Examines how environmental problems affect people, communities and societies differentially and how marginalized communities and people often bear the brunt of environmental costs, while contributing little to their creation. It uses readings and case studies from across the globe to address the production of environmental injustice and the struggle for environmental justice.

**Prerequisite:** 10.0 credits
**Recommended Preparation:** 1.0 credit in Geography (SOC SCI/BR=3)
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)

### GGR420H1 - Critical Development Geography

**Hours:** 24L

Examines the politics and processes shaping economic globalization and international development. The course will review a range of critical approaches to development, the historical geography of uneven development, and some emerging approaches to critical development studies. The course focuses on recent scholarly discussions about how to define international development and pays particular attention to the relationships between migration and development in theory and practice. It takes seriously the politics of difference (race, ethnicity, class, gender, nationality and sexuality) and inequality in the critical study of international development research and practice.

**Prerequisite:** 10.0 credits
**Recommended Preparation:** GGR112H1/GGR124H1, GGR320H1
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)

### GGR421H1 - Histories of Geographical Thought

**Hours:** 24S

The history of geography as an intellectual subject, focusing primarily on the modern period, and on the genealogies of central concepts. Disciplinary developments will be situated next to broader contexts, including imperialism and militarism, the relationship between culture and nature, and the shifting social role of the academy.

**Prerequisite:** 10.0 credits
**Recommended Preparation:** 2.0 credits in Geography (HUM/BR=1 or SOC SCI/BR=3)
**Distribution Requirements:** Humanities
**Breadth Requirements:** Society and its Institutions (3)
GGR424H1 - Transportation Geography and Planning

Previous Course Number: GGR324H1
Hours: 24L

Introductory overview of major issues in interurban and intraurban transportation at the local, national and international scale. Topics include urban transportation, land use patterns and the environment, causes of and cures for congestion, public transit, infrastructure finance, and transport planning and policy setting.

Prerequisite: 10.0 credits including one of GGR124H1/GGR220H1/GGR221H1
Exclusion: GGR324H1, CITC18H3
Recommended Preparation: GGR270H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR428H1 - Alternative Economies: Another Economy is Possible

Hours: 24S

Between neoliberal capitalism and state socialism are many innovative enterprise models to empower people and protect the planet. This course compares the range of such enterprise models across the three factors of production – land, labour, and capital – from community companies to cooperatives, peer-to-peer non-profit technologies, credit unions, community land trusts and beyond. Planning/policy’s role in their development in different spaces and places, both urban and rural, is evaluated. Relevant multi-disciplinary and geographical conceptual frameworks -- alternative, diverse, and community economies; the commons/commoning; community control; economic democracy; social and solidarity economies; and feminist and BIPOC economic frameworks -- are also compared.

Prerequisite: 10.0 credits
Recommended Preparation: Two of: GGR124H1, GGR221H1, GGR324H1, GGR328H1, GGR339H1, GGR357H1, GGR359H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR429H1 - Innovation and Governance

Previous Course Number: POL408H1
Hours: 24S

The course focuses on a broad range of topics related to innovation and governance, such as (i) technological change and its social and economic consequences, (ii) the spatial effects which result from this, and (iii) the necessities for economic policies at different territorial levels. Since international competitiveness of industrialized economies cannot be based on cost advantages alone, future growth in the knowledge-based economy will be increasingly associated with capabilities related to creativity, knowledge generation and innovation. As a consequence, questions regarding the performance in innovation and effectiveness of policy support become decisive at the firm level, regional level and national level. The first part of the course deals with conceptual foundations of innovation processes, such as evolutionary and institutional views of innovation. In the second part, national configurations of innovation processes are investigated. The third part deals with innovation at the subnational level, focusing on regional clustering, institution building, multilevel governance, and regionalized innovation systems.

Prerequisite: 10.0 credits
Exclusion: POL408H1
Recommended Preparation: One of GGR221H1, GGR251H1, GGR324H1, GGR326H1, GGR328H1, GGR374H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR430H1 - Geographies of Markets

Hours: 36S

Focuses on actually-existing markets and their geographically-mediated formation and assemblage. Explores how markets are produced, stabilized, reshaped and fall apart at multiple geographic scales. We examine issues such as the debates on states versus markets, embeddedness of markets, neoliberalism and moral justification of markets, varieties of capitalism, regionally variegated capitalism, post-socialist market transitions, and the dynamic evolution of market institutions and economic landscapes.

Prerequisite: 10.0 credits including at least 1.0 credit in 300+ level Geography (SOC SCI/BR=3)
Exclusion: GGR400H1 (2013-14)
Recommended Preparation: GGR220H1/GGR221H1, GGR326H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

GGR431H1 - Regional Dynamics

Hours: 24L

Economic activity, and related indices of socioeconomic well-being and human capital, have always tended to concentrate in space, leaving specific regions to be
Examines concepts of resilience as a way of building the capacity of communities to (a) respond to predicted disruptions/shocks associated with climate change, global pandemics, anticipated disruptions in global food supply, energy insecurity, and environmental degradation; and (b) nurture the development of alternative spaces that support the emergence of more life-sustaining structures and practices. Includes explicit attention to equity and public health, and explores issues such as: participatory governance of social-ecological systems, the nature of social change, complexity science, the role of social movements, indigenous and political ecology perspectives.

**Prerequisite:** 10.0 credits  
**Exclusion:** GGR400H1 (2011-12)  
**Recommended Preparation:** 1.0 credit in Geography  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### GGR438H1 - Environment and Development

**Hours:** 36S

Examines the implications of development – as an economic and social project – for how the environment is used, by whom, and to what ends. Draws on literatures in political ecology and critical development geography. Topics include: interpretations of scarcity and degradation, questions of consumption, and the greening of development. Examines expansion of and struggles over new forms of green infrastructure in urban and rural settings.

**Prerequisite:** 10.0 credits  
**Recommended Preparation:** 1.0 credit in Geography  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### GGR433H1 - Built Environment and Health

**Hours:** 36S

Linking across fields that include public health, geography and planning, this course examines the growing evidence and ways in which human health is affected by the design and development of the built environment in which we live, work and play. The course considers how various planning and development decisions impact population and individual health, particularly in relation to chronic diseases, injuries, and mental health. Potential field trip, transportation cost: $20.

**Prerequisite:** 10.0 credits including GGR221H1/ GGR251H1  
**Recommended Preparation:** GGR326H1, GGR270H1. A statistics course (GGR270H1 or other) will be an asset.  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### JIG440H1 - Indigenous Geographies

**Previous Course Number:** GGR400H1 in 20199  
**Hours:** 36S

This course draws on theoretical texts of Indigeneity, with a primary focus on Indigenous spaces in the Americas. Course participants will examine how core geographic concepts such as place, territory, land, movement and the scale of the body are sites of colonial dispossession and violence, as well as sites for decolonial and liberatory thought and practice. We will primarily engage with Indigenous-led scholarship within Geography and Indigenous Studies, and creative forms of knowledge production generated across Indigenous communities.

**Prerequisite:** 10.0 credits including one of INS200H1, INS201Y1, INS250H1, GGR107H1, GGR124H1.
GGR240H1, GGR246H1, GGR254H1

Exclusion: GGR400H1 (Special Topics in Geography I: Indigenous Geographies), offered in Fall 2019

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

GGR240H1

Entanglements of Power: Race, Sexuality and the City, offered in Fall 2018

Recommended Preparation: 2.0 credits in GGR

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

GGR452H1 - Space, Power, Geography: Understanding Spatiality

Hours: 24S

Our understanding of space and power has shifted radically in the past half century. Space no longer implies only regions, nations or territory; power is not simply a question of domination, control, or forms of political representation. Space and power are intricately related. This course explores a shift in our ways of thinking about space and power, focusing specifically on the works of Michel Foucault and Gilles Deleuze. Through the works of Deleuze and Foucault, students are introduced to a variety of ways that space and power are organized and contested. The course begins with the maps in our heads: what kinds of spatial systems organize dominant world-views, how have these changed over time? What spatial metaphors do we use to think about power – as hidden and operating at a depth, or as a surface effect? How does the social organization of space figure in the development of different technologies and techniques of power? How do technologies of power become organized, serialized, dispersed, transformed and contested?

Prerequisite: 10.0 credits including at least one (or an equivalent) of GGR327H1, GGR328H1, GGR339H1, GGR352H1, GGR360H1, GGR363H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

GGR454H1

GGR456H1 - Entanglements of Power: Race, Sexuality and the City

Hours: 24S

This course investigates the city as a space sculpted by particular configurations and relations of power, and productive of those forms. It considers shifting urban geographies of identity, economy and desire with a focus on race and racism, settler colonialism, empire, the laboring body, sexuality, and sexual identity. Course participants will engage a series of case studies of particular urban spaces and struggles, drawing on conceptual support from scholarship in urban geography, anti-colonial thought, political economy, black studies, feminist and queer theory, Indigenous and settler colonial studies, as well as literature and other artistic work.

Prerequisite: 10.0 credits

Exclusion: GGR400H1 (Special Topics in Geography I: Indigenous Geographies), offered in Fall 2019

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

GGR457H1 - The Post-War Suburbs

Hours: 24L

Investigates post-war suburbs, beginning with an examination of their competing contemporary meanings. It considers images of prosperous private enclaves, of declining and difficult to access places, of racialized and segregated areas, of banality and homogeneity, of precarity and polarization, and of creative social struggles. It assesses these different visions through an analysis of urban growth and change since WWII. The course will focus on themes of public and private space; class, race and segregation; gender and suburban space; immigration; urban sprawl, and the changing social and economic geography of the suburbs. It examines North American areas, with examples from Australia and Europe.

Prerequisite: 10.0 credits

Distribution Requirements: Humanities, Social Science

Breadth Requirements: Society and its Institutions (3)

GGR458H1 - Selected Topics in Urban Geography

Hours: 24L

This course focuses on a special topic in urban geography and covers it with more depth than would otherwise be the case in a survey-oriented class. The aim is to utilize this single topic as a vehicle to understanding how urban geographical ideas are produced more widely. Check the department website for the theme (updated each year).

Prerequisite: 10.0 credits

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

GGR460H1 - Global Cities, Urban Planning, Critical Theory

Previous Course Number: GGR400H1 (20181)

Hours: 36S

This seminar addresses the relationship between urbanization and global economic, political, cultural, social, demographic, technological and ecological dynamics. It does so with an emphasis on the contested
legacies of city planning, urban design, architecture and urban political activism, by drawing on historical studies of global cities as well as critical-theoretical perspectives on the ‘production of space’. While broaching the question what’s ‘production of space’ got to do with social justice, we explore—with reference to pioneering thinkers in the fields of planning, architecture and critical theory—such concepts as radical planning, the urban revolution and the right to the city.

**GGR481H1 - Field Course in Environmental Geography**

Introduction to field studies in environmental geography. The course may include individual assignments and group work. Field trips are concentrated during a one-week period in late August or early September. Some preparation during the preceding summer may be required. Periodic course meetings and shorter field trips continue, along with course work, during the Fall Term. Each student is required to pay the costs of their transportation and accommodation (field trip costs: $100). Students must register with the Department by April. Course may be limited by size. Not eligible for CR/NCR option.

**Prerequisite:** Permission of instructor

**Recommended Preparation:** 10.0 credits including 3.0 credits in Geography (SOC SCI/BR=3)

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

---

**GGR462H1 - GIS Research Project**

**Hours:** 24L

Students work in groups to develop their own research project and then acquire, organize and analyze geographic data to complete it. Emphasis is placed on research design, project management and the application of GIS concepts and skills learned in previous courses to a practical problem.

**Prerequisite:** GGR373H1

**Recommended Preparation:** 10.0 credits

**Distribution Requirements:** Science, Social Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

---

**GGR482H1 - Toronto Field Course**

Examines the production of urban landscapes, built environments and social spaces in Toronto and surrounding areas through in-depth case studies. Coverage will vary some depending on instructor. The course consists of local field trips and in-class seminars and lectures. Students must apply with the Department. Contact the Department in January for deadlines. Course is limited by size. Preference given to Geography SPE/MAJ/MIN. Applications open to all students. Not eligible for CR/NCR option. Field trip costs are normally low, but may go up to $150.

**Prerequisite:** 10.0 credits

**Recommended Preparation:** 2.0 GGR credits

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**GGR491Y1 - Research Project**

Specially designed for students wishing to gain experience in conducting research in their area of specialization. Of particular value for geographers interested in graduate study, or positions in government, planning and consulting firms where research skills may be an asset. Students select a research problem and complete a project under the supervision of a faculty member. Enrolment requires written permission from a faculty supervisor and Associate Chair, Undergraduate; early discussion with a likely supervisor is encouraged. Enrolment may be completed at any time up to September; open to students in a Specialist or Major Program sponsored by the Department of Geography. Not eligible for CR/NCR option.
**Prerequisite:** 10.0 credits
**Distribution Requirements:** Social Science

**GGR492Y1 - Senior Practicum**

Students design and implement an independent applied geography/planning/GIS project in consultation with an employer (paid or volunteer), who will act as their “client.” Enrolment requires written permission from a staff supervisor and Associate Chair, Undergraduate. Only open to students who have completed 10.0 credits and who are enrolled in a Specialist, Major or GIS minor program sponsored by the Department of Geography. Not eligible for CR/NCR option.

**Distribution Requirements:** Social Science

**GGR492H1 - Senior Practicum**

Students design and implement an independent applied geography/planning project in consultation with an employer (paid or volunteer), who will act as their “client.” Enrolment requires written permission from a staff supervisor and Associate Chair, Undergraduate. Only open to students who are enrolled in a Specialist or Major program sponsored by the Department of Geography. Not eligible for CR/NCR option.

**Distribution Requirements:** Social Science

**GGR493Y1 - Geography Professional Experience**

Undertake professional placement matching academic interests and career goals. Students meet regularly during the year in class to cover topics such as: reflective writing, project management, career planning, and the application of academic skills in professional contexts. Research project required that connects a topic related to placement with academic literatures. Normally, one day per week spent at placement site. For students in their final year of a Geography major or specialist program of study, or the GIS Minor. Satisfies program requirements based on placement. Space limited. Applications are reviewed in early spring. Not eligible for CR/NCR option.

**Prerequisite:** 14.5 credits and an application

**GGR496H1 - Independent Research**

Independent research extension to one of the courses already completed in Geographic Information Systems. Enrolment requires written permission from a faculty supervisor and Associate Chair, Undergraduate. Only open to students who are in Year 3 or higher and who are enrolled in the GIS program sponsored by the Department of Geography. Not eligible for CR/NCR option.

**Prerequisite:** 10.0 credits

**GGR497H1 - Independent Research**

Independent research extension to one of the courses already completed in Environmental Geography. Enrolment requires written permission from a faculty supervisor and Associate Chair, Undergraduate. Only open to students who are in Year 3 or higher and who are enrolled in a Specialist or Major program sponsored by the Department of Geography. Not eligible for CR/NCR option.

**Prerequisite:** 10.0 credits

**GGR498H1 - Independent Research**

Independent research extension to one of the courses already completed in Physical Geography. Enrolment requires written permission from a faculty supervisor and Associate Chair, Undergraduate. Only open to students in Year 3 or higher and who are enrolled in a Specialist or Major program sponsored by the Department of Geography. Not eligible for CR/NCR option.

**Prerequisite:** 10.0 credits

**GGR499H1 - Independent Research**

Independent research extension to one of the courses already completed in a social science or humanities branch of Geography. Enrolment requires written permission from a faculty supervisor and Associate Chair, Undergraduate. Only open to students in Year 3 or higher who are enrolled in a Specialist or Major program sponsored by the Department of Geography. Not eligible for CR/NCR option.

**Prerequisite:** 10.0 credits

National University of Singapore Courses

NUS250H0 - Cities in Transition

This module is concerned with the changing roles of cities in an age of globalization. The first part examines cities as part of urban networks at the national, regional and international levels, and focuses on the implications arising from the rise of mega-cities and global cities. The second half of the module investigates the challenges facing cities on the ground, including issues of the revitalization and re-imaging of city cores, changing retail landscapes, and the impact of telecommunications on the location of urban activities and peoples’ mobility. The module is targeted at students with an interest in urban issues. (Co-listed as GE2204 National University of Singapore)

Recommended Preparation: 4.0 credits
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NUS251H0 - Southeast Asia

This module deals with a multi-disciplinary approach to understanding the regional geography of Southeast Asia. Students are expected not only to critically analyze their readings but also to be able to synthesize materials to provide a holistic understanding of the region. Specifically, it looks at the region through historical, cultural, social and political-economic perspectives. The module also discusses sustainable development issues. This is a module that is open to all students in the Faculty of Arts & Social Sciences, Engineering, Law, Science, School of Design & Environment and School of Business. (Co-listed as GE2226 National University of Singapore)

Exclusion: GGR342H1
Recommended Preparation: 4.0 credits
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NUS252H0 - Rice, Spice & Trees: Peasants in Southeast Asia

Southeast Asia has been, and still is comprised of predominantly rural and agrarian societies. This module seeks to develop an understanding of peasant life in the region. Topics to be studied include the village as a construct, the “moral economy” of the peasantry, land and man relations, economic output, and peasant beliefs, consciousness, and cultural expressions. With the peasants’ increasing involvement in the world market and the nation-state, it is also important to consider the penetration of capitalism into the rural economy, as well as the demand for supra-village identification and loyalties. Notions of “development” as they pertain to the peasants, and as postulated by the state, non-governmental organizations and the peasants themselves are also discussed. (Co-listed as SE3213 National University of Singapore)

Recommended Preparation: 4.0 credits
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NUS253H0 - Economy and Space

This module examines relationships between economy and space through a focus on ‘development’. Through interrogating theories, strategies and trajectories of ‘development’, students will develop an understanding of the past and contemporary global political economy and its geographies. The course will emphasize the geopolitical and cultural backdrops to ‘development’ and attendant economic geographies amidst debates about ‘globalization’, international trade and investment. (Co-listed as GE2202 National University of Singapore)

Recommended Preparation: 4.0 credits
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NUS254H0 - Geographies of Social Life

This module explores debates in geography about social issues. It emphasizes the relationship between social identity and social space, and how different places reflect and shape diverse ways of life. The module examines the role of space in the interplay of different social groups (e.g. ethnic groups, men/women), and in relation to different aspects of daily life (e.g. housing, leisure). Its emphasis, however, is on how to think about these issues in different scales/contexts (streets, public spaces, global cities). The course is intended for geography majors, and students throughout NUS with an interest in the relationship between society and space. (Co-listed as SE2224 National University of Singapore)

Recommended Preparation: 4.0 credits
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NUS255H0 - Cities and Urban Life in Southeast Asia

Are Southeast Asian urban models unique from those of the West? This module uses historical and emerging developments to re-evaluate debates on Southeast Asian urbanization. The particularities of Southeast Asian
Urbanization will be examined both in terms of its intertwined history with the rest of the world as well as the politics of time and space. The module aims at developing a critical understanding of the interaction between historical, political-economic and cultural processes that constitute urbanization in Southeast Asia. (Co-listed as SE2212 National University of Singapore)

**Recommended Preparation:** 4.0 credits  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### NUS256H0 - Changing Landscape of Singapore

This module attempts to understand the rationale of changes in Singapore’s urban landscape. It places these changes within a framework that considers Singapore’s efforts to globalize and examines how policies are formulated with the idea of sustaining an economy that has integral links sub-regionally with Southeast Asia while developing new spatial linkages that will strengthen its position in the global network. Emphasis is also given to recent discussions about how diversity and difference in the perception and use of space pose a challenge to the utilitarian and functional definition adopted by the state. (Co-listed as GEK2001/SSA2202 National University of Singapore)

**Recommended Preparation:** 4.0 credits  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### NUS350H0 - Natural Resources: Policy and Practice

This module examines important geographical, ecological and political concepts and approaches to natural resources management. In particular, we focus on ownership regimes, access, exploitation and conservation in different social, economic and cultural contexts. Detailed cases of fisheries, forestry, freshwater and agriculture conflicts and problems are discussed. (Co-listed as GE3210 National University of Singapore)

**Recommended Preparation:** 4.0 credits  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### NUS351Y0 - Field Studies in Geography: SE Asia

The module exposes students to different geographical methods, both human and physical, and as such it is an ideal preparation for any student wishing to undertake further primary research at higher levels in geography, and other social science disciplines. After a series of lectures/seminars on fieldwork methods, fieldwork ethics, and health and safety issues in the field (which may include some basic introductory language classes), students then undertake a 2 – 5 week period of field study overseas, depending on logistical and other constraints. Previous field studies have been for periods of 4-5 weeks overseas in Thailand and Malaysia. While overseas, students undergo orientation workshops, meet peers in host universities, and visit potential field sites before conducting an intensive period of fieldwork in small groups of 3-5 students. (Co-listed as GE3230A at the National University of Singapore)

**Recommended Preparation:** 4.0 credits  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### NUS352H0 - East Asia

This module examines aspects of the geography of East Asia, which includes China, Hong Kong, Taiwan, Japan and Korea. Emphasis is placed on the developmental processes and the underlying physical, political, socio-cultural and economic factors that account for their development. It evaluates various discourses on East Asian development and also assesses the impact of East Asian development on regional conflicts, patterns of social change, urbanization and sub-regional integration. (Co-listed as GE3209 at the National University of Singapore)

**Recommended Preparation:** 4.0 credits  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### NUS353H0 - Globalization and Asian Cities

This module aims to provide students with an in-depth understanding of the social, political, and economic changes at various geographical scales with respect to globalization. More specifically, the module focuses on developing understandings of the complex forces driving globalization and the related urban and regional changes and the relationship between globalization and regionalization. This module is not just for geography students, but for all students who are interested in the urban and regional changes in the Asia-Pacific with respect to globalization and regionalization and the driving forces of the changes. (Co-listed as GE3219 at the National University of Singapore)

**Recommended Preparation:** 4.0 credits  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)
This module is concerned with understanding and assessing the development experiences of the South Asian countries. Students are expected to grapple with concrete case studies of development programs in their work. The coursework covers issues pertaining to rural, agricultural, urban, industrial and human development, as well as their impact upon people and the environment. Particular attention is given to the situation of the poor and the weak, including disadvantaged children, women, and ethnic minorities. (Co-listed as SN3232 at the National University of Singapore)

**Introduction**

German-speaking countries enjoy a long tradition at the cultural and political core of Europe. During the last two hundred years their importance has steadily increased, and with the recent developments in Eastern Europe their influence seems certain to expand even more.

The importance of the German language has grown correspondingly: it is the second foreign language after English in the countries of central and Eastern Europe, and its use is spreading within the European Community. Learning German opens the door to many fields of intellectual, technical and politico-economic endeavor. German scholars have been leaders in philosophy, the sciences, history, archaeology, sociology and political science. German literature is equally distinguished: writers like Goethe, Kafka, Rilke, Brecht, Mann, Wolf, Grass, Jelinek, Özdamar, etc., have dealt with the widest possible range of human problems and concerns, and have been recognized worldwide.

The Department of Germanic Languages and Literatures offers courses on literature from the Middle Ages to the present, so that the student may acquire an overview of this significant element of German life and culture. We offer language courses from beginning and intermediate to advanced levels, with practice in reading, writing, comprehending and speaking German, as well as stylistics, linguistics, and the specialized vocabulary and concepts of business. Language and literature instruction is integrated as far as possible, with the aim of teaching students advanced critical literacy in German. The department offers a minor in Yiddish, with instruction offered from beginning and intermediate to advanced levels. German combines well with other modern languages and literatures, and double-majors are encouraged. Students in a variety of programs, such as Cinema Studies, European Studies, Literary Studies, Drama, Music and others, will benefit from courses in German language, literature and culture. The Department supports opportunities for students to study and work in Germany, by encouraging participation in programs established by the German government, by Canadian universities, and by our own Arts and Science Faculty's Study Elsewhere Program. One of these is the exchange program under which Toronto students can spend the academic year at the Humboldt University in Berlin.

A knowledge of German is a virtual necessity for specialists in many disciplines; it is also very useful in certain career areas (e.g., the foreign service, interpretation and translation, librarianship, business and commerce, music, tourism, and of course teaching). The successful completion of a four-year program, including seven approved courses in German, may entitle the student to enter the M.A. or Ph.D. program in the Graduate Division of the Department.

Students entering with some previous knowledge of German are required to contact the department to write an initial assessment test (placement test) and will then be advised to take courses at the appropriate level. Please check the department's website at german.utoronto.ca for more information.

Information on studies in German Language and/or Literature can be obtained from the Associate Chair for Undergraduate Studies at german.undergrad@utoronto.ca.

**Faculty of Arts & Science Language Citation**

The Department of Germanic Languages and Literatures participates in the Faculty of Arts & Science’s Language Citation initiative for German. The study of German is a demanding and intellectually rewarding educational experience, providing students with excellent resources for understanding the culture of the German speaking world. German is now the second foreign language after English in the countries of central and Eastern Europe, and its use is spreading within the European Community. Learning German opens the door to many intellectual, technical, political, and economic fields. Successful study of German demonstrates intelligence, discipline, analytical sophistication, and an excellent memory. The study of any foreign language provides invaluable insights into the varieties of human culture and expression.

The Language Citation recognizes a significant level of achievement in language study with a high level of academic success. The Citation in German is available to students who complete GER100Y1 (or the equivalent prerequisite training) and earn a grade of at least B- in GER200Y1 and GER300Y1.

Students should note that, as explained in the About Programs of Study section of this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.
1. All students with previous knowledge of the German language, as well as students returning from extended stays in German-speaking countries, are REQUIRED to take a placement test offered at the Department.

2. The Department reserves the right to place students in the language course appropriate to their level of language skill.

3. More detailed course descriptions and reading lists for the various courses are available from the instructor.

4. Courses that indicate "(E)" in the title are taught in English.

This course taught in English is intended for students who are unfamiliar with German culture. It examines historical, political and cultural developments in Germany from about 1871 to the present focusing on literary and non-literary texts. (Note: This course is required for the major and specialist program; it should be taken within the first two years.)

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER194H1 - Our Vampires, Ourselves (E)

Hours: 24S

Vampires are among the most fascinating figures of popular culture. Since Bram Stoker's Dracula (1897) – and, in fact, well before that – they have been haunting the human imagination in various shapes and forms. This course examines the figure of the vampire as a potent cultural metaphor in the German context and beyond, showing how every age embraces the vampires it needs and gets the vampires it deserves. The goal is to teach students to reflect critically and independently on issues of self and society and to develop a structured approach to critical thinking in general. All readings and class discussions will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

GER195H1 - Cities, Real and Imagined (E)

Hours: 24S

Cities have been described as places of desire and places of fear. They pulse with life, bringing together people from different class, gender, and ethnic backgrounds, simultaneously giving rise to a sense of freedom and oppression, a sense of belonging and alienation. This course will explore the city as a physical reality that shapes our lives, but is also a projection of our deepest...
imaginings. Through readings of philosophical and sociological texts by influential theorists of the city, we will consider various ancient and modern conceptions of urban space and subjectivity. Alongside these theoretical readings, we will also examine literary and filmic representations of the city as a space of desire, memory and power. All readings and class discussions are in English. Restricted to first-year students. Not eligible for CR/NCR option.

**GER196H1 - "Es war einmal auf Deutsch" - Learning German with Fairy Tales**  
**Hours:** 24S

Grimm’s Fairy Tales – we all know and love them. But what do we *really* know? Which versions are we familiar with? Most likely not the ones by the Brothers Grimm. And certainly not in German! This course is a journey into the mythical German Schwarzwald, a place of wolves and witches, the realm of the fantastic. It is not a traditional language course, as we won’t be cramming grammar and vocabulary, at least not excessively. Rather, we will learn German playfully by reading, analyzing and acting out original folk tales, their Romantic adaptations and modern retellings. In the process we will enrich our understanding of German language and culture. Please note that basic knowledge of German is required to participate in this course (i.e. at least one year of solid high school instruction). Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** One year of German instruction, or equivalent  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**GER197H1 - Poets and Power: Art under the Nazis (E)**  
**Hours:** 24S

Did you know that Hitler was a failed artist? Goebbels a poet? Göring a collector of art? That there was an orchestra in Auschwitz?

In this course we will examine the ways in which politics and aesthetics intertwined in Nazism: the fascist cult of beauty; the theatrics of political propaganda; anti-Semitic entertainment films; and the eroticization of the Führer-figure. We will investigate this marriage of beauty and violence, and ask ourselves: What made the “Third Reich” so attractive to so many? Beginning with the great aesthetic movements from the pre-Nazi era, we will analyze Hitler’s 1937 ban on “degenerate,” modern art, as well as his return to Greek and Roman images of beauty. Throughout the course, we will consider some of the high points of German culture – in philosophy, music, and literature – and ask: How did a society that produced such works of genius also create Nazism and the Holocaust? Restricted to first-year students. Not eligible for CR/NCR option.

**Breadth Requirements:** Creative and Cultural Representations (1)

**GER198H1 - Technology and the Human in German Literature and Thought (E)**  
**Hours:** 24S

Technology has changed our lives, and scientific knowledge has enhanced human capacities. At the same time, though, this development is also experienced as a threat. Killing missiles, controlling 'Big Brothers,' and monstrous creatures are often considered the flip-side of technological advancement. This course asks: What is the relationship between technology and the "human"? Can there be progress of technology without a regress of humanity? Or is technology liberating us from the bonds of nature? We will discuss possible answers to these questions by looking at key texts in German literature, philosophy, and cultural history from the eighteenth century to Post-Modernity. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**GER199H1 - The Pleasure of Reading: Reading as Self-Emancipation in the German Literary Tradition (E)**  
**Hours:** 24S

In this course we read some of the most enjoyable plots and stories in German Literature and examine how the pleasure of reading sets readers free to re-imagine themselves and the world released from everyday pressures and the repressive weight of the status quo. Readings are all in English translation and include texts by Lessing, Goethe, Schiller, Kleist, Keller, Heine and Kafka. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

GER251H1 - German and European Cinema (E)

Hours: 24P/24S

This course examines German cinema against the backdrop of European film history. European films share common references points anchored in the cataclysms of two world wars, and have also negotiated analogous postwar transformations in family life, urbanization, the regional and the national, cultural identity, labour relations, post-socialist societies, and state security. A comparative approach enables examination of what binds German cinema to European cinema – shared histories and political concerns—as well as what is nationally unique and distinctive. By matching select films with readings from social theory, cultural studies, and film studies, we will compare and contrast these socio-historical concerns while also attending to the medium specificities of film style, aesthetics, and narrative form.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

GER260Y1 - Elementary Yiddish

Hours: 72P

**GER391H1 - iPRAKTIKUM Experiential Learning and Internationalization Internship**

**Hours:** 24P

The course provides curricular support for a variety of work and community-engaged, experiential learning placements in the GTA and in German-speaking countries. The placements are designed to deepen linguistic, cultural, and analytical skills acquired in the classroom in work-related environments, create an awareness of the translatability of academic knowledge to other contexts, promote global competency, and foster links to the community. The number of weekly hours spent in the field, the scope of learning objectives, and the nature of reflective activities are determined on an individual basis in consultation with the host institution, the German Department, and other units in which the student is pursuing a program degree (as required). In addition to successfully achieving the formulated learning goals, students must complete assignments such as eJournals and research papers as well as participate in peer-to-peer reporting and post-placement interviews.

**Prerequisite:** GER100Y1 and GER200Y1 or consent of department (equivalent proficiency level B1)

**Recommended Preparation:** 3.0 credits in GER courses

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

Introduction

Historians study the past to understand it on its own terms, to gain insight into how our world has developed, and in order to influence the present. The study of history covers a wide and diverse range of topics, from the history of aboriginal societies, conquistadors, ethnicity, fascism, labour, psychiatry, patterns of settlement and migration, politics, the Renaissance, revolution, to the automobile, slavery, international relations, trade unions, women's studies, and more.

The study of history is at the core of any liberal arts education. In order to make sense of political, social, economic, and cultural development, it is essential to understand historical change and continuities. History is also integral to most area studies (East Asian Studies, Near and Middle Eastern Civilizations, Canadian or American Studies, etc.) and is a crucial part of the study of political science, economics, sociology, international relations, religion, art history, English—nearly every discipline in the humanities and social sciences. History as a discipline partakes of both the humanities and social sciences: it is a social science because it studies societies and the processes of change, but the method and analytical approach are those of the humanities. Close analysis of problems, critical examination of evidence, and persuasive oral and written communication are all hallmarks of historical inquiry.

History graduates will gain both a broad overview of the contours of history and in-depth knowledge of one or more specific regions, time periods, or thematic specializations. They will understand how social processes, political ideologies, economic trends, and environmental changes have intersected with individual and collective human actions to shape historical change and, ultimately, the world we live in today. History graduates will comprehend how history is written, including the skills and methods of historical research, the use and interpretation of textual and other evidence, and the choices involved in various theoretical and analytical frameworks. They will be able to critically read and assimilate large amounts of information, weigh evidence, draw well-informed conclusions, and present cogent, analytical arguments.

The analytical and communication skills one develops by studying history are critical to a great variety of careers. History graduates put their training directly to use in such fields as law, politics, business, government service, museums, libraries and archives, documentary filmmaking, journalism, international relations, urban planning, teaching, and many other areas. With emphasis on how to analyze issues, read critically, do productive research, delineate a case, and present evidence in...
support of that case, studying history equips one with both the skills and knowledge for an ever-changing workplace and society.

Curriculum

The History curriculum is designed to give students a solid grounding in a variety of interpretive and methodological approaches, while allowing them a great deal of flexibility to follow their own particular interests. Breadth requirements (detailed below) ensure that students achieve chronological depth and geographic range. There are courses at most levels in American, Asian, African, Latin American and Caribbean, British, Canadian, European, Russian and East European history. Thematic clusters such as medieval history, gender, international relations, and colonialism/post-colonialism help students pursue areas of particular interest.

The 100-level courses are thematically-based and introduce students to the craft and tools of historical research and writing. The 200-level courses are broad chronological surveys of countries, regions, or time periods. They are open to first-year students and have no prerequisites. The 300-level courses enable students to pursue topics in greater depth and methodological sophistication. They are not open to first-year students and frequently have prerequisites. The 400-level courses represent the culmination of an undergraduate’s study of history. They are taught as small-group seminars in which students draw upon the skills they have developed through the course of their History program in research, analysis, and oral and written presentation.

More detailed information concerning the department, history programs and particular courses can be found on our website: www.history.utoronto.ca. There is a History Students’ Association in the Department and there is student participation in the Department meetings and major standing committees.

History Programs

History Specialist (Arts Program) - ASSPE0652

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade
A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- 2.0 HIS credits, including 1.0 credit at the 100-level (non-FYF) or one 0.5 credit at the 200-level + one 0.5 credit from the following First-Year Foundations (FYF) courses: HIS192H1, HIS194H1, HIS195H1, HIS196H1, HIS197H1, HIS198H1, HIS199H1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 70% in each course will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Completion Requirements:

The Specialist program gives students in-depth training in historical research, analysis, and writing for future professional use or graduate study. To tailor the program to your needs, in your third year you have a choice between two pathways: a higher level course-work option in order to further the development of excellent skills via a wider variety of courses or a thesis option where you will be able to do the same while also concentrating on a specific research topic.

(10.0 credits, of which only 1.0 credit at the 100-level may be used to fulfill program requirements)

First year: 1.0 HIS credit at the 100-level.

Note 1: Students may also take 200-level HIS courses in their first year.

Higher Years: Additional HIS courses to a total of 10.0 credits overall, meeting the following requirements:

1. Geographic Distribution (200+ level):

   a) 2.0 credits in Africa/Asia/Middle East with at least one 0.5 credit in each region
   b) 1.0 credit in Canada/US/Latin America/The Caribbean
   c) 1.0 credit in Europe

2. Temporal Requirement: 1.0 credit in Pre-1800 history course(s) listed below.

   Note 2: HIS courses listed with (.50) indicate that they fulfill half of the Temporal Requirement.
3. Levels: At least 5.0 credits at the 300+ level, including 1.5 credits at the 400-level to be fulfilled in one of the following ways:

Pathways:

a) Thesis Option: HIS475H1 and HIS476H1 taken in that order (see Note 3)

b) Coursework option: 1.0 credit of Senior (300 or 400-level) Methodology course(s), listed below

Note 3: Students interested in the Thesis Option should contact the Undergraduate Chair for advice about the pathway, thesis topics, and the selection of an appropriate faculty advisor.

Courses in other departments:

a) Students may take up to 1.0 credit from the Equivalent Courses list below. These courses may not be used to fulfill the 100-level, Geographic, or Temporal requirements.

**Focus in Law and History (Specialist) - ASFOC0652A**

The Focus in Law and History gives students the critical skill-set to interrogate the ‘force of law’, not only in the sense of law as enforced, but also as a vehicle of cultural, social, and economic knowledge. Importantly, it will ask students to interrogate assumptions of what counts as law across time and space. At the core of this Focus to the Major are fundamental questions of both law and society: Who has law? What does (or should) it look like? Who decides? What sorts of critical histories can be written from and about legal archives that span time, space, and language tradition?

**Enrolment Requirements:**

Enrolment in the History Specialist is required.

**Completion Requirements:**

3.0 credits

2. Law and History Focus Enrichment: 2.5 credits from the following list, including at least 1.0 credit at the 300+ level.

HIS101Y1, HIS230H1, HIS231H1, HIS283Y1, HIS303H1, HIS308H1, HIS357Y1, HIS379H1, HIS390H1, HIS391Y1, HIS397H1, HIS419H1, HIS424H1, HIS438H1, HIS443H1, HIS470H1.
HIS493H1, JHN323H1

Some offerings of HIS389H1, HIS466H1 and HIS496H1 may also count towards this focus. Check with the department for current offerings.

Up to a 0.5 credit from non-HIS courses may be substituted for requirement 2, with permission of the department. Substitutions will be reviewed based on a copy of the course syllabus.

History Major (Arts Program) - ASMAJ0652

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Focus in Law and History
(Major) - ASFOC0652B

The Focus in Law and History gives students the critical skill-set to interrogate the ‘force of law’, not only in the sense of law as enforced, but also as a vehicle of cultural, social, and economic knowledge. Importantly, it will ask
students to interrogate assumptions of what counts as law across time and space. At the core of this Focus to the Major are fundamental questions of both law and society: Who has law? What does (or should) it look like? Who decides? What sorts of critical histories can be written from and about legal archives that span time, space, and language tradition?

Enrolment Requirements:

Enrolment in the History Major is required.

Completion Requirements:

3.0 credits

2. Law and History Focus Enrichment: 2.5 credits from the following list, including at least 1.0 credit at the 300+ level.

Combined Degree Program (CDP) offered with Victoria College and Ontario Institute for Studies in Education (OISE)

- Combined Degree Program in HBA/HBSc and Master of Teaching (MT)

Students enrolled in the Minor in Education and Society and Major in History may apply for this Combined Degree Program. For details about application and program requirements, see the Combined Degree Programs section.
Regarding History Courses

Note: Not all of these courses are taught every year. Please check the Arts & Science timetable or the HIS Department website for the list of courses offered in 2021-2022.

First-Year Foundation Seminars

First-Year Foundation Seminars are open only to newly-admitted, Faculty of Arts & Science students (3.5 credits or less). They are 1.0 credit or 0.5 credit courses that focus on discussion of issues, questions and controversies surrounding a particular discipline (or several disciplines) in a small-group setting that encourages the development of critical thinking, writing skills, oral presentation and research methods. FYF seminars are as rigorous and demanding as any other first-year course and require in addition the acquisition of those skills expected of successful undergraduate students. With a maximum enrolment of 30 students each, they are an ideal way to have an enjoyable and challenging small-class experience in your first year. Details can be found at www.artsci.utoronto.ca/future/academic-

**HIS110Y1 - History of the Indian Ocean World**

**Hours: 48L/20T**

This course introduces you to the connected and interdependent world people who lived between the present day cities of Dakar, in West Africa, and Jakarta, in Indonesia, from about 1000 to the present. We explore in this class the three "C"s which have linked human experience in Africa and Asia via routes which connected the Indian Ocean World: Connectedness, Contingency, and Cosmopolitanism. We study how people who lived more than a thousand years before our time transported ideas, products, and scripts by land and sea via routes that connected large parts of Africa, Central & South Asia, and East and Southeast Asia, and their histories. The land and sea routes connected these communities and the cosmopolitan outlook of the hosts provided the contingent conditions for a Buddhist monks to travel from all over China to Southern and Southeast Asia; Muslim scholars to travel from West Africa to Indonesia; and merchants and writers to move within these worlds. Human migration, economic trade, and religious conversion had linked the lands and the seas, making it possible for our imams, merchants, monks, and servants to traverse these territories, across the Africa and Asia. This vibrant and
Wealthy world of African and Asian thinkers, merchants, leaders, and communities became the envy of the world, and as late as the seventeenth century, these crazy rich Africans and Asians dominated the world as it was known. We'll see how history is contingent—and that human migration, economic exploitation, lack of reciprocity, and legacies of European colonial racism have disrupted the cosmopolitan worlds of the Indian Ocean. The world is different today, but more than three quarters of the human population still live in Africa and Asia—see the richness of their worlds as it was for thousands of years, and what will be left for the people of this world as climate change makes the seas rise.

Exclusion: HIS100Y1, HIS101Y1, HIS102Y1, HIS103Y1, HIS106Y1, HIS107Y1, HIS108Y1, HIS109Y1

HIS111H1 - Fake S*** in History: Misinformation, Unreal Authentics, Hidden Figures, and the Telling of Histories

In the 21st century, the idea of fake news and its rapid circulation via social media shapes how humans perceive events around them. The issue of what counts as authentic, or “fake,” is not simply a recent phenomenon, but is central to the idea of history itself. What materials get saved, whose stories get told, and why are some stories represented as more important than others? By examining specific examples of “misinformation”—propaganda, suppression of information, and hidden actors—in a global context, this course explores how historical narrative and public memory have been shaped by the collection and valuation of texts, experiences, and material objects, all themes central to the craft of history.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS112H1 - Ten Events that Changed the World

Hours: 12L/10T

Ever wonder how and why the founding of Islam in 610, the Mongol conquests of Eurasia in the 13th century, the Trans-Atlantic Slave trade, the Haitian Revolution (1791-1804), or the detonation of the atomic bombs on Hiroshima and Nagasaki changed the world? This course ten events changed the world and continue to have ramifications today. Experts will give guest lectures on the important “events,” while students will learn how historians work to understand the significance of these moments, human agency, and the idea of an “event,” itself.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS191H1 - Pandemics and Human History

Hours: 24S

We have all just lived through a major historical disruption caused by CoViD-19. In this course, you will be invited to use your experience of the pandemic as a tool for understanding other times, other places, and the study of history itself. We will study plagues and diseases from the ancient world to the Twentieth Century, and introduce methods from social, cultural, and economic history, as well as concepts from the histories of science and medicine.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS192H1 - A History of Queer Asia

Hours: 24L

A first-year seminar on the history of queerness, in all its complexity and diversity, in the no less complex and diverse settings of East, South, and Southeast Asia. Our journey will encompass empires and Indigenous peoples, rulers and rebels, and range from early recorded history down to the twentieth century. Focus will be placed on primary sources and introducing students to the evolving definitions of “queerness” itself. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HIS193H1 - Calls to Action: The TRC and Residential Schools in Canadian History

Hours: 24S

The last Indian Residential School in Canada closed in 1996. For more than a century and half before that, the Canadian state supported church-run residential schools intended to take Indigenous children away from their families, cultures, languages and traditions. Over 150,000 children passed through the doors of these different schools that operated from coast to coast. Using the formal report of the Truth and Reconciliation Commission as a central text, this course explores that history and the ongoing legacy of residential schools in Canada while introducing first year students to historical research
methods and sources. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**HIS194H1 - Power, Resistance, and the Graphic Novel**

**Hours:** 24S

This course will look broadly at the question of power and resistance in the Americas (Canada, the United States, and Latin America) through the prism of graphic novels. Each week we will read a graphic novel related to important historical moments or events, drawing on scholarly articles to help us contextualize the novel. We will discuss the medium of graphic novels, their history and place in the broader culture, as well as how they might help or hinder our ability to study and disseminate information about the past. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**HIS195H1 - Drunk History**

**Hours:** 24S

Histories of wine or beer or vodka often focus either on the production of these alcoholic beverages and their role in national economies, or the ways that drinking is part of celebrations. But drunkenness enters the historical record in other ways, too—not just as a social lubricant but as a social ill, one associated with intimate violence or violence to the self and with mass protest. From worries about the Gin Craze to the rise of temperance movements and eventually the passing of Prohibition, from tax policies to policing, this class will consider the many ways that drunkenness has been accepted, denounced, and legislated about in societies around the world. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**HIS196H1 - Religion and Violence**

**Hours:** 24S

In this seminar we will explore the complex roles of religion in cases of extreme violence. Working chronologically backward from the 1990s (Rwanda, former Yugoslavia), we will consider cases from a number of locations and decades in the 20th Century (Cambodia in the 1970s, the Holocaust in the 1940s, Armenians in the 1910s, Southwest Africa in the 1900s). Rather than limiting ourselves to the recent past, we will also explore cases from the 19th century (imperialism) and earlier as well as ongoing situations that connect past and present (aboriginal people in the Americas). Students will be expected to do the assigned reading (from personal accounts, primary sources, and scholarly articles), participate actively in discussions, prepare a series of short responses, make and oral presentation individually or with a group, and produce a final paper based on original research. Restricted to first-year students. Not eligible for CR/NCR option.

**HIS197H1 - Microhistory, Global History, and Historical Narrative**

**Hours:** 24S

How do historians make arguments and tell stories? How does the scale of their gaze affect their narrative strategies? In this course, we will consider a number of topics and themes related to these questions: the difference between microhistory and biography (or microhistory and regional history); the relationship of microhistory to global history; the role of the historian in these kinds of history; and the ways that microhistory and global history both pose particular problems of narrative. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**HIS198H1 - Decolonizing Women's History**

**Hours:** 24S

This course introduces students to the historiographical and theoretical debates in women's and gender history from a global perspective, with emphasis on the local histories of women in the non-western world. Students will study the themes in women's history as articulated by first and second wave feminists. The second part of the class deconstructs the basic assumptions of Western feminism through the perspective of post-colonial feminist writings and empirical studies. The readings are structured so that you consider how examples from Asia disrupt narratives of universality in Western feminist epistemologies. Restricted to first-year students. Not eligible for CR/NCR option.

**Breadth Requirements:** Society and its Institutions (3)
**HIS199H1 - Soccer: The History of the World’s Game**

**Hours:** 24S

This seminar proposes to consider the history of the world’s most popular sport, soccer, in a broader political, social, economic, and cultural context. We will consider the emergence of the modern game in industrializing Britain in the 19th century; its globalization; its mobilization as a vehicle for political expression; as well as social, cultural, and gendered identities; supporter culture; and soccer as an industry. Students will read scholarly works from a range of disciplinary perspectives, including history, cultural anthropology, sociology, literature, and economics. Restricted to first-year students. Not eligible for CR/NCR option.

**HIS202H1 - Gender, Race and Science**

**Hours:** 24L/10T

This course examines scientific ideas about human difference from the 18th-century to the present. It explores how scientists and their critics portrayed the nature of race, sex difference, and masculinity/femininity in light of debates over nation, citizenship, colonialism, emancipation, knowledge and equality. The course will also introduce students to the uses of gender and race as analytic categories within the practice of history. While the course draws much of its subject matter from the history of the United States, it also explores selective issues in European and colonial contexts.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**HIS205H1 - From Women's History to Gender History**

**Hours:** 24L/10T

This course critically examines gender in the context of politics, society, culture, and economics across a range of comparative times and spaces depending on instructor expertise. In what ways have gendered norms and transgressions been part of human societies and lived experiences? How have those norms shifted across historical and geographical contexts? How has the history of gender impacted gender as it is lived and made political today? Throughout the course, we will be querying the theoretical assumptions underlying and framing the historical texts we are studying, as well as assessing the different kinds of primary sources used to recover women’s and gender history.

**Exclusion:** HIS245Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**HIS205Y1 - Topics in Women's History**

**Hours:** 48L/20T

This course introduces students to the diverse experiences of women from a comparative perspective. Students will study how women’s strategies have shaped the major cultural, economic, political and social processes in the world and how these processes have affected women’s experiences in their particular societies. By studying women’s history from both local and global perspectives, students will engage critically with claims that women’s history is universal. The local focus of the course will rotate between Africa, Asia, Europe, and North America, depending on the expertise of the instructors.

**HIS218H1 - Environmental History**

**Hours:** 24L/8T

A lecture-based course designed to introduce students to key moments and concepts in the field of environmental history since c. 1400. This course will track the reciprocal influence of humans and the non-human world since the so-called "Columbian Exchange," emphasizing the ways in which the non-human world-from plants, animals, and
disease organisms to water, topography, and geography—have shaped human endeavours. At the same time, students will engage with many of the ways in which human beings have shaped the world around us, from empire and colonization, to industrial capitalism, nuclear power, and modern wildlife conservation.

### HIS240H1 - World War I in Europe

**Hours:** 24L/10T

Many scholars believe that the initial 1900s had only been an extension of the 19th century and that the First World War opened the next age. Many feel that it changed Europe and the entire world and started a long period of military conflicts, genocides, nationalism, and high-speed
modernization. This course will offer the most important facts related to the Great War and discuss their consequences. The course will demonstrate that it is difficult to understand our contemporary world without basic knowledge of World War I, that we are all grandchildren of that war.

**HIS386H1 - Fascism**

**Hours:** 24L

A comparative and transnational examination of fascist movements and regimes in Europe during 1919-1945. Beginning with Mussolini in Italy and Hitler in Germany, this course analyzes manifestations of the phenomenon in various European countries, including France, Spain, the Baltic states, Central Europe and Scandinavia. We analyze the factors that led to fascist movements obtaining power in certain countries and to their failure in others. Collaboration with Nazi Germany during the Second World War is also explored. Finally, we discuss whether the concept of ‘generic’ fascism can also be applied to other regions and periods.

**Prerequisite:** 9.0 credits including 1.0 HIS credit

**Exclusion:** HIS389H1 (Topics in History: Fascism), offered in Winter 2018 and Winter 2019

Introduction

How are scientific theories developed? Do values affect science and do scientific theories influence social values? What is the role of science and technology in a democratic society? These are some of the questions that historians and philosophers of science examine. Courses in the philosophy of science engage with the structure of science, its methods, and its special claims to the production of knowledge. Courses in the history of science and technology situate scientific advances in their cultural and socio-economic context.

Students taking HPS courses deepen their understanding of major ideas in science; they learn to think critically about the past and present role of science in human societies, and they improve their skills in oral presentation and debate, research, and writing.

Students pursuing History and Philosophy of Science and Technology programs will be ideally suited to any professional or academic context that requires an understanding of science, science in society, and the relation between the sciences and the humanities.

The Minor programs are designed to complement a wide range of Major or Specialist programs including those in the sciences, history, philosophy, or any program for which the combination of sciences and humanities could prove beneficial. The Major program is useful for elementary and secondary school teaching, museum and library work, science writing and editing, law, medicine and other fields where competence in both science and humanities is valuable.

   JHE353H1, JHE355H1, JPH311H1, PHL245H1, PHL356H1, or PHL357H1 may also be used to fulfill this requirement.

Science, Technology, and Society Minor (Arts Program) - ASMIN2743

The Minor in Science, Technology, and Society is an interdisciplinary program that focuses on the different ways science and technology shape modern society and, in turn, how society shapes science and technology. From the food we eat to the way we conceive family relations or our obligations to future generations, our daily practices and our beliefs are increasingly influenced by scientific research and its applications. In turn, politics, public opinion, moral beliefs and cultural practices affect scientific and technological development. Courses in this program address such topics as science and values, science-related policy and politics, ethical uses of technology, scientific revolutions and controversies, modeling and communication of scientific research, and knowledge transfer from research to commercial and societal applications.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, no more than 1.0 credit at the 100-level, at least 1.0 credit at the 300+ level)

1. HPS200H1
2. 1.0 credit from: VIC106H1, VIC121H1, VIC122H1, VIC137H1, VIC170Y1, VIC172Y1, VIC206H1, VIC207H1, REN242H1, VIC245H1, VIC246H1, CRE247H1, VIC274H1, REN343H1, CRE371H1, VIC377H1, VIC493H1
3. 1.0 credit from: HPS110H1, HPS202H1, HPS210H1, HPS211H1, HPS222H1, HPS245H1, HPS260H1, HPS270H1, HPS272H1, HPS307H1, HPS318H1, HPS319H1, HPS324H1, HPS345H1, HPS346H1, HPS351H1, HPS401H1, HPS402H1, HPS430H1, HPS431H1, HPS440H1, HPS450H1
4. An additional 0.5 credit from program requirements (2) and (3) above.
5. An additional 1.0 credit from program requirements (2) and (3) above and/or from the approved list of cognate courses: ANT358H1, ANT364H1, BIO220H1, EEB215H1, ENV200H1, ETH220H1, GGR223H1, JIG322H1, JGE321H1, PHL273H1, PHL281H1, PHL373H1, PHL381H1, PHL384H1, PSY328H1, WGS275H1.

Note: Effective Fall 2021, courses associated with Victoria College's Creative Expression and Society, and Renaissance Studies programs will have the new "CRE" and "REN" designators respectively.
History and Philosophy of Science and Technology Courses

HPS100H1 - Introduction to History and Philosophy of Science and Technology

Hours: 24L/10T

An investigation of some pivotal periods in the history of science with an emphasis on the influences of philosophy on the scientists of the period, and the philosophical and social implications of the scientific knowledge, theory and methodology that emerged.

Distribution Requirements: Humanities, Science
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS110H1 - The Science of Human Nature

Hours: 24L/10T

Why do we do what we do? What factors play a role in shaping our personality? What biological and social elements help configure a person's moral and emotional character? In this course, we examine landmark studies that shook standard beliefs about human nature in their time. We analyze those studies in their historical context and discuss their relevance to social, ethical, and policy debates. The studies may include research on mother love, obedience, conformity, bystander intervention in emergencies, deception, race, and gender stereotypes.

Distribution Requirements: Humanities, Science
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS120H1 - How to Think about Science

Hours: 24L/10T

This course addresses the nature of science and its importance to our understanding of ourselves. Questions include: What is a science? Is science objective? What is scientific reasoning? Has our conception of science changed through history? How does science shape our moral image? Does science reveal our natures as humans?

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS200H1 - Science and Values

Hours: 24L

An introduction to issues at the interface of science and society. Including the reciprocal influence of science and social norms, the relation of science and religion, dissemination of scientific knowledge, science and policy. Issues may include: Nuclear, Biological and Chemical Weapons; Genetic Engineering; The Human Genome Project; Climate Change.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS202H1 - Technology in the Modern World

Hours: 24L/10T

This course examines the reciprocal relationship between technology and society since 1800 from the perspectives of race, class, and gender. From the role of European imperial expansion in 19th-century industrialization and mechanization to the development of nuclear technology, smartphones, and digital computers in the 20th century, we consider cultural responses to new technologies, and the ways in which technology operates as an historical force in the history of the modern world.

Recommended Preparation: HPS201H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS203H1 - Making Sense of Uncertainty

Hours: 24L

This course examines issues of uncertainty in various contexts of science, technology, and society since the 19th century. Topics may include randomized controlled trials, statistical identification of normal and pathological, biopolitics, philosophical interpretations of probability, Brownian motions, uncertainty principle in quantum
mechanics, cybernetic mind, and chance in avant-garde arts.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**HPS205H1 - Science, Technology, and Empire**

**Hours:** 24L/6T

This gateway course introduces the emergence of the modern science and technology and the rise of European mercantile and colonial empires as closely intertwined processes. Beginning with the European discovery of the Americas, this course provides a broad thematic overview of the transformation of scientific practices in imperial contexts, including but not limited to geography and cartography; medical botany and plantation agriculture; biogeography and evolutionary biology; ecology and environmentalism; and race science and anthropology. The course primarily focuses on British and French colonial contexts in South Asia, Africa, Australasia and the Americas, but also considers Iberian, Russian, Dutch, and other imperial formations.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**HPS206H1 - Science and the State: Science and Forming of Modern Nations**

**Hours:** 24L/12T

In this course, we will learn about the complicated relations between science and state in the modern world. The state is often the main patronage to scientists. Science and technology have played crucial parts in political, economic, social, and cultural development. For poor countries, science has been a solution to catch up with rich countries. Yet the risk of science and technologies often unequally falls on the developing world. Drawing from anthropological, social, and historical studies of science, we will examine, among other topics, science and nation-building from ethnicity, population control, internet, big data, technocracy, scientists’ self-fashioning and global capitalism.

**Distribution Requirements:** Humanities, Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**HPS207H1 - Scientific Revolutions I**

**Hours:** 24L

Case studies in the history of science from antiquity to 1800, including the revolutionary work of Copernicus, Kepler, Galileo, Descartes, Newton, Linnaeus, Lavoisier, and Herschel. The course is designed to be accessible to science students and non-scientists alike.

**Exclusion:** HPS200Y1  
**Distribution Requirements:** Humanities, Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**HPS211H1 - Scientific Revolutions II**

**Hours:** 24L

Case studies in the history of science from 1800 to 2000, including Volta, Lyell, Darwin, Mendel, Einstein, Schrödinger, Watson, and Crick. The course is designed to be accessible to science students and non-scientists alike.

**Exclusion:** HPS200Y1, HPS300Y0  
**Distribution Requirements:** Humanities, Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**HPS222H1 - Science, Paradoxes, and Knowledge**

**Hours:** 24L/10T

What is the nature of science and scientific knowledge? What is the nature of space, time and motion? Does science tell us the truth about the world? What are scientific revolutions and how they occur? The course will address these and various other questions about science. It will focus on the bearings that philosophical views had on science in different periods in history, starting from ancient Greece and concluding in the 20th C.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**HPS240H1 - The Influence of the Eugenics Movement on Contemporary Society**

**Hours:** 24L/10T

This course explores present-day topics such as reproductive issues (including “designer babies” and genetic counselling), gender, racism/colonialism, disability and euthanasia through the lens of the history of
eugenics. A "scientific" movement which became popular around the world in the early twentieth century, eugenics was based on the principle that certain undesirable human characteristics were hereditary and could be eliminated by controlled reproduction. It resulted in the enactment of laws in numerous places, including Canada, authorizing coerced reproductive sterilization of certain individuals, and other measures intended to "improve" humanity. Today, we see its influences woven through contemporary debates, a number of which we will consider.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS245H1 - Visions of Society and Progress

Previous Course Number: HPS352H1
Hours: 24L/12T

This course explores influential visions of society and progress found in the history of the human sciences. It addresses questions such as: Are human beings naturally selfish or cooperative? Is society in harmony with the individual or opposed to the individual? It explores the significance of race, class, population growth, capitalism, and gender in debates about the good society.

Exclusion: HPS352H1
Recommended Preparation: 0.5 credit in any of the following: HPS, history, sociology, economics, political science, anthropology, or another field that intersects with the social sciences such as criminology
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS250H1 - Introductory Philosophy of Science

Hours: 24L/10T

This course introduces and explores central issues in the philosophy of science, including scientific inference, method, and explanation. Topics may include underdetermination, realism and empiricism, and laws of nature.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS255H1 - History and Philosophy of Artificial Intelligence

Hours: 24L/12T

This course introduces students to the historical and philosophical issues around artificial intelligence (AI). We will cover the geopolitical, economic, and cultural contexts from which the field of AI emerged, as well as the troubled history of the scientific concept of intelligence and how that has influenced the development of AI. The course will also introduce students to foundational and normative questions, such as how we should define and measure AI, how to evaluate the accomplishments of AI systems, and what the benefits and risks of relying on such systems might be.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS260H1 - Biology and the Future: Science and Science Fiction

Hours: 24L

This lecture course explores the fantastic visions of humanity's future inspired by the advance of the biological sciences during the twentieth century. Biology provided the scientific underpinning for societal hopes and fears embodied in such cultural icons as robots, aliens, "brains in a vat," and super-humans.

Exclusion: HMB444H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

HPS270H1 - Science and Literature

Hours: 24L/10T

This course will focus on the interplay between science and literature from ancient Greece to the present day. We'll examine the impact of major scientific paradigm shifts on the literature of their time, and situate literary texts within the context of contemporary scientific discoveries and technological innovations.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
HPS272H1 - Science against Religion? A Complex History

Previous Course Number: HPS326H1
Hours: 24L

This course introduces to the central topics arising from the encounter between modern science and religion. It aims to integrate historical and philosophical perspectives about science and religion. Did modern science arise because of Christianity or despite of it? Are science and religion necessarily in conflict? Have they factually always been in conflict throughout history? Are proofs of God’s existence obsolete? Has science secularized society? What role should religions play in liberal democracies?

Exclusion: HPS326H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities.... Not eligible for CR/NCR option.

Distribution Requirements: Humanities

HPS300Y0 - Britain and the Rise of Modern Science

A Historical exploration of Britain’s role in the rise of modern science, from the Renaissance to the double helix. Students will be introduced to the work of Hooke, Newton, Cavendish, Davy, Faraday, Maxwell, Rutherford, and others.

Exclusion: HPS211H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2), Society and its Institutions (3)

HPS300H1 - Topics in History and Philosophy of Science and Technology

Hours: 24L/10T

Topics vary year to year.

Distribution Requirements: Humanities

HPS301H1 - Topics in the History of Science

Hours: 24L/10T

This course can concern topics of special interest in the history of science from Antiquity until present. Topics may focus on specific-time periods, fields of inquiry, individuals, scientific institutions, or geographic locations.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

HPS302H1 - Topics in Philosophy of Science

Hours: 24L/10T

This course can concern topics of special interest in the philosophy of science from Antiquity until present. Topics may include scientific change, rationality, method, evidence, progress, reduction, scientific laws, models, representation etc. The course may also focus on specific-time periods, fields of inquiry, individuals, scientific institutions, geographic locations, etc.

Prerequisite: HPS250H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS304H1 - A History Lab: Biomedical Sciences, Past and Present

Hours: 36S

Offers a hands-on introduction to historical research. Through a close examination of classic scholarly texts, archival materials, and recent media publications, this advanced seminar explores the sources, methods, and approaches in historical studies of biomedical twentieth century-sciences.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

HPS307H1 - History of Energy

Hours: 24L/10T

The history of human control of various sources of energy, including technical developments, scientific theories, and
impact on culture and society. Recent debates on fossil fuel and nuclear power examined in historical context. (offered irregularly)

**Recommended Preparation:** HPS201H1/HPS202H1 or any HIS course  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**HPS309H1 - Worldviews: Aristotelian-Medieval Worldview**

**Hours:** 24L/10T  
This course reconstructs the Aristotelian-medieval mosaic of theories including physics, cosmology, theology, astronomy/astrology, optics, and physiology/medicine. We analyze the role of metaphysics in medieval science, including determinism/indeterminism, plenism/vacuism, finitism/infinitism, theism/deism, and teleology/mechanism. Finally, we explicate the Aristotelian-medieval method, by focusing on the notions of demonstrative truth, intuition, and deduction.

**Recommended Preparation:** HPS100H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**JPH311H1 - From Universal Gravity to Quantum Information: The Making of Modern Physics**

**Hours:** 24L  
Topics in the history of physics from antiquity to the 20th century, including Aristotelian physics, Galileo, Descartes, electromagnetism, thermodynamics, statistical mechanics, relativity, quantum physics, and particle physics. The development of theories in their intellectual and cultural contexts.

**Prerequisite:** At least a 0.5 credit PHY course at university level  
**Exclusion:** HPS311H1  
**Distribution Requirements:** Humanities, Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**HPS313H1 - Two Hundred Years of Electricity**

**Hours:** 24S  
A history of the science and technology of electricity in the 19th and 20th centuries in its social, economic, and cultural context.

**Prerequisite:** At least one-half CSC/PHY or Electrical Engineering (ECE) course  
**Distribution Requirements:** Humanities, Science  
**Breadth Requirements:** Society and its Institutions (3)

**HPS316H1 - Environment, Technology, and Nature**

**Hours:** 24L/10T  
This course examines the intersection of technology and environment in the modern world. Whether simple or complex, whether designed for recreation, work, or warfare, our tools and how we use them filter our perceptions of, and engagements with, non-human nature. Emphasis is on case studies from 1800 to the present.

**Prerequisite:** 0.5 credit in HPS or HIS  
**Recommended Preparation:** HPS201H1/HPS202H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**HPS318H1 - History of Medicine I**

**Hours:** 24L/10T  
This course explores how medicine was practiced, taught and theorized from ancient Greece to the early modern period. It focuses on the historical development of western medicine in relation to societies, politics and culture, and considers topics such as the creation of medical traditions, the transmission and communication of medical knowledge, the pluralistic world of healers, the role of religion, magic and natural philosophy, the cultural meaning of disease, and the emergence of institutions such as the hospital.

**Prerequisite:** First-year students must have instructor's approval  
**Exclusion:** HPS314Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**HPS319H1 - History of Medicine II**

**Hours:** 24L/10T  
This course examines the development of medicine from the seventeenth to the twentieth century. It focuses on the
historical development of western medicine in relation to societies, politics and culture and considers topics such as changing views of the body, the development of medical institutions such as hospitals, asylums and laboratories, the diversifies world of healing and the place of visual and material culture in the production and dissemination of medical knowledge.

**Prerequisite:** First-year students must have instructor’s approval

**Exclusion:** HPS314Y1; HPS315H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

---

**HPS321H1 - Understanding Engineering Practice: From Design to Entrepreneurship**

**Hours:** 24S

This course seeks to understand the nature of engineering practice, which comprises complex social, intellectual, and technical actions at various stages from design to entrepreneurship. Building upon the history and social studies of technology, philosophy of engineering, business history, and management science, we introduce ways to analyze such complex actions.

**Prerequisite:** 1.5 credits with any combination of engineering, natural sciences, medical sciences, or commerce courses.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

---

**HPS322H1 - Complexity, Order, and Emergence**

**Hours:** 10T/24S

A survey of the history of and recent developments in the scientific study of complex systems and emergent order. There will be particular emphasis on the biological and cognitive sciences. Topics covered may include: mechanism and teleology in the history of science, 19th and 20th century emergentism, complex systems dynamics, order and adaptiveness, self-organization in biology and cognitive development.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Thought, Belief and Behaviour (2)

---

**HPS324H1 - Natural Science and Social Issues**

**Hours:** 24L

Historical examination of the interactions of science (both as body of knowledge and as enterprise) with ideological, political and social issues. The impact of science; attacks on and critiques of scientific expertise as background to contemporary conflicts. Subjects may vary according to students interests. (offered irregularly)

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

---

**HPS325H1 - Modern Science and Holy Texts**

**Hours:** 24L

This course explores interdisciplinary topics related to the encounter between modern science and texts accepted as holy by religious communities, such as the Bible in Christianity. What role did holy texts play in the emergence of modern science? Did modern science change the way religious communities interpret their holy texts? What to do with claims such as that the Quran contains quantum physics? Does modern science exhibit the same kind of rationality that we find in rabbinical Judaism? Do holy texts only exist to assist humanity’s attempts at understanding the meaning of the world, while modern science actually explains the world? What role do texts play in modern science compared to holy texts in religious communities? And, what has modern science to say about the very idea of holy texts?

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

---

**HPS333H1 - Famous Debates in Science**

**Hours:** 24L/10T

The course focuses on famous debates in science, such as the Leibniz-Clarke debate on the nature of space, time and God, the Huxley-Wilberforce debate on evolution and the Bohr-Einstein debate on the nature of the quantum reality. The main aim is to explore the philosophical ideas involved in these debates in their historical context.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Thought, Belief and Behaviour (2)
HPS345H1 - Quantifying the World: the Debates on the Ethical and Epistemic Implications of AI and Automation

Hours: 24L

The effects of automation, computing, and information technology have had a great impact on our society. The rise of automation and computing and the almost cult-like trust in mechanization have transformed our society both at the material and the epistemological level. This course will examine the epistemological and ethical debates that AI and automation have produced in all sectors of society. It will consider a variety of media and instruments from data visualization and mapping, to the use of AI and robotics, contextualizing them within popular and hotly contested examples in the military field and in cybersecurity, in medical diagnostics and epidemiology, in the automotive industry, and in the personal realm.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS346H1 - Modifying and Optimizing Life: on the Peculiar Alliance between AI, Biology, and Engineering

Hours: 24L/12T

Taking cue from the entanglements that historically have pervaded the relation between biology and information technology since the early 20th century, this course interrogates the sociocultural and technological conjuncture that has brought computer science, biology and engineering together into peculiar, ingenious, and often controversial alliances. What do AI, synthetic biology, and biotechnology have in common? How have they come to be associated? What are the debates and ethics emerging from such associations? The course will focus on topics such as: geoengineering and bioremediation; GMO and Robotic insects; the use of expert systems and machine learning to optimize synthetic biology; the flourishing and marketing of precision and personalized medicine/immunotherapy; and the ethics behind CRISPR babies.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS351H1 - Life Sciences and Society

Hours: 24L/12T

This course examines how the contemporary life sciences intersect with global geopolitics through an introduction to the field of science and technology studies (STS). Using interdisciplinary methodologies and global perspectives, the course addresses key questions including: Who benefits from the development of new biotechnologies, and who is exploited in the process? Who sets the international norms of bioethics and medical market regulation? How are biologists and medical practitioners redefining life for different societies and their diverse constituencies? The course predominantly focuses on humans, but also introduces new scholarship on animal studies and synthetic life forms. It has significant coverage of the Middle East, Africa, and East and South Asia.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

JHE353H1 - History of Evolutionary Biology

Hours: 24L/10T

An examination of major ideas about biological evolution from the 18th century to the 1930s and of their impact on scientific and social thought. Topics include the diversity of life and its classification, the adaptation of organisms to their environment, Wallace’s and Darwin’s views on evolution by natural selection, sexual selection, inheritance from Mendel to T.H. Morgan, eugenics, and the implications of evolution for religion, gender roles, and the organization of society. Offered by the Institute for the History and Philosophy of Science and Technology.

Prerequisite: 6.0 credits
Exclusion: EEB353H1/ HPS323H1/ HPS353H1
Distribution Requirements: Humanities, Science
Breadth Requirements: Society and its Institutions (3)

HPS354H1 - History of Medicine and Public Health in the Middle East

Hours: 24L/6T

This course provides a broad thematic overview of the history of medicine and public health in the Middle East. Focusing on the modern period, the course highlights the region as a contact zone of medical traditions and a key site in the emergence of colonial medicine and international public health. Students examine the social and cultural effects of new developments in medical thought and practice, including ideas about contagion and disease prevention, the notion of public health and hygiene, and the construction of colonial and postcolonial medical schools and hospitals.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
**Recommended Preparation:** A prior course in HPS, HIS, or NMC  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**JHE355H1 - History and Philosophy of Evolutionary Biology**

**Hours:** 24L/10T

An examination of the place of the organism in evolutionary theory from the early 1900s to the present. Biology is the science of living things, and yet, paradoxically, living things—organisms—have been comprehensively left out of the Modern Synthesis theory of evolution that developed in the twentieth century. This course surveys the reasons—historical, philosophical and empirical—for the marginalisation of organisms from evolutionary theory. It examines the ways in which evolutionary developmental biology attempts to restore the organisms to a central place in evolutionary biology. Offered by faculty in the Institute for the History and Philosophy of Science and Technology.

**Prerequisite:** 6.0 credits, including two 0.5 credits or a 1.0 credit course in any one or more of EEB, BIO or HPS  
**Exclusion:** EEB355H1/ HPS333H1/ HPS355H1  
**Recommended Preparation:** JHE353H1  
**Distribution Requirements:** Humanities, Science  
**Breadth Requirements:** Society and its Institutions (3)

**HPS356H1 - Child Science: Knowing and Caring for Children in Modern World**

**Hours:** 24L/12T

'Childhood' associates with diverse meanings throughout human history. In a western industrial society, the responsibility of childcare mainly falls upon parents' shoulders, with help from various professionals. Also, knowing and caring for children have evolved into distinct fields across life sciences, humanities, and social science. The child science ranges from education, developmental psychology, and child and adolescent psychology, etc. The development of these disciplines further shapes our views of children and modify parenting practices. In this course, we will draw on empirical studies to examine how the science of children and childcare penetrates families and schools to structure the daily life of children in the modern world.

**Distribution Requirements:** Humanities, Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**HPS360H1 - History of Modern Cosmology**

**Hours:** 24L

Conceptions of the universe since 1800 with attention to observational sources of changing ideas. History of large telescopes, stellar spectroscopy and radio astronomy. Relativistic conceptions of space and time, models of stellar evolution, discovery of extra-galactic nebulae, Hubble red-shift and microwave background radiation. Philosophical and religious implications are examined.

**Distribution Requirements:** Humanities, Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**HPS370H1 - Philosophy of Medicine**

**Hours:** 24L

This course introduces students to philosophical issues in the study of medicine. The course will cover foundational questions, such as what constitutes evidence that a therapy is effective, how do we define health and disease, and information derived from research is used to support clinical practice. Students will be introduced to different movements in contemporary clinical medicine, such as Evidence-based Medicine, Person-Centered Healthcare, and Precision Medicine.

**Prerequisite:** Completion of 4.0 credits  
**Recommended Preparation:** HPS250H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**HPS371H1 - COVID-19: Epistemology and Societal Implications**

**Hours:** 24L/12T

The COVID-19 pandemic has led to significant changes in our daily lives. This course will examine the pandemic and the public response through a philosophy of science lens. In particular, students will explore philosophical issues about how the healthcare community generates knowledge and how that knowledge is used to inform responses to a major public health crisis. The course will also provide a brief history of pandemics and examine Coronavirus in a historical context. Epistemological issues regarding pandemic modelling and epidemiology, clinical research and generalizability of findings, diagnostic testing, public health response (e.g. border closures, protective masks, social distancing, isolation, testing and tracking), and economic and social impact will be covered. Portrayals of the pandemic by media, government, and
scientists will also be examined. Readings will be drawn from a variety of academic disciplines and popular sources.

**Prerequisite:** 4.0 credits  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**HPS390H1 - The Story of Number: Mathematics from the Babylonians to the Scientific Revolution**

**Hours:** 36L

A survey of ancient, medieval, and early modern mathematics with emphasis on historical issues. (Offered in alternate years)

**Prerequisite:** At least 1.0 credit at the 200+level from CSC/MAT/STA  
**Exclusion:** HPS310Y1; MAT220Y1  
**Distribution Requirements:** Humanities, Science  
**Breadth Requirements:** Society and its Institutions (3)

**HPS391H1 - Rebels Who Count: The History of Mathematics from 1700 to the Present**

**Hours:** 24L/10T

A survey of the development of mathematics from 1700 to the present with emphasis on historical issues. (Offered in alternate years)

**Prerequisite:** At least 1.0 credit at the 200+level from CSC/MAT/STA  
**Exclusion:** HPS310Y1; MAT220Y1; MAT391H1  
**Distribution Requirements:** Humanities, Science  
**Breadth Requirements:** Society and its Institutions (3)

**HPS395Y1 - Science, Development, and Innovation in Contemporary China**

**Hours:** 48L/24P

Science and technology not only are vehicles to build a modern state, but also serve impetus for economic development in many countries. In China, the development of science has intertwined with the transformation from self-reliance to an integrated node of global economy, and from planned to market economy. We will use science and technology as a lens to analyze China’s recent social changes from Mao era to post-Mao years. Utilizing interdisciplinary research, we will critically exam the concepts and practices of development, innovation, and science and technology. The course design also includes field trips to key sites of innovations in China, including museums for Chinese medicine, IT and biotech companies, and makers’ lab in Shenzhen.

**Exclusion:** EAS328H1  
**Distribution Requirements:** Humanities, Social Science  
**Breadth Requirements:** Creative and Cultural Representations (1), Society and its Institutions (3)

**HPS399Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at [https://www.artsci.utoronto.ca/current/academics/research-opportunities](https://www.artsci.utoronto.ca/current/academics/research-opportunities). Not eligible for CR/NCR option.

**HPS401H1 - Scientific Artifacts**

**Hours:** 12T/24S

This course explores the history of science through direct engagement with location scientific artifacts within the University of Toronto Scientific Instrument Collection (UTSIC.org). Each student will undertake a research project focused on a single artifact within the collection in order to explore both the local history of science and the methodology of material culture research as it relates to science.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**HPS402H1 - Animals in the Histories of Science and Technology**

**Hours:** 24S

What can a focus on nonhuman animals reveal about the knowledge practices and politics of science and technology? This course approaches the history of science from the perspective of nonhuman animals in order to revisit—and retell—the history of various scientific disciplines and practices. We will consider how the various ways in which animals have been enrolled into the formation of scientific knowledge, from laboratory settings to ecological fieldwork, to colonial natural history. Students will learn to interrogate anthropocentric biases in the histories of science and technology, and to assess the significance of nonhuman animals in the formation of scientific knowledge.
HPS410H1 - History of Mathematics

Hours: 24S

An historical survey from pre-Greek to the present. Various themes are emphasized year to year, to show mathematics as changing and evolving. A student could expect to gain an historical overview as well as a sense of the unity of the mathematical sciences.

Prerequisite: Any 300-level HPS course or permission of the instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS411H1 - Conceptual Foundations of Mathematics

Hours: 24S

An examination of foundational and conceptual aspects of mathematics such as: the nature of mathematical objects, logicism, Church’s elementalist mathematics, Gödel’s theorem and formal systems, postulational methods, mathematics and reality, the cardinal, ordinal and abstract approaches to numbers, infinity, and Euclidean and non-Euclidean geometries. Not eligible for CR/NCR option.

Prerequisite: HPS309Y1/HPS310Y1/HPS390H1/HPS391H1/MAT220Y 1 and permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS412H1 - History of the Biological Sciences

Hours: 24S

Advanced level survey of biological science from ancient Greece to the 20th century emphasizing primary sources analyses. Not eligible for CR/NCR option.

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS413H1 - Reading and Writing about Physics

Hours: 24S

Historians, philosophers, and sociologists have produced a wealth of literature on the analysis and examination of physics from the early modern period to the present. In this seminar, we read and discuss in depth a collection of recent classics and cutting-edge works on the historical studies of physics. Students also conduct research based on this literature. We aim to use physics as a lens to understanding key themes in the making of modern science, from incommensurability, epistemic cultures, and historical ontology, to materiality, social construction, pedagogy, and countercultures.

Prerequisite: At least one HPS course
Recommended Preparation: Develop the ability to read scholarly books and conduct research in history of science
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS430H1 - History of Technology I

Hours: 24S

An advanced survey of the history of technology from Antiquity to the Industrial Revolution. Not eligible for CR/NCR option.

Prerequisite: Permission of instructor
Recommended Preparation: HPS201H1/HPS202H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

HPS431H1 - History of Technology II

Hours: 24S

An advanced survey of the history of technology from the Industrial Revolution to modern times. Not eligible for CR/NCR option.

Prerequisite: Permission of instructor
Recommended Preparation: HPS201H1/HPS202H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
HPS440H1 - Topics in History of Medicine

Previous Course Number: HPS303H1
Hours: 24S

This course offers a focused discussion of several aspects of the history of medicine. Various themes are examined in depth year to year so as to familiarize students with different topics and methodological approaches.

Prerequisite: HPS318H1 and/or HPS319H1, or at least 1.0 credit of HPS courses or History courses with a focus on the history of science at the 300-level or higher. Students who do not meet the prerequisites are encouraged to contact the instructor.

Exclusion: HPS303H1

Recommended Preparation: A prior course in HPS, HIS, or NMC

Distribution Requirements: Humanities, Social Science

Breadth Requirements: Society and its Institutions (3)

JPH441H1 - Physical Science in Contemporary Society

Hours: 24L

This course will discuss the complex, real-life, ethical, and philosophical issues behind how science gets done, including questions such as how we as scientists strive to determine the truth; who determines what science is done, and on what basis; how we as a community manage science and make decisions about education, authorship, publication, hiring, et cetera (including issues related to equity, inclusivity, and diversity); and how we as a society fund science and apply its discoveries.

Prerequisite: PHY224H1/ PHY250H1/ PHY252H1/ PHY254H1/ PHY256H1, or by permission of the instructor.

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

HPS442H1 - Sciences of Whiteness in the Middle East & Its Diasporas

Hours: 24S

This research seminar traces the historical response of Middle Eastern societies and diasporas to Western scientific discourses of race and ethnicity from the 19th century to the present. We examine notions of racial classification and hierarchy as they emerged in Islamicate and European imperial contexts and their scientific application to Middle Eastern populations. We further investigate how the nationalist ideologies of modern Middle Eastern nation-states relied on and perpetuated race science. Finally, we consider the experience of Middle Eastern migrants to Europe and North America and their engagement with scientific definitions of Aryan, Caucasian and white racial identity.

Recommended Preparation: A prior course in HPS, HIS, or NMC

Distribution Requirements: Humanities, Social Science

Breadth Requirements: Society and its Institutions (3)

HPS444H1 - Health, Medicine, and Society in the Mediterranean World

Hours: 24S

This course examines healing practices and medical knowledge in the Mediterranean world, focusing on the early modern period. We will address topics such as the interplay between medicine and religion, the relationship between patients and practitioners, and the role of women as both healers and patients and across Mediterranean shores. We will also consider how individuals in different Mediterranean regions experienced the relationship between health and the environment, explore the bearings that medical pursuits had on the creation and consolidation of notions of sex and gender, and examine how medical knowledge shaped views of the body and informed health policies.

Prerequisite: This course presupposes having some background in the history of medicine and/or history of science and having engaged in historical research projects. It is highly recommended that students have taken one or more courses in History of Medicine (or History of Science and/or Technology)

Recommended Preparation: HPS318H1 or HPS319H1, or a 0.5 HPS or HIS credit with a focus on the history of science at the 200-level or higher

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

HPS450H1 - Revolutions in Science

Previous Course Number: HPS350H1
Hours: 24S

A detailed investigation into a highly celebrated and important philosophical idea concerning the development of scientific knowledge: the notion of scientific revolutions. We will consider the process of theory change, whether theory choice is rational, and whether theoretical terms, such as light and space preserve their meanings across revolutions. In addition to classic work by Kuhn, we shall consider approaches that were inspired by Kuhn's work.
In particular, we will consider the approaches of sociologists of scientific knowledge. The course is taught as a seminar in which the students play an active role in presenting and discussing the readings.

**Prerequisite:** HPS250H1 or by permission of the instructor

**Exclusion:** HPS350H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

### HPS455H1 - Well-being and Policy Analysis

**Hours:** 24L

The research seminar will consider some central questions in the philosophy of economics and political philosophy and their intersection with, and relevance for questions concerning social justice, the environment, well-being, and policy analysis. The aim is to provide some background and analytical tools for policy analysis concerning issues related to well-being, distributive justice, poverty, disability, and environmental sustainability.

**Distribution Requirements:** Humanities, Social Science

**Breadth Requirements:** Society and its Institutions (3)

### HPS481H1 - Special Research Opportunity in History of Medicine

**Hours:** 24L/6T

This course offers advanced undergraduate students the opportunity to undertake original research into the history of medicine, under the guidance of a faculty mentor.

**Prerequisite:** Permission of instructor

**Recommended Preparation:** Preparation with instructor

**Distribution Requirements:** Humanities, Science

### HPS482H1 - Special Research Opportunity in History of Science

**Hours:** 24L/6T

This course offers advanced undergraduate students the opportunity to undertake original research into the history of the natural or physical sciences, under the guidance of a faculty mentor.

**Prerequisite:** Permission of instructor

**Recommended Preparation:** Preparation with instructor

**Distribution Requirements:** Humanities

### HPS483H1 - Special Research Opportunity in History of Technology

**Hours:** 24L/6T

This course offers advanced undergraduate students the opportunity to undertake original research into the history of the natural or physical sciences, under the guidance of a faculty mentor.

**Prerequisite:** Permission of instructor

**Recommended Preparation:** Preparation with instructor

**Distribution Requirements:** Humanities, Science

### HPS484H1 - Special Research Opportunity in Philosophy of Science 1

**Hours:** 24L/6T

This course offers advanced undergraduate students the opportunity to undertake original research into the philosophy of the natural or physical sciences, under the guidance of a faculty mentor.

**Prerequisite:** Permission of instructor

**Recommended Preparation:** Preparation with instructor

**Distribution Requirements:** Humanities, Science

### HPS485H1 - Special Research Opportunity in Philosophy of Science 2

**Hours:** 24L/6T

This course offers advanced undergraduate students the opportunity to undertake original research into the philosophy of the natural or physical sciences, under the guidance of a faculty mentor.

**Prerequisite:** Permission of instructor

**Recommended Preparation:** Preparation with instructor

**Distribution Requirements:** Humanities

### HPS495Y1 - Individual Studies

A reading and research project in some aspect of history of science and technology, supervised by a faculty member.
Prerequisite: Two HPS courses
Distribution Requirements: Humanities, Science
Breadth Requirements: Thought, Belief and Behaviour (2)

HPS496H1 - Individual Studies

A reading and research project in some aspect of the social, cultural or intellectual history of science and technology, supervised by a faculty member.

Prerequisite: Two HPS courses
Distribution Requirements: Humanities, Science

HPS497H1 - Individual Studies

A reading and research project in some aspect of the social, cultural or intellectual history of science and technology, supervised by a faculty member.

Prerequisite: Two HPS courses
Distribution Requirements: Humanities

HPS498H1 - Individual Studies in HPS

A reading and research project in some aspect of the development of scientific theory or practice, supervised by a faculty member.

Prerequisite: Two HPS courses
Distribution Requirements: Humanities

HPS499Y1 - Individual Studies

A reading and research project in some aspect of the development of scientific theory or practice, supervised by a faculty member.

**Introduction**

The Human Biology Program is an undergraduate collaborative program between the Faculty of Arts and Science and the Faculty of Medicine. Our programs examine the biology of our species through interdisciplinary lenses by integrating topics from the biological and medical sciences, social sciences, and the humanities. The overall structure of the collaborative program is designed to expose students to the transdisciplinary field of human biology with opportunities to specialize in selected areas of inquiry in the field.

A central objective to the Human Biology Program (HMB) is to facilitate the development of core competencies in our students: critical and creative thinking, self-directed learning, quantitative and analytical reasoning, and effective communication and research. HMB aims to prepare students for future careers where an interdisciplinary education in biological and health sciences would be an asset. HMB offers diverse experiential learning opportunities for students which includes a faculty that is at the cutting-edge of teaching innovation, strong academic relationships with other department and faculties at the University, service learning with organizations in Toronto, and undergraduate research in laboratories on campus and affiliated hospital research institutes.

After first year life science courses, undergraduate students may enter the Human Biology program in their selected HMB program: Fundamental Genetics and its Applications, Global Health, Health and Disease, Human Biology, and Neuroscience. HMB students start by taking foundational courses to provide background on their subject area and introduce students to topics integral to the study of human biology. Students then progress to more specialised topics and have more detailed instruction but are also encouraged to participate in self-directed and group learning. In their final year, HMB students are further engaged to practice critical analysis by taking one of our specialized seminar courses in their program, which focuses on expanding the depth of knowledge the student has acquired while studying human biology at the University of Toronto.

**Regarding Human Biology Programs**

The Human Biology Program offers five areas of study, all of which offer a major program, and four of which offer a specialist program.

Students are allowed to switch between Human Biology major programs, but should first obtain written permission from the Program Office to determine which of their completed courses will transfer to their new Human Biology major program. Students seeking advice on which HMB major to choose or advice for program completion pathways should view the HMB Program Pathway Tools webpage.

*Students are not permitted to be enrolled in more than one Human Biology major program.*

**Human Biology Programs**

**Fundamental Genetics and its Applications Specialist (Science Program) - ASSPE1050**

The objective of the HMB: Fundamental Genetics and its Applications specialist and major programs are to provide students with a solid foundation in the biological sciences...
with a focus on genetics and its applications in medicine, environment and biotechnology.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Note there are different options depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

For students who have completed between 4.0 and 8.5 credits:

Variable Minimum Grade
A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO130H1
- (CHM135H1, CHM136H1) / CHM151Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in BIO130H1 will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

For students who have completed 9.0 or more credits:

Variable Minimum Grade
Minimum grades are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO220H1
- BIO230H1 / BIO255H1
- HMB265H1 / BIO260H1
- BCH210H1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in either BIO220H1 or (BIO230H1 / BIO255H1) will not be considered for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

Students applying for admissions to the program utilizing transfer credits will be considered on a case-by-case basis. Students entering from CEGEP or from another university should contact hmb.undergrad@utoronto.ca after their transfer credit assessment has been complete for program enrolment assessment. Please consult the Arts & Science Program Toolkit for more information on program enrolment.

Completion Requirements:

Required Courses (12.0 credits, including at least 1.0 credit at the 400 level)

Chemical and Physical Foundations of Biological Systems

1. (CHM135H1, CHM136H1) / CHM151Y1
Transfer credits will be accepted in lieu of the chemistry requirements only if they carry a direct exclusion or equivalency to a pre-approved chemistry course

2. MAT135H1 / PHY131H1 / PHY151H1 / CSC120H1 / CSC148H1
3. BCH210H1

Biological Foundations of Living Systems

4. BIO120H1, BIO130H1
5. BIO220H1

7. HMB265H1 / BIO260H1
8. HMB321H1

Courses in Applied Genetics

10. HMB201H1
11. HMB301H1 / HMB360H1 / BCH311H1 / CSB349H1 / PSL350H1

12. 1.5 credits from: HMB301H1 / HMB401H1 / HMB431H1 / HMB436H1 / HMB441H1 / HMB489H1 / BCH311H1 / BCH340H1 / BCH441H1 / BCH447H1 / CSB352H1 / CSB458H1 / CSB459H1 / CSB472H1 / CSB473H1 / CSB474H1 / EEB325H1 / EEB459H1 / EEB460H1 / NFS487H1 / PHL384H1 / PSL350H1 / PSL404H1 / PSY390H1

Data Analysis and Research-Based Courses

13. 0.5 credit in statistics: EEB225H1 / STA220H1 / STA288H1 / PSY201H1
14. 0.5 credit from bioethics: HMB306H1 / HMB406H1 / PHL281H1
15. 0.5 credit from upper-year lab course: HMB311H1 / HMB314H1 / MGY314H1 / MGY315H1
16. 0.5 credit from: HMB342H1/ HMB360H1/ HST373H1/ MGY377H1/ MGY378H1
17. 1.0 credit from project course: HMB490Y1/ HMB496Y1*

* A research project from a different unit may be accepted with prior written approval from Human Biology if the course is not counting toward a different program.

Fundamental Genetics and its Applications Specialists

Notes:
1. Courses can only count toward one requirement, even if listed as options to multiple requisites of the program.
2. Not all courses listed have priority enrolment for Fundamental Genetics and its Applications specialists. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.

Neuroscience Specialist (Science Program) - ASSPE1472

HMB: Neuroscience
Neuroscience is an interdisciplinary field aimed at understanding the brain and nervous system utilizing integration of research at the molecular, cellular, and organismal levels, and through all stages of human development. The application of neuroscience has important implications for understanding human behaviour and for promoting the development of effective strategies for diagnosing and treating nervous system disorders. The objective of the HMB: Neuroscience specialist and major programs is to provide students with a solid foundation and facilitates the integration of concepts from multiple fields to their understanding of neuroscience.

Enrolment Requirements:
This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Note there are different options depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

For students who have completed between 4.0 and 8.5 credits:

Variable Minimum Grade
Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO130H1
- (CHM135H1, CHM136H1)/ CHM151Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 70% in BIO130H1, a final grade average lower than 70% in (CHM135H1, CHM136H1), or a final grade lower than 70% in CHM151Y1 will not be considered for admission. Please note that obtaining the minimum grades does not guarantee admission to the program.

For students who have completed 9.0 or more credits:

Variable Minimum Grade
A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO230H1 / BIO255H1
- HMB265H1 / BIO260H1
- BCH210H1
- PSL300H1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 70% in BIO230H1 / BIO255H1 will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Students applying for admissions to the program utilizing transfer credits will be considered on a case-by-case basis. Students entering from CEGEP or from another university should contact hmb.undergrad@utoronto.ca after their transfer credit assessment has been complete for program enrolment assessment. Please consult the Arts & Science Program Toolkit for more information on program enrolment.

Human Biology Major (Science Program) - ASMAJ2035

HMB: Human Biology

Human Biology is a transdisciplinary field concerned with the study of human health from a biological, sociological, and evolutionary perspective. Research in human biology focuses on impact that genetic variations, development, physical fitness, and nutrition have on the general health of populations and how this compares across cultures and through history. The objective of the HMB: Human Biology major program is to provide students with a solid foundation in the life sciences as it relates to human biology and to facilitate the integration of concepts from across the social sciences and humanities, and to equip them with quantitative skills essential to research and success in this field.

Neuroscience Major (Science Program) - ASMAJ1472

HMB: Neuroscience

Neuroscience is an interdisciplinary field aimed at understanding the brain and nervous system utilizing integration of research at the molecular, cellular, and organismal levels, and through all stages of human development. The application of neuroscience has important implications for understanding human behaviour and for promoting the development of effective strategies for diagnosing and treating nervous system disorders. The objective of the HMB: Neuroscience specialist and major programs is to provide students with a solid foundation and facilitates the integration of concepts from multiple fields to their understanding of neuroscience.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Note there are different options depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

For students who have completed between 4.0 and 8.5 credits:

**Variable Minimum Grade**

Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- [BIO130H1](#)
- (CHM135H1, CHM136H1)/CHM151Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 55% in [BIO130H1](#) or [BCH20H1](#), or a final grade lower than 70% in (CHM135H1, CHM136H1) or a final grade lower than 70% in CHM151Y1 will not be accepted for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

For students who have completed 9.0 or more credits:

**Variable Minimum Grade**

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- [BCH210H1](#)
- [PSL300H1](#)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 55% in [BIO230H1](#)/[BIO255H1](#) will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Students applying for admissions to the program utilizing transfer credits will be considered on a case-by-case basis. Students entering from CEGEP or from another university should contact hmb.undergrad@utoronto.ca after their transfer credit assessment has been complete for program enrolment assessment. Please consult the Arts & Science Program Toolkit for more information on program enrolment.

**Completion Requirements:**

**Required Courses (8.0 credits, including at least 0.5 credit at the 400-level)**

**Chemical and Physical Foundations of Biological Systems**

1. (CHM135H1, CHM136H1)/CHM151Y1

Transfer credits will be accepted in lieu of the chemistry requirements only if they carry a direct exclusion or equivalency to a pre-approved chemistry course.

2. MAT135H1/PHY131H1/PHY151H1/CSC120H1/CSC148H1

14. 0.5 credit from a higher-year lab course: HMB310H1/ HMB314H1/ PSY369H1

* A research project from a different unit may be accepted with prior written approval from Human Biology if the course is not counting toward a different program.

Neuroscience Major Notes:

1. Courses can only count toward one requirement, even if listed as options to multiple requisites of the program.
2. Not all courses listed have priority enrolment for Neuroscience majors. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.
3. The Neuroscience major cannot be paired with any other Human Biology Program managed major program.
4. Effective Fall 2021, courses associated with New College’s Buddhism, Psychology and Mental Health program will have the new "BPM" designator.

Important Notes About Human Biology Courses

Human Biology Course Prerequisites & Corequisites

Students are advised that the Human Biology Program enforces prerequisites and corequisites on all courses offered by the program. Students are expected to know the prerequisites of courses they wish to take and ensure they have the necessary prerequisites prior to enrolment.

Should a student wish to seek a prerequisite waiver, the request must be made prior to enrolling in the course. Please email the program office at hmb.undergrad@utoronto.ca with such requests. If a student is enrolled in an Applied Statistics Specialist, or is planning on using transfer credits, or credits obtained from UTSC/UTM, in lieu of stated prerequisites/corequisites, please contact the program office prior to enrolling in courses to ensure your alternate credits will be accepted.

Please note that if a pre-requisites is a credit count, we generally will allow a 0.5 credit difference (i.e. have 13.5 credits complete when 14.0 credits is required). Should a student have all other prerequisites and if enrolment pressure is not too high, the credit prerequisite will be waived. An email request for a waiver of this type of prerequisite is not necessary.

Please note that 300-level courses with the following joint course codes are automatically accepted when the prerequisite states "A HMB 300-level course;" CJH, EHJ, JNH.

Regarding Human Biology 400-level Courses

Given that all students enrolled in a Human Biology program require, at least, 0.5 credit of HMB 400-level courses and due to the popularity of these courses, student entering their 4th year of study will be given the opportunity to ballot for 0.5 credit of HMB 400-level fall/winter courses. The balloting process will be conducted during the period immediately preceding course enrolment and students who have successfully completely this process will be pre-enrolled in 0.5 credit of HMB 400-level courses; students will then be able to enrol and/or waitlist for other HMB 400-level courses during the regular course enrolment period. Students who have completed or will completed their HMB 400-level course requirements by the Fall of their 4th year are not eligible to participate in balloting.

There are no individual pre-requisite exceptions on any HMB 400-level course. Students are required to check all prerequisites prior to enrolling in HMB 400-level courses. Students who enrol in and do not meet the stated prerequisites of an HMB course will be removed.

Students planning to use transfer credits in lieu of the pre-requisites must email hmb.undergrad@utoronto.ca before enrolling in the course to request that transfer credits be accepted in lieu of the stated pre-requisites.

Regarding Human Biology "Tiered Waitlists"

The Human Biology Program employs "tiered waitlists" on all courses that have the enrolment indicator of R1 or R2 that has unequal spots. (HMB does not use the R2
enrolment control). For an explanation of how Tiered Waitlists work please visit the HMB Webpage "HMB Tiered Waitlist Explained."

Human Biology Courses

HMB200H1 - Introduction to Neuroscience

Hours: 24L/12T

An introductory course that explores the development, physiology and continually changing function of the nervous system as it relates to certain types of human behaviour. Critical analysis of scientific evidence is used to enrich learning.

Prerequisite: BIO120H1, BIO130H1
Recommended Preparation: PSL300H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB201H1 - Introduction to Fundamental Genetics and its Applications

Hours: 24L/12T

The course provides a comprehensive introduction to a variety of therapeutic approaches including gene therapy, CRISPR-based gene editing, epigenetic manipulations & regenerative medicine. This course consists of three parts: tools and techniques of gene & genome manipulations; medical, environmental and agricultural biotechnology applications; and ethical, legal and social aspects of modern biotechnology as it pertains to human health and wellbeing.

Prerequisite: BIO120H1, BIO130H1
Recommended Preparation: HMB265H1/ BIO260H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB202H1 - Introduction to Health and Disease

Hours: 24L/12P

An introductory course in Health and Disease using an interdisciplinary approach that integrates bacteriology and virology with other aspects of human biology, including chronic disease and neoplasia. An exploration of the key concepts and approaches that are necessary for understanding the dynamic nexus of human health and disease. (Lab Fees: $40)

Prerequisite: BIO120H1, BIO130H1
Exclusion: HMB203H1/ HMB204H1
Recommended Preparation: BIO230H1/ BIO255H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB203H1 - Introduction to Global Health

Hours: 24L/12T

An introductory course covering the theories, operational components and strategies of implementing health care in resource-poor settings. Topics may include education, control of vector-borne diseases, essential drug provision, maternal and child health, nutrition, incorporation of alternative and complementary technologies, community participation and deployment of health service providers

Prerequisite: BIO120H1, BIO130H1
Exclusion: HMB202H1/ HMB204H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB204H1 - Introduction to Human Biology

Hours: 24L/12T

An introduction to the biological, health, environmental, and sociopolitical issues that influence human health and well-being. Topics include genetic variation within and across human populations, biological variation related to the environment, determinants of health and disease, and human behaviour and development.

Prerequisite: BIO120H1, BIO130H1
Exclusion: HMB202H1/ HMB203H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
**HMB226H1 - Indigenous Holistic Health**

**Hours:** 2P/22S

What is holistic health in an Indigenous framework? How can holistic health (physical, mental, emotional, and spiritual) be ethically explored to inform health and healing? What is cultural safety in health care systems? This course explores the effects of traditional practices, culture, activities, arts, land-based healing, music and ceremony in health and healing.

**Corequisite:**
HMB200H1/HMB201H1/HMB202H1/HMB203H1/HMB204H1/HST209H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**HMB265H1 - General & Human Genetics**

**Hours:** 24L/12T

An introduction to classical and modern methods of genetic analysis. Topics include Mendelian genetics, the genetics of human population and disease, genomics, and applications of genetics to human society.

**Prerequisite:** BIO120H1, BIO130H1, (CHM135H1/CHM139H1, CHM136H1/CHM138H1)/CHM151Y1

**Exclusion:** BIO260H1/BIO207H5

**Recommended Preparation:** Recommended Co-requisite: BIO230H1/BIO255H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**HMB299Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities... Not eligible for CR/NCR option.

**HMB300H1 - Neurobiology of Behaviour**

**Hours:** 24L/12T

This neuroscience course focuses on higher brain functions and the mechanisms underlying human and animal behaviours. Topics may include the emerging role of the gut microbiome’s impact on behaviour, pathogens that alter neuronal development and the biological basis of mindfulness and placebos. In addition, the impact that exercise and sleep play in modulating these behaviours are examined. Common experimental techniques used in neuroscience research such as brain imaging and cellular genetics are emphasized.

**Prerequisite:** BIO230H1/BIO255H1, HMB200H1/PSY290H1/PSL300H1/CJH332H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**HMB301H1 - Biotechnology**

**Hours:** 24L/12T

Students gain an appreciation for how science, government and society drive the development of biotechnology products. Topics include emerging immunotherapies, “living therapeutics”, emerging challenges, CRISPR-based therapeutics, emerging diagnostics, and stem cells and regenerative medicine.

**Prerequisite:** HMB265H1/BIO260H1

**Recommended Preparation:** HMB201H1/HMB360H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**HMB302H1 - Vertebrate Histology and Histopathology**

**Hours:** 24L/36P

Laboratory and lecture course studying the structure of the cell, various tissues and organ systems. Emphasis is on functional morphology and the adaptive response (including the inflammatory reaction) by comparing histological sections of normal tissues and organs with common diseases including neoplasia, respiratory, and liver disease. (Lab Materials Fee: $27)

**Prerequisite:** BIO230H1/BIO255H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**HMB303H1 - Global Health and Human Rights**

**Hours:** 28L/8S

The Global Health & Human Rights course uses a multidisciplinary approach to consider the theory and practice of global health as well as human rights from a
global health perspective. The course has an emphasis on the social, historical, economic and political determinants of global health and human rights. The critical approach used in the course will also allow students to begin to consider the limitations and contradictions inherent in the theory and practice of global health and in human rights.

**Prerequisite:** Completion of 9.0 credits, a HST200-level course/ HMB202H1/HMB203H1/HMB204H1

**Distribution Requirements:** Science, Social Science

**Breadth Requirements:** Society and its Institutions (3)

---

**HMB306H1 - Ethical Considerations in Emerging Technology**

**Hours:** 14L/10S

Advancing technology increases our ability to intervene in the course of natural events involving human health and well being. Questions arise as whether we ought to and who will benefit or be harmed. This course considers the far-reaching bioethical implications of emerging biotechnology. Topics to be explored include-but are not limited to- ethical considerations in emerging reproductive technologies, genetic alteration/genetic enhancement. Use of life support technologies, synthetic life, life extension.

**Prerequisite:** BIO230H1, HMB265H1/BIO260H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**HMB310H1 - Laboratory in Neuroscience**

**Hours:** 12L/36P

A laboratory course based on current research techniques for students in the Neuroscience program. Lab topics may include human brain imaging and disorders, electrophysiology, cell culture, and changes in gene expression during neuronal development. Labs start in the first week of term. (Lab Materials Fee: $63)

**Prerequisite:** Completion of 9.0 credits, HMB200H1/PSY290H1, HMB265H1/BIO260H1, BIO230H1/ BIO255H1

**Corequisite:** PSL300H1

**Exclusion:** HMB311H1/HMB312H1/HMB314H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**HMB311H1 - Laboratory in Fundamental Genetics and its Applications**

**Hours:** 12L/36P

A laboratory course based on current research techniques for students in the Fundamental Genetics and its Applications programs. Lab topics may include molecular biology and animal cell culture techniques, nutrigenomics; an overview of microarrays and a CRISPR module. Labs start in the first week of term. (Lab Materials Fee: $102)

**Prerequisite:** Completion of 9.0 credits, HMB201H1, HMB265H1/BIO260H1, BIO230H1/ BIO255H1

**Exclusion:** HMB310H1/HMB312H1/HMB314H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**HMB312H1 - Laboratory in Health and Disease**

**Hours:** 12L/36P

A laboratory course based on current research techniques and topics which may include basic microbiology, molecular biology and animal cell culture techniques, immunocytochemistry, changes in gene expression, and histological techniques. Labs start in the first week of term. (Lab Materials Fee: $81)

**Prerequisite:** Completion of 9.0 credits, HMB202H1/HMB203H1/HMB204H1, HMB265H1/BIO260H1, BIO230H1/BIO255H1

**Corequisite:** BCH210H1

**Exclusion:** HMB310H1/HMB311H1/HMB314H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**HMB314H1 - Laboratory in Human Biology**

**Hours:** 12L/36P

Students analyze whole body, cellular, and molecular responses to stress. Techniques range from those standard in medical practice (e.g., fitness measures, blood pressure, lung function) to current research techniques (cell culture, changes in gene expression). Students gain technical and analytical skills as they work at the bench to design and carry out individual and group experiments. Labs start in the first week of term. (Lab Materials Fee: $61)
**Prerequisite:** Completion of 9.0 credits, HMB202H1/HMB203H1/HMB214H1, BIO230H1/BIO255H1
**Corequisite:** PSL300H1, PSL301H1
**Exclusion:** HMB310H1/HMB311H1/HMB312H1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

---

**HMB320H1 - Neuroanatomy**

**Hours:** 24L/4T/10P

This is a rigorous, introductory course that addresses the structure of the vertebrate central nervous system with an emphasis on functional human neuroanatomy. It is designed for students who intend to continue with studies in the Neurosciences and related areas.

**Prerequisite:** Completion of 9.0 credits, PSL300H1, HMB200H1/PSY290H1, BIO230H1/BIO255H1

**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

---

**HMB321H1 - Topics in Genetics**

**Hours:** 24L/12T

The overall theme of this course is human genetics in disease. Topics include the molecular basis of human disease, using model organisms to identify disease-related genes, and genetic counseling. Expert guest lectures from clinical and basic sciences as well as small group work in tutorials build in-depth understanding.

**Prerequisite:** Completion of 9.0 credits, HMB202H1/HMB203H1/HMB204H1, BIO230H1/BIO255H1

**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

---

**HMB322H1 - Topics in Health & Disease**

**Hours:** 24L/12T

Explore the scientific basis and interdisciplinary healthcare practices of several diseases (diseases vary by year). Discuss current issues related to the biology and the impact of these diseases.

**Prerequisite:** Completion of 9.0 credits, HMB202H1/HMB203H1/HMB204H1, BIO230H1/BIO255H1, PSL300H1

**Corequisite:** PSL301H1
**Recommended Preparation:** HMB302H1

**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

---

**HMB323H1 - Global Health Research**

**Hours:** 24L/12T

Health is a responsibility shared worldwide. Globalization of health has impacted biomedical research. Students will explore current global health research advances and build skills in the design and conduct of global health research studies.

**Prerequisite:** Completion of 9.0 credits, HMB202H1/HMB203H1/HMB204H1, BIO230H1/BIO255H1

**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

---

**CJH332H1 - Cellular and Molecular Neurobiology of the Synapse**

**Previous Course Number:** CSB332H1
**Hours:** 36L

Examination of all aspects of the synapse in both the peripheral and central nervous systems of invertebrates and vertebrates. Topics include: neuroplasticity, synapse formation, synaptic transmission, synaptic modulation, and the molecular biological basis of neurodegenerative disorders.

**Prerequisite:** BIO271H1/PSL300H1

**Exclusion:** CSB332H1

**Recommended Preparation:** STA220H1/STA288H1

---

**HMB342H1 - Epidemiology of Health & Disease**

**Hours:** 24L/12T

This course engages students in the fundamental science of epidemiology applied to health and disease. After an introduction to various measures of health and disease, the scientific methods used to investigate, analyze, prevent and control health problems will be illustrated using social, biomedical and public health examples.

**Prerequisite:** 9.0 credits complete, (BIO120H1, BIO130H1)/HST209H1

**Exclusion:** HST373H1
**Recommended Preparation:** STA220H1/STA288H1
JNH350H1 - AIDS: Challenges and Successes

Previous Course Number: NEW350H1
Hours: 24L

Explores the pandemic of AIDS in Africa through a social science lens. (Given by Human Biology and New College)

Exclusion: NEW350H1
Recommended Preparation: AFR150Y1
Distribution Requirements: Humanities, Science, Social Science
Breadth Requirements: Society and its Institutions (3)

EHJ352H1 - Evolution of the Human Genome

Hours: 24L/12T

Human genome diversity and evolution with a focus on current research. The course integrates applications of human evolutionary genomics to the understanding of human history and adaptation, the causes of disease, and genome structure and function. Topics include: comparative genomics, population genomics of adaptation, association mapping, repetitive/selfish DNA, and gene duplication.

Prerequisite: BIO220H1, BIO260H1/HMB265H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB360H1 - Neurogenomics

Hours: 24L/12T

Genetic basis of both the normal and abnormal development of the nervous system and its function. Topics include the regulation of neural gene expression, the role of epigenetics on neuron function, genome wide association studies and disorders of brain and behaviour, optogenetic and pharmacogenetic techniques to probe neural circuit function. Tutorials emphasize critical analysis of primary research.

Prerequisite: Completion of 9.0 credits, HMB265H1/BIO260H1, HMB200H1/HMB201H1
Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

HMB394Y0 - International Research Project in Human Biology

Your individual, independent research project is supervised by a faculty member in an approved university. This unique opportunity to conduct a lab-based research project is open to students in any Human Biology program. Coordinated by Centre for International Experience. Not eligible for CR/NCR option.

Prerequisite: 8.5 credits including relevant courses in human biology.
Distribution Requirements: Science

HMB396Y0 - International Research Project in Human Biology

Your individual, independent research project is supervised by a faculty member in an approved university. This unique opportunity to conduct a lab-based research project is open to students in any Human Biology program. Not eligible for CR/NCR option. Coordinated by Woodsworth College.

Prerequisite: An approved 300-series science laboratory course and permission of the Human Biology Program from which application forms may be obtained.
Distribution Requirements: Science

HMB398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities... Not eligible for CR/NCR option.

Prerequisite: Completion of 9.0 credits and permission of the Human Biology Program from which application forms may be obtained.
Distribution Requirements: Science

HMB399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities... Not eligible for CR/NCR option.
HMB399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities... Not eligible for CR/NCR option.

HMB401H1 - Biomedical Advances & Technologies

Hours: 24L/12T

This course introduces life science students to biomedical advances and technologies in medicine, including drug patents, medical device implants, diagnostic and medical device software. Limitations of patent protection in commercializing medical products, and limitations to scalability may also be discussed. Specific topics vary from year to year and will be based on the course instructor's area(s) of expertise.

Prerequisite: Completion of 14.0 credits, HMB301H1/HMB321H1/BCH311H1/CSB349H1/MGY311Y1/PSL350H1, HMB201H1/HMB202H1/HMB203H1/HMB204H1
Recommended Preparation: A statistics course
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB402H1 - Topics in Translational Medicine

Hours: 18L/6S

The bridge between basic scientific research and clinical practice integrates fundamental knowledge about molecular/cellular mechanisms and clinical disorders to increase the potential for new medical treatments, therapies and interventions as well as understanding of disease processes. Specific topics vary from year to year and will be based on the instructor's area(s) of expertise.

Prerequisite: Completion of 14.0 credits, BCH210H1, BIO230H1/BIO255H1, HMB302H1/HMB321H1/HMB322H1/BCH311H1/CSB349H1/MGY311Y1/PSL350H1, and HMB202H1/HMB203H1/HMB204H1
Recommended Preparation: BCH311H1/ CSB349H1/ PSL350H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB406H1 - Health Care Ethics

Hours: 8L/16S

Since research involving human subjects lays the foundation for innovation in modern health care, this course examines health care ethics along a continuum from bench to bedside. Ethical issues are discussed in the context of specific cases involving human research, as well as contemporary clinical practice.

Prerequisite: Completion of 14.0 credits, a HMB300-level course, HMB306H1/PHL281H1/other ethics course with prior approval from the unit
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

JHA410H1 - Clinical Neuroimaging

Hours: 24L/12T

This course focuses on the use of neuroimaging techniques in understanding how trauma, disorders, and disease impact neural structure and function. Lectures will focus on introduction to techniques and clinical/research applications. Lab work will focus on the development of practical skills including image processing, analyses, and experimental design.

Prerequisite: Completion of 9.0 credits, PSL300H1, BIO230H1, HMB200H1/PSY290H1/ANA300Y1
Recommended Preparation: HMB320H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB420H1 - Seminar in Neurobiology of Behaviour

Hours: 12L/12S

This seminar course focuses on recent research into the neurobiology underlying human behaviour. A variety of normal and abnormal human behaviours are studied which may include: voluntary action; moral cognition; hedonism; aggression; mental health; addiction; the impact of the gut microbiome on brain development and health.

Prerequisite: Completion of 14.0 credits, HMB200H1, HMB300H1, HMB320H1/ANA300Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
HMB421H1 - Seminar in Fundamental Genetics and its Applications

**Hours:** 12L/12S

Theme based lecture and seminar course underlining current medical research in relation to the areas of genes and genetics. Topics vary yearly.

**Prerequisite:** Completion of 14.0 credits, HMB265H1/BIO260H1, HMB201H1

**Recommended Preparation:** HMB321H1/BCB311H1/CSB349H1/MGY311Y1/PSL350H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

HMB422H1 - Seminar in Health & Disease

**Hours:** 16L/8S

This course focuses on various medical research related to human disease. Topics vary based on course instructor's area(s) of expertise.

**Prerequisite:** Completion of 14.0 credits, PSL300H1, PSL301H1, HMB302H1/HMB322H1, and HMB202H1/HMB203H1/HMB204H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

HMB430H1 - Trends in Neuroscience

**Hours:** 18L/6S

Current research covering the breadth of neuroscience is showcased by members of the Collaborative Program in Neuroscience. Topics vary yearly, but cover the spectrum from molecular through genetic, cellular, developmental, systems, behavioural and modelling. As well, approaches to studying neurodegenerative diseases and clinical neurophysiology are introduced.

**Prerequisite:** Completion of 14.0 credits, HMB200H1, CJH332H1, HMB320H1/JHA410H1/ANA300Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

HMB431H1 - Innovation in Applied Genetics

**Hours:** 16L/8S

From bench to bedside, this seminar-based course explores innovation in research and technology and their application in the medical field. Special emphasis on innovative genetic engineering approaches used in combination with stem cell technologies to transform the field of personalized and regenerative medicine.

**Prerequisite:** 14.0 credits complete, HMB301H1/HMB360H1/HMB321H1, HMB201H1/HMB202H1/HMB203H1/HMB204H1

**Distribution Requirements:** Science

**Breadth Requirements:** Society and its Institutions (3)

HMB432H1 - Topics in Histology & Histopathology

**Hours:** 12L/12S

Lecture and seminar course emphasizing current research. Topics may include the digestive system, cardiovascular system, respiratory system, stem cells, and neoplasia. Topics vary depending on class interest.

**Prerequisite:** Completion of 14.0 credits, HMB302H1/HMB322H1

**Recommended Preparation:** BCH311H1/CSB349H1/MGY311Y1/PSL350H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

HMB433H1 - Topics in Global Health

**Hours:** 16L/8S

Seminar and theme based course examining the opportunity to apply basic knowledge of biological determinants of disease to designing health system interventions and informatics that can have a global impact in the near term.

**Prerequisite:** Completion of 14.0 credits, HMB303H1/HMB323H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)
HMB434H1 - Complementary & Integrative Medicine

Hours: 20L/4S

Introduction to complementary and alternative medical therapies. Topics include, Traditional Chinese Medicine, Naturopathy, Ayurvedic, and Mind-Body Practices. Biological mechanisms will be emphasized and therapies will be critically analyzed from an evidence-based research perspective. Integrating alternative therapies into Western practices with a focus on personalized medicine will be discussed.

Prerequisite: Completion of 14.0 credits, BCH210H1, BIO230H1/BIO255H1, HMB302H1/ HMB312H1/ HMB314H1/ HMB322H1/ HMB323H1/ HMB342H1, and HMB202H1/HMB203H1/HMB204H1

Recommended Preparation: HMB342H1/ CSB349H1/ PSL350H1/ BCH311H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

HMB435H1 - Selected Topics in Molecular Cell Biology

Hours: 16L/8S

Theme-based lecture and seminar course underlining current basic science research in the area of molecular and cell biology, focusing on cell migration and its relevance to human health and disease. Topics may focus on the impact of fundamental processes underlying the cell biology, physiology and pathophysiology of cell motility in a variety of systems (e.g. immune, nervous system, cancer context).

Prerequisite: Completion of 14.0 credits, BCH311H1/CSB349H1/ MGY311Y1/PSL350H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

HMB437H1 - The Biology of the Human Metallome

Hours: 24L

This course will discuss how heavy metals are integral to organ function through various biological pathways, the importance of metal regulation and control and its relationship with gene transcription. An introduction of metallo-therapeutics will also be featured, ranging from neurodegenerative therapies to cancer treatment.

Prerequisite: Completion of 14.0 credits, HMB265H1/BIO260H1, BIO230H1/ BIO255H1, BCH210H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

HMB440H1 - Dementia

Hours: 24L

This course, featuring a service-learning component, explores dementia. In patients with dementia, intellectual, social and occupational functioning deteriorate. The course addresses the multi-disciplinary aspects of dementia (clinical, genetic, molecular, social) with a focus on the most common cause of dementia, Alzheimer's disease.

A short application to enrol in this course is required. Information may be found via the Human Biology Program website.

Prerequisite: Completion of 14.0 credits, HMB265H1/BIO260H1, PSL300H1, HMB300H1/ HMB302H1/ HMB320H1/ HMB321H1/ ANA300Y1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

HMB441H1 - Genetics of Human Disease

Hours: 24L

This advanced course aims to provide students with current, in-depth knowledge of the genetics of specific human diseases, including single gene (e.g., Huntington disease), multifactorial (e.g. Alzheimer’s disease), and non-Mendelian (e.g. mitochondrial DNA-related disease) disorders, and how the use of genetics to elucidate disease mechanisms can lead to treatments and personalized medicine in order to improve healthcare.

Prerequisite: Completion of 14.0 credits, HMB265H1/BIO260H1, PSL300H1, HMB300H1/ HMB302H1/ HMB320H1/ HMB321H1/ CSB349H1/ MGY311Y1/PSL350H1 and HMB201H1/HMB202H1/HMB203H1/HMB204H1

Recommended Preparation: HMB321H1, PSL300H1, PSL301H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)
HMB442H1 - Brain Tumours: From Diagnosis to Treatment Effects

Hours: 16L/8S

This course focuses on current insights in brain tumour etiology and pathology as well as treatment options and side-effects. Based on a seminar format, this course is highly discussion-based and collaborative in nature.

Prerequisite: 14.0 credits complete, PSL300H1, HMB302H1/HMB322H1/HMB300H1/CJH332H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB443H1 - Global Hidden Hunger

Hours: 18L/6S

Vitamin and mineral deficiencies, termed ‘hidden hunger,’ affect about half the world’s population. Explore the global nature, catastrophic consequences, and causes of these deficiencies. Discuss formulation and implementation of international, national, and local policies to alleviate ‘hidden hunger’ especially in infants and young children. A service-learning opportunity is integrated. Students will be required to contribute to a local community organization while using course knowledge to develop a project or initiative beneficial to the organization and community.

A short application to enrol in this course is required. Information may be found via the Human Biology Program website.

Prerequisite: Completion of 14.0 credits, BIO230H1/ BIO255H1, HMB302H1/ HMB303H1/ HMB312H1/ HMB314H1/ HMB322H1/ HMB323H1/ CJH332H1 (formerly CSB332H1) V NFS382H1
Recommended Preparation: PSL301H1, CSB349H1/ PSL350H1/ BCH311H1
Distribution Requirements: Science
Breadth Requirements: Society and its Institutions (3)

HMB445H1 - AIDS: A Global Perspective

Hours: 6L/18S

Seminars explore the global AIDS crisis. Varying epidemiological profiles of AIDS are placed in broader biological, social, and cultural frameworks. The impact of globalization and structural inequality on local cultures and lifestyles provides a backdrop to the discussions.

Prerequisite: 14.0 credits complete, BIO220H1/ JSU237H1/ PHS300H1/JNH350H1
Exclusion: HAJ453H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB450H1 - Neurodevelopmental Disorders and Diseases

Hours: 24L/12T

Proper development of the human brain is essential for human health. This course will examine how neurodevelopment failures contribute to neurological disorders and diseases, such as epilepsy and autism. Current research from basic, translational, and clinical perspectives will be examined using case studies.

Prerequisite: Completion of 14.0 credits, HMB200H1, HMB320H1/ANA300Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB452H1 - Personalized Medicine

Hours: 12L/12S

The bridge between basic scientific research and clinical practice integrates fundamental knowledge about molecular/cellular mechanisms and clinical disorders to increase the potential for new medical treatments and technologies as well as understanding of disease processes. Specific topics vary from year to year and will be based on the course instructor's area(s) of expertise.

Prerequisite: 14.0 credits complete, HMB302H1/ HMB321H1/ HMB322H1, HMB201H1/HMB202H1/HMB203H1/HMB204H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

HMB453H1 - Current Issues in Environment and Health

Hours: 16L/8S

This course introduces students to complex issues at the interface between environment and health where health is broadly defined. Each year a current and controversial case study is explored from scientific, medical, political and policy perspectives. The course takes students from the molecular to individual to population and societal levels.
Prerequisite: Completion of 14.0 credits, ENV341H1/HMB302H1/HMB312H1/HMB314H1/HMB322H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

HMB460H1 - Seminars in Neurobiology of Mental Health

Hours: 12L/12S

This seminar course focuses on recent research into the neurobiology underlying mental health issues and is highly discussion-based and collaborative in nature. Specific topics are indicated by subtopic (which may vary yearly).

Prerequisite: 14.0 credits complete, HMB200H1, HMB300H1, HMB320H1/ANA300Y1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

HMB462H1 - Topics in Epidemiology

Hours: 12L/12S

The focus is on the theory and application of biostatistics and epidemiology to current developments in special topics in substantive areas of epidemiology (e.g., chronic disease, environmental & occupational health, infectious disease, methods, social, etc.).

Prerequisite: Completion of 14.0 credits, HMB342H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

HMB470H1 - Exercise and Sports Medicine

Hours: 22L/4S

This course considers the health benefits and risks of different forms of exercise, with a goal of understanding how people should exercise, and how much, depending on their athletic and health goals. It introduces elements of exercise science including the biomechanics of tissues and injuries to develop an understanding of how both the quantity and quality of movement and loading contribute to healthy training and/or injury. Some common injuries in sport such as knee injuries and concussions are used as examples of how various patterns of loading can cause injuries.

Prerequisite: Completion of 14.0 credits, PSL300H1, PSL301H1, HMB200H1/HMB201H1/HMB202H1/HMB203H1/HMB204H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

HMB471H1 - Performance Enhancement

Hours: 24L/4P

Enhancing performance has broad appeal. This course explores current developments for achieving peak performance academically, physically and emotionally. We focus on the scientific basis of the links between performance and stress, and of the benefits and risks of pharmacological methods to achieve performance enhancement. Various stress management skills are introduced.

Prerequisite: Completion of 14.0 credits, PSL300H1, HMB200H1/HMB201H1/HMB202H1/HMB203H1/HMB204H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

HMB472H1 - Exercise Physiology

Hours: 20L/4S

Examine the physiological and biochemical responses of the human body to both acute and chronic bouts of physical activity. The impact of activity on health, and health on physical activity, is explored by examining adaptations from the cellular to the systemic level of bodily function.

Prerequisite: Completion of 14.0 credits, PSL300H1, PSL301H1, HMB200H1/HMB201H1/HMB202H1/HMB203H1/HMB204H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

HMB473H1 - Exercise and Mental Health

Hours: 18L/10P/6S

This course, featuring a service-learning component, discusses how mental well-being is a critical element of total health. We explore the evidence underpinning the role of physical activity in the avoidance of mental
disorders, recovery from mental disorders, and the quality of life of those with or without mental disorders.

A short application to enroll in this course is required. Information may be found via the Human Biology Program website.

**Prerequisite:** Completion of 14.0 credits, PSL300H1, PSL301H1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

**HMB474H1 - Dental Sciences**

**Hours:** 20L/4S

Dentistry is one of the oldest branches of medicine responsible for the treatment of diseases of oral cavity. This course will introduce students to the key concepts as well as the latest research in the dental sciences, including but not limited to craniofacial structures, bone physiology, odontogenesis, pathogenesis of oral diseases, and technology in dental sciences.

**Prerequisite:** Completion of 14.0 credits, BIO230H1/BIO255H1, PSL300H1, PSL301H1, HMB200H1/HMB201H1/HMB202H1/HMB203H1/HMB204H1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

**HMB474H1 - Advanced Laboratory in Human Biology**

**Hours:** 36P/12S

Building on their experience in 3rd-year labs, students participate in inquiry-based laboratory experiments in diverse areas of current human biology research. Open to students in any Human Biology program. Labs start in the first week of term. (Lab Materials Fee: $107)

**Prerequisite:** Completion of 14.0 credits, HMB310H1/ HMB311H1/ HMB312H1/ HMB314H1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

**HMB490Y1 - Health in Community**

**Hours:** 24L/24T

An experiential learning course exploring health-related challenges and social determinants of health in partnership with local community organizations. Lectures and tutorials will support learning of selected biological and social aspects of health and disease, neuroscience, genetics or population health, and the development of scientific knowledge translation skills relevant to the community agencies. Cannot be taken concurrently with a full year research project course.

**Prerequisite:** BIO230H1/ BIO255H1, HMB265H1/ BIO260H1, BCH210H1, PSL300H1, PSL301H1, HMB200H1/ HMB201H1/ HMB202H1/ HMB203H1/ HMB204H1
**Exclusion:** HMB473H1
**Recommended Preparation:** A 300-level science lab course
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4), Society and its Institutions (3)

**HMB496Y1 - Research Project in Human Biology**

A research project course for students enrolled in a Human Biology program, supervised by a faculty member appointed in a faculty or division at St. George Campus (Faculties of Arts & Science, Medicine, Engineering, Dalla Lana School of Public Health, etc.). Open to third and fourth year students.

Students are responsible for securing their own supervisor. Should a HMB Specialist require help securing a supervisor, the request must be made by email to the Human Biology Program Office no later than July 20 for Academic year projects and January 30 for Summer projects.

Completed applications for this course are due to the Human Biology Program Office by September 1 for Academic year projects and May 1 for Summer projects. Please see the application on the Special Enrolment Courses page on the HMB Website.

Not eligible for CR/NCR option.

**Prerequisite:** Permission of the Human Biology Program; please refer to the Human Biology Program website for more details
**Exclusion:** Students are not permitted to do a HMB research project concurrently with another research project
**Distribution Requirements:** Science
HMB499Y1 - Research Project in Human Biology II

A research project course for students enrolled in a Human Biology program, supervised by a faculty member appointed in a faculty or division at St. George Campus (Faculties of Arts & Science, Medicine, Engineering, Dalla Lana School of Public Health, etc.).

Students are responsible for securing their own supervisor. Should a HMB Specialist require help securing a supervisor, the request must be made by email to the Human Biology Program Office no later than July 20 for Academic year projects and January 30 for Summer projects.

Completed applications for this course are due to the Human Biology Program Office by September 1 for Academic year projects and May 1 for Summer projects. Please see the application on the Special Enrolment Courses page on the HMB Website.

Not eligible for CR/NCR option.

**Prerequisite:** HMB496Y1, and permission of the program

**Exclusion:** Students are not permitted to do a HMB research project concurrently with another research project.

Hungarian

Given by the Centre for European, Russian, and Eurasian Studies

Hungarian is spoken by ten and a half million inhabitants of present-day Hungary, about three million people in the neighbouring countries, and perhaps as many as an additional two million around the world. These figures make Hungarian, which is related to Finnish, Estonian, and Lappish, but virtually no other language in Europe, by far the largest minority language in the great Indo-European language territory.

Despite the isolation that might have been imposed by the uniqueness of their language, Hungarians have been engaged with, and participants in, greater European affairs since their arrival in the Carpathian basin more than a thousand years ago. Hungarians have made significant contributions in the fields of arts, science, and mathematics, winning Nobel prizes in Chemistry (4), Medicine (3), Physics (3), Economics, and Literature. In the music world the names Bárók, Kodály, Lehár, Liszt, Szél, Ormandy, Schiff, and many others are internationally famous. Leo Szilárd, Edward Teller, Paul Erdős, and John von Neumann are famous figures in theoretical physics and mathematics. Joseph Biró developed the ball-point pen and to this day the British call a ball-point pen, a biro. Hungarians have also become famous in sports, particularly soccer, boxing, and fencing, and in the world of cinema. And who has not played with the Rubik's cube?

Hungarian studies at the University of Toronto focus on the language, literature, cinema and culture of Hungary and on the international role of Hungary and Hungarians - particularly on Hungarian immigration to Canada. For many of the courses no prior knowledge of the Hungarian language is necessary, making them easily accessible to students in other programs.

Hungarian Programs

Hungarian Studies Major (Arts Program) - ASMAJ1124

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(6.0 credits, including 2.0 credits in Hungarian language study)

First Year:
HUN100Y1

Higher Years:
1. HUN200Y1, HUN310Y1, HUN320Y1
2. Two courses from: EUR200Y1, HIS241H1, HIS242H1, HIS251Y1, HIS389H1 (Hungarian History), HIS453H1, HUN355H1, HUN345H1, HUN355H1, HUN356H1, HUN440Y1, HUN450H1, HUN455H1, INI381H1

Hungarian Studies Minor (Arts Program) - ASMIN1124

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(4 full courses or their equivalent, including at least one at the 300+ level)

Four courses from: HUN100Y1, HUN200Y1, HUN310Y1, HUN320Y1, HUN335H1, HUN345H1, HUN351H1, HUN440Y1, HUN450H1, HUN455H1; HIS241H1, HIS251Y1, HIS389H1 (Hungarian History), HIS453H1; INI381H1

Faculty of Arts & Science Language Citation

The Hungarian program participates in the Faculty of Arts and Science’s Language Citation initiative. Students may achieve this Citation in Hungarian.

Language study is a demanding and intellectually rewarding educational experience. Our students learn to communicate both orally and in writing in other languages and are thus able to experience other parts of the world in more intimate ways. Their access to other cultures opens doors for further study and employment. Students in our department also have the opportunity to read a vast array of world-renowned authors in the original languages, as well as works – normally not available in English – in other

709
areas of study, for example, cinema studies, drama, folklore, history, intellectual history, philosophy, mathematics, and political science.

The Language Citation recognizes a significant level of achievement in language study. For course selection students should consult the Undergraduate Coordinator as early as possible since not every language course is offered each year. Students who begin language study at the Intermediate level should consult the Undergraduate Coordinator for approval of advanced literature and culture courses that may satisfy the requirements for the Language Citation.

The Language Citation in Hungarian is available to students who complete HUN200Y1 and HUN310Y1 with a grade of at least B-.

Students should note that, as explained in the About Programs of Study section of this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

Note

The Department reserves the right to assign students to courses appropriate to their level of competence in Hungarian.

Hungarian Courses

HUN100Y1 - Elementary Hungarian

Hours: 120P

This course is aimed at students interested in Hungarian but have no prior knowledge of the language. The course emphasizes essential vocabulary, basic comprehension, speaking, reading and writing skills with a balance between communicative activities and grammar practices. Communicative activities will include group and partner work to encourage interactive learning.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

HUN200Y1 - Intermediate Hungarian

Hours: 96P

Review of descriptive grammar; studies in syntax; vocabulary building; intensive oral practice; composition; reading and translation.

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

HUN310Y1 - Advanced Hungarian

Hours: 48S

This course is intended to build on the skills and knowledge acquired by the students in the previous Hungarian language courses. It will consist of a more advanced study of grammar, more complex vocabulary, higher level of oral skills and longer reading, writing and translation exercises. Communicative activities will include group and partner work to encourage interactive learning.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

HUN320Y1 - A Survey of Hungarian Literature

Hours: 48S

A chronological study of the development of Hungarian literature since the 12th century; emphasis both on outstanding writers and on significant movements or themes. Transformations of ideas and changes in language and style. No knowledge of Hungarian required.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

HUN335H1 - Urban vs. Rural: Immigration to and Settlement in North America

Hours: 12L/12S

This course will provide an examination of the history of Hungarian Immigration to and settlement in North America. The course will examine the "push" and "pull" factors, the socio-economic factors involved, their patterns of migration and the organizational development of the communities they founded in North America. The course will compare and contrast the reception the immigrants and later refugees received in the United States and
Canada and examine how they adapted to their new homelands.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

### HUN345H1 - The Dynamic of Hungarian Culture, Ethnography, and Folklore

**Hours:** 12L/12S

Explore the cultural traditions, historical processes, myths, and figures that have shaped and redefined Hungarian civilization and national identity. Theoretical and practical classes on ethno-genesis, anthropology, and folklore. Readings in English (also available in Hungarian).

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### HUN355H1 - One Hundred Years of Dramatic Change: History of the Past Century and Reflections of Society in Hungarian Culture

**Hours:** 12L/12S

Explore Hungary's rapidly changing place in Europe. Focus on political, sociological, and historical understandings of nationalism and identity as they manifest themselves in literature, history, and culture. Knowledge of Hungarian not required.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

### HUN455H1 - Hungary and Europe: Cultural Adaptation in the Late 20th Century

**Hours:** 12L/12S

Focus on literature, art, mass media, and popular culture in post-1990 Hungary with special emphasis on the past ties to European culture and the impact of European integration. Readings in English (also available in Hungarian).

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### HUN497Y1 - Independent Study (Hungarian)

Translation course concentrating on Hungarian prose translation. Not eligible for CR/NCR option.

**Prerequisite:** Permission of Department  
**Distribution Requirements:** Humanities

### HUN498H1 - Independent Study (Hungarian)

Translation course concentrating on Hungarian prose translation. Not eligible for CR/NCR option.

**Prerequisite:** Permission of Department  
**Distribution Requirements:** Humanities
Immunology

**Introduction**

Immunology is an integrative branch of the medical sciences that draws upon the more traditional disciplines of Molecular Biology, Microbiology, Pathology, and Biochemistry. In essence, Immunology is the study of the physiological responses that result when foreign (i.e. non-self) materials are introduced into a vertebrate organism such as humans. Traditionally, the discipline has focussed on the body’s response to infectious micro-organisms, with the purpose of developing effective vaccines. However, the scope of modern Immunology now encompasses all aspects of self vs. non-self recognition phenomena including organ transplantation, tumour immunology and autoimmune diseases. Recent major advances in our understanding of the cellular and molecular basis of the immune response promise to provide us with a new generation of prophylactic, therapeutic and diagnostic reagents of relevance to human and animal health.
The Department of Immunology, in collaboration with Trinity College, co-ordinates specialist, major, and minor programs in Immunology. The emphasis of the specialist program is to provide students with a sound theoretical understanding of the cellular and molecular basis of non-self recognition, together with sufficient laboratory experience to enable the students to consider embarking on a career in the discipline. The major and minor programs offer students fundamental training in Immunology and gives them the opportunity to combine Immunology with another program in Life Sciences, Basic Sciences, or within the Arts.

Immunologists may have careers in universities and other centres of learning and research, as well as in the biotechnology industries, diagnostic laboratories and various government agencies. Courses in this specialist program are drawn from offerings by the Department, together with courses from other Departments, taught in some cases by members of the Department of Immunology. As enrolment in the specialist and major programs are restricted, please consult specific requirements outlined in the program description section.

Immunology Programs

Immunology Specialist
(Science Program) - ASSPE1002

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade and Variable Minimum Grade Average
Minimum grades combined with a minimum grade average in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1 and BIO130H1
- CHM135H1 and CHM136H1, or CHM138H1 and CHM139H1, or CHM151Y1
- MAT135H1 and MAT136H1, or MAT137Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in each course, or a final grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining the minimum final grades and grade average does not guarantee admission to the program. While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 70s; average = mid 70s. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of the student’s entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at undergraduate.immunology@utoronto.ca, specify which program you would like to be considered for, and provide your student number.

Please consult the Arts & Science Program Toolkit for more information on program enrolment. Additional information is also available on the Immunology website at www.immunology.utoronto.ca.

Completion Requirements:

(13.5 credits)

First Year:
BIO120H1; BIO130H1; [ CHM135H1 (formerly CHM139H1); CHM136H1 (formerly CHM138H1)]/ CHM151Y1; ( MAT135H1; MAT136H1)/ MAT137Y1

First Year or upper years:
( PHY131H1; PHY132H1)/ ( PHY151H1; PHY152H1)
(Note 1)

Second Year:
1. BCH242Y1; BIO230H1; BIO260H1/ HMB265H1; IMM250H1; STA288H1
2. One course from the following list: BIO220H1/ TRN225Y1/ TRN236H1/ CHM220H1/ CHM247H1/ CHM249H1

Third Year:
1. BCH377H1; IMM341H1; IMM351H1; MGY311Y1; IMM360H1
2. MGY377H1/ MGY378H1

Fourth Year:
1. IMM435H1
2. 1.0 credit from the following list: IMM428H1/
3. IMM450Y1 or 1.0 credit at the 400-series in ANA, BCH, IMM, LMP, MGY, CSB.

Notes:

1. (PHY131H1; PHY132H1)/ (PHY151H1; PHY152H1) may be taken in the first year or subsequent years and are not required for entrance into the specialist program.
2. IMM435H1 is capped at 40 students. Priority will be given to Immunology Specialist students, followed by Immunology Major students.
3. Students considering graduate school are encouraged to take IMM385Y1.

Immunology Major (Science Program) - ASMAJ1002

2. 0.5 credit from the following list: BIO220H1/STA288H1/TRN225Y1/TRN236H1/CHM247H1/CHM249H1

Third Year:
IMM340H1; IMM350H1; CSB349H1/BCH311H1; 1.0 credit from the following list: BCH370H1/MGY377H1/MGY378H1/PHL281H1

Fourth Year:
1.0 credit from the following list: IMM428H1/IMM429H1/IMM430H1/IMM431H1/IMM435H1/MIJ485H1

Notes:

1. Students considering graduate school are encouraged to add the additional non-compulsory IMM450Y1 research course, if space permits.
2. MIJ485H1 requires MGY377H1 & MGY378H1 as pre-requisites.
3. IMM435H1 is capped at 40 students. Priority will be given to Immunology Specialist students, followed by Immunology Major students.

Immunology Minor (Science Program) - ASMIN1002

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Immunology Courses

**IMM199H1 - Immunology in the News Today**

**Hours:** 24S

Why do we get sick? How do vaccines work? Does our diet influence our immunity? This course is intended to inspire curiosity about questions generated by immunology concepts that are prevalent in the news today. Different topics will be explored each week including immunity worldwide, human vaccinations and the mucosal immune system. Topics will be placed in context through real-life case studies, immunology virtual laboratory simulation, interactions with faculty members and extensive coverage of the basic science underlying each topic. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

**IMM221H1 - Origins of Immunology**

**Hours:** 24L/12T

This course will examine the milestones in the field of immunology from ancient to current times, with specific emphasis on 1880 to 1980. It will observe how the concept of immunity has changed over time and examine the major events and discoveries that shaped how immunology is viewed today. Pioneers, such as Edward Jenner, Louis Pasteur, Robert Koch, Paul Ehrlich and Brigitte Askonas, and their contributions to the field will be discussed in both historical and scientific context as well as their impact on society. Assignments are staggered for students to build upon instructor’s feedback.

**Recommended Preparation:** BIO120H1, BIO130H1
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)

**IMM250H1 - The Immune System and Infectious Disease**

**Hours:** 24L

Students will be introduced to the basic concepts of immunity to infectious disease and how breakdown of the immune response can lead to auto-immunity. We will trace the history of current ideas in immunology and the immune response by examining how bacteria and viruses cause disease and the initial discoveries that led to such developments as vaccination. Current topical and newsworthy infectious diseases (HIV, tuberculosis, SARS, avian flu) will be used as examples of how the immune system copes with microbial infections.

**Recommended Preparation:** BIO120H1, BIO130H1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

**IMM340H1 - Fundamental Immunology**

**Hours:** 24L/12T

This course introduces the basic principles and key players of the immune system: differences and interplay between innate and adaptive immunity, how immune cells develop and function, how immune cells recognize threats and danger and mount an appropriate and measured response. This course is offered in the Fall term with in-class lectures and tutorials, as well as in the Summer term with hybrid delivery (online lectures and in-class tutorials).

**Prerequisite:** BIO230H1
**Exclusion:** IMM334Y1/IMM335Y1/IMM341H1
**Recommended Preparation:** IMM250H1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

**IMM341H1 - Fundamental Immunology (Advanced)**

**Hours:** 24L/12T
This course introduces the fundamental principles and key players of the immune system: differences and interplay between innate and adaptive immunity, how immune cells develop and function, how immune cells recognize threats and danger and mount an appropriate and measured response. Intended for students specializing in Immunology and related programs.

**Prerequisite:** BIO230H1
**Exclusion:** IMM334Y1/IMM335Y1/IMM340H1
**Recommended Preparation:** IMM250H1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

### IMM350H1 - The Immune System in Action

**Hours:** 24L/12T

This course illustrates how different elements of the immune system come together to mount efficient and measured responses. Topics include response to infectious microorganisms, allergy and autoimmunity, immune responses against cancer, and transplantation immunology.

**Prerequisite:** IMM340H1/IMM341H1
**Exclusion:** IMM334Y1/IMM335Y1/IMM351H1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

### IMM351H1 - The Immune System in Action (Advanced)

**Hours:** 24L/12T

This course illustrates how different elements of the immune system come together to mount efficient and measured responses. Topics include response to infectious microorganisms, allergy and autoimmunity, immune responses against cancer, and transplantation immunology. Intended for students specializing in Immunology and related programs.

**Prerequisite:** IMM341H1/IMM340H1
**Exclusion:** IMM334Y1/IMM335Y1/IMM350H1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

### IMM360H1 - Scientific Methods and Research in Immunology

**Hours:** 24L/24T

This course will provide students with an opportunity to advance their understanding of research in Immunology in accordance with scientific methodology. Students will critically appraise scientific articles, design and analyze scientific experiments, and develop the core skills of data and statistical literacy. This course is well suited for anyone interested in discovering knowledge in Immunology, providing students with a methodology for the achievement of scientific research activities.

**Prerequisite:** IMM250H1, BCH210H1/BCH242Y1, BIO230H1/BIO255H1, BIO260H1/HMB265H1, STA288H1/STA220H1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

### IMM385Y1 - Special Research Project in Immunology

**Hours:** 180P

This course provides an opportunity for students to conduct a research project under the supervision of a member of the Faculty. Students are expected to devote a minimum of seven hours per week to the course from the week the fall term lectures begin to the last week of the spring term. Research projects will involve experimental design and work, data analyses, literature reading etc.

**Prerequisite:** IMM250H1
**Corequisite:** IMM340H1/IMM341H1

### IMM428H1 - Molecular Immunology

**Hours:** 24L

This course will focus on the molecular and cellular biology of immune recognition. The course will emphasize historical and recent experimental evidence leading to our current understanding of immune recognition. Subtopics are subject to change and have recently included mechanisms of diversification of immunoglobulin receptors, T cell –MHC interactions, T cell activation and signaling mechanisms; receptors of the innate immune system, immune recognition by natural killer cells.
**Prerequisite:** BCH210H1/BCH242Y1, BCH311H1/CSB349H1/ MGY311Y1/PSL350H1, IMM350H1/IMM351H1/IMM334Y1/IMM335Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**IMM429H1 - Developmental Immunology**

**Hours:** 24L

Hematopoiesis, myelopoiesis, lymphopoiesis, a study of the development of cells involved in the immune system including their ontogeny, physical, molecular, and biochemical characteristics, regulation of differentiation and maturation, positive and negative selection of lymphocytes.

**Prerequisite:** IMM350H1/IMM351H1 (IMM334Y1/IMM335Y1)

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**IMM430H1 - Clinical Immunology**

**Hours:** 24L/24T

This course will address the underlying pathogenesis as well as highlight the challenges of treating immune-related conditions such as autoimmunity, cancer, HIV, and transplantation and graft rejection. Half of the lectures will address the genetics and cellular pathogenesis of autoimmune diseases such as multiple sclerosis, type I diabetes and lupus. Other lectures will overview a number of immunological challenges faced in the clinic, such as preventing graft rejection after transplantation or boosting the immune system to fight cancer and HIV.

**Prerequisite:** IMM350H1/IMM351H1 (IMM334Y1/IMM335Y1)

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**IMM431H1 - Immunotherapy**

**Hours:** 24L/12T

Therapies that enhance, or suppress, the body’s immune response have proven remarkably efficient for the treatment of human diseases such as cancer, autoimmunity and chronic inflammation. Some of these therapies, such as the so-called checkpoint inhibitors and CAR-T cell therapies have recently leaped from bench to bedside. This course will cover the fundamental immune principles at play, how they were discovered, as well as the existing and future immune therapies to treat these diseases.

**Prerequisite:** IMM350H1/IMM351H1

**Recommended Preparation:** IMM428H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**IMM435H1 - Practical Immunology**

**Hours:** 72P

Application of basic principles acquired from IMM350H1/IMM351H1 (IMM334Y1/IMM335Y1); immunological procedures performed in research and diagnostic laboratories using molecular and cellular approaches; instruction through lectures, video tapes, and practical exercises in the laboratory. (Lab Materials Fee: $50)

**Prerequisite:** BCH210H1/BCH242Y1, IMM350H1/IMM351H1/IMM334Y1/IMM335Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**IMM450Y1 - Research Project in Immunology**

**Hours:** 154P

An opportunity for specialized research in Immunology under the supervision of a member of the Faculty. There are no pre- or co-requisites, although preference is given to Immunology Specialist and Major students. Not eligible for CR/NCR option.

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**MIJ485H1 - Vaccines and Immunity**

**Hours:** 36L

Analysis of the strategies used by pathogenic microbes to evade specific and innate immune responses, and the strategies used to combat infectious disease using vaccines, with an emphasis on molecular and immunological aspects. Special topics include: molecular basis of pathogenicity and immune-evasion strategies; vaccination strategies; challenges to vaccine...
implementation (given jointly by the Departments of Molecular Genetics and Immunology).

**Prerequisite:** (IMM340H1/IMM341H1), (IMM350H1/IMM351H1), MGY377H1, MGY378H1
**Exclusion:** MBY480H1, MGY485H1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

### Introduction

Indigenous Studies is an interdisciplinary undergraduate program dedicated to the study and research of Indigenous peoples in Canada and throughout the world. The program offers courses that engender a rigorous and respectful understanding of Indigenous peoples’ languages, knowledges, cultures, histories, politics, arts, intellectual traditions and research methodologies. INS offers Specialist, Major, and Minor Programs within the Faculty of Arts & Science. Students are encouraged to seek counselling and information about this program from indigenous.studies@utoronto.ca or on our website at https://www.indigenousstudies.utoronto.ca.

### Indigenous Studies Programs

#### Indigenous Studies Specialist (Arts Program) - ASSPE0115

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

(10.0 credits, including at least 1.0 credit at the 400-level)

1. INS201Y1
2. INS210Y1 / INS220Y1 / INS230H1 + INS231H1
3. INS300Y1 / INS301Y1, JPI201H1, JIG322H1
4. INS390H1 and INS460H1
5. 4.0 credits from Group A (note: some of these courses have prerequisites)
6. 1.0 credit from Group A or Group B below (note: some of these courses have prerequisites)
7. For numbers 5 and 6 above, 2.0 credits must be at the 300-level and a 0.5 credit must be at the 400-level.

**Group A:**
- INS200Y1, INS201Y1, JPI201H1, INS205H1, INS210Y1, INS215Y1, INS220Y1, INS230H1, INS231H1, INS240Y1, INS250H1, INS261H1, INS300Y1, INS301Y1, INS302H1, INS310Y1, INS322H1, JIG322H1, INS323Y1, INS340Y1, INS341H1, INS350H1, INS351Y1, INS352H1, INS353H1, INS354H1, INS355H1, INS356H1, INS357H1, INS358H1, INS359H1, INS360H1, INS361H1, INS372H1, INS390H1, INS398H0, INS399Y0, INS491Y1, INS402H1, INS403H1, INS404H1, INS405H1, INS406H1, JIG440H1, JFP450H1, INS460H1, INS461H1, INS491Y1, INS493H1, INS494Y1, INS495Y1, INS496H1, INS497H1, INS498Y1, ANT315H1, ANT327H1, ANT384H1, ANT388H1, ANT458H1, ENG254H1, ENG355Y1, HIS262H1, HIS366H1, HIS369H1, HIS419H1, HIS472H1, LIN458H1, WGS395H1

**Group B:**
- ANT200Y1, ANT204H1, ANT319Y1, ANT311Y1, ANT348H1, ANT366H1, ANT410H1, CAR225H1, CAR226H1, CSE240H1, HIS106Y1, HIS263Y1, HIS318H1, HIS365H1, HIS402H1, JHN323H1, LIN351H1, RLG307H1

Note: Effective Fall 2021, courses associated with New College’s Caribbean Studies, and Critical Studies in Equity and Solidarity programs will have the new “CAR” and “CSE” designators respectively.

#### Indigenous Studies Major (Arts Program) - ASMAJ0115

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

(7.0 credits, including at least 2.0 credits at the 300+ level)

1. INS201Y1
2. INS210Y1 / INS220Y1 / INS230H1 + INS231H1
3. INS300Y1 / INS301Y1, JPI201H1, JIG322H1
4. INS390H1
5. 2.0 credits from INS, JFP, JIG or JPI (note: some of these courses have prerequisites)
6. One 0.5 credit from Group A or one 0.5 credit from Group B below (note: some of these courses have...
prerequisites)
7. Of the courses chosen, at least 2.0 credits must be at the 300+ level, of which a 0.5 credit must be at the 400-level.

Group A:
INS200H1, INS201Y1, JPI201H1, INS205H1, INS210Y1, INS215Y1, INS220Y1, INS230H1, INS231H1, INS240Y1, INS250H1, INS261H1, INS300Y1, INS301Y1, INS302H1, INS310Y1, INS322H1, JIG322H1, INS323Y1, INS340Y1, INS341H1, INS350H1, INS351Y1, INS352H1, INS355H1, INS352H1, INS353H1, INS354H1, INS360Y1, INS371H1, INS372H1, INS390H1, INS398H0, INS399Y0, INS491Y1, INS402H1, INS403H1, INS404H1, INS405H1, INS407H1, JIG440H1, JFP450H1, INS460H1, INS491Y1, INS494Y1, INS495Y1, INS496H1, INS497H1, INS498Y1, ANT315H1, ANT327H1, ANT384H1, ANT388H1, ANT458H1, ENG254H1, ENG355Y1, HIS262H1, HIS366H1, HIS369H1, HIS419H1, HIS472H1, LIN458H1, WGS395H1

Group B:
ANT200Y1, ANT204H1, ANT319Y1, ANT311Y1, ANT348H1, ANT366H1, ANT410H1, CAR225H1, CAR226H1, CSE240H1, HIS106Y1, HIS263Y1, HIS318H1, HIS365H1, HIS402H1, JHN323H1, LIN351H1, RLG307H1

Note: Effective Fall 2021, courses associated with New College's Caribbean Studies, and Critical Studies in Equity and Solidarity programs will have the new "CAR" and "CSE" designators respectively.

Indigenous Studies Minor (Arts Program) - ASMIN0115

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(4.0 credits, including at least 1.0 credit at the 300+ level)
1. INS201Y1
2. INS300Y1/ INS301Y1/( JPI201H1 and JIG322H1)

3. 1.0 additional credit from INS, JFP, JIG or JPI (note: some of these courses have prerequisites)
4. 1.0 additional credit from Group A below (note: some of these courses have prerequisites)

Group A:
INS200H1, INS201Y1, JPI201H1, INS205H1, INS210Y1, INS215Y1, INS220Y1, INS230H1, INS231H1, INS240Y1, INS250H1, INS261H1, INS300Y1, INS301Y1, INS302H1, INS310Y1, INS322H1, JIG322H1, INS323Y1, INS340Y1, INS341H1, INS350H1, INS351Y1, INS352H1, INS355H1, INS352H1, INS353H1, INS354H1, INS360Y1, INS371H1, INS372H1, INS390H1, INS398H0, INS399Y0, INS491Y1, INS402H1, INS403H1, INS404H1, INS405H1, INS407H1, JIG440H1, JFP450H1, INS460H1, INS491Y1, INS493H1, INS494Y1, INS495Y1, INS496H1, INS497H1, INS498Y1, ANT315H1, ANT327H1, ANT384H1, ANT388H1, ANT458H1, ENG254H1, ENG355Y1, HIS262H1, HIS366H1, HIS369H1, HIS419H1, HIS472H1, LIN458H1, WGS395H1

Faculty of Arts & Science Language Citation

Indigenous Studies participates in the Faculty of Arts & Science Language Citation Initiative for Anishinaabemowin. The study of the Anishinaabe language is a demanding and intellectually rewarding educational experience. Successful study of this language demonstrates intelligence, discipline, analytical sophistication, and an excellent memory. The study of any language provides invaluable insights into the varieties of human culture and expression.

In each language the Language Citation recognizes a significant level of achievement in language study with a high level of academic success. The Citation in Anishinaabemowin is available to students who complete INS210Y1 and earn a grade of at least B- in INS310Y1 and INS301Y1/INS351Y1.

Students should note that, as explained in the About Programs of Study section of this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.
Indigenous Studies Courses

**INS200H1 - Introduction to Indigenous Truth and Resilience**

**Hours:** 24L/12T

This course is an interdisciplinary introduction to the historical and contemporary experiences of Indigenous peoples in Canada, with an emphasis on local lands and peoples. The course will explore Indigenous resilience, relationships with settlers and settler states, and principles and ethics of Indigenous Knowledge. Tutorials will focus on critical discussion and experiential learning.

**Distribution Requirements:** Humanities, Social Science
**Breadth Requirements:** Society and its Institutions (3)

**INS201Y1 - Introduction to Indigenous Studies: Foundations, History and Politics**

**Hours:** 48L/24T

This course is designed to introduce students to the ideas, methods and themes of the discipline of Indigenous Studies. The development of the field of Indigenous Studies in Canada will form an important focus in the first half. The second part of the course will address "history and politics", including an overview of the historical processes of diplomacy, alliances, and treaty-making.

**Exclusion:** ABS201Y1
**Distribution Requirements:** Humanities, Social Science
**Breadth Requirements:** Creative and Cultural Representations (1), Society and its Institutions (3)

**JPI201H1 - Indigenous Politics in Canada**

**Previous Course Number:** POL308H1

**Hours:** 24L/12T

This course explores key issues in Indigenous politics in Canada. Provides students with an overview of historical and contemporary socio-political issues in Indigenous societies and institutions such as Indigenous self-governance, land claims and treaty negotiations.

**Prerequisite:** 4.0 credits/1.0 POL credit/INS201Y1
**Exclusion:** POL308H1/POLC56H3
**Recommended Preparation:** POL214H1 or POL224H1
**Distribution Requirements:** Social Science

Introduction

Since 1965, the Centre for Industrial Relations and Human Resources (CIRHR) has brought together professors from many different disciplines and departments at the University of Toronto to teach and conduct research on all aspects of work, the workplace, labour markets and labour relations. The CIRHR’s graduate programs rank among the best in North America and its faculty reflects the depth, breadth and diversity of our university.

The overarching goal of the undergraduate program in Industrial Relations and Human Resources is to offer an interdisciplinary learning opportunity in which to study the ‘world of work and employment’ in a Canadian and global context from the perspectives of economics, history, law, management, political science, psychology and sociology. The program provides students with a theoretical background and knowledge of current developments in the field that will serve as a basis for careers areas such as: a Human Resources Generalist, Recruitment Specialist, HR Consultant, Employment Equity Officer, Training and Development Consultant, Corporate Trainer, Policy Advisor in the Ministry of Labour, Union Representative and Labour Relations Specialist. The undergraduate program in IRHR is also a perfect platform from which to enter post-graduate programs in Industrial Relations and Human Resources, Law with a specialisation in labour and employment, as well as policy and labour studies programs.

Students are encouraged to use the resources available in both the CIRHR Library and Career Centre in order to investigate current labour market trends and career options in Industrial Relations and Human Resources. In Ontario, the Human Resources Professionals Association (HRPA) regulates the HR profession and issues the Certified Human Resources Professional (CHRP) designation, the national standard for excellence in human resources management. IRHR students are also encouraged to explore the services offered by HRPA. The IRHR Program Office is located in Woodsworth College and students continue to benefit from the rich academic support services and facilities available at the College.

Regarding Program Enrolment

Admission to major and specialist programs will be determined by a student's mark in specific courses. These are limited enrolment programs that can only accommodate a limited number of students. Achieving the marks required does not necessarily guarantee admission to the program in any given year. Requests for admission will be considered in the first program request period only. For detailed program application instructions, please consult the Arts & Science Program Toolkit. Do not change your program after Year 3 if you are required to complete your degree in four years as prerequisites and program requirements will not be waived. Due to the limited enrolment nature of this program students are strongly advised to enrol in backup programs.
Arts & Science Internship Program

The new Arts & Science Internship Program (ASIP) stream is available to students entering their second year of study in Fall 2021 and enrolled in the Industrial Relations & Human Resources Specialist or Major.

- Enrollment is limited and requires a supplemental application. Students enrolled in the ASIP stream will be required to complete mandatory Professional Development programming plus a minimum of 12 and maximum of 20 months of paid, full-time work experience. The time to degree completion for students enrolled in ASIP will normally be 5 years. There is an additional cost to participate in the ASIP stream.

- Students will typically be admitted to the ASIP stream for the Fall term of Year 2 of study, however starting in Fall 2022, in exceptional circumstances students, including transfer students, enrolled in an eligible program in the Summer after Year 2 can be admitted to the ASIP stream for the Fall of Year 3. Year 3 entry into the program requires prior approval of the Associate Chair, Undergraduate or their designate and the Experiential Learning & Outreach Support (ELOS) Office.

- Further details about ASIP, including eligibility requirements and application procedures, can be found here. Students may also visit the ASIP webpage or contact the ELOS office at asip@utoronto.ca.

Industrial Relations and Human Resources Programs

Industrial Relations & Human Resources - Specialist Program (Arts Program) - ASSPE1536

Enrollment Requirements:

This is a limited enrollment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade or Variable Minimum Grade Average
A minimum grade/minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

Option 1

- ECO101H1 and ECO102H1 with a minimum combined average of 67%, or ECO105Y1 with a minimum grade of 80%
- 1.0 credit from SOC100H1/ SOC150H1/ PSY100H1 with a minimum combined average of 70%

Option 2

- ECO101H1 and ECO102H1 with a minimum combined average of 67%, or ECO105Y1 with a minimum grade of 80%
- 1.0 credit from 200+ level SOC courses with a minimum combined average of 73%

To ensure that students admitted to the program will be successful, students with a final grade/grade average lower than the grades listed above will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Notes:

- Requests for admission will be considered in the first program request period only.
- Due to the limited enrollment nature of this program students are strongly advised to apply to backup programs.

Completion Requirements:

(10.0 credits, including 4.0 credits at the 300+ level, of which 1.0 credit must be a 400-level IRE course)

Industrial Relations and Human Resources Courses

IRE199H1 - Why We Work: Understanding Work Through the Prism of Art & Culture

Hours: 24S

Why do we work? What does work mean to the average person? These questions are not as straightforward as they appear. We work for the bulk of our lives and most of our days are spent with coworkers who are neither family nor our closest friends, but we often fail to realize how self-defining work really is. This speaks to work's centrality but also to its invisibility in reflective discourse. However, through "popular" representations of work (e.g., such as in story-telling, cave drawings, hieroglyphs, music, writing, painting, television, film, video games, etc.,) we can begin to better understand the meaning of work and how this has changed over time. Readings in anthropology, history, economics, sociology and employment relations plus film and art criticism will help us explore these questions from an interdisciplinary perspective; assignments will encourage students to reflect on their own experience of work. Developing strong analytical and communication skills is an important goal of the course. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

IRE472H1 - Negotiations

Hours: 24S

Resolving conflicts constructively is a challenge faced by all organizations and most individuals. This course will cover fundamentals of the negotiation process and conflict resolution. This course will apply multiple cases and simulations providing students with several opportunities to build their skills.

Prerequisite: IRE244H1, IRE260H1 and 1 300H level IRE course
Exclusion: WDW372H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

IRE473H1 - Sociology of Industrial Relations

Hours: 24S

This course introduces students to sociological approaches to work and industrial relations. Students are introduced to classical theories and then these perspectives are applied to analyze current labour market and employment relationships. The objective of this course is first to demonstrate how an understanding of industrial relations can be informed and enriched by classical and contemporary sociological perspectives. Second, it is to enable students to familiarise themselves with sociological perspectives so that they can compare and contrast, support or oppose, distinct approaches to industrial relations and the nature of work. This will facilitate a critical view of the theories that will be explored and applied in the course.
Prerequisite: SOC101Y1 or equivalent and at least 1 300 IRE half-credit course
Distribution Requirements: Social Science

IRE474H1 - Labour Arbitration

Hours: 24S

This course will focus on grievance arbitration and examine both procedural and substantive issues, including the scope of arbitration, pre-arbitration and arbitration processes and select issues in arbitration—discipline and discharge, contract interpretation, disability accommodation, privacy and discrimination.

Introduction

Innis College offers courses that sustain two interdisciplinary academic programs: Urban Studies (designated URB) and Writing and Rhetoric (designated WRR). Innis College is also the home of the Cinema Studies Institute, which offers an impressive collection of courses (designated CIN) listed separately under Cinema Studies Institute. Courses for the Innis One Program have been inspired by the College’s two academic programs and its special relationship with the Cinema Studies Institute.

Innis One: The Creative City

Innis One: The Creative City is a first-year foundations program for students who wish to develop their creative and critical capacities by exploring the dynamism of our urban environment. Drawing from the College’s two academic programs — Urban Studies and Writing and Rhetoric — and its special relationship with the Cinema Studies Institute, Innis One coaxes students to venture beyond the academy walls and engage in an imaginative, inquiry-based, and civic-minded learning experience.

In a small-class setting, students will be encouraged to bring their own experience, passions and history into relationship with the civic issues and landscapes of Toronto, thus gaining a greater appreciation of the interplay between personally driven writing, film, and urban life. Seminars featuring guest lecturers, films and special field trips offer a unique experiential learning opportunity that will also help students to develop writing, research, and analytical skills.

All first-year students in the Faculty of Arts and Science (St. George campus) are eligible for admission. Further information is available at innis.utoronto.ca/academic-programs/one/.

Urban Studies

Urban Studies at Innis College provides students with the tools to make sense of their urban world. The Program examines the complex and dynamic relations among institutions, people, and physical form that create, sustain, or destroy cities.

The Program is suited for those students who wish to study cities using several disciplinary approaches. It is also of interest to those students who wish to become involved in urban issues in Toronto. The Program offers an internship in the office of either a municipal politician, non-profit research group, or other government organization as part of its experiential learning program. Because urban issues are so varied, Urban Studies combines well with many other program areas. Students are advised to consult the Program Director when designing programs that meet their particular interests. The Program encourages students to take advantage of the Study Elsewhere Program at the University of Toronto to broaden their knowledge of cities.

Writing and Rhetoric

Innis College’s Minor Program in Writing and Rhetoric offers a diverse array of courses that explore the worlds of oral, written, and online discourse.

Writing and rhetoric go hand in hand. In an increasingly digital world, where the variety and sheer number of texts are rapidly proliferating, the ability to produce persuasive and eloquent writing, as well as analyze and interpret texts, couldn’t be more foundational. Guiding our program is the premise that students must be equipped to engage both theoretically and practically with the multimodal world of discourse.

Rhetoric, one of the oldest disciplines in the humanities, is fundamentally concerned with how persuasion circulates in society: what transpires in texts necessarily reflects, deflects, and impacts what happens outside of them. The study of rhetoric includes analyzing the circulation of influence, identities, seductions, ideologies, narratives, tropes, ideas, compromises, and effects across a wide variety of contexts: for example, digital media environments (digital rhetoric), marketing campaigns (advertising rhetoric), medical and scientific settings (rhetoric of science and technology), and the contemporary world of political activity and activism (rhetoric of social change—including feminist rhetoric, rhetoric of race, and environmental rhetoric).

Writing, one of the most important rhetorical skills that anyone can develop, is an invaluable craft both in academic programs and beyond the university. Rhetors—those who can adapt their language to audience and context and use language skillfully—exert a powerful influence in almost any setting. Our writing courses teach students how to write well in the modes, genres, and
styles appropriate to particular disciplinary, institutional, and creative contexts. Each course is oriented towards the specialized writing, reading, research, and editing skills involved in a specific writing genre.

**Innis College Courses**

**Innis College First-Year Foundations**

**INI196H1 - Environmental Writing**

**Hours:** 24L

From environmental disasters and ecological collapse to climate change denial and celebrations of nature and wilderness, we will explore the diverse ways humans imagine and write about the natural world and the consequences of such writing. We will study a variety of nonfiction texts, images, and videos about ecology, the environment, nature, wilderness, and sustainability as we consider what these terms mean. From the 19th century American transcendentalists to 20th century ecologists, and 21st century scientific, Indigenous, feminist, and anti-racist perspectives, we will analyze the many ways that humans use writing to argue for certain ways of seeing and interacting with our planet and the creatures that inhabit it. Through weekly reading, written reflections, and discussion, students will hone their deep reading, research, and writing skills. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

**INI101H1 - Blogging the Just City**

**Hours:** 36S

An introduction to the concept of the city as a creative environment promoting not only growth and wealth but also social justice, equality, cooperation, and civility. Students will learn to build their own blog to help them to observe, interpret, and reflect upon the process of urban interaction and the relationship between creativity and justice. Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:** Munk One, New One, St. Mike's One, Trinity One, Vic One, UC One, Woodsworth One

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**INI102H1 - Telling the Stories of the City: Writing Creative Non-Fiction**

**Hours:** 36S

An introduction to creative writing techniques and the personal essay form through which students will explore and develop their conscious connection to the natural-urban landscape. The course will include activities such as field trips, readings, interviews, and journaling to generate the material for personal essays on engagement with nature in the city. Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:** Munk One, New One, St. Mike's One, Trinity One, Vic One, UC One, Woodsworth One

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

**INI106H1 - Writing Literary Journalism: Telling the Stories of the City**

**Hours:** 36S

An introduction to literary journalism, in which students study the craft of storytelling along with interviewing, reporting, and the journalist's ethical stance. Guest speakers, field trips, writing activities and course readings will help students engage deeply with their environment and develop the skills and sensitivity required for literary...
reporting. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Munk One, New One, St. Mike's One, Trinity One, Vic One, UC One, Woodsworth One

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Urban Studies Courses

JGU216H1 - Globalization and Urban Change

Previous Course Number: JGI216H1
Hours: 24L

Focusing on the impacts that global flows of ideas, culture, people, goods, and capital have on cities throughout the globe, this course explores some of the factors that differentiate the experiences of globalization and urban change in cities at different moments in history and in various geographic locations.

Exclusion: JGI216H1

Recommended Preparation: GGR124H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

URB234H1 - Cities in Popular Culture

Previous Course Number: INI234H1
Hours: 24L

By exploring different popular culture phenomena such as the emergence of hip-hop in the Bronx, Batman's Gotham, and Nollywood, this course works to examine the contributions of popular culture in shaping our understandings of cities (as well as providing different perspectives of the city and the urban experience than is generally captured in scholarly/academic literature). Popular culture becomes a vehicle by which we will explore different aspects of urban life and urban representation.

Prerequisite: Completion of 4.0 credits

Exclusion: INI234H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

URB235H1 - A Multidisciplinary Introduction to Urban Studies I: Theoretical Foundations of City Building

Previous Course Number: INI235H1
Hours: 24L

Focuses on the theoretical foundations of urbanization, urban change, and city building, with particular attention on global urban growth, history of contemporary urbanization, urban planning, governance, built form, and economic development. These topics are explored through a multidisciplinary lens, with an emphasis on understanding urban transitions over time and their meaning for contemporary urban experience.

Prerequisite: Completion of 4.0 credits, including 1.0 credit from one of the following four course groups.
Economics: ECO101H1, ECO102H1, ECO105Y1
Geography: GGR101H1, GGR107H1, GGR112H1, GGR124H1
Political Science: POL101Y1, POL101H1, POL106H1, POL107H1, POL109H1, POL214Y1
Sociology: SOC100H1, SOC150H1

Exclusion: INI235H1, INI235Y1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

URB236H1 - A Multidisciplinary Introduction to Urban Studies II: Urban Challenges and Theoretical Application

Previous Course Number: INI236H1
Hours: 24L

Cities are centres of innovation and creative energy, but they also face significant and pressing challenges. This course explores various urban issues including inequality, eroding infrastructure, and concerns arising from globalization, while also examining the ways in which municipal governments and urban citizens are imagining and implementing potential solutions to these challenges.

Prerequisite: URB235H1

Exclusion: INI235Y1, INI236H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

URB333H1 - Critical Approaches in Urban Studies

Previous Course Number: INI333H1
Hours: 24L
How do power and dominance consolidate in urban settings? How do individuals and communities contest this consolidation, and claim spaces and rights in the city? These questions will be taken up through a range of critical approaches, including Indigenous, critical race feminist, political economy, queer, and anarchist perspectives. Students will have the opportunity to carry out interview-based research on an issue of equality and social justice that matters to them.

**Prerequisite:** URB235H1 and URB236H1  
**Exclusion:** INI333H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**URB334H1 - Urban Field Course**

**Previous Course Number:** INI334H1  
**Hours:** 12S

Students will have the opportunity to travel to a destination city for a week-long examination of specific social, economic, physical, and/or environmental issues. The trip will include meetings with municipal representatives and other decision-makers (public and possibly private). The findings of the trip supplemented by bibliographic research and in-class discussion will form the basis of a major research essay. Each student is required to pay the cost of transportation and accommodation. Not eligible for CR/NCR option.

**Prerequisite:** URB235H1 and URB236H1  
**Exclusion:** INI334H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**URB336H1 - Creative Cities**

**Previous Course Number:** INI336H1  
**Hours:** 24L

A prominent thesis in the fields of planning and economic geography is that the presence of creative occupations in a city correlates positively with the overall health of urban regions. This course will investigate the nature of this link from theoretical and empirical perspectives and examine its potential usefulness in a planning/policy context.

**Exclusion:** INI336H1, INI336Y1  
**Recommended Preparation:** URB235H1/URB236H1/GGR124H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**URB337H1 - Studies in Contemporary Urban Problems**

**Previous Course Number:** INI337H1  
**Hours:** 24L

This course will focus on an examination of the immediate difficulties facing Toronto and by extension all Canadian cities. Instruction will consist of a combination of lectures by the instructor and by noted experts/practitioners in a range of topic areas including urban governance, finance, planning, environmental sustainability and social welfare.

**Exclusion:** INI337H1  
**Recommended Preparation:** GGR124H1/ (URB235H1, URB236H1)  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**URB338H1 - Advanced Topics in Urban Studies I**

**Previous Course Number:** INI338H1  
**Hours:** 24L

This course will expose students to a range of contemporary theoretical, analytical, and policy oriented debates in Urban Studies. The emphasis will be on establishing a broad knowledge base in the multifaceted field of urban studies. The exact topics to be covered will fall broadly under the umbrella of urban socioeconomic change, and specific syllabi, year to year, will follow contemporary and emerging debates. This will be expanded upon in this course’s 400 level counterpart.

**Exclusion:** GGR347H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**URB339H1 - Divided City / United City**

**Previous Course Number:** INI339H1  
**Hours:** 24L

Focus on the impact of increased economic inequality and economic polarization trends that are reshaping Canada’s metropolitan areas, changing neighbourhoods, and affecting the lives of our diverse urban population. Using the Toronto area as an example, students explore the consequences of these trends and the implications for public policy.

**Prerequisite:** Completion of 8.0 credits

URB439H1 - Cities and Mega-events: Place-making, Contestation and Urban Citizenship

Previous Course Number: INI439H1
Hours: 24S

Mega-events, like the Olympics, give cities the opportunity to showcase themselves to the world, but the production of television-friendly urban images do much to obscure the processes, compromises and social consequences in host cities. These events are powerful tools for city branding. They are also potential opportunities for social movements and other groups and individuals to highlight their own sets of concerns. This course will explore the challenges and opportunities that cities face in hosting such events.

Prerequisite: Completion of 12.0 credits
Exclusion: INI439H1; INI430H1 (Advanced Topics in Urban Studies II: Cities and Mega-Events: Conflicts and Opportunity) offered in Winter 2014; INI332H1; INI432H1 (Special Topics in Urban Studies: Cities and Mega-Events), offered in fall 2016
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

WRR103H1 - Writing Essays

Previous Course Number: INI103H1
Hours: 24L/12T

A course on essay writing designed to equip students with the skills required to write on different subjects and in a variety of different genres (including critical analysis, the narrative essay, and argumentative writing). By unpacking the stages of the writing process, this course helps students develop research, critical reading, planning, organization, writing, editing, and proofreading skills.

Exclusion: INI103H1
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

WRR104H1 - Writing Reports

Previous Course Number: INI104H1
Hours: 36S

An examination into the practical and theoretical aspects of writing reports. This writing intensive course introduces the fundamentals of report writing within an interdisciplinary context and focuses on improving writing skills appropriate to report writing genres. This course provides students the opportunity to prepare abstracts, literature reviews, qualitative and quantitative research, a formal report and a poster presentation at the end of the term. Focus will be on purpose, audience, structure, style, persuasive strategies and visual rhetoric (tables, charts, graphs) and research methods.
Exclusion: INI104H1
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

WRR201H1 - Theories of Rhetoric: A Brief History of Persuasion

Previous Course Number: INI201H1
Hours: 36S

The history of rhetoric, the philosophical art of persuasion, is a complex one bound up with the histories of philosophy, literature, and religion, the rise and fall of empires, and the emergence of modern science and media technology. We will examine the development of rhetoric over time, from the roots of the discipline in classical antiquity to the genesis of modern and postmodern rhetoric, including the New Rhetoric. We will then focus on contemporary rhetorical currents in language philosophy, gender studies, critical race studies, and affect theory.

Prerequisite: Completion of 4.0 credits
Exclusion: INI201H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WRR203H1 - Foundations of Written Discourse

Previous Course Number: INI203H1
Hours: 36S

Designed to teach students to write persuasively and to recognize persuasive strategies at work in writing they analyze. Classical rhetorical terms, elements of style, and modes of argument are central to the course. Assignments include a rhetorical analysis, in-class close reading exercises, and a term essay. Readings include prose from a variety of disciplines, excluding fiction and poetry. Students who enrol in the course must demonstrate competence in the English language.

Prerequisite: Completion of 4.0 credits
Exclusion: INI203H1, INI203Y1
Distribution Requirements: Humanities

Introduction

To study Italian is not only to acquire a language, but also to study a rich literature and a many-sided culture which have played an important, and sometimes dominant, role in Western civilization. For Canadians, the Italian contribution bears a special significance: the vast influx of Italians has brought changes in our way of life and a living presence to reinforce traditional Italian influences, thus enriching the meaning of the term Canadian. Italian combines well with other modern languages and literatures, and other programs such as European Studies, Literary Studies, and Mediaeval and Renaissance Studies, but is by no means restricted to these. Students may choose from Specialist, Major and Minor programs in Italian Studies. Italian courses are offered for beginners as well as for students who may have prior knowledge or instruction in Italian. Oral practice is included in all language courses. Students well qualified in the Italian language may be excused from language courses in first year (please see the Undergraduate Coordinator). 300 and 400-level courses are available to qualified third and fourth-year students and may be taken concurrently. These courses offer a wide range of options in language, literature, linguistics, culture and cinema. There are courses in Italian literature, culture and cinema that are given in English and have no language requirement. In conjunction with Woodsworth College, ITA courses may be taken in Italy at the University of Siena during July and August. A number of bursaries are available. Students may apply to take their Third Year in Italy under the Study Abroad Program in conjunction with the Centre for International Experience (https://studentlife.utoronto.ca/department/centre-for-international-experience/).

Faculty of Arts & Science Language Citation

The Department of Italian Studies participates in the Faculty of Arts and Science’s Language Citation initiative for Italian. Proficiency in Italian is an invaluable asset for those wishing to pursue a career in social work, business, applied science, government, law, medicine or education.
A knowledge of Italian complements undergraduate studies in other areas, such as music, fine art, literary studies, European history or political science, to name a few.

The Language Citation recognizes a significant level of achievement in language study with a high level of academic success. The Citation in Italian is available to students who, having completed a first year language course in Italian (ITA100Y1/ITA151Y1) (or the equivalent prerequisite training), earn a grade of at least B- in a second year language course (ITA250Y1/ITA251Y1) and in a third year language course (ITA350Y1/ITA351Y1).

Students should note that, as explained in the About Programs of Study section of this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

Guidelines for students who wish to begin the study of the Italian language at the university level

ITA100Y1 - Italian Language for Beginners – An introductory course for students with no previous knowledge of the Italian language. Not open to students with grade 11 and/or 12 U or M Italian or with previous experience, exposure or instruction in Italian.

ITA250Y1 - Intermediate Italian – The subsequent course for students who have completed ITA100Y1 or ITA151Y1.

This course is also open to students who have completed Grade 11 and/or 12 Italian (U or M level) or with previous experience or instruction in Italian. For this group, the Department may conduct assessment to determine appropriate placement.

Self-placement is not allowed in the Department of Italian Studies. The Department reserves the right to place students in the language course appropriate to their level of language skill. In ITA100Y1 students will be asked to fill out a questionnaire on their knowledge of, past studies and background in Italian. The questionnaire will also be filled out by all other language students who do not have the proper prerequisite in all other languages. The Department may conduct assessment to determine appropriate placement.

### Introduction

The Anne Tanenbaum Centre for Jewish Studies (ATCJS) offers a unique interdisciplinary undergraduate program where students can gain foundational knowledge of Jewish Studies while pursuing their diverse academic interests by choosing from courses offered by more than 20 collaborating departments, centres, and programs at the University of Toronto.

Our program is organized around four areas of study to reflect the breadth, depth, and relevance of Jewish

770
Studies as an academic discipline, and builds on the expertise of our world-class faculty. The four areas of study are:

I. Classical Judaism

The civilization of the people of the book has produced a rich, classical literature: the Hebrew Bible, the Dead Sea Scrolls, Hellenistic texts, as well as rabbinic literature from the earliest targumic and midrashic interpretations through the Talmuds and geonic traditions to medieval commentators on Talmudic texts. We situate these texts in their linguistic and cultural contexts, and study them with philological rigour. Our students learn to trace the development of the Jewish imagination in its interactions with surrounding cultures and to appreciate its many expressions: legal, exegetical, mythic, and mystical. Jewish civilization emerges as a highly variegated collection of phenomena and traditions.

II. Jewish Philosophy and Thought

Both in the ancient world and contemporary society, many vital questions have arisen from Jewish experience and its interaction with diverse religions and philosophies. Why would the perfect, all-sufficient God care to speak to human beings? How could God’s inner life be described? What is the relationship between law and ethics? What future could a particular, religious identity have in a secular democracy based on universal values? What can traditional Jewish sources contribute to contemporary feminism and what does contemporary feminism have to say about the traditionally gendered view of Jewish commandments? In addressing these questions, we teach students to engage critically with the great figures in the history of Jewish thought, from Philo to Maimonides, from Spinoza to Rosenzweig.

III. Jewish History and Social Sciences

Covering the whole range of Jewish history, from ancient Israelites to modern Israel, from medieval Spain to the Holocaust and beyond, our courses explore both the ideal and material aspects of the many contexts in which Jewish civilization has survived and thrived, while offering a unique perspective on world history. Social sciences such as anthropology, political science, and sociology enrich our comprehension of today as well as yesterday by exploring phenomena such as collective memory, group identity, and inter-group conflict. Our courses give students the tools not only to understand the past but also to shape the future.

IV. Jewish Cultures, Languages, and Literatures

We offer a rich variety of courses in Jewish literature, film, and theatre, as well as Yiddish and Hebrew language. How have Jews expressed their resilience and imagination under the extreme conditions of the Holocaust or within communist societies? What is the Jewish contribution to North American popular culture? From the social lives of contemporary Russian Jews to the impact of Israeli folk dance on national identity, from experimental Jewish photography to Jewish involvement in Broadway musicals, we investigate the many ways in which Jews express their identity and creativity in cultures around the world.

These areas of study are guidelines to assist you in choosing courses and cultivating a program that is specially tailored to your academic interests. If you are driven to gain special expertise in one area, you can focus your program by taking several courses in that area, or if you interested in gaining a well-rounded understanding of Jewish Studies as a broader field, then you can choose to sample courses from all areas.

The ATCJS offers four to six “CJS” designated courses every year, including our gateway courses on Jewish Culture (CJS201H1) and Jewish Thoughts (CJS200H1), that are specialized in one of the four areas. In addition to CJS designated courses, one of the greatest assets of doing a Jewish Studies degree with the ATCJS is the flexibility to take courses from our collaborating units as part of your program; such as Sociology, Anthropology, Political Science, History, English, Classics, Environmental Studies, and more. The ATCJS release an Undergraduate Handbook every year, which is the master list of all courses from the ATCJS’ collaborating units at UofT that count towards your Jewish Studies program in a given year.

All Jewish Studies programs require one of the gateway courses, CJS200H1 or CJS201H1. In addition, the Specialist requires 1.0 credit at the 400-level, at least 4.0 credits at the 300-level, and proficiency in Hebrew, Yiddish, Aramaic, or another Jewish language approved the the Undergraduate Director. The Major requires 0.5 credit at the 400-level, and at least 2.0 credits at the 300-level. The Minor requires at least 1.0 credit at the 300-level. All courses listed in the ATCJS’ Undergraduate Handbook (which changes every academic year) count towards your Jewish Studies program requirements; including courses that do not have a "CJS" designated course code.

Your Jewish Studies degree at the ATCJS is designed to reflect your individual academic interests, while providing you with an academically rigorous education in the foundations of Jewish Studies.

Centre for Jewish Studies Courses

CJS200H1 - Introduction to Jewish Thought

Hours: 24L

A balanced presentation of the multifaceted approach to the discipline by treating Jewish religion and thought. The course introduces students not only to a chronological and thematic overview of the subject, but also to different methodological approaches.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Thought, Belief and Behaviour (2)

CJS201H1 - Introduction to Jewish Culture

Hours: 24S

General introduction to history, literatures and cultures of Jewish people from antiquity to contemporary. A balanced presentation of multi-disciplinary approaches and multi-methodological approaches to Jewish studies, with a special emphasis on Jewish cultural studies and Jewish secularity.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

CJS220H1 - The Holocaust in Fiction

Hours: 24S

The course examines literary works written in different languages, in ghettos and concentration camps during the Holocaust, as well as those reflecting on the genocide in its aftermath. We focus on literature as a means of engaging with the unimaginable and on the cross analysis of eye-witness and memory writing.

Recommended Preparation: CJS200H1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

CJS330H1 - Who's a Jew? Theory, Myth, and Practice

Hours: 24L

This course introduces students to the host of core concepts in terms of which Jewish identity has been and continues to be defined and debated. Topics include: the difference between insiders and outsiders; collective vs individual identity; the nature of the bond between group members; identification across time, space, and disagreements; social and gendered hierarchies; joining and leaving the group; the identities of outsiders.
Exclusion: CJS290H1 (Topics in Jewish Studies: Who is a Jew?), offered in Fall 2014 and Fall 2015
Recommended Preparation: CJS200H1 or CJS201H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

CJS340H1 - Mizrahim in Israel: History, Politics, and Culture

Hours: 24L

What is the significance of the designation “Mizrahi” in Israel today? Does it refer to people who share a common geographical and ethnic origin or does it indicate a shared worldview that draws upon Middle Eastern Arabic culture? What are its relations with other terms, such as “Sephardi,” “Oriental,” or “Levantine”? What kind of political membership does it entail? Does it possess a certain cultural, religious, or political vocabulary? And, ultimately, does the diasporic concept of “Mizrahiyut” (mizrahiness) undermine national homogeneity or rather facilitate and enable its enforcement?

Exclusion: CJS390H1 (Special Topics in Jewish Studies: Mizrahim in Israel: History, Politics, and Culture), offered in Summer 2017
Recommended Preparation: CJS201H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

JGJ360H1 - Holocaust in Literature (E)

Hours: 24S

This course examines literary works written in different languages, in ghettos and concentration camps during the Holocaust, as well as those reflecting on the genocide in its aftermath. We focus on literature as a means of engaging with the unimaginable and on the cross analysis of eye-witness and memory writing.

Prerequisite: Completion of 4.0 credits
Exclusion: CJS220H1, GER367H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CJS383H1 - Jews and Power

Hours: 24L

This course will explore the relationship of Jews to political power. Among the themes to be covered are: How has the relationship of the Jewish community to political authority changed over time? What is the Jewish conception of political authority? How did Jews protect their communal and individual rights in the absence of sovereignty? How did the dynamics of antisemitism, philosemitism, and anti-Jewish violence change over time? How did Zionism and the revival of Jewish sovereignty change the position of Jews in the political order? What are the political and moral dilemmas posed by statehood? And what are the implications of Jewish sovereignty for Jews in the Diaspora?

Prerequisite: POL101Y1 or CJS200H1 or CJS201H1
Exclusion: POL383H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CJS389H1 - Jewish Secularism and Messianic Thought: From Spinoza to Derrida

Hours: 24S

This course examines the critical role that Messianic thought plays in the emergence of modern Jewish secular thought. A study of the secular dimension of Messianism in the writings of Jewish philosophers, from Spinoza to Derrida, leading to the larger question of its place in the project of Jewish modernity.

Recommended Preparation: CJS200H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

CJS390H1 - Special Topics in Jewish Studies

Hours: 24L

An examination of issues in Jewish Studies. Content in any given year depends on instructor.

Prerequisite: Completion of at least 4.0 credits.
Distribution Requirements: Humanities

CJS391H1 - Special Topics in Jewish Studies

Hours: 24L

An examination of issues in Jewish Studies. Content in any given year depends on instructor.
Prerequisite: Completion of at least 4.0 credits.  
Distribution Requirements: Humanities

CJS392H1 - Special Topics in Jewish Studies

Hours: 24L

An examination of issues in Jewish Studies. Content in any given year depends on instructor.

Prerequisite: Completion of at least 4.0 credits.  
Distribution Requirements: Humanities

CJS396H1 - Independent Study

A scholarly project on an approved topic supervised by a faculty affiliated with the Centre for Jewish Studies. Not eligible for CR/NCR option.

Prerequisite: CJS200H1 or CJS201H1, and permission of the CJS Undergraduate Director  
Recommended Preparation: At least 2.0 credits in Jewish Studies courses (this can include courses listed in the CJS Undergraduate Handbook)  
Distribution Requirements: Humanities

CJS400H1 - Research Seminar in Jewish Studies

Hours: 24S

An interdisciplinary seminar in which Jewish Studies topics are explored intensively, culminating in a major research paper by each student. Not eligible for CR/NCR option.

Prerequisite: CJS200H1 or CJS201H1; permission of the instructor/program  
Distribution Requirements: Humanities

CJS401H1 - Community & Identity

Hours: 24S

Exploration of Jewish notions of community, identity, and humanity in classic and contemporary sources as well as through experiential learning in which students are placed in internships at organizations and institutions that identify themselves as Jewish and as serving the Jewish community in the GTA. Not eligible for CR/NCR option.

Prerequisite: CJS200Y1 or CJS201Y1 and at least two other half-courses in Jewish Studies; permission of instructor  
Distribution Requirements: Social Science  
Breadth Requirements: Thought, Belief and Behaviour (2)

CJS430H1 - Encounters between Jewish and Modern Thought

Hours: 24L

A detailed exploration of how Jewish thought develops in relationship to key figures or moments in modern European philosophy (e.g., Spinoza, Kant, Hegel, Kierkegaard, Marx, Nietzsche, Heidegger). The particular focus varies from year to year.

Exclusion: CJS490H1 (Advanced Topics in Jewish Studies: Kierkegaard and Modern Jewish Philosophy), offered in Fall 2015  
Recommended Preparation: CJS201H1 or a course in either modern European philosophy  
Distribution Requirements: Humanities  
Breadth Requirements: Thought, Belief and Behaviour (2)

CJS440H1 - The Arab Jew: A History of a Concept

Hours: 24L

This course invites students to explore the debates around the term “Arab Jews.” A cultural, historical, and historiographical designation, the term encompasses a range of experiences for Arabic-speaking Jews. These Jews lived in diverse cultural worlds across the Middle
East and North Africa, where they developed deep and enduring relationships with non-Jews, and were instrumental in shaping local, regional and national cultures and politics. By engaging with the term “Arab Jews” in its various incarnations, the course offers new perspectives on questions of Zionism and nationalism, colonialism and geography, religion and secularization, as well as historiography and memory.

Exclusion: CJS491H1 (Advanced Topics in Jewish Studies: The Arab Jew: A History of a Concept), offered in Winter 2017
Recommended Preparation: CJS201H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CJS444H1 - Topics in the Study of Antisemitism

Hours: 24L

This seminar explores in depth one of the many theoretical or methodological issues that confront scholars of antisemitism. Possible topics include: definitions of antisemitism and their purposes; philosemitism and its conceptual and real connection with antisemitism; Jewish self-hatred; contextualist vs eternalist accounts of antisemitism; classic and contemporary theories of antisemitism.

Recommended Preparation: RLG344H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

CJS490H1 - Advanced Topics in Jewish Studies

Hours: 24S

An in-depth investigation of topics in Jewish Studies. Content in any given year depends on instructor.

Prerequisite: Permission of the instructor/program
Distribution Requirements: Humanities

CJS491H1 - Advanced Topics in Jewish Studies

Hours: 24S

An in-depth investigation of topics in Jewish Studies. Content in any given year depends on instructor.

Prerequisite: Permission of the instructor/program
Distribution Requirements: Humanities
Laboratory Medicine and Pathobiology

**Introduction**

The Department of Laboratory Medicine and Pathobiology provides a bridge between the basic sciences and medicine. Investigating the molecular mechanisms of disease is an important priority of the department. Faculty are concerned with the biochemical changes that may be associated with cell and tissue injury and with the etiology, pathogenesis and behaviour of disease. Research is carried out in such areas as cardiovascular disease, immunopathobiology, neuropathology, endocrinology and metabolism, neoplasia, bone and connective tissue disease, clinical and molecular epidemiology, antibiotic resistance, and molecular pathogenesis of infectious disease.

The Pathobiology Specialist program gives students a broad understanding of contemporary medical research and basic scientific insights that have revolutionized our understanding of disease in recent years. Aspects of biochemistry, chemistry, cellular and molecular biology, and genetics are brought to bear upon human pathology. Graduates from the program will frequently pursue graduate studies in medical research and eventual research careers in academic, industrial, pharmaceutical, or governmental laboratories. A knowledge of cellular and molecular mechanisms of disease processes is also useful in a wide variety of multidisciplinary careers in government, regulatory agencies, law, and environment.

Some of the new LMP courses will not be offered until the 2022-2023 or 2023-2024 Academic Year. To help you with your academic planning, please check our website for more information about these courses.

**Enrolment Requirements:**

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

*Variable Minimum Grade or Variable Minimum Grade Average*
A minimum grade/minimum grade average in required courses or their equivalents is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1 and CHM136H1)/CHM151Y1
- (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1

The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at lmp.undergrad@utoronto.ca and provide your student number.

Please consult the Arts & Science Program Toolkit for program enrolment information.

Completion Requirements:

(14.0-15.5 credits, including at least 2.0 credits at the 400-level)

First Year:

- BIO120H1, BIO130H1
- (CHM135H1, CHM136H1)/CHM151Y1
- (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1

First or Second Year:

- (PHY131H1, PHY132H1)/(PHY151H1, PHY152H1)

Second Year:

- BCH210H1
- BIO230H1
- BIO260H1/ HMB265H1
- CHM220H1
- CHM247H1/CHM249H1
- PSL300H1, PSL301H1
- STA288H1/STA220H1/BIO220H1
- LMP200H1

Third Year:

- BCH370H1, BCH311H1
- LMP310H1, LMP320H1, LMP330H1

Choose one of the options below:

- Option A: Immunology: (IMM340H1, IMM350H1)/(IMM341H1, IMM351H1)
- Option B: Microbiology: (MGY377H1, MGY378H1)
- Option C: Anatomy: ANA300Y1
- Option D: Metabolic and Signaling Pathways: PSL425H1, and PCL386H1/PCL486H1
- Option E: Research: LMP305Y1 and one of the above four options

Fourth Year:

Students should choose four of the following 400-level courses (2.0-2.5 credits):

- LMP405Y1, LMP410H1, LMP415H1, LMP420H1, LMP430H1, LMP440H1, LMP450H1, LMP460H1

Note: If the research course LMP405Y1 is taken, an additional three 400-level courses from the list are still required (totalling 2.5 credits).

This course builds on concepts in cellular pathobiology to develop an advanced understanding of the function and dynamics of the cell in the context of health and disease. Concepts in cell injury, cell adaptation, migration, cell stress, cell survival, cell death, oxidative stress, endocytosis, ion homeostasis, protein folding, and their implications for disease are covered.

Prerequisite: BIO230H1, PSL300H1; enrolment is limited to students in the Pathobiology Specialist program
Exclusion: LMP301H1, LMP363H1, LMP340H1
Recommended Preparation: BCH210H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

**LMP299Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities…. Not eligible for CR/NCR option.

**LMP301H1 - Introduction to the Biochemistry of Human Disease**

Hours: 24L

Introduces concepts and mechanisms of disease processes as they arise from disturbances of normal biochemical and physiological functions. The rational use of the clinical biochemistry laboratory in the diagnosis and management of disease is explained. Not intended for students in the Pathobiology Specialist program.

Prerequisite: BCH210H1/BCH242Y1
Exclusion: LMP300Y1
Recommended Preparation: PSL201Y1/PSL300H1/PSL301H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

**LMP305Y1 - Pathobiology Research Analysis and Project**

Hours: 24L/100P

This course is designed to introduce third-year students to biomedical research, and to provide them with the analytical skills required to be a successful scientist. Students will have the opportunity to carry out a full-year research project under the supervision of an LMP faculty member (6-8 hours/week in lab). A lecture component will cover laboratory practice, experimental design, basic logic/argument, statistics, data analysis and scientific communication. The fundamentals taught in these lectures will be used to critique and analyze scientific literature. This course is recommended for students with a general interest in research and especially to students who will conduct additional research projects as part of the LMP summer research program and/or the LMP405Y1 fourth-year research project course.

Prerequisite: STA288H1/STA220H1, BCH210H1, BIO230H1 Students are required to secure an LMP supervisor. This course is open to non-Pathobiology Specialist students, but students must carry out a research project under the supervision of an LMP faculty member.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

**LMP310H1 - Fundamentals of Pathobiology**

Hours: 24L/12T

This course covers the major molecular mechanisms that impact human health and disease. Specifically, it is divided into three blocks that focus on the fundamentals of pathobiology in cancer, cardiovascular diseases and infection. It is intended to introduce the cellular and molecular concepts of health and disease that will be explored with more depth in fourth-year LMP courses.

Prerequisite: LMP200H1, BCH210H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

**LMP320H1 - Pathobiology of Stem Cells**

Hours: 24L/12T

This course introduces stem cells and their impact on human health and disease. Stem cells are studied from the perspective of development and disease, with a focus on the nervous system, respiratory system and cancer. This course is intended to provide a foundation in the basis of stem cells in preparation for fourth-year courses.

Prerequisite: LMP200H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

**LMP330H1 - Genetic and Computational Modeling in Human Development and Disease**

Previous Course Number: LMP408H1
Hours: 24L/12T

Introduces the use and impact of genetic model systems and organisms in exploring aspects of human reproduction, development, aging and disease. Ethical issues in animal research, genetic manipulation, and
disease modeling are highlighted. This course also introduces the bioinformatics concepts and methods used in biological data analysis.

**Prerequisite:** LMP200H1, BIO260H1/HMB265H1  
**Exclusion:** LMP408H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**LMP340H1 - Introduction to Pathobiology I**

**Previous Course Number:** LMP300Y1  
**Hours:** 18L/12T/6P

Concepts in pathogenesis, cell injury, adaptation and death; oxidative stress, ion channels and pumps, calcium homeostasis. Molecular basis of diseases affecting iron, blood and the cardiovascular system. The laboratory examines anatomical and histopathological specimens in cardiac disease.

**Prerequisite:** Enrolment is limited to students specializing in Pathobiology who have completed, or are completing, the first and second year requirements of the program.  
**Exclusion:** LMP300Y1, LMP301H1, LMP363H1  
**Recommended Preparation:** Second Year required courses for the Pathobiology Specialist Program  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**LMP350H1 - Introduction to Pathobiology II**

**Previous Course Number:** LMP300Y1  
**Hours:** 24L/12T

Molecular basis of tissue repair and fibrosis, endocrine and signaling disorders, introduction to neurodegenerative diseases. Animal models and genetic basis of disease. Mechanisms infection by virus, bacteria and parasites. Topics are chosen to complement LMP340H1 and introduce areas that may be explored in more depth in 400-level LMP courses. Enrolment is limited to students specializing in Pathobiology who have completed LMP340H1.

**Prerequisite:** LMP340H1  
**Exclusion:** LMP300Y1, LMP301H1, LMP363H1  
**Recommended Preparation:** Second Year required courses for the Pathobiology Specialist Program  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**LMP363H1 - Principles of Pathobiology**

**Hours:** 24L

Pathological changes brought on by foreign compounds; mechanisms of pathologic, toxic and carcinogenic change.

**Prerequisite:** BIO230H1, CHM247H1/CHM249H1  
**Exclusion:** LMP300Y1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**LMP365H1 - Neoplasia**

**Hours:** 20L/4P

A general introduction to the cellular and molecular aspects of cancer and its etiology. The laboratory component presents the range of benign and malignant tumor types at the gross and histological levels. Pathophysiology of cancer, invasion and metastases, role of the immune system.

**Corequisite:** LMP300Y1 or permission of department  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**LMP399Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at [https://www.artsci.utoronto.ca/current/academics/research-opportunities...](https://www.artsci.utoronto.ca/current/academics/research-opportunities...). Not eligible for CR/NCR option.

**LMP402H1 - Inflammation and Infection**

**Hours:** 24L

Mechanisms that allow microbial pathogens to cause disease and the host to detect infection, mount an inflammatory response and resolve the infection. Primary research articles are discussed. Topics include commensal bacteria, bacterial toxins, pattern recognition receptors, leukocyte emigration, chemotaxis, and the role of non-coding RNAs in immunity.

**Prerequisite:** (IMM340H1, IMM350H1) or (IMM341H1, IMM351H1) or (MGY377H1, MGY378H1)  
**Distribution Requirements:** Science
Breadth Requirements: Living Things and Their Environment (4)

LMP405Y1 - Project in Pathobiology

Hours: 154P

A self-contained research project to be completed under the supervision of a faculty member. The main areas of research are as listed in the description of the Department (above). The student will normally have completed three full years of study, and is expected to devote at least one full day per week to the project. Admission is by arrangement with the Department and with a particular supervisor. A list of potential supervisors is available from the Departmental Office and on our web site. Not eligible for CR/NCR option.

Prerequisite: BCH210H1/BCH242Y1, LMP300Y1/(LMP340H1, LMP350H1)/LMP363H1/LMP365H1, and permission of department

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

LMP406H1 - Pathobiology of the Cardiovascular System

Hours: 24L

Pathobiology of the heart, blood vessels, and lymphatic system. Congenital diseases of the heart, ischemic injury, stroke. Treatments of vascular disease and cardiovascular biomaterials. Major focus on atherosclerosis and hypertension. The emphasis is on the underlying cell biology of these processes.

Prerequisite: (PSL300H1, PSL301H1)/PSL302Y1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

LMP408H1 - Genetic Modelling of Human Development and Disease

Hours: 24L

Introduces use of genetic model systems and organisms in exploring aspects of human reproduction, development, and disease. A major focus is on the impact of the genetic models on understanding human health, and disease. Ethical issues in animal research, genetic manipulation, and disease modeling are highlighted.

Prerequisite: LMP300Y1/(LMP340H1, LMP350H1)/BIO260H1/HMB265H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

LMP410H1 - Pathobiology of Neurodegenerative Disease

Hours: 24L

Molecular basis of neurodegenerative diseases of the central and peripheral nervous systems. Emphasis on the molecular pathobiology of neurodegenerative diseases, current research developments and guidance with writing of research proposals. Mid-term and final exams will practice assembly of a succinct research proposal and query neurodegenerative disease material taught in course.

Prerequisite: BCH311H1/(PSL300H1, PSL301H1)

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

LMP415H1 - Forensic Pathobiology

Hours: 24L

A thematic review of the major scientific areas and research controversies in forensic medicine. The approach is mechanistic analysis and evidence-based medicine. Classical forensic medicine is critically analyzed with emphasis on experimental methods to resolve controversies. We also explore how the justice system utilizes medical and scientific data.

Prerequisite: LMP300Y1/(LMP340H1, LMP350H1)/permission of department

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

LMP420H1 - Cancer Pathogenesis

Previous Course Number: LMP365H1

Hours: 24L/12T

A general introduction to the cellular and molecular aspects of cancer and its etiology. Topics include pathophysiology of cancer, invasion and metastases, role of the immune system, immune evasion, understanding biological targets, chemotherapeutic and immunotherapeutic agents and its mechanism of action, and resistance mechanisms of cancer.
Prerequisite: LMP310H1. Life sciences students who do not have all of the required prerequisites are encouraged to contact the academic unit to seek a waiver.
Exclusion: LMP365H1
Recommended Preparation: PCL486H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

LMP430H1 - Metabolic Disorders
Hours: 24L/12T

This is an advanced-level course that focuses on the pathobiology of metabolic disorders, whether inherited or acquired. It covers enzymatic pathways and diseases associated with fat/energy metabolism, dyslipidemia, dysglycemia, aminoacidopathies and lysosomal storage disorders.

Prerequisite: BCH210H1, PSL300H1. Life sciences students who do not have all of the required prerequisites are encouraged to contact the academic unit to seek a waiver.
Recommended Preparation: PSL425H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

LMP436H1 - Microbial Pathogenesis
Hours: 36L

Molecular mechanism involved in pathogenesis of infectious disease. Topics include recurrent themes in the establishment of infectious disease, such as adherence and spread of pathogenic bacteria as well as evasion of host defences. Emphasis is placed on genetic characterization and expression of virulence determinants and on interactions between bacterial pathogens and their hosts.

Prerequisite: BCH210H1/BCH242Y1, (IMM340H1, IMM350H1)/(IMM341H1, IMM351H1)
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

LMP440H1 - Mechanisms in Host-Microbe Interactions
Previous Course Number: LMP402H1 & LMP436H1
Hours: 24L

Mechanisms that allow microbial pathogens to cause disease and the host to detect infection, mount an inflammatory response and resolve the infection. Primary research articles are discussed. Topics include commensal and pathogenic bacteria, immune recognition, programmed cell death, immunometabolism, inflammatory diseases.

Prerequisite: (IMM340H1, IMM350H1)/(IMM341H1, IMM351H1)/(MGY377H1, MGY378H1)/LMP310H1. Life sciences students who do not have all of the required prerequisites are encouraged to contact the academic unit to seek a waiver.
Exclusion: LMP402H1, LMP436H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

LMP450H1 - Organogenesis in Health and Disease
Hours: 24L/12T

This course introduces advanced topics in stem cell biology and focuses on the latest developments related to the use of stem cells in the design and generation of organoids and organs for use in research. The use of organogenesis within basic and clinical research settings will be highlighted with a focus on several human diseases. This course will build on the third-year courses, through which students will have been introduced to stem cell biology within the context of human diseases.

Prerequisite: LMP320H1, LMP330H1. Life sciences students who do not have all of the required prerequisites are encouraged to contact the academic unit to seek a waiver.
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

LMP460H1 - Pathobiology of the Cardiovascular System
Previous Course Number: LMP406H1
Hours: 24L

Pathobiology of the heart, blood vessels, and lymphatic system. Congenital diseases of the heart, ischemic injury, stroke. Treatments of vascular disease and cardiovascular biomaterials. Major focus on atherosclerosis and hypertension. The emphasis is on the underlying cell biology of these processes.

Prerequisite: (PSL300H1, PSL301H1)/PSL302Y1. Life sciences students who do not have all of the required prerequisites are encouraged to contact the academic unit
to seek a waiver.

**Exclusion:** LMP406H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

Introduction

The Latin American Studies program at the Department of Spanish and Portuguese provides students in the social sciences and humanities an opportunity to engage and deepen their understanding of Latin American regions, their histories, politics, cultures, economies and societies. Courses encourage students to situate both their special interests and the contemporary debates in fields such as anthropology, political science, geography, literature, or history within a broader interdisciplinary framework, while at the same time committing themselves to an understanding of the historical, cultural and political experiences of Spanish and Portuguese America. Through an engagement with different texts and faculty expertise, this program trains students in current themes such as postcolonial thinking, critical readings of colonial histories, literary and anthropological genres, comparative politics, politics of indigeneity and human rights, as well as in environmental policies and political economy of Latin America and the Americas as a transnational whole. With the possibility to carry out curricula experience in Latin America, this program also offers an important lead for career development experiences on Latin America. This knowledge is increasingly necessary for Canada, as the country enters into new trade, political, environmental, and academic agreements with our emerging hemispheric partners.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

There are no specific first-year requirements. However, first-year students are encouraged to take a Spanish or Portuguese language course (SPA100Y1, SPA196H1, SPA220Y1, SPA230Y1, PRT100Y1, PRT110Y1, PRT219Y1, or PRT220Y1), which counts towards the Latin American Studies Major.

(7.0 credits, including a minimum of 2.0 LAS credits at the 300+ level, of which a 0.5 credit must be at the 400-level)

- LAS200H1 and LAS201H1.
- 1.5 LAS credits at the 300-level.
- 0.5 LAS credit at the 400-level, or an equivalent 0.5 credit at the 400-level, approved by the Associate Chair of Latin American Studies / program administration.
- JQR360H1 or an alternative, but similar, 0.5 credit course on a combination of quantitative and qualitative reasoning/research design can be taken in consultation with the Associate Chair of Latin American Studies/program administration. (Possible options include POL222H1, GGR270H1, DTS300H1)
- 2.5 LAS credits or pre-approved courses from cognate units listed below (List A and List B). As part of the 2.5 credits, students may choose up to one 0.5 credit from the disciplinary group course list (List B), or all 2.5 credits from the thematic group course list (List A).

- Students must successfully complete (with a minimum grade of 65%) at least the second level of language instruction in Spanish or Portuguese by the end of the third year of study. This requirement is normally met through choice of courses from List A. Students can also demonstrate equivalent proficiency in the given language through completion of 1.0 credit of Spanish and/or Portuguese courses in Latin American topics as approved by LAS administration at a second-year level of instruction or higher.

List A (Thematic Group):

Latin American Societies: ANT320H1, ANT340H1, ANT407H1
Historical Understandings of Latin America: HIS291H1, HIS292H1, HIS390H1, HIS397H1

Geography: JGE321H1
Indigenous Studies: INS200H1, INS205H1
New College Caribbean Studies: CAR120Y1, CAR220H1, CAR221H1, CAR324H1
New College Critical Studies in Equity and Solidarity: CSE240H1, CSE270H1, CSE346H1

Course work: Students must successfully complete 7.0 credits sponsored or approved by LAS, as well as satisfy the requirements of their departmental specialization.

Note: Effective Fall 2021, courses associated with New College’s Caribbean Studies, and Critical Studies in Equity and Solidarity programs will have the new “CAR” and “CSE” designators respectively.
Latin American Studies Minor (Arts Program) - ASMIN0552

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

There are no specific first-year requirements. However, first-year students are welcome to take a Spanish or Portuguese language course (SPA100Y1, SPA219Y1, SPA220Y1, SPA320Y1, PRT100Y1, PRT110Y1, PRT219Y1, or PRT220Y1), which counts towards the Latin American Studies Minor.

(4.0 credits, including LAS200H1, LAS201H1, and at least 1.0 credit at the 300+ level.)

1. LAS200H1 and LAS201H1 (previously LAS200Y1).
2. A minimum of 0.5 credit of LAS 300-level courses. 3. 2.5 LAS credits, or pre-approved courses from cognate units listed below (List A). A minimum of one 0.5 credit must be from the Social Sciences/BR=3; another 0.5 credit must be from the Humanities/BR=1 or 2. (LAS300H1 or LAS370H1 can be used to cover the Social Science requirement and LAS301H1, LAS310H1, LAS320H1, LAS350H1 for the Humanities requirement).

Latin American Studies Courses

**LAS200H1 - Introduction to Latin American Studies I: Foundational Themes**

**Hours:** 24L/12T

An introductory course studying the development of Latin American societies from their pre-Columbian past to the 19th century building of modern nations. Cultural, historical, political, and social topics are examined combining historical documents with art, music and other texts from popular culture.

**Exclusion:** IAS200Y1, LAS200Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

**LAS201H1 - Introduction to Latin American Studies II: Current Issues**

**Hours:** 24L/12T

An introductory course studying the development of Latin American societies from the 20th century to the present. Cultural, historical, political, and social topics are examined combining historical documents with art, music and other texts from popular culture.

**Exclusion:** IAS200Y1 and LAS200Y1

**Recommended Preparation:** LAS200H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

**LAS300H1 - Topics in the Social Sciences**

**Hours:** 24S

The goal of this course is to critically analyze the current economic, social, and political realities of Latin America, based on an insightful knowledge of its past and present.
Topics of the course vary depending on the needs of the program and the interests of students.

**Prerequisite:** IAS200Y1/ LAS200Y1/ LAS200H1, LAS201H1/ POL305Y1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**LAS301H1 - Topics in the Humanities**  
**Hours:** 24S  
The goal of this course is to critically analyze the Latin American social imaginaries as expressed in art, literature and/or film, based on close readings of texts. Topics of the course vary depending on the needs of the program and the interests of students.

**Prerequisite:** IAS200Y1/LAS200Y1/LAS201H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**LAS302H1 - Topics in Latin American Studies**  
**Hours:** 24S  
The goal of this course is to critically explore debates and perspectives on development and on the politics of inequality in Latin American contexts. Topics of the course may vary, depending on the needs of the program and the interests of students and instructors.

**Recommended Preparation:** LAS200H1, LAS201H1, LAS300H1, POL305Y1  
**Distribution Requirements:** Humanities, Social Science

**LAS310H1 - The Postcolonial Imaginary in Latin America**  
**Hours:** 24L  
This seminar style course explores the postcolonial status of Latin America as a controversial issue, through critical analysis of the Latin American social imaginary. The course considers works by Simón Bolívar, José Martí, Ernesto Guevara, Pablo Neruda, Rigoberta Menchú, Subcomandante Marcos, Sergei Eisenstein, Walter Salles, Tomás Gutiérrez Alea, as well as films that illustrate the rich visual culture of the continent. Readings and seminar discussions are conducted in English.

**Prerequisite:** LAS200H1 + LAS201H1  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**LAS320H1 - Latin American Thought**  
**Hours:** 24L  
This seminar-style course explores critical thinking about culture, history, politics, and society by some of the most influential Latin American intellectuals of the 20th and 21st centuries. Emphasis on theoretical contributions, in English translation, of Latin American thinkers such as Rodó, Vasconcelos, Mariategui, Zea, Dussel, García Canclini, Cornejo Polar, Quijano and Lugones. Topics covered include questioning identities, cultural diversity, indigenism, liberation theology, colonialism, neoliberalism, postcolonialism, coloniality, and decoloniality. Readings and seminar discussions in English.

**Prerequisite:** LAS200H1 + LAS201H1  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**JLN327H1 - Culture and Modernity in the Hispanic Caribbean**  
**Hours:** 24L  
Explores the Hispanic areas of the Caribbean including the Caribbean areas of continental Spanish-speaking America. Topics may include: regional politics, state and economy; revolutions and authoritarian regimes; popular culture, the arts and media; religion and society; gender and sexuality; state structures; diasporas and migration.

**Prerequisite:** HIS230H1/ HIS231H1/ CAR120Y1/ CAR220H1/ CAR221H1/ NEW224Y1/ CAR225H1/ CAR226H1/ LAS200H1/ LAS201H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**LAS348H1 - The Renaissance Mexico City**  
**Hours:** 24S  
By exploring history, art, architecture, literature and music of sixteenth century Mexico City as a geographical and cultural point of reference, this course explores the historical event known as “the Renaissance” outside of its traditional localities. By the mid 16th century, colonial Mexico City became the contact zone and the hub for the exchange of peoples, goods and ideas that migrated...
across the Atlantic. Mexico City gives an alternative perspective to how local political and social-historical contexts shape ideas and cultural forms and illustrates the processes and effects of cultural cross-fertilization in the Renaissance. Taught in English.

**Recommended Preparation:** LAS200H1, a History course on Early Modern Hispanic world or a course in the Renaissance Studies Program (VIC346H1, "The Idea of the Renaissance"), or permission of the instructor

**Breadth Requirements:** Creative and Cultural Representations (1)

**LAS350H1 - Indigenous Realities in Latin America**

**Hours:** 24L

This course studies the past and present realities of the diverse indigenous societies of the regions we now call Latin America. Eurocentric texts such as the chronicles of the conquest of Mexico, are critically contrasted with diverse indigenous peoples' self-representing narratives that respond to more than five hundred years of Spanish and Portuguese occupation of their lands. These texts include Nahuatl poetry and accounts of the conquest of Mexico, literary creations from multiple Maya linguistic groups, multi-lingual chronicles from the colonial Inca period, diverse indigenous political manifestos and movements, indigenous testimonios, and decolonizing indigenous literature and criticism. Taught in English.

**Recommended Preparation:** (LAS200H1 + LAS201H1)/INS201Y1/ POL305Y1

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**JQR360H1 - The Canadian Census: Populations, Migrations and Demographics**

**Hours:** 24L/12T

Examines the Canadian population census through the experience of diasporic groups in Canada. Approaches the census as a statistical tool, an historical source and an ideological project of citizenship and nationalism. Uses census data to explore mathematical and statistical concepts and to integrate numerical ways of thinking with qualitative analysis. (Jointly sponsored by African Studies, Diaspora and Transnational Studies, Caribbean Studies, Equity Studies and Latin American Studies).

**Prerequisite:** DTS200Y1/ HIS230H1/ HIS231H1/ LAS200H1/ LAS201H1/ CAR120Y1/ AFR150Y1/ CAR220H1/ CAR221H1/ NEW224Y1/ CAR225H1/ CAR226H1/ NEW240Y1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**LAS370H1 - Critical Perspectives of Development in Latin American Contexts**

**Hours:** 24L

A seminar-style course that engages in critical analysis of local and global development initiatives in a Latin American context. The seminar is organized around the interrelated themes of health, economics, education, globalization, and infrastructure. Topics of discussion may include: challenges and ethics of sustainable development initiatives in theory and practice, medical missions and global health, community-based transnational public health projects, developing localities and sustainable economics, local infrastructure development and environmental impacts, ethics and implications of volunteerism, local and global cultural perspectives, the colonial legacies of inequality, dependency and sustainability of development projects.

Readings and lectures in English.

**Prerequisite:** 4.0 credits

**Recommended Preparation:** (LAS200H1 + LAS201H1)/POL305Y1

**Breadth Requirements:** Society and its Institutions (3)

**LAS400H1 - Topics in Latin American Studies**

**Hours:** 24S

An upper level seminar. Topics of the course vary from year to year, depending on the needs of the program and the interests of students. Offered in alternate years.

**Prerequisite:** LAS200Y1/(LAS200H1, LAS201H1) & LAS300H1/LAS301H1

**Distribution Requirements:** Humanities, Social Science

**LAS401H1 - Latinos in Canada**

**Hours:** 48T/24S

A historical survey of migration from Latin American countries to Canada, this course examines mediation strategies of Latinos as they adjust to a new home: negotiation of national identities, political participation, entrepreneurship, cultural representations, and charitable
work. Students engage in service with organization working with/in LatAm communities.

**Prerequisite:** LAS200H1, LAS201H1, one LAS 300-level course, interview

**Recommended Preparation:** JQR360H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

---

**LAS410H1 - Independent Study**

This course provides an opportunity for students to do academic research related to Latin American issues under the supervision of a faculty member. The intent is that the student, aided and advised by the supervisor, will read relevant literature, and plan, execute, analyze and report on an original and independent investigation of an appropriate topic. For application forms, please visit the “Resources” section of the program's website. Not eligible for CR/NCR option.

**Prerequisite:** LAS200Y1/(LAS200H1, LAS201H1), and LAS300H1/LAS301H1

**Distribution Requirements:** Humanities, Social Science

---

**LAS411Y1 - Independent Study**

This course provides an opportunity for students to do academic research related to Latin American issues under the supervision of a faculty member. The intent is that the student, aided and advised by the supervisor, will read relevant literature, and plan, execute, analyze and report on an original and independent investigation of an appropriate topic. For application forms, please visit the “Resources” section of the program's website. Not eligible for CR/NCR option.

**Prerequisite:** LAS200Y/(LAS200H1, LAS201H1) and LAS300H1/LAS301H1/LAS302H1

**Exclusion:** LAS410H1

**Distribution Requirements:** Humanities, Social Science

---

**JLN427H1 - Advanced Topics: The Hispanic Caribbean**

**Hours:** 24S

Explores, in depth, a country in the Hispanic Caribbean or a theme relating to the Hispanic Caribbean. Topics vary each year and may include: Cuban society; Hispanic Caribbean revolutions; Hispanic Caribbean music, art and popular cultures; Hispanic Caribbean diasporas.

**Prerequisite:** HIS230H1/ HIS231H1/ JLN327H1/ LAS200H1/ LAS201H1/ CAR120Y1/ CAR220H1/
Life Sciences

The following Life Science departments and programs are listed in this Calendar:

- Biochemistry
- Biology
- Cell & Systems Biology
- Ecology & Evolutionary Biology
- Human Biology
- Immunology
- Laboratory Medicine & Pathobiology
- Molecular Genetics & Microbiology
- Nutritional Sciences
- Pharmaceutical Chemistry
- Pharmacology & Toxicology
- Physiology
- Psychology

Many of the Life Science programs are collaborative programs given by the Faculty of Arts and Science and departments in the Faculty of Medicine. The Life Sciences all focus on the scientific study of life. The study of biological processes has enormous importance for:

- Understanding one’s own body and those of other organisms sharing our planet, both in health and sickness;
- Analysing the behaviour of humans and other organisms;
- Understanding the interdependent web of living organisms on the planet, and their evolutionary relationships;
- Preparing for ethical, social and political questions arising from our increasing ability to modify living systems;
- Enhancing our ability to protect the delicate and complex ecological balance that sustains this world.

Today, the biological sciences are experiencing a revolution. Important discoveries occur almost weekly as scientists and students around the world develop and use techniques, theories and approaches. Increasingly, we need people with advanced knowledge and training who can contribute to these discoveries and their application. Equally, we need people who know enough about life sciences generally to make informed judgments about critical issues such as global warming, population growth, the emergence of drug resistance and new diseases, and the degradation of the environment.

On the St. George campus, undergraduate education, graduate education and research in the Life Sciences is carried out in departments within the Faculty of Arts and Science and the Faculty of Medicine.

The programs offered in the Life Sciences are listed below. Admission to all programs occurs after completion of 4.0 credits. Admission to some programs is limited. Please see individual program listings for admission criteria and procedures. Also check the Arts & Science Program Toolkit for details and application procedures.

Specialist Programs

Biochemistry, Biological Chemistry (Chemistry), Bioinformatics and Computational Biology (Cell & Systems Biology), Biology, Biophysics (Physics), Cell and Molecular Biology (Cell & Systems Biology), Ecology and Evolutionary Biology (Ecology & Evolutionary Biology), Environment and Health (School of the Environment), Fundamental Genetics and its Applications (Human Biology), Global Health (Human Biology), Health and Disease (Human Biology), Immunology, Molecular Genetics & Microbiology, Neuroscience (Human Biology), Pathobiology, Pharmaceutical Chemistry (Chemistry), Pharmacology, Physiology, Psychology, Psychology Research, Toxicology.

Major Programs

Animal Physiology (Cell & Systems Biology), Biochemistry, Biodiversity and Conservation Biology (Ecology & Evolutionary Biology), Biology, Cell and Molecular Biology (Cell & Systems Biology), Ecology & Evolutionary Biology, Environmental Biology (Ecology & Evolutionary Biology), Environment and Health (School of the Environment), Fundamental Genetics and its Applications (Human Biology), Genome Biology (Biology), Global Health (Human Biology), Health & Disease (Human Biology), Human Biology, Immunology, Neuroscience (Human Biology), Nutritional Sciences, Pharmacology, Physiology, Psychology, Toxicology.

Minor Programs

Biology, Environmental Biology (Ecology & Evolutionary Biology), NUS Biology (Ecology & Evolutionary Biology), Immunology, Physiology, Psychology.

Animal Use in Laboratories

Laboratory investigations are part of life science programs at the University of Toronto. Programs in life sciences at the University of Toronto include courses that involve observation, handling, or experimentation on animals or on samples derived from animals. The use of animals in teaching and research is regulated by ethical and procedural guidelines and protocols. These are approved on an ongoing basis by the University Animal Care Committee, and follow provincial and federal government rules. We recognize, however, that some students may have strong reservations about personal exposure to any
use of animal material in teaching. Students who want to avoid registration in programs or courses that include such labs are, therefore, encouraged to check in advance with the departments involved.

Introduction

Linguistics can trace its roots back to the ancient Sanskrit grammarians, and the study of language is probably as old as language itself. However, the twentieth century has produced an explosion in the scientific study of language. As our understanding of the nature and structure of human language develops, linguistics is becoming relevant to many other areas of research such as Cognitive Science, Artificial Intelligence, Speech-Language Pathology, Audiology, Psychology, and Philosophy.

On its own, linguistics represents an invaluable key to the nature of the mind and the diverse elements of human culture; as a tool, linguistics is unmatched in preparing one for the learning and teaching of languages and for integrating language with technology.

Part-time students should note that most of the summer and evening courses available to them are offered on a rotating basis only. Consequently, students wishing to take such courses should enrol in them at the earliest opportunity after completing the necessary prerequisites.

In addition to the undergraduate curriculum within the Department of Linguistics, there are courses relating to linguistics offered in other departments such as the language departments, Anthropology, Computer Science, Philosophy, and Psychology, and in the Cognitive Science and Artificial Intelligence program.

Students seeking counselling and information should contact the Undergraduate Administrator (undergrad.linguistics@utoronto.ca) or the Associate Chair, Undergraduate, Prof. Alexei Kochetov (ugling@chass.utoronto.ca).

Linguistics Programs

**Linguistics Specialist (Arts Program) - ASSPE0506**

**Enrolment Requirements:**
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

(12.0 credits)

**Required Courses (5.5 credits):**

- First Year: LIN101H1, LIN102H1
- Second Year: LIN228H1, LIN229H1, LIN232H1, LIN241H1, LIN251H1
- Third and Fourth Years: LIN322H1, LIN331H1, JAL401H1, JLP374H1/ JLP315H1

**Elective Courses (4.5 credits):**
A total of 4.5 credits in LIN/JAL/JFL/JLP/JLS (excluding LIN200H1, LIN203H1, LIN204H1) including:
- a 1.5 credits at the 300+ level
- a 0.5 credit at the 400+ level
Up to 1.0 credit may be from other departments. Approved courses include ANT329H1, ANT425H1, ANT427H1; COG250Y1; CSC384H1, CSC401H1, CSC448H1, CSC485H1; FIN220H1, FIN305H1, FRE272H1, FRE273H1, FRE274H1, FRE376H1, FRE378H1, FRE379H1, FRE379H1, FRE383H1, FRE386H1, FRE387H1, FRE388H1, FRE471H1, FRE487H1, FRE488H1; GER400H1, GER426H1, GER462H1; HPS250H1, HPS322H1, HPS352H1; ITA360H1, ITA363H1; MCS223H1; NML315H1; SLA255H1, SLA380H1, SLA452Y1; SPA322H1, SPA324H1, SPA421H1, SPA422H1, SPA423H1; VIC223Y1. Other courses might also qualify; consult the Department of Linguistics for approval.

Language Requirement (2.0 credits):

Two years of study or its equivalent of one non-Germanic, non-Romance language in courses using the spoken language. We encourage you to begin this language study in your first or second year. Approved sequences of courses include CLT141Y1, CLT251H1, and CLT252H1; EAS100Y1 and EAS200Y1; EAS120Y1 and EAS220Y1; EAS110Y1 and EAS210Y1; EST100H1, EST101H1, EST200H1, and EST201H1; FIN100H1, FIN110H1, FIN200H1, and FIN210H1; HUN100Y1 and HUN200Y1; INS220Y1 and INS323Y1; INS210Y1 and INS310Y1; NEW280Y1 and NEW380Y1; MGR100H1, MGR101H1, and MGR245Y1; NML110Y1 and NML210Y1; NML155H1, NML156H1, NML255H1, and NML256H1; NML360Y1; NML270Y1 and NML370Y1; SLA105Y1 and SLA204Y1; SLA106H1, SLA116H1, SLA206H1, and SLA207H1; SLA100H1, SLA101H1, and SLA220Y1; SLA107Y1, SLA257H1, and SLA277H1; SLA108Y1 and SLA208Y1. Other courses might also qualify; consult the Department of Linguistics for approval.

Note: Effective Fall 2021, courses associated with Victoria College's Material Culture and Semiotics program will have the new "MCS" designator.

Linguistics Major (Arts Program) - ASMAJ0506

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(7.0 credits)

1) All of: LIN101H1, LIN102H1
2) All of: LIN228H1, LIN229H1, LIN232H1, LIN241H1, LIN251H1
3) 0.5 credit from: JLP374H1 or JLP315H1
4) A further 1.0 LIN/JAL/JFL/JLP/JLS credit at the 300+ level
5) 0.5 LIN/JAL/JFL/JLP/JLS credit at the 400-level
6) An additional 1.5 credits in LIN/JAL/JFL/JLP/JLS (excluding LIN200H1, LIN203H1, LIN204H1)

Linguistics Minor (Arts Program) - ASMIN0506

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

First Year: LIN101H1, LIN102H1

Higher Years: 3.0 credits in LIN/JAL/JFL/JLP/JLS (excluding LIN200H1) of which 1.0 credit must be at the 300+ level
Linguistics Courses

LIN101H1 - Introduction to Linguistics: Sound Structure

Hours: 24L/12T

Introduction to fundamental principles of linguistics with particular attention to sound structure and its acquisition, processing, and variation; practice in elementary analytic techniques using data from a broad spectrum of languages.

Exclusion: LIN100Y1, LIN101H5, LINA01H3, LINA02H3

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN102H1 - Introduction to Linguistics: Sentence Structure and Meaning

Hours: 24L/12P

Introduction to fundamental principles of linguistics with particular attention to sentence and meaning structure, their acquisition, processing, and variation; practice in elementary analytic techniques using data from a broad spectrum of languages.

Exclusion: LIN100Y1, LIN102H5, LINA01H3, LINA02H3

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN192H1 - Sustaining Indigenous Languages

Hours: 24S

There has been much publicity in recent years about language shift and language loss and, along with it, language revitalization. In this course we examine shift involving Indigenous languages – and particularly those of Canada – from a variety of perspectives, and looking at reasons why one might want to ‘save’ a language. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN194H1 - The Science Behind Our Accents

Previous Course Number: TBB199H1

Hours: 24P

When we speak, the sound is transmitted through the air as a complex sound wave. How are various speech sounds – vowels and consonants – manifested acoustically? What does it mean, in physical terms, to have an accent? These and other related questions will be explored through computer-based acoustic analysis and perceptual experimentation. Upon completion of this course, students will (i) have overview knowledge of basic acoustic properties characterizing phonetic variation pertaining to speech, and accents in particular, (ii) be able to conduct simple speech production and perception experiments, and write up results in the form of scientific research reports, (iii) begin to read and understand scientific literature pertaining to acoustic phonetic variation and its relevance for communication. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN195H1 - Babel: Language in the Mind of Speakers

Hours: 24L

What is the relation between language and thought? In this course we examine how language is represented in our minds, and how language and cognitive processes interact. While the link between words and meanings is arbitrary and reflects culture, language is considered to be a universal property of our species. We will examine the place of language in the architecture of the mind; the debates about the universality of language structure vs. linguistic relativism; and how language and thought interact in children’s development. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN196H1 - Language and Communication

Hours: 24L

We will explore the ways in which information is communicated in conversation. We will consider systematic ways in which what a speaker intends to
communicate with language goes beyond what one says in conversation. The goal of the course is to investigate the ways in which speakers rely on knowledge of language and implicit "rules" to enrich and transform the literal content of someone’s utterance.

Students will familiarize themselves with some fundamental concepts in linguistic semantics and pragmatics. They will develop analytic skills necessary to analyze a text in an academic context and beyond. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements**: Social Science
**Breadth Requirements**: Thought, Belief and Behaviour (2)

**LIN197H1 - Language and Social Justice**

**Hours**: 24L

This course explores how language is used to construct and reinforce unjust social structures. Topics may include: the underlying sexism, classism, racism, and ableism of prestige dialects and prescriptive language education; the history and consequences of national language movements; language endangerment, documentation, and revival; sign languages and language rights for the deaf and hard-of-hearing; popular media representations of linguistic variation, especially vocal fry, uptalk, and regional accents; and the relationships between language and sex, gender identity, and sexuality.

Students will develop research, analytic, and writing skills through critique and discussion of assigned texts, independent research projects, and regular written and oral presentation of their work. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements**: Social Science
**Breadth Requirements**: Thought, Belief and Behaviour (2)

**LIN198H1 - Language Diversity**

**Hours**: 24L

There are estimated to be about 7000 languages currently spoken in the world. What do they have in common? In what ways are they different? This course will explore these questions, covering such topics as meaning, sound systems, the structure of words, the order of words in sentences, question formation, concepts such as subject and object, tense systems, pronoun systems. We will also discuss language loss and revival. Students will develop analytic skills as they consult published grammars and other resources to address these issues. Students will share their findings through oral and written presentation. Examples will be drawn from a wide range of languages. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements**: Social Science
**Breadth Requirements**: Thought, Belief and Behaviour (2)

**LIN199H1 - Exploring Heritage Languages**

**Hours**: 24L

We will explore how speakers use Heritage Languages in Toronto, using data recently collected in the GTA, so students should be familiar with one of these languages. We will collect, organize and interpret information about heritage languages in Toronto. We will look for speech patterns that differentiate first, second and third generation speakers in Toronto from corresponding speakers in their countries of origin, and look at the effects of cultural and language attitudes and usage.

Students will develop analytic skills as they explore a range of research methods and resources to address these issues. Students will share their findings through oral and written presentation, including online formats. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements**: Social Science
**Breadth Requirements**: Thought, Belief and Behaviour (2)

**LIN200H1 - Introduction to Language**

**Hours**: 24L/12T

Introduction to Language is a general-interest course on language. Possible topics include: the structure of language; how language changes over time, the social and psychological aspects of language, language and culture, the origin of language, writing systems, and language acquisition. (This course cannot be used as an entrance to programs in linguistics, and cannot be used as a prerequisite to any linguistics courses unless otherwise indicated.)

**Exclusion**: LIN100Y1, LIN101H1, LIN102H1, LIN101H5, LIN102H5, LINA01H3, LINA02H3, ANT253H1, LIN200H5

**Distribution Requirements**: Humanities
**Breadth Requirements**: Thought, Belief and Behaviour (2)
LIN201H1 - Canadian English

Hours: 24L

A study of English spoken in Canada. Topics include: vocabulary items, usage surveys, non-standard dialect enclaves, regional variation and historical development. Students will develop original research projects in linguistics.

Prerequisite: (LIN101H1, LIN102H1)/LIN200H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN201H1 - American Sign Language 1

Hours: 36L

This course is an introductory language course for students with little or no prior knowledge of American Sign Language (ASL). It provides an immersive introduction to ASL, with a focus on basic vocabulary, grammar, conversation, and appropriate behaviours for everyday interactions in a variety of social situations. The language is taught through various immersive activities, such as lecture/discussion, interactive games, and situational conversations, supplemented with readings and videos. A significant emphasis throughout the course is placed on Deaf culture and issues facing the Deaf community.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN202H1 - Introduction to Indigenous Languages of the Americas

Hours: 24L

This is an introduction to Indigenous languages and cultures of Central, North, and South America. Students will be exposed to discussions about what is an indigenous language, social status of indigenous languages as well as indigenous movements towards language documentation and revitalization and language education in the Americas.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN202H1 - English Words

Hours: 24L/12T

English has a rich vocabulary. We will learn how it has developed over time, and investigate aspects of the meaning and pronunciation of words. Most of all, we will study how words are put together, so that students will be able to recognize and analyze unfamiliar words.

Exclusion: LIN203H5, LIN233H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN203H1 - English Grammar

Hours: 24L/12T

How the English language works: students analyze a wide variety of English grammatical structures and learn how they vary across dialects and change through time.

Exclusion: LIN204H5, LINB18H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN204H1 - English Grammar

Hours: 24L/12T

How the English language works: students analyze a wide variety of English grammatical structures and learn how they vary across dialects and change through time.

Prerequisite: LIN101H1, LIN228H1
Exclusion: LIN228H5, LINB09H3
Recommended Preparation: LIN101H1/LIN200H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN209H1 - Sound Patterns in Language

Hours: 24L/12T

The nature and organization of phonological systems, with practical work in linguistic analysis.

Prerequisite: LIN101H1, LIN228H1
Exclusion: LIN229H5, LINB04H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
LIN232H1 - Syntactic Patterns in Language

Hours: 24L/12T

The nature and organization of syntactic systems; their relation to semantic systems and the linguistic organization of discourse; practical work in linguistic analysis.

Prerequisite: LIN102H1
Exclusion: LIN232H5, LINB06H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN241H1 - Introduction to Semantics

Hours: 24L/12T

An introduction to meaning within linguistics and the interpretation of language in context. Topics include logical and semantic relations, pragmatic concepts such as presupposition and implicature, the nature of thematic roles, quantifiers and scope relations, the expressions of temporal and modal relations in natural language.

Prerequisite: LIN102H1
Exclusion: LIN237H5, LIN247H5, LINC12H3, FREC12H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN251H1 - Introduction to Sociolinguistics

Hours: 24L/12T

How does linguistic variation construct identity? Introduction to recent sociolinguistic literature on language contact, multilingualism, code-switching, expressions of ethnic solidarity and regional identity, sex and gender differentiation, dialect geography, sociophonetics, perceptual dialectology, diffusion of norms in mobile populations, documentation of variation in lesser studied languages, and changes across the life-span.

Prerequisite: LIN101H1, LIN102H1
Exclusion: LIN256H5, LINB20H3
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities... Not eligible for CR/NCR option.

Distribution Requirements: Social Science

LIN302H1 - South American Indigenous Languages

Previous Course Number: PRT368H1
Hours: 36L

This course is an overview of linguistic diversity in South America, centred on Brazilian indigenous languages and peoples. Students will be introduced to current practices in the maintenance and revitalization of Brazilian indigenous languages and current strategies for empowering indigenous peoples (such as training indigenous filmmakers and music production). We will study aspects of the grammar of Brazilian languages through the analysis of small data sets, and we will discuss the influence of Brazilian indigenous languages on Brazilian Portuguese. Not offered every year.

Prerequisite: (LIN101H1, LIN102H1)/LIN200H1/ANT253H1
Exclusion: LIN303H1, PRT368H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN303H1 - Central American Indigenous Languages

Hours: 36L

This course is about indigenous languages of Central America, focusing on Mayan languages and culture. Students will be introduced to current movements in the maintenance and revitalization of indigenous languages and current strategies for empowering indigenous people (such as training indigenous linguists, music production in indigenous languages, and intercultural bilingual education). Students will also study grammatical features of indigenous languages through the analysis of small data sets, and discuss the contact between indigenous languages and Spanish. Not offered every year.

Prerequisite: (LIN101H1, LIN102H1)/LIN200H1/ANT253H1
Exclusion: LIN302H1
Distribution Requirements: Humanities
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**LIN305H1 - Quantitative Methods in Linguistics**

**Hours:** 36L

Principles of research design, data collection, and a wide variety of statistical techniques for research in various subfields of linguistics.

**Prerequisite:** LIN101H1, LIN102H1, 1.0 credit in LIN/JAL/JFL/JLP

**Exclusion:** LIN318H5, LINB29H3

**Distribution Requirements:** Social Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**LIN306H1 - Language Diversity and Language Universals**

**Hours:** 24L

This linguistics course examines cross-linguistic typological features found in the languages of the world. Special attention is given to describing morphological and syntactic patterns found cross-linguistically. The goal of the course is to draw on the diversity of languages in order to uncover language universals. (Not offered every year)

**Prerequisite:** LIN232H1

**Exclusion:** LIN476H5, LINC13H3

**Distribution Requirements:** Humanities

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**JLP315H1 - Language Acquisition**

**Hours:** 36L

Infants' abilities at birth, prelinguistic development, the first words, phonological, syntactic and semantic development. Social variables influencing language acquisition, bilingualism, models of development, language play. (Sponsored by the Departments of Linguistics and Psychology, but administered solely by the Dept. of Linguistics).

**Prerequisite:** 1.0 credit at the 200+ level in LIN/JAL/JUP/PSL/PSY/COG

**Exclusion:** PSY315H5, PLIC24H3

**Distribution Requirements:** Science

**LIN322H1 - Phonological Theory**

**Hours:** 36L

Basic issues in current phonological theory. Problems focusing on analysis and theory. (Students who want to pursue graduate studies in linguistics are strongly advised to include this course in their program.)

**Prerequisite:** LIN229H1

**Exclusion:** LIN322H5, LIN329H5, LINC02H3

**Distribution Requirements:** Social Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**LIN323H1 - Acoustic Phonetics**

**Hours:** 24L

This linguistics course is an introduction to the acoustic phonetics of the vocal tract, including acoustic properties of speech and its analysis using instrumental techniques.

**Prerequisite:** LIN101H1, LIN102H1, LIN228H1

**Exclusion:** LIN328H5

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**JAL328H1 - Writing Systems**

**Hours:** 36L

Introduction to writing systems; their historical development, their relationship to language, and their role in culture and society. (Given by the Departments of Anthropology and Linguistics) (Not offered every year)

**Prerequisite:** ANT100Y1/LIN101H1/LIN200H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**LIN331H1 - Syntactic Theory**

**Hours:** 36L

A course in syntactic theory and analysis within a current formal framework. (Students who want to pursue graduate...
studies in linguistics are strongly advised to include this course in their program.)

**Prerequisite:** LIN232H1  
**Exclusion:** LIN332H5, LINC11H3  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**LIN333H1 - Morphological Patterns in Language**

**Hours:** 36L  

The nature and organization of morphological systems, with practical work in linguistic analysis.

**Prerequisite:** LIN229H1, LIN232H1  
**Exclusion:** LIN231H5, LINC10H3  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**LIN341H1 - Semantic Theory**

**Hours:** 36L  

This linguistics course focuses on the study of natural language semantics and the relation between interpretation and syntactic structure. Topics include predication and quantification, scope and anaphora, problems of discourse analysis, the interpretation of different types of pronouns, and ellipsis.

**Prerequisite:** LIN241H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**LIN351H1 - Sociolinguistic Patterns in Language**

**Hours:** 24L/12T  

In this sociolinguistics course, we explore linguistic variation and its social implications, especially the quantitative study of phonological and grammatical features and their correlations with age, sex, ethnicity, and other social variables.

**Prerequisite:** LIN251H1, or permission of the instructor  
**Distribution Requirements:** Humanities, Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**JAL355H1 - Language and Gender**

**Hours:** 24L  

An introduction to some of the principal questions of feminist theory, as viewed from sociolinguistics. Topics include: socialization into gendered discourse patterns, cultural and ethnic differences in gendered interactions; the role of language and gender in legal, medical and labour settings; multilingualism, migration, imperialism and nationalism; sexuality, desire and queer linguistics, language, gender and globalization.

**Prerequisite:** 1.0 credit at the 200-level in LIN/ANT/JAL/SOC/WGS  
**Recommended Preparation:** ANT204H1/ANT253H1/SOC200H1/SOC214H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**LIN362H1 - Historical Linguistics**

**Hours:** 24L  

An introduction to diachronic linguistics. Theories of language change; the comparative method, internal reconstruction, linguistic geography, the origin of languages; language death.

**Prerequisite:** LIN229H1  
**Exclusion:** LIN360H5  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**JLP374H1 - Psychology of Language**

**Hours:** 36L  

In Psychology of Language, we investigate human and other animal communication, structure of human language, word meaning and semantic memory, psychological studies of syntax, bilingualism, language and thought, language errors and disorders. (Sponsored by the Departments of Linguistics and Psychology, but administered solely by the Dept. of Linguistics).

**Prerequisite:** 1.0 credit from LIN228H1, LIN229H1, LIN232H1, LIN241H1, PSY260H1, PSY270H1, PSY280H1, PSY290H1, COG250Y1  
**Exclusion:** LIN258H5, PSY374H5, PLIC55H3  
**Distribution Requirements:** Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)
LIN398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities.... Not eligible for CR/NCR option.

Distribution Requirements: Humanities

LIN398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities.... Not eligible for CR/NCR option.

Distribution Requirements: Humanities

LIN399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities.... Not eligible for CR/NCR option.

Distribution Requirements: Humanities

JAL401H1 - Field Linguistics

Hours: 48P

Field Linguistics provides practice in language analysis based on elicited data from a native speaker of an indigenous or foreign language, emphasizing procedures and techniques. (Given by the Departments of Anthropology and Linguistics)

Prerequisite: Completion of LIN322H1 and LIN331H1 or permission of the instructor

Exclusion: LIND46H3

Distribution Requirements: Social Science

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN402H1 - Linguistic Typology and Constructed Languages

Hours: 36L

This course uses constructed languages (e.g., Esperanto, Klingon, Dothraki) to explore crosslinguistic patterns in language structure. Topics include phonological and morphosyntactic typology, language change over time, effects of culture and environment on language, history of language construction, standards in writing descriptive grammars, and critical analysis of research on language diversity.

Prerequisite: 5 required 200-level courses (LIN228H1, LIN229H1, LIN232H1, LIN241H1, LIN251H1), AND LIN322H1 Phonological Theory OR LIN331H1 Syntactic Theory, or permission of the instructor.

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN405H1 - Advanced Quantitative Methods in Linguistics

Hours: 36L

This course introduces advanced statistical modeling techniques using the statistical software R, tailored specifically to the needs of linguistic research.

Prerequisite: LIN305H1

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN409H1 - Structure of a Specific Language

Hours: 24L

Topics may include: the phonological, morphological, syntactic, and semantic systems; the writing system; a brief diachronic sketch; linguistic variation and sociolinguistic aspects. (Not offered every year).

Prerequisite: LIN228H1, LIN229H1, LIN232H1, 1.0 credit at the 300/400- level in LIN/JAL/JFL/JLP/JLS

Exclusion: LIN479H5 or LINC61H3 if the same language was analyzed.

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN423H1 - Phonetic Analysis

Hours: 36S

This course provides students with hands-on experience with main methods of linguistic phonetic (acoustic and articulatory) analysis through project-based group work and training in writing up experimental results.
LIN429H1 - Research in Phonology  
Hours: 24S

Research in Phonological Theory, including guided instruction in how to undertake critical reading of primary literature, develop an original topic, write a research paper, an abstract, a handout, and give an oral presentation. Not eligible for CR/NCR option.

Prerequisite: LIN322H1  
Distribution Requirements: Humanities  
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN432H1 - Advanced Morphology  
Hours: 24L

Current research involving morphology, including the role of morphology in the grammar, the nature of inflectional paradigms, affixes affecting grammatical relations constitute this linguistics course. Each year one topic will be a special focus and will be dealt with at length. (Not offered every year)

Prerequisite: LIN333H1  
Corequisite: LIN331H1  
Distribution Requirements: Humanities  
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN439H1 - Research in Syntax  
Hours: 24S

Research in Syntactic Theory, including guided instruction in how to undertake critical reading of primary literature, develop an original topic, write a linguistics research paper, an abstract, a handout, and give an oral presentation. Not eligible for CR/NCR option. (Not offered every year)

Prerequisite: LIN331H1  
Distribution Requirements: Humanities  
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN441H1 - Advanced Semantics and Pragmatics  
Hours: 24S

This course covers current research in formal semantics and pragmatics. Topics may vary from year to year. The course is intended to be a seminar-style course; it includes reading primary literature and writing a research paper.

Prerequisite: LIN341H1  
Distribution Requirements: Humanities  
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN451H1 - Urban Dialectology  
Hours: 24L

Ways in which urban sub-cultures differ in their use of language. How speakers dialects reflect their ethnicity, group affiliation, and other social categories. Practice in dialect analysis based on data from the speech community, emphasizing procedures and techniques.

Prerequisite: LIN351H1 plus 2.0 credits at the 200+ level in LIN/JAL/JLP  
Distribution Requirements: Humanities, Social Science  
Breadth Requirements: Society and its Institutions (3)

LIN456H1 - Language Variation and Change: Theory and Analysis  
Hours: 36L

The theory and practice of sociolinguistics. The inter-relationship between language and society from the perspective of collecting, organizing, and analyzing patterns in natural speech data, including field methods and quantitative methods for correlating linguistic and social variables.

Prerequisite: LIN351H1  
Exclusion: LIN458H5  
Distribution Requirements: Humanities, Social Science  
Breadth Requirements: Society and its Institutions (3)

LIN458H1 - Revitalizing Languages  
Hours: 24L

A study of language endangerment and language revitalization efforts, focusing on Indigenous languages of...
Canada. Topics include language classification and a survey of major features of the languages, what it means for a language to be endangered, the factors that contribute to language shift, and efforts to reverse language shift, including discussion of literacy, documentary linguistics and dictionaries.

**Prerequisite:** LIN101H1, LIN102H1 plus 2.0 credits at the 200+ level in LIN/JAL  
**Distribution Requirements:** Humanities, Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**JLP471H1 - Advanced Psycholinguistics**

**Hours:** 24S

Seminar in advanced topics in psycholinguistics. Content varies from year to year. (Sponsored by the Departments of Linguistics and Psychology, but administered solely by the Dept. of Linguistics).

**Prerequisite:** JLP374H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**JLS472H1 - Child Language Disorders**

**Hours:** 36L

Students are introduced to the etiologies and characteristics of speech and language disorders in children, associated with autism, intellectual disabilities, and specific language impairment. Theoretical underpinnings of the major intervention approaches for children with speech and language disorders are discussed. (Given by the Departments of Linguistics and Speech Language Pathology)

**Prerequisite:** LIN101H1, LIN102H1, LIN228H1, and 1.0 credit at the 300+ level  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**JLS473H1 - Adult Speech and Language Disorders**

**Hours:** 36L

Students are introduced to the etiologies and characteristics of speech and language disorders in adults, associated with aphasia, neurodegenerative disorders, and head injuries. The effects of communication handicaps on the individual and theoretical underpinnings of the major intervention approaches for adults are discussed. Given by the Departments of Linguistics and Speech Language Pathology. (Not offered every year)

**Prerequisite:** LIN101H1, LIN102H1, and 1.0 credit at the 300+ level  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**JLS475H1 - Literacy and Reading Disorders**

**Hours:** 36L

Literacy and Reading Disorders is an introduction to the typical development of emergent literacy skills, including oral language, phonological awareness, narratives, and emergent writing in children; a discussion of the effects of language disorders on emergent literacy skills; a survey of approaches to intervention for children’s emergent literacy skills. Given by the Departments of Linguistics and Speech Language Pathology. (Not offered every year)

**Prerequisite:** LIN101H1, LIN102H1, and 1.0 credit at the 300+ level  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**JLS476H1 - Linguistics in the Workforce: Clinical Practice and Research**

**Hours:** 36S

This course exposes students to research and practical approaches in the context of health professions of relevance to linguistics students, especially audiology and speech-language pathology. Students learn about evidence-informed practice, research methodologies, practice approaches and theories in the health professions. Students will be poised to benefit from optional service learning placements during or following the course, in research laboratories or clinical settings. Successful completion of this course provides students with exposure and experience of use in their applications to audiology, speech-language pathology, and other clinical programs and in their future health or graduate studies. Not eligible for CR/NCR option. (Not offered every year)

**Prerequisite:** LIN101H1, LIN102H1, and 1.0 credit at the 200+ level
LIN481H1 - Introduction to Analysis and Argumentation

Hours: 36L

Linguistic argumentation, practice in constructing and evaluating hypotheses, and critical evaluation of representative articles. Emphasis on the structure of arguments rather than on the analysis of a particular language.

Prerequisite: LIN322H1/LIN331H1
Exclusion: LIN411H5, LINC10H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN490H1 - Special Topics in Linguistics

Hours: 24S

A specific topic in linguistics will be explored in depth in Special Topics in Linguistics. Students will learn about a narrowly-focused area of linguistics, including guided instruction in how to undertake critical reading of primary literature, develop a research topic and write a linguistics research paper. Not eligible for CR/NCR option. (Not offered every year)

Prerequisite: 2.0 LIN credits at the 200+ level, of which 1.0 LIN credit must be at the 300+ level. Permission of the instructor will also be required.
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LIN495Y1 - Individual Project

A research or reading project in linguistics undertaken by the student under the supervision of a staff member. Open only when a faculty member is willing and available to supervise. Not eligible for CR/NCR option.

Prerequisite: Permission of the Department
Distribution Requirements: Humanities, Social Science

LIN496H1 - Individual Project

A research or reading project in linguistics undertaken by the student under the supervision of a staff member. Open only when a faculty member is willing and available to supervise. Not eligible for CR/NCR option.

Prerequisite: Permission of the Department
Distribution Requirements: Humanities, Social Science

LIN497Y1 - Individual Project

A research or reading project in linguistics undertaken by the student under the supervision of a staff member. Open only when a faculty member is willing and available to supervise. Not eligible for CR/NCR option.

Prerequisite: Permission of the Department
Distribution Requirements: Humanities, Social Science

LIN498H1 - Individual Project

A research or reading project in linguistics undertaken by the student under the supervision of a staff member. Open only when a faculty member is willing and available to supervise. Not eligible for CR/NCR option.

Prerequisite: Permission of the Department
Distribution Requirements: Humanities, Social Science

LIN499H1 - Individual Project

A research or reading project in linguistics undertaken by the student under the supervision of a staff member. Open only when a faculty member is willing and available to supervise. Not eligible for CR/NCR option.

Prerequisite: Permission of the Department
Distribution Requirements: Humanities, Social Science
Materials Science

Materials science is the study of the structure, properties and applications of all types of materials including metals, ceramics, glasses and polymers. Currently many exciting scientific developments are in the materials field. Notable advances have been made recently in studies of amorphous metals, the quasicrystalline state, liquid crystals, semiconductors, nanostructured materials, high critical temperature superconductors, biomaterials, high strength polymers, materials processing techniques such as ion implantation and laser melting, and in new categories of engineered materials such as advanced industrial ceramics or composite materials.

Materials science is interdisciplinary, drawing on the basic sciences of chemistry and physics and on more applied subjects such as metallurgy, ceramics and polymer science. Its tools and techniques include electron microscopy, x-ray diffraction, surface analysis using Auger emission spectroscopy, x-ray photoelectron spectroscopy, etc.

Introduction to Materials Science, MSE101H1, is designed to appeal to a wide variety of student interests. Other materials science courses are available to students having the prescribed prerequisites and the approval of the Undergraduate Student Counsellor. The specialist program in Materials Science is coordinated jointly by the Departments of Chemistry and Materials Science and Engineering. For further information on the program, consult the undergraduate coordinators for both departments.

Materials Science Programs

Materials Science Specialist (Science Program) - ASSPE2424

Consult Professor Andrew Dicks, Department of Chemistry.

This program draws both on the basic sciences of chemistry and physics, and on the more applied areas such as metallurgy or ceramics. Courses dealing with these latter fields are offered through the Department of Materials Science in the Faculty of Applied Science and Engineering. This would be an appropriate program for students with career interests in solid-state, polymer or composite materials industries, or for graduate work in either chemistry or materials science, with an appropriate choice of options. Students may follow the Materials Chemistry path by taking the research course CHM499Y1 or the Materials Science and Engineering path by taking the research courses MSE492H1 and MSE493H1.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

• (CHM135H1 and CHM136H1) (63% in each)/CHM151Y1 (63%)

Completion Requirements:

(14.0 credits, including 1.0 credit from 400-level courses)

First Year:

1. BIO120H1
2. CHM151Y1 (strongly recommended)/ (CHM135H1 and CHM136H1)
3. (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1
4. MSE120H1

First or Second Year:

1. BIO130H1/BIO220H1
2. (PHY131H1 and PHY132H1)/ (PHY151H1 and PHY152H1)

Second Year and Higher Years:

1. CHM220H1/CHM222H1/MSE202H1/CHM223H1/CHM238Y1/CHM247H1/CHM249H1
2. MSE219H1,(MSE218H1/MSE318H1)/MSE335H1

Regarding Materials Science Courses

Notes

1. The MSE courses below are administered by the Faculty of Applied Science and Engineering, and are subject to the rules and regulations of that Faculty, including those for term dates, examination periods and deferral practices.
2. The CHM courses listed for the Materials Science program are described in the Chemistry section of this Calendar.
3. Enrollment in MSE courses is done through your own College Registrar. It is not necessary to petition as the courses listed below have been pre-approved for this Specialist Program.
4. Deferment of Final Exams is NOT generally granted in the Faculty of Applied Science and Engineering.

Materials Science Courses

MSE120H1 - Materials Engineering, Processing and Application

Hours: 38.4L/6.4T/12.8P

This course covers an introduction to the field of materials science and engineering following a design-led approach. Application areas such as stiffness-limited design, fracture-limited design, strength-limited design will be used to guide further investigations into elements of the processing-structure-properties-performance paradigm. Topics covered will include material property charts, computer-aided design and materials selection, crystallographic planes and directions, crystal structures, stiffness, strength, plasticity, yielding, ductility, fracture and fracture toughness, cyclic loading and fatigue, friction and wear, thermal properties of materials, electrical properties, optical properties, materials corrosion, and materials processing.

MSE218H1 - Phase Transformations

Hours: 39L/13T/20P

A key part of MSE is focused on explaining how material systems transform from one condensed phase to another. These phase transformations are a critical aspect of understanding the behaviour of a material. MSE 218 builds on the thermodynamics and phase stability of MSE 202 and runs in parallel to the rates of transformation seen in MSE 217. In MSE 218 we will consider phase transformations in one component, two component, and multicomponent systems. We will look at both diffusional and diffusionless transformations, focusing on the nucleation and growth aspects of each case. Specific examples will include: solidification, precipitation, recrystallization, spinodal, massive, and order-disorder transformations. Both experimental and computational labs will be used to outline specific transformations in more depth.

MSE219H1 - Structure and Characterization of Materials

Hours: 39L/13T/39P

Introduction to two and three-dimensional crystallography and crystal structures of solids. Topics include: Pearson and Hermann-Mauguin symbols, reciprocal space, point group and space group symmetry analysis, stereographic projections. Introduction to tensor analysis of crystalline material properties, and symmetry breakdown by imperfections in crystals. Experimental techniques used to interpret structure and chemistry of solids and their defects will be covered theoretically and in the laboratory including: X-ray diffractometry, optical, electron and scanning probe microscopy, and surface/bulk spectroscopies based on optical, X-ray, electron and ion-beam analysis methods.

MSE316H1 - Mechanical Behaviour of Materials

Hours: 38.4L/12.8T/25.6P

The mechanical behaviour of engineering materials including metals, alloys, ceramics and polymeric materials. The following topics will be discussed: macro- and micro-structural response of materials to external loads; load-displacement and stress-strain relationships, processes and mechanisms of elastic, visco-elastic, plastic and creep deformation, crystallographic aspects of plastic flow, effect of defects on mechanical behaviour, strain hardening theory, strengthening mechanisms and mechanical testing.

MSE335H1 - Materials Physics

Hours: 39L/13T

MSE342H1 - Nanomaterials

Hours: 26L/13T

An introduction to nanostructured materials. Topics include: the different classes of nanomaterials, synthesis and characterization methods, changes in physical properties on the nanometer scale, areas of application of nanostructured materials and materials issues in nanotechnology. (Quarter term course taught over the entire Fall term, worth .25 credits).

MSE343H1 - Biomaterials

Hours: 26L/13P

Provides an overview of the field of biomaterials, introducing fundamental biological and materials design and selection concepts, and is open to CHE students. Key applications of materials for biomedical devices will be covered, along with an introduction to the expected biological responses. The concept of biocompatibility will be introduced along with the essential elements of biology related to an understanding of this criterion for biomaterial selection and implant design. In addition, structure-property relationships in both biological and bio-inspired materials will be highlighted.

MSE351H1 - Design and Sim of Materials Processes

Hours: 36L/12T/24P

An overview of computer modeling approaches to analyze various macro-scale phenomena involved in materials processing, product design, and manufacturing. These approaches will include weighted residual methods, finite element and finite difference methods, computational fluid dynamics, and multiphysics simulations. The students will apply these methods to study heat transfer, fluid flow, stress analysis, structural dynamics, and coupled behavior. Practical experience will be provided on commercial finite element (FE) and computer-aided design (CAD) packages such as ANSYS and SOLIDWORKS.

MSE430H1 - Electronic Materials

Hours: 26L/13T

Materials parameters and electronic properties of semiconductors are discussed as basic factors in the engineering of semiconductor devices. Materials parameters are related to preparation and processing methods, and thus to the electronic properties. The implications of materials parameters and properties on selected simple devices are discussed.

MSE440H1 - Biomaterial Processing and Properties

Hours: 39L/13T

Currently used biomaterials for formation of surgical implants and dental restorations include selected metals, polymers, ceramics, and composites. The selection and processing of these materials to satisfy biocompatibility and functional requirements for applications in selected areas will be presented. Materials used for forming scaffolds for tissue engineering, and strategies for repair, regeneration and augmentation of degenerated or traumatized tissues will be reviewed with a focus on biocompatibility issues and required functionality for the intended applications.

Prerequisite: MSE343H1

MSE451H1 - Advanced Physical Properties of Structural Nanomaterials

Hours: 39L/13T/39P

This course deals with the physical properties of bulk nanostructured materials. Included are mechanical properties (elastic behavior, tensile and compressive strength, creep, wear and fatigue properties) electrical properties (electrical transport phenomena, electrical resistivity) magnetic properties (paramagnetic, diamagnetic, soft and hard ferromagnetic, superparamagnetic and antiferromagnetic properties), thermodynamic properties (interfacial enthalpy, thermal
stability, phase transformations, heat capacity). The considerable differences observed for nanocrystalline solids compared to conventional polycrystalline and amorphous solids will be discussed in terms of the microstructural differences for these materials.

MSE459H1 - Synthesis of Nanostructured Materials

Hours: 39L/26P

Various synthesis techniques to produce nanostructured materials will be introduced. These include methods involving the vapor phase (physical and chemical vapor deposition, organometallic chemical vapor deposition), the liquid phase (rapid solidification, spark erosion), the solid phase, (mechanical attrition, equal channel deformation) as well techniques producing these structures from solution (electrodeposition, electroless processing, precipitation). Secondary processing techniques to produce final products or devices will also be discussed.

MSE461H1 - Engineered Ceramics

Hours: 39L/24T

The unique combinations of physical, electrical, magnetic, and thermomechanical properties exhibited by advanced technical ceramics has led to a wide range of applications including automobile exhaust sensors and fuel cells, high speed cutting tool inserts and ball bearings, thermal barrier coatings for turbine engines, and surgical implants. This course examines the crystal and defect structures which determine the electrical and mass transport behaviours and the effects of microstructure on optical, magnetic, dielectric, and thermomechanical properties. The influence of these structure-property relations on the performance of ceramic materials in specific applications such as sensors, solid oxide fuel cells, magnets, and structural components is explored.

MSE498Y1 - Capstone Project: Design of Materials Processes

Hours: 12.8L/25.6T/12.8P

The students, working in small groups complete a project involving design of a materials processing plant, leading to a design report delivered at the conclusion of the course. The topics covered in the lectures and design process include basic materials processing flowsheet for primary processing and recycling of materials, materials and energy balance of individual units and of overall process flowsheets, use of computer software for flowsheet evaluation, translating process flowsheets to resource and utility requirements, energy analysis, capital/operating cost, basics of equipment sizing, operation scheduling, safety and HAZOP, plant layout, and design for sustainability.

Mathematics is the study of shape, quantity, pattern and structure. It serves as a tool for our scientific understanding of the world. Knowledge of mathematics opens gateways to many different professions such as economics, finance, computing, engineering, and the natural sciences. Aside from practical considerations, mathematics can be a highly satisfying intellectual pursuit, with career opportunities in teaching and research.

The department counts many of Canada's leading research mathematicians among its faculty. Our mathematics programs are flexible, allowing students to select courses based on specialization and interest. Contents range from calculus and linear algebra in the non-specialist programs to more advanced topics such as real and complex analysis, ordinary and partial differential equations, differential geometry, topology, commutative algebra, graph theory, mathematical logic, number theory, and functional analysis.

The department offers eight specialist programs in addition to the major and minor programs.

In the Mathematics, Applied Mathematics, Mathematics and Physics, and Mathematics and Philosophy specialist programs, students acquire an in-depth knowledge and expertise in mathematical reasoning and the language of mathematics, with its emphasis on rigor and precision. These programs are designed for students wishing to pursue graduate studies; most of the graduates of these programs continue on to graduate school with some of them gaining admission to the world's best graduate schools.

The Mathematical Applications in Economics and Finance specialist program is designed to prepare students for direct entry into the world of finance. It can also serve as a gateway to an MBA or a Master of Finance degree, possibly followed by an eventual doctorate.

The Mathematics and its Applications specialist programs offer three areas of concentration: teaching, physical science, and probability/statistics. These specialist programs are designed as "enhanced double majors." The required courses for these concentrations are almost identical for the first two years, but they diverge in the upper years. Students in these programs can also continue on to graduate studies.

The Major and Minor programs are intended for students who want to combine mathematical skills with work in other subjects. These programs require less coursework than the specialist programs, but still require the completion of some upper year mathematics courses.

Students interested in becoming K-12 teachers should consider applying to the combined degree program --- a six-year program that leads to an Honours Bachelor of Science (HBSc) from the University of Toronto and a Master of Teaching (MT) from the Ontario Institute for Studies in Education (OISE). The HBSc part of this program involves completing a Math Major, a Minor in Education and Society (offered by Victoria College) and a Minor in an area that would lead to a second "teachable" subject. Please see the Victoria College website for more information.

Co-op and Internship Opportunities

The Professional Experience Year (PEY) Co-op Program is available to eligible full-time Specialist and Major students entering their third year of study in Fall 2021. The PEY Co-op program is an optional 12 to 16-month work term providing industrial experience. It gives students an opportunity to apply their skills in the context of a paid internship. Note: September 2021 or January 2022 will be the last opportunity for Faculty of Arts & Science students to register for the PEY Co-op. Students in Year 3 in the Fall/Winter 2021-2022 session will be the last group of Faculty of Arts & Science students eligible to participate in PEY Co-op. Students starting Year 2 in Fall 2021 or later will only be eligible to participate in the Arts & Science Internship Program stream.

The new Arts & Science Internship Program (ASIP) stream is available to students entering their second year of study in Fall 2021 and enrolled in the Mathematics Specialist, Applied Mathematics Specialist, Mathematics & Physics Specialist, Mathematics & Philosophy Specialist, Mathematical Applications in Economics & Finance Specialist, Mathematics & its Applications Specialist, and Mathematics Major.

- Enrolment is limited and requires a supplemental application. Students enrolled in the ASIP stream
will be required to complete mandatory Professional Development programming plus a minimum of 12 and maximum of 20 months of paid, full-time work experience. The time to degree completion for students enrolled in ASIP will normally be 5 years. There is an additional cost to participate in the ASIP stream.

- Students will typically be admitted to the ASIP stream for the Fall term of Year 2 of study, however starting in Fall 2022, in exceptional circumstances students, including transfer students, who enrolled in an eligible program in the Summer after Year 2 can be admitted to the ASIP stream for the Fall of Year 3. Year 3 entry into the program requires prior approval of the Associate Chair, Undergraduate or their designate and the Experiential Learning & Outreach Support (ELOS) Office.

- Further details about ASIP, including eligibility requirements and application procedures, can be found here. Students may also visit the ASIP webpage or contact the ELOS office at asip@utoronto.ca.

### Introductory Courses

The Department of Mathematics offers introductory courses for incoming students to foster the development of mathematics skills.

**PUMP Level 1 and PUMP Level 2 (Preparing for University Mathematics Program)**

Both programs are non-credit courses that equip students with the necessary background knowledge required to succeed in first year mathematics courses. The content for the courses may be viewed at http://www.math.toronto.edu/cms/undergraduate-program/current-students-ug/pump-courses-2/.

PUMP Level 1 provides a quick math review during the months of July and August, for students who would like to take six weeks prior to the start of the first semester to practice pre-calculus math skills. During other terms, it is scheduled as a longer course, for students who have not taken the appropriate high school mathematics prerequisites for university calculus and linear algebra. This course is recommended for any student who wish to close any existing gap between high school math and University level math courses or anyone who wishes to review high school math before attempting University level math or other science courses.

PUMP Level 2 is an Introduction to Proofs course. The curriculum provides background knowledge that is a preparation for MAT137Y1, MAT157Y1, MAT240H1, MAT247H1, MAT237Y1, and other proof-oriented advanced courses. The course covers the reading and comprehension of mathematical statements, analyzing definitions and properties, formulation of arguments, and strategies for proofs. This course is recommended for any student who wish to add to their knowledge by joining the group of students who will commence their preparation for the more challenging concepts in the advance analytical programs, during the months of July and August.

Visit https://www.math.toronto.edu/cms/undergraduate-program/potential-students-ug/ for up-to-date information on the availability of PUMP Level 1 and PUMP Level 2.

If you have questions about the content of these courses, e-mail 1styear@math.toronto.edu.

### Mathematics Programs

#### Mathematics Specialist (Science Program) - ASSPE1165

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

(12.5 credits, including at least 3.0 credits at the 400-level)

The Specialist Program in Mathematics is directed toward students who hope to pursue mathematical research as a career.

**Year 1:**

MAT157Y1, MAT240H1, MAT247H1
Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream or PEY Co-op.

**Note:** September 2021 or January 2022 will be the last opportunity for Faculty of Arts & Science students to register for PEY Co-op. Students in Year 3 in the 2021-2022 Fall/Winter session will be the last group of Faculty of Arts & Science students eligible to participate in PEY Co-op. Students starting Year 2 in Fall 2021 or later will only be eligible to participate in the Arts & Science Internship Program stream.

Year 2:
MAT257Y1, MAT267H1

Year 2 and Higher Years:

1. 0.5 credit with a significant emphasis on ethics and social responsibility: ANT100Y1/ANT253H1/ CSC300H1/ EEB215H1/ENT200H1/ ENV100H1/ ENV200H1/ ENV333H1/ESS205H1/ETH201H1/ETH210H1/ ETH220H1/FOR200H1/HMB203H1/HPS200H1/ HPS250H1/HPS301H1/HST209H1/IMC200H1/ JPH441H1/PHL240H1/PHL244H1/PHL265H1/ PHL271H1/PHL273H1/PHL275H1/PHL281H1/ PHL295H1 or another 0.5 credit course approved by the Department.

**NOTE:** Students may use the CR/NCR option with this 0.5 credit course and have it count toward the program. Students in the VIC program may also use VIC172Y1.

2. MAT327H1

Years 3 and 4:
1. MAT347Y1, MAT354H1, MAT357H1, MAT363H1/ MAT367H1 (MAT363H1 can be taken in Year 2, if desired)
2. 2.0 credits of: MAT309H1, MAT351Y1, ANY 400-level APM/MAT
3. 3.0 credits of APM/MAT at the 300+ level, including at least 2.0 credits at the 400-level (these may include options above not already chosen)
4. MAT477H1

**NOTES:**
1. The Department recommends that PHY151H1 and PHY152H1 be taken in the first year, and that CSC148H1 and STA257H1 be taken during the program. If you do not have a year-long course in programming from high school, the Department strongly recommends that you take CSC108H1 prior to CSC148H1.
2. Students planning to take specific 400-level courses should ensure that they have the necessary prerequisites.
3. Students may apply to have graduate level math courses count towards their 400-level course requirements.

### Applied Mathematics Specialist (Science Program) - ASSPE2053

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

(13.0-13.5 credits, including at least 1.5 credits at the 400-level)

The Specialist Program in Applied Mathematics is directed toward students who hope to pursue applied mathematical research as a career.

Year 1:
MAT157Y1, MAT240H1, MAT247H1. (CSC108H1, CSC148H1)

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream or PEY Co-op.

**Note:** September 2021 or January 2022 will be the last opportunity for Faculty of Arts & Science students to register for PEY Co-op. Students in Year 3 in the Fall/Winter 2021-2022 session will be the last group of Faculty of Arts & Science students eligible to participate in PEY Co-op. Students starting Year 2 in Fall 2021 or later will only be eligible to participate in the Arts & Science Internship Program stream.

Year 2:
MAT257Y1, MAT267H1, STA257H1, STA261H1

Year 2 and Higher Years:

1. 0.5 credit with a significant emphasis on ethics and social responsibility: ANT100Y1/ANT253H1/ CSC300H1/ EEB215H1/ENT200H1/ENV100H1/ENV200H1/ ENV333H1/ESS205H1/ETH201H1/ETH210H1/ ETH220H1/FOR200H1/HMB203H1/HPS200H1/ HPS250H1/HPS301H1/HST209H1/IMC200H1/ JPH441H1/PHL240H1/PHL244H1/PHL265H1/ PHL271H1/PHL273H1/PHL275H1/PHL281H1/ PHL295H1 or another 0.5 credit course approved by the Department.

**NOTE:** Students may use the CR/NCR option with this 0.5 credit course and have it count toward the program. Students in the VIC program may also use VIC172Y1.
Mathematics and Physics Specialist (Science Program)  
- ASSPE0397

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(14.5-15.5 credits, including at least 1.0 credit at the 400-level)

Year 1:
MAT157Y1, MAT240H1, MAT247H1, PHY151H1, PHY152H1

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream or PEY Co-op.

Note: September 2021 or January 2022 will be the last opportunity for Faculty of Arts & Science students to register for PEY Co-op. Students in Year 3 in the Fall/Winter 2021-2022 session will be the last group of Faculty of Arts & Science students eligible to participate in PEY Co-op. Students starting Year 2 in Fall 2021 or later will only be eligible to participate in the Arts & Science Internship Program stream.

Year 2:
MAT257Y1, MAT267H1, PHY224H1, PHY250H1, PHY252H1, PHY254H1, PHY256H1

Year 2 and Higher Years:
1. 0.5 credit with a significant emphasis on ethics and social responsibility: ANT100Y1/ ANT253H1/ CSC300H1/ EEB215H1/ ENT200H1/ ENV100H1/ ENV200H1/ ENV333H1/ ESS205H1/ ETH201H1/ ETH210H1/ ETH220H1/ FOR200H1/ HMB203H1/ HPS200H1/ HPS250H1/ HPS301H1/ HST209H1/ IMC200H1/ JPH441H1/ PHL240H1/ PHL244H1/ PHL265H1/ PHL271H1/ PHL273H1/ PHL275H1/ PHL281H1/ PHL295H1 or another 0.5 credit course approved by the Department.

NOTE: Students may use the CR/NCR option with this 0.5 credit course and have it count toward the program. Students in the VIC program may also use VIC172Y1.

Year 3:
1. MAT351Y1, MAT334H1/ MAT354H1, MAT357H1
2. One of: MAT327H1, MAT347Y1, MAT363H1/ MAT367H1 (MAT363H1 can be taken in the second year, if desired)
3. PHY324H1, PHY350H1, PHY354H1, PHY356H1

Year 4:
1. Two of: APM421H1, APM426H1, APM446H1, APM441H1
2. Two of: PHY450H1, PHY452H1, PHY454H1, PHY456H1, PHY460H1
3. One of: MAT477H1, PHY424H1, PHY478H1, PHY479Y1

NOTES:
1. Students who are intending to apply to graduate schools in mathematics would be well-advised to take MAT347Y1.
2. Students planning to take specific 400-level courses should ensure that they have the necessary prerequisites.
3. Students may apply to have graduate level math courses count towards their 400-level course requirements.

Mathematics and Philosophy Specialist (Science Program)  
- ASSPE1361

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Consult the Undergraduate Coordinators of the Departments of Mathematics and Philosophy.
(12.0 credits including at least 1.0 credit at the 400-level)

Year 1:
MAT157Y1, MAT240H1, MAT247H1; One of PHL232H1, PHL233H1, PHL255H1

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream or PEY Co-op.

Note: September 2021 or January 2022 will be the last opportunity for Faculty of Arts & Science students to register for PEY Co-op. Students in Year 3 in the Fall/Winter 2021-2022 session will be the last group of Faculty of Arts & Science students eligible to participate in PEY Co-op. Students starting Year 2 in Fall 2021 or later will only be eligible to participate in the Arts & Science Internship Program stream.

Higher Years:
1. MAT257Y1, MAT327H1, MAT347Y1, MAT354H1/ MAT357H1
2. PHL345H1, MAT309H1/ PHL348H1
3. Four of: PHL325H1, PHL331H1, PHL332H1, PHL346H1/ PHL354H1, PHL347H1, PHL349H1, PHL355H1, PHL451H1, PHL480H1
4. 1.0 credit from PHL200Y1/ PHL205H1/ PHL206H1/ PHL210Y1
5. PHL265H1/ PHL275H1
6. 2.0 credits of PHL/APM/MAT at the 300+ level, to a total of 12.0 credits.

Note: Students may apply to have graduate level math courses count towards their 400-level course requirements.

Mathematical Applications in Economics and Finance Specialist (Science Program) - ASSPE1700

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(12.0-12.5 credits, including at least 1.5 credits at the 400-level)

Year 1:
ECO100Y/ (ECO101H1, ECO102H1), MAT137Y1/ MAT157Y1 (see NOTE 1), MAT223H1, MAT224H1

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream or PEY Co-op.

Note: September 2021 or January 2022 will be the last opportunity for Faculty of Arts & Science students to register for PEY Co-op. Students in Year 3 in the Fall/Winter 2021-2022 session will be the last group of Faculty of Arts & Science students eligible to participate in PEY Co-op. Students starting Year 2 in Fall 2021 or later will only be eligible to participate in the Arts & Science Internship Program stream.

(Please check the requirements for ECO206Y1 to ensure that you pass these first year courses with grades that allow registration in ECO206Y1)

Year 2:
ECO206Y1, MAT237Y1, MAT244H1, MAT246H1 (see NOTE 1), STA257H1, STA261H1

Year 2 and Higher Years:
0.5 credit with a significant emphasis on ethics and social responsibility: ANT100Y1/ ANT253H1/ CSC300H1/ EEB215H1/ ENT200H1/ ENV100H1/ ENV200H1/ ENV333H1/ ESS205H1/ ETH201H1/ ETH210H1/ ETH220H1/ FOR200H1/ HMB203H1/ HPS200H1/ HPS250H1/ HPS301H1/ HST209H1/ IMC200H1/ JPH441H1/ PHL240H1/ PHL244H1/ PHL265H1/ PHL271H1/ PHL273H1/ PHL275H1/ PHL281H1/ PHL295H1 or another 0.5 credit course approved by the Department.

Note: Students may use the CR/NCR option with this 0.5 credit course and have it count toward the program. Students in the VIC program may also use VIC172Y1.

Year 3:
1. APM346H1, ECO358H1, ECO359H1, MAT337H1, STA302H1/ ECO375H1, STA347H1
2. One of: MAT332H1, MAT344H1, MAT334H1, MAT475H1

Year 4:
APM462H1, APM466H1, STA457H1

Notes:

1. Students who have completed MAT157Y1 are waived from completing MAT246H1.
2. Students planning to take specific 400-level courses should ensure that they have the necessary prerequisites.
3. Please note that STA457H1 lists STA302H1 as one of the prerequisites, so you are encouraged to plan ahead.
Mathematics & Its Applications Specialist (Physical Science) (Science Program) - ASSPE1758

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(12.0-13.5 credits, including at least 1.0 credit at the 400-level)

Core Courses:

Year 1:
CSC108H1, CSC148H1, MAT137Y1/ MAT157Y1 (see NOTE 1), MAT223H1/ MAT240H1, MAT224H1/ MAT247H1 (recommended, can also be taken in second year)

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream or PEY Co-op.

Note: September 2021 or January 2022 will be the last opportunity for Faculty of Arts & Science students to register for PEY Co-op. Students in Year 3 in the Fall/Winter 2021-2022 session will be the last group of Faculty of Arts & Science students eligible to participate in PEY Co-op. Students starting Year 2 in Fall 2021 or later will only be eligible to participate in the Arts & Science Internship Program stream.

Year 2:
MAT235Y1/ MAT237Y1/ MAT257Y1, MAT246H1 (see NOTE 1), MAT244H1/ MAT267H1, STA257H1

Note: 1. Students who have completed MAT157Y1 are waived from completing MAT246H1.

Year 2 and Higher Years:
0.5 credit with a significant emphasis on ethics and social responsibility: ANT100Y1/ ANT253H1/ CSC300H1/ EEB215H1/ ENT200H1/ ENV100H1/ ENV200H1/ ENV333H1/ ESS205H1/ ETH201H1/ ETH210H1/ ETH220H1/ FOR200H1/ HMB203H1/ HPS200H1/ HPS250H1/ HPS301H1/ HST209H1/ IMC200H1/ JPH441H1/ PHL240H1/ PHL244H1/ PHL265H1/ PHL271H1/ PHL273H1/ PHL275H1/ PHL281H1/ PHL295H1 or another 0.5 credit course approved by the Department.

Note: Students may use the CR/NCR option with this 0.5 credit course and have it count toward the program. Students in the VIC program may also use VIC172Y1.

Higher Years:
MAT301H1, MAT334H1

Note:
2. Students planning to take specific 400-level courses should ensure that they have the necessary prerequisites.

Physical Sciences Concentration:

1. PHY151H1, PHY152H1, AST221H1
2. Three of: AST222H1, PHY250H1, PHY252H1, PHY254H1, PHY256H1
3. APM346H1/ MAT351Y1
4. Three of: AST320H1, AST325H1, MAT337H1, MAT363H1/ MAT367H1, PHY350H1, PHY354H1, PHY356H1, PHY357H1, PHY358H1
5. Two of: APM421H1, APM426H1, APM441H1, APM446H1, PHY407H1, PHY408H1, PHY456H1

Mathematics & Its Applications Specialist (Probability/Statistics) (Science Program) - ASSPE1890

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(11.5-13.0 credits, including at least 1.0 credit at the 400-level)

Core Courses:

Year 1:
( CSC108H1, CSC148H1), MAT137Y1/ MAT157Y1 (see NOTE 1), MAT223H1/ MAT240H1, MAT224H1/ MAT247H1

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream or PEY Co-op.

Note: September 2021 or January 2022 will be the last opportunity for Faculty of Arts & Science students to register for PEY Co-op. Students in Year 3 in the Fall/Winter 2021-2022 session will be the last group of Faculty of Arts & Science students eligible to participate in PEY Co-op.
Faculty of Arts & Science students eligible to participate in PEY Co-op. Students starting Year 2 in Fall 2021 or later will only be eligible to participate in the Arts & Science Internship Program stream.

Year 2: MAT235Y1/ MAT237Y1/ MAT257Y1, MAT246H1 (see NOTE 1), MAT244H1/ MAT267H1, STA257H1

NOTE:
1. Students who have completed MAT157Y1 are waived from completing MAT246H1.

Year 2 and Higher Years:
0.5 credit with a significant emphasis on ethics and social responsibility: ANT100Y1/ ANT253H1/ CSC300H1/ EEB215H1/ ENT200H1/ ENV100H1/ ENV200H1/ ENV333H1/ ESS205H1/ ETH201H1/ ETH210H1/ ETH220H1/ FOR200H1/ HMB203H1/ HPS200H1/ HPS250H1/ HPS301H1/ HST209H1/ IMC200H1/ JPH441H1/ PHL240H1/ PHL244H1/ PHL265H1/ PHL271H1/ PHL273H1/ PHL275H1/ PHL281H1/ PHL295H1 or another 0.5 credit course approved by the Department.

Note: Students may use the CR/NCR option with this 0.5 credit course and have it count toward the program. Students in the VIC program may also use VIC172Y1.

Higher Years: MAT301H1, MAT334H1

NOTE:
2. Students planning to take specific 400-level courses should ensure that they have the necessary prerequisites.

Probability/Statistics Concentration:

1. APM346H1/ MAT351Y1/ APM462H1, MAT337H1, STA261H1, STA302H1, STA347H1, (STA452H1, STA453H1)/ MAT332H1/ MAT344H1/ APM348H1/ MAT377H1/ APM461H1/any 0.5 or 1.0 credit 300+ level course from STA.
2. Additional 1.0 credit at the 300+ level from APM/MAT/STA
3. Two of: STA437H1, STA442H1, STA447H1, STA457H1

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(11.5-12.0 credits, including at least 1.0 credit at the 400-level)

Core Courses:

Year 1:
CSC108H1, MAT137Y1/ MAT157Y1 (see NOTE 1), MAT223H1/ MAT240H1, MAT224H1/ MAT247H1 (recommended, can also be taken in Year 2)

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream or PEY Co-op.

Note: September 2021 or January 2022 will be the last opportunity for Faculty of Arts & Science students to register for PEY Co-op. Students in Year 3 in the Fall/Winter 2021-2022 session will be the last group of Faculty of Arts & Science students eligible to participate in PEY Co-op. Students starting Year 2 in Fall 2021 or later will only be eligible to participate in the Arts & Science Internship Program stream.

Year 2:
MAT235Y1/ MAT237Y1/ MAT257Y1, MAT246H1 (see NOTE 1), MAT244H1/ MAT267H1, STA257H1

Year 2 and Higher Years:
0.5 credit with a significant emphasis on ethics and social responsibility: ANT100Y1/ ANT253H1/ CSC300H1/ EEB215H1/ ENT200H1/ ENV100H1/ ENV200H1/ ENV333H1/ ESS205H1/ ETH201H1/ ETH210H1/ ETH220H1/ FOR200H1/ HMB203H1/ HPS200H1/ HPS250H1/ HPS301H1/ HST209H1/ IMC200H1/ JPH441H1/ PHL240H1/ PHL244H1/ PHL265H1/ PHL271H1/ PHL273H1/ PHL275H1/ PHL281H1/ PHL295H1 or another 0.5 credit course approved by the Department.

Note: Students may use the CR/NCR option with this 0.5 credit course and have it count toward the program. Students in the VIC program may also use VIC172Y1.

Higher Years: MAT301H1, MAT334H1

NOTES:
1. Students who have completed MAT157Y1 are waived from completing MAT246H1.
2. MAT237Y1/ MAT257Y1 is a direct or indirect prerequisite for many courses in each of the areas of concentration except the Teaching Concentration. Students are advised to take MAT237Y1/ MAT257Y1 unless they have planned their program and course selection carefully and are certain that they will not need
it.
3. Students planning to take specific 400-level courses should ensure that they have the necessary prerequisites.

Teaching Concentration:
For course selection, note that OISE requires students to have a second teachable subject.
1. MAT329Y1, HPS390H1/MAT390H1, HPS391H1/MAT391H1
2. Two of: MAT332H1/MAT344H1, MAT335H1, MAT337H1, MAT363H1/MAT367H1
3. Two of: MAT309H1, MAT315H1, STA302H1/STA347H1
4. MAT401H1/MAT402H1 and 0.5 credit at the 400-level from MAT, APM, STA

Mathematics Major (Science Program) - ASMAJ1165

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(7.5 credits, including 2.5 credits at the 300+ level, of which one 0.5 credit must be at the 400-level).

Year 1:
( MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1,
MAT223H1/MAT240H1, MAT224H1/MAT247H1

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream or PEY Co-op.

Note: September 2021 or January 2022 will be the last opportunity for Faculty of Arts & Science students to register for PEY Co-op. Students in Year 3 in the Fall/Winter 2021-2022 session will be the last group of Faculty of Arts & Science students eligible to participate in PEY Co-op. Students starting Year 2 in Fall 2021 or later will only be eligible to participate in the Arts & Science Internship Program stream.

Year 2:
MAT235Y1/MAT237Y1/MAT257Y1, MAT244H1,
MAT246H1

Note: MAT244H1 may be taken in first year

Year 2 and Higher Years:
0.5 credit with a significant emphasis on ethics and social responsibility: ANT100Y1/ANT253H1/CSC300H1/EEB215H1/ENT200H1/ENV100H1/ENV200H1/ENV333H1/ESS205H1/ETH201H1/ETH210H1/

ETH220H1/FOR200H1/HMB203H1/HPS200H1/

PHL271H1/PHL273H1/PHL275H1/PHL281H1/
PHL295H1 or another 0.5 credit course approved by the Department.

Note: Students may use the CR/NCR option with this 0.5 credit course and have it count toward the program. Students in the VIC program may use VIC172Y1.

Higher Years:
1. MAT301H1, MAT309H1/MAT315H1, MAT334H1
2. Additional 0.5 credit at the 200+ level from: ACT240H1/ACT230H1/APM236H1, MAT309H1/MAT315H1/
MAT335H1/MAT337H1, STA247H1/STA257H1
3. Additional 0.5 credit at the 300+ level from: APM346H1/APM462H1, MAT309H1/MAT315H1, MAT332H1/
MAT344H1, MAT335H1, MAT337H1, MAT363H1,
MAT475H1, HPS390H1, HPS391H1, PSL432H1
4. MAT401H1/MAT402H1 or any other MAT/APM 400-level course

NOTES:
1. Students using MAT157Y1 towards the first year program requirements must replace the exclusion course MAT246H1 with a different 0.5 credit MAT/APM course at the 200+ level.
2. In the major program, higher level courses within the same topic are acceptable substitutions. With a judicious choice of courses, usually including introductory computer science, students can fulfill the requirements for a double major in mathematics and one of several other disciplines.
3. Students planning to take specific 400-level courses should ensure that they have the necessary prerequisites.
4. Students interested in becoming K-12 teachers should consider applying to the combined degree program --- a six-year program that leads to an Honours Bachelor of Science (HBSc) from the University of Toronto and a Master of Teaching (MT) from the Ontario Institute for Studies in Education (OISE). The HBSc part of this program involves completing a Math Major, a Minor in Education and Society (offered by Victoria College) and a Minor in an area that would lead to a second "teachable" subject. Please see the Victoria College website for more information.

Mathematics Minor (Science Program) - ASMIN1165

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.
Completion Requirements:
(4.0 credits)

1. (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1

2. MAT221H1(80%+)/MAT223H1/MAT240H1,
   MAT235Y1/MAT237Y1/MAT257Y1/MAT224H1/
   MAT244H1/MAT246H1/APM236H1/MAT247H1

Note: MAT221H1/MAT223H1 should be taken in first year

3. Additional 1.0 credit at the 300+ level from APM/MAT/
   HPS390H1/HPS391H1/PSL432H1 [note that
   APM306Y1 will be counted as a 0.5 credit towards this requirement]

NOTE:
1. In the minor program, higher level courses within the
   same topic are acceptable substitutions.
2. Students planning to take specific 300 and 400-level
   courses should ensure that they have the necessary 100,
   200 and 300-level prerequisites.
3. APM306Y1 will be counted as a 0.5 credit for Society
   and its Institutions (BR=3) and a 0.5 credit for The
   Physical and Mathematical Universes (BR=5).

Mathematics Courses

MAT133Y1 - Calculus and Linear Algebra for Commerce

Hours: 72L

Mathematics of finance. Matrices and linear equations. Review of differential calculus; applications. Integration and fundamental theorem; applications. Introduction to partial differentiation; applications.

NOTE: please note Prerequisites listed below. Students without the proper prerequisites for MAT133Y1 may be deregistered from this course.

Note that MAT133Y is not a valid prerequisite for a number of more advanced quantitative courses. Students who are considering a quantitative non-Commerce program, such as a math minor or a stats minor, may want to consider MAT135H and MAT136H, MAT137Y, or MAT157Y instead of MAT133Y. Specifically, a student who took MAT133Y may need to subsequently take MAT135H and MAT136H as "extra" or take MAT137Y or MAT157Y in order to proceed in non-Commerce programs.

Combined Degree Program (CDP) offered with Victoria College and Ontario Institute for Studies in Education (OISE)

- Combined Degree Program in HBA/HBSc and Master of Teaching (MT)

Students enrolled in the Minor in Education and Society and Major in Mathematics may apply for this Combined Degree Program. For details about application and program requirements, see the Combined Degree Programs section.

Joint Programs

- Economics and Mathematics, see Economics
- Statistics and Mathematics, see Statistics
- Combined Degree Program: STG, Honours Bachelor of Science, Major in Mathematics / Master of Teaching

Prerequisite: High school level calculus
Exclusion: MAT135H1, MAT135H5, MAT136H1,
MAT136H5, MAT137Y1, MAT157Y1, MATA30H3,
MATA31H3, MATA32H3, MATA33H3, MATA35H3,
MATA36H3, MATA37H3, MAT133Y5, MAT134Y5,
MAT135Y5, MAT137Y5, MAT138Y5, MAT186H,
MAT187H, MAT196H & MAT197H, ESC194H, ESC195H
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT135H1 - Calculus I

Hours: 36L/12T

In this first introduction to Calculus, students will be introduced to the tools of differential calculus, the branch of calculus that is motivated by the problem of measuring how quantities change. Students will use these tools to solve other problems, including simplifying functions with straight lines, describing how different types of change are related, and computing maximum and minimum quantities. This course will focus on developing a deep understanding of why the tools of calculus make sense and how to apply them to the social, biological, and physical sciences. It will also emphasize translating between algebraic, graphical, numerical and verbal descriptions of each concept studied.
Prerequisite: High school level calculus
Exclusion: MAT133Y1, MAT135H5, MAT136H1, MAT136H5, MAT137Y1, MAT157Y1, MAT130H3, MAT131H3, MAT132H3, MAT133H3, MAT135H3, MAT136H3, MAT137H3, MAT133Y5, MAT134Y5, MAT135Y5, MAT137Y5, MAT138Y5, MAT186H, MAT187H, MAT196H, MAT197H, ESC194H, ESC195H
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT136H1 - Calculus II

Hours: 36L/12T

This second part of the introductory Calculus sequence focuses on integral calculus beginning with the Fundamental Theorem of Calculus, the connection between two seemingly unrelated problems: measuring changing quantities and finding areas of curved shapes. Students will develop a deep understanding of the integral, and use it to: unpack equations involving derivatives; to make sense of infinite sums; to write complicated functions as 'infinite polynomials'; and to compute areas, volumes, and totals in applied problems. This course will further develop students' abilities to translate between algebraic, graphical, numerical, and verbal descriptions of mathematics in a variety of applied contexts.

Prerequisite: MAT135H1
Exclusion: MAT133Y1, MAT137Y1, MAT157Y1, MAT132H3, MAT133H3, MAT136H3, MAT137H3, MAT133Y5, MAT134Y5, MAT135Y5, MAT137Y5, MAT138Y5, MAT186H, MAT187H, MAT196H, MAT197H, ESC194H, ESC195H
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT137Y1 - Calculus with Proofs

Hours: 72L/24T

A conceptual approach for students with a serious interest in mathematics. Attention is given to computational aspects as well as theoretical foundations and problem solving techniques. Review of Trigonometry. Limits and continuity, mean value theorem, inverse function theorem, differentiation, integration, fundamental theorem of calculus, elementary transcendental functions, Taylor's theorem, sequence and series, power series. Applications.

Prerequisite: High school level calculus
Exclusion: MAT135H1, MAT135H5, MAT136H1, MAT136H5, MAT157Y1, MAT135H3, MAT136H3, MAT137H3, MAT135Y5, MAT137Y5, MAT138Y5, MAT187H, MAT196H, MAT197H, ESC194H, ESC195H.
Students will receive credit for both MAT137Y1 and MAT138H1 if MAT138H1 is taken before or along with MAT137Y1.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT138H1 - Introduction to Proofs

Hours: 36L/12T

The goal of this course is for students to become comfortable with abstraction, rigour, logic, and proofs. They will practice reading and understanding mathematical statements, analyzing definitions and properties, formulating conjectures and generalizations, providing and writing reasonable and precise arguments, writing and critiquing proofs. The instructor may use specific mathematical content, which could vary from year to year, to practice these skills. The course is aimed at students interested in the creative character of mathematics, particularly those planning to take any of our proof-oriented courses, and is an excellent preparation for MAT137Y1, MAT157Y1, or MAT240H1.

Note: students may take this course concurrently with MAT157Y1 or MAT137Y1, or prior to registering in MAT157Y1 or MAT137Y1. This course can also be used by students who have already taken MAT136H1 and wish to bridge the gap to MAT237Y1.

Prerequisite: High school level calculus
Exclusion: MAT157Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT157Y1 - Analysis I

Hours: 72L/48T

A theoretical course in calculus; emphasizing proofs and techniques, as well as geometric and physical understanding. Trigonometric identities. Limits and continuity; least upper bounds, intermediate and extreme value theorems. Derivatives, mean value and inverse function theorems. Integrals; fundamental theorem; elementary transcendental functions. Techniques of integration. Taylor's theorem; sequences and series; uniform convergence and power series.

Prerequisite: High school level calculus
Exclusion: MAT137Y1, MAT137H3, MAT137Y5, MAT157Y5, MAT197H1, ESC195H1.
Recommended Preparation: Students should consider taking the Preparing for University Math Level II in order to prepare in advance for MAT157Y1. Students may also take MAT138H1 concurrently with MAT157Y1. Students will receive credit for both MAT157Y1 and MAT138H1 if MAT138H1 is taken before or along with MAT157Y1.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

JMB170Y1 - Biology, Models, and Mathematics

Hours: 48L/24T

Applications of mathematics to biological problems in physiology, genetics, evolution, growth, population dynamics, cell biology, ecology, and behavior. Mathematical topics include: power functions and regression; exponential and logistic functions; binomial theorem and probability; calculus, including derivatives, max/min, integration, areas, integration by parts, substitution; differential equations, including linear constant coefficient systems; dynamic programming; Markov processes; and chaos. This course is intended for students in Life Sciences.

Corequisite: BIO120H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT192H1 - Liberating Mathematics

Hours: 36L

Currently, mathematics is at a crossroads between tradition and progress. Progress has been led in large part by women mathematicians, in particular Black women, Indigenous women, and women from visible minorities. Intertwined in their studies of mathematics is a daring critique of traditional mathematics, re-imagining of mathematics culture, and more. This course will compare and contrast new forms of accessible mathematics with standard sources that draw dominantly on the experiences and narratives of men. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: High school level algebra.
Exclusion: Not intended for students in a Mathematics Specialist or Major program.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT199H1 - Cryptology: The Mathematics of Secrecy and Security

How do we send our own confidential information through secure channels, and how can we break codes to uncover the secret information of our adversaries? The mathematical field of cryptology is dedicated to answering such questions. In this course we will study breakthroughs in cryptology, from secret messages in the ancient world and the Enigma cipher in World War II, to modern cryptosystems that facilitate online commerce. Along the way, you will develop a sophisticated understanding of how numbers interact and develop the ability to communicate messages secretly and mathematics clearly. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: High school level algebra.
Exclusion: Not intended for students in a Mathematics Specialist or Major program.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT193H1 - Women’s Mathematics

Hours: 36S

This course is an exploration into the creative process and use of imagination as they arise in the context of mathematical problem solving. The problems, which are
all at a pre-calculus level, are chosen primarily by the
criterion of aesthetic appeal, and emphasize reasoning
rather than technique. Still, many of them are quite
challenging, and substantial independent thinking will be
required, the course is therefore appropriate for students
from a variety of backgrounds and disciplines, including
hard sciences. Its goal will be to hone each participant's
creativity and mathematical problem-solving skills while
guiding them towards the ‘Aha!’ experience which
accompanies independent discovery. Restricted to first-
year students. Not eligible for CR/NCR option.

**Prerequisite:** High school level algebra
**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical
Universes (5)

**JUM202H1 - Mathematics as an Interdisciplinary Pursuit**

**Hours:** 24L/12T

Study of the interaction of mathematics with other fields of
inquiry: how mathematics influences, and is influenced by,
the evolution of science and culture. Art, music, and
literature, as well as the more traditionally related areas of
the natural and social sciences may be considered.
(Offered every three years)

**JUM202H1** is particularly suited as a Science Distribution
Requirement course for Humanities and Social Science
students.

**Exclusion:** JUM102H1
**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical
Universes (5)

**JUM203H1 - Mathematics as a Recreation**

**Hours:** 24L/12T

A study of games, puzzles and problems focusing on the
deeper principles they illustrate. Concentration is on
problems arising out of number theory and geometry, with
emphasis on the process of mathematical reasoning.
Technical requirements are kept to a minimum. A
foundation is provided for a continuing lay interest in
mathematics. (Offered every three years)

**JUM203H1** is particularly suited as a Science Distribution
Requirement course for Humanities and Social Science
students.

**MAT221H1 - Applied Linear Algebra**

**Hours:** 36L/12T

An application-oriented approach to linear algebra, based
on calculations in standard Euclidean space. Systems of
linear equations, matrices, Gauss-Jordan elimination,
subspaces, bases, orthogonal vectors and projections.
Matrix inverses, kernel and range, rank-nullity theorem.
Determinants, eigenvalues and eigenvectors, Cramer’s
rule, diagonalization. This course has strong emphasis on
building computational skills in the area of algebra.
Applications to curve fitting, economics, Markov chains
and cryptography.

**Prerequisite:** High school level calculus
**Exclusion:** MAT223H1, MAT23H3, MAT223H5,
MAT224H1, MAT240H1, MAT240H5, MAT247H1,
MAT247H5
**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical
Universes (5)

**MAT223H1 - Linear Algebra I**

**Hours:** 36L/12T

Systems of linear equations, matrix algebra, real vector
spaces, subspaces, span, linear dependence and
independence, bases, rank, inner products, orthogonality,
orthogonal complements, Gram-Schmidt, linear
transformations, determinants, Cramer's rule, eigenvalues, eigenvectors, eigenspaces, diagonalization.

**Prerequisite:** High school level calculus
**Exclusion:** MAT222H3, MAT223H3, MAT223H5, MAT224H1, MAT240H1, MAT240H5, MAT247H1, MAT247H5
**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**MAT224H1 - Linear Algebra II**

**Hours:** 36L/12T

Fields, complex numbers, vector spaces over a field, linear transformations, matrix of a linear transformation, kernel, range, dimension theorem, isomorphisms, change of basis, eigenvalues, eigenvectors, diagonalizability, real and complex inner products, spectral theorem, adjoint/self-adjoint/normal linear operators, triangular form, nilpotent mappings, Jordan canonical form.

**Prerequisite:** MAT221H1(80%)/MAT223H1/MAT240H1/MATA22H3
**Exclusion:** MAT247H1
**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**MAT235Y1 - Multivariable Calculus**

**Hours:** 72L

Parametric equations and polar coordinates. Vectors, vector functions and space curves. Differential and integral calculus of functions of several variables. Line integrals and surface integrals and classic vector calculus theorems. Examples from life sciences and physical science applications.

**Exclusion:** MAT237Y1, MAT257Y1, MATB41H3, MATB42H3, MATB43H3 & MAT368H5, MAT232H5 & MAT236H5
**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**MAT240H1 - Algebra I**

**Hours:** 36L/24T

**Prerequisite:** High school level calculus
**Corequisite:** MAT157Y1

**APM236H1 - Applications of Linear Programming**

**Hours:** 36L

Introduction to linear programming including a rapid review of linear algebra (row reduction, matrix inversion, linear independence), the simplex method with applications, the duality theorem, complementary slackness, the dual simplex method and the revised simplex method.

**Prerequisite:** MAT221H1/MAT223H1/MAT240H1 (Note: no waivers of prerequisites will be granted)
**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**MAT237Y1 - Multivariable Calculus with Proofs**

**Hours:** 72L

**Prerequisite:** MAT137Y1/MAT157Y1/(MAT135H1/ MAT135H5, MAT136H1(85%)/ MAT136H5 (85%), MAT138H1). MAT223H1/ MAT240H1
**Exclusion:** MAT235Y1, MAT257Y1, MATB41H3, MATB42H3, MATB43H3 & MAT368H5, MAT232H5 & MAT236H5
**Distribution Requirements:** Science

MAT244H1 - Introduction to Ordinary Differential Equations

Hours: 36L

Corequisite: MAT235Y1/MAT237Y1/MAT257Y1
Exclusion: MAT157Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT245H1 - Mathematical Methods in Data Science

Hours: 36L/24P

An introduction to the mathematical methods behind scientific techniques developed for extracting information from large data sets. Elementary probability density functions, conditional expectation, inverse problems, regularization, dimension reduction, gradient methods, singular value decomposition and its applications, stability, diffusion maps. Examples from applications in data science and big data.

Prerequisite: MAT135Y1/ MAT157Y1, MAT223H1/MAT240H1/MAT240H5, MAT224H1/MAT247H1
Corequisite: MAT237Y1/MAT257Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT246H1 - Concepts in Abstract Mathematics

Hours: 36L/12T

Designed to introduce students to mathematical proofs and abstract mathematical concepts. Topics may include modular arithmetic, sizes of infinite sets, and a proof that some angles cannot be trisected with straightedge and compass.

Prerequisite: MAT133Y1/(MAT135H1/MAT135H5, MAT136H1/MAT136H5)/MAT137Y1/MAT223H1/MAT240H1
Exclusion: MAT157Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT247H1 - Algebra II

Hours: 36L

Prerequisite: MAT240H1/MAT240H5
Corequisite: MAT157Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT257Y1 - Analysis II

Hours: 72L/48T

Topology of R^n; compactness, functions and continuity, extreme value theorem. Derivatives; inverse and implicit function theorems, maxima and minima, Lagrange multipliers. Integration; Fubini's theorem, partitions of unity, change of variables. Differential forms. Manifolds in R^n; integration on manifolds; Stokes' theorem for differential forms and classical versions.

Prerequisite: MAT157Y1/MAT157Y5, MAT247H1/MAT247H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
MAT267H1 - Advanced Ordinary Differential Equations

Hours: 36L/12T

Prerequisite: MAT157Y1/MAT157Y5, MAT247H1/MAT247H5
Corequisite: MAT257Y1
Exclusion: APM288H1, MAT244H1, MATB44H3, MAT242H5, MAT252H5, MAT234H1, MAT292H1

MAT271H1 - Insights from Mathematics

Hours: 36L/6T

This breadth course is accessible to students with limited mathematical background. Various mathematical techniques will be illustrated with examples from humanities and social science disciplines. Some of the topics will incorporate user friendly computer explorations to give participants the feel of the subject without requiring skill at calculations.

Note: This course cannot be used to satisfy requirements of program in the math department.

MAT282H1 - Topics in Mathematics

Hours: 36L

A course in mathematics on a topic outside the current undergraduate offerings. For information on the specific topic to be studied and possible additional prerequisites, go to http://www.math.toronto.edu/cms/current-students-ug/

Prerequisite: 1.0 MAT credit at the 100-level. Possible additional topic-specific prerequisites.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT295H1 - Independent Reading in Mathematics

Independent study under the direction of a faculty member. Topic must be outside undergraduate offerings. Similar workload to a 36L course. Not eligible for CR/NCR option.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT296H1 - Independent Reading in Mathematics

Independent study under the direction of a faculty member. Topic must be outside undergraduate offerings. Workload equivalent to a 36L course. Not eligible for CR/NCR option.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT297Y1 - Research Project in Mathematics

Independent research under the direction of a faculty member. Similar workload to a 72L course. Not eligible for CR/NCR option.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

MAT301H1 - Groups and Symmetries

Hours: 36L

Prerequisite: MAT224H1/MAT247H1, MAT235Y1/MAT237Y1, MAT246H1/MAT157Y1/CSC236H1/CSC240H1. (These Prerequisites will be waived for students who have MAT257Y1.) For FASE students, MAT185H, MAT194H, MAT195H.

Exclusion: MAT347Y1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

APM306Y1 - Mathematics and Law

Hours: 72L

This course examines the relationship between legal reasoning and mathematical logic; provides a mathematical perspective on the legal treatment of interest and actuarial present value; critiques ethical issues; analyzes how search engine techniques on massive databases transform legal research and considers the impact of statistical analysis and game theory on litigation strategies.

NOTE

This course counts as 0.5 credit in BR=3 and 0.5 credit in BR=5.

This course will only contribute 0.5 credit to the Math Minor program.

Prerequisite: (MAT135H1/MAT135H5/MAT136H1/MAT136H5)/MAT137Y1/MAT157Y1, MAT221H1/

MAT223H1/ MAT240H1

Exclusion: JUM206Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT315H1 - Introduction to Number Theory

Hours: 36L

Elementary topics in number theory: arithmetic functions; polynomials over the residue classes modulo m, characters on the residue classes modulo m; quadratic reciprocity law, representation of numbers as sums of squares.

Prerequisite:

(MAT223H1/MAT233H5/MAT224H1/MAT240H1/MAT240H5, MAT235Y1/MAT235Y5/(MAT232H5, MAT236H5)/MATB41H3, MATB42H3)/MAT237Y1/(MATB41H3, MATB42H3, MATB43H3)/MAT237Y5, MAT246H1/CSC236H1/CSC240H1/157Y1/MAT157Y5/MAT247H1/MAT247H5

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)
MAT327H1 - Introduction to Topology

Hours: 36L

Metric spaces, topological spaces and continuous mappings; separation, compactness, connectedness. Fundamental group and covering spaces. Brouwer fixed-point theorem. Students in the math specialist program wishing to take additional topology courses are advised to obtain permission to take MAT1300H, MAT1301H.

Prerequisite:
MAT157Y1/MAT157Y5/(MAT237Y1/MAT237Y5, MATB41H3, MATB42H3, MATB43H3)/MAT246H1/MAT157Y1 and permission of the instructor

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT329Y1 - Concepts in Elementary Mathematics

Hours: 72L

This course is aimed at students intending to become elementary school teachers. Emphasis is placed on the formation and development of fundamental reasoning and learning skills required to understand and to teach mathematics at the elementary level. Topics may include: Problem Solving and Strategies, Sets and Elementary Logic, Numbers and Elements of Number Theory, Introductory Probability and Fundamentals of Geometry.

The course may include an optional practicum in school classrooms.

Prerequisite:
(MAT137Y1/MAT157Y1)/MAT138H1/(MAT223H1/MAT240H1)/(MAT246H1/MAT157Y1) and any 5.0 credits with a CGPA of at least 2.5
Exclusion: MAT382H5
Recommended Preparation: Participation in the practicum requires the presentation of an Ontario Police Report that declares suitability to work with minors and other special groups.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT332H1 - Introduction to Graph Theory

Hours: 36L

This course will explore the following topics: Graphs, subgraphs, isomorphism, trees, connectivity, Euler and Hamiltonian properties, matchings, vertex and edge colourings, planarity, network flows and strongly regular graphs. Participants will be encouraged to use these topics and execute applications to such problems as timetabling, tournament scheduling, experimental design and finite geometries.

Prerequisite:
MAT224H1/MAT24H3/MAT224H5/MAT247H1/MAT247H5
Corequisite: Recommended Corequisite: MAT301H1/MAT347Y1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT334H1 - Complex Variables

Hours: 36L

Theory of functions of one complex variable, analytic and meromorphic functions. Cauchy’s theorem, residue calculus, conformal mappings, introduction to analytic continuation and harmonic functions.

Prerequisite:
MAT223H1/MATA23H3/MAT223H5/MAT240H1/MAT240H5, MAT235Y1/MAT235Y5/(MAT232H5, MAT236H5)/(MATB41H3, MATB42H3)/(MAT246H1/MAT157Y1 and permission of the instructor)
Exclusion: MAT354H1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT335H1 - Chaos, Fractals and Dynamics

Hours: 36L

Prerequisite:
MAT137Y1/(MATA30H3, MATA31H3, MATA37H3)/MAT137Y5/MAT157Y1/MAT157Y5/(MAT235Y1/MAT235Y5)/(MAT232H5, MAT236H5)/(MATB41H3, MATB42H3)/(MAT246H1/MAT157Y1 and permission of the instructor)

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
MAT336H1 - Elements of Analysis

Hours: 36L/12T

This course provides the foundations of analysis and rigorous calculus for students who will take subsequent courses where these mathematical concepts are central of applications, but who have only taken courses with limited proofs. Topics include topology of \( \mathbb{R}^n \), implicit and inverse function theorems and rigorous integration theory.

Prerequisite:
MAT223H1/MATA23H3/MAT223H5/MAT240H1/MAT240H5, MAT235Y1/MAT235Y5/MAT232H5, MAT236H5)/(MATB41H3, MATB42H3)/MAT237Y1/(MATB41H3, MATB42H3, MATB43H3)/MAT237Y5; (for FASE students, MAT185H, MAT195H/ESC195H)

APM346H1 - Partial Differential Equations

Hours: 36L

Sturm-Liouville problems, Green's functions, special functions (Bessel, Legendre), partial differential equations of second order, separation of variables, integral equations, Fourier transform, stationary phase method.

Prerequisite: MAT235Y1/ MAT235Y5/ (MAT232H5, MAT236H5)/ (MATB41H3, MATB42H3)/ MAT237Y1/ MAT237Y5/ MAT257Y1, (MAT244H1/ MATB44H3/ MAT244H5/ MAT267H1)

Exclusion: MAT351Y1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT347Y1 - Groups, Rings and Fields

Hours: 72L/24T

Groups, subgroups, quotient groups, Sylow theorems, Jordan-Hölder theorem, finitely generated abelian groups, solvable groups. Rings, ideals, Chinese remainder theorem; Euclidean domains and principal ideal domains: unique factorization. Noetherian rings, Hilbert basis theorem. Finitely generated modules. Field extensions, algebraic closure, straight-edge and compass constructions. Galois theory, including insolvability of the quintic.

Prerequisite: MAT257Y1/(85% in MAT247H1/MAT247H5)

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT344H1 - Introduction to Combinatorics

Hours: 36L

Basic counting principles, generating functions, permutations with restrictions. Fundamentals of graph theory with algorithms; applications (including network flows). Combinatorial structures including block designs and finite geometries.

Prerequisite:
MAT223H1/MATA23H3/MAT223H5/MAT240H1/MAT240H5

**APM348H1 - Mathematical Modelling**

**Previous Course Number:** MAT482  
**Hours:** 36L/22P

An overview of mathematical modelling. A variety of approaches for representing physical situations mathematically followed by analytical techniques and numerical simulations to gain insight. Questions from biology, economics, engineering, medicine, physics, physiology, and the social sciences formulated as problems in optimization, differential equations, and probability. Precise content varies with instructor.

**Prerequisite:** MAT244H1/MAT267H1, MAT224H1/MAT247H1, STA237H1/STA247H1/STA257H1/MAT377H1  
**Exclusion:** MAT482H1 (Topics in Mathematics: Topics in Mathematical Modelling), offered in Winter 2019  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**MAT351Y1 - Partial Differential Equations**

**Hours:** 72L

This is a first course in Partial Differential Equations, intended for Mathematics students with interests in analysis, mathematical physics, geometry, and optimization. The examples to be discussed include first-order equations, harmonic functions, the diffusion equation, the wave equation, Schrodinger's equation, and eigenvalue problems. In addition to the classical representation formulas for the solutions of these equations, there are techniques that apply more broadly: the notion of well-posedness, the method of characteristics, energy methods, maximum and comparison principles, fundamental solutions, Green’s functions, Duhamel's principle, Fourier series, the min-max characterization of eigenvalues, Bessel functions, spherical harmonics, and distributions. Nonlinear phenomena such as shock waves and solitary waves are also introduced.

**Prerequisite:** MAT257Y1/85% in MAT237Y1, MAT267H1  
**Exclusion:** APM351Y1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**MAT354H1 - Complex Analysis I**

**Hours:** 36L

Complex numbers, the complex plane and Riemann sphere, Möbius transformations, elementary functions and their mapping properties, conformal mapping, holomorphic functions, Cauchy's theorem and integral formula, Taylor and Laurent series, maximum modulus principle, Schwarz' lemma, residue theorem and residue calculus.

Note: Students may take MAT354H1 after they complete MAT334H1, however, in this case, MAT334H1 will count as 'extra'; it will not count as credit towards program requirements.

**Prerequisite:** MAT257Y1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**MAT357H1 - Foundations of Real Analysis**

**Hours:** 36L

**Prerequisite:** MAT257Y1/(MAT327H1 and permission of instructor)  
**Exclusion:** MAT438H5  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**MAT363H1 - Geometry of Curves and Surfaces**

**Hours:** 36L

**Prerequisite:** MAT224H1/MATB24H3/MAT224H5/MAT247H1/MAT247H5, MAT237Y1/(MATB41H3, MATB42H3, MATB43H3)/MAT237Y5/MAT257Y1 (MAT257Y1 can be taken concurrently). For FASE students, MAT185H, MAT194H, MAT195H, AER210H.  
**Exclusion:** MAT367H1
MAT367H1 - Differential Geometry

**Hours:** 36L

Manifolds, partitions of unity, submersions and immersions, vector fields, vector bundles, tangent and cotangent bundles, foliations and Frobenius' theorem, multilinear algebra, differential forms, Stokes' theorem, Poincare-Hopf theorem.

**Prerequisite:** MAT257Y1/ MAT224H1, MAT237Y1, MAT246H1/ MAT157Y1, and permission of instructor

**Recommended Preparation:** Multivariable calculus (MAT257Y1), Linear algebra (MAT240H1, MAT247H1)

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

MAT377H1 - Mathematical Probability

**Hours:** 36L/12T

This course introduces students to various topics in mathematical probability theory. Topics include basic concepts (such as probability, random variables, expectations, conditional probability) from a mathematical point of view, examples of distributions and stochastic processes and their properties, convergence results (such as the law of large numbers, central limit theorem, random series, etc.), various inequalities, and examples of applications of probabilistic ideas beyond statistics (for example, in geometry and computer science).

**Prerequisite:** MAT247H1/MAT247H5, MAT257Y1

**Exclusion:** STA347H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

MAT390H1 - History of Mathematics up to 1700

**Hours:** 36L

A survey of ancient, medieval, and early modern mathematics with emphasis on historical issues. (Offered in alternate years)

**Prerequisite:** 1.0 APM/MAT credit at the 200-level

**Exclusion:** HPS309H1, HPS310Y1, HPS390H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

MAT391H1 - History of Mathematics after 1700

**Hours:** 24L/12T

A survey of the development of mathematics from 1700 to the present with emphasis on technical development. (Offered in alternate years)

**Prerequisite:** 1.0 APM/MAT credit at the 200 level

**Exclusion:** HPS309H1, HPS310H1, HPS391H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

MAT395H1 - Independent Reading in Mathematics

Independent reading under the direction of a faculty member. Topic must be outside current undergraduate offerings. Similar workload to a 36L course. Not eligible for CR/NCR option.

**Prerequisite:** Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)
APM396H1 - Independent Reading in Applied Mathematics

Independent study under the direction of a faculty member. Topic must be outside undergraduate offerings. Similar workload to a 36L course. Not eligible for CR/NCR option.

**Prerequisite:** Minimum GPA 3.5 for APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

MAT409H1 - Set Theory
Hours: 36L
Set theory and its relations with other branches of mathematics. ZFC axioms. Ordinal and cardinal numbers. Reflection principle. Constructible sets and the continuum hypothesis. Introduction to independence proofs. Topics from large cardinals, infinitary combinatorics and descriptive set theory.

Joint undergraduate/graduate course - MAT409H1/MAT1404H
Prerequisite: MAT357H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

APM421H1 - Mathematical Foundations of Quantum Mechanics
Hours: 36L
Key concepts and mathematical structure of Quantum Mechanics, with applications to topics of current interest such as quantum information theory. The core part of the course covers the following topics: Schroedinger equation, quantum observables, spectrum and evolution, motion in electro-magnetic field, angular momentum and O(3) and SU(2) groups, spin and statistics, semi-classical asymptotics, perturbation theory. More advanced topics may include: adiabatic theory and geometrical phases, Hartree-Fock theory, Bose-Einstein condensation, the second quantization, density matrix and quantum statistics, open systems and Lindblad evolution, quantum entropy, quantum channels, quantum Shannon theorems.

Joint undergraduate/graduate course - APM421H1/MAT1723H
Prerequisite: (MAT224H1/MAT247H1, MAT337H1)/MAT357H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT415H1 - Algebraic Number Theory
Hours: 36L
A selection from the following: finite fields; global and local fields; valuation theory; ideals and divisors; differenters and discriminants; ramification and inertia; class numbers and units; cyclotomic fields; Diophantine equations.

Prerequisite: MAT347Y1 or permission of instructor
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT417H1 - Analytic Number Theory
Hours: 36L
A selection from the following: distribution of primes, especially in arithmetic progressions and short intervals; exponential sums; Hardy-Littlewood and dispersion methods; character sums and L-functions; the Riemann zeta-function; sieve methods, large and small; Diophantine approximation, modular forms.

Joint undergraduate/graduate course - MAT417H1/MAT1202H
Prerequisite: MAT334H1/ MAT354H1/permission of instructor

MAT436H1 - Introduction to Linear Operators

**Hours:** 36L

The course will survey the branch of mathematics developed (in its abstract form) primarily in the twentieth century and referred to variously as functional analysis, linear operators in Hilbert space, and operator algebras, among other names (for instance, more recently, to reflect the rapidly increasing scope of the subject, the phrase non-commutative geometry has been introduced). The intention will be to discuss a number of the topics in Pedersen's textbook Analysis Now. Students will be encouraged to lecture on some of the material, and also to work through some of the exercises in the textbook (or in the suggested reference books).

Joint undergraduate/graduate course - MAT436H1/MAT1011H

**Prerequisite:** 5.0 MAT credits, including MAT224H1/MAT247H1 and MAT237Y1/MAT257Y1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

MAT437H1 - K-Theory and C* Algebras

**Hours:** 36L

The theory of operator algebras was begun by John von Neumann eighty years ago. In one of the most important innovations of this theory, von Neumann and Murray introduced a notion of equivalence of projections in a self-adjoint algebra (C*-algebra) of Hilbert space operators that was compatible with addition of orthogonal projections (also in matrix algebras over the algebra), and so gave rise to an abelian semigroup, now referred to as the Murray-von Neumann semigroup.

Later, Grothendieck in geometry, Atiyah and Hirzebruch in topology, and Serre in the setting of arbitrary rings (pertinent for instance for number theory), considered similar constructions. The enveloping group of the semigroup considered in each of these settings is now referred to as the K-group (Grothendieck's terminology), or as the Grothendieck group.

Among the many indications of the depth of this construction was the discovery of Atiyah and Hirzebruch that Bott periodicity could be expressed in a simple way using the K-group. Also, Atiyah and Singer famously showed that K-theory was important in connection with the Fredholm index. Partly because of these developments, K-theory very soon became important again in the theory of operator algebras. (And in turn, operator algebras became increasingly important in other branches of mathematics.)

The purpose of this course is to give a general, elementary, introduction to the ideas of K-theory in the operator algebra context. (Very briefly, K-theory generalizes the notion of dimension of a vector space.)

The course will begin with a description of the method (K-theoretical in spirit) used by Murray and von Neumann to give a rough initial classification of von Neumann algebras (into types I, II, and III). It will centre around the relatively recent use of K-theory to study Bratteli's approximately finite-dimensional C*-algebras---both to classify them (a result that can be formulated and proved purely algebraically), and to prove that the class of these C*-algebras---what Bratteli called AF algebras---is closed under passing to extensions (a result that uses the Bott periodicity feature of K-theory).

Students will be encouraged to prepare oral or written reports on various subjects related to the course, including basic theory and applications.

Joint undergraduate/graduate course - MAT437H1/MAT1016H

**Prerequisite:** 5.0 MAT credits, including MAT224H1/MAT247H1 and MAT237Y1/MAT257Y1

**Recommended Preparation:** Students are encouraged to execute basic research that answers the question, what is an abelian group?

MAT448H1 - Introduction to Commutative Algebra and Algebraic Geometry

Hours: 36L

Basic notions of algebraic geometry, with emphasis on commutative algebra or geometry according to the interests of the instructor. Algebraic topics: localization, integral dependence and Hilbert's Nullstellensatz, valuation theory, power series rings and completion, dimension theory. Geometric topics: affine and projective varieties, dimension and intersection theory, curves and surfaces, varieties over the complex numbers. This course will be offered in alternating years.

Joint undergraduate/graduate course - MAT448H1/MAT1155H

Prerequisite: MAT347Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT449H1 - Algebraic Curves

Hours: 36L

Projective geometry. Curves and Riemann surfaces. Algebraic methods. Intersection of curves; linear systems; Bezout's theorem. Cubics and elliptic curves. Riemann-Roch theorem. Newton polygon and Puiseux expansion; resolution of singularities. This course will be offered in alternating years.

Prerequisite: MAT347Y1, MAT354H1

APM462H1 - Nonlinear Optimization

Hours: 36L

An introduction to first and second order conditions for finite and infinite dimensional optimization problems with mention of available software. Topics include Lagrange multipliers, Kuhn-Tucker conditions, convexity and calculus of variations. Basic numerical search methods and software packages which implement them will be discussed.

Prerequisite: (MAT223H1, MAT224H1) /MAT247H1, MAT235Y1/MAT237Y1/MAT257Y1
Recommended Preparation: MAT336H1/MAT337H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT464H1 - Riemannian Geometry

Hours: 36L

Joint undergraduate/graduate course - MAT464H1/MAT1342H

Prerequisite: MAT367H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

APM466H1 - Mathematical Theory of Finance

Hours: 36L

Introduction to the basic mathematical techniques in pricing theory and risk management: Stochastic calculus, single-period finance, financial derivatives (tree-approximation and Black-Scholes model for equity derivatives, American derivatives, numerical methods,
lattice models for interest-rate derivatives), value at risk, credit risk, portfolio theory.

Joint undergraduate/graduate course - APM466H1/MAT1856H

**MAT482H1 - Topics in Mathematics**

**Hours:** 36L

A course in mathematics on a topic outside the current undergraduate offerings. For information on the specific topic to be studied and possible additional prerequisites, go to [http://www.math.toronto.edu/cms/current-students-ug/](http://www.math.toronto.edu/cms/current-students-ug/).

**Prerequisite:** 6.0 APM/MAT credits at the 100, 200 and 300-level. Possible additional topic-specific prerequisites.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**MAT483H1 - Topics in Mathematics**

**Hours:** 36L

A course in mathematics on a topic outside the current undergraduate offerings. For information on the specific topic to be studied and possible additional prerequisites, go to [http://www.math.toronto.edu/cms/current-students-ug/](http://www.math.toronto.edu/cms/current-students-ug/).

**Prerequisite:** 6.0 APM/MAT credits at the 100, 200 and 300-level. Possible additional topic-specific prerequisites.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**MAT495H1 - Independent Reading in Mathematics**

Independent study under the direction of a faculty member. Topic must be outside undergraduate offerings. Workload equivalent to a 36L course. Not eligible for CR/NCR option.

**Prerequisite:** Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)
APM496H1 - Independent Readings in Applied Mathematics

Independent study under the direction of a faculty member. Topic must be outside current undergraduate offerings. Similar workload to a course that has 36 lecture hours. Not eligible for CR/NCR option.

Prerequisite: minimum GPA 3.5 for APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT496H1 - Independent Reading in Mathematics

Independent study under the direction of a faculty member. Topic must be outside undergraduate offerings. Workload equivalent to a 36L course. Not eligible for CR/NCR option.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT497Y1 - Research Project in Mathematics

Independent research under the direction of a faculty member. Not eligible for CR/NCR option. Similar workload to a 72L course.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT499Y1 - Readings in Mathematics

Independent study under the direction of a faculty member. Topic must be outside undergraduate offerings. Workload equivalent to a 72L course. Not eligible for CR/NCR option.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

Introduction

Molecular biology has revolutionized the fields of genetics and microbiology. The Department of Molecular Genetics offers Specialist and Major programs in Molecular Genetics and Microbiology, which emphasize the molecular aspects of both disciplines. Genetics, the science of heredity, and microbiology, the study of microorganisms (microbes), have long served as meeting grounds for a variety of biological disciplines. Developments in genetics and microbiology have contributed greatly to our basic understanding of the fundamental processes of life as well as to the treatment of genetic and infectious diseases.

Of particular significance in molecular genetics has been the development of techniques that permit the isolation, through cloning, of the genes responsible for specific traits, and the detailed analysis of their regulation, interactions, and products. More recently the advent of genome sequencing has fueled efforts to understand in full the information content of the genome and to assign function to every gene, using methods that allow systematic, genome-scale analyses of gene expression, the phenotypic consequences of gene disruption, and the interactions between genes and gene products. Molecular techniques have increased our ability to diagnose and understand viral and bacterial disease, and the complex microbe/host interactions that are involved. The impact of these and other technological advances extend to such diverse fields as plant and animal developmental biology, virology, immunology, cancer biology, and biotechnology. Studies at a molecular level are essential to understanding the consequences to life when fundamental processes are altered by mutation, by infection, or by the environment.

The Molecular Genetics and Microbiology Specialist program is a research-intensive program and is designed to provide strong in-depth training in science, including critical analyses of scientific concepts and literature, advanced laboratory experience, and detailed understanding and application of molecular biology. Specialists enter the program in 2nd year and then choose one of two Streams, called Genetics and Microbiology, by the start of the third year. Each Stream provides focused training, but there is considerable overlap between the streams, reflective of both the cross-disciplinary requirements of these two rapidly evolving disciplines and the impact of each on areas spanning modern biomedical science.

The Molecular Genetics and Microbiology Major program offers students fundamental training in molecular genetics and microbiology. Students tailor their own program and may focus on a microbiology major, a genetic major, or a combination; they choose a path to suit their specific interests. Students take several advanced courses in these disciplines, but the Major allows them to choose the breadth of their training by combining the MGY Major with another Major of interest.

The Department of Molecular Genetics is also a cosponsor of the Major program in Genome Biology, with the Departments of Cell and Systems Biology (CSB), and Ecology and Evolutionary Biology (EEB). See the Biology program listings for details of the Genome Biology Major.

Career opportunities for graduates include employment in research institutes, universities and other educational institutions, and industry. The programs provide excellent preparation for post-graduate research and professional programs.

Molecular Genetics and Microbiology Programs

Molecular Genetics and Microbiology Specialist (Science Program) - ASSPE1387

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade and Variable Minimum Grade Average

Minimum grades combined with a minimum grade average in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1, BIO130H1
- (CHM135H1 and CHM136H1)/CHM151Y1
- (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 75% in each course, or a grade average lower than 80% in these required courses will not be considered for admission. Please note that obtaining the minimum final grades and grade average does not guarantee admission to the program. While it is difficult to predict what will constitute "competitive" course marks in a given year, based on previous years the estimate is: course marks = mid 80s; average = mid 80s.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at mgy.info@utoronto.ca, specify which program you would like to be considered for, and provide your student number.

Please consult the Arts & Science Program Toolkit for more information on program enrolment. Additional information is also available by contacting the Undergraduate Coordinator.

Completion Requirements:

(14.0 credits)

First Year:
BIO120H1, BIO130H1; (CHM135H1, CHM136H1)/CHM151Y1; (MAT135H1, MAT136H1)/MAT137Y1

First or Second Year:
(PHY131H1, PHY132H1)/(PHY151H1, PHY152H1)

Second Year:

Molecular Genetics and Microbiology Courses

**MGY200H1 - An Introduction to Molecular Genetics and Microbiology**

**Hours:** 24L

Introduction to the core concepts of genetics and microbiology. Included are also topical biological problems and cutting-edge scientific approaches with some examples from world-class Toronto labs. Historical context is often used to deliver material. Topics include: core concepts in genetics, an introduction to cancer and stem cells; the genetic regulation of aging; core concepts in microbiology; emerging and recurring microbial threats; genetic engineering.

**Prerequisite:** BIO120H1, BIO230H1/BIO255H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**MGY250H1 - Introduction to Medical Genetics**

**Hours:** 36L

An introduction to medical genetics including the “omics” revolution, stem cells, cancer genetics, finding disease-causing mutations, genetic counselling and gene therapy. The course material is delivered online and is approximately equivalent to 36 lecture hours. Midterm and final exam are taken on campus or at a pre-approved site off-campus.

**Prerequisite:** BIO120H1, BIO130H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**MGY277H1 - Introduction to Medical Microbiology**

**Hours:** 36L

An online introductory survey course that explores the agents of infectious disease including bacteria, viruses, and parasites as well as the host immune response. Other topics include the fundamentals of disease diagnosis and epidemiology. This course will use web-based delivery of lectures and tutorials and utilize a range of communication tools equivalent to approximately three lectures per week. The final exam will require student attendance on the St. George campus.

**Prerequisite:** BIO120H1, BIO130H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**MGY280H1 - Second Year Specialist Research**

**Hours:** 48P/12S

This course gives students enrolled in the Molecular Genetics and Microbiology Specialist or Biochemistry Specialist program an opportunity to conduct an original research project in the second semester of their second year in a research laboratory in either of those Departments. Laboratory assignments are chosen during the first semester of second year by agreement with a Departmental faculty member and the Course Coordinator. Attendance at a weekly meeting is mandatory and students will present a report at the end of term. Details can be found on the departmental website. Not eligible for CR/NCR option.

**Prerequisite:** Students cannot have completed more than 8.5 credits

**Exclusion:** MGY299Y1 and other ROP299Y1 courses

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**MGY299Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities... Not eligible for CR/NCR option.

**Distribution Requirements:** Science

**MGY311Y1 - Molecular Biology**

**Hours:** 72L

This course examines the design and interpretation of experiments that have led to our current understanding of
the biological roles of DNA, RNA and proteins. Intended for students considering graduate or professional work in molecular biology or a related field or wanting a deeper understanding of these topics.

**Prerequisite:** BIO120H1, BIO230H1/BIO255H1, BCH242Y1 (Note: BCH210H1 may be acceptable with permission of instructor)

**Exclusion:** BCH311H1, CSB349H1, JBC372H5(UTM), PSL350H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**MGY314H1 - Principles of Genetic Analysis I**

**Hours:** 12T/36P

Laboratory experiments in genetics, with the focus on microbial and prokaryotic genetics. Topics and experiments include mutagenesis and genetic selection, linkage and recombination, genetic crosses, gene regulation, suppressor analyses, and genetic mapping. (Lab Materials Fee: $25; Lab Manual Fee: $7)

**Prerequisite:** BIO230H1/BIO255H1, BIO260H1/HMB265H1

**Exclusion:** MGY312H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**MGY315H1 - Principles of Genetic Analysis II**

**Hours:** 12T/36P

Laboratory experiments in eukaryotic genetics, using two of the most powerful eukaryotic model systems, the yeast Saccharomyces cerevisiae and fruit fly Drosophila melanogaster. The course follows MGY314H1; topics include analysis of genetic networks and pathways, meiotic segregation analysis, recombination mapping, genetic crosses, and phenotypic analyses. (Lab Materials Fee: $25; Lab Manual Fee: $20)

**Prerequisite:** BIO230H1/BIO255H1, BIO260H1/HMB265H1, MGY314H1/MGY340H1

**Exclusion:** MGY312H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**MGY340H1 - Molecular Genetics**

**Hours:** 36L

This course gives students an in-depth understanding of how genetics, the study of mutations and their resulting phenotypes, are used to probe and understand a variety of biological phenomena ranging from metabolism, to development, to cancer.

**Prerequisite:** BIO120H1, BIO130H1, BIO230H1/BIO255H1, BIO260H1/HMB265H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**MGY350H1 - Model Organisms to Disease**

**Hours:** 36L

The concepts of genetics in the context of human development, disease and evolution. Topics include genetic interactions and complex traits, variation in disease phenotype, signalling and development, stem cells and epigenetic regulation.

**Prerequisite:** BIO120H1, BIO230H1/BIO255H1, BIO260H1/HMB265H1

**Corequisite:** BCH311H1/CSB349H1/MGY311Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**MGY360H1 - Whole-Genome Sequencing and Analysis Laboratory**

**Hours:** 36P

The principles and practice of whole-genome sequencing. Each student team will sequence an entire eukaryotic genome and analyze it. Topics will include: modern sequencing technology, yeast husbandry, genomic library construction and quality control, ‘next-generation’ sequencing, sequence assembly using a reference genome, principles of genome organization, mutation detection and interpretation.

**Prerequisite:** BIO230H1/BIO255H1, BIO260H1/HMB265H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)
MGY377H1 - Microbiology I: Bacteria

Hours: 36L

An in depth study of bacteria including their structure, their biology, their ability to adapt, and their effects on human health. Provides a foundation for advanced studies in bacterial physiology, bacterial genetics, molecular pathogenesis of disease, immunology, and environmental studies.

Prerequisite: BCH210H1/BCH242Y1, BIO120H1, BIO230H1/BIO255H1
Exclusion: BIO370Y5 (UTM)
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

MGY378H1 - Microbiology II: Viruses

Hours: 36L

Detailed study of viruses in terms of structure, classification, replication and interaction with the host. Basis for advanced study in virology. Requires some familiarity with molecular and cellular biology. A concurrent course in immunology (IMM340H1, IMM350H1) or (IMM341H1, IMM351H1) is recommended.

Prerequisite: BCH210H1/BCH242Y1; BIO120H1, BIO230H1/BIO255H1
Corequisite: BCH311H1/CSB349H1/MGY311Y1
Exclusion: BIO351Y1, CSB351Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

MGY380H1 - Microbiology Laboratory I: Bacteria

Previous Course Number: MGY379Y1
Hours: 12L/36P

A laboratory course in bacteriology. Students will perform a variety of genetic and biochemical experiments to identify and characterize unknown organisms, and learn how bacteria live together in biofilm and become resistance to antibiotics. Students will also learn important research tools and concepts including CRISPRi, transduction, and conjugation through experiments. Valuable not only for advanced work in microbiology but also in related fields that make use of bacteria and bacteriophages as research tools. (Lab Materials Fee: $25; Lab Manual Fee: $20)

Prerequisite: BIO120H1, BIO230H1/BIO255H1, HMB265H1/BIO260H1
Corequisite: MGY377H1
Exclusion: MGY379Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

MGY381H1 - Microbiology Laboratory II: Viruses

Previous Course Number: MGY379Y1
Hours: 12L/36P

Hands-on experiments provide the opportunity to develop skills in working safely with human viruses. Important concepts are learned through analysis of results. Topics include propagation and assay of viruses, examination of viruses by electron microscopy, replication kinetics, host response to infection and viral vectors. Valuable not only in microbiology but in fields using viruses as vectors. (Lab Materials Fee: $25; Lab Manual Fee: $20)

Prerequisite: BIO120H1, BIO230H1/BIO255H1, HMB265H1/BIO260H1, MGY380H1
Corequisite: MGY378H1
Exclusion: MGY379Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

MGY399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities.... Not eligible for CR/NCR option.

MGY420H1 - Regulation of Gene Expression

Hours: 24L

Regulatory mechanisms controlling gene expression in eukaryotes; students will read, discuss, and present the primary research literature in class. Topics include: assembly of the initiation complex; roles of transcription factors, co-activators and cis-acting regulatory elements; promoter escape; mechanisms that control elongation, termination and anti-termination of transcription; chromatin control of transcription.
MGY425H1 - Signal Transduction and Cell Cycle Regulation

Hours: 24L

This course presents and integrates molecular aspects of signal transduction and cell cycle regulation in eukaryotic cells from yeast to humans. Emphasis is on recent advances in growth factor receptor signalling, modular protein domains, and the recurrent role of protein phosphorylation and protein-protein interactions in cell regulation.

Prerequisite: BCH311H1/MGY311Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

MGY460H1 - Genetic Analysis of Development

Hours: 24L

Basic and advanced principles of genetic analysis applied to the study of the best-understood eukaryotic model organisms including the nematode worm Caenorhabditis elegans, the zebrafish, and the laboratory mouse. We emphasize the use of genetic approaches to address problems in cell biology and development, such as the regulation of cell fate and tissue development. Much of the knowledge gained from these experimentally tractable organisms has proven broadly applicable, and the same principles of developmental genetic analysis underlie efforts to understand the development of humans.

Prerequisite: BIO260H1/HMB265H1,
MGY311Y1/CVB349H1/BCH311H1
Exclusion: MGY451H1, MGY452H1
Recommended Preparation: MGY340H1, MGY350H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

MGY470H1 - Human and Molecular Genetics

Hours: 24L

Current aspects of human and molecular genetics including: chromosome structure and function, inheritance of mutations and disease, the human genome and disease gene mapping, cancer genetics, mouse disease models and gene based diagnostics and therapies.

Prerequisite: BCH311H1/MGY311Y1 (Note: CSB349H1 is acceptable with permission of the instructor)
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

MGY480Y1 - Special Research Project

An opportunity for specialized individual research in molecular genetics and microbiology by arrangement with the course coordinator. Students are required to perform
an original research project and attend relevant research seminars. Not eligible for CR/NCR option.

**Prerequisite:** (MGY314H1/ MGY315H1/ MGY379Y1/MGY380H1/MGY381H1), (MGY311Y1/BCH311H1/CSB349H1)

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

### MGY481H1 - Independent Research Project

**Hours:** 120P

This course provides an opportunity for individual research with a specific topic of study. Students are mentored and supervised by research scientists and faculty associated with the University of Toronto. It provides students an opportunity to enhance and apply their knowledge and understanding learned in other courses. Not eligible for CR/NCR option.

**Prerequisite:** (MGY314H1/MGY315H1/MGY379Y1/MGY380H1/MGY381H1), (MGY311Y1/BCH311H1/CSB349H1)

**Exclusion:** MGY480Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

### MGY482H1 - Independent Research Project

**Hours:** 120L

This course provides an opportunity for individual research with a specific topic of study. Students are mentored and supervised by research scientists and faculty associated with the University of Toronto. It provides students an opportunity to enhance and apply their knowledge and understanding learned in other courses. Not eligible for CR/NCR option.

**Prerequisite:** (MGY314H1/MGY315H1/MGY379Y1/MGY380H1/MGY381H1), (MGY311Y1/BCH311H1/CSB349H1)

**Exclusion:** MGY480Y1

**Breadth Requirements:** Living Things and Their Environment (4)

### MIJ485H1 - Vaccines and Immunity

**Hours:** 36L

Analysis of the strategies used by pathogenic microbes to evade specific and innate immune responses, and the strategies used to combat infectious disease using vaccines, with an emphasis on molecular and immunological aspects. Special topics include: molecular basis of pathogenicity and immune-evasion strategies; vaccination strategies; challenges to vaccine implementation (given jointly by the Departments of Molecular Genetics and Immunology).

**Prerequisite:** (IMM340H1/IMM341H1), (IMM350H1/IMM351H1), MGY377H1, MGY378H1

**Exclusion:** MBY480H1, MGY485H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

Introduction

Munk One, provided by the Munk School of Global Affairs & Public Policy, provides first-year students with an interdisciplinary program focused on innovation and global problem-solving, investigating the central questions that lie at the heart of teaching and research in the Munk School of Global Affairs, namely issues of global institutions, markets and civil society. Through case studies of some of the most complex challenges worldwide, students in Munk One will examine innovations that have succeeded and failed, when innovation occurs, how innovation can be fostered, and how obstacles to innovation can be overcome. Students, faculty members, and practitioners working together draw on the breadth of interdisciplinary research and teaching in the Munk School to examine problems and solutions for complex global problems.

The Munk One experience integrates small group seminars with hands-on research and analysis of global problems. Limited to an enrolment of 25, students in Munk One enrol in the two (2.0 credits) courses offered in the Program. The seminar courses promote small-group discussion and emphasize research, analytical, and presentation skills. A lab course gives students the unique opportunity to tackle real-world problems with faculty and graduate students, building connections with their coursework through research-based opportunities that identify problems around the globe and seek to address them through innovative and empirically-grounded solutions. Beyond the classroom, Munk One engages students in the dynamic global conversation occurring in the Munk School, and offers students a vast array of co-curricular offerings such as access to the Munk School’s 500 events each year, insights from leading practitioners, field visits, leadership events, curated readings and films. In the summer following their first year, Munk One offers students opportunities to apply these skills in the field by taking part in courses offered in places like Argentina, Israel and Singapore.

By focusing on innovation throughout their foundational year, undergraduate students will receive early immersion in leading thinking on the current global architecture across the sciences, professional fields, humanities, and with perspectives drawn from around the world. Because of the intensive intellectual experience that Munk One will provide, we deliver these offerings through collaboration with the School’s flagship Master of Global Affairs Program. The result is a unique bridging of foundational year undergraduate education with the insights being developed in the School's professional graduate program. In so doing, we expect that Munk One: Global Innovation will build a community of undergraduate students who are passionate about the increasingly interconnected and multipolar world in which we live, and who are also linked in closely with the graduate and professional student cohorts pursuing related questions across the Munk School.

The course offerings for Munk One are specifically designed to meet these goals. Global Innovation I: Issues and Perspectives emphasizes innovation as a key driver of economic growth, population health, and societal success. Relying on contemporary and historical cases across the globe, this course engages students on the question of when innovation occurs, how to identify moments of innovation, motivates students to explore who benefits from innovation and how innovation can be fostered. Global Innovation II: Challenges and Solutions, pushes students to explore the potential problems that often limit or hamper innovation – such as the challenges of implementation and scale. In so doing, students engage directly with the problem-solving approach that is also core to the Munk School’s graduate program, by relying on case studies of some of the most complex challenges worldwide, and examining interventions that have succeeded and failed to address them.

As identified above, in addition to seminar courses and co-curricular activities, students in Munk One will each be placed in research labs working on real-world global problems, such as digital governance, environment, global health, ethnic conflict and security, and economic development. Through these laboratory opportunities students will work with interdisciplinary teams to conduct research, develop reports, participate in roundtables, and learn how to identify and address complex global problems. These labs uniquely provide students a platform to draw from and refine their Foundational Year experience. Students will gain experience in a structured multidisciplinary approach to addressing global problems, engage in innovative global problem-solving, and drill down on substantive areas of interest within the field of global affairs.

All first-year students in the Faculty of Arts and Science (St. George campus) are eligible for admission. Students must submit an online application with a resume and personal statement.
Regarding Munk One Courses

Munk One students intending to pursue Peace, Conflict and Justice, Contemporary Asian Studies, and Public Policy programs (undergraduate programs run through the Munk School of Global Affairs & Public Policy), are also eligible to count some of their Munk One coursework toward their degree requirements.

The first objective is to familiarize students with the concept of global public goods, the different mechanisms that can provide these goods and the challenges that emerge from lacking incentives to secure their provision. To this end, the course will introduce theories from sociology, political science, philosophy, and history to help us understand different types of governance mechanisms and how they may be used to scale global solutions. Theories can help us explain the tensions between cooperating for the public good at the expense of sacrificing individual goals, or why certain areas of our lives, like the Internet, seem to produce public goods without any formal mechanism of cooperation.

The second objective is to use the class and subject of study as an arena to model and practice the kind of learning that is expected of university students. The main skills that the course will help students target and develop are: research (finding, evaluating and assimilating reliable information); writing (developing ideas into logically written arguments); and critical analysis of arguments presented in the readings and debated in class (this includes identifying the key assumptions that are implicit in different theories as well as inherent in our own positions on various questions related to governance). Restricted to first-year students. Not eligible for CR/NCR option.

MUN105Y1 - Global Problem-Solving: Laboratory Opportunities

Hours: 48L

This course teaches students how to conduct analytically rigorous social science research to improve their insights into complex global problems and devise innovative solutions to address them. A unique feature of this class is that students have the opportunity to learn by doing. Students work hands-on in one of several labs dealing with some of the most intractable global problems of our time in the areas of the environment, health, digital governance, security and the gap between rich and poor. By the end of this course students will be able to:

Munk One Courses

MUN101H1 - Global Innovation I: Issues and Perspectives

Hours: 24L

Innovation has always been a key driver of economic growth, population health, and societal success. Transformative change has historically been linked to major innovations such as urban sanitation, pasteurization, the printing press and the industrial revolution. Currently, the opportunity to enhance life chances worldwide relies on innovating for the poor, social innovation, and the ability to harness scientific and technological knowledge. What precisely is innovation? When does innovation happen? Who benefits from innovation? How can innovation be fostered, and how do innovations spread? Relying on major global transformations and country-specific case studies (for example, South Korea, Taiwan, Israel and India), this course examines the drivers of innovation, the political, social, economic, and scientific and technological factors that are critical to promoting innovation and addressing current global challenges, and the consequences of innovation. Restricted to first-year students. Not eligible for CR/NCR option.

MUN102H1 - Global Innovation II: Challenges and Solutions

Hours: 24L

Governing public goods has been an age-old concern for social scientists and policymakers alike. This is not surprising since the provision of global public goods is riddled by problems of collective action. In this course, we focus on how to implement solutions through states, markets and communities.
1. Experience and practice the process of social science research
2. Narrow the scope of a complex global challenge into a manageable research problem that can be tackled over the course of the semester
3. Improve their knowledge and insights on a particular global problem
4. Develop a viable, compelling and implementable solution that can help address an aspect of a global problem
5. Pitch a solution in a compelling way to a jury of experts in global affairs

Students will work with their peers in small seminar classes and lab group settings, mentored by graduate teaching assistants specializing in global affairs, expert faculty and senior policy advisors dedicated to addressing global issues in the fields of the environment, health, security, digital governance and political economy. Restricted to first-year students. Not eligible for CR/NCR option.

Introduction

In the Faculty of Arts and Science, Music is approached as one of the liberal arts and taught as cultural history. This humanistic emphasis aims at a high degree of correlation with other disciplines such as Fine Art, Cultural Anthropology, Languages and Literatures, History, and Philosophy. Note that unlike students in the Mus.Bac. program at the Faculty of Music, students in the Specialist and Major programs are not given individual applied music instruction (e.g. piano or voice lessons). They are, however, offered a thorough grounding in musicology, and strong training in both ethnomusicology and music theory, with the option of increasing their exposure to the latter two disciplines via their upper-year option courses.

The courses with the prefix MUS are open to any student of the University. Even students with a strong music background should find them stimulating explorations of the world of music.

Students wishing to enter the Specialist or Major Program should examine the courses listed under HMU History of Music and TMU Theory of Music in the Faculty of Music Calendar. First-year specialist/major courses are available to a small number of students, who are admitted to them by audition and interview during Registration week. Those interested in ethnomusicology and the study of world music may audition on the basis of their comparable accomplishments in a non-Western instrumental or vocal performing tradition. All students are required to have completed Level 8 Theory and Level 9 Harmony from the Royal Conservatory of Music or equivalent as prerequisite, prior to the audition-interview. Knowledge of Western music history and theory ensures that students are not disadvantaged when facing the curricular requirements of the program. In this program the humanistic and historical approach is supported by courses in music theory which provide craft and analytical tools. The Specialist Program provides excellent preparation for a variety of professional activities including music criticism, library science, positions in the publishing, broadcasting, and recording industries, as well as for graduate studies in musicology, ethnomusicology, and music theory, leading to careers in university teaching. The program leads to the degree of Bachelor of Arts (honours). For programs leading to the degree of Bachelor of Music, the student should consult the Calendar of the Faculty of Music.

Students are encouraged to attend events sponsored by the Faculty of Music such as the Thursday Noon and Faculty Artists’ Series, opera productions and numerous concerts. For information refer to www.music.utoronto.ca or telephone 416-978-3740. Faculty of Music Representative: Professor R. McClelland, Associate Dean, Edward Johnson Building, Room 256 (416-946-0802); email: ryan.mcclelland@utoronto.ca

Regarding Music Programs

Enrolment in HMU and TMU courses, and, therefore, in the Specialist and Major programs, is limited to students who pass the audition-interview, held annually in September. Students are required to complete and submit the Student Profile available on-line, normally prior to mid-August each year. Detailed information is available on the Faculty of Music website. Hard copies are available from the Faculty of Music Registrar’s Office. You will then be assigned an audition/interview time. Prospective candidates must perform at the Royal Conservatory of
Music Grade Eight level, and demonstrate that they have RCM Level 8 Theory (formerly Advanced Rudiments) and RCM Level 9 Harmony (formerly Basic Harmony) or equivalents. Students interested in pursuing the Major or Specialist with the Ensemble option are required to pass an additional audition-interview for ensemble placement. Please refer to MUS120Y1. An information sheet is available at the Faculty of Music and online at www.music.utoronto.ca under "Music for Arts & Science Students". (Note: No audition is required for the Music Minor program, see below.)

Music Programs

Music Specialist (Arts Program) - ASSPE2276

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Special Requirement

- Students must pass an audition-interview to enroll in the program. The audition is held annually in September. Students are required to complete and submit the Student Profile available on-line, normally prior to mid-August each year. Detailed information is available on the Faculty of Music website.
- Prospective candidates must perform at the Royal Conservatory of Music Grade Eight level, and demonstrate that they have RCM Level 8 Theory (or equivalent) and RCM Level 9 Harmony (or equivalent). Students who do not meet the Level 9 Harmony requirement (or equivalent) will be required to attend an additional hour of tutorial during the fall term of TMU140Y1.
- Students interested in pursuing the Major or Specialist with the Ensemble option are required to pass an additional audition-interview for ensemble placement. Please refer to MUS120Y1.

Introduction

The Department is concerned with the interdisciplinary study of the civilizations and cultures of the Near and Middle East from Neolithic times until the present, including their archaeology, history, mythology, religion and thought, art and architecture, and language and literature (Akkadian, Ancient Egyptian, Arabic, Aramaic, Coptic, Ge’ez, Hebrew, Persian, Sumerian, Syriac, and Turkish). The Department’s programs provide students with a unique opportunity to study non-Western complex societies and civilizations.

The term Near East has been used in scholarship to refer to the region of Southwest Asia at the eastern end of the Mediterranean, including the Levant, Mesopotamia, Egypt, and Anatolia, from ancient times until the advent of Islam in the seventh century AD. The term Middle East refers to a broader geographical area stretching from North Africa to West and Central Asia. Although Islam became the predominant religious culture and remains so to the present day, the Middle East has been home to many religious communities, including Christians, Jews, Zoroastrians, and others. And while Arabic functioned as the interlanguage in much the same way as Latin did in the Christian West, many other languages and cultures (notably Persian and Turkish) contributed to the formation of Islamic civilization.

The Department welcomes students of all academic backgrounds who wish to learn about the Near and Middle East. Many courses do not require knowledge of the languages of the region. However, the Department strongly believes that a deeper understanding of the cultures of the Near and Middle East can be achieved through the study of one or more of its languages.

Additional information about programs and courses offered in a particular year, as well as about the NMC Students’ Union, can be found on the Department’s website: www.nmc.utoronto.ca. Undergraduate enquiries should be directed to the Associate Chair, Undergraduate,

Faculty of Arts & Science Language Citation

The Department of Near and Middle Eastern Civilizations participates in the Faculty of Arts & Science’s Language Citation for Arabic, modern Hebrew, Persian, Turkish, Biblical Hebrew, and Ancient Egyptian. The study of languages is a demanding and intellectually rewarding educational experience that provides access to the varieties of human culture and expression. The Language Citation requires the completion of 3.0 credits and recognizes a significant level of achievement in the advanced study of a language.

The Citation in Arabic is available to students who, having completed the introductory course in Arabic (NML110Y1 or the equivalent prerequisite training), earn a grade of at least B- in two additional credits in Arabic language (NML210Y1, NML310Y1, or NML410Y1).

The Citation in modern Hebrew is available to students who, having completed the introductory courses in modern Hebrew (NML155H1 and NML156H1 or the equivalent prerequisite training), earn a grade of at least B- in two additional credits in modern Hebrew language (NML255H1, NML256H1, NML355H1, and NML356H1).

The Citation in Persian is available to students who, having completed the introductory Persian language course (NML260Y1 or the equivalent prerequisite training), earn a grade of at least B- in two additional credits in Persian language/literature (NML360Y1, NML461H1, NML462H1, NML466H1, NML467H1, or NML468H1).

The Citation in Turkish is available to students who, having completed the introductory course in Turkish (NML270Y1 or the equivalent prerequisite training), earn a grade of at least B- in two additional credits in Turkish language (NML370Y1 and NML470Y1).

The Citation in Biblical Hebrew is available to students who, having completed the introductory course in Biblical Hebrew (NML250Y1 or the equivalent prerequisite training), earn a grade of at least B- in two additional credits in Biblical Hebrew language (NML350H1, NML351H1, NML450H1, and NML459H1).

The Citation in Ancient Egyptian is available to students who, having completed the introductory course in Ancient Egyptian (NML240Y1 or the equivalent prerequisite training), earn a grade of at least B- in two additional credits in Ancient Egyptian language/literature (NML340Y1, NML440H1, and NML441H1).

Students should note that, as explained in the About Programs of Study section of this Calendar, the Language Citation is not equivalent to an academic program for purposes of degree completion; however, language courses taken as part of the Requirements for an NMC
Program of study may count towards a Language Citation in the relevant language(s).

Regarding Near and Middle Eastern Civilizations Courses

**Note Regarding Courses:** Not all courses are taught every year. Please check the Faculty of Arts & Science Timetable for the list of courses offered in 2021–2022. Courses with the designator NML indicate courses devoted to the study of the languages of the Near and Middle East (at Introductory, Intermediate, and Advanced levels), as well as courses that study texts written in the original languages. The Department reserves the right to place students in the course level best suited to their linguistic preparation.

**Gateway Courses**

These courses are designed to introduce students to the major civilizations and cultures of the Near and Middle East—ancient, medieval, and modern—and to present students with the range of possibilities for further study in their chosen area of interest. These courses provide an opportunity for students to improve their writing skills under the supervision of the Writing Integrated Teaching (WIT) program of the Faculty of Arts & Science. Students pursuing any one of the NMC Specialist Programs are required to take two of these Gateway courses, whereas students opting to do any one of the Major Programs are required to take only one.

Restricted to first-year students. Not eligible for CR/NCR option.

**NMC First-Year Foundations**

**NMC195H1 - Rebels, Misfits, and Outcasts in Modern Arabic Literature**

*Previous Course Number:* NMC242H1
*Hours:* 36S

This course examines modern Arabic literary texts that portray marginalized social figures and groups who have been excluded from a protective system of resources and privileges. Students will read novels and short stories by prominent Arab authors who have represented marginal social groups in their fiction, including representations of the urban poor, the peasantry, the delinquent, the prostitute, sexual minorities, women who reject normative roles, and the political rebel. These fictional texts address issues such as political resistance and rebellion, economic precarity, and social exclusion. Students will engage with these texts by critically examining the role of literature in narrating unspoken and suppressed histories. The class will also introduce students to theoretical modes of literary analysis and interpretation. All texts will be read in English translation. Authors include Mohamed Choukri, Hanan al-Shaykh, Alifa Rifaat, Sonallah Ibrahim, and Arwa Salih.

and develop strong written and oral communication skills in the process. The Department offers five FYF Seminars on topics ranging from the ancient to the modern. First-Year Foundation Seminars:

- Count as 0.5 of the 20.0 credits required for an Hon. B.A., Hon B.Sc. or B. Com.
- First-Year Foundation Seminars may count towards your Program. Please check with your college registrar or the NMC Department for further details.
- Can be counted towards the breadth requirement. For the list of NMC First-Year Foundation Seminars see the Faculty of Arts & Science Calendar.

NMC197H1 - Myth and History in the Bible

**Hours:** 24S

Reading the Bible is easy, but reading it well isn’t. Should we read its stories as history? All of it? Or perhaps only part of it? If so, which parts? And if some parts aren’t meant to be read as history, then what are they? Was Jonah really swallowed by a large fish? Did the sun and moon stand still for Joshua? Did Moses really part the Red Sea? Did Jesus really raise Lazarus from the dead? Are miracles necessarily fiction? In this seminar, we will read together many of the most colourful stories of the Bible, sometimes alongside similar stories from the cultural context of ancient Israel, and discuss what genre (history, myth, legend, folktale) they belong to and how this affects our reading of these texts. Restricted to first-year students. Not eligible for CR/NCR option.

NMC198H1 - Iranian Women Reveal Their Lives: The First Generation

**Hours:** 24S

The course focuses on Iranian women born in the late 19th and early decades of the 20th centuries. *Making of the Modern Iranian Woman, 1865-1946* introduces the context of social, cultural, and governmental change that encouraged educated females to think beyond the dominant conservative ideal of a woman's place. Primarily we will use writings by women themselves, such as *Memoirs of a Persian Princess: From the Harem to Modernity*, 1884-1914, to examine their lives. Interviews with women in *Exiled Memories* give voice to repressed memories that inhibited female self-development. The memoir *Reveille for a Persian Village* reveals the challenge of introducing change for females into an isolated rural community. Poems by this early generation vividly reveal their anger, regret, difficulties, and hopes for the future. *Memories of a Persian Childhood* helps us to appreciate the important role of childhood experience in later choices. Each woman is discussed as an individual and as a product of a period of turbulent social and cultural change in the history of Iran. Restricted to first-year students. Not eligible for CR/NCR option.

NMC199H1 - Babylon: Fact vs. Fiction

**Hours:** 24S

The ancient city of Babylon, now a vast archaeological site in Iraq about 100km south of Baghdad, has captured people’s imagination up to this day. Who has not heard of the Hanging Gardens of Babylon, the Biblical Tower of Babel, or the sci-fi TV series *Babylon 5*? Yet, how much of that reflects the reality of ancient Babylon? This course will explore the city of Babylon through its texts and archaeology and contrast this data with the way the city has been remembered over the past two thousand years. However, the goal of the course is not only to investigate how myths about Babylon have been constructed throughout the centuries. It will also look at the shortcomings of contemporary academic research on Babylon, and how difficult it is to reconstruct humankind’s distant past. Restricted to first-year students. Not eligible for CR/NCR option.

Gateway Courses

NMC101H1 - Land of the Pharaohs

**Hours:** 24L/12T

Egypt is one of the oldest known civilizations on the African continent. Deeply embedded within early African history, Egypt was also inextricably linked with the history of many civilizations in the Ancient Near East. From pyramids to mummies and from King Tut to the Hanging Gardens of Babylon, the course will trace the history of ancient Egypt from its foundation around 3050 BCE to its incorporation into the Roman Empire in the 1st Century BCE. The focus will be on various aspects of Egyptian culture, including the institution of kingship, the role of women, and the characteristic features of Egyptian art, literature, and religion. Emphasis will be placed on the methods by which knowledge about this ancient civilization can be obtained.

NMC102H1 - Heartland of Ancient Empires

**Hours:** 24L/12T

Mesopotamia and the ancient Near East—the area of modern Iraq and adjacent regions—witnessed the rise of...
the first cities in the fourth millennium BC and the emergence of the world's first empires in the first millennium BC. This course traces Mesopotamian history from the beginnings of agriculture through to the earliest cities, following the trajectory of political development from city states, to territorial states, and finally to the great empires of Assyria, Babylonia, and Achaemenid Persia and their aftermath. It studies the peoples and polities of the ancient Near East, including the Sumerians, Assyrians, Babylonians, and Persians. It also examines their cultural contributions, from the development of cuneiform writing to their achievements in law, administration, science, art and architecture, religion, and literature.

**NMC103H1 - The Islamic World**

**Hours:** 24L/12T

A broad introduction to Islam, including the history, culture, and religion of the people and places that came to be influenced by Islam and that constitute a world civilization. What makes something (an empire or state, or a work of art or music) Islamic? When and how did that which we think of today as Islamic come about? How has “the Islamic” changed over time? With these questions in mind, this course introduces students to major figures, events, themes, institutions, and intellectual currents in Islamic history, from its beginnings in the 7th century to the modern period. Key topics to be covered include the rise and spread of Islam, the Qur'an and the role of Arabic, political thought, law and society, and literary and artistic expressions. Attention is paid to the geographical and ethno-linguistic scope of the Muslim world, demonstrating the diversity of peoples and traditions that make up Islamic civilizations.

**NMC104H1 - The Biblical World**

**Hours:** 24L/12T

Examine the history, lands, peoples, religions, literatures and cultures that produced the Hebrew Bible/Old Testament. Topics to be covered include an overview of the geography and history of Ancient Israel and Judea, the role of the Hebrew, Aramaic, and Greek languages, the literary genres reflected in biblical and some contemporary non-biblical texts, and the scholarly methods by which the Bible is studied.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Society and its Institutions (3)

**Culture and Civilization Courses**

**NMC241H1 - Anthropology of the Middle East**

**Hours:** 24L

This course aims to familiarize students with the anthropological study of the contemporary Middle East. It introduces key questions and concepts for anthropological study: who speaks for the Middle East? What is culture? What is ethnicity? It analyzes systems of power and exclusion, and everyday life and relations in countries like Egypt, Turkey, Iran, Iraq, Syria, Lebanon, Palestine, Israel, and Kuwait. The course will provide critical perspectives on gender, religion, family relations, national belonging, migrant workers, and refugees. Students will apply anthropological methods learned in class to do an independent project.

**NMC243H1 - The Arabic Novel**

**Hours:** 24L

This course focuses on the origins and development of the novel genre in the modern Arabic literary tradition. The course examines the aesthetic qualities of the novel as an artistic form as well as the ways it has represented and intervened in the modern social, political, and cultural upheavals that have shaped the Arabic-speaking world from the mid 19th century to the 21st century. Students will read literary criticism that addresses the Arabic novel's emergence and consolidation as a major literary form and will engage with contemporary methods of literary analysis and interpretation. Topics addressed in the course include textual representations of colonialism and post-colonialism, gender and sexuality, representations of the peasantry, the nation-state and Arab nationalism, and discourses of progress and modernity. Authors include Ahmad Faris al-Shidyaq, Yahya Haqqi, Naguib Mahfouz, Tayeb Salih, Latifa al-Zayyat, Mohamad Choukri, and Hanan al-Shaykh. Readings of novels and criticism in English translation.

NMC245H1 - Women in the Ancient Near East

Hours: 24L

The course examines written and archaeological sources to discuss the status and role of women in the ancient Near East, focusing in particular on the first millennium BCE.

Recommended Preparation: NMC101H1, NMC102H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC246H1 - Sumerian and Babylonian Literature in Translation

Hours: 24L

This course explores some of the world’s oldest literature, including the Epic of Gilgamesh and the Babylonian Epic of Creation. It surveys the major literary genres from ancient Mesopotamia, including epics, myths, lyrical poetry, wisdom literature, and humorous tales. It covers literary compositions written in the Sumerian and Babylonian languages using the cuneiform script, ranging in date from the third millennium BC through to the first millennium BC. The course also examines the scholarly and cultural context in which these works were created and preserved for posterity, including the role of scribal training, the nature of Mesopotamian scholarship, royal sponsorship, and the formation of ancient libraries.

Recommended Preparation: NMC102H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC247H1 - The Intellectual History of the Ancient Near East

Hours: 24L

Survey of the intellectual life in the Ancient Near East from the emergence of writing in Mesopotamia and Egypt at the end of the third millennium BCE until the Hellenistic and Roman periods. Covers issues of orality vs. literacy, state and scribal control, notions of progress, origins and purpose of knowledge, as well as areas such as taxonomy of the natural world, astronomy, mathematics, medicine, divination.

NMC248H1 - Ancient Bureaucracies

Hours: 24L

Where were taxes first collected? When was the first receipt issued? What did the first account ledgers look like? This course offers an introduction to the development of early bureaucracies in ancient Mesopotamia (Iraq), Iran and Syria. Find out how accounting procedures evolved after 6,500 BC, from closing storage containers in Neolithic villages with seals and sealings to complex recording procedures in urban settings that ultimately led to the development of writing on clay tablets around 3,100 BC. Learn how different patterns of irrigation in river-based agricultural societies such as Mesopotamia, Egypt, and China led to similar yet distinct systems of resource management and administration, using different writing materials (e.g. clay tablets, papyrus) based on available raw materials. And see how bureaucratic procedures, while helping to maximize efficiency in an ancient society, could also create a lack of flexibility, ultimately leading to political decline or collapse.

NMC251H1 - Voices from Ancient Egypt

Hours: 24L

This course introduces students to the culture of ancient Egypt through the study of “functional” textual materials. After a brief introduction to the Ancient Egyptian language and writing system, we will read texts from domestic, religious (comprising funerary and ritual), historical, and scientific backgrounds to paint a rich picture of the daily life and experiences of the ancient Egyptians. By way of example, we will illustrate Egyptian funerary beliefs on the basis of texts found in tombs, such as autobiographies, offering formulae, and letters left there for the dead by their families; or the role of the pharaoh for the Egyptian state by studying monumental inscriptions left on temple walls, boundary stelae, and in the tombs of the Egyptian elite. No knowledge of Ancient Egyptian required; all texts read in translation.

NMC253H1 - Egyptian Myths

Hours: 24L

This course explores ancient Egyptian mythical writings and representations, starting with the myths contained in the Pyramid Texts of the 3rd millennium BCE and ending with the narrative mythical tales of the 1st millennium BCE and beyond. Definitions and theories of ancient Egyptian myth as well as historical developments will be discussed, and we will attempt to explain why religious beliefs and stories changed. The course is structured systematically, focusing in particular on mythical accounts that elucidate Egyptian cosmic, royal, and funerary beliefs as well as the intersection of these domains. All texts read in translation.

NMC255H1 - Love, Battle, and Wit: Classics of Premodern Arabic Literature

Hours: 24L

This course surveys the premodern Arabic literary heritage, from pre-Islamic poetry to literature of the Mamluk period, focusing on texts that remained influential sometimes until the present day. Students read classic works in translation each week, while discussion focuses on social context and close reading. Throughout, we note the development of literary forms over time, and the way authors reference previous works. Readings include: the animal fable book *Kalila wa Dimna*, excerpts from anecdote collections (*adab*), multilingual Andalusi songs (*muwashshah*), the linguistically playful trickster tales called *maqamat*, an obscene shadow play by Ibn Daniyal, popular epic, and some of the most famous poems by Labid, Jarir, Abu Nuwas, Abu Tammam, al-Mutanabbi, and Ibn Nubata.

NMC256H1 - 1001 Nights Around the World

Hours: 24L

The 1001 Nights has had many lives, in many languages, and across many media. This course starts off with a detailed reading, in translation, of one of the oldest surviving Arabic versions of the text, with consideration of its literary and social context, and its sources. We then move forward in time to examine how the 1001 Nights was expanded, adapted, and disseminated from then until today. A key transformation moment occurred between 1704-1717 with the publication of Antoine Galland’s French version, composed with the input of Syrian storyteller Hanna Diab. This version was widely disseminated and became a basis for most subsequent modern adaptations. We consider adaptations both before and after this turning point, including manuscripts, translations, novels, ballets, short stories, and films produced around the world. Throughout, we consider the politics and aesthetics of these historical translations, adaptations, and transformations.

NMC258H1 - The Book of Kings: Persian Myth, History, and Art

**Hours:** 24L

The *Shahnameh*, or Book of Kings, is the single most important book in Irania national culture and one of the great epics of world literature. Composed in Persian by the poet Ferdowsi in the late 10th–early 11th centuries, it had a deep and lasting impact not only on Iran, but also on those cultures that came under the influence of Persian language, literature, and courtly traditions. The course examines, in English translation, the *Shahnameh*’s presentation of the history of the mythical dynasties of the ancient kings of Iran from the creation of the world to the Sasanians, the last historical dynasty to rule Iran before the Muslim Arab conquests. As the *Shahnameh* was frequently illustrated, attention will also be devoted to the manuscript tradition, which exhibits some of the finest examples of medieval Persian painting.

NMC259H1 - Literature of Ancient and Late Antique Iran

**Hours:** 24L

This course explores the most important texts of the Zoroastrian literature of ancient and late antique Iran and serves as a broad introduction to the mythical and ritual world of Zoroastrianism and the contours of pre-Islamic Iranian thought. The course is divided into two parts: a) Old Iranian literature, such as the Avestan religious literature and the Old Persian inscriptions, and b) Middle Persian (Pahlavi) literature, including epic poetry (Chronicle of Ardakhshir, narrating the deeds of the first Sasanian king), didactic and wisdom literature (Memorial of the Vizier Wuzurgmihr; Explanation of Chess and Backgammon), apocalyptic and visionary literature (Book of the Righteous Wiraz, describing his journey to heaven and hell), texts on cosmology (Primordial Creation), and encyclopaedic works (Acts of the Zoroastrian Religion), as well as specimens of Manichaean literature in Middle Iranian languages. All readings are in English translation.

NMC260H1 - Why the Ancient Near East? Investigating the Great Transformations in Pre- and Proto-History

**Hours:** 48L

This is an experiential course that asks what it would have been like for people in the ancient Near East as their world underwent the profound changes wrought by domestication, farming, urbanism, and state formation. We focus on the sensory experiences of the body, and their effect upon the mind, by reconstructing and using spaces and objects that have come to define the archaeological periods from 10,000 to 2500 BCE. From circular communal buildings and the constraints and possibilities they offer, to replastering skulls and making hand-held figurines, to the performance of a ritual text, we link traditional teaching with walking a mile in ancient footwear. Participation in this course requires an active imagination and a willingness to get physical.

NMC262H1 - Why the Ancient Near East? The Historic Periods

**Hours:** 48L

From 2500 to 333 BCE, the ancient Near East saw the world’s first empire, the birth of international diplomacy, burgeoning sea-trade and piracy, perennial warfare and the emergence of new ethnic identities like the Philistines and Israelites. Explore the archaeological evidence for these events in Mesopotamia, Egypt, Anatolia and the Levant.

NMC266H1 - Archaeologies of Power

Hours: 36L

Who were the first powerful leaders? How did they portray themselves, and what was the source and basis of their power? This course provides a comprehensive survey of the origins and rise of political leadership in the Near East from its beginnings in the Neolithic period to the famous kings and military leaders of Sumer, Assyria, and Babylon. Sources consulted include archaeological data (architecture, monuments, narrative art) as well as historical sources. The course is intended as an introduction to a broader understanding of the mechanisms that result in the formation of political power structures. Although it focuses on the ancient Near East, the course will discuss parallels from other parts of the world, both ancient and modern, that are relevant to understanding manifestations of political power in our present-day world.

NMC271H1 - The Sufi Tradition in Islam

Hours: 24L

The history of asceticism and mysticism in the Islamic tradition, with particular attention to the formative period as well as the breadth and diversity of Sufism across the Islamic world, from West Africa and Spain, to the Balkans and Central Asia, to China and Southeast Asia. We begin with the origins of the piety movement in early Islam, and the ways in which it responded to late antique Christian monasticism. We then examine the emergence of classical Sufism in the 9th century, its basic concepts and practices, the rise of saints, the formation of Sufi orders,
the social and cultural context for key developments, as well as the reasons for the contested legacy of Sufism in the modern world. Major figures for discussion include Rabi’a, Junayd, Hallaj, Ghazali, Ibn Arabi, and Rumi.

NMC273Y1 - Early Islamic History: The Prophet and the Caliphates

Hours: 72L

The formative period of Islam, from its origins in the late antique Near East to the fall of Baghdad in the mid-13th century. This course serves to build a solid foundation in Middle East and Islamic Studies, giving students an understanding of the key topics, events, movements and figures in medieval Islamic history. The major early Islamic dynasties (including the Umayyads, Abbasids, Buyids, and Fatimids) are covered, with attention to broader themes of importance, such as historiography, change and continuity, imperial power and politics, revolt and resistance, religious authority and tradition, cultural and intellectual developments, military organization and slavery, and the encounters between nomadic and sedentary peoples. Students will also gain an awareness of the sources and methods available for the study of Islamic history, the challenges they pose for modern historians, various interpretive approaches in using them, and the debates they have inspired in the scholarship.

NMC274H1 - The Turks in History: From Nomads of the Steppe Frontier to Islamic Rulers

Hours: 24L

The course examines the roles of Turks and other primarily nomadic peoples as raiders, migrants, slave-soldiers, and empire-builders in the ancient and medieval history of Eurasia (including Central Asia, the Middle East, and Eastern Europe) and in the formation of the Islamic world. Topics covered include long-distance economic and cultural contacts (“silk roads”) facilitated by “steppe empires”; the Islamization of the Turks and their gradual takeover of Iranian, Arab, and other Muslim lands; lifeways (especially pastoral nomadism); the relationship between nomadic and sedentary societies; political structures; steppe warfare; the role of physical geography and the environment. Students explore the histories and landscape geographies of Turks through fascinating primary sources and internet resources. The course illustrates the key role that Turks played in the formation of the modern world on the Eurasian continent.

NMC275H1 - The Mongol Empire and the World It Made

Hours: 24L

Most of Eurasia (the Middle East, East and South Asia, Eastern Europe) was once incorporated into the Mongol Empire and greatly influenced by Mongol rule. It may be said that the beginnings of modern history on the Eurasian continent were shaped by the impact of the Mongols and their non-Mongol (mainly Turkic) partners. This course explores the history of the pan-Eurasian empire founded by Chinggis Khan (Genghis Khan) in the 13th century and the smaller empires into which it devolved: Yuan China-Mongolia, Chaghatayid Mongolia-Central Asia, Ilkhanid Iran-Anatolia, and the Golden Horde Eastern Europe-Western Siberia. The course also surveys various post-Mongol successor states, such as the Timurid and Mughal Empires, and the Kazakh, Uzbek, and Crimean Tatar Khanates, as well as touches upon important non-Chinggisid successor polities, such as Muscovy-Russia and Slavic Cossacks. Students explore the history and landscape geographies of the Mongol venture through fascinating primary sources and internet resources.

NMC284H1 - Topics in Judaism and Feminism: Conflict, Competition, Complement

Hours: 24L

Agitation for change exists in religious practice worldwide in areas of access, status, inclusion, and egalitarianism. Traditional religion is often in conflict with egalitarian modernity. This sometimes results in difficulties with religious identification. This course will explore the interaction between feminism and Judaism. We will examine how Jewish law (halakhah) sometimes conflicts with ideas of egalitarianism particularly in legal disabilities for women such as divorce, lack of access to high-level Torah study, and discrimination in public religious roles. The traditional exemption of women from the obligation of Torah study had great impact on women’s religious responsibility and status. Various movements within Judaism competed in efforts to resolve these difficulties. In this course we will consider to what extent inclusion and egalitarianism have become complementary to traditional Judaism.

NMC316H1 - Cultural Encounter in Arabic Narrative

Hours: 36S

This course examines historical and literary texts that narrate Muslim and Arab encounters with cultural difference. Students will read travel narratives, autobiographies, and fictional texts that chronicle encounters with the Arab-Islamic world’s cultural "others." The course first examines travel narratives from the medieval Islamic period, including al-Sirafi’s travels to India and China, and Ibn Fadlan’s encounters with peoples inhabiting lands north of the Abbasid Empire, such as the Vikings. Students then consider how travel narratives in the modern period are transformed due to radical changes in the balance of power between Europe and the Middle East, first reading 19th-century travel narratives to Paris (al-Tahtawi), and then focusing on 20th-century texts that narrate the travels of Arab men and women to Europe and North America (Leila Ahmed, Sayyid Qutb, Nawal El Saadawi). Students will also read texts that depict encounters with non-Arabs within the modern Arab world, such as literary depictions of American oil workers in the Arab Gulf (Munif). All readings are in English translation.

NMC347H1 - Ancient Mesopotamia II: Assyrians and Babylonians

Hours: 24L

This course traces the political development and cultural history of Mesopotamia, from the territorial states of the Late Bronze Age to the world’s first empires in the 1st millennium BC, those of Assyria, Babylonia, and Achaemenid Persia. It also traces the subsequent history of Mesopotamia through the Seleucid and early Parthian eras, down to the end of cuneiform writing around the end of the 1st millennium BC. The course emphasizes the critical analysis of primary written sources (in translation) for reconstructing the history of the peoples of Mesopotamia. It also examines their achievements in literature, science and scholarship, and art and architecture.

NMC348Y1 - History of Iran: From the Sasanians to the Safavids

Hours: 48L/24T

This course studies the political, religious, and cultural history of greater Iran from Late Antiquity through the Islamic period to the early modern era. Following an overview of the history of the Sasanian empire, the course traces the progress of the Muslim Arab conquests of Iran in the 7th century and surveys the rise of regional Iranian dynasties that contributed to the formation of a new Perso-Islamic cultural identity. From the 11th–15th centuries Iran was dominated politically by Turkic and Turko-Mongolian dynasties, the most significant of which—the Ghaznavids, Seljuqs, Ilkhanids, and Timurids—are examined, including their patronage of Persianate literature and art. Particular attention is devoted to the Safavid polity established in the early 16th
century, which represented a watershed in the political and cultural history of Iran due to its adoption of Shi'ism as the state religion.

NMC352H1 - Ancient Egyptian Literature

Hours: 24L

This course focuses on the analysis of Ancient Egyptian literary texts from a variety of different genres. We will read examples of instructional and wisdom literature, poetry, literary narratives, and mythical tales. Issues such as how to best define terms like “literature” or “genre” for such an ancient culture will be discussed, and we will try to trace the development of literary texts in pharaonic Egypt—from the earliest attestations of coherent prose in the tombs of the Egyptian Old Kingdom (around 2500 BCE), via the full-blown Late Egyptian narratives of the Ramesside Period (around 1200 BCE), to instances of reiterations of the older genres in the Late and Ptolemaic Periods (to about 300 BCE). No knowledge of Ancient Egyptian is required; all texts will be read in translation.

Prerequisite: Any 0.5 credit on ancient Egypt offered by academic units within the Faculty of Arts & Science

NMC353H1 - Possible Worlds: Arabic Speculative Fiction

Hours: 24S

This course examines the relationship between political critique and the textual production of possible worlds, taking the Arabic literary canon as its example. Among the key concepts analyzed will be history, time, language, and selfhood. Students will experiment with appropriately using concepts from modern critical theory in the analysis of premodern and modern Arabic literary texts. Readings include Qur’anic apocalyptic suras, the philosophical novel Hayy ibn Yaqzan, Sindbad the Sailor and other travel narratives, al-Ma’mari’s satirical narrative of a visit to the afterlife, trickster tales of the maqama genre. We then turn to the merging of novelistic forms, selfhoods, and conceptions of political organization with those of the maqama in early novels by al-Muwaylihi and al-Shidyaq, ending with contemporary conceptual art and a dystopic novel.

NMC355H1 - Ottoman Empire: The Age of Reform

Hours: 24L

The course examines the history of the Ottoman Empire beginning with the inauguration of the first Western-inspired reforms at the end of the 18th century until the empire’s dissolution over the course of World War I. It explores the transformation of Ottoman politics, society,
and intellectual and cultural life during a period marked by active reform efforts and increasing contacts with the West, which had an impact on the empire’s diverse populations. Topics include the Nizam-i Cedid (New Order), the Tanzimat, the Hamidian era, the Young Turk revolution, constitutionalism, women, and the emergence of artistic expressions of modernity, such as theatre and painting. The course also provides insights into the Ottoman legacy in modern Turkey, the Middle East, and the Balkans, and seeks to situate the Ottoman experience in a global context.

**NMC356H1 - Anthropology of Islam**

**Hours:** 24L

This course introduces students to studies of contemporary Islam that are based on extensive periods of research with Muslim communities in their own languages using anthropological methods. What do such studies teach us about the varied ways Muslims engage with their religious tradition in the modern world? And how can such studies make us think differently about gender, economy, science, and secularism? We will discuss examples from Nigeria to Somalia, Egypt, Turkey, and Iran, to India, Pakistan, and Indonesia, to Canada, the US, and Europe. Students will apply anthropological methods learned in class to do research among a Muslim community in Toronto or online.

**NMC357H1 - Gender and Sexuality in Premodern Arabic Literature**

**Hours:** 24S

Students read translations of Arabic literary texts composed by women or dealing with gender and sexuality. Class discussion considers debates in the field about how to analyze these texts in their historical context and in a theoretically grounded manner. Topics addressed include: popular and elite narrative representations of gender and sexuality; pre-Islamic and Abbasid poetry and remarks composed by women, and their transmission in male-authored anthologies; hetero- and homoerotic obscenity and eroticism in Arabic poetry, epistles, and scientific texts; and literary representations of sexual minorities like eunuchs, intersex people, and *mukhannathūn* (people with apparently male biology who dressed and behaved as women, and had a specific social position at certain times).

**NMC358H1 - Gender and Sexuality in Modern Middle Eastern Cultures**

**Hours:** 24L

This course examines questions of gender and sexuality in the broader Middle East (Iran, Turkey, and the Arab world) from the colonial period (19th to early 20th centuries) to the present through readings of religious, cultural, historical, visual, and literary texts. We will begin the course by thinking critically about colonial and Orientalist legacies that continue to structure contemporary debates on representations of women, gender, and sexuality in the Middle East and North Africa. Students will read and analyze a range of primary historical texts written by Middle Eastern women reflecting the ways in which women of different backgrounds (religious, class, urban/rural) and generations have conceptualized and inhabited their gendered and sexual identities. Topics students will explore include the development of modern secular and religious feminist thought; cultural representations of gender, sexuality, and queerness; fictional texts that represent non-normative expressions of gender and sexuality; and critical approaches to theorizing gender and sexuality in the Middle East. All readings are in English translation.

**Prerequisite:** 3.0 credits in Humanities/BR= 1 or 2  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**NMC359H1 - Nomads in the Ancient Near East**

**Hours:** 24L

Using ancient archaeological and textual sources as well as modern ethnographies and political theories, this class takes a critical look at the role of mobile populations in Near Eastern history from the fourth to first millennium BCE, assessing modern perspectives as well as the ancient evidence.
**NMC360H1 - The Archaeology of the Biblical World I: The Bronze Age**

**Hours:** 24L

The archaeology of Syria-Palestine from prehistoric times until the end of the Late Bronze Age (ca. 1200 BCE), with special emphasis on the development of complex society, and inter-relations with the neighboring regions of Egypt and Syro-Mesopotamia. Attention will also be given to the history of archaeological research in the region, current field techniques and methods of archaeological analysis, and the relationship between archaeological evidence and contemporary written records, including the Hebrew Bible.

**Prerequisite:** 1.0 credit in Humanities/BR= 1 or 2
**Recommended Preparation:** NMC102H1/ NMC104H1/ NMC260H1/ NMC262H1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**NMC361H1 - The Archaeology of the Biblical World II: The Iron Age**

**Hours:** 24L

The archaeology of Syria-Palestine from the collapse of the Late Bronze Age until the Persian Period, with a special emphasis on the emergence of Israel and the small territorial nation-states of the eastern Mediterranean seaboard. Particular attention will be given to the relationship between the archaeological evidence and contemporary written records, including the Hebrew Bible.

**Prerequisite:** 1.0 credit in Humanities/BR= 1 or 2
**Recommended Preparation:** NMC102H1 or NMC104H1 or NMC260H1 or NMC262H1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**NMC362Y1 - Ancient Egyptian Sites**

**Hours:** 48L

Detailed examination of significant sites for the understanding of ancient Egyptian cultural development, encompassing the study of spatial organization, architecture, artifactual material, and archaeological evidence from each site.

**Prerequisite:** NMC343H1 and NMC344H1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1), Society and its Institutions (3)

**NMC363H1 - Archaeology of Mesopotamia**

**Hours:** 36L

A comprehensive survey of the origins of complex societies, urbanism and early states in Mesopotamia from the beginning of the Neolithic period to the end of the Achaemenid Empire. Learn about the rise of villages in the Fertile Crescent (Neolithic period, 10,000–5,000 BC); the foundation of cities and the invention of writing (Chalcolithic period, 5000–3000 BC); the formation of states headed by mighty kings (Early and Middle Bronze Age, 3,000–1,200 BC), and the splendour and awe that defined the empires of Assyria, Babylon, and Persia (1,000–330 BC). While focusing geographically on the archaeology and material culture of Iraq this course will also address sites and related archaeological materials from western Iran, eastern Syria, and south-eastern Turkey.

**Prerequisite:** NMC102H1
**Recommended Preparation:** NMC260H1, NMC262H1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Society and its Institutions (3)

**NMC364H1 - Art and Archaeology of Syria**

**Hours:** 36S

Discover the wonders of Syria’s past, from 10,000 year-old burials to the world heritage sites of Palmyra and the Citadel of Aleppo. Explore headless skeletons, royal marriages, desert castles and Roman streetscapes.

**Prerequisite:** 3.0 credits in any field
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**NMC367H1 - Archaeology & Architecture of Egyptian Monasticism**

**Hours:** 24L
Underlines the role of some Egyptian monasteries as active institutions carrying out numerous economic activities, and reveals the forces that enabled their survival and changing function. Exploration of these rich sites of cultural exchange, as manifested in their architecture and religious art and written material.

**Recommended Preparation:** NMC260H1, NMC262H1, NMC342H1, NMC368H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**NMC368H1 - Coptic Art & Archaeology**  
**Hours:** 24L

A survey of Coptic art, archaeology and architecture. The course will cover aspects of the religious, civil and daily life of the Copts: their houses, religious architecture, funerary monuments, art and artefacts.

**Recommended Preparation:** NMC260H1, NMC262H1, NMC289H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**NMC370H1 - History of Ancient Israel**  
**Hours:** 24L

The course is concerned with the political and cultural history of ancient Israel and the Hebrew people from origin stories set in the pre-monarchic period to early Roman Palestine. Israel is the land that bequeathed the Bible, the Jewish people, and hosted the birth of Christianity. Much of its history witnessed hostile interactions with imperial forces, from Babylon to Rome. While the focus is on key people, events, and essential chronology, the course also addresses critical questions concerning the use of sources (primary among which is the Hebrew Bible/Old Testament); differences between ancient history-writing and modern history-writing; and the assumptions and methods involved in reconstructing historical events.

**Prerequisite:** NMC104H1, NMC252H1  
**Recommended Preparation:** NMC101H1, NMC102H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**NMC373H1 - Modern Iran**  
**Hours:** 24L

This course covers the history of Iran from the early modern period to the present. Following an overview of the Safavid revolution and the empire it created (1501–1722), we examine the political upheavals experienced in post-Safavid Iran throughout the 18th century that culminated in the rise of the Qajar polity. This review of early modern Iranian history will set the stage for our investigation of the defining moments in the modern history of Iran, including the Constitutional Revolution (1905–1911), the subsequent toppling of the Qajar dynasty, and the establishment of Pahlavi rule under Reza Shah. We then focus on the events leading up to and including the Islamic Revolution of 1979 and the making of the Islamic Republic. The course concludes with an exploration of society and culture in contemporary Iran.

**Recommended Preparation:** NMC348Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**NMC374H1 - The Mamluks: from Slaves to Sultans**  
**Hours:** 24L

Engages with fundamental themes of Islamic civilization that played out in the Mamluk sultanate of Egypt and Syria: slavery, plague, the role of women, military patronage, global trade networks, the emergence of a “discourse” society, science and medicine, material culture and architecture, and the impact of Crusades and Mongol invasions.

**Prerequisite:** NMC273Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**NMC376H1 - History of Islamic Spain and North Africa (640-1492)**  
**Hours:** 24L

Muslim conquest of North Africa and Spain, history of Spain under Muslim rule to 1492. Attention given to institutional and cultural development, Islamic Spain’s relations with the Islamic east and neighbours in Europe.

**Prerequisite:** NMC273Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**NMC377Y1 - Ottoman Empire: The Classical Age**  
**Hours:** 48L
A survey of the Ottoman Empire from its late 13th–early 14th century origins as a border principality through the classical age of Mehmed the Conqueror and Süleyman the Magnificent when, as a mature Islamic empire, it ruled lands in Europe, Asia, and Africa, to the internal and external challenges it faced during the 17th and 18th centuries that forced it to either transform or decline. Attention is also paid to the immediate predecessors of the Ottomans—the Anatolian Seljuk Sultanate, the Mongols, and the principalities known as beyliks that came into being with the decline of the Seljuks and led to the rise of the Ottomans. Coverage includes topics in Ottoman institutions, economy, society, and culture.

Exclusion: NMC377H1
Recommended Preparation: NMC273Y1, NMC274H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC378H1 - Modern Arab History

Hours: 36L

A thematic treatment of the Arab lands of the Middle East and North Africa from 1700 onward, focusing on the Ottoman and colonial periods.

Prerequisite: NMC278H1 and permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC380H1 - Religion in the Ancient Near East

Hours: 48S

Primary sources from Mesopotamia, Syria and the Levant reveal profound awareness of the human condition. What do they tell us about religion in the ancient Near East, and why do Judaism, Christianity and Islam share some stories? Takes a critical approach to the ways we read texts and reconstruct beliefs.

Prerequisite: 3.0 credits in any field
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NMC381H1 - Modern Islamic Thought

Hours: 24L

Survey of major intellectual trends in the Islamic tradition, particularly those identified with Middle Eastern Muslim thinkers, from the early 19th century to the present. Topics include reformism, modernism, hermeneutics, feminism, Islamism, and liberal and progressive trends in contemporary Muslim thought. Readings in English translation.

Prerequisite: NMC103H1
Recommended Preparation: NMC278H1, NMC283Y1, RLG204Y1/RLG204H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NMC382Y1 - Mummies, Myth and Magic: The Religion of Ancient Egypt

Hours: 72L

Religious belief and practice in ancient Egypt. The course will focus on gods and mythology, which will be studied through primary sources in translation.

Prerequisite: NMC101H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NMC384H1 - Life Cycle and Personal Status in Judaism

Hours: 24S

This course will examine certain aspects of status and family law in Judaism, as well as Zoroastrianism, Eastern Christianity, and Islam. We will review some literature in legal theory to test its applicability to religious-based law. Our main topics include virginity (marital age, proof of virginity or its absence, rape or seduction of virgins, economics and theology of virginity); menstrual laws (impurity, punishment, sexuality, purification); mysticism (practitioners, purity requirements, theology); and sexuality (marriageability, prohibited partners, sex acts). Sectarian approaches to these legal issues will be examined, for example, how biblical law is interpreted in Qumran, by the rabbis, and how these topics are addressed by Zoroastrian law, the Eastern Church Fathers and the Four Schools in Islamic law.

Prerequisite: Completion of 4.0 credits in Humanities/BR=1 or 2
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
NMC385H1 - Islamic Law in Historical Perspective and Contemporary Debate

Hours: 24L

The course surveys the history, theory, and doctrines of Islamic law, and addresses issues that are at the center of public debate across the world. Students will closely read primary sources, provide oral and written responses, and reflect on their own positionality vis-à-vis debates on Islamic law. The course introduces students to the dynamics of Islamic legal reasoning in a historical and comparative perspective.

Prerequisite: NMC103H1/RLG204H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NMC386H1 - Muslims, Christians, and Jews in the Ottoman Empire

Hours: 24L

Although ruled by a Muslim dynasty and frequently characterized as an Islamic empire, the Ottoman state was inhabited by diverse religious and ethnic populations, many of them non-Muslim. This course examines how the Ottoman Empire governed and organized its subjects, Muslims and non-Muslims alike, of various ethnic backgrounds. It explores the relations among these communities and their interactions with the state, raising questions about tolerance, co-existence, conflict, loyalty, and identity. By looking into a selection of topics from the wide territorial span of the Ottoman Empire (Anatolia, the Balkans, and the Arab Middle East) the course seeks to provide insights into the organization, functioning, and transformation of a multi-confessional state and society in the premodern and modern eras.

Recommended Preparation: NMC241H1, NMC278H1, NMC355H1, NMC377Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC394H1 - Persianate Art and Architecture

Hours: 24L

Covering art and material culture in the eastern Islamic lands from the late 13th century to the modern period. Objects from the collections of Islamic art in the Royal Ontario Museum will also be studied.

Prerequisite: 1.0 credit from FAH or NMC in medieval art/history/culture
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC395H1 - Iconography of the Art and Material Culture of the Islamic World

Hours: 24S

The art and material culture of the Islamic world is rich in iconography - from Persian paintings to Afghan war rugs - with complex layers of meaning that are not necessarily understood at first glance. Such imagery can be comprehended through numerous lenses, from pre-Islamic concepts and literary themes to politically-driven motivations or religious beliefs and practices. Through a series of case studies of examples of painting, ceramics, metalwork, textiles, and contemporary art, the course examines the meanings behind the iconography on objects from across the Middle East and Central Asia, dating from the medieval period to the present day.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC396H1 - The Art of the Qur’an

Hours: 24L

The holy Qur’an, believed by Muslims to be the Word of God, has been a source of creative and artistic inspiration for Muslims around the world and through the ages. The language and interpretation of the Qur’an have engaged the minds of artists, craftspeople, and patrons of the arts as much as the minds of theologians and jurists. This course explores expressions of the Qur’an through a wide range of visual and material culture—from illuminated manuscripts to the use of the sacred text on coins, amulets, architecture, ceramics, metalwork, textiles, and modern and contemporary works of art. The course will include visits to the Royal Ontario Museum to examine Qur’ans in its Islamic collection.

Prerequisite: Completion of 4.0 credits in Humanities/BR=1 or 2
Recommended Preparation: Knowledge of Arabic or the Arabic script beneficial though not essential.
Breadth Requirements: Creative and Cultural Representations (1)
NMC445H1 - Sacred versus Secular Space: Mesopotamian Architecture in Context

Hours: 36L

When and where did the first buildings come about? Learn how some 10,000 years ago, the first permanent dwellings were constructed in the ancient Near East. Discover how the agricultural revolution and the domestication of animals resulted in the formation of villages during the Neolithic period (9,000–5,000 BC) with house types that grew in size and complexity. Observe how religious architecture evolved from simple, household-based cultic installations to large public complexes that dominated cities during the Uruk and Early Dynastic periods (4,000–2,300 BC). See how the rise and manifestation of powerful political leaders is reflected in the development, layout and decoration of their palaces. Beyond a typological approach to architecture, this course will also address challenges created by environmental conditions and limitations in available building materials. While focusing on Mesopotamia and Syria, it will also incorporate examples from Iran, Anatolia and the Levant.

Prerequisite: Students in other areas of study are encouraged to contact the Department.

NMC446H1 - The Babylonian City

Hours: 24L

Ancient Mesopotamia is well known as the birthplace of some of the world’s earliest cities. This course investigates the physical form of the city in 2nd and 1st millennium BC Babylonia (southern Mesopotamia) as the setting for the daily activities of its inhabitants. It examines the key components of the Babylonian city: houses; neighbourhoods and city districts; palaces; temples and ziggurats; streets and alleys; shops and markets; city walls, gates, and moats, as well as canals, orchards and gardens. The course emphasizes the reading and critical evaluation of written sources in translation, including selected royal inscriptions, topographical texts, and legal and administrative documents. It also considers ways of approaching the study of ancient cities and addresses the integration of textual and archaeological evidence. The focus is on investigating the relationship between Babylonian city form and contemporary social structure.

Prerequisite: 9.0 credits in any field
Recommended Preparation: NMC102H1, NMC346H1/NMC347H1
Breadth Requirements: Society and its Institutions (3)

NMC447H1 - The Neo-Assyrian Empire

Hours: 24L

The course offers a detailed introduction to the Neo-Assyrian empire and how it functioned, based on study of a representative selection of written sources (in translation). It examines Assyrian kingship, imperial administration, and daily life as reflected in the texts, including the royal inscriptions, official correspondence, astrological reports, and everyday legal and administrative documents. The course studies a cross-section of Assyrian society taking into account various perspectives, from the king and his highest officials and court scholars to the lowest-ranking subjects and deportees. It also investigates the economic basis of the Assyrian empire, including taxation and tribute, booty from military conquest, specialist craft production, and agriculture. The course emphasizes the historical evaluation and interpretation of the primary written sources.

Prerequisite: 9.0 credits in any field
Recommended Preparation: NMC102H1, NMC346H1/NMC347H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC449H1 - Mesopotamian Society and Economy

Hours: 24L

This course presents a thematic overview of Mesopotamian society and economy from the third millennium to the 1st millennium BC. The emphasis is on critical evaluation of the primary sources (in translation), such as everyday legal contracts and the so-called "Laws". It also explores different approaches to the study of ancient social structures and economies. Topics include: freedom, slavery, and social class; ethnicity; women, children, and the elderly; marriage, family, and household; crime and punishment, and the judicial system; the priesthood; palace and temple, private and state; merchants and trade; money, markets, and prices, and the question of whether there was a market economy; labour and wages; land ownership and tenure, and wealth and social inequality.

Prerequisite: 9.0 credits in any field
Recommended Preparation: NMC102H1, NMC346H1/NMC347H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
NMC450H1 - Research Seminar on Ancient Jewish Literature

Hours: 24S

A seminar focusing on the critical analysis of the Hebrew Bible and related ancient Jewish texts. Literary genre and critical topics will vary according to instructor's research interests. Focus will be given to developing research skills by working with accepted critical methodologies. Not eligible for CR/NCR option.

Prerequisite: Permission of the instructor.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

NMC452H1 - Iranian Modernity

Hours: 36S

This course explores competing conceptions of Iranian modernity within a comparative historical framework on "multiple modernities." A major theme is the exploration of the temporality and historicity in discussions of Iranian modernity.

Prerequisite: Completion of 9.0 credits

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

NMC461H1 - The History and Archaeology of the Horn of Africa and South Arabia

Previous Course Number: NMC461Y1

Hours: 24S

The cultures of the Horn of Africa and South West Arabia, separated by the Red Sea, have long been intertwined. This course explores the history and archaeology from the emergence of the hominids in Ethiopia, to the rise of the Sabaean and Axumite kingdoms, until the Middle Ages, highlighting their interactions and the roles they played in the development of their respected cultures.

Prerequisite: NMC260H1 or NMC262H1

Exclusion: NMC461Y1

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

NMC462H1 - Polarized-light Microscopy in Archaeology I: Foundations

Hours: 24L/24P

This course provides students with training in the use of polarized-light microscopy in the examination of archaeological materials, particularly pottery (ceramic petrology). Students will apply the knowledge they gain from lectures to hands-on work with materials in the lab, covering instruction in crystallography, optics, mineralogy, lithology, and other aspects of the petrology of ceramics and other materials. Labs comprise eight three-hour sessions during the term, working with the polarized-light microscope to examine and analyze thin-sections. No prior knowledge of geology is required. Students should plan to take NMC470H1 Polarized-light Microscopy in Archaeology II: Applications, in the following term to complete their training.

Prerequisite: NMC264H1 or permission of the instructor.

Exclusion: NMC462Y1

Distribution Requirements: Social Science

Breadth Requirements: The Physical and Mathematical Universes (5)

NMC463H1 - Warfare: The Archaeology of Conflict in the Ancient Near East

Hours: 36L

When did humans start fighting each other, and how far back can we trace the history of warfare? This course investigates the origin, nature, and manifestation of military conflicts in the ancient Near East and studies their impact on political, economic, and social developments in the region. Following a review of the relevant terminology (e.g., "warfare" vs "skirmish") in archaeological literature, we will investigate the archaeological and historical data for a time span that extends from 9,000 to 300 BC. Evidence from archaeological sites (notably violent destructions of ancient settlements) will be compared with available artistic representations of warfare in sculpture, reliefs, inlays, and glyptics, complemented by textual accounts. While the course focuses on Mesopotamia, evidence from Syria, Turkey, Iran, the Levant, and Egypt will also be included.

Prerequisite: NMC260H1

Recommended Preparation: NMC102H1, NMC363H1

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)
NMC464H1 - The Archaeology of Stuff at the ROM

Previous Course Number: NMC369Y1
Hours: 36P

Hands-on analysis of actual materials from the Middle and Near East, including Egypt, Iraq, Iran, Syria, and Turkey. Students learn the techniques by which archaeologists understand objects from the past: what they are made of, how they were made, and what they reveal about the people who made them.

Prerequisite: NMC264H1
Exclusion: NMC369Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC465H1 - Ceramic Analysis

Hours: 6P/24S

A survey of methods of classification and analysis (form, fabric and style) involved in the study of archaeological ceramics, and the use of ceramics to infer patterns of production, distribution, and social organization; linking research questions with appropriate analytical techniques.

Prerequisite: 9.0 credits in any field
Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)

NMC466H1 - Near Eastern Ceramics

Hours: 6P/24S

An introduction to the basic corpus of Near Eastern ceramics, from the invention of pottery production in the Neolithic until the Persian period, utilizing existing collections at the University and in the Royal Ontario Museum.

Prerequisite: 9.0 credits in any field
Recommended Preparation: ARH312Y1/NMC264H1/NMC360H1/NMC361H1/NMC464H1/NMC465H1
Distribution Requirements: Humanities

NMC467H1 - Seminar in Egyptian Archaeology I

Hours: 24S

Seminar focuses on the social and cultural development of Egypt from the Predynastic Period through the Middle Kingdom, engaging with major theories regarding social complexity, state formation, urbanism, social organization, and regionalism. An independent research project and hands-on experience with artifacts at the ROM are important features of the course.

Prerequisite: NMC101H1 or NMC343H1. Students who do not meet these prerequisites are encouraged to contact the Department.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC468H1 - Seminar in Egyptian Archaeology II

Hours: 24S

Seminar focuses on the social and cultural development of Egypt from the Middle Kingdom through the Ptolemaic Period, engaging with major theories regarding urbanism, ethnicity, core-periphery relationships, cultural interaction, and social organization. An independent research project and hands-on experience with artifacts at the ROM are important features of the course.

Prerequisite: NMC101H1 or NMC344H1. Students who do not meet these prerequisites are encouraged to contact the Department.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NMC469Y1 - Medieval Middle Eastern Ceramics

Hours: 72S

An introduction to the ceramics of the Middle or Near East from the time of Alexander until recent times. A particular emphasis will be the elite glazed wares of the mediaeval and Islamic periods. Apart from providing a history of the production of ceramics and their social and archaeological context, this course is intended to train archaeologists and art-historians in the fundamental field recognition and identification of the various types and their production origins, and the course will rely heavily on the collections of the ROM.
Prerequisite: NMC260H1, NMC262H1, and at least one other 0.5 credit 300- or 400-level course in archaeological materials

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1), Society and its Institutions (3)

### NMC470H1 - Polarized-light Microscopy in Archaeology II: Applications

**Previous Course Number:** NMC462Y1

**Hours:** 24L/24P

This course explores further applications of polarized-light microscopy in the examination of archaeological materials, particularly pottery (ceramic petrology). The focus is on foundational research and case-studies of materials from around the world with particular attention to material culture from the Middle East, Central America, and East Asia, where University of Toronto researchers have worked, ranging in date from the Neolithic period to the modern day. Class and lab discussions will include critical examination of the application and integration of ceramic petrology in archaeological research design and how petrology can address relevant research questions successfully. Labs comprise eight three-hour sessions during the term, working with the polarized-light microscope to examine and analyze thin-sections.

**Prerequisite:** NMC462H1

**Exclusion:** NMC462Y1

**Distribution Requirements:** Social Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

### NMC471H1 - Advanced Topics in Near and Middle Eastern Civilizations

**Hours:** 24S

An advanced seminar organized around readings on a topic selected by the instructor.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

---

### NMC472H1 - Theory & Method in Middle East Studies

**Hours:** 24S

Examines current theoretical and methodological trends in the study of the Near/Middle East. A seminar course, it consists of presentations, discussions, lectures, guest speakers, and documentaries. No previous knowledge of methodology required. Special attention will be paid to the politics, culture, political economy, gender, and ethics of various research practices. Intended for 4th year students only.

**Prerequisite:** Permission of the instructor

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

### NMC473H1 - Intellectuals of the Modern Arab World

**Hours:** 24S

The course is designed to re-examine the role of intellectuals in the Arab world and political events that shaped their thinking. It introduces the life and thought of some leading thinkers of the Arab world and relates their thought to the lived experience of political, social, economic and cultural change in the Middle East.

**Prerequisite:** 1.0 credit from NMC278H1, NMC377Y1, NMC378H1

**Recommended Preparation:** Fluency in reading Arabic

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

### NMC474H1 - The Archaeology of Death

**Hours:** 36S

This is an intensive education in the archaeology of death. Working as a study group, the participants in this class will examine in detail the primary archaeological data for mortuary practices in the third millennium in the Big Bend region of the Euphrates River.

**Prerequisite:** ANT200Y1 or NMC260H1 or NMC262H1

**Recommended Preparation:** ANT334H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

### NMC475H1 - Orientalism & Occidentalism

**Hours:** 24S

This course probes the contemporaneous formation of modern Oriental Studies in Europe and the emergence of discourses on Europe (Ifraj/Farang) in the Middle East from the eighteenth century to the present. Special emphasis will be devoted to encounters between scholars in Western Europe, Iran, India, and the Ottoman Empire. This seminar-style course explains that Orientals gazed
and returned the gaze, and in the process of cultural looking, they, like their Occidental counterparts, exoticized and eroticized the Farangi-Other. In the interplay of looks between Orientals and Occidentals, there was no steady position of spectatorship, no objective observer, and no aperspectival position. Intended for upper year students.

Prerequisite: Permission of the instructor.
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC476H1 - Politics of Archaeology in the Modern Middle East

Hours: 24S

This course examines the role nineteenth and twentieth-century archaeology played in Middle Eastern politics, the culture of colonialism and in nationalist struggles. The course will first familiarize the students with the diplomatic and intellectual context of the formation of archaeology as a field of study in Europe and analyse the role archaeology played in the production of knowledge about the Middle East. Next, the course will examine the archaeological practices on the ground (and underground) and inquire what happens in the contact zone between foreign and local archaeologists. Finally, we will trace the ways in which emergent nationalist discourse challenge, appropriate and imitate the historical narratives of Western archaeology.

Prerequisite: Permission of instructor is required.

NMC477H1 - Modern Turkey

Hours: 24S

The course examines the history of modern Turkey from the beginning of the 20th century until the present day. Topics include transition from empire to nation-state; the establishment of the Turkish republic; the Kemalist reforms and legacy; nationalism and nation-building; Islam and politics; gender and sexuality; as well as recent political, social, and cultural developments. The course seeks to situate the history of Turkey in a broader regional context and introduces students to some historiographical debates. In seminar discussions, students are encouraged to explore topics from a critical post-nationalist perspective and to think about current events in a historical context.

Recommended Preparation: NMC278H1, NMC355H1, or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC478H1 - Modern Arab Societies

Hours: 24S

A weekly seminar built around thematic readings of social and economic history of the modern Arab world. Sometimes, the course is geographically extensive, encompassing the predominantly Arabic-speaking lands of North Africa and the Middle East from Morocco in the west to Iraq in the east. At other times, the course focuses on a more narrowly defined geographic region—one country or a group of countries in the Arabic-speaking lands. Readings and discussions emphasize the experiences of broad sectors of the population, not just of elites. This framework of “history from below” also invites scrutiny of historically-marginalized populations (“subalterns”), or at least of silences in the literature about these populations.

Prerequisite: NMC378H1. Students who do not meet the prerequisite are encouraged to contact the Department.
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC479H1 - Nationalism in the Arab World

Hours: 24S

A seminar that critically examines the types and varieties of national expression in Arab societies of the Middle East and North Africa, through a reading of common texts and students’ individual research projects.

Prerequisite: NMC378H1 and permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

NMC480H1 - Structural Development of the Iranian Languages

Previous Course Number: NML463H1
Hours: 24S

This interdisciplinary course focuses on the structural development of the Persian language from Old Persian (6th century BC) to Modern Persian (7th century AD) with emphasis on word formation and grammar. The course consists of two main parts: The first focuses on an overview of the Old Persian and Middle Persian languages, their linguistic features and writing systems and the factors that changed Old Persian to Middle and then Modern Persian; the second part concentrates on the structural analysis of Iranian languages, including Dari,
Tajiki, Balochi, Kurdish, Pashto, and others. The lectures are based on texts and articles written by theoretical linguists, historians, sociolinguists, descriptive and historical linguists. The course also examines the role of language in maintaining cultural identity and demonstrates the type and mechanism of the development of Iranian languages in general and of Persian in particular.

**Prerequisite:** Completion of 9.0 credits in Humanities/BR= 1 or 2

**Exclusion:** NML463H1

**NMC491H1 - Mesopotamian Material Culture: Art versus Artifact**

**Hours:** 36L

What is an artifact, and to what degree does it represent art? At what point in the evolution of ancient human society does art emerge? What does it express, what is its purpose, and who are the agents that create and propagate it? This course addresses these questions by examining artifacts from the Palaeolithic to the Iron Age (15,000-300 BC). Students will learn to categorize works of ancient Near Eastern art using descriptive (materials, size, object type) as well as interpretive (iconography, style, themes) parameters, in order to engage critically with art-historical studies. Techniques of reading visual narratives will be exemplified by discussing selected examples in detail, showing ways of identifying a messenger and the message that they are trying to convey, the selective inclusion or omission of elements within a visual narrative, and the possible propagandistic intent in doing so.

NML260Y1 - Introductory Persian

Hours: 72L/24T

This course is for students who have minimal or no prior knowledge of Persian focusing on reading, writing and conversation. Students start by learning how to write and pronounce the sound and alphabet, how to connect letters to form basic vocabulary in Persian in order to express basic ideas orally and in writing; then they develop their language comprehension through expanding their vocabulary and grammar. By the end of the course, students' skills in listening, speaking, reading, and writing in Persian improves and they should be able to read, write and translate sentences in Persian at intermediate low level.

Exclusion: Native speakers, PRS210Y5, PRS210H5, PRS211H5
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML270Y1 - Introductory Turkish

Hours: 96L

This course is designed to provide an introduction to Turkish for learners with no previous experience with the language. A variety of speaking, listening, reading, and writing activities will be included to develop both spoken and written language skills. By the end of the course, students will be able to carry out basic conversations in Turkish in everyday social encounters, have a grasp of the basics of the Turkish grammar, and understand elementary texts such as simple excerpts from news articles or literary works. They will also have gained a basic understanding of the cultural contexts in which Turkish is spoken.

Exclusion: Native speakers

NML320H1 - Aramaic Bible Translations

Hours: 36S

This course is an intensive study of various Aramaic Bible translations (Targumim) to the Pentateuch: Onkelos, Pseudo-Jonathan, Neophyti, Samaritan and Syriac (both transliterated into Hebrew letters), and Fragment Targumim. A comparative study of the Targumim will be made in reference to vocabulary, syntax, verb usage, and translation strategies. We will address their relationship to the Palestinian midrashim. Students will learn to use the online Comprehensive Aramaic Lexicon and the relevant dictionaries and grammars. The texts studied will be from legal sections of the Pentateuch, generally from Deuteronomy on levirate marriage or war captives, Exodus on abortion and personal injury, as well as narrative sections from Genesis such as the Garden of Eden, the binding of Isaac, and the accounts of the Matriarchs.

Prerequisite: Intermediate-level Hebrew or experience in Babylonian Talmud or NML220Y1.
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NML340Y1 - Intermediate Middle Egyptian

Hours: 72S

A continuation of NML240Y1, in which the student is exposed to a wide range of hieroglyphic texts in the Middle Egyptian dialect. Sources of historical, literary, religious, and economic significance will be studied. The
grammar and syntax covered in NML240Y1 are reviewed intensively.

**Prerequisite:** NML240Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### NML350H1 - Intermediate Biblical Hebrew I

**Hours:** 24S

A continuation of the study of ancient Hebrew grammar and texts. Focus is given to covering a wide variety of genres, e.g., narrative, chronicle, genealogy, oracle, prayer, hymn, and proverb.

**Prerequisite:** NML250Y1

### NML357H1 - Legends of the Jews (Aggadah)

**Hours:** 24S

This course is an introduction to the exegetical methods of the rabbinic sages in their analysis of biblical texts, with special attention to issues of intertextuality. After a quick overview of the genres of midrashic literature, we shall examine the midrashic methods used to transition from the biblical text to the midrash. Our main focus will be on Original Sin in the Garden of Eden and its repercussions. Our primary texts will be Bereishit Rabbah, Avot de Rabbi Natan, and Alphabeta deBen Sirah. We shall follow these midrashim in other midrash collections such as Midrash HaGadol, Tanhuma, Bereishit Rabbati, and Aggadat Bereishit. The motif of Original Sin has had significant reverberations in Judaism and Christianity and societies influenced by these traditions.

**Prerequisite:** Intermediate-level Hebrew (Modern or Biblical)  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

### NML358H1 - Middle Hebrew: Mishnah and Tosefta

**Hours:** 24S

This course introduces Mishnah and Tosefta which are two of the three foundational documents of Middle Hebrew I from the Tannaitic period ending circa 250 CE in the Galilee. In addition to studying specific features of this level of Hebrew (e.g. syntax, grammar, vocabulary), we shall examine these compositions independently and analyze their interaction (textuality and intertextuality). Students will read recent scholarly literature on these documents and their relationship to each other and to orality. Students will be introduced to the manuscripts of these documents and the variant readings will be studied philologically. Decisions on original readings will be made.
Finally, we shall explore redaction and source critical issues allowing identifications of anonymous statements with specific authorities (sages). The Tractate may vary from year to year.

Prerequisite: Intermediate Hebrew (Modern or Biblical)
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NML359Y1 - Babylonian Talmud

Hours: 72S

This course introduces the student to Talmudic texts through selections from a particular tractate for representative study. We shall study the Mishnah of the chapter in preparation for the Talmud. Recognition of the dialogic structure of the legal discussions centered on the Mishnah and its elucidation is emphasized. The classical commentaries (Rashi, Tosafot, R. Hananel), the use of dictionaries, concordances, biographies of sages, parallels and other sources will gradually become familiar to the student as aids in understanding the text under consideration. A brief presentation of the essential features of Babylonian Aramaic will be included in the course to facilitate study. Students will also be taught to make use of the Bar Ilan Responsa Project, the Lieberman database, and the Friedberg Jewish Manuscript Society database. We shall also discuss redactional issues as they appear.

Prerequisite: Intermediate-level Hebrew or experience in Babylonian Talmud
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NML360Y1 - Intermediate Persian

Hours: 96L

This course is an intermediate/advanced level of Persian language for students who passed NML260Y1 or demonstrate commensurate Persian skills. The course continues to develop students' Persian language knowledge by focusing on more complex readings, writing, grammatical structure, translation, audio/visual, and conversational activities such as group discussion, language games, movies, dialogue, and playing roles at an advanced level. By the end of this course, students are able to reach the intermediate high/advanced level of proficiency in Persian. The course also serves as preparation for courses on classical and contemporary Persian literature.

Exclusion: Native speakers, PRS310H5
Recommended Preparation: NML260Y1 and/or adequate knowledge of modern Persian
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML362Y1 - Middle Persian (Pahlavi)

Hours: 48L

An introduction to the grammar and syntax of Middle Persian, or Pahlavi, language; the special script it was written in; and the connections of Pahlavi to Old Persian and New Persian languages. Knowledge of Pahlavi provides access to the most important Zoroastrian religious texts, and the epic and wisdom literature composed during the period of the Sasanian empire (3rd–7th centuries CE) and early Islamic Iran (8th–10th centuries CE). Students will read excerpts, in the original Pahlavi, from such works as Arda Wiraz Namag (Book of the Righteous Wiraz, describing his journey to heaven and hell), Karnamag i Ardakhshir i Pabagan (Chronicle of Ardakhshir, Son of Pabag, narrating the deeds of the first Sasanian king), and Bundahishn (Primordial Creation, on Zoroastrian cosmology).

Recommended Preparation: NML260Y1/NML360Y1/NMC259H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML370Y1 - Intermediate Turkish

Hours: 96L

This course is designed for students who have already completed NML270Y1 Introductory Turkish or have an equivalent level of proficiency in Turkish. It aims to expand students' communicative skills, grammatical knowledge, and vocabulary. A variety of intermediate-level speaking, listening, reading, and writing activities will be included to further develop both spoken and written language skills. By the end of the course, students will be able to read, understand, and translate various authentic texts of intermediate difficulty. They will be able to write short essays and talk about a wide range of general topics. They will also have gained a deeper understanding of the cultural contexts in which Turkish is spoken. The course also serves as a preparation for the advanced study of Turkish.

Prerequisite: NML270Y1 or permission of instructor based on previous language knowledge.
Exclusion: Advanced speakers of Turkish
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML380H1 - Introduction to Ge'ez (Classical Ethiopic)

Hours: 36L
This course covers the essentials of Ge'ez (Classical Ethiopic) grammar, and introduces students to Ge'ez texts of elementary to intermediate difficulty. Designed for students with no previous knowledge of Ge'ez.
Prerequisite: NML110Y1/NML220Y1/NML250Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML381H1 - Intermediate Ge'ez

Hours: 36L
This course continues the study of Ge'ez (Classical Ethiopic) grammar and progresses to a survey of classical Ge'ez literature. Linguistic connections to Amharic and Tigrinye will also be introduced.
Prerequisite: NML380H1 or permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML405Y1 - Intermediate Akkadian

Hours: 48S
(Offered in alternate years)
Prerequisite: NML305Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML410Y1 - Advanced Standard Arabic

Hours: 96S
This course assumes active knowledge of the content covered in NML310Y. Its goal is to strengthen the students reading and writing skills, refine their knowledge of syntax and morphological patterns, and enrich their cultural background. This is achieved through analysis of sophisticated authentic texts covering a wide range of genres. In addition, Classical Arabic literary texts will be incrementally introduced. By the end of the course, students are expected to reach a superior level of proficiency.
Prerequisite: NML310Y1 or permission of instructor.
Exclusion: Native speakers.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML411H1 - Media Arabic

Hours: 24S
This course familiarizes advanced students of Arabic with structural properties, styles, and discourse features of the language used in the Arabic media. Class time is devoted to analysis of authentic texts covering a wide range of topics and drawn from various online media outlets.
Prerequisite: NML310Y1 or adequate reading knowledge of Arabic.
Exclusion: Native speakers of Arabic must obtain permission of instructor.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML412H1 - Adab and Arabic Literary Prose

Hours: 24L
This class surveys the rich and varied literary prose tradition in the Arabic language to the Mamluk period. These works are frequently referenced in modern Arabic literature, in addition to being beautiful and intellectually challenging in their own right. We will read essayistic epistles, advice guides, debates, sermons, and narrative works of a variety of genres, including, maqamat, anecdotes, and fables. All readings are in the original Arabic. The course focuses equally on developing reading skills specific to classical Arabic texts, and on developing an ability to analyze the themes, literary techniques, generic features, and ideas within those texts. We also consider the historical development of a distinct branch of knowledge called adab, that canonized many of these works.
Prerequisite: NML310Y1. Heritage speakers are encouraged to take this class.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
**NML413H1 - Premodern Arabic Poetry**

*Hours: 24L*

The main focus for this course is reading poems by a variety of poets in the original Arabic. Class discussion focuses on how to decipher the lines of poetry using appropriate reference works, as well as close reading, rhetorical figures, historical context, and the shifting aesthetics of various poetic movements. Weekly exercises build to the study of the Arabic metric system. The course usually addresses a specific theme: for example, early Abbasid love poems selected to study the development of the concept of a culturally refined individual (*zarif*) in the context of the "rhetorical style" (*badi‘*) of "new" (*muhdath*) poetry.

**Prerequisite:** NML310Y1. Heritage speakers are encouraged to take this class.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

**NML415H1 - The Arabic Short Story**

*Hours: 24S*

This course examines the origins and development of the modern Arabic short story as a literary genre by reading selected works in Arabic of major figures in the genre. The course historicizes the emergence of the short story, exploring the genre’s consolidation as a major literary form in Arabic in the early 20th century. As part of an exploration of modern narrative in Arabic, students will read literary criticism that theorizes the emergence of modern Arabic narrative prose, paying close attention to questions of language, form, style and theme. The course also focuses on issues such as innovations in narrative technique, plot structure, complexity of characterization, and point of view. Authors include Mahmud Tahir Lashin, Yusif Idris, Zakariyya Tamir, Ghada al-Samman, Hanan al-Shaykh, and Fu’ad al-Takarli.

**Prerequisite:** NML220Y1 or permission of instructor.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

---

**NML420Y1 - Jerusalem Talmud**

*Hours: 72S*

The Talmud of the Land of Israel, also called Talmud Yerushalmi or Palestinian Talmud, is written in a mixture of Jewish Western Aramaic and Middle Hebrew. It is the principal document of the Land of Israel in Late Antiquity. The course examines the legal argumentation, terminology and language which differ from those of the Babylonian Talmud. Recognition of the dialogical structure of the legal discussions concerning the Mishnah and its elucidation will be emphasized. Terminology, grammar, and syntax of Western Aramaic will be addressed. We shall also investigate when the text uses Hebrew versus Aramaic. Students will be taught the use of the Bar Ilan Responsa Project and the Lieberman bibliographic database. Close attention will be paid to its relationship to Tosefta.

**Prerequisite:** Intermediate-level Hebrew (Modern or Biblical)

**Recommended Preparation:** NML220Y1/NML320H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1), Thought, Belief and Behaviour (2)

---

**NML421Y1 - Classical Syriac**

*Hours: 48S*

This course is primarily a reading course in Syriac literature with reference to specific points in grammar and syntax as contrasted with Aramaic. The texts are read with reference to the history of Syriac literature.

**Prerequisite:** NML220Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

---

**NML440H1 - Ancient Egyptian Historical Texts**

*Hours: 36S*

This is an advanced language seminar that introduces the student to the analysis, in terms of both language/grammar and content, of Ancient Egyptian texts of historical significance. Texts from the periods of the Old Kingdom up to the Late Period will be studied, and all texts will be read in the (mostly Middle Egyptian) original. Particular attention will be paid to the cultural and social context of the texts, and questions such as how to best define “historical texts,” and to what extent literary texts may be used as historical sources, will be discussed.

**Prerequisite:** NML340Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)
NML441H1 - Ancient Egyptian Religious and Funerary Texts

Hours: 36S

This is an advanced language seminar that introduces the student to the analysis, in terms of both language/grammar and content, of texts that elucidate ancient Egyptian religious conceptions. Texts from all periods of Pharaonic history will be studied and all texts will be read in the original. While the focus will be on texts from funerary contexts, for which the most complete sources can be found, cultic, magical, and theological sources will also be studied.

Prerequisite: NML340Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML450H1 - Advanced Biblical Hebrew

Hours: 24S

Continuation of the study of Biblical Hebrew language. Combination of reading more advanced texts and Hebrew composition exercises. Introduction to the standard reference works for advanced study of the phonology, morphology, syntax, and semantics of Biblical Hebrew.

Prerequisite: NML350H1 or NML351H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML452H1 - Halakhic Midrashim

Hours: 36S

Halakhic Midrash, the rabbinic continuation of biblical law, is written in Middle Hebrew I and is one of the three major literary creations of the Tannaitic period. It is an important part of ancient Jewish biblical interpretation which often differs from sectarian interpretation as found in Qumran. A study of the terminology and methodology indicates the existence of two midrashic systems: Devei R. Akiba and Devei R. Ishmael. This course familiarizes students with the methodology and terminology of these two midrashic schools. We will examine the scholarly debate concerning the exact time in which the halakhic midrashim were composed and redacted as well as the transfer of terminology and material between the schools. Sections from all the midrash halakhah (Mekhiltot, Sifra and Sifre) are studied and compared to other tannaitic materials.

Prerequisite: Intermediate-level Hebrew (Modern or Biblical)
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

NML455H1 - Modern Hebrew Poetry

Hours: 24S

This course is designed for the advanced students of Modern Hebrew who wish to pursue the study of Hebrew literature. We will examine the way in which this literature relates to ideas of land, homeland, peoplehood, and religious identities. We will continue with Yehuda Amihai’s poetry with particular attention to his love poetry. Our major concentration will be on Ḥaim Naḥman Bialik’s poetry and include at least one of his major epic poems. We shall focus on what makes Amihai and Bialik national poets. Our method of poetic analysis will include an intertextual examination of the sources of poetic inspiration. Students will be taught to use the Bar Ilan Responsa Project as an aid to tracking allusions. We will also use historical Hebrew dictionaries.

Prerequisite: High Intermediate-level Modern Hebrew
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML456H1 - Modern Hebrew Prose

Hours: 24S

This course is designed to introduce advanced students of Modern Hebrew to modern prose written primarily in today’s state of Israel. To this end we will spend two weeks looking at the motifs and styles available in contemporary children’s literature with an eye to their use of biblical allusions. This serves as background to a study of short stories by the Nobel laureate Agnon. The sources of the stories will be studied from the perspective of intertextuality where the source is both inspirational and in turn explicated by the novelist. The use of online search engines and databases will facilitate this analysis. The course teaches advanced reading skills in prose literature in Hebrew with emphasis on interpreting the texts, close readings, and tracking allusions. Use will be made of historical Hebrew dictionaries.

Prerequisite: High Intermediate-level Modern Hebrew
Recommended Preparation: NML225H1, NML256H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
The literary knowledge and abilities of students will be developed by analyzing different genres of prose writing, especially Persian short stories. At the end of this course students will be able to examine and analyze any form of story-writing and compose their own short stories. (Conducted in Persian.)

**NML464Y1 - Old Persian**

**Previous Course Number:** NML262Y1  
**Hours:** 36L

This course introduces students to the grammar and syntax of Old Persian, the language of the main epigraphical texts dating from the period of the Achaemenid Empire (550–330 BCE); the simplified cuneiform script it was written in; as well as its connections with Old and Young Avestan (belonging, like Old Persian, to the Old Iranian linguistic group), Middle Persian (Pahlavi), and New Persian languages. Students will read the Old Persian version of the famous trilingual inscription of Darius I at Bisotun, dated 520–519 BCE, and related inscriptions in the original Old Persian cuneiform script, and discuss the Achaemenid historical context and political ideology they reflected.

**Recommended Preparation:**  
NML260Y1/NML360Y1/NML362Y1/NML465Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1), Society and its Institutions (3)

**NML465Y1 - Avestan**

**Hours:** 48L

This course surveys the grammar and syntax of the language of the Young Avestan corpus, belonging to the Old Iranian linguistic group. The Avesta was a compendium of Zoroastrian texts composed orally in northern Iran and Central Asia in two dialects spoken in different periods: Old Avestan (2nd millennium BCE) and Young Avestan (1st millennium BCE). Most foundational texts of Zoroastrianism were composed in Young Avestan language, which attests a more simplified grammar than Old Avestan and in this regard is closer to Old Persian. Knowledge of Young Avestan provides access to the mythical and ritual context of pre-Islamic Iran and Central Asia. Students will be introduced to the main phonological, morphological, and syntactical features of the Young Avestan language; its script; its most important texts; and its connections with Old Persian and Middle Persian, or Pahlavi.
Recommended Preparation: NML260Y1/NML360Y1/NML464Y1

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML466H1 - Theory and Practice of Translation from and into Persian

Hours: 24S

An introduction to theories and techniques involved in English/Persian translation, focusing on translation practice and theoretical discussions on linguistic, cognitive, socio-political, and cultural aspects of translation. Through analysis and application of translation theory, students practice the art of translation and develop awareness of issues that translators face.

Prerequisite: NML360Y1 or permission of instructor based on previous language knowledge.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML467H1 - Persian Literature: The Epic Tradition

Previous Course Number: NML460Y1

Hours: 36S

Selected representative readings from the iconic masterpieces of classical heroic and romantic epic poetry, including the Persian national epic, Shahnameh, or Book of Kings; the magisterial ode of Khaqani on the ruins of a Sasanian palace; and tales from the Khamsheh, or Quintet, of Nezami about the star-crossed lovers Laili and Majnun and the world-conqueror Iskandar, or Alexander the Great. Emphasis is on close reading and analysis of the linguistic and literary content and style of these works, and discussion of their historical, cultural, and religious backgrounds. All readings are in the original Persian. During the course, students will acquire essential skills related to the technical requirements of classical Persian poetry, such as prosody, rhyme, and poetic devices, as well as an understanding of the key concepts and terminology of Persian Sufism.

Prerequisite: NML360Y1 or adequate knowledge of Persian

Exclusion: NML460Y1

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML468H1 - Persian Literature: Ethical, Erotic, and Mystical

Previous Course Number: NML460Y1

Hours: 36S

The companion course to NML467H1 (Persian Literature: The Epic Tradition). Selected representative readings from the ethical works of Sa’di (Bustan and Gulistan); the mystical parable Mantiq al-tayr of ‘Attar and the Masnavi-i ma’navi of Rumi; and the ghazals, or mystico-erotic lyrical poems, of Rumi and Hafiz. Emphasis is on close reading and analysis of the linguistic and literary content and style of these works, and discussion of their historical, cultural, and religious backgrounds. All readings are in the original Persian. During the course, students will acquire essential skills related to the technical requirements of classical Persian poetry, such as prosody, rhyme, and poetic devices, as well as an understanding of the key concepts and terminology of Persian Sufism.

Prerequisite: NML360Y1 or adequate knowledge of Persian

Exclusion: NML460Y1

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NML470Y1 - Advanced Turkish

Hours: 96L

This course is designed for students who have already completed NML370Y1 Intermediate Turkish or have an equivalent level of proficiency in Turkish. It aims to build upon the existing competence of the students in Turkish and to further improve their four skills through a variety of advanced speaking, listening, reading, and writing activities. By the end of this comprehensive course, students will be able to read, understand and translate various authentic texts of different genres such as literary works. They will be able to write essays on a wide range of topics. They will demonstrate the ability to express themselves both orally and in writing through complex grammatical structures and a rich vocabulary. They will also have gained thorough understanding of the social and cultural contexts in which Turkish is spoken. The course will enable students to pursue independent studies in Turkish.

Prerequisite: NML370Y1 or permission of instructor based on previous language knowledge.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
NML471H1 - Modern Turkish Literature in Perspective

Hours: 36L

This course surveys the main literary currents, figures, major themes, and motifs that define modern Turkish literature. Selected readings, including a variety of genres, such as short story, poetry, and the novel, will be used to map out a possible trajectory of modern Turkish literature, ranging from national allegories that pervaded early Republican Period to postmodern orientations.

Prerequisite: NML370Y1
Recommended Preparation: NMC278H1
Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

NML490H1 - Topics in Near and Middle Eastern Languages

Hours: 36S

An advanced language seminar organized around grammatical issues or texts selected by the instructor.

Prerequisite: Permission of the Instructor
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

Introduction

New College courses have in common a commitment to socially engaged learning and to explorative and inventive pedagogy that widens students’ experience by critically examining relationships among academic disciplines. We offer four degree programs: African Studies; Buddhism, Psychology and Mental Health; Caribbean Studies; and Critical Studies in Equity and Solidarity. These programs are open to all students in the Faculty of Arts and Science.

We also offer interdisciplinary courses that can enhance any degree program. Integration of student experience is a major priority in a college with students from all faculties in the University. The Independent Studies courses provide an opportunity for students to design their own programs and to test their research, analytic, synthetic, and creative skills by writing a major research paper. The Community Engaged Learning program supports course-based service learning and independent community engaged learning opportunities. These allow students to integrate their theoretical knowledge with practical experience, while engaging in meaningful work in campus and community organizations.

New One: Learning Without Borders

New One provides first year students with a comprehensive foundation for successful undergraduate study. It encourages active, engaged learning and creative forms of inquiry, and supports students in developing their research, writing and oral communication abilities. In New One, students develop skills in research and knowledge presentation, showcasing their projects at our Knowledge Fair.

New One offers up to ten interdisciplinary small-class seminars annually. Students join the program by simply registering in one of our courses, whether in the Fall or Winter term. The courses explore themes that connect to our daily lives such as the food we eat, the languages we speak, the technology we use, the art that we create and surrounds us, and the science that impacts our lives. We encourage students to take a course in both the Fall and Winter terms for a more complete experience.

New One gives students the tools to think deeply, critically, and creatively and to see the ways our lives are connected "beyond borders." Inspired by the social advocacy focus of New College's academic programs, the program grapples with the core question: how do we imagine responsible global citizenship and build a more equitable and just society?

The African Studies Program

(Specialist, Major, Minor) How has the evolution of societies on the African continent been integral to universal human history? What factors, in the past and in our time, account for similarities and differences among Africa societies? How are patterns and challenges of development in African societies shaped by their location within the global political economy? How do representations of Africa in popular media influence our knowledge of African societies? What are the ethical dilemmas of the various ways in which we engage with African societies?

The African Studies Program provides students opportunities to study the complexity and dynamism of African societies, the dynamics, challenges and processes of socio-economic, environmental and political transformations in Africa, the varied histories, societies, ideas, institutions of Africa and its diasporas through interdisciplinary lenses. Cutting across disciplines, the program offers a path to exploring how the organization of African societies has and continues to be shaped by the complex interaction of global and regionally-specific forces, encounters, and processes. The curriculum has three areas of emphasis: dynamics and challenges of socio-economic and political transformations in Africa’s “modern era”; social and political thought of Africa and its Diasporas in Europe, North America and elsewhere; and African popular cultures.

The interdisciplinary courses, through innovative and critical pedagogies, deal with cutting edge subjects such as political economy, African inventions, development, aid, humanitarianism, NGOs, conflict and peace making, activism and political struggles, politics, African cultures, migration and displacement, gender and development, environment, health, black freedom, urbanization, African systems of thought, the slave trade, colonialism, the post-colonial state, Africa and its diaspora, Pan-Africanism, and globalization. Innovative pedagogies nurturing students’ intellectual curiosity, cultivating engaged, creative and critical thinking and teaching cutting edge courses that recognize Africa as a living place rather than merely as a site for intellectual speculation and study inform our teaching. The program also offers practical courses in African languages. These areas of emphasis are supported by a rich menu of program courses that form the spine of the curriculum. Additional cross-listed courses with cognate disciplines and other interdisciplinary programs, drawn from disciplines in humanities, social sciences and sciences, complement the program offerings.

The Buddhism, Psychology and Mental Health Program

(Minor) An interdisciplinary Minor program, BPMH focuses on the growing convergence between western psychology and the psychological aspects of Buddhism as expressed in the recent interest in mindfulness meditation as a means of enhancing health and wellness. The program allows students to investigate the diverse ways that Buddhist and western psychology and science intersect, bringing together academic, clinical and contemplative traditions. Students choose from a wide range of courses on mind, consciousness, mindfulness meditation, social implications and applications of Buddhism, cognitive science, psychotherapy and the psychology of religion. The program encourages a critical examination of the ways that Buddhist psychology can contribute to the modern understanding of consciousness, wisdom, mental health and physical health.

For general enquiries, call 416-978-5404 or email nc.undergradadmin@utoronto.ca.

The Caribbean Studies Program

(Specialist, Major, Minor) Caribbean Studies is an interdisciplinary undergraduate program that consists of courses on Caribbean history and society, politics and economic development, literature and thought. Our courses deal with a wide range of issues including gender, religion, culture, ethnicity, race, development, language, colonialism, the environment and regional common markets. Caribbean Studies equips students to think about broad, theoretical and challenging intellectual issues and, at the same time, to ground that expansive thinking in deep understanding of the particular historical, political, economic, geographical, cultural and linguistic realities of the Caribbean and its diasporas. This combined interdisciplinary and area studies approach prepares students to think across disciplines about these kinds of questions, and to base their comparative, transnational and interdisciplinary thinking in concrete knowledge of the Caribbean and its people. The study of the Caribbean equips students to question the order of things, reflect on their own place in the world, and see
past the Caribbean’s size or current level of geo-political influence to recognize the inherent value and intellectual significance of all places and all people.

Critical Studies in Equity and Solidarity

(Major, Minor) Critical Studies in Equity and Solidarity (CSES) is an interdisciplinary program that explores how social relations and practices of power and privilege are (re)produced locally and transnationally. In CSES we question the dominant conceptualization of equity by the state, educational programs, the non-profit sectors and community organizations as individualized and de-historicized social differences. CSES is a hub of critical disability studies teaching and learning. The program provides students with theoretical and practical tools to study social, political, economic and historical injustices. CSES takes a unique approach to undergraduate education that values student experiential learning and community knowledge. The learning goal of CSES is to provide frameworks on theories of transformative social change rooted in political activism and formations of solidarity. The program encourages students to apply theory in action through organizing and practicing solidarity in making a more just world. CSES creates a dynamic learning environment that extends far beyond the university walls. With a vibrant student body, dynamic faculty members, connection with a wide range of community partners and a bold curriculum, CSES at New College is a leader in studies of social justice, settler colonialism, race, gender, sexuality, disability, land/water and sustainability, activism, solidarity and the art of resistance, and global food equity and security.

Community Engaged Learning (CEL)

New College offers several community engaged courses. These provide students the opportunity to integrate academic, experiential and practice-based learning as they participate in meaningful work in community or campus organizations.

Two forms of community engaged learning courses are offered: embedded and independent. In the former, a community service component is either a mandatory or optional component of the course syllabus. (Examples of such courses are CSE342H1 and BPM323H1). In the independent community engaged learning courses, upper level students, with various academic backgrounds, are placed with a social purpose community or campus-based organization for several hours per week, contributing to the mission of that organization in program support work or research. Through seminar discussions and critical reflection on their experiences, students learn how to mobilize their academic knowledge, deepen their appreciation of community engagement and social justice, explore social and ethical issues, and build professional dispositions and work-place skills relevant to the social sector.

Information about CEL can be found at http://www.newcollege.utoronto.ca/academics/new-college-academic-programs/community-engaged-learning.

Independent Studies

New College Independent Study courses are designed both to complement regular offerings in New College Programs and to provide an opportunity for New College students in any program to enrich their studies. The normal expectation of a project course is that the student, aided and advised by their supervisor, will read relevant literature, and plan, analyze and report on an original and independent investigation of an appropriate topic. Written applications, including a detailed proposal, should be made through the Programs Office for approval by the Vice Principal of New College or a designate by April 15 for the Summer Session; by July 15 for the Fall Term; or by November 15 for the Winter Term. Should the deadline fall on a weekend, applications will be accepted until the following Monday. Students will be notified of the acceptance or rejection of an application. If the project requires ethics approval, please be advised that you should find and consult with a supervisor about meeting this requirement at least a semester in advance of these deadlines. For more information and application forms, please see the Independent Studies website: http://www.newcollege.utoronto.ca/new-college-academic-programs/independent-studies.

Interdisciplinary Courses on Jungian Theory

This suite of courses offers students opportunities for sustained, interdisciplinary engagement with the thought of Carl Jung. Courses invite students to consider Jung’s thought and practice in relation to a range of disciplinary and cultural issues in order to open up conversations about models of consciousness and mind.

Enquiries: New College Program Administrator - Wetmore Hall, room 133; nc.undergradadmin@utoronto.ca or 416-978-5404.

The International Foundation Program

is designed for international students who need to meet the University’s English language requirement. Students
will acquire the academic and language skills necessary for full admission to undergraduate studies. Core courses include one first year history credit course (IFP100Y1), three non-credit language courses and one non-credit discipline-specific course. Courses are open only to students admitted to the program. For program and admission information, please see https://internationalprograms.utoronto.ca.

The Human Biology Programs

offer a broad education in life sciences with courses offered by departments in both the Faculties of Arts and Science, and Medicine (see Human Biology section of the Calendar.)

The Women and Gender Studies Program

(Specialist, Major, Minor) provides an interdisciplinary and culturally inclusive approach to understanding gender (see Women and Gender Studies section of the Calendar.)

**Critical Studies in Equity and Solidarity Major (Arts Program) - ASMAJ1141**

Critical Studies in Equity and Solidarity (CSES) is an interdisciplinary program that explores how social relations and practices of power and privilege are (re)produced locally and transnationally. In CSES we question the dominant conceptualization of equity by the state, educational programs, the non-profit sectors and community organizations as individualized and de-historicized social differences. CSES is a hub of critical disability studies teaching and learning. The program provides students with theoretical and practical tools to study social, political, economic and historical injustices. CSES takes a unique approach to undergraduate education that values student experiential learning and community knowledge. The learning goal of CSES is to provide frameworks on theories of transformative social change rooted in political activism and formations of solidarity. The program encourages students to apply theory in action through organizing and practicing solidarity in making a more just world. Equity Studies creates a dynamic learning environment that extends far beyond the university walls. With a vibrant student body, dynamic faculty members, connection with a wide range of community partners and a bold curriculum, CSES at New College is a leader in studies of social justice, settler colonialism, race, gender, sexuality, disability, land/water and sustainability, activism, solidarity and the art of resistance, and global food equity and security.

New College First-Year Foundations

NEW197H1 - Public Intellectual Activism: Theory and Practice

Hours: 24S

Explores the role of the public intellectual in modern and contemporary societies from a theoretical and practical lens. Specifically, investigates the interventions of this capital actor of the social fabric in specific historical junctures of the 20th century and the new millennium with the idea of informing a hands-on approach to participation in civil society debates. Students will be encouraged to examine how “marginalized communities” intervene in the public sphere to effect social change. Term work will include the writing and publishing of an op-ed article, blog, social media posts and a podcast interview. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NEW198H1 - Myths of French Sensuality

Hours: 24S

A study of French cultural history with respect to the French reputation for the indulgence and refinement of all the senses in visual arts, music, cuisine, perfume and fashion. Supporting mythologies are investigated, along with stereotype formation, exoticism and cultural appropriation. Through various research, writing and presentation techniques, including mini-essays, poster displays and pecha kucha, students will explore what is left of this reputation in an era of globalization. No knowledge of French is necessary. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

NEW199H1 - We Are What We Eat: The Example of French Cuisine

Hours: 24S

The historical study of French cuisine reveals a culture rich in controversy and conflicting narratives. These include contested origins, court intrigues, sensual delight, revolutions, colonialism and slavery, controversial farm practices, haute cuisine, cuisine bourgeoise, regionalism, European regulation. Through various research, writing and presentation techniques, including mini-essays, wikis and pecha kucha, students will explore what is left of French food culture in an era of globalization. No knowledge of French is necessary. Restricted to first-year students. Not eligible for CR/NCR option.

New One: Learning Without Borders

NEW101H1 - The Everyday Politics of Food

Hours: 12L/24S

How often do we reflect on the environmental, social and economic impact of our everyday food choices? This course offers an introduction to the key concepts, terms and theories that underlie our current food system. The course links the food we eat to global forces and considers how these forces affect food distribution, access and consumption. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Cannot be enrolled in concurrent College One courses.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

NEW102H1 - Exploring Multilingual Toronto

Hours: 12L/24S

How does language connect and divide people, places and communities? This course considers how interactions between people in Toronto are shaped by language as well as history, economy, architecture and urban landscapes. Students engage with the city both in and out of class to think about a range of questions linked to gender and sexuality, indigeneity, migration, race, ethnicity, and public/private space. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Cannot be enrolled in concurrent College One courses.
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**NEW103H1 - Digital Technology and Society**

Hours: 12L/24S

While the internet and other forms of digital technology have created new forms of social relationships and widened access to information, they have also raised concerns. This course explores issues such as surveillance, addiction and bullying as well as the potential of digital technologies (e.g. smart cities, Big Data, and the internet of things). The course engages students' own experience of digital technology. Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:** Cannot be enrolled in concurrent College One courses.  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**NEW104H1 - Creating Community: Art, Identity and Belonging**

Hours: 12L/24S

How is art implicated in the process of community building? How does art foster a sense of community identity and belonging? This course explores how communities, in Toronto and beyond, engage a variety of art forms including graffiti, spoken-word, hip-hop, digital art, traditional dance and music to connect people and express community identity. Students will have the opportunity to visit community arts projects. Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:** Cannot be enrolled in concurrent College One courses.  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**NEW105H1 - Current Issues Without Borders I**

Hours: 12L/24S

This interdisciplinary course addresses a current issue that exemplifies the themes of "Learning Without Borders" in New One. It investigates how this issue is implicated in connecting us with others around the globe; it engages different kinds of knowledge and community perspectives; and integrates students' own experience as related to the issue. Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:** Cannot be enrolled in concurrent College One courses.  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**NEW106H1 - Science, Health and Social Justice**

Hours: 12L/24S

How can scientific knowledge and research be mobilized to impact individual and global health? How is health impacted by social, racial and economic inequalities? This course explores scientific research and practice with special attention to the translation of scientific knowledge in the public sphere, and its ability to inform policies, practices and laws. Students have the opportunity to meet with clinician-scientists, policy-makers, and other professionals connected to the health care system. Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:** Cannot be enrolled in concurrent College One courses.  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**NEW111H1 - Food, Ethics and Sustainability**

Hours: 12L/24S

How do we produce and ensure access to nutritious and environmentally sustainable food for all? This course explores what is involved in achieving ethical food production and food security, examining topics such as: the paradox of food waste amidst scarcity, the relationship between food production and climate change, community-led alternatives to dominant food systems, and the role of biotechnology. Research projects allow students to focus on an issue of particular interest. Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:** Cannot be enrolled in concurrent College One courses.  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**NEW112H1 - Language Freedom and Power**

Hours: 12L/24S
How do we imagine a balance between the need for communication, freedom of expression, and protection for marginalized groups? This course considers how language shapes and is shaped by the relations of power not only in such sites as colonies, nations and institutions, but also in popular culture and how we communicate online. It explores the key role of language in activism and youth cultures and allows students to focus on an issue of particular interest. Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:** Cannot be enrolled in concurrent College One courses.
**Distribution Requirements:** Humanities

CAR422H1 - Caribbean Regionalism

Previous Course Number: NEW422H1
Hours: 24S

In a public lecture in 1958, Trinidadian CLR James described Federation as the means to "accomplish the transition from colonialism to national independence." This course explores the shift from James' vision to Jamaican economist Norman Girvan's observation that contemporary "...governments tend to perceive supranationality as less an exercise in collective sovereignty and more a diminution of national sovereignty." Among the topics to be considered are: histories of regionalism; formal and informal dimensions of regional identity-making practices; freedom of movement; governance mechanisms; and widening and deepening debates, with particular reference to the non-Anglophone Caribbean and Latin America.

Prerequisite: Completion of at least 1.0 credit at the 300-level.

**Critical Studies in Equity and Solidarity Courses**

**CSE240H1 - Introduction to Critical Equity and Solidarity Studies**

**Previous Course Number:** NEW240H1, NEW240Y1

**Hours:** 24L/12T

An interdisciplinary intersectional interrogation and examination of systemic inequity and social justice in local and global contexts. Provides a foundation for the field of critical equity and solidarity studies through a concentrated focus on theory and practice as it relates to major concepts, historical perspectives, key debates and radical grassroots community resistance to inequity. Introduces and foregrounds the concept of critical equity as both a theoretical framework and as a lived contestation of the structural nature and effects of systemic inequity.

**Exclusion:** NEW240H1, NEW240Y1

**Distribution Requirements:** Humanities, Social Science

**Breadth Requirements:** Society and its Institutions (3)

**CSE241Y1 - Introduction to Critical Disability Studies**

**Previous Course Number:** NEW241Y1

**Hours:** 48L/24T

Draws on an intersectional history and politics of normativity and bodily difference to understand disability as a diverse and materially salient social category that can be used as a lens to better understand systems and experiences of colonization, race, class, gender, age, etc. Explores scenes of disability or 'crip' solidarity, resistance and cultural production, disability D/deaf and mad arts, coalitional movements for disability justice, collective approaches to access and other non-normative ways of knowing and being.

**Exclusion:** NEW241Y1

**Distribution Requirements:** Humanities, Social Science

**Breadth Requirements:** Society and its Institutions (3)

**CSE270H1 - Community (dis)Engagement and Solidarity**

**Previous Course Number:** NEW270H1

**Hours:** 24L/12T
An introduction to issues and questions arising from the field of 'community engagement'. Explores the meaning, practices and implications of/for 'community' and 'community (dis)engagement' from multiple perspectives (e.g. the State and its agencies, institutional power, colonial discourse, communities of embodied difference, etc.). Takes a multi-media and arts-based approach to examining self-care from an anti-colonial perspective of central importance in the practice and pedagogy of critical equity and solidarity in the collective struggle for freedom and transformation.

Exclusion: NEW270H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

Hours: 24L

An upper-level course. Topics of study vary from year to year, depending on the instructor.

Prerequisite: CSE240H1/NEW240Y1

CSE340H1 - Abolition in the Global Context: Theorizing Uprisings and Youth Activism against Policing and Prisons

Previous Course Number: NEW340H1
Hours: 24L

Considers the question: what does abolition mean in a global context? An analysis of how nation-states use prisons, (im)migrant detention centers, black sites, detention camps, military prisons, border checkpoints, refugee camps, walls, and concentration camps, to surveil, contain, and lock up disposable populations, and/or to suppress those that resist state violence. Explores these carceral spaces through a historical and political economic investigation of the processes that have produced these sites. Draws on anti-carceral perspectives on abolition and reform to examine uprisings and political activism, particularly youth activism, against prisons, policing, and forms of militarized, capitalist violence transnationally.

Prerequisite: CSE240H1/ NEW240H1/ NEW240Y1
Exclusion: NEW340H1 (Special Topics in Equity Studies: Youth, Activism and Social Change), offered in Fall 2017, Fall 2018, Fall 2019 and Fall 2020

CSE341H1 - Theorizing Settler Colonialism, Capitalism and Race

Previous Course Number: NEW341H1
Hours: 24S

Provides students with a theoretical background for understanding settler colonialism, capitalist social relations and difference (including race, class, gender, disability and sexuality) and solidarity. Provides an analysis of state violence and the formation of hegemonic power relations. Introduces students to the method of thinking *dialectically* to examine the social world as a set of relations between multiple phenomena occurring at the same time. Articulates an emancipatory politics of knowledge production and strategies of building solidarities to enable the imagination of a different future.

Prerequisite: CSE240H1/NEW240Y1
Exclusion: NEW341H1
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Society and its Institutions (3)

CSE342H1 - Theory and Praxis in Food Security

Previous Course Number: NEW342H1
Hours: 24S

Prerequisite: CSE240H1/NEW240Y1
Exclusion: NEW342H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CSE344Y1 - Body Matters: Oppression, Solidarity and Justice

Previous Course Number: NEW344Y1
Hours: 48L

Through lectures, small-group discussions and experiential activities, explores how intersecting cultural stories impact our bodies and how stories inscribed upon us shape and constrain our relations, perceptions, experiences and vulnerabilities as embodied subjects. Draws on work in cultural studies, critical race and decolonial theory, gender studies, queer, trans and disability theory and fat studies to ask: Whose bodies matter? How do bodies come to matter? And, how are we - as embodied beings - engaged in acts of rewriting,
resisting and otherwise transforming the body means and what it can do?

CSE344H1 - Body Matters: Oppression, Solidarity and Justice

CSE444H1 - Anti-Colonization and the Politics of Violence

Previous Course Number: NEW444H1
Hours: 36S

This advanced seminar interrogates how the theorizations, embodied lived experiences and lived resistance to structural violence can create social, epistemological, ontological and political decolonizing/anti-colonial transformation. The work of Frantz Fanon, John
Akomfrah, The Black Panther Party for Self-Defense, Elaine Brown and Assata Shakur amongst others are utilized to search for alternative and oppositional ways to rethink and re-respond to violence. The seminar pursues a nuanced understanding of violence as it relates to de/anticolonization as a lived praxis of resistance and as a practice of self-defense that is grounded in the assertion that there can be no decolonization without anticolonization.

**Prerequisite:** CSE240H1/NEW240Y1 and an additional 0.5 credit at the 300+ level from the Critical Studies in Equity and Solidarity Core Group.
**Exclusion:** NEW444H1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Society and its Institutions (3)

**CSE445H1 - Geographies of Military Occupation, (Un)Freedom and Transnational Solidarity**

**Hours:** 24S

Examines how some of the longest military occupations in history have produced forms of inequality, injustice, and violence that have given rise to mass resistance and global solidarity on an unprecedented scale. Through a comparison of cases such as Palestine/Israel and Kashmir analyzes concepts such as imperialism, settler colonialism, militarism, occupation, nationalism, indigeneity, demography, sovereignty, collective memory, resistance, liberation and transnational solidarity. Draws on memoirs, oral histories, films, poetry, music, and literature to understand the historical and political economic foundations that have produced these occupations and the forms of resistance and liberation struggles that have shaped international solidarity.

**Prerequisite:** CSE240H1/NEW240Y1, CSE341H1/NEW341H1
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)

**CSE446H1 - Community Development and Social Change**

Examines a range of historical and present-day meanings associated with the figure of the disabled child. Draws on work emanating from a variety of disciplines, including history, psychology, neuroscience, visual arts, film and literature, and engaging with critical theories of race, class, gender, sexuality and disability, to discuss ideas and issues relevant to the construction of 21st century disabled childhoods. Counters the near monolithic story of disability as threat to the presumed goodness of normative childhood by asking: what alternate depictions and narratives of disabled childhood exist and what can they teach us?

**Prerequisite:** CSE240H1/NEW240Y1/CSE241Y1 and an additional 0.5 Critical Studies in Equity and Solidarity Core Group 300+ level course
**Exclusion:** NEW448H1
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)

Note: This is a joint graduate/undergraduate course.
CSE449H1 - Contemporary Theories in Critical Disability Studies

Previous Course Number: NEW449H1
Hours: 24S

Explores competing conceptions, definitions and practices of disability through a range of critical disability theories, including crip-of-colour critique, decolonial theories of disability studies and black feminist disability frameworks. Enacts disability studies as a justice-oriented methodology or practice that has value for understanding and responding to colonial systems of race, class, gender and disability. Interrogates the shape and limits of disability and disability studies to ask the provocative question: what can disability studies do?

Prerequisite: CSE420H1/NEW240Y1 and 0.5 credit from CSE241Y1/CSE344Y1/CSE349H1/CSE448H1
Exclusion: NEW449H1
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Society and its Institutions (3)

JNS450H1 - Sexuality & Disability

Hours: 24S

An interdisciplinary and intersectional approach to the study of disability and sexuality. Students will engage with historical, mainstream and critical discourses and explore complex issues and representations pertaining to disability, sexuality, sexual practices and desire. Draws from a range of writings and cultural texts in queer, crip and sexuality studies.

Prerequisite: SDS255H1/ SDS256H1 (UNI255H1/UNI256H1) or NEW240Y1/ CSE241Y1 or permission of the instructor
Exclusion: SDS455H1 (Special Topics in Sexual Diversity Studies: Sexuality & Disability), offered in Fall 2015
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CSE469Y1 - Decolonizing Research Methodologies for New Researchers

Previous Course Number: NEW469Y1
Hours: 48S

A feminist/anti-racist/anti-colonial/anti-imperialist exploration of research methods. Examines the work of researchers and scholar-activists who seek to humanize research with communities detrimentally impacted by colonial, imperialist, heteropatriarchal research agendas and processes. Supports students' independent research projects through guidance from the course instructor. Prepares students for graduate studies or research-oriented careers. Not eligible for CR/NCR option.

Prerequisite: CSE240H1/NEW240Y1, 1.0 credit from Critical Studies in Equity and Solidarity Core Group 300+ level courses and a GPA of 3.0 from Critical Studies in Equity and Solidarity Core courses.
Exclusion: NEW469Y1
Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

Community Engaged Learning (CEL) Courses

NEW495Y1 - Community Engaged Learning: Critical and Creative Perspectives on the Non-Profit Sector

Hours: 96P/24S

A placement-based course in which students develop knowledge, practice and professional skills appropriate to the social purpose sector while working to support programming for community partners. The accompanying seminar considers critical social justice issues and creative models of community-engagement practice from grassroots, community and non-profit organizations and other perspectives that support students' experiential, participatory and reflective learning. Not eligible for CR/NCR option.

Recommended Preparation: CAR120Y1/AFR150Y1/CAR220H1/CAR221H1/NEW224Y1/CAR225H1/CAR226H1/BPM232H1/NEW232Y1/CSE240H1/NEW240Y1/CSE241Y1/CSE270H1/HIS230H1/HIS231H1/other New College courses
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Society and its Institutions (3)

NEW496H1 - Community Engaged Learning: Critical and Creative Perspectives on the Non-Profit Sector

Hours: 48P/12S

A placement-based course in which students develop knowledge, practice and professional skills appropriate to the social purpose sector while working to support programming for community partners. The accompanying seminar considers critical social justice issues and creative models of community-engagement practice from grassroots, community and non-profit organizations and
other perspectives that support students’ experiential, participatory and reflective learning. Not eligible for CR/NCR option.

**Recommended Preparation:** CAR120Y1/AFR150Y1/ CAR220H1/ CAR221H1/ NEW224Y1/ CAR225H1/ CAR226H1/ BPM232H1/ NEW232Y1/ CSE240H1/ NEW240Y1/ CSE241Y1/ CSE270H1/ HIS230H1/ HIS231H1/ other New College courses

**Distribution Requirements:** Humanities, Social Science

**Breadth Requirements:** Society and its Institutions (3)

**NEW497Y1 - Critical and Creative Perspectives on Community Based Research (CBR): An Advanced Seminar**

**Hours:** 96P/24S

Explores how research is conducted and mobilized by marginalized communities as a form of resistance, knowledge production and social change. Examines the foundations of empirical research, the role of the university as a site of research activity and the ethics and methods of community-based research. Informed by examples of grassroots research projects from Black, Indigenous and racialized communities locally, nationally and globally. In this course, students engage in community-based and participatory action research projects with community partners. Not eligible for CR/NCR option.

**Prerequisite:** Completion of 9.0 credits and successful completion of the application process.

**Recommended Preparation:** CAR120Y1/AFR150Y1/ CAR220H1/ CAR221H1/ NEW224Y1/ CAR225H1/ CAR226H1/ BPM232H1/ NEW232Y1/ NEW240Y1/ CSE241Y1/ CSE270H1/ HIS230H1/ HIS231H1/ other New College courses

**Prerequisite:** Completion of 8.0 credits and permission of the College

**NEW391H1 - New College Independent Studies**

**Prerequisite:** Completion of 8.0 credits and permission of the College

**NEW490Y1 - New College Independent Studies**

**Prerequisite:** Completion of 12.0 credits and permission of the College

**NEW491H1 - New College Independent Studies**

**Prerequisite:** Completion of 12.0 credits and permission of the College

**Interdisciplinary Courses**

**NEW271H1 - Interdisciplinary Special Topics**

*Hours:* 24L

Topics vary from year to year depending on the instructor. Consult timetable for current offering information.

**JQR360H1 - The Canadian Census: Populations, Migrations and Demographics**

*Hours:* 24L/12T

Examines the Canadian population census through the experience of diasporic groups in Canada. Approaches the census as a statistical tool, an historical source and an ideological project of citizenship and nationalism. Uses census data to explore mathematical and statistical concepts and to integrate numerical ways of thinking with qualitative analysis. (Jointly sponsored by African Studies, Diaspora and Transnational Studies, Caribbean Studies, Equity Studies and Latin American Studies).

**Prerequisite:** DTS200Y1/ HIS230H1/ HIS231H1/ LAS200H1/ LAS201H1/ CAR120Y1/ AFR150Y1/ CAR220H1/ CAR221H1/ NEW224Y1/ CAR225H1/ CAR226H1/ NEW240Y1

**NEW370Y0 - Research Excursion**

Credit course for supervised participation in faculty research project. Details at [https://www.artsci.utoronto.ca/current/academics/research-opportunities...](https://www.artsci.utoronto.ca/current/academics/research-opportunities...). Not eligible for CR/NCR option.

**Distribution Requirements:** Social Science, Humanities

**NEW471H1 - Interdisciplinary Special Topics**

*Hours:* 24S

Topics vary from year to year depending on the instructor.

**Distribution Requirements:** Humanities
New College

**Interdisciplinary Courses in Jungian Theory**

**NEW302Y1 - C.G. Jung: Stories, Patterns, Symbols**

*Hours: 48L/24S*

Impact of Jung’s analytical psychology, critical methodology and interpretative practice on issues in religion, anthropology, art and literature, popular culture, gender studies and postmodernist critique. Theoretical studies include traditional Jungian and contemporary post-Jungian texts together with feminist and non-Jungian sources.

**Prerequisite:** 4.0 credits, at least 1.0 of which should be in the HUM/BR=1/2

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1), Thought, Belief and Behaviour (2)

**NEW303H1 - Hypotheses of the Unconscious**

*Hours: 12L/12S*

Current discussions of the hypotheses, starting with Freud’s and Jung’s hypotheses, especially Jung’s collective unconscious; critical examination through retrospective analysis of the evolution and development of the concept in works from philosophy, psychology, poetry, ethnology, science and popular culture that anticipated, influenced or were influenced by the work of Freud and Jung, post-Freudians and post-Jungians.

**Prerequisite:** 4.0 credits, at least 1.0 of which should be in the HUM/BR=1/2

**Recommended Preparation:** NEW302Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**NEW402Y1 - Advanced Special Topics in Jungian Theory**

*Hours: 48S*

Topics vary from year to year depending on the interests of students and instructors.

**Prerequisite:** Permission of instructor

**Distribution Requirements:** Humanities

**International Foundation Program Courses**

**UTP100H1 - Themes in World History**

*Hours: 24L*

Surveys the development of human societies from their origins to the present. Topics may include the environment, cultural development and interaction, the creation and nature of belief systems, political, economic and social structures, gender relations, and the relationship between global patterns and local development. Restricted to students enrolled in the UTPrep program.

**Exclusion:** IFP100H1/IFP100Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

**IFP100Y1 - Themes in World History**

*Hours: 48L/36T*

Surveys the development of human societies from their origins to the present using examples from across the world. Topics may include the environment, cultural development and interaction, the creation and nature of belief systems, political, economic and social structures, gender relations, and the relationship between global patterns and local developments. Enrolment is restricted to students registered in the International Foundation Program. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities, Social Science

**Breadth Requirements:** Society and its Institutions (3), Thought, Belief and Behaviour (2)

**IFP100H1 - Themes in World History**

*Hours: 24L*
Surveys the development of human societies from their origins to the present. Topics may include the environment, cultural development and interaction, the creation and nature of belief systems, political, economic and social structures, gender relations, and the relationship between global patterns and local development. Restricted to students enrolled in the summer offering of the International Foundation Program (IFP). Not eligible for CR/NCR option.

Introduction

Nutritional Sciences represents an exciting and challenging area of study of a truly interdisciplinary nature. Understanding of the impact of nutrition on health and its role in disease is based upon a knowledge of the metabolic processes involved (nutrient requirements and utilization, food additive metabolism and safety), of the chemistry of foods (food preservation, food production) and of social and behavioural factors (determinants of food selection). Thus, in this program, the physical, biological and social sciences are integrated in consideration of the national and international goals of achieving optimal health through proper nutrition.

Most career opportunities in Nutritional Sciences require training beyond the undergraduate level. The Major Program provides excellent preparation for entry into postgraduate studies in nutrition research or for a professional faculty such as Medicine and Dentistry.

Please note that this Department does not offer an undergraduate dietetics program. Students interested in this qualification should contact Dietitians of Canada for information (www.dietitians.ca).

Students interested in applying to the MPH: Nutrition and Dietetics Program, through the Dalla Lana School of Public Health, are advised to contact the program director during their second year of undergraduate studies.

Nutritional Sciences Programs

Nutritional Sciences Major (Science Program) - ASMAJ1068

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade/Grade Average
A minimum grade average in required courses or their equivalents is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1, BIO130H1
- (CHM135H1, CHM136H1)/(CHM138H1, CHM139H1)/CHM151Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60% in each course, or a final grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.
Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at dns.admin@utoronto.ca, specify which program you would like to be considered for, and provide your student number.

Please consult the Arts & Science Program Toolkit for more information on program enrolment.

Completion Requirements:

First Year: 
( BIO120H1, BIO130H1); ( CHM135H1, CHM136H1)/( CHM138H1, CHM139H1)/ CHM151Y1

Second Year:
NFS284H1; BCH210H1; ( STA220H1, STA221H1)/ ( PSY201H1, PSY202H1)

Third Year:
( PSL300H1, PSL301H1)/ PSL302Y1; CSB349H1/ PSL350H1/ BCH311H1; any two of: NFS382H1, NFS386H1, NFS301H1; NFS302H1; NFS394Y1

Fourth Year:
Any three of: NFS400H1, NFS484H1, NFS485H1, NFS486H1, NFS487H1, NFS488H1, NFS489H1, NFS490H1, NFS494Y1

**Nutritional Sciences Courses**

**NFS284H1 - Basic Human Nutrition**

*Hours: 36L*

An introductory course to provide the fundamentals of human nutrition to enable students to understand and think critically about the complex interrelationships between food, nutrition, health and the environment.

*Exclusion: HLTB11H3*

*Recommended Preparation:* ( BIO120H1, BIO130H1)/ BIO150Y1; ( CHM138H1, CHM139H1)/( CHM135H1, CHM136H1)/ CHM151Y1

*Distribution Requirements: Science*

*Breadth Requirements: Living Things and Their Environment (4)*

**NFS301H1 - Nutrition Literacy: Sorting Science from Snake Oil**

*Hours: 36L*

This course will help students learn how to recognize the strengths and limitations of various nutrition research methods, find reliable nutrition information on the Internet and develop systematic thinking skills to critically evaluate the quality of nutrition information in both the scientific literature and popular media.

*Prerequisite: NFS284H1*

*Distribution Requirements: Science*

*Breadth Requirements: Living Things and Their Environment (4)*

**NFS302H1 - Nutrition, Athletics, Performance and Behaviour**

*Hours: 36L*

This course will give an overview of the emerging and advancing role of chronic diet and supplements in athletics, performance and behavior.

*Prerequisite: NFS284H1*

*Exclusion: KPE328H1*

*Distribution Requirements: Science*

*Breadth Requirements: Living Things and Their Environment (4)*

**NFS382H1 - Vitamin and Mineral Metabolism Throughout the Life Cycle**

*Hours: 36L*

Micronutrients are essential for health throughout the life cycle. This course examines the role of micronutrients during development and ageing with some emphasis on disease prevention and pathogenesis. Students develop critical appraisal skills, an understanding of the principles of study design and learn to write in a scientific style.

*Prerequisite: NFS284H1*

*Distribution Requirements: Science*

*Breadth Requirements: Living Things and Their Environment (4)*
NFS386H1 - Food Chemistry

Hours: 36L

Structure, composition and chemical and biochemical reactions in foods during postharvest/postmortem, processing, storage and utilization. Implications for organoleptic properties, nutritional value, toxicity and human health.

Prerequisite: CHM138H1/ CHM139H1/ CHM135H1/ CHM136H1
Recommended Preparation: NFS284H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

NFS394Y1 - Research Course in Nutritional Science

Hours: 144P

Research experience under the supervision of a Departmental staff member. The course entails designing and carrying out a small research project and the preparation and presentation of both a research proposal and a final report. Note that the research project NFS394Y1 requires the prior consent of a staff member who will supervise the project and departmental approval before enrolment. The student is responsible for locating a supervisor. Not eligible for CR/NCR option.

Prerequisite: NFS284H1, Permission of Department and Project Supervisor
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

NFS400H1 - Functional Foods and Nutraceuticals in Human Nutrition

Hours: 36L

This course will demonstrate the rationale, including health benefits, development and marketing of functional foods and nutraceuticals.

Prerequisite: BCH210H1, NFS284H1, (PSL300H1, PSL301H1)/PSL302Y1
Recommended Preparation: CSB349H1/PSL350H1/BCH311H1, NFS386H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

NFS484H1 - Advanced Nutrition

Hours: 24L/12T

Physiological and biochemical features of nutrient needs. The roles of nutrients in the development and adaptability of the whole body, organs and cells. Interpretation of current research data.

Prerequisite: BCH210H1, CSB349H1/PSL350H1/BCH311H1, NFS284H1, (PSL300H1, PSL301H1)/PSL302Y1, (STA220H1, STA221H1/JBS229H1) or permission of instructor
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

NFS485H1 - Diet, Microbiome & Health

Hours: 36L

Provides an integrated approach to how prokaryotes modulate nutrient availability and how they interact with the host to impact human health from a molecular perspective.

Prerequisite: BCH210H1, CSB349H1/PSL350H1/BCH311H1/MGY311Y1, NFS284H1, (PSL300H1, PSL301H1)/PSL302Y1 or permission of the instructor
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

NFS486H1 - Obesity: Metabolic and Clinical Aspects

Hours: 36L

Obesity and its co-morbidities illustrated with pathophysiological and biochemical principles and clinical case studies.

Prerequisite: BCH210H1, NFS284H1, (PSL300H1, PSL301H1)/PSL302Y1
Recommended Preparation: CSB349H1/ PSL350H1/ BCH311H1, (STA220H1, STA221H1)
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
NFS487H1 - Nutrigenomics and Personalized Nutrition

Hours: 36L

The impact of the human genome on nutrition research. Experimental approaches to investigating gene-diet interactions. Understanding how genetic variability affects nutrient response, and how dietary factors regulate gene expression. Application of the various 'omics' technologies to nutrition research as well as exploring the social, legal and ethical issues associated with direct-to-consumer marketing of genetic tests for personalized nutrition.

Prerequisite: NFS284H1, CSB349H1/PSL350H1/BCH311H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

NFS488H1 - Nutritional Toxicology

Hours: 36L

Occurrence, mechanism of action, safety and health implications of chemicals naturally present in or added to foods. Interactions of nutrients and toxicants and the effects on their metabolism and utilization. Food safety evaluation and regulatory control.

Prerequisite: BCH210H1, NFS284H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

NFS489H1 - Nutritional Neurosciences

Hours: 36L

This course provides an integrated approach to how brain function regulates and in turn is regulated by nutrition from a biochemical perspective.

Prerequisite: BCH210H1, BCH311H1/CSB349H1/PSL350H1, NFS284H1, PSL302Y1/(PSL300H1, PSL301H1)
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

NFS490H1 - International and Community Nutrition

Hours: 36L

This course focuses on current issues in international and community nutrition including global and domestic food security, micronutrient deficiencies and other forms of undernutrition, maternal and infant/child nutrition, dietary guidance, and food and nutrition policy. The course will consider the environmental, sociopolitical, cultural and biosocial contexts of nutrition.

Prerequisite: NFS284H1
Recommended Preparation: GGR107Y1/POL103Y1/SOC101Y1
Distribution Requirements: Science
Breadth Requirements: Society and its Institutions (3)

NFS494Y1 - Research Projects in Nutritional Sciences

Hours: 144P

Research experience under the supervision of a Departmental staff member. The course entails designing and carrying out a small research project and the preparation and presentation of both a research proposal and a final report. Note that the research project NFS494Y1 requires the prior consent of a staff member who will supervise the project and departmental approval before enrolment. The student is responsible for locating a supervisor. Not eligible for CR/NCR option.

Prerequisite: NFS284H1, Permission of Department and Project Supervisor
Distribution Requirements: Science

Introduction

The Trudeau Centre for Peace, Conflict and Justice administers the program in Peace, Conflict and Justice at the Munk School of Global Affairs & Public Policy.

The Peace, Conflict and Justice program provides undergraduates with an interdisciplinary education covering three central pillars: the meanings and causes of conflict, peace, and justice; the lived experiences of living in the context of conflict and struggles for peace and justice; and approaches to resolving conflict and producing peace and/or justice. The topics of study are wide-ranging, including the study of peacemaking and peace-building, interstate war and intrastate conflicts, insurgencies, revolutions and rebellions, ethnic strife, global justice, and negotiation theory. In doing so, we address some of the world’s most urgent humanitarian problems, and train students to deeply analyze these issues across several levels of analysis, from the local through the national and the global. Students interested in this program are strongly encouraged to consider pursuing a double major in related fields, especially International Relations. Other related fields include: Economics, Political Science, Sociology, Psychology, Anthropology, Geography, History, Diaspora and Transnational Studies, Ethics, Society and Law and Women and Gender Studies

Enrolment Requirements:

This is a limited enrollment program that can only accommodate a limited number of students. Admission is determined by a range of criteria, including at the initial stage a student's academic background, a statement of interest in the program, and as a later stage of the process, a personal interview on invitation of the Program Director. In the past, enrollment in Peace, Conflict and Justice has proven to be extremely competitive across all these dimensions, and an applicant's success in any one of these dimensions does not necessarily guarantee admission to the program in any given year.

Completion Requirements:

(12.0 credits, including at least 1.0 credit at the 400-level)

1. (ECO101H1+ ECO102H1)/ ECO105Y1/ HIS103Y1, (PSY100H1+ PSY220H1)/ (SOC100H1+ SOC150H1), POL208H1, 0.5 credit in quantitative methods from one of the following courses: ECO220Y1, EEB125H1, GGR270H1, GGR274H1, POL222H1, PSY201H1, PSY202H1, SOC202H1, STA201H1, STA220H1, STA221H1, or an appropriate substitution on the approval of the Program Director.

Except for POL208H1, substitutions may be permitted for other introductory courses in relevant disciplines, based on a student's rationale and on approval of the Program Director.

2. PCJ260Y1, PCJ360H1, PCJ362H1, PCJ460H1, PCJ461H1

3. 3.0 credits from one of Groups A, B, C, D, E or F (below), or substitutions with a rationale that must be approved by the Program Director. Students may substitute from different disciplines or with different courses from within these disciplines. At least 1.0 credit must be at the 300+ level.

4. 3.0 complementary credits with either a disciplinary, regional, or thematic focus relevant to Peace, Conflict and Justice (on approval of the Director, based on the needs for the student's program of study).
of students interdisciplinary programs of study). At least 2.0 credits must be at the 300+ level. Up to 1.0 credits of MUN courses may be used to fulfill this requirement, subject to approval by the Director.

**Disciplinary focus:**

3.0 credits from one of ANT, ECO, GGR and Environmental Studies (combined), HIS, PHL, POL, PSY, RLG, SLA, SOC, or from other units with a rationale approved by the Program Director.

(Note: The disciplinary focus in this cluster must be different from the discipline chosen in requirement 3. For instance, HIS is excluded for students who have taken 3.0 HIS credits to meet requirement 3; POL is excluded for students who have taken 3.0 POL credits, etc.)

**Regional Studies focus:**

3.0 credits on, for example, Canada, Southern Africa, the Middle East, Latin America, or the Slavic countries.

**Thematic focus:**

3.0 credits on a thematic topic proposed by the student and approved by the Program Director. Examples include negotiation and conflict resolution, diplomatic history, gender and conflict, morality of war, quantitative analysis, group-identity conflict, economic development and conflict, literature, culture, and everyday life of conflict, or environmental change and conflict.

Peace, Conflict and Justice
Major (Arts Program) - ASMAJ1228

Enrolment Requirements:

While we welcome students with diverse experiences, this is a limited enrolment program that can accommodate a limited number of students. Admission is determined by a range of criteria, including at the initial stage a student's academic background, a short essay, a writing sample, a resume, and as a later stage of the process, a personal interview on invitation of the Program Director. In the past, enrollment in Peace, Conflict and Justice has proven to be extremely competitive across all of these dimensions, and an applicant's success in any one of these dimensions does not necessarily guarantee admission to the program in any given year. While it is not a prerequisite for program admission, students in their first year who are interested in the program in Peace, Conflict and Justice are advised to take three introductory courses in History, Economics, Psychology, Sociology and/or Political Science (courses listed in Cluster 1 for the major and specialist).

Completion Requirements:

(7.5 credits)

Peace, Conflict and Justice Courses

PCJ260Y1 - Introduction to Peace and Conflict Studies

Previous Course Number: PCS260Y1, UNI110Y1, UNI260Y1

Hours: 48L/24S

The course reviews theories exploring the causes of conflict, the possibilities for the pursuit of peace, and the role of justice in both. Drawing on a wide range of disciplines and perspectives, including political science, psychology, sociobiology, economics, and religion, it offers an introduction to diverse approaches to conflict resolution and peace-building. After examining the role of individual characteristics, social group dynamics, and structural processes in generating conflict, the course interrogates different conceptions of peace and justice as well as the dilemmas involved in pursuing them in practice. Case studies and examples are used to help students apply the conceptual tools they acquire to prominent world conflicts.

Prerequisite: For current PCJ program students in second year and higher/permission of the Program Director
Exclusion: PCS260Y1, UNI110Y1, UNI260Y1
Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

PCJ299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

PCJ360H1 - Topics in Peace, Conflict and Justice

Hours: 24L

This course explores selected issues in the field of peace, conflict and justice. Topics may vary from year to year. Through a suite of recent readings, students will strive to...
critically examine implications and challenges of, and solutions to the issues being studied. Please visit the Trudeau Centre for Peace, Conflict and Justice website for current offering information.

**Prerequisite:** PCJ260Y1 or permission of the Program Director.

**Exclusion:** PCS360Y1, UNI360Y1

**Recommended Preparation:** POL208H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

---

**PCJ361H1 - Special Topics in Peace, Conflict and Justice Studies**

**Hours:** 24S

An exploration of selected issues in the field of Peace, Conflict and Justice involving an overseas and/or practicum component.

**Exclusion:** PCS361H1, UNI361Y1

**Recommended Preparation:** POL208Y1

**Distribution Requirements:** Social Science

---

**PCJ361Y1 - Special Topics in Peace and Conflict Studies**

**Previous Course Number:** PCS361Y1, UNI361Y1

**Hours:** 48S

An exploration of selected issues in the field of Peace, Conflict and Justice involving an overseas and/or practicum component.

**Prerequisite:** PCJ260Y1 or permission from the Program Director

**Exclusion:** PCS361H1, PCS361Y1, UNI361Y1

**PCJ362H1 - Service Learning**

**Hours:** 24S

Students are given a service learning placement in the GTA in partnership with local, national, or international not-for-profits or governmental organizations. Students work in teams of 2-7 students, and help partner organizations solve important problems. Student teams mostly work independently of the organization, while receiving some mentoring, critique, and advice from the organizations. Students are expected to invest 5-7 hours per week in course projects, in addition to class time. In this non-competitive course, students are asked to engage in deep personal reflection, help teammates, advise other teams, and contribute their skills and talents to their community partners. The course will emphasize how groups work to achieve community goals, how grassroots politics works, the power of social capital, and how these topics link to questions of conflict resolution, brokering peace, and achieving justice.

**Prerequisite:** PCJ260Y1

**Exclusion:** PCJ361H1, PCJ363H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

---

**PCJ363H1 - Study Abroad Module**

*[This course will not be offered in 2021-22]*

Using Quercus, Skype, and email, students meet weekly in a virtual class that will assign readings, provide written assignments, and require a final assignment. Students are asked to situate their training from the PCJ program within the context of their academic study abroad experiences, though they may also have the opportunity to reflect on volunteer, activist, and social experiences. In written assignments, students are required to reflect on how their thinking has been influenced by their study abroad experiences, what they will do with their new perspectives upon returning to the University of Toronto, and how these affect how they think about peace, conflict, and justice.

**Prerequisite:** PCJ260Y1

**Exclusion:** PCJ361H1, PCJ362H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**PCJ444H1 - Special Topics in Peace and Conflict Studies**

**Previous Course Number:** PCS444H1

Topics vary annually. The objective of the course is to explore emerging issues in Peace and Conflict Studies. The focus of the course will be on a specific topic, rather than a broad survey of the field.
PCJ460H1 - Advanced Topics in Peace, Conflict and Justice

Previous Course Number: PCS460H1, UNI460H1
Hours: 24S

This course explores selected issues in the field of peace, conflict and justice. Topics may vary from year to year. Through a suite of recent readings, students will strive to critically examine implications and challenges of, and solutions to the issues being studied. This course is restricted to students enrolled in the Peace, Conflict and Justice Major or Specialist programs. Please visit the Trudeau Centre for Peace, Conflict and Justice website for current offering information.

Prerequisite: PCJ360H1 and PCJ362H1, or permission of the Program Director
Exclusion: PCS460H1, PCS460Y1, UNI460H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

PCJ461H1 - Research Methods in Peace, Conflict and Justice

Previous Course Number: PCS461H1, UNI460Y1
Hours: 48S

This course guides each student through their own individual research project, embedded in an interactive group learning process, in order to offer an applied introduction to research methods for peace, conflict and justice studies. Students work through the full research process, including: identifying a research question, learning how to conduct effective literature reviews, developing a rigorous research design, and applying quantitative and qualitative methods to answering questions. Rather than conducting research independently or studying research methods in isolation, the course combines the two: students learn collectively about the different steps in the research process while simultaneously applying those steps to their own research project. This is then complemented by presenting that research and discussing different research projects in class, so as to receive continuous feedback and be exposed to a variety of research methods and approaches.

Prerequisite: Enrolment restricted to students enrolled in the Peace, Conflict and Justice Specialist program
Corequisite: PCJ460H1

PCJ499H1 - Peace and Conflict Studies Independent Study Course

Previous Course Number: PCS499H1

This course is designed to provide students with the opportunity to explore topics not covered in the curriculum, or to develop a more detailed focus on topics covered. Approval of the program director is required. The student must obtain written agreement of the instructor who will supervise the independent study, submit the proposal to and obtain approval from the director and program administrator, who will then add the student to the course. Not eligible for CR/NCR option.

Applications are due two weeks before course enrollment deadlines for each semester.

Prerequisite: PCJ260Y1
Exclusion: PCS499H1
Recommended Preparation: For students enrolled in the Peace, Conflict and Justice Major or Specialist program.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

Pharmaceutical Chemistry

Collaborative Program of the Faculty of Arts & Science and the Leslie Dan Faculty of Pharmacy

Pharmaceutical Chemistry combines knowledge of the biological, medical, and physical sciences in the study of drug therapy. The emphasis is on the chemical nature of the reactions and interactions involved in drug therapy. The students will receive a solid background in the facets of chemistry the most relevant to drugs: physical, organic, and analytical chemistry. They will also learn the fundamental aspects of the synthesis, manufacture, use, and mode of action of drugs.

Undergraduate Office – General Enquiries: Nicole Treston, (416-978-6033), chem.undergrad@utoronto.ca

Program Director: Dr. David Dubins, (416-976-5303), d.dubins@utoronto.ca

Regarding Pharmaceutical Chemistry Programs

Pharmaceutical Chemistry combines knowledge of the biological, medical and physical sciences in the study of the scientific aspect of drug therapy. The emphasis is on the chemical nature of the reactions and interactions involved in drug therapy.

This program is offered jointly by the Leslie Dan Faculty of Pharmacy and the Faculty of Arts and Science. Students in the Pharmaceutical Chemistry Specialist program will receive a solid background in physical, organic and analytical chemistry, and will also learn the fundamental aspects of the synthesis, manufacture, use, and mode of action of drugs. The fourth-year project course gives students direct involvement in research.

We also offer an internship in which qualified students may spend 12 or 16 months working at a pharmaceutical company or research lab. This is a project-based, paid employment placement that takes place between the third and fourth years of undergraduate study. It provides the student with an opportunity to apply the knowledge acquired in the first three years of university to private- or public-sector settings. Placements are available in pharmaceutical and biotechnology companies, university research labs, university-affiliated organizations, or government research agencies. Note: September 2021 or January 2022 will be the last opportunity for Faculty of Arts & Science students to register for the PEY Co-op. Students in Year 3 in the Fall/Winter 2021-2022 session will be the last group of Faculty of Arts & Science students eligible to participate in PEY Co-op. Students starting Year 2 in Fall 2021 or later will only be eligible to participate in the Arts & Science Internship Program stream.

Arts & Science Internship Program

The new Arts & Science Internship Program (ASIP) stream is available to students entering their second year of study in Fall 2021 and enrolled in the Pharmaceutical Chemistry Specialist.

• Enrolment is limited and requires a supplemental application. Students enrolled in the ASIP stream will be required to complete mandatory Professional Development programming plus a minimum of 12 and maximum of 20 months of paid, full-time work experience. The time to degree completion for students enrolled in ASIP will normally be 5 years. There is an additional cost to participate in the ASIP stream.

• Students will typically be admitted to the ASIP stream for the Fall term of Year 2 of study, however starting in Fall 2022, in exceptional circumstances students, including transfer students, who enrolled in an eligible program in the Summer after Year 2 can be admitted to the ASIP stream for the Fall of Year 3. Year 3 entry into the program requires prior approval of the Associate Chair, Undergraduate or their designate and the Experiential Learning & Outreach Support (ELOS) Office.

• Further details about ASIP, including eligibility requirements and application procedures, can be found here. Students may also visit the ASIP webpage or contact the ELOS office at asip@utoronto.ca.

Pharmaceutical Chemistry Programs

Pharmaceutical Chemistry Specialist (Science Program) - ASSPE1211

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average
A minimum grade average is needed for entry, and this minimum changes each year depending on available
spaces and the number of applicants. The following courses must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1 and CHM136H1)/CHM151Y1
- (PHY131H1 and PHY132H1)/(PHY151H1 and PHY152H1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60%, or a grade average lower than 70% will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program.

Completion Requirements:

(13.0 credits, including 1.0 credit from 400-level courses)

NOTE: Some of the courses listed below may have prerequisites.

First Year:

1. BIO120H1, BIO130H1
2. (CHM135H1 and CHM136H1)/CHM151Y1
3. (PHY131H1 and PHY132H1)/(PHY151H1 and PHY152H1)

Second Year:

1. BCH210H1
2. BIO230H1
3. CHM220H1/CHM222H1, CHM223H1, CHM247H1/CHM249H1
4. PCL201H1
5. PHC230H1

Third Year:

1. CHM217H1
2. PHC300H1, PHC301H1, PHC320H1, PHC330H1, PHC340Y1

Fourth Year:

1. PHC489Y1/CHM499Y1
2. 2.0 credits from: CHM317H1, CHM342H1, CHM347H1, CHM379H1, CHM410H1, CHM414H1, CHM417H1, CHM427H1, CHM440H1, JPM300H1, JPM400Y1, PCL362H1, PCL486H1, PHC331H1, PHC401H1, PHC420H1, PHC421H1, PHC430H1, PHC431H1, PHC432H1, PHC435H1, PHC460H1, PHC462H1, PHC470H1, PSL300H1, PSL301H1

Note that not all of the 400-level PHC courses are offered every academic year.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream or PEY Co-op.

Note: September 2021 or January 2022 will be the last opportunity for Faculty of Arts & Science students to register for PEY Co-op. Students in Year 3 in the Fall/Winter 2021-2022 session will be the last group of Faculty of Arts & Science students eligible to participate in PEY Co-op. Students starting Year 2 in Fall 2021 or later will only be eligible to participate in the Arts & Science Internship Program stream.

Pharmaceutical Chemistry Courses

PHC230H1 - Pharmaceutics 1

**Hours:** 36L/12T

An introduction to the key concepts in the design, manufacture, and use of efficacious dosage forms. The course covers the characteristics of different delivery routes.

**Prerequisite:** (CHM135H1, CHM136H1)/(CHM138H1, CHM139H1)/CHM151Y1; CHM220H1/CHM222H1

**Exclusion:** PHM141H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

PHC300H1 - Molecular Pharmacology 1

**Hours:** 24L/12T

Structural and mechanistic determinants of drug action at the molecular level. Topics include the physical-chemical properties of drugs per se as they relate to therapeutic intervention and the biophysical and biochemical properties of enzymes and nucleic acids that underlie and are affected by their interactions with drugs.

**Prerequisite:** (CHM135H1, CHM136H1)/(CHM138H1, CHM139H1)/CHM151Y1; CHM220H1/CHM222H1

**Exclusion:** PCL302H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)
PHC301H1 - Molecular Pharmacology 2

Hours: 36L/12T

Structural and mechanistic determinants of drug action via macromolecules that effect cellular signalling. Neurohumoral receptors and other signalling proteins are grouped according to their structure and mechanism of action. Native properties and their modulation by drugs are discussed in the context of basic principles of molecular pharmacology.

Prerequisite: (CHM135H1, CHM136H1)/(CHM138H1, CHM139H1)/CHM151Y1; CHM220H1/CHM222H1;
BCH210H1
Exclusion: PCL302H1, PHM140H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PHC320H1 - Medicinal Chemistry

Hours: 36L

Modern discovery and synthesis of antibiotics, antineoplastics, antiviral and other therapeutic agents.

Prerequisite: BCH210H1, CHM247H1/CHM249H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PHC330H1 - Pharmaceutics 2

Hours: 36L/12T

This course presents a detailed examination of the material properties of pharmaceuticals and the role of cellular processes in delivery of a drug to its site of action.

Prerequisite: (CHM135H1, CHM136H1)/(CHM138H1, CHM139H1)/CHM151Y1; CHM220H1/CHM222H1;
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PHC331H1 - Establishing the Bioequivalence of Pharmaceutical Products

Hours: 48L

PHC340Y1 - Pharmaceutical Chemistry Laboratory

Hours: 24L/96P

The scientific basis and practical techniques relevant to modern pharmaceutical development. This course is restricted to Pharmaceutical Chemistry Specialist program students.

Prerequisite: CHM247H1/CHM249H1:
(CHM220H1/CHM222H1), CHM223H1; BCH210H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PHC401H1 - Drug Transport across Biological Membranes

Hours: 24L

The goal of this course is to provide students with knowledge of the molecular processes involved in drug transport across biological cell membranes with emphasis on their physiological and clinical significance. This course is restricted to Pharmaceutical Chemistry Specialist program students.

Prerequisite: PHC301H1, and enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.
Corequisite: PHC300H1
Exclusion: JFK1122H
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PHC420H1 - Application of Medicinal Chemistry to Pharmacology

Hours: 24L
This course shows students the links between basic science and the drugs used therapeutically to treat clinical problems. This course is restricted to Pharmaceutical Chemistry specialist program students.

**Prerequisite:** PHC301H1, PHC320H1, and enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

**Exclusion:** PHM240H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PHC421H1 - Biomolecular Interactions and Thermodynamics I**

**Hours:** 36L

This course will consider many of the topics presented in the first half in much greater detail including a rigorous examination of the interpretation of experimental data. This course is intended for students whose research or interest is in the thermodynamics of biological molecules. This course is restricted to Pharmaceutical Chemistry specialist program students.

**Prerequisite:** Enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

**Exclusion:** PHM1130H

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PHC430H1 - Recent Developments in Dosage Form Design**

**Hours:** 24L

Introduction to controlled drug delivery: Mechanisms and kinetics of controlled drug release. Fundamental theories and mathematical tools for the design of modern dosage forms. Development and applications of controlled drug delivery dosage forms. This course is restricted to Pharmaceutical Chemistry specialist program students.

**Prerequisite:** Enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

**Exclusion:** PHM324H1, PHM1109H

**Recommended Preparation:** PHC230H1, PHC330H1, PHC340Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PHC431H1 - Selected Topics in Drug Development**

**Hours:** 24L

In-depth discussion of implementation of pharmaceutical sciences in drug development strategies. Students will apply fundamental principles of pharmaceutics and drug delivery to current problems in the pharmaceutical industry. This course is restricted to Pharmaceutical Chemistry specialist program students.

**Prerequisite:** Enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

**Exclusion:** JFK1120H

**Recommended Preparation:** PHC230H1, PHC330H1, PHC340Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PHC432H1 - Nanomedicines in Oncology**

**Hours:** 24L

This course covers a range of topics that pertain to the development and application of nanomedicines in oncology. Students will gain an understanding of the biological barriers to drug delivery in oncology as well as the tremendous heterogeneity in cancer and the challenge this presents for treatment. The concepts of passive and active targeting of nanomedicines will be covered with critical assessment of the enhanced permeability and retention effect. A detailed overview of the most advanced nanotechnology-platforms for drug delivery (i.e., liposomes, block copolymer micelles and polymer-drug conjugates) will be provided with additional discussion of new emerging platforms. The integration of imaging in drug development and development of theranostics and therapeutic-diagnostic pairs will also be discussed. Special emphasis on critical evaluation of scientific literature and pre-clinical/clinical studies will be made throughout the course.

**Prerequisite:** PHC230H1, PHC330H1 and enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PHC435H1 - Pharmaceutical Data Acquisition and Analysis**

**Hours:** 26P
Application and development of devices for the purpose of collecting and analyzing experimental data in pharmaceutical development and manufacture.

**Prerequisite:** BCH210H1, CHM247H1/CHM249H1, (MAT135H1, MAT136H1)/MAT137Y1, PHC340Y1 and enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

### PHC460H1 - Fundamentals of Drug Discovery

**Hours:** 24L

Lectures by scientists from academia and industry, and student seminars based on journal articles dealing with strategies for discovering new drugs for therapy and diagnosis. This course is restricted to Pharmaceutical Chemistry specialist program students.

**Prerequisite:** BIO120H1, BIO130H1, PHC301H1 and enrolled as a Year 4 student in the Pharmaceutical Chemistry program.

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

### PHC462H1 - Clinical Drug Development

**Hours:** 24L

This course is designed to broaden student’s understanding of the development and licensing of new drugs and how scientific principles, ethics, governmental regulations and commercial considerations are coordinated for designing clinical trials. The format involves lectures, group discussion and student presentations. This course is restricted to Pharmaceutical Chemistry specialist program students.

**Prerequisite:** PHC230H1, PHC301H1, PHC340Y1 and enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

**Exclusion:** JFK1120H

**Distribution Requirements:** Science

**Breadth Requirements:** Society and its Institutions (3)

### PHC470H1 - Global Pharmaceutical Policy

**Hours:** 24L/2T

This course is designed for students who are interested in the critical analysis of global health policy and the interrelationship between global and domestic policy issues. The course will introduce students generally to the basic concepts and issues in global health with a particular focus on pharmaceutical policy. We will address key issues in health and discuss core institutional and transnational actors, how governments in different jurisdictions manage public health responsibilities, the tension between economic imperatives and health objectives, global obligations, and pressure from special interest groups. More narrowly, we will analyze a breadth of complex policies questions. Examples include: the research and development global divide, policy issues influences on pharmaceutical policy, how global commitments, such as membership in the World Trade Organization, conflict with or correspond to domestic policy directions and national sovereignty. Guest speakers will lead some sessions. This course will consist of lectures, guest discussions, case studies and student-led presentations. This is restricted to students in the Pharmaceutical Chemistry specialist program.

**Prerequisite:** Enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

**Exclusion:** PHM320H1, PHM1124H

**Breadth Requirements:** Society and its Institutions (3)

### PHC489Y1 - Pharmaceutical Chemistry Research

**Hours:** 165P

This course will provide research experience under the supervision of a Departmental staff member. The goal is to deepen the student’s understanding of the scientific basis and practical techniques relevant to modern pharmaceutical development. This course is restricted to Pharmaceutical Chemistry specialist program students. Not eligible for CR/NCR option.

**Prerequisite:** Permission from the Course Coordinator and enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

Introduction

Pharmacology and Toxicology are integrative biological sciences that examine the properties of chemical compounds and their interactions with living systems. They provide the scientific basis for the study of chemical actions in the health sciences, the use of drugs as therapeutic agents or as tools in scientific research, the development and control of pharmaceutical products, and the investigation and control of pollutants and poisons in natural and social environments. The Department of Pharmacology and Toxicology offers four Specialist and two Major undergraduate programs of study that are jointly sponsored by the Faculties of Arts and Science and Medicine. The Specialist programs have the added benefit of providing students with opportunities to learn advanced laboratory techniques and to gain real-world experience through supervised independent research projects and participation in the Professional Experience Year Co-op or the Arts & Science Internship Program (see below). Students who intend to pursue graduate research and/or careers in pharmacology or toxicology are encouraged to enrol in a Specialist program because of the opportunities for additional experiential learning.

Students wishing to enrol in the Biomedical Toxicology Specialist (ASSPE2573) or in the Pharmacology Specialist (ASSPE2082) will initially apply to the Joint Pharmacology and Biomedical Toxicology Specialist (ASSPE2340) at the end of their first year of study. Students wishing to enrol in the Biomedical Toxicology Major (ASMAJ2573) or in the Pharmacology Major (ASMAJ2082) will initially apply to a general departmental Major (ASMAJ2675) at the end of their first year of study and then select the focus for their future studies (Biomedical Toxicology or Pharmacology) prior to the start of the third year of study. Students wishing to enrol in the Environment and Toxicology Specialist (ASSPE0605) will apply directly to the program after completion of first year prerequisite courses. First and second year courses are the same for students within either the Specialist programs (ASSPE2082/ASSPE2340/ASSPE2573) or the Major programs (ASMAJ2675/ASMAJ2082/ASMAJ2573) within the Department.

For further information about registration and courses, consult the Arts & Science Program Toolkit and Course Enrolment Instructions, and visit our website at: www.pharmtox.utoronto.ca.

Regarding Pharmacology and Toxicology Programs

Professional Experience Year Co-op

The Professional Experience Year Co-op (PEY Co-op) program is a 12-16 month paid employment placement within pharmaceutical/biotechnology/chemical companies, university research laboratories, university-affiliated organizations, consulting companies or government research agencies. The PEY Co-op takes place between the 3rd and 4th years of undergraduate study and is open to Specialists in Pharmacology, Biomedical Toxicology and Environment and Toxicology who have a cGPA of at least 3.0. Students who participate in this program agree to return to their Specialist program within the Department to complete their 4th year and degree program as enrolled prior. The PEY Co-op provides an excellent opportunity for real-world experience in drug development, project management, client relations, basic and clinical research, information management and regulatory affairs. Note: September 2021 or January 2022 will be the last opportunity for Faculty of Arts & Science students to register for the PEY Co-op. Students in Year 3 in the Fall/Winter 2021-2022 session will be the last group of Faculty of Arts & Science students eligible to participate in PEY Co-op. Students starting Year 2 in Fall 2021 or later will only be eligible to participate in the Arts & Science Internship Program stream.
Arts & Science Internship Program

The new Arts & Science Internship Program (ASIP) stream is available to students entering their second year of study in Fall 2021 and enrolled in the Biomedical Toxicology Specialist, Environment & Toxicology Specialist, Pharmacology Specialist, and the Specialist in Pharmacology and Biomedical Toxicology.

- Enrolment is limited and requires a supplemental application. Students enrolled in the ASIP stream will be required to complete mandatory Professional Development programming plus a minimum of 12 and maximum of 20 months of paid, full-time work experience. The time to degree completion for students enrolled in ASIP will normally be 5 years. There is an additional cost to participate in the ASIP stream.

- Students will typically be admitted to the ASIP stream for the Fall term of Year 2 of study, however starting in Fall 2022, in exceptional circumstances students, including transfer students, who enrolled in an eligible program in the Summer after Year 2 can be admitted to the ASIP stream for the Fall of Year 3. Year 3 entry into the program requires prior approval of the Associate Chair, Undergraduate or their designate and the Experiential Learning & Outreach Support (ELOS) Office.

- Further details about ASIP, including eligibility requirements and application procedures, can be found here. Students may also visit the ASIP webpage or contact the ELOS office at asip@utoronto.ca.

NOTE: Students cannot combine any MAJOR or SPECIALIST from this program with another MAJOR or SPECIALIST from this program for their degree.

Pharmacology and Toxicology Programs

Biomedical Toxicology Specialist (Science Program) - ASSPE2573

Biomedical toxicology has emerged as an important science addressing drug safety and the adverse consequences of chemical exposure. The Biomedical Toxicology Specialist program examines the harmful effects of chemicals on the health and behaviour of individuals and society. The safety/toxicity of a wide array of chemicals is examined including pharmaceutical preparations, herbal products, natural toxins and environmental contaminants, with a focus on their effects on human health. This program emphasizes the application of toxicological knowledge and risk assessment and prepares students for a variety of job opportunities following its completion as well as for further study in graduate research or professional programs such as Medicine, Dentistry, and Pharmacy. (Note: Students interested in professional programs should contact the respective faculties to inquire about specific transfer credits.) Many graduates of the Biomedical Toxicology Specialist program pursue careers in scientific research, forensic science, nutrition and food sciences, governmental agencies, consulting agencies, and industrial settings including the pharmaceutical and chemical industries. Students learn about basic and clinical toxicology and related areas through lectures, tutorials, laboratories, and independent research projects. The senior research project course enables students to gain valuable research experience while working under the supervision of an individual faculty member in either a laboratory-based or a non-laboratory-based setting.

Enrolment Requirements:
This is a limited enrolment program. Students must have completed 8.0 credits and meet the requirements listed below to enroll. **NOTE:** Students interested in this program should initially apply to the Specialist in Pharmacology & Biomedical Toxicology Program (ASSPE2340) after their first year of study. Students in ASSPE2340 will have the opportunity to move into the Biomedical Toxicology Specialist (ASSPE2573) following their second year of study.

Variable Minimum Grade or Variable Minimum Grade Average
A minimum grade/minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- ( CHM135H1, CHM136H1)/ CHM151Y1
- 1.0 credit from ( MAT135H1 and MAT136H1)/MAT137Y1/ MAT157Y1/( PHY131H1 and PHY132H1)/( PHY151H1 and PHY152H1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in any of these courses, or a combined grade average lower than 75% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying
through ACORN, students applying in their second year or later are asked to please contact the department directly at undergrad.pharmtox@utoronto.ca, specify which program you would like to be considered for, and provide your student number. Please consult the Arts & Science Program Toolkit for more information on program enrolment.

Notes:

- While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 80s; average = mid 80s.
- **Students wishing to enroll in the Biomedical Toxicology Specialist** will initially apply to the Joint Specialist in Pharmacology and Biomedical Toxicology (ASSPE2340). After admission, students can then choose to transfer to the Biomedical Toxicology Specialist. First and second year courses are the same for all Specialist programs within the Department (ASSPE2082/ASSPE2340/ASSPE2573).
- Students cannot combine the Biomedical Toxicology Specialist with either departmental Major programs (Biomedical Toxicology or Pharmacology).
- Students wishing to enroll after their second year who have taken PCL201H1 will be considered on a case by case basis. Successful completion of required pre-requisite courses is required to further enrol in upper level program courses. Students may not transfer to the Major program from the Specialist after completion of PCL474Y1 or the Arts & Science Internship Program (ASIP).

**Completion Requirements:**

(14.5 credits)

First Year: BIO120H1, BIO130H1, (CHM135H1, CHM136H1)/CHM151Y1, and 1.0 credit from any combination of (MAT135H1, MAT136H1), PHY131H1/PHY151H1, PHY132H1/PHY152H1 (see NOTE 1)

Students in this program have the option to enrol in the Arts & Science Internship Program (ASIP) stream.

Second Year: BCH210H1, BIO230H1/ BIO255H1, BIO260H1/HMB265H1, CHM247H1/CHM249H1, STA288H1, PCL201H1, (PSL300H1, PSL301H1) (NOTE: PSL201Y1 is not acceptable)

Third Year: PCL302H1, PCL362H1, at least one 0.5 credit from PCL367H1 or PCL368H1

Third or Fourth Year: LMP363H1 and 2.5 credits at least 1.5 credits from PCL courses: JPM300H1/ PCL345H1/ PCL367H1 or PCL368H1 (see NOTE 2)/ PCL385H1/ PCL389H1/ PCL475H1/ PCL476H1/ PCL475Y1/

**NOTES:**

1. Any PHY/MAT courses should be completed during the first year and included for program enrolment.
2. At least 0.5 credit from PCL367H1 or PCL368H1 is required for the program, however if desired the alternative course can be taken as a program elective.
3. Enrolment in any of PCL474Y1 or JPM400Y1 is limited and requires permission from the Department of Pharmacology and Toxicology. Students must receive prior consent from the course coordinator according to Departmental guidelines before the Department will register the students in the course. Students can take either course as their required independent project, or may take JPM400Y1 as an additional elective. It is the student’s responsibility to make all necessary preparations before the session starts (see course description).

**Environment & Toxicology Specialist (Science Program) - ASSPE0605**

This program is jointly sponsored by the Department of Pharmacology and Toxicology and the School of the Environment. For additional information see “School of the Environment” (www.environment.utoronto.ca) or consult our website: www.pharmtox.utoronto.ca.
The Environment and Toxicology Specialist program is an interdisciplinary program which spans the social, physical and life sciences and integrates study of the effects of chemicals not only on the health and behaviour of human beings but on whole ecosystems as the adverse effects associated with therapeutic and environmental chemicals are discussed. This program emphasizes the application of knowledge of environmental toxicology and risk assessment and prepares students for a variety of job opportunities following its completion. Graduates of the Environment and Toxicology program may pursue careers in scientific research, environmental science, conservation science, governmental agencies, consulting agencies, and within chemical, manufacturing or agriculture industries. Students learn to integrate basic environmental and life science with particular aspects of clinical toxicology and related areas through lectures, tutorials, and laboratory and independent research project experience. The senior independent research project course enables students to gain valuable research experience while working under the supervision of an individual faculty member in either a laboratory-based or a non-laboratory-based setting.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enroll.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1, CHM136H1)/CHM151Y1
- 1.0 credit from (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1/(PHY131H1 and PHY132H1)/(PHY151H1 and PHY152H1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in each course, or a combined grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at undergrad.pharmtox@utoronto.ca, specify which program you would like to be considered for, and provide your student number. Please consult the Arts & Science Program Toolkit for more information on program enrolment.

Notes:

- Students cannot combine a Biomedical Toxicology Major program with an Environment and Toxicology Specialist program for their degree.
- Students who wish to enroll in the program after their second year will be considered on a case-by-case basis. Successful completion of required prerequisite courses is required to enroll in further upper-level program courses.

Completion Requirements:

(14.0 credits, including 4.0 credits at the 300+level, 1.0 credit of which must be at the 400-level).

First Year: BIO120H1, BIO130H1, (CHM135H1, CHM136H1)/CHM151Y1, and at least 1.0 credit from MAT135H1, MAT136H1, MAT137Y1, MAT157Y1, PHY131H1, PHY132H1, PHY151H1, PHY152H1

Students in this program have the option to enrol in the Arts & Science Internship Program (ASIP) stream.

Second Year: BCH210H1, BIO230H1, BIO255H1, ENV221H1, ENV222H1, PCL201H1 and CHM247H1. 1.0 credit from (BIO270H1, BIO271H1)/(PSL300H, PSL301H1) (see NOTE 1)

Third and Fourth Years:

BIO220H1, ENV234H1, JGE321H1, ENV334H1, CHM210H1, PCL302H1, PCL362H1, (PCL482H1, PCL483H1)/PCL473Y1
One of: STA220H1/STA221H1/STA288H1/EEB225H1 (see NOTE 2)
One of: ENV421H1/PCL367H1/PCL474Y1 (see NOTE 2) At least 1.0 credit from: ENV341H1,PHY231H1, ENV337H1/JEE337H1, CHM310H1, ESS463H1, JPM300H1, PCL386H1, PCL477H1, PCL481H1, PCL484H1, PCL490H1, LMP301H1, LMP363H1 (see NOTE 3)

An Integrative, Inquiry-Based Activity Requirement must be satisfied.

The requirement for an integrative, inquiry-based and/or experiential activity must be met by completing at least one of the following: PCL297H1, PCL367H1, PCL397Y0, ENV421H1, PCL474Y1. Students who complete the Arts & Science Internship Program (ASIP) stream or PEY Co-op will also meet this requirement.
Pharmacology and Toxicology

**Note:** September 2021 or January 2022 will be the last opportunity for Faculty of Arts & Science students to register for PEY Co-op. Students in Year 3 in the Fall/Winter 2021-2022 session will be the last group of Faculty of Arts & Science students eligible to participate in PEY Co-op. Students starting Year 2 in Fall 2021 or later will only be eligible to participate in the Arts & Science Internship Program stream.

**Notes:**

1. **PSL300H1** and **PSL301H1** require MAT 100-level/PHY 100-level courses.
2. **PCL201H1** and **PCL302H1** are pre-requisites for students intending to take **PCL474Y1**. Students intending to take **PCL474Y1** must obtain permission from the Undergraduate Student Advisor of the School of the Environment 3 months prior to the intended date of enrolment. Students must also consult with the Department of Pharmacology and Toxicology at least 3 months prior to the intended date of enrolment.
3. Students taking **PCL481H1** must take **PCL302H1** and **PCL362H1** as prerequisites. Students taking **PCL477H1** must take **BCH210H1** prior. **Students taking ENV421H1** or **PCL367H1** must take 1.5 credits from program electives requirement list of courses to ensure 14.0 program credits.

**Pharmacology Specialist (Science Program) - ASSPE2082**

Pharmacology is an integrative medical science that builds upon the core foundational disciplines of the basic life sciences. The Pharmacology Specialist program aims to provide students with an understanding of the therapeutic properties and clinical uses of externally administered chemical substances in the whole body, as well as the mechanisms of their actions and interactions with molecular, cellular and tissue targets. This understanding prepares students for a variety of either research-based or non-research-based careers, including positions in the pharmaceutical and biotechnology industries, in government agencies, in research institutes and in universities. Students learn about both basic and clinical pharmacology through lectures, tutorials, laboratories and independent research projects. The senior research project course enables students to gain valuable research experience while working under the supervision of an individual faculty member in either a laboratory-based or a non-laboratory-based setting.

Pharmacology (and its application in clinical therapeutics) plays a prominent role in society, and a comprehension of drug mechanisms and uses is fundamental to career success in the fields of medicine, dentistry, pharmacy and nursing. While some students take the Pharmacology Specialist program in preparation for these professional programs, students are advised to contact the respective Faculties directly for questions related to transfer credits.

**Enrolment Requirements:**

This is a limited enrolment program. Students must have completed 8.0 credits and meet the requirements listed below to enroll. **NOTE:** Students interested in this program should initially apply to the Specialist in Pharmacology & Biomedical Toxicology Program (ASSPE2340) after their first year of study. Students in ASSPE2340 will have the opportunity to move into the Pharmacology Specialist (ASSPE2082) following their second year of study.

**Variable Minimum Grade or Variable Minimum Grade Average**

A minimum grade/minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- **BIO120H1** and **BIO130H1**
- **(CHM135H1, CHM136H1)/CHM151Y1**
- 1.0 credit from **(MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1/PHY131H1 and PHY132H1)**

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in each course, or a combined grade average lower than 75% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at undergrad.pharmtox@utoronto.ca, specify which program you would like to be considered for, and provide your student number. Please consult the **Arts & Science Program Toolkit** for more information on program enrolment.

**Notes:**

- While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 80s; average = mid 80s.
- **Students wishing to enroll in the Pharmacology Specialist will initially apply to**
the Joint Specialist in Pharmacology and Biomedical Toxicology (ASSPE2340). After admission, students can then choose to transfer to the Biomedical Toxicology Specialist. First and second year courses are the same for all Specialist programs within the Department (ASSPE2082/ASSPE2340/ASSPE2573).

- Students cannot combine the Biomedical Toxicology Specialist with either departmental Major programs (Biomedical Toxicology or Pharmacology).
- Students wishing to enroll after their second year who have taken PCL201H1 will be considered on a case by case basis. Successful completion of required pre-requisite courses is required to further enroll in upper level program courses. Students may not transfer to the Major program from the Specialist after completion of PCL472Y1 or the Arts & Science Internship Program (ASIP).

Completion Requirements:

(14.5 credits)

First Year: BIO120H1, BIO130H1, (CHM135H1, CHM136H1)/CHM151Y1, and 1.0 credit from any combination of (MAT135H1, MAT136H1), PHY131H1/PHY151H1, PHY132H1/PHY152H1 (see NOTE 1)

Students in this program have the option to enrol in the Arts & Science Internship Program (ASIP) stream.

Second Year: BCH210H1, BIO230H1/ BIO255H1, BIO260H1/ HMB265H1, CHM247H1/ CHM249H1, STA288H1, PCL201H1, (PSL300H1, PSL301H1) (NOTE: PSL201Y1 is not acceptable)

Third Year: BCH311H1/ PSL350H1, PCL302H1, at least one 0.5 credit from PCL367H1 or PCL368H1

Third or Fourth Year: PCL469H1 and 3.5 credits with at least 1.5 credits from PCL courses: JPM300H1/ PCL345H1/ PCL367H1 or PCL368H1 (see NOTE 2)/ PCL386H1/ PCL389H1/ PCL475H1/ PCL476H1/ PCL475Y1/ PCL477H1/ PCL484H1/ PCL490H1/ JPM400Y1/ ANA300Y1/ BCH340H1/ BCH450H1

Fourth Year: PCL402H1, PCL470H1/ PCL470Y1, PCL472Y1/ JPM400Y1 (see NOTE 3)

An Integrative, Inquiry-Based Activity Requirement must be satisfied.

The requirement for an integrative, inquiry-based and/or experiential activity must be met by completing at least one of the following: PCL297H1, PCL389H1, PCL397Y0, PCL472Y1, PCL474Y1, JPM400Y1. Students who complete the Arts & Science Internship Program (ASIP) stream or PEY Co-op will also meet this requirement.

Note: September 2021 or January 2022 will be the last opportunity for Faculty of Arts & Science students to register for PEY Co-op. Students in Year 3 in the Fall/Winter 2021-2022 session will be the last group of Faculty of Arts & Science students eligible to participate in PEY Co-op. Students must receive prior consent from course coordinator according to Departmental guidelines before the Department will register them in the course. Students can take either course as their required independent project, or may take JPM400Y1 as an additional elective. It is the student’s responsibility to make all necessary preparations before the session starts (see course description).

Specialist in Pharmacology and Biomedical Toxicology (Science Program) - ASSPE2340

Pharmacology and Biomedical Toxicology are complementary sciences, and the Pharmacology and Biomedical Toxicology Specialist combines the requirements of the two distinct specialist programs. The Specialist program integrates knowledge of pharmacology – the understanding of the therapeutic properties and clinical applications of externally administered chemical substances in the whole body and the mechanisms of their actions and interactions with their intended targets, while biomedical toxicology examines the harmful effects of exogenous chemicals on the health and behaviour of individuals and society, addressing drug safety and the adverse consequences of chemical exposure. Biomedical toxicology includes understanding the safety/toxicity of a wide array of chemicals (pharmaceutical preparations, herbal products, natural toxins and environmental contaminants) with a focus on their effects and adverse consequences on human health.

Both Pharmacology and Biomedical Toxicology are integrative life sciences which build on the core foundational disciplines of the basic life sciences and the
prominent role each science plays in society. A comprehension of the biological mechanisms of action and potential uses of chemicals are key to career success in the fields of medicine, dentistry, pharmacy and nursing. The Specialist program prepares students for a variety of job opportunities following its completion as well as for further study in graduate research or professional programs such as Medicine, Dentistry, and Pharmacy. (Note: Students interested in professional programs should contact the respective faculties to inquire about specific transfer credits.) Graduates of this rigorous program will have access to an impressive variety of job opportunities in either research-based or non-research-based careers, including scientific research in research institutes and in universities, positions in the pharmaceutical, biotechnology and chemical industries, forensic science, nutrition and food sciences, government or consulting agencies. Students learn about both basic and clinical pharmacology and biomedical toxicology through lectures, tutorials, small group sessions, laboratories and independent research projects. The senior research project course enables students to gain valuable research experience while working under the supervision of an individual faculty member in either a laboratory-based or a non-laboratory-based setting.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade or Variable Minimum Grade Average

A minimum grade/minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1, CHM136H1)/CHM151Y1
- 1.0 credit from (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1/(PHY131H1 and PHY132H1)/(PHY151H1 and PHY152H1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in each course, or a combined grade average lower than 75% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at undergrad.pharmtox@utoronto.ca, specify which program you would like to be considered for, and provide your student number. Please consult the Arts & Science Program Toolkit for more information on program enrolment.

Notes:

- While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 80s; average = mid 80s.
- Students wishing to enroll in the Pharmacology Specialist (ASSPE2082) or Biomedical Toxicology Specialist (ASSPE2573) will initially apply to the Joint Specialist in Pharmacology and Biomedical Toxicology (ASSPE2340). After admission, students can then choose to transfer to the Biomedical Toxicology Specialist. First and second year courses are the same for all Specialist programs within the Department (ASSPE2082/ASSPE2340/ASSPE2573).
- Students cannot combine the Biomedical Toxicology Specialist with either departmental Major programs (Biomedical Toxicology or Pharmacology).
- Students wishing to enroll after their second year who have taken PCL201H1 will be considered on a case by case basis. Successful completion of required pre-requisite courses is required to further enroll in upper level program courses. Students may not transfer to the Major program from the Specialist after completion of PCL472Y1/PCL474Y1 courses or the Arts & Science Internship Program (ASIP).

Completion Requirements:

(15.0 credits)

First Year: BIO120H1, BIO130H1, (CHM135H1, CHM136H1)/CHM151Y1, and 1.0 credit from any combination of (MAT135H1, MAT136H1), PHY131H1/PHY151H1, PHY132H1/PHY152H1 (see NOTE 1)

Students in this program have the option to enrol in the Arts & Science Internship Program (ASIP) stream.

Second Year: BCH210H1, BIO230H1, BIO255H1, BIO260H1/HMB265H1, CHM247H1/CHM249H1, STA288H1, PCL201H1, (PSL300H1, PSL301H1) (NOTE: PSL201Y1 is not acceptable)

Third Year: BCH311H1/PSL350H1, PCL302H1, PCL362H1, at least one 0.5 credit from PCL367H1 or PCL368H1 (see NOTE 2)
Biomedical Toxicology Major (Science Program) - ASMAJ2573

Biomedical toxicology has emerged as an important science addressing drug safety and the adverse consequences of chemical exposure. The Biomedical Toxicology Major program examines the harmful effects of chemicals on the health and behavior of individuals and society. The safety/toxicity of a wide array of chemicals is examined including pharmaceutical preparations, herbal products, natural toxins, and environmental contaminants, with a focus on their effects on human health. Students learn about basic and clinical toxicology and related areas through lectures, tutorials and class discussions/debates.

This program includes the application of toxicological knowledge and risk assessment and prepares students for a variety of job opportunities following its completion as well as for further study in graduate research or professional programs such as Medicine, Dentistry, and Pharmacy. (Note: Students interested in professional programs should contact the respective faculties to inquire about specific transfer credits.) Many graduates of the Biomedical Toxicology major program pursue careers in scientific research, forensic science, nutrition and food sciences, governmental agencies, consulting agencies, and industrial settings including the pharmaceutical and chemical industries.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 8.0 credits and meet the requirements listed below to enroll. **NOTE:** Students interested in this program should initially apply to the general Major (ASMAJ2675) after their first year of study. Following their second year of study, students in ASMAJ2675 must choose to pursue either the Pharmacology Major (ASMAJ2082) or the Biomedical Toxicology Major (ASMAJ2573).

**Variable Minimum Grade or Variable Minimum Grade Average**

A minimum grade/minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1, CHM136H1)/CHM151Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in any of these courses, or a combined grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum

NOTES:

1. Any PHY/MAT courses should be completed during the first year and included for program enrolment.
2. At least one 0.5 credit from PCL367H1 or PCL368H1 is required for the program, however if desired the alternative course can be taken as a program elective.
3. Enrolment in any of PCL472Y1/ PCL474Y1 or JPM400Y1 is limited and requires permission from the Department of Pharmacology and Toxicology. Students must receive prior consent from the course coordinator according to Departmental guidelines before the Department will register them in the course. Students can take either course as their required independent project, or may take JPM400Y1 as an additional elective. It is the student’s responsibility to make all necessary preparations before the session starts (see course description).

Third or Fourth Year: LMP363H1, PCL469H1, and 1.5 credits from the following courses: JPM300H1/ PCL345H1/ PCL367H1 or PCL368H1 (see NOTE 2)/ PCL386H1/ PCL389H1/ PCL475H1/ PCL476H1/ PCL475Y1/ PCL477H1/ PCL484H1/ PCL490H1/ JPM400Y1/ LMP301H1. Additional courses that may strengthen your background in this program can be taken, but will not count towards your program: ANA300Y1/ ANA301H1/ BCH340H1/ CHM310H1/ ESS463H1

Fourth Year: PCL402H1; PCL470H1/ PCL470Y1; (PCL482H1, PCL483H1)/ PCL473Y1; PCL472Y1/ PCL474Y1/ JPM400Y1 (see NOTE 3); PCL481H1

An Integrative, Inquiry-Based Activity Requirement must be satisfied.

The requirement for an integrative, inquiry-based and/or experiential activity must be met by completing at least one of the following: PCL297H1; PCL369H1, PCL397Y0, PCL472Y1/ PCL474Y1/ JPM400Y1. Students who complete the Arts & Science Internship Program (ASIP) stream or PEY Co-op will also meet this requirement.

**Note:** September 2021 or January 2022 will be the last opportunity for Faculty of Arts & Science students to register for PEY Co-op. Students in Year 3 in the Fall/Winter 2021-2022 session will be the last group of Faculty of Arts & Science students eligible to participate in PEY Co-op. Students starting Year 2 in Fall 2021 or later will only be eligible to participate in the Arts & Science Internship Program stream.

Pharmacology and Toxicology

NOTES:

First or Second Year: BIO120H1 and BIO130H1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in any of these courses, or a combined grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum

Fourth Year: (PCL482H1, PCL483H1)/PCL473Y1

Notes:

1. Students are not allowed to enroll concurrently in the Major Program in Pharmacology and the Major Program in Toxicology.
2. Students are not allowed to enroll concurrently in the Major Program in Pharmacology and a Specialist Program in Toxicology.
3. Students are not permitted to take PCL472Y1 or PCL474Y1.

Pharmacology Major (Science Program) - ASMAJ2082

Pharmacology is an integrative medical science that builds upon the core foundational disciplines of the basic life sciences. This program is intended for students who want to gain knowledge in Pharmacology in combination with a separate and complementary area of study and is designed for students interested in broad, multidisciplinary training. The Pharmacology Major program is designed to provide students with a broad understanding of the therapeutic properties and clinical uses of externally administered chemical substances in the whole body, as well as the mechanisms of their actions and interactions with molecular, cellular and tissue targets. Students learn about both basic and clinical pharmacology through lectures, tutorials and small group sessions.

This understanding prepares students for a variety of either research-based or non-research-based careers, including positions in the pharmaceutical and biotechnology industries, in government agencies, in research institutes and in universities. Pharmacology (and its application in clinical therapeutics) plays a prominent role in society, and a comprehension of drug mechanisms and uses is fundamental to career success in the fields of medicine, dentistry, pharmacy and nursing. While some students take the Pharmacology Major program in preparation for these professional programs, students are advised to contact the respective Faculties directly for questions related to transfer credits.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 8.0 credits and meet the requirements listed below to enroll. NOTE: Students interested in this program should initially apply to the general Major (ASMAJ2675) after their first year of study. Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL200H1 - Drugs & the Brain

Hours: 24L

This course introduces students to prescribed and illicit drugs that affect the brain. Lectures cover drug pharmacology and explain how drugs alter mood, perception, cognition, and arousal by affecting different aspects of brain function.
function. The societal impact of these prescribed and illicit drugs is also discussed.

Note: This course is not intended for upper-year students who have already completed BCH210H1 or other exclusion courses. Upper-year Life Science students who are excluded and are interested in this content should look into PCL475H1 and/or PCL476H1 as the more appropriate choice.

Exclusion: PSY396H1, PCL302H1, BCH210H1, BCH242Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL201H1 - Introduction to Pharmacology and Pharmacokinetic Principles

Hours: 36L/6T

A general introduction to the principles of pharmacology and pharmacokinetics. Topics include chemical (drug) absorption, distribution, biotransformation, elimination; the calculation of dosages and pharmacokinetic parameters, variability in drug response, adverse drug reactions and special interest topics.

Prerequisite: BIO130H1/BIOA01H3/BIO152H5
Corequisite: Recommended Co-requisites: BIO230H1/BIO255H1, PSL300H1/PSL301H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL218H1 - Cannabis the Drug

Hours: 24L

There is a critical need for a breadth of understanding regarding its mechanism of action, pharmacological effects and its potential benefits and harms (short- and long-term). Students will gain a breadth of understanding in cannabis-related topics including pharmacology and toxicology, its role in mental health and addictions, medical use, drug policy and new drug development that stems from increased access to cannabis constituents. They will learn to differentiate myths and anecdotes from evidence-based knowledge. Going forward it is imperative that students spanning basic sciences through business, arts and engineering have a comprehensive understanding of these topics. PCL218H1 will give students for a variety of academic backgrounds a basic understanding of the health implications of cannabis which have broad implications for both our professional and personal lives.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL297H1 - Research Experience in Pharmacology & Toxicology

Hours: 60P

A formal opportunity to gain hands-on experience and develop their skills within a research laboratory setting. Students will have a chance to become familiar and efficient at good lab practices, develop critical thinking and evaluation skills while applying their knowledge and developing trouble shooting skills to practical research questions. This course is Pass/Fail. Not eligible for CR/NCR option.

Prerequisite: Permission of Faculty Supervisor and Departmental Undergraduate Coordinator required.
Recommended Preparation: Completion of at least first year of Life Sciences program.
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Science

JPM300H1 - Research Readiness and Advancing Biomedical Discoveries

Hours: 12L/24T

Explore how scientists leverage their knowledge and skills to advance academic biomedical discoveries from the laboratory to improve patient health through either commercialization or not-for-profit approaches. Students will learn about innovation and develop key research and industry skills including intellectual property, ethics, budget and project management; learn how to critically evaluate scientific evidence and effectively communicate to a wide audience. This hybrid student-centered course will include interactive online modules and in-class group work. Course work will focus on developing skills and knowledge to help you be successful in diverse research courses and future careers. Not eligible for CR/NCR.
**Prerequisite:** Completion of 10.0 credits, BCH210H1/BCH242Y1
**Recommended Preparation:** PSL300H1, PSL301H1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

---

**PCL302H1 - Pharmacodynamic Principles**

**Hours:** 36L

Topics include biological action of drugs on membranes, enzymes, receptors, neural and hormonal systems, transmission and modulation.

**Prerequisite:** (PSL300H1, PSL301H1)
**Exclusion:** PHC300H1, PHC301H1
**Recommended Preparation:** PCL201H1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

---

**PCL345H1 - Experimental Approaches in Drug Discovery**

**Hours:** 24L

Lecturers use their own research to demonstrate how they approach a biological question. The lectures emphasize why one approach is chosen over other possible approaches, and explain the strengths and limitations of techniques. Following the one-hour lecture there is an interactive discussion of the experimental approach covered in the lecture.

**Prerequisite:** One of PSL300H1/PSL301H1/BIO270H1/BIO271H1, and completion of 10.0 credits. Students who do not meet the prerequisite are encouraged to contact the Department.
**Recommended Preparation:** BCH210H1, PCL201H1, PCL302H1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

---

**PCL362H1 - Introductory Toxicology**

**Hours:** 27L/5T

Toxicological problems encountered in animals and humans; biochemical mechanisms and clinical factors of toxicological significance; models of drug-related diseases.

**Prerequisite:** BIO130H1/BIOA01H3/BIO152H5, PCL201H1 or Permission of the Department
**Corequisite:** Recommended Co-requisite: PCL302H1, BCH311H1/CSB349H1
**Recommended Preparation:** BCH210H1, CHM247H1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

---

**PCL367H1 - Drug Development Pipeline I: In vitro**

**Hours:** 8T/40P

This course will provide a learning experience that simulates the process, techniques, analysis and evaluation methods used for early-stage in vitro drug development. Modules will build on the student’s fundamental knowledge and will simulate and illustrate the thought processes and techniques that are used during new drug development in academic research institutes, clinical research organizations and pharmaceutical and biotechnology companies worldwide. Modules include target screening, cytotoxicity assays, transcriptional activation testing and metabolizing enzyme identification experiments. This experience will allow students to leverage their learned knowledge to improve their employability in this area, while honing their critical thinking and analytical skills.

**Prerequisite:** PSL300H1, PSL301H1
**Corequisite:** PCL302H1
**Recommended Preparation:** PCL201H1
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

---

**PCL368H1 - Drug Development Pipeline II: In vivo**

**Hours:** 8T/40P

This course will provide a learning experience that parallels and simulates the process, protocols, methods and evaluation tools used for later-stage in vivo drug development. Modules will build on the student’s fundamental knowledge and simulate the thought processes and techniques used during drug development in research institutes, clinical research organizations and pharmaceutical and biotechnology companies worldwide. Modules will include pharmacokinetic and pharmacodynamic analyses and pharmacogenetic screening approaches in model systems and humans. This experience will allow students to leverage their learned skills and knowledge to improve their comprehension and employability in this area, while honing critical thinking and analytical skills.
**Prerequisite:** PSL300H1, PSL301H1, PCL201H1, PCL302H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**PCL376H1 - Experimental Design and Data Analysis for Pharmacology and Toxicology**

**Hours:** 30L/6T

This course includes lectures focused on experimental design and the analysis of pharmacological and toxicological data. Topics include: principles of experimental design, data analysis and statistical tests appropriate for each type, use of computing statistical packages, analysis of dose-response and time-response curves and analysis of receptor binding assays. Practical applications and problem sets will be taken up in class and in tutorials.

**Prerequisite:** PCL201H1  
**Corequisite:** PCL302H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**PCL386H1 - Pharmacology of Cancer Signaling**

**Previous Course Number:** PCL486H1  
**Hours:** 24L

This course will expand on both classical and cutting edge pharmacological strategies proposed to mitigate the consequences of altered signal transduction in cancer. Students will have the opportunity to develop knowledge on these molecular events and how they can be targeted to improve clinical outcomes. Students will integrate lecture material with assigned readings and assignments.

**Prerequisite:** BCH210H1/BCH242Y1, and completion of at least 10.0 credits, or Permission of the Department  
**Exclusion:** PCL486H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**PCL389H1 - Understanding the Role of Pharmacology and Toxicology in Society**

**Hours:** 24L

This service learning course explores issues surrounding the effects that pharmaceuticals and chemicals have in society. Specifically, it integrates pharmacology and toxicology with social, health and political issues as they relate to drug abuse and addiction. Students are required to interact and work with community partners during the semester (approx. 20hrs). Classroom discussions will integrate community experiences with lecture material.

**Prerequisite:** PCL201H1  
**Corequisite:** PCL302H1; (PSL300H1, PSL301H1)  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**PCL397Y0 - Research Abroad in Pharmacology and Toxicology**

**Hours:** 200P

An independent research project in a pharmacology and/or toxicology laboratory in an approved partner university. This international research experience will be supervised by a faculty member at the partner institution and will allow students to develop critical thinking and evaluation skills while applying their knowledge and troubleshooting skills to practical research questions. Not eligible for CR/NCR option.

**Prerequisite:** PCL201H1 (65%), PSL300H1 (65%), PSL301H1 (65%); permission from the Undergraduate Coordinator  
**Recommended Preparation:** PCL302H1 (65%)  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**PCL399Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at [https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program](https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program). Not eligible for CR/NCR option.

**JPM400Y1 - Biomedical Incubator Capstone Project**

**Hours:** 240P/16S

Discover what it is like to be part of a biomedical innovation team. Develop and engage in biomedical research in a simulated small business/incubator setting.
under the guidance of a faculty mentor. Bring your proposed JPM300H1 project to life, while acquiring budget management, research, business and communication workplace skills for future careers. Enrolment is application-based. Proposals will be reviewed by committee and successful proposals will be matched to a mentor. Not eligible for CR/NCR option.

Students will form teams and develop a research proposal based on either:

1. Faculty led concept requiring further development and testing, which would not normally be funded grants and would be tangential to ongoing research in the lab.

2. Student developed innovative idea that requires further development and testing. This should be a project that is not being investigated in a UofT research lab.

**Prerequisite:** A minimum of 75% in JPM300H1; completion of any of PCL367H1/PCL368H1/PSL372H1/BCH370H1/BCH377H1. Application required; see department for more information.

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PCL402H1 - Pharmacology and Toxicology in Drug Development**

**Hours:** 24L

This course provides the basic principles of drug development, with a primary focus on the application of fundamental principles of pharmacology and toxicology to the design and conduct of early phase clinical trials. This is the phase of the drug development process where much of the innovation and science occurs.

**Prerequisite:** PCL201H1, PCL302H1

**Corequisite:** PCL470H1 or PCL482H1

**Recommended Preparation:** PSL300H1, PSL301H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PCL469H1 - Systems Pharmacology I**

**Previous Course Number:** PCL470Y1

**Hours:** 31L/4T

A culmination of pharmacological principles discussing concepts of drug properties and their interactions within the body. The mechanism of action, pharmacological properties including clinical use and adverse effects of drugs acting on the autonomic nervous systems, cardiovascular, renal, respiratory, gastrointestinal and endocrine systems will be examined. Critical evaluation of primary literature and examination of clinical problem-based case studies will be integrated with lecture material through small group sessions.

**Prerequisite:** PCL201H1, PCL302H1, (PSL300H1, PSL301H1)

**Exclusion:** PCL470Y1

**Recommended Preparation:** BCH210H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PCL470H1 - Systems Pharmacology II**

**Previous Course Number:** PCL470Y1

**Hours:** 31L/4T

A culmination of pharmacological principles discussing concepts of drug properties and their interactions within the body. The mechanism of action, pharmacological properties including clinical use and adverse effects of drugs acting on the central nervous systems and immunological system; antimicrobial and cancer chemotherapeutic agents as well as the potential therapeutic use of endogenous/herbal compounds will be examined. Critical evaluation of primary literature and examination of clinical problem-based case studies will be integrated with lecture material through small group sessions.

**Prerequisite:** PCL201H1, PCL302H1, (PSL300H1, PSL301H1), and 14.0 credits. Students who do not meet the prerequisite are encouraged to contact the Department.

**Exclusion:** PCL470Y1

**Recommended Preparation:** BCH210H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PCL472Y1 - Project in Pharmacology**

**Previous Course Number:** PCL470Y1

**Hours:** 31L/4T

This course affords students an opportunity for hands-on research experience in a laboratory or applied pharmacology setting. Students will work under the supervision of a faculty member and will submit a final written report and oral presentation. Enrollment is limited and requires permission from the Department of Pharmacology and Toxicology. It is the student’s responsibility to secure a placement with an approved supervisor before the course begins (a list of potential supervisors can be obtained from the Department of Pharmacology and Toxicology). Students will be
registered in the course once their ballot form (obtained from the Department of Pharmacology and Toxicology) is signed by an approved supervisor and approved by the Department of Pharmacology and Toxicology. Students are expected to spend approximately 200 hours towards this project but this will be project/supervisor dependent. Not eligible for CR/NCR option.

**Prerequisite:** PCL201H1, PCL302H1, PCL366H1/PCL367H1/PCL368H1, STA288H1/PCL376H1/STA220H1/PSY201H1, and permission of Department

**Exclusion:** PCL474Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PCL474Y1 - Project in Toxicology**

This course affords students an opportunity for hands-on research experience in a laboratory or applied toxicology setting. Students will work under the supervision of a staff member and will submit a final written report and oral presentation. Enrollment is limited and requires permission from the Department of Pharmacology and Toxicology. It is the student's responsibility to secure a placement with an approved supervisor before the course begins (a list of potential supervisors can be obtained from the Department of Pharmacology and Toxicology). Students will be registered in the course once their ballot form (obtained from the Department of Pharmacology) is signed by an approved supervisor and approved by the Department of Pharmacology and Toxicology. Students are expected to spend approximately 200 hours towards this project but this will be project/supervisor dependent. Not eligible for CR/NCR option.

**Prerequisite:** PCL201H1, PCL302H1, PCL366H1/PCL367H1/PCL368H1, STA288H1/PCL376H1/STA220H1/PSY201H1, and permission of Department

**Exclusion:** PCL474Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PCL475Y1 - Neuropsychopharmacology 1**

**Previous Course Number:** PCL475Y1

**Hours:** 36L/12T

Students will explore the major CNS neurological syndromes, examples include pain, epilepsy, the sleep-wake cycle and relate neurological abnormalities. Lectures will discuss major classes of drugs used to mitigate and treat these disorders, their mechanisms of action, clinical use and unwanted effects. This course was previously offered as PCL475Y1.

**Prerequisite:** Completion of 9.0 credits

**Exclusion:** PCL475Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PCL476H1 - Neuropsychopharmacology 2**

**Previous Course Number:** PCL475Y1

**Hours:** 36L/12T

Students will explore the major CNS neurological syndromes which may include anxiety, schizophrenia and depression/mania and their relate neurological abnormalities. Lectures will discuss major classes of drugs used to mitigate and treat these disorders, their mechanisms of action, clinical use and unwanted effects.

**Prerequisite:** Completion of 9.0 credits, and PCL475H1. Students who do not meet the prerequisite are encouraged to contact the Department.

**Exclusion:** PCL475Y1, PSY396H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PCL477H1 - The DNA Damage Response in Pharmacology and Toxicology**

**Hours:** 24L

Many anticancer drugs and environmental agents exert their cytotoxic effects through DNA damage. This course explores specific pharmacological and toxicological agents that damage DNA and discusses how mammalian cells respond to this DNA damage.

**Prerequisite:** BCH210H1/BCH242Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PCL481H1 - The Molecular and Biochemical Basis of Toxicology**

**Hours:** 24L

The biochemical principles and molecular mechanisms underlying the toxicity of drugs and foreign agents. The
sequence of events at the molecular level leading to impairment of cell function and the factors which determine and affect toxicity.

Prerequisite: PCL302H1
Recommended Preparation: PCL362H1, BCH210H1/BCH242Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL482H1 - Biomedical Toxicology

Previous Course Number: PCL473Y1
Hours: 24L

This course explores several contemporary topics in biomedical toxicology with emphasis on how chemicals affect human health. Lectures cover principles of toxicology, the mechanisms of toxicity of a wide variety of toxic agents and the associated toxicities, methodologies used to examine chemical toxicities, risk assessment, and the applications of toxicology.

Prerequisite: (PCL201H1, PCL302H1, PCL362H1), and completion of 14.0 credits. Students who do not meet the prerequisite are encouraged to contact the Department.
Exclusion: PCL473Y1
Recommended Preparation: BCH210H1 and BCH311H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PCL483H1 - Interdisciplinary Toxicology

Previous Course Number: PCL473Y1
Hours: 24L

This course explores several contemporary topics in biomedical and environmental toxicology with emphasis on how chemicals affect human health. Lectures cover principles of toxicology, the mechanisms of toxicity of a wide variety of toxic agents and the associated toxicities, methodologies used to examine chemical toxicities, risk assessment, and the applications of toxicology.

Prerequisite: (PCL201H1, PCL302H1, PCL362H1) or Permission of the Course Coordinator
Exclusion: PCL473Y1
Recommended Preparation: BCH210H1 + BCH311H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

Introduction

The Greek words from which “Philosophy” is formed mean “love of wisdom” and all great philosophers have been moved by an intense devotion to the search for wisdom. Philosophy takes no belief for granted, but examines the grounds for those beliefs which make up people’s fundamental views of the world. Philosophers think about these beliefs as thoroughly and systematically as possible, using methods of conceptual analysis, reasoning, and detailed description.

What distinguishes Philosophy from the physical and social sciences is its concern not only with the truths which are discovered by means of specialized methods of investigation, but with the implications that such discoveries have for human beings in their relations with one another and the world. Moreover, Philosophy has an abiding interest in those basic assumptions about the nature of the physical and social world, and about the nature of enquiry itself, which underlie our scientific and practical endeavours.

The Philosophy Department at the University of Toronto offers courses in most of the main periods and areas of Philosophy, which are listed here with a typical question or the name of one or two central figures: Ancient Philosophy (Plato, Aristotle); Mediaeval Philosophy (Augustine, Aquinas); Early Modern Philosophy (Descartes, Hume, Kant); Nineteenth-Century Philosophy (Hegel, Mill, Marx); Global Philosophy (Chinese, Islamic, Jewish, Sanskrit, South Asian Philosophies), Continental Philosophy and Phenomenology (Husserl, Heidegger, Sartre); Analytic Philosophy (Quine, Russell, Wittgenstein); Epistemology and Metaphysics (What can be known? What is the ultimate nature of reality?); Moral Philosophy (How should we argue rationally about right and wrong?); Philosophy of Mind (What is mind? Is there free will?); Logic and Philosophy of Mathematics (What is sound reasoning? Do numbers exist?); Philosophy of Language (What is the meaning of “meaning”?); Philosophy of Natural Science (What is scientific method?); Social and Political Philosophy (What justifies the state?); Aesthetics (What is art? Must it be beautiful?). In addition, the Department offers Seminars (numbered PHL400H1 - PHL488H1), Individual Studies courses (numbered PHL495H1 - PHL499H1) and the Socrates Project (PHL489Y1).

Counselling is available in the main departmental office, 170 St. George St., 4th floor. In particular, students may wish to get advice about how best to combine philosophy programs with other majors or minors, given that various co-specialist programs with other disciplines have been discontinued. In addition, the Department publishes an annual Bulletin. It contains full and up-to-date information on programs and courses, including names of instructors and descriptions of particular course sections. The Bulletin is published in the summer (for the succeeding year) and is available on the Department’s website and at 170 St. George Street.

Philosophy Programs

Bioethics Specialist (Arts Program) - ASSPE1001

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

10.0 credits, including at least 4.0 credits at the 300+ level, of which 1.0 credit must be at the 400-level

First year (recommended):
PHL100Y1/ PHL101Y1
BIO120H1, BIO220H1

Higher Years (required):
1. PHL281H1, PHL271H1, PHL275H1
2. PHL245H1/ PHL246H1
3. 1.5 credits from Group 1 (Advanced Bioethics)
4. 1.0 credit from Group 2 (Value Theory)
5. 0.5 credit from Group 3 (Metaphysics and Epistemology)
6. Additional philosophy courses, to a total of 10.0 credits, or else additional philosophy courses to a total of 9.0 credits and 1.0 credit from Group 4 (Interdisciplinary)

Group 1 - Advanced Bioethics:
PHL380H1, PHL381H1, PHL382H1, PHL383H1, PHL384H1, PHL440H1, PHL470H1
Group 2 - Value Theory:
PHL265H1, PHL295H1, PHL365H1, PHL366H1, PHL370H1, PHL375H1, PHL407H1, PHL412H1, PHL413H1, PHL483H1

Group 3 - Metaphysics and Epistemology:
PHL232H1, PHL233H1, PHL240H1, PHL331H1, PHL332H1, PHL340H1, PHL341H1, PHL342H1, PHL355H1, PHL357H1, HPS250H1

Group 4 - Interdisciplinary:
ANT348H1, GER338H1, GGR340H1, HIS423H1, HIS489H1, HMB201H1, HMB202H1, HPS318H1, HPS319H1, JHE353H1, SOC243H1, SOC309H1, SOC363H1, SOC427H1, WGS367H1

Philosophy Specialist (Arts Program) - ASSPE0231

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(10.0 credits, including PHL100Y1/ PH101Y1 if taken)

First year (recommended):
PHL100Y1/ PHL101Y1

Higher Years (required):
1. 2.0 credits from the following: PHL200Y1/ PHL205H1, PHL206H1/ PHL210Y1
2. 1.0 credit from the following: PHL217H1/ PHL232H1/ PHL233H1/ PHL240H1
3. PHL265H1/ PHL275H1
4. PHL245H1/ PHL246H1
5. Additional philosophy courses, to a total of 10.0 credits, including 4.0 PHL credits at the 300+ level, of which 1.0 credit must be at the 400-level.

Physics and Philosophy Specialist (Science Program) - ASSPE2584

Physics has deep historical roots in natural philosophy and many aspects of contemporary Physics raise profound philosophical questions about the nature of reality. The interdisciplinary Physics and Philosophy Program allows the student to engage with both Physics and Philosophy at their deepest levels, and to more fully explore the connections between them.

Consult Associate Chair (Undergraduate Studies), Department of Physics or Philosophy.

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(15.0 credits, including at least 1.5 credits at the 400-level)

First Year: (2.5 credits)

MAT135H1, MAT136H1/ MAT137Y1/ MAT157Y1, MAT223H1/ MAT240H1, PHY131H1/ PHY151H1, PHY132H1/ PHY152H1 (The courses MAT137Y1, MAT223H1, PHY151H1, PHY152H1 are recommended.)

First or Second Year: (1.5 credits)

1.5 credits of: PHL232H1/ PHL233H1/ PHL240H1/ PHL245H1/ HPS250H1/ PHL255H1 (PHL245H1 may only be counted here if MAT157Y1 is not taken)

Second Year: (3.0 credits)

MAT237Y1/ MAT257Y1/ MAT235Y1, MAT244H1/ MAT267H1, PHY250H1, PHY254H1, PHY256H1 (The courses MAT237Y1, MAT244H1 are recommended.)

Third Year: (2.0 credits)

MAT334H1/ MAT354H1, PHY252H1, (PHY350H1/ PHY354H1), PHY356H1

Fourth Year: (1.0 credit)

PHY456H1, PHY491H1

Any Year: (5.0 credits)

(PHL345H1/ PHL347H1), PHL355H1, PHL356H1, (PHL415H1/ PHL455H1/ PHL482H1), plus 1.0 credit of (PHL325H1/ PHL331H1/ PHL332H1/ PHL346H1/ PHL354H1/ PHL357H1) plus 2.0 additional PHL credits, at least 0.5 credit of which must be from Course Group 2 - Value Theory (The courses PHL265H1, PHL275H1 are recommended.)

Group 2 - Value Theory:
PHL265H1, PHL295H1, PHL365H1, PHL366H1, PHL370H1, PHL375H1, PHL407H1, PHL412H1, PHL413H1, PHL483H1
Bioethics Major (Arts Program) - ASMAJ1001

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
7.0 credits, including at least 2.0 credits at the 300+ level, of which one 0.5 credit must be at 400-level.

First year (recommended):
PHL100Y1/PHL101Y1

Completion Requirements:

Consult the Undergraduate Coordinators of the Departments of Mathematics and Philosophy.

(12.0 credits including at least 1.0 credit at the 400-level)

Year 1:
MAT157Y1, MAT240H1, MAT247H1; One of PHL232H1, PHL233H1, PHL255H1

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream or PEY Co-op.

Note: September 2021 or January 2022 will be the last opportunity for Faculty of Arts & Science students to register for PEY Co-op. Students starting Year 2 in Fall 2021 or later will only be eligible to participate in the Arts & Science Internship Program stream.

Higher Years:
1. MAT257Y1, MAT327H1, MAT347Y1, MAT354H1/ MAT357H1
2. PHL345H1, MAT309H1/ PHL348H1
3. Four of: PHL325H1, PHL331H1, PHL332H1, PHL346H1/ PHL354H1, PHL347H1, PHL349H1, PHL355H1, PHL451H1, PHL480H1

5. PHL265H1/ PHL275H1
6. 2.0 credits of PHL/APM/MAT at the 300+ level, to a total of 12.0 credits.

Regarding Philosophy Courses

The following courses do not have PHL prefixes but may still be counted towards a philosophy program. Students should consult the primary listings for their course descriptions: COG250Y1, COG401H1, HPS250H1, TRN200Y1.

300-LEVEL COURSES

All 300-level courses have a prerequisite of 1.5 credits (or equivalent) in philosophy, with the exception of PHL345H1 - PHL349H1 and PHL356H1. There is also a general prerequisite of 7.5 credits (in any field). Only specific courses required or recommended are listed below. Students who do not meet the prerequisite for a particular course but believe that they have adequate preparation must obtain the permission of the instructor to gain entry to the course.

400-LEVEL COURSES

1. The general prerequisite for ALL 400-level courses is 4.0 credits in philosophy. Most courses also have specific prerequisites. Students who do not meet the prerequisite for a particular course but believe that they have adequate preparation must obtain the permission of the instructor in order to gain entry to the course.
2. PHL400H1-PHL451H1 are undergraduate-level courses. PHL470H1-PHL488H1 are cross-listed graduate courses, available to undergraduates as well. Enrolment in cross-listed graduate courses requires the permission of the instructor and the Department in addition to the completion of the prerequisites indicated below.

Philosophy Minor (Arts Program) - ASM0231

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, including PHL100Y1/ PHL101Y1 if taken)

1. 1.0 credit from the following: PHL200Y1/ PHL205H1/ PHL206H1/ PHL210Y1/ PHL217H1/ PHL232H1/ PHL233H1/ PHL240H1/ PHL265H1/ PHL275H1
2. Additional philosophy courses, to a total of 4.0 credits, including 1.0 credit at the 300+ level.

Philosophy Courses

**PHL100Y1 - Introduction to Philosophy (Historical)**

*Hours: 48L/24T*

An introduction to the central branches of philosophy, such as logic, theory of knowledge, metaphysics, ethics, and political philosophy. Writings from the central figures in the history of Western and non-Western philosophy, as well as contemporary philosophers, may be considered.

*Exclusion:* PHL101Y1, PHL201H1, PHLA10H3, PHLA11H3, PHL101H5, PHL102H5, PHL105Y5

*Distribution Requirements:* Humanities

*Breadth Requirements:* Thought, Belief and Behaviour (2)

**PHL101Y1 - Introduction to Philosophy (Thematic)**

*Hours: 48L/24T*

An introduction to some of the central problems of philosophy. Examples of questions that may be considered include: What is sound reasoning? What can we know? What is ultimately real? Is morality rational? Do humans have free will? Is there a God? What is consciousness? Should we fear death? What is justice?

*Exclusion:* PHL100Y1, PHL201H1, PHLA10H3, PHLA11H3, PHL101H5, PHL102H5, PHL105Y5

*Distribution Requirements:* Humanities

*Breadth Requirements:* Thought, Belief and Behaviour (2)

**PHL196H1 - Multiculturalism, Philosophy and Film**

*Hours: 48S*

This course will critically examine the role of cinema in the construction and exploration of the figure of the racial, ethnic, cultural, and social "other". Our topics will include (1) racial, ethnic and cultural identity and its reciprocal relationship with cinema, (2) the notion of realism in relation to the representation of race and ethnicity in film, (3) the cinematic representation of inter-ethnic and intra-ethnic conflict, (4) the position of cinema in the debate between assimilation and multiculturalism, and (5) the ways in which cinema can help illuminate a cluster of relevant notions in political philosophy including citizenship, communitarianism, cosmopolitanism, and the relation between individual rights and group rights. Films will be screened in class and discussed against the background of focused critical readings. Restricted to first-year students. Not eligible for CR/NCR option.

*Distribution Requirements:* Humanities

*Breadth Requirements:* Creative and Cultural Representations (1)

**PHL197H1 - Introduction to Philosophical Anthropology**

*Hours: 24S*

Philosophical anthropology is the subject that poses the most fundamental questions about human nature and the human condition. Taking as its point of departure the most up-to-date scientific understanding of human nature, from anthropology broadly conceived, it goes on to inquire, in a disciplined fashion, about the implications of these views for perennial philosophical questions about human rationality, morality, the possibility of progress, the existence of god and the meaning of life. This course will examine one or more topics in this domain, as a more general introduction to the discipline. Restricted to first-year students. Not eligible for CR/NCR option.

*Distribution Requirements:* Humanities

*Breadth Requirements:* Thought, Belief and Behaviour (2)
PHL198H1 - Philosophy of Time

Hours: 24S

The passage of time is a fundamental aspect of human experience: we are born, we grow older, and eventually we pass away. During our lives our experience of the past, present, and future are distinct. We can influence the world in the present and the future, but it does not seem that we can influence the past. We have hopes about the future, memories of the past, and experiences of the present. In this seminar we will explore insights from contemporary philosophy and physics concerning the nature of the passage of time. Questions to be considered may include the following: What does it mean to say that time passes? Does time really pass at all? How do we experience time? Why can we influence the future but not the past? Is it possible to travel backward in time? Is time even real? What is time? Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHL199H1 - Ethics and Fiction

Hours: 24S

The goal of this seminar is to investigate ethical questions via works of fiction, primarily novels. The idea is not to see fiction as a pedantic vehicle for ethical argument, but rather to consider how, and with what effect, fiction functions as an ethical medium. We will not judge characters as 'likeable' or 'relatable'; rather, we will reflect on what fiction can teach us about the pressing challenges of choice and responsibility, and how it can (perhaps) enhance empathy.

The focus is on issues of individual identity and integrity: creating and maintaining oneself as a moral whole within environments hostile or indifferent to that end. All the works considered are novels or plays from the period between about 1900 and 2020—for convenience, the 'modern' and 'postmodern' ages, though we will query those notions. A running theme in the chosen readings is what is usually called 'existential' philosophy, but we will query the validity of that label as well. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

**Prerequisite:** 7.5 credits with at least 1.5 PHL credits, including (PHL245H1/MAT157Y1), (PHL232H1/PHL233H1/PHL240H1)

**Exclusion:** PHL43H3, PHL332H5

**Distribution Requirements:** Humanities

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PHL332H1 - Epistemology**

**Hours:** 36L

Historical and systematic approaches to topics in the theory of knowledge, such as truth, belief, justification, perception, a priori knowledge, certitude, skepticism, other minds.

**Prerequisite:** PHL232H1/PHL233H1, 7.5 courses (in any field) with at least 1.5 in philosophy

**Exclusion:** PHL20H3, PHL333H5

**Distribution Requirements:** Humanities

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PHL333H1 - Puzzles and Paradoxes**

**Hours:** 36L

Time travel, truth, infinity, rational decision making: each of these topics gives rise to philosophical puzzles and paradoxes. In this class we'll consider a variety of such paradoxes. Using logic and other philosophical tools, we'll show how these paradoxes can lead to deep and important philosophical conclusions.

**Prerequisite:** 7.5 credits, with at least 1.5 credits in philosophy, PHL245H1/MAT157Y1

**Exclusion:** PHL255H3

**Distribution Requirements:** Humanities

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PHL334H1 - Mind and Language in Chinese Thought**

**Hours:** 36L

Issues in the philosophy of mind and language played a crucial role in the philosophical discourse of classical China. This course will guide students in reconstructing this role and exploring its philosophical significance by interpreting and critically evaluating selected early Chinese philosophical texts that treat mind, language, and interrelated aspects of psychology. Topics to be discussed include the nature and functions of names and speech; the role of “correcting names”; semantic theory and argumentation; perception and knowledge; the role of language in knowledge and action; and the ontological
grounds of linguistic distinctions. Texts to be discussed include the Analects, Guăngzi, Mòzǐ, Mèngzǐ, Dàodéjīng, Xúnzǐ, Zhuàngzǐ, and Annals of Mr. Lǔ.

**Prerequisite:** 7.5 credits, with at least 1.5 PHL credits including PHL237H1
**Exclusion:** EAS338H1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PHL335H1 - Issues in Philosophy of Religion**

**Hours:** 36L

Some specific problem(s) in the philosophy of religion, such as the relationship of religious faith and religious belief, the ontological argument for the existence of God, theories about divine transcendence, the philosophical presuppositions of religious doctrines, the modern critique of religion.

**Prerequisite:** 7.5 courses (in any field) with at least 1.5 in philosophy
**Distribution Requirements:** Humanities
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PHL336H1 - Islamic Philosophy**

**Hours:** 36L

An introduction to the major thinkers in classical Islamic philosophy, with emphasis placed on developing a properly philosophical understanding of the issues and arguments. Topics include the existence of God; creation and causality; human nature and knowledge; the nature of ethical obligations; and the constitution of the ideal political state.

**Prerequisite:** PHL200Y1, 7.5 courses (in any field) with at least 1.5 in philosophy
**Distribution Requirements:** Humanities
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PHL337H1 - Classical Chinese Ethics**

**Hours:** 36L

This course explores and critiques personal and social ethical ideals as presented in early Chinese Confucian, Mohist, and Daoist writings and considers their relevance to issues in contemporary ethics. Major texts discussed include the Analects, Mèngzǐ, Xúnzǐ, Mòzǐ, Dàodéjīng, and Zhuàngzǐ. Central questions examined include: What is the way (dào)? What standards can guide us in following the way? What grounds can we have for confidence that these are the correct standards? What kind of person should we strive to be? What is virtue (dé)? What values take priority in a life of virtue? How does the person of virtue act?

**Prerequisite:** 7.5 credits, with at least 1.5 PHL credits including PHL237H1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PHL338H1 - Jewish Philosophy**

**Hours:** 36L

A selection of texts and issues in Jewish philosophy, for example, Maimonides’ Guide of the Perplexed, Buber’s The Prophetic Faith, prophecy and revelation, Divine Command and morality, creation and eternity, the historical dimension of Jewish thought.

**Prerequisite:** 7.5 courses (in any field) with at least 1.5 in philosophy
**Distribution Requirements:** Humanities
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PHL339H1 - Topics in South Asian Philosophy**

**Hours:** 36L

An intermediate level study of one or more topics in South Asian Philosophy.

**Prerequisite:** 7.5 credits (in any field) with at least 1.5 credits in Philosophy
**Recommended Preparation:** PHL239H1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PHL340H1 - Issues in Philosophy of Mind**

**Hours:** 36L

Typical issues include: the mind-brain identity theory; intentionality and the mental; personal identity.
Prerequisite: One of COG250Y1/PHL240H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHL345H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL341H1 - Freedom, Responsibility, and Human Action

Hours: 36L

Human action, and the nature of freedom and responsibility in the light of contemporary knowledge concerning the causation of behaviour.

Prerequisite: PHL210Y1/PHL232H1/PHL233H1/PHL240H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHL341H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL342H1 - Minds and Machines

Hours: 36L

Topics include: philosophical foundations of artificial intelligence theory; the computational theory of the mind; functionalism vs. reductionism; the problems of meaning in the philosophy of mind.

Prerequisite: 7.5 courses (in any field) including COG250Y1 or at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL344H1 - Philosophy of Emotions

Hours: 36L

A survey of philosophical topics related to the emotions, from a range of philosophical perspectives. Questions to be considered may include the following: What exactly is an emotion? Are emotions feelings? What emotions are there, and how are they shaped by culture and society? How are emotions related to reason, the brain and the body? What role do -- and should -- the emotions play in decision-making? Can an emotion be morally right or wrong, and what makes it so?

Prerequisite: PHL240H1/PHL244H1/PHL342H1, 7.5 courses (in any field) with at least 1.5 in philosophy

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL345H1 - Intermediate Logic

Hours: 36L

A continuation of PHL245H1, requiring no other prior knowledge of philosophy or mathematics. First-order logic, including basic metalogical results such as soundness and completeness. An introduction to basic set theory and metalogic. Topics may include the Loewenheim-Skolem theorems for first-order logic, Goedel’s incompleteness theorems.

Prerequisite: PHL245H1/MAT157Y1 and a full course in PHL/CSC/MAT
Exclusion: PHL345H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL347H1 - Modal Logic and Philosophical Applications of Logic

Hours: 36L

Formal study of the concepts of necessity and possibility, modal, propositional and quantificational logic, possible-worlds semantics, and the metaphysics of modality. Other topics may include counterfactuals, truth, vagueness, epistemic logic, temporal logic, or non-classical logic.

Prerequisite: PHL245H1/MAT157Y1 and a full course in PHL/CSC/MAT
Exclusion: PHL347H5
Recommended Preparation: PHL345H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL348H1 - Logic and Computation

Hours: 36L

Topics will include Kurt Gödel’s celebrated incompleteness theorems, the technical ideas and methods involved in proving them, their relation to the abstract theory of computation, and their philosophical implications. Are there mathematical truths that cannot be known? Are mathematical concepts such as number and set indeterminate to some extent? Are there limits to what can be modeled formally?
Prerequisite: PHL245H1/MAT157Y1 and a full course in PHL/CSC/MAT
Exclusion: MAT309H1/CSC438H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL349H1 - Set Theory

Hours: 36L

An introduction to set theory emphasizing its philosophical relevance as a unifying framework for mathematics and logic. Topics examined may include the paradoxes of the 'naïve' conception of sets and their resolution through axiomatization, the construction of natural numbers and real numbers in set theory, equivalents of the axiom of choice, and model theory.

Prerequisite: PHL245H1/MAT157Y1 and a full course in PHL/CSC/MAT
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL351H1 - Philosophy of Language

Hours: 36L

The nature of language as a system of human communication, theories of meaning and meaningfulness, the relation of language to the world and to the human mind.

Prerequisite: PHL245H1/MAT157Y1 and one of PHL232H1/PHL233H1/PHL240H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHLC80H3, PHL350H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL354H1 - Philosophy of Mathematics

Previous Course Number: PHL346H1
Hours: 36L

Platonism versus nominalism, the relation between logic and mathematics, implications of Gödel's theorem, formalism and intuitionism.

Prerequisite: PHL245H1/MAT157Y1 and a full course in PHL/CSC/MAT
Exclusion: PHL346H1, PHL346H5, PHL344H5, PHL354H5

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL355H1 - Philosophy of Natural Science

Hours: 36L

The structure and methods of science: explanation, methodology, realism and instrumentalism.

Prerequisite: 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHL355H5
Recommended Preparation: A solid background in science or HPS250H1/PHL246H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL356H1 - Philosophy of Physics

Hours: 36L

Introduction to philosophical issues which arise in modern physics, especially in relativity and quantum mechanics. This course will be accessible to students without a significant background in physics, but with an interest in the philosophical challenges that modern physics poses.

Prerequisite: One full course in MAT/PHY; two full courses are recommended.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHL357H1 - Philosophy of Biology

Hours: 36L

Philosophical issues in the foundations of biology, e.g., the nature of life, evolutionary theory; controversies about natural selection; competing mechanisms, units of selection; the place of teleology in biology; biological puzzles about sex and sexual reproduction; the problem of species; genetics and reductionism; sociobiology; natural and artificial life.

Prerequisite: 7.5 courses (in any field) with at least 1.5 in philosophy. Students with a background in Biology are exempt from the prerequisite of 1.5 courses in Philosophy
Exclusion: PHL357H5
Recommended Preparation: HPS250H1/PHL246H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL362H1 - Philosophy of History

Hours: 36L

Typical questions include: Has history any meaning? Can there be general theories of history? How are the findings of historians related to the theories of metaphysics and of science? Is history deterministic? Must the historian make value judgements? Is history science or an art? Are there historical forces or spirits of an epoch?

Prerequisite: 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL365H1 - Political Philosophy

Hours: 36L

A study of some of the central problems of political philosophy, addressed by historical and contemporary political theorists.

Prerequisite: PHL265H1/POL200Y1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHLC92H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL366H1 - Topics in Political Philosophy

Hours: 39L

A focused examination of a selected issue in political philosophy.

Prerequisite: PHL265H1/POL200Y1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL367H1 - Philosophy of Feminism

Hours: 36L

Selected issues and topics in the philosophy of feminism.

Prerequisite: PHL265H1/PHL268H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHLC13H3, PHL367H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL370H1 - Issues in Philosophy of Law

Hours: 36L

Major issues in philosophy of law, such as legal positivism and its critics, law and liberalism, feminist critiques of law, punishment and responsibility.

Prerequisite: PHL271H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHL370H5
Recommended Preparation: PHL265H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL373H1 - Issues in Environmental Ethics

Hours: 36L

An intermediate-level examination of key issues in environmental philosophy, such as the ethics of animal welfare, duties to future generations, deep ecology, ecofeminism, sustainable development and international justice.

Prerequisite: PHL273H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL375H1 - Ethics

Hours: 36L

An intermediate-level study of selected issues in moral philosophy, or of influential contemporary or historical works in ethical theory.

Prerequisite: PHL275H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHLC05H3
Distribution Requirements: Humanities
PHL376H1 - Topics in Moral Philosophy

Hours: 36L
A focused examination of a selected issue in moral philosophy.

Prerequisite: PHL275H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Exclusion: PHLC06H3
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL377H1 - Ethical Issues in Big Data

Hours: 36L
An introduction to the ethical dimensions arising in the practice of statistics and data science, including moral puzzles, problems and dilemmas that arise in the application of machine learning and artificial intelligence to everyday decision making in politics, business, and ordinary life.

Prerequisite: 7.5 credits, including 1.5 PHL credits and a 0.5 credit from STA221H1/STA238H1/STA248H1/STA255H1/STA261H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL378H1 - War and Morality

Hours: 36L
Moral and political issues concerning warfare: the theory of the just war, pacifism, moral constraints on the conduct of war, war as an instrument of foreign policy, the strategy of deterrence. Special attention to the implications of nuclear weapons.

Prerequisite: PHL265H1/PHL275H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL380H1 - Global Bioethics

Hours: 36L
An intermediate-level study of moral problems that arise in international contexts, including issues of special interest in bioethics: moral universalism and relativism; global distributive justice; poverty relief and international aid; international health disparities; globalization and health; HIV/AIDS; intellectual property and access to essential medicines; clinical trials in developing countries; exploitation and the 10/90 gap.

Prerequisite: PHL281H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL381H1 - Ethics and Medical Research

Hours: 36L
An intermediate-level study of problems in biomedical and behavioural research with human subjects: informed voluntary consent, risk and benefit, experimental therapy, randomized clinical trials, research codes and legal issues, dependent groups (human embryos, children, the aged, hospital patients, the dying, prisoners, the mentally ill).

Prerequisite: PHL281H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL382H1 - Ethics: Death and Dying

Hours: 36L
An intermediate-level study of moral and legal problems, including the philosophical significance of death, the high-tech prolongation of life, definition and determination of death, suicide, active and passive euthanasia, the withholding of treatment, palliative care and the control of pain, living wills; recent judicial decisions.

Prerequisite: PHL281H1, 7.5 courses (in any field) with at least 1.5 in philosophy
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PHL383H1 - Ethics and Mental Health

Hours: 36L
An intermediate-level study of moral and legal problems, including the concepts of mental health and illness, mental competence, dangerousness and psychiatric confidentiality, mental institutionalization, involuntary treatment and behaviour control, controversial therapies; legal issues: the Mental Health Act, involuntary commitment, the insanity defence.

**Prerequisite:** PHL281H1, 7.5 courses (in any field) with at least 1.5 in philosophy  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

### PHL384H1 - Ethics, Genetics and Reproduction

Hours: 36L

An intermediate-level study of moral and legal problems, including the ontological and moral status of the human embryo and fetus; human newborn, carrier and prenatal genetic screening for genetic defect, genetic therapy; the reproductive technologies (e.g., artificial insemination, in vitro fertilization); recent legislative proposals and judicial decisions.

**Prerequisite:** PHL281H1, 7.5 courses (in any field) with at least 1.5 in philosophy  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

### PHL385H1 - Issues in Aesthetics

Hours: 36L

Selected topics in the philosophy of art. Such issues as the following are discussed: whether different arts require different aesthetic principles; relations between art and language; the adequacy of traditional aesthetics to recent developments in the arts; art as an institution.

**Prerequisite:** 7.5 courses (in any field) with at least 1.5 in philosophy  
**Exclusion:** PHLC03H3  
**Recommended Preparation:** PHL285H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### PHL388H1 - Literature and Philosophy

Hours: 36L

The literary expression of philosophical ideas and the interplay between literature and philosophy. Such philosophical issues as the nature and origin of good and evil in human beings, the nature and extent of human freedom and responsibility, and the diverse forms of linguistic expression. Such authors as Wordsworth, Mill, Dostoyevsky, Tolstoy, Miller, Camus, and Lawrence are studied.

**Prerequisite:** 7.5 courses (in any field) with at least 1.5 in philosophy  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### PHL394H1 - Markets and Morals

Hours: 36L

A study of the standards that can be used to judge the performance of economic systems, e.g., efficiency, fairness, maximization, along with the different institutional mechanisms that can be used to organize economic activity, e.g., markets or hierarchies, public or private ownership.

**Prerequisite:** One of PHL265H1/PHL275H1/POL200Y1, 7.5 courses (in any field) with at least 1.5 in philosophy  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

### PHL395H1 - Issues in Business Ethics

Hours: 36L

A focused examination of moral issues that arise in the conduct of business, in areas such as accounting and finance, corporate governance, human resources, environmental conduct, business lobbying and regulatory compliance.

**Prerequisite:** PHL295H1, 7.5 courses (in any field) with at least 1.5 in philosophy  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

### PHL398H0 - Research Excursions

Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities
PHL398Y0 - Research Excursions

Distribution Requirements: Humanities

PHL399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

PHL400H1 - Seminar in Ancient/Medieval Philosophy

Hours: 36S
Advanced discussion of the principal figures and themes in ancient and/or medieval philosophy.

Prerequisite: PHL200Y1, 4.0 credits in philosophy
Distribution Requirements: Humanities

PHL401H1 - Seminar in the History of Philosophy

Hours: 36S
Advanced study of some of the principal figures in a particular historical, philosophical tradition.

Prerequisite: PHL200Y1/PHL210Y1
Distribution Requirements: Humanities

PHL402H1 - Seminar in Early Modern Philosophy

Hours: 36S
Advanced discussion of the principal figures and themes in the philosophy of the 17th and/or 18th centuries.

Prerequisite: PHL210Y1, 4.0 credits in philosophy
Distribution Requirements: Humanities

PHL403H1 - Seminar in 19th-Century Philosophy

Hours: 36S
Advanced discussion of some principal figures and themes in 19th century philosophy.

Prerequisite: PHL210Y1/PHL217H1/PHL315H1/PHL316H1, 4.0 credits in philosophy
Distribution Requirements: Humanities

PHL404H1 - Seminar in Epistemology

Hours: 36S
Typical problems include the nature of knowledge and belief; perception; theories of truth and necessity; skepticism.

Prerequisite: PHL232H1/PHL233H1, 4.0 credits in philosophy
Distribution Requirements: Humanities

PHL405H1 - Seminar in Philosophy of Mind

Hours: 36S
Advanced study of a problem in the philosophy of mind.

Prerequisite: PHL240H1/PHL342H1/COG250Y1, 4.0 credits in philosophy
Distribution Requirements: Humanities

PHL406H1 - Seminar in Metaphysics

Hours: 36S
Typical problems include causality and determinism; ontological categories; mind and body; the objectivity of space and time.

Prerequisite: 4.0 credits in Philosophy including (one of PHL245H1/MAT157Y1) and (PHL232H1/PHL233H1/PHL240H1)
Distribution Requirements: Humanities
PHL407H1 - Seminar in Ethics

Hours: 36S

Advanced discussion of issues in moral philosophy, including issues of applied ethics.

Prerequisite: PHL275H1, 4.0 credits in philosophy
Distribution Requirements: Humanities

PHL408H1 - Seminar in Philosophy

Hours: 36S

Topics vary but bridge two or more areas or traditions of philosophy.

Prerequisite: 4.0 credits in philosophy
Distribution Requirements: Humanities

PHL409H1 - New Books Seminar

Hours: 36S

Advanced study of key philosophical works published within the last five years.

Prerequisite: 4.0 credits in philosophy
Distribution Requirements: Humanities

PHL410H1 - Seminar in Continental Philosophy

Hours: 36S

Advanced study of recent philosophical discussions within the continental tradition.

Prerequisite: PHL217H1/PHL315H1/PHL316H1/PHL319H1/PHL320H1/PHL321H1/PHL322H1, 4.0 credits in philosophy
Distribution Requirements: Humanities

PHL411H1 - Seminar in Analytic Philosophy

Hours: 36S

Advanced study of some topic of current philosophical interest within the analytic tradition.

Prerequisite: PHL245H1/MAT157Y1 and one of PHL232H1/PHL233H1/PHL240H1, 4.0 credits in philosophy
Distribution Requirements: Humanities

PHL412H1 - Seminar in Political Philosophy

Hours: 36S

Advanced study of some topic in social or political philosophy.

Prerequisite: PHL265H1/PHL271H1, 4.0 credits in philosophy
Distribution Requirements: Humanities

PHL413H1 - Seminar in Applied Ethics

Hours: 36S

Advanced study of some topic in an area of applied ethics, including bioethics, environmental ethics, and so on.

Prerequisite: PHL271H1/PHL273H1/PHL275H1/PHL281H1, 4.0 credits in philosophy
Distribution Requirements: Humanities

PHL414H1 - Seminar in Philosophy of Religion

Hours: 36S

Advanced study of topics in the philosophy of religion.

Prerequisite: PHL235H1/PHL335H1, 4.0 credits in philosophy
Distribution Requirements: Humanities

PHL416H1 - Seminar in Philosophy of Law

Hours: 36S

Advanced discussion of issues in the philosophy of law.

Prerequisite: PHL265H1/PHL271H1, one of PHL365H1/PHL370H1/PHL375H1, 4.0 credits in philosophy
Distribution Requirements: Humanities
**Breadth Requirements**: Thought, Belief and Behaviour (2)

**PHL417H1 - Seminar in History of Analytic Philosophy**

Hours: 36S

Advanced study of a figure or topic from the history of analytic philosophy.

**Prerequisite**: PHL325H1, 4.0 credits in philosophy

**Distribution Requirements**: Humanities

**Breadth Requirements**: Thought, Belief and Behaviour (2)

**PHL418H1 - Seminar in South Asian Philosophy**

Hours: 36S

Advanced study of one or more topics in South Asian Philosophy.

**Prerequisite**: 4.0 PHL credits or permission of the instructor

**Recommended Preparation**: PHL339H1

**Distribution Requirements**: Humanities

**Breadth Requirements**: Thought, Belief and Behaviour (2)

**PHL440H1 - Clinical Bioethics**

Hours: 36S

Advanced study of topics in bioethics, taught in conjunction with clinical bioethicists associated with the health care organization partners of the University of Toronto Joint Centre for Bioethics.

**Prerequisite**: PHL281H1, 4.0 credits in philosophy.

Limited to students enrolled in the Bioethics Specialist or Bioethics Major programs.

**Distribution Requirements**: Humanities

**PHL445H1 - Metalogic**

Hours: 36S

A continuation of PHL345H1, this is a course in the mathematical study of logic, also known as metalogic. We will investigate and prove theorems about logical systems. Topics covered may include: important results in metalogic, second and higher-order logic, or lambda-calculus.

**Prerequisite**: PHL345H1/MAT309H1; 4.0 credits in philosophy

**Exclusion**: PHL445H5; PHLD51H3

**Distribution Requirements**: Humanities

**Breadth Requirements**: Thought, Belief and Behaviour (2)

**PHL446H1 - Seminar in Decision Theory**

Hours: 36S

Decision theory studies what one ought to do when some more or less desirable outcomes of one’s actions depend on external facts about which one is uncertain. Uncertainty is characterized in terms of probabilities, desires are characterized in terms of utilities, and together they determine the expected utility of one’s actions. This course introduces these notions and their mathematical representations, as well as critically reflects on philosophical questions such as whether one should always take the action that maximize one’s expected utility, whether uncertainty is subjective or objective, and why uncertainty does, or ought to, obey the laws of probability.

**Prerequisite**: PHL246H1, 4.0 Credits in Philosophy

**Distribution Requirements**: Humanities

**Breadth Requirements**: Thought, Belief and Behaviour (2)

**PHL447H1 - Seminar in Philosophical Logic**

Hours: 36S

Advanced discussion of some topic in philosophical logic.

**Prerequisite**: PHL245H1/MAT157Y1; one of PHL246H1/PHL345H1/PHL347H1/PHL445H1/MAT309H1; 4.0 credits in philosophy

**Distribution Requirements**: Humanities

**Breadth Requirements**: Thought, Belief and Behaviour (2)

**PHL451H1 - Seminar in Philosophy of Language**

Hours: 36S

Advanced study of some topic in the philosophy of language.
**Prerequisite:** 4.0 PHL credits, including (PHL245H1/MAT157Y1), (PHL232H1/PHL233H1/PHL240H1)

**Distribution Requirements:** Humanities

**PHL455H1 - Seminar in Philosophy of Science**

**Previous Course Number:** PHL415H1

**Hours:** 36S

Advanced study of some area or problem in the philosophy of science.

**Prerequisite:** One of PHL355H1, PHL357H1 or HPS250H1. 4.0 credits in philosophy

**Distribution Requirements:** Humanities

**PHL470H1 - Advanced Bioethics**

**Hours:** 36S

Philosophical exploration of the foundations and methodology of bioethics. Offered jointly with PHL2145H.

**Prerequisite:** PHL281H1 and one of PHL380H1/PHL381H1/PHL382H1/PHL383H1/PHL384H1, and permission of the instructor and Department (by ballot). Limited to students enrolled in the Bioethics Specialist or Bioethics Major programs.

**Distribution Requirements:** Humanities

**PHL471H1 - Advanced Topics in Greek Philosophy**

**Hours:** 36S

Advanced Topics in Greek Philosophy

**Prerequisite:** PHL200Y1 and permission of the instructor and Department (by ballot)

**Distribution Requirements:** Humanities

**PHL472H1 - Advanced Topics in Medieval Philosophy**

**Hours:** 36S

Advanced Topics in Medieval Philosophy

**Prerequisite:** PHL200Y1/PHL205H1/PHL206H1 and permission of the instructor and Department (by ballot)

**Distribution Requirements:** Humanities

**PHL473H1 - Advanced Topics in Modern Philosophy**

**Hours:** 36S

Advanced Topics in Modern Philosophy

**Prerequisite:** PHL210Y1 and permission of the instructor and Department (by ballot)

**Distribution Requirements:** Humanities

**PHL475H1 - Advanced Topics in Moral Philosophy**

**Hours:** 36S

Advanced Topics in Moral Philosophy

**Prerequisite:** PHL275H1 and permission of the instructor and Department (by ballot)

**Distribution Requirements:** Humanities

**PHL476H1 - Advanced Topics in Epistemology**

**Hours:** 36S

Advanced Topics in Epistemology

**Prerequisite:** PHL232H1/PHL233H1 and permission of the instructor and Department (by ballot)

**Distribution Requirements:** Humanities

**PHL477H1 - Advanced Topics in Metaphysics**

**Hours:** 36S

Advanced Topics in Metaphysics

**Prerequisite:** PHL232H1/PHL233H1 and permission of the instructor and Department (by ballot)

**Distribution Requirements:** Humanities
PHL478H1 - Advanced Topics in Philosophy of Religion

Hours: 36S

Advanced Topics in Philosophy of Religion

Prerequisite: PHL235H1/PHL335H1 and permission of the instructor and Department (by ballot)
Distribution Requirements: Humanities

PHL479H1 - Advanced Topics in Philosophy of Mind

Hours: 36S

Advanced Topics in Philosophy of Mind

Prerequisite: COG250Y1/PHL240H1/PHL340H1/PHL341H1/PHL342H1 and permission of the instructor and Department (by ballot)
Distribution Requirements: Humanities

PHL480H1 - Advanced Topics in Logic

Hours: 36S

Advanced Topics in Logic

Prerequisite: Two of PHL344H1 - PHL349H1 and permission of the instructor and Department (by ballot)
Distribution Requirements: Humanities

PHL481H1 - Advanced Topics in the Philosophy of Language

Hours: 36S

Advanced Topics in the Philosophy of Language

Prerequisite: PHL351H1 and permission of the instructor and Department (by ballot)
Distribution Requirements: Humanities

PHL482H1 - Advanced Topics in Philosophy of Natural Science

Hours: 36S

Advanced Topics in Philosophy of Natural Science

Prerequisite: One of PHL355H1, PHL357H1 or HPS250H1, and permission of the instructor and Department (by ballot)
Distribution Requirements: Humanities

PHL483H1 - Advanced Topics in Social and Political Philosophy

Hours: 36S

Advanced Topics in Social and Political Philosophy

Prerequisite: PHL265H1 and permission of the instructor and Department (by ballot)
Distribution Requirements: Humanities

PHL484H1 - Advanced Topics in the Philosophy of Law

Hours: 36S

Advanced Topics in the Philosophy of Law

Prerequisite: PHL271H1 and permission of the instructor and Department (by ballot)
Distribution Requirements: Humanities

PHL485H1 - Advanced Topics in Aesthetics

Hours: 36S

Advanced Topics in Aesthetics

Prerequisite: PHL285H1/PHL385H1 and permission of the instructor and Department (by ballot)
Distribution Requirements: Humanities

PHL486H1 - Advanced Topics in Philosophy of History

Hours: 36S

Advanced Topics in Philosophy of History

Prerequisite: PHL362H1 and permission of the instructor and Department (by ballot)
Distribution Requirements: Humanities
PHL487H1 - Advanced Topics in Philosophy
Advanced Topics in Philosophy
Prerequisite: Permission of the instructor and Department
Distribution Requirements: Humanities

PHL488H1 - Advanced Topics in Philosophy
Advanced Topics in Philosophy
Prerequisite: Permission of the instructor and Department

Introduction

Physics forms the bedrock of our understanding of Nature. Any physical object or process, or even the structure of the whole universe itself, can be the subject of physics. Physicists study an extremely diverse array of systems, from the simplest subatomic particles to the most complex processes found in biological cells or in the Earth’s climate. Physics provides a comprehensive set of fundamental tools that can be brought to bear on many problems across a wide variety of fields.

Students can choose between Specialist Programs in Physics or Physics combined with numerous other sciences, as well as Philosophy. In addition, the Physics Major and Minor programs give the student the option of mixing Physics with the nearly limitless array of science and non-science programs available across the University. As well, students have the opportunity to do original research and to undertake independent supervised studies for course credit.

A program in physics has much to offer. Beyond the traditional careers of teaching and research, a knowledge of physics is a powerful asset in professions like Medicine or Law, or for careers involving the environmental, geological or biological sciences. An understanding of physics is essential for those who are concerned about how society is affected by climate change or advanced technology. The conceptual problem-solving tools one acquires as a physicist can be applied with great success to many occupations.

The Physics Specialist Program offers intensive training in all aspects of physics. Courses can be selected in order to emphasize the experimental, theoretical or applied sides of physics. In fourth year, students intending to undertake graduate studies are encouraged to take advanced optional courses. These courses, which reflect the excellence and research diversity of the faculty, are offered in areas such as Relativity, High Energy Physics, Quantum Optics, Condensed Matter, Geophysics and Atmospheric Physics.

The Specialist Program in Biological Physics combines the analytical problem solving skills of the physicist with sound backgrounds in relevant biology and biochemistry. The interface between biology and physics lies at the forefront of the rapidly growing field of quantitative biology.

The Professional Experience Year Co-op program ("PEY Co-op": see also https://engineeringcareers.utoronto.ca/) is available to eligible, full-time Arts & Science Specialist students after their second year of study. Physics students are encouraged to take advantage of this opportunity to apply their scientific and mathematical skills in a 12-16-month professional internship. Note: Students in Year 3 in the Fall/Winter 2021-2022 session will be the last group of Faculty of Arts & Science students eligible to participate in the PEY Co-op. September 2021 or January 2022 will be the last opportunity for Faculty of Arts & Science students to register for PEY Co-op.

The Departmental website gives detailed information on programs and courses, and describes the operation of the Department and the counseling services available. All students, most particularly those entering first year, are strongly urged to consult the web site before term begins.

Physics Programs

Biological Physics Specialist
(Science Program) -

The Biological Physics specialist program focuses on the physical principles that organize complex biological phenomena. How do cells use chemical energy to generate motion? How does diffusion limit the ability of cells to measure the concentration of chemicals? How do neurons transmit and process information? How does blood flow through a beating heart? Biological Physics deals with problems at the interface of Physics, Molecular Biology, and Physiology, and covers the full range of scales, from the molecular, to the organismic. Students in this program will be trained to think rigorously and quantitatively about a wide range of interdisciplinary problems, will be well prepared to work in a variety of fields such as medicine and biotechnology, and will be ready to undertake graduate work in the fast-emerging field of Biological Physics and its related specialties including Immunology, Physiology, Neuroscience, and Bioengineering.

The program is offered as a partnership between the Departments of Physics, Biochemistry, Chemistry, Immunology, and Physiology (referred to as "partner departments"). All students take the Core courses in Physics, Mathematics, Biology, Biochemistry, and Chemistry. The Core also includes a specialized course in Biological Physics (PHY331H1) and a third-year laboratory course from one of the partner departments. Students then choose one of four Streams (below) consisting of additional courses from the partner departments.

Biological Physics Specialist: Advanced Physics Stream
(Science Program) - ASSPE2739

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Core Biological Physics Courses (11.5 credits)

First Year (3.0 credits): (CHM138H1/CHM136H1, CHM139H1/CHM135H1)/CHM151Y1 (MAT135H1, MAT136H1)/MAT137Y1, PHY131H1/PHY151H1, PHY132H1/PHY152H1 (PHY151H1, PHY152H1 recommended)

Second Year (3.0 credits): BCH210H1, (MAT235Y1/MAT237Y1), PHY244H1, PHY250H1, PHY252H1

Second or Third Year (0.5 credit): BIO230H1/ BIO255H1

Third Year (2.0 credits): PHY224H1, PHY254H1, PHY256H1, PHY354H1

Third or Fourth Year (2.0 credits):

1. PHY331H1
2. PHY324H1/BCH370H1/CHM327H1/PSL372H1
3. 1.0 credit, including at least 0.5 credit at the 400-level, from APM346H1/MAT334H1/MAT354H1/PHY 300-level courses /PHY 400-level courses.

Additional Requirements for the Advanced Physics Stream (2.5 credits):

1. (BCH311H1, BCH340H1)/(PSL300H, PSL301H1)
2. PHY431H1 and 1.0 credit from additional courses from APM346H1/MAT334H1/MAT354H1/PHY 300-level courses /PHY 400-level courses/ JPE395H1/ JPE493H1

Integrative, Inquiry-Based Activity Requirement

The choices in the program must satisfy the requirement for an integrative, inquiry-based activity by including at least one of the following courses: IMM435H1, PHY371Y1, PHY372H1, PHY396Y0, PHY397Y0, PHY398H0, PHY399Y0, PHY407H1, PHY424H1, PHY426H1, PHY428H1, PHY429H1, PHY471Y1, PHY472H1, PHY478H1, PHY479Y1, PSL304H1, PSL305H1, and PSL372H1

Notes:

Students are encouraged but not required to enrol in the independent project courses PHY478H1/PHY479Y1. These students may be supervised by faculty in the Departments of Physics, Biochemistry, Chemistry, Immunology, and Physiology. Students are required to have a B average in the program courses, identify a supervisor, and consult the Associate Chair of Physics (Undergraduate Studies) before enrolling in PHY478H1/PHY479Y1.

Students might wish to enrol in 300- and 400-level courses in the partner life science departments that are not listed above. These students will need approval to take these courses from the Associate Chair (Undergraduate Studies) prior to enrolment in the course.
Biological Physics Specialist: Biochemistry Stream (Science Program) - ASSPE2737

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Core Biological Physics Courses (11.5 credits):

First Year (3.0 credits): (CHM138H1/CHM136H1, CHM139H1/CHM135H1/CHM151Y1, (MAT135H1, MAT136H1)/MAT137Y1, PHY131H1/PHY151H1, PHY132H1/PHY152H1 (PHY151H1, PHY152H1 recommended)

First or Second Year (1.0 credit): BIO130H1, MAT223H1

Second Year (3.0 credits): BCH210H1, (MAT235Y1/MAT237Y1), MAT244H1, PHY250H1, PHY252H1

Second or Third Year (0.5 credit): BIO230H1/ BIO255H1

Third Year (2.0 credits): PHY224H1, PHY254H1, PHY256H1, PHY354H1

Third or Fourth Year (2.0 credits):

1. PHY331H1
2. PHY324H1/ BCH370H1/ CHM327H1/ PSL372H1
3. 1.0 credit, including at least 0.5 credit at the 400-level, from APM346H1/ MAT334H1/ MAT354H1/PHY 300-level courses/PHY 400-level courses.

Additional Courses for the Biochemistry Stream (2.5 credits):

1. BCH311H1, BCH340H1
2. 1.5 credits from BCH370H1/CSB428H1/BCH 400-level courses. Excludes BCH472Y1, BCH473Y1, BCH478H1, BCH479H1

Integrative, Inquiry-Based Activity Requirement

The choices in the program must satisfy the requirement for an integrative, inquiry-based activity by including at least one of the following courses: IMM435H1, PHY371Y1, PHY372H1, PHY396Y0, PHY397Y0, PHY398H0, PHY399Y0, PHY407H1, PHY424H1, PHY426H1, PHY428H1, PHY429H1, PHY471Y1, PHY472H1, PHY478H1, PHY479Y1, PSL304H1, PSL305H1, and PSL372H1

Notes:

Students are encouraged but not required to enroll in the independent project courses PHY478H1/PHY479Y1. These students may be supervised by faculty in the Departments of Physics, Biochemistry, Chemistry, Immunology, and Physiology. Students are required to have a B average in the program courses, identify a supervisor, and consult the Associate Chair of Physics (Undergraduate Studies) before enrolling in PHY478H1/PHY479Y1.

Students might wish to enrol in 300- and 400-level courses in the partner life science departments that are not listed above. These students will need approval to take these courses from the Associate Chair (Undergraduate Studies) prior to enrolment in the course.

On approval of the Department of Physics, students who take CHM222H1/CHM225Y1 will not have to take PHY252H1.

Biological Physics Specialist: Immunology Stream (Science Program) - ASSPE2740

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Core Biological Physics Courses (11.5 credits)

First Year (3.0 credits): (CHM138H1/CHM136H1, CHM139H1/CHM135H1) /CHM151Y1, (MAT135H1, MAT136H1)/MAT137Y1, PHY131H1/PHY151H1, PHY132H1/PHY152H1 (PHY151H1, PHY152H1 recommended)

First or Second Year (1.0 credit): BIO130H1, MAT223H1

Second Year (3.0 credits): BCH210H1, (MAT235Y1/MAT237Y1), MAT244H1, PHY250H1, PHY252H1

Second or Third Year (0.5 credit): BIO230H1/ BIO255H1

Third Year (2.0 credits): PHY224H1, PHY254H1, PHY256H1, PHY354H1

Third or Fourth Year (2.0 credits):

1. PHY331H1
2. PHY324H1/ BCH370H1/ CHM327H1/ PSL372H1
3. 1.0 credit, including at least 0.5 credit at the 400-level, from APM346H1/ MAT334H1/ MAT354H1/PHY 300-level courses/PHY 400-level courses.

On approval of the Department of Physics, students who take CHM222H1/CHM225Y1 will not have to take PHY252H1.
Additional Courses for the Immunology Stream (2.0 credits):

1. IMM341H1, IMM351H1 (Students in the Biological Physics Specialist Immunology Stream are permitted to take BIO230H1 as a co-requisite to IMM341H1, instead of as a prerequisite, by permission of the Department of Immunology)
2. 1.0 credit from IMM 400-level courses.

Integrative, Inquiry-Based Activity Requirement

The choices in the program must satisfy the requirement for an integrative, inquiry-based activity by including at least one of the following courses: IMM435H1, PHY371Y1, PHY372H1, PHY396Y0, PHY397Y0, PHY398H0, PHY399Y0, PHY407H1, PHY424H1, PHY426H1, PHY428H1, PHY429H1, PHY471Y1, PHY472H1, PHY478H1, PHY479Y1, PSL304H1, PSL305H1, and PSL372H1.

**Physics and Philosophy Specialist (Science Program) - ASSPE2584**

Physics has deep historical roots in natural philosophy and many aspects of contemporary Physics raise profound philosophical questions about the nature of reality. The interdisciplinary Physics and Philosophy Program allows the student to engage with both Physics and Philosophy at their deepest levels, and to more fully explore the connections between them.

Consult Associate Chair (Undergraduate Studies), Department of Physics or Philosophy.

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

(15.0 credits, including at least 1.5 credits at the 400-level)

First Year: (2.5 credits)

( MAT135H1, MAT136H1) / MAT137Y1 / MAT157Y1, MAT223H1 / MAT240H1, PHY131H1 / PHY151H1, PHY132H1 / PHY152H1 (The courses MAT137Y1, MAT223H1, PHY151H1, PHY152H1 are recommended.)

First or Second Year: (1.5 credits)

1.5 credits of: PHL232H1, PHL233H1, PHL240H1, PHL245H1, HPS250H1, PHL255H1 (PHL245H1 may only be counted here if MAT157Y1 is not taken)

Second Year: (3.0 credits)

MAT237Y1, MAT257Y1, MAT235Y1, MAT244H1, MAT267H1, PHY250H1, PHY254H1, PHY256H1 (The courses MAT237Y1, MAT244H1 are recommended.)

Third Year: (2.0 credits)

MAT334H1, MAT354H1, PHY252H1, (PHY350H1 / PHY354H1), PHY356H1

Fourth Year: (1.0 credit)

PHY456H1, PHY491H1

Any Year: (5.0 credits)

( PHL345H1, PHL347H1, PHL355H1, PHL356H1, (PHL415H1 / PHL455H1 / PHL482H1), plus 1.0 credit of PHL325H1 / PHL331H1 / PHL332H1 / PHL346H1 / PHL354H1 / PHL357H1) plus 2.0 additional PHL credits, at least 0.5 credit of which must be from Course Group 2 - Value Theory (The courses PHL265H1, PHL275H1 are recommended.)

**Group 2 - Value Theory:**

PHL265H1, PHL295H1, PHL365H1, PHL366H1, PHL370H1, PHL375H1, PHL407H1, PHL412H1, PHL413H1, PHL483H1

**Physics Specialist (Science Program) - ASSPE1944**

The Physics Specialist Program offers rigorous training in the full spectrum of core physics subfields, as well as their numerous important applications. Practical courses treat the experimental and computational aspects and complement the lecture courses. Physics concerns many of the most fundamental questions in our scientific understanding of the universe. What is the nature of matter and energy at the smallest scales? What are the physical processes that govern the Earth’s climate? What is the nature of light and how can it be controlled? How do the collective properties of solids emerge from those of individual atoms? How do biological processes organize themselves to maintain their survival? What is the structure and evolution of the Earth and the other planets? How can quantum information be used for computation? Physics seeks answers to these questions using a combination of theory, computation and precise experimental work, and the results find application across all of science.

Consult the Associate Chair (Undergraduate Studies), Department of Physics.

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**
Physics Major (Science Program) - ASMAJ1944

A Physics Major program is appropriate for students interested in a more flexible and diverse undergraduate physics program. A Physics Major may be tailored to be a natural counterpart to a second Major in mathematics, astronomy, computer science, environmental science, geology or the life sciences. Students should consult the Associate Chairs (Undergraduate Studies) of Physics and the respective departments for advice on course selections.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(8.0 credits, including 2.0 credits at the 300+ level, with at least one 0.5 credit at the 400-level)

First Year: (2.0 credits)

Second Year: (3.0 credits)

Third or Fourth Year: (3.5 credits)

Notes:

1. Students are encouraged but not required to enrol in the independent study and project courses such as PHY371Y1, PHY478H1, etc.

2. PHY479Y1 (Undergraduate Research Project) satisfies Requirement 3 in Third or Fourth Year and counts as a 0.5 credit at the PHY 400-level for Requirement 4 in Third or Fourth Year. Students may use MAT351Y1 instead of APM346H1 for Requirement 1 in Third Year.

3. Requirement 5 in Third or Fourth Year represents a 0.5 credit with a significant emphasis on "Ethics and Social Responsibility". Students may use the CR/NCR option towards any of the courses listed in Requirement 5. Another Arts & Science course with a significant emphasis on "Ethics and Social Responsibility" may be substituted subject to approval from the Associate Chair (Undergraduate Studies).

4. The requirement for an integrative, inquiry-based activity is satisfied by the required course PHY424H1.
Third Year: (2.5 credits)

1. MAT244H1/ MAT267H1, PHY324H1/ PHY405H1/ PHY407H1/ PHY408H1

2. 1.5 credits, including at least a 0.5 credit at the PHY 400-level, from APM346H1/ MAT334H1/ MAT354H1/PHY 300-level courses/PHY 400-level courses/ JPE395H1/ JPE493H1, excluding JPH311H1, JPH441H1. A maximum of a 0.5 credit from APM346H1/ MAT334H1/ MAT354H1 may be used to fulfil this requirement.

Third or Fourth Year: (0.5 credit)

1. Ethics and Social Responsibility Requirement: The Physics course JPH441H1 meets this requirement as well as any of the following courses: ETH201H1/ ETH210H1/ ETH220H1/ ETH230H1/ HPS200H1/ PHL233H1/ PHL265H1/ PHL273H1/ PHL275H1/ PHL281H1/ IMC200H1/ VIC172Y1/ ENV333H1. See Note 2.

Notes:

1. Students in the Physics Major program who are intending to pursue graduate studies in Physics should consult with the Associate Chair (Undergraduate Studies).

2. Requirement 1 in Third or Fourth Year represents a 0.5 credit with a significant emphasis on "Ethics and Social Responsibility". Students may use the CR/NCR option towards any of the courses listed in Requirement 1. Another Arts & Science course with a significant emphasis on "Ethics and Social Responsibility" may be substituted subject to approval from the Associate Chair (Undergraduate Studies).

Regarding Physics Courses

Note

More detailed and current information on courses is available through the Physics Department website. Many course numbers have changed in recent years: check the course descriptions and exclusions below for course equivalencies. Pre- and co-requisites are strictly enforced and may only be waived in special circumstances. Students should consult the Physics Associate Chair (Undergraduate Studies) with questions about pre- and co-requisites prior to the beginning of term if they are requesting a waiver. Students without the required pre- and co-requisites will be removed from courses.

Physics Minor (Science Program) - ASMIN1944

Enrolment Requirements:

Physics Courses

PHY100H1 - The Magic of Physics

Hours: 24L/12T
quantum worlds courtesy of Galileo, Newton, Maxwell, Einstein, Heisenberg and many others.

(PHY100H1 is primarily intended as a Breadth Requirement course for students in the Humanities and Social Science)

Exclusion: PHY131H1/PHY132H1/PHY151H1/PHY152H1 (or equivalent) taken previously or concurrently
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY131H1 - Introduction to Physics I

Hours: 36L/20P

A first university physics course primarily for students not intending to pursue a Specialist or Major program in Physical or Mathematical Sciences. Topics include: classical kinematics & dynamics, momentum, energy, force, friction, work, power, angular momentum, oscillations, waves, sound.

Corequisite: MAT135H1/MAT137Y1/MAT157Y1 recommended, but may be required prerequisite in 2nd year Physics courses
Exclusion: PHY151H1
Recommended Preparation: MCV4U Calculus & Vectors / MCB4U Functions & Calculus, SPH4U Physics
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY132H1 - Introduction to Physics II

Hours: 36L/20P

The second university physics course primarily for students not intending to pursue a Specialist or Major program in Physical or Mathematical Sciences. Topics include: electricity, magnetism, light, optics, special relativity.

Prerequisite: PHY131H1/PHY151H1
Corequisite: MAT136H1/MAT137Y1/MAT157Y1 recommended, but may be required prerequisite in 2nd year Physics courses
Exclusion: PHY152H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY151H1 - Foundations of Physics I

Hours: 36L/30P

The first physics course in many of the Specialist and Major Programs in Physical Sciences. It provides an introduction to the concepts, approaches and tools the physicist uses to describe the physical world while laying the foundation for classical and modern mechanics. Topics include: mathematics of physics, energy, momentum, conservation laws, kinematics, dynamics, and special relativity.

Prerequisite: MCV4U Calculus & Vectors / MCB4U Functions & Calculus, SPH4U Physics
Corequisite: MAT137Y1/MAT157Y1
Exclusion: PHY131H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY152H1 - Foundations of Physics II

Hours: 36L/30P

The concept of fields will be introduced and discussed in the context of gravity and electricity. Topics include rotational motion, oscillations, waves, electricity and magnetism.

Prerequisite: PHY131H1/PHY151H1/PHY180H1
Corequisite: MAT137Y1/MAT157Y1
Exclusion: PHY132H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY196H1 - Emergence in Nature

Hours: 24S

The universe is not a rigid clockwork, but neither is it formless and random. Instead, it is filled with highly organized, evolved structures that have somehow emerged from simple rules of physics. Examples range from the structure of galaxies to the pattern of ripples on windblown sand, to biological and even social processes. These phenomena exist in spite of the universal tendency towards disorder. How is this possible? Self-organization challenges the usual reductionistic scientific method, and begs the question of whether we can ever really understand or predict truly complex systems. Restricted to first-year students. Not eligible for CR/NCR.

Prerequisite: No prior experience with physical science will be required, but familiarity with Grade 10 mathematics will be assumed.
PHY197H1 - Modern Physics for the Curious

Hours: 24S

Have you wondered about the origin and workings of the natural world around us? Have you found physical science interesting but inaccessible because it was too full of math and jargon? Have you felt a pull to become more science-literate? If so, this seminar course is for you -- or for anyone interested in understanding more about the universe, including our planet, seen through the lens of modern physics. Ideas on the menu will include: particle physics, space and time, relativity, black holes, quantum physics, unification forces, string theory, and big bang cosmology. The intriguing story of these integrated phenomena unfolds over a wide distance and a long time. Students from diverse academic backgrounds are warmly welcome. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: No prior experience with physical science will be required, but familiarity with Grade 10 mathematics will be assumed.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY198H1 - Physics at the Cutting Edge

Previous Course Number: PHY289H1
Hours: 24L/12S

A limited enrollment seminar course for First Year Science students interested in current research in Physics. Students will meet active researchers studying the universe from the centre of the earth to the edge of the cosmos. Topics may range from string theory to experimental biological physics, from climate change to quantum computing, from superconductivity to earthquakes. The course may involve both individual and group work, essays and oral presentations. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: PHY151H1
Corequisite: PHY152H1, MAT137Y1/MAT157Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY199H1 - Dark Matter and Dark Energy are the New Black

Hours: 24S

It is now 90 years since astronomers found the first evidence for a form of matter that wasn't part of the stars in our galaxies, but rather is "dark" and has a gravitational attraction to ordinary matter. Other lines of evidence lead us to believe that there is six times more dark matter than the ordinary matter we are familiar with. Despite this, we have no credible, direct evidence for what this dark matter might be. It is one of the biggest puzzles in particle physics and cosmology. In the last decade, we have also discovered that something else is going on – the universe appears to be filled with "dark energy" that causes the expansion of our universe to speed up instead of slowdown. We will discuss what we know about the hypotheses of dark matter and dark energy, and the debates about what might really be going on. Are we seeing science in crisis, with a revolution just around the corner, or is this just the "normal science" talked about by Kuhn and other philosophers of science? Participants will be expected to participate in seminar-style discussions, as well as take the lead on at least one topic of discussion. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: No prior experience with physical science will be required, but familiarity with Grade 10 mathematics will be assumed.

Breadth Requirements: The Physical and Mathematical Universes (5)

PHY202H1 - The Physics of Science Fiction and Gaming

Hours: 24L/12T

The physics of time travel, teleportation, levitation, invisibility, special effects, and other physics related topics found in literature, film, and gaming. The course will analyze the realism of physical phenomena in these media, and consider the impact of these concepts on science and society.

PHY202H1 is primarily intended as a Breadth Requirement course for students in the Humanities and Social Sciences.

Exclusion: PHY131H1/PHY132H1/PHY151H1/PHY152H1 (or equivalent) taken previously or concurrently.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
PHY205H1 - The Physics of Everyday Life

Hours: 24L/12T

An introduction to the physics of everyday life. This conceptual course looks at everyday objects to learn about the basis for our modern technological world. Topics may include anything from automobiles to weather.

PHY205H1 is primarily intended as a Breadth Requirement course for students in the Humanities and Social Sciences.

Exclusion:
PHY131H1/PHY132H1/PHY151H1/PHY152H1 or equivalent, taken previously or concurrently

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY207H1 - The Physics of Music

Hours: 24L/12T

An online course intended to provide non-science students with a basic understanding of the science behind sound and music. Topics include oscillations, waves, human hearing and perception of music, musical scales, musical instruments, recording and storing sound digitally, producing sound and broadcasting. Lectures will be delivered via the web and mandatory tutorials will require live webinar participation. The final exam will require attendance on the St. George campus.

Exclusion:
PHY131H1/PHY132H1/PHY151H1/PHY152H1 or equivalent, taken previously or concurrently

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY224H1 - Practical Physics I

Hours: 72P

Develops the core practical experimental and computational skills necessary to do physics. Students tackle simple physics questions involving mathematical models, computational simulations and solutions, experimental measurements, data and uncertainty analysis.

Prerequisite: PHY132H1/PHY152H1, (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1
Corequisite:

PHY231H1 - Physics of Living Systems

Hours: 24L/18P

An introductory course for students interested in understanding the physical phenomena occurring in biological systems and the applications of physics in life sciences. Topics may include physical processes inside living cells and systems, medical physics and imaging.

Prerequisite:
PHY132H1/PHY152H1, (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1

Recommended Preparation: BIO130H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ENV237H1 - Physics of the Changing Environment A

Hours: 24L/24P

The course will cover basic physics of environmental processes and of measurement techniques in the atmosphere, the ocean, lake-land-forest systems, and other biological systems. It will place its work in the context of climate change and other aspects of environmental change. This course is solely intended for students who have NOT completed a previous first year physics core course, who are in one of the following programs: Environmental Science Major or Minor, Environmental Geosciences Specialist or Earth and Environmental Systems Major.

Prerequisite: MAT135H1/ MAT136H1/ MAT137Y1/ MAT157Y1/ JMB170Y1, CHM136H1/ CHM138H1/ CHM135H1/ CHM139H1/ CHM151Y1
Exclusion: ENV238H1, PHY131H1/ PHY132H1/ PHY151H1/ PHY152H1
Recommended Preparation: Any high school physics
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

ENV238H1 - Physics of the Changing Environment B

Hours: 24L/24P
The course will cover basic physics of environmental processes and of measurement techniques in the atmosphere, the ocean, lake-land-forest systems, and other biological systems. It will place its work in the context of climate change and other aspects of environmental change. This course is solely intended for students who have completed a previous first year physics core course, who are in one of the following programs: Environmental Science Major or Minor, Environmental Geosciences Specialist or Earth and Environmental Systems Major.

**Prerequisite:** MAT135H1/ MAT136H1/ MAT137Y1/ MAT157Y1/ JMB170Y1, CHM136H1/ CHM138H1/ CHM135H1/ CHM139H1/ CHM151Y1, PHY131H1/ PHY132H1/ PHY151H1/ PHY152H1

**Exclusion:** ENV237H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY250H1 - Electricity and Magnetism**

**Hours:** 24L/12T

An introductory course in Electromagnetism. Topics include: Point charges, Coulomb’s law, electrostatic field and potential, Gauss's Law, conductors, electrostatic energy, magnetostatics, Ampere's Law, Biot-Savart Law, the Lorentz Force Law, Faraday's Law, Maxwell's equations in free space.

**Prerequisite:** PHY132H1/PHY152H1, (MAT135H1,MAT136H1)/MAT137Y1/MAT157Y1

**Corequisite:** MAT235Y1/MAT237Y1/MAT257Y1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY254H1 - Classical Mechanics**

**Hours:** 24L/12T

The course analyzes the linear, nonlinear and chaotic behaviour of classical mechanical systems such as harmonic oscillators, rotating bodies, and central field systems. The course will develop the analytical and numerical tools to solve such systems and determine their basic properties. The course will include mathematical analysis, numerical exercises using Python, and participatory demonstrations of mechanical systems.

**Prerequisite:** PHY132H1/PHY152H1 (PHY152H1 recommended), (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1

**Corequisite:** MAT235Y1/MAT237Y1/MAT257Y1

**Recommended Preparation:** MAT244H1/MAT267H1, PHY224H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY256H1 - Introduction to Quantum Physics**

**Hours:** 24L/12T

Failures of classical physics; the Quantum revolution; Stern-Gerlach effect; harmonic oscillator; uncertainty principle; interference packets; scattering and tunneling in one-dimension.

**Prerequisite:** PHY132H1/PHY152H1, (MAT135H1,MAT136H1)/MAT137Y1/MAT157Y1

**Corequisite:** MAT235Y1/MAT237Y1/MAT257Y1, (MAT223H1/MAT240H1 recommended)

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY299Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

**Distribution Requirements:** Science
JPH311H1 - From Universal Gravity to Quantum Information: The Making of Modern Physics

Hours: 24L

Topics in the history of physics from antiquity to the 20th century, including Aristotelian physics, Galileo, Descartes, electromagnetism, thermodynamics, statistical mechanics, relativity, quantum physics, and particle physics. The development of theories in their intellectual and cultural contexts.

Prerequisite: At least a 0.5 credit PHY course at university level
Exclusion: HPS311H1
Distribution Requirements: Humanities, Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY324H1 - Practical Physics II

Hours: 72P

A modular practical course that further develops the core experimental and computational skills necessary to do physics. Modules include: experimental skills building, computational tools in data and uncertainty analysis, and independent experimental projects.

Prerequisite: PHY224H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY331H1 - Introduction to Biological Physics

Hours: 24L/18P

A course for students interested in a deeper understanding of physical phenomena occurring in biological systems. Thermodynamics, diffusion, entropic forces, fluids, biological applications.

Prerequisite: PHY252H1/CHM222H1/CHM225Y1, PHY231H1/PHY250H1/PHY254H1/PHY256H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY350H1 - Electromagnetic Theory

Hours: 24L/12T

This course builds upon the knowledge and tools developed in PHY250H1. Topics include: solving Poisson and Laplace equations via method of images and separation of variables, multipole expansion for electrostatics, atomic dipoles and polarizability, polarization in dielectrics, multipole expansion in magnetostatics, magnetic dipoles, magnetization in matter, Maxwell's equations in matter, conservation laws in electrodynamics, and electromagnetic waves.

Prerequisite: MAT223H1/MAT240H1, MAT244H1/MAT267H1, MAT235Y1/MAT237Y1/MAT257Y1, PHY250H1, PHY254H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY354H1 - Advanced Classical Mechanics

Hours: 24L/12T

Symmetry and conservation laws, stability and instability, generalized coordinates, Hamilton's principle, Hamilton's equations, phase space, Liouville's theorem, canonical transformations, Poisson brackets, Noether's theorem.

Prerequisite: MAT244H1/MAT267H1, PHY254H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY356H1 - Quantum Mechanics I

Hours: 24L/12T

The general structure of wave mechanics; eigenfunctions and eigenvalues; operators; orbital angular momentum; spherical harmonics; central potential; separation of variables; hydrogen atom; Dirac notation; operator methods; harmonic oscillator and spin.

Prerequisite: MAT223H1/MAT240H1, PHY250H1, PHY256H1/(CHM222H1,CHM223H1)/CHM225Y1, (PHY256H1 recommended)
Corequisite: MAT244H1/MAT267H1
Exclusion: CHM326H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
PHY357H1 - Nuclear and Particle Physics
Hours: 24L/12T
The subatomic particles; nuclei, baryons and mesons, quarks, leptons and bosons; the structure of nuclei and hadronic matter; symmetries and conservation laws; fundamental forces and interactions, electromagnetic, weak, and strong; a selection of other topics: CP violation, nuclear models, standard model, proton decay, supergravity, nuclear and particle astrophysics. This course is not a prerequisite for any PHY400-level course.
Prerequisite: PHY356H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY358H1 - Atoms, Molecules and Solids
Hours: 24L/12T
Quantum theory of atoms, molecules, and solids; variational principle and perturbation theory; hydrogen and helium atoms; exchange and correlation energies; multielectron atoms; simple molecules; bonding and antibonding orbitals; rotation and vibration of molecules; crystal binding; electron in a periodic potential; reciprocal lattice; Bloch's theorem; nearly-free electron model; Kronig-Penney model; energy bands; metals, semiconductors, and insulators; Fermi surfaces.
Prerequisite: PHY356H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY365H1 - Quantum Information
Hours: 24L/12T
Introduction to quantum computing and other quantum information topics; Quantum states of multi-particle systems; Entanglement, Bell inequalities and Teleportation; Quantum Key Distribution; Quantum Computing Algorithms; Quantum Information Processing Technologies; other applications to metrology and illumination.
Prerequisite: PHY256H1/PHY294H1/CHM223H1/ECE330H1 (Students who do not meet these prerequisites are encouraged to contact the Department.)
Recommended Preparation: MAT223H1/MAT240H1

PHY371Y1 - Supervised Study in Physics
An individual study program chosen by the student with the advice of, and under the direction of, a staff member. A student may take advantage of this course either to specialize further in a field of interest or to explore interdisciplinary fields not available in the regular syllabus. Consult the department web pages for some possible topics. This course may also be available in the summer. Not eligible for CR/NCR option.
Prerequisite: Consult the Physics Associate Chair (Undergraduate Studies)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY372H1 - Supervised Study in Physics
An individual study program chosen by the student with the advice of, and under the direction of, a staff member. A student may take advantage of this course either to specialize further in a field of interest or to explore interdisciplinary fields not available in the regular syllabus. Consult the department web site for some possible topics. This course may also be available in the summer. Not eligible for CR/NCR option.
Prerequisite: Consult the Physics Associate Chair (Undergraduate Studies)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PHY385H1 - Introductory Optics
Hours: 24L/20P
An introduction to the physics of light. Topics covered include: electromagnetic waves and propagation of light; the Huygens and Fermat principles; geometrical optics and optical instruments; interference of waves and diffraction; polarization; introduction to photons, lasers, and optical fibers.
Prerequisite: PHY250H1, PHY254H1
Exclusion: ECE318H1
Distribution Requirements: Science
**PHY392H1 - Physics of Climate**

**Hours:** 24L

This course provides an introduction to climate physics and the earth-atmosphere-ocean system. Topics include solar and terrestrial radiation; global energy balance; radiation laws; radiative transfer; atmospheric structure; convection; the meridional structure of the atmosphere; the general circulation of the atmosphere; the ocean and its circulation; and climate variability.

**Prerequisite:** PHY250H1/PHY252H1, MAT235Y1/MAT237Y1/MAT257Y1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY397Y0 - Exchange Research Project Abroad**

Course credit for research or field studies abroad under the supervision of a faculty or staff member from an exchange institution. Consult the Physics Department web pages for information about opportunities. Not eligible for CR/NCR option.

**Prerequisite:** Consult the Physics Associate Chair (Undergraduate Studies)

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**JPE395H1 - Physics of the Earth**

**Hours:** 24L

Designed for students interested in the physics of the Earth and the planets. Study of the Earth as a unified dynamic system; determination of major internal divisions in the planet; development and evolution of the Earth's large scale surface features through plate tectonics; the age and thermal history of the planet; Earth's gravitational field and the concept of isostasy; mantle rheology and convection; Earth tides; geodetic measurement techniques, in particular modern space-based techniques.

**Prerequisite:** PHY132H1/PHY152H1/PHY180H1/MIE100H1, MAT235Y1/MAT237Y1/MAT291H1/AER210H1, PHY254H1/PHY293H/MAT244H1/MAT267H1/MAT290H1/MAT292H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY398H0 - Research Excursions**

**Distribution Requirements:** Science

**PHY398Y0 - Research Excursions**

**PHY399Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

**PHY405H1 - Electronics Lab**

**Hours:** 12L/36P

Electrical circuits, networks and devices are all-pervasive in the modern world. This laboratory course is an introduction to the world of electronics. Students will learn the joys and perils of electronics, by designing,
constructing and debugging circuits and devices. The course will cover topics ranging from filters and operational amplifiers to micro-controllers, and will introduce students to concepts such as impedance, transfer functions, feedback and noise.

**Prerequisite:** PHY224H1, PHY250H1. Note that PHY405H1 may be taken in third or fourth year.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

### PHY407H1 - Computational Physics

**Hours:** 12L/36P

This is an introduction to scientific computing in physics. Students will be introduced to computational techniques used in a range of physics research areas. By considering select physics topics, students will learn basic computational methods for function analysis (computing integrals and derivatives; finding roots and extrema), resolution of linear and non-linear equations, eigenvalue problems, Fourier analysis, ODEs, PDEs and Monte Carlo techniques. As the course progresses, students will develop their skills at debugging, solution visualization, computational efficiency and accuracy. The course is based on python and will involve working on a set of computational labs throughout the semester as well as a final project.

**Prerequisite:** PHY224H1/PHY254H1

**Corequisite:** Any third or fourth year course in Physics

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

### PHY408H1 - Time Series Analysis

**Hours:** 12L/24P

The analysis of digital sequences; filters; the Fourier Transform; windows; truncation effects; aliasing; auto and cross-correlation; stochastic processes, power spectra; least squares filtering; application to real data series and experimental design.

**Prerequisite:** PHY407H1/PHY224H1/PHY250H1/PHY254H1/PHY324H1

1. PHY408H1 may be taken in third or fourth year

**Corequisite:** Any third or fourth year lecture course in Physics

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

### PHY424H1 - Advanced Physics Laboratory

**Hours:** 72P

Experiments in this course are designed to form a bridge to current experimental research. A wide range of exciting experiments relevant to modern research in physics is available. The laboratory is normally open from 9 a.m. - 4 p.m., Monday to Friday.

**Prerequisite:** PHY250H1, PHY256H1, PHY324H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

### PHY426H1 - Advanced Practical Physics I

**Hours:** 72P

This course is a continuation of PHY424H1, but students have more freedom to progressively focus on specific areas of physics, do extended experiments, projects, or computational modules.

**Prerequisite:** PHY424H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

### PHY428H1 - Advanced Practical Physics II

**Hours:** 72P

This course is a continuation of PHY426H1, but students have more freedom to progressively focus on specific areas of physics, do extended experiments, projects, or computational modules.

**Prerequisite:** PHY426H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

### PHY429H1 - Advanced Practical Physics III

**Hours:** 72P

This course is a continuation of PHY428H1, but students have more freedom to progressively focus on specific
areas of physics, do extended experiments, projects, or computational modules.

**Prerequisite:** PHY428H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY431H1 - Topics in Biological Physics**

**Hours:** 24L/12T

An introduction to the physical phenomena involved in the biological processes of living cells and complex systems. Models based on physical principles applied to cellular processes will be developed. Biological computational modeling will be introduced.

**Prerequisite:** PHY250H1, PHY252H1/CHM222H1/CHM225Y1, PHY331H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**JPH441H1 - Physical Science in Contemporary Society**

**Hours:** 24L

This course will discuss the complex, real-life, ethical, and philosophical issues behind how science gets done, including questions such as how we as scientists strive to determine the truth; who determines what science is done, and on what basis; how we as a community manage science and make decisions about education, authorship, publication, hiring, et cetera (including issues related to equity, inclusivity, and diversity); and how we as a society fund science and apply its discoveries.

**Prerequisite:** PHY224H1/PHY250H1/PHY252H1/PHY254H1/PHY256H1, or by permission of the instructor.  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**PHY450H1 - Relativistic Electrodynamics**

**Hours:** 24L/12T

An introduction to relativistic electrodynamics. Topics include: special relativity, four-vectors and tensors, relativistic dynamics from the Principle of Stationary Action and Maxwell’s equations in Lorentz covariant form. Noether’s theorem for fields and the energy-momentum tensor. Fields of moving charges and electromagnetic radiation: retarded potential, Lienard-Wiechert potentials, multipole expansion, radiation reaction.

**Prerequisite:** PHY350H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY452H1 - Statistical Mechanics**

**Hours:** 24L/12T

Classical and quantum statistical mechanics of noninteracting systems; the statistical basis of thermodynamics; ensembles, partition function; thermodynamic equilibrium; stability and fluctuations; formulation of quantum statistics; theory of simple gases; ideal Bose and Fermi systems.

**Prerequisite:** PHY252H1, PHY356H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY454H1 - Continuum Mechanics**

**Hours:** 24L/12T

The theory of continuous matter, including solid and fluid mechanics. Topics include the continuum approximation, dimensional analysis, stress, strain, the Euler and Navier-Stokes equations, vorticity, waves, instabilities, convection and turbulence.

**Prerequisite:** PHY254H1, MAT235Y1/MAT237Y1/MAT257Y1, APM346H1/APM351Y1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY456H1 - Quantum Mechanics II**

**Hours:** 24L/12T

Quantum dynamics in Heisenberg and Schrödinger pictures; WKB approximation; variational method; time-independent perturbation theory; spin; addition of angular momentum; time-dependent perturbation theory; scattering.

**Prerequisite:** PHY356H1  
**Distribution Requirements:** Science
Breadth Requirements: The Physical and Mathematical Universes (5)

**PHY460H1 - Nonlinear Physics**

**Hours:** 24L/12T

The theory of nonlinear dynamical systems with applications to many areas of physics. Topics include stability, bifurcations, chaos, universality, maps, strange attractors and fractals. Geometric, analytical and computational methods will be developed.

**Prerequisite:** PHY354H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY471Y1 - Supervised Study in Physics**

An individual study program chosen by the student with the advice of, and under the direction of, a staff member. A student may take advantage of this course either to specialize further in a field of interest or to explore interdisciplinary fields not available in the regular syllabus. Consult the department web pages for some possible topics. This course may also be available in the summer. Not eligible for CR/NCR option.

**Prerequisite:** Consult the Physics Associate Chair (Undergraduate Studies)  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY472H1 - Supervised Study in Physics**

An individual study program chosen by the student with the advice of, and under the direction of, a staff member. A student may take advantage of this course either to specialize further in a field of interest or to explore interdisciplinary fields not available in the regular syllabus. Consult the department web pages for some possible topics. This course may also be available in the summer. Not eligible for CR/NCR option.

**Prerequisite:** Consult the Physics Associate Chair (Undergraduate Studies)  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY478H1 - Undergraduate Research Project**

An individual experimental or theoretical research project undertaken with the advice of, and under the direction of, a staff member. A student may take advantage of this course either to specialize further in a field of interest or to explore independent research. Consult the department web site for some possible topics. This course may also be available in the summer. Not eligible for CR/NCR option.

**Prerequisite:** Consult the Physics Associate Chair (Undergraduate Studies)  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY479Y1 - Undergraduate Research Project**

An individual experimental or theoretical research project undertaken with the advice of, and under the direction of, a faculty member. A student may take advantage of this course either to specialize further in a field of interest or to explore independent research. Consult the department web site for possible topics. This course may also be available in the summer. Not eligible for CR/NCR option.

**Prerequisite:** Consult the Physics Associate Chair (Undergraduate Studies)  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY483H1 - Relativity Theory I**

**Hours:** 24L/12T

Basis of Einstein's theory: differential geometry, tensor analysis, gravitational physics leading to General Relativity. Theory starting from solutions of Schwarzschild, Kerr, etc.

**Prerequisite:** PHY350H1, PHY354H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY484H1 - Relativity Theory II**

**Hours:** 24L/12T

Basis of Einstein's theory: differential geometry, tensor analysis, gravitational physics leading to General Relativity. Theory starting from solutions of Schwarzschild, Kerr, etc.
Applications of General Relativity to Astrophysics and Cosmology. Introduction to black holes, large-scale structure of the universe.

**Prerequisite:** PHY483H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY485H1 - Laser Physics**

**Hours:** 24L

This course, which is intended to be an introduction to research in optical sciences, covers the statistics of optical fields and the physics of lasers. Topics include the principles of laser action, laser cavities, properties of laser radiation and its propagation, the diffraction of light, and spatial and temporal coherence.

**Prerequisite:** PHY350H1, PHY358H1, PHY385H1/ECE318H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY487H1 - Condensed Matter Physics**

**Hours:** 24L

Introduction to foundational concepts of condensed matter physics in the solid state. Main topics to be covered: crystal structure, reciprocal lattice, x-ray diffraction, crystal binding, lattice vibrations, phonons and electrons in solids, Fermi surfaces, energy bands, semiconductors and magnetism. Special topics to be surveyed: superconductivity and nanoelectronic transport.

**Prerequisite:** PHY250H1, PHY252H1, PHY356H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY489H1 - Introduction to High Energy Physics**

**Hours:** 24L

This course introduces the basics of fundamental particles and the strong, weak and electromagnetic forces that govern their interactions in the Standard Model of particle physics. Topics include relativistic kinematics, conservation laws, particle decays and scattering processes, with an emphasis on the techniques used for calculating experimental observables.

**Prerequisite:** PHY354H1, PHY356H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY491H1 - Current Interpretations of Quantum Mechanics**

**Hours:** 24L/24T

Different interpretations of quantum mechanics are presented and discussed, comparing and contrasting the various approaches to understanding the formalism of the theory. We begin with “textbook quantum mechanics” and then discuss the Copenhagen view, operationalist quantum mechanics, hidden variable theories, Bohm-de Broglie theory, consistent histories, relational quantum mechanics, relative state approaches (many minds and many worlds), QBism, the interactional interpretation, and collapse theories.

**Prerequisite:** PHY456H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PHY492H1 - Advanced Atmospheric Physics**

**Hours:** 24L/12T

A preparatory course for research in experimental and theoretical atmospheric physics. Content will vary from year to year. Themes may include techniques for remote sensing of the Earth's atmosphere and surface; theoretical atmosphere-ocean dynamics; the physics of clouds, precipitation, and convection in the Earth's atmosphere.

**Prerequisite:** PHY250H1, MAT235Y1/MAT237Y1/MAT257Y1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**JPE493H1 - Seismology**

**Hours:** 24L

Why do earthquakes occur and how are they related to tectonic motion of the Earth's surface? What is the physics behind the propagation of seismic waves through the Earth, and how can it be used to determine the internal structures of the Earth? This introductory course is aimed at understanding the physics behind seismic wave propagation, as well as asymptotic and numerical
solutions to the elastodynamic equation. Travel time and amplitude of seismic waves are discussed based on seismic ray theory, while numerical methods are introduced to obtain accurate solutions to more complex velocity structures. Seismic tomographic methods, including their applications to hydrocarbon reservoir imaging, are also covered.

**Prerequisite:** JPE395H1, APM346H1/APM351Y1/MAT351Y1
**Exclusion:** PHY493H1
**Recommended Preparation:** ESS345H1
**Distribution Requirements:** Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)

Physiology is the study of living matter in action. It integrates physical and life science disciplines in order to understand body functions and the origins of disease. Beyond the study of control mechanisms, compensations, and cooperation among body molecules, cells, tissues and organs, the interaction between the body's external and internal environments is a key theme in Physiology. Most importantly, Physiology unifies the life sciences from molecule to organism, providing the link from genomics and molecular signaling pathways to behaviour and disease. Emerging fields for physiologists are the analysis of the functional implications of genomic sequence variation, developmental factors leading to chronic illness, and novel approaches for regenerative medicine.

Biological function -- of molecules, cells, and organs -- is at the heart of Physiology, and this knowledge is fundamental to the life sciences in general. Accordingly, Physiology provides an excellent and often necessary background for subsequent training in Medicine, Dentistry, Pharmacy, Nursing, Physical or Occupational Therapy, and other health-related professions. It is also excellent preparation for graduate work in Physiology and related areas; or for the teaching of Biological Science in secondary schools. Physiologists are needed in hospitals and departments of medicine as teachers and research personnel. Other outlets would be in agriculture and veterinary medicine, in military research establishments and in life science-based industry. The development of air and space travel, the exploration of the continental shelf, the development of Northern regions, and increased emphasis on exercise and fitness, all provide business and research opportunities for the person trained in Physiology.

Physiology at the research level covers a variety of specialties (e.g. Endocrinology, Cardiovascular Physiology, Neurophysiology, Respiratory Physiology, Reproductive Physiology, Sensory Physiology), each with a wide variety of technical and analytical methods. More information is available on the departmental website (www.physiology.utoronto.ca).

Physiology Programs

Physiology Specialist
(Science Program) - ASSPE0482

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO130H1
- (CHM135H1 and CHM136H1)/CHM151Y1
- 1.5 credits from BIO120H1, MAT135H1, MAT136H1, MAT137Y1, MAT157Y1, PHY131H1, PHY132H1, PHY151H1, PHY152H1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60% in each course, or a grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or
later are asked to please contact the department directly at physiology.undergrad@utoronto.ca, specify which program you would like to be considered for, and provide your student number.

Please consult the Arts & Science Program Toolkit for more information on program enrolment, or the Physiology website at www.physiology.utoronto.ca.

Completion Requirements:

(14 credits)

First Year:
BIO120H1, BIO130H1; (CHM135H1, CHM136H1)/
CHM151Y1; (PHY131H1, PHY132H1)/(PHY151H1,
PHY152H1)

First Year or Upper Years:
(MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1*

Second Year:
1. 2.5 credits from BCH210H1; BIO230H1/ BIO255H1;
CHM220H1/CHM247H1/CHM249H1; PSL300H1,
PSL301H1
2. 1.5 credits from BIO220H1, BIO260H1/ HMB265H1;
MAT235Y1, PHY231H1, PSL299Y1/PSL399Y1,
STA220H1/ STA250H1

Third Year:
1. 3 credits from BCH370H1; PSL304H1, PSL305H1,
PSL350H1/CSB349H1/ BCH311H1, PSL372H1,
PSL374H1
2. 1 credit from the following list: ANA300Y1, ANA301H1;
BME498Y1; CSB325H1, CSB332H/ CJH332H1,
CSB343H1, CSB345H1/ CSB445H1, CSB346H1,

**Physiology Minor (Science Program) - ASMIN0482**

**Enrolment Requirements:**
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**
(4.0 credits, including 1.0 credit at the 300+ level)

**Physiology Courses**

**PSL190H1 - Biomedical Research at the Cutting Edge**

**Hours:** 24L/6S

Explore the thought processes, logic, motivation, techniques, analysis and impact of recent high-profile publications to gain insight into the enterprise of science. Outstanding scientists present recent high-impact papers, and students will examine the research in depth, focusing on the underlying questions, experimental approach, results and significance. Restricted to first-year students. Not available for CR/NCR option.

**Prerequisite:** SBI4U and SCH4U (Grade 12 University Preparation Biology and Chemistry); permission of Department
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

**PSL201Y1 - Basic Human Physiology**

**Hours:** 44L/24P

A survey course covering all organ systems intended for students who are not proceeding further in Physiology.

**Exclusion:** Any 300-level PSL course taken previously or concurrently
**Recommended Preparation:** 100-level course in BIO or equivalent
**Distribution Requirements:** Science

**PSL280H1 - Introduction to Physiologic Adaptations of Marine Mammals**

**Hours:** 24L/14P

Systems approach to physiology of marine mammals in their aquatic environment. Highlights unique features of cardiovascular, respiratory, renal, urinary, and reproductive systems. Introduces relevant physiology, and makes comparisons to human condition and disease.

**Prerequisite:** (BIO120H1, BIO130H1), CHM136H1/CHM138H1/CHM151Y1 or permission of the course coordinator.
**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

**PSL299Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

**Distribution Requirements:** Science
JPM300H1 - Research Readiness and Advancing Biomedical Discoveries

Hours: 12L/24T

Explore how scientists leverage their knowledge and skills to advance academic biomedical discoveries from the laboratory to improve patient health through either commercialization or not-for-profit approaches. Students will learn about innovation and develop key research and industry skills including intellectual property, ethics, budget and project management; learn how to critically evaluate scientific evidence and effectively communicate to a wide audience. This hybrid student-centered course will include interactive online modules and in-class group work. Course work will focus on developing skills and knowledge to help you be successful in diverse research courses and future careers. Not eligible for CR/NCR.

Prerequisite: Completion of 10.0 credits,
BCH210H1/BCH242Y1

Recommended Preparation: PSL300H1, PSL301H1

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL300H1 - Human Physiology I

Hours: 36L/5T

Principles of neurophysiology, endocrinology and reproductive physiology for students enrolled in Life Science programs.

Exclusion: PSL201Y1, PSL302Y1

Recommended Preparation: BIO130H1; CHM136H1/CHM138H1/CHM151Y1; and 1.0 credit from any of the following: MAT135H1, MAT136H1, MAT137Y1, MAT157Y1, PHY131H1, PHY132H, PHY151H1, PHY152H1

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL301H1 - Human Physiology II

Hours: 36L/4T

Principles of respiratory, cardiovascular, gastrointestinal, and renal physiology for students enrolled in Life Science programs.

Exclusion: PSL201Y1, PSL302Y1

Recommended Preparation: BIO130H1; CHM136H1/CHM138H1/CHM151Y1; and 1.0 credit from any of the following: MAT135H1, MAT136H1, MAT137Y1, MAT157Y1, PHY131H1, PHY132H, PHY151H1, PHY152H1

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL304H1 - Topics in Cellular, Molecular and Organismic Physiology I

Hours: 32L/16T

Control systems, feedback, networks, and both neonatal and adult cardiovascular and respiratory control are the topics examined in detail using homeostasis as a unifying theme. Tutorials involve computer simulations, case studies and/or experimental design. This course is designed for students in the Physiology Specialist and Biological Physics Specialist Programs, although permission is granted to students in other programs upon approval by the Department.

Prerequisite: BCH210H1, PSL300H1, PSL301H1, MAT100-series

Exclusion: PSL303Y1

Recommended Preparation: PSL372H1

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL305H1 - Topics in Cellular, Molecular and Organismic Physiology II

Hours: 32L/16T

Molecular, cellular and organismic physiology of the central nervous system, gut, pancreas and glucose-sensing tissues; CNS diseases, obesity and diabetes are used as model systems. Tutorials involve computer simulations. This course is designed for students in the Physiology Specialist and Biological Physics Specialist Programs, although permission is granted to students in other programs upon approval by the Department.

Prerequisite: BCH210H1, PSL300H1, PSL301H1, MAT100-series

Exclusion: PSL303Y1

Recommended Preparation: PSL372H1

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL310H1 - Clinical Reasoning

Hours: 24L/12S
Improved clinical reasoning will reduce the current likelihood that most people will suffer at least one medical diagnostic error, errors that contribute to ~10% of patient deaths. Learn to apply strategies of critical thinking and principles of physiology to solve clinical cases. Shadow a healthcare professional. Not eligible for CR/NCR option.

**Prerequisite:** BCH210H1, BIO230H1/ BIOC255H1, PSL300H1, PSL372H1, PSL301H1  
**Corequisite:** PSL301H1  
**Exclusion:** HMB322H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**PSL350H1 - Mammalian Molecular Biology**

**Hours:** 18L/12T/6S

Extend molecular biology concepts to current scientific literature in mammalian physiology. Apply these principles to disease and complex behaviours. Discuss bioethical issues raised by these techniques and their application. Benefit from three weeks in small group seminars lead by research professors focusing on current advances in mammalian molecular biology.

**Prerequisite:** BIO230H1/BIOC255H1, PSL300H1, BICH210H1  
**Corequisite:** PSL301H1  
**Exclusion:** BICH311H1/BIOC349H1/CSB349H1/MGY311Y1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**PSL372H1 - Mammalian Physiology Laboratory**

**Hours:** 12L/36P

A laboratory course covering selected topics in physiology. An ancillary fee of $50 will be charged for lab materials.

**Prerequisite:** BIO230H1/(BIOC240H1, BIOC241H1)/BIOC255H1, BCH210H1/BCH242Y1, MAT100-series/PHY100-series, PSL300H1, PSL301H  
**Corequisite:** BCH370H1 (recommended)  
**Exclusion:** CSB348H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**PSL374H1 - Advanced Physiology Laboratory**

**Hours:** 12L/36P/12S

A problem-based laboratory course focused on the integration and control of organ systems to understand body functions. Enrollment in this course is restricted to students in the Physiology Specialist and Major Programs although permission is granted to students in other programs upon approval by the Department. An ancillary fee of $50 will be charged for lab materials.

**Prerequisite:** BIO230H1/(BIOC240H1, BIOC241H1)/BIOC255H1, PSL300H1, PSL301H1, PSL372H1  
**Exclusion:** CSB348H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**PSL378H1 - Field Physiology: Marine Mammal Autopsy**

**Hours:** 12L/24T/36P

An opportunity to go outside of the traditional university classroom and actively participate in a marine mammal autopsy. Learn the diversity and adaptive nature of marine mammalian physiology/anatomy as it compares to human. The course is 2 weeks (in May), one week of hands-on tissue dissection, and one week of group discussions of the findings and draft report preparation. Not eligible for CR/NCR option.

An additional fee is required to help cover the cost of delivery for this course. Please see https://physiology.utoronto.ca/psl378h1f for details.

**Prerequisite:** BIO270H1, BIO271H1/PSL201Y1/PSL280H1/PSL300H1, PSL301H1 or permission of the course coordinator  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**PSL379H0 - Comparative Marine Mammal Physiology in the Field**

**Hours:** 24T/36P

Hands-on monitoring of physiological measures with live dolphins, manatee and sea lions; field observations and applied learning to a physiology project. Two-weeks at the end of April early May. 1st week is spent at the marine research center in Mexico, 2nd week of wrap-up
discussion and integration of data at U of T. Not eligible for CR/NCR option.

An additional fee is required to help cover the cost of delivery for the course. See https://physiology.utoronto.ca/psl379h for details.

**Prerequisite:**
BIO220H1/BIO230H1/BIO270H1/BIO271H1/CSB343H1/PSL280H1/PSL201Y1/PSL300H1/PSL301H1/PSY362H1/any other relevant course

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PSL398H0 - Research Excursions**

**Distribution Requirements:** Science

**PSL399Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

**JPM400Y1 - Biomedical Incubator Capstone Project**

**Hours:** 240P/16S

Discover what it is like to be part of a biomedical innovation team. Develop and engage in biomedical research in a simulated small business/incubator setting under the guidance of a faculty mentor. Bring your proposed JPM300H1 project to life, while acquiring budget management, research, business and communication workplace skills for future careers. Enrolment is application-based. Proposals will be reviewed by committee and successful proposals will be matched to a mentor. Not eligible for CR/NCR option.

*Students will form teams and develop a research proposal based on either:*

1. **Faculty led concept requiring further development and testing, which would not normally be funded grants and would be tangential to ongoing research in the lab.**

   **Prerequisite:** A minimum of 75% in JPM300H1; completion of any of PCL367H1/PCL368H1/PSL372H1/BCH370H1/BCH377H1. Application required; see department for more information.

   **Distribution Requirements:** Science

   **Breadth Requirements:** Living Things and Their Environment (4)

2. **Student developed innovative idea that requires further development and testing. This should be a project that is not being investigated in a UofT research lab.**

   **Prerequisite:**

   - PSL372H1/BCH370H1/BCH377H1
   - Application required; see department for more information.

   **Distribution Requirements:** Science

   **Breadth Requirements:** Living Things and Their Environment (4)

**PSL404H1 - Regenerative Medicine**

**Hours:** 24L/12T

Regenerative medicine promises to restore body function that has been lost due to disease, damage or age. Students will explore selected molecular, stem cell and tissue engineering developments to better understand how the body normally functions and how cells, tissues, and organs can be repaired or replaced.

**Prerequisite:** PSL300H1, PSL301H1

**Recommended Preparation:** PSL350H1/BCH311H1/CSB349H1/MGY311Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PSL420H1 - Reproduction: Development and Function**

**Hours:** 24L

This course provides an in-depth review of the development and function of the male and female reproductive systems. Topics include sex determination and differentiation, steroidogenesis, gametogenesis, hormonal control of the reproductive axis, the female ovulatory cycle, fertilization and implantation, infertility and assisted reproduction approaches.

**Prerequisite:** PSL300H1, PSL301H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)
PSL421H1 - Pregnancy and Birth: From Implantation to Newborn Life

Hours: 24L

General overview of the integrated physiological events associated with fetal development, pregnancy and birth. The approach emphasizes physiological processes using insights gained from studies of humans, animals, cells and genes. Where appropriate the clinical consequences of aberrant development are reviewed.

Prerequisite: PSL300H1, PSL301H1
Recommended Preparation: PSL420H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL424H1 - Cellular and Molecular Basis of Endocrine Disorders

Hours: 24S

Explore how researchers uncover the molecular and cellular basis of endocrine disorders. Learn about experimental design, state-of-the-art research tools, and data interpretation. Topics include disorders in: hormone regulation, secretion and action; circadian rhythms; and sexual development and reproduction. Each week students engage in class discussion related to research seminars delivered by faculty.

Prerequisite: PSL300H1, PSL301H1, PSL350H1/BCH311H1/CSB349H1/SGY311Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL425H1 - Integrative Metabolism and its Endocrine Regulation

Hours: 24L

This course integrates the newest findings and experimental approaches from cellular and molecular biology into metabolic function at the tissue, organ and whole body level.

Prerequisite: BCH210H1, PSL300H1, PSL301H1
Recommended Preparation: PSL305H1/PSL303Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL432H1 - Theoretical Physiology

Hours: 24L

Theoretical treatment of neurophysiology. Mathematical modeling and analysis of neurophysiological systems.

Prerequisite: MAT235Y1/MAT237Y1; APM346H1/MAT244H1
Recommended Preparation: PHY200-series; PSL201Y1/PSL300H1/(BIO270H1, BIO271H1)
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL440Y1 - Neuroscience: Systems and Behaviour

Hours: 96L

Introduction to systems neuroscience. A review of basic neuroanatomy and physiology followed by in-depth study of selected sensory and motor systems, with an emphasis on clinical applications in the second term. Students with an elementary neuroscience background progress to reading neuroscience literature on their own.

Prerequisite: PSL300H1/PSY290H1/CSB332H1 or equivalent
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL445H1 - Neuroscience: Cellular and Molecular

Previous Course Number: PSL444Y1
Hours: 36L

Overview of the fundamentals of cellular and molecular aspects of brain function. Course material is updated yearly to reflect the rapid evolution of ideas in Neuroscience.

Prerequisite: PSL300H1, PSL301H1, CJH332H1 or permission of instructor
Exclusion: PSL444Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
PSL446H1 - Neural Disorders

Previous Course Number: PSL444Y1
Hours: 36L

Explore topics in neurological disorders and treatments to reinforce and expand your knowledge of cellular and molecular neurophysiology. Course material is updated yearly to reflect the rapid evolution of ideas in this area.

Prerequisite: PSL300H1, PSL301H1, CJH332H1 or permission of instructor
Exclusion: PSL444Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL450H1 - Mechanisms of Neural and Endocrinal Secretion

Hours: 24L

Exocytosis and other aspects of secretion mainly in neurons and neuroendocrine cells, but also in pancreatic cells. Topics include synapse anatomy and physiology, synaptic plasma membrane and vesicle proteins, membrane fusion, genetic tools, endocrine secretion, plasticity in neurotransmitter release, diseases arising from secretion defects.

Prerequisite: BCH210H1, PSL300H1/(BIO240H1, BIO241H1), PSL350H1/CSB349H1/BCH311H1/MGY311Y1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL452H1 - Membrane Physiology

Hours: 24L

Biophysics and molecular biology of ion channels. Topics include equivalent circuits for cells, molecular structure of voltage-gated channels, distribution of channels, relationship between single-channel and whole-cell recording, and regulation of channel function by voltage, phosphorylation, G-proteins and metabolites.

Prerequisite: PSL300H1, PSL301H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL462H1 - Molecular Aspects of Cardiovascular Function

Hours: 36L

Heart anatomy and development, ion channels and contractile proteins involved in cardiac and smooth muscle contraction are studied. Emphasis is on regulation of electrical and contractile function of kinases, metabolism, volume and ions.

Prerequisite: PSL300H1, PSL301H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL470H1 - Cardiovascular Physiology

Hours: 24L

Development of the cardiovascular system from conception to adulthood with particular emphasis on maturational changes, age-related differences and developmental problems from cellular/molecular to whole organ/system.

Prerequisite: PSL300H1, PSL301H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL472H1 - Sleep Physiology and Chronobiology

Hours: 24L

This course covers the physiology underlying sleep and circadian rhythms, and their impact on important physiological processes and health. The integrative nature of the basic physiological processes is emphasized via discussions and clinical presentations. Overall, the aim is to present the full spectrum of integrative physiology from molecules and cells to understanding the sick patient.

Prerequisite: PSL300H1, PSL301H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSL480H1 - Diving Physiology of Marine Mammals

Hours: 24L/6T
This course compares and contrasts the physiological and anatomical adaptations exhibited by the different species of marine mammals in relationship to humans, with respect to diving.

**Prerequisite:** (BIO270H1, BIO271H1)/PSL201Y1/PSL300H1, PSL301H1; PSL280H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PSL495H1 - Communicate Biomedical Science**

**Hours:** 6L/2T/18S

Research, critique and write a manuscript on a topic of your choice in the scientific literature while guided by classes and assignments that develop advanced science communication skills; and by a mentor expert in your area of clinical or basic physiology.

**Prerequisite:** PSL300H1; PSL301H1; PSL372H1; 13.5 additional credits; and permission of Department

**Exclusion:** BCH479H1; HMB490H1; HMB491H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**PSL496Y1 - Translational Physiology Research Project**

**Hours:** 144P

Engage in supervised original science research, either basic or clinical, combined with a healthcare placement. Develop skills in defining scientific questions, designing experiments, analyzing data, and communicating your results. Gain insight into the power of translational "bench-to-bedside" research. Discover your interest in becoming a science researcher. Not eligible for CR/NCR option.

**Prerequisite:** PSL300H1, PSL301H1, PSL310H1, PSL372H1, permission of Department

**Exclusion:** PSL496Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**PSL498Y1 - Project in Physiology**

**Hours:** 144P

Laboratory research project with reading assignments leading to a final report. By special arrangement with a Physiology staff member after admission to course. PSL498Y1 is recommended for students applying to the Physiology graduate program. Enrollment in this course is restricted to students in the Physiology Specialist and Major Programs, although permission is granted to students in other programs upon approval by the Department. Not eligible for CR/NCR option.

**Prerequisite:** (PSL304H1, PSL305H1)/PSL303Y1, PSL372H1, PSL374H1, permission of Department

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(14.0 credits, including 2.0 credits at the 300+ level, of which 1.0 credit must be at the 400-level)

First Year:

( CHM135H1, CHM136H1) / CHM151Y1, ( MAT135H1, PHY131H1, PHY132H1) / ( PHY151H1, PHY152H1) ( MAT137Y1 and PHY151H1, PHY152H1 preferred)

First or Second Year:

MAT223H1 / MAT240H1

Second or Third Year:

AST221H1, AST222H1, ( CHM222H1, CHM223H1) / ( PHY252H1, PHY256H1), CHM238Y1, ESS223H1, ESS261H1, ESS262H1; MAT235Y1 / MAT237Y1 ( MAT237Y1 preferred), MAT244H1 / MAT267H1, PHY250H1, PHY254H1

Third and/or Fourth Years:

JPE395H1

At least four of (2.0 credits) AST325H1, CHM327H1, CHM338H1, PHY354H1, PHY407H1, PHY408H1, GGR201H1, ESS223H1, ESS241H1, ESS445H1, ESS462H1

Fourth Year:

PLN420H1, PLN425H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

Planetary Science Courses

PLN420H1 - Interdisciplinary Seminar in Planetary Science

Hours: 24S

Discussion of topics of current interest in planetary science with emphasis on papers published in scientific journals. This course is intended for students in the final year of the Planetary Science specialist program. Students must enrol with the course coordinator.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PLN425H1 - Research in Planetary Science

Hours: 120P

Research report by student in consultation with individual staff member in Astronomy, Chemistry, Geology or Physics. This course is intended for students in the final year of the Planetary Science specialist program.

The study of Political Science at the University of Toronto is wide-ranging and diverse. Courses are offered in political theory, Canadian government, international relations, and the politics of societies that are industrialized, developing, and in transition. Many courses deal with issues (such as environmental politics, diversity, peace and conflict, globalization) that cut across fields. Course offerings are designed to introduce students to Political Science at the first year level, provide the foundations for further study at the second year level, and provide specialized lecture and seminar courses at the intermediate and advanced levels. Studies in Political Science provide students with a good grounding in one of the chief social science disciplines and an opportunity to explore the issues that confront us as individuals, groups, societies and on the international level in the twenty-first century. In addition to the materials covered, Political Science courses are set up to offer students an opportunity to learn writing and analytical skills to support a challenging and diverse career.

Courses in Political Science dovetail with programs in many other disciplines of the social sciences and the
humanities: Economics, Sociology, History, Philosophy, and Psychology. A student interested in Canadian studies or urban problems, for example, would be well advised to choose courses from all these disciplines, as would someone interested in international affairs or environmental studies. A student planning graduate work in the social sciences should seek to obtain a basic understanding of each of these disciplines.

Detailed information on our programs, extended descriptions of courses, and background information on the interests of our instructors can be found on our website. The Association of Political Science Students, the students’ organization for Political Science undergraduates, has an office in Room 1091, Sidney Smith Hall.

**Political Science Specialist (Arts Program) - ASSPE2015**

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

_Completed courses (with minimum grades)_

The following courses with the stated minimum grades are required for students who have completed 4.0 to 8.5 credits:

- 1.0 credit from POL101H1, POL106H1, POL107H1, POL109H1 with a grade of 65% in each; or

- 0.5 credit from POL101H1, POL106H1, POL107H1, POL109H1 with a grade of 65%, and 0.5 credit from POL193H1, POL194H1, POL195H1, POL196H1, POL197H1, POL198H1 with a grade of 65%; or

- 0.5 credit from POL101H1, POL106H1, POL107H1, POL109H1 with a grade of 65%, and 0.5 credit from POL193H1, POL194H1, POL195H1, POL196H1, POL197H1, POL198H1 with a grade of 65%; or

For students who have completed 9.0 or more credits:

- 2.0 credits in non-FYF POL courses with a grade of 70% in each; or

- 1.5 credits in non-FYF POL courses with a grade of 70% in each, and 0.5 credit from POL193H1, POL194H1, POL195H1, POL196H1, POL197H1, POL198H1 with a grade of 70%; or

- 1.5 credits in non-FYF POL courses with a grade of 70% in each, and 0.5 credit from MUN101H1, MUN102H1, TRN151Y1, TRN160Y1, TRN162Y1, TRN172Y1, VIC110H1, VIC121H1, VIC167H1, VIC168H1, VIC181H1, VIC183H1, VIC184H1, VIC185H1, WDW151H1, WDW152H1 with a grade of 70%

**Completion Requirements:**

(10.0 POL credits. Of these, 3.0 credits must be 300+ level courses and 1.0 credit must be 400 level.)

First Year:

- 1.0 credit in POL courses at the 100-level (of which only a maximum of 0.5 credit may come from: POL193H1, POL194H1, POL195H1, POL196H1, POL197H1, POL198H1, or other first-year seminars in relevant topics such as MUN101H1, MUN102H1, TRN151Y1, TRN160Y1, TRN162Y1, TRN172Y1, VIC110H1, VIC121H1, VIC167H1, VIC168H1, VIC181H1, VIC183H1, VIC184H1, VIC185H1, WDW151H1, WDW152H1)

Higher Years:

1. POL200Y1
2. 0.5 credit from: POL201H1/ POL208H1/ POL218H1
3. POL214H1/ POL224H1 and 0.5 credit at the 200+ level in Canadian Politics from JPI201H1, POL220H1, POL312H1, POL312Y1, POL313H1, POL316H1, POL316Y1, POL334H1, POL336H1, POL337H1, POL337Y1, POL344H1, POL344Y1, POL351H1, POL353H1, POL356H1, POL356Y1, POL363H1, POL382H1, POL404Y1, POL428H1, POL439H1, POL450H1, POL467H1, POL474H1, POL490H1, POL491H1

Political Science Courses

POL101H1 - The Real World of Politics: An Introduction

Previous Course Number: POL101Y1
Hours: 24L/12T

This course introduces students to compelling issues of contemporary politics through the lens of classic and important texts in political science. The course covers the politics of climate change, Indigenous rights, elections and electoral systems, terrorism, social movements and political activism, voting, democracy, and power.

Exclusion: POL101Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL106H1 - Contemporary Challenges to Democracy: Democracy in the Social Media Age

Hours: 24L/12T

This course examines the latest evidence-based research on the effects of social media on democracy. We cover surveillance capitalism, privacy, disinformation, and the often-overlooked ecological implications of data consumption. We also examine targeted digital espionage against civil society, Citizen Lab research reports, and explore solutions and alternatives to social media.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL107H1 - What Went Wrong? A Post Mortem of Political Disasters, Catastrophic Policy Failures, and Epic Marches of Folly

Hours: 24L/12T

Why do individuals, groups, and societies make repeated, and often easily predictable mistakes? Why do they persist in courses of action that produce disastrous results? Why is it that in the political world good intentions are insufficient to ensure good results? This course employs the political science analytical toolkit to answer these questions and examines an array avoidable disasters, from the local to the international.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
POL109H1 - Might and Right: Power and Justice in International Relations

Hours: 24L/12T

This course explores the relationship between justice, power, and interests in the works of prominent ancient, modern, and contemporary thinkers. It adopts a problem-driven approach and engages with current controversies in international relations in light of insights from classic books. Special attention is paid to the prospects of a just world order, the causes and justifications of war, the construction of images of citizens and enemies, and the nature of duties to outsiders.

Exclusion: POL323Y1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

POL193H1 - First-Year Foundation Seminar: The Politics of Representation

Hours: 24S

This course examines the politics of representation in Canada from a political science perspective. What is representation? Why are some groups under-represented? How can we increase the representation of marginalized groups? Students will learn to evaluate qualitative, quantitative and normative scholarship; develop their own arguments; and communicate their arguments effectively.

Restricted to first-year students.
Not available for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL194H1 - First-Year Foundation Seminar: Race

Hours: 24S

This course is an introduction to the history, politics, economics, and psychology of race and racism, as well as intersections between race and class, gender, and indigeneity. The course focuses attention on the ways that states structure race, and the ways race is differently conceptualized around the world.

Restricted to first-year students.
Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

POL195H1 - First-Year Foundation Seminar: Settler Colonialism and Enduring Indigeneity

Hours: 24S

What is settler colonialism and how does Indigeneity endure it? This course explores the many, diverse ways that Indigenous peoples resist settler colonization and persist beyond it. We will examine Indigenous activisms, legal orders, political philosophies, and cultural productions that demonstrate settler colonialism is indeed a failing project.

Restricted to first-year students.
Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL196H1 - First-Year Foundation Seminar: The China Challenge

Hours: 24S

China’s meteoric rise to great power status has triggered an intense international debate over its global implications. While many analysts see Beijing’s rise as posing a threat to global political and economic stability, Chinese leaders have argued forcefully that China’s efforts to regain its historic preeminence will result in a “win-win” outcome for all states. This course will assess the merits of these contending positions through an historical examination of China’s 20th century renaissance. The course will begin by tracing the long period of imperial decline in the 19th century, culminating in China’s revolutionary rebirth as a Marxist state in 1949. A major focus will be on the Mao-era legacy of revolutionary diplomacy and the foreign policy consequences of its later transformation into a market-authoritarian powerhouse.

Restricted to first-year students.
Not eligible for CR/NCR option.
POL197H1 - First-Year Foundation Seminar: Solidarity in Diverse Societies

Hours: 24S

Liberal democracies in the “populist” age are increasingly defined by polarization. Many observers fear that liberal democracies are having trouble accommodating diversity and protecting the rule of law and the integrity of their elections. This course will explore how these societies can better accommodate diversity and preserve liberal democracy. It will consider patriotism and nationalism, as well as arguments that seek to empower citizens with the techniques of “political friendship” required to manage difference and disagreement. The course will also consider critical arguments, that solidarity can only be attained by juxtaposing the political community against an “enemy.”

Restricted to first-year students.

Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL198H1 - First-Year Foundation Seminar: Social Justice and the City

Previous Course Number: POL198Y1
Hours: 24S

An introduction to the concept of social justice from an urban perspective. It will highlight how unequal relations of race, class, gender, sexuality, and ability operate through the urban environment, and how these conditions can be contested through political mobilization.

Restricted to first-year students.

Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

POL200Y1 - Political Theory: Visions of the Just/Good Society

Hours: 48L/24T

A selective presentation of critical encounters between philosophy and politics, dedicated to the quest for articulation and founding of the just/good society. Among the theorists examined are Plato, Aristotle, Machiavelli, Hobbes and Locke.

Exclusion: POL200Y5/POLC70H3/POLC71H3
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3), Thought, Belief and Behaviour (2)

JPI201H1 - Indigenous Politics in Canada

Previous Course Number: POL308H1
Hours: 24L/12T

This course explores key issues in Indigenous politics in Canada. Provides students with an overview of historical and contemporary socio-political issues in Indigenous societies and institutions such as Indigenous self-governance, land claims and treaty negotiations.

Prerequisite: 4.0 credits/1.0 POL credit/INS201Y1
Exclusion: POL308H1/POLC56H3
Recommended Preparation: POL214H1 or POL224H1
Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)

POL201H1 - Politics of Development

Previous Course Number: POL201Y1
Hours: 24L/12T

This course offers an introduction to the history and politics of economic and political development, starting with the Industrial Revolution and then turning to a critical analysis of the politics of economic growth, international trade, debt, state intervention, protectionism, and neoliberalism in the global periphery, including Africa, Asia, and Latin America.

Prerequisite: 4.0 credits/1.0 POL credit
Exclusion: POL201Y1/POLB90H3/POLB91H3
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

POL205H1 - International Relations in the Anthropocene

Hours: 24L/12T

Humans have altered the planet so dramatically that some geologists have coined a new epoch: the Anthropocene.
Is our study of global politics up to the challenge of human-driven environmental change? In this course, we consider multiple perspectives on IR to make sense of geopolitics on a changing planet.

**Prerequisite:** 4.0 credits/1.0 POL credit  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Living Things and Their Environment (4)

**POL208H1 - Introduction to International Relations**

**Previous Course Number:** POL208Y1  
**Hours:** 24L/12T

This introductory course examines some key themes and issues in global politics, including interstate war, human rights, international institutions, and the evolution of the global order.

**Prerequisite:** 4.0 credits/1.0 POL credit  
**Exclusion:** POL208Y1/POL208Y5/POL209H5/POLB80H3/POLB81H3  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**POL211H1 - Intelligence, Disinformation, and Deception: Challenges of Global Governance in the Digital Age**

**Hours:** 24L/12T

Knowledge is power, but knowledge is often unreliable in the digital world. This course introduces students to the challenges of global governance and decision making in the face of ambiguous evidence, information overload, political spin, disinformation, subversion, and deception. Students will learn conceptual tools for understanding and solving complex problems.

**Prerequisite:** 4.0 credits/1.0 POL credit  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**POL214H1 - Canadian Government**

**Previous Course Number:** POL214Y1  
**Hours:** 24L/12T

An introduction to the study of Canadian government. Topics include institutions of governance: the constitution, machinery of government, charter of rights and freedom, and the electoral system.

**Prerequisite:** 4.0 credits/1.0 POL credit  
**Exclusion:** POL214Y1/POL214Y5/POL215H5/POL216H5/POL224H1/POL224Y1/POLB50Y3  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**POL218H1 - State, Society and Power in Comparative Perspective**

**Hours:** 24L/12T

This course is designed to introduce students to major issues and challenges that shape states, determine how they are governed, and how they change. The course helps to explain major events such as state transformation, democratization, authoritarian rule, civil conflict and social mobilization.

**Prerequisite:** 4.0 credits/1.0 POL credit  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**POL219H1 - Unpacking Political Systems: Institutions and Behavior in Comparative Perspective**

**Hours:** 24L/12T

This course aims to unpack the institutional and behavioral variation within political systems. The goal is to expose students to the key questions and theories in comparative politics around three themes: a) the origins and effects of political institutions (federalism, electoral rules, bicameralism, courts…); b) party and electoral behavior across democracies and authoritarian regimes; and c) explaining quality of governance (issues of representation, accountability, trust, corruption). We will draw on cutting edge research and touch on current events and a variety of cases.

**Prerequisite:** 4.0 credits/1.0 POL credit  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**POL220H1 - Immigration, Multiculturalism, and Citizenship in Canada**

**Hours:** 24L/12T
This course deals with three inter-related themes – immigration, multiculturalism, and citizenship – by focusing on a single unifying question: What does it mean to “belong” to the Canadian political community? Who belongs, on what terms, and to what ends? A range of materials – normative, empirical, historical, and contemporary – will be used.

**Prerequisite:** 4.0 credits/1.0 POL credit  
**Recommened Preparation:** POL214H1/POL224H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### POL222H1 - Introduction to Quantitative Reasoning I

**Hours:** 24L/12T

Introduces the foundations of quantitative empirical research methods - increasingly popular and important part of political science research and public policy debates - to enable you to interpret and evaluate the results of the studies that employ these methods. Topics include scientific study of politics, empirical research designs, and regression analysis.

**Prerequisite:** 1.0 POL credit  
**Exclusion:**  
POL242Y5/ECO220Y1/GGR270H1/PSY201H1/SOC202H1/STA220H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### POL223H1 - Globalization and Development: Issues and Challenges

**Hours:** 24L/12T

This course examines how globalization creates opportunities and challenges to development in the Global South. Key issues considered include globalization and dynamics of inequality amongst and within nations, human rights and democratic struggles, environmental sustainability and justice, gender and racialized patterns of inequality, trade, foreign aid and poverty alleviation.

**Prerequisite:** 4.0 credits/1.0 POL credit  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### POL224H1 - Canada in Comparative Perspective

**Previous Course Number:** POL224Y1  
**Hours:** 24L/12T

This course introduces students to aspects of Canadian political life by comparing them with those that prevail in other advanced democracies. Themes covered will include the Canadian constitution, federalism, parties and elections, political culture and social and economic institutions and policies.

**Prerequisite:** 4.0 credits/1.0 POL credit  
**Exclusion:**  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### POL232H1 - Introduction to Quantitative Reasoning II

**Hours:** 24L/12T

Building up on POL222H1, students will continue to build theoretical foundations of quantitative empirical research, such as probability theory and statistical inference. They will also learn the basic use of statistical software and have become able to conduct a basic data analysis by themselves by the end of semester.

**Prerequisite:** POL222H1  
**Exclusion:** POL242Y5  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### POL252H1 - Introduction to Qualitative Research Methods

**Hours:** 24L/12T

This course introduces students to qualitative research methods in political science (e.g. interviews, participant observation, case studies). It provides opportunities to acquire hands-on experience with these methods and prepares students to carry out their own research projects.

**Note:** POL252H1 cannot be used as a substitute for POL222H1 for POL major/specialist.

**Prerequisite:** 1.0 POL credit  
**Exclusion:** SOC204H1, GGR271H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

JPR364H1 - Religion and Politics in the Nation State

Previous Course Number: JPR364Y1
Hours: 24L

This course will engage with contemporary debates on religion and politics in the context of the nation-state in our post-9/11 world, and will do so comparatively across a wide range of contexts.

The emphasis will be on understanding the evolving relationship between religion and politics in liberal democracies, and examining challenges facing democratic politics from the religious sphere, both in the West, where secular liberalism is the dominant framework for discussing these questions, and in Africa, India, and the Middle East, where such a framework is more likely to be contested. The themes explore will include secularization, religious pluralism and tolerance, human rights regimes, the idea of “civil religion,” the impact of religion on party politics, the formation of identity and political community, the legal regulation of sometimes-competing claims based on religious faith, gender, and sexuality, and the rise of extremist forms of religious politics, conspiracy thinking, new online communities that lead to dangerous political outcomes, such as ‘QAnon’ and ‘Plandemic’. Cases studies will include the USA, Canada, France, Turkey, Egypt, Nigeria.

(Given by the Departments of Political Science and Religion)

JPR365H1 - Global Religion and Politics

Previous Course Number: JPR364Y1
Hours: 24L

This course will engage with contemporary debates on religion and politics in the international context in our post-9/11 world, and will do so comparatively across a wide range of contexts.

The emphasis will be on understanding the evolving role transnational religion has played in the past three decades, where new global networks have emerged as central global actors. We will focus empirically on the rise of radical reformist Islam and evangelical Christianity, the two most dramatically successful forms of religiosity around the world today. We will study the implications for the foreign policies of key nation-states, as well as the forces that have contributed to the prevalence of contestatory religious politics and networks as new and poorly understood global actors. International religious freedom, human rights, the role of media and mediation, the place of religious or theological doctrines or imaginaries in constructing and motivating a range of political goals, many involving the use of violence. We will focus as well on the global spread of extremist forms of religious politics, conspiracy thinking, new online communities that lead to dangerous political outcomes, such as ‘QAnon’ and ‘Plandemic’. Many of the cases will focus on the non-Western world, especially the Middle East and Africa. (Given by the Departments of Political Science and Religion)

JPS378H1 - Sex and the State

Hours: 24L

What role have sex and sexuality played in the formation of the modern nation State? How has the State regulated sex? This course explores these questions with a theoretical focus on biopolitics. We will proceed in two parts. First, we engage Foucault’s History of Sexuality and its reception by postcolonial theorists, focusing on questions of state building. The second part of the course shifts examination from State formation to contemporary forms of sexual regulation by the State. This includes maintenance of the public/private divide, citizenship law and nationalism, administrative violence and the prison industrial complex, and neoliberalism and BDSM. By the end of the course, students are able to apply core theoretical concepts and identify forms of contemporary
sexual regulation in a variety of Western and non-Western contexts.

POL387H1 - Politics in Europe

Previous Course Number: POL207Y1
Hours: 24L

This course applies the basic concepts in comparative politics to the political systems of Europe. We will cover theories of transitions to democracy, formation and development of the nation-state, political institutions and their effects, parties and party systems and elections and electoral behaviour. We will use these theories to gain a better understanding of politics in Europe. We will also address some of the major challenges that Europe and the EU have recently faced such as the eurozone crisis, Brexit, the rise of populism and extreme right parties and the challenges of immigration and incorporation of minorities. The goal is for students to become familiar with the politics and governments of contemporary Europe through the lens of current and classic themes in comparative politics.

JPR459H1 - Fanaticism: A Political History

Hours: 24S

This seminar in theory will explore the modern history of the concept of ‘fanaticism’ and its role in the development of political modernity. A focus on the concept of the “fanatic” (and its cognates) from the perspective of its various uses in political and religious thought from the Early Modern period through the Enlightenment and up to the present day, provides a fascinating opportunity for a critical review of the secular, rationalist, and scientific assumptions underwriting modern political forms and concepts, especially those of liberal democracy. At the same time, the course will offer critical insight into the ways in which religious and political differences among colonial “others” were, and continue to be, central to the elaboration of Western theoretical discourse on fanaticism and extremism as forms of “political pathology”. (Given by the Departments of Political Science and Religion)

Prerequisite: (2.0 credits in Political Theory and/or Philosophy including 1.0 credit at the 300-level) or (0.5 credit in Method and Theory in the Study of Religion and 1.0 credit at the 300-level in the Study of Religion)

Breadth Requirements: Society and its Institutions (3)

POL469H1 - Ethics and International Relations

Hours: 24S

The course aims to explore the requirements of justice and fairness in international affairs. It is common to theorize international relations in terms of interests and power. But even the most cursory look at what important actors actually do in their international interactions reveals that they use normative language all the time. This has not gone unnoticed, with investigations of ethics in the international arena multiplying in recent years. Drawing on readings from political philosophy, legal theory, and normative international relations theory, the course will take up practical ethical dilemmas encountered in world affairs. The main focus of the course will be on institutions. Examples will be drawn from the issue areas of trade, health, and the environment, among others.

Prerequisite: POL200Y1/POL208H1/POL208Y1/POL209H5/POLB80H3/(POLC70H3, POLC71H3)
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

POL472H1 - The Comparative Political Economy of Industrial Societies

Hours: 24S

Topics discussed will include the historical origins of advanced capitalist political economies, the ‘Varieties of Capitalism’ debate, current trajectories of different political economies, labour politics and regulation, the politics of
macro-economic policy, the political economy of growth, and Canada's political economy.

**Prerequisite:** POL224H1/POL224Y1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**POL474H1 - Politics and Policy Analysis**

**Hours:** 24S

Major theories of public policy-making and related approaches to policy analysis are examined from the perspective of political science. Key contributions to the theoretical literature pertaining to leading models are read and discussed. Models of public policy-making are successively applied to analysis of cases of Canadian and comparative policy development.

**Prerequisite:** POL214H1/POL214Y1/POL215H5/POL216H5/POL224H1/POLB50Y3  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**POL475H1 - Postmodern and Contemporary Thought**

**Previous Course Number:** POL475Y1  
**Hours:** 24S

Study of postmodern and contemporary themes. Beginning with political economy, then the effect of technology on politics, a discussion of Western colonialism leading to a revised concept of social relations. Social contract theory will be analyzed through a natural contract as well as examination of individualism and the posthuman.

**Exclusion:** POL475Y1  
**Recommended Preparation:** POL200Y1 and POL320Y1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**POL476H1 - Topics in Public Policy**

**Hours:** 24S

The course is designed for advanced students with serious interests in the public policy field. Specific topics covered will vary from year to year.

**Prerequisite:** POL214H1/POL214Y1/POL215H5/POL216H5/POL224H1

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**POL477H1 - Advanced Topics in International Political Economy**

**Hours:** 24S

The course is designed for advanced students with serious interests in the subfield of international political economy. Specific topics covered will vary, but all involve the deep interplay between politics and economics in the contemporary world.

**Prerequisite:** POL208H1/POL208Y1/POL209H5/POLB80H3/POLB81H3; ECO100Y/(ECO101H1, ECO102H1)  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**POL478H1 - Topics in Methods**

**Hours:** 24S

Various topics are taken up each year, the content of which depends on the instructor.

**Prerequisite:** POL232H1

**Distribution Requirements:** Social Science

**POL479H1 - Topics in Middle East Politics**

**Hours:** 24S

The course examines the contemporary politics of the Middle East and North Africa. It seeks to examine the relative importance of political, socio-economic and ideological factors in the context of such issues as the resilience of authoritarianism, the rise of civil society, and the resurgence of Islamic activism. Theoretical discussion is followed by case studies.

**Prerequisite:** POL201H1/POL201Y1/POLB90H3/POLB91H3

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**POL480H1 - Studies in Comparative Political Theory**

**Hours:** 24S
We will critically examine what “comparative political theory” is and what it would mean to genuinely “deparochialize” political theory, that is, to de-center Euro-American thought in the study of political ideas. The course neither presupposes background knowledge of any non-Western thought tradition, nor does it aspire to provide students with sufficient knowledge of particular traditions to ground serious scholarly contributions to this emerging field. To provide that background would require a series of specialized courses in, e.g., East Asian political thought, Indian political thought, Latin American political thought, Indigenous political thought, African political thought, and so on. Rather, the course aims at sharpening our understanding of (a) the purposes served by “deparochializing” political theory; and (b) the various methods by which we can seek to serve these purposes.

**Prerequisite:** POL200Y1/POL200Y5/(POLC70H3, POLC71H3)

**Distribution Requirements:** Social Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

Introduction

Overview:

Portuguese is the sixth most widely used language in the world. It is spoken by more than two hundred and sixty million people on four continents inhabited by the Lusophone population: Europe, Africa, Asia, and the Americas. Twenty percent of all residents of the Western Hemisphere are Brazilians, a fact attesting to the truth that one out of every five Americans - North, Central, South - speaks Portuguese as his or her native language. The literature of Portugal has a tradition that goes back as far as the twelfth century, and the discoveries of its Renaissance seafarers led the language and the culture to all corners of the globe.

The Department offers an integrated curriculum, combining courses in language, linguistics, literature, and culture. Courses in the studies of the Lusophone world provide a diverse, flexible and detailed examination of the Portuguese language and its cultures. The skills and knowledge developed in these courses lay the groundwork for careers in teaching, journalism, translation, publishing, and foreign services, as well as for research in a variety of fields. In the Canadian job market, command of the Portuguese language is a definite advantage. Toronto has one of the largest Portuguese speaking diasporas, and Canada has been establishing strong cultural, political and business ties with Brazil.

Why should I learn Portuguese?

- Portuguese gives you access to a rich and fascinating culture.
- Portuguese is the world's sixth most widely spoken language.
- Portuguese is a mother tongue in the 5 continents, parallel only to English and Spanish.
- Portuguese is the most widely spoken language in the Southern Hemisphere.
- Portuguese unites Portuguese-speaking diasporas all over the world in countries such as Canada, the United States, South-Africa, France or Switzerland.
- Portuguese has one of the highest growth rates as a second language in the Internet, in social networks and in learning as a foreign language.
- Portuguese is a Romance language, so if you already know another Romance language (Spanish, Italian, etc.), you will find it easier to learn it.
- Portuguese is now the first foreign language in the educational system of many countries.
- Portuguese is the official language of some of the fastest growing economies in the world, namely Brazil and Angola.

What can I do with a degree in Portuguese?

- Education
- Marketing, Editing, Copywriting
- Journalism, Media
- Library and Information Sciences
- Public Relations
- Research
- Foreign Services/Foreign Affairs Specialist
- International development
- Political Aid
- National and international law

How is the program structured?

For many students, our program begins with the language sequence.

Language sequence:

1. The Department reserves the right to place students in the language course best suited to their linguistic preparation. Please contact the Associate Chair, Undergraduate Studies if you would like to take a Placement test to help you determine your level of linguistic competence in Portuguese.

2. Students who, in the department's assessment, have an adequate knowledge of Portuguese may be required to take Portuguese literature, culture or linguistic course instead of a language course at any level.

The progression of courses in the language sequence is designed to accommodate a wide range of previous
language experience. Students are placed in the appropriate language course based on their proficiency as determined by departmental assessment.

Students who have had little to no previous experience in studying Portuguese may enrol in an intensive course, PRT100Y1.

Students who have a strong background in Spanish language (native fluency or minimum SPA320Y1), should enrol in PRT120Y1.

Students who have had previous experience in studying Portuguese may enrol in several intermediate and advanced courses, depending on their background and their level of preparation. Speakers with an intermediate level of Portuguese, including those who successfully completed PRT100Y1 should enrol in PRT220Y1.

Those students who have had exposure to spoken Portuguese in an informal context (i.e., those who live in a Portuguese-speaking environment; for instance, those who have grown up in a Portuguese-speaking country, or who live in Portuguese speaking families), but who have had little to no exposure to written Portuguese, should enrol in PRT219Y1. Students who qualify for this course are able to understand and speak Portuguese. They speak Portuguese relatively fluently, but they usually do not write or read Portuguese. After completing PRT219Y1, Students should proceed to PRT420H1.

Students who have completed PRT120Y1 or PRT220Y1 should proceed to PRT320Y1. Those students who come to the program with an advanced level of Portuguese as assessed by the department should also proceed to take PRT320Y1 or PRT420H1.

Following PRT320Y1, students are qualified to enroll in PRT420H1. This course is appropriate for students with a relatively high vocabulary base and good command of grammar and academic writing who need to increase their lexicon, and who need further formal instruction in grammar and writing.

PRT423H1, a course for advanced speakers of Portuguese, trains students to develop their skills in a range of professional language fields, such as finances, law, medicine, and education.

Cognate courses:

- Portuguese Specialist: Up to 2.0 credits may be taken from cognate departmental or college offerings.
- Portuguese Major: Up to 1.0 credits may be taken from cognate departmental or college offerings.
- Portuguese Minor: Up to 1.0 cognate credit may be taken in Spanish.

Students who are unsure of what is the most appropriate placement for them in the language sequence should contact the Associate Chair, Undergraduate Studies to receive personal assessment and recommendation for proper placement.

Fluent speakers of Portuguese who have received a high school or a higher level of education in the Portuguese language, and who in the department's assessment does not need further training in language, may enroll immediately in any linguistics, literature or culture course.

Literature, culture and linguistics courses:

Portuguese opens the door to a rich range of cultural expressions in literature, film, and art, from the world-changing contribution of Renaissance Portugal to the contemporary Brazilian and Luso-African diaspora. Whether it is Nobel-prize winning Portuguese literature or the excitement of the Brazilian cinema novo, Lusophone writers, filmmakers, and artists continue to shape and change contemporary global culture.

Portuguese also opens the door to the study of the Romance language family. The Department offers students the opportunity to advance their language skills through the systematic reflection on the language structure. Through a variety of courses with a theoretical and experimental focus in linguistics, students acquire basic skills that can be transferred to teaching or research programs. Through collaboration with other language and linguistics programs, students are provided with opportunities and training to conduct research in linguistics with a focus on the Portuguese language.

The Department encourages students to consider completing part of their course work at a university in Portugal or Brazil.

Students should contact the Undergraduate Coordinator early on in the course of their university career to receive advice on how to proceed with their studies and to thus assure that they can receive their degree by the time of planned graduation. For further information, please contact us in the Department of Spanish and Portuguese, Victoria College, Room 208.

Faculty of Arts & Science Language Citation

The Department of Spanish and Portuguese participates in the Faculty of Arts and Science’s Language Citation initiative for Portuguese.

To obtain a Language Citation in Portuguese, students will successfully complete the two language-sequence
courses that follow the introductory level with a minimum of B- in each one of the courses to be considered.

For students with no previous knowledge of Portuguese, PRT220Y1 or PRT320Y1 are required.

Heritage speakers should complete PRT219Y1 and two additional 0.5 credit courses in Portuguese at the 300 or 400-level.

Students should note that, as explained in the About Programs of Study section of this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

To request the citation, e-mail your request with your student ID number to the Associate Chair, Undergraduate Studies. Submit your request as soon as you complete all the courses to be considered.

Portuguese Courses

PRT100Y1 - Portuguese for Beginners

Hours: 48L/48T

An intensive basic course in spoken and written Portuguese for students who have no knowledge of this language or advanced Spanish. It aims to give students a basic knowledge of reading, listening, spoken and written skills in a dynamic and communicative way. Presentation of cultural aspects of the Portuguese-speaking world.

Prerequisite: No previous knowledge of Portuguese or advanced Spanish.
Exclusion: PRT110Y1, PRT120Y1, PRT219Y1, PRT220Y1, PRT320Y1, PRT420H1, PRT420Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

PRT120Y1 - Portuguese for Spanish Speakers

Hours: 48L/24T

Introduction to the Portuguese language for speakers of Spanish. Development of listening, speaking, reading, and writing skills with an emphasis on communication, and an overview of basic grammatical structures and building of vocabulary. Presentation of cultural aspects of the Portuguese-speaking world.

Prerequisite: Basic to relatively high ability to speak and understand Portuguese; limited or no formal education in Portuguese.
Exclusion: PRT100Y1, PRT110Y1, PRT120Y1, PRT220Y1, PRT320Y1
Breadth Requirements: Creative and Cultural Representations (1)

PRT219Y1 - Academic Portuguese

Hours: 48L/24T

Meets the needs of students who have had exposure to spoken Portuguese in an informal context (living in a Portuguese speaking country, or in a Portuguese speaking family) but little to no exposure to written Portuguese. Besides reviewing English/Portuguese spelling differences, written and spoken registers of Portuguese, and basic aspects of the grammatical system, the course (1) provides students with the essential understanding of Portuguese grammatical system; (2) builds their vocabulary; and (3) trains them to express themselves formally in both spoken and written Portuguese.

Prerequisite: Native or advanced knowledge of Spanish (min. SPA320Y1 for non-native speakers of Spanish); no previous knowledge of Portuguese.
Exclusion: PRT100Y1, PRT110Y1, PRT220Y1, PRT320Y1, PRT420Y1, PRT420H1, PRT219Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
PRT220Y1 - Intermediate Portuguese

Hours: 48L/24T

This course will bring together Portuguese grammar and language skills into a useful and practical framework, in order to develop students' skills to communicate in an accurate, effective, and informed manner within a variety of socio-cultural situations. Besides introducing new grammar topics corresponding to the intermediate level, it also includes a grammar review with extra work on vocabulary acquisition. Focuses on comprehension, development of a greater complexity in students' written and oral productions, and gaining a better understanding of Portuguese-speaking cultures.

Prerequisite: PRT100Y1
Exclusion: PRT219Y1/PRT110Y1/PRT120Y1/PRT320Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

PRT221H1 - Portuguese Pronunciation

Hours: 24L

Overview of Portuguese speech sounds (articulation and transcription). The course provides perception and pronunciation training of Portuguese vowels, consonants, stress, intonation, and co-articulation phenomena in connected speech. The main focus will be on European Portuguese and Brazilian Portuguese, but differences between these two and other Portuguese accents will be discussed as well.

Prerequisite: PRT100Y1
Corequisite: PRT120Y1/PRT220Y1
Exclusion: PRT219Y1, native speakers of Portuguese
Breadth Requirements: Thought, Belief and Behaviour (2)

PRT250H1 - Introduction to Lusophone Culture

Hours: 24L

A survey of historical and cultural trends in the Portuguese-speaking world, from colonial past to the present. (Offered in alternate years; taught in English)

Exclusion: PRT252H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

PRT258H1 - Introduction to Lusophone Literature

Previous Course Number: PRT258Y1
Hours: 24L

Introduction to literary studies in Portuguese and information literacy. Representative selection of Lusophone prose, poetry, and drama, with a focus on critical terminology and methods of literary analysis. Required for a program degree.

Prerequisite: First semester PRT220Y1
Exclusion: PRT258Y1
Recommended Preparation: PRT219Y1/PRT220Y1/PRT120Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

PRT299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

PRT320Y1 - Advanced Portuguese

Hours: 48L/24T

Intensive practice in written and oral Portuguese for the advanced student. Selective review of grammar with emphasis on complex language structures.

Prerequisite: PRT120Y1, PRT220Y1 or placement test
Exclusion: PRT219Y1, PRT420H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

PRT322H1 - Introduction to Portuguese Linguistics

Hours: 24L

An overview of theoretical and methodological aspects of Portuguese linguistics: phonology, morphology, syntax, and semantics. Analysis of structural similarities and
differences between the two worldwide main Portuguese varieties - Brazilian and European Portuguese.

**Prerequisite:** PRT219Y1 or PRT220Y1 or PRT120Y1 or Permission of the Department  
**Corequisite:** PRT320Y1  
**Recommended Preparation:** PRT320Y1

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PRT350H1 - Portuguese Language and Society**

**Hours:** 24L

Explores how factors such as ethnicity, gender, social class and age affect the use of Portuguese language and determine its characteristics. The course overviews mostly the aspects of Brazilian and European Portuguese. (Offered in alternate years.)

**Prerequisite:** PRT219Y1 or PRT220Y1 or PRT120Y1 or Permission of the Department  
**Corequisite:** PRT320Y1  
**Recommended Preparation:** PRT320Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PRT356H1 - Topics in Portuguese Linguistics**

**Hours:** 24S

A course on a specific topic in Portuguese linguistics, designed for advanced students. Course content and instructor are established on a yearly basis.

**Prerequisite:** PRT219Y1 or PRT220Y1 or PRT120Y1 or Permission of the Department  
**Corequisite:** PRT320Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PRT358H1 - Topics in Portuguese Studies**

**Hours:** 24L

In years when this course is offered, topics are described in detail on the departmental webpage. Students can enrol in this course multiple times, as long as the topic of the course is different. For any questions, please check with the department.

**Prerequisite:** PRT219Y1 or PRT220Y1 or PRT120Y1; PRT258H1; or Permission of the Department  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**PRT364H1 - Portuguese Language in the World**

**Hours:** 24L

An overview of the varieties of Portuguese spoken in four continents (Europe, South America, Africa, Asia) and a
discussion of the structural similarities and differences between the two most extensively studied varieties: European and Brazilian Portuguese. Analysis of linguistic variation in contemporary Portuguese in terms of phonetics, syntax and lexicon. (Offered in alternate years.)

Prerequisite: PRT219Y1 or PRT120Y1 or PRT220Y1 or Permission of the Department
Recommended Preparation: PRT320Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PRT368H1 - Brazilian Indigenous Languages

Hours: 24L

Overview of linguistic diversity of Brazil, current practices in the maintenance and revitalization of languages and strategies for empowering indigenous peoples. Linguistic properties of Brazilian languages; introduction to language description by working on small data sets; discussion of the influence of Brazilian indigenous languages on Brazilian Portuguese. Taught in English. (Offered in alternate years.)

Prerequisite: Any 200-level course
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PRT398H0 - Research Excursions

Distribution Requirements: Humanities

PRT398Y0 - Research Excursions

Distribution Requirements: Humanities

PRT399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

PRT420H1 - Advanced Academic Portuguese

Hours: 24L

A study of advanced aspects of formal Portuguese through reading and extensive writing practice, with an aim at developing skills necessary for academic and professional writing and oral presentations.

Prerequisite: PRT320Y1 or PRT219Y1 or Placement test
Exclusion: PRT420Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

PRT423H1 - Community Engaged Learning of Portuguese in Toronto and the GTA

Hours: 24L/12P

This course combines advanced language instruction with the richness and complexity of the Lusophone work experience in Toronto, promoting Community Engaged Learning (CEL) as a vehicle for greater linguistic fluency and cultural understanding. Students are placed with community organizations within the Greater Toronto Area and volunteer for 2 hours per week, furthering their language skills and their cultural knowledge. Class work focuses on developing students' communication skills through exposure to a range of topics, from financial, legal, medical to educational, and to an extensive variety of styles and registers in Portuguese. Therefore, students meet real needs in the community by applying knowledge from their Portuguese courses.

Prerequisite: PRT320Y1
Recommended Preparation: PRT420H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
PRT455H1 - Lusophone Cinema

Hours: 24L

Explores the films of Portuguese-speaking countries and iconic Angolan, Brazilian, Cape Verdean, Mozambican and Portuguese directors in the context of political and cultural national movements. (Offered in alternate years.)

Prerequisite: PRT258H1
Recommended Preparation: PRT320Y1, PRT420H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural
Representations (1)

PRT458H1 - The Lusophone Short Story

Hours: 24S

Overview of the short story in the particular context of Portuguese-speaking countries. Examination of theories of the genre as they relate to short stories of Portuguese-speaking writers. (Offered in alternate years)

Prerequisite: PRT258H1
Recommended Preparation: PRT320Y1, PRT420H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural
Representations (1)

PRT470H1 - Acquisition of Portuguese as a Second Language

Hours: 24S

Invites critical reflection about the acquisition of Portuguese as a second language. Analyzes phonological, morphosyntactic, semantic and lexical aspects in the linguistic performance of bilingual speakers, and of learners of Portuguese as a second language. (Offered in alternate years)

Prerequisite: PRT219Y1/PRT220Y1
Corequisite: PRT320Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

PRT490H1 - Independent Study

Individual study with a member of staff on a topic of common interest including readings, discussion and written assignments. Not eligible for CR/NCR option.

**Introduction**

Psychology is the branch of science that focuses on the behaviour of human beings and animals. Our courses span the various areas of psychology and introduce students to the methods used in psychological research. The basic tools of a research psychologist include experimentation in the laboratory and field, naturalistic observation, and the use of statistical methods in interpreting data.

Our faculty have highly diversified interests which are reflected in the number and variety of our undergraduate course offerings. These include courses in cognitive neuroscience, cognitive psychology, computational neuroscience, developmental psychology, human and animal learning, perception, personality psychology, physiological psychology, and social psychology.

For more information, please consult our website (https://www.psych.utoronto.ca/), or the Undergraduate Administrator in Sidney Smith Hall, Room 4014, by phone.
Regarding Psychology Programs

Psychology programs at the St. George Campus are limited enrolment, which means there are a limited number of spaces to offer students. Please note that just meeting the minimum admission requirements does not guarantee one a spot in any of our programs and, in most cases, students will need to exceed them to be competitive because of the volume of applications in comparison to the number of program spaces available.

Entry into all Psychology programs requires Grade 12 Calculus and Grade 12 Biology (we will also accept these two courses taken at the college and university-level). Please note that these two requirements will not be waived.

Combined Degree Program (CDP) offered with Victoria College and Ontario Institute for Studies in Education (OISE)

- Combined Degree Program in HBA/HBSc and Master of Teaching (MT)

Students enrolled in the Minor in Education and Society and Major in Psychology may apply for this Combined Degree Program. For details about application and program requirements, see the Combined Degree Programs section.

Psychology Programs

Psychology Research Specialist - Thesis (Science Program) - ASSPE1958

This program is designed for students who have demonstrated a particular interest and aptitude for research and who want to complete a thesis. Admission to the program is based on strong academic performance and expressed interest in research.

Enrolment Requirements:

This is a limited enrolment program. Students interested in the Psychology Research Specialist - Thesis typically apply and enrol after the end of second year, from the Psychology Major or Psychology Specialist (Non-thesis).

Variable Minimum Grade Average
A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on the number of applicants. Up to 15 students are admitted each year.

The following courses and requirements must be completed:

For students who have completed 8.0 credits or more:

- Gr. 12 Calculus
- Gr. 12 Biology
- PSY100H1 (80%)
- PSY201H1 (or ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1), and PSY202H1 (or ECO220Y1/ STA221H1/ SOC252H1), with a 75% minimum grade average.
- 2.0 PSY 200-level credits (not including statistics), with a 78% minimum grade average

Special Requirement
- In addition to applying via ACORN, students must also send in a supplementary application directly to the department via the Research Specialist Online Application.

To ensure that students admitted to the program will be successful, applicants with a grade average lower those listed in required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Notes:
- Interested students should ideally apply for a PSY Major or Specialist (Non-thesis) at the end of their first year.
- Prior research experience is desired, but not a firm requirement for admission to the program.
- All students accepted into or considering the Research Specialist program should enrol into a 300-level PSY lab course in Year 3.

Completion Requirements:

(10.0 credits):

1. First Year: PSY100H1
2. Statistics: PSY201H1 (or one of ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1) and PSY202H1 (or one of ECO220Y1/ STA221H1/ SOC252H1)
3. 1.0 credit (from Cluster A) PSY210H1, PSY220H1, PSY230H1, PSY240H1
4. 1.0 credit (from Cluster B) PSY260H1, PSY270H1, PSY280H1, PSY290H1 (NOTE: HMB200H1 or PSL300H1 cannot be used in place of PSY290H1)
5. 0.5 credit in PSY at the 300/400-level from Group 1 in Cluster A
6. 0.5 credit in PSY at the 300/400-level from Group 1 in Cluster B.
7. 1.0 credit in PSY at the 300/400-level from Group 1 (any of Clusters A, B, and C)
8. One lab course (0.5 credit), and no more, taken from the following: PSY319H1, PSY329H1, PSY339H1, PSY349H1, PSY359H1, PSY369H1, PSY379H1, PSY389H1
9. PSY309H1
10. PSY409H1
11. PSY400Y1
12. 2.0 credits from Group 1 (Clusters A, B, and C) and/or Group 2, at any level.

(Please note that these are all individual requirements and cannot overlap or be used twice).

**Psychology Specialist (Science Program) - ASSPE1160**

You should consider pursuing the Specialist Program in Psychology if you want a greater concentration in Psychology than provided by the Major Program. Please note that having a Specialist is not required in order to be admitted to a graduate program in Psychology later on.

**Enrolment Requirements:**

This is a limited enrolment program. Note there are different options depending on whether a student has completed between 4.0 and 7.5 credits, or 8.0 or more credits.

**Variable Minimum Grade or Minimum Grade Average**

A minimum final grade or grade average in required courses is needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

**For students who have completed 4.0 to 7.5 credits:**

- PSY100H1 (80%) *(AP and IB Psychology are not accepted)*
  - Gr. 12 Calculus
  - Gr. 12 Biology

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 80% in required courses will not be considered for admission.
Completion Requirements:

(10.0 credits):

1. First Year: PSY100H1
2. Statistics: PSY201H1 (or one of ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA238H1/STA248H1/STA288H1), and PSY202H1 (or ECO220Y1/STA221H1/SOC252H1), 1.0 credits in PSY from the PSY210H1 to PSY290H1 series of courses, and a grade average of 75% across all four courses. If more than 1.0 200-level PSY credits have been completed, the two with the highest grades will be used.

To ensure that students admitted to the program will be successful, applicants with a minimum grade average lower than 75% in required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Note:
In past admission cycles, the average grade cut-off for the Specialist program ranged from approximately 80-83%.

For students who have completed 8.0 or more credits:

- PSY100H1 (AP and IB Psychology are not accepted)
- Gr. 12 Calculus
- Gr. 12 Biology
- PSY201H1 (or ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA238H1/STA248H1/STA288H1), and PSY202H1 (or ECO220Y1/STA221H1/SOC252H1), 1.0 credits in PSY from the PSY210H1 to PSY290H1 series of courses, and a grade average of 75% across all four courses. If more than 1.0 200-level PSY credits have been completed, the two with the highest grades will be used.

**Psychology Major (Science Program) - ASMAJ1160**

You should consider pursuing the Major Program in Psychology if you want to concentrate in Psychology together with another discipline.

**Enrolment Requirements:**

This is a limited enrolment program. Note there are different options depending on whether a student has completed between 4.0 and 7.5 credits, or 8.0 or more credits.

**Variable Minimum Grade or Minimum Grade Average**

A minimum final grade or grade average in required courses is needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

For students who have completed 4.0 to 7.5 credits:

- **PSY100H1 (75%) (AP and IB Psychology are not accepted)**
  - Gr. 12 Calculus
  - Gr. 12 Biology

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 75% in required courses will not be considered for admission. Please note that obtaining the minimum grade average does not guarantee admission to the program.

For students who have completed 8.0 credits or more:

- **PSY100H1 (AP and IB Psychology are not accepted)**
  - Gr. 12 Calculus
  - Gr. 12 Biology

PSY201H1 (or ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA238H1/STA248H1/STA288H1), 1.0 credits in PSY from the PSY210H1 to PSY290H1 series of courses, and a grade average of 73% across all three courses. If more than 1.0 200-level PSY credits have been completed, the two with the highest grades will be used.

To ensure that students admitted to the program will be successful, applicants with a grade average lower than 73% in required courses will not be considered for admission. Please note that obtaining the minimum grade average does not guarantee admission to the program.

**Note:**

In past admission cycles, the average grade cut-off for the Major program ranged from approximately 77-79%.

**Completion Requirements:**

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

**Special Requirement**

- Students must be enrolled in the Psychology Minor, Major or Specialist, to be considered for enrolment.

Completion Requirements:

(4.0 credits, including 1.0 credit at the 300+ level.)

For more information, please email the School of the Environment’s Undergraduate Student Advisor, David Powell, at ug.office.env@utoronto.ca.

Higher Years:

1. ENV221H1, ENV222H1, PSY220H1, PSY335H1/PSY435H1
2. 1.0 credit from: ENV333H1, ENV335H1, ENV361H1/ENV381H1 (if ENV381H1 taken in 2015-16 or 2016-17), JGE321H1, JGE331H1
3. 1.0 credit from: PSY320H1, PSY321H1, PSY327H1/PSY427H1, PSY336H1

**Psychology Minor (Science Program) - ASMIN1160**

You should consider pursuing the Minor Program in Psychology if you are interested in Psychology as a part of your general education or as a compliment to your training in another profession (i.e., nursing, rehabilitation medicine, physical health and education, social work, etc.).

Enrolment Requirements:

This is a limited enrolment program. Note there are different options depending on whether a student has completed between 4.0 and 7.5 credits, or 8.0 or more credits.

**Variable Minimum Grade or Minimum Grade Average**

A minimum final grade or grade average in required courses is needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

For students who have completed 4.0 to 7.5 credits:

- PSY100H1 (73%) (*AP and IB Psychology are not accepted*)
- Gr. 12 Calculus
- Gr. 12 Biology

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 73% in required courses will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

For students who have completed 8.0 credits or more:
• PSY100H1 (AP and IB Psychology are not accepted)
  • Gr. 12 Calculus
  • Gr. 12 Biology
  • PSY201H1 (or ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1), 1.0 200-level PSY credits from the PSY210H1 - PSY290H1 series, and a grade average of 70% across all three courses. If more than 1.0 200-level PSY credits have been completed, the two with the highest grades will be used.

To ensure that students admitted to the program will be successful, applicants with a grade average lower than 70% in required courses will not be considered for admission. Please note that obtaining the minimum grade average does not guarantee admission to the program.

Note: In past admission cycles, the average grade cut-off for the Minor program ranged from approximately 73-75%.

Completion Requirements:

(4.0 credits):

1. First Year: PSY100H1
2. Statistics: PSY201H1 (or one of ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1), 1.0 200-level PSY credits from the PSY210H1 - PSY290H1 series, and a grade average of 70% across all three courses. If more than 1.0 200-level PSY credits have been completed, the two with the highest grades will be used.
3. 1.0 credit from PSY210H1/ PSY220H1/ PSY230H1/ PSY240H1/ PSY260H1/ PSY270H1/ PSY280H1/ PSY290H1 (NOTE: HMB200H1 or PSL300H1 cannot be used in place of PSY290H1)
4. 1.0 credit in PSY at the 300/400-level from Group 1 (any Cluster)
5. 1.0 credit from Group 1 (any Cluster) and/or Group 2, at any level

(Please note that these are all individual requirements and cannot overlap or be used twice).

Psychology of Economics and Management Certificate - ASCER1160

The Certificate in Psychology of Economics and Management explores the interdisciplinary connections between social psychology, economics, and business, covering the role of motivation, culture and leadership in organizations. This Certificate is not open to students pursuing a Psychology Specialist, Major, or Minor.
Enrolment Requirements:

This is a limited enrolment Certificate. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

• PSY100H1 (70%)
• RSM100H1 (63%)/ MGT100H1 (63%)/ ECO101H1 (63%)

Special Requirement
• This Certificate is open to students not enrolled in a Psychology Specialist, Major, or Minor.

Completion Requirements:

(3.0 credits)

In first year or higher (1.0 credit):

• PSY100H1 (grade of 70%)
• RSM100H1/ MGT100H1/ ECO101H1 (grade of 63%)

In second year and higher (2.0 credits):

• PSY220H1
• PSY332H1/ RSM260H1/ IRE260H1
• 1.0 credit from: PSY326H1, PSY321H1, PSY336H1, PSY322H1

Regarding Psychology Courses

We encourage students at all levels, and particularly those who are beginning a program in Psychology, to consult the undergraduate section of the Psychology website (https://www.psych.utoronto.ca/undergraduate) before selecting courses and to discuss their proposed programs with the Undergraduate Administrator.

Courses in the various areas within Psychology and the numbering system associated with these courses follow a specific pattern: PSYXXX. The first digit represents the year, and the second digit represents the area in which the course belongs. Social Psychology, for example, is identified by “2.” Therefore, PSY220 at the second year, PSY320, 321, 322, etc. at the third year, and PSY420, 421, 424, etc. at the fourth year represent the Social Psychology courses. Other areas within Psychology follow a similar pattern, with their own identifying number in the middle.

Please note that the Department of Psychology will not waive course prerequisites under any circumstances and that Psychology courses do not have co-requisites. Students will need to have prerequisites completed BEFORE taking a course.

200-Level Courses

Students registered in a St. George campus PSY program will be given priority to enrol in all PSY courses above the 100-level. Please see the online Arts and Science Registration Instructions and Timetable for more details on enrolment controls. PSY100H1 is required in order to take all 200-level PSY courses, with the exception of PSY202H1 which requires PSY201H1.

300-Level Courses

Almost all 300/400-level lecture courses require PSY201H1 (Statistics I), or its equivalent/exclusion, as one of their prerequisites. This will not be waived. Students must complete the statistics requirement before taking any 300- or 400-level PSY lecture courses. Similarly, 300-level lab and 400-level seminar courses require PSY202H1 (Statistics II) or its equivalent/exclusion.

400-Level Courses

The 400-level courses comprise of lecture courses, seminars, individual projects, and the thesis course for Research Specialists.

The 400-level courses will be given priority to enrol in all PSY courses above the 100-level. Please see the online Arts and Science Registration Instructions and Timetable for more details on enrolment controls. PSY100H1 is required in order to take all 200-level PSY courses, with the exception of PSY202H1 which requires PSY201H1.

Psychology Courses

PSY100H1 - Introductory Psychology

Hours: 36L

A brief introductory survey of psychology as both a biological and social science. Topics will include physiological, learning, perceptual, motivational, cognitive,
PSY194H1 - The Psychology of Student Success

Hours: 24S

University life presents students with all sorts of challenges as well as amazing opportunities for learning and growth. While there are many different ways to define a "successful student", the goal of this seminar is for everyone to develop the knowledge, skills, and mindset needed to make the most of out of the university experience. Students will discover what research in psychological science has to say about facing and overcoming common academic, intrapersonal, and interpersonal challenges, as we cover topics including deliberate practice, impostor syndrome, and belongingness. Students will also learn evidence-based strategies for better managing their attention, energy, and emotions so that they may thrive (rather than just survive) in university. In addition to learning about psychology, students will develop useful skills in scientific literacy, critical thinking, self-reflection, written and oral communication, and teamwork. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY195H1 - The Science of Babies

Hours: 24S

Up until roughly four decades ago, infants were seen as cute, clueless creatures. Yet, research from a range of fields has led to a radical reconsideration of this claim; infants may be cute but they are not clueless! In this class, we will consider and discuss the science of babies. In particular, we will take a second look at long-held beliefs about the nature of infants and their knowledge. We will learn that studying infants’ perception, cognition and behaviour can offer us critical insights into long-standing philosophical questions. This course provides an interdisciplinary introduction to infancy, that includes content from psychology, philosophy, neuroscience, as well as biology and anthropology. Upon completion of this class, students will (1) have overview knowledge of aspects of infancy as it relates to perception, cognition and behavior; (2) be able to use exploratory writing to develop arguments and develop their understanding of subject matter; and (3) begin to be able to read and summarize a scientific research paper in Developmental Psychology. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY196H1 - Critical Periods, Brain Plasticity and Development

Hours: 24S

This course will ask how changes in the developing brain can influence our understanding of how humans learn. To answer this question, we will learn about how the brain changes and about how learning changes. We will dig into brain plasticity and ask how this influences “critical” or “sensitive” periods for learning: a phenomenon whereby learning can only take place during a particular time in an organism’s life. We will explore learning in a number of different ways including learning in sensory and motor systems and the development of multiple aspects of learning and memory. In all cases, we will ask how changes in the developing brain impact learning outcomes. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSY197H1 - The Individual and Society

Hours: 24S

How does one develop a sense of individuality? Can individual will and freedom be reconciled with the interests of society? Are we determined by society or culture or do we, in some important sense, determine our own behaviour and futures? In this course, we will use classic and contemporary readings from psychology, sociology, anthropology, philosophy, and law to explore general characterizations of the individual and society. Basic questions will be examined in light of these characterizations such as: Is there a universal human nature? Who is a “person”?, and What is the ideal society? We will examine these questions in light of various social issues, such as debates about multiculturalism and democracy, whether children have rights to freedom of speech, and women's equality in society. Throughout the course, the emphasis will be on the different views of the person underlying and informing contrasting perspectives on important social questions. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY198H1 - The Psychology of Magic

Hours: 24S
Magicians entertain us with their tricks. What appears as “Magic” is based on fundamental aspects of human psychology: visual and auditory perception, decision making, logic, memory, and verbal abilities. In this class, we will consider and discuss the psychological basis of magic tricks and use magic to explore aspects of psychology. The class will require reading of scientific articles and book chapters as well as watching and analyzing magical tricks. The only prerequisite is a curious and critical mind. The course puts great emphasis on writing and on starting to read primary scientific literature. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY199H1 - Psychology and History of Drug Use**

**Hours:** 24S

This seminar will examine the historical and contemporary use of drugs. Students will be introduced to the general psychological and neuroscientific mechanisms by which drugs affect human behavior, and explore highlights of current research on drug effects in animals and humans. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY201H1 - Statistics I**

**Hours:** 36L

Fundamentals of descriptive and inferential statistics, including population and sampling distributions, simple association, probability, estimation, and hypothesis testing.

**Prerequisite:** PSY100H1/PSY100Y5/(PSYA01H3 + PSYA02H3)

**Recommended Preparation:** Grade 12 Calculus

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PSY202H1 - Statistics II**

**Hours:** 36L

Fundamentals of statistical analysis of experimental and observational data including linear models, the analysis of variance, a priori contrasts, post-hoc tests, power analysis and effect size calculations.

**Prerequisite:**

**Exclusion:** ECO220Y1/SOC252H1/STA221H1/PSY202H5/STA221H5/PSYB07H3/STAB27H3/STAC32H3

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**PSY203H1 - Psychological Research**

**Hours:** 36P

This course provides an introduction to conceiving, designing, and conducting research in psychology. It prepares students to be both consumers and producers of scientific research, and also addresses basic issues related to the work of psychological scientists such as theory development, research ethics, and scientific writing. Students in this course will gain insight into the scientific process as a whole – its advantages, difficulties, and limitations. As such, students will be able to better evaluate the knowledge that psychological science can provide, and integrate that knowledge into a broader worldview.

**Prerequisite:** PSY100H1/PSY100Y5/(PSYA01H3 + PSYA02H3)

**Corequisite:**

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY204H1 - Psychology Careers and Applications**

**Hours:** 36L

Psychology has been identified as a hub science, a discipline whose research influences the work of scientists in many other fields. This course will provide students with
a broad introduction to the application of the psychological sciences across various clinical, academic, and industry contexts. Students will gain valuable insight into the broad range of careers that are relevant to psychology, while also investigating barriers to rigorous application of psychological science in applied settings. Students will also learn how the skills and knowledge gained in an undergraduate psychology program can be applied to a broad range of careers and fields/sectors. Students will gain significant exposure to career and education planning considerations within the psychological sciences and will participate in at least one experiential career exploration activity.

**Prerequisite:** PSY100H1/PSY100Y5/(PSYA01H3 + PSYA02H3), and 0.5 PSY credit at the 200-level

**Distribution Requirements:** Science

**Breadth Requirements:** Society and its Institutions (3)

**PSY210H1 - Introduction to Developmental Psychology**

**Hours:** 36L

The developmental approach to the study of behaviour with reference to sensorimotor skills, cognition, socialization, personality, and emotional behaviour.

**Prerequisite:**
PSY100H1/PSY100Y5/PSYA02H3/COG250Y1

**Exclusion:** PSY210H5/PSYB20H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY220H1 - Introduction to Social Psychology**

**Hours:** 36L

Contemporary areas of research in social psychology: social perception, attitudes, inter-personal relations, and group processes.

**Prerequisite:**
PSY100H1/PSY100Y5/PSYA02H3/COG250Y1

**Exclusion:** PSY220H5/PSYB10H3/SOC213H1

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY230H1 - Personality and Its Transformations**

**Hours:** 36L

Theory and research in personality structure and dynamics: the interaction of cultural and biological factors in the development and expression of individual differences.

**Prerequisite:** PSY100H1/PSY100Y5/PSYA02H3

**Exclusion:** PSY230H5/PSYB30H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY240H1 - Introduction to Abnormal Psychology**

**Hours:** 36L

A critical survey of concepts, theories, and the state of research in the area of psychopathology and therapeutic methods.

**Prerequisite:** PSY100H1/PSY100Y5/PSYA02H3

**Exclusion:** PSY240H5/PSYB32H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY260H1 - Introduction to Learning and Plasticity**

**Hours:** 36L

Concepts, theories, and applications of classical and contemporary learning theories, including classical and operant conditioning. Current theories of the physiological and anatomical basis of learning and memory, including synaptic plasticity, the role of the hippocampus, amygdala, frontal cortex and other brain regions. Theories will be related to a practical understanding and applications such as drug addiction, phobias and other disorders.

**Prerequisite:**
PSY100H1/PSY100Y5/PSYA01H3/COG250Y1

**Exclusion:** PSYB38H3

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PSY270H1 - Introduction to Cognitive Psychology**

**Hours:** 36L
An introduction to research and theory on the neural and cognitive architecture of attention, memory, language, thinking and reasoning.

**Prerequisite:**
PSY100H1/PSY100Y5/PSYA01H3/COG250Y1

**Exclusion:** PSY270H5/PSYB57H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

---

**PSY280H1 - Introduction to Sensation and Perception**

**Hours:** 36L

An introduction to the physiological and psychological basis of perception across the different sensory modalities in humans and lower animals, with an emphasis on vision. Exploring visual perception such as shape and objects, scenes, colour, space, and motion as well as auditory perception of simple and complex sounds, and location. Further topics may include touch, including perception of temperature, pain and body posture, the chemical senses, and cross-modal influences of the senses on one another. In-class demonstrations may supplement the lectures.

**Prerequisite:**
PSY100H1/PSY100Y5/PSYA01H3/COG250Y1

**Exclusion:** PSY280H5/PSYB51H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**Distribution Requirements:** Science

---

**PSY305H1 - The Treatment of Psychological Data**

**Hours:** 36L

This course provides a practical yet intensive introduction to the research pipeline, with a focus on research data management and advanced statistical analysis and inference. Students learn how to find, organize, and analyze data sets in a transparent and reproducible way. Students also learn more about statistical inference, focusing on how the design and analysis of data shape the interpretation of results.

**Prerequisite:**

**Exclusion:** EEB313H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

---

**PSY306Y0 - Special Topics in Psychology Abroad**

**Hours:** 48L

Special Topics in Psychology for the Summer Abroad Program. Course topics, content, and instructor may vary from one year to another. More information about Psychology course offerings can be obtained from the Professional & International Programs office at...
Woodsworth College. For students in any Psychology and/or Social Science major or specialist.

Prerequisite: Completion of 8.0 credits
Distribution Requirements: Science

PSY307H1 - Special Topics in Psychology

Hours: 36L

A lecture course providing in-depth examination of specific topics/themes relating to Psychology. Content in any given year depends on instructor. Priority is given to PSY Major program students during the first enrolment period.

Prerequisite: PSY100H1/PSY100Y5/(PSYA01H3 + PSYA02H3), and PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA238H1/STA248H1/STA288H1/PSY201H5/STA215H5/STA220H5/PSYB07H3/STAB2H3/STAB23H3/STAB57H3, and 0.5 PSY credit at the 200-level
Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

PSY308H1 - Special Topics in Psychology

Hours: 36L

A lecture course providing in-depth examination of specific topics/themes relating to Psychology. Content in any given year depends on instructor. Priority is given to PSY Major program students during the first enrolment period.

Prerequisite: PSY100H1/PSY100Y5/(PSYA01H3 + PSYA02H3), and PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA238H1/STA248H1/STA288H1/PSY201H5/STA215H5/STA220H5/PSYB07H3/STAB2H3/STAB23H3/STAB57H3, and 0.5 PSY credit at the 200-level
Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

PSY309H1 - Research Specialization: Practicum

Hours: 36P

Research Specialists learn about the research opportunities within our department, and develop skills in the areas of critical thinking, writing, and oral presentation. Students also conduct a pre-thesis research project under the supervision of a faculty member. Students should complete a PSY lab course (PSY3*9H1) prior to taking this course; however, taking the lab course concurrently will be considered in consultation with the instructor. Enrolment is restricted to PSY Research Specialists.

Corequisite: PSY319H1/PSY329H1/PSY339H1/PSY349H1/PSY359H1/PSY369H1/PSY379H1/PSY389H1
Exclusion: PSY309H5

Distribution Requirements: Science

PSY311H1 - Social Development

Hours: 36L

Theory and research in social attachment, aggression, morality, imitation and identification, altruism, and parental discipline, with discussion of methodological issues.

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

PSY312H1 - Cognitive Development

Hours: 36L

Examines the developmental of knowledge in fundamental domains such as spatial perception, navigation, object perception, number, language, and theory of mind. Emphasis is on current experimental findings and how they address centuries-old debates surrounding the origin and nature of human knowledge.

Exclusion: PSY312H5
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY313H1 - Psychology of Aging

Hours: 36L

Age changes in sensory and perceptual processes, motor skill, learning, memory, and personality. Theory, methodological problems, social, cultural, and environmental influences that shape behaviour and attitudes towards and among the elderly.

Prerequisite:
PSY280H1/PSY280H5/PSYB51H3
Exclusion: PSY316H5/PSYC22H3
Recommended Preparation: PSY210H1/PSY210H5/PSYB20H3
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

JLP315H1 - Language Acquisition

Hours: 36L

Infants' abilities at birth, prelinguistic development, the first words, phonological, syntactic and semantic development. Social variables influencing language acquisition, bilingualism, models of development, language play. (Sponsored by the Departments of Linguistics and Psychology, but administered solely by the Dept. of Linguistics).

Prerequisite: 1.0 credit at the 200+ level in LIN/JAL/JUP/PSL/PSY/COG
Exclusion: PSY315H5, PLIC24H3
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY316H1 - Perceptual Development

Hours: 36L

The course examines human perceptual development during the first 2-3 years of life. Vision and audition are emphasized. Some topics are: pattern and colour vision, depth perception, infant speech perception.

Prerequisite:
PSY280H1/PSY280H5/PSYB51H3
Exclusion: PSY316H5/PSYC22H3

Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY319H1 - Developmental Laboratory

Hours: 36P

Provides an overview of developmental psychology methods. The class conducts an original research project, including design, data collection, data analysis, and a written report. Course capacity is limited to 15 students and priority is given to PSY Specialists and Research Specialists during the first enrolment period.

Prerequisite:
PSY202H1/ECO220Y1/SOC252H1/STA221H1/PSY202H5/STA221H5/PSYC08H3/STAC32H3, and
PSY210H1/PSY210H5/PSYB20H3
Exclusion: PSY319H5/PSYC72H3
Recommended Preparation: PSY203H1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY320H1 - Social Psychology: Attitudes

Hours: 36L

Intensive study of social attitude development, description, measurement, modification, and organization.

Prerequisite:
PSY280H1/PSY280H5/PSYB10H3/SOC213H1
Exclusion: PSY320H5
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY321H1 - Cross-Cultural Psychology

Hours: 36L
One of the hallmarks of human behaviour is its diversity. Some of the ways in which we differ are thought to be relatively idiosyncratic (e.g., specific aspects of personality), whereas others are fairly systematic. Cultural psychology is one area of research in human behaviour that examines systematic differences resulting from individuals’ cultural backgrounds. This course will introduce you to the consideration of cultural variation in the study of human thought and behaviour.

**Prerequisite:**

**Exclusion:** PSY321H5/PSYC14H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY322H1 - Intergroup Relations**

**Hours:** 36L

An in-depth examination of theories and research in intergroup relations; focuses on stereotyping, prejudice, discrimination, and stigma.

**Prerequisite:**

**Exclusion:** PSYC12H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY323H1 - Sex Roles and Behaviour**

**Hours:** 36L

The effect of sex-role expectations on how men and women behave and perceive the world; theories of sex-role development, physiological and cultural determinants of sex differences, power relationships between men and women.

**Prerequisite:**

**Exclusion:** PSY230H1/PSY230H5/PSYB30H3 or PSY240H1/PSY240H5/PSYB32H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY324H1 - Moral Thought and Behaviour**

**Hours:** 36L

Moral values vary considerably across individuals, groups, countries, and cultures. What explains the emergence of these differential moral systems? What psychological processes are involved in moral decisions and actions? How might insights from psychological research shed light on contemporary, ‘hot-button’ moral issues? How are moral decisions similar to – and different from – other types of everyday decisions? What is the role of emotion in moral decision making? As an introduction to the field of moral psychology, this 300-level course will cover research from a range of sub-disciplines within psychology including social-personality psychology, cognitive neuroscience, and developmental psychology. In addition, students will gain exposure to related material in other fields including philosophy, ethology, and economics. Students will gain a firm understanding of the key debates and issues in the study of the moral mind and will gain skills in critical thinking and writing.

**Prerequisite:**

**Exclusion:** PSYD14H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY326H1 - Social Cognition**

**Hours:** 36L

An examination of theory and research on how we make sense of ourselves and our social world. Topics covered include goals, mood, memory, hypothesis testing, counterfactual thinking, stereotypes, and culture.

**Prerequisite:**
**Exclusion:** PSYC13H3/PSYD12H3/PSYD15H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

PSY337H1 - Advanced Personality Psychology

Hours: 36L

This course covers major topics in personality psychology including prominent theories and current research in the area. Theoretical frameworks are integrated with specific applications in primary sources. Specific topics may include personality structure, personality development, psychodynamic approaches, genetic methodology, and emotion regulation.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H
1/SOC202H1/STA220H1/STA238H1/STA248H1/STA288

Exclusion: PSY324H5
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY339H1 - Individual Differences Laboratory

Hours: 36P

Introduction to methods involved in individual differences or personality research. Group and individual projects focus on assessment of individual difference characteristics and on experimentation including such characteristics. Course capacity is limited to 15 students and priority is given to PSY Specialists and Research Specialists during the first enrolment period.

Prerequisite:
PSY202H1/ECO220Y1/SOC252H1/STA221H1/PSY202H
5/STA221H5/PSYCO8H3/STAB27H3/STAC32H3, and

Exclusion: PSY329H5
Recommended Preparation: PSY203H1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY341H1 - Psychopathologies of Childhood

Hours: 36L

This course focuses on cognitive and neuropsychological aspects of neurodevelopmental and psychiatric disorders in children from clinical and theoretical perspectives.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H
1/SOC202H1/STA220H1/STA238H1/STA248H1/STA288
Exclusion: PSY341H5
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY342H1 - Cognition and Psychopathology

Hours: 36L

Work in psychological disorders has increasingly used the theories and methodologies of cognitive psychology to guide research. This course will examine accounts of clinical disorders informed by cognitive experimental psychology, with emphasis on recent work in affective disorders.

Exclusion: PSY340H5
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY343H1 - Theories of Psychopathology and Psychotherapy

Hours: 36L

Examines various theories of how personality functioning may become impaired and corresponding psychotherapeutic interventions. Emphasis on empirical assessment of personality dysfunction and therapy effectiveness.

Exclusion: PSY343H5/PSYC36H3
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY349H1 - Laboratory in Social Psychological Field Methods

Hours: 36P

This laboratory class introduces students to field methods in social psychology used to study social processes as they unfold in daily life and public spaces. Students will get hands on experience to collecting, managing, storing, and communicating data collected through observational and longitudinal methods, including data collection in public spaces around Toronto and online. Course capacity is limited to 15 students and priority is given to PSY Specialists and Research Specialists during the first enrolment period.

Recommended Preparation: PSY203H1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY359H1 - Human Neuroimaging Laboratory

Hours: 36P

Introduction to brain imaging methods used in cognitive, developmental, and social neuroscience. Course projects will cover experimental design, imaging techniques, and data analysis. Course capacity is limited to 15 students and priority is given to PSY Specialists and Research Specialists during the first enrolment period.

Exclusion: HMB310H1/PSYD55H3
Recommended Preparation: PSY203H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSY360H1 - Associative Learning

Hours: 36L
Learning allows our experiences to shape what we know, what we can do and how we interact with our environments. This course addresses the fundamental concepts and more important research findings related to contemporary theories of associative learning in animals and humans. It examines the application of such fundamental research to issues such as the neural substrates of behaviour, drug use, and anxiety disorders. It is designed to foster skills in critical thinking, experimental design and reading primary sources in this area.

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**PSY362H1 - Animal Cognition**

**Hours:** 36L

The study of memory, representation, concept learning, and other cognitive processes in non-human animals.

**Exclusion:** PSY362H5

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**PSY369H1 - Psychobiology Laboratory**

**Previous Course Number:** PSY399H1

**Hours:** 36P

This lab is an introduction to experimental methods in behavioural neuroscience, including neuroanatomical and psychopharmacological methods in rodents. Course projects will cover experimental design, laboratory techniques, data analysis, and scientific writing. Course capacity is limited to 12-15 students and priority is given to PSY Specialists and Research Specialists during the first enrolment period.

**Prerequisite:**

**Exclusion:** HMB310H1/PSY369H5/PSYC06H3

**Recommended Preparation:** PSY203H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**PSY370H1 - Thinking and Reasoning**

**Hours:** 36L

Problem-solving as a model of directed thinking; conceptual behaviour and mental representation; induction, deduction and learning; probabilistic reasoning; creative thinking and complex problem solving.

**Prerequisite:**

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

---

**PSY371H1 - Higher Cognitive Processes**

**Hours:** 36L

This course covers selected topics pertaining to higher cognitive processes including rationality, consciousness, creativity, and human and artificial intelligence.

**Prerequisite:**

**Exclusion:** PSY371H5

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

---

**PSY372H1 - Human Memory**

**Hours:** 36L

Current theories and data on human memory: processes involved in encoding, storage, and retrieval.
Prerequisite:
Exclusion: PSY372H5/PSYC53H3
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

JLP374H1 - Psychology of Language

Hours: 36L

In Psychology of Language, we investigate human and other animal communication, structure of human language, word meaning and semantic memory, psychological studies of syntax, bilingualism, language and thought, language errors and disorders. (Sponsored by the Departments of Linguistics and Psychology, but administered solely by the Dept. of Linguistics).

Prerequisite: 1.0 credit from LIN228H1, LIN229H1, LIN232H1, LIN241H1, PSY260H1, PSY270H1, PSY280H1, PSY290H1, COG250Y1
Exclusion: LIN258H5, PSY374H5, PLIC55H3
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY378H1 - Engineering Psychology

Hours: 36L

The application of our knowledge of human information processing capabilities to improve human-machine systems design in a number of engineering environments including aviation, computer software, human-computer interaction, and nuclear power plants.

Prerequisite:
Recommended Preparation:
Exclusion: PSY379H5/PSYC75H3
Recommended Preparation: PSY203H1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY379H1 - Human Memory and Learning Laboratory

Hours: 36P

Examination of issues and methods in human memory research. Students conduct supervised research projects, and read, critique, and write research articles. Course capacity is limited to 15 students and priority is given to PSY Specialists and Research Specialists during the first enrolment period.

Prerequisite:
Exclusion: PSY379H5/PSYC75H3
Recommended Preparation: PSY203H1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

PSY380H1 - Vision Science

Hours: 36L

Integrates psychology, neuroscience, and computer science approaches to the study of vision science. Topics include: history and philosophy of vision science, low-level vision, motion perception, spatial vision, perception of objects and scenes, colour perception, attention and consciousness, and multisensory integration. Demonstrations/in-class experiments supplement lectures and readings. Emphasis on reading and writing scientific articles in vision science.

Prerequisite:
Exclusion: PSYC51H3
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)

PSY389H1 - Perception Laboratory

Hours: 36P

Examination of issues and methods in perception research. Students conduct supervised research projects, and read, critique, and write research articles. Course capacity is limited to 15 students and priority is given to
PSY Specialists and Research Specialists during the first enrolment period.

**Prerequisite:**

**Recommended Preparation:** PSY203H1

**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

**PSY390H1 - Behavioural Genetics**

**Hours:** 36L

An examination of how genes contribute to the production of behaviour, either as structural elements or direct participants in behavioural regulation. Covers molecular genetics, natural selection, and genetic methods followed by specific examples of congenic disorders that affect behaviour and studies of normal behaviours in human and animal models.

**Prerequisite:**

**Exclusion:** PCL200H1/PCL476H1/PSYC62H3

**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

**PSY395H1 - Neuroethics**

**Hours:** 36L

An examination of how developments in neurology and neuroscience can be used to inform ethical and legal issues related to free will, responsibility, competence, education, morality, and empathy in healthy people and in people with confirmed or suspected neurological disorders.

**Prerequisite:**

**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

**PSY396H1 - Neurochemical Basis of Behaviour**

**Hours:** 36L

The functional relevance of neurotransmitters, with particular emphasis on their role in mediating behaviour.

**Prerequisite:**

**Exclusion:** PCL200H1/PCL476H1/PSYC62H3

**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

**PSY397H1 - Biological Rhythms**

**Hours:** 36L

Daily, monthly, annual and other rhythms and methods of measuring them. Behavioural and physiological aspects of biological clocks. The importance of rhythms in experimental design, in research on brain function, in affective disorders, and the use animals make of rhythms in migration and other behaviours.

**Prerequisite:**

**Distribution Requirements:** Science
**Breadth Requirements:** Living Things and Their Environment (4)

**PSY399H1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at Psychology 1082.
**PSY399Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at [https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program](https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program). Not eligible for CR/NCR option.

**Distribution Requirements:** Science

**PSY400Y1 - Research Specialization: Thesis**

An individual thesis done under the direction of a faculty member. Lecture and seminar presentations of proposals in the Fall session. Enrolment is restricted to PSY Research Specialists. Not eligible for CR/NCR option.

**Prerequisite:** Enrolment in the PSY Research Specialist program, and one of PSY319H1/PSY329H1/PSY339H1/PSY349H1/PSY359H1/PSY369H1/PSY379H1/PSY389H1

**Corequisite:** PSY409H1

**Exclusion:** PSY400Y5/PSYC98Y3

**Distribution Requirements:** Science

**PSY402H1 - Psychology Seminar**

Hours: 24S

Examination in depth of specific topics in psychology at the graduate level. These seminars vary from year to year in terms of the number given, the topics, and the restrictions on enrolment. Students must get prior consent from the instructor of the graduate seminar they are interested in taking and submit this consent in writing to the department at which time you will be enrolled for undergraduate credit. Consult the Undergraduate Administrator for more details.

### PSY407H1 - Special Topics in Psychology

**Hours:** 36L

A lecture course providing in-depth examination of specific topics/themes relating to Psychology. Content in any given year depends on instructor. Priority is given to PSY Major program students during the first enrolment period.

**Prerequisite:**
PSY100H1/PSY100Y5/(PSYA01H3 + PSYA02H3), and PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA238H1/STA248H1/STA288H1/PSY201H5/STA215H5/STA220H5/PSYB07H3/STAB2H3/STAB23H3/STAB57H3, and 0.5 PSY credit at the 200-level

**Distribution Requirements:** Science

### PSY408H1 - Special Topics in Psychology

**Hours:** 36L

A lecture course providing in-depth examination of specific topics/themes relating to Psychology. Content in any given year depends on instructor. Priority is given to PSY Major program students during the first enrolment period.

**Prerequisite:**
PSY100H1/PSY100Y5/(PSYA01H3 + PSYA02H3), and PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA238H1/STA248H1/STA288H1/PSY201H5/STA215H5/STA220H5/PSYB07H3/STAB2H3/STAB23H3/STAB57H3, and 0.5 PSY credit at the 200-level

**Distribution Requirements:** Science

### PSY409H1 - Research Specialization: Theoretical Foundations

**Hours:** 24S

Addresses the central theoretical issues that structure contemporary research in each of the major areas of psychology. The aim is to provide an informal overview of the field as a whole. Enrolment is restricted to PSY Research Specialists.

**Prerequisite:** Enrolment in the PSY Research Specialist program, and PSY309H1, and one of PSY319H1/PSY329H1/PSY339H1/PSY349H1/PSY359H1/PSY369H1/PSY379H1/PSY389H1

**Corequisite:** PSY400Y1

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

### PSY410H1 - Developmental Psychology Seminar

**Hours:** 24S

Examination in depth of a limited topic within developmental psychology. Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.
PSY414H1 - Moral Development

Hours: 36L

Lecture courses examining cognitive-developmental, psychoanalytic, sociobiological, behaviouristic and cultural-anthropological approaches to moral development. Issues covered include definitions of morality, the relationship between moral judgement and action, gender differences and commonalities, and the role of culture in moral development.

Prerequisite: 
PSY210H1/PSY210H5/PSYB20H3

Exclusion: PSY140H5/PSYD20H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

PSY417H1 - Aging and Social Cognition

Hours: 36L

Lecture course examining theory and research on the social cognitive aspect of aging. Topics range from impression formation and causal attributions to perceptions of control and emotions.

Prerequisite: 
PSY210H1/PSY210H5/PSYB20H3

Exclusion: PSY145H5/PSYC13H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

PSY420H1 - Social Psychology Seminar

Hours: 24S

Examination in depth of a limited topic within social psychology. Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

Prerequisite: 
PSY210H1/PSY220H5/PSYB10H3/SOC213H1

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

PSY421H1 - Person Perception

Hours: 36L

This lecture course discusses how we perceive, categorize, and form impressions of other people, relying on readings from primary sources in the scientific literature.

Prerequisite: 
PSY210H1/PSY210H5/PSYB20H3

Exclusion: PSY327H5/PSYD11H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

PSY424H1 - Social Psychology of Interpersonal Relationships

Hours: 36L

This lecture course focuses on the social psychology of interpersonal relationships between individuals, especially romantic or close relationships and friendships. It surveys what social psychologists have learned about the development, maintenance, disruption or dissolution of personal relationships, as well as current social psychological theories of interpersonal relationships.

Prerequisite: 
PSY220H1/PSY220H5/PSYB10H3/SOC213H1, and 
PSY270H1/PSY270H5/PSYB57H3/COG250Y1 or 
PSY280H1/PSY280H5/PSYB51H3

Exclusion: PSY327H5/PSYD11H3
PSY425H1 - Self-Consciousness

Hours: 36L

The distinguishing feature of our species is the reflexivity of our consciousness -- the ability to conceive of and interpret ourselves and our experiences. For us, consciousness involves self-consciousness. All our higher symbolic capabilities rest upon this foundation. The aim of this lecture course is to trace out a variety of frames through which we can examine and understand the shared aspects of our subjectivity as self-conscious agents. Using a multidisciplinary approach that draws together ideas and insights from psychology, sociology, philosophy, anthropology, and biology, the course is designed to foster articulacy and critical acumen in how we think about reflexive experience.

Prerequisite:  
Exclusion:  PSY325H5
Distribution Requirements:  Science
Breadth Requirements:  Thought, Belief and Behaviour (2)

PSY426H1 - Motivational Theories in Social Psychology

Hours: 36L

With intensive reading and discussion of 'classic' and contemporary articles, this advanced lecture course in social psychology focuses on the central issues, methods, and findings in the study of motivation. Topics include self-regulation, achievement, and reward/punishment.

Prerequisite:  
Exclusion:  PSY325H5
Distribution Requirements:  Science
Breadth Requirements:  Thought, Belief and Behaviour (2)

PSY427H1 - Media Psychology

Hours: 36L

This course in critical media literacy examines how we come to understand ourselves and our world, and learn to feel, evaluate, and act, through the simulative mediation of information and communication technologies. The aim is to provide students with a deeper understanding of the dynamic symbolic environment that surrounds them and in which they participate as both audience and producer. The approach is multidisciplinary, drawing not only from psychology but a broad range of influential perspectives in the social sciences and humanities. The topics explored reveal how developments in the world of media are central to understanding changing forms of public and private life in the 21st century.

Prerequisite:  
Distribution Requirements:  Science
Breadth Requirements:  Thought, Belief and Behaviour (2)

PSY428H1 - Critical Psychology

Hours: 36L

This course examines the place of psychology in broader society and culture. What are the consequences of our research and professional practices for how we understand and govern ourselves and others? What is the basis and extent of our authority and power to describe, define, and explain human behaviour and experience? How do our values direct our activities and interpretations as psychologists? How can we critically evaluate the assumptions, commitments, and achievements of our discipline in relation to real or imagined alternatives?

Prerequisite:  
Distribution Requirements:  Science
Breadth Requirements:  Thought, Belief and Behaviour (2)

PSY430H1 - Personality Seminar

Hours: 24S
Examination in depth of a limited topic within the area of personality. Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

**Prerequisite:**
PSY202H1/ECO220Y1/SOC252H1/STA221H1/PSY202H5/STA221H5/PSYC08H3/STAB27H3/STAC32H3, and
PSY230H1/PSY230H5/PSYB30H3 or
PSY240H1/PSY240H5/PSYB32H3

**Exclusion:** PSY430H5/PSYD30H3/PSYD32H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY434H1 - Maps of Meaning: The Architecture of Belief**

**Hours:** 36L

This lecture course is based on the book Maps of Meaning: The Architecture of Belief. Maps of Meaning lays bare the grammar of mythology, and describes the relevance of that grammar for interpretation of narrative and religion, comprehension of ideological identification, and understanding of the role that individual choice plays in the maintenance, transformation and destiny of social systems.

**Prerequisite:**
PSY230H1/PSY230H5/PSYB30H3 or
PSY240H1/PSY240H5/PSYB32H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY435H1 - Environmental Psychology**

**Hours:** 36L

This lecture course explores how psychologists can contribute to finding solutions to today's pressing environmental challenges. Topics include persuasion, community-based social marketing, social influence, social capital, and the many ways in which the physical environment affects psychological processes. The course takes a multi-scalar approach to the human-environment relationship, covering individual, community, cultural and global levels of scale, through the lens of complex dynamic systems theories.

**Prerequisite:**
PSY100H1/PSY100Y5/(PSYA01H3 + PSYA02H3), and
PSY220H1/PSY220H5/PSYB10H3/SOC213H1, OR
registered in an Environmental Studies/Science program

**Recommended Preparation:**

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY440H1 - Abnormal Psychology Seminar**

**Hours:** 24S

Examination in depth of a limited topic within abnormal psychology. Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

**Prerequisite:**
PSY202H1/ECO220Y1/SOC252H1/STA221H1/PSY202H5/STA221H5/PSYC08H3/STAB27H3/STAC32H3, and
PSY230H1/PSY230H5/PSYB30H3 or
PSY240H1/PSY240H5/PSYB32H3

**Exclusion:** PSY440H5/PSYD33H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY450H1 - History of Psychology**

**Hours:** 36L

This lecture course discusses the philosophical predecessors and early development of modern psychology, schools of thought, and shifts in areas of theory and research, as well as history and philosophy of science, in general.

**Prerequisite:** 1.0 PSY credit at the 200-level

**Exclusion:** PSYC85H3

**Distribution Requirements:** Science

**Breadth Requirements:** Society and its Institutions (3)

**PSY460H1 - Seminar in Learning**

**Hours:** 24S

Examination in depth of a limited topic in human or animal learning. Content in any given year depends on instructor.
Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

**Prerequisite:** PSY202H1/ECO220Y1/SOC252H1/STA221H1/PSY202H5/STA221H5/PSYC08H3/STAB27H3/STAC32H3, and PSY260H1/PSYB38H3

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

**PSY470H1 - Seminar in Human Memory**

**Hours:** 24S

Examination in depth of a limited topic within the area of memory. Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

**Prerequisite:** PSY202H1/ECO220Y1/SOC252H1/STA221H1/PSY202H5/STA221H5/PSYC08H3/STAB27H3/STAC32H3, and PSY270H1/PSY270H5/PSYB57H3/COG250Y1

**Exclusion:** PSYD50H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**JLP471H1 - Advanced Psycholinguistics**

**Hours:** 24S

Seminar in advanced topics in psycholinguistics. Content varies from year to year. (Sponsored by the Departments of Linguistics and Psychology, but administered solely by the Dept. of Linguistics).

**Prerequisite:** JLP374H1

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY471H1 - Seminar in Cognition**

**Hours:** 24S

An in-depth examination of current research and selected topics in cognitive psychology. Content in any given year depends on the instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists. There may be additional prerequisites based on the seminar topic given.

**Prerequisite:** PSY202H1/ECO220Y1/SOC252H1/STA221H1/PSY202H5/STA221H5/PSYC08H3/STAB27H3/STAC32H3, and PSY270H1/PSY270H5/PSYB57H3/COG250Y1

**Exclusion:** PSY471H5/PSYD50H3

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY473H1 - Social Cognitive Neuroscience**

**Hours:** 36L

Social cognitive neuroscience is an emerging interdisciplinary field that seeks to integrate theories of social psychology and cognitive neuroscience to understand behaviour at three fundamentally interrelated levels of analysis (social, cognitive, and neural). Topics such as self-regulation, cooperation, decision-making, emotion, morality, and prejudice will be examined in this lecture course.

**Exclusion:** PSY353H5/PSYD17H3

**Recommended Preparation:** PSY220H1/PSY220H5/PSYB10H3/SOC213H1, PSY326H1

**Distribution Requirements:** Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**PSY474H1 - Computation in Psychology**

**Hours:** 36L

This lecture course surveys computational perspectives on the mind and brain and introduces computational tools for connecting psychological and neural data to theory. Topics may include neural networks, probabilistic models, pattern recognition, and other techniques applicable to psychological research and general analysis. Basic familiarity with programming is recommended but not required.

**Prerequisite:** PSY202H1/ECO220Y1/SOC252H1/STA221H1/PSY202H5/STA221H5/PSYC08H3/STAB27H3/STAC32H3

**Distribution Requirements:** Science
Breadth Requirements: The Physical and Mathematical Universes (5)

PSY475H1 - Attention and Performance

Hours: 36L

This lecture course discusses a range of topics in visual cognition and human performance. Topics covered may include attention, working memory, spatial cognition, the processing of features and objects, and cognitive motor control in eye and limb movements.

Prerequisite:

Exclusion: PSYC52H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

PSY480H1 - Seminar in Perception

Hours: 24S

An in-depth examination of current issues in perception (e.g. perceptual organization, object and face recognition, motion perception). Emphasis is on the psychological perspective, but integrates physiological and computational perspectives as well. Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

Prerequisite:

Exclusion: PSY490H5/PSYD66H3

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

PSY492H1 - Neurobiology of Learning and Memory

Hours: 36L

Understanding the complexities of how the mammalian nervous system acquires and stores information and how it transforms this information into appropriate behavior is fundamentally important to our understanding of both animal and human behavior. This lecture course explores empirical and theoretical contributions to our understanding of the neural basis of learning and memory.

Prerequisite:
PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA221H1/STA238H1/STAC32H3, and PSY260H1/PSB38H3 or PSY290H1/PSY290H5/PSYB64H3/HMB200H1/PSL300H1

Exclusion: PSY492H5/PSYD66H3

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

PSY493H1 - Cognitive Neuroscience

Hours: 36L

This is a capstone lecture course surveying research on how the mind arises from the brain. The first objective of the course is to understand how processes in human brains (ranging from the firing of a single neuron to the dynamics of billions) support cognitive abilities (such as recognizing a face, remembering a birthday from childhood, understanding the words in a spoken lecture, or planning a route home from class). The second objective of the course is to understand the methods of contemporary cognitive neuroscience research, to enable students to read primary literature and to understand ongoing debates.

PSY490H1 - Seminar in Behavioural Neuroscience

Hours: 24S

An in-depth examination of current issues in behavioural neuroscience (e.g. activity of neurons, sensory, motor, motivational, and higher cortical systems.). Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

Prerequisite:
PSY201H1/ECO220Y1/SOC252H1/PSY221H1/PSY290H1/PSY290H5/PSYB57H3/PSYB51H3/COG250Y1 or PSY280H1/PSY280H5/PSYB51H3

Exclusion: PSY490H5/PSYD66H3

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)
**Prerequisite:**

**Exclusion:** PSYB55H3

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**PSY494H1 - Physiology and Psychology of Emotion**

**Hours:** 36L

This lecture course discusses the role of brain and body in the expression and experience of emotion in humans considered through the experimental, physiological, theoretical, and clinical literatures.

**Prerequisite:**

**Exclusion:** PSYC18H3

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**PSY495H1 - Sex and the Brain**

**Hours:** 36L

This lecture course explores the scientific literature underlying the concept that female/male, gay/straight, and transgendered behaviours are based on brain differences. Original scientific papers will be read in close detail for design and interpretation of the experiments. The goal is to gain an understanding of the science and psychology underlying sex/gender, popular conceptions of sex, and the sexual brain. Topics include: the making of sex, hormone action, brain-based sexual behaviours, sex and cognition, and sex and sexuality/gender identification.

**Prerequisite:**

---

**PSY496H1 - Cognitive Dysfunction in Neurological Disorders**

**Hours:** 36L

This lecture course provides an in-depth examination of the cognitive dysfunction found in neurological disorders, including Alzheimer's Disease, Parkinson's Disease, and Schizophrenia. The course focuses on how cognitive impairments relate to neuropsychological models of the specific disease (specifically how these models provide insights into the biological mechanisms underlying the cognitive symptoms) and cognition, more broadly.

**Prerequisite:**

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

---

**PSY497H1 - Seminar in Biological Timing**

**Hours:** 24S

This is an advanced seminar course that examines the mechanisms and significance of timing and timekeeping at several levels of organization in living organisms. Topics include the roles of clocks and oscillations in physiology and behaviour, and the importance of timing in sensorimotor integration, memory, decision making, and health. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

**Prerequisite:**

**Recommended Preparation:** PSY397H1

**Distribution Requirements:** Science

**Breadth Requirements:** Living Things and Their Environment (4)

Public Health Sciences Courses

PHS100H1 - Discovering Global Health

Hours: 24L/24T

This course introduces students to basic public health-related concepts, significant aspects of the historical development of global health, and a selection of topics illustrating the broad and evolving nature of this field. In addition, it helps students explore the contributions that various disciplines/fields offer to global health.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

HST211H1 - Health Policy in Canada

Previous Course Number: UNI211H1
Hours: 24L

This course introduces students to health policy in Canada, with a particular focus on the social determinants of health, and on how to improve health through policy advocacy. Examines the policy making process in the Canadian context, and the development of health policy in Canada. Explores current debates about health issues.

Exclusion: UNI211H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

PHS300H1 - HIV Prevention Research

Hours: 24L

This course examines HIV prevention research across the full spectrum of sciences concerned with prevention of HIV and sexual health, including basic science, clinical science, epidemiology, behavioural science, social science, and legal, policy, economic analysis, and cultural theory. Examples are borrowed from efforts across the globe.

Offered by the Dalla Lana School of Public Health

Introduction

Public health is the science and art of preventing disease and promoting health through organized population-based efforts. The focus of public health is to prevent rather than treat disease and to positively affect determinants of health through a wide range of strategies, including the surveillance and assessment of population health and the promotion of healthy behaviours, healthy environments and healthy public policies. In addition to these activities, the identification and treatment of those with disease may be vital to preventing it in others, such as during an outbreak of an infectious disease. Hand washing, vaccination programs, the inspection of restaurants, laws banning smoking in public places and tax credits for childhood physical activity programs are examples of public health measures. Public health includes sub-disciplines such as epidemiology, biostatistics, occupational and environmental health, public health policy, and social and behavioural health sciences.

Associate Dean, Academic Affairs: Professor Dionne Gesink, adaa.dlsph@utoronto.ca

Enquires: Visit www.dlsph.utoronto.ca or email: grad.dlsph@utoronto.ca
The course highlights prevention research related to key populations at risk of HIV infection and transmission. The course focuses on challenges and issues, with the goal of stimulating critical thinking and engagement with topics. Some material will be presented by Guest Lecturers who are experts in the areas, allowing students to learn from and interact with these experts and to hear about their current research as well as their career paths.

It is expected that at the end of this course students will have an advanced appreciation of the history and future and underlying values and ethics of effective HIV prevention research, including future possibilities and challenges. One ancillary aim is to encourage students to compare and contrast HIV Prevention with prevention research in adjacent areas (e.g., HCV, HPV).

**Recommended Preparation:** STA220H1 or equivalent

**Distribution Requirements:** Science, Social Science

**Breadth Requirements:** Society and its Institutions (3)

**HMB342H1 - Epidemiology of Health & Disease**

**Hours:** 24L/12T

This course engages students in the fundamental science of epidemiology applied to health and disease. After an introduction to various measures of health and disease, the scientific methods used to investigate, analyze, prevent and control health problems will be illustrated using social, biomedical and public health examples.

**Prerequisite:** 9.0 credits complete, (BIO120H1, BIO130H1)/HST209H1

**Exclusion:** HST373H1

**Recommended Preparation:** STA220H1/ STA288H1/ EEB225H1/ PSY201H1

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**HST405H1 - Global Migration and Health**

**Previous Course Number:** HST307H1

**Hours:** 24L

Over the past decades, economic globalization, widening socio-economic inequities, conflict, natural disasters, environmental degradation, and, more recently, climate change have combined to become increasingly significant forces shaping global migration fluxes. This course analyzes the impact of migration on the health of those who move and of individuals, communities and entire societies in countries of origin, transit, arrival, and resettlement. It adopts an interdisciplinary approach, incorporating scholarly work from the fields of public health, the social sciences, law, and human rights.

**Prerequisite:** HST209H1

**Exclusion:** HST307H1 (Special Topics in Health Studies I: Globalization, Migration and Health), offered in Winter 2017, Winter 2018, and Winter 2019

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**HST410H1 - Case Studies in Health Policy**

**Previous Course Number:** UNI408H1

**Hours:** 36S

Analyses the formation and implementation of health policy through the use of case studies. Each case deals with a substantive health policy issue. Using case studies, students will learn to understand and analyze the processes by which public policies are formed, and perform comparisons of policy alternatives.

**Prerequisite:** HST211H1

**Exclusion:** UNI408H1, HST408H1

**Recommended Preparation:** HST310H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**GGR433H1 - Built Environment and Health**

**Hours:** 36S

Linking across fields that include public health, geography and planning, this course examines the growing evidence and ways in which human health is affected by the design and development of the built environment in which we live, work and play. The course considers how various planning and development decisions impact population and individual health, particularly in relation to chronic diseases, injuries, and mental health. Potential field trip, transportation cost: $20.

**Prerequisite:** 10.0 credits

**Exclusion:** GGR400H1 (Special Topics in Geography I: Built Environments & Health), offered in Winter 2013

**Recommended Preparation:** 1.0 credit in Geography (SOC SCI/BR=3)

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)
GGR434H1 - Building Community Resilience

Hours: 36S

Examines concepts of resilience as a way of building the capacity of communities to (a) respond to predicted disruptions/shocks associated with climate change, global pandemics, anticipated disruptions in global food supply, energy insecurity, and environmental degradation; and (b) nurture the development of alternative spaces that support the emergence of more life-sustaining structures and practices. Includes explicit attention to equity and public health, and explores issues such as: participatory governance of social-ecological systems, the nature of social change, complexity science, the role of social movements, indigenous and political ecology perspectives.

Prerequisite: 10.0 credits
Exclusion: GGR400H1 (2011-12)
Recommended Preparation: 1.0 credit in Geography
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Public Policy

Introduction

Solving real-world policy challenges requires the use of multi-disciplinary tools to analyze problems, determine the best means to deal with those problems, and decide on the best course of action. An undergraduate Major in Public Policy provides a unique opportunity for students in Social Science disciplines to think in an interdisciplinary way, by drawing on theories and approaches, as well as tool kits developed in the core disciplines of Economics and Political Science, and beyond. Students in this program develop theoretical and applied reasoning skills in policy analysis, as well as a solid grounding in quantitative methods and research.

Regarding Public Policy Programs

The Major program in Public Policy is offered jointly by the Munk School of Global Affairs and Public Policy, the Department of Economics, and the Department of Political Science. Students may enroll after their first- or second-year of undergraduate studies, and must meet the prerequisite conditions for all second-year and higher courses.

The Program Director and Program Assistant are available for consultation. For enquiries or an appointment call the Undergraduate Administrator, Petra Jory at 416-978-5402 or send an e-mail to pjory@utoronto.ca.

Public Policy Programs

Major in Public Policy (Arts Program) - ASMAJ2660

The Major in Public Policy is offered jointly by the Munk School of Global Affairs & Public Policy, the Department of Economics, and the Department of Political Science. Students enroll after the first year, and must meet the prerequisite conditions for all second-year and higher courses.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade/minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- ECO101H1 & ECO102H1 (with an average final mark of at least 67%) or ECO105Y1 (with a final mark of at least 80%), and

One of the following four options (1.0 credit):

- POL101Y1, or 1.0 credit from POL101H1, POL106H1, POL107H1 or POL109H1, with a grade of 67% in each course
- 1.0 credit from Munk One courses (MUN105Y1, MUN101H1, MUN102H1), with a grade of 75% in each course
- 1.0 credit from Trinity One Public Policy courses (TRN160Y1 or TRN161Y1) with a grade of 75%
- 1.0 credit from Vic One Pearson policy stream courses (VIC181Y1, VIC183Y1, VIC184H1 or VIC185H1) with a grade of 75% in each course

To ensure that students admitted to the program will be prepared, applicants with a final grade lower than the minimum grades stated above will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Notes:

- Students entering from Munk One/Trinity One/Vic One course options will be ineligible to take upper year POL courses until they have completed POL214Y1 or (POL218H1, POL219H1)
- Students expecting to choose ECO courses in their second year or higher must complete MAT133Y1 or the combination of MAT135H1 and MAT136H1 in their first year, to meet required prerequisites for ECO courses. If MAT133Y1 or (MAT135H1, MAT136H1) is not taken, students will not be eligible to enrol in 200+-level ECO courses, and must take PPG200H1 to fulfill program requirements in lieu of ECO200Y1/ECO204Y1/ECO206Y1.

Completion Requirements:

(7.5 credits)

First Year:

1. One of the following four options (1.0 credit):
   - POL101Y1, or 1.0 credit from POL101H1, POL106H1, POL107H1 or POL109H1, with a grade of 67% in each course
The objectives are: (1) To provide students with a foundation in microeconomic analysis and; (2) To predict the effects of and evaluate public policies.

Students will be equipped to understand the main issues on a range of policy topics such as taxation, social insurance, welfare and income support programs.

**Prerequisite:**  
ECO100Y1 /  ECO101H1 &  ECO102H1 /  ECO105Y1  

**Exclusion:**  
ECO200Y1,  ECO204Y1,  ECO206Y1  

**Recommended Preparation:**  
POL101Y1  

**Breadth Requirements:**  
Society and its Institutions (3)
PPG301H1 - Introduction to Public Policy

Hours: 24L

The course introduces students to the study of public policy, the policy process and our policy institutions in Canada. The course examines how issues emerge, how important ideas are framed, priorities are established, and agendas are set and managed. It explores how institutions – formal and informal rules which enable and constrain actors – shape policy-making in Canada.

Prerequisite: 
(ECO200Y1/ECO204Y1/ECO206Y1/PPG200H1), (ECO220Y1/POL242Y1/SOC202H1/STA220H1/STA221H1/STA248H1/STA255H1/STA261H1), POL214Y1

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

PPG401H1 - The Role of Government

Hours: 24L

This course explores the government’s role in promoting efficiency and equity in both the financing and delivery of public policy goals. It explores the conditions when government involvement is important, the policy levers available to government in promoting social policy, market failures, and conditions for efficiency. It examines the role of government in many of the major areas of social policy such as health care, education, redistribution, the environment, financial regulations and other important issues.

Corequisite: PPG301H1
Recommended Preparation: 
ECO200Y1/ECO204Y1/ECO206Y1/PPG200H1

The Study of Religion

As an intellectual inquiry into a key dimension of human experience, the study of religion enables students to grasp a crucially important aspect of the cultures of the world and the interactions among them. We look at the development of religious beliefs, practices, and doctrines as they intersect with the history of peoples, societies, and cultures right up to the contemporary world. The study of religion also prepares students for a wide range of careers, such as social work, law, politics from the local to the international level, teaching, medicine, or leadership in religious organizations. Combined with appropriate language preparation, it can also open out into graduate work leading to the M.A. and Ph.D. in the growing number of universities offering advanced graduate degrees in the field, and in our University's own Graduate programs.

Historically, the academic study of religion has taken a variety of forms, each with its own rationale. The Department identifies itself with a model in which the major religious traditions (e.g., Buddhism, Christianity, Hinduism, Islam, Judaism) are studied within an explicitly comparative frame. We employ and encourage a variety of approaches (e.g., historical, textual, linguistic, social scientific) without sacrificing specialized skills and training. The diversity that characterizes this model is reflected in the variety of courses offered or cross-listed by the Department, and by the wide range of training and expertise of our faculty.

Information about programs, courses, including a number of cross-listed courses offered by Colleges or departments such as East Asian Studies, History, Near and Middle Eastern Civilizations, Philosophy, and Sociology can be found on the Department's website. Students aiming to complete any RLG program should consult the

3. 2.0 additional RLG credits

Notes:

• No cross-listed courses may be counted. JAR, JNR, JPR and JSR courses will be counted as Religion courses.
• Pali, Sanskrit, Tibetan and Modern Hebrew courses will not count towards the program.

Regarding Courses in Religion

200-Level Courses
No 200-level course has a 100-level RLG course prerequisite or co-requisite.

300-Level Courses
All 300-level courses normally presuppose that a student has already completed, by the first day of the course, at least 4.0 credits (or their equivalent). Only specific Prerequisites or recommended preparations are listed below. Students who do not meet the Prerequisites, but believe they have adequate academic preparation, should
consult the Undergraduate Administrator regarding entry to the course.

400-Level Courses

400-level courses are intended primarily but not exclusively for Specialists and Majors who have already completed several RLG courses. Almost all 400-level courses are E indicator courses and require the instructor's permission. Students must enrol at the Department.

Independent Research Courses

Student-initiated intensive research courses supervised by faculty members of the Department. The student must obtain both a Supervisor's agreement and the Department's approval in order to register. The maximum number of Independent Research courses one may take is 2.0 credits. Deadline for submitting applications to Department, including Supervisor's approval, is the first week of classes of the session. A full-course may be compressed into a single session or spread through two sessions; a half-course may similarly be done in either one session or across two sessions. These courses are open to majors and specialists only.

Religion Courses

RLG100H1 - World Religions

Hours: 24L/12T

An introduction to the history, philosophy, and practice of the major religions of the world, including Judaism, Christianity, Islam, Hinduism, Buddhism, Confucianism and Taoism.

Exclusion: RLG100Y1, RLG280Y1, RLG101H5, RLG101H1. Note: RLG100H3 and RLG280H3 taken together are equivalent to RLG100Y1. Note: RLG101H5 is not equivalent to RLG100H1.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

RLG101H1 - Reason and Religion in the Modern Age

Hours: 24L

An introduction to critical thinking about religion as it took shape in modern European thought. We examine major thinkers such as Baruch Spinoza, David Hume, Immanuel Kant, Friedrich Nietzsche, Hannah Arendt, and others. Issues covered include freedom of thought, the relationship between religion and politics, belief and truth, rational ethics in relation to religious ethics. We explore how issues addressed by these classical authors remain relevant in today's world.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG102H1 - Blood, Sex and Drugs

Hours: 24L/12T

Religion can be understood as a set of aspirations that manages and moralizes the most intimate matters of social life, including sexual intercourse, bodily fluids, and mind altering substances. This course engages fundamental theories of religion to consider an eclectic set of case studies that troubles a clean divide between purity and danger.

Exclusion: RLG101H1 (Introducing Religion: Blood, Sex and Drugs), offered in Winter 2019 and Winter 2020

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG103H1 - Sports and/as Religion

Hours: 24L/12T

A first-year course looking at the historical and contemporary relationship between religion and sport. We start with the Ancient Greek Olympics (a funeral ritual) and end with the ever-hopeful gathering of Toronto Maple Leafs fans, Leaf Nation. In between, we look at examples of those sports around the world, in which religion plays a significant role or where sports serves as a religion-like pastime.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG104H1 - Conspiracies, Social Media, and the Rise of New Religious Movements

Hours: 24L/12T

Conspiracy theories are nothing new, but in the past few years we have all witnessed the meteoric rise of conspiracies such as QAnon via social media, which have taken on the elements of New Religious Movements. This course examines recent examples of new religious
movements that might be thought of as “conspiritualities,” that is, conspiracies with strong cult and religious overtones.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG106H1 - Happiness

Hours: 24L

Are you happy? Today happiness is a metric by which a growing number of people assess the quality of their lives, with a range of experts offering innumerable life hacks and opportunities to optimize life. But what does it mean to be happy? And how have people tried to achieve this ever-elusive state? Situated squarely within the study of religion, this course considers how different traditions from around the world and for thousands of years have raised similar questions about happiness—not simply for the sake of reflection but also to do something about it. And their answers have varied: fast, meditate, pray, go to the desert, come together, get high, suffer, renounce God, and/or make lots of money. Readings will include selections from social theory and religious texts as well as a few authors who seem to be (against all odds) kind of happy.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG107H1 - "It's the End of the World as We Know It"

Hours: 24L/12T

Throughout history, many religious movements have envisioned the end of the world. This course will explore the ways in which different religious movements have prepared for and expected an end time, from fears, symbols, and rituals to failed prophecies and social violence. By examining traditions such as Jewish and Christian apocalyptic texts through to fears of nuclear apocalypse and zombies, the course seeks to understand the ways in which ancient and modern claims of "the end" reflect the aspirations, anxieties, and religious concerns of communities.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

MHB155H1 - Elementary Modern Hebrew I

Hours: 36L/12T

Introduction to the fundamentals of Hebrew grammar and syntax. Emphasis on the development of oral and writing skills.

Exclusion: Grade 4 Hebrew (or Grade 2 in Israel)/NML155H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MHB156H1 - Elementary Modern Hebrew II

Hours: 36L/12T

Continued introduction to the fundamentals of Hebrew grammar and syntax. Emphasis on the development of oral and writing skills.

Prerequisite: MHB155H1/ NML155H1 or permission of instructor
Exclusion: Grade 4 Hebrew (or Grade 2 in Israel)/NML156H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG194H1 - Great Confrontations in Ancient Israel

Hours: 24L

Great Confrontations in Ancient Israel deals with ten episodes recorded in the Hebrew Bible or "Old Testament" in which two parties confronted each other over a great moral issue. The ten confrontations are: (1) God and Humans; (2) Adam and Eve; (3) Cain and Abel; (4) Abraham and God; (5) Jacob and Esau; (6) Joseph and Mrs. Potiphar; (7) Moses and Pharaoh; (8) Moses and Israel; (9) David and Nathan; (10) Elijah and Ahab. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
RLG195H1 - Alt-Bible: What Could Have Been

Hours: 24S

Why does our contemporary Bible not include any daughters for Adam and Eve or any stories of Jesus as a young boy? What if Enoch was more prominent than Moses or Thomas more prominent than Paul? "The Bible" that we have is not a single book or a simple collection, but something that has grown over time, been the object of contention and argument, and has sometimes been a common ground across traditions. We examine side-by-side writings that have become canonical and writings that once held authority but have not found widespread canonical status, and strive to understand the processes by which we ended up with "the Bible" we have today. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG196H1 - Innocence and Ecstasy

Hours: 24S

Religion can be understood as a set of aspirations that manages and moralizes the most intimate matters of social life, including sexual intercourse, bodily fluids, and mind-altering substances. This course engages fundamental theories of religion to consider an eclectic set of case studies that troubles a clean divide between purity and danger. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG197H1 - Enchantment, Disenchantment, Re-Enchantment

Hours: 24L

Modernity is associated with disenchantment, secularisation and progress, and has traditionally been understood as the successor to the enchanted, spiritual, and transcendent worldviews of antiquity and the middle ages. Re-enchantment, a term increasingly encountered in popular and academic contexts alike, demonstrates nostalgia for an enchanted past, a discomfort with the modern narrative, and a desire to recover wonder. This course will examine the history of enchantment through a series of readings taken from literature, philosophy, theology, ranging from Plato to contemporary magical realism. Restricted to first-year students. Not available for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG198H1 - Dystopia: Religion & Gender in Science Fiction

Hours: 24L

This course will examine the "what ifs" and imagined worlds of ideal utopias and oppressive dystopias through the lens of religion and gender in Margaret Atwood's The Handmaid's Tale and Charlotte Perkins Gilman's Herland. Because science fiction and utopian/dystopian literature expresses what an author sees as possible or hopes is possible, but also fears is possible, we will consider science fiction as a political and social critique. Themes to be covered include fundamentalism, totalitarianism, the relationship between technology and religion, religion and reproductive rights, and the potential relationship between religion, gender and oppression. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG199H1 - Religion for Grown-Ups?

Hours: 24L

Kant, the great modern philosopher, famously describes enlightenment as our release from self-incurred immaturity or minority. That is, according to Kant, we don’t want to grow up. Our immaturity is facilitated especially by religion, whose demands for deference to the authority of texts, traditions, and gods often prevent us from taking full responsibility for our thoughts and actions. But need religion play this role? Is there a religion for grown-ups? This course explores those questions by reading autobiographical accounts of philosophers who describe how their study of philosophy either strengthened or strangled their youthful religious convictions. Restricted to first-year students. Not eligible for CR/NCR option.
RLG200H1 - The Study of Religion

Previous Course Number: RLG200Y1
Hours: 24L/12T

An introduction to the discipline of the study of religion. This course surveys methods in the study of religion and the history of the discipline in order to prepare students to be majors or specialists in the study of religion.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG201H1 - Indigenous Spiritualities and Religions

Hours: 24L/12T

This course examines how Indigenous communities saw the world before contact—primarily exploring early creation narratives and ways of engaging with the natural world through ceremonials of reciprocity and acknowledgements. It engages with how early colonial societies and Western-based religions evaluated and understood Indigenous spiritualities and practices. We consider Indigenous critiques of Western religion as it has actually been practiced as opposed to what has been taught as constituting the ideals of civilization. Finally, we analyze how Indigenous communities and culture begin to create “New Religions” that blend Indigenous values and thinking with aspects of Western culture or emerge in direct response to re-imagining spirituality in attempts to prove humanness and civility in contexts where little of Indigenous culture and values has been seen as acceptable.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG202H1 - Judaism

Hours: 24L/12T

An introduction to the religious tradition of the Jews, from its ancient roots to its modern crises. Focus on great ideas, thinkers, books, movements, sects, and events in the historical development of Judaism through its four main periods - biblical, rabbinic, medieval, and modern.

Exclusion: RLG202H5, RLG202Y1
Recommended Preparation: RLG100Y1/RLG200H1/RLG280Y1
Distribution Requirements: Humanities

RLG203H1 - Christianity

Hours: 24L/12T

This course equips students to understand how and why Christianity has come to exert such influence on the world around us. We will trace the history of Christianity from the early Jesus movement to its emergence as the official religion of the Roman Empire, and through its medieval forms and colonial expansion into one of the world’s largest religions. This introductory course centres on themes such as political authority, Christian mysticism and the arts, debates about sexuality, and visions of justice and redemption. No familiarity with the Bible, Christianity, or the academic study of religion is presupposed.

Exclusion: RLG203H5, RLG203Y1
Recommended Preparation: RLG100H1/RLG200H1/RLG280Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG204H1 - Islam

Hours: 24L/24T

The faith and practice of Islam: historical emergence, doctrinal development, and interaction with various world cultures.

Exclusion: RLG204H5, RLG204Y1
Recommended Preparation: RLG200H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG205H1 - Hinduism

Hours: 24L/24T

A historical and thematic introduction to the Hindu religious tradition as embedded in the socio-cultural structures of India.

Exclusion: RLG205H5, RLG205Y1
Recommended Preparation: RLG100Y1/RLG200H1/RLG280Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
RLG206H1 - Buddhism

Hours: 24L/24T

The development, spread, and diversification of Buddhist traditions from southern to northeastern Asia, as well as to the West.

Exclusion: RLG206H5, RLG206Y1

RLG212H1 - Anthropology, Religion and Culture

Previous Course Number: RLG212Y1
Hours: 24L/24T

Is religion a matter of belief or a matter of practice? Do all religions share common features? Is one born into religion, or does one learn to be religious? This course is designed to introduce students to some of the ways in which anthropologists have studied and thought about religion. The emphasis is not on memorizing things people believe and do in different societies but on understanding how anthropologists have tried to explain religious phenomena. The themes covered in the course include: magic and religion; the (ir)rationality of belief; the body as a site of knowledge; ritual; ethical self-cultivation; and religion's role in the secular age.

Exclusion: RLG212Y1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG213H1 - Embarrassment of Scriptures

Hours: 24L/12T

Surveys interpretative traditions related to sacred texts, focusing on reading strategies that range from the literal to the figurative with attention to rationales that transform literal textual meanings and copyists manipulations of texts. May focus on various religious traditions from year to year, targeting a single canonical tradition or comparative analysis. Students will gain insight into literalist, environmentalist, secularist and erotic approaches to texts. Prior exposure to the study of religion is not required; all readings will be in English.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG214H1 - Mythologies and Religion

Hours: 24L

Myths and legends are narrative means for humans to make sense of their environment, the organization of their societies, and their social practices. This course
introduces the principal myths and mythological figures of a selection of mythic systems (Near Eastern, Celtic, Nordic, Slavic and Indigenous North American) as way of modelling the world. Such topics as creation, chaos and order, love and death, coming of age, the monstrous, and explanations of evil and misfortune, and the survival and the transformation of mythic and folkloric elements.

**RLG230H1 - Religion, Law and Society**

**Hours:** 24L/12T

The course examines various issues, including: Canadian society and secularization; religious pluralism and legal pluralism; the role of religions in public contexts; land and property; marriage and women's rights; and the place of minority religious communities.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**RLG232H1 - Religion and Film**

**Previous Course Number:** RLG390H1  
**Hours:** 24L

The role of film as a mediator of thought and experience concerning religious worldviews. The ways in which movies relate to humanity's quest to understand itself and its place in the universe are considered in this regard, along with the challenge which modernity presents to this task. Of central concern is the capacity of film to address religious issues through visual symbolic forms.

**Prerequisite:** 4.0 credits

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**RLG233H1 - Religion and Popular Culture**

**Hours:** 36L

A course on the interactions, both positive and negative, between religion and popular culture. We look at different media (television, advertising, print) as they represent and engage with different religious traditions, identities, and controversies.

**RLG234H1 - Religion, Gender, and Sexuality**

**Hours:** 24L

This course equips students to understand how norms and practices of gender and sexuality are deeply entangled with religious imaginations and traditions. We will examine how ritual, scriptural, and legal traditions enable and constrain embodied and political power. Readings will draw from feminist, womanist, queer, and other perspectives. With a combination of in-class discussions, critical reading exercises, and short essay assignments, students will strengthen their awareness of transnational intersections of religion, gender, and "religious-racial" formations. You will develop skills in analyzing the role of popular culture and legal and religious texts in shaping norms and experiences of gender and embodiment.

**Prerequisite:** Completion of 4.0 credits.  
**Exclusion:** RLG314H5  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**RLG235H1 - Material Religion**

**Previous Course Number:** RLG305H1  
**Hours:** 24L

Religions are more than beliefs or sacred texts. They are also formed through buildings, bodies, objects of devotion, images, websites. We examine how religion is embodied, circulated, built, played, displayed, and painted. We ask why religions are often constituted through feasting or fasting, excess or asceticism, abundance of objects or destruction of icons. Religious activity is explored through its connections with objects of wealth and consumption— not just great art, but items common within popular culture. The overall aim is to 'see' religion in a new way— and to understand the role of the senses in the formation of religious experience.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**RLG239H1 - Special Topics**

**Hours:** 24L
Some topic of central interest to students of religion, treated on a once-only basis. For details of this year's offering, consult the Department's current undergraduate handbook.

Breadth Requirements: Thought, Belief and Behaviour (2)

JAR301H1 - Plagues and Peoples: From Divine Intervention to Public Health

Hours: 24L/12T

Infectious diseases have afflicted human societies throughout the history of our species. How are diseases shaped by the societies in which they spread, and how do they change culture and politics in turn? This course introduces perspectives from medical anthropology and religious studies to analyze the intersection of cultural,
religious and scientific narratives when people confront plagues. We focus on historical and contemporary examples, such as the Spanish flu and COVID-19, giving students the tools to understand how cultural institutions, religious worldviews, and public health epidemiology shape living and dying during a pandemic.

**Prerequisite:** At least 4.0 credits  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**RLG302H1 - Dreams, Visions and the Invisible**

**Previous Course Number:** RLG249H1  
**Hours:** 24L

In many cultures, dreaming is understood to open pathways to unseen realities and worlds populated by spirit beings, souls of the dead, noetic powers and avenues to mystical union. Dreams include visions, daydreams, and dissociative, altered states of consciousness. This course examines contributions from a variety of disciplines such as psychoanalytic psychology, anthropology, biblical criticism, neuroscience, and paleo-archaeology to the study of religious experiences. Topics include how human beings negotiate the contents of their minds that result in social and political agreements that distinguish what is deemed as real, thereby constituting acceptable religious experience. The course will also discuss crisis apparitions, alien abduction accounts, spirit possession and existence of life after death as culturally specific religious narratives that seek to articulate and organize dreams and other visionary experiences.

**Prerequisite:** Completion of 4.0 credits  
**Exclusion:** RLG249H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**RLG303H1 - Evil and Suffering**

**Hours:** 24L

The existence of evil poses a problem to theistic beliefs and raises the question as to whether a belief in a deity is incompatible with the existence of evil and human (or other) suffering. This course examines the variety of ways in which religions have dealt with the existence of evil.

**Prerequisite:** Completion of 4.0 credits  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**RLG304H1 - Language, Symbols, Self**

**Hours:** 24L

Theories of the self that involve the constitutive role of language in its various forms. Problems of socially-conditioned worldviews and sense of self as related to discourse. Myth, symbol, metaphor, and literary arts as vehicles for personality development and self-transformation along religious lines.

JSR312H1 - Queer Religion and Religiosities

Hours: 24L

This course will introduce students to key terms, theories, and debates in Queer and Religious Studies and to the history of queer identities as they are expressed within various religious traditions, texts, and communities. It asks how dominant heteronormative discourses on gender and sexuality are adhered to, legitimized, negotiated, and contested within various religious traditions. The course will also allow students to interrogate how power and power relationships are shaped by sex, gender, sexuality, race, ethnicity, class, age, and ability in the world of religion.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
RLG313H1 - Love, Sex, Family

Previous Course Number: RLG237H1
Hours: 24L/12T

This course equips students to understand the religious roots of modern formations of gender, sexuality, and kinship, focusing in particular on Judaism, Christianity, and New Religious Movements. Topics we will cover include: the transformation of traditional religious structures into the modern "religion of romantic love," the reshaping of religious practices within the modern nuclear family and its gendered division of labour, the persistent religious entanglements within not only normative but also queer and transgressive gender performances and kinship structures, the political asymmetries within which different religious modernities emerge, and the role of literature in preserving religious enchantment in modernity.

RLG314H1 - Pilgrimage as Idea and Practice

Previous Course Number: RLG215H1
Hours: 24L

The study of pilgrimage has become increasingly prominent in anthropology and religious studies in recent decades. Why should this be? This course provides some answers while engaging in a cross cultural survey and analysis of pilgrimage practices. We also explore whether research into pilgrimage has wider theoretical significance.

Prerequisite: Completion of 4.0 credits
Exclusion: RLG215H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

RLG315H1 - Rites of Passage

Hours: 24L

We examine rituals of transition from one social status to another (such as childbirth, coming of age, marriage) from theoretical, historical and ethnographic perspectives. We pay particular attention to the importance of rites of passage in the construction of gendered identities.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

RLG316H1 - Martyrs, Mystics, and Saints

Hours: 24L/12T

An examination of the variety of ways in which religious traditions construct sanctity, articulate categories of exceptionalism, and how exceptional persons function within social systems. Consideration of gender and social status in definitions of sanctity. Focus varies from year to year, and may focus either on constructions of sanctity in one religious tradition, or comparatively, comparing and contrasting ideas of sainthood and martyrdom in Christianity, Judaism, Islam, Hinduism and/or Buddhism.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG317H1 - Religion, Violence, and Non-Violence

Hours: 24L

People acting in the name of religion(s) have incited violence and worked for peace. How can we understand this tension both today and in the past? Through examination of the power of authoritative tradition, collective solidarity, charisma, and acts of resistance, this course addresses religious justifications of violence and non-violence across varied historical and geographical contexts.

Prerequisite: Completion of 4.0 credits
Exclusion: RLG317H5
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG318H1 - Religion and Nature

Previous Course Number: RLG228H1
Hours: 24L

There is a complex relationship between nature, religion and the aesthetic expression of human spirituality. Religion and Nature will explore this relationship across a range of periods, from the antique to the contemporary. Our journeys, both philosophical and literary, will take participants through a range of biomes—desert, countryside, forest, mountains, tundra—and explore how these texts can help to redefine our place both in nature and as part of it.
RLG319H1 - Death, Dying and Afterlife

**Previous Course Number:** RLG229H1  
**Hours:** 24L

This course introduces students to various religious approaches to death, the dead, and afterlife. Through considering different ways in which death has been thought about and dealt with, we will also explore different understandings of life and answers to what it means to be human.

**Prerequisite:** Completion of 4.0 credits  
**Exclusion:** RLG229H1

RLG322H1 - Early Gospels

**Hours:** 24L

Careful examination of the earliest "lives of Jesus" ('gospels') shows that they offer very different portraits of Jesus of Nazareth. The course will compare ancient biographical accounts of famous ancient figures such as Alexander the Great, the Caesars, and wandering philosophers with early depictions of Jesus, both the gospels that eventually were included in the New Testament, and extra-canonical or "apocryphal" gospels such as the Gospels of Thomas, Peter, or Mary.

**Prerequisite:** Completion of 4.0 credits  
**Recommended Preparation:** RLG241H1/RLG241Y1

---

RLG323H1 - Jesus of Nazareth

**Hours:** 24L

To what extent does Jesus who lived and taught in first-century Galilee and Judea align with the picture of Jesus in early Christian writings? We examine the methods for discerning the historical Jesus and the portraits that result from rigorous application of those methods.

**Prerequisite:** Completion of 4.0 credits  
**Exclusion:** RLG323H5

**Recommended Preparation:** RLG241H1/RLG241Y1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

RLG325H1 - The Uses and Abuses of the Bible

**Hours:** 24L

From politics to popular culture, the Bible has shaped people and nations for good and for ill. This course introduces the Jewish and Christian Bibles and considers case studies of how biblical texts have been interpreted. The Bible has been used to bolster slavery and white supremacy and to inspire political liberation movements. It has been used to justify annihilation of Indigenous people by Christian colonists yet given hope to Jews that next year in Jerusalem might be better. How can the same "book" be used for such different purposes? This course focuses on the cultural and political consequences of
biblical interpretation. An underlying premise is that the Bible is not static but is rather a nomadic text as it is continuously interpreted in ways that sometimes contribute to human flourishing, but also can result in violence, human diminishment, or death.

**Prerequisite:** Completion of 4.0 credits  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

### RLG326H1 - Roots of Christianity and Judaism

**Hours:** 24L  

Judaism and Christianity are both considered “religions of the book” but how are they related to each other? This course considers the origins of that relationship by reading a range of Jewish texts from the 6th century BCE to the 1st century CE, including the Dead Sea Scrolls, in order to illuminate the diverse cultural matrix from which early Christianity and Judaism took shape. A major theme of the course is the formation of scriptures and scriptural interpretation as a factor in shaping distinctive Jewish cultures. Attention is also given to “lived religion” and practices that form individuals and communities.

**Prerequisite:** Completion of 4.0 credits  
**Exclusion:** RLG326H5  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

### RLG328H1 - The Politics of Belief in Early Christianity

**Hours:** 24L  

This course examines historical processes, negotiations, and strategies involved in the consolidation of discourses and practices of orthodoxy and heresy in Christianity from the second through fifth centuries. Topics include: intellectual, therapeutic, and social models of orthodoxy; methods of discipline; historical events and contexts; the political and social contexts of theological conflict; and the gendered production of the orthodox subject.

**Prerequisite:** Completion of 4.0 credits  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

### RLG329H1 - New Atheism and the Study of Religion

**Hours:** 24L  

A course to look at the rise of a “new atheism” in the late 20th- and early 21st-century. This popular movement has gained traction in late modernity, renewing older arguments about the negative consequences of religion in public life. We shall examine this movement, tracking its rise, fall, and future, as we ponder the implications of New Atheism for the academic study of religion.

**Prerequisite:** 4.0 credits  
**Recommended Preparation:** RLG200H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

### RLG330H1 - Visions and Revelation in Ancient Judaism and Christianity

**Hours:** 24L  

What did ancient Jews and Christians see and know when they “saw” God or heavenly realms? Or when they toured hell or the infernal regions? This course examines the ancient imagination by treating the major elements of the apocalyptic literary corpus and accompanying visionary experiences in ancient Judaism and Christianity. Contemporary theories on the function and origin of apocalyptic literature inform our readings.

**Prerequisite:** Completion of 4.0 credits  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### RLG331H1 - Creation Narratives and Epistemologies

**Hours:** 24S  

The course will examine the importance of Indigenous cultural knowledge and values as presented in various Indigenous Creation Narratives. Creation Narratives or Cosmological narratives have long been studied as mere mythology. Yet, it is in these very narratives that complex, layered, and nuanced epistemologies emerge. Often, these narratives not only lay the epistemological frameworks of cultural value systems, but they also contain what many refer to as original instructions and purpose for the “Original People”.

**Prerequisite:** 4.0 credits  
**Distribution Requirements:** Creative and Cultural Representations (1)
RLG334H1 - Religion, Space and Diaspora

Hours: 24L

This course explores the transformation of religion, space and practices in diasporic settings. How is space adapted to the sensibilities of diasporic subjects, and how are the ritual practices that take place in those spaces transformed? The course examines historical and contemporary examples of the impact of diasporas, exile, and immigration on spatial practices in synagogues, churches, mosques, and temples, and ritual transformations in diaspora.

Prerequisite: Completion of 4.0 credits
Recommended Preparation: RLG100Y1, RLG200H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

RLG336H1 - Religion and its Monsters

Hours: 24L

A course looking at the theories about and responses to the monstrous in global religious traditions and practices.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG337H1 - Witchcraft and Magic in Christian Tradition

Hours: 24L/12T

This course considers the history and theory of Western witchcraft, magic, and heresy in the mediaeval and early modern periods. Consideration of relevant anthropological theory, the relationship between constructions of witchcraft, the Enlightenment and the rise of science, and the role of gender in definitions of witchcraft.

Prerequisite: Completion of 4.0 credits
Recommended Preparation: RLG203H1/RLG203Y1/RLG203H5
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

RLG338H1 - Religion and Religiosity in Israel/Palestine

Hours: 24L

Focusing on present-day Israel/Palestine, this interdisciplinary course is intended for students interested in exploring a wide range of theoretical questions and examining their applicability to the study of sites, texts, rituals, and politics in the region. We will address the history of the land's consecration from Jewish, Christian, and Muslim perspectives. Students will analyze specific sites associated with religious congregations and ritual practices, and study them within their local and regional contexts. Looking at the complex relationships between religious-political movements and institutions within Jewish and Muslim societies, we will delve into various attempts to secularize (and theologize) Jewish and Palestinian communities and their discontents. Rather than providing the typical emphasis on conflict, the course is a journey into the history and present of the land and its diverse communities.

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

RLG339H1 - Religious Ethics: The Jewish Tradition

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

RLG352H1 - Post-Colonial Islam

Hours: 24L

This course will study Islam in a post-colonial framework. It will introduce students to the work of post-colonial studies, and how critical scholarship has transformed our understanding of monolithic concepts such as modernity, the nation and Islam. It will focus on the particular case of Islam in South Asia and the Middle East by exposing students to the transformative impact of colonialism. It will equip students with the tools to challenge the hegemonic notion of a singular 'tradition' in Islam by tracing its lineages in the post-colony.

Prerequisite: Completion of 4.0 credits
Exclusion: NMC381Y1, RLG250H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

RLG353H1 - The Politics of Charity

Previous Course Number: RLG250H1
Hours: 24L

The course examines religious charitable giving, philanthropic foundations, and humanitarian aid and asks: Is charitable giving altruistic or is it always partly self-interested? Could aid perpetuate poverty? What kinds of "strings" come with receiving aid and is there such thing like a free gift?

Prerequisite: Completion of 4.0 credits
Exclusion: RLG250H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
RLG355H1 - Living Islam

Hours: 24S

This course introduces students to studies of contemporary Islam that are based on extensive periods of research with Muslim communities in their own languages using anthropological methods. What do such studies teach us about the varied ways Muslims engage their religious tradition in the modern world? And how can such studies make us think differently about gender, economy, medicine, and secularism?

Prerequisite: Completion of 4.0 credits
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

**JPR364H1 - Religion and Politics in the Nation State**

**Previous Course Number:** JPR364Y1
**Hours:** 24L

This course will engage with contemporary debates on religion and politics in the context of the nation-state in our post-9/11 world, and will do so comparatively across a wide range of contexts.

The emphasis will be on understanding the evolving relationship between religion and politics in liberal democracies, and examining challenges facing democratic politics from the religious sphere, both in the West, where secular liberalism is the dominant framework for discussing these questions, and in Africa, India, and the Middle East, where such a framework is more likely to be contested. The themes explore will include secularization, religious pluralism and tolerance, human rights regimes, the idea of "civil religion," the impact of religion on party politics, the formation of identity and political community, the legal regulation of sometimes-competing claims based on religious faith, gender, and sexuality, and the rise of extremist forms of religious politics, conspiracy thinking, new online communities that lead to dangerous political outcomes, such as 'QAnon' and 'Plandemic'. Cases studies will include the USA, Canada, France, Turkey, Egypt, Nigeria.

**JPR365H1 - Global Religion and Politics**

**Previous Course Number:** JPR364Y1
**Hours:** 24L

This course will engage with contemporary debates on religion and politics in the international context in our post-9/11 world, and will do so comparatively across a wide range of contexts.

The emphasis will be on understanding the evolving role of transnational religion has played in the past three decades, where new global networks have emerged as central global actors. We will focus empirically on the rise of radical reformist Islam and evangelical Christianity, the two most dramatically successful forms of religiosity around the world today. We will study the implications for the foreign policies of key nation-states, as well as the forces that have contributed to the prevalence of contestatory religious politics and networks as new and poorly understood global actors. International religious freedom, human rights, the role of media and mediation, the place of religious or theological doctrines or imaginaries in constructing and motivating a range of political goals, many involving the use of violence. We will focus as well on the global spread of extremist forms of religious politics, conspiracy thinking, new online communities that lead to dangerous political outcomes, such as 'QAnon' and 'Plandemic'. Many of the cases will focus on the non-Western world, especially the Middle East and Africa. (Given by the Departments of Political Science and Religion)

**RLG383H1 - Interpretation and Dialogue**  
**Hours:** 24L

Can we understand the beliefs and behaviors of people whose religious and cultural outlooks differ radically from our own? Do we always impose our preconceptions on them? Or are there cognitive, imaginative, and emotional resources that enable us to see people on their own terms? These questions, which beset the practices of anthropologists and historians of religions, are central to the philosophy of the human sciences. This course explores the theoretical issues involved in interpretation and dialogue across cultural and historical divides by reading seminal texts by Dilthey, Collingwood, Heidegger, Quine, Davidson, Winch, Maclntyre, Benedict, Geertz, and Rorty.

**Prerequisite:** Completion of 4.0 credits  
**Recommended Preparation:** RLG231H1/RLG387H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**RLG384H1 - Pluralism and Toleration**  
**Hours:** 24L

This course traces the development of philosophical arguments in favor of toleration or pluralism that emerged first in response to bitter religious conflicts and then out of a growing recognition of the potential benefits of the normative diversity characteristic of modern societies. Typical philosophers to be studied are Bodin, Spinoza, Locke, Bayle, Lessing, Herder, and Mill.

**Prerequisite:** Completion of 4.0 credits  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**RLG385H1 - Becoming Modern**  
**Hours:** 24L

What does it mean to be modern? Words like “modern,” “modernity,” and “modernism” are used to mark a fundamental boundary between our era and all that came before it (or lies outside of it); but most of us are hard-pressed to offer a solid account of what exactly this boundary is. This course examines the relationship between: a fundamental shift in the nature of daily experience; an order-of-magnitude expansion of the power of the State; a dramatic reorganization of religious experience and cultures; and a tremendous growth in the enterprise of Western science and technological production. We trace this reorientation over the last two centuries and examine its consequences using philosophical, literary, theological, and scientific sources, as well as recent scholarly work on the topic.

**Prerequisite:** Completion of 4.0 credits  
**Exclusion:** RLG231H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**RLG386H1 - Devotional Literature of Early Modern India**  
**Hours:** 24L/12T

This class is an introduction to the devotional literature of early modern India (c. 1500-1800), but more importantly, it is about thinking critically and developing skills in close reading of texts. In addition to learning about historical, religious, and social contexts of various literary traditions in Brajbhasha, students will be expected to demonstrate their ability to analyze and interpret texts by actively participating in class discussions and by writing a well-argued final paper. The focus will be on the what of literary traditions but also on the how and why these traditions made sense to people in the past and are still relevant to us, today.

**Prerequisite:** 4.0 credits  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**RLG387H1 - Religion and Science**  
**Previous Course Number:** RLG231H1  
**Hours:** 24L

Course explores issues at the intersection of religion and science which may include such topics as evolution and the assessment of its religious significance by different traditions, conceptions of God held by scientists (theism, pantheism, panentheism), ethical issues raised by scientific or technological developments (cloning or embryonic stem cell research), philosophical analysis of religious and scientific discourses.

### RLG418H1 - Advanced Topics in the Philosophical Study of Religion

**Hours:** 24S  
A seminar that explores a topic in the philosophical study of religion. Possible topics include: the nature of religious truth; the phenomenology of religion; descriptions of the holy; religion and the meaning of life; God-talk as literal or metaphorical language; naturalizing religious belief. If the course is offered during the year, a detailed course description of the topic will be available under current courses in the undergraduate section of the Department’s website. As these courses are offered simultaneously as graduate level courses, students interested in taking them are encouraged to contact the instructor.

**Recommended Preparation:**  
RLG211H1/RLG301H1/RLG302H1

### JPR419H1 - Secularism and Religion

**Previous Course Number:** RLG419H1  
**Hours:** 24S  
Themes considered include what notion of religion is necessary for secular governance, and how secularity relates to particular discourses of citizenship and practices of political rule. Case studies include the effects of colonial rule on religious life; Jewish emancipation in Europe; and religious freedom in France and North America.

*(Given by the Departments of Political Science and Religion)*

**Prerequisite:** 2.0 200-level (or above) credits in Political Science or Study of Religion/permission of the instructor  
**Exclusion:** RLG419H1  
**Distribution Requirements:** Humanities, Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### RLG419H1 - Ghosts to Ancestors: Racialized Hauntings and Reparative Promise in Psychoanalysis

**Hours:** 24L  
All forms of injustice disfigure both societies and psyches. Racist, sexist, and other unconscious fantasies of evil and persecuting ‘others’ generate social injustice. At the same time, social injustice distorts the mind. This “dual track” process can drive human beings and their societies mad. Justice depends upon transformations of social structures and moral codes as well as changes within human minds. In order for psychoanalysis to realize its own potential for facilitating justice, it must confront its own historical contribution to injustice. Through a close reading of selected texts from Sigmund Freud and the activist psychiatrist Franz Fanon, this course explores the inherent tensions between colonizing and emancipatory themes within psychoanalytic discourses. Both Freud and Fanon contribute to a psychoanalytic critical theory that have influenced several contemporary ethnographic writers who explore the intricate ways in which social and cultural realities are internalized as unconscious hauntings and tormenting spirits across generations.

**Recommended Preparation:**  
RLG211H1/RLG301H1/RLG302H1
RLG420H1 - Religion and Philosophy in the European Enlightenment

Hours: 24S

An advanced study of selected Enlightenment thinkers with a focus on their interpretations of religion. The main thinkers discussed are Spinoza, Hume, and Kant. Issues include the rational critique of traditional religion, the relations among religion, ethics and politics, and the pursuit of universal approaches to religion.

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG421H1 - Fragments of Redemption: Sigmund Freud and Theodor Adorno

Hours: 24S

This course will challenge the prevailing view that the thought of Sigmund Freud and Theodor Adorno is so deeply pessimistic as to be devoid of hope. Freud’s psychoanalytic theories are widely (mis)interpreted in the register of a crude pansexualism and biological determinism. Adorno’s critique of society and the individual is often (mis)interpreted as so ruthlessly pervasive that it forecloses on any possibility for emancipatory transformation. This is a distorted view of both thinkers, that misses the hopeful, utopian currents that motivate and shape psychoanalysis and critical theory. The course will explore the emancipatory currents in Freud and Adorno, and their implications for potentialities of individual, social and ecological transformation.

Prerequisite: Permission of instructor
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG422H1 - Kant’s Theory of Religion

Hours: 24L/12S

An advanced study of Immanuel Kant’s theory of religion, as developed in major writings such as Critique of Practical Reason and Religion within the Boundaries of Mere Reason. Emphasizes rational ethical criteria as the basis for analyzing the doctrines, symbols, and institutions of historical religions.

Prerequisite: Permission of instructor
Recommended Preparation: RLG310Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG425H1 - Hermeneutics and Religion

Hours: 24S

A study of how principles of textual interpretation and theories of language have been central to modern philosophy of religion. We begin with Schleiermacher, and then move to an in-depth treatment of the 20th century hermeneutical theories of Heidegger, Gadamer, and Ricoeur.

Prerequisite: Permission of instructor
Recommended Preparation: RLG310Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

RLG426H1 - Religion in the Public Sphere: Community-Engaged Learning

Hours: 24S

For upper-year students, from any discipline. In a 30-hour community service placement, discover first-hand religion’s significance in Toronto and examine how religion manifests in public spaces, institutions, and interactions, while critically reflecting on the experience of working in settings where religious diversity is at play. The Religion in the Public Sphere (RPS) coordinator’s permission is required for admission to the course.

Prerequisite: RPS coordinator’s permission
Distribution Requirements: Humanities

RLG428H1 - Religion and Economy

JPR459H1 - Fanaticism: A Political History

Hours: 24S

This seminar in theory will explore the modern history of the concept of 'fanaticism' and its role in the development of political modernity. A focus on the concept of the "fanatic" (and its cognates) from the perspective of its various uses in political and religious thought from the Early Modern period through the Enlightenment and up to the present day, provides a fascinating opportunity for a critical review of the secular, rationalist, and scientific assumptions underwriting modern political forms and concepts, especially those of liberal democracy. At the same time, the course will offer critical insight into the ways in which religious and political differences among colonial "others" were, and continue to be, central to the elaboration of Western theoretical discourse on fanaticism and extremism as forms of "political pathology". (Given by the Departments of Political Science and Religion)

Prerequisite: (2.0 credits in Political Theory and/or Philosophy including 1.0 credit at the 300-level) or (0.5 credit in Method and Theory in the Study of Religion and 1.0 credit at the 300-level in the Study of Religion)

Introduction

Rotman Commerce at the University of Toronto offers a rigorous curriculum combining studies in management, economics, and the arts and sciences for an enriched professional undergraduate experience. The program explores the role of commerce in modern society while developing skill and confidence in analysis, effective communications and decision making.

The Bachelor of Commerce degree builds on a common foundation of a range of business disciplines and economics. Rotman Commerce students specialize in one
of three areas: Accounting, Finance and Economics, or Management. Each stream combines courses in management and applied economics with a variety of courses in the arts and sciences. The balance assures graduates of a solid understanding of business and modern society along with a command of critical skills across business disciplines, decision-making, and leadership.

Rotman Commerce graduates enter a wide range of professions, and frequently become financial analysts, accountants, marketing analysts, economists, managers of firms and government, or entrepreneurs. Some commerce students elect to undertake post-graduate studies. Law schools and MBA programs have been particularly favoured destinations of recent graduates.

Faculty from the Rotman School of Management who teach in Rotman Commerce are listed above.

General Enquiries: Rotman Commerce Academic Services; Rotman Commerce, 125 St. George Street; email: rotmancommerce.info@utoronto.ca; telephone: 416.978.3339; www.rotmancommerce.utoronto.ca

Registration Instructions for the Faculty of Arts & Science can be found in the Program Toolkit and Course Enrolment Instructions sections of the Arts & Science website.

**Bachelor of Commerce (BCom) Degree Requirements**

Requirements for the BCom are stated on the Degree Requirements page.

**Rotman Commerce Notes**

Enrolment in Rotman Commerce programs is limited. Most students are admitted to first-year with Rotman Commerce Guaranteed Admission (see below for terms and conditions). Rotman Commerce students choose their Specialist program after first year, provided that the Guaranteed Admission requirements have been met. A number of spaces are also available in second-year for other Arts & Science students who were not admitted with the guarantee (see enrolment requirements with the program information below for details).

**Part-Time Students:**

Students holding Rotman Commerce Guaranteed Admission, who have applied for and been admitted to Part-Time study, will be assessed for entry into the Rotman Commerce program at the point when they have completed 4.0 credits including the Guaranteed Admission requirements. To qualify under the Part-Time provision, students must have been enrolled in a part-time course load from the beginning of each session. Students may repeat each of the required courses only once in order to attain the minimum marks.

**Additional Notes:**

- Tuition Fees: Students enrolling in Rotman Commerce programs pay fees that are higher than other Arts & Science programs.
- Mathematics Note: MAT133Y1 satisfies the minimum Program requirements. Students who are likely to enrol in 200+ level MAT, STA and/or CSC courses are advised to take MAT135H1 and MAT136H1 or MAT137Y1 instead, noting that MAT137Y1 is a theoretically-oriented course for mathematically-based disciplines such as Mathematics, Computer Science, and Statistics.
- Maximum Term Load: Rotman Commerce students are limited to a maximum of 6.0 credits in any Fall/Winter session of their program and a maximum of 2.0 credits in their Summer session.
- Students who have completed the requirements of their Admission Guarantee by the end of the Winter Session are eligible to enroll in 200-level RSM courses during the Summer Session following their first-year.

**Rotman Commerce Programs**

**Accounting Specialist (BCom) - ASSPE2676**

Rotman Commerce at the University of Toronto offers an innovative curriculum combining studies in management, economics, and the liberal arts for an enriched professional undergraduate experience. The program explores the role of commerce in modern society while developing skill and confidence in analysis, effective communication, and decision making. The Rotman Commerce program offers a Bachelor of Commerce (BCom) degree in three different specialist programs, Finance & Economics, Accounting, and Management.

All programs within the Bachelor of Commerce degree build on a common foundation of business and liberal arts courses. Rotman Commerce students specialize in one of three programs: Accounting, Finance and Economics, or Management. Each program combines courses in management and applied economics with a variety of advanced courses in the liberal arts and sciences. The balance assures graduates of a solid understanding of business and modern society along with a command of critical skills in decision-making and organizational leadership.

Rotman Commerce graduates frequently become economists, accountants, actuaries, financial analysts, marketing analysts, managers of firms and government, or proprietors of small businesses. Some Rotman
Commerce students elect to undertake post-graduate studies in the form of further university education: law schools and MBA programs have been particularly favoured destinations of recent graduates.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

For students admitted to the Rotman Commerce admission category in Year 1:

Special Requirement

- Students are admitted to Year 1 of the Faculty of Arts and Science in the Rotman Commerce admission category with an "admission guarantee." Students admitted with the guarantee are invited to enroll in the program after first year, provided that the course and grade requirements below (i.e., Guaranteed Admission requirements) are met.
- Failure to meet any of these requirements, or failure to complete all the required courses within the calendar year (assuming full-time studies), will result in losing the admission guarantee.

Completed courses (with minimum grades)
The following courses with the stated minimum grades are required:

- RSM100H1 (67%)
- ECO101H1 (63%) and ECO102H1 (63%)
- MAT133Y1 (63%) / (MAT135H1 (60%), MAT136H1 (60%)) / MAT137Y1 (55%) / MAT157Y1 (55%)

Notes:

- Students may repeat any of the required courses once, in order to attain the requisite mark. The repeated course(s) must be completed within the calendar year (as per the terms of the "guarantee"); as such, the repeated course(s) must be taken during either the Winter or Summer Session of first-year (i.e. a student may not extend the terms of their guarantee in order to attain the minimum marks).
- Note that none of the required courses may be completed using the CR/NCR option.

For students NOT admitted to the Year 1 Rotman Commerce admission category:

Special Requirement

- Students must complete the Rotman Commerce Supplemental Application in late April or May of each year.
- All course admission requirements must be completed by May 1 to be eligible.
- For information regarding admission to the program, contact Rotman Commerce at rc.admissions@utoronto.ca

Minimum Course Grades and Minimum Grade Average
A limited number of spaces in Rotman Commerce are available to Arts & Science students who were not admitted to first year with the Admission Guarantee.

Minimum grades in each listed course, combined with a minimum grade average in required courses, is needed for entry. The following courses with the stated minimum grades are required:

- MGT100H1 (67%) / RSM100H1 (67%)
- ECO101H1 (63%) and ECO102H1 (63%)
- MAT133Y1 (63%) / (MAT135H1 (60%), MAT136H1 (60%)) / MAT137Y1 (55%) / MAT157Y1 (55%)
- Note: in the case of repeated attempts, the highest mark attained will be considered when calculating this average

Admission will be based on marks and the Rotman Commerce Supplemental Application. Admission to Rotman Commerce is competitive. Meeting the minimum academic requirements does not guarantee admission to the program. An average of at least 73% in prerequisite courses is needed for admission consideration.

Notes:

- If an Arts and Science student is admitted to Rotman Commerce, then MGT100H1 will be considered equivalent to RSM100H1.

Completion Requirements:

(15.5 credits)
First Year:

1. (ECO101H1, ECO102H1), RSM100H1 / MGT100H1
2. MAT133Y1 / (MAT135H1, MAT136H1) / MAT137Y1 / MAT157Y1

RSM338H1 - Applications of Machine Learning in Finance

Hours: 24L/12T

This course provides an overview of the basic tools in data analysis and machine learning, with emphasis on their applications in finance. Data analysis and machine learning play an important role in FinTech. Individual investors and financial institutions who are able to leverage these new tools and technology will have a significant advantage. This course discusses these new opportunities and challenges. It seeks to equip students with these highly coveted skills in the market.

Prerequisite: Completion of 9.0 credits, ECO204Y1/ECO206Y1, ECO220Y1/ECO227Y1/(STA220H1, STA255H1)/(STA237H1, STA238H1)/(STA257H1, STA261H1)

RSM340H1 - The Opposable Mind: Approaches to Integrative Thinking

Previous Course Number: RSM310H1
Hours: 24L

Beginning with an exploration of integrative thinking and the tools associated with it, this course asks students to apply integrative thinking to complex problems that span traditional disciplines. Throughout the course, students will learn practical tools aimed at helping integrate between models, build new models and create new value. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: Completion of 9.0 credits.
Exclusion: RSM310H1 (Special Topics in Management: The Opposable Mind: Approaches to Integrative Thinking), offered in Winter 2011/Winter 2012/Winter 2013
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

RSM341H1 - Model-Based Decision Making

Hours: 24L

This course aims to introduce logically disciplined approaches to decision making under uncertainty. Managers are continually barraged with information that may be unreliable. They must choose courses of action in the face of many uncertainties. How can we define and assess the "optimality" of their decisions in a consistent manner? By building upon the answers to these questions, the course will consider the problem of rational choice when the outcome is determined by the actions of, and interactions between, multiple individuals. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: Completion of 9.0 credits, ECO204Y1/ECO206Y1, ECO220Y1/ECO227Y1/(STA220H1, STA255H1)/(STA237H1, STA238H1)/(STA257H1, STA261H1)
RSM350H1 - Marketing Management

**Previous Course Number:** RSM251H1  
**Hours:** 24L

This course employs the case method of instruction to develop the skills required of marketing managers. Students will learn to diagnose marketing problems and develop, present, and defend their recommendations. They will also gain experience analyzing marketing situations, identifying market opportunities, developing marketing strategies, and designing the marketing mix. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

**Prerequisite:** RSM250H1  
**Exclusion:** RSM251H1

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

RSM352H1 - Marketing Research

**Hours:** 24L

Marketing research is studied from the perspective of the marketing manager. The course focuses on the initiation, design, and interpretation of research as an aid to marketing decision making. Case studies and projects are used to provide students with some practical research experiences. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

**Prerequisite:** ECO220Y1/ECO227Y1/(STA220H1, STA255H1)/(STA237H1, STA238H1)/(STA257H1, STA261H1)  
**Corequisite:** RSM251H1/RSM350H1

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

RSM353H1 - Consumer Behaviour

**Hours:** 24L

Formulating successful marketing strategies requires an understanding of consumers’ cultures, motivations, cognitions, and emotions. Students will learn how to use theoretical perspectives from psychology, economics, anthropology, and other disciplines to generate predictions about consumers, interpret consumer reactions to marketing stimuli, and develop rigorous skills in marketing analysis. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

**Prerequisite:** ECO220Y1/ECO227Y1/(STA220H1, STA255H1)/(STA237H1, STA238H1)/(STA257H1, STA261H1), CSC108H1/CSC148H1

**Exclusion:** RSM338H1, RSM313H1 (Special Topics in Rotman Commerce)

RSM355H1 - Managing Customer Value

**Previous Course Number:** RSM310H1 - Managing Customer Value  
**Hours:** 24L

This course builds on the foundation developed in RSM250H1 (Principles of Marketing) in a competitive simulation environment. While RSM250H1 focuses on the fundamental marketing elements for operationalizing this basic philosophy - segmentation, targeting, positions and 3 of the 4 Ps, this course is designed to advance a participant's understanding of designing and implementing marketing strategies and explore the management of the 4th P (promotion) in greater depth. In particular, participants will make decisions about all 4 Ps simultaneously and manage the interactions between them. Not eligible for CR/NCR.

**Prerequisite:** RSM250H1 and completion of 9.0 credits  
**Exclusion:** RSM310H1 (Special Topics in Management: Managing Customer Value), offered in Winter 2019 and Winter 2020

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

RSM358H1 - Foundations of AI for Management

**Hours:** 24L/12T

Artificial intelligence — the application of machine-learning techniques to prediction problems historically performed by humans — is transforming business and society. This course provides a hands-on introduction to the wide variety of algorithms used in applications of machine-learning. The technical topics will include linear and non-linear regression models, classification algorithms, and more recent machine-learning techniques rooted in neuroscience like reinforcement learning and deep learning. Application topics will include predicting consumer choices, MLB salaries, and Super Mario Bros. There will be an emphasis on conceptual understanding, so that students can interpret the results of these techniques to support effective decision-making. The course will be complemented by many hands-on exercises using the R programming language.

**Prerequisite:** ECO220Y1/ECO227Y1/(STA220H1, STA255H1)/(STA237H1, STA238H1)/(STA257H1, STA261H1), CSC108H1/CSC148H1

**Exclusion:** RSM338H1, RSM313H1 (Special Topics in
Management: Foundations of Artificial Intelligence for Management), offered in Fall 2020

**Distribution Requirements:** Social Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**RSM361H1 - Human Resource Management**

**Previous Course Number:** RSM460H1
**Hours:** 24L

Human resource management is studied from the perspective of the manager/practitioner. The course focuses on decisions about when and whom to hire, how much to pay, what training to offer, and how to evaluate employees. Class exercises and projects are used to provide students with some practical experience with these topics. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

**Prerequisite:** RSM260H1
**Exclusion:** RSM460H1

**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)

**RSM362H1 - Leading Across Differences**

**Hours:** 24L

This course makes linkages between a leader’s stance and how strong preferences come to life and influence perspectives at the individual and organizational level. There is a deep exploration of one's knowledge system and a particular focus upon uncovering innovative frames around diversity that directly impact organizational strategy. Not eligible for CR/NCR option.

**Exclusion:** RSM315H1 - Leading Across Differences

**Distribution Requirements:** Social Science
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**RSM370H1 - Supply Chain Management**

**Previous Course Number:** RSM311H1
**Hours:** 24L

Globalization increasingly intertwines the Canadian and world economies. Understanding how firms can successfully link with worldwide suppliers and markets is central to growth. Supply chain management issues covered include: advanced inventory and production models; supply contracts; the bullwhip effect; vendor-managed inventories; distribution strategies; third-party logistics; product variety; current information technology. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

**Prerequisite:** Completion of 9.0 credits
**Corequisite:** RSM270H1
**Exclusion:** RSM311H1 (Special Topics in Management: Supply Chain Management), offered in Winter 2011/Winter 2012/Fall 2012

**Distribution Requirements:** Social Science
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**RSM384H1 - Sports Analytics**

**Hours:** 24L

This course applies concepts of analytic management and data analysis to the sports world. The class is intended to deepen the students' ability to apply econometric skills from ECO220Y1. Particular emphasis is given to player management, “on the field” decisions and giving the students the opportunity to do their own analysis while learning frontier techniques. The class will introduce students to some basics of coding and econometric analysis in R. No prior coding experience is required, but basic coding will be necessary and the course provides students with new or deepened skills in that area.

**Prerequisite:** ECO220Y1/ECO227Y1/(STA220H1, STA255H1)/(STA237H1, STA238H1)/(STA257H1, STA261H1)
**Exclusion:** RSM314H1 (Special Topics in Management: Sports Analytics), offered in Winter 2019/Winter 2020/Winter 2021

**RSM391H1 - Creative Destruction Lab – Introductory Course**

**Hours:** 24L

This course is suitable for students interested in pursuing careers in strategy, innovation, entrepreneurship, entrepreneurial finance, new product development, and economic development policy. The course will introduce students to a framework for developing an entrepreneurial strategy. This involves the key choices of customer, competition, technology and identity as well as whether ventures pursue a control versus execution focus. The course will also provide a discussion of intellectual property strategies for technology entrepreneurs.

As part of the preparation for the CDL Advanced course, this course will also introduce you to the business of
artificial intelligence. You will explore what machine learning is, what its economic properties are, how it impacts on strategy, its risks and legal implications. As most ventures in the Toronto CDL have AI cores, this will be essential preparation for that as well as an introduction to AI in the real business world.

This course is a prerequisite for students wanting to apply for the Creative Destruction Lab (CDL) Advanced Course RSM2013Y/ RSM498Y1 where students will have the opportunity to work directly with a CDL venture. Interested students should familiarize themselves with the Creative Destruction Lab and its various activities prior to registering for this course. You can find more information from our website at www.creativedestructionlab.com.

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**RSM492H1 - Cooperative Strategy**

**Previous Course Number:** RSM419H1  
**Hours:** 24L

Cooperation to create economic value is a central feature of markets: from sophisticated coordination in strategic alliances to simple acts of agreement between buyers and sellers. This course goes beyond Porter's Five Forces to develop a rigorous understanding of the connections between value creation, competition and firm performance. Not eligible for CR/NCR option.

**Prerequisite:** RSM392H1  
**Exclusion:** RSM419H1 Cooperative Strategy  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**RSM493H1 - Entrepreneurship**

**Hours:** 24L

Introduces essentials of starting a new business: how to evaluate new opportunities, craft strategy, obtain resources, manage growth, and distribute ownership.
Applies concepts from strategic management to challenges facing new/small businesses. Examines the role of entrepreneurs in spurring technological innovation and economic growth, and the effect of government policy on entrepreneurial activity. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### RSM494H1 - Technology Strategy

**Hours:** 24L

Teaches about technological evolution and how evolutionary stages impact firms' strategic choices. Important issues in technological evolution are technological discontinuities, standards wars, dominant designs and patenting. Important strategic decisions concern innovation management, product versus process focus and intellectual property strategies. Project oriented coursework based on patent and business data bases. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

**Prerequisite:** RSM392H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### RSM495H1 - Management Consulting

**Previous Course Number:** RSM416H1  
**Hours:** 24L

This course examines the management consultant's role and how the consulting industry serves to enhance effectiveness of client organizations. Future management advisors will learn skills necessary to support successful consulting business models and how to professionally engage clients to assist in generating competitive advantage through design/implementation of innovative approaches. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

**Prerequisite:** RSM392H1

Programs

Book and Media Studies
The Book and Media Studies program is an interdisciplinary and historical investigation of the role of printing, books, reading, and electronic and digital media in cultures past and present. Its topics include: manuscript and book production, internet publishing, book illustrations, advertising, censorship, reading and entertainment alongside the development of mass media—the advent of radio and the emergence of television, global telecommunications, social media, and the internet.

The new Arts & Science Internship Program (ASIP) stream is available to students entering their second year of study in Fall 2021 and enrolled in the Book and Media Studies Major.

Celtic Studies
The Celtic Studies Program introduces students to a wide variety of undergraduate courses on the languages, literature, history, music, folklore, art and archaeology of the peoples of Ireland, Scotland and Wales. We examine Celtic identities in the modern as well as the ancient and medieval world and explore the transmission of these traditions to Canada and the United States.

Christianity and Culture
Christians claim that the Gospel has the power to transform not only individual lives but whole societies. The Christianity and Culture Program offers students an opportunity to explore this bold claim through critical, academic studies of how the Christian faith has shaped—and been shaped by—the institutions, artistic expressions, and intellectual achievements of Western and world cultures. Courses provide a comprehensive and humanistic approach to Christian experience, past and present. By focusing on students' personal engagement with primary sources, the Program fosters scholarly exchange, intellectual community, and a shared search for meaning.

Mediaeval Studies
The term "mediaeval" is the name given to a period in the history between “antiquity” and “modernity,” or roughly the fifth through the fifteenth centuries. Its parameters are broad and boundaries are not clearly defined. The Mediaeval Studies program adopts an interdisciplinary approach to exploring this world through the study of subjects such as the Latin language, art, literature, law,
gender roles, and religion. As well as examining the mediaeval foundations of modern culture, students also explore "mediaevalisms" that appear in our own culture through such media as film, literature, drama, and art, and introduce new approaches including digital humanities.

For more information about our programs please see the St. Michael's College website or email smc.programs@utoronto.ca.

SMC One: First-Year Seminars

**The Gilson Seminar in Faith and Ideas**

First-year students explore the intersection of faith with today's most important questions. This course also features a two-week international learning experience in Rome that explores the roles that the Catholic Church and Vatican have played in ecology, science, literature and politics.

**The Boyle Seminar in Scripts and Stories**

First-year students investigate the intersection of Celtic and mediaeval cultures through manuscript analysis and language instruction. Participants are invited to travel to Ireland with the course instructors for an out-of-course international learning experience the following summer.

**The McLuhan Seminar in Creativity and Technology**

First-year students explore the relationship between creativity and technology and the individual, social, and cultural effects of innovation. The McLuhan Seminar includes a one-week trip to Silicon Valley, California that takes place during Reading Week.

**The Seminar in Christianity, Truth and Reconciliation**

First-year students critically explore the complex relations of Christianity and Indigenous peoples of Turtle Island, with a special focus on education. The course includes guest speakers and travel to residential school site(s) and archives in Ontario.

First-Year Foundations Courses

These small class-sized courses offer first-year students an introduction to inter-disciplinary university-level studies through a topic chosen by its instructor.

St. Michael's College Courses

SMC First-Year Foundations

SMC194H1 - Christianity, Truth and Reconciliation

Hours: 12T/24S

This First-Year Foundations seminar critically explores the complex relations of Christianity and Indigenous peoples of Turtle Island, with a special focus on education. Sample topics include: settler colonialism and treaty relationships; prominent Indigenous Christians, critics and reformers; the residential school system; the Truth and Reconciliation Commission of Canada; recent initiatives in ecclesial repentance, dialogue and enculturation. The course will include online primary research in the archives of residential schools in Ontario. Restricted to first-year students. Not eligible for CR/NCR option.
SMC195H1 - God and Money in the Middle Ages

Hours: 24S

This seminar considers the ethical, political, and spiritual questions arising from the existence of wealth and poverty in medieval European culture. With readings from Dante, Chaucer, Thomas Aquinas and others, the course will examine how the interaction of spiritual ideals and material realities shaped cultural developments from late antiquity to the Protestant Reformation. Restricted to first-year students. Not eligible for CR/NCR option.

SMC196H1 - God and the Poets: Lyric Form in the Christian Tradition

Hours: 24S

This course will develop the skills fostered by the close reading of poetry by exploring how the most sophisticated forms of language have been used to address the highest possible subjects in the Christian literary tradition. With readings in English, we will survey poetry in a range of languages and forms, giving particular attention to how, in lyric poetry, poets have addressed themselves to God—from devotion to desperation, ecstasy to outrage, tenderness to terror. In addition to building the necessary skills for reading, describing, and analyzing poetry, this course will also develop other research skills. Restricted to first-year students. Not eligible for CR/NCR option.

SMC197H1 - The Sistine Chapel: History, Imagery, Usage

Hours: 24S

The Sistine Chapel in Rome is a historical artifact, an artistic monument, and a house of worship—at once recognizable and mystifying. This seminar explores fifteenth-century origins, decoration by some of the most accomplished artists of the Italian renaissance, and continuing use (especially the election of popes). Topics will include: art and patronage, rhetoric and ritual, controversial restoration, and the Sistine Chapel in popular culture—with an emphasis on the close analysis of the major frescoes. The seminar will develop the academic skills needed for the analysis and discussion of texts, paintings, and ritual events. Restricted to first-year students. Not eligible for CR/NCR option.

SMC198H1 - How to Study Video Games

Hours: 36S

Games and play are a fundamental part of human society, and today digital games occupy a central place in popular culture, media industries, and the imaginations of players around the world. This seminar introduces students to the growing academic field of game studies, with an emphasis on close analysis of specific games as cultural objects. Through lectures, discussions, and in-class play sessions, students will build a critical vocabulary and toolbox of techniques for understanding the unique formal, aesthetic, narrative, and thematic properties of games in a variety of platforms and genres, and develop basic academic reading, writing, and research skills. No previous experience or expertise with video games is required to take this course. Restricted to first-year students. Not eligible for CR/NCR option.

SMC199H1 - Intelligence, Artificial and Human

Hours: 24S

What is human intelligence? How close are we to replicating it? How productive/reductive is the brain-computer analogy? What ethical challenges are posed by AI on workers, society, and the environment? Can we put a hold on “progress”? Is Silicon Valley the seat of a new techno-religion? What can they teach us about today's research priorities? What insight (or inspiration) can we get from works of science fiction about the future of human-AI interaction? Through reading discussion, written assignment, and workshops, this seminar will present students with the opportunity to integrate their computer science interests with philosophy, history, and literature. There is an equivalent course offered by the Department of Computer Science. Students may take one or the other but not both. Restricted to first-year students. Not eligible for CR/NCR option.
Exclusion: CSC199H1  
Distribution Requirements: Science  
Breadth Requirements: Society and its Institutions (3)

SMC One: First-Year Seminars

SMC155H1 - SMC One: The McLuhan Seminar in Creativity and Technology  

Hours: 12L/12S

This seminar is an interdisciplinary exploration of the relationship between creativity and technology. Inspired by the innovative thinking of Marshall McLuhan, it explores how the humanities relate to other fields of thought and research in addressing the individual, social and cultural experiences and effects of technological innovation. This course includes a mandatory travel component opportunity to Silicon Valley, California. Restricted to first-year students. Not eligible for CR/NCR option. (An ancillary fee of $1,000 is required to help cover some of the travel costs.)

Prerequisite: Admission to SMC One  
Exclusion: Innis One, Munk One, New One, Trinity One, Vic One, UC One, Woodsworth One, SMC155H1, SMC188H1, SMC189H1  
Distribution Requirements: Humanities  
Breadth Requirements: Creative and Cultural Representations (1)

SMC185H1 - SMC One: Seminar in Christianity, Truth and Reconciliation  

Hours: 24L/12T

This seminar critically explores the complex relations of Christianity and Indigenous peoples of Turtle Island, with a special focus on education. Sample topics include: settler colonialism and treaty relationships; prominent Indigenous Christians, critics and reformers; the residential school system; the Truth and Reconciliation Commission of Canada; recent initiatives in ecclesiastical repentance, dialogue and enculturation. The course includes guest speakers and mandatory co-curricular activities, including travel to residential school site(s) and archives in Ontario during reading week. The costs of these activities are supported by the University of St. Michael’s College. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to SMC One  
Exclusion: Innis One, Munk One, New One, Trinity One, Vic One, UC One, Woodsworth One, SMC155H1, SMC165H1, SMC188H1, SMC189H1  
Distribution Requirements: Humanities  
Breadth Requirements: Thought, Belief and Behaviour (2)

SMC165H1 - SMC One: The Boyle Seminar in Scripts and Stories  

Hours: 24L/12S

This seminar introduces students to university-level studies through an interdisciplinary exploration of Celtic influences in the mediaeval world, with a particular focus on early books and historical artifacts as physical objects and bearers of meaning. Students will learn how to read and analyse these books and artifacts to decode their meanings, and, in support of that, take introductory language instruction in Latin or Irish. Subjects discussed will include intercultural encounter and dialogue, research methods with historical sources, and the relationship between the written word and lived experience, then and now. There is a co-curricular travel opportunity to Dublin, Ireland associated with this course which takes place following the Winter term exam period. Restricted to first-year students. Not eligible for CR/NCR option. (If you choose to go on the trip to Ireland, an ancillary fee of $1,000 is required to help cover some of the travel costs.)

Prerequisite: Admission to SMC One

SMC188H1 - SMC One: The Gilson Seminar in Faith and Ideas  

Previous Course Number: SMC188Y1  
Hours: 12L/12S

This seminar is an interdisciplinary exploration of leading scholarly, intellectual and public questions related to ecology, science, literature, and public life. From a variety of perspectives, the seminar considers how religion, and how different kinds of religious experience, figure in the broader context of human affairs. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to SMC One  
Exclusion: Innis One, Munk One, New One, Trinity One, Vic One, UC One, Woodsworth One, SMC155H1, SMC165H1, SMC188Y1  
Distribution Requirements: Humanities  
Breadth Requirements: Thought, Belief and Behaviour (2)
SMC189H1 - SMC One: The Gilson Seminar in Faith and Rome

Previous Course Number: SMC188Y1
Hours: 24L

This course provides an intensive international learning experience in Rome, Italy. It offers contemporary and historical models of integrating faith with reason, and religious practice with intellectual, creative, and public engagement, specifically the roles that the Catholic Church and Vatican play in Rome, in ecology, science, literature, and public life. This course includes a mandatory travel component to Rome, Italy, which takes place following the Winter term exam period. Restricted to first-year students. Not eligible for CR/NCR option. (An ancillary fee of $2,000 is required to help cover some of the travel costs.)

Previous Course Number: SMC316H1
Hours: 24L

Social media, digital platforms, and networked technologies are deeply embedded in our contemporary lives, both shaping and shaped by users. But what are their social, cultural, political, and economic impacts? What consequences do they have for how we think, feel, socialize, work, play, and understand ourselves? Students in this course will explore, examine, and debate these questions with reference to their everyday experiences and current examples.

Prerequisite: (BMS100H1, BMS200Y1, BMS201H1) or SMC219Y1
Exclusion: SMC316H1
Distribution Requirements: Humanities
**Breadth Requirements**: Creative and Cultural Representations (1)

**BMS319H1 - Media Ethics**

**Previous Course Number**: SMC319H1  
**Hours**: 24L

Provides students with a theoretical foundation that enables them to identify and analyze ethical issues in mainstream and non-mainstream media. Traditional principles of journalistic truth-seeking, objectivity, and minimizing harm are revisited in the light of global, interactive media, produced by both citizens and professionals.

**Prerequisite**: (BMS100H1, BMS200Y1, BMS201H1) or SMC219Y1  
**Exclusion**: SMC319H1  
**Distribution Requirements**: Humanities  
**Breadth Requirements**: Society and its Institutions (3)

**BMS331H1 - The History of the Book: Elements of Bibliography and Print Culture**

**Previous Course Number**: SMC228H1  
**Hours**: 24L/12T

An exploration of the history of the book from ancient inscriptions to e-books. This course develops an awareness of the interplay between material object and conceptual categories in book history by focusing on significant episodes in the evolution of the book as a medium, such as the rise of the context and the introduction of print. This course also delves in the practices of bibliography, the features of typography, and the material details of the printing process, while also highlighting the interdisciplinary nature of book history from a global perspective. Typically, this course will involve in-person workshops and visits to print studios and rare books collections on campus.

**Prerequisite**: (BMS100H1, BMS200Y1, BMS201H1) or SMC219Y1  
**Exclusion**: SMC228H1  
**Distribution Requirements**: Humanities  
**Breadth Requirements**: Thought, Belief and Behaviour (2)

**BMS350H1 - Propaganda and Media**

**Previous Course Number**: SMC470H1  
**Hours**: 24S

This course assesses ways in which governments, political parties, news agencies and other groups and institutions use media to shape particular messages or describe current events. Each week the seminar will focus on a major historical event, the manner in which it was reported and interpreted, and principal challenges to that interpretation. A wide variety of media will be analyzed including: books, newspapers, film, radio, television, and the internet. Events such as the War on Terror, the Great War, the Dreyfus Affair, the Irish Famine, and the “Red Scare” are among some of the topics that will be discussed. Students will prepare unique assignments akin to the work done by communications officers.

**Prerequisite**: (BMS100H1, BMS200Y1, BMS201H1) or SMC219Y1  
**Exclusion**: SMC430H1  
**Distribution Requirements**: Humanities  
**Breadth Requirements**: Creative and Cultural Representations (1)

**BMS386H1 - Book and Media Internship**

**Previous Course Number**: SMC386H1  
**Hours**: 48P

Credit is offered to a student doing an internship with a media organization. A faculty supervisor assesses and assigns the necessary written component cognate to the internship. Application forms are available from the SMC Principal's Office. Not eligible for CR/NCR option.

Enrolment in this course is intended for Book and Media Studies students not enrolled in the Arts & Science Internship (ASIP) stream of the program.
**BMS387H1 - Advertising and Media**

**Previous Course Number:** SMC387H1  
**Hours:** 24L

This course presents a critical media studies approach to advertising and consumer culture, past and present. Advertising, marketing, branding, and promotion play a central role in capitalist societies and media industries, reflecting and refracting dominant cultural attitudes and ideologies. How does advertising shape what and how we consume? What are its social, cultural, economic, and environmental impacts? Students will learn to analyze the form, content, and ideology of advertisements, and think critically about the advertising they are subjected to in everyday life.

**Prerequisite:** (BMS100H1, BMS200Y1, BMS201H1) or SMC219Y1  
**Exclusion:** SMC387H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**BMS389H1 - Libraries, Special Collections, and Archives**

**Hours:** 24L

This course takes a hands-on approach to introduce students to different types of printed and manuscript primary and secondary sources. Students will learn to apply information literacy concepts, and library and archival theories to the analysis, critique, evaluation, and use of materials drawn from the University of Toronto’s collections of library, rare book, and archival materials.

This course will touch on current topics within information literacy, including, but not limited to, digitization, the ethical collection and use of oral and written information; post-colonial practices; racial, cultural, and gender representations; and archival neutrality.

**Prerequisite:** (BMS100H1, BMS200Y1, BMS201H1) or SMC219Y1  
**Exclusion:** SMC300H1 (Special Topics in Book and Media Studies I: Libraries, Special Collections and Archives), offered in Winter 2017, Winter 2018, Fall 2018 and Fall 2019

**BMS392H1 - Media Identities**

**Previous Course Number:** SMC392H1  
**Hours:** 24L

An exploration of media’s influence on the constructions and representation of identity and power relations across race, gender and class in individual and collective spheres. Applies a social justice and intersectional framework to media technologies and industries in order to expose socio-political influence on identity and to position media consumption and production as potential vehicles for restorative mediations of marginalized identities.

**Prerequisite:** (BMS100H1, BMS200Y1, BMS201H1) or SMC219Y1  
**Exclusion:** SMC392H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**BMS394H1 - Independent Study in Book and Media Studies**

**Previous Course Number:** SMC398H1

An independent research project to be proposed by the student and supervised by a full-time faculty member affiliated with the Book and Media Studies Program. Application forms are available from the SMC Principal’s Office. Not eligible for CR/NCR option.

Exclusion: SMC232H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

JCA302H1 - The Bible and the Big Bang

Hours: 12L/12T
The origin of the Universe is addressed both by current physical cosmology and by religious interpretations of the Bible. This course explores how these approaches to the cosmos's origins differ and how they might be mutually informative. Core concepts in each domain will be examined and definitions carefully distinguished (e.g., 'nothing', 'cause', 'matter'): topics will include the question of temporal beginnings (scientific theories of spontaneous creation or an eternal universe vis-à-vis the doctrine of creation from nothing) and the problem of cosmic fine tuning (the multiverse vis-à-vis the idea of divine intervention).

**Prerequisite:** Completion of 4.0 credits  
**Recommended Preparation:** AST101H1/AST201H1/AST121H1/AST221H1/AST222H1, SMC232H1/CHC232H1

### Mediaeval Studies

### MST210H1 - The Early Mediaeval Tradition

**Previous Course Number:** SMC210H1  
**Hours:** 24L/12T

An introduction to the thought and culture of early mediaeval Europe. Students are introduced to important monuments of early mediaeval History, Thought, Literature, and Art. They follow some of the common
threads that run through these disciplines and explore chief expressions of early mediaeval life and thought.

Exclusion: SMC210H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

MST211H1 - The Middle Ages and the Movies

Previous Course Number: SMC211H1
Hours: 24L/12T

This course examines the ways mediaeval themes have been presented in the cinema over the last century by taking exemplary films from different countries and epochs. The purpose is to explore each on three levels: the mediaeval reality, the subsequent legendary or literary elaboration, and the twentieth-century film rendition, regarded equally as work of art, ideology and economic product.

Exclusion: SMC211H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MST222H1 - Mediaeval Latin Literature

Previous Course Number: SMC222H1
Hours: 48S

This course studies a selection of Mediaeval Latin prose and poetry. Emphasis is on the linguistic differences between Mediaeval Latin and its classical antecedent, especially in regard to vocabulary, grammar and orthography. A review of Latin grammar is part of the course.

Prerequisite: SMC176Y1/LAT102H1
Exclusion: SMC222H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MST226H1 - King Arthur

Previous Course Number: SMC226H1
Hours: 24L

A survey of the Arthurian legends from the earliest Latin histories through selected Welsh, French and German Romances to the English-language classic, Morte d’Arthur of Malory. Emphasis will be on reading the primary sources (in translation).

Prerequisite: 5.0 credits
Exclusion: SMC226H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MST230H1 - The Middle Ages in Modern Life: Games, Television, and the Popular Imagination

Hours: 24L

Modern culture retains a fascination with the middle ages. In many cases, the Mediaeval world or more often ideas about the Mediaeval world, feature in modern entertainment, politics, or literature. This course explores the ways the middle ages have been interpreted and
reinterpreted in various aspects of modern culture such as role playing games, videogames, television, literature, and iconography.

**Distribution Requirements**: Humanities  
**Breadth Requirements**: Creative and Cultural Representations (1)

**MST231H1 - On the Move in Mediaeval Eurasia**

**Hours**: 24L

In this age of constant global travel, it is easy both to forget how much more complicated travel was in earlier periods, and to assume that there was very little of it. In the Mediaeval world, people travelled for work as traders, craftsmen and warriors; they travelled for their spirit as pilgrims; they travelled as migrants and refugees. This course will introduce students to the variety of people on the move in Mediaeval Eurasia, their motives, and the means they used to travel.

**Distribution Requirements**: Humanities  
**Breadth Requirements**: Creative and Cultural Representations (1)

**MST232H1 - How to Be a Barbarian:  
Beard, Battles and Belief at the Dawn of the Middle Ages**

**Hours**: 24L

Barbarians have caught the modern popular imagination, and they appear to be much the same: hairy warriors who destroyed civilization. The late antique period (c.300–c.600) was a time of transition and the meetings of several cultures. This course examines the so-called barbarians who entered and soon came to rule the former Roman provinces of western Europe in this period. Our particular focus is the cultural, religious, artistic, and socio-economic aspects of barbarian peoples, and how these intersected with the civilization of Rome.

**Distribution Requirements**: Humanities  
**Breadth Requirements**: Society and its Institutions (3)

**MST233H1 - Viking Cultures**

**Hours**: 24L

Everyone thinks they know who the Vikings were. Like many aspects of the middle ages popular in modern life, there is much that is inaccurate about this picture of the Vikings. This course explores how Vikings lived—what sorts of things they did for a living, how they amused and entertained themselves, and what they thought—and moves on to consider their rituals of death and their notions of the afterlife. It will be based both on reading a variety of texts produced by and about the Vikings, as well as looking at various objects they produced that have survived.

**Distribution Requirements**: Humanities  
**Breadth Requirements**: Creative and Cultural Representations (1)

**MST234H1 - Women's Lives in Mediaeval Europe**

**Hours**: 24L

Using an interdisciplinary lens, this course explores the experiences of Mediaeval women. Some attention will be given to subjects such as the idea of the Mediaeval feminine, holiness and femininity, and appropriate feminine behaviour. At the same time, we will look at the social and cultural roles of women in society for instance the gendered ideals of marriage, guild structures, and childrearing.

**Distribution Requirements**: Humanities  
**Breadth Requirements**: Thought, Belief and Behaviour (2)

**MST242H1 - Mediaeval Mythologies and Methodologies**

**Hours**: 24L

The idea of the ‘middle ages’ is pervasive in Western thought, but only some of what is ‘traditional’ actually happened. This course introduces various interpretations, constrictions, and re-creations. Our analysis will draw on literary texts and their various interdisciplinary interpretations and applications.

**Distribution Requirements**: Humanities  
**Breadth Requirements**: Creative and Cultural Representations (1)

**MST301H1 - Special Topics in Mediaeval Studies**

**Hours**: 24L

A senior-level special topics seminar in Mediaeval Studies as determined by the instructor.
**MST323H1 - Mediaeval Latin Prose**

Previous Course Number: SMC323H1  
Hours: 48S

Comprising an immersion in Mediaeval Latin prose texts, this course gives students a deepened acquaintance with the linguistic features of Mediaeval Latin, as well as with its literature, and generic and stylistic conventions. A solid foundation in basic Latin morphology, syntax and vocabulary is assumed.

Prerequisite: LAT202H1/MST222H1  
Exclusion: SMC323H1  
Distribution Requirements: Humanities  
Breadth Requirements: Creative and Cultural Representations (1)

**MST328H1 - Mediaeval Latin Poetry**

Previous Course Number: SMC328H1  
Hours: 48L

This course studies selections from the rich variety of Mediaeval Latin poetry, rhymed as well as rhythmic, and provides a survey of prosody and metrics. A solid foundation in basic Latin morphology, syntax and vocabulary is assumed.

Prerequisite: LAT202H1/MST222H1  
Exclusion: SMC328H1  
Distribution Requirements: Humanities  
Breadth Requirements: Creative and Cultural Representations (1)

**MST324H1 - The Study of the Bible in the Middle Ages**

Previous Course Number: SMC324H1  
Hours: 24L/12T

This course explores mediaeval biblical commentary and the various approaches taken by the exegetes to uncover the secrets of the sacred page, for instance through the four senses of Scripture: history, allegory, tropology, and anagogy.

Exclusion: SMC324H1  
Recommended Preparation: MST210H1/MST212H1  
Distribution Requirements: Humanities

**MST326H1 - Mediaeval Music: thought and practice**

Previous Course Number: SMC326H1  
Hours: 24L

An introduction to musical theory and practice in the middle ages: sacred and secular music, monophony and polyphony, performers and patrons, notation and orality. No prior background in music or ability to read music is required.

Prerequisite: CHC203Y1/SMC206H1/MST210H1/MST212H1/MUS111H1  
Exclusion: SMC326H1  
Distribution Requirements: Humanities  
Breadth Requirements: Thought, Belief and Behaviour (2)

**MST340H1 - Mediaeval Genders and Sexualities**

Hours: 24L

This course explores ideas of gender and sexuality in the mediaeval world. In particular it examines the links between the two throughout history, the social religious, and literary ideas of marriage and reproduction. Through close readings of primary sources including literature, canon law, penitentials, sermons, and medical treatises, students will explore the boundaries between the worlds of biology and culture.

Prerequisite: Completion of 9.0 credits  
Recommended Preparation: MST210H1, MST212H1  
Distribution Requirements: Humanities  
Breadth Requirements: Thought, Belief and Behaviour (2)

**MST341H1 - Middle Ages by the Numbers**

Hours: 24L

Numbers and their uses often appear to be absolute fact: a thousand dollars is exactly that, not more or less; and if you weigh fifty kilos, that’s what you weigh. But the use and meaning of numbers—for recording and counting dates, money, weights, distances, and myriad other functions—is not, in fact, devoid of cultural, historical, and political context. Mediaeval Europe provided a bewildering range of calendric systems, currencies, systems of
measurement, and numerical symbolism was much used in art, music, religious thought, and literature. This course provides an introduction to the various uses of numbers in this period across different regions and cultural contexts.

**Prerequisite:** Completion of 9.0 credits  
**Recommended Preparation:** MST210H1, MST212H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

### MST358H1 - The Mediaeval Book

**Previous Course Number:** SMC358H1  
**Hours:** 24S

This course examines the most salient aspects of mediaeval manuscript culture. We will study, first, how the parchment for books was folded, pricked, ruled and bound, and second, what scripts were employed in the different codices. We will also examine the various types of books made in the Middle Ages and the challenges they pose to modern scholars.

**Exclusion:** SMC358H1  
**Recommended Preparation:** LAT102H1, MST210H1/MST212H1 or a course in mediaeval history.  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### MST359H1 - Mediaeval Theology

**Previous Course Number:** SMC359H1  
**Hours:** 24L

An introduction to the discipline of theology as taught in the mediaeval schools. Building on a basic knowledge of Christian scriptures and of philosophical argument, this course will offer an organic exposition of mediaeval theology, together with an introduction into the scientific method of theological investigation as practised in the Middle ages.

**Exclusion:** SMC359H1  
**Recommended Preparation:** MST210H1/MST212H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

### MST361H1 - Mediaeval Law

**Previous Course Number:** SMC361H1  
**Hours:** 24S

Mediaeval jurisprudence combines the high technical quality of Roman law with the requirements of Christianity. The seminar provides an overview of the development of mediaeval learned jurisprudence; select texts from Roman and canon law, with their glosses, are read in order to explore more specifically the methods and concerns of mediaeval jurists.

**Exclusion:** SMC361H1  
**Recommended Preparation:** HIS220Y1/MST210H1/MST212H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

### MST401H1 - Advanced Topics in Mediaeval Studies

**Hours:** 24L

In this course, students will have an opportunity to take a graduate seminar at the Centre for Medieval Studies, one of the world’s premier research institutions in the field. Depending on the nature of the seminar, the instructor, the SMC program coordinator, and the student will determine a method of assessment appropriate for an undergraduate student while still pushing the student’s boundaries to be able to participate in weekly discussions in a graduate seminar along with MA and PhD students. Course forms are available from the SMC Principal's Office.

**Prerequisite:** MST210H1, MST212H1, 9.0 credits  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

### MST406H1 - Mediaeval Seminar II

**Previous Course Number:** SMC406H1  
**Hours:** 12T/24S

A fourth-year seminar on a topic to be determined annually. Refer to the St. Michael's College website for more information.

**Prerequisite:** 1.0 credit in MST courses  
**Recommended Preparation:** MST210H1/MST212H1 or other mediaeval courses  
**Distribution Requirements:** Humanities

### MST407Y1 - Mediaeval Seminar I

**Previous Course Number:** SMC407Y1  
**Hours:** 24T/48S
A fourth-year seminar on a topic to be determined annually. Refer to the St. Michael's College website for more information.

**Prerequisite:** 1.0 credit in MST courses  
**Recommended Preparation:** MST210H1/MST212H1 or other mediaeval courses  
**Distribution Requirements:** Humanities

### MST435H1 - Independent Studies in Mediaeval Studies

**Previous Course Number:** SMC435H1  
An independent research project to be proposed by the student and supervised by a member of faculty affiliated with the Mediaeval Studies Program. Application forms are available from the SMC Principal's Office. Not eligible for CR/NCR option.

**Prerequisite:** Completion of 10.0 credits and written approval of the Program Coordinator and Program Director  
**Distribution Requirements:** Humanities

### MST436H1 - Advanced Latin Seminar

**Previous Course Number:** SMC436H1  
**Hours:** 24S  
This seminar is devoted to the in-depth study of one or a number of related Mediaeval Latin text(s) in their linguistic, historical, and intellectual context. Readings in the original Latin will be discussed and commented upon by students.

**Prerequisite:** MST323H1/MST328H1  
**Recommended Preparation:** MST210H1/MST212H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### MST442H1 - Mediaeval Skills and Methodologies

**Hours:** 24L  
This course focuses on the skills and tools necessary for graduate research in mediaeval studies. It introduces palaeography, codicology, and diplomatics, as well as other lexical and conceptual tools needed for dealing with mediaeval primary sources.

**Prerequisite:** MST210H1, MST212H1, 9.0 credits  
**Recommended Preparation:** MST242H1

### Distribution Requirements:
- Humanities

### MST490Y1 - Senior Essay in Mediaeval Studies

**Previous Course Number:** SMC490Y1  
**Hours:** 24S  
A scholarly project chosen by the student in consultation with a faculty member and approved by the Program Coordinator. Arrangements for the choice of topic and supervisor must be completed by the student before registration. The project will be accompanied by a research seminar component. Not eligible for CR/NCR option.

**Prerequisite:** Completion of 10.0 credits and written approval of the Program Coordinator and Program Director  
**Distribution Requirements:** Humanities

SMC457H1 - Directed Research

Hours: 24S

Based on a professor's research project currently in progress, this course will enable an undergraduate student to play a useful role in the project while receiving hands-on training in research. Not eligible for CR/NCR option.

Prerequisite: Completion of 10.0 credits and written approval of a faculty supervisor and the SMC Principal.

Distribution Requirements: Humanities
Introduction

The Sexual Diversity Studies program (Specialist, Major, Minor) enables students to explore, analyze, and challenge the ways in which sexuality shapes people's lives in both local and global contexts. The program provides vibrant interdisciplinary scholarship and academic learning on the historical and contemporary formations of sexual practices at the intersections of race, class, gender, disability, and citizenship status, among other social relations and processes. Our courses are designed to foster critical conversations of queer and normative sexualities; the formation of sexual, racial, and gender, and gender-non-conforming personhood; and the role of sexuality in culture and politics both in North America and transnationally.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(10.0 credits, including 4.0 credits at the 300+ level, 1.0 credit of which must be at the 400-level.)

1. One course from: WGS160Y1, NEW240H1/CSE240H1, or SOC209H1. Students may substitute with another introductory course that emphasizes intersectionality of sexuality, with the approval of the Director or Undergraduate Director.

2. SDS Foundational Courses (1.5 credits):
   - SDS255H1: Histories of Sexuality
   - SDS256H1: Methods in Sexual Diversity Studies
   - SDS355H1: Theories of Sexuality

3. Thematic Clusters (3.0 credits): 1.0 credit from each of the three Thematic Clusters.

Sexual Diversity Studies Courses

SDS199H1 - Sexuality at the Intersections

Hours: 24L

This First-Year Foundations seminar will explore sexuality at the intersections of race, gender, class, disability, citizenship status, and geography, among other social relations and processes as a foundational practice in Sexual Diversity Studies. In an intimate seminar setting, students will develop reading, writing, and presentation skills necessary for engaging in Sexual Diversity Studies across a wide array of disciplinary traditions. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities, Social Science
Breadth Requirements: Society and its Institutions (3)

JSU237H1 - Introduction to HIV/AIDS: Health, Sexuality and Gender

Previous Course Number: UNI237H1
Hours: 24L

A critical examination of the HIV/AIDS global pandemic from a multidisciplinary perspective and with an emphasis on sexuality. The course examines the basic biology of HIV/AIDS and then covers social, historical, political, cultural, gender, and public health aspects of HIV/AIDS. Attention is given to the distinct features of vulnerable and marginalized populations, prevention, treatment, drug development, and access to medicines.

JSU237H1 is particularly intended for students in the Health Studies and/or Sexual Diversity Studies programs.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SDS256H1 - Methods in Sexual Diversity Studies

Previous Course Number: UNI256H1
Hours: 24L/12T

This course examines a variety of methodological approaches used in humanities and humanist social sciences concerning sexuality and gendered diversity. Students will explore some of the popular methods in sexuality studies including ethnography, archival research, visual cultural studies, oral history, and media and discourse analysis.

Exclusion: UNI255H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SDS257H1 - Histories of Sexuality

Previous Course Number: UNI257H1
Hours: 24L/12T

An interdisciplinary examination of sexuality across cultures and periods. How are sexualities represented? How are they suppressed or celebrated? How and why are they labeled as straight, gay, lesbian, bisexual, queer, or perverse? How do sexualities change with race/ethnicity, class, gender, and geographies?

SDS279H1 - Queer Popular Culture

Previous Course Number: UNI379H1, SDS379H1
Hours: 24L

This introductory course examines the critical relationship between popular culture and queer sexualities in historical and contemporary contexts. The course will draw upon literature from performance studies, media studies, and queer of colour cultural productions. Students will engage with a range of queer public cultures and arts, including drag performance, queer musics, social media networks, and popular media.

Exclusion: SDS379H1, UNI379H1
Recommended Preparation: Introductory course in Sexual Diversity Studies, Women and Gender Studies, or Equity Studies
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

JSR312H1 - Queer Religion and Religiosities

Hours: 24L

This course will introduce students to key terms, theories, and debates in Queer and Religious Studies and to the history of queer identities as they are expressed within various religious traditions, texts, and communities. It asks how dominant heteronormative discourses on gender and sexuality are adhered to, legitimized, negotiated, and
contested within various religious traditions. The course will also allow students to interrogate how power and power relationships are shaped by sex, gender, sexuality, race, ethnicity, class, age, and ability in the world of religion.

**Prerequisite:** Completion of 4.0 credits
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**JPS315H1 - Sexual Diversity Politics**

**Hours:** 24L

This is an interdisciplinary course examining the development of the Lesbian, Gay, Bisexual, Transgender and Queer (LGBTQ) movement and its interaction with the state in the US and Canada. *(Given by the Department of Political Science and the Sexual Diversity Studies Program)*

**Prerequisite:** SDS255H1/SDS256H1/UNI255H1/UNI256H1/one full course on the politics of 20th century Europe, U.S., or Canada/one full course on gender or sexuality/permission of the instructor

**Exclusion:** JPU315H1
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)

**JSU325H1 - Queerly Canadian**

**Previous Course Number:** UNI325H1
**Hours:** 36L

This course focuses on Canadian literary and artistic productions that challenge prevailing notions of nationality and sexuality, exploring not only how artists struggle with that ongoing Canadian thematic of being and belonging, but also celebrate pleasure and desire as a way of imagining and articulating an alternative national politics.

**Prerequisite:** SDS255H1/SDS256H1/CDN267H1 (formerly UNI267H1)/CDN268H1 (formerly UNI268H1) or permission of the instructor

**Exclusion:** SDS375H1 Special Topics: Queerly Canadian, UNI325H1

**Breadth Requirements:** Creative and Cultural Representations (1)

**SDS345H1 - Sex and the Epidemic: Social Work, HIV, and Human Sexuality**

**Previous Course Number:** UNI345H1
**Hours:** 36L

HIV has forever changed the way human beings understand sexuality. Through a social justice lens, this course examines the nature of community norms, laws, popular media, and the academy to explore how the epidemic has impacted the provision of social services in relation to the diversity of human sexuality.

**Prerequisite:** 0.5 credit in SDS
**Exclusion:** UNI345H1
**Recommended Preparation:** JSU237H1
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)

**SDS346H1 - Feminist and Queer Approaches to Technology**

**Previous Course Number:** UNI346H1
**Hours:** 24L

What do electronic technologies mean for feminist and queer identity, activism, sociability, art, and politics? This course considers a range of critical pressure points central to digital studies, including social networking, participatory media, digital archives, databases, new media activism, performance, embodiment, and representations of race, gender, and sexuality in electronic contexts.

**Prerequisite:** 0.5 credit in SDS
**Exclusion:** UNI346H1
**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**SDS354H1 - Theories of Sexuality I: Western Trajectories**

**Previous Course Number:** UNI354H1
**Hours:** 24L

This course offers a survey of some key texts and narratives that have traversed and structured Western conceptualizations of sexuality from Greek antiquity to the 19th century. We will examine a variety of literary, philosophical and medical sources in light of what they say about past conceptualizations of the body, desire and its pleasures, and we will ask how they resonate with, or radically differ from, our current understandings of bodily norms, passions and transgressions.
Prerequisite: SDS255H1/SDS256H1/UNI255H1/UNI256H1
Exclusion: UNI354H1
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

SDS355H1 - Theories of Sexuality

Previous Course Number: UNI355H1
Hours: 24L

This course introduces students to key theories of sexuality and sexual diversity. The main goal is to create a framework for understanding sexuality at its intersections with race, gender, class, disability, citizenship status, and geography among other social relations and processes at an advanced level. Closely tracing sexuality’s intersections, course readings will draw upon critical race theory, postcolonial critique and decolonizing movements, women of colour feminisms, trans studies, and transnational sexuality and gender studies.

Prerequisite: 4.0 credits
Exclusion: UNI355H1
Recommended Preparation: Some coursework in intersectionality of gender or sexuality
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Society and its Institutions (3)

SDS365H1 - Sexuality and Law

Previous Course Number: UNI365H1
Hours: 24L

The course explores the legal regulation of sexuality. How does law understand, constitute and regulate sex, sexuality and sexual diversity? It will consider the role of different types of regulation, including criminal law, family law and constitutional law, and explore issues ranging from sex work and pornography to same sex marriage to transgender discrimination.

Prerequisite: 0.5 credit in SDS
Exclusion: UNI365H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SDS375H1 - Special Topics in Sexual Diversity Studies A

Previous Course Number: UNI375H1
Hours: 24L

Topics vary from year to year depending on instructor. This seminar is intended to expose students in the Sexual Diversity Studies program to topics that may not be covered by permanent university courses.

Prerequisite: 0.5 credit in SDS
Exclusion: UNI375H1
Distribution Requirements: Humanities, Social Science

SDS376H1 - Special Topics in Sexual Diversity Studies B

Previous Course Number: UNI376H1
Hours: 24L

Topics vary from year to year depending on instructor. This seminar is intended to expose students in the Sexual Diversity Studies program to topics that may not be covered by permanent university courses.

Prerequisite: 0.5 credit in SDS
Exclusion: UNI376H1
Distribution Requirements: Humanities, Social Science

SDS377H1 - Lesbian Studies: Identity/Theory/Culture

Previous Course Number: UNI377H1
Hours: 24L

This multidisciplinary course examines multiple lesbian identities that have varied in time and place. The course will pose such questions as: What does lesbian mean? Why have changes occurred in meaning? How has the identity of lesbian been culturally represented and politically expressed in various social and political contexts? It will also take up contemporary theoretical, cultural, and political understandings of lesbianism.

Prerequisite: 0.5 credit in SDS
Exclusion: UNI377H1
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Society and its Institutions (3)

JPS378H1 - Sex and the State

Hours: 24L

What role have sex and sexuality played in the formation of the modern nation State? How has the State regulated sex? This course explores these questions with a theoretical focus on biopolitics. We will proceed in two parts. First, we engage Foucault’s History of Sexuality and its reception by postcolonial theorists, focusing on questions of state building. The second part of the course
shifts examination from State formation to contemporary forms of sexual regulation by the State. This includes maintenance of the public/private divide, citizenship law and nationalism, administrative violence and the prison industrial complex, and neoliberalism and BDSM. By the end of the course, students are able to apply core theoretical concepts and identify forms of contemporary sexual regulation in a variety of Western and non-Western contexts.

(Given by the Department of Political Science and the Mark S. Bonham Centre for Sexual Diversity Studies.)

Introduction

For over one thousand years the countries of the Slavic world have played a prominent role in international life, and have provided our civilization with numerous writers, musicians, philosophers, religious and political thinkers, and scientists of note. The richness of the Slavic cultures has a special significance for Canada, since the vast influx of Slavs, which began in the last century, has contributed greatly to the Canadian cultural mosaic.

The Department of Slavic Languages and Literatures offers an extensive range of courses in Russian, Polish, Ukrainian, Czech and Slovak, Bosnian, Croatian, and Serbian languages, literatures, culture, and film as well as in Slavic linguistics. Within this range there are courses suitable for inclusion in a wide variety of programs of study, whether or not the student has studied any Slavic language previously. Some students may specialize in Slavic Languages and Cultures, i.e. Russian, Polish or Ukrainian (see Programs of Study). Others may simply wish to gain a working knowledge of Russian or another Slavic language to aid their reading of important material in another field. Language study emphasizes small instructional groups, with some laboratory or conversational practice, and the use of literary materials.

Courses in the literatures and cultures of various Slavic countries explore the artistic, intellectual, and social currents of their civilizations, trace the literary history of each country, and examine the works of major authors. Many of our literature, culture, and film courses are taught in English and do not require special linguistic preparation.

The growing importance of Eastern Europe in contemporary affairs has had the effect of making academic study of this area especially lively and relevant. The student whose interest in the Russian or East European world is political, historical, or sociological can specialize in Russian and East European Studies, or pursue a course in Political Science, History, or Sociology, and at the same time take language courses, and perhaps selected courses in literature, in this Department. Students planning to specialize in Economics, Psychology, Mathematics, or any number of other fields, who have a special interest in the Russian or East European area, will find an advanced knowledge of Russian or of another Slavic language an important intellectual and professional asset.

Students intending to take a Program offered by the Department are asked to study carefully the Programs of Study and are urged to begin their language training as soon as possible. A Departmental brochure is available on request.

**Faculty of Arts & Science Language Citation**

The Department of Slavic Languages and Literatures participates in the Faculty of Arts and Science’s Language Citation initiative. Students may achieve this Citation in Bosnian, Croatian, Czech, Polish, Russian, Serbian, and Ukrainian. Students interested in completing the Language Citation in languages taught in the Slavic Department but not listed here should consult the Undergraduate Coordinator of the Department of Slavic Languages and Literatures.

Language study is a demanding and intellectually rewarding educational experience. Our students learn to communicate both orally and in writing in other languages and are thus able to experience other parts of the world in more intimate ways. Their access to other cultures opens doors for further study and employment. Students in our department also have the opportunity to read a vast array of world-renowned authors in the original languages, as well as works – normally not available in English – in other areas of study, for example, cinema studies, drama, folklore, history, intellectual history, philosophy, mathematics, and political science.

The Language Citation recognizes a significant level of achievement in language study. For course selection students should consult the Undergraduate Coordinator as early as possible since not every language course is offered each year. Students who begin language study at the Intermediate level should consult the Undergraduate Coordinator for approval of advanced literature and culture courses that may satisfy the requirements for the Language Citation.

The Language Citation in Bosnian, Croatian, or Serbian is available to students who complete SLA257H1, SLA277H1, and an additional credit in South Slavic literature or culture with readings and discussion in the target language with a grade of at least B-. The Language Citation in Macedonian is available to students who complete SLA209H1, SLA213H1 and an additional credit in South Slavic literature or culture with readings and discussion in the target language with a grade of at least B-. Consult the Undergraduate Coordinator for approval of advanced literature and culture courses that may satisfy the requirements for the Language Citation.

The Language Citation in Czech is available to students who complete SLA204Y1 and one (1.0) additional credit in Czech literature or culture with readings and discussion in the target language with a grade of at least B-.

The Language Citation in Polish is available to students who complete SLA206H1, SLA207H1, SLA306H1 and SLA336H1 with a grade of at least B-.
The Language Citation in Russian is available to students who complete, with a grade of at least B-, 2.0 credits from: **SLA220Y1, SLA320Y1, or SLA420Y1**.

The Language Citation in Ukrainian is available to students who complete **SLA208Y1** as well as one (1.0) additional credit in Ukrainian literature or culture with readings and discussion in the target language with a grade of at least B-. Transfer language credits also eligible.

Students should note that, as explained in the About Programs of Study section of this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

**Regarding Slavic Languages and Literatures Courses**

**Note:** The Department reserves the right to place students in the language course best suited to their linguistic preparation

**Bosnian, Croatian, Macedonian and Serbian Courses:**
Please see South Slavic Courses

**Macedonian Courses:** Please see South Slavic Courses

**Russian language student placement policy**
All students who have studied Russian outside the University of Toronto must take a language placement test prior to enrolling into a Russian language course. Contact the Department for test dates and times.

Native speakers of Russian are not allowed to enrol into any Russian language course, with the exception of **SLA330H1**. Native speakers may enrol into any Russian literature and culture course, and any Russian program of study (language requirement will be replaced with the equivalent number of literature and culture credits in consultation with the Undergraduate Coordinator).

Heritage speakers of Russian are allowed to enrol into a Russian language course only by special permission from the Russian language program coordinator, Prof. Julia Mikhailova (julia.mikhailova@utoronto.ca) but are encouraged to enrol in **SLA210H1** and **SLA410H1**, courses specially designed for them. Heritage speakers may enroll into any Russian literature and culture course, and any Russian program of study (if necessary, language requirement will be replaced with the equivalent number of literature and culture credits in consultation with the Undergraduate Coordinator).

**Who are native and heritage speakers of Russian?**

For academic purposes, the Department considers a student to be a native speaker of Russian if they meet one of the following criteria:

1. The student left Russia at the age of 10 or later.
2. The student lived in a Russian-speaking country (any former Soviet republic) before the age of 10 and did elementary schooling in Russian.

For academic purposes, the Department considers a student to be a heritage speaker of Russian if they meet one of the following criteria:

1. The student left Russia before the age of 10.
2. The student lived in a Russian-speaking country (any former Soviet republic) before the age of 10 but did elementary schooling in a language other than Russian.
3. The student was born and/or grew up outside of a Russian-speaking country but speaks some Russian at home.

It is the responsibility of individual students to furnish documentation proving their native- or heritage-speaker status. In the absence of such documentation, the Department reserves the right to deny enrolment into Russian language courses. Heritage and native speakers of Russian who enroll in a Russian language course and fail to identify themselves to the Department engage in cheating and will be treated in accordance with the university policy on academic misconduct.

Slavic Languages and Literatures Courses

Slavic First-Year Foundations

SLA190H1 - Losing It

Previous Course Number: SLA201H1
Hours: 24S

How does one cope with loss, be it a nose, a leg, a pet, a name, a lover, a battle, a fortune, or one’s sanity? Through literary texts from Central and Eastern Europe, we explore the trauma and poetics of losing, and the mechanisms of coping with and compensating for the lost object. Taught in English, all readings in English. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: SLA201H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA191H1 - The Criminal Mind

Hours: 24S

In the mid-nineteenth century, European and American fiction became obsessed with the subject of criminals. This course examines this preoccupation and its literary and social ramifications. We discuss the changing image of the criminal in British, French, Russian and American fiction. Readings by Dickens, Dostoevsky, Balzac, Zola, Poe, Stevenson and Lombroso. Reading and discussion in English. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA192H1 - On the Road in Eastern Europe

Hours: 24S

This course examines the function of travel within texts and films depicting journeys through Eastern Europe. We will distinguish various types of journeys, the narrative and cultural expectations they imply, and the ways that travel relates to individual identity, raising questions about nationality, race, gender, sexuality, and the Other. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA193H1 - Objects of War

Hours: 24L

An object or a thing always has a collective history. It speaks of the political and the social conditions under which it was made. In this course, objects of war – the material culture of conflict – from the 20th and 21st centuries will be critically and historically examined. How do these objects speak of violence, politics, and culture, but also rewrite and influence the arenas within which they circulate? Some objects include: canned food, drones, the journalists’ hotel, helmets, tents. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA194H1 - Utopia Interrupted: Late and Post-Soviet Russian Literature

Hours: 24S

Almost 30 years after the collapse of the Soviet Union, what can we understand about its culture and people, and its impact on the popular imagination in the West? To answer these questions, the course introduces students to canonical literary and cinematic works from the post-Stalin era to the present, with particular attention to the literary and cultural peripheries. Some of the topics will include: Gulag, or Return of the Repressed, Counter-Culture, Space Race, Immigration, Gender, Perestroika, and Putin’s Russia. All readings in English. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA195H1 - Literature and Painting in Russia and the West

Hours: 24S

What makes literature ‘visible’? How do the verbal and the visual coexist? This seminar explores the relationship
between words and images, texts and pictures through history, in Russia and the West. Special attention will be paid to the figure of the artist. Is it a writer's *alter ego*, the incarnation of creativity, or just a character among others? Literary texts (mainly short stories) from Balzac and Gogol to Chekhov and O. Henry, Maugham and Bunin, Nabokov and Camus will be studied along with the paintings of some major 19th-20th century artists. The comparative dimension of the course will help students contextualize Russian literature and think about its relationship with the Western canon. We will also watch some 21st century films about artists (such as Julie Taymor's *Frida* [2002], Milos Forman *Goya's Ghosts* [2006], and Mike Leigh *Mr. Turner* [2014]). All texts will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**SLA196H1 - Russia at War**

**Hours:** 24S

In its long history Russia has fought numerous wars, both defensive and offensive, and these wars have inspired a rich, complex, contradictory poetic response. We examine Russian war narratives starting with the medieval period and ending with the Second World War and including epic poetry, songs, stories, novels, paintings, and films. We will study the depiction of war and the image of the soldier (or warrior) in different genres and time periods, as well as the historical circumstances in which the different works were produced and the respective audiences for which they were intended. All texts will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**SLA197H1 - The Imaginary Jew**

**Hours:** 24S

The course examines the genesis and evolution of the image of the Jew, central to all European cultures, from the theology and psychology of Christian anti-Judaism to their reflection in folklore, visual, plastic, and verbal arts, and to the survival of the imaginary Jew in secular forms. Special attention is given to the Jews of Slavic and East European imagination. All readings are in English. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**SLA198H1 - The Slavic Grecian Formula: From Ancient Rhapsode to Modern Slav Song**

**Hours:** 24S

Slav singers of heroic tales about war, lust, honour and revenge have made a special contribution to our appreciation of classical literature and mythology. We will compare Slavic epics and African-American rap songs to reveal the connection between Homer's *Iliad* and Nas's iconic *Illmatic*, between the mythical image of the pagan goddess Aphrodite and the mystique of Nicki Minaj, Lauryn Hill, and other iconic singers today. As we read *The Iliad* closely, we will study songs from the Russian, Bosnian Muslim, Croatian and Serbian traditions. Employing new performance formulaic theory, we will learn that they share much, in melody and message, with the work of today's hip-hop artists, whose roots of rap "flowing" reach back to the beginnings of Western literature and the epic singers of ancient Greece. Students will have the opportunity to interact with a unique online multimedia edition of an epic song by a traditional Slavic singer.

No knowledge of languages other than English is required. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)

**SLA199H1 - Invisible Kingdom, Imaginary Space**

**Hours:** 24S

The Central European Region of Galicia gave rise to a remarkable array of literary representations -- Austrian, Jewish, Polish, and Ukrainian -- animating fantastic creatures, powerful myths, deviant pleasures, and sublime stories. Bruno Schulz created shimmering peacocks, Leopold von Sacher-Masoch seized ecstasy through pain, and Ivan Franko investigated the effects of avarice and social decay.

**Distribution Requirements:** Humanities
**Breadth Requirements:** Creative and Cultural Representations (1)
Slavic Interdisciplinary Courses

SLA103H1 - Slavic Civilizations

Hours: 24L

A survey of Slavic civilizations through literature, art, architecture, and film. Key moments in the development of the cultures of Slavic countries are examined in a comparative framework, juxtaposing the varied historical, cultural, linguistic, religious, social, and political developments of the countries involved. Taught in English, all readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA104H1 - Cities of the Mediterranean

Hours: 24L

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SLA203H1 - Faking It

Hours: 24L

The role of forgery in cultural, national, and personal identities. A scholar “discovering” an “ancient” manuscript, a noblewoman in disguise joining the army, an impostor conning a provincial town, a writer faking political loyalty. Literary texts from Central and Eastern Europe expose the porous boundaries between authenticity and lies, highlighting the artificiality and vulnerability of social and cultural conventions. Taught in English, all readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA200H1 - Culture and Politics in Europe

Hours: 24L

Introduction to the issues of the interaction between cultural expression and political life, with a historical focus on 1968 in Central and Eastern Europe. The mutually influential relationship between artistic activity and political dynamics in modern societies is examined through literature, visual arts, drama, music, and film. Taught in English, all materials in English.

Distribution Requirements: Humanities

SLA214H1 - Slavic Languages through Creative Writing

Hours: 24P

A course for students of Czech and Slovak, BCS and Russian. Improve your writing skills in a group of different Slavic language learners. Learn simple creative writing in different genres. This course presents a catalogue of different methods and strategies for individual learners at various stages of writing in a foreign language. Complements rather than substitutes for intermediate and advanced levels of the languages taught.

Prerequisite: SLA105Y1 or SLA107Y1 or (SLA100H1 and SLA101H1)
Corequisite: SLA204Y1 or (SLA257H1 and SLA277H1) or SLA220Y1 or SLA320Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SLA222H1 - Forging Identities: The Roms of Central and Eastern Europe

Hours: 24S

Both in popular culture and the headlines, Roma (Gypsies) are often depicted as either romantic or negative. Roma and Slavs have interacted for centuries and this course examines the history of that interaction with particular emphasis on linguistic and educational rights. Taught in English, all readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

SLA229H1 - Writing with Images: Eastern and Central European History Through the Graphic Novel

Hours: 24L

This course examines how East and Central European graphic novelists retell the history of the 20th century in images and words. Our focus is the medium. How do comics effect the relationship between the personal and national? Can graphic novels substitute history textbooks?

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA235H1 - After Communism: Literature and Art Post-1989

Previous Course Number: SLA377H1
Hours: 24S

This course examines the era inaugurated by the collapse of the state-socialist regimes in the former Eastern Bloc, marked by political turmoil, major economic restructuring, and social ambivalences. The course investigates topics such as: socialist legacy and nostalgia, mass emigrations and refugee crises, conflicts over national identity and borders, sociocultural anxieties about inclusion in the EU, perspectives on the future of socialist thought and practice in Eastern Europe.

Exclusion: SLA377H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA253H1 - Origins of Russia and Ukraine

Previous Course Number: SLA102H1
Hours: 24L

A survey of Ukrainian and Russian civilizations through art, architecture, literature, and religion. Includes the Scythians, whose battle skills and gold fascinated the ancient world; Kyivan Rus’ and its princes, monks and martyrs; rise of the Cossacks; and Peter the Great, founder of the Russian Empire and St. Petersburg. Taught in English, all readings in English. No background knowledge required.

Exclusion: SLA102H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA254H1 - Stone Books to Sky Books: The Book as Institution, Commerce and Art

Hours: 24L

Evolution of the book and printed media in Central and Eastern Europe: legends (and forgeries) of ancient letters, mediaeval illuminated manuscripts, forbidden and "supernatural" books, hand-written and painted books of modernist and avant-garde artists, books as a way of living and dying. Readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SLA256H1 - Firebirds and Other Wonders: The World of Slavic Folklore

Hours: 24L/12T

An introduction to the comparative study of folk narratives – fairy-tales, legends, epics, from Russia, Central and Eastern Europe, and the Balkans. Topics include the structural and psychological analysis and interpretation of oral folk traditions; the cultural specificity of Slavic folklore; its adaptation and treatment in literature, music, and visual arts. Taught in English, all readings in English.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SLA268H1 - Cossacks!

Hours: 24S

How are Cossacks depicted in literary and visual works? Were they the agents of a repressive Russian government, the hirelings of Polish kings, the tormentors of Eastern European Jews, the protectors of Europe from the Ottomans, or the liberators of the Ukrainian nation? We read works from the Jewish, Polish, Russian and Ukrainian cultural traditions.

These images may include a historical painting by Matejko, a photo of the Solidarity strikes in 1980, a screenshot from a Wajda film, or a literary passage from a Gombrowicz novel. Apart from serving as an introduction to Polish cultural studies, this course provides students with analytical tools to read diverse cultural texts. This is a blended course combining online modules with four on-site discussion meetings per semester.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### SLA266H1 - War and Culture

**Hours:** 24S

Poland and Europe 1914-1945. As we commemorate the centenary of the outbreak of WWI, this cataclysmic event that launched the 20th century and was followed by another total war soon after still defines our view of the world and understanding of it. It may be time now to look anew at how various forms of expression, including literature, film, theatre, painting and sculpture produced during the two wars, between them or many decades later deal with the extreme and everyday experiences, with shattered worlds of individuals, ethnicities, and nations.

**Prerequisite:** SLA216H1 or permission of instructor  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### SLA306H1 - Conversations-Inspirations: Everyday Polish

**Hours:** 48P

Through a series of thematic modules based on everyday communicative situations in contemporary Poland students develop Polish language skills in the four linguistic competencies: listening, reading, writing, and speaking. The course is based on a communicative-functional approach to language. It means that even though students are regularly exposed to new grammatical structures, their work focuses primarily on practical, diverse uses of language in real-life situations.

**Prerequisite:** SLA206Y1 or SLA207H1 or permission of instructor  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### SLA336H1 - Let's Talk! Advanced Polish

**Factor-Inwentash Faculty of Social Work**

**Social Work Courses**

**SWK301H1 - Qualitative Research Methods: Meaning-Making in Social Contexts**

*Hours: 24L*

Qualitative research uses text as units of analysis based on data collected through interviews, policy documents, archival materials and various forms of media. Students are provided with conceptual understandings and tools to explore how people, community members, helping professionals, administrators, and policy makers make meaning of their world(s) in the context of their whole lives. In this course students will: be introduced to interpretive and constructivist qualitative research methods; learn how to assess the ethics and rigor of qualitative research; and develop the ability to assess qualitative research and evaluate implications for people and social change.

**Prerequisite:** Completion of 9.0 credits

**Exclusion:** SOC204H1

**Recommended Preparation:** Some familiarity with any research methods, theories of ethics, and critical thinking

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**SWK302H1 - Aging, Law and Policy**

*Hours: 36L*

This course will examine selected areas in aging that reflect current issues and future directions with respect to law and health/social policy, and will delve into how they are impacted in the time of COVID-19. The focus will be on essential elements of the law and policy and their links to the context of aging in Canada. The course will consider "issues on the ground" where each topic will be explored from "alternative viewpoints", presenting both a legal and policy perspective with the aim of making connections between law, policy and current best practices. The longstanding debate about whether the consequences of individual and population aging should be viewed as private troubles or public issues continues to influence law and policy in the areas of health care, community services, income security and housing, especially for specific groups defined by gender, class, sexual orientation and ethnicity. Analyses of each area will include an evaluation of the main applications of the law and policies, and students will gain an in-depth understanding of the issues discussed and the significance of these issues to older adults.

**Prerequisite:** Completion of 4.0 credits

**Recommended Preparation:** This course will be attractive to students from all disciplines but they can expect engaged learning and critical thinking. Workload will be commensurate with a 300-level course.

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

Introduction

Sociology’s key principle is that patterned social relationships create opportunities for, and place constraints on, human action. The influence of this idea is widespread. New research agendas in law, literature, economics, and other disciplines reflect the notion that beyond individual motives, goals, values, beliefs and emotions, patterned social relationships help to make us who we are. Our courses and faculty research examine how patterned social relationships shape and are shaped by gender roles and families; health; immigration and ethnic relations; labour markets, work and social inequality; political structures and processes; crime, law and deviance; culture; cities; and networks, and communities.

To test explanations regarding the influence of social relationships on various aspects of human behaviour, sociologists collect and analyze observational, survey, experimental, and historical data. Accordingly, the sociological perspective and the research skills learned by studying sociology prepare students for a wide variety of careers in industry, government, education, politics, health and journalism. Medical, legal, and environmental fields report an increasing need for sociologists. Municipal, provincial and federal governments hire in areas like urban sociology, community relations, policy and planning, and statistical analysis. In private business, sociologists work in management consulting firms and polling organizations, as well as in labour relations and human resources.

A professional career in sociology requires training beyond the undergraduate level. However, the critical, analytical and research skills that undergraduate sociology students learn open many employment opportunities. Over a third of Canadian undergraduates in sociology go on to be employed in business, finance and administrative occupations, and just under a third in
government service, social science, and educational fields.

Regarding Sociology Programs

Enrolment in sociology programs is limited. Consult the Arts & Science Program Toolkit for application procedures.

NOTE 1: Obtaining a combined average of 65% or more in SOC100H1+SOC150H1 is required for entry into the sociology major and minor programs. Entry to the sociology specialist program at the end of the first year requires a minimum combined average of 80% in SOC100H1+SOC150H1. Achieving the minimum grades does not guarantee acceptance into the programs. Credit for higher-level SOC courses will not waive these requirements.

NOTE 2: Transfer credits of SOC1**H without exclusion cannot be used to meet program admission or requirements.

Sociology Programs

Sociology Specialist (Arts Program) - ASSPE1013

Enrolment Requirements:

This is a limited enrolment program. Note there are different options depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits. Students interested in the Sociology Specialist typically apply and enroll from the Sociology Major.

For students who have completed 9.0 or more credits:

Variable Minimum Grade Average
A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- SOC201H1, SOC202H1, and SOC204H1

To ensure that students admitted to the program will be successful, applicants with a final grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Special Requirement

- Students must be enrolled in the Sociology Major (ASMAJ1013)

For students who have completed between 4.0 and 8.5 credits:

Variable Minimum Grade Average
A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- (SOC100H1 and SOC150H1)

To ensure that students admitted to the program will be successful, applicants with a final grade average lower than 80% in these required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Note:
Students cannot combine a Sociology Specialist program with another Sociology program (Major or Minor) for their degree.

Completion Requirements:

(10.0 credits in Sociology)

1. SOC100H1 and SOC150H1

Sociology Courses

SOC100H1 - Introduction to Sociology I: Sociological Perspectives

Hours: 24L/12T

This course will challenge your views on a wide range of issues that affect us all. It will also excite your interest in a unique sociological way of understanding your world. We will analyze the globalization of culture, emerging patterns of class, race, and gender inequality in Canada and internationally, criminal and deviant behaviour, and so on. You will learn to understand these and other pressing social issues by analyzing the way the social world is organized. These topics are further taken up in the sequel to this course, SOC150: Introduction to Sociology II: Sociological Inquiries.

Exclusion: SOC101Y1, SOC102H1, SOC103H1, SOCA01H3, SOCA02H3, SOC100H5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC150H1 - Introduction to Sociology II: Sociological Inquiries

Hours: 24L/12T

In the sequel to SOC100H1: Introduction to Sociology I: Sociological Perspectives, this course will explore in more depth the topic of social inequality and the contemporary debates that animate sociology. We may like to think of ourselves as perfectly free but powerful social forces open up some opportunities and close off others, constraining our freedom and helping to make us what we are. By examining the operation of these social forces, sociology can help us know ourselves. The course is also about skills-building, skills useful not only for success at U of T, but beyond the walls of the university.

Prerequisite: SOC100H1
Exclusion: SOC101Y, (SOC102H + SOC103H), SOC200H1, SOC200Y1, SOC205H3, SOC221H5, SOC220Y5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC196H1 - Global Cities and Urban Refugees: Connecting South and North

Hours: 24L

The majority of refugees and asylum seekers today live in cities, above all, in the Global South. This course will introduce and critically assess key theories and concepts on forced migration in relation to cities from a global perspective. By drawing on a wide range of literature and case studies from around the world, the course will explore and compare cities across the Global South and North around questions of law, governance, and politics related to urban refugees and asylum seekers. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC197H1 - Future “Agents” & Social Relations: Considering Sociology in a World of Robots, Cyborgs, Bioengineered Agents & Tools

Previous Course Number: SII199H1S-L0391
Hours: 24L
Some people are worried that we risk becoming less human if we allow ourselves or others to engage in widespread self-transformation through the insertion of some kinds of devices into human bodies (e.g., computers, becoming cyborgs) or as a result of interventions such as genetic engineering, etc. Others are concerned that the use of some technologies, or barriers to their use, will increase global inequalities. In this course we will read, talk, and write about these and related issues. We will take a sociological approach, which means that we will attend to contextual forces that shape practices, and material flows, and the meaning of objects. Students will present their final paper in class. Restricted to first-year students. Not available for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC198H1 - The Social Networks of Students

Hours: 24L

This course is a First-Year Foundation Seminar and provides an opportunity for exploration of different topics and themes. Social networks are the webs of connections between people, the mesh that weaves people into communities and societies. In this course, you will learn about social networks by examining the ones around you: what do student's social networks look like? How do they change from high school, to university, and beyond? You will learn, first hand, how researchers study social networks, and how we work to understand their association with important outcomes like academic achievement, graduation, job-finding, and more. Restricted to first-year students. Not available for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC199Y1 - How We Use Time in Everyday Life

Hours: 48S

This seminar examines how people use time in their everyday lives: the content, the interpersonal and structural circumstances, and the implications. The seminar will include an examination of seminal writings about people's use of time and hands-on practice in the strategies and techniques of analyzing available data, including the formulation of questions and approaches to answering them. Students will acquire an appreciation not only of the concept of time and how it helps explain important issues in the social sciences but also of how they use time in their daily lives and how time-use analysis can help them better understand many situations. Several skills will be developed in this seminar, including reading, writing, expressing points of view, and asking and answering research questions by using numerical data and computers to organize, analyze, and show results clearly. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC201H1 - Classical Sociological Theory

Hours: 24L/12T

Introduction to the history, nature, and role of sociological theory, through an examination of the works of key classical theorists such as Karl Marx, Max Weber, Emile Durkheim, Georg Simmel, and others. Restricted to sociology majors and specialists.

Prerequisite: SOC100H1+ SOC150H1
Exclusion: SOC203H1, SOC231H5, SOCB42H3
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC202H1 - Introduction to Quantitative Methods in Sociology

Hours: 24L/18T

Introduction in quantitative social science research from descriptive statistics to hypothesis testing using various strategies for the analysis of bivariate relationships. Restricted to sociology majors and specialists.

Prerequisite: SOC100H1+ SOC150H1
Exclusion: SOC200Y5, SOC222H5, ECO220Y1, ECO227Y1, GGR270H1, PSY201H1, STA220H1, STA248H1, POL222H1, POL232H1, POL242Y1, POL322H1, STA288H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC204H1 - Introduction to Qualitative Methods in Sociology

Hours: 24L/12T

Introduction to the methods and issues of qualitative research, the theories, methods for data collection and
analysis, and the personal and ethical issues relating to qualitative research. Restricted to sociology majors and specialists.

**Prerequisite:** SOC100H1+ SOC150H1  
**Exclusion:** SOC302H1, SOCC23H3, SOC387H5  
**Recommended Preparation:** SOC150H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**SOC205H1 - Urban Sociology**  
**Hours:** 24L  
This course reviews theories of urban genesis and urban form; the interrelationship of urbanization, industrialization and modernization, issues in urban living (housing, transportation, urban-renewal, poverty, unemployment, etc.); urban social networks (ethnic and cultural heterogeneity, neighbourhood, community and other voluntary associations).

**Prerequisite:** SOC100H1  
**Recommended Preparation:** SOC150H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**SOC207H1 - Sociology of Work & Occupations**  
**Hours:** 24L  
The nature and meaning of work in relation to changes in the position of the professions, unions and government, of women and minority groups, and in industrial societies more generally. Career choice and strategies, occupational mobility, and individual satisfaction at work.

**Prerequisite:** SOC100H1  
**Exclusion:** SOC227H5  
**Recommended Preparation:** SOC150H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**SOC208H1 - Introduction to Social Policy**  
**Hours:** 24L  
This course introduces students to the concepts, history and development of social policy in economically developed welfare states. It examines the problems and concepts of the policy process, exploring the political, economic, and institutional frameworks that structure public choices about social policy in Canada, and compare systems of social policy around the world.

**Prerequisite:** SOC100H1  
**Exclusion:** SOC297H1 (New Topics in Sociology: Introduction to Social Policy), offered in Winter 2017, SOC240H5  
**Recommended Preparation:** SOC150H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**SOC209H1 - Sexuality and Modernity**  
**Hours:** 24L  
This course examines questions related to sexuality, with a special focus on the social construction of sexual identity, practice, community and desire. To do so, we proceed self consciously with a critical analysis of the modern study of sexuality, and the ways in which sexual science, as a kind of social practice, has affected the construction and regulation of sexual orientation.

**Prerequisite:** SOC100H1  
**Exclusion:** SOC227H5 (taken in Winter 2015, Winter 2016), SOC387H1 (taken in Fall 2016, Fall 2017), SOC386H1 (taken in Winter 2018)  
**Recommended Preparation:** SOC150H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**SOC210H1 - Sociology of Race and Ethnicity**  
**Hours:** 24L  
The course explores the concepts of race and ethnicity and major theories to understand race and ethnic relations.

**Prerequisite:** SOC100H1  
**Exclusion:** SOC210Y1  
**Recommended Preparation:** SOC150H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**SOC212H1 - Sociology of Crime & Deviance**  
**Hours:** 24L  
This course provides an overview of the study of crime and deviance. We critically examine how scholars have gone about studying crime and deviance (the methods they use and the statistics they employ) as well as the
major sociological explanations for crime and deviance. We also consider the empirical evidence as it relates to the validity of these explanations and some of the policy fallout from different theoretical approaches.

**Prerequisite: SOC100H1**
**Exclusion: SOC211H5**
**Recommended Preparation: SOC150H1**
**Distribution Requirements: Social Science**
**Breadth Requirements: Society and its Institutions (3)**

**SOC213H1 - Sociological Social Psychology**

**Hours: 24L**

This course provides an introduction to the systematic study of the influence of individuals, groups, and society on individuals' thoughts, feelings, and behaviours from a sociological perspective. The course emphasizes interaction among individuals, between an individual and a group, or among groups, all situated within particular social contexts. One core emphasis involves the ways that individual-level processes contribute to explaining social inequality in social groups and organizations. Topics include identity processes, social cognitions, attitudes, emotions, status processes, power relations, legitimacy, and justice.

**Prerequisite: SOC100H1**
**Exclusion: PSY220H1**
**Recommended Preparation: SOC150H1**
**Distribution Requirements: Social Science**
**Breadth Requirements: Society and its Institutions (3)**

**SOC218H1 - Asian Communities in Canada**

**Hours: 24L**

The course will explore the structures and processes of Asian communities in Canada. Historical development of various Asian communities will be explored.

**Prerequisite: SOC100H1**
**Exclusion: SOC342Y1/SOC394Y1**
**Recommended Preparation: SOC150H1**
**Distribution Requirements: Social Science**
**Breadth Requirements: Society and its Institutions (3)**

**SOC220H1 - Social Stratification**

**Hours: 24L**

This course is concerned with the causes and consequences of economic inequality. More specifically, it explores how achieved and ascribed characteristics are related to social class and related economic outcomes. Although some of the material will be comparative and pertain to modern Democracies generally, emphasis will be on Canadian society.

**Prerequisite: SOC100H1**
**Recommended Preparation: SOC150H1**
**Distribution Requirements: Social Science**
**Breadth Requirements: Society and its Institutions (3)**

**SOC223H1 - Sociology of the Family**

**Hours: 24L**

This course examines diverse family patterns, to show the economic, political and cultural factors that influence families. A brief social history of family paves the way for an examination of the various family patterns common in Canada today. Special attention is paid to the gender relations at the heart of family.

**Prerequisite: SOC100H1**
**Exclusion: SOCB49H3; SOC244H5**
**Recommended Preparation: SOC150H1**
**Distribution Requirements: Social Science**
**Breadth Requirements: Society and its Institutions (3)**

**SOC230H1 - Sociology of Education**

**Hours: 24L**

In advanced economies, schooling is a near-universal and highly structured institution. During the most impressionable times in their lives, children and adolescents go nearly every day to sit in the same pattern of classes with the same peers. In theory, students both within and across schools are supposed to learn the same things, at approximately the same time, and engage in similar rituals. And yet, this level of standardization often leads to substantively different outcomes across groups. This course investigates the structure of schools and the achievement hierarchies within and across them.

**Prerequisite: SOC100H1**
**Distribution Requirements: Social Science**
**Breadth Requirements: Society and its Institutions (3)**
SOC240H1 - Sociology of Law

Previous Course Number: SOC293H1
Hours: 24L

This course asks students to think critically about the role of law in society, and to develop a sociological understanding of law and legal institutions. The course will include theoretical approaches to understanding the role of law and legal authority, and the constitutive ways in which law affects, shapes, and is negotiated in everyday life. In addition, attention will be paid to the legal profession, including empirical research on lawyers, legal careers, and their relationship to fields of practice, with an emphasis on the relationship between the structure of the legal profession and law as a democratic institution.

Prerequisite: SOC100H1
Exclusion: SOC334H5
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC249H1 - Sociology of Migration

Hours: 24L

This course examines contemporary migration flows, types and causes of migration, theories of migration, immigration policies, and migrant integration with emphasis on Canada.

Prerequisite: SOC100H1
Exclusion: SOC307Y1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC243H1 - Sociology of Health and Illness

Hours: 24L

This course examines (1) the social causes of illness and disease, (2) the experience of illness, and social processes that shape both of these issues, including medicalization. It focuses on population health, the relation between agency and structure, and macro-micro connections. Professional health care is discussed to the extent that it provides context for analyses of illness patterns and experiences.

Prerequisite: SOC100H1
Exclusion: SOC239H5
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC246H1 - Sociology of Aging

Hours: 24L

This course deals with population aging, cohort effects, inter-generational relations, historical variation in effects of social environment on aging, how health and family relationships vary with age, and social policies related to aging. The whole life course is considered, but the emphasis on adulthood and old age.

Prerequisite: SOC100H1 or SOC203H1
Exclusion: SOC376H1; SOC232H5

SOC250Y1 - Sociology of Religion

Hours: 48L

This course will examine religious beliefs, practices, and experiences from a historical-sociological and comparative perspective. Classical and contemporary theories will be reviewed and applied to investigate such topics as: the social origins of religions; the formation of religious communities; heresies, schisms and the making of orthodoxies; secularization and fundamentalism; cults and new religious movements; religious regulation of the body and person; and the variable linkages of religion to politics, war, art and science.

Prerequisite: SOC100H1
Exclusion: RLG210Y1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC251H1 - Contemporary Sociological Theory

Hours: 24L/12T

A selective introduction to major contemporary thinkers and approaches whose ideas have achieved wide influence, as well as an on-going inquiry into the nature and role of sociological analysis. Restricted to sociology majors and specialists.

Prerequisite: SOC201H1 or SOC203H1
Exclusion: SOC376H1; SOC232H5
SOC252H1 - Intermediate Quantitative Methods in Sociology

Hours: 24L/24T

Provides students with the opportunity to develop an understanding of the logic of multivariate analysis by applying various strategies for the analysis of complex multivariate data. Restricted to sociology majors and specialists.

Prerequisite: SOC202H1
Exclusion: SOC300H1, ECO220Y1, PSY202H1, STA221H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC254H1 - Intermediate Qualitative Methods in Sociology

Hours: 24L/12T

An in-depth examination of key methods of qualitative research, and an opportunity to design and conduct qualitative research that draws from key debates, methodologies, and methods in the field. Restricted to sociology majors and specialists.

Prerequisite: SOC204H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC256H1 - Lives and Societies

Hours: 24L

Characteristics of very different kinds of societies, from hunters and gathering to modern postindustrial countries, and how these affect features of individual lives including: life stages, their status, and transitions between them; the variety of possible life courses; rates of birth and death, and their implications for people, their kin, and their societies.

Prerequisite: SOC100H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC260H1 - Introduction to Political Sociology

Hours: 24L

An introduction to key topics in political sociology such as social movements, electoral alignments, parties as organizations, the welfare state, revolution, policymaking, state formation, nationalism and imperialism.

Prerequisite: SOC100H1
Exclusion: SOCB30H3, SOC335H5
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC265H1 - Gender and Society

Hours: 24L

This course first explores how sociologists conceptualize gender and study gender. Then, it explores the varied nature of gender relations, with a focus on the social organization of gender today.

Prerequisite: SOC100H1
Exclusion: SOCB22H3, SOC275H5
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC270H1 - Introduction to Social Networks

Previous Course Number: SOC355H1
Hours: 24L

This course covers the fundamentals of the social network perspective, including a short introduction to social network theory and a survey of major findings in social network research. We will study how patterns of relations between social actors develop and how they affect outcomes such as health, status attainment, and inequality. Students will write a proposal to conduct research from a social network perspective.

Prerequisite: SOC100H1
Exclusion: SOC355H1, SOC294H1 (Topics: Introduction to Social Networks) offered in Winter 2018 and Winter 2020
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC280H1 - Sociology of Culture

Hours: 24L

The course examines the social origins of culture, the cultural patterns found in various groups and institutions, and the influence culture has on important aspects of society.

Prerequisite: SOC100H1
Exclusion: SOC281H1; SOC202H5
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC282H1 - Introduction to Social Problems

Hours: 24L

Examines a variety of widely discussed social problems, including poverty, crime, substance abuse, sexism, climate change and urban sprawl, using sociological theories to understand the causes of these problems. Will also examine the “social construction” of these social problems and factors that influence public attention and concern.

Prerequisite: SOC100H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC295H1 - New Topics in Sociology

An opportunity to explore new topics in sociology. Topics vary from year to year based on the instructor. Consult the Departmental website: http://sociology.utoronto.ca/st-george-campus/courses-3/new-topics-in-s...

Prerequisite: SOC100H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC296H1 - New Topics in Sociology

An opportunity to explore new topics in sociology. Topics vary from year to year based on the instructor. Consult the Departmental website: http://sociology.utoronto.ca/st-george-campus/courses-3/new-topics-in-s...

Prerequisite: SOC100H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC297H1 - New Topics in Sociology

An opportunity to explore new topics in sociology. Topics vary from year to year based on the instructor. Consult the Departmental website: http://sociology.utoronto.ca/st-george-campus/courses-3/new-topics-in-s...

Prerequisite: SOC100H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC298H1 - New Topics in Sociology

An opportunity to explore new topics in sociology. Topics vary from year to year based on the instructor. Consult the Departmental website: http://sociology.utoronto.ca/st-george-campus/courses-3/new-topics-in-s...

Prerequisite: SOC100H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC303H1 - Family Demography

Hours: 24L

Uses empirical sociological studies to describe and analyze the political, social and economic implications of diverse family relationships and living arrangements. Examines the social and economic consequences of inconsistencies between public definitions of family and the realities of family life. Introduces students to the statistical analysis of the demographic features of families using census data.

Prerequisite: 1.0 SOC credit at the 200+ level
Exclusion: SOC320H1
Recommended Preparation: SOC214H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC304H1 - Status and Class Mobility

Hours: 24L

Shows how getting ahead or becoming downwardly mobile are affected by social as well as economic factors. Links the experience of mobility to larger scale social change.

Prerequisite: 1.0 SOC credit at the 200+ level
Exclusion: SOC321H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC305H1 - Sociology of Professions

Hours: 24L

Becoming a professional (doctor, accountant, lawyer, engineer, nurse, etc.) remains a coveted goal for many young adults and their parents. But what is a profession, and what do these disparate groups have in common? This course lays the groundwork for understanding how the “professional projects” define professions, limit entry, create internal inequalities and try to maintain their prestige. The role of policy is key to our understanding of the professions, and we will focus on the role of policies in the creation of professions, in the substance of professional work such as ethics, autonomy and commercialism, and on the role of policies in addressing social concerns of inequality and diversity in the professions.

Prerequisite: 1.0 SOC credit at the 200+ level
Exclusion: SOC322H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC306H1 - Economic Sociology

Hours: 24L

This course offers a sociological account of economic phenomena. It examines the sociological perspectives on production, consumption, exchange and distribution, economic crises, and other economic matters. In addition to exploring economic behavior in the corporate and financial worlds, the course also examines behavior in households, markets for intimacy, and illegal markets.

Prerequisite: 1.0 SOC credit at the 200+ level
Exclusion: SOC386H1F (2016/2017), SOC323H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC308H1 - Global Inequality

Hours: 24L

This course examines the social processes that characterize stratification and social inequality across the globe, by looking at whether global inequality is growing, shrinking or stagnant and the impact of globalization on global inequality, with particular emphasis on examining disparities over time in education, income/wealth and health.

Prerequisite: 1.0 SOC credit at the 200+ level or SOC220H1
Exclusion: SOC395H1 (2016/2017), SOC345H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC309H1 - HIV and AIDS: Social Policies and Programs

Hours: 24L
Explores and discusses specific theories of action. Applies theories to various factors associated with AIDS/HIV. Examines political, scientific, health, social, economic, and cultural environments. This course forces students to examine the hidden theoretical assumptions surrounding AIDS/HIV.

**Prerequisite:** 1.0 SOC credit at the 200+ level  
**Exclusion:** SOC309Y1, SOC324H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**SOC310H1 - Sociology of Atrocities**

Previous Course Number: SOC397H1  
**Hours:** 24L

This course focuses on the sociology of atrocities. We focus on the range of social actors and processes involved when atrocities occur, how we identify, name, and respond to atrocities (such as genocide or crimes against humanity), the behavior of bystanders and intervenors, cultural trauma and the effects of atrocities, and processes of commemoration. We investigate the collective and social dynamics to try and explain the role of individuals, groups, and institutional actors in committing atrocities, including the role of group identities, bureaucracies, collective decision-making, shared repertoires, legacies of hate, and peer networks. We study the role of other actors – in particular legal institutions, but also humanitarian bodies, journalists, and others – in identifying, naming and sometimes responding to these atrocities, along with sociological evidence about how they do so and the efficacy of any such response.

**Prerequisite:** 1.0 SOC credit at the 200+ level  
**Exclusion:** SOC312Y1, SOC325H1, SOC356H5  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**SOC311H1 - Immigration and Race Relations in Canada**

**Hours:** 24L

Examines the economic, social, cultural and political impacts of 20th century immigration in Canada, and emerging race and ethnic relations. Topics include immigration policy; population impact; community formation; labour markets; enclave economies; welfare use by immigrants; the criminal justice system; racial conflict; multiculturalism and race; and equity policies.

**Prerequisite:** 1.0 SOC credit at the 200+ level  
**Exclusion:** SOC326H1  
**Recommended Preparation:** SOC212H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**SOC312H1 - Population and Society**

**Hours:** 24L

This introductory course examines Canada's population in a global context, covering a broad range of population issues and perspectives. Topics include (a) demographic data and methods, (b) population composition in terms of age, sex, and nuptiality, (c) demographic processes of fertility, mortality, internal and international migration, (d) the relationship between population change and urbanization, and (e) the role of social policy on population change. For all course topics, the instructor will examine historical and cross-national trends and review proposed explanations.

**Prerequisite:** 1.0 SOC credit at the 200+ level  
**Exclusion:** SOC312Y1, SOC325H1, SOC356H5  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**SOC313H1 - Social Control**

**Hours:** 24L

This course examines how society has gone about controlling specific types of deviants (e.g., gang members, sex and drug offenders) and acts of deviance (e.g., organized crime, the deviance of social control agents). In examining these individuals and acts, attention is also directed to why they are defined as deviant and sanctioned, and why some types of deviance are less likely to be detected and sanctioned than others. Finally, consideration is also given to a range of sanctions that have been used to control deviance and the empirical evidence on their effectiveness.

**Prerequisite:** 1.0 SOC credit at the 200+ level  
**Exclusion:** SOC212H1  
**Recommended Preparation:** SOC212H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**SOC315H1 - Domestic Violence**

**Hours:** 24L

This course will provide an overview of the different forms of domestic criminal violence, concentrating primarily on intimate partner violence and child abuse. We will focus on the methodological problems in assessing the nature
and extent of these types of violence, the risk factors and correlates of both offending and victimization and the theoretical explanations that have been offered for these crimes. We also consider the social and legal responses to intimate partner violence and child abuse.

**Prerequisite:** 1.0 SOC credit at the 200+ level  
**Exclusion:** SOC328H1  
**Recommended Preparation:** SOC212H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**SOC316H1 - Sociology of Health Care**

**Hours:** 24L

Examines factors that influence the organizational structure of health care systems, how these organizations develop, how they are maintained, and how they can be change.

**Prerequisite:** 1.0 SOC credit at the 200+ level  
**Exclusion:** SOC244H1, SOC333H5, SOC346H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**SOC318H1 - Theories of Stratification**

**Hours:** 24L/12T

Why do some people have more resources than others? Who winds up at the top of economic hierarchies, and who winds up at the bottom? These are the primary questions for the study of stratification. In this course, we focus primarily on the most influential contemporary sociological theories of status attainment and gender inequality, with additional but briefer treatments of the central theories on other topics (e.g., poverty and the welfare state, networks, rents, racial inequality). This is a program-only course and is restricted to Sociology Majors and Specialists.

**Prerequisite:** SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1  
**Exclusion:** SOC303H1

**SOC319H1 - Immigration and Employment**

**Previous Course Number:** SOC439H1  
**Hours:** 24L/12T

This course examines the labour market and employment situation of immigrants emphasizing recent Canadian experience in comparative context. Topics include immigrant human capital, declining immigrant earnings, immigrant skill-underutilization, impact of the knowledge economy, racial discrimination, labour market structure and unionization, immigrant entrepreneurship and experiences of the Canadian-born second generation. This is a program-only course and is restricted to Sociology Majors and Specialists.

**Prerequisite:** SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1  
**Exclusion:** SOC304H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**SOC320H1 - Family Demography**

**Hours:** 24L/12T

Uses empirical sociological studies to describe and analyze the political, social and economic implications of diverse family relationships and living arrangements. Examines the social and economic consequences of inconsistencies between public definitions of family and the realities of family life. Introduces students to the statistical analysis of the demographic features of families using census data. This is a program-only course and is restricted to sociology majors and specialists.

**Prerequisite:** SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1  
**Exclusion:** SOC303H1  
**Recommended Preparation:** SOC214H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**SOC321H1 - Status and Class Mobility**

**Hours:** 24L/12T

Shows how getting ahead or becoming downwardly mobile are affected by social as well as economic factors. Links the experience of mobility to larger scale social change. This is a program-only course and is restricted to sociology majors and specialists.

**Prerequisite:** SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1  
**Exclusion:** SOC304H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)
SOC322H1 - Sociology of Professions

Hours: 24L/12T

Becoming a professional (doctor, accountant, lawyer, engineer, nurse, etc.) remains a coveted goal for many young adults and their parents. But what is a profession, and what do these disparate groups have in common? This course lays the groundwork for understanding how the "professional projects" define professions, limit entry, create internal inequalities and try to maintain their prestige. The role of policy is key to our understanding of the professions, and we will focus on the role of policies in the creation of professions, in the substance of professional work such as ethics, autonomy and commercialism, and on the role of policies in addressing social concerns of inequality and diversity in the professions. This is a program-only course and is restricted to Sociology Majors and Specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC305H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC323H1 - Economic Sociology

Hours: 24L/12T

This course offers a sociological account of economic phenomena. It examines the sociological perspectives on production, consumption, exchange and distribution, economic crises, and other economic matters. In addition to exploring economic behavior in the corporate and financial worlds, the course also examines behavior in households, markets for intimacy, and illegal markets. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC306H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC324H1 - HIV and AIDS: Social Policies and Programs

Hours: 24L/12T

Explores and discusses specific theories of action. Applies theories to various factors associated with AIDS/HIV. Examines political, scientific, health, social, economic, and cultural environments. This course forces students to examine the hidden theoretical assumptions surrounding AIDS/HIV. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC313H1
Recommended Preparation: SOC212H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC325H1 - Population and Society

Hours: 24L/12T

This introductory course examines Canada’s population in a global context, covering a broad range of population issues and perspectives. Topics include (a) demographic data and methods, (b) population composition in terms of age, sex, and nuptiality, (c) demographic processes of fertility, mortality, internal and international migration, (d) the relationship between population change and urbanization, and (e) the role of social policy on population change. For all course topics, the instructor will examine historical and cross-national trends and review proposed explanations. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC312H1, SOC356H5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC326H1 - Social Control

Hours: 24L/12T

This course examines how society has gone about controlling specific types of deviants (e.g., gang members, sex and drug offenders) and acts of deviance (e.g., organized crime, the deviance of social control agents). In examining these individuals and acts, attention is also directed to why they are defined as deviant and sanctioned, and why some types of deviance are less likely to be detected and sanctioned than others. Finally, consideration is also given to a range of sanctions that have been used to control deviance and the empirical evidence on their effectiveness. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC313H1
Recommended Preparation: SOC212H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
SOC328H1 - Domestic Violence

Hours: 24L/12T

This course will provide an overview of the different forms of domestic criminal violence, concentrating primarily on intimate partner violence and child abuse. We will focus on the methodological problems in assessing the nature and extent of these types of violence, the risk factors and correlates of both offending and victimization and the theoretical explanations that have been offered for these crimes. We also consider the social and legal responses to intimate partner violence and child abuse. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC315H1
Recommended Preparation: SOC212H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC329H1 - Social Movements

Hours: 24L/12T

This course introduces students to the sociological study of collective action. Students will explore how movements in a variety of historical and global contexts endeavor to produce social change. In this process, we will examine political and cultural opportunities and obstacles, organizational dynamics, resources, collective action frames, strategies and tactics. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC279H1, SOC360H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC330H1 - Sociology of Atrocities

Previous Course Number: SOC397H1
Hours: 24L/12T

This course focuses on the sociology of atrocities. We focus on the range of social actors and processes involved when atrocities occur, how we identify, name, and respond to atrocities (such as genocide or crimes against humanity), the behavior of bystanders and intervenors, cultural trauma and the effects of atrocities, and processes of commemoration. We investigate the collective and social dynamics to try and explain the role of individuals, groups, and institutional actors in committing atrocities, including the role of group identities, bureaucracies, collective decision-making, shared repertoires, legacies of hate, and peer networks. We study the role of other actors – in particular legal institutions, but also humanitarian bodies, journalists, and others – in identifying, naming and sometimes responding to these atrocities, along with sociological evidence about how they do so and the efficacy of any such response. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC310H1, SOC397H1 (Selected Topics in Sociological Research: International Criminal Justice & Atrocities), offered in Fall 2013, Winter 2015 and Winter 2016
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC331H1 - Sociology of Technology

Hours: 24L/12T

This course invites students to critically examine the interplay between technology and society. We will discuss how our interactions with technologies, including computers and the Internet, ICTs, social media, and other digital technologies, have become central for our understanding of contemporary social life. This course provides an overview of the sociology of technology, encompassed by various topics in which technology intersects with other areas of sociological inquiry, such as social stratification, community and networks, criminology and social control, work and labour, health and aging, and many others. This is a program-only course and is restricted to Sociology Majors and Specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC356H1, SOC356Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC332H1 - Lives in Canada

Hours: 24L/12T

The life course in Canada, in the twentieth century and today, with some comparisons to other first world countries. How lives have changed over the past century; how lives are affected by history and social location; the impact of the life trajectories on health and crime. This is a program-only course and is restricted to sociology majors and specialists.
SOC333H1 - Quality of Institutions and Lives

Hours: 24L/12T

Theory and research on quality of life encompass studies of subjective dimensions of individual wellbeing, such as happiness, and studies that focus on objective indicators of the quality of institutions and settings, such as child mortality rates. Quality-of-life theories range from (sometimes utopian) classical sociological theories with a historical and political slant to recent interdisciplinary theories that integrate sociological, psychological, and philosophical approaches. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC362H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC334H1 - Sociology of Mental Health and Mental Disorders

Hours: 24L/12T

An overview of the link between social inequality and emotional inequality, focusing on differences in mental health across social groups and the role of stress and coping resources in explaining group differences. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC363H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC335H1 - Urban Health

Hours: 24L/12T

Cities are home to particular populations (the poor, the homeless, racial and ethnic minorities, immigrants, and the young and old) and have distinct risks and protections relevant to health. Patterns of health in cities, historical developments, and emerging literature and methodology are used to uncover how everyday settings influence health. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC365H1
Recommended Preparation: SOC265H1

SOC336H1 - Transnational Asia

Hours: 24L/12T

This course explores how transnational flows of capital, labor, ideas, and culture are reconstituting the ways in which we organize our political, economic, and cultural life by particularly focusing on Asia, the region that has been at the center of this global transformation. How has the notion of the "transnational" evolved and invited critical re-evaluations? What has been the place of Asian countries in this global process and what political, economic, social, and cultural changes do they experience? By examining these questions, this course aims to enhance our understanding of contemporary Asian societies closely tied with each other and the rest of the world. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC364H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC337H1 - Gender Relations

Hours: 24L/12T

This course examines the dynamics of gender in daily life – in sexuality and intimate relations, in parenting and families, and in paid work and workplace organizations, as well as in popular culture. It examines the social construction of gender in individuals and in social organizations, in order to understand gender inequality. This is a program-only course and is restricted to sociology majors and specialists. 

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC364H1
Recommended Preparation: SOC265H1
SOC338H1 - Sociology of Women and Work

Hours: 24L/12T

This course focuses on women's paid and unpaid work and the relationship between the two. It analyzes the gender gap in earnings, the sexual segregation of the labour force, the restructuring of paid work, sexual harassment, paid domestic work, and the division of housework and child care. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC366H1

SOC339H1 - Race, Class, and Gender

Hours: 24L/12T

In this class, we analyze the ways in which race, class, gender and sexuality interact and shape communities, life opportunities, perspectives and politics. We will read contemporary ethnographies concerning work, socialization, and urban life against current sociological theories about inequality and intersectionality, and identity. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC367H1

SOC340H1 - Comparative Political Sociology

Hours: 24L/12T

The study of comparative (historical and cross-national) variation in outcomes that are the subject of research by political sociologists. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC371H1
Recommended Preparation: SOC260H1

SOC341H1 - Sociology of Scandals

Hours: 24L/12T

Scandals – corporate, political, or bureaucratic – pervade media reporting and public debate. This course takes up scandals as sociological events: what are the causes of scandals? How are scandals 'made'? How are scandals represented? And what are the consequences of scandals: do they discredit some actors, and lead to cultural, institutional, and organizational change? Do they lead to reform, used for new professional mobilization, new forms of regulation and oversight, targeted for legal intervention, or do they generate new political shifts, or new memories or narratives? Or are they ignored? The course will also pay attention to how scandals are made public: leaks, investigations, whistleblowers, and media reporting, and the framing of events as scandals worthy of public condemnation. Finally, with scandals often thought of as singular, this course allows students to consider what is in common between these events. This is a program-only course and is restricted to Sociology Majors and Specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC389H1

SOC342H1 - The Sociology of Women and International Migration

Hours: 24L/12T

Examines the international migration of women in postindustrial economies with emphasis on Canada. Topics include: theories of female migration; the impacts of immigration policies; migration trends and entry status; integration issues pertaining to family, language knowledge, citizenship and economic status; labour market barriers and public policy considerations. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC383H1

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

Sociology
SOC343H1 - Neighbourhoods & Communities in Canada

Hours: 24L/12T

Uses recent and historical data to demonstrate the changing social characteristics of local neighbourhoods and larger communities, as these have been affected by industrialization, immigration and other factors and as they affect the life chances of their residents. Provides students with active learning experiences through research activities using Census data. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC384H1
Recommended Preparation: SOC202H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC344H1 - Sociology of Everyday Life

Hours: 24L/12T

This course explores the phenomenological and organizational foundation of everyday experience. It focuses on the structure and social interactions that shape everyday life, and explains the social order that makes everyday life seem smooth and relatively effortless. The course offers experience in qualitative research and writing. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC384H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC345H1 - Global Inequality

Hours: 24L/12T

This course examines the social processes that characterize stratification and social inequality across the globe, by looking at whether global inequality is growing, shrinking or stagnant and the impact of globalization on global inequality, with particular emphasis on examining disparities over time in education, income/wealth and health. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1

SOC346H1 - Sociology of Health Care

Hours: 24L/12T

Examines factors that influence the organizational structure of health care systems, how these organizations develop, how they are maintained, and how they can be changed. Topics also include the social forces that influence the relationship between healthcare providers and consumers. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC316H1; SOC244H1; SOC333H5
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC347H1 - Immigration and Race Relations in Canada

Hours: 24L/12T

Examines the economic, social, cultural and political impacts of 20th century immigration in Canada, and emerging race and ethnic relations. Topics include immigration policy; population impact; community formation; labour markets; enclave economies; welfare use by immigrants; the criminal justice system; racial conflict; multiculturalism and race; and equity policies. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
Exclusion: SOC311H1; SOC336H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC348H1 - Culture and Inequality

Hours: 24L/12T

How location in socioeconomic, ethnic, gender, and generational groups shapes individual cultural repertoires; how culture affects individual positions in stratification hierarchies; and the role of culture in group boundaries and struggles. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1
SOC349H1 - Deconstructing 'Muslim American' - Race, Nationalism, and Religion

Hours: 24L/12T

Since the 2016 U.S. presidential election, Muslim Americans have been once again been cast as both threatening "outsiders" as well as examples of what makes the United States a "nation of immigrants." What do these contestations teach us about how race, nationalism, and globalization shape immigrant identities? This course examines a range of topics, from everyday boundary-making to ongoing global politics pertaining to different Muslim groups in the United States, often drawing comparisons with Muslims in other Western countries. Course materials include theoretical overviews, research articles, survey reports, book chapters, newspapers, films, and T.V. shows. This is a program-only course and is restricted to sociology majors and specialists.

**SOC361H1 - Theories of Stratification**

**Hours**: 24L

Why do some people have more resources than others? Who winds up at the top of economic hierarchies, and who winds up at the bottom? These are the primary questions for the study of stratification. In this course, we focus primarily on the most influential contemporary sociological theories of status attainment and gender inequality, with additional but briefer treatments of the central theories on other topics (e.g., poverty and the welfare state, networks, rents, racial inequality).

**Prerequisite**: 1.0 SOC credit at the 200+ level

**Exclusion**: SOC318H1

**Recommended Preparation:** SOC317Y1 or SOC336H1 or SOC383H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### SOC371H1 - Comparative Political Sociology

**Hours:** 24L

The study of comparative (historical and cross-national) variation in outcomes that are the subject of research by political sociologists.

**Prerequisite:** 1.0 SOC credit at the 200+ level  
**Exclusion:** SOC340H1
Recommended Preparation: SOC260H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC372H1 - Transnational Asia

Previous Course Number: SOC395H1
Hours: 24L

This course approaches Asia from a transnational perspective to enhance our understanding of the complexities involved in Asia’s contemporary transformations. By departing from traditional nation-state-oriented analyses, this class explores how Asia shapes and is shaped by trans-Pacific politics, war and colonial legacies, global capitalism, labor migration, international norms of citizenship, urban development, and flows of ideas and popular culture. By closely examining Asia’s transnational interconnectedness, we question the prevalent notion of Asia and regional studies and highlight the contradictions and challenges Asia faces in its political, economic, social, and cultural spheres. This critical approach is expected to offer a deeper investigation of Asia in and of itself while critiquing dominant assumptions and frameworks found in existing approaches to Asia.

Prerequisite: 1.0 SOC credit at the 200+ level
Exclusion: SOC336H1, SOC351H1 (New Topics in Sociology: Transnational Asia), offered in Winter 2019, SOC395H1 (New Topics in Sociology: Transnational Asia), offered in Fall 2019
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC381H1 - Culture and Inequality

Hours: 24L

How location in socioeconomic, ethnic, gender, and generational groups shapes individual cultural repertoires; how culture affects individual positions in stratification hierarchies; and the role of culture in group boundaries and struggles.

Prerequisite: 1.0 SOC credit at the 200+ level
Exclusion: SOC281H1, SOC348H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC383H1 - The Sociology of Women and International Migration

Hours: 24L

Examines the international migration of women in postindustrial economies with emphasis on Canada. Topics include: theories of female migration; the impacts of immigration policies; migration trends and entry status; integration issues pertaining to family, language knowledge, citizenship and economic status; labour market barriers and public policy considerations.

Prerequisite: 1.0 SOC credit at the 200+ level
Exclusion: SOC342H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC384H1 - Neighbourhoods & Communities in Canada

Hours: 24L
Uses recent and historical data to demonstrate the changing social characteristics of local neighbourhoods and larger communities, as these have been affected by industrialization, immigration and other factors and as they affect the life chances of their residents. Provides students with active learning experiences through research activities using Census data.

**Prerequisite:** 1.0 SOC credit at the 200+ level  
**Exclusion:** SOC343H1  
**Recommended Preparation:** SOC202H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### SOC386H1 - New Topics in Sociology

**Prerequisite:** 1.0 SOC credit at the 200+ level  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### SOC387H1 - New Topics in Sociology

**Hours:** 24L

**Prerequisite:** 1.0 SOC credit at the 200+ level  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### SOC388H1 - Sociology of Everyday Life

**Hours:** 24L

This course explores the phenomenological and organizational foundation of everyday experience. It focuses on the structure and social interactions that shape everyday life, and explains the social order that makes everyday life seem smooth and relatively effortless. The course offers experience in qualitative research and writing.

**Prerequisite:** 1.0 SOC credit at the 200+ level  
**Exclusion:** SOC344H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### SOC389H1 - Sociology of Scandals

**Hours:** 24L

Scandals – corporate, political, or bureaucratic – pervade media reporting and public debate. This course takes up scandals as sociological events: what are the causes of scandals? How are scandals ‘made’? How are scandals represented? And what are the consequences of scandals: do they discredit some actors, and lead to cultural, institutional, and organizational change? Do they lead to reform, used for new professional mobilization, new forms of regulation and oversight, targeted for legal intervention, or do they generate new political shifts, or new memories or narratives? Or are they ignored? The course will also pay attention to how scandals are made public: leaks, investigations, whistleblowers, and media reporting, and the framing of events as scandals worthy of public condemnation. Finally, with scandals often thought of as singular, this course allows students to consider what is in common between these events.

**Prerequisite:** 1.0 SOC credit at the 200+ level  
**Exclusion:** SOC341H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### SOC390Y1 - Independent Research

Independent Research courses allow students to pursue a specific topic of interest. These courses are offered at the 300-level, as full or half courses. Students work independently with a professor in the Department who acts as research supervisor. There are no formal class meetings, lectures, or readings other than what is agreed to with the supervisor. Professors accept supervisory responsibility at their discretion. They are not required to serve as research supervisors. It is recommended that students approach a professor working in the same sub-discipline of sociology. Often students become interested in a topic through a SOC course and approach the instructor of that course for supervision; however, this is not required. Not eligible for CR/NCR option. For further details, please visit our website at: [http://sociology.utoronto.ca/st-george-campus/courses-3/independent-research-course/](http://sociology.utoronto.ca/st-george-campus/courses-3/independent-research-course/)

**Prerequisite:** Students must have completed 10.0 courses towards their degree, plus a SOC course at the 300+ level to be eligible for 300-level Independent Research.

**SOC408H1 - Advanced Studies in Organizations**

Previous Course Number: SOC489H1  
**Hours:** 24L

This course covers central issues in the field of organizational sociology. It explores different perspectives on why complex organizations look and operate the way that they do, and examines the social consequences of their behavior. The first part of the course focuses on the evolution of the modern firm. We will trace the history of different models of management and strategy, and evaluate their relative efficacy. The second part of the course examines how organizations shape, and are shaped by, their environments. The third part of the course will explore how organizational behavior influences social inequality, and how social inequality shapes the way that modern organizations function. We will make use of both social scientific analyses and Harvard Business School case studies. Restricted to 4th-year sociology majors and specialists.

**Prerequisite:** 1.0 SOC credit at the 300+ level  
**Exclusion:** SOC489H1 (Topics: Sociology of Organizations), offered in Fall 2017 and Fall 2019  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**SOC409H1 - Sexuality and Research Design**

Previous Course Number: SOC485H1  
**Hours:** 24L

Research designs are much like jigsaw puzzles, but harder: they require scholars to carefully connect a variety of distinct yet intrinsically linked pieces into a thematically consistent, practical and defensible whole. Few tasks in the research process are as commonplace and as riddled with difficulty. This semester length course will provide a forum for students to compose a research design on the topic of sexuality using qualitative approaches that include in-depth interview and ethnography. Throughout the course, students will read a variety of works that describe the goals, procedures, and underlying logic of research design. These works will draw from articles and chapters on methodological problems and issues, and also from actual studies that use in-depth interview and ethnography in sexuality studies. Restricted to 4th-year sociology majors and specialists.

**Prerequisite:** 1.0 SOC credit at the 300+ level  
**Exclusion:** SOC485H1 (Topics: Sexuality of Research Design), offered in Fall 2017, Winter 2019, Fall 2019, SOC497H1 (Topics: Sexuality of Research Design), offered in Fall 2016  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**SOC412H1 - Medicalization of Deviance**

**Hours:** 24L

This course examines the sociological implications associated with the growing dominance of psychiatry over designating and managing the margins of ‘normality’ and ‘deviance.’ It covers the evolution of the DSM and rise of deinstitutionalization, the importance of stigma and symbolic interactionist understandings of psychiatric
diagnoses, and the methods of social control used to mitigate risk and reduce social deviance within the psychiatric and criminal justice systems. Emphasis will be placed on understanding the social implications of mental health labels. Restricted to 4th-year sociology majors and specialists.

**Prerequisite:** 1.0 SOC credit at the 300+ level

**Recommended Preparation:** SOC313H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**SOC413H1 - Sociology of Punishment**

**Hours:** 24L

This course considers the history of penology, theories of penal development and current trends. Particular attention will be paid to cross-national variations in punishment and what these reveal about the relevance of particular theories and the importance of culture in understanding historical developments in punishment. Restricted to 4th-year sociology majors and specialists.

**Prerequisite:** 1.0 SOC credit at the 300+ level

**Exclusion:** WDW340H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**SOC448H1 - Sociology & Emotions**

**Hours:** 24L

From social cohesion to intergroup violence, emotional processes influence social outcomes. Moral aspects of experience in particular are linked to emotions such as shame and pride. Students in this course will review major theories of, and a variety of empirical approaches to, the link between social and emotional processes. They will be encouraged to extend ideas and analyses in the published literature to new topics. Restricted to 4th-year sociology majors and specialists.

**Prerequisite:** 1.0 SOC credit at the 300+ level

**Recommended Preparation:**

SOC313H1/SOC315H1/SOC364H1/SOC478H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**SOC422H1 - Advanced Studies in Political Sociology**

**Hours:** 24L

This fourth year course will provide an advanced treatment of selected topics in political Sociology. Specific topics to be covered are the relationship between political systems and cleavage voting, the relationship between social class and attitudes and voting, the post-materialist thesis, social capital and civic participation, gender politics, the various varieties, causes and effects of welfare states, and social movements. The course will have both a Canadian and international focus. Restricted to 4th-year sociology majors and specialists.

**Prerequisite:** 1.0 SOC credit at the 300+ level

**Recommended Preparation:**

SOC313H1/SOC355H1/SOC362H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**SOC427H1 - Families and Health**

**Hours:** 24L

Examines the competing theoretical, policy and therapeutic responses to a variety of family health problems, including addictions, chronic physical illnesses, and mental illness, as well as the effects of illness on family life and family coping. The links between theory and practice provide the basis for discussion of knowledge transfer. Restricted to 4th-year sociology majors and specialists.

**Prerequisite:** 1.0 SOC credit at the 300+ level

**Recommended Preparation:**

SOC313H1/SOC363H1/SOC364H1/SOC478H1

SOC460H1 - Global Inequalities and Contentious Politics

Previous Course Number: SOC495H1
Hours: 24L

Global Inequality and Contentious Politics: This is a seminar course designed to understand global inequalities and contentious politics. Inequality has been one of the primary subjects in sociological inquiries and its scope naturally expands to a global dimension as our societies are increasingly shaped by international connections. This seminar focuses on understanding various manifestations of global inequalities intersected by international hierarchy, race, gender, and class. Yet, these divisions and injustices are neither static nor unchallenged as people react to these realities via divergent methods. This class will read major theoretical approaches to social movements and examine contentious mobilizations taking place in different geographies around the world to reshape the global order ridden with disparities. Empirical cases of contentious activism include anti-globalization protest, the Occupy movement, campaigns for migrant care workers, resistance against American military bases, and the Me Too movement. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC credit at the 300+ level
Exclusion: SOC494H1 (Topics: Global Inequalities and Contentious Politics), offered in Winter 2019, SOC495H1 (Topics: Global Inequalities and Contentious Politics), offered in Winter 2020
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC463H1 - Mental Health and Education

Previous Course Number: SOC493H1
Hours: 24L

In this course, we examine institutions of higher education as unique social contexts within which student mental health unfolds. In doing so, we will address mediating and moderating factors, which characterize the unique and varied socio-emotional experiences of students attending post-secondary. As such, we will distinguish and clarify social approaches to studying mental health – focusing on mentorship, funding, social support, academic demands and healthcare resources – from mental illness as characterized in medical disciplines. Students will be expected to read thoroughly and apply insights from the course to authentic mental health concerns facing institutions of higher education today. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC credit at the 300+ level
Exclusion: SOC493H1 (Topics: Mental Health and Education), offered in Fall 2018 and Winter 2020
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC465H1 - Advanced Studies in Gender

Hours: 24L

This course explores major questions about the nature of gender and gender inequality. The course requires a careful review of key theoretical and empirical work addressing one of these questions and the completion of a research project. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC credit at the 300+ level
Recommended Preparation: SOC214H1/SOC366H1/SOC367H1/SOC365H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC478H1 - Social Context of Public Policy

Hours: 24L

This course explores how policy processes and frameworks need to be evaluated in light of the social context in which they are developed. Factors to be considered include the interplay between public values and expectations and public policy; the implications of cultural diversity and demographic change, and understandings of ethical principles of conduct in public organizations. A related goal is to help students learn how to use empirical research to answer highly contested issues in policy circles and in public life. These objectives are pursued by introducing students to major trends in inequality in Canada, assessing these trends within a comparative context, reflecting on their normative implications, and examining alternative policy responses to these developments. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC credit at the 300+ level
Recommended Preparation: SOC303H1/SOC304H1/SOC305H1/SOC306H1/SOC307H1/SOC308H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SOC479H1 - Advanced Studies in Social Movements

Hours: 24L
This course focuses on current debates and research findings in the study of social movements. Restricted to 4th-year sociology majors and specialists.

**Prerequisite:** 1.0 SOC credit at the 300+ level (preferably selected from the Recommended Preparation list for this course)

**Exclusion:** SOCC04H3

**SOC481H1 - Culture and Social Networks**

**Hours:** 24L

Relationships between various forms of culture and the networks connecting both individual people and organizations creating culture. Restricted to 4th-year sociology majors and specialists.

**Prerequisite:** 1.0 SOC credit at the 300+ level (preferably selected from the Recommended Preparation list for this course)

**Recommended Preparation:** SOC355H1/SOC382H1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**SOC483H1 - Culture and Cognition**

**Hours:** 24L

This course examines the social foundations of thinking and action, with a focus on how individuals think and act through shared cognitive schemas that are embedded in larger social structures. The course is organized around a wide-ranging array of classical and contemporary theories that help explain the various factors that shape culture and cognition. There is a research component to put this analytical understanding into practice. Restricted to 4th-year sociology majors and specialists.

**Prerequisite:** 1.0 SOC credit at the 300+ level

**Exclusion:** SOC483Y1

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

**SOC484H1 - Children of Immigrants**

**Hours:** 24L

Nearly one-quarter of Canada's population are immigrant offspring, defined as those who immigrate as children or those who are Canadian born with foreign born parents.

This course examines sociological perspectives, language and bilingualism, racial and ethnic identities, family structure and relationships, marriage, education and labour market experiences of immigrant offspring. Restricted to 4th-year sociology majors and specialists.

**Prerequisite:** 1.0 SOC credit at the 300+ level (preferably selected from the Recommended Preparation list for this course)

South Asian Studies

Students study South Asia in an approach attentive to global formations. They are introduced to the study of South Asia—Bangladesh, India, Pakistan, Nepal, Sri Lanka—through a wide angle view of Asian modernities, political economies, and cultures, all the while delving into specialist close-ups of South Asia. With open access to comparative courses in the Contemporary Asian Studies program, students can learn from specialists in South, East, and Southeast Asia.

With a curriculum motivated by the moving present—the changing face of South Asia today—the South Asian Studies minor offers rigorous training in major debates and questions in the rich field of South Asian Studies, and provides a basic foundation for many directions of future study. From historical contexts of ethnic conflict, to postcolonial readings of ancient traditions, to the politics of religious and ethnic identities, to the workings of vast-scale democracy and capitalism, to the worlds of cinema and public culture, students are exposed to the dynamic landscapes—political, material, and mythic—that constitute South Asia today.

Students may also be interested in the closely connected Contemporary Asian Studies program.

South Asian Studies Courses

SAS114H1 - Introduction to South Asian Studies

Previous Course Number: SAS114Y1
Hours: 24L

An interdisciplinary introduction to South Asian Studies emphasizing inquiry and critical analysis, drawing attention to the specificities of individual nations as well as the factors (historical, political, economic and cultural) that define South Asia as a region. Some attention will be paid to the South Asian Diaspora.

Exclusion: NEW114Y1, SAS114Y1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

CAS200H1 - Introduction to Contemporary Asian Studies

Hours: 24L

This course is an introduction to Contemporary Asian Studies. It covers detailed case study material from South Asia, Southeast Asia, and East Asia. It introduces students to the interdisciplinary study of political, sociocultural and economic interactions among these regions, as well as the transnational forces shaping internal dynamics throughout Asia. In addition, it examines the ways that forces stemming from Asia are affecting global processes, pushing scholarship to engage questions about colonialism, nationalism, "race," religion, markets, urbanization, migration, and mass mediated culture. This course provides preparation for more advanced courses on Asia and globalization and provides an introductory gateway for the Contemporary Asian Studies major and minor. May be taken in the first year of studies.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CAS201H1 - Global Asian Studies: Insights and Concepts

Previous Course Number: CAS200Y1
Hours: 24L

This course addresses Asia empirically in contemporary global formations and as an idea in the global imagination. It introduces students to concepts and theories central to scholarship on Asia and its transnational formations. It provides foundational theoretical and conceptual material to understand global issues as they play out in the politics, economies, cultures and contemporary social worlds of contemporary Asian sites. Interdisciplinary analytical and research concepts are introduced to provide area studies grounding. This course provides preparation to delve into deeper research on Asia connected to broad questions about the natures of democracy, authoritarianism, market formation, social justice, and the media of cultural expression. It informs students aiming to take more advanced courses on Asia and globalization and provides one part of the foundation for the Contemporary Asian Studies major and minor. CAS201H1 introduces the theoretical and conceptual frameworks that are explored through further grounded empirical case studies in upper year CAS courses.

Exclusion: CAS200Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CAS202H1 - Global Asian Studies: Sites and Practices

Previous Course Number: CAS200Y1
Hours: 24L

This interdisciplinary course explores a variety of sites and topics in South, Southeast, and East Asia. It explores themes including contemporary and historical articulations of socio-economic development, (post)colonial political formations, urbanization processes, climate change, labour struggles, gender studies, migration, citizenship, and social justice. The course examines the diversity of Asian modernities, cross-regional linkages, and changing approaches to area studies over time. It provides a foundation for the Contemporary Asian Studies major and minor, preparing students for taking more advanced courses on Asia in the global context.

Exclusion: CAS200Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CAS310H1 - Comparative Colonialisms in Asia

Hours: 24L

This course analyzes the impact of colonialism in South, East, and Southeast Asia and the various ways in which pre-colonial traditions intersect with and reshape colonial and postcolonial process across the various regions of Asia. The course will examine the conjunctures of economy, politics, religion, education, ethnicity, gender, and caste, as these have played out over time in the making and re-making of Asia as both idea and place.
Attention will be paid to postcolonial and indigenous theories, questions of ‘the colonial’ from the perspective of Asian Studies, and debates about the meaning of postcolonialism for the study of Asia now and in the future.

**Prerequisite:** 0.5 CAS credit at the 200-level  
**Distribution Requirements:** Humanities, Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**SAS318H1 - Colonialism and Tradition**

**Hours:** 24L

This course analyzes the impact of colonialism in South Asia and the various ways in which tradition intersects with and has reshaped colonialism in postcolonial South Asia. The course will examine the role of religion, education, ethnicity, gender, and caste. Some attention will be paid to postcolonial and indigenous theory.

**Prerequisite:** Completion of 6.0 credits  
**Recommended Preparation:** SAS114H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**CAS320H1 - Comparative Modernities in Asia**

**Hours:** 24L

Since at least the late 1700s, the effects of capitalism across the globe have profoundly transformed the landscapes of human livelihood, consumption, production and governance in Asia. While colonial empires have declined, new empires have emerged, and a growing number of countries have witnessed the rise of nationalism and independent states, social, political and technological revolutions, and most recently neoliberal globalization. This course theorizes and explores these dramatic changes in a comparative framework. It is aimed at students wishing to better understand the great transformations of modern Asia in a global context.

**Prerequisite:** 0.5 CAS credit at the 200-level  
**Recommended Preparation:** CAS202H1  
**Distribution Requirements:** Humanities, Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**CAS350H1 - Asian Youth Cultures**

**Hours:** 24L

In focusing on youth in Asia, this course brings together two disputed cultural formations of substantial contemporary importance. Both youth and Asia are increasingly invoked on the global stage in support of a wide range of interests. Examining practices of young people and the idea of youth in the context of Asia requires critical attention to the promises and fears that attach to the rise of Asian economies, international demographic transitions, the growth of a global middle-class, increasing consumption disparities, changing immigration patterns, expanding technological skills, global/local environmental concerns, and young people’s shifting political priorities and loyalties. The course may feature a significant amount of social theory, with authors such as Michel Foucault, Roland Barthes, Louis Althusser, and Stuart Hall.

**Prerequisite:** 6.0 credits  
**Recommended Preparation:** 0.5 CAS credit at the 200-level  
**Distribution Requirements:** Humanities, Social Science  
**Breadth Requirements:** Creative and Cultural Representations (1)

**CAS336H1 - Asian Genders**

**Hours:** 24L

This course will explore ways that gender is mobilized and produced in parts of Asia. It seeks to understand gender and sexuality in their diversity and in attempts to “fix” or locate it in various bodies and places. Attempts will be made to see how gender is made knowable in terms of sexuality, medicine, nation, class, ethnicity, religion, and other discourses. The course assumes a willingness to read challenging theory – such as the writings of Judith Butler, Michel Foucault, and Eve Sedgwick – and asks that students commit to regular attendance.

**Prerequisite:** 6.0 credits  
**Recommended Preparation:** 0.5 CAS credit at the 200-level  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**CAS370H1 - Asian Cities**

**Hours:** 24L

This course offers a multidisciplinary perspective of urban life in Asia. The thematic focus will be on how the urban intersects with modernities and postcolonial formations. Drawing on recent scholarship in the social sciences and the humanities, we will examine the realignment of cultural, political, and economic forces associated with Asia’s diverse processes of urbanization.

**Prerequisite:** 6.0 credits  
**Recommended Preparation:** 0.5 CAS credit at the 200-level
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

SAS390H1 - Special Topics in South Asian Studies

Hours: 24L

Course content varies in accordance with the interest of the instructor.

Prerequisite: SAS114H1 and completion of 9.0 credits. Students who do not meet the prerequisite are encouraged to contact the instructor.

Distribution Requirements: Humanities

CAS390H1 - Special Topics

Hours: 24L

Course content varies in accordance with the interest of the instructor. Check [http://munkschool.utoronto.ca/ai/cas](http://munkschool.utoronto.ca/ai/cas) for an updated description.

Prerequisite: 6.0 credits
Recommended Preparation: 0.5 CAS credit at the 200-level

CAS393H1 - Independent Research

Supervised independent research on a topic agreed on by the student and supervisor before enrolment in the course. Open to advanced students with a strong background in contemporary Asian studies. A maximum of one year of Independent Research courses is allowed per program. Contact hours with the supervisor may vary, but typically comprise of one hour per week. Not eligible for CR/NCR option.

Prerequisite: 10.0 credits, permission from the Program Director

CAS393Y1 - Independent Research

Supervised independent research on a topic agreed on by the student and supervisor before enrolment in the course. Open to advanced students with a strong background in contemporary Asian studies. A maximum of one year of Independent Research courses is allowed per program. Contact hours with the supervisor may vary, but typically comprise of one hour per week. Not eligible for CR/NCR option.

Prerequisite: At least 14.0 credits
Exclusion: NEW414H1, SAS414H1
Recommended Preparation: 1.0 credit in 200 level CAS courses; 1.0 credit in 300 level CAS courses

Prerequisite: 10.0 credits, permission from the Program Director

Distribution Requirements: Social Science

CAS400H1 - Interdisciplinary Research in Methods in Contemporary Asian Studies

Hours: 24S

This seminar addresses Asian worlds – In Asia, transnationally, and locally – to cultivate new approaches to global processes and problems. The course explores key Asian sites that open new configurations for studying interactions between economic/environmental development, political change, and migration and cultural politics. It provides an advanced and systematic overview of the research methodologies that students have been exposed to throughout the CAS program. These include historical-archival, ethnographic, visual/media, and statistical/quantitative methods that allow us to map Asian political, economic, and cultural formations, and through them, global challenges. The seminar builds interdisciplinary conversations attentive to both critical problematizing and problem-solving, to qualitative and applied projects. It is the required capstone to the Contemporary Asian Studies major.

Prerequisite: 1.0 200-level CAS credit and 1.0 300-level CAS credit
Exclusion: CAS400Y1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CAS414H1 - The Public Event in Asia

Hours: 24S

This upper-level seminar will introduce students to the interdisciplinary study of popular culture in Asia through a focus on public events. Readings about all kinds of performances, including ritual, popular protest, festivals, sports, cinema, television, digital media events, and the performing arts will help students learn methodological tools to interpret the politics and meanings of public culture as it articulates with class, ethnicity, religious community, gender and caste. The course will furthermore familiarize students with a range of theoretical lenses for conceptualizing the different meanings of the “event” and the “public” from a perspective grounded in the histories of South Asia, Southeast Asia, East Asia, and their diasporas.

Prerequisite: 10.0 credits, permission from the Program Director
Exclusion: NEW414H1, SAS414H1
Recommended Preparation: 1.0 credit in 200 level CAS courses; 1.0 credit in 300 level CAS courses
**Distribution Requirements:** Social Science
**Breadth Requirements:** Creative and Cultural Representations (1)

**CAS420H1 - Asia and the New Global Economy**

*Previous Course Number:* JPA420H1  
*Hours:* 24S  

This course explores the rise of Asia and its integration into the new global economy (labour, capitalism, knowledge economy, economic nationalism, inequality, gender, the meaning of capitalism, democracy, among others), exposing students to diverse disciplinary perspectives. Geographical coverage is pan-Asian, including East, Southeast and South Asia.

**Prerequisite:** 14.0 credits  
**Exclusion:** JPA420H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**CAS430H1 - Nationalism and Revolution in Asia**

*Hours:* 24L  

This course explores the far-reaching social, political, and cultural transformations in modern East, Southeast, and South Asia, focusing on the twentieth-century revolutionary histories and struggles to establish modern nation-states. The course adopts a topical approach within a chronological and comparative framework to highlight major historical movements and theoretical issues significant to the Asian experience.

**Prerequisite:** 14.0 credits  
**Exclusion:** HIS382H1, ASI430H1  
**Recommended Preparation:** 1.0 200-level CAS credit and 1.0 300-level CAS credit  
**Distribution Requirements:** Humanities, Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**CAS450H1 - Asian Pathways Research Practice**

*Hours:* 24S  

This seminar builds on the systematic overview of research methodologies of the Contemporary Asian Studies major and its capstone course, CAS400H1. CAS450H1 provides students with the opportunity to research questions of contemporary relevance stemming from Asia and its transnational networks and communities. Addressing a range of methodologies, including historical-archival, ethnographic, visual/media, and statistical/quantitative, the course emphasizes research experience outside the classroom, in Asia as well as locally with communities in Toronto. Students will develop their own research contributions while working collaboratively.

**Prerequisite:** 14.0 credits, including 1.0 200-level CAS credit and 1.0 300-level CAS credit  
**Exclusion:** CAS400Y1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**CAS498Y1 - Independent Research**

Supervised independent research on a topic agreed on by the student and supervisor before enrolment in the course. Open to advanced students with a strong background in contemporary Asian studies. Introduction

Overview:

Spanish is the most widely spoken language of the Americas, with 130 million speakers in North America alone, more than 400 million worldwide, and with growing numbers in Canada. It is the fourth most widely spoken language in the world, and it is the official language in 21 countries on three continents: Europe, Africa, and Latin America.

Spanish opens the door to the study of a rich range of cultural expressions in literature, film, and art, from medieval and early modern Transatlantic world, to the literary and cultural productions of contemporary Spanish and Spanish American societies. The department offers a wide selection of courses at the introductory (second year), intermediate (third year) and advanced (fourth year) level in literature, culture, and linguistics. Students are encouraged to complement and expand on the training they receive in these courses by taking courses in other academic units. By the time of their graduation, our students acquire skills to read analytically fictional and non-fictional, literary and visual texts. They thus gain a deep knowledge of Hispanic cultures, as well as the skills to reflect critically on the world in which they live.

Spanish also opens the door to the study of the Romance language family. The Department offers students the opportunity to advance their language skills through the systematic reflection on the language structure, from the sound system to the morphology and syntax. Through a variety of courses with a theoretical and experimental focus in linguistics, students acquire basic skills that can be transferred to teaching or research programs. Through collaboration with other language and linguistics programs, students are provided with opportunities and training to conduct research in linguistics with a focus on the Spanish language.

What can I do with a degree in Spanish?

Plenty! Spanish is recognized as one of the four United Nations official languages. A degree in Spanish linguistics, literature, and culture opens up career paths both domestically and internationally. The skills that students acquire through the study of Spanish and of the Spanish-speaking world either prepare them directly for or are an asset in some of the following fields:

- media, journalism, marketing, public relations;
- domestic government services and NGOs; foreign services and foreign affairs specialist; international development; political aid,
- commerce, finances, tourism, and hospitality
- post-graduate studies and academic careers; cultural work
- editing, publishing, translation, education
- library and information sciences
- careers in the health profession, including medicine, speech pathology and audiology
- computational linguistics, speech recognition, and synthesis

For the Portuguese component, see under “Portuguese Program” in this Calendar.

The Department offers Specialist, Major and Minor programs, as well as language citation certificate.

How is the program structured?

For many students, our program begins with the language sequence.

Language sequence:

1. The Department reserves the right to place students in the language course best suited to their linguistic preparation.

2. Students who, in the department's assessment, have adequate knowledge of Spanish may be required to take Spanish literature, culture or linguistics course instead of a language course at any level.

The progression of courses in the language sequence is designed to accommodate a wide range of previous language experience. Students are placed in the appropriate language course based on their proficiency, as determined by the online placement test and departmental assessment.

Placement test:

Students who have studied Spanish before joining the department should take the on-line placement test by going to the following link:

http://spanport.utoronto.ca/undergraduate/spanish

Please, read carefully the instructions that explain how to take the test. The placement test can be taken only once.

If you cannot assess your placement level from the available information, please contact the Associate Chair, Undergraduate Studies and you will receive personal advice for placement in the language sequence.

Students with no previous knowledge of Spanish: enrol in SPA100Y1.

The recommended sequence of language courses for those students who have had little or no previous training in the language is the following:

SPA100Y1 > SPA220Y1 > SPA320Y1 > SPA420H1

Students with previous knowledge of Spanish: take the placement test.

Students who have studied Spanish before joining the department may enrol in several courses – beginners’, intermediate or advanced – depending on their background and their level of preparation. This includes those students who have traveled or lived briefly in the Spanish-speaking world.

The recommended sequence of language courses for those students who join the department having mastered a beginner’s level of Spanish, including those who successfully completed SPA100Y1, is the following:

SPA220Y1 > SPA320Y1 > SPA420H1 or

SPA120Y1 > SPA320Y1 > SPA420H1

The recommended sequence of language courses for those students who join the department having mastered an intermediate level of Spanish, including those who have successfully completed SPA220Y1, is the following:

SPA320Y1 > SPA420H1

Native or bilingual speakers of Spanish:

Those students who have native fluency in Spanish because they have had a life-long exposure to spoken Spanish in an informal context (i.e., those who have lived in a Spanish-speaking country, or those who live in a Spanish-speaking family) – should enrol in SPA219Y1. Students who qualify for this course have distinctly different learning needs than those students who learned Spanish as a foreign language. They have a native knowledge of the language and are able to understand and speak Spanish, but they have had little or no exposure to written Spanish. The recommended language sequence for such students is the following: SPA219Y1 > SPA420H1

Students who have completed the equivalent of a high school degree or higher level of education in a Spanish-speaking country can skip the language sequence. However, if they have not studied descriptive grammar, they should enrol in SPA420H1. Please consult the Undergraduate Coordinator for placement advice.

Throughout the language sequence, stress is laid both on the cultural component of language acquisition and on the range of practical applications to which both the spoken and the written language may be put. Courses in business Spanish and in the structure of the Spanish language
provide an array of possible options for students in the upper years.

**Literature, culture and linguistics courses:**

Students are encouraged to enroll early on in their academic career in several second-year courses as they transition from the language sequence (SPA219Y1 / SPA220Y1 / SPA320Y1) into the third and fourth-year courses in literature, culture, and linguistics.

SPA258H1 is a foundational course for the students who plan to pursue a major or a specialist degree in Spanish. While permitting students to advance their skills in reading and composition, this course also introduces information literacy, and the terms and methods of literary analysis through the study of a wide selection of brief literary texts. Intermediate level students (SPA220Y1) who are comfortable reading short texts, and who have well-developed writing and speaking skills for the intermediate level, may take that course while enrolled in SPA220Y1 (preferable in their second semester of SPA220Y1). Others should complete SPA220Y1 before taking SPA258H1.

The other courses offered in the 200-level (SPA221H1 and SPA259H1) are not required for a Specialist or Major degree but are recommended for students who need to hone their language skills before advancing to the upper-level literature, culture and linguistics courses.

SPA221H1 (Spanish Pronunciation) is a companion course to SPA220Y1. Students who are interested in this course are best advised to enroll while taking SPA220Y1.

SPA259H1 is a course that introduces students to the techniques of cultural analysis. Although not a degree requirement, this course is a popular option for students enrolled in the program. It has the same language requirements as SPA258H1 (students can take it either while enrolled in SPA220Y1, or upon completion of SPA220Y1).

**Following the language sequence,** and upon successfully completing SPA258H1, students pursuing a specialist and major degrees will fulfill in the due course of their university career the remaining degree requirements:

- One 0.5 credit in Hispanic linguistics at the 300/400-level
- One 0.5 credit in Spanish peninsular literature at the 300/400-level
- One 0.5 credit in Spanish American literature at the 300/400-level
- SPA420H1
- SPA454H1 or SPA489H1

SPA420H1 (Advanced Grammar), SPA454H1 (Cervantes: Don Quixote) and SPA489H1 (Latin American Transculturations) are the capstone courses in the Spanish program. Students should plan to take these courses towards the end of their university studies, as by that time they will have acquired language fluency, and become versed in the reading of extended and complex texts in Spanish, and will have honed their skills in textual analysis.

**Cognate courses:**

- Spanish Specialist: Up to 2.0 credits may be taken from cognate departmental or college offerings
- Spanish major: Up to 1.0 credit may be taken from cognate departmental or college offerings
- Spanish minor: Up to 1.0 cognate credit may be taken in Portuguese.

First-Year Foundation Seminars

The SPA195H1/SPA196H1/SPA197H1/SPA198H1/SPA199H1 seminars are designed to provide the opportunity to work closely with an instructor in a class of no more than thirty students. These interactive seminars are intended to stimulate the students’ curiosity and provide an opportunity to get to know a member of the professorial staff in a seminar environment during the first year of study.

Faculty of Arts & Science Language Citation

The Department of Spanish and Portuguese participates in the Faculty of Arts and Science’s Language Citation initiative for Spanish.

To obtain a Language Citation in Spanish, students will complete the two language-sequence courses that follow the introductory level: SPA220Y1, SPA320Y1, with a minimum of B- in each one of the courses to be considered.

Native and bilingual speakers should complete SPA219Y1 and two additional 0.5 credits in Spanish at the 300- or 400-level.

Regarding Spanish Courses

Note:

• see also European Studies, Latin American Studies

Notes

1. The Department reserves the right to place students in the language course best suited to their linguistic preparation.
2. Students who, in the department's assessment, have adequate knowledge of Spanish may be required to take Spanish literature, culture or linguistics course instead of a language course at any level.
3. All courses are taught in Spanish unless otherwise specified.

Spanish Courses

SPA100Y1 - Spanish for Beginners

Hours: 48L/48T

Introduction to the Spanish language for beginning students; overview of basic grammatical structures, development of vocabulary and oral and written expression. Not eligible for CR/NCR option.

Prerequisite: No previous knowledge of Spanish, or placement test results.
Exclusion: SPA120Y1, SPA219Y1, SPA319Y1, SPA220Y1, SPA320Y1, SPA420H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA120Y1 - Accelerated Spanish Through Community Engaged Learning

Hours: 96L

This course is a combination of SPA100Y1 and SPA220Y1 into one year. It is designed for students with prior knowledge of Spanish, but whose level is not appropriate to enroll in SPA220Y1. The focus is on the fundamentals of Spanish grammar and cultural aspects through community service learning with the local Spanish-speaking community of Toronto. Not eligible for CR/NCR option.

Prerequisite: High School Spanish; informal knowledge of Spanish
Exclusion: Native and Heritage Speakers, SPA219Y1, SPA100Y1 and SPA220Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
SPA195H1 - Barcelona

Hours: 24L

A deep dive into the modern experience of one of the world’s most compelling cities, this course considers Barcelona from a multidisciplinary perspective that includes study of its architecture, foodways, politics and response to mass tourism. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA196H1 - Class and Work in the Americas

Hours: 24L

This course examines economic and social inequalities in the contemporary Americas. We look at the ways in which class divisions are represented in academic studies, literature, film, and television. From Mexican maquiladoras to indigenous reservations, we consider the global poor and how recent changes in the character of work (automation, outsourcing, free trade zones) have had an impact on class divisions, especially for younger members of society. Can a renewed understanding of class and work help us to negotiate power, privilege, and inequality in this century? Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA197H1 - Cervantes and Imperial Spain

Hours: 24L

During the lifetime of Miguel de Cervantes, the Spanish monarchy governed an empire that extended across the globe, from its traditional lands in Europe to colonies in the Philippines and the Americas. We will examine the advantages and cost of imperial rule through reading a selection of Cervantes’s works. Discussions will centre on such questions as the social impact of imperial wealth, the disruptive role of soldiers in civil society, contact with non-European cultures and the sub-cultures of Spanish society. Students will be introduced to the University of Toronto’s outstanding resources for studying the literatures and cultures of early modern Europe. Readings will include some of the Exemplary Stories and selected episodes of Don Quixote. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA198H1 - A Brief History of Love in the Western World

Hours: 24L

This course introduces students to the ways in which the foremost thinkers in the history of the Western world (Plato, Ovid, St. Augustine, Ficino, Ebreo) conceived the idea of love; how did the notions of sexuality and gender play into that idea, and how did these notions carry on – or not – into our present understanding of love, sexuality and gender. While the background readings pertain to the general Western cultural heritage, the literary texts through which we will observe particular applications of the theories of love were produced by some of the outstanding 16th and 17th century Spanish authors (for ex. Rodriguez de Montalvo; Jorge de Montemayor; Miguel de Cervantes; Tirso de Molina, María de Zayas, Sor Juana Inés de la Cruz). All the readings will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

SPA199H1 - More than Nachos and Tequila: Mexican History and Culture

Hours: 24L

This course aims at studying the rich history of Mexico from an interdisciplinary perspective. We will cover a wide range of issues, such as identity, modernity race, immigration, gender, sexuality, globalization, and iconic figures. The issue of identity as construed from the inside, but also from the outside and particularly from the English-speaking world (i.e. current US presidential views on the wall), will be widely examined. Course materials will range from chronicles of conquest to modern reflections and representations by historians, philosophers, filmmakers, musicians, writers and artist, among others. Restricted to first-year students. Not eligible for CR/NCR option.

Production, circulation and meaning of icons through Latin American literary and cultural contexts. Readings are selected from the period of independence to the present, and focus on the transformative ideological charge of cultural objects across geographic space and history.

Focuses on political and socio-economic tensions between popular and elite spheres of cultural production, and on the risks and limits of iconographic representation. (Offered every three years)

**Prerequisite:** At least one 300-series half-course in Spanish.  
**Recommended Preparation:** SPA258H1/SPA259H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### SPA482H1 - 20th-Century Spanish American Narrative

**Hours:** 24L

Detailed study of the major movements in Spanish-American narrative, including magic realism, fantastic literature, women's writing, and testimonial literature, through analysis of representative novels and short stories. (Offered every three years)

**Prerequisite:** At least one 300-series half-course in Spanish.  
**Recommended Preparation:** SPA258H1/SPA259H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### SPA486H1 - Contemporary Caribbean Literatures and Identities

**Hours:** 24L

Literature studied as a socio-political space for the articulation of new concepts of cultural identity; examination of cultural change and aesthetic innovation in selected poetic, dramatic, and narrative texts from different national traditions (Cuba, the Dominican Republic, Puerto Rico). (Offered every three years)

**Prerequisite:** At least one 300-series half-course in Spanish.  
**Recommended Preparation:** SPA258H1/SPA259H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

### SPA488H1 - Central America Postwar Narrative

**Hours:** 24L

Literature studied as a socio-political space for the articulation of new concepts of cultural identity; examination of cultural change and aesthetic innovation in selected poetic, dramatic, and narrative texts from different national traditions (Cuba, the Dominican Republic, Puerto Rico). (Offered every three years)
The end of civil and military conflicts in the last decade of the 20th century reshapes the political landscape of Central America. Through selected readings of novels and short stories from representative writers, issues of immigration, displacement, and globalization are discussed to understand these changes in the region. (Offered every three years)

**Prerequisite:** At least one 300-series half-course in Spanish.

**Recommended Preparation:** SPA258H1/SPA259H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

**SPA489H1 - Latin American Transculturations**

**Hours:** 36L

This course integrates a series of contemporary debates in Latin American cultural studies with analysis of its transdisciplinary history and global permutations. Key topics of investigation within these debates may include indigeneity; coloniality, transculturation, and subalternity; empire, nation, and globalism; revolution, state discourse, and the popular; gender and sexuality; and the production of race.

**Prerequisite:** SPA258H1; SPA219Y1/SPA320Y1

**Recommended Preparation:** Another 300-series half-course in literature

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

**SPA490H1 - Independent Study**

Individual study with a member of staff on a topic of common interest including readings, discussion and written assignments. Not eligible for CR/NCR option.

**Prerequisite:** At least one 300-series half-course in Spanish, and written approval of the Undergraduate Coordinator

**Distribution Requirements:** Humanities

**SPA491H1 - Independent Study**

Individual study with a member of staff on a topic of common interest including readings, discussion and written assignments. Not eligible for CR/NCR option.

**Prerequisite:** At least one 300-series half-course in Spanish, and written approval of the Undergraduate Coordinator

**Distribution Requirements:** Humanities

Introduction

Statistical Science is the science of learning from data. Statistical science plays a large role in data science, which broadly encompasses computational and statistical aspects of managing and learning from large and complex datasets. Statistical theory and methodology have applications in almost all areas of science, social science, public health, medicine, engineering, finance, technology, business, government and industry. Statisticians and data scientists are involved in solving problems as diverse as understanding the health risk of climate change, predicting the path of forest fires, understanding the role of genetics in human health, and creating a better search engine. New ways of collecting, organizing, visualizing, and analyzing data are increasingly driving progress in all fields and have created demand for people with data expertise.

The Department of Statistical Sciences offers specialist, major, and minor programs in Statistics and a specialist program in Data Science and a specialist and a major
program in Actuarial Science (please refer to the Actuarial Science section of the academic calendar for more information on Actuarial Science programs). All Statistics programs offer training in statistical methods, theory, computation, and communication, as well as an understanding of the role of statistical science to solve problems in a variety of contexts. The specialist program in Statistical Science: Theory and Methods emphasizes probability and statistical theory as underlying mathematical frameworks for data analysis. The specialist program in Statistical Science: Methods and Practice has greater emphasis on collaborative statistical practice. Students in this program combine their study in statistics with a focus in a discipline that relies on statistical methods. The specialist program in Data Science is offered jointly with the Department of Computer Science. Students in this program acquire expertise in statistical reasoning and methods, in the design and analysis of algorithms and data structures for handling big data, in best practices for software design, and in machine learning. The major program in Statistics offers the most flexibility in choice of courses. This program gives students a broad understanding of the methods and computational and communication skills appropriate for effective statistical problem solving. The minor program in Statistics is designed to provide students with some exposure and skills in statistical methods which is intended to complement programs in other disciplines that involve quantitative research.

**Arts & Science Internship Program**

The new Arts & Science Internship Program (ASIP) stream is available to students entering their second year of study in Fall 2021 and enrolled in the Data Science Specialist, the Specialist in Statistical Science: Methods and Practice, and the Specialist in Statistical Science: Theory and Methods.

- Enrolment is limited and requires a supplemental application. Students enrolled in the ASIP stream will be required to complete mandatory Professional Development programming plus a minimum of 12 and maximum of 20 months of paid, full-time work experience. The time to degree completion for students enrolled in ASIP will normally be 5 years. There is an additional cost to participate in the ASIP stream.

- Students will typically be admitted to the ASIP stream for the Fall term of Year 2 of study, however starting in Fall 2022, in exceptional circumstances students, including transfer students, who enrolled in an eligible program in the Summer after Year 2 can be admitted to the ASIP stream for the Fall of Year 3. Year 3 entry into the program requires prior approval of the Associate Chair, Undergraduate or their designate and the Experiential Learning & Outreach Support (ELOS) Office.

- Further details about ASIP, including eligibility requirements and application procedures, can be found here. Students may also visit the ASIP webpage or contact the ELOS office at asip@utoronto.ca.

**Statistical Sciences Programs**

**Data Science Specialist (Science Program) - ASSPE1687**

The field of Data Science is a combination of statistics and computer science methodologies that enable ‘learning from data’. A data scientist extracts information from data, and is involved with every step that must be taken to achieve this goal, from getting acquainted with the data to communicating the results in non-technical language. The Data Science Specialist program prepares students for work in the Data Science industry or government and for graduate studies in Data Science, Computer Science, or Statistics. Students in the program will benefit from a range of advanced courses in Computer Science and Statistics offered by the University of Toronto, as well as from a sequence of three integrative courses designed especially for the program.

The Data Science Specialist program comprises three fundamental and highly-integrated aspects. First, students will acquire expertise in statistical reasoning, methods, and inference essential for any data analyst. Seconds, students will receive in-depth training in computer science: the design and analysis of algorithms and data structures for handling large amounts of data, and best practices in software design. Students will receive training in machine learning, which lies at the intersection of computer and statistical sciences. The third aspect is the application of computer science and statistics to produce analyses of complex, large-scale datasets, and the communication of
the results of these analyses; students will receive training in these areas by taking integrative courses that are designed specifically for the Data Science Specialist program. The courses involve experiential learning: students will be working with real large-scale datasets from the domain of business, government, and/or science. The successful student will combine their expertise in computer and statistical science to produce and communicate analyses of complex large-scale datasets.

Skills that graduates of the program will acquire include proficiency in statistical reasoning and computational thinking; data manipulation and exploration, visualization, and communication that are required for work as a data scientist; the ability to apply statistical methods to solve problems in the context of scientific research, business, and government; familiarity and experience with best practices in software development; and knowledge of current software infrastructure for handling large data sets. Graduates of the program will be able to demonstrate the ability to apply machine learning algorithms to large-scale datasets that arise in scientific research, government, and business; create appropriate data visualizations for complex datasets; identify and answer questions that involve applying statistical methods or machine learning algorithms to complex data, and communicating the results; present the results and limitations of a data analysis at an appropriate technical level for the intended audience.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

For students admitted to Arts & Science in the Year 1 Computer Science (CMP1) admission category:

**Variable Minimum Grade**
A minimum grade is needed for entry, and this minimum changes each year depending on the number of applicants. At least 20 spaces will be available each year for students applying from Year 1 Computer Science (CMP1). The following courses must be completed:

- CSC110Y1
- CSC111H1
- MAT137Y1/ MAT157Y1
- STA130H1

To ensure that students admitted to the program will be successful, applicants will not be considered for admission with a grade lower than 70% in CSC110Y1, MAT137Y1, and STA130H1, or lower than 77% in CSC111H1. (MAT157Y1 grades will be adjusted to account for the course’s greater difficulty.) Obtaining these minimum grades does not guarantee admission to the program.

For students admitted to other Arts & Science Year 1 admission categories:

**Special Requirement**

- Students who do not have the Computer Science Admission Guarantee must complete a supplementary application to be considered for the program.

**Variable Minimum Grade**
A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- CSC148H1
- MAT137Y1/ MAT157Y1
- STA130H1

To ensure that students admitted to the program will be successful, applicants with a grade lower than 70% will not be considered for admission. (MAT157Y1 grades will be adjusted to account for the course’s greater difficulty.) Obtaining these minimum grades does not guarantee admission to the program.

**Notes:**

1. Requests for admission will be considered in the first program request period only.
2. Due to the limited enrolment nature of this program, students are strongly advised to plan to enroll in backup programs.
3. Students admitted to the program after second or third year will be required to pay retroactive deregulated program fees.

**Completion Requirements:**

(13.0-13.5 credits, including at least 1.5 credits at the 400-level)

**First year (3.0-3.5 credits)**
MAT137Y1/ MAT157Y1, MAT223H1/ MAT240H1 (MAT240H1 is recommended), STA130H1. (CSC108H1, CSC148H1)/ (CSC110Y1, CSC111H1)

Note: Students with a strong background in an object-oriented language such as Python, Java or C++ may omit CSC108H1 and proceed directly with CSC148H1. There is no need to replace the missing half-credit for program completion; however, please base your course choice on what you are ready to take, not on “saving” a half-credit. Consult with the Computer Science Undergraduate Office for advice on choosing between CSC108H1 and CSC148H1.

Students in this program have the option to enrol in the Arts & Science Internship Program (ASIP) stream.
Specialist in Statistical Science: Methods and Practice (Science Program) - ASSPE2270

Statistical Science encompasses methods and tools for obtaining knowledge from data and for understanding the uncertainty associated with this knowledge. The purposes of the undergraduate programs are to: (1) equip students with a general framework for obtaining knowledge from data; (2) give students skills that they are able to flexibly apply to a variety of problems; and (3) to provide students with the ability to learn new methods as needs, data sources, and technology change.

The Specialist Program in Statistical Science: Methods and Practice is distinguished from the specialist program in Statistical Science: Theory and Methods through its emphasis on collaborative statistical practice and advanced exposure to an allied discipline. The program includes fundamental concepts in probability and statistical theory with mathematical prerequisites relevant to statistical practice. Students in the program acquire advanced expertise in statistical reasoning, methods, and computation, and complete a focus in another discipline that permits students to become conversant in that discipline to the extent that they can effectively collaborate. Students will also acquire advanced skills in communication, consultation and collaboration and an understanding of the role of mathematical thinking to support the development and evaluate the properties of statistical methods.

Enrolment Requirements:

This is a limited enrolment program. Note there are different admission criteria depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

For students who have completed between 4.0 and 8.5 credits:

Completed Courses (some with minimum grades)
The following courses are required:

- STA130H1
- CSC108H1/ STA110H1/ CSC111H1/ CSC120H1/ CSC148H1
- MAT223H1/ MAT240H1
- (MAT135H1 and MAT136H1) with a minimum grade of 73% in each/ MAT137Y1 (63%)/ MAT157Y1 (63%)

Variable Minimum Grade Average
A minimum grade average in STA130H1 and (MAT135H1
and MAT136H1/ MAT137Y1/ MAT157Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

Note:
Students who take (MAT135H1 and MAT136H1) will typically require a higher minimum grade average than students who take MAT137Y1/ MAT157Y1.

For students who have completed 9.0 or more credits:

Completed Courses (some with minimum grades)
The following courses are required:

- CSC108H1/ CSC110Y1/ CSC111H1/ CSC120H1/ CSC148H1
- MAT223H1/ MAT240H1
- MAT235Y1/ MAT237Y1/ MAT257Y1
- (STA237H1 and STA238H1) with a minimum grade of 73% in each/ (STA247H1 and STA248H1) with a minimum grade of 73% in each/ (STA257H1 and STA261H1) with a minimum grade of 63% in each.

Variable Minimum Grade Average
A minimum grade average in (STA237H1 and STA238H1)/ (STA247H1 and STA248H1)/ (STA257H1 and STA261H1) and MAT235Y1/ MAT237Y1/ MAT257Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

Note:
Students who take (STA237H1, STA238H1)/ (STA247H1, STA248H1) will typically require a higher minimum grade average than students who take (STA257H1, STA261H1).

Completion Requirements:

(10.5 or 11.0 credits plus a disciplinary focus requiring 2.0-3.5 credits)

First year:
1. STA130H1, CSC108H1/ CSC110Y1/ CSC111H1/ CSC120H1/ CSC148H1, (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1. (MAT137Y1/ MAT157Y1 recommended)

2. Recommended: introductory course in disciplinary focus. MAT223H1/ MAT240H1 is also strongly recommended to be taken in first year and is required preparation for MAT237Y1.

Second year:
3. MAT223H1/ MAT240H1, MAT235Y1/ MAT237Y1/ MAT257Y1, (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)}

((STA257H1, STA261H1) recommended)

Upper years:
4. STA302H1, STA303H1, STA304H1/ STA305H1, STA313H1/ STA314H1/ STA365H1, STA355H1

5. 1.5 credits from the following list: STA414H1, STA437H1, STA442H1, STA457H1, STA465H1, STA475H1, STA480H1, STA410H1

6. STA490Y1. Students who complete the Arts & Science Internship Program (ASIP) stream will also meet this requirement.

7. 1.0 credit from the following list: MAT224H1/ MAT247H1, MAT337H1/ MAT357H1, CSC148H1, CSC207H1, STA300+ level courses (excluding STA310H5, STA399H1 and STA399Y1) and STA399Y1 may be considered on a case by case basis with the approval of the Program Director.

Disciplinary Focuses

Students in the Specialist Program in Statistical Science: Methods and Practice program must enrol in and complete at least one disciplinary focus.

To enrol in one or more focuses, students must first be enrolled in the Specialist Program in Statistical Science: Methods and Practice program. Enrolment instructions can be found on the Arts & Science Program Toolkit website. Focuses can be chosen on ACORN after admission to the program, which begins in July.

Health Studies (ASFOC2270A): (2.0 credits) HMB342H1, at least 0.5 credit from HST209H1/ HST211H1/ HST250H1, and at least 0.5 credit from HST308H1/ HST310H1/ HST405H1/ HST330H1/ HST440H1/ HST464H1

Global Health (ASFOC2270B): (3.0 credits) BIO120H1, BIO130H1, HMB203H1, HMB265H1, HMB323H1, HMB303H1/ HMB306H1/ JNH350H1/ HMB342H1, HMB433H1/ HMB406H1/ HMB462H1/ HAJ453H1/ HMB434H1 (Recommended: HMB433H1)

Health and Disease (ASFOC2270C): (3.0 credits) BIO120H1, BIO130H1, HMB202H1, HMB265H1, HMB302H1/ HMB322H1/ HMB312H1/ HMB342H1, HMB422H1/ HMB402H1/ HMB432H1/ HMB434H1/ HMB435H1/ HMB436H1/ HMB437H1/ HMB452H1/ HMB462H1

Fundamental Genetics and its Applications (ASFOC2270D): (3.0 credits) BIO120H1, BIO130H1, HMB201H1, HMB265H1, HMB301H1/ HMB311H1/
HMB321H1/ HMB360H1, HMB421H1/ HMB441H1/ HMB401H1/ HMB431H1 (Recommended: HMB421H1)

Neuroscience (ASFOC2270E): (3.0 credits) BIO120H1, BIO130H1, HMB200H1, HMB265H1, HMB300H1/ HMB310H1/ HMB320H1/ HMB360H1/ CJH332H1, HMB420H1/ JHA410H1/ HMB430H1/ HMB450H1 (Recommended: HMB420H1)

Social Psychology (ASFOC2270F): (2.0 credits) PSY100H1, PSY220H1, PSY322H1, PSY326H1/ PSY321H1/ PSY424H1/ PSY426H1/ PSY405H1/ PSY406H1

Cognitive Psychology (ASFOC2270G): (2.0 credits) PSY100H1, PSY270H1, PSY493H1, PSY372H1/ PSY405H1/ PSY406H1/ PSY475H1

Sociolinguistics (ASFOC2270H): (3.0 credits) LIN100Y1; two of LIN228H1, LIN229H1, LIN232H1 or LIN241H1; LIN351H1 and LIN456H1

Psycholinguistics (ASFOC2270I): (3.0 credits) LIN100Y1; two of LIN228H1, LIN229H1, LIN232H1 or LIN241H1; two of JLP374H1, JLP315H1 or JLP471H1

Astronomy & Astrophysics (ASFOC2270J): (2.5 or 3.0 credits) (PHY131H1 and PHY151H1 or PHY152H1); AST211H1, AST222H1; (PHY252H1 and AST320H1)/ AST325H1/ AST326Y1

Sociology (ASFOC2270K): (2.5 credits) (SOC100H1 and SOC150H1) with a combined minimum grade average of 65%; SOC204H1; 1.0 credit from SOC303H1, SOC312H1, SOC336H1, SOC355H1, SOC363H1, SOC364H1.

Students interested in advanced study in Sociology should consider additional courses, in particular SOC201H1, SOC251H1, and SOC254H1

Ecology (ASFOC2270L): (3.0 credits) BIO120H1, BIO220H1; 2.0 credits from (with at least a 0.5 credit at the 400-level) EEB319H1/ EEB321H1/ EEB328H1/ EEB365H1/ EEB428H1/ EEB433H1/ EEB440H1 or ENV234H1/ ENV334H1/ ENV432H1

Evolutionary Biology (ASFOC2270M): (3.5 credits) BIO120H1, BIO130H1, BIO220H1; 1.5 credits from HMB265H1/ BIB260H1, EEB318H1, EEB323H1, EEB324H1, EEB325H1, EEB362H1, EEB440H1/ 0.5 credit from EEB440H1, EEB455H1, EEB459H1, EEB460H1

Notes:

- BIO260H1 requires BIO230H1 as a prerequisite.
- Students in the Focus in Evolutionary Biology can request that HMB waive the co-requisite of BIO230H1 for HMB265H1 and that EEB waive the prerequisite of BIO230H1 for EEB460H1. These waivers will only be considered for students in the Applied Statistics specialist focus in Evolutionary Biology. All other pre- and co-requisites are required.

Economics (ASFOC2270N): (3.5 credits) (ECO101H1 and ECO102H1), ECO200Y1/ ECO206Y1, ECO202Y1/ ECO208Y1, 0.5 credit 300+ series ECO course with the exception of ECO374H1 and ECO375H1

Biochemistry (ASFOC2270O): (3.0 credits) CHM135H1, CHM136H1, BCH210H1, BCH311H1, BCH370H1, BCH441H1

Physics (ASFOC2270P): (2.5 credits) PHY131H1/ PHY151H1, PHY132H1/ PHY152H1, PHY224H1, PHY252H1/ PHY254H1/ PHY256H1, PHY324H1

Pharmacology and Biomedical Toxicology (ASFOC2270Q): (3.0 credits) BIO130H1 (70%), PSL300H1, PSL301H1, PCL201H1, PCL302H1, PCL345H1/ PCL362H1/ PCL469H1/ PCL470H1

**Specialist in Statistical Science: Theory and Methods (Science Program) - ASSPE2290**

Statistical Science encompasses methods and tools for obtaining knowledge from data and for understanding the uncertainty associated with this knowledge. The purposes of the undergraduate programs are to: (1) equip students with a general framework for obtaining knowledge from data; (2) give students skills that they are able to flexibly apply to a variety of problems; and (3) to provide students with the ability to learn new methods as needed, data sources, and technology change.

The Specialist Program in Statistical Science: Theory and Methods emphasizes probability and the theory of statistical inference as underlying mathematical frameworks for statistical data analysis. Students in the program acquire advanced expertise in statistical theory and methods, as well as an understanding of the role of statistical science to solve problems in a variety of contexts. The successful student will also acquire skills in mathematical reasoning, computational thinking, and communication in the context of solving statistical problems.

**Enrolment Requirements:**
This is a limited enrolment program. Note there are different admission criteria depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

For students who have completed between 4.0 and 8.5 credits:

**Completed Courses (some with minimum grades)**
The following courses are required:

- STA130H1
- CSC108H1/ CSC110Y1/ CSC111H1/ CSC120H1/ CSC148H1
- MAT223H1/ MAT240H1
- MAT137Y1 (63%)/ MAT157Y1 (63%)

**Variable Minimum Grade Average**
A minimum grade average in STA130H1 and MAT137Y1/MAT157Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

For students who have completed 9.0 or more credits:

**Completed Courses (some with minimum grades)**
The following courses are required:

- CSC108H1/ CSC110Y1/ CSC111H1/ CSC120H1/ CSC148H1
- MAT223H1/ MAT240H1
- MAT237Y1/ MAT257Y1
- STA257H1 (63%) and STA261H1 (63%)

**Variable Minimum Grade Average**
A minimum grade average in (STA257H1 and STA261H1) and MAT237Y1/MAT257Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

**Completion Requirements:**

(11.0 or 11.5 credits)

**First Year:**

STA130H1, CSC108H1/ CSC110Y1/ CSC111H1/ CSC120H1/ CSC148H1, MAT137Y1/ MAT157Y1, MAT223H1/ MAT240H1

**Second Year:**

MAT224H1/ MAT247H1, MAT237Y1/ MAT257Y1; STA257H1, STA261H1

**Higher Years:**

1. STA302H1, STA303H1, STA304H1/ STA305H1, STA313H1/ STA314H1/ STA365H1, STA347H1, STA355H1

2. 1.0 credit from the following list: STA410H1, STA414H1, STA437H1, STA442H1, STA457H1, STA465H1, STA475H1, STA480H1

3. One of STA447H1, STA452H1, STA453H1

4. 1.0 credit from: ACT451H1, ACT452H1, ACT460H1, MAT327H1, MAT332H1, MAT334H1/ MAT354H1, MAT337H1/ MAT357H1, MAT301H1/ MAT347Y1, MAT344H1, CSC207H1, CSC336H1, CSC343H1, STA300+ level courses (excluding STA310H5, STA399H1 and STA399Y1; STA399H1 and STA399Y1 may be considered on a case by case basis with the approval of the Program Director.)

5. One of STA492H1, STA496H1/ STA497H1/ STA498Y1/ STA499Y1. Students who complete the Arts & Science Internship Program (ASIP) stream will also meet this requirement.

**Students planning to take any of these courses should ensure they have the required prerequisites**

**Statistics Major (Science Program) - ASMAJ2289**

Statistical Science encompasses methods and tools for obtaining knowledge from data and for understanding the uncertainty associated with this knowledge. The purposes of the undergraduate programs are to: (1) equip students with a general framework for obtaining knowledge from data; (2) give students skills that they are able to flexibly apply to a variety of problems; and (3) to provide students with the ability to learn new methods as needs, data sources, and technology change.

The Major in Statistics gives students a broad understanding of the statistical methods and computational and communication skills appropriate for effective statistical problem solving. The successful student will also acquire a general understanding of the role of mathematical thinking to support the development and evaluate the properties of statistical methods. While the Major is designed to complement study in an area of application of quantitative methods, students in the Major may choose to have a greater focus in probability and statistical theory through elective courses.

**Enrolment Requirements:**

This is a limited enrolment program. Note there are different admission criteria depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

For students who have completed between 4.0 and 8.5 credits:

**Completed Courses**
The following courses are required:
• STA130H1
• (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1

Variable Minimum Grade Average
A minimum grade average in STA130H1 and (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

Note:
Students who take (MAT135H1 and MAT136H1) will typically require a higher minimum grade average than students who take MAT137Y1/MAT157Y1.

For students who have completed 9.0 or more credits:

Completed Courses
The following courses are required:

• CSC108H1/ CSC110Y1/ CSC111H1/ CSC120H1/CSC148H1
• MAT223H1/ MAT240H1
• MAT235Y1/MAT237Y1/MAT257Y1
• (STA237H1 and STA238H1)/ (STA247H1 and STA248H1)/ (STA257H1 and STA261H1)/ ECO227Y1

Variable Minimum Grade Average
A minimum grade average in (STA237H1 and STA238H1)/ (STA247H1 and STA248H1)/ (STA257H1 and STA261H1)/ ECO227Y1 and MAT235Y1/MAT237Y1/MAT257Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

Note:
Students who take (STA237H1 and STA238H1)/ (STA247H1 and STA248H1) will typically require a higher minimum grade average than students who take (STA257H1 and STA261H1)/ ECO227Y1.

Completion Requirements:
(7.0 or 7.5 credits, including a 0.5 credit STA 400-series course)

First Year:
STA130H1, CSC108H1/ CSC110Y1/ CSC111H1/ CSC120H1/ CSC148H1, (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1.

(MAT223H1/ MAT240H1 recommended in 1st year)

Second Year:
MAT223H1/ MAT240H1, MAT235Y1/ MAT237Y1/

MAT257Y1: (STA247H1, STA248H1)(STA237H1, STA238H1)/(STA257H1, STA261H1)/ECO227Y1

( STA237H1 and STA238H1 are strongly recommended. MAT221H1 may not be used for this requirement.)

Higher Years:
1. STA302H1
2. 0.5 credit from STA313H1/ STA314H1/ STA365H1/ STA347H1/ STA355H1
3. 0.5 credit from STA414H1/ STA437H1/ STA442H1/ STA457H1/ STA465H1/ STA475H1/ STA480H1
4. 1.0 credit from all available STA300+ level courses (excluding STA310H5, STA399H1 and STA399Y1; STA399H1 and STA399Y1 may be considered on a case by case basis with the approval of the Program Director).

Statistics Minor (Science Program) - ASMIN2289

Statistical Science encompasses methods and tools for obtaining knowledge from data and for understanding the uncertainty associated with this knowledge. The Minor in Statistics is designed to provide students with some exposure and skills in statistical methods. It complements programs in other disciplines which involve quantitative research.

Enrolment Requirements:
This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:
(4.0 credits)

First Year:
MAT133Y1 (70%)/(MAT135H1, MAT136H1)/MAT135Y1/MAT137Y1/MAT157Y1; CSC108H1/CSC110Y1/CSC111H1/CSC120H1/CSC148H1; (MAT135H1 and MAT136H1)/MAT137Y1/MAT157Y1 is strongly recommended).

STA130H1 is also strongly recommended.

Second Year:
MAT221H1 (70%)/MAT223H1/MAT240H1, (STA220H1/ STA221H1/ECO220Y1, STA255H1)(STA237H1, STA238H1)/(STA247H1, STA248H1)/(STA257H1, STA261H1)/ECO227Y1

MAT221H1 (70%)/MAT223H1/MAT240H1 recommended in 1st year
Higher Years:

STA302H1

0.5 credit from all available STA300+ level courses (excluding STA310H5, STA399H1 and STA399Y1; STA399H1 and STA399Y1 may be considered on a case by case basis with the approval of the Program Director.)

About Courses in Statistical Sciences

The statistics course offerings are intended not only for students in statistics programs of study, but also to serve the needs of the many other disciplines that use statistical methods.

- The first-year seminar courses, STA197H1, STA198H1 and STA199H1, are designed to provide first-year students with the opportunity to work closely with an instructor in a small class setting. Note that these courses do not count toward a Statistics program of study.
- First year students wishing to enrol in a major or specialist program in the Department of Statistical Sciences must take STA130H1, which provides a broad introduction to statistical reasoning, data science, statistical computation and communication.
- The second year foundation courses (STA220H1, STA221H1, STA237H1, STA238H1, STA247H1, STA248H1, STA255H1, STA257H1, and STA261H1) are distinguished primarily by their mathematical demands, as indicated by the prerequisites. Students interested in pursuing more advanced study in probability and theoretical statistics should take STA257H1 and STA261H1. They are the most mathematically rigorous of the 2nd year courses and provide the greatest flexibility when choosing upper-year courses. They are required by students in the specialist programs in Statistical Science: Theory and Methods and Data Science. Students in the specialist program in Statistical Science: Methods and Practice or in the major program in Statistics may instead choose STA237H1 and STA238H1. Students in computer science programs of study can take STA247H1 and STA248H1. The courses STA288H1, STA220H1 and STA221H1 provide training in statistical reasoning and methods for students in other programs of study, with STA288H1 particularly designed for students in life science programs. Students interested in completing a minor in statistics can combine STA220H1 with STA255H1, which will provide preparation in probability and statistical theory sufficient for many of the upper year courses in statistical methods.
- Pre- and co-requisites are designed to ensure that students have the appropriate preparation for their courses. They are strictly enforced. However, exceptions can be considered for students who have taken an equivalent course at another university. If you have taken courses that are exclusions to pre- or co-requisite courses, though, you should be aware that these are not always equivalent to the requisite courses and may not be allowed.

Statistical Sciences Courses

STA130H1 - An Introduction to Statistical Reasoning and Data Science

Hours: 24L/24P

This course, intended for students considering a program in Statistical Sciences, discusses the crucial role played by statistical reasoning in solving challenging problems from natural science, social science, technology, health care, and public policy, using a combination of logical thinking, mathematics, computer simulation, and oral and written discussion and analysis.

Corequisite: MAT135H1/MAT136H1/MAT137Y1/MAT157Y1. Strongly recommended: CSC108H1/CSC110Y1/CSC120H1/CSC148H1

STA197H1 - Thinking Better with Statistics

Hours: 24S

This course explores how our statistical intuitions and ways of thinking can let us down. There’s no need to be a math whiz to be a better statistical thinker. Everyone can become a more critical consumer of claims presented in media, advertisements and by politicians—especially those relevant to our own health and wealth. This course
uses real-world examples and tours common and avoidable statistical traps and tricks. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA198H1 - Probabilities Everywhere

Hours: 24S

This course examines the meaning and mathematics of probabilities, and how they arise in our everyday lives. Specific topics may include: the nature of coincidences, the concept of luck, games involving dice and cards, long run averages in casinos, margins of error in polls, the interpretation of medical studies, crime statistics, decision making, pseudorandomness, and Monte Carlo algorithms. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Grade 12 Mathematics
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA199H1 - Statistical Evidence: Truth or Myth?

Hours: 24S

This course explores the impact Statistics has made and continues to make on everyday life through science, law, and the modern methods for information processing. Statistical principles will be illustrated using examples from real life including business, romance and health. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA201H1 - Why Numbers Matter

Hours: 36L

This course teaches non-science students the importance of quantitative reasoning to many different areas. It explores a variety of applications to such diverse subjects as economics, gambling, politics, poetry, graphics, music, medicine, demographics, sports, secret codes, and more, using only basic high school level mathematics combined with logical thinking.

Exclusion: MAT133Y1/MAT135H1/MAT136H1/MAT137Y1/MAT157Y1/(MAT29H3, MAT35H3)/(MAT32H3, MAT33H3)/(MAT30H3, MAT36H3)/(MAT31H3, MAT37H3)/MAT133Y5/MAT136H5/MAT137Y5/MAT157Y5

STA202H1 - The Practice of Statistics I

Hours: 36L/12T

Continuation of STA201H1 (or similar course), emphasizing major methods of data analysis such as analysis of variance for one factor and multiple factor designs, regression models, categorical and non-parametric methods (Note: STA221H1 does not count as a distribution requirement course).

Prerequisite: STA201H1/STA288H1/PSY201H1/GGR270H1/STAB27H3/STA221H5

Breadth Requirements: The Physical and Mathematical Universes (5)
STA237H1 - Probability, Statistics and Data Analysis I

**Hours:** 36L/12T

An introduction to probability using simulation and mathematical frameworks, with emphasis on the probability needed for more advanced study in statistical practice. Topics covered include probability spaces, random variables, discrete and continuous probability distributions, probability mass, density, and distribution functions, expectation and variance, independence, conditional probability, the law of large numbers, the central limit theorem, sampling distributions. Computer simulation will be taught and used extensively for calculations and to guide the theoretical development.

**Prerequisite:** (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1/(MAT30H3, MAT36H3)/(MATA31H3, MATA37H3)/(MAT135H5, MAT136H5)/MAT137Y5/MAT157Y5

**Exclusion:** STA247H1, STA255H1, STA257H1, ECO227Y1, STAB52H3, STA256H5, ECO227Y5

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

STA238H1 - Probability, Statistics and Data Analysis II

**Hours:** 36L/12T

An introduction to statistical inference and practice needed for computer science applications. Statistical models and parameters, estimators of parameters and their statistical properties, methods of estimation, confidence intervals, hypothesis testing, likelihood function, the linear model. Use of statistical computation for data analysis and simulation.

**Distribution Requirements:** Science

**Breadth Requirements:** The Physical and Mathematical Universes (5)

STA247H1 - Probability with Computer Applications

**Hours:** 36L/12T

This course deals with the mathematical aspects of some of the topics discussed in STA220H1. Topics include discrete and continuous probability distributions, conditional probability, expectation, sampling distributions,
estimation and testing, the linear model (Note: STA255H1 does not count as a distribution requirement course).

**Prerequisite:** STA220H1/STA221H1/ECO220Y1 (note: ECO220Y1 may be taken as a co-requisite)/STAB22H3/STA220H5/ECO220Y5; MAT133Y1 (70%)/(MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1/(MATA32H3 (70%), MATA33H3 (70%))/(MATB29H3 (70%), MATA35H3 (70%))/(MATA30H3, MATA36H3)/(MATA31H3, MATA37H3)/MAT133Y5 (70%)/(MAT132H5 (70%), MAT134H5 (70%))/(MAT135H5,MAT136H5)/MAT137Y5

**Exclusion:** ECO227Y1/STA237H1/STA238H1/STA257H1/STA261H1/STA247H1/STA248H1/STAB52H3/STAB57H3/STA260H5/STA261H5

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**STA257H1 - Probability and Statistics I**

**Hours:** 36L/12T

A mathematically rigorous introduction to probability, with applications chosen to introduce concepts of statistical inference. Probability and expectation, discrete and continuous random variables and vectors, distribution and density functions, the law of large numbers. The binomial, geometric, Poisson, and normal distributions. The Central Limit Theorem. (Note: STA257H1 does not count as a distribution requirement course).

**Prerequisite:** (MAT135H1 (70%), MAT136H1(70%))/MAT137Y1/MAT157Y1 (MAT137Y1/ MAT157Y1 is strongly recommended)/(MATA30H3(70%), MATA36H3(70%))/(MATA31H3, MATA37H3)/(MAT135H5(70%), MAT136H5(70%))/MAT137Y5/MAT157Y5

**Corequisite:** MAT235Y1/MAT237Y1/MAT257Y1 (MAT237Y1/ MAT257Y1 is strongly recommended)/MATB41H3/MAT232H5/MAT233H5; MAT223H1/MAT240H1/MATA22H3/MATA23H3/MAT223H5/MAT240H5

**Exclusion:** ECO227Y1, STA237H1, STA247H1, MAT377H1, STAB52H3, STA256H5, ECO227Y5

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**STA261H1 - Probability and Statistics II**

**Hours:** 36L/12T

**Prerequisite:** STA257H1/STAB52H3/STA256H5

**Corequisite:** MAT235Y1/MAT237Y1/MAT257Y1/MATB42H3/MAT236H5; MAT223H1/MAT240H1/MATA22H3/MATA23H3/MAT223H5/MAT240H5

**Exclusion:** ECO227Y1/STA238H1/STA248H1/STAB57H3/STA260H5/ECO227Y5

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**JSC270H1 - Data Science I**

**Hours:** 24L/24P

This course is restricted to students in the Data Science Specialist program. Data exploration and preparation; data visualization and presentation; and computing with data will be introduced. Professional skills, such as oral and written communication, and ethical skills for data science will be introduced. Data science workflows will be integrated throughout the course. These topics will be explored through case studies and collaboration with researchers in other fields.

**Prerequisite:** STA257H1, CSC207H1

**Corequisite:** STA261H1, MAT237Y1/MAT257Y1, CSC236H1/CSC240H1

**Breadth Requirements:** The Physical and Mathematical Universes (5)

**STA288H1 - Statistics and Scientific Inquiry in the Life Sciences**

**Hours:** 36L/18P

Introduction to statistics and its connection to all stages of the scientific inquiry process. Issues around data collection, analysis and interpretation are emphasized to inform study design and critical assessment of published research. Statistical software is used to conduct descriptive and inferential statistics to address basic life sciences research questions.

**Prerequisite:** BIO230H1/ BIO255H1

**Exclusion:** STA220H1, PSY201H1, GGR270H1, ECO220Y1, ECO227Y1, SOC202H1, EEB225H1, HMB325H1, STA238H1, STA248H1, STA261H1, PCL376H1, STA215H5, STA220H5, STAB22H3
STA299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Science

STA302H1 - Methods of Data Analysis I

Hours: 36L

Exclusion: STAC67H3, STA302H5

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

STA303H1 - Methods of Data Analysis II

Hours: 36L

Analysis of variance for one-and two-way layouts, logistic regression, loglinear models, longitudinal data, introduction to time series.

Prerequisite: STA302H1/STAC67H3/STA302H5

Exclusion: STAC51H3

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

STA304H1 - Surveys, Sampling and Observational Data

Hours: 36L

Design of surveys, sources of bias, randomized response surveys. Techniques of sampling; stratification, clustering, unequal probability selection. Sampling inference, estimates of population mean and variances, ratio estimation. Observational data; correlation vs. causation, missing data, sources of bias.

Prerequisite: ECO227Y1/STA255H1/STA261H1/STA248H1/STA238H1/STAB57H3/STA258H5/STA260H5/ECO227Y5

Exclusion: STAC50H3, STAC53H3, STA304H5

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

STA305H1 - Design and Analysis of Experiments

Hours: 36L

Prerequisite: STA302H1/STAC67H3/STA302H5

Exclusion: STAC50H3, STAC53H3, STA305H5

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)
STA313H1 - Data Visualization

Hours: 24L/12P

An introduction to data visualization and the use of visual and interactive representations of data to support human cognition. This course covers visualization techniques and algorithms based on principles from graphic design, perceptual psychology, cognitive science, and human-computer interaction. Topics include: graphic design, interaction, perception and cognition, design and heuristics. Computational tutorials involve design review, implementation, and testing of information visualizations.

Prerequisite: At least 70% in CSC108H1/CSC110Y1 or at least 60% in CSC148H1/CSC111H1; STA238H1/STA248H1/STA261H1/ECO227Y1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Sciences (5)

STA314H1 - Statistical Methods for Machine Learning I

Hours: 36L/12T

Statistical methods for supervised and unsupervised learning from data: training error, test error and cross-validation; classification, regression, and logistic regression; principal components analysis; stochastic gradient descent; decision trees and random forests; k-means clustering and nearest neighbour methods. Computational tutorials will support the efficient application of these methods.

Prerequisite: STA238H1/STA248H1/STA255H1/STA261H1/STA57H3/STA260H5/STA258H5/ECO227Y1; CSC108H1/CSC110Y1/CSC120H1/CSC148H1/CSCA08H3/CSCA48H3/CSCA20H3/CSC108H5/CSC148H5; MAT223H1/MAT240H1/MATA22H3/MATA23H3/MAT223H5/MAT240H5; MAT235Y1/MAT237Y1/MAT257Y1/(MATB41H3, MATB42H3)/(MAT232H5, MAT236H5)/(MAT233H5, MAT236H5); (Note: STA257H1, MAT223H1/MAT240H1, MAT237Y1/MAT257Y1 are very strongly recommended)

Exclusion: STA377H1/STAC52H3/STA348H5

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

STA347H1 - Probability

Hours: 36L

An overview of probability from a non-measure theoretic point of view. Random variables/vectors; independence, conditional expectation/probability and consequences. Various types of convergence leading to proofs of the major theorems in basic probability. An introduction to simple stochastic processes such as Poisson and branching processes.

Prerequisite: STA247H1(70%)/STA255H1(70%)/STA237H1(70%)/STA257H1/ECO227Y1/STAB52H3/STA256H5; MAT223H1/MAT240H1/MATA22H3//MAT223H5/MAT240H5; MAT235Y1/MAT237Y1/MAT257Y1/(MATB41H3, MATB42H3)/(MAT232H5, MAT236H5)/(MAT233H5, MAT236H5); (Note: STA257H1, MAT223H1/MAT240H1, MAT237Y1/MAT257Y1 are very strongly recommended)

Exclusion: MAT377H1/STAC62H3/STA348H5

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

STA355H1 - Theory of Statistical Practice

Hours: 24L/12P

STA355H1 provides a unifying structure for the methods taught in other courses, and will enable students to read methodological research articles or articles with a large methodological component. Topics covered include statistical models and distributions; fundamentals of inference: estimation, hypothesis testing, and significance levels; likelihood functions and likelihood-based inference; prior distributions and Bayesian inference.

Prerequisite: STA255H1 (73%)/STA248H1 (73%)/STA238H1 (73%)/STA261H1 (60%)/ECO227Y1 (60%)/STAB57H3 (60%)/STA260H5 (60%)/ECO227Y5 (60%); MAT235Y1/MAT237Y1/MAT257Y1/(MATB41H3, MATB42H3)/(MAT232H5, MAT236H5)/(MAT233H5, MAT236H5); MAT223H1/MAT240H1/MATA22H3/MATA23H3/MAT223H5/MAT240H5; MAT235Y1/MAT237Y1/MAT257Y1/(MATB41H3, MATB42H3)/(MAT232H5, MAT236H5)/(MAT233H5, MAT236H5); MAT223H1/MAT240H1/MATA22H3/MATA23H3/MAT223H5/MAT240H5

Exclusion: STAC58H3

Breadth Requirements: The Physical and Mathematical Universes (5)

STA365H1 - Applied Bayesian Statistics

Hours: 36L

Bayesian inference has become an important applied technique and is especially valued to solve complex problems. This course first examines the basics of
Bayesian inference. From there, this course looks at modern, computational methods and how to make inferences on complex data problems.

**Prerequisite:** STA302H1/STAC67H3/STA302H5  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**JSC370H1 - Data Science II**

**Hours:** 24L/24P

This course is restricted to students in the Data Science Specialist program. Students will learn to identify and answer questions through the application of exploratory data analysis, data visualization, statistical methods or machine learning algorithms to complex data. Software development for data science and reproducible workflows. Communication of statistical information at various technical levels, ethical practice of data analysis and software development, and teamwork skills. Topics will be explored through case studies and collaboration with researchers in other fields.

**Prerequisite:** JSC270H1, STA261H1, MAT237Y1/MAT257Y1, STA302H1, CSC343H1  
**Corequisite:** STA303H1/STA305H1

**STA399H1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at [https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program](https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program). Not eligible for CR/NCR option.

**Distribution Requirements:** Science

**STA399Y1 - Research Opportunity Program**

Credit course for supervised participation in faculty research project. Details at [https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program](https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program). Not eligible for CR/NCR option.

**STA410H1 - Statistical Computation**

**Hours:** 36L

**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**STA414H1 - Statistical Methods for Machine Learning II**

**Hours:** 36L

Probabilistic foundations of supervised and unsupervised learning methods such as naive Bayes, mixture models, and logistic regression. Gradient-based fitting of composite models including neural nets. Exact inference, stochastic variational inference, and Markov chain Monte Carlo. Variational autoencoders and generative adversarial networks.
Prerequisite:
STA314H1/CSC411H1/CSC311H3/CSC411H5;
STA302H1/AC67H3/STA302H5;
MAT235Y1/MAT237Y1/MAT257Y1/(MATB41H3, MATB42H3)/(MAT232H5, MAT236H5)/(MAT233H5, MAT236H5);
MAT223H1/MAT240H1/MATA22H3/MATA23H3/MAT223H5/MAT240H5
Exclusion: CSC412H1; STAD68H3
Recommended Preparation: STA303H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA422H1 - Theory of Statistical Inference

Hours: 36L

This course examines current theory of statistical inference, particularly likelihood-based methods and Bayesian methods with an emphasis on resolving present conflicts; log-model expansion and asymptotics are primary tools.

Prerequisite: STA355H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA437H1 - Methods for Multivariate Data

Hours: 24L/12P

Practical techniques for the analysis of multivariate data; fundamental methods of data reduction with an introduction to underlying distribution theory; basic estimation and hypothesis testing for multivariate means and variances; regression coefficients; principal components and partial, multiple and canonical correlations; multivariate analysis of variance; profile analysis and curve fitting for repeated measurements; classification and the linear discriminant function.

Prerequisite: STA302H1/AC67H3/STA302H5
Exclusion: STAD37H3, STA437H5
Recommended Preparation: MAT224H1/MAT247H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA442H1 - Methods of Applied Statistics

Hours: 36L

Advanced topics in statistics and data analysis with emphasis on applications. Diagnostics and residuals in linear models, introduction to generalized linear models, graphical methods, additional topics such as random effects models, designed experiments, model selection, analysis of censored data, introduced as needed in the context of case studies.

Prerequisite: STA303H1/( STAC67H3, STAC51H3);
CSC108H1/ CSC110Y1/ CSC120H1/ CSC148H1/
CSC148H5
Exclusion: STA441H5
Recommended Preparation: At least an additional 1.0 credit in STA courses at the 300 or 400 level
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA447H1 - Stochastic Processes

Hours: 36L

Discrete and continuous time processes with an emphasis on Markov, Gaussian and renewal processes. Martingales and further limit theorems. A variety of applications taken from some of the following areas are discussed in the context of stochastic modeling: Information Theory, Quantum Mechanics, Statistical Analyses of Stochastic Processes, Population Growth Models, Reliability, Queuing Models, Stochastic Calculus, Simulation (Monte Carlo Methods).

Prerequisite: STA347H1/MAT377H1/STAC62H3
Exclusion: STA348H5, STAC63H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA450H1 - Topics in Statistics

Hours: 36L

Topics of current research interest are covered. Topics change from year to year, and students should consult the department for information on material presented in a given year.

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
STA452H1 - Mathematical Statistics I

Hours: 36L

Statistical theory and its applications at an advanced mathematical level. Topics include probability and distribution theory as it specifically pertains to the statistical analysis of data. Linear models and the geometry of data, least squares and the connection to conditional expectation. The basic concept of inference and the likelihood function.

Prerequisite: MAT223H1/MAT240H1/MATA22H3/MATA23H3/MAT223H5/MAT240H5;
MAT235Y1/MAT237Y1/MAT257Y1/(MATB41H3, MATB42H3)/(MAT232H5, MAT236H5)/(MAT233H5, MAT236H5); (STA257H1, STA355H1)/STA347H1.
Note: MAT237Y1/MAT257Y1; (MAT223H1, MAT224H1)/MAT240H1 very strongly recommended.
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA453H1 - Mathematical Statistics II

Hours: 36L

Continuation of STA452H1: statistical theory and its applications at an advanced mathematical level. Topics include classical estimation, theory with methods based on the likelihood function and the likelihood statistics. Testing hypothesis and the evaluation of confidence from both a Bayesian and frequentist point of view.

Prerequisite: STA452H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA457H1 - Time Series Analysis

Hours: 36L

An overview of methods and problems in the analysis of time series data. Topics include: descriptive methods, filtering and smoothing time series, theory of stationary processes, identification and estimation of time series models, forecasting, seasonal adjustment, spectral estimation, bivariate time series models.

Prerequisite: STA302H1/STAC67H3/STA302H5;
MAT235Y1/MAT237Y1/MAT257Y1/(MATB41H3, MATB42H3)/(MAT232H5, MAT236H5)/(MAT233H5, MAT236H5);
MAT236H5)
Exclusion: STAD57H3, STA457H5
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA465H1 - Theory and Methods for Complex Spatial Data

Hours: 36L

Data acquisition trends in the environmental, physical and health sciences are increasingly spatial in character and novel in the sense that modern sophisticated methods are required for analysis. This course will cover different types of random spatial processes and how to incorporate them into mixed effects models for Normal and non-Normal data. Students will be trained in a variety of advanced techniques for analyzing complex spatial data and, upon completion, will be able to undertake a variety of analyses on spatially dependent data, understand which methods are appropriate for various research questions, and interpret and convey results in the light of the original questions posed.

Prerequisite: STA302H1/STAC67H3/STA302H5, STA303H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

JSC470H1 - Data Science III

Hours: 24L/24P

This course is restricted to students in the Data Science Specialist program. Research topics and applications of data science methods will be explored through case studies and collaboration with researchers in other fields. Data analysis, visualization, and communication of statistical information at various technical levels, ethical practice of data analysis and software development, and teamwork skills.

Prerequisite: JSC370H1, STA314H1/CSC411H1/CSC311H1, STA303H1/STA305H1
Exclusion: STA490Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA475H1 - Survival Analysis

Hours: 36L
An overview of theory and methods in the analysis of survival data. Topics include survival distributions and their applications, parametric and non-parametric methods, proportional hazards regression, and extensions to competing risks and multistate modelling.

**Prerequisite:** STA303H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

### STA480H1 - Fundamentals of Statistical Genetics

**Hours:** 36L/9P

Statistical analysis of genetic data is an important emerging research area with direct impact on population health. This course provides an introduction to the concepts and fundamentals of statistical genetics, including current research directions. The course includes lectures and hands-on experience with R programming and state-of-the-art statistical genetics software packages.

**Prerequisite:** STA303H1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

### STA490Y1 - Statistical Consultation, Communication, and Collaboration

**Previous Course Number:** STA490H1  
**Hours:** 48L/48P

Through case studies and collaboration with researchers in other disciplines, students develop skills in the collaborative practice of Statistics. Focus is on pragmatic solutions to practical issues including study design, dealing with common complications in data analysis, and ethical practice, with particular emphasis on written communication.

**Prerequisite:** STA303H1, STA304H1/STA305H1, STA355H1 (An application is required to be considered for this course. Information about this special enrolment course as well as a link to the online application form is available on the Department of Statistical Sciences website. Priority will be given to students who complete the application during the priority enrolment period the summer before the course is offered and who are completing all requirements of the Specialist in Statistical Science: Theory and Methods or the Statistics Specialist that academic year.)  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

### STA496H1 - Readings in Statistics

Independent study under the direction of a faculty member. Students wishing to take this course must have the permission of the Department of Statistical Sciences and of the prospective supervisor. Not eligible for CR/NCR option.

**Prerequisite:** At least 1.0 STA credit at the 300+ level with a minimum grade of 80% in each course  
**Exclusion:** STA497H1/STA498Y1/STA499Y1  
**Distribution Requirements:** Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

### STA497H1 - Readings in Statistics

Independent study under the direction of a faculty member. Students wishing to take this course must have the permission of the Department of Statistical Sciences and of the prospective supervisor. Not eligible for CR/NCR option.

**Prerequisite:** At least 1.0 STA credit at the 300+ level with a minimum grade of 80% in each course  
**Exclusion:** STA496H1/STA498Y1/STA499Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA498Y1 - Readings in Statistics

Independent study under the direction of a faculty member. Students wishing to take this course must have the permission of the Department of Statistical Sciences and of the prospective supervisor. Not eligible for CR/NCR option.

Prerequisite: At least 1.0 STA credit at the 300+ level with a minimum grade of 80% in each course
Exclusion: STA496H1/STA497H1/STA498Y1

Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

STA499Y1 - Readings in Statistics

Independent study under the direction of a faculty member. Students wishing to take this course must have the permission of the Department of Statistical Sciences and of the prospective supervisor. Not eligible for CR/NCR option.

Prerequisite: At least 1.0 STA credit at the 300+ level with a minimum grade of 80% in each course
Exclusion: STA496H1/STA497H1/STA498Y1

Introduction

Trinity College offers Trinity One, a set of first-year courses, an independent studies program, and three interdisciplinary programs: Ethics, Society, and Law; Immunology; International Relations. The Major Program in Ethics, Society, and Law assembles courses offered by a variety of Departments and Colleges, including History, Philosophy, Political Science, Religion, Sociology, Woodsworth College and Trinity College. The Specialist and Major Programs in Immunology are assembled from offerings by the Departments of Biochemistry, Immunology, Molecular Genetics. The International Relations Program encompasses courses offered by the Departments of History, Political Science, Economics and Trinity College.

The Margaret MacMillan Trinity One Program

Trinity One provides first-year students with the opportunity to explore together significant issues and ideas pertaining to the conduct of human life and world affairs. Trinity One has six streams, each linked to a prominent aspect of the College’s intellectual identity: Policy, Philosophy, & Economics; Ethics, Society, & Law; International Relations; Medicine & Global Health; Biomedical Health; and Environment & Sustainability. Each stream includes two seminar courses limited to 25 students. These courses foster small-group discussion and emphasize the development of critical thinking, oral presentation, writing and research skills. Co-curricular events enable students in the streams of Trinity One to hear guest speakers and to engage in informal conversation with one another and with their professors. Please see the Trinity One webpages.

Ethics, Society, and Law

The Ethics, Society and Law program allows undergraduates to explore some of the most crucial questions facing contemporary society, and to do so by means of an explicitly interdisciplinary approach. The humanities, social sciences and natural sciences all provide useful lenses for study and distinctive skill sets. Students are required to cover core areas in each of the streams; they additionally select their own areas of focus from optional courses in fields like philosophy, religion, anthropology, women and gender studies, economics, geography, political science, sociology and criminology. Engaging across disciplines, E, S and L majors acquire a strong critical preparation for well-informed, effective analysis and action, which will serve them professionally,
locally and as members of the global community. Please see the ES&L webpages.

**International Relations**

The study of international relations dates back to antiquity and remains one of the most vital disciplines in the academic community. Its purpose is to explore the enduring questions of the origins of war and the maintenance of peace, prosperity, sustainability and well-being, the nature and exercise of power within the international system, and the changing character of the participants and process and outcomes in international decision-making.

Drawing on the strengths of faculty members in History, Political Science, Economics and related disciplines, the International Relations program offers a structured and interdisciplinary education. The program provides students with knowledge of the historical and contemporary dimensions of the international system while introducing them to the methodologies employed in historical, political, economic and social scientific analysis.

The International Relations Specialist and Major are limited enrolment programs. For more information, please consult the International Relations Program webpages.

**Immunology Studies**

For more information please see the entry under Immunology or the Immunology departmental website.

**Independent Studies**

The Trinity College Independent Studies Program is open to students of all colleges. Only full-time students are eligible to apply. The program allows you to undertake extensive research into a topic that interests you, and is an especially suitable way of doing interdisciplinary work on subjects that are not directly part of the present university curriculum. Enrolment is open until the end of the first week of the semester in which the course will begin.

Participation in the program is restricted to students who have completed at least 10.0 credits and have maintained a CGPA of at least 3.50. Students applying to the Trinity Program must already have the agreement of a full-time faculty member of the University to act as supervisor for either a half course or a full year Independent Study course. The maximum number of independent studies half courses for which a student may receive credit is one, and the maximum number of independent studies full course equivalents for which a student may receive credit is two, typically one credit in third year and one credit in fourth year. Permission to undertake Trinity independent studies projects for the equivalent of two full courses will normally be granted only to students with a cumulative GPA of at least 3.70. Your proposal must be approved by your supervisor and accepted by the director of the program, Dr. Gillian Gillison.

Course numbers are as follows: Students enrolling for the first time register for one or more of TRN300H1, TRN301Y1, TRN302Y1 (third year), or for one or more of TRN400H1, TRN404Y1, TRN405Y1 (fourth year), as appropriate. Those enrolling for a second time register in one of TRN400H1, TRN404Y1, and TRN405Y1, as appropriate. Enrolment in third year TRN independent studies courses is not a prerequisite for fourth year TRN independent studies courses but students who initially enrol in fourth year TRN independent studies courses may not subsequently enrol in third year TRN independent studies courses.

Students are enrolled in TRN independent studies courses by the Dean of Arts' office at Trinity College. Students should complete the enrolment approval process in enough time to be enrolled no later than the end of the first week of classes in the relevant term.

Please note that a TRN independent studies course is not a "directed reading" course. The expectation is that students should do original research and provide a report of this research as part of their evaluation.

Students are required to identify a second reader for their final reports, in addition to their direct supervisor, whose evaluation of the paper will form part of their final grade for the course. The second reader should also be a Faculty member.

Students are required to file a graded progress report with the director of the program, Dr. Gillian Gillison, no later than two weeks before the last date for dropping the course without academic penalty. All work including final reports must be submitted on or before the last day of classes. The supervisor and second reader will then grade the report and copies of the final essay or report, one graded by the supervisor and one independently graded by the second reader must be emailed to the Director within one week of the last day of classes.

For more information, please see the Independent Studies webpage or consult the director, Dr. Gillian Gillison.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average
A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

For students who have completed 4.0 to 8.5 credits:

• 3.0 credits from BR=2 and/or BR=3 and/or TRN170Y1

To ensure that students admitted to the program will be successful, applicants with a grade average lower than 77% will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

For students who have completed 9.0 credits:

• A minimum grade average of 77% in 3.0 credits that count toward the program, including 1.0 credit from: ETH201H1, ETH210H1, ETH220H1, ETH230H1, PHL265H1, PHL271H1, PHL275H1, and POL200Y1.

To ensure that students admitted to the program will be successful, applicants with a grade average lower than 77% will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Completion Requirements:

(7.0 credits)

1. First year: While no specific courses are required in first year, course selection should take into account the program’s admission requirements above, as well as the prerequisites for 200+ level courses students plan to take to complete the program.

2. Second year: PHL271H1, TRN203H1, and TRN204H1 are required courses that students are recommended to take in second year (their first year of registration in the program).

3. Third year: TRN303H1, TRN312H1

5. 1.0 credit from ETH201H1, ETH210H1, ETH220H1, ETH230H1, ETH350H1, ETH401H1, PHL265H1, PHL275H1, POL200Y1, to be taken in any year of registration in the program.

6. 3.0 credits from Groups A-D, including at least a 0.5 credit from each of Groups A-C and at least 1.5 credits at the 300+ level. Courses taken in fulfillment of requirement 5 above may not be counted toward the Group courses here.

Group A (Ethics)
ETH201H1, ETH210H1, ETH220H1, ETH230H1, ETH350H1, ETH401H1, PHL265H1, PHL275H1, POL200Y1, POL214Y1, POL214H1, POL320Y1, POL412H1, PSY311H1, PSY321H1, SOC208H1, SOC265H1, SOC313H1, SOC330H1, SOC360H1, SOC367H1, CRI205H1, CRI210H1, CRI300H1, CRI335H1, CRI340H1, CRI380H1, CRI425H1, WGS373H1

Group B (Society)
ANT204H1, CSC300H1, ECO313H1, ECO332H1, ECO336H1, ENV221H1, ENV222H1, ENV347H1, GGR416H1, HIS332H1, HPS324H1, JGE331H1, PHL265H1, PHL365H1, POL200Y1, POL214Y1, POL214H1, POL320Y1, POL412H1, POL432H1, PSY311H1, PSY321H1, SOC208H1, SOC212H1, SOC220H1, SOC265H1, SOC313H1, SOC330H1, SOC360H1, SOC367H1, CRI205H1, CRI210H1, CRI300H1, CRI335H1, CRI340H1, CRI380H1, CRI425H1, WGS373H1

Group C (Law)
CLA336H1, ECO320H1, ENV422H1, MST361H1, NMC484H1, PHL370H1, PHL416H1, POL337Y1, POL337H1, POL340Y1, POL340H1, POL341H1, TRN304Y1, TRN305Y1, TRN305H1, TRN425Y1, CRI225H1, CRI365H1, WGS373H1

Group D (Further Courses)
RLG309H1, TRN200Y1, TRN320H1, TRN321H1, TRN406H1, TRN407Y1, and with permission of the director: TRN300H1, TRN301Y1, TRN302Y1, TRN400H1, TRN404Y1, TRN405Y1, TRN477Y1, TRN477H1, 1.0 credit from TRN160Y1, TRN161Y1, TRN171Y1, TRN172Y1.

N.B. (1) The above CRI courses are available only to students enrolled in the double major program Ethics, Society, and Law/Criminology. (2) Access to courses in the Ethics, Society, and Law program is not guaranteed; students must check prerequisites.
Completing courses. First-year MAT courses are a prerequisite for many optional ECO courses in the IR Program Requirements listed below. Students are strongly advised to enrol in MAT133Y1/ (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1 if they wish to pursue ECO electives.

Completion Requirements:

(13.0 credits)

Consult the Office of the International Relations Program, room 310N, Munk School of Global Affairs, 416-946-8950.

Year 1 (3.0 credits):

1. ECO101H1 and ECO102H1 OR ECO105Y1
2. 2.0 credits from GGR112H1, HIS102Y1, HIS103Y1, MUN101H1, MUN102H1, MUN105Y1, POL101H1, POL106H1, POL107H1, POL109H1, TRN150Y1, TRN151Y1, TRN152Y1, VIC181H1, VIC183H1, VIC184H1, VIC185H1

Year 2 (2.5 credits):

1. ECO231H1 and ECO232H1, OR ECO202Y1/ECO206Y1/ECO208Y1. Students should note that completing (ECO231H1 and ECO232H1) limits future enrolment options in ECO courses.
2. POL208H1
3. TRN250Y1

Year 3 (4.0 credits):

1. TRN350H1
2. 1.0 credit from: ECO320H1/ECO341H1/ECO342H1/ECO362H1/ECO364H1/ECO365H1/ECO366H1
3. 1.0 credit from: HIS311Y1/HIS312H1/HIS324H1/HIS330H1/HIS338H1/HIS341Y1/HIS343H1/HIS344H1/HIS347H1/HIS350H1/HIS359H1/HIS361H1/HIS364H1/HIS377H1/HIS379H1/HIS385H1/HIS386H1/HIS397H1
5. 0.5 credit from: ECO351H1/ TRN307H1/ TRN308H1/ TRN377Y1/ Or any of the above from Year 3 Req. 2-4 not previously counted

Note: Effective Fall 2021, courses associated with St. Michael's College's Mediaeval Studies program will have the new "MST" designator.

International Relations Specialist (Arts Program) - ASSPE1469

The study of international relations dates back to antiquity and remains one of the most vital disciplines in the academic community. Its purpose is to explore the enduring questions of the origins of war and the maintenance of peace, the nature and exercise of power within an international system, and the changing character of the participants in international decision-making.

Drawing on the strengths of faculty members in History, Economics, and Political Science, the International Relations Specialist Program offers a structured and interdisciplinary education. The program provides students with knowledge of the historical and contemporary dimensions of the international system while introducing them to the methodologies employed in historical, political and economic analysis.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

• (ECO101H1 and ECO102H1) with a minimum grade of 63% in each, or ECO105Y1 with a minimum grade of 80%
• 2.0 credits from GGR112H1, HIS102Y1, HIS103Y1, MUN101H1, MUN102H1, MUN105Y1, POL101H1, POL106H1, POL107H1, POL109H1, TRN150Y1, TRN151Y1, TRN152Y1, VIC181H1, VIC183H1, VIC184H1, VIC185H1, with a minimum grade of 70% in each course.

To ensure that students admitted to the program will be successful, applicants with a final grade lower than the minimum grades stated above will not be considered for admission. Please note that obtaining these minimum final grades does not guarantee admission to the program; admission will be based on the average of the required courses.

Note: Completing ECO105Y1 limits future enrolment options in ECO courses. First-year MAT courses are a prerequisite for many optional ECO courses in the IR Program Requirements listed below. Students are strongly advised to enrol in MAT133Y1/ (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1 if they wish to pursue ECO electives.
Note: Those students choosing to add a Focus should be guided in their selection by the courses listed in their Focus group.

Year 4 (3.5 credits)

1. 1.0 credit from: (TRN409H1, TRN410H1)/TRN411Y1/ TRN419Y1/ TRN421Y1

Notes:
- Those students choosing to add a Focus should be guided in their selection by the courses listed in their Focus group.
- Effective Fall 2021, courses associated with New College’s African Studies program will have the new “AFR” designator.

Focus in Canadian Foreign & Security Relations (Specialist) - ASFOC1469B

Enrolment Requirements:

Enrolment in the International Relations Specialist is required for entry into this Focus.

Enrolment in this Focus is recommended after second year to guide choice of courses in the higher years. Please note normal course prerequisites will apply to all courses in the Focus.

Completion Requirements:

(2.5 credits)

1. HIS311Y1
2. 1.5 credits chosen from the following list: HIS312H1, POL312Y1, HIS402H1, HIS405Y1, HIS429H1, HIS430H1, POL467H1, TRN409H1 (Canadian Defense Policy since the end of the Cold War), TRN409H1 (Nuclear Weapons and International Politics), TRN410H1, TRN419Y1, VIC476H1

Notes:
- Focus courses meet the basic IRP inclusion standard of substantially and directly addressing relations between and among countries at the state or society level.
- Students can request substitutions from the IRP Director
- Not all courses may be available at all times without scheduling conflicts.

Focus in International Economy (Specialist) - ASFOC1469C

Enrolment Requirements:

Enrolment in the International Relations Specialist is required for entry into this Focus.

Enrolment in this Focus is recommended after second year to guide choice of courses in the higher years. Please note normal course prerequisites will apply to all courses in the Focus.

Completion Requirements:

(2.5 credits)

1. ECO341H1
2. ECO342H1

International Relations Major (Arts Program) - ASMAJ1469

The study of international relations dates back to antiquity and remains one of the most vital disciplines in the academic community. Its purpose is to explore the enduring questions of the origins of war and the maintenance of peace, the nature and exercise of power within an international system, and the changing character of the participants in international decision-making.

Drawing on the strengths of faculty members in History, Economics, and Political Science, the International Relations Specialist Program offers a structured and interdisciplinary education. The program provides students with knowledge of the historical and contemporary dimensions of the international system while introducing them to the methodologies employed in historical, political and economic analysis.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- (ECO101H1 and ECO102H1) with a minimum grade of 63% in each, or ECO105Y1 with a minimum grade of 80%
- 1.0 credit from GGR112H1, HIS102Y1, HIS103Y1, MUN101H1, MUN102H1, MUN105Y1, POL101H1, POL106H1, POL107H1, POL109H1, TRN150Y1, TRN151Y1, TRN152Y1, VIC181H1, VIC183H1,
VIC184H1, VIC185H1, with a minimum grade of 70% in each course.

To ensure that students admitted to the program will be successful, applicants with a final grade lower than the minimum grades stated above will not be considered for admission. Please note that obtaining these minimum final grades does not guarantee admission to the program; admission will be based on the average of the required courses.

Note:
Completing ECO105Y1 limits future enrolment options in ECO courses. First-year MAT courses are a prerequisite for many optional ECO courses in the IR Program Requirements listed below. Students are strongly advised to enrol in MAT133Y1/ (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1 if they wish to pursue ECO electives.

Completion Requirements:

(7.5 credits)

Year 1 (2.0 credits):
1. ECO101H1 and ECO102H1, OR ECO105Y1
2. 1.0 credit from GGR112H1, HIS102Y1, HIS103Y1, MUN101H1, MUN102H1, MUN105Y1, POL101H1, POL106H1, POL107H1, POL109H1, TRN150Y1, TRN151Y1, TRN152Y1, VIC181H1, VIC183H1, VIC184H1, VIC185H1

Year 2 (2.5 credits):
1. ECO231H1 and ECO232H1, OR ECO200Y1/ ECO202Y1/ ECO206Y1/ ECO208Y1. Students should note that completing (ECO231H1 and ECO232H1) limits future enrolment options in ECO courses.
2. POL208H1
3. TRN250Y1

Year 3 (2.5 credits):
1. TRN350H1
2. 1.0 credit from: HIS311Y1, HIS312H1, HIS324H1, HIS330H1, HIS338H1, HIS341Y1, HIS343H1, HIS344H1, HIS347H1, HIS350H1, HIS359H1, HIS361H1, HIS364H1, HIS377H1, HIS379H1, HIS385H1, HIS386H1, HIS397H1, TRN307H1, TRN308H1
3. 1.0 credit from: ANAT452H1, ECO324H1, ECO341H1, ECO342H1, ECO362H1, ECO364H1, ECO365H1, ECO368H1, EUR200Y1, GGR314H1, GGR326H1, GGR329H1, GGR439H1, JHA384H1, JPA376Y0, LAS200H1, LAS201H1, NMC378H1, NEW353H1, AFR353H1, POL300H1, POL302Y1, POL312Y1, POL324H1/ POL326Y1/ POL329H1/ POL330Y1/ POL340Y1/ POL361H1/ POL362H1/ POL371H1/ POL372H1/ POL377H1/ POL380H1/ POL384H1

Year 4 (0.5 credit)
TRN409H1/ TRN410H1

Notes:
• Those students choosing to add a Focus should be guided in their selection of courses at the third and fourth year level by the courses listed in the specific Focus group they choose.
• Effective Fall 2021, courses associated with New College's African Studies program will have the new “AFR” designator.

Trinity College First-Year Foundations

TRN191H1 - Disaster and Terrorism: Religion and Ethics at Ground Zero

Hours: 24S

A Global Classroom course, International Course Module, or Research Excursion Program dealing with some aspect of international affairs not captured in the above list may also fulfill the global experience requirement with approval of the Director of the International Relations Program.

Note: Effective Fall 2021, courses associated with New College's African Studies program will have the new "AFR" designator.

Regarding Trinity College Courses

Listed in this order:

- Trinity One;
- Ethics, Society, and Law;
- Independent Studies;
- International Relations;
- Other

First Year Foundations (FYF)

The FYF seminars are designed to provide the opportunity to work closely with an instructor in a class of no more than thirty students. These interactive seminars are intended to stimulate the students’ curiosity and provide an opportunity to get to know a member of the professorial staff in a seminar environment during the first year of study.

Trinity One Courses

Students participating in other Foundational Year programs (e.g., Vic One, Munk One) are excluded from Trinity One.

In response to contemporary terrorist attacks and natural disasters, many are led to cry, “The world will never be the same!” How should such statements be evaluated? What impact do they have on social and political life? This course explores religious and cultural responses to human tragedy and cultural shock. Discussion will attend to debates over the meaning of suffering, public reactions to terrorism, the traumas of natural disasters, and the role of media in covering such events. These themes are engaged from the perspectives of ethics, cultural theory, religious studies, and theology. The course focuses on popular responses to events that include: the Lisbon Earthquake of 1755, the First World War, the Holocaust,
Hurricane Katrina, the Japanese experiences of Hiroshima and Fukushima, 9/11, and more recent examples of terrorism and disaster. Attention will be given to concerns such as the impact of trauma on social and political debate, the function of religious discourse in the face of tragedy, the nature of ideology, and the relationship between religion and violence. A thematic concern throughout the course will be the nature of ethical commitment in the midst of confusion and social disruption. Restricted to first-year students. Not eligible for CR/NCR option.

**TRN192H1 - Public Health in Canada: Health for the 21st Century**

**Hours:** 24L

This course deals with preventive care and population health. It will also move into new areas like healthcare and the environment (climate change) and the greening of healthcare. It will look at health as an extension of democracy — of how health extends individual rights beyond the political realm to the social realm, of how it can build social capital and knit populations together. It will look at areas inimical to health, ‘detriments to health’ and how economic inequality can lead to health inequality. Along with this it will look at ways of empowering the individual, the public as agent and a role of public engagement by major institutions. It will also push beyond the popular determinants of health to engage students in a paradigm on next steps, the future challenges in population health. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

---

**TRN193H1 - Canadian Health Policy: Past, Present and Future**

**Hours:** 24L

This is a health systems course. It deals with illness care, individual health, and health insurance. It will take a comparative and historical approach. We will look at the genesis of Canadian healthcare, our benefits and those other countries provide (e.g., pharmacare, dental care). We will look at indirect contributors like childcare and basic income. We will examine the public-private debate. We will also take some novel approaches. One is that the university has an expanded role in the 21st century, one that involves public outreach, a role that includes healthcare. Recent academic literature on healthcare notes that it is nation-building. We will look at why. We will examine some cutting-edge ideas, like integrated care, the learning health system, the concept of customer-owners. We will explore whether our healthcare system needs to be anchored by ‘institutions of excellence’ and identify these. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**TRN194H1 - Literature and Wicked Problems**

**Hours:** 24L

This course explores contemporary literature in relation to the interdisciplinary framework of “wicked problems.” Research emphasizes that complex, entrenched problems, like government relations with Indigenous peoples or human impacts on the climate, involve interconnected systems and require approaches that cross disciplines and types of knowledge. The course examines the role of literary works (mostly 21st-century fiction) in addressing these issues of pressing concern to students as global citizens. Critical thinking, scholarly reading and database research are foundational skills that this course strengthens in order to prepare students for their writing in disciplines across the university. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

---

**TRN195H1 - The Literature of Heroes and Horrors**

**Hours:** 24L

This course explores contemporary literary works that redefine heroism in light of personal and cultural trauma. What does recent literature (mostly 21st-century fiction) show us about the nature of heroism in our time? To answer this question, the course examines theories of psychological trauma, studies in the field of positive psychology, and research on gothic and dystopian literature. Critical thinking, scholarly reading and database research are foundational skills that this course strengthens in order to prepare students for their writing in disciplines across the university. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)
“Can we speak about joy for once?” In contemporary literature from Black, Indigenous and People of Colour (BIPOC) authors across Canada and Turtle Island, there is a resurgence in diasporic stories that capture the joy and resistance of carving space for community against the mechanisms of the state. This course explores how BIPOC literature has intersected with social problems and activist movements, creating spaces for readers to reflect on their own lived experiences. Students will expand their creative thinking, critical reading and scholarly writing skills through multi-modal assignments that offer connections to current issues and community knowledge. Restricted to first-year students. Not eligible for CR/NCR option.

**Breadth Requirements:** Creative and Cultural Representations (1)

**TRN197H1 - In the Shadow of the Vikings: Depictions of the Early Norse in Medieval, Modern, and Post-Modern Culture**

**Hours:** 24L

Although rarely attested during the historical era when they were active, since the early nineteenth century the word “Viking” has been popularly applied to describe groups of Scandinavian adventurers who marauded along the frontiers of Medieval Europe: in this respect, the image of “the Viking” may be regarded as much a modern, as it is a medieval, creation. The legacy of historical “Viking activities” was a factor in the development of modern nation states in Scandinavia and the Baltic region, and their contributions to the heritage of people residing in Britain, continental Europe, the Middle East, and even the Atlantic coast of Canada have been and continue to be cited to the present day. Aspects of culture attributed to “the Vikings”—their assumed independence, courage, resourcefulness, and tenacity in the face of adversity, as well as the occult characteristics of their cosmology—have, for better and worse, inspired modern artists, writers, composers, intellectuals, explorers and even political leaders, and persist in present day literature, art, music, sport and popular culture as well. Why and how do elements of historic Viking culture continue to evoke traditions and characteristics popularly attributed to “the Vikings”? What are some implications of “Viking-ness” for those people in the post-Viking Age past and/or present who we may regard—or may regard themselves—as the “cultural descendants” of the Vikings? In this seminar, participants will study selected cultural artifacts of the “post-Viking Age,” along with recent multidisciplinary research, to observe how various “post-Viking Age” cultures and subcultures have selectively appropriated elements of the “Viking” past. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**TRN199H1 - Classical Social and Political Thought from the 18th Century Enlightenment to the 20th Century**

**Hours:** 24L

In the first part of the course, via lectures and readings, we will be examining the Enlightenment, the French and Industrial Revolutions, and the Romantic Conservative Reaction to these revolutions. In part two of the course, we will study Karl Marx, who coined the term “capitalism”
to describe the new type of society that had emerged as a product of the Industrial Revolution. Marx, as the severest critic of the capitalist system, called attention to its alienating character. In the 19th Century, his ideas provoked a response that accounts, in large measure, for the character of Western political thought. The discussion of Marx is therefore followed by the intense debate with his “ghost,” the Marxian legacy. We will engage with the participants in the debate - Weber, Pareto, Mosca, Michels, Durkheim, and Mannheim. Restricted to first-year students. Not eligible for CR/NCR option.

 Distribution Requirements: Humanities, Social Science
 Breadth Requirements: Thought, Belief and Behaviour (2)

**TRN125Y1 - Contemporary Issues in Health Science**

Hours: 48S

Can the immune system be strengthened? Are some diseases incurable? What is the best way to stop the spread of a virus? This course examines the scientific principles underlying contemporary issues in the science of human health with the goal of exposing students to the current state of biomedical research. We will develop three distinct types of understanding that are essential to literacy about the science of human health: the basic concepts in science; the nature of scientific research; and the rules that govern how scientists do their work. This course will explore topics such as stem cells, gene editing, regenerative medicine, vaccination, drug development, and personalized medicine. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

 Corequisite: TRN225Y1
 Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
 Distribution Requirements: Science
 Breadth Requirements: Living Things and Their Environment (4), Society and its Institutions (3)

**TRN135Y1 - Science and Social Choice**

Hours: 48S

Many of the decisions we make as a society rely on advances in scientific knowledge. In this course, we will discuss a number of contemporary medical topics that involve complex scientific discoveries about health, the human body, disease, and infection. We will consider genes and study the medical implications of our growing understanding of the human genome. We will study a number of recent cases in order to explore how scientific findings influence decision-making in hospitals and the selection of social policies. We will also discuss the background forces that shape medical research and how this affects the kinds of health problems that are prioritized. The objective of this course is to develop a solid understanding of biological concepts related to human health and consider them in their wider social and ethical contexts. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

 Corequisite: TRN135Y1
 Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
 Distribution Requirements: Science, Social Science
 Breadth Requirements: Living Things and Their Environment (4), Society and its Institutions (3)

**TRN136Y1 - Canadian Health Policy in the Global Context**

Hours: 48S

In this course we consider when our health policies support the highest standards of medical care, consistent with the latest discoveries in medical research. We examine the ways in which debates around ethics, effectiveness and efficiency shape global and national health policy. We begin by exploring the most important advancements in global health policy over the past two decades. We then assess Canada’s experience in providing health care, identifying lessons for national policy reform and for Canada’s role as a leader in global health research and policy. We explore a range of health challenges including universal health care, anti-microbial drug resistance, HIV AIDS, tuberculosis, reproductive, maternal, newborn and child health, cardiovascular care, oncology, environmental health, indigenous health, violence against women and mental health. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

 Corequisite: TRN135Y1
 Exclusion: TRN235H1, TRN236H1, Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
 Distribution Requirements: Science, Social Science
 Breadth Requirements: Thought, Social Science
 Breadth Requirements: Thought, Belief and Behaviour (2), Society and its Institutions (3)

**TRN140Y1 - Ethics, Humans, and Nature**

Hours: 48S
This course introduces students to ethical issues arising from the way humans interact with nature. Students will study some theoretical approaches for evaluating how human society affects the planet, ecosystems, and the other animals. Theories will be drawn from philosophy, theology, and ecology, and will include Western and non-Western approaches to living in harmony with one’s environment. Key themes may include speciesism—the idea that human needs are the most important—as well as overpopulation, extinction, vegetarianism, and responsible resource management. The course will also look at how social policy shapes human choices and whether sustainability initiatives should be pursued through the public or private sector. The course will also discuss the spiritual connection between humans and the environment and how society can be organized to promote access to nature in urban communities. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: TRN141Y1
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Breadth Requirements: Thought, Belief and Behaviour (2), Society and its Institutions (3)

TRN141Y1 - Environmental Science and Pathways to Sustainability

Hours: 48S

This course introduces students to fundamental issues in environmental science with a multi-disciplinary focus on human impacts on physical and biological systems, and on identifying pathways to sustainability. Key themes will include energy and resources, climate change, land use, contaminants and protecting biodiversity in the context of the Anthropocene. The course challenges students to apply the scientific method to environmental monitoring, research and problem solving through project design, data collection and analysis. The course also emphasizes information literacy, skills to distinguish science from pseudo-science, and considerations around representation of environmental science in the media. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: TRN140Y1
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Breadth Requirements: Living Things and Their Environment (4), The Physical and Mathematical Universes (5)

TRN150Y1 - National versus International

Hours: 48S

The international system today faces extraordinary challenges. Understanding these challenges requires understanding the past. This seminar course briefly reviews the origins and development of the international system from the 17th century through the age of empires and the great wars of the 20th century. It then concentrates on the clash of nationalism with internationalism in the world since 1945, looking at such issues as what drives nationalism and what alternatives there are to it. We will study ideas and ideologies as well as the institutions that make up the current geopolitical world. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: TRN151Y1
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2), Society and its Institutions (3)

TRN151Y1 - Global Governance

Hours: 48S

Terrorism, the proliferation of arms (including weapons of mass destruction), environmental degradation, globalization, technological change, and the rise of non-state actors all pose challenges to statecraft and the management of global order. This seminar course explores the changing dynamics of global politics and the responses to them by states (and others). Topics will include an examination of new forms of international collaboration that have developed in the wake of crises in the years following the Second World War. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: TRN150Y1/ TRN152Y1
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2), Society and its Institutions (3)

TRN152Y1 - Justice & Global Conflict

Hours: 48S

Modern states face both new and familiar challenges to protecting national security. National insecurity threatens a country’s capacity to protect the well-being of its citizens
while at the same time participating in international organizations and treaties. This course explores the origins and management of international conflict from the 17th to the 21st century, focusing on the precursors to war and the markers of peace. We will also consider the ways in which our current global world order promotes and preserves justice between and within nations. Students will consider different theoretical approaches to justice between nations, and apply them to recent security issues. By studying the history of conflict and the difference between justice and injustice students will gain a deeper understanding of how current geopolitical actors can structure and affect the prospects for security policy reform moving forward. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: TRN151Y1
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Breadth Requirements: Thought, Belief and Behaviour (2), Society and its Institutions (3)

TRN160Y1 - Public Policy and the Public Good

Hours: 48S

This course examines the sense of the public good that undergirds Canada’s domestic and international obligations. We examine the notion of the “public” through investigating possible answers to a central political question: what is the purpose of government? Drawing on readings in philosophy and political theory, the course considers a variety of approaches to defining the nature of the public good and how policy makers should respond when competing goods (e.g., freedom and security) clash with each other. In addition, the course looks at the treaties and conventions that articulate the responsibilities of signatory nations regarding challenges such as climate change mitigation, refugee resettlement, and foreign aid. Students will learn how international agreements either compel or encourage participation and multilateral cooperation in the absence of robust enforcement mechanisms.

Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: TRN161Y1/ TRN162Y1
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3), Thought, Belief and Behaviour (2)

TRN161Y1 - Making Public Policy Work

Hours: 48S

How do we know what kinds of public policy will work and what will not? How do we assess the effectiveness of a policy? An historical examination of ways in which Canadian governments have addressed a range of policy problems. Case studies of areas of federal and provincial activity today. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Trinity One
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

TRN162Y1 - Political Economy and Social Inequality

Hours: 48S

What is the relationship between capitalism and democracy? How can understanding rational choice theory inform public policy? This course will introduce students to the methods of studying the interplay between economics and politics. We will focus on specific topics to guide our quantitative analysis, which may include intergenerational poverty, the transfer of wealth, efficiency, and social stratification. We will analyse empirical results while developing critical skills for interpreting economic data and research. The course also considers global economic dynamics, transnational governance regimes, as well as the political-economic dimensions of setting global policies. By the end of the course, students will have a better understanding of global political economy, and its connection the fields of international relations and public policy.

Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: TRN160Y1
Exclusion: Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

TRN170Y1 - Ethics and the Creative Imagination

Hours: 48S

A seminar course that explores ethical issues through the study of works of the creative imagination that pose or
provoke questions of right and wrong, good and evil, justice and injustice. The selected works will be drawn from such fields as literature, film, and the visual and performing arts. Open only to students admitted to Trinity One. Restricted to first-year students. Not eligible for CR/NCR option.

**Prerequisite:** Admission to Trinity One  
**Exclusion:** Innis One, Munk One, New One, St. Mike’s One, Vic One, UC One, Woodsworth One  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1), Thought, Belief and Behaviour (2)

**TRN171Y1 - Ethics and the Public Sphere**

**Hours:** 48S

What does it mean to be morally required to do something? What rights do we have over ourselves, our bodies, our privacy, our choices? In this course, we will read texts from philosophy, history, political science, cultural studies and beyond that engage with the theme of ethics in the public arena. These will provide valuable analytic tools as we go on to confront contemporary issues that raise urgent ethical questions. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

**Corequisite:** TRN172Y1  
**Exclusion:** Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3), Thought, Belief and Behaviour (2)

**TRN172Y1 - Ethics and the Law**

**Hours:** 48S

What is the relationship between moral values and the law? What role does the law play in enabling people to live better lives? Are legal institutions and actors subject to higher ethical standards? In this course we will read texts from legal theory and political philosophy to try to explain the connection between ethics and the law. This will provide the basis for thinking about some historical and contemporary legal cases, as well as ethical issues judges, lawyers, and lawmakers face in their professional roles. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

**Corequisite:** TRN171Y1  
**Exclusion:** Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Society and its Institutions (3)

**TRN225Y1 - The Art of Health Science Discovery**

**Hours:** 48S

Illustrated by contemporary examples, students go through the stages of the scientific discovery process. From initial idea, through literature review, funding (grant writing and assessment), experimental design and critical analysis of data through to the public dissemination of results by publication, the patent process and development of intellectual property. Restricted to students admitted to the Trinity One Program.

**Corequisite:** TRN125Y1  
**Exclusion:** Innis One, Munk One, New One, SMC One, UC One, Vic One, Woodsworth One  
**Distribution Requirements:** Science  
**Breadth Requirements:** Living Things and Their Environment (4), Society and its Institutions (3)

**TRN235H1 - Health Policy in Canada: Past, Present and Future**

**Hours:** 24S

This course explores the nature and impact of public health policy in Canada. The course describes the origins of Canadian health policy, its evolution towards its current form and the choices resulting from aging populations and the increasing costs associated with a high standard of health care.

**Prerequisite:** TRN135Y1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**TRN236H1 - The Politics of Global Health**

**Hours:** 24S

This course explores the nature and impact of policy relationships designed to improve global public health. We explore the analytical tools necessary to study these institutional arrangements and examine successes and failures of these policy relationships across a range of global health policy challenges including infectious disease and child health.
Ethics, Society and Law

TRN203H1 - Society, its Limits and Possibilities

Hours: 24L/12T

Key texts from various disciplines that articulate fundamental features, limitations, and possibilities of contemporary society are introduced. TRN350H1 - Scarcity, Sustainability, and the Future of International Relations

Hours: 24L/12T

International Relations are changing, and changing quickly. Major challenges in global affairs, including the interrelated problems of climate change, resource scarcity, great power competition, and changes in mass politics will shape our future in uncertain and possibly dangerous ways. This course seeks to evaluate the effect of these interconnected issues on our world today, and their implications for the future. Through a series of case studies, students will be encouraged to identify future international challenges and work to develop sustainable and innovative solutions to the problems that will confront our world in the next decades and beyond.

TRN410H1 - Researching Critical Cases in Contemporary International Relations

This course allows students with majors in International Relations to apply some of the techniques and skills they have developed during their undergraduate careers to an original research project in contemporary international relations history. This course is a chronological historical survey of the world since 1968, as the origin of the present era. Within the chronology, attention is given to major developments/themes that emerged and continue to affect the present day. These include: the rise of China as a power, political dissent, the emergence of terrorism, the environment, energy as major international issues, the neo-liberal economic turn, globalization, the end of the Cold War, the human rights/humanitarian intervention revolution, and key post 2000 developments such as the War on Terror, the decline of the US “unipolar moment,” the 2008 financial crisis and the return in the 2010s of nationalism and protectionism. This course is restricted to students enrolled in the International Relations major program.

Prerequisite: TRN250Y1
Exclusion: TRN410Y1
Recommended Preparation: POL208Y1 or HIS344H1

TRN419Y1 - Comparative American, British and Canadian Foreign Policy

Hours: 48S

The origins and evolution of American, British and Canadian foreign policy from the late 18th century to the present. Policies are compared in order to understand the development of these countries as nations and actors in the international community.

Prerequisite: Students must have a background in one of Canadian, British or American history.
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Society and its Institutions (3)

TRN421Y1 - Fragile and Conflict-Affected States in Global Politics

Hours: 48S

Since the end of the Cold War, fragile and conflict-affected states have been widely viewed in the international relations field as one of the preeminent challenges to international security and global governance. Western countries have typically responded to this challenge by launching interventions aimed at building new states that can be integrated into the global, liberal order. This course will dissect the liberal peacebuilding and statebuilding project and explore its broader impact and implications for the international system.

Recommended Preparation: POL300Y1 or POL343Y1

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

TRN308H1 - International Experience II

Students who have engaged in a research project abroad participate in a regular forum in which they present their research projects and discuss their varied experiences of
work and social engagement in different foreign environments. Students prepare a detailed scholarly article based on their research.

**Prerequisite:** TRN307H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### TRN377Y1 - Trinity Comprehensive Paper I

Students are individually mentored by faculty experts through readings from primary literature towards preparation of a quality review article. For students in third year, students identify their faculty mentor during second year and agree to become familiar with the available textbook level material during that year in their chosen topic. Not eligible for CR/NCR option.

**Prerequisite:** Completion of 8.0 credits and permission of the instructor  
**Distribution Requirements:** Humanities, Science, Social Science

### TRN477H1 - Trinity Comprehensive Paper II

The preparation of a publication quality review article typically involves extensive editing. Students are individually mentored by faculty experts to take the review paper generated in TRN377Y1 and edit the structure, content and style to produce a publication quality review article. Not eligible for CR/NCR option.

**Prerequisite:** TRN377Y1  
**Distribution Requirements:** Humanities, Science, Social Science

### TRN478H1 - Science Writing for Non-Scientific Audiences

The course aims to train senior-level science students in a wide range of writing genres, focusing on a diversity of non-scientific audiences and writing styles. In addition, students learn to read and analyze texts in order to understand rhetorical strategies and devices.

**Prerequisite:** Students in science specialist or major programs. Permission by instructor.  
**Exclusion:** Non-science students, first or second year students.  
**Recommended Preparation:** TRN377Y1 (the comprehensive paper will serve as writing sample).  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Living Things and Their Environment (4)
Introduction

University College offers a number of programs and courses outside the areas traditionally covered by departments. These include UC One and programs and courses in Asian Canadian Studies, Canadian Studies, Cognitive Science, Drama, Health Studies, and Sexual Diversity Studies, in addition to First-Year Foundation Seminars. The overall aims of the College Programs are to foster interdisciplinary work in significant areas of study and to encourage intellectual breadth. Many program courses are open to students not enrolled in the programs themselves.

UC One: Engaging Toronto

UC One is an exciting initiative that provides first-year students with a special university experience. Students choose from one of four courses, each of which is designed to engage with the city from a different perspective. Classroom learning is directly linked to real life experience.

UC One is a 0.5 credit course, one of four courses typically taken by a first-year Faculty of Arts and Science student. Enrolment in each course is limited to up to 30 students. Students enrol in one of the following four 0.5 credit courses:

- UNI101H1: Citizenship in the Canadian City
- UNI102H1: Performing the City I
- UNI103H1: Gradients of Health in an Urban Mosaic
- UNI104H1: Sex in the City

In UC One, you can choose a stream that complements your own interests.

Weekly lectures and seminars will be supplemented with prominent guest speakers, including political and business leaders, activists from non-governmental organizations, theatre directors, artists, and health practitioners. Students will have the opportunity to meet with the speakers and socialize with their fellow students after each guest lecture. Students will also participate in a range of field trips across the city.

Students enrol to the specific section during the Enrolment period. All first-year students in the Faculty of Arts and Science (St. George campus) are eligible to enrol. Those participating in other One programs are excluded from UC One.

For more information visit the UC One website at: https://www.uc.utoronto.ca/programs-study-first-year-program-uc-one.

The Asian Canadian Studies program (Minor)

The minor in Asian Canadian Studies program focuses on community-engaged learning that explores how to understand the historical, social, cultural, economic, and political forces that affect people of Asian heritage in Canada. Our interdisciplinary courses connect students with local communities, and every course provides opportunities for students to pursue a choice of research interests. Together we critically investigate and add to knowledge about Asian Canadians.

The Canadian Studies Program (Specialist, Major, Minor)

The Canadian Studies program offers opportunities to study contemporary Canada in an interdisciplinary manner and to explore cultural, social, economical and political developments in this complex and diverse country. Students are encouraged to consider additional courses in Indigenous Studies in completing the requirements of the Program.

The Certificate in Black Canadian Studies

The Certificate in Black Canadian Studies will provide students with an opportunity to study and research the social construction of race in Canada, with a focus on Black Canada and Black Canadians, past and present. This will include attending to structural and systemic discrimination in areas including politics, judicial systems, and the arts, as well as considering counter-narratives and forms of resistance and empowerment enacted by Black Canadian communities. This certificate also offers a specialization that considers the historical roots and
contemporary implications of anti-Black racism, as well as movements that are building towards social equity, and future imaginings. While this certificate addresses local and national contexts, it also situates diasporic and transnational frameworks for understanding Blackness in Canada. As a result, the certificate also examines a comparative approach to meaning-making and belonging in solidarity with other forms of racism and oppression.

The Cognitive Science Program (Major)

The Cognitive Science Program introduces students to the field of cognitive science: the interdisciplinary study of mind in humans and machines. Our students gain an understanding of such mental phenomena as perception, language, reasoning, and consciousness, and they integrate this understanding with an account of how the human brain works.

The Cognitive Science Arts Major has three course streams: Perception and Attention; Thinking and Reasoning; and Language and Cognition. The Cognitive Science Science Major has two streams: Computational Cognition and Cognition and the Brain. Courses include: COG250Y1 Introduction to Cognitive Science; COG341H1 and COG342H1 Issues in Cognitive Science; COG401H1, COG402H1, and COG403H1 Seminar in Cognitive Science; COG498H1/COG499H1 Independent Study; as well as courses drawn from offerings in Computer Science, Linguistics, Philosophy, and Psychology.

The Centre for Drama, Theatre & Performance Studies (Specialist, Major, Minor)

The Centre for Drama, Theatre & Performance Studies is described elsewhere in this Calendar under Drama.

The Health Studies Program (Specialist, Major)

The Health Studies Program focuses on many areas of study that surround, interact with and support bio-medical research and clinical activity in regard to health, including health policy, practices, research methods, and socio-cultural expression. The Major serves as a general introduction; the Specialist provides a more intense research focus with more methodological emphasis.

The Sexual Diversity Studies Program (Specialist, Major, Minor)

The Sexual Diversity Studies Program allows students to focus on questions of sexual identity, difference, and dissidence across disciplinary lines and cultural frameworks. By examining sexual diversity across time and place, students will learn about the ways different cultures have separated the sexual from the nonsexual, the normal from the abnormal, and what the regulation of sexuality can tell us about how power operates along the lines of gender and race, for example. Students will gain an understanding of how and why certain sexual practices have come under scrutiny, and the significance of the various labels and identities that we have attached to them.

University College (UNI) and Drama (DRM) courses are staffed by a combination of specific program staff members and members of various University departments, and are open to all students at the University. Further information on University College Independent Study courses is available at https://www.uc.utoronto.ca/programs-study-academic-programs-independent-study. Further information on DRM is available at https://www.cdtps.utoronto.ca/.

Asian Canadian Studies Minor (Arts Program) - ASMIN2728

The Minor in Asian Canadian Studies focuses on community-engaged learning that explores how to understand the historical, social, cultural, economic, and political forces that affect people of Asian heritage in Canada. Our interdisciplinary courses connect students with local communities, and every course provides opportunities for students to pursue a choice of research interests. Together we critically investigate and add to knowledge about Asian Canadians.

The category "Asian Canadian" is widely understood to refer to people in Canada of East Asian, South Asian, Southeast Asian, and West Asian ancestry.

Students take two required 0.5 credit core courses in Asian Canadian Studies; select from an array of courses in Asian Canadian Studies; and take additional courses related to the larger contexts of Asian Canadian Studies. The Minor in Asian Canadian Studies is easily combined with other disciplines, such as Anthropology, Art, Economics, English, Geography, History, Political Science and Sociology, as well as with interdisciplinary studies such as Contemporary Asian Studies, Diaspora and Transnational Studies, Equity Studies, East Asian Studies, South Asian Studies, and Near Eastern Studies.
Students will be encouraged to take full advantage of the opportunities available through the Canadian Studies Program, including its journal, ImaginATIONS, produced by and for undergraduate students and its annual undergraduate student conference. The Canadian Studies Student Union is a focal point for social as well as academic pursuits, and is open to students pursuing a Minor in Canadian Studies. Students also can participate in Asian Canadian Studies student events and in the tri-campus Asian Canadian Studies Research network. The Research network brings together professors and students to discuss current research related to Asian Canadian Studies, Asian diasporas, and global Asian migrations. Students in the minor are also invited to participate in the Asian Institute’s Asian Pathways Research Lab that offers research opportunities in Toronto.

• Effective Fall 2021, courses associated with Innis College’s Urban Studies and Writing and Rhetoric programs will have the new "URB" and "WRR" designators respectively. Joint JGI courses will see their designator changed to "JGU."
• Effective Fall 2021, courses associated with New College’s Caribbean Studies and Critical Studies in Equity and Solidarity programs will have the new "CAR" and "CSE" designators respectively.
• Effective Fall 2021, courses associated with St. Michael's College's Celtic Studies program will have the new "CLT" designator.

Canadian Studies Specialist (Arts Program) - ASSPE0728

Canadian Studies courses offer opportunities to study contemporary Canada in an interdisciplinary manner to explore cultural, social, economic, and political developments in this complex and diverse country. Students are encouraged to consider additional courses in Indigenous Studies in completing the Program requirements.

Please note that not all courses are offered on an annual basis. A list of approved Canadian Studies courses can be found on the website at www.uc.utoronto.ca/canadianstudies/. Other courses that are in the current academic Calendar that include significant Canadian content may be considered for approval by the Canadian Studies Program Director. Consult the Canadian Studies Program Office, UC173, University College, 416-946-4025. Email: canadian.studies@utoronto.ca.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(11.0 credits in Canadian Studies approved courses, including 4.0 credits at the 300+ level, of which 1.0 credit must be at the 400-level.)

First Year: No specific first-year requirements. (Students are advised to take introductory courses that will serve as prerequisites for optional courses of interest taken later in the program.)

**Certificate in Black Canadian Studies - ASCER0828**

The Certificate in Black Canadian Studies will provide students with an opportunity to study and research the social construction of race in Canada, with a focus on Black Canada and Black Canadians, past and present. This will include attending to structural and systemic discrimination in areas including politics, judicial systems, and the arts, as well as considering counter-narratives and forms of resistance and empowerment enacted by Black Canadian communities. This certificate also offers a specialization that considers the historical roots and contemporary implications of anti-Black racism, as well as movements that are building towards social equity, and future imaginings. While this certificate addresses local and national contexts, it also situates diasporic and transnational frameworks for understanding Blackness in Canada. As a result, the certificate also examines a comparative approach to meaning-making and belonging in solidarity with other forms of racism and oppression.

**Enrolment Requirements:**

This is an open enrolment Certificate. A student who has completed 4.0 credits may enrol in the Certificate.

**Completion Requirements:**
Cognitive Science Major - Arts (Language and Cognition Stream) (Arts Program) - ASMAJ1445B

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- COG250Y1 with a minimum grade, or
- 1.5 credits in CSC, LIN, PHL, or PSY with a minimum grade average based on the 1.5 credits. No more than 1.0 credits can be from any ONE of the listed course designators. If more than 1.5 credits have been completed, the minimum grade average will be based on the higher course grades.

Note:

Students are responsible for checking co- and prerequisites for all courses. Not all courses are offered on a regular basis. A list of approved Cognitive Science courses can be found on the website: https://www.uc.utoronto.ca/cognitive-science. For any questions, please email uc.academicservices@utoronto.ca.

Completion Requirements:

(8.0 credits)

Where noted below, please consult the Faculty of Arts & Science Course Calendar on prerequisites.

First Year:
CSC108H1/ CSC120H1; LIN102H1 (note: LIN200H1 does not serve as prerequisite for upper year LIN courses)

Second Year:
COG250Y1 (may be taken in Year 1); STA220H1/ PSY201H1; PSY270H1

Second Year and Higher:

- COG341H1/ COG342H1, COG344H1, PHL342H1, PSY290H1
- 2.5 credits from Language and Cognition Stream courses:

Cognitive Science Major - Science (Cognition and the Brain Stream) (Science Program) - ASMAJ1446B

Today's cognitive scientists are more interested than ever before in the way the brain implements the information-processing underpinnings of cognitive mental processes. The study of cognition and the brain is the study, grounded in cognitive neuroscience, of those aspects of brain activity directly relevant to the performance of cognitive functions.

Health Studies Specialist (Arts Program) - ASSPE2085

The Health Studies Program explores how health around the world is shaped by the circumstances in which people are born, grow up, live, work, and age, and how these in turn connect to a wider set of environmental, social, cultural, economic, and political forces. Understanding health requires knowledge from a range of disciplines and sectors: Health Studies offers a stimulating interdisciplinary environment that challenges students to think about health – both locally and globally – in new ways.

Enrolment Requirements:

This is a limited enrolment program. Note there are different options depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

Variable Minimum Grade Average
A minimum grade average in required courses is normally needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

For students who have completed between 4.0 and 8.5 credits:

- 1.0 credits from: ANT100Y1/ BIO130H1/ GGR107H1/ HPS100H1/ HPS110H1/ HPS120H1/ HPS120Y1/ HST209H1/ HST211H1/ HST250H1/ PCL102H1/ PHL100Y1/ PHL101Y1/ PHL101Y1/ POL101Y1/ PSY100H1/ SOC100H1/ TRN135Y1/ UNI103H1/ UNI103Y1/ WGS160Y1. If more than 1.5 credits have been completed, the minimum grade average will be based on the higher course grades.

To ensure that students admitted to the program will be successful, applicants with a grade average lower than 77% in required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

For students who have completed 9.0 credits or more:

- 77% in 1.5 credits from: ANT100Y1/ BIO130H1/ GGR107H1/ HPS100H1/ HPS110H1/ HPS120H1/ HST209H1/ HST211H1/ HST250H1/ PCL102H1/ PHL100Y1/ PHL101Y1/ PHL101Y1/ POL101Y1/ PSY100H1/ SOC100H1/ TRN135Y1/ UNI103H1/ UNI103Y1/ WGS160Y1. If more than 1.5 credits have been completed, the minimum grade average will be based on the higher course grades.

To ensure that students admitted to the program will be successful, applicants with a grade average lower than 77% in required courses will not be usually considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Completion Requirements:

(12.0 credits, including 2.0 credits at the 400-level)

1. 1.0 credit from the following courses: ANT100Y1/ BIO130H1/ GGR107H1/ HPS100H1/ HPS110H1/ HPS120H1/ PCL102H1/ PHL100Y1/ PHL101Y1/ POL101Y1/ PSY100H1/ SOC100H1/ TRN135Y1/ UNI103H1/ UNI103Y1/ WGS160Y1

University College Courses

UC First-Year Foundations

CDN197H1 - Inventing Canada

Hours: 24S

This course explores the ways that Canadian history and identity have been commemorated, interpreted and experienced, now and in the past. The course focuses in particular on who has been included or excluded in commemorative efforts over time. Key topics include representations of women, Indigenous peoples, and political figures on screen and through public installations like museum exhibits, plaques and statues. Case studies highlighting a range of interpretive media will encourage students to work with and discuss a range of primary and secondary sources, build critical thinking and academic writing skills. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

UNI197H1 - Hamilton: Musical and History

Hours: 24S

This course examines the American revolution and its reception in the musical “Hamilton.” The American revolution generated multiple stories that included and excluded actors, peoples, perspectives, and more. This course delves into the American revolution and the diversity of those engaged in it and affected by it. The songs, performances, and reception of the musical “Hamilton” are a key resource for exploring the events and role of the American Revolution. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

UNI198H1 - Why Go to University? The Changing Role and Purpose of Higher Education

Hours: 24S

Is higher education about job preparation or about giving students an opportunity to learn about themselves and the world around them? Can higher education in Canada achieve both these aims? This course engages with the spirited conversations and scholarly debates about the ideals of a liberal arts education and how these connect with ancient and contemporary arguments about citizenship. We explore the impact on higher education of globalization and what some call the “corporatization” of universities. Students will be encouraged to think, read, research and write about various models of higher education and explore questions suggested by these debates. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CDN198H1 - Canada, Colonialism and Settler Relations

Hours: 24S

A First Year Foundations seminar focused on exploring Canada's colonial history and recent efforts to enact appropriate settler relations through an interdisciplinary lens. Topics will include contemporary land claims and treaty-making processes, the Royal Commission on Aboriginal Peoples, governmental apologies for the mistreatment of Indigenous peoples, the Truth and Reconciliation Commission, land acknowledgements, practices of allyship through social movement such as Idle No More, and efforts to influence Canada’s overseas mining practices. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

Note: Effective Fall 2021, courses associated with New College’s Critical Studies in Equity and Solidarity program will have the new "CSE" designator.
CDN199H1 - Canada- Hong Kong Migration

Hours: 24S

This course surveys the effects of migrations and cultural connections between Hong Kong and Canada from the 1960s. Students will discuss and analyze the impact of migrations, and study the connection between the two locations from the perspectives of history, culture and literature, politics and democracy, economic and financial development and the network of people and community. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

UNI199H1 - The Construction of Race in America: A History

Hours: 24S

The course will explore the origins of racial categories in America. Drawing on primary sources such as memoirs, film, and government records as well as writings by scholars, we will examine how beliefs about these categories changed over time and with what consequences for the unfolding of American history. Arriving at the present day, we will consider such contradictory developments as the accelerating influence of Black Lives Matter and the headline-grabbing white nationalism on display at the "Unite the Right" rally in Charlottesville, Virginia, August, 2017. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

UNI102H1 - Performing the City I

Previous Course Number: UNI102Y1
Hours: 36S

In this course we learn about different practices of performative engagement with the city and experiment with them through exercises and creative activities. The goal is to gain, through this mode of embodied engagement with the city, a critical understanding of urban space as a diverse social, cultural, and physical environment. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Innis One, Munk One, New One, St. Mike's One, Trinity One, Vic One, Woodsworth One
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

UNI103H1 - Gradients of Health in an Urban Mosaic

Previous Course Number: UNI103Y1
Hours: 36S

In this course, you will examine how Toronto's varied communities access and use health care, and how they may encounter barriers in doing so. You will study how economic disparities, shifting demographics, and government policies affect health policy and the right to access resources. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Innis One, Munk One, New One, St. Mike's One, Trinity One, Vic One, Woodsworth One
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

UNI104H1 - Sex in the City

Previous Course Number: UNI104Y1
Hours: 36S

You will learn about the sexual politics of the city and how cities and their neighbourhoods become sexualized and desexualized spaces. In Sex in the City, you will examine what "sex" means to Toronto's varied, multicultural communities by looking at urban space, cultural productions, law enforcement, safety and health...
resources and more. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Innis One, Munk One, New One, St. Mike’s One, Trinity One, Vic One, Woodsworth One

Distribution Requirements: Social Science

Breadth Requirements: Thought, Belief and Behaviour (2)

UNI106H1 - Performing the City II

Previous Course Number: UNI102Y1

Hours: 36S

Further exploration of connections between the performing arts, urban spaces, and cultural diversity; complementing UNI102H1. How does theatrical performance affect how people perceive the city? What are the alternatives to established theatres, and how does community activism inform performing arts in Toronto? Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: Innis One, Munk One, New One, St. Mike’s One, Trinity One, Vic One, Woodsworth One

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

CDN202H1 - Aspects of Quebec Culture

Previous Course Number: UNI202H1

Hours: 24S

An exploration of modern Québec culture as expressed in literature and the performing arts. Through a selection of internationally-known entertainers, we examine form, artistic innovation, communication of information and knowledge, and spectatorship. Novels and plays provide key elements such as tradition and historical context.

Exclusion: UNI202H1

Distribution Requirements: Social Science

Breadth Requirements: Creative and Cultural Representations (1)

CDN205H1 - Topics in Canadian Studies I

Previous Course Number: UNI205H1

Hours: 24L

A focused introduction to specific issues in Canadian culture and society. Content will vary from year to year. Specific course information will be available on the Canadian Studies website at www.uc.utoronto.ca/canadianstudies.

Exclusion: UNI205H1

Distribution Requirements: Humanities, Social Science

CDN218H1 - Voices in Canadian Writing

Previous Course Number: UNI218H1

Hours: 24S

A study of the variety of voices in Canadian fiction with a focus on contemporary writers. Issues such as marginalization, migration, diaspora and the formulation of the Canadian canon are discussed.

Exclusion: UNI218H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

CDN221H1 - Culture and the Media in Canada

Previous Course Number: UNI221H1

Hours: 24L

An exploration of the encounter between culture and mass communication in Canadian society. The course considers the role of major cultural institutions such as the CBC, the NFB, and their granting bodies. The emergence of new media and its relationship to mass media is also addressed.

Exclusion: UNI221H1

Distribution Requirements: Social Science

Breadth Requirements: Creative and Cultural Representations (1)

CDN230H1 - Asian Canadian History

Previous Course Number: UNI230H1

Hours: 24L

The course examines the history of Asian Canadians from the mid-1800s to the present by analyzing their contributions to the socio-cultural, economic, and political development of Canada. It explores how Asian Canadian history reconfigures prevailing understanding of race, migration, multiculturalism, and national identity through intersectional, comparative, and transnational frameworks.
Exclusion: UNI230H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

CDN240H1 - Italian Canadian Studies

Hours: 24L

An interdisciplinary course that examines the social, economic, and political forces and events that have shaped the Italian Canadian experience. Topics include initial and subsequent settlement patterns including suburbanization, identity formation, education, mobility, work, media, multiculturalism, transnationalism, and political participation and representation. The course interrogates the complexities of the social and cultural interactions of Italian Canadians in the context of the changing demography of Canada.

Recommended Preparation: CDN267H1, CDN268H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JCI250H1 - Italian Canadian Communities

Hours: 24S

This course examines the past and present settlement patterns of those of Italian descent in Canada, in rural areas and cities, including increasing suburbanization. Students will address issues such as work and employment and political participation. Challenges and opportunities will be examined, with respect to issues such as migration, community-building, belonging, and discrimination.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CDN267H1 - Canadian Nationalisms

Previous Course Number: UNI267H1
Hours: 24L

A critical examination of contemporary forms of Canadian nationalism. This interdisciplinary course will interrogate national formations across theoretical works, policy documents, and cultural representations. Students will address the ways that nationalist discourses constitute difference, especially with respect to race, ethnicity, gender, and sexuality.

Exclusion: UNI220Y, UNI267H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CDN268H1 - Canada and Globalization

Previous Course Number: UNI268H1
Hours: 36L

Students examine the impact of contemporary globalization on Canada, and for Canada's place in the world. The course is interdisciplinary in its approach and addresses globalization from a wide range of perspectives, including mobility, trade, urbanization, health, religion, environmental change, technology, communications, and the arts.

Exclusion: UNI220Y, UNI268H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CDN280H1 - Canadian Jewish History

Previous Course Number: UNI280H1
Hours: 24L

This course focuses on initial settlement patterns of Jews in Toronto and elsewhere, community growth including suburbanization, and contemporary challenges such as anti-Semitism and assimilation.

Exclusion: UNI280H1
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Society and its Institutions (3)

CDN305H1 - Topics in Canadian Studies II

Previous Course Number: UNI305H1
Hours: 24L

An in-depth study of selected questions in contemporary Canadian culture and society. Content will vary from year to year. Specific course information will be available on the Canadian Studies website at www.uc.utoronto.ca/canadianstudies/.

Exclusion: UNI305H1
Distribution Requirements: Humanities, Social Science
CDN307H1 - Asian Cultures in Canada

Previous Course Number: UNI307H1
Hours: 24S

An exploration of the cultural histories and creative productions of a wide range of Asian communities in Canada. Experts in specific areas - literature, dance, drama, film - will be invited to present their work.

Exclusion: UNI307Y1, UNI307H1
Recommended Preparation: CDN267H1 (formerly UNI267H1), CDN268H1 (formerly UNI268H1)
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

JUG325H1 - Landscapes of Violence in Canada

Hours: 24L

This course examines how violence is enacted in Canada, at various scales, and across domestic, urban, national, and international landscapes. We will interrogate what is meant by violence; examine its colonial, racial and patriarchal dimensions; explore the impact on people and communities; and attend to forms of resistance and repair.

Recommended Preparation: CDN267H1, CDN268H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JUG320H1 - The Canadian Wilderness

Hours: 24L

The idea of wilderness permeates narratives of Canadian national identity, while policy-makers seek to manage and contain natural areas. This course compares and contrasts historical and contemporary wilderness narratives in literature, painting and film with policies in areas such as conservation, urban planning, land claims and tourism.

Recommended Preparation: 8.0 credits
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

JSU325H1 - Queerly Canadian

Previous Course Number: UNI325H1
Hours: 36L

This course focuses on Canadian literary and artistic productions that challenge prevailing notions of nationality and sexuality, exploring not only how artists struggle with that ongoing Canadian thematic of being and belonging, but also celebrate pleasure and desire as a way of imagining and articulating an alternative national politics.

Prerequisite: SDS255H1/SDS256H1/CDN267H1 (formerly UNI267H1)/CDN268H1 (formerly UNI268H1) or permission of the instructor
Exclusion: SDS375H1 Special Topics: Queerly Canadian, UNI325H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CDN325H1 - Asian Canadian Space & Place

Hours: 24L

A comprehensive examination of how Asian Canadian communities shape urban and suburban environments. Explore how urban planning and peoples' local decisions interact to create space, place, and culture.

The course applies a multidisciplinary lens, with an emphasis on culture and heritage, place and identity formation, diasporas, multiculturalism, and nationalism.

Prerequisite: 5.0 credits. Students who do not meet the prerequisite are encouraged to contact the instructor
Recommended Preparation: CDN267H1/CDN268H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CDN335H1 - Black Canadian Studies

Previous Course Number: UNI335H1
Hours: 24S

An interdisciplinary course that interrogates the constitution of blackness in Canada. Students will study race and ethnic relations, alongside other identity formations such as class, gender and sexuality. Topics to be addressed include media, education, law, immigration and mobility, urbanism, work, political representation and the arts.

Exclusion: UNI335H1
Recommended Preparation: CDN267H1 (formerly UNI267H1), CDN268H1 (formerly UNI268H1)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
CDN340H1 - The History of Canadian-U.S. Relations

Hours: 24L

Over time, Canadians and Americans have developed distinct identities and cultures, but their histories have always been closely linked. This course examines the complex interrelationship between Canada and the United States from the colonial period through the present day, especially its political, cultural, and indigenous dimensions.

Prerequisite: 0.5 CDN credit. Students who do not meet the prerequisite are encouraged to contact the instructor.

Exclusion: CDN305H1 (Canadian Topics II: The History of Canadian-U.S. Relations)

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

CDN365H1 - The Canadian Arctic

Hours: 24S

This course surveys topics related to the Canadian Arctic. Through a critical interdisciplinary lens, the course looks at a broad set of issues including discovery and history, the environment and climate change, economic and resource development, sovereignty and security, social conditions, governance, and First Nations, Inuit, and Metis perspectives.

Prerequisite: 4.0 credits or 1.0 credit in Canadian Studies

Exclusion: CDN406H1 (Topics in Canadian Studies III: Canadian Arctic Policy Development and Inuit Recognition)

Recommended Preparation: CDN267H1, CDN268H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

JCI350H1 - Italian Canadian Culture and Identity

Hours: 24S

This course examines the contributions of Canadians of Italian descent to arts, culture, identity and heritage in Canada, with attention to the diversity of the community with respect to issues such as language, religion, gender, class, sexuality, etc. A core concept addressed by the course is immigration, whether from the experiences of migrants themselves or later generations.

Recommended Preparation: JCI250H1/ITA233H1

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

CDN367H1 - Canadian Pluralism

Previous Course Number: UNI367H1

Hours: 24S

Students will examine the complexities of social and cultural interaction in the context of changing Canadian demographics. This course compares and contrasts policies regarding indigenous rights, migration, multiculturalism, and citizenship with contemporary cultural narratives in literature, painting and film.

Prerequisite: CDN267H1/CDN268H1 or permission of instructor

Exclusion: UNI320Y1, UNI367H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

CDN368H1 - Canada's Borders

Previous Course Number: UNI368H1

Hours: 24S

The Canadian border is being reshaped by the increasing transnational movement of people, goods and ideas. Students will examine border issues relating to mobility, trade, and security from a wide range of interdisciplinary perspectives, from public policy to contemporary media, such as TV, films, and novels.

Prerequisite: CDN267H1/CDN268H1 or permission of instructor

Exclusion: UNI320Y1, UNI368H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)
CDN380H1 - Socio-Cultural Perspective of the Canadian Jewish Community

Previous Course Number: UNI380H1
Hours: 24L

This course examines the relationship between prominent Canadians who happen to be Jews and those whose works are founded in Jewish identity; the diversity of the community on the basis of religion, language, class, ideology, etc.; contributions to the arts and scholarship; and the role and contribution of Jewish women.

Exclusion: UNI380H1
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Creative and Cultural Representations (1)

CDN385H1 - Re-Imagining Canada: Creative Visions of Our Past, Present, and Futures

Hours: 24S

Artists and writers are re-imagining Canada, exploring alternate pasts, presents, and futures, often critiquing systemic inequities by positing “what ifs” of resistance and renewal, while reclaiming agency, voice, and power for those who are disadvantaged in society. This course will examine these re-imaginings across various media such as fiction, poetry, graphic novels, films, multimedia installations, performance art, paintings, virtual reality works, and video games. Examples will be drawn from a wide variety of genres such as speculative fiction, Afrofuturism, Indigenous arctic horror, trans, queer, Indigenous and Indigiqueer perspectives.

Prerequisite: Completion of 4.0 credits
Recommended Preparation: CDN267H1 (formerly UNI267H1), CDN268H1 (formerly UNI268H1)
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CDN390H1 - Chinese Canadian Studies

Previous Course Number: UNI390H1
Hours: 24S

This course examines socio-cultural, political and economic aspects of Chinese communities in Canada. It explores how the study of Chinese Canadians challenges and augments our understanding of issues such as immigration and diaspora, multiculturalism, and race and ethnicity.

Prerequisite: 4.0 credits. Students who do not meet the prerequisite are encourage
Exclusion: UNI390H1
Recommended Preparation: CDN230H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CDN395H1 - Independent Study in Asian Canadian Studies

Previous Course Number: UNI395H1

An opportunity to write an independent research paper in Asian Canadian Studies under direction of a faculty member. Students wishing to take this course must have their essay proposal and supervisor approved by the Canadian Studies Program Director. The application for enrolment should be made in the term preceding study. Not eligible for CR/NCR option.

Prerequisite: CDN267H1/CDN268H1 or permission of instructor
Exclusion: UNI395H1

CDN405H1 - The University in Canada

Previous Course Number: UNI405H1
Hours: 24S

This seminar course will address the role of universities in Canadian society and in the lives of Canadians. Students will explore both contemporary issues in Canadian higher education and consider the historical contexts from which they emerged.

Prerequisite: CDN367H1/CDN368H1 or permission of instructor
Exclusion: UNI405H1
Recommended Preparation: CDN267H1, CDN268H1, CDN367H1, CDN368H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CDN406H1 - Topics in Canadian Studies III

Hours: 24S

An in-depth study of selected questions in contemporary Canadian culture and society. Content will vary from year to year. Specific course information will be available on the Canadian Studies website at www.uc.utoronto.ca/canadianstudies.
Prerequisite: 4.0 credits or 1.0 credit in Canadian Studies
Recommended Preparation: CDN267H1, CDN268H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CDN420Y1 - Senior Essay

Previous Course Number: UNI420Y1
Hours: 48S

Students select an appropriate research topic and, in consultation with the Program Director, make arrangements with a suitable supervisor. Preferably, research projects must be approved by the supervisor and by the Director of the Canadian Studies Program by April of the preceding academic year. Students meet periodically during the year in seminar to participate in peer evaluations of: statement of research, literature review, methods of analysis, and to share reports of progress in research. Not eligible for CR/NCR option.

Prerequisite: Normally open only to Majors and Specialists in the Canadian Studies program or permission of Director.
Exclusion: UNI420Y1
Distribution Requirements: Humanities, Social Science

CDN425H1 - Independent Research in Canadian Studies

Previous Course Number: UNI425H1

An opportunity to write a substantial research paper in Canadian Studies that integrates research methodologies and conceptual frameworks developed over the student’s course of study. Students must have their topic and supervisor approved by the Canadian Studies program director. Not eligible for CR/NCR option.

Prerequisite: CDN367H1, CDN368H1 or permission of Director
Distribution Requirements: Humanities, Social Science

CDN430Y1 - Senior Seminar: Special Topics in Canadian Studies

Previous Course Number: UNI430Y1
Hours: 48S

An upper level seminar. Not eligible for CR/NCR option.

Prerequisite: CDN367H1 (formerly UNI367H1), CDN368H1 (formerly UNI368H1) or permission of the Director of the Canadian Studies program
Exclusion: UNI430Y1

CDN435Y1 - Active Citizenship in a Canadian Context

Previous Course Number: UNI435Y1
Hours: 48S

This course draws from theoretical works to critically examine the experiences of citizenship of various communities in Canada. A service learning component is incorporated so that students can themselves engage in active citizenship. The course develops extra-curricular expertise that can contribute to a student’s professional CV.

Prerequisite: 9.0 credits and an application. See http://www.uc.utoronto.ca/courses-offered-canadian-studies-program for details.
Exclusion: UNI435Y1
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

Cognitive Science

COG250Y1 - Introduction to Cognitive Science

Previous Course Number: JUP250Y1, UNI250Y1
Hours: 78L

An introduction to the problems, theories and research strategies central to the interdisciplinary field focusing on the nature and organization of the human mind and other cognitive systems. Interrelations among the philosophical, psychological, linguistic and computer science aspects of the field are emphasized.

Exclusion: JUP250Y1, UNI250Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

COG260H1 - Data, Computation, and the Mind

Hours: 24L/12P

How does the human mind work? We explore this question by analyzing a range of data concerning such topics as human rationality and irrationality, human memory, how objects are represented in the mind, and the relation of language and cognition. This class provides critical thinking and practical computational skills that will
allow students to work with data in cognitive science and related disciplines.

Prerequisite: CSC108H1/CSC148H1
Corequisite: COG250Y1
Distribution Requirements: Social Science
Breadth Requirements: The Physical and Mathematical Universes (5)

COG341H1 - Issues in Cognitive Science I: Attention, Perception, and Consciousness

Hours: 36L

An examination of core topics in cognitive science building on introductions in COG250Y1. Typical topics include: perception and attention; concepts; imagery; consciousness.

Prerequisite: COG250Y1 and one of PSY270H1/PHL342H1
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

Hours: 36L

An examination of core topics in cognitive science building on introductions in COG250Y1. Typical topics include: concepts; theories of mind; cognitive evolution.

Prerequisite: COG250Y1 and one of PSY270H1/PHL342H1
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

COG343H1 - Issues in Cognitive Science III: Computational Cognition

Hours: 24L/12P

An examination of core topics in cognitive science building on introductions in COG250Y1. Typical topics include: computational models of cognition and learning, natural language processing, computer intelligence.

Prerequisite: COG260H1, CSC148H1, STA220H1/PSY201H1
Corequisite: COG250Y1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

COG344H1 - Issues in Cognitive Science IV: Language and Communication

Hours: 36L

An examination of core topics in cognitive science building on introductions in COG250Y1. Typical topics include: language and cognition; language acquisition; theories of meaning; pragmatics.

Prerequisite: COG250Y1 and one of either LIN232H1/LIN241H1 or JLP315H1/JLP374H1.
Breadth Requirements: Thought, Belief and Behaviour (2)

COG345H1 - Issues in Cognitive Science V: Cognitive Science and Society

Hours: 36L

An examination of core topics in cognitive science building on introductions in COG250Y1. Topics include central moral, social, and political questions both relevant to and raised by cognitive science research.

Prerequisite: COG250Y1 and one of PSY270H1/PHL342H1
Breadth Requirements: Society and its Institutions (3)

COG401H1 - Seminar in Cognitive Science

Hours: 36S

Advanced treatment of cognitive science topics for arts majors. Possible topics include: concepts, consciousness, the mind-body problem, cognitive science and the arts.

Prerequisite: COG250Y1; PHL342H1; 14.0 credits
Exclusion: COG402H1, COG403H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
COG402H1 - Seminar in Cognitive Science

Hours: 36S

Advanced treatment of cognitive science topics such as neuroscientific theories of consciousness, rationality and modelling of cognitive processes.

Prerequisite: COG250Y1; PSY270H1; 14.0 credits
Exclusion: COG401H1; COG403H1
Distribution Requirements: Science, Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

COG403H1 - Seminar in Cognitive Science

Hours: 36S

Advanced treatment of cognitive science topics, including the application of core ideas from probability theory, information theory, statistics, and machine learning to modelling human cognition and artificial intelligence.

Prerequisite: 14.0 credits, CSC148H1, COG250Y1, COG260H1, (MAT135H1, MAT136H1)/MAT137Y1, 0.5 credit in statistics
Exclusion: COG401H1, COG402H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

COG404H1 - Seminar in Cognitive Science

Hours: 36S

Advanced treatment of cognitive science topics, including language processes and language representation, productions and comprehension, language acquisition, and language and theory of mind, pragmatics, reference and context.

Prerequisite: COG250Y1; JLP315H1/JLP374H1; LIN232H1/LIN241H1; 14.0 credits.
Exclusion: COG401H1; COG402H1; COG403H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

COG415H1 - Cognitive Science in Practice

Hours: 18L/15P

This course provides COG students with the opportunities to practice quantitative and qualitative evaluation and assessment methods in real world situations and juxtapose theory with practice. Placement activities will ground topics such as problem solving, logistics, decision making, etc., through practical application, individual and group / in-class critical reflection.

Prerequisite: COG250Y1, COG341H1/ COG342H1, PSY370H1
Distribution Requirements: Science
Breadth Requirements: Thought, Belief and Behaviour (2)

COG498H1 - Independent Study

Advanced Independent Study. Not eligible for CR/NCR option.

Distribution Requirements: Humanities, Social Science

COG499H1 - Individual Study in Cognitive Science

Advanced Independent Study. Not eligible for CR/NCR option.

Distribution Requirements: Humanities, Social Science

Health Studies

PHS100H1 - Discovering Global Health

Hours: 24L/24T

This course introduces students to basic public health-related concepts, significant aspects of the historical development of global health, and a selection of topics illustrating the broad and evolving nature of this field. In addition, it helps students explore the contributions that various disciplines/fields offer to global health.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
HST209H1 - Introduction to Health: Determinants of Health & Health Care

Previous Course Number: UNI209H1
Hours: 24L

A multidisciplinary approach to understanding perspectives in health, health equity, and primary health care. Themes include critical discussion of the measurements of health outcomes and the socioeconomic and political factors that affect health, including neglected and marginalized populations in Canada and globally.

Exclusion: UNI209H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

HST211H1 - Health Policy in Canada

Previous Course Number: UNI211H1
Hours: 24L

Introduces students to health policy in Canada, with a particular focus on the social determinants of health, and on how to improve health through policy advocacy. Examines the policy making process in the Canadian context, and the development of health policy in Canada. Explores current debates about health issues.

Exclusion: UNI211H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

JSU237H1 - Introduction to HIV/AIDS: Health, Sexuality and Gender

Previous Course Number: UNI237H1
Hours: 24L

A critical examination of the HIV/AIDS global pandemic from a multidisciplinary perspective and with an emphasis on sexuality. The course examines the basic biology of HIV/AIDS and then covers social, historical, political, cultural, gender, and public health aspects of HIV/AIDS. Attention is given to the distinct features of vulnerable and marginalized populations, prevention, treatment, drug development, and access to medicines.

JSU237H1 is particularly intended for students in the Health Studies and/or Sexual Diversity Studies programs.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

HST250H1 - Introduction to Research Methods in Health Studies

Previous Course Number: UNI250H1
Hours: 36L

Offers students in Health Studies a basic understanding of the logic of research methods, including research design and data collection on health topics as well as means for assessing validity, generalizability, and representativeness of data.

Exclusion: UNI250H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

PHS300H1 - HIV Prevention Research

Hours: 24L

This course examines HIV prevention research across the full spectrum of sciences concerned with prevention of HIV and sexual health, including basic science, clinical science, epidemiology, behavioural science, social science, and legal, policy, economic analysis, and cultural theory. Examples are borrowed from efforts across the globe.

The course highlights prevention research related to key populations at risk of HIV infection and transmission. The course focuses on challenges and issues, with the goal of stimulating critical thinking and engagement with topics. Some material will be presented by Guest Lecturers who are experts in the areas, allowing students to learn from and interact with these experts and to hear about their current research as well as their career paths.

It is expected that at the end of this course students will have an advanced appreciation of the history and future and underlying values and ethics of effective HIV prevention research, including future possibilities and challenges. One ancillary aim is to encourage students to compare and contrast HIV Prevention with prevention research in adjacent areas (e.g., HCV, HPV).

Recommended Preparation: STA220H1 or equivalent
Distribution Requirements: Science, Social Science
Breadth Requirements: Society and its Institutions (3)

HST305H1 - Perspectives in Health, Gender, Ethnicity and Race

Hours: 24L

This course will examine historical and contemporary health disparities with respect to gender, ethnicity, and
race. Other intersectional issues such as Colonialism, class, sexuality, and the urban/rural divide will also be considered as they to social determinants of health. Attention will be focused on examples of disparities that perpetuate and exacerbate current epidemiological challenges for underrepresented populations in Canada and globally.

Prerequisite: HST250H1/STA220H1/STA288H1/GGR207H1/EEB225H, or other equivalent
Recommended Preparation: HST209H1
Breadth Requirements: Social Science

HST306H1 - Health, Nutrition and Food Security

Hours: 24L

This course examines the antecedents (for example: social structure, environments, human development and behaviour) that underlie nutrition-mediated aspects to human health and disease. This will include review and analysis of seminal, primary, and current research as well as contemporary issues surrounding nutritional literacy and deficits, food insecurity and access, as these relate to morbidity and pre-mature mortality. The course will also examine existing public health practices for health promotion and access, and population-level disease prevention and interventions.

Prerequisite: HST250H1/STA220H1/STA288H1/GGR207H1/EEB225H, or other equivalent
Recommended Preparation: HST209H1
Breadth Requirements: Society and its Institutions (3)

HST307H1 - Special Topics in Health Studies I

Hours: 24L

The specific content of this course will vary from one year to another, depending on the availability of particular health researchers and scholars. Specific course information will be available on the Health Studies website at www.uc.utoronto.ca/healthstudies/.

Distribution Requirements: Social Science

HST308H1 - Aging and Health

Previous Course Number: UNI308H1
Hours: 24L

Provides an understanding of the interface between health and aging, and how to maintain wellness in a rapidly aging population. Examines theories of aging, the meaning of health in old age, myths about the health of Canada's older people, and emerging national and international responses to aging populations.

Prerequisite: HST209H1, HST211H1
Exclusion: UNI308H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

HST309H1 - Special Topics in Health Studies II

Previous Course Number: UNI309H1
Hours: 24L

The specific content of this course will vary from one year to another, depending on the availability of particular health researchers and scholars. Specific course information will be available on the Health Studies website at www.uc.utoronto.ca/healthstudies/.

Distribution Requirements: Social Science

HST310H1 - Critical Health Policy

Previous Course Number: UNI310H1
Hours: 24L

A critical, in-depth exploration of contemporary health and social issues. Political, social and economic forces at play in Canadian society are examined in relation to specific health issues and policies, in order to understand general societal and system dynamics of evolution and change, and to identify implications for reform efforts.

Prerequisite: HST211H1
Exclusion: UNI310H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

HST330H1 - Population Health

Previous Course Number: UNI330H1
Hours: 24L
Extends students’ understanding of population-based strategies of health promotion in Canada. Topics include: variations in health status as affected by population patterns, class, gender, ethnicity, employment, and family composition; major causes of morbidity and mortality; the concept of “community health”, opportunities and constraints facing public policy.

**Prerequisite:** HST209H1  
**Exclusion:** UNI330H1  
**Recommended Preparation:** HST250H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**HST350H1 - Health Research & Practice**

**Previous Course Number:** UNI350Y1, HST350Y1  
**Hours:** 36S

For students enrolled in the Health Studies Specialist and Major programs. Students engage in career-planning, presentation, and workshop activities that will prepare them for independent research and practicum projects as well as potential graduate-school applications. Includes, but not limited to, sessions on topic selection and project development, finding a supervisor, ethics and professionalism.

**Prerequisite:** HST250H1  
**Exclusion:** UNI350Y1, HST350Y1  
**Distribution Requirements:** Social Science

**HST373H1 - Epidemiology**

**Previous Course Number:** UNI373H1  
**Hours:** 36L

Introduces students to the principles and methods of epidemiology. Emphasis on descriptive methods and study design. Computational techniques, measurement problems, and issues that surround the drawing of inferences from area-level or other aggregate data will be discussed.

**Prerequisite:** STA220H1 or equivalent  
**Exclusion:** HMB342H1, UNI373H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** The Physical and Mathematical Universes (5)

**HST400Y1 - Health Studies Practicum**

**Hours:** 172P/24S

For students enrolled in the Health Studies Specialist and Major programs. Individual field placement with a health-related institution or organization, in which the student applies theory and skills to specific projects and/or tasks. Culminates in an oral and written report. Not eligible for CR/NCR option.

**Prerequisite:** HST350H1/HST350Y1 or permission of the Director

**HST405H1 - Global Migration and Health**

**Previous Course Number:** HST307H1  
**Hours:** 24L

Over the past decades, economic globalization, widening socio-economic inequities, conflict, natural disasters, environmental degradation, and, more recently, climate change have combined to become increasingly significant forces shaping global migration fluxes. This course analyzes the impact of migration on the health of those who move and of individuals, communities and entire societies in countries of origin, transit, arrival, and resettlement. It adopts an interdisciplinary approach, incorporating scholarly work from the fields of public health, the social sciences, law, and human rights.

**Prerequisite:** HST209H1  
**Exclusion:** HST307H1 (Special Topics in Health Studies I: Globalization, Migration and Health), offered in Winter 2017, Winter 2018, and Winter 2019  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**HST407H1 - Special Topics in Advanced Health Studies I**

**Hours:** 24L

The specific content of this course will vary from one year to another, depending on the availability of particular health researchers and scholars. Specific course information will be available on the Health Studies website at www.uc.utoronto.ca/healthstudies/.

**HST409H1 - Special Topics in Advanced Health Studies II**

**Hours:** 24S

The specific content of this course will vary from one year to another, depending on the availability of particular health researchers and scholars. Specific course
information will be available on the Health Studies website at [www.uc.utoronto.ca/healthstudies/](http://www.uc.utoronto.ca/healthstudies/).

**Exclusion:** UNI409H1

**HST410H1 - Case Studies in Health Policy**

**Previous Course Number:** UNI408H1  
**Hours:** 36S

Analyses the formation and implementation of health policy through the use of case studies. Each case deals with a substantive health policy issue. Using case studies, students will learn to understand and analyze the processes by which public policies are formed, and perform comparisons of policy alternatives.

**Prerequisite:** HST211H1  
**Exclusion:** UNI408H1, HST408H1  
**Recommended Preparation:** HST310H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**HST411H1 - Political Economy of Health**

**Previous Course Number:** UNI411H1  
**Hours:** 36S

Examines the production and distribution of health and illness within and across populations. A political economy approach is used to better understand the fundamental origins of health inequalities, the political action that is required to tackle them, and the obstacles that hinder the possibilities for such action.

**Prerequisite:** HST209H1  
**Exclusion:** UNI411H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**HST440H1 - Health & Pharmaceuticals**

**Previous Course Number:** UNI440H1  
**Hours:** 24L

A critical examination of drug development, including the role of health professionals and the pharmaceutical industry in researching, testing, marketing, licensing, and evaluating pharmaceutical drugs. Topics include the differing needs for drug development, evaluation and dispensing in lower income countries, and potential conflicts of interest in drug development.

**Prerequisite:** HST209H1/HMB303H1  
**Exclusion:** UNI440H1, UNI330H1 (Health & Pharmaceuticals) taken prior to 2010-11  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**HST450Y1 - Undergraduate Health Research Project**

**Previous Course Number:** UNI450Y1

Final culminating project for students in the Health Studies Specialist. Students will prepare an undergraduate thesis by the end of the course under the supervision of a University of Toronto faculty member. Not eligible for CR/NCR option.

**Prerequisite:** HST250H1, STA220H1, HST350Y1  
**Exclusion:** UNI450Y1  
**Distribution Requirements:** Social Science

**HST451Y1 - Independent Research in Health Studies**

**Previous Course Number:** UNI451Y1

This two-semester course designation will permit students to gain academic credit for health studies pursued independently, or to participate in an ongoing health research project, under the supervision of a University of Toronto faculty member. Not eligible for CR/NCR option.

**Prerequisite:** HST209H1, HST250H1  
**Exclusion:** UNI451Y1  
**Recommended Preparation:** HST350Y1  
**Distribution Requirements:** Social Science

**HST464H1 - The Nature of Global Health**

**Previous Course Number:** UNI464H1  
**Hours:** 24L

Explores the historical, ideological, economic, political, and organizational factors that shape the theory and practice of international health (IH). Students will be encouraged to critically examine some of the central tensions embedded in this field.

**Prerequisite:** HST209H1/HMB303H1  
**Exclusion:** UNI464H1  
**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)
HST480H1 - Independent Research in Health Studies

Previous Course Number: UNI480H1

This one-semester course will permit students to gain academic credit for health studies pursued independently, or to participate in an ongoing health research project, under the supervision of a University of Toronto faculty member. Not eligible for CR/NCR option.

Prerequisite: HST209H1, HST250H1
Exclusion: UNI480H1
Recommended Preparation: HST350Y1
Distribution Requirements: Social Science

Other University College Courses

JUM202H1 - Mathematics as an Interdisciplinary Pursuit

Hours: 24L/12T

Study of the interaction of mathematics with other fields of inquiry: how mathematics influences, and is influenced by, the evolution of science and culture. Art, music, and literature, as well as the more traditionally related areas of the natural and social sciences may be considered. (Offered every three years)

JUM202H1 is particularly suited as a Science Distribution Requirement course for Humanities and Social Science students.

Exclusion: JUM102H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

JUM203H1 - Mathematics as a Recreation

Hours: 24L/12T

A study of games, puzzles and problems focusing on the deeper principles they illustrate. Concentration is on problems arising out of number theory and geometry, with emphasis on the process of mathematical reasoning. Technical requirements are kept to a minimum. A foundation is provided for a continuing lay interest in mathematics. (Offered every three years)

JUM203H1 is particularly suited as a Science Distribution Requirement course for Humanities and Social Science students.

Exclusion: JUM103H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

JUM205H1 - Mathematical Personalities

Hours: 24L/12T

An in-depth study of the life, times and work of several mathematicians who have been particularly influential. Examples may include Newton, Euler, Gauss, Kowalewski, Hilbert, Hardy, Ramanujan, Gödel, Erdös, Coxeter, Grothendieck. (Offered every three years)

JUM205H1 is particularly suited as a Science Distribution Requirement course for Humanities and Social Science students.

Exclusion: JUM105H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)

UNI299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

UNI393Y1 - University College Independent Studies

An opportunity to design an independent research course of study at the 300 level not otherwise available within the Faculty. Normally, students will have a minimum cGPA of 3.0 and have completed 10.0 credits. Permission of a faculty supervisor and approval by the Vice-Principal are required. Those registered in a UC program or UC-registered students should submit a written proposal and application form to the Programs Office (UC173) for approval. Applications for Y and F courses are due by 30 June prior to the academic year; S courses to be submitted by 15 September; Summer proposals are due by 15 February. Not eligible for CR/NCR option.
Application form is available at the University College website at www.uc.utoronto.ca.

**Prerequisite:** Permission of University College Vice-Principal

Introduction

Victoria College (Vic) is committed to providing students with a personal and inclusive university experience inside and outside the classroom. This is an environment where students and faculty are engaged in building a community that welcomes diversity, embraces creativity, and is energized by challenge.

At Vic, we nurture a close-knit learning environment from the very beginning of your academic career. Whether it is through our Vic One program, Vic One Hundred or other First-Year Foundation (FYF) courses offered by the Faculty of Arts and Science, every first-year Victoria College student takes at least one small seminar course. You will experience here the academic advantages of being a student at one of Canada’s leading research universities combined with the intimacy of a small liberal arts college.

More information is found on the Victoria College website.

Vic One

Victoria College offers first-year Arts and Science students an opportunity for a unique educational experience that draws upon the College’s history and identity. Eight streams with differing emphases are available in this foundation year program, known as Vic One. The eight streams feature lively seminars and dialogue, and are enriched by weekly plenary sessions with guest professors, visiting artists, writers, ambassadors and other public figures.

Two required courses in each stream are seminar courses given by faculty of Victoria College. They have a limited enrolment of 25 students in each class. A third co-requisite course is listed with each course description. Students who have questions about their Vic One co-requisite course must contact the Vic One Liaison Officer at vic.one@utoronto.ca.

Vic One enrolment requires an application that is found on the Vic One website (www.vic.utoronto.ca). All first-year
students in the Faculty of Arts and Science (St. George campus), regardless of college membership, are eligible for admission to Vic One. Admission decisions are based on extra-curricular activities, a short original essay and the student’s entering grades.

PLEASE NOTE: Vic One students are NOT eligible to enrol in Vic One Hundred courses, First-Year Foundations seminars or any other One program.

Vic One Hundred: First Year Seminars

Vic One Hundred is a Victoria College initiative that offers first-year Arts and Science students the opportunity to experience a small class environment. These limited enrolment courses facilitate close contact with distinguished teaching faculty and fellow students, while providing an excellent gateway to, and foundation for, subsequent studies.

Combined Degree Programs (CDP) offered with Ontario Institute for Studies in Education (OISE)

- Combined Degree Program in HBA/HBSc and Master of Teaching (MT)
- Combined Degree Program (CDP) in Education and Society, HBA/HBSc and Master of Arts, Child Study and Education (MA-CSE) (Victoria College and OISE)

Students enrolled in the Minor in Education and Society may apply for one of these Combined Degree Programs. For details about application and program requirements, see the Combined Degree Programs section.

Creative Expression and Society Program

The Minor in Creative Expression and Society allows students to develop creative and communicative proficiency by taking part in one or more workshop-style courses in fiction, non-fiction, drama or poetry writing and/or creative expression through aural and visual media. Students will also explore the reciprocal relationship of the creative arts and society by studying social issues in the arts, the influence of writers and artists on society, and the impact of the society and the marketplace on creative endeavours. Courses explore such topics as the arts and public opinion; reception and interpretation; marketing and reviewing; censorship and criticism; ethics and accountability. This program fosters the exercise of creativity while making the relationship of creative expression and social conditions a subject for reflection and dialogue.

Education and Society Program

The Vic-sponsored Education and Society Minor is open to all Arts and Science students. This program is for those who are interested in education policy, the sociology of education, and teaching as a skill that is relevant to many careers. The Minor program provides strong background for admission to a teacher education program and is required for admission to the Combined Degree Programs with OISE (separate application required, see above).

Literature and Critical Theory Program

The Literature and Critical Theory program is based on a pair of ideas. The first is that many of the most important issues that engage our attention call for a multidisciplinary approach. The second is that the kind of critical analysis demanded by the study of literary texts offers powerful tools for investigating other cultural and social forms, both past and present. Central to the program is the comparative study of forms of representation – texts, media, institutions, and theories – in diverse cultures and historical periods. This requires thinking seriously about what it means to compare and what it means to translate.

The Literature and Critical Theory program will attract students who are interested in exploring and generating links between literature and historical, cultural, political, social, and psychological forces. The program trains students to think about how problems of the present are tied to those of the past, and to consider critically how we both represent this past and imagine possible futures. Students will be engaged in the practice of close, contextualized analyses of literary texts and other discursive forms, including artefacts, institutions and social practices, originating in different languages, geographical locations, and historical periods.

Literary production, like all forms of cultural production, invariably exceeds the boundaries of the nation, and increasingly so in today’s globalized world. The boundaries between various cultural media are similarly porous, and the aesthetic values by which we identify, judge, and classify literary and cultural objects are historically shaped. For these reasons, students will be encouraged to study in more than one language and to work with a variety of media. Our courses explore literary and cultural movements across languages, geographical regions, epochs, media, and disciplines.

Material Culture and Semiotics Program

What does it mean to live in a “material world”? What might we learn from studying the signs that surround us? In an increasingly consumer-oriented, globalized and digital age, how do objects and signs express the longstanding beliefs and values of different societies? The Minor in Material Culture and Semiotics is a unique, future-oriented program of study that combines the study of objects such as clothing, household goods, machinery,
and built forms with semiotics – the science of signs, sense-making, and cultural interpretation. Courses examine the meanings people invest in their things, across cultures and time periods, and consider processes of production, consumption, invention, exchange, use, reuse, divestment, disposal, collection, and exhibition. Material Culture and Semiotics thus offers an interdisciplinary space in which to understand contemporary and emerging society through engagement with historical and theoretical perspectives on human behaviour and meaning-making. Students have the opportunity to participate in an internship course with a placement in museums, archives, cultural institutions, or creative design and advertising-oriented businesses. The Minor is designed to complement programs in such disciplines as Anthropology, Art History, History, Book and Media Studies, and History of Science and Technology and to prepare students for careers in such fields as marketing and advertising, museums and cultural institutions, communications, journalism, and education.

**Renaissance Studies Program**

The Renaissance Studies Program lets you study one of the most critical periods in European and world history. Changes in art and literature, in social and political development, and in technology and science transformed European concepts of the individual, society, and the world.

Many aspects of our modern world had their origin in this period: our emphasis on the study of human affairs; our irrepressible interest in the exploration of the universe, in science, and in medicine; the institutions of church and state as we know them today. The Renaissance is also a period of unparalleled European contacts with non-European civilizations – from the powerful Islamic world of the Near East and North Africa to the great pre-Columbian civilizations of the Americas, from the uncharted forests of equatorial Africa to the exotic lands of the Indian subcontinent and the Far East, nothing seemed too distant or too inaccessible for the European mind or merchant.

This interdisciplinary program is particularly attractive to students of history, politics, literature, fine art, history of science, music and theatre, because it assembles aspects of all these studies to focus on one seminal period in Western civilization.

**Science, Technology, and Society Program**

The influence of scientific research and its applications is evident in virtually all aspects of modern life, from our conception of societal obligation and familial relations, to our interaction with the commonplace materials and objects we use to sustain ourselves. However, scientific and technological development is in turn affected by and shaped by politics, public opinion, moral beliefs and cultural practices.

Courses in this program explore topics such as ethical uses of technology, scientific revolutions and controversies, science-related policy and politics, modeling and communication of scientific research, and knowledge transfer from research to commercial and societal applications.

**Victoria College Programs**

**Literature and Critical Theory Specialist in the Comparative Literature Stream (Arts Program) - ASSPE1026**

**Enrolment Requirements:**

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

**Completion Requirements:**

(12.5 credits, no more than 1.0 credit at the 100-level, at least 3.0 credits at 300-level and 1.0 credit at 400-level)

1. First year in program: LCT202Y1
2. First or second year in program: LCT203H1, LCT205H1
3. 3.5 credits from VIC162H1, VIC163H1, VIC190Y1, LCT204H1, LCT301H1, LCT302H1, LCT303H1, LCT304H1, LCT305H1, LCT306H1, LCT307H1, LCT308H1, LCT401H1/ LCT401Y1, LCT403H1, LCT494H1/ LCT494Y1.
4. 0.5 credit in Breadth Requirement Category 5: The Physical and Mathematical Universes, or another half course approved by the program coordinator, to fulfill the Quantitative Reasoning competency required in the program.
5. LCT402H1
6. 6.0 credits in languages or literatures drawn from other departments, of which:
   - at least 4.0 credits must involve reading texts in a language other than English,
   - at least 2.0 credits must be at the 300+ level.

Note: Effective Fall 2021, courses associated with Victoria College’s Literature and Critical Theory program will have the new “LCT” designator.
Literature and Critical Theory Specialist in the Cultural Theory Stream (Arts Program) - ASSPE1023

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(12.5 credits, no more than 1.0 credit at the 100-level, at least 3.0 credits at 300-level, and 1.0 credit at 400-level)

4. 1.0 credit in Art from: FAH230H1, FAH330H1, FAH331H1, FAH335H1, FAH337H1, FAH338H1, FAH340H1, FAH341H1, FAH370H1, FAH371H1, FAH393Y0, FAH430H1, FAH433H1, FAH434H1, FAH436H1, FAH440H1, FAH470H1

Note: Effective Fall 2021, courses associated with Victoria College's Renaissance Studies program will have the new "REN" designator.
Creative Expression and Society Minor (Arts Program) - ASMIN2741

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

4.0 credits including at least 1.0 credit at the 300+ level, with a maximum of 1.0 credit at the 100-level. Up to 1.0 credit may be chosen from approved courses offered by other departments (see list of Cognate Courses).

1. At least 1.0 credit from Group A – Creative Expression: VIC191Y1, CRE273H1, CRE275H1, CRE276H1, CRE279H1, CRE280H1, CRE282H1, CRE350Y1, CRE370H1, CRE470H1, CRE479H1, CRE479Y1, CRE480H1, IVP210H1/ CRE210H1.

2. At least 1.0 credit from Group B – Social Contexts and Interpretation: VIC190Y1, CRE209H1, MCS223H1, VIC223Y1, CRE235H1, CRE247H1, CRE270H1, CRE271H1, CRE281H1, VIC320H1/ VIC320Y1, CRE335H1, CRE352Y1, CRE371H1, CRE372H1, MCS373H1, CRE374H1.

3. Up to 1.0 credit from Cognate Courses: SMC219Y1, SMC229H1, SMC317H1, BMS319H1, CIN201Y1, DRM428H1, EAS349H1, ENG287H1, ENG289H1, ENG388H1, ENG389H1, FAH352H1, FAH382H1, INS300Y1, MUS211H1, WRR211H1, WRR311Y1, WRR414H1

Notes:

- Effective Fall 2021, courses associated with Victoria College's Creative Expression and Society, and Material Culture and Semiotics programs will have the new "CRE" and "MCS" designators respectively.
- Effective Fall 2021, courses associated with Innis College's Writing and Rhetoric program will have the new "WRR" designator. In addition, active courses associated with St. Michael's College's Book and Media Studies program will have the new "BMS" designator.

Education and Society Minor (Arts Program) - ASMIN1029

The Vic-sponsored Education and Society (E&S) Minor is open to all Arts and Science students. The program provides students with opportunities to develop their understanding of the social, cultural, historical, and political contexts of education and issues related to these contexts while reflecting on the reciprocal relationship between education and society.

Conceived as an interdisciplinary Minor program, E&S targets students from a broad array of Major and Specialist programs with interests in education, teaching, curriculum development, learning, child development, social justice, and international education. The Minor program provides strong background for admission to a teacher education program and is required for admission to the Combined Degree Program with OISE.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade or grade averages in required courses are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- PSY100H1/ SOC100H1/ VIC150Y1 (70%)
- 3.0 credits (minimum grade average of 73%)

To ensure that admitted students are adequately prepared to succeed in the program, applicants with a final grade and grade averages lower than those listed in the required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program.

Special requirement

Program applicants will be required to submit a supplemental application including 2 short questions related to the Education & Society Minor.

Completion Requirements:

Science, Technology, and Society Minor (Arts Program) - ASMIN2743

The Minor in Science, Technology, and Society is an interdisciplinary program that focuses on the different ways science and technology shape modern society and, in turn, how society shapes science and technology. From the food we eat to the way we conceive family relations or our obligations to future generations, our daily practices and our beliefs are increasingly influenced by scientific research and its applications. In turn, politics, public opinion, moral beliefs and cultural practices affect scientific and technological development. Courses in this program address such topics as science and values, science-related policy and politics, ethical uses of technology, scientific revolutions and controversies, modeling and communication of scientific research, and knowledge transfer from research to commercial and societal applications.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC117H1 - Understanding the Performing Arts: Interpretation and Expression

Hours: 24S

This course examines two key issues about the performing arts that concern both artists and theorists: the nature of interpretation and of expression. What might we mean when we say that a work, a piece of music or a dance for example expresses something? What is it to express? And what is the nature of interpretation? Are there any constraints or boundaries on interpretation? We will draw on both philosophers and non-philosophers to
explore these sorts of questions. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**VIC119H1 - Myths and Legends in Modern Contexts**

**Hours:** 24S

This course provides an introduction to modern forms of ancient narratives, exploring the ways in which selected ancient literary sources and myths have been adapted to modern Canadian literature. Ancient narratives or ‘old stories’ are often reused, reinterpreted or reconstructed in modern narratives and given new relevance in a contemporary context. Students will encounter sources and contexts of ancient narratives. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**VIC121H1 - Evaluating Healthcare: Problems and Solutions**

**Hours:** 24S

This course introduces students to the study of healthcare by asking foundational questions about how evidence and knowledge are produced in the context of healthcare problems. Students will explore how different frameworks for clinical practise (e.g. Evidence-based Medicine, Person-Centered Healthcare) conceptualize evidence and how different methodologies impact how healthcare research is conceived, reported, and understood. Students will learn to critically appraise healthcare research studies and assess their evidence value and implications for clinical practice. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**VIC134H1 - Globalization**

**Hours:** 24S

This interdisciplinary course explores the contemporary character of globalization. The world is shrinking as money, goods, people, ideas, weapons, and information flow across national boundaries. Some commentators assert that a more tightly interconnected world can exacerbate financial disruptions, worsen the gap between rich and poor nations, undermine democracy, imperil national cultures, harm the environment, and give unconstrained freedom to predatory corporations. Others proclaim that globalization - understood as capitalism and free markets - fosters economic growth, encourages creative collaboration, inspires technological breakthroughs, and enhances human prospects for a better life, in rich and poor countries alike, in unprecedented ways. Our task is to evaluate the evidence and draw our own conclusions. Not eligible for CR/NCR option.

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**VIC135H1 - The Death of Meaning**

**Hours:** 24S

In *The Origin of Species*, Darwin concluded there was no evidence to suggest that life was designed by a higher power. A corollary of this is that our lives lack any necessary purpose or meaning. Our readings will be directed to the question of what it means to lack ‘Meaning’. Not eligible for CR/NCR option.

**Distribution Requirements:** Humanities  
**Breadth Requirements:** Thought, Belief and Behaviour (2)
VIC136H1 - How to Study Everyday Life

Hours: 24S

CRE235H1 - Innovation in Society

Previous Course Number: VIC235H1
Hours: 24L

This course investigates the history and contemporaneity of innovation as a response to social, scientific, and environmental challenges. Students will acquire key frameworks for understanding the workings of innovation, the place of creativity, and the social impacts of new and disrupted organizations. Through historicizing key moments of innovation (from the Gutenberg printing press to today’s healthcare discoveries) and considering related issues (including intellectual property and sustainability) students will develop approaches to understanding the past, present, and future of creative disruption.

Exclusion: VIC235H1, MUN101H1, MUN102H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

CRE247H1 - Creativity in the Sciences

Hours: 24S

This course explores definitions of “creativity” and compares its significance in science to creativity in arts, business or engineering. By studying major developments in the history of science as well as psychological and neuroscientific studies, we will consider factors that enable creativity; creativity in fundamental science and at various stages of a project; the randomness or predictability of scientific discoveries; disciplinary and interdisciplinary work; the evaluation of discoveries; and attempts to predict the future of scientific creativity.

Prerequisite: Any 1.0 credit combination of courses carrying a breadth requirement (BR) category of 4 or 5.
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

CRE270H1 - Listening: A Critical History

Previous Course Number: VIC270H1
Hours: 24S

Surveying scenarios for public and private musical listening, from historical contexts to the present, this course explores critical questions about how we listen, including the relationship between musical genres and listening situations, the definition of music vs. noise, the influence of spectatorship, and the impact of changing technologies. Students discuss the changing aesthetics and ideologies of musical listening, considering ways in which listening shapes our understanding of the social and our awareness of communities.

Exclusion: VIC270H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

CRE271H1 - Reading the Wild

Previous Course Number: VIC271H1
Hours: 24S

In light of the environmental crisis, this seminar surveys a wide range of oral and written literature in order to discover how our approach to nature has changed over the centuries, what gains and losses have attended modernity, and what older cultures can teach us as we seek to preserve threatened ecosystems.

Exclusion: VIC271H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

Particular emphasis will be placed on the artistry of the writers' presentation, the role of dialogue, the economy of narrative, etc. Students will read Chekhov, *The Kiss, Lady with a Dog* and Tolstoy, *Master and Man* but will also be exposed to such contemporary popular authors as Elmore Leonard, *When the Women Come Out to Dance*; Truman Capote, *Mojave*; Richard Ford, *The Occidentals*; Philip Roth, *The Dying Animal*; Ian McEwen, *The Cement Garden*; and David Bezmozgis, *Natasha*.

**CRE335H1 - Ethical Enterprise and Critical Reflection**

**Previous Course Number:** VIC335H1  
**Hours:** 24L

The course explores what change we hope to produce through a wide range of new enterprises. The main goal is to develop critical perspectives on enterprises in the widest sense, including start-up companies, non-profits, arts institutions, community outreach organizations, and social activism. What would make these changes ethical? When we evaluate the endeavours, how can we compare economic benefits, social disruption, questions of exclusions and diversity, sustainability in several senses, and the processes of change themselves? Where are the limits of social responsibility in entrepreneurial creativity?

**Prerequisite:** 4.0 credits in any subject

EDS361H0 - A Study of Chinese Literature and Culture

Previous Course Number: VIC361H0

This course takes place on exchange in Beijing, China. This course will compare selected works of Chinese and Canadian authors with a view to the presentation of such writing in an educational setting.

Exclusion: VIC361H0
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

EDS363H1 - Teaching Math: The JUMP Approach

Previous Course Number: VIC363H1
Hours: 24S

This course will challenge the widely accepted idea that people need to be born with a special gift or natural ability to excel in mathematics. New research in education and cognitive science suggests that young learners often struggle in school because they are not taught in a way that allows their brains to work efficiently. This course will examine barriers that prevent students from learning and methods of teaching that can help all students reach their full potential (not only in math). Math lovers and math phobic students are welcome: the course aims to help students develop deeper levels of confidence and understanding in mathematics so they can become effective teachers themselves.

Exclusion: VIC363H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

EDS368H1 - Special Topics in Education and Society

Previous Course Number: VIC368H1

Literature and Critical Theory

LCT202Y1 - Forms of Representation

Previous Course Number: VIC202Y1
Hours: 48L/24T

This course explores representation as a cultural and political problem from antiquity to the modern era. Representation will be analyzed as a means of depicting or constructing reality and as a tool for constituting individual and collective subjectivity. We consider literary and other modes of representation in their historical contexts.

Exclusion: VIC202Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LCT203H1 - Empires I

Previous Course Number: VIC203H1
Hours: 24L/12T

This course explores representation as a cultural and political problem from antiquity to the modern era. Representation will be analyzed as a means of depicting or constructing reality and as a tool for constituting individual and collective subjectivity. We consider literary and other modes of representation in their historical contexts.
This course examines the literary and non-literary representations that accompany imperial conquests and hegemony from pre-modern times to the emergence of the modern nation-state. We compare the establishment, interpretation and reinvention of cultural forms of empire (e.g. Ottoman, Persian, Roman) at local, national, transnational and global levels.

Exclusion: VIC203H1, VIC203Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

LCT204H1 - Canons and Canonicity

Previous Course Number: VIC204H1
Hours: 24L

This course will consider the problem of canons in a variety of contexts: the aesthetic (including the literary, visual arts and music), but also the religious, the political, the philosophical and other discursive forms. Special focus will be on the problem of the relations across these boundaries.

Exclusion: VIC204H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LCT205H1 - Empires II

Previous Course Number: VIC205H1
Hours: 24L/12T

This course examines the literary and non-literary representations that accompany imperial conquests and hegemony from the emergence of the modern nation-state through more recent developments in globalization. We compare the establishment, interpretation and reinvention of cultural forms of empire (e.g. British, Japanese, Spanish) at local, national, transnational and global levels.

Exclusion: VIC205H1, VIC203Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

LCT300Y0 - Special Topics in Literature and Critical Theory

Previous Course Number: VIC300Y0
Hours: 48S

Special topic in Literature and Critical Theory. Topics vary by instructor and are listed on the Victoria College programs website.

Prerequisite: Completion of 9.0 credits
Recommended Preparation: LCT202Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

LCT301H1 - Critical Writing Seminar

Previous Course Number: VIC301H1
Hours: 24S

This course is a writing intensive class devoted to the practice and analysis of critical writing. We will explore the critical tradition, the public(s) for whom one writes, and the choice of voice, point of view, and writerly form. The class will be structured around workshop style discussion and writing exercises.

Exclusion: VIC301H1
Recommended Preparation: LCT202Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

LCT302H1 - Pasts and Futures

Previous Course Number: VIC302H1
Hours: 24S

An introduction to representations of history, in which we will consider concepts that turn on the problem of time such as tradition, periodization, genealogy, memory, crisis, revolution, eschatology, and utopia.

Exclusion: VIC302H1
Recommended Preparation: LCT202Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

LCT303H1 - Memory and Trauma

Previous Course Number: VIC303H1
Hours: 24S

This course will explore the problem of memory in relation to both collective and individual trauma. What pressure does trauma place on language, and agency, and how does it figure in commemoration, narrative, monumentalization, and other modes of representing the past?
Exclusion: VIC303H1
Recommended Preparation: LCT202Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LCT304H1 - Praxis and Performance

Previous Course Number: VIC304H1
Hours: 24S

This course will explore what it means to “act” in cultural, political, religious, and psychological realms. We focus on the historically shifting relations between theory and practice, between artifice and agency, and between theatricality and spectatorship.

Exclusion: VIC304H1
Recommended Preparation: LCT202Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

LCT305H1 - Institutions and Power

Previous Course Number: VIC305H1
Hours: 24S

This course will consider some of the ideologies and practices of various institutions at work in the production and transmission of cultural objects and social power. These may include the family, museum, hospital, prison, university, library, and theatre, as well as fields such as publishing and religion.

Exclusion: VIC305H1
Recommended Preparation: LCT202Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

LCT306H1 - Culture and Media

Previous Course Number: VIC306H1
Hours: 24S

This course will consider relations between various cultural media – such as film, literature, photography, visual art, architecture – with specific attention to the historical demands and possibilities posed by technological change.

Exclusion: VIC306H1
Recommended Preparation: LCT202Y1
Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

LCT307H1 - Periodization and Cultural History

Previous Course Number: VIC307H1
Hours: 24S

This course explores the phenomenon of historical periodization in its various modes, including as a stylistic concept, a set of discursive norms for cataloguing and grouping cultural forms, and a means of organizing and contesting historical narratives.

Exclusion: VIC307H1
Recommended Preparation: LCT202Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LCT308H1 - Identities

Previous Course Number: VIC308H1
Hours: 24S

Though “identity” might suggest sameness, it is historically unstable and has many components, including ability/disability, age, class, ethnicity, gender, health/illness, ‘race,’ sexuality, and religion. This course considers the complexities of identity-formation and identity-transformation as captured in literary texts and cultural artefacts over a wide range of historical and cultural contexts.

Exclusion: VIC308H1
Recommended Preparation: LCT202Y1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

LCT401Y1 - Seminar in Comparative Literature

**Material Culture and Semiotics**

**MCS223H1 - Signs, Meanings, and Culture**

Previous Course Number: VIC223Y1  
Hours: 24S

This course will introduce the main elements of semiotic theory, applying it to the study of human culture from language, myth, and art to popular forms such as pop music, cinema, and material culture. It will deal with primary texts in the development of semiotics, and cover a broad range of cultural applications of semiotic theory.
MCS224Y1 - Approaches to Material Culture

Previous Course Number: VIC224Y1
Hours: 24P/48S

This course is about things - the everyday objects of past and present cultures. It examines the meanings people have invested in objects and how those meanings have changed over time. Using interdisciplinary approaches, students investigate objects found in homes, retail spaces, cities, art galleries and museums in order to develop new understandings of the objects that structure their daily lives and their material world.

Exclusion: VIC224Y1, VIC224H1, MCS224H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

MCS224H1 - Approaches to Material Culture

Previous Course Number: VIC224H1
Hours: 12P/24S

This course is about things - the everyday objects of past and present cultures. It examines the meanings people have invested in objects and how those meanings have changed over time. Using interdisciplinary approaches, students investigate objects found in homes, retail spaces, cities, art galleries and museums in order to develop new understandings of the objects that structure their daily lives and their material world.

Exclusion: VIC224Y1, VIC224H1, MCS224H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

MCS225Y1 - A History of the World in Objects and Signs

Previous Course Number: VIC225Y1
Hours: 24P/48S

Through a multidisciplinary approach, this course opens new perspectives on the history of artifacts, the evolution of a world of things and signs, and the meanings of material culture. Lectures and tutorials are supplemented by hands-on exercises in museums and local communities.

Exclusion: VIC225Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

MCS320H1 - Semiotics of Visual Art

Previous Course Number: VIC320H1
Hours: 24L

Theories and models of applied semiotics: analysis of sign systems as articulated in various forms of artistic and cultural production.

Prerequisite: MCS223H1/VIC223Y1
Exclusion: VIC320H1
Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)

MCS322H1 - Topics in Semiotics

Previous Course Number: VIC322H1
Hours: 24S

An in-depth examination of some aspect of semiotic theory or practice. Content in any given year depends on instructor. Not offered every year.

Prerequisite: MCS223H1/VIC223Y1
Exclusion: VIC322H1
Distribution Requirements: Social Science
Breadth Requirements: Creative and Cultural Representations (1)

MCS323H1 - Theories of the Sign

Previous Course Number: VIC323Y1
Hours: 24S

Theories of signification studied with a focus on major works in the semiotics of modern and contemporary culture.

Prerequisite: MCS223H1/VIC223Y1
Exclusion: VIC323Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
MCS325H1 - Media Semiotics

Previous Course Number: VIC325H1
Hours: 24L

This course will deal with media semiotics, both in the traditional sense of the study of meanings in all media (from print to digital) and in how new digital media are changing the nature of signification and communication. The course will look at the usage of semiotics to study how meaning is negotiated in interactive media versus the older and still extant one-way media (print and radio, for example). The course will utilize actual media materials (comic books, television programs, text messages, and so on) on which semiotic analysis can be conducted.

Prerequisite: MCS223H1/VIC223Y1
Exclusion: VIC325H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

MCS326H1 - The Material Culture of Food

Previous Course Number: VIC326H1

This course explores the material cultures which form around food and foodways in contemporary culture. It looks at foods as objects of production and consumption and at the material landscapes (culinary tools, the geography of the kitchen and restaurant, the archives - recipes, cookbooks, menus - that home cooks or chefs use) in order to "expose" the social, cultural and political dimensions of cooking, entertaining and eating.

Prerequisite: Completion of 9.0 credits
Exclusion: VIC326H1; VIC229H1 (Special Topics in Material Culture: The Material Culture of Food), offered in Winter 2016
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

MCS327H1 - Digital Material Culture

Previous Course Number: VIC327H1
Hours: 24S

This course explores the materiality of digital objects, from image and music files to digital documents to video games and other software, and considers their status as material culture. It involves the primary study of digital objects and also considers the technological infrastructures, cultural contexts, and signifying systems in which they are produced, circulated, and interpreted.

Prerequisite: Completion of 9.0 credits
Exclusion: VIC327H1
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

MCS328H1 - Materializing Cultural Identities

Previous Course Number: VIC328H1
Hours: 24S

Students examine the expression of cultural identities in objects. Students are taught to think critically about the construction, use, display, and exchange of objects with significance for cultural identity. In addition to lectures and discussions, students participate in guided visits to sites – everyday, ritual, institutional – where negotiation of identity through objects occurs.

Prerequisite: Completion of 9.0 credits
Exclusion: VIC328H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MCS329H1 - Internship in Material Culture

Previous Course Number: VIC329H1

A practical or experiential learning opportunity under the supervision of a faculty member, normally at a museum, art gallery or other cultural agency (as approved by the supervisor). This course is restricted to students enrolled in the Material Culture and Semiotics program. Not eligible for CR/NCR option.

Prerequisite: Completion of 9.0 credits
Exclusion: VIC329H1
Distribution Requirements: Humanities, Social Science

MCS329Y1 - Internship in Material Culture

Previous Course Number: VIC329Y1

A practical or experiential learning opportunity under the supervision of a faculty member, normally at a museum, art gallery or other cultural agency (as approved by the supervisor). This course is restricted to students enrolled in the Material Culture and Semiotics program. Not eligible for CR/NCR option.
Prerequisite: Completion of 9.0 credits
Exclusion: VIC329Y1
Distribution Requirements: Humanities, Social Science

MCS330H1 - Topics in Material Culture

Hours: 24S

An in-depth examination of some aspect of Material Culture theory or practice. Content in any given year depends on instructor. Not offered every year.

Prerequisite: Completion of 9.0 credits
Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

MCS373H1 - Materialities of Music

Previous Course Number: VIC373H1
Hours: 24L

Music is often understood as the most ephemeral and transcendent of the fine arts, even if that means overlooking the physical realities of music's production and dissemination. We will examine these materialities here, from paper and technologies of print, through to instruments for making and studying sound, and architectural spaces for its market circulation; we will see how music and its instruments provided the raw material for the emergence of a nineteenth-century science of acoustics.

Prerequisite: Completion of 9.0 credits
Exclusion: VIC373H1
Recommended Preparation: 0.5 credit in Creative Expression and Society, Material Culture, or Music.
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

MCS429H1 - Advanced Topics in Material Culture, Information Systems and Meaning-Making

Previous Course Number: VIC429H1
Hours: 24S

Content varies depending on instructor. Selected issues are examined in depth and at an advanced level.

Prerequisite: Completion of 9.0 credits including MCS224Y1/MCS225Y1, or permission of instructor
Distribution Requirements: Humanities

MCS444H1 - Themes in Material Culture

Previous Course Number: VIC444H1
Hours: 24S

This fourth year seminar, required for students pursuing a minor in material culture, will have opportunities to explore themes in material culture studies, museum exhibitions and collections as well as processes of object analysis in greater depth and at an advanced level. Specific topics and research projects will vary according to the interests and specialties of course instructors and students.

Prerequisite: Completion of 9.0 credits including MCS224Y1/MCS225Y1, or permission of instructor
Exclusion: VIC444H1
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Creative and Cultural Representations (1)

Renaissance Studies

REN240Y1 - The Civilization of Renaissance Europe

Previous Course Number: VIC240Y1
Hours: 48L

An interdisciplinary introduction to the civilization of the Renaissance illustrated by a study of the institutions, thought, politics, society and culture of both Italy and Northern Europe. Italian city states such as Florence, Urbino and Venice, Papal Rome and despotic Milan are compared with the northern dynastic monarchies of France and England.

Exclusion: VIC240Y1, REN240Y0, VIC240Y0

REN241H1 - Renaissance Icons and Afterlives

Previous Course Number: VIC241H1  
Hours: 24S

Focusing on famous works like Michelangelo’s David, Shakespeare’s Hamlet, Cervantes’ Don Quixote, and Monteverdi’s Orfeo, this course explores some of the greatest masterpieces of the European Renaissance and their afterlives, cross-cultural adaptations, and appropriations in later and modern popular culture.

Exclusion: VIC241H1, VIC241Y1  
Distribution Requirements: Humanities  
Breadth Requirements: Creative and Cultural Representations (1)

REN338H1 - Renaissance in the City

Previous Course Number: VIC338H1  
Hours: 24S

An interdisciplinary course exploring the history, art, architecture, literature, and music of the Renaissance in one or more cities from ca. 1400-1650. The course will investigate how local political and social-historical contexts shape ideas and cultural forms, and so illustrate the process and effects of cross-fertilization in the Renaissance period.

Exclusion: VIC338H1  
Recommended Preparation: REN240Y1, or another course in Renaissance Studies  
Distribution Requirements: Humanities  
Breadth Requirements: Society and its Institutions (3)

REN341H1 - The Self and Society: Women, Men and Children

Previous Course Number: VIC341H1  
Hours: 24S

A study of the changing conception of the human self in the Renaissance, and of its representation by major authors: Erasmus, Rabelais, Marguerite de Navarre, Castiglione, Machiavelli and others.

Exclusion: VIC341H1  
Distribution Requirements: Humanities  
Breadth Requirements: Thought, Belief and Behaviour (2)

REN342H1 - Women and Writing in the Renaissance

Previous Course Number: VIC342H1  
Hours: 24S

Focusing on writers from various geographical areas, the course examines a variety of texts by early modern women (for example, treatises, letters, and poetry) so as to explore the female experience in a literate society, with particular attention to how women constructed a gendered identity for themselves against the backdrop of the cultural debates of the time.

Exclusion: VIC342H1  
Distribution Requirements: Humanities  
Breadth Requirements: Creative and Cultural Representations (1)

REN343Y0 - Sex and Gender

Previous Course Number: VIC343Y0  
Hours: 24S

An interdisciplinary approach to questions of gender and sexuality in early modern Europe, with special focus on the representations of the sexual drive, the gender roles of men and women, and varieties of sexual experience in the literature and art of the period. (Offered as part of the Summer Abroad program)

Exclusion: VIC343Y0  
Distribution Requirements: Humanities  
Breadth Requirements: Society and its Institutions (3), Thought, Belief and Behaviour (2)

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)

REN344H1 - Renaissance Narrative

Previous Course Number: VIC344H1
Hours: 24S

Focuses on analysis of short stories and longer prose works including, in English translation: Boccaccio's stories of love, fortune and human intelligence in the Decameron; Rabelais' humorous parody of high culture in Gargantua; the tragic tale of Romeo and Juliet; and the adventures of picaresque rogues in Lazarillo de Tormes and Nashe's Unfortunate Traveler.

Exclusion: VIC344H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

REN345H1 - Media and Communications in the Early Modern Era

Previous Course Number: VIC345H1
Hours: 24S

This course examines the various media (printing press, representational art, music, preaching) and social and political forces (family and political networks, censorship, education, etc.) that conditioned the communication of ideas in early modern society.

Exclusion: VIC345H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

REN346H1 - The Idea of the Renaissance

Previous Course Number: VIC346H1
Hours: 24S

This course examines the changing views of the Renaissance, from the earliest definitions by poets and painters to the different understandings of contemporary historians. We will pay attention to the interests and biases that have informed the idea of the Renaissance as an aesthetic, social, political, gendered, and Eurocentric phenomenon.

Prerequisite: Completion of 4.0 credits
Exclusion: VIC346H1
Recommended Preparation: At least 0.5 credit in the art, literature, history, or philosophy of fifteenth or sixteenth century Europe

**REN441H1 - Michel de Montaigne: A Renaissance Life**

**Previous Course Number:** VIC441H1

Hours: 24S

A study of Montaigne as a multifaceted historical and cultural figure, as a mirror to sixteenth-century history, as product and observer of the religious divisions, political transformations, and cultural evolutions in an age marked...
by religious war, the growth of the state, the advent of the printed book, and the dissemination of the humanist project across western Europe. The course examines Montaigne’s essays, travel journals, and important scholarly works on Montaigne, in the context of contemporary gender relations, colonial empire, religious belief, and early modern Europe’s complex relationship with Greco-Roman Antiquity.

**Prerequisite:** REN240Y1/HIS243H1, or permission of the instructor  
**Exclusion:** VIC441H1  
**Recommended Preparation:** Another course in Renaissance Studies or permission of the instructor  
**Breadth Requirements:** Thought, Belief and Behaviour (2)

**REN442H1 - The Renaissance Book**

**Previous Course Number:** VIC442H1  
**Hours:** 24L

This course explores the intellectual and historical contexts of the Renaissance book and applies a digital humanities approach to its study, focusing on books printed in Western Europe between 1500 and 1700. Through a close examination of early and rare books, students explore three major areas in Renaissance intellectual history: 1) humanist rhetoric, politics, and literature, 2) Reformation studies, and 3) natural history, science, and medicine. Regular guest lectures sponsored by the Centre for Reformation and Renaissance Studies will introduce students to scholars from beyond the UofT; the course also involves experiential learning with digital exhibitions and rare books.

**Prerequisite:** Completion of 9.0 credits  
**Exclusion:** VIC442H1; VIC449H1 (Advanced Seminar in the Renaissance: Exhibiting the Renaissance Book), offered in Winter 2018 and Winter 2019  
**Recommended Preparation:** REN240Y1, or another course in Renaissance Studies  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Humanities (2)

**REN449H1 - Advanced Seminar in the Renaissance**

**Previous Course Number:** VIC449H1  
**Hours:** 12P/24S

An in-depth study in an aspect of the Renaissance based around lectures, seminars, and readings. Content in any given year depends on the instructor.

**Prerequisite:** Completion of 9.0 credits  
**Recommended Preparation:** REN240Y1, or another course in Renaissance Studies

VIC206H1 - Psychology and Society

**Hours:** 24S

This course explores central developments and ongoing controversies in the scientific study of the human mind, brain and behaviour. It examines topics such as: psychoanalysis, behaviourism, humanistic psychology, evolutionary psychology, intelligence testing, and feminist perspectives. Goals include understanding the historical evolution and social relevance of scientific psychology.

**Exclusion:** VIC106H1
**Distribution Requirements:** Humanities, Social Science
**Breadth Requirements:** Thought, Belief and Behaviour (2)

VIC207H1 - Evolution, Genetics, and Behaviour

**Hours:** 24S

In this course we examine major episodes in the history of evolution and genetics in the twentieth century. Topics include Darwinian evolution, sociobiology and evolutionary psychology, eugenics, and genetic screening and therapy. We will examine different views about the control of evolution and genetic manipulation in their socio-cultural-economic context and discuss the ethical and social implications of those views.

**Exclusion:** VIC107H1
**Distribution Requirements:** Humanities, Social Science
**Breadth Requirements:** Thought, Belief and Behaviour (2)

REN242H1 - Scientific Worldviews of the Renaissance

**Previous Course Number:** VIC242H1
**Hours:** 24L

An in-depth study of late medieval and early modern scientific worldviews, with a focus on interconnections between natural philosophy, cosmology, theology, astronomy, optics, medicine, natural history, and ethics. Through a consideration of early modern ideas including free will and determinism, the finite and infinite universe, teleology and mechanism, theism and deism, and deduction and intuition, this course investigates some of the period's key metaphysical and methodological assumptions, and reveals how an evolving scientific understanding informed the Renaissance worldview.

**Exclusion:** VIC242H1, HPS309H1
**Recommended Preparation:** Completion of 4.0 credits
**Distribution Requirements:** Social Science
**Breadth Requirements:** Society and its Institutions (3)

VIC245H1 - Science Wars: Society and the Limits of Scientific Knowledge

**Hours:** 24L

An introduction to competing conceptions of scientific knowledge and the role of sociocultural factors in shaping scientific methods, theories, and evidence. Can science provide objective knowledge of the external mind-independent world, or are the empirical aspirations of science limited by the social, cultural, economic, political, and religious contexts that shape “science” itself? Can scientific knowledge reach certainty? How do sociocultural factors affect the process of theory acceptance? This course considers “science” as an epistemological battleground from 17th century debates on inductive reasoning to contemporary arguments about “alternative” science.

**Breadth Requirements:** Thought, Belief and Behaviour (2)

VIC246H1 - Animal, Vegetable, Mineral, Monster

**Hours:** 24L

This course introduces students to the history of natural history--or how thinkers (often called "naturalists") made sense of the world around them. Course readings, lectures, and activities will explore changing perspectives on nonhuman nature across time, from medieval bestiaries to early modern cabinets of curiosities, from colonial botany to more recent legends of Yetis, Bigfoots, and other fantastical creatures of cryptozoology.

**Prerequisite:** Completion of 4.0 credits
**Distribution Requirements:** Social Science
**Breadth Requirements:** Thought, Belief and Behaviour (2)
VIC274H1 - Wisdom of the Social Sciences

Hours: 24S

This course examines influential efforts to study human beings and society scientifically, from the seventeenth century to the present. We consider major contributions from prominent thinkers, such as Thomas Hobbes, Adam Smith, Karl Marx, and Sigmund Freud. We also review the contemporary relevance and persistent controversies about their ideas.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC278H1 - Modelling Evil and Disease

Hours: 24S

Models frame our understanding and treatment of illness and are the most fundamental element of the scientific method. Theology, history, and literature may use models in different ways than natural and medical sciences but fundamentally all modelling is an attempt to accurately predict and manipulate the future.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

VIC377H1 - Special Topics in Science and Society

Hours: 24S

In-depth study of a topic related to science and society. Content varies with instructor. Please see the Victoria College website for current offerings.

Prerequisite: Completion of 9.0 credits
Recommended Preparation: 0.5 credit in Science and Society
Distribution Requirements: Social Science, Science
Breadth Requirements: Thought, Belief and Behaviour (2)

Vic Capstone

VIC435H1 - Capstone Seminar: Community-Engaged Research

Hours: 12L/78P

This course provides students with an experiential learning opportunity in community-engaged research combined with critical reflection and academic discussion within a seminar setting. Through a placement in social enterprise organizations, students develop research-based approaches to support their organization in assessing needs, impact, and resources. Alongside this hands-on experience, interdisciplinary seminar discussions will help students understand how research methodologies, standards, and protocols are deployed in community settings. Not eligible for CR/NCR.

Prerequisite: Completion of 15.0 credits. Application required.
Exclusion: NEW497Y1/NEW498H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC451H1 - Capstone: Learning Communities and Higher Education

Hours: 24S

This course examines higher education in Canada using Victoria University and Victoria's affiliates as a case study. Topics covered include learning communities, mentoring, experiential learning, and international contexts of education. Students gain practical mentorship experience through placement in first-year Victoria College courses. Not eligible for CR/NCR.

Prerequisite: A minimum CGPA of 3.0, completion of 15.0 credits, and an application are required
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

VIC452H1 - Work-Integrated Capstone Course

Hours: 24S

This seminar provides academic support for individual work placements in a specific sector of employment, through interdisciplinary readings, integrative discussion, and critical reflection on the culture of labour and the acquisition of workplace skills and experience. Assignments will include reflective exercises and critical
analyses, leading to participation in a capstone seminar. Not eligible for CR/NCR.

**Prerequisite:** Completion of 15.0 credits and an application are required

**Recommended Preparation:** A strong academic record

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

### VIC476H1 - Capstone Seminar in Foreign Policy

The seminar involves a critical assessment of current foreign policy issues and contemporary world problems. Issues and case studies to be analyzed include: 1. International military interventions to respond to imminent threats or humanitarian crises, issues of legitimacy and effectiveness, e.g., Iraq, Afghanistan, Kosovo, Haiti. 2. Canada-US relations in international crisis management, the track record and the way ahead. 3. Globalization, international terrorism, and their effects on sovereignty, diplomacy and international institutions.

Introduction

For nearly five decades, we have trained students to think deeply about how gender and sexuality operate at individual, interpersonal, institutional and global levels. We are an interdisciplinary program with faculty expertise across a range of fields, including history and literature, sociology and law, cultural studies and queer theory, and African, Caribbean, Middle Eastern, East Asian, and Equity studies. We enable students to answer urgent and complex questions, such as how militarization can constrict men’s aspirations for their lives, why pay gaps exist, how sexual expression is scripted and can be re-scripted, and even what Lizzo might have in common with Shakespeare. In addition to training students to analyze a music video, a novel, and a government report with equal care and skill, we also focus attention on matters of scale: when to aggregate and when to parse significant distinctions; how to think comparatively across space and time.

The Women & Gender Studies Institute (WGSI) at the University of Toronto is distinctive for its transnational approach. We critically address how national borders and nationalist discourses frame constructions of gender, race, class, indigeneity, sexuality, ability, and other important differences. We study the effects of migration, diaspora, and displacement on experiences of home and heritage, family, desire, and selfhood. We provide students the conceptual tools to connect processes of imperialism and globalization with emergent economies and forms of labour and consumption. Finally, we encourage students to reflect on the varied histories of feminism when framing their own activism in the present.

Our graduates go on to do innovative work in the public service, creative, and corporate sectors, and some enter the academy. They become everything from documentary filmmakers to grassroots activists to policy analysts in economic development agencies and professors in leading universities. All of them draw on the critical lenses they develop in this program, becoming part of a rich community of graduates who maintain their connections with one another, and who come back to the diverse classrooms where they once were students to share their experiences.

**WGS376H1 - Studies in Queer and Trans**

**Previous Course Number:** WGS272H1, WGS272Y1

**Hours:** 24L

Takes up conversations in queer and trans studies as separate and entangled fields. It explores how queer and trans people have experienced and theorized gender and sexuality.

**Exclusion:** WGS272H1/WGS272Y1

**Recommended Preparation:** WGS160Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

---

**WGS380H1 - Feminist Graphic Novels**

**Hours:** 24L

Comics aren't new, and graphic novels aren't either, but feminists have built a rich array of stories about consciousness, resistance, and coming of age in this genre that warrant scholarly attention. In this case, we will read graphic novels for their subtleties, thinking about what picture and text make possible in the exploration of emotion, interconnection, and identity. Reading about resistance to marriage in *Aya of Yop City*, a child's view of revolution in *Persepolis*, parent child reckoning in *Fun Home*, and loneliness in *Skim* will advance students' understandings of the of the power of narrative and the pictorial displacement of innocence.

**Recommended Preparation:** WGS160Y1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

---

**WGS381H1 - Black Britain: Race, Gender and Entangled Diasporas**

**Hours:** 24L

An exploration of Black British history and culture, with a particular focus on labour, overlapping migrations, and racial formations following World War II. Topics and themes may include Afro-Asian-Arab politics and transnational solidarities against empire; citizenship and (non)belonging; mobilizations against fascism and state violence; the Black Women's Movement and Black British Feminisms; the emergence and interventions of Cultural Studies; the Caribbean Artists Movement and Black British cultural productions more generally.

**Recommended Preparation:** WGS160Y1 and completion of at least 4.0 credits

**Distribution Requirements:** Humanities

**Breadth Requirements:** Thought, Belief and Behaviour (2)

---

**WGS382H1 - Decolonial Aesthetics and Indigenous Futurities**

**Hours:** 24L

Students are invited to think through the relationships between Indigenous and Afro-futurist concepts and land. This class will engage indigenous feminist and emergent indigenous queer theories to Indigenous and Afro-futurist thought. We explore various 'texts' relating to theoretical concepts and methodologies emerging from Indigenous decolonial work towards land and futures.
WGS385H1 - Gender and Neoliberalism

Hours: 24L

Reviews major feminist transnational, Marxist and Foucauldian approaches to the study of neoliberalism. Adopts a comparative, historical and global approach to the ways that gender is implicated in state restructuring, changing roles for corporations and non-governmental organizations, changing norms for personhood, sovereignty and citizenship, and changing ideas about time/space.

Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Society and its Institutions (3)

WGS386H1 - Gender and Critical Political Economy

Hours: 24L

Offers a critical analysis of political economy, its historical and contemporary contentions and the ruptures that open the space for alternative theorizing beyond orthodox and heterodox thinking, by inserting gender and intersecting issues of power, authority and economic valorization across multiple and changing spheres: domestic, market and state.

Recommended Preparation: WGS160Y1, WGS273Y1
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Society and its Institutions (3)

WGS390H1 - Land-ing: Indigenous and Black Futurist Spaces

Hours: 24L

Students are invited to think through the relationships between Indigenous and Afro-futurist concepts of land. This class will engage Indigenous feminist and Black queer and feminist theories of land and space, linking them to Afrofuturist and Indigenous futurist thought. We explore various texts in relation to emergent methodologies, decolonial desires, and love and radical relationalities.

Prerequisite: Completion of 4.0 credits
Exclusion: WGS335H1 (Special Topic in Women and Gender Studies: Indigenous Feminist Theory), offered in Fall 2015, WGS385H1 (Special Topic in Women and Gender Studies: Decolonial Aesthetics and Futurities), offered in Winter 2018, Winter 2019 and Winter 2020
Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WGS396H1 - Writing the Body

Hours: 24L

Examines the ways in which bodies are lived and inscribed and represented through a variety of genres. Students will work through issues of corporeality and materiality in the production and reception of texts and will practice embodied writing on a personal level through in-class workshops and written assignments.

Exclusion: WGS332H1: Writing the Body
Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WGS397H1 - The Politics of Girlhood

Hours: 24L

The course communicates the growing field of "girl studies" and provides a critical exploration of the historical, social, psychological and political definitions attached to girlhood. We will move toward a feminist understanding of how definitions of girl-child shape individual experience, historical narratives, cultural representations, political agendas and futures.

Exclusion: WGS335H1: The Politics of Girlhood
Recommended Preparation: WGS160Y1
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

WGS420H1 - Asian/North American Feminist Issues

Hours: 24L
A transpacific examination of issues that have directly and indirectly shaped the feminist and other related critical inquiries in Asia and among the Asian diasporas in Canada and the United States.

**Prerequisite:** WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Society and its Institutions (3)

### WGS426H1 - Gender and Globalization: Transnational Perspectives

Critically examines current interdisciplinary scholarship on globalization, its intersections with gender, power structures, and feminized economies. Related socio-spatial reconfigurations, 'glocal' convergences, and tensions are explored, with emphasis on feminist counter-narratives and theorizing of globalization, theoretical debates on the meanings and impacts of globalization, and possibilities of resistance, agency, and change.

**Prerequisite:** WGS160Y1, one full course at THE 300+ level in WGS, and one half course in WGS.

**Exclusion:** WGS463H1, fall session 2009

**Distribution Requirements:** Social Science

**Breadth Requirements:** Society and its Institutions (3)

### WGS434H1 - Advanced Topics in Women and Gender Studies

**Hours:** 24S

An upper level seminar. Topics vary from year to year depending on instructor. Please consult the Women & Gender Studies Institute's website for more information.

**Prerequisite:** WGS160Y1, one full course at THE 300+ level in WGS, and one half course in WGS.

**Distribution Requirements:** Humanities

### WGS435H1 - Advanced Topics in Women and Gender Studies

**Hours:** 24S

An upper level seminar. Topics vary from year to year depending on instructor.

**Prerequisite:** WGS160Y1, one full course at THE 300+ level in WGS, and one half course in WGS.

**Distribution Requirements:** Humanities

### WGS440H1 - Decolonial Cyborgs for Planetary Futures

**Hours:** 24L

Drawing together film, fiction, and theory this course invites students to explore ways of imagining other worlds. From afro-futurism to planetary humanism, from cyborgs to hauntings, from science fiction fantasies to the politics of aliens, the course examines and produces feminist, postcolonial, anti-racist, and queer visions of other worlds.

**Prerequisite:** WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

### WGS442H1 - Toxic Worlds, Decolonial Futures

**Hours:** 24S

This course explores the ways environmental violence is an integral practice of settler colonialism that affects human and non-human life, disrupts Indigenous sovereignty, and enacts ongoing racism. A typical way of addressing environmental violence is to document the harm done to bodies and communities. This class asks, how might we also refuse environmental violence and enact better obligations to land/body relations? What kind of decolonial futures can be summoned in the aftermath of environmental violence? Our readings will bring Indigenous feminist approaches together with Black feminist, queer, and feminist environmental justice approaches. Participants will build upon the readings to create their own decolonial environmental justice future projects.

**Prerequisite:** WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.

**Exclusion:** WGS463H1 (Advanced Topics in Gender Theory: Toxic Worlds, Decolonial Futures), offered in Winter 2018, Winter 2019 and Winter 2020

**Distribution Requirements:** Humanities

**Exclusion:** WGS434H1 Black Diasporic Feminisms: Modernity, Freedom, Citizenship

**Distribution Requirements:** Humanities, Social Science

**Breadth Requirements:** Thought, Belief and Behaviour (2)

**WGS451H1 - Independent Study in Women and Gender Studies Issues**

Under supervision, students pursue topics in Women and Gender Studies not currently part of the curriculum. Not eligible for CR/NCR option.

**Prerequisite:** Permission of the Undergraduate Coordinator, Women and Gender Studies Program.

**Distribution Requirements:** Humanities

**WGS451Y1 - Independent Study in Women and Gender Studies**

Under faculty supervision, students pursue topics in Women and Gender Studies that are not currently part of the curriculum. Not eligible for CR/NCR option.

**Prerequisite:** Permission of the Undergraduate Coordinator of the Women and Gender Studies program is required.

**Recommended Preparation:** WGS160Y1 and at least 9.0 credits completed.

**Distribution Requirements:** Humanities

**WGS460Y1 - Honours Seminar**

**Hours:** 24S

Supervised undergraduate thesis project undertaken in the final year of study. Students attend a bi-weekly seminar to discuss research strategies, analytics, methods and findings. A required course for Specialist students. Not eligible for CR/NCR option.

**Prerequisite:** WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.

**Distribution Requirements:** Humanities, Social Science

**WGS461Y1 - Advanced Topics in Women and Gender Studies**

**Hours:** 48S

An upper level seminar. Topics vary from year to year depending on the instructor.

**Prerequisite:** WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.

**Distribution Requirements:** Humanities

**WGS462H1 - Advanced Topics in Gender and History**

**Hours:** 24S

An upper-level seminar. Topics vary from year to year depending on instructor.

**Prerequisite:** WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.

**Distribution Requirements:** Humanities

**WGS463H1 - Advanced Topics in Gender Theory**

**Hours:** 24S

Senior students may pursue more advanced study in feminist theory. Topics vary from year to year depending on instructor.

**Prerequisite:** WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.

**Distribution Requirements:** Humanities

**WGS465H1 - Special Topics in Gender and the Law**

**Hours:** 24S

Senior students may pursue advanced study in gender and law. Topics vary from year to year.

**Prerequisite:** WGS160Y1, WGS365H1, one half course at the 300+ level in WGS, and one half course in WGS.

**Distribution Requirements:** Humanities, Social Science

**Breadth Requirements:** Society and its Institutions (3)
WGS470Y1 - Community Engagement

Hours: 48S

The application of theoretical study to practical community experience. Advanced Women and Gender Studies students have the opportunity to apply knowledge acquired in the Women and Gender Studies curriculum through a practicum placement within a community organization. Not eligible for CR/NCR option.

Prerequisite: WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)

WGS480H1 - Challenging Coloniality: Caribbean Sexualities in Transnational Perspective

Previous Course Number: WGS435H1S
Hours: 24S

This course foregrounds the Caribbean as a transnational space, where sexuality, gender, race and class are intimately connected and shaped by colonial legacies and contemporary circuits of globalization.

Prerequisite: WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.
Exclusion: WGS435H1 (Topics: Challenging Coloniality: Caribbean Sexualities in Transnational Perspective), offered in Summer 2017
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)

WGS481H1 - Gender, Sexuality and Black Liberation from Black Power to #BlackLivesMatter

Previous Course Number: WGS435H1
Hours: 24S

This course maps genealogies of black insurgency and transnational itineraries of intersectional theorizing, organizing, and praxis from the 20th century to our present moment. Through close study of works by and about black revolutionary migrants, exiles, intellectuals, fugitives, and so-called terrorists, participants will critique and create radical visions for emancipation. Major topics and themes may include black feminisms; queer insurgencies; transnational imaginaries and solidarities; silence and intracommunal violence; accountability and transformative justice. Through collective discussion, writing, and reflection we interrogate visions and strategies of emancipation, and imagine radical futures historically and in our own times.

Prerequisite: WGS160Y1, one full course at the 300+ level in WGS, and one half course in WGS.
Exclusion: WGS434H1 (Topics: Trans/national Sexuality), offered in Fall 2016 and Fall 2017
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

Introduction

Woodsworth College is named in honour of James Shaver Woodsworth (1874-1942), minister, pacifist, social activist and Member of Parliament, who was strongly committed to broadening educational opportunities for all. The College remains faithful to its mission of promoting accessibility and equity, providing two access programs for students seeking admission to the Faculty of Arts and Science: the Millie Rotman Shime Academic Bridging Program and the Diploma to Degree Transfer Program. In addition, Woodsworth offers rewarding educational experiences through its distinctive College One programs, a selection of First-Year Foundation courses, and the Summer Abroad programs. The Minor program in Digital Humanities prepares students for future paths ranging from graduate studies in literature, history, library science, and other fields, to careers as technical writers, data analysts and visualizers, project managers, or programmers. Regardless of College affiliation, you are encouraged to explore the exceptional range of programs offered by Woodsworth College.

Digital Humanities (Minor program)
Digital humanities (DH) is a discipline at the intersections of the humanities with computing. DH studies human culture -- art, literature, history, geography, religion -- through computational tools and methodologies; and, in turn, DH studies the digital through humanist lenses. Digital humanists study social media phenomena or medieval manuscript archives; computationally analyze thousands of newspaper articles to trace economic developments; construct video games to study literary narratives; or resurrect historical cities through digital maps and virtual reality exhibits.

In introductory and advanced DH courses, students learn about the intellectual landscape of digital humanities scholarship. They learn how to build digital stories, exhibits, and maps; how to digitize rare books; how to analyze collections of data; how to construct digital models and 3D-print them; and how to manage major digital projects. By the end of the program, students conduct a major DH research project of their own or participate in the research of an established faculty project. Throughout the program, students gain a critical perspective on digital technologies, learning to consider the ways digital platforms shape, and are shaped by, the currents of wider social and cultural forces. By providing this critical and technical skillset, the Digital Humanities Minor prepares students for future paths that range from graduate studies in literature, history, library science, education, or computer science, to careers as technical writers, data analysts and visualizers, project managers, or programmers.

First-Year Foundation Options
Woodsworth College offers two kinds of First Year Foundation options: individual FYF H seminars on a variety of topics, and our College One, in two streams that consist of two H seminars each, for students interested in a deeper level of engagement in this part of their first-year experience. All our First Year Foundation seminars offer an intellectually challenging introduction to university-level studies and are designed to complement other first-year courses, thereby enhancing academic success in the first year and beyond. They promote the development of strong critical thinking, information literacy, oral and written communication skills, and awareness of both the distinctive nature of particular academic disciplines and the practices and values common to all academic work.

FYF Seminars
Woodsworth’s FYF seminars, all of which are stand-alone H courses, are designed to provide first-year students with the opportunity to work closely with an instructor and
fellow students in a class of no more than 25, maximizing opportunities for class discussion and the development of essential academic skills. Each seminar focuses on specific disciplinary or interdisciplinary issues, questions or controversies of particular interest to the instructor, and introduces the students to the excitement of discovery inherent in academic research and scholarship at the University of Toronto. Wide-ranging readings and assignments encourage students to develop their ability to think critically and to express ideas and arguments clearly and coherently, both orally and in writing. Please check the timetable for Woodsworth College’s current offerings of FYF seminars.

**Woodworth One**
Woodworth One has two interdisciplinary streams, both of which draw on a wide range of Social Sciences and Humanities perspectives. The Order and Disorder stream focuses on the role of laws, government policies, trade, war, and innovation in creating and disrupting both social and global order. The Popular Culture Today stream examines the products of the entertainment industry and the social behaviours associated with their consumption, exploring how popular culture works and what it means.

Students take two 0.5 credit seminars – one in each term – and participate in regular co-curricular activities that build students’ sense of community within Woodsworth College and across the University of Toronto. Seminars are capped at 25 students to maximize opportunities for participation and to promote close contact with both the instructor and fellow students. The emphasis is on class discussion and problem-based learning. Students participate in role-playing games, simulations, debates and more. The co-curricular activities include field trips, film screenings, guest speakers, writing and research workshops, and test-taking seminars.

The Woodworth One team is dedicated to supporting students’ transition to university life, and to guiding their academic planning. In addition to the Program Coordinator, course instructors, and peer mentors, the team includes the College Writing Centre, the College Learning Strategist, a dedicated Registrar, and a program administrator. Each member of the team seeks to create a strong sense of community and to set students up for academic success.

Woodworth One is geared towards first-year students enrolled in Social Sciences and Humanities within the Faculty of Arts and Sciences. In keeping with Woodworth College’s tradition of open access, there is no incoming grade requirement. Students participating in any other One program are excluded from Woodworth One. Please note that both streams may not be offered in a given year. For more information please check the timetable for current course options.

**Summer Abroad Programs**
Students can prepare themselves for a future in the global village by participating in a Summer Abroad program and complete a University of Toronto course overseas in three to six weeks. These programs are designed to enrich students’ academic lives by providing an exciting and educational international experience. Learning is not limited to the classroom; students will observe and experience many of the things they study, including the language, history, culture, art, religion, business, and politics of the host country.

**Millie Rotman Shime Academic Bridging Program**
The Academic Bridging Program is designed for individuals who have been away from formal education for some time and do not meet the University’s established requirements for direct entry admission. Both part-time and full-time options are available to students interested in studies in the Humanities and Social Sciences. Those seeking admission to the Sciences must take the program’s full-time science option. Students who successfully complete the program with a grade of 63% or above are admitted to the Faculty of Arts and Science with one full credit towards their degree. Students who complete either of the program’s full-time options may transfer up to 2.0 credits towards their degree.

**Diploma to Degree**
The Diploma to Degree program is a pathway to university studies for students completing a two-year liberal arts diploma at one of our partner institutions, including George Brown College, Humber College and Seneca College. The Diploma to Degree Program is a facilitated transfer program into Woodsworth College in the Faculty of Arts and Science at the University of Toronto. The program is designed for students to transfer with up to 6 transfer credits and retained credits from courses completed at the University of Toronto.

To be eligible for transfer, students must:

- Complete the 2-year diploma with a minimum 3.0 GPA
- Receive a recommendation from their college
- Achieve a minimum grade of 60% in a qualifying course at the University of Toronto.

Throughout the program, students gain a critical perspective on digital technologies, learning to consider the ways digital platforms shape, and are shaped by, the currents of wider social and cultural forces.

By providing this critical and technical skillset, the Digital Humanities Minor prepares students for future paths that range from graduate studies in literature, history, library science, education, or computer science, to careers as technical writers, data analysts and visualizers, project managers, or programmers.

Students should note that some courses at the 200, 300, and 400 levels may have additional prerequisites.

Permission to count courses that are not on the list below towards the Minor in Digital Humanities must be received from the Program Coordinator, and will be granted on a case-by-case basis when the student's work demonstrably and substantially engages Digital Humanities-related content or research methods.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, including 1.0 credit at the 300/400-level)

Students should note that some courses at the 200, 300, and 400-levels may have additional prerequisites.

Permission to count courses towards the Minor in Digital Humanities that are not in the Completion Requirements must be received by the Program Coordinator, and will be granted on a case-by-case basis when the student’s work demonstrably and substantially engages Digital Humanities-related content or research methods.

It is not possible to complete this program in one year.

      Writing and Rhetoric: WRR303H1

3. A minimum of a 0.5 credit that provides a capstone experience, chosen from the list below:
   a. DHU435H1, DHU436H1, DHU437H1
   b. Other 400-level courses with a significant DH practicum element, such as CDN435Y1 (Active Citizenship), can also be considered for fulfillment of the capstone requirement, if students receive written permission of the Digital Humanities Program Coordinator within the first two weeks of enrollment in the course.

Note: Cross-listed courses are offered by other departments. Registration in these courses may be available only to students who have completed specified prerequisites and/or are enrolled in a program sponsored by the department offering the course. Course enrolment conditions are listed in the Arts and Science timetable. Course descriptions, prerequisites, corequisites and exclusions are listed in the Calendar.
Woodsworth College Courses

Woodsworth First-Year Foundations

WDW196H1 - From Rayguns to Light Sabers: Science Fiction in Contemporary Culture

Previous Course Number: CCR199Y1
Hours: 24S

This course examines science fiction as pop culture genre, media industry, and sociocultural phenomenon, with attention to some of its key themes, its important texts, creators, and audiences, and its place in contemporary culture. We will study some works chosen by the class as well as by the instructor. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: ANT195H1, VIC137H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WDW197H1 - Jane Austen on Film

Hours: 24S

In the 21st century, Jane Austen's early 19th-century novels of love and marriage are increasingly experienced through retellings and updatings in theatrical and made-for-television movies. The course will examine highlights from the last 25 years of Austen adaptations for what they can tell us about relationships in our time, including how Austen's stories are rewritten to please a modern audience. Films in the course will include works from 1995 to 2016 (from 1995, Clueless, Austen’s Emma retold as a Hollywood high school comedy and starring Alicia Silverstone; and Sense and Sensibility, for which Emma Thompson’s screenplay won an Academy Award; and from 2016, the Hallmark Channel's Unleashing Mr. Darcy, Austen’s Pride and Prejudice transferred to the present-day dog show circuit; and writer/director Whit Stillman’s Love and Friendship, the first-ever film version of Austen’s Lady Susan). Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WDW198H1 - There and Back Again: Exploring Tolkien

Hours: 24S

Since the mid-twentieth century, J.R.R. Tolkien's The Hobbit and The Lord of the Rings have become classics of children's and fantasy literature. In this course, we read Tolkien’s The Lord of the Rings and investigate the world-building and imagined history that lies behind the books. We trace how Tolkien's own life experience informed his work—his experience as a soldier of the Great War and a civilian during World War Two; as a scholar of medieval language and literature, and of fairy tales; as a Catholic thinker; and as a lover of nature and the past. We also survey the afterlife of the novels in fantasy, film, and the popular imagination. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

WDW199H1 - Indigenous Knowledge and Storytelling in Toronto

Hours: 12T/24S

The land now known as Toronto has a 13,000+ year old history of Indigenous presence that is still unfolding. This

Note:

- Effective Fall 2021, courses associated with Woodsworth College's Digital Humanities program will have the new "DHU" designator.
- Effective Fall 2021, active courses associated with St. Michael's College's Book and Media Studies program will have the new "BMS" designator. In addition, courses associated with Innis College's Urban Studies and Writing and Rhetoric programs will have the new "URB" and "WRR" designators respectively.

Regarding Woodsworth College Courses

Not all courses are offered every year. Please check the timetable for current course offerings and enrolment restrictions/conditions. Students without course prerequisites may be removed at any time they are discovered. Course descriptions, prerequisites, corequisites and exclusions are listed below.
history is inscribed in the land – it is visible in the geographical features, place names, and contemporary urban form of the city and is represented through stories (oral and written) told by diverse members of Toronto’s Indigenous community. This course engages with stories of Indigenous history and presence in Toronto through a selection of Indigenous literary works about Toronto, Indigenous guest speakers, and a series of experiential Indigenous storytelling tours of significant locations across the city. Students will be introduced to Indigenous worldviews and ways of knowing and will learn why storytelling remains a significant and culturally-appropriate means for keeping and sharing land-based Indigenous Knowledge. Students will gain a deeper appreciation of the city as a traditional Indigenous territory and will reflect on their own relationships and responsibilities within these lands. Restricted to first-year students. Not eligible for CR/NCR option.

### Woodsworth One

**WDW151H1 - Order and Disorder I: Issues and Perspectives**

**Hours:** 16T/24S

Societies require law and order, but at what point does order become oppression? How do we balance our need for freedom and society’s need for order? This interdisciplinary seminar allows students to explore these and related questions through selected readings introducing theories from sociology, political science, philosophy, and history. Restricted to first-year students. Not eligible for CR/NCR option.

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

**WDW152H1 - Order and Disorder II: Problems and Solutions**

**Hours:** 16T/24S

This interdisciplinary seminar introduces students to some of the methods used by scholars and researchers in sociology, political science, philosophy, and history to develop, test, and debate possible solutions to the problems of social order and disorder. Topics will vary from year to year. Restricted to first-year students. Not eligible for CR/NCR option.

**Exclusion:**

**Distribution Requirements:** Social Science  
**Breadth Requirements:** Society and its Institutions (3)

### Digital Humanities

**DHU235H1 - Introduction to Digital Humanities**

**Previous Course Number:** WDW235H1  
**Hours:** 24L/12P

Digital Humanities (DH) studies human culture -- art, literature, history, geography, religion -- using computational tools and methodologies, and at the same time studies digital technologies and communities through humanist lenses, as complex cultural objects shaped by wider social and political concerns and the ways we construct knowledge and meaning.

**Prerequisite:** 4.0 credits at the 100-level, of which 1.0 credits must be in Humanities  
**Exclusion:** WDW235H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)

**DHU236H1 - Virtual Worlds: Introduction to Spatial Digital Humanities**

**Previous Course Number:** WDW236H1  
**Hours:** 24L/12P

A Digital Humanities perspective on the virtual worlds in which we are increasingly immersed, from scholarly digital archives to video games. We study the theory and methods of geospatial humanities research and explore the technical and cultural implications of computer vision, augmented reality, the Internet of Things, and 3D printing.

**Prerequisite:** DHU235H1 or permission of the Program Coordinator  
**Exclusion:** WDW236H1  
**Distribution Requirements:** Humanities  
**Breadth Requirements:** Creative and Cultural Representations (1)
DHU335H1 - From Book to Map to Video Game: Texts and their Digital Transformations

Previous Course Number: WDW335H1
Hours: 24L/12P

An examination of the new forms of storytelling made possible by digital media from two perspectives, that of the maker and that of the scholarly reader. Students learn to critically analyze storytelling in new media and experiment with their own adaptations of a literary text to various digital platforms.

Prerequisite: DHU235H1 and DHU236H1; open to students not taking the Digital Humanities Minor by permission of the program coordinator.
Exclusion: WDW337H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DHU336H1 - Research and Writing in Digital Humanities

Previous Course Number: WDW336H1
Hours: 24L

This course explores the future of digital humanities from two perspectives. We will examine some successful contributions to the humanities employing digital technology, and also look at some critical assessments of digital technology’s impact on humanistic studies. Students will then develop and report on their own digital humanities research projects.

Prerequisite: DHU235H1 and DHU236H1, or permission of the program coordinator.
Exclusion: WDW338H1
Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)

DHU337H1 - Historical Archives in the Digital Age

Previous Course Number: WDW337H1
Hours: 24L/12P

How do digital surrogates of texts and objects change how we use them? This course examines texts and archives in the digital age: the aims of building them; the new scholarly approaches that they enable; the preservation, access, and equity questions that they raise and require us to answer responsibly.

Prerequisite: DHU235H1 and DHU236H1; open to students not taking the Digital Humanities Minor by permission of the program coordinator.
Exclusion: WDW337H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DHU338H1 - Data: Access, Creation, Curation, and Interpretation

Previous Course Number: WDW338H1
Hours: 24L/12P

A central challenge of digital humanities is the complexity of representing interpretive, narrative, and perspective-dependent humanities data through digital tools and environments. Topics include the history of “data” as term and concept; data standards, databases, and linked data; datasets, data curation and analytics, both qualitative and quantitative; and data visualization.

Prerequisite: DHU235H1 and DHU236H1; open to students not taking the Digital Humanities Minor by permission of the program coordinator.
Exclusion: WDW338H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DHU339H1 - Special Topics in Digital Humanities

Hours: 24L/12P

Topics will vary from year to year. Open to students not enrolled in the Digital Humanities Minor by permission of the program coordinator.

Prerequisite: DHU235H1 and DHU236H1
Exclusion: WDW339H1
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)

DHU435H1 - The Internet Archive

Previous Course Number: WDW435H1
Hours: 24L/12P

Digital environments change how knowledge is created, communicated, and used. Using the Internet Archive as case study, this course examines the significance of such changes from a variety of perspectives: knowledge representation; technical infrastructure; gender, class, and race issues; disability rights; intellectual property
questions; and algorithmic and interpretive scholarly approaches.

**Prerequisite:** DHU235H1 and DHU236H1 plus at least 1.0 additional credit in the Digital Humanities Minor program; open to students not taking the Digital Humanities Minor by permission of the program coordinator.

**Exclusion:** WDW435H1

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

---

**DHU436H1 - Advanced Topics in Digital Humanities**

**Previous Course Number:** WDW436H1

**Hours:** 24L/12P

This course serves as a capstone for the Digital Humanities Minor program. It includes opportunities for students to conduct original research. The topics for this course will vary from year to year.

**Prerequisite:** DHU235H1 and DHU236H1, and 1.0 additional credit in the Digital Humanities Minor program.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

---

**DHU437H1 - Research Projects in Digital Humanities**

**Previous Course Number:** WDW437H1

This course is for students who wish to pursue a significant research project, usually participation in a faculty-led DH research project, though it may take other forms. Students must be enrolled in the DH Minor program or obtain special permission of the program coordinator.

**Prerequisite:** DHU235H1 and DHU236H1, and 1.0 additional credit in the Digital Humanities Minor program.

**Distribution Requirements:** Humanities

**Breadth Requirements:** Creative and Cultural Representations (1)

Writing in the Faculty of Arts & Science

The ability to think critically and to write well-organized, clear, grammatical prose is important to your work in Arts and Science courses. It will also improve your chances if you apply to graduate or professional schools and will give you an advantage in the workplace. To help you develop your writing skills, Arts and Science provides a range of instructional resources.

NOTE: For courses in creative writing, see entries under “English” (ENG), “Innis College” (WRR), and “Victoria College” (CRE) in this Calendar.

Courses

Departments and programs integrate writing instruction into many of their courses, and some offer courses that concentrate on communication in their disciplines. Check the course listings by department.

Your course instructors and teaching assistants will provide guidelines for written assignments. They will often offer instruction in class and give you the opportunity to ask questions before assignments are due. You may ask them to discuss work that has been graded and returned to you.

In addition, the university offers several courses in writing effective essays:

- ENG100H1 (Effective Writing) is listed under “English” in this Calendar
- WRR103H1 (Writing Essays) is listed under “Innis College”
- JWE206H1 (Writing English Essays) is listed under “English” and “Innis College”

Innis College’s Minor Program in Writing and Rhetoric offers an array of courses that explore the worlds of oral, written, and online discourse. Rhetoric courses focus on how persuasion circulates in society, while writing courses teach students how to employ rhetoric and to write well in the modes, genres, and styles appropriate to particular disciplinary, institutional, and creative contexts. Visit course listings under Innis College in this Calendar.

Victoria College offers a minor program called Creative Expression and Society. It has two components: (1) workshop-style courses allowing students to develop skills in creative expression and communication, and (2) courses encouraging students to analyze the relationship between creative arts and society. Visit course listings under Victoria College in this Calendar.

Trinity College offers the course TRN478H1 (Science Writing for Non-Scientific Audiences). It focuses on a diversity of non-scientific audiences and writing styles.

The University of Toronto at Mississauga (UTM) offers a major and minor program in Professional Writing and Communication. The University of Toronto at Scarborough (UTSC) offers a major and minor program in Creative Writing. Consult with your college registrar about taking courses at either campus, and see the UTM and UTSC calendars for more detail about courses offerings.

English Language Learning Opportunities

The English Language Learning (ELL) Program offers undergraduates in Arts and Science a variety of ways to develop both oral and written communication. Intensive non-credit mini-courses are offered during fall and winter reading weeks and during the summer. During the fall and winter terms, programming includes free drop-in workshops using a variety of interesting activities to improve speaking, and also an online component for improving academic reading and writing.

Writing Centres

The writing centres at undergraduate colleges will help you develop the writing and critical thinking skills you need throughout your university studies. They offer, free of charge, both group and individual instruction.

Group instruction is offered through both in-course instruction and a series of workshops called Writing Plus. These intensive group workshops help prepare you to meet the expectations of university writing. They cover all stages of writing university papers, from understanding the assignment to revising the final draft. They also provide targeted advice for handling your reading load and the challenges of studying for tests and exams. Special sessions focus on writing admissions statements for graduate and professional programs. Dates and locations are listed online in the Writing Plus section of www.writing.utoronto.ca.

In individual consultations, trained writing instructors help you improve your ability to plan, write, and revise, focusing on course writing assignments of your choice. Instructors are familiar with writing conventions in the whole range of Arts and Science courses; many have specialized training in teaching students whose first language is not English. You are entitled to use the writing centre of the college where you are registered. Most colleges also allow students from other colleges to book appointments for writing assignments in a college program.
course. All the college writing centres use an online booking system that requires your UTORid for login. More information is available in the Writing Centres section of www.writing.utoronto.ca. Here is a list of Arts and Science writing centres:

Writing Resources

Campus libraries stock many reference guides for academic writing, some of them online. You will find both general handbooks on style and referencing, and guides on writing in specific disciplines. You can also consult the Advice section of the website Writing at the University of Toronto at www.writing.utoronto.ca. It contains short files addressing common issues in academic writing along with links to other useful online and print resources.
