It is now 90 years since astronomers found the first evidence for a form of matter that wasn't part of the stars in our galaxies, but rather is "dark" and has a gravitational attraction to ordinary matter. Other lines of evidence lead us to believe that there is six times more dark matter than the ordinary matter we are familiar with. Despite this, we have no credible, direct evidence for what this dark matter might be. It is one of the biggest puzzles in particle physics and cosmology. In the last decade, we have also discovered that something else is going on -- the universe appears to be filled with "dark energy" that causes the expansion of our universe to speed up instead of slowdown. We will discuss what we know about the hypotheses of dark matter and dark energy, and the debates about what might really be going on. Are we seeing science in crisis, with a revolution just around the corner, or is this just the "normal science" talked about by Kuhn and other philosophers of science? Participants will be expected to participate in seminar-style discussions, as well as take the lead on at least one topic of discussion. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: No prior experience with physical science will be required, but familiarity with Grade 10 mathematics will be assumed.

PHY202H1 - The Physics of Science Fiction and Gaming

Hours: 24L/12T

The physics of time travel, teleportation, levitation, invisibility, special effects, and other physics related topics found in literature, film, and gaming. The course will analyze the realism of physical phenomena in these media, and consider the impact of these concepts on science and society.

PHY202H1 is primarily intended as a Breadth Requirement course for students in the Humanities and Social Sciences.

Exclusion: PHY131H1/ PHY132H1/ PHY151H1/ PHY152H1 (or equivalent) taken previously or concurrently.

PHY405H1 - Electronics Lab

Hours: 12L/36P

Electrical circuits, networks and devices are all-pervasive in the modern world. This laboratory course is an introduction to the world of electronics. Students will learn the joys and perils of electronics, by designing, constructing and debugging circuits and devices. The course will cover topics ranging from filters and operational amplifiers to micro-controllers, and will introduce students to concepts such as impedance, transfer functions, feedback and noise.

Prerequisite: PHY224H1, PHY250H1. Note that PHY405H1 may be taken in third or fourth year.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

Mode of Delivery: In Class

PHY407H1 - Computational Physics

Hours: 12L/36P

This is an introduction to scientific computing in physics. Students will be introduced to computational techniques used in a range of physics research areas. By considering select physics topics, students will learn basic computational methods for function analysis (computing integrals and derivatives; finding roots and extrema), resolution of linear and non-linear equations, eigenvalue problems, Fourier analysis, ODEs, PDEs and Monte Carlo techniques. As the course progresses, students will develop their skills at debugging, solution visualization, computational efficiency and accuracy. The course is based on python and will involve working on a set of

computational labs throughout the semester as well as a final project.

Prerequisite: PHY224H1/ PHY254H1

Corequisite: Any third or fourth year course in Physics

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

Mode of Delivery: In Class

PHY408H1 - Time Series Analysis

Hours: 12L/24P

The analysis of digital sequences; filters; the Fourier Transform; windows; truncation effects; aliasing; auto and cross-correlation; stochastic processes, power spectra; least squares filtering; application to real data series and experimental design.

Prerequisite: PHY407H1/ PHY224H1/ PHY250H1/ PHY254H1/ PHY324H1. PHY408H1 may be taken in third or fourth year

Corequisite: Any third or fourth year lecture course in Physics

Hours: 24L

Introduction to foundational concepts of condensed matter physics in the solid state. Main topics to be covered: crystal structure, reciprocal lattice, x-ray diffraction, crystal binding, lattice vibrations, phonons and electrons in solids, Fermi surfaces, energy bands, semiconductors and magnetism. Special topics to be surveyed: superconductivity and nanoelectronic transport.

Prerequisite: [PHY250H1](#), [PHY252H1](#), [PHY356H1](#)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
Mode of Delivery: In Class

PHY489H1 - Introduction to High Energy Physics

Hours: 24L

This course introduces the basics of fundamental particles and the strong, weak and electromagnetic forces that govern their interactions in the Standard Model of particle physics. Topics include relativistic kinematics, conservation laws, particle decays and scattering processes, with an emphasis on the techniques used for calculating experimental observables.

Prerequisite: [PHY354H1](#), [PHY356H1](#)
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
Mode of Delivery: In Class

PHY491H1 - Current Interpretations of Quantum Mechanics

Hours: 24L/24T

Different interpretations of quantum mechanics are presented and discussed, comparing and contrasting the various approaches to understanding the formalism of the theory. We begin with “textbook quantum mechanics” and then discuss the Copenhagen view, operationalist quantum mechanics, hidden variable theories, Bohm-de Broglie theory, consistent histories, relational quantum mechanics, relative state approaches (many minds and many worlds), QBism, the interactional interpretation, and collapse theories.

Prerequisite: PHY456H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

velocity structures. Seismic tomographic methods, including their applications to hydrocarbon reservoir imaging, are also covered.

Prerequisite: JPE395H1, APM346H1/ APM351Y1/
MAT351Y1

Exclusion: PHY493H1

Recommended Preparation: ESS345H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

Mode of Delivery: In Class

PHY492H1 - Advanced Atmospheric Physics

Hours: 24L/12T

A preparatory course for research in experimental and theoretical atmospheric physics. Content will vary from year to year. Themes may include techniques for remote sensing of the Earth's atmosphere and surface; theoretical atmosphere-ocean dynamics; the physics of clouds, precipitation, and convection in the Earth's atmosphere.

Prerequisite: PHY250H1, MAT235Y1/ MAT237Y1/
MAT257Y1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

Mode of Delivery: In Class

JPE493H1 - Seismology

Hours: 24L

Why do earthquakes occur and how are they related to tectonic motion of the Earth's surface? What is the physics behind the propagation of seismic waves through the Earth, and how can it be used to determine the internal structures of the Earth? This introductory course is aimed at understanding the physics behind seismic wave propagation, as well as asymptotic and numerical solutions to the elastodynamic equation. Travel time and amplitude of seismic waves are discussed based on seismic ray theory, while numerical methods are introduced to obtain accurate solutions to more complex

Introduction

Physiology is the study of living matter in action. It integrates physical and life science disciplines in order to understand body functions and the origins of disease. Beyond the study of control mechanisms, compensations, and cooperation among body molecules, cells, tissues and organs, the interaction between the body's external and internal environments is a key theme in Physiology. Most importantly, Physiology unifies the life sciences from molecule to organism, providing the link from genomics and molecular signaling pathways to behaviour and disease. Emerging fields for physiologists are the analysis of the functional implications of genomic sequence variation, developmental factors leading to chronic illness, and novel approaches for regenerative medicine.

Biological function -- of molecules, cells, and organs -- is at the heart of Physiology, and this knowledge is fundamental to the life sciences in general. Accordingly, Physiology provides an excellent and often necessary background for subsequent training in Medicine, Dentistry, Pharmacy, Nursing, Physical or Occupational Therapy, and other health-related professions. It is also excellent preparation for graduate work in Physiology and related areas; or for the teaching of Biological Science in

secondary schools. Physiologists are needed in hospitals and departments of medicine as teachers and research personnel. Other outlets would be in agriculture and veterinary medicine, in military research establishments and in life science-based industry. The development of air and space travel, the exploration of the continental shelf, the development of Northern regions, and increased emphasis on exercise and fitness, all provide business and research opportunities for the person trained in Physiology.

Physiology at the research level covers a variety of specialties (e.g. Endocrinology, Cardiovascular Physiology, Neurophysiology, Respiratory Physiology, Reproductive Physiology, Sensory Physiology), each with a wide variety of technical and analytical methods. More information is available on the departmental website (www.physiology.utoronto.ca).

Physiology Programs

Physiology Specialist (Science Program) - ASSPE0482

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- [BIO130H1](#)
- ([CHM135H1](#) and [CHM136H1](#))/ [CHM151Y1](#)
- 1.5 credits from [BIO120H1](#), [MAT135H1](#), [MAT136H1](#), [MAT137Y1](#), [MAT157Y1](#), [PHY131H1](#), [PHY132H1](#), [PHY151H1](#), [PHY152H1](#)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60% in each course, or a grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at physiology.undergrad@utoronto.ca, specify which program you would like to be considered for, and provide your student number.

Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment, or the Physiology website at www.physiology.utoronto.ca.

Completion Requirements:

(14 credits)

First Year:

BIO120H1, BIO130H1; (CHM135H1, CHM136H1)/ CHM151Y1; (PHY131H1, PHY132H1)/(PHY151H1, PHY152H1)

First Year or Upper Years:

(MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1*

Second Year:

1. 2.5 credits from BCH210H1; BIO230H1/ BIO255H1; CHM220H1/ CHM247H1/ CHM249H1; PSL300H1, PSL301H1

2. 1.5 credits from BIO220H1, BIO260H1/ HMB265H1; MAT235Y1, PHY231H1, PSL299Y1/ PSL399Y1, STA220H1/ STA250H1

Third Year:

1. 3 credits from BCH370H1; PSL304H1, PSL305H1, PSL350H1/ CSB349H1/ BCH311H1, PSL372H1, PSL374H1

2. 1 credit from the following list: ANA300Y1, ANA301H1; BME498Y1; CSB325H1, CSB332H1/ CJH332H1, CSB343H1, CSB345H1/ CSB445H1, CSB346H1, CSB347H1; IMM340H1/ IMM341H1, IMM350H1/ IMM351H1; JPM300H1; PCL201H1, PCL285H1, PCL302H1; PHY331H1, PSL310H1; PSL378H1/ PSL379H0/ PSL398H0; PSY397H1

Fourth Year: (at least 2 credits at 400-level)

1. PSL496Y1/ PSL497H1/ PSL498Y1/ PSL499H1/ JPM400Y1

2. 1-1.5 credits from PSL400-series or HMB430H1/ HMB470H1/ HMB472H1

* These courses may be taken in the first year or subsequent years, and are not required for entrance into the specialist program.

Physiology Major (Science Program) - ASMAJ0482

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1, CHM136H1)/ CHM151Y1
- 1.0 credit from MAT135H1, MAT136H1, MAT137Y1, MAT157Y1, PHY131H1, PHY132H1, PHY151H1, PHY152H1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60% in each course, or a grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. Physiology Courses

PSL190H1 - Biomedical Research at the Cutting Edge

Hours: 24L/6S

Explore the thought processes, logic, motivation, techniques, analysis and impact of recent high-profile publications to gain insight into the enterprise of science. Outstanding scientists present recent high-impact papers, and students will examine the research in depth, focusing on the underlying questions, experimental approach, results and significance. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: SBI4U and SCH4U (Grade 12 University Preparation Biology and Chemistry); permission of Department

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL201Y1 - Basic Human Physiology

Hours: 44L/24P

A survey course covering all organ systems intended for students who are not proceeding further in Physiology.

Exclusion: Any 300-level PSL course taken previously or concurrently

Recommended Preparation: 100-level course in BIO or equivalent

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: Hybrid

PSL280H1 - Introduction to Physiologic Adaptations of Marine Mammals

Hours: 24L/14P

Systems approach to physiology of marine mammals in their aquatic environment. Highlights unique features of cardiovascular, respiratory, renal, urinary, and

reproductive systems. Introduces relevant physiology, and makes comparisons to human condition and disease.

Prerequisite: (BIO120H1, BIO130H1), CHM136H1/CHM151Y1. Students who do not have all of the required prerequisites are encouraged to contact the course coordinator to seek a waiver.

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

Distribution Requirements: Science

Mode of Delivery: In Class

JPM300H1 - Research Readiness and Advancing Biomedical Discoveries

Hours: 12L/24T

Explore how scientists leverage their knowledge and skills to advance academic biomedical discoveries from the laboratory to improve patient health through either commercialization or not-for-profit approaches. Students will learn about innovation and develop key research and industry skills including intellectual property, ethics, budget and project management; learn how to critically evaluate scientific evidence and effectively communicate to a wide audience. This hybrid student-centered course will include interactive online modules and in-class group work. Course work will focus on developing skills and knowledge to help you be successful in diverse research courses and future careers. Not eligible for CR/NCR option.

Prerequisite: Completion of 10.0 credits, BCH210H1/BCH242Y1

Recommended Preparation: PSL300H1, PSL301H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: Hybrid

PSL300H1 - Human Physiology I

Hours: 36L/5T

Principles of neurophysiology, endocrinology and reproductive physiology for students enrolled in Life Science programs.

Exclusion: PSL201Y1, PSL302Y1

Recommended Preparation: BIO130H1; CHM136H1/CHM151Y1; and 1.0 credit from any of the following: MAT135H1, MAT136H1, MAT137Y1, MAT157Y1, PHY131H1, PHY132H1, PHY151H1, PHY152H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL301H1 - Human Physiology II

Hours: 36L/4T

Principles of respiratory, cardiovascular, gastrointestinal, and renal physiology for students enrolled in Life Science programs.

Exclusion: PSL201Y1, PSL302Y1

Recommended Preparation: BIO130H1; CHM136H1/CHM151Y1; and 1.0 credit from any of the following: MAT135H1, MAT136H1, MAT137Y1, MAT157Y1, PHY131H1, PHY132H1, PHY151H1, PHY152H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL304H1 - Topics in Cellular, Molecular and Organismic Physiology I

Hours: 32L/16T

Control systems, feedback, networks, and both neonatal and adult cardiovascular and respiratory control are the topics examined in detail using homeostasis as a unifying theme. Tutorials involve computer simulations, case studies and/or experimental design. This course is designed for students in the Physiology Specialist and Biological Physics Specialist Programs, although permission is granted to students in other programs upon approval by the Department.

Prerequisite: BCH210H1, PSL300H1, PSL301H1, MAT100-series

Exclusion: PSL303Y1

Recommended Preparation: PSL372H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL305H1 - Topics in Cellular, Molecular and Organismic Physiology II

Hours: 32L/16T

Molecular, cellular and organismic physiology of the central nervous system, gut, pancreas and glucose-sensing tissues; CNS diseases, obesity and diabetes are used as model systems. Tutorials involve computer simulations. This course is designed for students in the Physiology Specialist and Biological Physics Specialist Programs, although permission is granted to students in other programs upon approval by the Department.

Prerequisite: BCH210H1, [PSL300H1](#), [PSL301H1](#), MAT100-series

Exclusion: [PSL303Y1](#)

Recommended Preparation: [PSL372H1](#)

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL310H1 - Clinical Reasoning

Hours: 24L/12S

Improved clinical reasoning will reduce the current likelihood that most people will suffer at least one medical diagnostic error, errors that contribute to ~10% of patient deaths. Learn to apply strategies of critical thinking and principles of physiology to solve clinical cases. Shadow a healthcare professional. Not eligible for CR/NCR option.

Prerequisite: [BCH210H1](#), [BIO230H1](#)/ [BIO255H1](#), [PSL300H1](#), [PSL372H1](#), [PSL301H1](#)

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL350H1 - Mammalian Molecular Biology

Hours: 18L/12T/6S

Extend molecular biology concepts to current scientific literature in mammalian physiology. Apply these principles to disease and complex behaviours. Discuss bioethical issues raised by these techniques and their application. Benefit from three weeks in small group seminars lead by research professors focusing on current advances in mammalian molecular biology.

Prerequisite: [BIO230H1](#)/ [BIO255H1](#), [PSL300H1](#), [BCH210H1](#)

Corequisite: [PSL301H1](#)

Exclusion: [BCH311H1](#)/ [BIO349H1](#)/ [CSB349H1](#)/ [MGY311Y1](#)

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL374H1 - Advanced Physiology Laboratory

Hours: 12L/36P/12S

A problem-based laboratory course focused on the integration and control of organ systems to understand body functions. Enrollment in this course is restricted to students in the Physiology Specialist and Major Programs although permission is granted to students in other programs upon approval by the Department. An ancillary fee of \$50 will be charged for lab materials.

Prerequisite: [BIO230H1](#)/([BIO240H1](#), [BIO241H1](#))/ [BIO255H1](#), [PSL300H1](#), [PSL301H1](#), [PSL372H1](#)

PSL378H1 - Field Physiology: Marine Mammal Autopsy

Hours: 12L/24T/36P

An opportunity to go outside of the traditional university classroom and actively participate in a marine mammal autopsy. Learn the diversity and adaptive nature of marine mammalian physiology/anatomy as it compares to human. The course is 2 weeks (in May), one week of hands-on tissue dissection, and one week of group discussions of the findings and draft report preparation. Not eligible for CR/NCR option.

An additional fee is required to help cover the cost of delivery for this course. Please see <https://physiology.utoronto.ca/psl378h1f> for details.

Prerequisite: [BIO270H1](#), [BIO271H1](#)/ [PSL201Y1](#)/ [PSL280H1](#)/ [PSL300H1](#), [PSL301H1](#) or permission of the course coordinator

PSL379H0 - Comparative Marine Mammal Physiology in the Field

Hours: 24T/36P

Hands-on monitoring of physiological measures with live dolphins, manatee and sea lions; field observations and applied learning to a physiology project. Two-weeks at the end of April early May: 1st week is spent at the marine research center in Mexico, 2nd week of wrap-up discussion and integration of data at U of T. Not eligible for CR/NCR option.

An additional fee is required to help cover the cost of delivery for the course. See <https://physiology.utoronto.ca/psl379h> for details.

Mode of Delivery: In Class, Hybrid

PSL398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

Distribution Requirements: Science

Mode of Delivery: In Class

PSL399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

Mode of Delivery: In Class

JPM400Y1 - Biomedical Incubator Capstone Project

Hours: 240P/16S

Discover what it is like to be part of a biomedical innovation team. Develop and engage in biomedical research in a simulated small business/incubator setting under the guidance of a faculty mentor. Bring your proposed [JPM300H1](#) project to life, while acquiring budget management, research, business and communication workplace skills for future careers. Enrolment is application-based. Application requirements and process are presented as part of the [JPM300H1](#) course. Proposals will be reviewed by committee and successful proposals will be matched to a mentor. Not eligible for CR/NCR option.

Application required; contact department (undergrad.pharmtox@utoronto.ca) for more information.

Students will form teams and develop a research proposal based on either:

- 1. Faculty led concept requiring further development and testing, which would not normally be funded grants and would be tangential to ongoing research in the lab.*
- 2. Student developed innovative idea that requires further development and testing. This should be a project that is not being investigated in a UofT research lab.*

Prerequisite: A minimum of 75% in [JPM300H1](#); completion of any of [PCL367H1](#)/ [PCL368H1](#)/ [PSL372H1](#)/ [BCH370H1](#)/ [BCH377H1](#).

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL404H1 - Regenerative Medicine

Hours: 24L/12T

Regenerative medicine promises to restore body function that has been lost due to disease, damage or age. Students will explore selected molecular, stem cell and tissue engineering developments to better understand how the body normally functions and how cells, tissues, and organs can be repaired or replaced.

Prerequisite: PSL300H1, PSL301H1

Recommended Preparation: PSL350H1/ BCH311H1/ CSB349H1/ MGY311Y1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL420H1 - Reproduction: Development and Function

Hours: 24L

This course provides an in-depth review of the development and function of the male and female reproductive systems. Topics include sex determination and differentiation, steroidogenesis, gametogenesis, hormonal control of the reproductive axis, the female ovulatory cycle, fertilization and implantation, infertility and assisted reproduction approaches.

Joint undergraduate/graduate course -
PSL420H1/LMP2100H

Prerequisite: A minimum grade of 78% is required in PSL300H1 and PSL301H1. If minimum grade has not been met students are advised to contact the Department of Physiology at physiology.undergrad@utoronto.ca for approval.

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL421H1 - Pregnancy and Birth: From Implantation to Newborn Life

Hours: 24L

General overview of the integrated physiological events associated with fetal development, pregnancy and birth. The approach emphasizes physiological processes using insights gained from studies of humans, animals, cells and genes. Where appropriate the clinical consequences of aberrant development are reviewed.

Joint undergraduate/graduate course -
PSL421H1/PSL1421H

Prerequisite: A final grade of 75% or higher in each of PSL300H1 and PSL301H1. If minimum is not reached, please contact the Department of Physiology at physiology.undergrad@utoronto.ca for approval.

Recommended Preparation: PSL420H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL424H1 - Cellular and Molecular Basis of Endocrine Disorders

Hours: 24S

Explore how researchers uncover the molecular and cellular basis of endocrine disorders. Learn about experimental design, state-of-the-art research tools, and data interpretation. Topics include disorders in: hormone regulation, secretion and action; circadian rhythms; and sexual development and reproduction. Each week students engage in class discussion related to research seminars delivered by faculty.

Prerequisite: PSL300H1, PSL301H1, PSL350H1/ BCH311H1/ CSB349H1/ MGY311Y1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL425H1 - Integrative Metabolism and its Endocrine Regulation

Hours: 24L

This course integrates the newest findings and experimental approaches from cellular and molecular biology into metabolic function at the tissue, organ and whole body level.

Prerequisite: BCH210H1, PSL300H1, PSL301H1

Recommended Preparation: PSL305H1/ PSL303Y1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL432H1 - Theoretical Physiology

Hours: 24L

Theoretical treatment of neurophysiology. Mathematical modeling and analysis of neurophysiological systems.

Joint undergraduate/graduate course -
PSL432H1/PSL1432H

Prerequisite: MAT235Y1/ MAT237Y1; APM346H1/ MAT244H1 A minimum grade of 78% is required in MAT235Y1/ MAT237Y1; APM346H1/ MAT244H1. If minimum grade has not been met students are advised to contact the Department of Physiology at physiology.undergrad@utoronto.ca for approval.

Recommended Preparation: PHY200-series; PSL201Y1/ PSL300H1/(BIO270H1, BIO271H1)

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL440Y1 - Neuroscience: Systems and Behaviour

Hours: 96L

Introduction to systems neuroscience. A review of basic neuroanatomy and physiology followed by in-depth study of selected sensory and motor systems, with an emphasis on clinical applications in the second term. Students with an elementary neuroscience background progress to reading neuroscience literature on their own.

Prerequisite: PSL300H1/ PSY290H1/ CSB332H1 or equivalent

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL445H1 - Neuroscience: Cellular and Molecular

Previous Course Number: PSL444Y1

Hours: 36L

Overview of the fundamentals of cellular and molecular aspects of brain function. Course material is updated yearly to reflect the rapid evolution of ideas in Neuroscience.

Joint undergraduate/graduate course -
PSL445H1/PSL1445H/JNR1444Y

Prerequisite: PSL300H1, PSL301H1, CJH332H1 or permission of instructor A minimum grade of 78% is required in PSL300H1, PSL301H1 and CJH332H1. If minimum grade has not been met students are advised to

contact the Department of Physiology at physiology.undergrad@utoronto.ca for approval.

Exclusion: PSL444Y1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL446H1 - Neural Disorders

Previous Course Number: PSL444Y1

Hours: 36L

Explore topics in neurological disorders and treatments to reinforce and expand your knowledge of cellular and molecular neurophysiology. Course material is updated yearly to reflect the rapid evolution of ideas in this area.

Joint undergraduate/graduate course -
PSL446H1/PSL1446H/JNR1444Y

Prerequisite: PSL300H1, PSL301H1, CJH332H1 or permission of instructor A minimum grade of 78% is required in PSL300H1, PSL301H1 and CJH332H1. If minimum grade has not been met students are advised to contact the Department of Physiology at physiology.undergrad@utoronto.ca for approval.

Exclusion: PSL444Y1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL450H1 - Mechanisms of Neural and Endocrinal Secretion

Hours: 24L

Exocytosis and other aspects of secretion mainly in neurons and neuroendocrine cells, but also in pancreatic cells. Topics include synapse anatomy and physiology, synaptic plasma membrane and vesicle proteins, membrane fusion, genetic tools, endocrine secretion, plasticity in neurotransmitter release, diseases arising from secretion defects.

Prerequisite: BCH210H1, PSL300H1/(BIO240H1, BIO241H1), PSL350H1/ CSB349H1/ BCH311H1/ MGY311Y1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL452H1 - Membrane Physiology

Hours: 24L

Biophysics and molecular biology of ion channels. Topics include equivalent circuits for cells, molecular structure of voltage-gated channels, distribution of channels, relationship between single-channel and whole-cell recording, and regulation of channel function by voltage, phosphorylation, G-proteins and metabolites.

Joint undergraduate/graduate course -
PSL452H1/PSL1452H

Prerequisite: PSL300H1, PSL301H1 A minimum grade of 75% is required in PSL300H1 and PSL301H1. If minimum grade has not been met students are advised to contact the Department of Physiology at physiology.undergrad@utoronto.ca for approval.
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
Mode of Delivery: In Class

PSL462H1 - Molecular Aspects of Cardiovascular Function

Hours: 36L

Heart anatomy and development, ion channels and contractile proteins involved in cardiac and smooth muscle contraction are studied. Emphasis is on regulation of electrical and contractile function of kinases, metabolism, volume and ions.

Joint undergraduate/graduate course -
PSL462H1/PSL1462H

Prerequisite: PSL300H1, PSL301H1 A minimum grade of 75% is required in PSL300H1 and PSL301H1. If minimum grade has not been met students are advised to contact the Department of Physiology at physiology.undergrad@utoronto.ca for approval.
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
Mode of Delivery: In Class

PSL470H1 - Cardiovascular Physiology

Hours: 24L

Development of the cardiovascular system from conception to adulthood with particular emphasis on maturational changes, age-related differences and

developmental problems from cellular/molecular to whole organ/system.

Prerequisite: PSL300H1, PSL301H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
Mode of Delivery: In Class

PSL472H1 - Sleep Physiology and Chronobiology

Hours: 24L

This course covers the physiology underlying sleep and circadian rhythms, and their impact on important physiological processes and health. The integrative nature of the basic physiological processes is emphasized via discussions and clinical presentations. Overall, the aim is to present the full spectrum of integrative physiology from molecules and cells to understanding the sick patient.

Prerequisite: PSL300H1, PSL301H1 A minimum grade of 75% is required in PSL300H1 and PSL301H1. If minimum grade has not been met students are advised to contact the Department of Physiology at physiology.undergrad@utoronto.ca for approval.
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
Mode of Delivery: In Class

PSL480H1 - Diving Physiology of Marine Mammals

Hours: 24L/6T

This course compares and contrasts the physiological and anatomical adaptations exhibited by the different species of marine mammals in relationship to humans, with respect to diving.

Prerequisite: (BIO270H1, BIO271H1)/ PSL201Y1/
PSL300H1, PSL301H1; PSL280H1
Distribution Requirements: Science
Breadth Requirements: Living Things and Their Environment (4)
Mode of Delivery: In Class

PSL495H1 - Communicate Biomedical Science

Hours: 6L/2T/18S

Research, critique and write a manuscript on a topic of your choice in the scientific literature while guided by classes and assignments that develop advanced science communication skills; and by a mentor expert in your area of clinical or basic physiology.

Prerequisite: PSL300H1, PSL301H1, PSL372H1; 13.5 additional credits; and permission of Department

Exclusion: BCH479H1, HMB490H1, HMB491H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL496Y1 - Translational Physiology Research Project

Hours: 144P

Engage in supervised original science research, either basic or clinical, combined with a healthcare placement. Develop skills in defining scientific questions, designing experiments, analyzing data, and communicating your results. Gain insight into the power of translational bench-to-bedside research. Discover your interest in becoming a science researcher. Not eligible for CR/NCR option.

Prerequisite: PSL300H1, PSL301H1, PSL310H1, PSL372H1, permission of Department.

Exclusion: PSL497H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSL497H1 - Translational Physiology Research Project

Hours: 72P

Engage in original science research, either basic or clinical, combined with a healthcare placement. Develop skills in defining scientific questions, designing experiments, analyzing data, and communicating your results. Gain insight into the power of translational “bench-to-bedside” research. Discover your interest in becoming a science researcher. Not eligible for CR/NCR option.

Prerequisite: PSL300H1, PSL301H1, PSL310H1, PSL372H1, permission of Department.

Exclusion: PSL496Y1

PSL498Y1 - Project in Physiology

Hours: 144P

Laboratory research project with reading assignments leading to a final report. By special arrangement with a Physiology staff member after admission to course. PSL498Y1 is recommended for students applying to the Physiology graduate program. Enrollment in this course is restricted to students in the Physiology Specialist and Major Programs, although permission is granted to students in other programs upon approval by the Department. Not eligible for CR/NCR option.

Prerequisite: (PSL304H1, PSL305H1)/ PSL303Y1, PSL372H1, PSL374H1, permission of Department

Introduction

The study of Political Science at the University of Toronto is wide-ranging and diverse. Courses are offered in political theory, Canadian government, international relations, and the politics of societies that are industrialized, developing, and in transition. Many courses deal with issues (such as environmental politics, diversity, peace and conflict, globalization) that cut across fields. Course offerings are designed to introduce students to Political Science at the first year level, provide the foundations for further study at the second year level, and provide specialized lecture and seminar courses at the intermediate and advanced levels. Studies in Political Science provide students with a good grounding in one of the chief social science disciplines and an opportunity to explore the issues that confront us as individuals, groups, societies and on the international level in the twenty-first century. In addition to the materials covered, Political Science courses are set up to offer students an opportunity to learn writing and analytical skills to support a challenging and diverse career.

Courses in Political Science dovetail with programs in many other disciplines of the social sciences and the humanities: Economics, Sociology, History, Philosophy, and Psychology. A student interested in Canadian studies or urban problems, for example, would be well advised to choose courses from all these disciplines, as would someone interested in international affairs or environmental studies. A student planning graduate work in the social sciences should seek to obtain a basic understanding of each of these disciplines.

Detailed information on our programs, extended descriptions of courses, and background information on the interests of our instructors can be found on our website. The Association of Political Science Students, the students' organization for Political Science undergraduates, has an office in Room 1091, Sidney Smith Hall.

Political Science Programs

Political Science Specialist (Arts Program) - ASSPE2015

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required for students who have completed 4.0 to 8.5 credits:

- 1.0 credit from POL101H1, POL106H1, POL107H1, POL109H1 with a grade of 65% in each; or
- 0.5 credit from POL101H1, POL106H1, POL107H1, POL109H1 with a grade of 65%, and 0.5 credit from POL193H1, POL194H1, POL195H1, POL196H1, POL197H1, POL198H1, MUN101H1, MUN102H1, TRN151Y1, TRN160Y1, TRN162Y1, TRN172Y1, VIC110H1, VIC121H1, VIC167H1, VIC168H1, VIC181H1, VIC183H1, VIC184H1, VIC185H1, WDW151H1, WDW152H1 with a grade of 65%

For students who have completed 9.0 or more credits:

- 2.0 credits in POL/ JPA/ JPF/ JPI/ JPR/ JPS/ JRA courses (excluding POL193H1, POL194H1, POL195H1, POL196H1, POL197H1, POL198H1) with a grade of 70% in each; or

Regarding Political Science Courses

PLEASE NOTE:

- Not all courses listed in the calendar are offered every year. Please check the Department's website <https://politics.utoronto.ca/undergraduate/courses/fallwinter-timetable/> for the list of courses offered.
- Prerequisites and exclusions are enforced for all 2nd, 3rd and 4th year courses. Please consult the POL section of the Faculty of Arts & Science Registration Instructions and Course Enrolment Instructions for details. **Students without course prerequisites will be removed at any time they are discovered.**
- Enrolment is limited for all 300-level and 400-level courses. See the Registration Instructions and Course Enrolment Instructions for details.
- Nearly all POL 400-level courses are offered as joint undergraduate-graduate seminars with class sizes ranging from 15-25.

This course introduces students to compelling issues of contemporary politics through the lens of classic and important texts in political science. The course covers the politics of climate change, Indigenous rights, elections and electoral systems, terrorism, social movements and political activism, voting, democracy, and power.

Exclusion: POL101Y1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

POL106H1 - Contemporary Challenges to Democracy: Democracy in the Social Media Age

Hours: 24L/12T

This course examines the latest evidence-based research on the effects of social media on democracy. We cover surveillance capitalism, privacy, disinformation, and the often-overlooked ecological implications of data consumption. We also examine targeted digital espionage against civil society, Citizen Lab research reports, and explore solutions and alternatives to social media.

Distribution Requirements: Social Science

Mode of Delivery: In Class

POL107H1 - What Went Wrong? A Post Mortem of Political Disasters, Catastrophic Policy Failures, and Epic Marches of Folly

Hours: 24L/12T

Why do individuals, groups, and societies make repeated, and often easily predictable mistakes? Why do they persist in courses of action that produce disastrous results? Why is it that in the political world good intentions are insufficient to ensure good results? This course employs the political science analytical toolkit to answer these questions and examines an array of avoidable disasters, from the local to the international.

Exclusion: POL486H1 (Topics in International Politics I: What Went Wrong? A Post Mortem of Political Disasters, Policy Failures and Marches of Folly), offered in Winter 2019 and Winter 2020; POL487H1 (Topics in International Politics II: What Went Wrong? Mode of Delivery: In Class

POL194H1 - First-Year Foundation Seminar: Race

Hours: 24S

This course is an introduction to the history, politics, economics, and psychology of race and racism, as well as intersections between race and class, gender, and indigeneity. The course focuses attention on the ways that states structure race, and the ways race is differently conceptualized around the world.

Restricted to first-year students.

Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Thought, Belief and Behaviour (2)
Mode of Delivery: In Class

POL195H1 - First-Year Foundation Seminar: Settler Colonialism and Enduring Indigeneity

Hours: 24S

What is settler colonialism and how does Indigeneity endure it? This course explores the many, diverse ways that Indigenous peoples resist settler colonization and persist beyond it. We will examine Indigenous activisms, legal orders, political philosophies, and cultural productions that demonstrate settler colonialism is indeed a failing project.

Restricted to first-year students.

Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

POL196H1 - First-Year Foundation Seminar: The China Challenge

Hours: 24S

China's meteoric rise to great power status has triggered an intense international debate over its global implications. While many analysts see Beijing's rise as posing a threat to global political and economic stability, Chinese leaders have argued forcefully that China's efforts to regain its historic preeminence will result in a 'win-win' outcome for all states. This course will assess the merits of these contending positions through an historical examination of China's 20th century renaissance. The course will begin by tracing the long period of imperial decline in the 19th century, culminating in China's revolutionary rebirth as a Marxist state in 1949. A major focus will be on the Mao-era legacy of revolutionary diplomacy and the foreign policy consequences of its later transformation into a market-authoritarian powerhouse.

Restricted to first-year students.

Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

POL197H1 - First-Year Foundation Seminar: Politics and Sports: Identity, Activism, and Political Economy

Hours: 24S

The course aims to introduce first year students to key themes in political science – power, race, ethnicity, gender, sexuality, class, nationalism, social movements, activism, and political economy – through the lens of sports and those who participate in them.

Restricted to first-year students.

Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

POL198H1 - First-Year Foundation Seminar: Social Justice and the City

Previous Course Number: POL198Y1
Hours: 24S

An introduction to the concept of social justice from an urban perspective. It will highlight how unequal relations of race, class, gender, sexuality, and ability operate through the urban environment, and how these conditions can be contested through political mobilization.

Restricted to first-year students.

Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

POL200Y1 - Political Theory: Visions of the Just/Good Society

Hours: 48L/24T

POL219H1 - Unpacking Political Systems: Institutions and Behavior in Comparative Perspective

Hours: 24L/12T

This course aims to unpack the institutional and behavioral variation within political systems. The goal is to expose students to the key questions and theories in comparative politics around three themes: a) the origins and effects of political institutions (federalism, electoral rules, bicameralism, courts...); b) party and electoral behavior across democracies and authoritarian regimes; and c) explaining quality of governance (issues of representation, accountability, trust, corruption). We will draw on cutting edge research and touch on current events and a variety of cases.

JPR364H1 - Religion and Politics in the Nation State

Previous Course Number: JPR364Y1

Hours: 24L

This course will engage with contemporary debates on religion and politics in the context of the nation-state in our post-9/11 world, and will do so comparatively across a wide range of contexts.

The emphasis will be on understanding the evolving relationship between religion and politics in liberal democracies, and examining challenges facing democratic politics from the religious sphere, both in the West, where secular liberalism is the dominant framework for discussing these questions, and in Africa, India, and the Middle East, where such a framework is more likely to be contested. The themes explored will include secularization, religious pluralism and tolerance, human rights regimes, the idea of "civil religion," the impact of religion on party politics, the formation of identity and political community, the legal regulation of sometimes-competing claims based on religious faith, gender, and sexuality, and the rise of extremist forms of religious politics, conspiracy thinking, new online communities that lead to dangerous political outcomes, such as 'QAnon' and 'Plandemic'. Cases studies will include the USA, Canada, France, Turkey, Egypt, Nigeria.

(Given by the Departments of Political Science and Religion)

JPR365H1 - Global Religion and Politics

Previous Course Number: JPR364Y1

Hours: 24L

This course will engage with contemporary debates on religion and politics in the international context in our post-9/11 world, and will do so comparatively across a wide range of contexts.

The emphasis will be on understanding the evolving role transnational religion has played in the past three decades, where new global networks have emerged as central global actors. We will focus empirically on the rise of radical reformist Islam and evangelical Christianity, the two most dramatically successful forms of religiosity

around the world today. We will study the implications for the foreign policies of key nation-states, as well as the forces that have contributed to the prevalence of contestatory religious politics and networks as new and poorly understood global actors. International religious freedom, human rights, the role of media and mediation, the place of religious or theological doctrines or imaginaries in constructing and motivating a range of political goals, many involving the use of violence. We will focus as well on the global spread of extremist forms of religious politics, conspiracy thinking, new online communities that lead to dangerous political outcomes, such as 'QAnon' and 'Plandemic'. Many of the cases will focus on the non-Western world, especially the Middle East and Africa. *(Given by the Departments of Political Science and Religion)*

JPS378H1 - Sex and the State

Hours: 24L

What role have sex and sexuality played in the formation of the modern nation State? How has the State regulated

sex? This course explores these questions with a theoretical focus on biopolitics. We will proceed in two parts. First, we engage Foucault's *History of Sexuality* and its reception by postcolonial theorists, focusing on questions of state building. The second part of the course shifts examination from State formation to contemporary forms of sexual regulation by the State. This includes maintenance of the public/private divide, citizenship law and nationalism, administrative violence and the prison industrial complex, and neoliberalism and BDSM. By the end of the course, students are able to apply core theoretical concepts and identify forms of contemporary sexual regulation in a variety of Western and non-Western contexts.

POL387H1 - Politics in Europe

Previous Course Number: POL207Y1

Hours: 24L

This course applies the basic concepts in comparative politics to the political systems of Europe. We will cover theories of transitions to democracy, formation and development of the nation-state, political institutions and their effects, parties and party systems and elections and electoral behaviour. We will use these theories to gain a better understanding of politics in Europe. We will also address some of the major challenges that Europe and the EU have recently faced such as the eurozone crisis, Brexit, the rise of populism and extreme right parties and the challenges of immigration and incorporation of minorities. The goal is for students to become familiar with the politics and governments of contemporary Europe through the lens of current and classic themes in comparative politics.

JPA453H1 - Authoritarianism in Comparative Perspective

Previous Course Number: POL453H1

Hours: 24S

This course examines the politics of authoritarianism in theory and practice. It covers major theories in authoritarian politics, ranging from selectorate theory,

authoritarian institutions, impact of institutions on political outcome, ways of measuring authoritarian state power, democracy and development, to social movement and state repression in authoritarian regime, and political transitions. On empirical application, we will draw on cases from around the world, with some emphasis on Asian authoritarian states.

JPR459H1 - Fanaticism: A Political History

Hours: 24S

This seminar in theory will explore the modern history of the concept of 'fanaticism' and its role in the development of political modernity. A focus on the concept of the "fanatic" (and its cognates) from the perspective of its various uses in political and religious thought from the Early Modern period through the Enlightenment and up to the present day, provides a fascinating opportunity for a critical review of the secular, rationalist, and scientific assumptions underwriting modern political forms and concepts, especially those of liberal democracy. At the same time, the course will offer critical insight into the ways in which religious and political differences among colonial "others" were, and continue to be, central to the elaboration of Western theoretical discourse on fanaticism and extremism as forms of "political pathology". (*Given by the Departments of Political Science and Religion*)

Prerequisite: (2.0 credits in Political Theory and/or Philosophy including 1.0 credit at the 300-level) or (0.5 credit in Method and Theory in the Study of Religion and 1.0 credit at the 300-level in the Study of Religion)

POL469H1 - Ethics and International Relations

Hours: 24S

The course aims to explore the requirements of justice and fairness in international affairs. It is common to theorize international relations in terms of interests and power. But even the most cursory look at what important actors actually do in their international interactions reveals that they use normative language all the time. This has not gone unnoticed, with investigations of ethics in the international arena multiplying in recent years. Drawing on readings from political philosophy, legal theory, and normative international relations theory, the course will take up practical ethical dilemmas encountered in world affairs. The main focus of the course will be on institutions. Examples will be drawn from the issue areas of trade, health, and the environment, among others.

POL480H1 - Studies in Comparative Political Theory

Hours: 24S

We will critically examine what “comparative political theory” is and what it would mean to genuinely “deparochialize” political theory, that is, to de-center Euro-American thought in the study of political ideas. The course neither presupposes background knowledge of any non-Western thought tradition, nor does it aspire to provide students with sufficient knowledge of particular traditions to ground serious scholarly contributions to this emerging field. To provide that background would require a series of specialized courses in, e.g., East Asian political thought, Indian political thought, Latin American political

thought, Indigenous political thought, African political thought, and so on. Rather, the course aims at sharpening our understanding of (a) the purposes served by “deparochializing” political theory; and (b) the various methods by which we can seek to serve these purposes.

- Portuguese is the world's sixth most widely spoken language.
- Portuguese is a mother tongue in the 5 continents, parallel only to English and Spanish.
- Portuguese is the most widely spoken language in the Southern Hemisphere.
- Portuguese unites Portuguese-speaking diasporas all over the world in countries such as Canada, the United States, South-Africa, France or Switzerland.
- Portuguese has one of the highest growth rates as a second language in the Internet, in social networks and in learning as a foreign language.
- Portuguese is a Romance language, so if you already know another Romance language (Spanish, Italian, etc.), you will find it easier to learn it.
- Portuguese is now the first foreign language in the educational system of many countries.
- Portuguese is the official language of some of the fastest growing economies in the world, namely Brazil and Angola.

Introduction

Overview:

Portuguese is the sixth most widely used language in the world. It is spoken by more than two hundred and sixty million people on four continents inhabited by the Lusophone population: Europe, Africa, Asia, and the Americas. Twenty percent of all residents of the Western Hemisphere are Brazilians, a fact attesting to the truth that one out of every five Americans - North, Central, South - speaks Portuguese as his or her native language. The literature of Portugal has a tradition that goes back as far as the twelfth century, and the discoveries of its Renaissance seafarers led the language and the culture to all corners of the globe.

The Department offers an integrated curriculum, combining courses in language, linguistics, literature, and culture. Courses in the studies of the Lusophone world provide a diverse, flexible and detailed examination of the Portuguese language and its cultures. The skills and knowledge developed in these courses lay the groundwork for careers in teaching, journalism, translation, publishing, and foreign services, as well as for research in a variety of fields. In the Canadian job market, command of the Portuguese language is a definite advantage. Toronto has one of the largest Portuguese speaking diasporas, and Canada has been establishing strong cultural, political and business ties with Brazil.

Why should I learn Portuguese?

- Portuguese gives you access to a rich and fascinating culture.

What can I do with a degree in Portuguese?

- Education
- Marketing, Editing, Copywriting
- Journalism, Media
- Library and Information Sciences
- Public Relations
- Research
- Foreign Services/Foreign Affairs Specialist
- International development
- Political Aid
- National and international law

How is the program structured?

For many students, our program begins with the language sequence.

Language sequence:

1. The Department reserves the right to place students in the language course best suited to their linguistic preparation. Please contact the [Associate Chair, Undergraduate Studies](#) if you would like to take a Placement test to help you determine your level of linguistic competence in Portuguese.
2. Students who, in the department's assessment, have an adequate knowledge of Portuguese may be required to take Portuguese literature, culture or linguistic course instead of a language course at any level.

The progression of courses in the language sequence is designed to accommodate a wide range of previous

language experience. Students are placed in the appropriate language course based on their proficiency as determined by departmental assessment.

Students who have had little to no previous experience in studying Portuguese may enrol in an intensive course, [PRT100Y1](#).

Students who have a strong background in Spanish language (native fluency or minimum [SPA320Y1](#)), should enrol in [PRT120H1](#). Students who have completed [PRT120H1](#) should proceed to [PRT220Y1](#).

Students who have had previous experience in studying Portuguese may enrol in several intermediate and advanced courses, depending on their background and their level of preparation. Speakers with an intermediate level of Portuguese, including those who successfully completed [PRT100Y1](#) should enrol in [PRT220Y1](#).

Those students who have had exposure to spoken Portuguese in an informal context (i.e., those who live in a Portuguese-speaking environment; for instance, those who have grown up in a Portuguese-speaking country, or who live in Portuguese speaking families), but who have had little to no exposure to written Portuguese, should enrol in [PRT219H1](#). Students who qualify for this course are able to understand and speak Portuguese. They speak Portuguese relatively fluently, but they usually do not write or read Portuguese. After completing [PRT219H1](#), students should proceed to [PRT320Y1](#).

Students who have completed [PRT220Y1](#) should proceed to [PRT320Y1](#). Those students who come to the program with an advanced level of Portuguese as assessed by the department should also proceed to take [PRT320Y1](#) or [PRT420H1](#).

Following [PRT320Y1](#), students are qualified to enroll in [PRT420H1](#). This course is appropriate for students with a relatively high vocabulary base and good command of grammar and academic writing who need to increase their lexicon, and who need further formal instruction in grammar and writing.

Here are the sequence of language courses in Portuguese:

1. [PRT100Y1](#) > [PRT220Y1](#) > [PRT320Y1](#) > [PRT420H1](#)
2. [PRT219H1](#) > [PRT320Y1](#) > [PRT420H1](#)
3. [PRT120H1](#) > [PRT220Y1](#) > [PRT320Y1](#) > [PRT420H1](#)

[PRT423H1](#), a course for advanced speakers of Portuguese, trains students to develop their skills in a range of professional language fields, such as finances, law, medicine, and education.

Cognate courses:

- Portuguese Specialist: Up to 2.0 credits may be taken from cognate departmental or college offerings.
- Portuguese Major: Up to 1.0 credits may be taken from cognate departmental or college offerings.
- Portuguese Minor: Up to 1.0 cognate credit may be taken in Spanish.

GGR341H1; HIS291H1; HIS292H1; HIS390H1; HIS446H1; HIS390H5; JLN327H1; JLN427H1; JLP315H1; POL442H1; POL360H1; MUS305H1; LIN101H1, LIN102H1; NEW322H1; SPA* and LAS*

Students who are unsure of what is the most appropriate placement for them in the language sequence should contact the [Associate Chair, Undergraduate Studies](#) to receive personal assessment and recommendation for proper placement.

Fluent speakers of Portuguese who have received a high school or a higher level of education in the Portuguese language, and who in the department's assessment does not need further training in language, may enroll immediately in any linguistics, literature or culture course.

Literature, culture and linguistics courses:

Portuguese opens the door to a rich range of cultural expressions in literature, film, and art, from the world-changing contribution of Renaissance Portugal to the contemporary Brazilian and Luso-African diaspora. Whether it is Nobel-prize winning Portuguese literature or the excitement of the Brazilian cinema novo, Lusophone writers, filmmakers, and artists continue to shape and change contemporary global culture.

Portuguese also opens the door to the study of the Romance language family. The Department offers students the opportunity to advance their language skills through the systematic reflection on the language structure. Through a variety of courses with a theoretical and experimental focus in linguistics, students acquire basic skills that can be transferred to teaching or research programs. Through collaboration with other language and linguistics programs, students are provided with opportunities and training to conduct research in linguistics with a focus on the Portuguese language.

The Department encourages students to consider completing part of their course work at a university in Portugal or Brazil.

Students should contact the Undergraduate Coordinator early on in the course of their university career to receive advice on how to proceed with their studies and to thus assure that they can receive their degree by the time of planned graduation. For further information, please

contact us in the **Department of Spanish and Portuguese**, Victoria College, Room 208.

Faculty of Arts & Science Language Citation

The Department of Spanish and Portuguese participates in the Faculty of Arts and Science's Language Citation initiative for Portuguese.

To obtain a Language Citation in Portuguese, students will successfully complete the two language-sequence courses that follow the introductory level with a minimum of B- in each one of the courses to be considered.

For students with no previous knowledge of Portuguese, PRT220Y1 and PRT320Y1 are required.

Heritage speakers should complete PRT219H1 and three additional 0.5 credit courses in Portuguese at the 300 or 400-level.

Students should note that, as explained in the About Programs of Study section of this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

PRT219H1 - Academic Portuguese

Previous Course Number: PRT219Y1

Hours: 24L/12T

For students who have had exposure to spoken Portuguese in an informal context (living in a Portuguese speaking country, or in a Portuguese speaking family) but little to no exposure to written Portuguese. Besides reviewing English/Portuguese spelling differences, written and spoken registers of Portuguese, and basic aspects of the grammatical system, the course (1) provides students

with the essential understanding of Portuguese grammatical system; (2) builds their vocabulary; and (3) trains them to express themselves formally in both spoken and written Portuguese.

Prerequisite: Basic to relatively high ability to speak and understand Portuguese; limited or no formal education in Portuguese.

Exclusion: PRT100Y1, PRT120Y1, PRT120H1, PRT219Y1, PRT220Y1, PRT320Y1

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

PRT220Y1 - Intermediate Portuguese

Hours: 48L/24T

This course will bring together Portuguese grammar and language skills into a useful and practical framework, in order to develop students' skills to communicate in an accurate, effective, and informed manner within a variety of socio-cultural situations. Besides introducing new grammar topics corresponding to the intermediate level, it also includes a grammar review with extra work on vocabulary acquisition. Focuses on comprehension, development of a greater complexity in students' written and oral productions, and gaining a better understanding of Portuguese-speaking cultures.

Prerequisite: PRT100Y1/ PRT120Y1/ PRT120H1

Exclusion: PRT219Y1, PRT219H1, PRT110Y1, PRT320Y1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

PRT221H1 - Portuguese Pronunciation

Hours: 24L

Overview of Portuguese speech sounds (articulation and transcription). The course provides perception and pronunciation training of Portuguese vowels, consonants, stress, intonation, and co-articulation phenomena in connected speech. The main focus will be on European Portuguese and Brazilian Portuguese, but differences between these two and other Portuguese accents will be discussed as well.

Prerequisite: PRT100Y1

Introduction

Psychology is the branch of science that focuses on the behaviour of human beings and animals. Our courses span the various areas of psychology and introduce students to the methods used in psychological research. The basic tools of a research psychologist include experimentation in the laboratory and field, naturalistic observation, and the use of statistical methods in interpreting data.

Our faculty have highly diversified interests which are reflected in the number and variety of our undergraduate course offerings. These include courses in cognitive neuroscience, cognitive psychology, computational neuroscience, developmental psychology, human and animal learning, perception, personality psychology, physiological psychology, and social psychology.

For more information, please consult our website (<https://www.psych.utoronto.ca/>), or the Undergraduate Administrator in Sidney Smith Hall, Room 4014, by phone at (416) 978-3407 / (416) 578-4326 or via email (psy.undergrad@utoronto.ca).

Regarding Psychology Programs

Psychology programs at the St. George Campus are limited enrolment, which means there are a limited number of spaces to offer students. Please note that just meeting the minimum admission requirements does not guarantee one a spot in any of our programs and, in most cases, students will need to exceed them to be competitive because of the volume of applications in comparison to the number of program spaces available.

Entry into all Psychology programs requires Grade 12 Calculus and Grade 12 Biology (we will also accept these two courses taken at the college and university-level). Please note that these two requirements will not be waived.

Combined Degree Program (CDP) offered with Victoria College and Ontario Institute for Studies in Education (OISE)

- Combined Degree Program in HBA/HBSc and Master of Teaching (MT)

Students enrolled in the Minor in Education and Society and Major in Psychology may apply for this Combined Degree Program. For details about application and program requirements, see the [Combined Degree Programs section](#).

Psychology Programs

Psychology Research Specialist - Thesis (Science Program) - ASSPE1958

This program is designed for students who have demonstrated a particular interest and aptitude for research and who want to complete a thesis. Admission to the program is based on strong academic performance and expressed interest in research.

Enrolment Requirements:

This is a limited enrolment program. Students interested in the Psychology Research Specialist - Thesis typically apply and enrol after the end of second year, from the Psychology Major or Psychology Specialist (Non-thesis).

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on the number of applicants. Up to 15 students are admitted each year.

The following courses and requirements must be completed:

For students who have completed 9.0 credits or more:

- Gr. 12 Calculus
- Gr. 12 Biology
- PSY100H1 (80%)
- PSY201H1 (or ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1), and PSY202H1 (or ECO220Y1/ STA221H1/ SOC252H1), with a 75% minimum grade average.
- 2.0 PSY 200-level credits (not including statistics), from PSY210H1, PSY220H1, PSY230H1, PSY240H1, PSY260H1, PSY270H1, PSY280H1, PSY290H1, with a 78% minimum grade average

Special Requirement

- In addition to applying via ACORN, students must also send in a supplementary application directly to the department via the [Research Specialist Online Application](#).

To ensure that students admitted to the program will be successful, applicants with a grade average lower than those listed in required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Notes:

- Interested students should ideally apply for a PSY Major or Specialist (Non-thesis) at the end of their first year. Prior research experience is desired, but not a firm requirement for admission to the program.
- All students accepted into or considering the Research Specialist program should enrol into a 300-level PSY lab course in Year 3.

Completion Requirements:

(10.0 credits):

1. First Year: PSY100H1
2. Statistics: PSY201H1 (or one of ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1) **and** PSY202H1 (or one of ECO220Y1/ STA221H1/ SOC252H1)
3. 1.0 credit (from Cluster A) PSY210H1, PSY220H1, PSY230H1, PSY240H1
4. 1.0 credit (from Cluster B) PSY260H1, PSY270H1, PSY280H1, PSY290H1 (**NOTE:** HMB200H1 or PSL300H1 cannot be used in place of PSY290H1)
5. 0.5 credit in PSY at the 300/400-level from Group 1 in Cluster A
6. 0.5 credit in PSY at the 300/400-level from Group 1 in Cluster B

7. 1.0 credit in PSY at the 300/400-level from Group 1 (any of Clusters A, B, and C)
8. One lab course (0.5 credit), and no more, taken from the following: PSY319H1, PSY329H1, PSY339H1, PSY349H1, PSY359H1, PSY369H1, PSY379H1, PSY389H1
9. PSY309H1
10. PSY409H1
11. PSY400Y1
12. 2.0 credits from Group 1 (Clusters A, B, and C) and/or Group 2, at any level

Psychology Specialist (Science Program) - ASSPE1160

You should consider pursuing the Specialist Program in Psychology if you want a greater concentration in Psychology than provided by the Major Program. Please note that having a Specialist is not required in order to be admitted to a graduate program in Psychology later on.

Enrolment Requirements:

This is a limited enrolment program. Note there are different options depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

Variable Minimum Grade or Minimum Grade Average

A minimum final grade or grade average in required courses is needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

For students who have completed 4.0 to 8.5 credits:

- PSY100H1 (80%) (**AP and IB Psychology are not accepted**)
- Gr. 12 Calculus
- Gr. 12 Biology

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 80% in required courses will not be considered for admission.

Please note that obtaining this minimum final grade does not guarantee admission to the program.

For students who have completed 9.0 or more credits:

- PSY100H1 (**AP and IB Psychology are not accepted**)
- Gr. 12 Calculus
- Gr. 12 Biology
- PSY201H1 (or ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1), and PSY202H1 (or ECO220Y1/ STA221H1/ SOC252H1), 1.0 credits in PSY from PSY210H1, PSY220H1, PSY230H1, PSY240H1, PSY260H1, PSY270H1, PSY280H1, PSY290H1, and a grade average of 75% across all four courses. If more than 1.0 200-level PSY credits have been completed, the two with the highest grades will be used.

To ensure that students admitted to the program will be successful, applicants with a minimum grade average lower than 75% in required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Note:

In past admission cycles, the average grade cut-off for the Specialist program ranged from approximately 80-83%.

Completion Requirements:

(10.0 credits):

1. First Year: PSY100H1
2. Statistics: PSY201H1 (or one of ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1) **and** PSY202H1 (or one of ECO220Y1/ STA221H1/ SOC252H1)
3. 1.0 credit (from Cluster A) PSY210H1, PSY220H1, PSY230H1, PSY240H1
4. 1.0 credit (from Cluster B) PSY260H1, PSY270H1, PSY280H1, PSY290H1 (**NOTE:** HMB200H1 or PSL300H1 cannot be used in place of PSY290H1)
5. 0.5 credit in PSY at the 300/400-level from Group 1 in Cluster A
6. 0.5 credit in PSY at the 300/400-level from Group 1 in Cluster B
7. 1.5 credits in PSY at the 300/400-level from Group 1 (any of Clusters A, B, and C)
8. One lab course (0.5 credit), and no more, taken from the following: PSY319H1, PSY329H1, PSY339H1, PSY349H1, PSY359H1, PSY369H1, PSY379H1, PSY389H1
9. Two seminar courses (1.0 credit), and no more, taken from the following: JLP471H1, PSY402H1/ PSY403H1/ PSY404H1, PSY410H1, PSY420H1, PSY430H1, PSY440H1, PSY460H1, PSY470H1, PSY471H1, PSY480H1, PSY490H1, PSY497H1

10. 2.5 credits from Group 1 (Clusters A, B, and C) and/or Group 2, at any level

(Please note that these are all individual requirements and cannot overlap or be used twice).

Psychology of Economics and Management Certificate - ASCER1160

The Certificate in Psychology of Economics and Management explores the interdisciplinary connections between social psychology, economics, and business, covering the role of motivation, culture and leadership in organizations. This Certificate is not open to students pursuing a Psychology Specialist, Major, or Minor.

Enrolment Requirements:

This is a limited enrolment Certificate. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- PSY100H1 (70%)
- RSM100H1 (63%)/ MGT100H1 (63%)/ ECO101H1 (63%)

Special Requirement

- This Certificate is open to students not enrolled in a Psychology Specialist, Major, or Minor.

Completion Requirements:

(3.0 credits)

In first year or higher (1.0 credit):

- PSY100H1 (grade of 70%)
- RSM100H1/ MGT100H1/ ECO101H1 (grade of 63%)

In second year and higher (2.0 credits):

- PSY220H1
- PSY332H1/ RSM260H1/ IRE260H1
- 1.0 credit from: PSY326H1, PSY321H1, PSY336H1, PSY322H1

Regarding Psychology Courses

We encourage students at all levels, and particularly those who are beginning a program in Psychology, to consult the undergraduate section of the Psychology website (<https://www.psych.utoronto.ca/undergraduate>) before selecting courses and to discuss their proposed programs with the Undergraduate Administrator.

Courses in the various areas within Psychology and the numbering system associated with these courses follow a specific pattern: PSYXXX. The first digit represents the year, and the second digit represents the area in which the course belongs. Social Psychology, for example, is identified by "2." Therefore, PSY220 at the second year, PSY320, 321, 322, etc. at the third year, and PSY420, 421, 424, etc. at the fourth year represent the Social Psychology courses. Other areas within Psychology follow a similar pattern, with their own identifying number in the middle.

Please note that the Department of Psychology will not waive course prerequisites under any circumstances and that Psychology courses do not have *co-requisites*. Students will need to have prerequisites completed BEFORE taking a course.

200-Level Courses

Students registered in a St. George campus PSY program will be given priority to enrol in all PSY courses above the 100-level. Please see the online Arts & Science Registration Instructions and Timetable for more details on enrolment controls. PSY100H1 is required in order to take all 200-level PSY courses, with the exception of PSY202H1 which requires PSY201H1.

300-Level Courses

Almost all 300/400-level lecture courses require PSY201H1 (Statistics I), or its equivalent/exclusion, as one of their prerequisites. This will **not** be waived. Students *must* complete the statistics requirement before taking any 300- or 400-level PSY lecture courses. Similarly, 300-level lab and 400-level seminar courses require PSY202H1 (Statistics II) or its equivalent/exclusion.

400-Level Courses

The 400-level courses comprise of lecture courses, seminars, individual projects, and the thesis course for Research Specialists.

Psychology Courses

PSY100H1 - Introductory Psychology

Hours: 36L

A brief introductory survey of psychology as both a biological and social science. Topics will include physiological, learning, perceptual, motivational, cognitive, developmental, personality, abnormal, and social psychology.

Exclusion: PSY100Y5/ PSYA01Y3/(PSYA01H3 + PSYA02H3)

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY194H1 - The Psychology of Student Success

Hours: 24S

University life presents students with all sorts of challenges as well as amazing opportunities for learning and growth. While there are many different ways to define a “successful student”, the goal of this seminar is for everyone to develop the knowledge, skills, and mindset needed to make the most of out of the university experience. Students will discover what research in psychological science has to say about facing and overcoming common academic, intrapersonal, and interpersonal challenges, as we cover topics including deliberate practice, imposter syndrome, and belongingness. Students will also learn evidence-based strategies for better managing their attention, energy, and emotions so that they may thrive (rather than just survive) in university. In addition to learning about psychology, students will develop useful skills in scientific literacy, critical thinking, self-reflection, written and oral communication, and teamwork. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY195H1 - The Science of Babies and Children

Hours: 24S

This course will use an interdisciplinary perspective to explore how the infant mind emerges and grows. Topics could include how brain plasticity influences “critical” or “sensitive” periods for learning, or how studying infants’ perception, cognition and behaviour can offer us critical insights into long-standing philosophical questions. Note that specific content will depend on the instructor and will be posted on the Department of Psychology’s Undergraduate Course Information webpage. During the course, students will (1) engage in lively discussion and present their perspectives; (2) use exploratory writing to develop arguments and their understanding of subject matter; and (3) begin to read and summarize scientific research papers in Developmental Psychology. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY197H1 - Rethinking the Human Mind

Hours: 24S

This course will use an interdisciplinary perspective to explore the quirks, achievements, and puzzles of the human mind. Topics could include how technology and tools extend our minds, or the light that our ability (and inability) to reason sheds on human nature. Note that specific content will depend on the instructor and will be posted on the Department of Psychology’s Undergraduate Course Information webpage. During the course, students will: (1) engage in lively discussion and present their perspectives; and (2) use exploratory writing to develop arguments and their understanding of the subject matter. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY198H1 - The Psychology of Magic

Hours: 24S

Magicians entertain us with their tricks. What appears as “Magic” is based on fundamental aspects of human psychology: visual and auditory perception, decision making, logic, memory, and verbal abilities. In this class, we will consider and discuss the psychological basis of magic tricks and use magic to explore aspects of psychology. The class will require reading of scientific articles and book chapters as well as watching and analyzing magical tricks. The only prerequisite is a curious and critical mind. The course puts great emphasis on

writing and on starting to read primary scientific literature. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY199H1 - Psychology and History of Drug Use

Hours: 24S

This seminar will examine the historical and contemporary use of drugs. Students will be introduced to the general psychological and neuroscientific mechanisms by which drugs affect human behavior, and explore highlights of current research on drug effects in animals and humans. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY201H1 - Statistics I

Hours: 36L

Fundamentals of descriptive and inferential statistics, including population and sampling distributions, simple association, probability, estimation, and hypothesis testing.

Prerequisite: PSY100H1/ PSY100Y5/(PSYA01H3 + PSYA02H3)

Exclusion: ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3/ STAB57H3

Recommended Preparation: Grade 12 Calculus

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

Mode of Delivery: In Class

PSY202H1 - Statistics II

Hours: 36L

Fundamentals of statistical analysis of experimental and observational data including linear models, the analysis of

variance, a priori contrasts, post-hoc tests, power analysis and effect size calculations.

Prerequisite: PSY201H1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3

Exclusion: ECO220Y1/ SOC252H1/ STA221H1/ PSY202H5/ STA221H5/ PSYC08H3/ STAB27H3/ STAC32H3

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

Mode of Delivery: In Class

PSY203H1 - Psychological Research

Hours: 36P

This course provides an introduction to conceiving, designing, and conducting research in psychology. It prepares students to be both consumers and producers of scientific research, and also addresses basic issues related to the work of psychological scientists such as theory development, research ethics, and scientific writing. Students in this course will gain insight into the scientific process as a whole – its advantages, difficulties, and limitations. As such, students will be able to better evaluate the knowledge that psychological science can provide, and integrate that knowledge into a broader worldview.

Prerequisite: PSY100H1/ PSY100Y5/(PSYA01H3 + PSYA02H3)

Corequisite: PSY201H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3

Exclusion: PSYB70H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY204H1 - Psychology Careers and Applications

Hours: 36L

Psychology has been identified as a hub science, a discipline whose research influences the work of scientists in many other fields. This course will provide students with a broad introduction to the application of the psychological sciences across various clinical, academic, and industry contexts. Students will gain valuable insight into the broad range of careers that are relevant to psychology, while

also investigating barriers to rigorous application of psychological science in applied settings. Students will also learn how the skills and knowledge gained in an undergraduate psychology program can be applied to a broad range of careers and fields/sectors. Students will gain significant exposure to career and education planning considerations within the psychological sciences and will participate in at least one experiential career exploration activity.

Prerequisite: PSY100H1/ PSY100Y5/ (PSYA01H3 + PSYA02H3)

Recommended Preparation: 0.5 PSY credit at the 200-level

Distribution Requirements: Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

PSY210H1 - Introduction to Developmental Psychology

Hours: 36L

The developmental approach to the study of behaviour with reference to sensorimotor skills, cognition, socialization, personality, and emotional behaviour.

Prerequisite: PSY100H1/ PSY100Y5/ PSYA02H3/ COG250Y1

Exclusion: PSY210H5/ PSYB20H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY220H1 - Introduction to Social Psychology

Hours: 36L

Contemporary areas of research in social psychology: social perception, attitudes, inter-personal relations, and group processes.

Prerequisite: PSY100H1/ PSY100Y5/ PSYA02H3/ COG250Y1

Exclusion: PSY220H5/ PSYB10H3/ SOC213H1

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY230H1 - Personality and Its Transformations

Hours: 36L

Theory and research in personality structure and dynamics: the interaction of cultural and biological factors in the development and expression of individual differences.

Prerequisite: PSY100H1/ PSY100Y5/ PSYA02H3

Exclusion: PSY230H5/ PSYB30H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY240H1 - Introduction to Abnormal Psychology

Hours: 36L

A critical survey of concepts, theories, and the state of research in the area of psychopathology and therapeutic methods.

Prerequisite: PSY100H1/ PSY100Y5/ PSYA02H3

Exclusion: PSY240H5/ PSYB32H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY260H1 - Introduction to Learning and Plasticity

Hours: 36L

Concepts, theories, and applications of classical and contemporary learning theories, including classical and operant conditioning. Current theories of the physiological and anatomical basis of learning and memory, including synaptic plasticity, the role of the hippocampus, amygdala, frontal cortex and other brain regions. Theories will be related to a practical understanding and applications such as drug addiction, phobias and other disorders.

Prerequisite: PSY100H1/ PSY100Y5/ PSYA01H3/ COG250Y1

Exclusion: PSYB38H3

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSY270H1 - Introduction to Cognitive Psychology

Hours: 36L

An introduction to research and theory on the neural and cognitive architecture of attention, memory, language, thinking and reasoning.

Prerequisite: PSY100H1/ PSY100Y5/ PSYA01H3/ COG250Y1

Exclusion: PSY270H5/ PSYB57H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY280H1 - Introduction to Sensation and Perception

Hours: 36L

An introduction to the physiological and psychological basis of perception across the different sensory modalities in humans and lower animals, with an emphasis on vision. Exploring visual perception such as shape and objects, scenes, colour, space, and motion as well as auditory perception of simple and complex sounds, and location. Further topics may include touch, including perception of temperature, pain and body posture, the chemical senses, and cross-modal influences of the senses on one another. In-class demonstrations may supplement the lectures.

Prerequisite: PSY100H1/ PSY100Y5/ PSYA01H3/ COG250Y1

Exclusion: PSY280H5/ PSYB51H3

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSY290H1 - Behavioural Neuroscience

Hours: 36L

Provides students with a solid background in the biological basis of behaviour. Animal and human research topics will include functional neuroanatomy and neural signalling. Further topics may include sensory and motor control, motivational systems, hormones, and emotions, among other topics.

Prerequisite: PSY100H1/ PSY100Y5/ PSYA01H3

Exclusion: HMB200H1/ PSL300H1/ PSY290H5/ PSYB64H3

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSY299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

Distribution Requirements: Science

Mode of Delivery: In Class

PSY299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

Distribution Requirements: Science

Mode of Delivery: In Class

PSY305H1 - The Treatment of Psychological Data

Hours: 36L

This course provides a practical yet intensive introduction to the research pipeline, with a focus on research data management and advanced statistical analysis and inference. Students learn how to find, organize, and analyze data sets in a transparent and reproducible way. Students also learn more about statistical inference, focusing on how the design and analysis of data shape the interpretation of results.

Prerequisite: PSY202H1/ ECO220Y1/ SOC252H1/ STA221H1/ PSY202H5/ STA221H5/ PSYC08H3/ STAB27H3/ STAC32H3

Exclusion: EEB313H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

Mode of Delivery: In Class

PSY306Y0 - Special Topics in Psychology Abroad

Hours: 48L

Special Topics in Psychology for the **Summer Abroad Program**. Course topics, content, and instructor may vary from one year to another. More information about Psychology course offerings can be obtained from the Professional & International Programs office at Woodsworth College. For students in any Psychology and/or Social Science major or specialist.

Prerequisite: Completion of 8.0 credits

Distribution Requirements: Science

Mode of Delivery: In Class

PSY307H1 - Special Topics in Psychology

Hours: 36L

A lecture course providing in-depth examination of specific topics/themes relating to Psychology. Content in any given year depends on instructor. Priority is given to PSY Major program students during the first enrolment period.

Prerequisite: PSY100H1/ PSY100Y5/(PSYA01H3 + PSYA02H3), and PSY201H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3/ STAB57H3, and 0.5 PSY credit at the 200-level

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY308H1 - Special Topics in Psychology

Hours: 36L

A lecture course providing in-depth examination of specific topics/themes relating to Psychology. Content in any given year depends on instructor. Priority is given to PSY Major program students during the first enrolment period.

Prerequisite: PSY100H1/ PSY100Y5/(PSYA01H3 + PSYA02H3), and PSY201H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3/ STAB57H3, and 0.5 PSY credit at the 200-level

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY309H1 - Research Specialization: Practicum

Hours: 36P

Research Specialists learn about the research opportunities within our department, and develop skills in the areas of critical thinking, writing, and oral presentation. Students also conduct a pre-thesis research project under the supervision of a faculty member. Students should complete a PSY lab course (PSY3*9H1) prior to taking this course; however, taking the lab course concurrently will be considered in consultation with the instructor. Enrolment is restricted to PSY Research Specialists.

Prerequisite: PSY202H1/ ECO220Y1/ SOC252H1/ STA221H1/ PSY202H5/ STA221H5/ PSYC08H3/ STAB27H3/ STAC32H3

Corequisite: PSY319H1/ PSY329H1/ PSY339H1/ PSY349H1/ PSY359H1/ PSY369H1/ PSY379H1/ PSY389H1

Exclusion: PSY309H5

Distribution Requirements: Science

Mode of Delivery: In Class

PSY311H1 - Social Development

Hours: 36L

Theory and research in social attachment, aggression, morality, imitation and identification, altruism, and parental discipline, with discussion of methodological issues.

Prerequisite: PSY201H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3/ STAB57H3, and PSY210H1/ PSY210H5/ PSYB20H3

Exclusion: PSY311H5/ PSYC21H3/ PSYC27H3/ PSYD22H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY312H1 - Cognitive Development

Hours: 36L

Examines the developmental of knowledge in fundamental domains such as spatial perception, navigation, object perception, number, language, and theory of mind. Emphasis is on current experimental findings and how they address centuries-old debates surrounding the origin and nature of human knowledge.

Prerequisite: PSY201H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3/ STAB57H3, and PSY210H1/ PSY210H5/ PSYB20H3, and PSY270H1/ PSY270H5/ PSYB57H3/ COG250Y1

Exclusion: PSY312H5

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY313H1 - Psychology of Aging

Hours: 36L

Age changes in sensory and perceptual processes, motor skill, learning, memory, and personality. Theory, methodological problems, social, cultural, and environmental influences that shape behaviour and attitudes towards and among the elderly.

Prerequisite: PSY201H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3/ STAB57H3, and PSY210H1/ PSY210H5/ PSYB20H3

Exclusion: PSY313H5/ PSYC21H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

JLP315H1 - Language Acquisition

Hours: 36L

Infants' abilities at birth, prelinguistic development, the first words, phonological, syntactic and semantic development. Social variables influencing language acquisition, bilingualism, models of development, language play. (Sponsored by the Departments of Linguistics and Psychology, but administered solely by the Dept. of Linguistics).

Prerequisite: 1.0 credit at the 200+ level in LIN/JAL/JUP/PSL/PSY/COG

Exclusion: PSY315H5, PLIC24H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY316H1 - Perceptual Development

Hours: 36L

The course examines human perceptual development during the first 2-3 years of life. Vision and audition are emphasized. Some topics are: pattern and colour vision, depth perception, infant speech perception.

Prerequisite: PSY201H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3/ STAB57H3, and PSY280H1/ PSY280H5/ PSYB51H3

Exclusion: PSY316H5/ PSYC22H3

Recommended Preparation: PSY210H1/ PSY210H5/ PSYB20H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY319H1 - Developmental Laboratory

Hours: 36P

Provides an overview of developmental psychology methods. The class conducts an original research project, including design, data collection, data analysis, and a written report. Course capacity is limited to 15 students and priority is given to PSY Specialists and Research Specialists during the first enrolment period.

PSY321H1 - Cross-Cultural Psychology

Hours: 36L

One of the hallmarks of human behaviour is its diversity. Some of the ways in which we differ are thought to be relatively idiosyncratic (e.g., specific aspects of personality), whereas others are fairly systematic. Cultural psychology is one area of research in human behaviour that examines systematic differences resulting from individuals' cultural backgrounds. This course will introduce you to the consideration of cultural variation in the study of human thought and behaviour.

Prerequisite: PSY201H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3/ STAB57H3, and PSY220H1/ PSY220H5/ PSYB10H3/ SOC213H1

PSY324H1 - Moral Thought and Behaviour

Hours: 36L

Moral values vary considerably across individuals, groups, countries, and cultures. What explains the emergence of these differential moral systems? What psychological processes are involved in moral decisions and actions? How might insights from psychological research shed light on contemporary, 'hot-button' moral issues? How are moral decisions similar to – and different from – other types of everyday decisions? What is the role of emotion in moral decision making? As an introduction to the field of moral psychology, this 300-level course will cover research from a range of sub-disciplines within psychology including social-personality psychology, cognitive neuroscience, and developmental psychology. In addition, students will gain exposure to related material in other fields including philosophy, ethology, and economics. Students will gain a firm understanding of the key debates and issues in the study of the moral mind and will gain skills in critical thinking and writing.

PSY360H1 - Associative Learning

Hours: 36L

Learning allows our experiences to shape what we know, what we can do and how we interact with our environments. This course addresses the fundamental concepts and more important research findings related to contemporary theories of associative learning in animals and humans. It examines the application of such fundamental research to issues such as the neural substrates of behaviour, drug use, and anxiety disorders. It is designed to foster skills in critical thinking, experimental design and reading primary sources in this area.

PSY402H1 - Psychology Seminar

Hours: 24S

Undergraduate students who are given permission to take a seminar at the *graduate* level offered through the Dept. of Psychology's Graduate Program will be enrolled into this course code. Permission to take a graduate seminar for undergraduate credit must be obtained through three channels. First, the instructor of the grad course must give the student permission. It is ultimately up to instructor to decide whether the course is appropriate for undergraduate students, as well as if the specific student has the appropriate academic background to succeed in the course. Accordingly, the student may be asked to provide details about their relevant academic and/or research experience to assess their qualifications. Second, the Graduate Administrator (psy.graduate@utoronto.ca) must confirm if there is space in the course after graduate students have enrolled. Finally, the Undergraduate Administrator (psy.undergrad@utoronto.ca) must receive an email from the Graduate Administrator confirming that the student has permission to enrol. The following information must be included in the email: Student name, student number, graduate course code and term (F or S), and the course subtitle. The student will then be enrolled into this undergraduate course code by the Department. It is the student's responsibility to contact the graduate instructor to initiate this process and to follow-up with both the Graduate and Undergraduate Administrators to ensure their enrolment.

PSY425H1 - Self and Identity

Hours: 36L

The distinguishing feature of human consciousness is *self-consciousness* -- our ability to be aware of and interpret ourselves and our experiences. All our higher capabilities as a species rest upon this foundation. Self-consciousness allows us to develop an understanding of who we are as individuals and in relation to others. This lecture course brings together ideas and perspectives from across the social sciences to explore the nature of self-consciousness. The institutional relations and cultural practices that give shape to contemporary forms of identity and self-experience are also examined.

Prerequisite: PSY201H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3/ STAB57H3, and PSY220H1/ PSY220H5/ PSYB10H3/ SOC213H1

PSY427H1 - Media Psychology

Hours: 36L

This course in *critical media literacy* examines how we come to understand ourselves and our world, and learn to feel, evaluate, and act, through the simulative mediation of information and communication technologies. The aim is to provide students with a deeper understanding of the dynamic symbolic environment that surrounds them and in which they participate as both audience and producer. The approach is multidisciplinary, drawing not only from psychology but a broad range of influential perspectives in the social sciences and humanities. The topics explored reveal how developments in the world of media are central to understanding changing forms of public and private life in the 21st century.

Prerequisite: PSY201H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3/ STAB57H3, and PSY220H1/ PSY220H5/ PSYB10H3/ SOC213H1

PSY435H1 - Environmental Psychology

Hours: 36L

This lecture course explores how psychologists can contribute to finding solutions to today's pressing environmental challenges. Topics include persuasion, community-based social marketing, social influence, social capital, and the many ways in which the physical environment affects psychological processes. The course takes a multi-scalar approach to the human-environment

relationship, covering individual, community, cultural and global levels of scale, through the lens of complex dynamic systems theories.

Prerequisite: PSY100H1/ PSY100Y5/ (PSYA01H3 + PSYA02H3), and PSY220H1/ PSY220H5/ PSYB10H3/ SOC213H1, OR registered in any one of ASMAJ0365, ASSPE0365, ASMAJ1107, ASMIN1254, ASMAJ1254, ASMIN1551 Subject POSTs

Recommended Preparation: PSY201H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3/ STAB57H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY440H1 - Abnormal Psychology Seminar

Hours: 24S

Examination in depth of a limited topic within abnormal psychology. Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

Prerequisite: PSY202H1/ ECO220Y1/ SOC252H1/ STA221H1/ PSY202H5/ STA221H5/ PSYC08H3/ STAB27H3/ STAC32H3, and PSY230H1/ PSY230H5/ PSYB30H3 or PSY240H1/ PSY240H5/ PSYB32H3

Exclusion: PSY440H5/ PSYD33H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY450H1 - History of Psychology

Hours: 36L

This lecture course discusses the philosophical predecessors and early development of modern psychology, schools of thought, and shifts in areas of theory and research, as well as history and philosophy of science, in general.

Prerequisite: 1.0 PSY credit at the 200-level

Exclusion: PSYC85H3

Distribution Requirements: Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

PSY455H1 - Psychological Research Now and Then

Hours: 36L

This course delves into some of the most influential experiments across psychology subfields by discussing how they were conceived, designed, and conducted. Students will learn how these classic findings shaped theory, how to reinterpret them with the benefit of the current knowledge in the field, as well as how and if their experimental designs can be modified to meet current scientific standards and address still open questions. Students will leave this course equipped to be both critical consumers and producers of scientific research. This course will combine lectures with student presentations.

Prerequisite: (PSY202H1/ ECO220Y1/ SOC252H1/ STA221H1/ PSY202H5/ STA221H5/ PSYC08H3/ STAB27H3/ STAC32H3) and (PSY203H1/ PSYB70H3)

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY460H1 - Seminar in Learning

Hours: 24S

Examination in depth of a limited topic in human or animal learning. Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

Prerequisite: PSY202H1/ ECO220Y1/ SOC252H1/ STA221H1/ PSY202H5/ STA221H5/ PSYC08H3/ STAB27H3/ STAC32H3, and PSY260H1/ PSYB38H3

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSY470H1 - Seminar in Human Memory

Hours: 24S

Examination in depth of a limited topic within the area of memory. Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

Prerequisite: PSY202H1/ ECO220Y1/ SOC252H1/ STA221H1/ PSY202H5/ STA221H5/ PSYC08H3/ STAB27H3/ STAC32H3, and PSY270H1/ PSY270H5/

PSYB57H3/ COG250Y1

Exclusion: PSYD50H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY471H1 - Seminar in Cognition

Hours: 24S

An in-depth examination of current research and selected topics in cognitive psychology. Content in any given year depends on the instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists. There may be additional prerequisites based on the seminar topic given.

Prerequisite: PSY202H1/ ECO220Y1/ SOC252H1/ STA221H1/ PSY202H5/ STA221H5/ PSYC08H3/ STAB27H3/ STAC32H3, and PSY270H1/ PSY270H5/ PSYB57H3/ COG250Y1

Exclusion: PSY471H5/ PSYD50H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

JLP471H1 - Advanced Psycholinguistics

Hours: 24S

Seminar in advanced topics in psycholinguistics. Content varies from year to year. (Sponsored by the Departments of Linguistics and Psychology, but administered solely by the Dept. of Linguistics).

Prerequisite: JLP374H1

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY473H1 - Social Cognitive Neuroscience

Hours: 36L

Social cognitive neuroscience is an emerging interdisciplinary field that seeks to integrate theories of social psychology and cognitive neuroscience to understand behaviour at three fundamentally interrelated levels of analysis (social, cognitive, and neural). Topics such as self-regulation, cooperation, decision-making,

emotion, morality, and prejudice will be examined in this lecture course.

Prerequisite: PSY201H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3/ STAB57H3, and PSY270H1/ PSY270H5/ PSYB57H3/ COG250Y1 or PSY290H1/ PSY290H5/ PSYB64H3/ HMB200H1/ PSL300H1

Exclusion: PSY353H5/ PSYD17H3

Recommended Preparation: PSY220H1/ PSY220H5/ PSYB10H3/ SOC213H1, PSY326H1

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY474H1 - Computation in Psychology

Hours: 36L

This lecture course surveys computational perspectives on the mind and brain and introduces computational tools for connecting psychological and neural data to theory. Topics may include neural networks, probabilistic models, pattern recognition, and other techniques applicable to psychological research and general analysis. Basic familiarity with programming is recommended but not required.

Prerequisite: PSY202H1/ ECO220Y1/ SOC252H1/ STA221H1/ PSY202H5/ STA221H5/ PSYC08H3/ STAB27H3/ STAC32H3

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

Mode of Delivery: In Class

PSY475H1 - Attention and Performance

Hours: 36L

This lecture course discusses a range of topics in visual cognition and human performance. Topics covered may include attention, working memory, spatial cognition, the processing of features and objects, and cognitive motor control in eye and limb movements.

Prerequisite: PSY201H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3/ STAB57H3, and PSY270H1/ PSY270H5/ PSYB57H3/ COG250Y1 or PSY280H1/ PSY280H5/ PSYB51H3

Exclusion: PSYC52H3

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY480H1 - Seminar in Perception

Hours: 24S

An in-depth examination of current issues in perception (e.g. perceptual organization, object and face recognition, motion perception). Emphasis is on the psychological perspective, but integrates physiological and computational perspectives as well. Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

Prerequisite: PSY202H1/ ECO220Y1/ SOC252H1/ STA221H1/ PSY202H5/ STA221H5/ PSYC08H3/ STAB27H3/ STAC32H3, and PSY280H1/ PSY280H5/ PSYB51H3

Exclusion: PSY480H5/ PSYD51H3

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSY490H1 - Seminar in Behavioural Neuroscience

Hours: 24S

An in-depth examination of current issues in behavioural neuroscience (e.g. activity of neurons, sensory, motor, motivational, and higher cortical systems.). Content in any given year depends on instructor. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

Prerequisite: PSY202H1/ ECO220Y1/ SOC252H1/ STA221H1/ PSY202H5/ STA221H5/ PSYC08H3/ STAB27H3/ STAC32H3, and PSY290H1/ PSY290H5/ PSYB64H3/ HMB200H1/ PSL300H1

Exclusion: PSY490H5/ PSYD66H3

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSY492H1 - Neurobiology of Learning and Memory

Hours: 36L

Understanding the complexities of how the mammalian nervous system acquires and stores information and how it transforms this information into appropriate behavior is fundamentally important to our understanding of both animal and human behavior. This lecture course explores empirical and theoretical contributions to our understanding of the neural basis of learning and memory.

Prerequisite: PSY201H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3/ STAB57H3, and PSY260H1/ PSYB38H3 or PSY290H1/ PSY290H5/ PSYB64H3/ HMB200H1/ PSL300H1

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSY493H1 - Cognitive Neuroscience

Hours: 36L

This is a capstone lecture course surveying research on how the mind arises from the brain. The first objective of the course is to understand how processes in human brains (ranging from the firing of a single neuron to the dynamics of billions) support cognitive abilities (such as recognizing a face, remembering a birthday from childhood, understanding the words in a spoken lecture, or planning a route home from class). The second objective of the course is to understand the methods of contemporary cognitive neuroscience research, to enable students to read primary literature and to understand ongoing debates.

Prerequisite: PSY201H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3/ STAB57H3, and PSY260H1/ PSYB38H3 or PSY270H1/ PSY270H5/ PSYB57H3/ COG250Y1 or PSY290H1/ PSY290H5/ PSYB64H3/ HMB200H1/ PSL300H1

Exclusion: PSYB55H3

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Mode of Delivery: In Class

PSY494H1 - Physiology and Psychology of Emotion

Hours: 36L

This lecture course discusses the role of brain and body in the expression and experience of emotion in humans considered through the experimental, physiological, theoretical, and clinical literatures.

Prerequisite: PSY201H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3/ STAB57H3, and PSY260H1/ PSYB38H3 or PSY270H1/ PSY270H5/ PSYB57H3/ COG250Y1 or PSY290H1/ PSY290H5/ PSYB64H3/ HMB200H1/ PSL300H1

Mode of Delivery: In Class

PSY495H1 - Sex and the Brain

Hours: 36L

This lecture course explores the scientific literature underlying the concept that female/male, gay/straight, and transgendered behaviours are based on brain differences. Original scientific papers will be read in close detail for design and interpretation of the experiments. The goal is to gain an understanding of the science and psychology underlying sex/gender, popular conceptions of sex, and the sexual brain. Topics include: the making of sex, hormone action, brain-based sexual behaviours, sex and cognition, and sex and sexuality/gender identification.

Prerequisite: PSY201H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3/ STAB57H3, and PSY290H1/ PSY290H5/ PSYB64H3/ HMB200H1/ PSL300H1

Exclusion: PSY354H5/ PSY395H5

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

PSY496H1 - Cognitive Dysfunction in Neurological Disorders

Hours: 36L

This lecture course provides an in-depth examination of the cognitive dysfunction found in neurological disorders, including Alzheimer's Disease, Parkinson's Disease, and Schizophrenia. The course focuses on how cognitive impairments relate to neuropsychological models of the specific disease (specifically how these models provide

insights into the biological mechanisms underlying the cognitive symptoms) and cognition, more broadly.

Prerequisite: PSY201H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3/ STAB57H3, and PSY270H1/ PSY270H5/ PSYB57H3/ COG250Y1 or PSY290H1/ PSY290H5/ PSYB64H3/ HMB200H1/ PSL300H1

PSY497H1 - Seminar in Biological Timing

Hours: 24S

This is an advanced seminar course that examines the mechanisms and significance of timing and timekeeping at several levels of organization in living organisms. Topics include the roles of clocks and oscillations in physiology and behaviour, and the importance of timing in sensorimotor integration, memory, decision making, and health. Course capacity is limited to 20 students and enrolment priority is given to PSY Specialists and Research Specialists.

Prerequisite: PSY202H1/ ECO220Y1/ SOC252H1/ STA221H1/ PSY202H5/ STA221H5/ PSYC08H3/ STAB27H3/ STAC32H3, and PSY290H1/ PSY290H5/ PSYB64H3/ HMB200H1/ PSL300H1

Public Health Sciences

Offered by the Dalla Lana School of Public Health

Introduction

Public health is the science and art of preventing disease and promoting health through organized population-based efforts. The focus of public health is to prevent rather than treat disease and to positively affect determinants of health through a wide range of strategies, including the surveillance and assessment of population health and the promotion of healthy behaviours, healthy environments and healthy public policies. In addition to these activities, the identification and treatment of those with disease may be vital to preventing it in others, such as during an outbreak of an infectious disease. Hand washing, vaccination programs, the inspection of restaurants, laws banning smoking in public places and tax credits for childhood physical activity programs are examples of public health measures. Public health includes sub-disciplines such as epidemiology, biostatistics, occupational and environmental health, public health policy, and social and behavioural health sciences.

Public Health Sciences Courses

PHS100H1 - Discovering Global Health

Hours: 24L/24T

This course introduces students to basic public health-related concepts, significant aspects of the historical development of global health, and a selection of topics illustrating the broad and evolving nature of this field. In addition, it helps students explore the contributions that various disciplines/fields offer to global health.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

HST211H1 - Health Policy in Canada

Hours: 24L

Introduces students to health policy in Canada, with a particular focus on the social determinants of health, and on how to improve health through policy advocacy. Examines the policy making process in the Canadian context, and the development of health policy in Canada. Explores current debates about health issues.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

PHS300H1 - HIV Prevention Research

Hours: 24L

This course examines HIV prevention research across the full spectrum of sciences concerned with prevention of HIV and sexual health, including basic science, clinical science, epidemiology, behavioural science, social

science, and legal, policy, economic analysis, and cultural theory. Examples are borrowed from efforts across the globe.

The course highlights prevention research related to key populations at risk of HIV infection and transmission. The course focuses on challenges and issues, with the goal of stimulating critical thinking and engagement with topics. Some material will be presented by Guest Lecturers who are experts in the areas, allowing students to learn from and interact with these experts and to hear about their current research as well as their career paths.

It is expected that at the end of this course students will have an advanced appreciation of the history and future and underlying values and ethics of effective HIV prevention research, including future possibilities and challenges. One ancillary aim is to encourage students to compare and contrast HIV Prevention with prevention research in adjacent areas (e.g., HCV, HPV).

Recommended Preparation: STA220H1 or equivalent
Distribution Requirements: Science, Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

HMB342H1 - Epidemiology of Health & Disease

Hours: 24L/12T

This course engages students in the fundamental science of epidemiology applied to health and disease. After an introduction to various measures of health and disease, the scientific methods used to investigate, analyze, prevent and control health problems will be illustrated using social, biomedical and public health examples

Prerequisite: Completion of 9.0 credits including one of BIO120H1/ BIO130H1/ HST209H1
Exclusion: HST373H1
Recommended Preparation: STA220H1/ STA288H1/ EEB225H1/ PSY201H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
Mode of Delivery: In Class

HST405H1 - Global Migration and Health

Previous Course Number: HST307H1
Hours: 24L

Over the past decades, economic globalization, widening socio-economic inequities, conflict, natural disasters, environmental degradation, and, more recently, climate change have combined to become increasingly significant

forces shaping global migration fluxes. This course analyzes the impact of migration on the health of those who move and of individuals, communities and entire societies in countries of origin, transit, arrival, and resettlement. It adopts an interdisciplinary approach, incorporating scholarly work from the fields of public health, the social sciences, law, and human rights.

Prerequisite: HST209H1
Exclusion: HST307H1 (Special Topics in Health Studies I: Globalization, Migration and Health), offered in Winter 2017, Winter 2018, and Winter 2019
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

HST410H1 - Case Studies in Health Policy

Hours: 36S

Analyses the formation and implementation of health policy through the use of case studies. Each case deals with a substantive health policy issue. Using case studies, students will learn to understand and analyze the processes by which public policies are formed, and perform comparisons of policy alternatives.

Prerequisite: HST211H1
Recommended Preparation: HST310H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

GGR433H1 - Built Environment and Health

Hours: 36S

Linking across fields that include public health, geography and planning, this course examines the growing evidence and ways in which human health is affected by the design and development of the built environment in which we live, work and play. The course considers how various planning and development decisions impact population and individual health, particularly in relation to chronic diseases, injuries, and mental health. Potential field trip, transportation cost: \$20.

Prerequisite: 10.0 credits
Exclusion: GGR400H1 (Special Topics in Geography I: Built Environments & Health), offered in Winter 2013
Recommended Preparation: 1.0 credit in Geography (SOC SCI/BR=3)
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

GGR434H1 - Building Community Resilience

Hours: 36S

Examines concepts of resilience as a way of building the capacity of communities to (a) respond to predicted disruptions/shocks associated with climate change, global pandemics, anticipated disruptions in global food supply, energy insecurity, and environmental degradation; and (b) nurture the development of alternative spaces that support the emergence of more life-sustaining structures and practices. Includes explicit attention to equity and public health, and explores issues such as: participatory governance of social-ecological systems, the nature of social change, complexity science, the role of social movements, indigenous and political ecology perspectives.

Prerequisite: 10.0 credits

Exclusion: GGR400H1 (2011-12)

Recommended Preparation: 1.0 credit in Geography

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Public Policy

Introduction

Solving real-world policy challenges requires the use of multi-disciplinary tools to analyze problems, determine the best means to deal with those problems, and decide on the best course of action. An undergraduate Major in Public Policy provides a unique opportunity for students in Social Science disciplines to think in an interdisciplinary way, by drawing on theories and approaches, as well as tool kits developed in the core disciplines of Economics and Political Science, and beyond. Students in this program develop theoretical and applied reasoning skills in policy analysis, as well as a solid grounding in quantitative methods and research.

Regarding Public Policy Programs

The Major program in Public Policy is offered jointly by the Munk School of Global Affairs and Public Policy, the Department of Economics, and the Department of Political Science. Students may enrol after their first or second year of undergraduate studies, and must meet the prerequisite conditions for all second-year and higher courses.

The Program Director and Program Assistant are available for consultation. For inquiries or an appointment call the Undergraduate Administrator, Petra Jory at 416-978-5402 or send an email to p.jory@utoronto.ca.

Public Policy Programs

Major in Public Policy (Arts Program) - ASMAJ2660

The Major in Public Policy is offered jointly by the Munk School of Global Affairs & Public Policy, the Department of Economics, and the Department of Political Science. Students enroll after first year, and must meet the prerequisite conditions for all second-year and higher courses.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade/minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

ECO101H1 & ECO102H1 (with an average final mark of at least 67%) or ECO105Y1 (with a final mark of at least 80%), and

One of the following four options (1.0 credit):

- POL101Y1, or 1.0 credit from POL101H1, POL106H1, POL107H1 or POL109H1, with a grade of 67% in each course
- 1.0 credit from Munk One courses (MUN105Y1, MUN101H1, MUN102H1), with a grade of 75% in each course
- 1.0 credit from Trinity One Public Policy courses (TRN160Y1 or TRN161Y1) with a grade of 75%
- 1.0 credit from Vic One Pearson policy stream courses (VIC181H1, VIC183H1, VIC184H1 or VIC185H1) with a grade of 75% in each course

To ensure that students admitted to the program will be prepared, applicants with a final grade lower than the minimum grades stated above will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Notes:

- Students entering from Munk One/Trinity One/Vic One course options will be ineligible to take upper year POL courses until they have completed POL214Y1 or (POL218H1, POL219H1)
- Students expecting to choose ECO courses in their second year or higher must complete MAT133Y1 or the combination of MAT135H1 and MAT136H1 in their first year, to meet required prerequisites for ECO courses. If MAT133Y1 or (MAT135H1, MAT136H1) is not taken, students will not be eligible to enrol in 200+-level ECO courses, and must take PPG200H1 to fulfil program requirements in lieu of ECO200Y1/ ECO204Y1/ ECO206Y1.

Completion Requirements:

(7.5 credits)

First Year:

1. One of the following four options (1.0 credit):
 - POL101Y1, or 1.0 credit from POL101H1, POL106H1, POL107H1 or POL109H1, with a grade of 67% in each course

- 1.0 credit from Munk One courses (MUN105Y1, MUN101H1, MUN102H1), with a grade of 75% in each course
 - 1.0 credit from Trinity One Public Policy courses (TRN160Y1 or TRN161Y1) with a grade of 75%
 - 1.0 credit from Vic One Pearson policy stream courses (VIC181H1, VIC183H1, VIC184H1 or VIC185H1) with a grade of 75% in each course
2. ECO101H1 & ECO102H1 (with a combined average of at least 67%) or ECO105Y1 (with a final mark of at least 80%).
 3. Students expecting to choose ECO courses in their second year or higher must complete MAT133Y1 or the combination of MAT135H1 and MAT136H1 in their first year, to meet required prerequisites for ECO courses. If MAT133Y1 or (MAT135H1, MAT136H1) is not taken, students will not be eligible to enrol in 200+-level ECO courses, and must take PPG200H1 to fulfil program requirements in lieu of ECO200Y1/ECO204Y1/ECO206Y1.

Second Year:

1. ECO200Y1/ECO204Y1/ECO206Y1/PPG200H1
2. Students expecting to choose ECO courses in their second year or higher must complete MAT133Y1 or the combination of MAT135H1 and MAT136H1 in their first year, to meet required prerequisites for ECO courses. If MAT133Y1 or (MAT135H1, MAT136H1) is not taken, students will not be eligible to enrol in 200+-level ECO courses, and must take PPG200H1 to fulfil program requirements in lieu of ECO200Y1/ECO204Y1/ECO206Y1.
3. 1.0 credit from ECO220Y1, (POL222H1+POL232H1), SOC202H1, STA220H1, STA221H1, STA248H1, STA255H1, STA261H1
4. One of the following three options (1.0 credit):
 - POL214Y1
 - 1.0 credit from MUN200H1, POL201H1, JPI201H1, POL214H1, POL223H1, POL224H1,

of which at least 0.5 credit must be POL214H1 or POL224H1.

- POL218H1 and POL219H1

Third and Fourth Years:

1. PPG301H1
2. PPG401H1
3. Remaining courses to reach the 7.5 credits will be drawn from 300+-level drawn from Economics, Political Science, Sociology, or related disciplines.

Public Policy Courses

PPG200H1 - Microeconomics for Policy Analysis

Hours: 24L

The objectives are: (1) To provide students with a foundation in microeconomic analysis and; (2) To demonstrate how this foundation can be applied to design, predict the effects of and evaluate public policies.

Students will be equipped to understand the main issues on a range of policy topics such as taxation, social insurance, welfare and income support programs.

Prerequisite: (ECO101H1, ECO102H1)/ ECO105Y1

Exclusion: ECO200Y1, ECO204Y1, ECO206Y1

Recommended Preparation: POL101Y1/ 1.0 credit from POL101H1, POL106H1, POL107H1 or POL109H1/ MUN105Y1/ (MUN101H1, MUN102H1)/ TRN160Y1/ TRN161Y1/ 1.0 credit from VIC181H1, VIC183H1, VIC184H1 or VIC185H1

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

This course explores the government's role in promoting efficiency and equity in both the financing and delivery of public policy goals. It explores the conditions when government involvement is important, the policy levers available to government in promoting social policy, market failures, and conditions for efficiency. It examines the role of government in many of the major areas of social policy such as health care, education, redistribution, the environment, financial regulations and other important issues.

Prerequisite: PPG301H1

Corequisite: PPG301H1

Recommended Preparation: ECO200Y1/ ECO204Y1/ ECO206Y1/ PPG200H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: Hybrid

PPG301H1 - Introduction to Public Policy

Hours: 24L

The course introduces students to the study of public policy, the policy process and our policy institutions in Canada. The course examines how issues emerge, how important ideas are framed, priorities are established, and agendas are set and managed. It explores how institutions – formal and informal rules which enable and constrain actors – shape policy-making in Canada.

Prerequisite: (1) One of: ECO200Y1/ ECO204Y1/ ECO206Y1/ PPG200H1; (2) One of: ECO220Y1/ (POL222H1, POL232H1)/ SOC202H1/ STA220H1/ STA221H1/ STA248H1/ STA255H1/ STA261H1; (3) One of: POL214Y1/ (1.0 credit from POL201H1, JPI201H1, POL214H1, POL223H1, POL224H1, of which at least 0.5 credit must be POL214H1 or POL224H1)/ (POL218H1, POL219H1)

The Study of Religion

The Department for the Study of Religion (DSR) is a vibrant site of research and teaching where you can study diverse religious and spiritual traditions in their historical, cultural, political, and textual contexts. As a religion department located in one of the most multi-religious and multi-cultural cities in the world, our undergraduate courses attract a remarkably wide range of students curious about religion and how to study it in university. Our courses cover numerous traditions, including Buddhism, Christianity, Hinduism, Indigenous spiritualities, Islam, and Judaism, and also focus on existential questions, such as the nature of happiness, narratives of creation, evil and suffering, and love, sex and family. Some of our students may have grown up with religious traditions while many have no religious affiliation or background whatsoever; every student is welcome in our classes. Our courses equip you with the critical and methodological skills, writing ability, and language training that you need. DSR students learn to ask how power, creativity, and contestation are central to religion and to examine how religion is connected to other categories of experience such as gender, sexuality, and racialization. DSR undergraduate students combine religion programs and courses with a wide variety of other programs of study, including environmental studies, political science, computer science, women and gender studies, and college programs such as international relations and cognitive science.

More detailed information concerning the department, our programs, particular courses, and our Religion Undergraduate Students' Association (RUSA) can be

Your Pathways in the Study of Religion

100-Level Courses

Our 100-level courses introduce you to the study of religion, while tackling existential questions such as life, death, embodiment, the mind, and belief. We aim to provide communities of learning that provide foundational skills such as critical thinking, close reading, active listening, writing, oral presentation, and discussion. Most of our first- and second-year courses also provide extra support through the Writing-Integrated Teaching program.

200-Level Courses

Our 200-level courses give you entryways into specific religious traditions, including Buddhism, Christianity, Indigenous Religions, Hinduism, Islam, and Judaism, as well as specific 'lenses' into the study of religion, for instance through language or music. We also teach you different methodological and disciplinary approaches through our 'Study of Religion' course, which is required for all Majors and Specialists. Overall, we encourage you to think comparatively about what counts as 'religion' in specific contexts. We complement larger gatherings in lectures with more intimate tutorials. Students can take a 200-level course without having taken any prior RLG courses.

300-Level Courses

Our 300-level courses focus on providing you with skills of critical thinking and knowledge exchange. We encourage you to think about significant themes that cross-cut religious traditions, such as migration, politics, human rights, sexuality, pilgrimage, spaces, visions and revelations, and so on, and we often draw on forms of experiential learning and multi-media platforms for presenting the results of lengthier research projects. All 300-level courses normally presuppose that a student has already completed, by the first day of the course, at least 4.0 credits in any field.

400-Level Courses

Our 400-level courses consist of smaller and intensive seminars, where you engage closely with each other and with instructors. We encourage you to engage in advanced critical reflection on how and why you study religion in an academic setting and to develop your own voice as a thinker who can speak and write publicly about religion. We offer a Religion in the Public Sphere (RPS) community-engaged learning course, as well as seminars designed solely for undergraduates and several joint grad/undergrad seminars. 400-level courses are intended primarily but not exclusively for Specialists and Majors

who have already completed several RLG courses. That said, students who have taken cognate courses, e.g., anthropology, history, philosophy, are welcome to enroll.

Religion Specialist (Arts Program) - ASSPE0151

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(10.0 credits)

1. 1.0 credit from the following 100-level RLG courses: RLG100H1, RLG101H1, RLG102H1, RLG103H1, RLG104H1, RLG106H1, RLG107H1, RLG108H1
2. No later than the third year of study: RLG200H1. RLG200H1 is a prerequisite for all 400-level courses.
3. 0.5 credit from RLG201H1/ RLG202H1/ RLG203H1/ RLG204H1/ RLG205H1/ RLG206H1/ RLG208H1/ RLG241H1.
4. 0.5 credit from RLG209H1/ RLG211H1/ RLG212H1/ RLG213H1.
5. 0.5 credit in any other 200-level Department for the Study of Religion courses (excluding the following language courses: MHB255H1, NML255H1, MHB256H1, NML256H1, RLG260H1, RLG263H1, RLG261H1, RLG262H1, RLG264H1, RLG265H1).

- It is highly recommended that Religion Specialists who are interested in pursuing graduate training also complete two full years of a relevant foreign language. This should be discussed early in a student's program with the Associate Chair or other Religion professors.
- Up to two language courses totaling 1.0 credit (in Pali ([RLG264H1](#), [RLG265H1](#)), Sanskrit ([RLG260H1](#), [RLG263H1](#), [RLG359H1](#), [RLG360H1](#), [RLG474H1](#)), Tibetan ([RLG261H1](#), [RLG262H1](#)) or Modern Hebrew ([MHB155H1](#), [MHB156H1](#), [MHB255H1](#), [MHB256H1](#), [MHB355H1](#), [MHB356H1](#)) will count toward the Department for the Study of Religion courses required to complete any Specialist Program in Religion. If a student wishes a different language (not one of those mentioned here) to count toward completing these programs they should consult with the Associate Chair, Undergraduate.
- Please note that UTM and UTSC courses do not automatically count towards completion of a RLG program (except the Buddhist Studies Major and Specialist). If you have taken or are planning on taking a course at another campus and would like it to count exceptionally towards your program requirements, please e-mail the Undergraduate Program Assistant at religion.undergrad@utoronto.ca.

Religion Courses

RLG100H1 - World Religions

Hours: 24L/12T

An introduction to the history, philosophy, and practice of the major religions of the world, including Judaism, Christianity, Islam, Hinduism, Buddhism, Confucianism and Taoism.

Exclusion: RLG100Y1/ RLG280Y1/ (RLGA01H3, RLGA02H3). Note: RLG101H5 is not equivalent to RLG100H1.

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: Online, In Class

RLG101H1 - Reason and Religion in the Modern Age

Hours: 24L

An introduction to critical thinking about religion as it took shape in modern European thought. We examine major thinkers such as Baruch Spinoza, David Hume, Immanuel Kant, Friedrich Nietzsche, Hannah Arendt, and others. Issues covered include freedom of thought, the relationship between religion and politics, belief and truth, rational ethics in relation to religious ethics. We explore how issues addressed by these classical authors remain relevant in today's world.

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

RLG102H1 - Blood, Sex and Drugs

Hours: 24L/12T

Religion can be understood as a set of aspirations that manages and moralizes the most intimate matters of social life, including sexual intercourse, bodily fluids, and mind altering substances. This course engages fundamental theories of religion to consider an eclectic set of case studies that troubles a clean divide between purity and danger.

Exclusion: RLG101H1 (Introducing Religion: Blood, Sex and Drugs), offered in Winter 2019 and Winter 2020

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour

(2)

Mode of Delivery: In Class

RLG103H1 - Sports and/as Religion

Hours: 24L/12T

A first-year course looking at the historical and contemporary relationship between religion and sport. We start with the Ancient Greek Olympics (a funeral ritual) and end with the ever-hopeful gathering of Toronto Maple Leafs fans, Leaf Nation. In between, we look at examples of those sports around the world, in which religion plays a significant role or where sports serves as a religion-like pastime.

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

RLG104H1 - Conspiracies, Social Media, and the Rise of New Religious Movements

Hours: 24L/12T

Conspiracy theories are nothing new, but in the past few years we have all witnessed the meteoric rise of conspiracies such as QAnon via social media, which have taken on the elements of New Religious Movements. This course examines recent examples of new religious movements that might be thought of as “conspiratorialities,” that is, conspiracies with strong cult and religious overtones.

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: Online, In Class

RLG106H1 - Happiness

Hours: 24L

Are you happy? Today happiness is a metric by which a growing number of people assess the quality of their lives, with a range of experts offering innumerable life hacks and opportunities to optimize life. But what does it mean to be happy? And how have people tried to achieve this ever-elusive state? Situated squarely within the study of religion, this course considers how different traditions from around the world and for thousands of years have raised similar questions about happiness—not simply for the sake of reflection but also to do something about it. And

their answers have varied: fast, meditate, pray, go to the desert, come together, get high, suffer, renounce God, and/or make lots of money. Readings will include selections from social theory and religious texts as well as a few authors who seem to be (against all odds) kind of happy.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
Mode of Delivery: In Class

RLG107H1 - "It's the End of the World as We Know It"

Hours: 24L/12T

Throughout history, many religious movements have envisioned the end of the world. This course will explore the ways in which different religious movements have prepared for and expected an end time, from fears, symbols, and rituals to failed prophecies and social violence. By examining traditions such as Jewish and Christian apocalyptic texts through to fears of nuclear apocalypse and zombies, the course seeks to understand the ways in which ancient and modern claims of "the end" reflect the aspirations, anxieties, and religious concerns of communities.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
Mode of Delivery: Online, In Class

RLG108H1 - The Question of God

Hours: 24L/12T

What is God? Who is God? Is Yahweh the same as the Christian God? What about Allah? How do people come to see, hear, or feel God? Belief in God is a core tenet of all monotheistic religions, yet the figure of God is elusive and contested. This course offers an introduction to the study of religion and to how the discipline has engaged with the figure of God. Issues covered include histories of God (including proclamations of the "death of God"); psychological and anthropological views on prayer, divine interventions, and God-human relations; God and empire/colonialism; feminist (and other subversive) re-imaginings of God; and atheism. Regardless of their own belief, students will learn to grapple with an inescapable figure, will learn about lived Islam and Christianity (and to a lesser extent Judaism), and will gain insights into a range of thinking tools offered by the study of religion.

Exclusion: RLG239H1 (Special Topics: The Question of God), offered in Fall 2021

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
Mode of Delivery: Online, In Class

MHB155H1 - Elementary Modern Hebrew I

Hours: 36L/12T

Introduction to the fundamentals of Hebrew grammar and syntax. Emphasis on the development of oral and writing skills.

MHB156H1 - Elementary Modern Hebrew II

Hours: 36L/12T

Continued introduction to the fundamentals of Hebrew grammar and syntax. Emphasis on the development of oral and writing skills.

Prerequisite: MHB155H1/ NML155H1 permission of the instructor based on previous language knowledge

Exclusion: Grade 4 Hebrew (or Grade 2 in Israel)/
NML156H1

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
Mode of Delivery: Online, In Class

RLG194H1 - Great Confrontations in Ancient Israel

Hours: 24L

Great Confrontations in Ancient Israel deals with ten episodes recorded in the Hebrew Bible or "Old Testament" in which two parties confronted each other over a great moral issue. The ten confrontations are: (1) God and Humans; (2) Adam and Eve; (3) Cain and Abel; (4) Abraham and God; (5) Jacob and Esau; (6) Joseph and Mrs. Potiphar; (7) Moses and Pharaoh; (8) Moses and Israel; (9) David and Nathan; (10) Elijah and Ahab. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Thought, Belief and Behaviour (2)
Mode of Delivery: In Class

RLG195H1 - Alt-Bible: What Could Have Been

Hours: 24S

Why does our contemporary Bible not include any daughters for Adam and Eve or any stories of Jesus as a young boy? What if Enoch was more prominent than Moses or Thomas more prominent than Paul? "The Bible" that we have is not a single book or a simple collection, but something that has grown over time, been the object of contention and argument, and has sometimes been a common ground across traditions. We examine side-by-side writings that have become canonical and writings that once held authority but have not found widespread canonical status, and strive to understand the processes by which we ended up with "the Bible" we have today. Restricted to first-year students. Not eligible for CR/CNR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
Mode of Delivery: In Class

RLG196H1 - Goddess Lessons: Gender, Religion and Pop

Hours: 24S

Is God a woman? How can we get to heaven without losing a piece of ourselves? What does it mean to follow Lesbian Jesus? Pop music provides us with some important – if often surprising – opportunities to think through deep questions. Increasingly, these questions tie together two of our most powerful human categories: gender and religion. This course will consider the diverse interactions between pop, gender, and religion. Examples might include Beyonce's self-representation as the Yoruba goddess Oshun and Lil Nas X's reinterpretation of the Garden of Eden in *Montero*. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
Mode of Delivery: In Class

RLG197H1 - Enchantment, Disenchantment, Re-Enchantment

Hours: 24L

Modernity is associated with disenchantment, secularisation and progress, and has traditionally been understood as the successor to the enchanted, spiritual, and transcendent worldviews of antiquity and the middle ages. Re-enchantment, a term increasingly encountered in popular and academic contexts alike, demonstrates nostalgia for an enchanted past, a discomfort with the modern narrative, and a desire to recover wonder. This course will examine the history of enchantment through a series of readings taken from literature, philosophy, theology, ranging from Plato to contemporary magical realism. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
Mode of Delivery: In Class

RLG198H1 - Dystopia: Religion & Gender in Science Fiction

Hours: 24L

This course will examine the "what ifs" and imagined worlds of ideal utopias and oppressive dystopias through the lens of religion and gender in Margaret Atwood's *The Handmaid's Tale* and Charlotte Perkins Gilman's *Herland*. Because science fiction and utopian/dystopian literature expresses what an author sees as possible or hopes is possible, but also fears is possible, we will consider science fiction as a political and social critique. Themes to be covered include fundamentalism, totalitarianism, the relationship between technology and religion, religion and reproductive rights, and the potential relationship between religion, gender and oppression. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
Mode of Delivery: In Class

RLG199H1 - Contagions

Hours: 24S

It is obvious that infections spread through social networks; what is less well known is that forms of human behaviour, including religious affiliation, have network characteristics. This course examines a variety of

historical and contemporary contagions to introduce essential concepts in network analysis and the factors that account for the spread of innovation and other forms of human behaviour. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

JRC199H1 - Truths & Reconciliations in Canada

Hours: 24S

In this course, we examine the idea of reconciliation among Indigenous and Canadian nations by considering the complicated role of religion and spirituality in “truth and reconciliation.” Specifically, residential schools for Indigenous children were a collaboration of church and state that violently broke the spirit and intent of the treaties—or sacred promises—made between the Crown and Indigenous nations. The course will set the 2015 Truth & Reconciliation Commission of Canada in a longer history of twentieth-century commissions, reports, and petitions in which both Indigenous and Canadian people (and some churches) named the cultural and spiritual genocide of residential schools and called for action. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

JRN199H1 - Exodus and Enslavement

Hours: 24S

Popular conceptions of enslavement in North America have influenced how we frequently imagine enslavement in Exodus and related biblical and related texts from the ancient Near East. Yet, depictions of enslavement in these ancient texts may be strikingly different from our ideas of enslavement in North America. This course explores similarities and differences between enslavement in these different historical contexts. It also examines how biblical texts were utilized in debates over and revolts against enslavement primarily in the eighteenth and nineteenth century. All readings will be in English. No knowledge of Hebrew is required. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

RLG200H1 - The Study of Religion

Previous Course Number: RLG200Y1

Hours: 24L/12T

An introduction to the discipline of the study of religion. This course surveys methods in the study of religion and the history of the discipline in order to prepare students to be majors or specialists in the study of religion.

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: Online, In Class

RLG201H1 - Indigenous Spiritualities and Religions

Hours: 24L/12T

This course examines how Indigenous communities saw the world before contact—primarily exploring early creation narratives and ways of engaging with the natural world through ceremonials of reciprocity and acknowledgements. It engages with how early colonial societies and Western-based religions evaluated and understood Indigenous spiritualities and practices. We consider Indigenous critiques of Western religion as it has actually been practiced as opposed to what has been taught as constituting the ideals of civilization. Finally, we analyze how Indigenous communities and culture begin to create “New Religions” that blend Indigenous values and thinking with aspects of Western culture or emerge in direct response to re-imagining spirituality in attempts to prove humanness and civility in contexts where little of Indigenous culture and values has been seen as acceptable.

RLG202H1 - Judaism

Hours: 24L/12T

An introduction to the religious tradition of the Jews that explores key themes as they change from ancient times to today. The set of themes will include: the Sabbath, Study, Place, Household, Power. Each year will focus on one theme. We will read holy texts, modern literature, history, ethnography, and philosophy, covering each theme in a

range of genres and across the diverse span of Jewish experience.

RLG203H1 - Christianity

Hours: 24L/12T

We explore the multiple religious traditions of Christianity and follow key themes as they have changed throughout the last two millennia. The themes might include: the Bible and its translation; missionizing and colonial practices; belief and conversion; authority and power; capitalism and Christianity. The course will equip students to understand how and why Christianity has come to exert such influence around the globe. No familiarity with the Bible, Christianity, or the academic study of religion is assumed.

RLG204H1 - Islam

Hours: 24L/24T

An introduction to the Islamic religious tradition that explores its diversity and development, from its inception to the modern period. Themes include Pre-Islamic Arabia, the life of Muhammad and the Qur'an, the development of the notion of Sunna and Hadith, Islamic religious communities (Sunni, Shiite and Ismaili traditions), Sufism, and religious practices. The course will emphasize the complexity of the Islamic tradition both in its classical phase and in modernity including Islam in the diaspora.

RLG205H1 - Hinduism

Hours: 24L/24T

This course explores themes relating to the religion of Hindus, called Hinduism since modernity. Topics include the canonical literatures, philosophies, and doctrines of Hinduism, along with the debates surrounding them; lived Hinduism, and the texts that inform its practice and experience; activities considered quintessential to Hinduism, such as temple visits, yoga, and venerating a guru; and the vibrant spectrum of Hindu expression one encounters in the diaspora. The course will equip students with fluency in core concepts and practices of Hinduism, as well as an understanding of Hindu history as one of dynamism and transformation.

RLG212H1 - Anthropology, Religion and Culture

Previous Course Number: RLG212Y1

Hours: 24L/24T

Is religion a matter of belief or a matter of practice? Do all religions share common features? Is one born into religion, or does one learn to be religious? This course is designed to introduce students to some of the ways in which anthropologists have studied and thought about religion. The emphasis is not on memorizing things people believe and do in different societies but on understanding how anthropologists have tried to explain religious phenomena. The themes covered in the course include: magic and religion; the (ir)rationality of belief; the body as a site of knowledge; ritual; ethical self-cultivation; and religion's role in the secular age.

RLG222H1 - Witchcraft, Religion and the Powers of the Occult

Previous Course Number: RLG337H1

Hours: 24L

Picture a witch in your mind's eye. Do you see them as male, female, or somewhere between the two? Young or old? Good or evil? This course goes beyond common

Western assumptions about the character and morality of witchcraft to show how its study, its representation and its practice contribute in vital ways to our understandings of religion, the occult, morality, gender, sexuality and science. We move across Europe, Africa, Melanesia and North America to shed light on a controversial figure in numerous societies and literary traditions, past and present. Depictions of witches, wiccans, sorcerers and magicians are analyzed and compared. At the same time, the course should make you ask yourself: What is rational, what is ethical—and ultimately, what is human?

RLG234H1 - Language and Religion

Hours: 24L/12S

What is language to religion? And how is it used by humans and divine agents? This course moves across traditions, examining types of communications from speech to rhetoric to book to revelation; and types of communicators from hermit to evangelist to deity. We will see language used to clarify and to obscure; to exclude and to liberate. And we will think about miscommunication too: the message lost in transmission. All readings will be in English. No knowledge of other languages is required.

RLG235H1 - Religion, Gender, and Sexuality

Hours: 24L

This course equips students to understand how norms and practices of gender and sexuality are deeply

entangled with religious imaginations and traditions. We will examine how ritual, scriptural, and legal traditions enable and constrain embodied and political power. Readings will draw from feminist, womanist, queer, and other perspectives. With a combination of in-class discussions, critical reading exercises, and short essay assignments, students will strengthen their awareness of transnational intersections of religion, gender, and "religio-racial" formations. You will develop skills in analyzing the role of popular culture and legal and religious texts in shaping norms and experiences of gender and embodiment.

RLG236H1 - Material Religion

Previous Course Number: RLG305H1

Hours: 24L

Religions are more than beliefs or sacred texts. They are also formed through buildings, bodies, objects of devotion, images, websites. We examine how religion is embodied, circulated, built, played, displayed, and painted. We ask why religions are often constituted through feasting or fasting, excess or asceticism, abundance of objects or destruction of icons. Religious activity is explored through its connections with objects of wealth and consumption--not just great art, but items common within popular culture. The overall aim is to 'see' religion in a new way—and to understand the role of the senses in the formation of religious experience.

Hours: 24L/12T

Infectious diseases have afflicted human societies throughout the history of our species. How are diseases shaped by the societies in which they spread, and how do they change culture and politics in turn? This course introduces perspectives from medical anthropology and religious studies to analyze the intersection of cultural, religious and scientific narratives when people confront plagues. We focus on historical and contemporary examples, such as the Spanish flu and COVID-19, giving students the tools to understand how cultural institutions, religious worldviews, and public health epidemiology shape living and dying during a pandemic.

JRN301H1 - Disability in the Hebrew Bible and Related Texts

Hours: 24L

The Hebrew Bible (sometimes called the Old Testament) has influenced ideas about disability in societies across the globe for thousands of years. Yet, notions of disability in the Hebrew Bible may be strikingly different from what we might imagine. This course explores how some biblical texts and related ancient literature conceptualize disability in relation to issues of ethnicity, sexuality, beauty, age, social class, religious expression and so on. We will examine a number of these issues both in their ancient context and in some more recent interpretations of the

Hebrew Bible. All readings will be in English. No knowledge of Hebrew is required.

RLG302H1 - Dreams, Visions and the Invisible

Previous Course Number: RLG249H1

Hours: 24L

In many cultures, dreaming is understood to open pathways to unseen realities and worlds populated by spirit beings, souls of the dead, noetic powers and avenues to mystical union. Dreams include visions, daydreams, and dissociative, altered states of consciousness. This course examines contributions from a variety of disciplines such as psychoanalytic psychology, anthropology, biblical criticism, neuroscience, and paleo-archaeology to the study of religious experiences. Topics include how human beings negotiate the contents of their minds that result in social and political agreements that distinguish what is deemed as real, thereby constituting acceptable religious experience. The course will also discuss crisis apparitions, alien abduction accounts, spirit possession and existence of life after death as culturally specific religious narratives that seek to articulate and organize dreams and other visionary experiences.

Hours: 24L

From politics to popular culture, the Bible has shaped people and nations for good and for ill. This course introduces the Jewish and Christian Bibles and considers case studies of how biblical texts have been interpreted. The Bible has been used to bolster slavery and white supremacy and to inspire political liberation movements. It has been used to justify annihilation of Indigenous people by Christian colonists yet given hope to Jews that next year in Jerusalem might be better. How can the same "book" be used for such different purposes? This course focuses on the cultural and political consequences of biblical interpretation. An underlying premise is that the Bible is not static but is rather a nomadic text as it is continuously interpreted in ways that sometimes contribute to human flourishing, but also can result in violence, human diminishment, or death.

RLG326H1 - Roots of Christianity and Judaism

Hours: 24L

Judaism and Christianity are both considered "religions of the book" but how are they related to each other? This course considers the origins of that relationship by reading a range of Jewish texts from the 6th century BCE to the 1st century CE, including the Dead Sea Scrolls, in order to illuminate the diverse cultural matrix from which early Christianity and Judaism took shape. A major theme of the course is the formation of scriptures and scriptural interpretation as a factor in shaping distinctive Jewish cultures. Attention is also given to "lived religion" and practices that form individuals and communities.

RLG327H1 - Hospitality and Ethics in Judaism, Christianity, and Islam

Hours: 24S

Refugee crises in modern times have raised questions concerning what degree of hospitality is owed the stranger or foreigner whose motivation is a new, safe, and secure home rather than being treated as a guest passing through on a time-limited visa. Jacques Derrida's ideas of both conditional hospitality (e.g., tourists) and unconditional hospitality (e.g., strangers) need to be explored from the perspective of philosophical and ethical traditions including Jewish, Christian, and Muslim ethics.

RLG329H1 - New Atheism and the Study of Religion

Hours: 24L

A course to look at the rise of a "new atheism" in the late 20th- and early 21st-century. This popular movement has gained traction in late modernity, renewing older arguments about the negative consequences of religion in public life. We shall examine this movement, tracking its

rise, fall, and future, as we ponder the implications of New Atheism for the academic study of religion.

RLG330H1 - Visions and Revelation in Ancient Judaism and Christianity

Hours: 24L

What did ancient Jews and Christians see and know when they “saw” God or heavenly realms? Or when they toured hell or the infernal regions? This course examines the ancient imagination by treating the major elements of the apocalyptic literary corpus and accompanying visionary experiences in ancient Judaism and Christianity. Contemporary theories on the function and origin of apocalyptic literature inform our readings.

RLG331H1 - Creation Narratives and Epistemologies

Hours: 24S

The course will examine the importance of Indigenous cultural knowledge and values as presented in various Indigenous Creation Narratives. Creation Narratives or Cosmological narratives have long been studied as mere mythology. Yet, it is in these very narratives that complex, layered, and nuanced epistemologies emerge. Often, these narratives not only lay the epistemological frameworks of cultural value systems, but they also contain what many refer to as original instructions and purpose for the “Original People”.

RLG332H1 - Reasonable and Radical Hope

Hours: 24L

Human beings have a natural and necessary interest in the prospects of their happiness, their moral improvement, and a progressively more just world. When, to what extent, and on what basis our hope for these things could be reasonable have been central questions in philosophy of religion since the Enlightenment. But genocides and cultural devastation (e.g., the Holocaust or the fates of some Indigenous communities) have compelled more recent philosophers to ask not only about rational hope, but also radical hope. This course explores reasonable and radical hope, first by unpacking the well-established philosophical question of our what we may reasonably expect from ourselves and our world, and then turning to the issue of humans’ capacity to persist when their community and its culture face extinction, i.e., when they may no longer expect anything.

RLG334H1 - Religion, Space and Diaspora

Hours: 24L

This course explores the transformation of religion, space and practices in diasporic settings. How is space adapted to the sensibilities of diasporic subjects, and how are the ritual practices that take place in those spaces transformed? The course examines historical and contemporary examples of the impact of diasporas, exile, and immigration on spatial practices in synagogues, churches, mosques, and temples, and ritual transformations in diaspora.

RLG338H1 - Religion and Religiosity in Israel/Palestine

Hours: 24L

Focusing on present-day Israel/Palestine, this interdisciplinary course is intended for students interested in exploring a wide range of theoretical questions and examining their applicability to the study of sites, texts, rituals, and politics in the region. We will address the history of the land's consecration from Jewish, Christian, and Muslim perspectives. Students will analyze specific sites associated with religious congregations and ritual practices, and study them within their local and regional contexts. Looking at the complex relationships between religious-political movements and institutions within Jewish and Muslim societies, we will delve into various attempts to secularize (and theologize) Jewish and Palestinian communities and their discontents. Rather than providing the typical emphasis on conflict, the course is a journey into the history and present of the land and its diverse communities.

RLG346H1 - Time and Place in Judaism, Christianity, and Islam

Hours: 24L

Judaism, Christianity, and Islam each have their own sets of prayer times, frequency of prayers and their locations such as home, synagogue, temple, church or mosque. They have completely different calendrical systems. Holiness is also connected to geographical locations, which often serve as destinations of pilgrimage. This course will examine linear and cyclical times and the concepts of holiness in time and place by looking at primary sources in translation. We will investigate the persistence of holy places, how their names continue, and how gender issues are part of the jurisdictional politics of disputes over place and time.

JPR364H1 - Religion and Politics in the Nation State

Previous Course Number: JPR364Y1

Hours: 24L

This course will engage with contemporary debates on religion and politics in the context of the nation-state in our post-9/11 world, and will do so comparatively across a wide range of contexts.

The emphasis will be on understanding the evolving relationship between religion and politics in liberal democracies, and examining challenges facing democratic politics from the religious sphere, both in the West, where secular liberalism is the dominant framework for discussing these questions, and in Africa, India, and the Middle East, where such a framework is more likely to be contested. The themes explored will include secularization, religious pluralism and tolerance, human

rights regimes, the idea of "civil religion," the impact of religion on party politics, the formation of identity and political community, the legal regulation of sometimes-competing claims based on religious faith, gender, and sexuality, and the rise of extremist forms of religious politics, conspiracy thinking, new online communities that lead to dangerous political outcomes, such as 'QAnon' and 'Plandemic'. Cases studies will include the USA, Canada, France, Turkey, Egypt, Nigeria.

JPR365H1 - Global Religion and Politics

Previous Course Number: JPR364Y1

Hours: 24L

This course will engage with contemporary debates on religion and politics in the international context in our post-9/11 world, and will do so comparatively across a wide range of contexts.

The emphasis will be on understanding the evolving role transnational religion has played in the past three decades, where new global networks have emerged as central global actors. We will focus empirically on the rise of radical reformist Islam and evangelical Christianity, the two most dramatically successful forms of religiosity around the world today. We will study the implications for the foreign policies of key nation-states, as well as the forces that have contributed to the prevalence of contestatory religious politics and networks as new and poorly understood global actors. International religious freedom, human rights, the role of media and mediation, the place of religious or theological doctrines or imaginaries in constructing and motivating a range of political goals, many involving the use of violence. We will focus as well on the global spread of extremist forms of religious politics, conspiracy thinking, new online communities that lead to dangerous political outcomes, such as 'QAnon' and 'Plandemic'. Many of the cases will focus on the non-Western world, especially the Middle East and Africa. *(Given by the Departments of Political Science and Religion)*

RLG383H1 - Interpretation and Dialogue

Hours: 24L

Can we understand the beliefs and behaviors of people whose religious and cultural outlooks differ radically from our own? Do we always impose our preconceptions on them? Or are there cognitive, imaginative, and emotional resources that enable us to see people on their own terms? These questions, which beset the practices of anthropologists and historians of religions, are central to the philosophy of the human sciences. This course explores the theoretical issues involved in interpretation and dialogue across cultural and historical divides by reading seminal texts by Dilthey, Collingwood, Heidegger, Quine, Davidson, Winch, MacIntyre, Benedict, Geertz, and Rorty.

RLG385H1 - Becoming Modern: Institutions, Individuals, and the Dark Side of Modernity

Hours: 24L

What does it mean to be modern? Words like "modern," "modernity," and "modernism" are used to mark a fundamental boundary between our era and all that came before it (or lies outside of it); but most of us are hard-pressed to offer a solid account of what exactly this boundary is. This course examines the relationship between: a fundamental shift in the nature of daily experience; an order-of-magnitude expansion of the power of the State; a dramatic reorganization of religious

experience and cultures; and a tremendous growth in the enterprise of Western science and technological production. We trace this reorientation over the last two centuries and examine its consequences using philosophical, literary, theological, and scientific sources, as well as recent scholarly work on the topic.

RLG386H1 - Devotional Literature of Early Modern India

Hours: 24L/12T

This class is an introduction to the devotional literature of early modern India (c. 1500-1800), but more importantly, it is about thinking critically and developing skills in close reading of texts. In addition to learning about historical, religious, and social contexts of various literary traditions in Brajhasha, students will be expected to demonstrate their ability to analyze and interpret texts by actively participating in class discussions and by writing a well-argued final paper. The focus will be on the *what* of literary traditions but also on the *how* and *why* these traditions made sense to people in the past and are still relevant to us, today.

RLG404H1 - Departmental Capstone-Research

Hours: 24S

This seminar gives you the chance to explore the role of research in undergraduate education, and to construct a retrospective view of your and others' experiences of studying religion in the university. Each student will also develop a research project and will examine a range of audiences for their research, from specialists in their field, to wider academic scholars, to an audience beyond the university. Interaction between students will be a central feature of the work of the seminar. Open to students in the Majors and Specialists of the Department for the Study of Religion.

Prerequisite: Completion of 14.0 credits

RLG419H1 - Ghosts to Ancestors: Racialized Hauntings and Reparative Promise in Psychoanalysis

Hours: 24L

All forms of injustice disfigure both societies and psyches. Racist, sexist, and other unconscious fantasies of evil and persecuting 'others' generate social injustice. At the same time, social injustice distorts the mind. This "dual track" process can drive human beings and their societies mad. Justice depends upon transformations of social structures and moral codes as well as changes within human minds. In order for psychoanalysis to realize its own potential for facilitating justice, it must confront its own historical contribution to injustice. Through a close reading of selected texts from Sigmund Freud and the activist psychiatrist Franz Fanon, this course explores the inherent tensions between colonizing and emancipatory

themes within psychoanalytic discourses. Both Freud and Fanon contribute to a psychoanalytic critical theory that have influenced several contemporary ethnographic writers who explore the intricate ways in which social and cultural realities are internalized as unconscious hauntings and tormenting spirits across generations.

RLG421H1 - Fragments of Redemption: Sigmund Freud and Theodor Adorno

Hours: 24S

This course will challenge the prevailing view that the thought of Sigmund Freud and Theodor Adorno is so deeply pessimistic as to be devoid of hope. Freud's psychoanalytic theories are widely (mis)interpreted in the register of a crude pansexualism and biological determinism. Adorno's critique of society and the individual is often (mis)interpreted as so ruthlessly pervasive that it forecloses on any possibility for emancipatory transformation. This is a distorted view of both thinkers, that misses the hopeful, utopian currents that motivate and shape psychoanalysis and critical theory. The course will explore the emancipatory currents in Freud and Adorno, and their implications for potentialities of individual, social and ecological transformation.

RLG426H1 - Religion in the Public Sphere: Community-Engaged Learning

Hours: 24S

In a 55-hour placement with a community partner, students are given an opportunity to learn about and reflect upon the ways that religion and religious diversity shape public life. How do individuals and organizations recognize and negotiate the intersections of religious diversity, culture, and public space in the context of engaging with public policy? Through critical classroom discussions, readings, reflections, and meaningful work for and with front-line community partners, community-engaged learning offers students the opportunity to integrate academic knowledge with experiences outside the classroom, to challenge themselves, and to explore their values and future directions.

Application Process: By the end of November, interested students must complete the [online application form](#) to indicate their interest in and expectations of community engaged learning, as well as any previous volunteer/co-op/internship experience they may have had. Following submission of student applications, the course instructor(s) will contact student applicants individually to conduct a brief informational interview. Interviews will be completed by December, at which time students will be directly enrolled by the department.

JPR459H1 - Fanaticism: A Political History

Hours: 24S

This seminar in theory will explore the modern history of the concept of 'fanaticism' and its role in the development of political modernity. A focus on the concept of the "fanatic" (and its cognates) from the perspective of its various uses in political and religious thought from the Early Modern period through the Enlightenment and up to the present day, provides a fascinating opportunity for a critical review of the secular, rationalist, and scientific assumptions underwriting modern political forms and concepts, especially those of liberal democracy. At the same time, the course will offer critical insight into the ways in which religious and political differences among colonial "others" were, and continue to be, central to the elaboration of Western theoretical discourse on fanaticism and extremism as forms of "political pathology". RLG474H1 - Sanskrit Readings I

Hours: 24S

This course will have students read choice pieces of South Asian literature. While tackling a text in Sanskrit from a major literary tradition, Buddhist or Hindu, and discussing its content and context, students will learn strategies for translating and interpreting Sanskrit literature.

Prerequisite: [RLG359H1](#), [RLG360H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

RLG476H1 - Caste and its "Other"

Hours: 24S

This course focuses on works of South Asian fiction and non-fiction that deal with caste in Indian society. By looking at a range of texts from Classical Sanskrit literature in translation to contemporary radical Dalit perspective writings, we aim to arrive at an understanding of why, despite social and economic mobility, caste remains the indelible marker of modern Indian identity even today.

Prerequisite: Completion of 9.0 credits

Recommended Preparation: [RLG205H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

RLG478H1 - Burmese Religions

Hours: 24L

This course will question the statement that “to be a Burmese is to be a Buddhist” by introducing students to the variegated religious landscapes of Buddhist, Christian, Hindu, Judaic, and Muslim Burma/Myanmar through an analysis and discussion of historical, art-historical, anthropological, and literary sources.

Prerequisite: Completion of 9.0 credits

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

RLG479H1 - Burmese Buddhist Literature

Hours: 4L/20S

Burma, also known as Myanmar, offers one of the richest literary landscapes in the Buddhist world. This course introduces students to the Buddha's sermons, to the animal lives of struggling bodhisattvas, to the poetic creativity of Mandalay princesses, to the intricacies of the Buddhist philosophy of mind, to the textual regimes of monastic dress codes, and to cosmographies of Buddhist kingship in the interface of South and Southeast Asian

religions. Students will be trained to take a critical look at the fascinating world of Buddhist texts, inflected by the scriptural language of Pali, through a specifically Burmese prism.

Prerequisite: 4.0 credits

Recommended Preparation: [RLG206H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

RLG481H1 - Islamic Intellectual Tradition

Hours: 24S

This seminar covers three main areas of the Islamic intellectual tradition: legal, theological and mystical. Each section will be covered by reading an original work translated into English with the aid of secondary literature. The seminar will develop the students' knowledge of the classical Islamic tradition. Students will choose a research topic and develop and present to the class a synopsis of their research. The seminar culminates in writing a research paper on one aspect of the Islamic religious tradition.

Prerequisite: [RLG204H1](#) or [RLG355H1](#)

Research Opportunity/Research Excursions (299/398/399)

Research Opportunities Program: 299H1/299Y1/399H1/399Y1 Courses

Director: Randy Boyagoda, Vice-Dean, Undergraduate
Contact: Office of Experiential Learning and Outreach Support (rop.artsci@utoronto.ca)

The Research Opportunities Program (ROP) provides an opportunity for Arts & Science (St. George) degree students in their second and third year to earn course credit by participating in a faculty member's research project. Each 299H1/299Y1/399H1/399Y1 course has a program-specific designator, such as ANT, CLA, CSB, VIC, etc. Not all departments or programs will necessarily participate in the ROP each year.

In order to be eligible for the program, students must have completed at least 4.0 but not more than 13.5 credits by the end of the term in which they applied for ROP. Students can only participate in one ROP course at a time and can participate in a maximum of two ROP courses during their undergraduate studies. Students will be placed into a 299 course for their first ROP and a 399 course for their second ROP. Students may not participate in two ROP courses with the same professor. Students apply to ROP projects and are informed in mid-April whether they have been accepted for Summer ROP, and mid-May if they have been accepted for Fall, Fall/Winter, and Winter ROP. Successful applicants are registered by the Office of Experiential Learning & Outreach Support. Regular tuition fees apply.

Assessment and grading methods are determined by individual faculty members and may differ between projects. Students are typically expected to present a poster of their work at the Bi-annual Arts & Science Research Fair.

Details about ROP projects, application deadlines, eligibility, and how to apply are posted on the [Faculty of Arts & Science website](#).

Research Excursions Program: 398H0/398Y0 Courses

Director: Randy Boyagoda, Vice-Dean, Undergraduate
Contact: Office of Experiential Learning and Outreach Support (experiential.artsci@utoronto.ca)

The 398 Research Excursions Program (REP) provides an opportunity for Arts & Science (St. George) degree students in their third year (i.e. students who have completed at least 9.0 but not more than 13.5 credits by the end of the Winter term preceding the REP) to participate in an off-campus practical or experiential research activity, under the supervision of a faculty member. The practical, experiential component can take the form of research/learning in archives, laboratories, libraries, or in a field camp, etc.— but not in a classroom at another university (that is covered by the Faculty's summer abroad and exchange programs). REPs may take place in domestic or international locations. The projects run within the May-August period, when both Faculty and students can make the time commitments necessary. The Faculty of Arts & Science covers travel and living expenses for students. Regular tuition fees apply.

Each 398H0/398Y0 has a program-specific designator, such as ANT, CLA, CSB, VIC, etc., and would be eligible to count towards program completion if the program sponsor (Chair or Director) so chooses. A limited number of 398H0/398Y0 courses are available each year. Faculty supervisors propose the projects and choose students from those who apply. Students are typically expected to present a poster of their work at the Bi-annual Arts & Science Research Fair.

Note: To provide opportunities to as many students as possible, priority will be given to students who have not already received funding for a Faculty of Arts & Science international opportunity, including [ICM](#) or [DIIIE](#).

Details about REP application deadlines, eligibility, course offerings and how to apply are posted on the [Faculty of Arts & Science website](#).

Faculty of Arts & Science-Funded International Programs

Director: Randy Boyagoda, Vice-Dean, Undergraduate
Contact: Office of Experiential Learning and Outreach Support (experiential.artsci@utoronto.ca)

In an effort to provide opportunities to as many students as possible, for Faculty of Arts & Science-funded programs priority will be given to those students who have

not previously received funding for these programs. All participants must be current Arts & Science (St. George) degree students in good standing, and their eligibility must be confirmed by the Experiential Learning & Outreach Support Office prior to acceptance to the program. Participation in a Faculty-funded program does not affect participation in Summer Abroad or student exchange opportunities.

International/Indigenous Course Module (ICM)

The Faculty of Arts & Science's International/Indigenous Course Module (ICM) provides an opportunity for faculty members to incorporate an intensive international or Indigenous experiential module into the framework of existing undergraduate courses. The ICM is designed to enhance students' classroom learning in a wide range of areas through the application of course content to relevant settings and communities around the globe. ICMs are selected in late May and take place over Reading Week the following November or February. Students' participation in the ICM may be incorporated into the final course grade. In many cases, ICM participants share their experiences with the wider Arts & Science community through publications, presentations or web-based resources.

Locations: Courses and locations for Reading Week in the upcoming November or February will be posted in June on the Faculty of Arts & Science [Current Students](#) page. Interested students can view stories and highlights of previous ICMs on the [Learning Abroad](#) website.

Courses: Past ICMs have examined the role of political changes in the Republic of Georgia, geologic evolution and mining in Spain, historical biography in Uganda and urbanization in China.

Cost: Faculty of Arts & Science provides funding for students' and faculty airfare, accommodation and local transportation. Students may be asked to contribute a deposit towards the ICM, but amounts are capped at \$200.00.

Eligibility: A limited number of ICMs are offered each year and the program is only available to undergraduate Arts & Science (St. George) degree students enrolled in the course(s) in which the module is proposed.

Application: Upcoming ICMs and their corresponding courses will be listed on the [Arts & Science website](#). Students express interest to participate in the ICM through the course professor. Once they are enrolled and faculty members will be responsible for selecting student participants.

If you are interested in working with a faculty member to create an ICM for a course, and for all questions related to

the ROP, REP, and ICM programs, please contact: experiential.artsci@utoronto.ca

Undergraduate Research Fund

The [Undergraduate Research Fund](#) (URF) is funded jointly by the Arts & Science Students' Union (ASSU) and the Faculty of Arts & Science. It provides funding for students to develop a research project of their own, for which there is no other available funding. The fund is open to all Arts & Science undergraduate students in good academic standing and no minimum GPA is required. Research projects must be initiated by students, related to their degree, and supervised by a faculty member with a continuing appointment in the Faculty of Arts and Science either through a regular course, an independent study, a research essay, or other academic project. For application forms and further information, please see the [URF website](#).

Introduction

Rotman Commerce at the University of Toronto offers a rigorous curriculum combining studies in management, economics, and the arts and sciences for an enriched professional undergraduate experience. The program explores the role of commerce in modern society while developing skill and confidence in analysis, effective communications and decision making.

The Bachelor of Commerce degree builds on a common foundation of a range of business disciplines and economics. Rotman Commerce students specialize in one of three areas: Accounting, Finance and Economics, or Management. Each stream combines courses in management and applied economics with a variety of courses in the arts and sciences. The balance assures graduates of a solid understanding of business and

modern society along with a command of critical skills across business disciplines, decision-making, and leadership.

Rotman Commerce graduates enter a wide range of professions, and frequently become financial analysts, accountants, marketing analysts, economists, managers of firms and government, or entrepreneurs. Some commerce students elect to undertake post-graduate studies. Law schools and MBA programs have been particularly favoured destinations of recent graduates.

Faculty from the Rotman School of Management who teach in Rotman Commerce are listed above.

General Enquiries: Rotman Commerce Academic Services; Rotman Commerce, 125 St. George Street; email: rotmancommerce.info@utoronto.ca; telephone: 416.978.3339; rotmancommerce.utoronto.ca

Registration Instructions for the Faculty of Arts & Science can be found in the [Program Toolkit](#) and [Course Enrolment Instructions](#) sections of the Arts & Science website.

Bachelor of Commerce (BCom) Degree Requirements

Requirements for the BCom are stated on the [Degree Requirements](#) page.

Rotman Commerce Notes

Enrolment in Rotman Commerce programs is limited. Most students are admitted to first-year with Rotman Commerce Guaranteed Admission (see below for terms and conditions). Rotman Commerce students choose their Specialist program after first year, provided that the Guaranteed Admission requirements have been met. A limited number of spaces may also be available in second-year for other Arts & Science students who were not admitted with the guarantee (see enrolment requirements with the program information below for details).

Part-Time Students:

Students holding Rotman Commerce Guaranteed Admission, who have applied for and been admitted to Part-Time study, will be assessed for entry into the Rotman Commerce program at the point when they have completed 4.0 credits including the Guaranteed Admission requirements. To qualify under the Part-Time provision, students must have been enrolled in a part-time course load from the beginning of each session. Students may repeat each of the required courses only once in order to attain the minimum marks.

Additional Notes:

- Tuition Fees: Students enrolling in Rotman Commerce programs pay fees that are higher than other Arts & Science programs.
- Mathematics Note: [MAT133Y1](#) satisfies the minimum Program requirements. Students who are likely to enrol in 200+ level MAT, STA and/or CSC courses are advised to take [MAT135H1](#) and [MAT136H1](#) or [MAT137Y1](#) instead, noting that [MAT137Y1](#) is a theoretically-oriented course for mathematically-based disciplines such as Mathematics, Computer Science, and Statistics.
- Maximum Term Load: Rotman Commerce students are limited to a maximum of 6.0 credits in any Fall/Winter session of their program and a maximum of 2.0 credits in their Summer session.
- Students who have completed the requirements of their Admission Guarantee by the end of the Winter Session are eligible to enroll in 200-level RSM courses during the Summer Session following their first-year.

Rotman Commerce Programs

Accounting Specialist (BCom) - ASSPE2676

Rotman Commerce at the University of Toronto offers an innovative curriculum combining studies in management, economics, and the liberal arts for an enriched professional undergraduate experience. The program explores the role of commerce in modern society while developing skill and confidence in analysis, effective communication, and decision making. The Rotman Commerce program offers a Bachelor of Commerce (BCom) degree in three different specialist programs, Finance & Economics, Accounting, and Management.

All programs within the Bachelor of Commerce degree build on a common foundation of business and liberal arts courses. Rotman Commerce students specialize in one of three programs: Accounting, Finance and Economics, or Management. Each program combines courses in management and applied economics with a variety of advanced courses in the liberal arts and sciences. The balance assures graduates of a solid understanding of business and modern society along with a command of critical skills in decision-making and organizational leadership.

Rotman Commerce graduates frequently become economists, accountants, actuaries, financial analysts, marketing analysts, managers of firms and government, or proprietors of small businesses. Some Rotman Commerce students elect to undertake post-graduate studies in the form of further university education: law schools and MBA programs have been particularly favoured destinations of recent graduates.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

For students admitted to the Rotman Commerce admission category in Year 1:

Special Requirement

- Students are admitted to Year 1 of the Faculty of Arts and Science in the Rotman Commerce admission category with an "admission guarantee." Students admitted with the guarantee are invited to enroll in the program after first year, provided that the course and grade requirements below (i.e., Guaranteed Admission requirements) are met.
- Failure to meet any of these requirements, or failure to complete all the required courses within the calendar year (assuming full-time studies), will result in losing the admission guarantee.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- RSM100H1 (67%)
- ECO101H1 (63%) and ECO102H1 (63%)
- MAT133Y1 (63%) / (MAT135H1 (60%), MAT136H1 (60%)) / MAT137Y1 (55%) / MAT157Y1 (55%)

Notes:

- Students may repeat any of the required courses once, in order to attain the requisite mark. The repeated course(s) must be completed within the calendar year (as per the terms of the "guarantee"); as such, the repeated course(s) must be taken during either the Winter or Summer Session of first-year (i.e. a student may not extend the terms of their guarantee in order to attain the minimum marks).
- Note that none of the required courses may be completed using the CR/NCR option.

For students NOT admitted to the Year 1 Rotman Commerce admission category:

Special Requirement

- Students must complete the Rotman Commerce Supplemental Application in late April or May of each year.
- All course admission requirements must be completed by May 1 to be eligible.

- For information regarding admission to the program, contact Rotman Commerce at rc.admissions@utoronto.ca

Minimum Course Grades and Minimum Grade Average

A limited number of spaces in Rotman Commerce are available to Arts & Science students who were not admitted to first year with the Admission Guarantee.

Minimum grades in each listed course, combined with a minimum grade average in required courses, is needed for entry. The following courses with the stated minimum grades are required:

- MGT100H1 (67%) / RSM100H1 (67%)
- ECO101H1 (63%) and ECO102H1 (63%)
- MAT133Y1 (63%) / (MAT135H1 (60%) + MAT136H1 (60%)) / MAT137Y1 (55%) / MAT157Y1 (55%)

Admission will be based on marks and the Rotman Commerce Supplemental Application. Admission to Rotman Commerce is competitive. Meeting the minimum academic requirements does not guarantee admission to the program. An average of at least 73% in the prerequisite courses is needed for admission consideration and preference will be given to students whose marks are the result of a single attempt in each course.

Notes:

- For Arts and Science students admitted to Rotman Commerce, MGT100H1 will be considered equivalent to RSM100H1.

Completion Requirements:

(15.5 credits)

First Year:

1. (ECO101H1, ECO102H1), RSM100H1/ MGT100H1

2. MAT133Y1/(MAT135H1, MAT136H1)/ MAT137Y1/
MAT157Y1

3. Students are strongly encouraged to take RSM219H1, RSM230H1 and RSM250H1 in their first year of study

4. Students are encouraged to take one course towards the Breadth Requirement in their first year of study

Higher Years:

5. ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/(
STA220H1, STA255H1)*/(STA237H1, STA238H1)/(
STA257H1, STA261H1)

6. RSM219H1, RSM220H1, RSM221H1, RSM222H1, RSM225H1, RSM230H1, RSM250H1, RSM260H1, RSM270H1

7. RSM320H1, RSM321H1, RSM323H1, RSM324H1, RSM326H1, RSM332H1, RSM333H1, RSM392H1

8. Any 0.5 credit in 300+ ECO

9. RSM420H1, RSM422H1, RSM424H1, RSM426H1

*The combination of (STA220H1, STA255H1) is considered equivalent to ECO220Y1 for the purposes of completing Rotman Commerce program requirements only. It is not considered equivalent by the Department of Economics. Therefore (STA220H1, STA255H1) will not count towards an ECO major nor will it count as a pre-requisite for 300+ level ECO courses where ECO220Y1 is required. Please consult the Rotman Commerce Program office if you are considering taking (STA220H1, STA255H1) to complete your requirements.

Notes:

- Students may enrol in only one Rotman Commerce Specialist.
- Students must take a minimum of 8.0 credits in RSM and 8.0 credits in non-RSM courses to complete their Specialist requirements. MGT100H1 is considered equivalent to RSM100H1 and counts as 0.5 credit in RSM courses towards this requirement.
- The CR/NCR option cannot be used for any program completion requirements, including focus requirements and the 8.0 RSM credit requirement. Students may request to use the CR/NCR option for any RSM courses they take beyond their program requirements. Requests will be considered on a case-by-case basis and require the approval of the Director, Rotman Commerce. Students may contact the Rotman Commerce Program office to make a request.

The balance assures graduates of a solid understanding of business and modern society along with a command of critical skills in decision-making and organizational leadership.

Rotman Commerce graduates frequently become economists, accountants, actuaries, financial analysts, marketing analysts, managers of firms and government, or proprietors of small businesses. Some Rotman Commerce students elect to undertake post-graduate studies in the form of further university education: law schools and MBA programs have been particularly favoured destinations of recent graduates.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

For students admitted to the Rotman Commerce admission category in Year 1:

Special Requirement

- Students are admitted to Year 1 of the Faculty of Arts and Science in the Rotman Commerce admission category with an “admission guarantee.” Students admitted with the guarantee are invited to enroll in the program after first year, provided that the course and grade requirements below (i.e., Guaranteed Admission requirements) are met.
- Failure to meet any of these requirements, or failure to complete all the required courses within the calendar year (assuming full-time studies), will result in losing the admission guarantee.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- RSM100H1 (67%)
- ECO101H1 (63%) and ECO102H1 (63%)
- MAT133Y1 (63%)/ (MAT135H1 (60%), MAT136H1 (60%))/ MAT137Y1 (55%)/ MAT157Y1 (55%)

Notes:

- Students may repeat any of the required courses once, in order to attain the requisite mark. The

repeated course(s) must be completed within the calendar year (as per the terms of the "guarantee"); as such, the repeated course(s) must be taken during either the Winter or Summer Session of first-year (i.e. a student may not extend the terms of their guarantee in order to attain the minimum marks).

- Note that none of the required courses may be completed using the CR/NCR option.

For students NOT admitted to the Year 1 Rotman Commerce admission category:

Special Requirement

- Students must complete the Rotman Commerce Supplemental Application in late April or May of each year.
- All course admission requirements must be completed by May 1 to be eligible.
- For information regarding admission to the program, contact Rotman Commerce at rc.admissions@utoronto.ca

Minimum Course Grades and Minimum Grade Average

A limited number of spaces in Rotman Commerce are available to Arts & Science students who were not admitted to first year with the Admission Guarantee.

Minimum grades in each listed course, combined with a minimum grade average in required courses, is needed for entry. The following courses with the stated minimum grades are required:

- MGT100H1 (67%)/ RSM100H1 (67%)
- ECO101H1 (63%) and ECO102H1 (63%)
- MAT133Y1 (63%)/ (MAT135H1 (60%), MAT136H1 (60%))/ MAT137Y1 (55%)/ MAT157Y1 (55%)

Admission will be based on marks and the Rotman Commerce Supplemental Application. Admission to Rotman Commerce is competitive. Meeting the minimum academic requirements does not guarantee admission to the program. An average of at least 73% in the prerequisite courses is needed for admission consideration and preference will be given to students whose marks are the result of a single attempt in each course.

Notes:

- For Arts and Science students admitted to Rotman Commerce, MGT100H1 will be considered equivalent to RSM100H1.

Completion Requirements:

(15.0 credits)

First Year:

1. (ECO101H1, ECO102H1), RSM100H1/ MGT100H1

2. MAT133Y1/(MAT135H1, MAT136H1)/ MAT137Y1/
MAT157Y1

3. Students are strongly encouraged to take RSM219H1, RSM230H1 and RSM250H1 in their first year of study

4. Students are encouraged to take one course towards the Breadth Requirement in their first year of study.

Higher Years:

5. ECO204Y1/ ECO206Y1; ECO208Y1/ ECO209Y1; ECO220Y1/ ECO227Y1/(STA220H1, STA255H1)*/(STA237H1, STA238H1)/(STA257H1, STA261H1)

6. RSM219H1, RSM222H1, RSM230H1, RSM250H1, RSM260H1, RSM270H1

7. RSM330H1/ RSM336H1, RSM332H1, RSM333H1, RSM392H1

8. Any 2.5 credits in 300+ ECO

9. 2.0 credits from: RSM430H1, RSM432H1, RSM433H1, RSM434H1, RSM435H1, RSM436H1, RSM437H1, RSM439H1, or any 400-level finance-themed RSM special topics course as determined by the Director of Rotman Commerce.

*The combination of (STA220H1, STA255H1) is considered equivalent to ECO220Y1 for the purposes of completing Rotman Commerce program requirements only. It is not considered equivalent by the department of Economics. Therefore (STA220H1, STA255H1) will not count towards an ECO major nor will it count as a pre-requisite for 300+ level ECO courses where ECO220Y1 is required. Please consult the Rotman Commerce Program office if you are considering taking (STA220H1, STA255H1) to complete your requirements.

Notes:

- Students may enrol in only one Rotman Commerce Specialist.
- Students must take a minimum of 8.0 credits in RSM and 8.0 credits in non-RSM courses. MGT100H1 is considered equivalent to RSM100H1 and counts as 0.5 credit in RSM courses towards this requirement.
- The CR/NCR option cannot be used for any program completion requirements, including focus

requirements and the 8.0 RSM credit requirement. Students may request to use the CR/NCR option for any RSM courses they take beyond their program requirements. Requests will be considered on a case-by-case basis and require the approval of the Director, Rotman Commerce. Students may contact the Rotman Commerce Program office to make a request.

Management Specialist (BCom) - ASSPE2431

Rotman Commerce at the University of Toronto offers an innovative curriculum combining studies in management, economics, and the liberal arts for an enriched professional undergraduate experience. The program explores the role of commerce in modern society while developing skill and confidence in analysis, effective communication, and decision making. The Rotman Commerce program offers a Bachelor of Commerce (BCom) degree in three different specialist programs, Finance & Economics, Accounting, and Management.

All programs within the Bachelor of Commerce degree build on a common foundation of business and liberal arts courses. Rotman Commerce students specialize in one of three programs: Accounting, Finance and Economics, or Management. Each program combines courses in management and applied economics with a variety of advanced courses in the liberal arts and sciences. The balance assures graduates of a solid understanding of business and modern society along with a command of critical skills in decision-making and organizational leadership.

Rotman Commerce graduates frequently become economists, accountants, actuaries, financial analysts, marketing analysts, managers of firms and government, or proprietors of small businesses. RSM341H1 - Model-Based Decision Making

Hours: 24L

This course aims to introduce logically disciplined approaches to decision making under uncertainty. Managers are continually barraged with information that may be unreliable. They must choose courses of action in the face of many uncertainties. How can we define and assess the "optimality" of their decisions in a consistent manner? By building upon the answers to these questions, the course will consider the problem of rational choice when the outcome is determined by the actions of, and interactions between, multiple individuals. Not eligible for CR/NCR option. Contact Rotman Commerce for details.

Prerequisite: Completion of 9.0 credits, ECO204Y1/ ECO206Y1, ECO220Y1/ ECO227Y1/(STA220H1, STA255H1)/(STA237H1, STA238H1)/(STA257H1, STA261H1)

RSM355H1 - Managing Customer Value

Previous Course Number: RSM310H1 - Managing Customer Value

Hours: 24L

This course builds on the foundation developed in RSM250H1 (Principles of Marketing) in a competitive simulation environment. While RSM250H1 focuses on the fundamental marketing elements for operationalizing this basic philosophy - segmentation, targeting, positions and 3 of the 4 Ps, this course is designed to advance a participant's understanding of designing and implementing marketing strategies and explore the management of the 4th P (promotion) in greater depth. In particular, participants will make decisions about all 4 Ps simultaneously and manage the interactions between them. A fee of up to \$65 may be charged for simulation software licence. Not eligible for CR/NCR option.

Prerequisite: RSM250H1 and completion of 9.0 credits

Exclusion: RSM310H1 (Special Topics in Management: Managing Customer Value), offered in Winter 2019 and Winter 2020

RSM358H1 - Foundations of AI for Management

Hours: 24L/12T

Artificial intelligence — the application of machine-learning techniques to prediction problems historically performed by humans — is transforming business and society. This course provides a hands-on introduction to the wide variety of algorithms used in applications of machine-learning. The technical topics will include linear and non-linear regression models, classification algorithms, and more recent machine-learning techniques rooted in neuroscience like reinforcement learning and deep learning. Application topics will include predicting consumer choices, MLB salaries, and Super Mario Bros. There will be an emphasis on conceptual understanding, so that students can interpret the results of these techniques to support effective decision-making. The course will be complemented by many hands-on exercises using the R programming language.

Prerequisite: ECO220Y1/ ECO227Y1/(STA220H1, STA255H1)/(STA237H1, STA238H1)/(STA257H1, STA261H1), CSC108H1/ CSC148H1

RSM362H1 - Leading Across Differences

Hours: 24L

There is enormous buzz about leadership competencies that reflect the evolving nature of both the corporate culture as well as the disparate expectations of stakeholders. One leadership competency is the ability to navigate differences within the organization effectively. Through a series of thought provoking and experiential sessions, this course will make linkages between one's individual leadership stance and tools for leveraging differences for impact. There will be constant focus upon uncovering innovative frames around diversity and inclusion that directly impact organizational strategy across sectors. Thought leaders, executives and practitioners from various organizations will bring their insights to deepen the learning experience.

Prerequisite: 9.0 credits completed

RSM384H1 - Sports Analytics

Hours: 24L

This course applies concepts of analytic management and data analysis to the sports world. The class is intended to deepen the students' ability to apply econometric skills from ECO220Y1. Particular emphasis is given to player management, "on the field" decisions and giving the students the opportunity to do their own analysis while learning frontier techniques. The class will introduce students to some basics of coding and econometric analysis in R. No prior coding experience is required, but basic coding will be necessary and the course provides students with new or deepened skills in that area.

Prerequisite: ECO220Y1/ ECO227Y1/(STA220H1, STA255H1)/(STA237H1, STA238H1)/(STA257H1, STA261H1)

RSM391H1 - Creative Destruction Lab – Introductory Course

Hours: 24L

This course is suitable for students interested in pursuing careers in strategy, innovation, entrepreneurship, entrepreneurial finance, new product development, and economic development policy. The course will introduce students to a framework for developing an entrepreneurial

strategy. This involves the key choices of customer, competition, technology and identity as well as whether ventures pursue a control versus execution focus. The course will also provide a discussion of intellectual property strategies for technology entrepreneurs.

As part of the preparation for the CDL Advanced course, this course will also introduce you to the business of artificial intelligence. You will explore what machine learning is, what its economic properties are, how it impacts on strategy, its risks and legal implications. As most ventures in the Toronto CDL have AI cores, this will be essential preparation for that as well as an introduction to AI in the real business world.

This course is a prerequisite for students wanting to apply for the Creative Destruction Lab (CDL) Advanced Course RSM2013Y/ RSM498Y1 where students will have the opportunity to work directly with a CDL venture. Interested students should familiarize themselves with the Creative Destruction Lab and its various activities prior to registering for this course. You can find more information from our website at www.creativedestructionlab.com.

Introduction

The programs at St. Michael's College emerge from its academic strength in various scholarly fields and reflect its centuries-old Christian intellectual traditions. The College is home to the Mediaeval Studies program, the Celtic Studies program, the Book and Media Studies program and the Christianity and Culture program. These programs are complemented by our First-Year Foundations courses and our first-year Ones seminars: the Gilson Seminar in Faith and Ideas, the Boyle Seminar in Scripts and Stories, the McLuhan Seminar in Creativity and Technology and the new Christianity, Truth and Reconciliation Seminar.

More information can be found on the St. Michael's College website: stmikes.utoronto.ca

Programs

Book and Media Studies

The Book and Media Studies program is an interdisciplinary and historical investigation of the role of printing, books, reading, and electronic and digital media in cultures past and present. Its topics include: manuscript and book production, internet publishing, book illustrations, advertising, censorship, reading and entertainment alongside the development of mass media—the advent of radio and the emergence of television, global telecommunications, social media, and the internet.

The Arts & Science Internship Program (ASIP) stream is available to students entering their second year of study and enrolled in the Book and Media Studies Major. In exceptional circumstances, students, including transfer students, who enrolled in the Book & Media Studies Major after Year 2, may also be admitted to the ASIP stream in the Fall of Year 3. Acceptance into an ASIP stream in Year 3 is dependent on space and requires approval of the student's academic unit and the Faculty of Arts & Science Experiential Learning & Outreach Support (ELOS) Office. Please refer to the [ASIP Eligibility page](#) on the Faculty of Arts & Science website for further details.

Celtic Studies

The Celtic Studies Program introduces students to a wide variety of undergraduate courses on the languages, literature, history, music, folklore, art and archaeology of the peoples of Ireland, Scotland and Wales. We examine Celtic identities in the modern as well as the ancient and medieval world and explore the transmission of these traditions to Canada and the United States.

Christianity and Culture

Christians claim that the Gospel has the power to transform not only individual lives but whole societies. The Christianity and Culture Program offers students an opportunity to explore this bold claim through critical, academic studies of how the Christian faith has shaped—and been shaped by—the institutions, artistic expressions, and intellectual achievements of Western and world cultures. Courses provide a comprehensive and humanistic approach to Christian experience, past and present. By focusing on students' personal engagement with primary sources, the Program fosters scholarly exchange, intellectual community, and a shared search for meaning.

Mediaeval Studies

The term “mediaeval” is the name given to a period in the history between “antiquity” and “modernity,” or roughly the fifth through the fifteenth centuries. Its parameters are broad and boundaries are not clearly defined. The Mediaeval Studies program adopts an interdisciplinary approach to exploring this world through the study of subjects such as the Latin language, art, literature, law, gender roles, and religion. As well as examining the mediaeval foundations of modern culture, students also explore “mediaevalisms” that appear in our own culture through such media as film, literature, drama, and art, and introduce new approaches including digital humanities.

For more information about our programs please see the [St. Michael's College website](http://St.Michael's College website) or email smc.programs@utoronto.ca.

SMC One: First-Year Seminars

The Gilson Seminar in Faith and Ideas

First-year students explore the intersection of faith with today's most important questions. This course also features a two-week international learning experience in Rome that explores the roles that the Catholic Church and Vatican have played in ecology, science, literature and politics.

The Boyle Seminar in Scripts and Stories

First-year students investigate the intersection of Celtic and mediaeval cultures through manuscript analysis and language instruction. Participants are invited to travel to Ireland with the course instructors for an out-of-course international learning experience the following summer.

The McLuhan Seminar in Creativity and Technology

First-year students explore the relationship between creativity and technology and the individual, social, and cultural effects of innovation. The McLuhan Seminar includes a one-week trip to Silicon Valley, California that takes place during Reading Week.

The Christianity, Truth and Reconciliation Seminar

First-year students critically explore the complex relations of Christianity and Indigenous peoples of Turtle Island, with a special focus on education. The course includes

guest speakers and travel to residential school site(s) and archives in Ontario.

First-Year Foundations Courses

These small class-sized courses offer first-year students an introduction to inter-disciplinary university-level studies through a topic chosen by its instructor.

Faculty of Arts & Science Language Citation

Irish Language

St. Michael's College Celtic Studies Program participates in the Faculty of Arts and Science's Language Citation initiative for Irish. The Celtic Program is noted for its instruction in modern Irish language, as a key expression of its commitment to the continued thriving of the indigenous languages of the Celtic nations. Competence in Irish greatly benefits the study of Irish literature, folklore and music, and gives students a familiarity with the characteristics of Celtic languages that assists in further study of Scottish Gaelic, Welsh and Breton.

The Language Citation recognizes a significant level of achievement in a language study with a high level of academic success. Students who have earned this recognition are equipped with the practical and theoretical basis for graduate study.

The Language Citation is available to students who achieve a B- or above in 2.0 credits beyond the first-year course in a language. The Citation in Irish Language is available to students who complete [CLT141Y1](#), and earn a grade of at least B- in all of [CLT251H1](#), [CLT252H1](#), [CLT331H1](#), and [CLT332H1](#).

Students should note that, as explained in the [About Programs of Study](#) section of this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

To request the Citation, email your request with your student ID number to the Celtic Studies Program Coordinator. Submit your request as soon as you complete all the courses to be considered.

Mediaeval Latin Language

St. Michael's College Mediaeval Studies program participates in the Faculty of Arts and Science's Language Citation initiative for Mediaeval Latin. Our program is known for its integral approach to the Middle Ages, including its emphasis on essential research skills such as Latin. Familiarity with Mediaeval Latin not only adds a complementary linguistic and literary dimension to a student's study, but is essential for advanced research in mediaeval sources.

The Language Citation recognizes a significant level of achievement in a language study with a high level of academic success. Students who have earned this

recognition are equipped with the practical and theoretical basis for graduate study.

The Language Citation is available to students who achieve a B- or above in 2.0 credits beyond the first-year course in a language. The Citation in Mediaeval Latin is available to students who complete [LAT101H1](#) and [LAT102H1](#), and earn a grade of at least B- in 2.0 credits chosen from [MST222H1](#), [MST323H1](#), [MST328H1](#), [MST400Y1](#), and [MST436H1](#).

Students should note that, as explained in the [About Programs of Study](#) section of this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

To request the Citation, email your request with your student ID number to the Mediaeval Studies Program Coordinator. Submit your request as soon as you complete all the courses to be considered.

St. Michael's College Courses

SMC First-Year Foundations

SMC195H1 - God and Money in the Middle Ages

Hours: 24S

This seminar considers the ethical, political, and spiritual questions arising from the existence of wealth and poverty in medieval European culture. With readings from Dante, Chaucer, Thomas Aquinas and others, the course will examine how the interaction of spiritual ideals and material realities shaped cultural developments from late antiquity to the Protestant Reformation. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

SMC196H1 - God and the Poets: Lyric Form in the Christian Tradition

Hours: 24S

This course will develop the skills fostered by the close reading of poetry by exploring how the most sophisticated forms of language have been used to address the highest possible subjects in the Christian literary tradition. With readings in English, we will survey poetry in a range of

languages and forms, giving particular attention to how, in lyric poetry, poets have addressed themselves to God—from devotion to desperation, ecstasy to outrage, tenderness to terror. In addition to building the necessary skills for reading, describing, and analyzing poetry, this course will also develop other research skills. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SMC197H1 - The Sistine Chapel: History, Imagery, Usage

Hours: 24S

The Sistine Chapel in Rome is a historical artifact, an artistic monument, and a house of worship—at once recognizable and mystifying. This seminar explores fifteenth-century origins, decoration by some of the most accomplished artists of the Italian renaissance, and continuing use (especially the election of popes). Topics will include: art and patronage, rhetoric and ritual, controversial restoration, and the Sistine Chapel in popular culture—with an emphasis on the close analysis of the major frescoes. The seminar will develop the

academic skills needed for the analysis and discussion of texts, paintings, and ritual events. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SMC198H1 - How to Study Video Games

Hours: 36S

Games and play are a fundamental part of human society, and today digital games occupy a central place in popular culture, media industries, and the imaginations of players around the world. This seminar introduces students to the growing academic field of game studies, with an emphasis on close analysis of specific games as cultural objects. Through lectures, discussions, and in-class play sessions, students will build a critical vocabulary and toolbox of techniques for understanding the unique formal, aesthetic, narrative, and thematic properties of games in a variety of platforms and genres, and develop basic academic reading, writing, and research skills. No previous experience or expertise with video games is required to take this course. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SMC199H1 - Intelligence, Artificial and Human

Hours: 24S

What is human intelligence? How close are we to replicating it? How productive/reductive is the brain-computer analogy? What ethical challenges are posed by AI on workers, society, and the environment? Can we put a hold on "progress"? Is Silicon Valley the seat of a new techno-religion? What can they teach us about today's research priorities? What insight (or inspiration) can we get from works of science fiction about the future of human-AI interaction? Through reading discussion, written assignment, and workshops, this seminar will present students with the opportunity to integrate their computer science interests with philosophy, history, and literature. *There is an equivalent course offered by the Department of Computer Science. Students may take one or the other but not both.* Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: CSC199H1

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

SMC One: First-Year Seminars

SMC155H1 - SMC One: The McLuhan Seminar in Creativity and Technology

Hours: 12L/12S

This seminar is an interdisciplinary exploration of the relationship between creativity and technology. Inspired by the innovative thinking of Marshall McLuhan, it explores how the humanities relate to other fields of thought and research in addressing the individual, social and cultural experiences and effects of technological innovation. This course may include a compulsory travel component (location to be determined based on travel restrictions). (An ancillary fee of \$1,500 is required to help cover a portion of the travel costs.) Not eligible for CR/NCR option.

This course is restricted to newly admitted Faculty of Arts and Science students accepted to SMC One. Applications are due before the end of April (deadline subject to change). Apply via the [JOIN U of T website](https://stmikes.utoronto.ca/program/smc-one-mcluhan-seminar).

SMC165H1 - SMC One: The Boyle Seminar in Scripts and Stories

Hours: 24L/12S

This seminar introduces students to university-level studies through an interdisciplinary exploration of Celtic influences in the mediaeval world, with a particular focus on early books and historical artifacts as physical objects and bearers of meaning. Students will learn how to read and analyse these books and artifacts to decode their meanings, and, in support of that, take introductory language instruction in Latin and Irish. Subjects discussed

will include intercultural encounter and dialogue, research methods with historical sources, and the relationship between the written word and lived experience, then and now. There is a co-curricular, optional travel opportunity to Dublin, Ireland associated with this course that takes place following the Winter term exam period. If you choose to go on the trip to Ireland, an ancillary fee of \$1,500 is required to help cover a portion of the travel costs. Not eligible for CR/NCR option.

This course is restricted to newly admitted Faculty of Arts and Science students accepted to SMC One. Applications are due before the end of April (deadline subject to change). Apply via the JOIN U of T website.

BMS386H1 - Book and Media Internship

Previous Course Number: SMC386H1

Hours: 48P

Credit is offered to a student doing an internship with a media organization. A faculty supervisor assesses and assigns the necessary written component cognate to the internship. Students are responsible for securing their own internship.

A description of the internship, working bibliography, marking scheme, and academic supervisor's support must be submitted for approval by the Program Coordinator and Director. More information and application forms are available at <https://stmikes.utoronto.ca/bms-internship-form> or from the SMC Principal's Office, smc.programs@utoronto.ca.

Enrolment in this course is intended for Book and Media Studies Majors not enrolled in the Arts & Science Internship (ASIP) stream of the program. Not eligible for CR/NCR option.

JCA302H1 - The Bible and the Big Bang

Hours: 12L/12T

The origin of the Universe is addressed both by current physical cosmology and by religious interpretations of the Bible. This course explores how these approaches to the cosmos's origins differ and how they might be mutually informative. Core concepts in each domain will be examined and definitions carefully distinguished (e.g., 'nothing', 'cause', 'matter'); topics will include the question of temporal beginnings (scientific theories of spontaneous creation or an eternal universe vis-à-vis the doctrine of creation from nothing) and the problem of cosmic fine tuning (the multiverse vis-à-vis the idea of divine intervention).

Prerequisite: Completion of 4.0 credits

Recommended Preparation: AST101H1/ AST201H1/ AST121H1/ AST221H1/ AST222H1, SMC232H1/ CHC232H1

MST231H1 - On the Move in Mediaeval Eurasia

Hours: 24L

In this age of constant global travel, it is easy both to forget how much more complicated travel was in earlier periods, and to assume that there was very little of it. In the Mediaeval world, people travelled for work as traders, craftsmen and warriors; they travelled for their spirit as pilgrims; they travelled as migrants and refugees. This course will introduce students to the variety of people on the move in Mediaeval Eurasia, their motives, and the means they used to travel.

MST232H1 - How to Be a Barbarian: Beard, Battles and Belief at the Dawn of the Middle Ages

Hours: 24L

Barbarians have caught the modern popular imagination, and they appear to be much the same: hairy warriors who destroyed civilization. The late antique period (c.300–c.600) was a time of transition and the meetings of several cultures. This course examines the so-called barbarians who entered and soon came to rule the former Roman provinces of western Europe in this period. Our particular focus is the cultural, religious, artistic, and socio-economic aspects of barbarian peoples, and how these intersected with the civilization of Rome.

MST233H1 - Viking Cultures

Hours: 24L

Everyone thinks they know who the Vikings were. Like many aspects of the middle ages popular in modern life, there is much that is inaccurate about this picture of the Vikings. This course explores how Vikings lived—what sorts of things they did for a living, how they amused and entertained themselves, and what they thought—and moves on to consider their rituals of death and their notions of the afterlife. It will be based both on reading a variety of texts produced by and about the Vikings, as well as looking at various objects they produced that have survived.

MST341H1 - Middle Ages by the Numbers

Hours: 24L

Numbers and their uses often appear to be absolute fact: a thousand dollars is exactly that, not more or less; and if you weigh fifty kilos, that's what you weigh. But the use and meaning of numbers—for recording and counting dates, money, weights, distances, and myriad other functions—is not, in fact, devoid of cultural, historical, and political context. Mediaeval Europe provided a bewildering range of calendric systems, currencies, systems of

measurement, and numerical symbolism was much used in art, music, religious thought, and literature. This course provides an introduction to the various uses of numbers in this period across different regions and cultural contexts.

Prerequisite: Completion of 9.0 credits

Recommended Preparation: MST210H1, MST212H1

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

MST358H1 - The Mediaeval Book

Previous Course Number: SMC358H1

Hours: 24S

This course examines the most salient aspects of mediaeval manuscript culture. We will study, first, how the parchment for books was folded, pricked, ruled and bound, and second, what scripts were employed in the different codices. We will also examine the various types of books made in the Middle Ages and the challenges they pose to modern scholars.

Exclusion: SMC358H1

Recommended Preparation: LAT102H1, MST210H1/
MST212H1 or a course in mediaeval history.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

MST359H1 - Mediaeval Theology

Previous Course Number: SMC359H1

Hours: 24L

An introduction to the discipline of theology as taught in the mediaeval schools. Building on a basic knowledge of Christian scriptures and of philosophical argument, this course will offer an organic exposition of mediaeval theology, together with an introduction into the scientific method of the theological investigation as practised in the Middle ages.

Exclusion: SMC359H1

Recommended Preparation: MST210H1/

Introduction

The Sexual Diversity Studies program (Specialist, Major, Minor) enables students to explore, analyze, and challenge the ways in which sexuality shapes people's lives in both local and global contexts. The program provides vibrant interdisciplinary scholarship and academic learning on the historical and contemporary formations of sexual practices at the intersections of race, class, gender, disability, and citizenship status, among other social relations and processes. Our courses are designed to foster critical conversations of queer and normative sexualities; the formation of sexual, racial, and gender, and gender-non-conforming personhood; and the role of sexuality in culture and politics both in North America and transnationally.

Mode of Delivery: In Class

JPS378H1 - Sex and the State

Hours: 24L

What role have sex and sexuality played in the formation of the modern nation State? How has the State regulated sex? This course explores these questions with a theoretical focus on biopolitics. We will proceed in two parts. First, we engage Foucault's *History of Sexuality* and its reception by postcolonial theorists, focusing on questions of state building. The second part of the course shifts examination from State formation to contemporary forms of sexual regulation by the State. This includes maintenance of the public/private divide, citizenship law and nationalism, administrative violence and the prison industrial complex, and neoliberalism and BDSM. By the end of the course, students are able to apply core theoretical concepts and identify forms of contemporary sexual regulation in a variety of Western and non-Western contexts.

(Given by the Department of Political Science and the Mark S. Bonham Centre for Sexual Diversity Studies.)

musicians, philosophers, religious and political thinkers, and scientists of note. The richness of the Slavic cultures has a special significance for Canada, since the vast influx of Slavs, which began in the last century, has contributed greatly to the Canadian cultural mosaic.

The Department of Slavic Languages and Literatures offers an extensive range of courses in Russian, Polish, Ukrainian, Czech and Slovak, Bosnian, Croatian, and Serbian languages, literatures, culture, and film as well as in Slavic linguistics. Within this range there are courses suitable for inclusion in a wide variety of programs of study, whether or not the student has studied any Slavic language previously. Some students may specialize in Slavic Languages and Cultures, i.e. Russian, Polish or Ukrainian (see Programs of Study). Others may simply wish to gain a working knowledge of Russian or another Slavic language to aid their reading of important material in another field. Language study emphasizes small instructional groups, with some laboratory or conversational practice, and the use of literary materials.

Courses in the literatures and cultures of various Slavic countries explore the artistic, intellectual, and social currents of their civilizations, trace the literary history of each country, and examine the works of major authors. Many of our literature, culture, and film courses are taught in English and do not require special linguistic preparation.

The growing importance of Eastern Europe in contemporary affairs has had the effect of making academic study of this area especially lively and relevant. The student whose interest in the Russian or East European world is political, historical, or sociological can specialize in Russian and East European Studies, or pursue a course in Political Science, History, or Sociology, and at the same time take language courses, and perhaps selected courses in literature, in this Department. Students planning to specialize in Economics, Psychology, Mathematics, or any number of other fields, who have a special interest in the Russian or East European area, will find an advanced knowledge of Russian or of another Slavic language an important intellectual and professional asset.

Students intending to take a Program offered by the Department are asked to study carefully the Programs of Study and are urged to begin their language training as soon as possible. A Departmental brochure is available on request.

Faculty of Arts & Science Language Citation

The Department of Slavic Languages and Literatures participates in the Faculty of Arts and Science's Language Citation initiative. Students may achieve this Citation in Bosnian, Croatian, Czech, Polish, Russian, Serbian, and Ukrainian. Students interested in completing the Language Citation in languages taught in the Slavic Department but not listed here should consult the Undergraduate Coordinator of the Department of Slavic Languages and Literatures.

Language study is a demanding and intellectually rewarding educational experience. Our students learn to communicate both orally and in writing in other languages and are thus able to experience other parts of the world in more intimate ways. Their access to other cultures opens doors for further study and employment. Students in our department also have the opportunity to read a vast array of world-renowned authors in the original languages, as well as works – normally not available in English – in other areas of study, for example, cinema studies, drama, folklore, history, intellectual history, philosophy, mathematics, and political science.

The Language Citation recognizes a significant level of achievement in language study. For course selection students should consult the Undergraduate Coordinator as early as possible since not every language course is offered each year. Students who begin language study at the Intermediate level should consult the Undergraduate Coordinator for approval of advanced literature and culture courses that may satisfy the requirements for the Language Citation.

The Language Citation in Bosnian, Croatian, or Serbian is available to students who complete [SLA257H1](#), [SLA277H1](#), and an additional credit in South Slavic literature or culture with readings and discussion in the target language with a grade of at least B-. The Language Citation in Macedonian is available to students who complete [SLA209H1](#), [SLA213H1](#) and an additional credit in South Slavic literature or culture with readings and discussion in the target language with a grade of at least B-. Consult the Undergraduate Coordinator for approval of advanced literature and culture courses that may satisfy the requirements for the Language Citation.

The Language Citation in Czech is available to students who complete [SLA204Y1](#) and one (1.0) additional credit in Czech literature or culture with readings and discussion in the target language with a grade of at least B-.

The Language Citation in Polish is available to students who complete [SLA206H1](#), [SLA207H1](#), [SLA306H1](#) and [SLA336H1](#) with a grade of at least B-.

The Language Citation in Russian is available to students who complete, with a grade of at least B-, 2.0 credits from: [SLA220Y1](#), [SLA320Y1](#), or [SLA420Y1](#).

The Language Citation in Ukrainian is available to students who complete [SLA208Y1](#) as well as one (1.0) additional credit in Ukrainian literature or culture with readings and discussion in the target language with a grade of at least B-. Transfer language credits also eligible.

Students should note that, as explained in the [About Programs of Study](#) section of this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

Russian language student placement policy

All students who have studied Russian outside the University of Toronto must take a language placement test prior to enrolling into a Russian language course. Contact the Department for test dates and times.

Native speakers of Russian are not allowed to enrol into any Russian language course, with the exception of [SLA330H1](#). Native speakers may enrol into any Russian literature and culture course, and any Russian program of study (language requirement will be replaced with the equivalent number of literature and culture credits in consultation with the Undergraduate Coordinator).

Heritage speakers of Russian are allowed to enrol into a Russian language course only by special permission from

the Russian language program coordinator, Professor Julia Mikhailova (julia.mikhailova@utoronto.ca) but are encouraged to enrol in [SLA210H1](#) and [SLA410H1](#), courses specially designed for them. Heritage speakers may enroll into any Russian literature and culture course, and any Russian program of study (if necessary, language requirement will be replaced with the equivalent number of literature and culture credits in consultation with the Undergraduate Coordinator).

Who are native and heritage speakers of Russian?

For academic purposes, the Department considers a student to be a native speaker of Russian if they meet one of the following criteria:

1. The student left Russia at the age of 10 or later.
2. The student lived in a Russian-speaking country (any former Soviet republic) before the age of 10 and did elementary schooling in Russian.

For academic purposes, the Department considers a student to be a heritage speaker of Russian if they meet one of the following criteria:

1. The student left Russia before the age of 10.
2. The student lived in a Russian-speaking country (any former Soviet republic) before the age of 10 but did elementary schooling in a language other than Russian.
3. The student was born and/or grew up outside of a Russian-speaking country but speaks some Russian at home.

It is the responsibility of individual students to furnish documentation proving their native- or heritage-speaker status. In the absence of such documentation, the Department reserves the right to deny enrolment into Russian language courses. Heritage and native speakers of Russian who enroll in a Russian language course and fail to identify themselves to the Department engage in cheating and will be treated in accordance with the university policy on academic misconduct.

Slavic Languages and Literatures Courses

Slavic First-Year Foundations

SLA190H1 - Losing It

Previous Course Number: SLA201H1

Hours: 24S

How does one cope with loss, be it a nose, a leg, a pet, a name, a lover, a battle, a fortune, or one's sanity?

Through literary texts from Central and Eastern Europe, we explore the trauma and poetics of losing, and the mechanisms of coping with and compensating for the lost object. Taught in English, all readings in English.

Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: [SLA201H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SLA191H1 - The Criminal Mind

Hours: 24S

In the mid-nineteenth century, European and American fiction became obsessed with the subject of criminals.

This course examines this preoccupation and its literary and social ramifications. We discuss the changing image of the criminal in British, French, Russian and American fiction. Readings by Dickens, Dostoevsky, Balzac, Zola, Poe, Stevenson and Lombroso. Reading and discussion in English. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SLA192H1 - On the Road in Eastern Europe

Hours: 24S

This course examines the function of travel within texts and films depicting journeys through Eastern Europe. We will distinguish various types of journeys, the narrative and

cultural expectations they imply, and the ways that travel relates to individual identity, raising questions about nationality, race, gender, sexuality, and the Other. Restricted to first-year students. Not eligible for CR/NCR option.

Mode of Delivery: In Class

SLA193H1 - Objects of War

Hours: 24L

An object or a thing always has a collective history. It speaks of the political and the social conditions under which it was made. In this course, objects of war – the material culture of conflict – from the 20th and 21st centuries will be critically and historically examined. How do these objects speak of violence, politics, and culture, but also rewrite and influence the arenas within which they circulate? Some objects include: canned food, drones, the journalists' hotel, helmets, tents. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SLA194H1 - Utopia Interrupted: Late and Post-Soviet Russian Literature

Hours: 24S

Almost 30 years after the collapse of the Soviet Union, what can we understand about its culture and people, and its impact on the popular imagination in the West? To answer these questions, the course introduces students to canonical literary and cinematic works from the post-Stalin era to the present, with particular attention to the literary and cultural peripheries. Some of the topics will include: Gulag, or Return of the Repressed, Counter-Culture, Space Race, Immigration, Gender, Perestroika, and Putin's Russia. All readings in English. Restricted to first-year students. Not eligible for CR/NCR option.

SLA195H1 - Literature and Painting in Russia and the West

Hours: 24S

What makes literature 'visible'? How do the verbal and the visual coexist? This seminar explores the relationship between words and images, texts and pictures through history, in Russia and the West. Special attention will be paid to the figure of the artist. Is it a writer's *alter ego*, the incarnation of creativity, or just a character among others? Literary texts (mainly short stories) from Balzac and Gogol to Chekhov and O. Henry, Maugham and Bunin, Nabokov and Camus will be studied along with the paintings of some major 19th-20th century artists. The comparative dimension of the course will help students contextualize Russian literature and think about its relationship with the Western canon. We will also watch some 21st century films about artists (such as Julie Taymor's *Frida* [2002], Milos Forman *Goya's Ghosts* [2006], and Mike Leigh *Mr. Turner* [2014]). All texts will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

SLA196H1 - Russia at War

Hours: 24S

In its long history Russia has fought numerous wars, both defensive and offensive, and these wars have inspired a rich, complex, contradictory poetic response. We examine Russian war narratives starting with the medieval period and ending with the Second World War and including epic poetry, songs, stories, novels, paintings, and films. We will study the depiction of war and the image of the soldier (or warrior) in different genres and time periods, as well as the historical circumstances in which the different works were produced and the respective audiences for which they were intended. All texts will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

SLA198H1 - The Slavic Grecian Formula: From Ancient Rhapsode to Modern Slav Song

Hours: 24S

Slav singers of heroic tales about war, lust, honour and revenge have made a special contribution to our appreciation of classical literature and mythology. We will compare Slavic epics and African-American rap songs to reveal the connection between Homer's *Iliad* and Nas's iconic *Illmatic*, between the mythical image of the pagan goddess Aphrodite and the mystique of Nicki Minaj, Lauryn Hill, and other iconic singers today. As we read *The Iliad* closely, we will study songs from the Russian, Bosnian Muslim, Croatian and Serbian traditions. Employing new performance formulaic theory, we will learn that they share much, in melody and message, with the work of today's hip-hop artists, whose roots of rap "flowing" reach back to the beginnings of Western literature and the epic singers of ancient Greece. Students will have the opportunity to interact with a unique online multimedia edition of an epic song by a traditional Slavic singer.

No knowledge of languages other than English is required. Restricted to first-year students. Not eligible for CR/NCR option.

SLA266H1 - War and Culture

Hours: 24S

Poland and Europe 1914-1945. As we commemorate the centenary of the outbreak of WWI, this cataclysmic event that launched the 20th century and was followed by another total war soon after still defines our view of the world and understanding of it. It may be time now to look anew at how various forms of expression, including literature, film, theatre, painting and sculpture produced during the two wars, between them or many decades later deal with the extreme and everyday experiences, with shattered worlds of individuals, ethnicities, and nations.

SWK302H1 - Aging, Law and Policy

Hours: 36L

This course will examine selected areas in aging that reflect current issues and future directions with respect to law and health/social policy, and will delve into how they are impacted in the time of COVID-19. The focus will be on essential elements of the law and policy and their links to the context of aging in Canada. The course will consider "issues on the ground" where each topic will be explored from "alternative viewpoints", presenting both a legal and policy perspective with the aim of making connections between law, policy and current best practices. The longstanding debate about whether the consequences of individual and population aging should be viewed as private troubles or public issues continues to influence law and policy in the areas of health care, community services, income security and housing,

Introduction

Sociology's key principle is that patterned social relationships create opportunities for, and place constraints on, human action. The influence of this idea is widespread. New research agendas in law, literature, economics, and other disciplines reflect the notion that beyond individual motives, goals, values, beliefs and emotions, patterned social relationships help to make us who we are. Our courses and faculty research examine how patterned social relationships shape and are shaped by gender roles and families; health; immigration and ethnic relations; labour markets, work and social inequality; political structures and processes; crime, law and deviance; culture; cities; and networks, and communities.

To test explanations regarding the influence of social relationships on various aspects of human behaviour, sociologists collect and analyze observational, survey, experimental, and historical data. Accordingly, the sociological perspective and the research skills learned by studying sociology prepare students for a wide variety of careers in industry, government, education, politics, health and journalism. Medical, legal, and environmental fields report an increasing need for sociologists. Municipal, provincial and federal governments hire in areas like urban sociology, community relations, policy and planning, and statistical analysis. In private business, sociologists work in management consulting firms and polling organizations, as well as in labour relations and human resources.

A professional career in sociology requires training beyond the undergraduate level. However, the critical, analytical and research skills that undergraduate sociology students learn open many employment opportunities. Over a third of Canadian undergraduates in

sociology go on to be employed in business, finance and administrative occupations, and just under a third in government service, social science, and educational fields.

Regarding Sociology Programs

Enrolment in sociology programs is limited. Consult the [Arts & Science Program Toolkit](#) for application procedures.

NOTE 1: Obtaining a combined average of 65% or more in [SOC100H1](#)+[SOC150H1](#) is required for entry into the sociology major and minor programs. Entry to the sociology specialist program at the end of the first year requires a minimum combined average of 80% in [SOC100H1](#)+[SOC150H1](#). **Achieving the minimum grades does not guarantee acceptance into the programs. Credit for higher-level SOC courses will not waive these requirements.**

NOTE 2: Transfer credits of SOC1**H without exclusion cannot be used to meet program admission or requirements.

Sociology Programs

Sociology Specialist (Arts Program) - ASSPE1013

Enrolment Requirements:

This is a limited enrolment program. Note there are different options depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits. Students interested in the Sociology Specialist typically apply and enroll from the Sociology Major.

For students who have completed 9.0 or more credits:

Variable Minimum Grade Average

A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- [SOC201H1](#), [SOC202H1](#), and [SOC204H1](#)

To ensure that students admitted to the program will be successful, applicants with a final grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Special Requirement

- Students must be enrolled in the Sociology Major (ASMAJ1013)

For students who have completed between 4.0 and 8.5 credits:

Variable Minimum Grade Average

A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- ([SOC100H1](#) and [SOC150H1](#))

To ensure that students admitted to the program will be successful, applicants with a final grade average lower than 80% in these required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Note:

Students cannot combine a Sociology Specialist program with another Sociology program (Major or Minor) for their degree.

Completion Requirements:

(10.0 credits in Sociology)

1. [SOC100H1](#) and [SOC150H1](#)
2. [SOC201H1](#), [SOC202H1](#), and [SOC204H1](#)
3. [SOC251H1](#), [SOC252H1](#), and [SOC254H1](#)
4. 2.0 SOC credits from 300-level "Program-Only" courses ([SOC318H1](#) – [SOC354H1](#); Offerings will vary from year to year.).

5. 1.0 SOC credit at the 400-level

6. An additional 3.0 credits in Sociology at the 200 or 300-level (1.0 of which must be taken at the 300-level, i.e., 2.0 credits at the 200 or 300-level and 1.0 at the 300-level).

NOTES:

1. Students cannot take more than 1.0 credit at the 400-level without written permission from the Undergraduate Program Administrator.
2. Students cannot take more than 2.0 credits of the program-only courses without written permission from the Undergraduate Program Administrator.

Sociology Courses

SOC100H1 - Introduction to Sociology I: Sociological Perspectives

Hours: 24L/12T

This course will challenge your views on a wide range of issues that affect us all. It will also excite your interest in a unique sociological way of understanding your world. We will analyze the globalization of culture, emerging patterns of class, race, and gender inequality in Canada and internationally, criminal and deviant behaviour, and so on. You will learn to understand these and other pressing social issues by analyzing the way the social world is organized. These topics are further taken up in the sequel to this course, SOC150: Introduction to Sociology II: Sociological Inquiries.

Exclusion: [SOC101Y1](#), [SOC102H1](#), [SOC103H1](#), [SOCA01H3](#), [SOCA02H3](#); [SOC100H5](#)

Regarding Sociology Courses

Note:

Transfer credits of SOC1**H without exclusion cannot be used to meet program admission or requirements.

400-level Courses

Note: Sociology majors cannot take more than 0.5 SOC credit at the 400-level and Sociology specialists cannot take more than 1.0 SOC credit at the 400-level, without written permission from the Undergraduate Program Administrator.

Program-only Courses

Note: Sociology Majors cannot take more than 1.0 SOC credit of the program-only courses and Sociology Specialists cannot take more than 2.0 SOC credit of the program-only courses, without permission from the Undergraduate Program Administrator.

In the sequel to [SOC100H1](#): Introduction to Sociology I: Sociological Perspectives, this course will explore in more depth the topic of social inequality and the contemporary debates that animate sociology. We may like to think of ourselves as perfectly free but powerful social forces open up some opportunities and close off others, constraining our freedom and helping to make us what we are. By examining the operation of these social forces, sociology can help us know ourselves. The course is also about skills-building, skills useful not only for success at U of T, but beyond the walls of the university.

SOC196H1 - Thinking Through the Sociological Canon

Hours: 24L

Every year, students take courses on the theoretical foundations of sociology. Though they may not know it, they are participating in a process of disciplinary reproduction: core authors, texts, and ideas are defined as reference points for sociological debates. The boundaries

of what does – and does not – count as sociological questions are set and disciplinary fault-lines are subtly formed, and sometimes contested. In this seminar, we will explore the history of sociological thought and review both empirical and theoretical literature of the canon formation. In doing so, we will explore the structures, dynamics, and relationships of sociological theory, examining its patterns, variations, sources, and trends. Students will present their final paper in class. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

SOC197H1 - Future “Agents” & Social Relations: Considering Sociology in a World of Robots, Cyborgs, Bioengineered Agents & Tools

Previous Course Number: SII199H1S-L0391
Hours: 24L

Some people are worried that we risk becoming less human if we allow ourselves or others to engage in widespread self-transformation through the insertion of some kinds of devices into human bodies (e.g., computers, becoming cyborgs) or as a result of interventions such as genetic engineering, etc. Others are concerned that the use of some technologies, or barriers to their use, will increase global inequalities. In this course we will read, talk, and write about these and related issues. We will take a sociological approach, which means that we will attend to contextual forces that shape practices, and material flows, and the meaning of objects. Students will present their final paper in class. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

SOC198H1 - How the Social Informs the Political

Hours: 24L

How are people's political attitudes and behaviours influenced by their diverse social contexts? This seminar will strive to provide key tools to answer this question. Together, we will consider the influence of diverse familial, class, racial, educational backgrounds along with geographic, network, and generational differences. Students will read and discuss wide-ranging empirical studies on the role played by social structural factors for varied political outcomes, including polarization, cleavage

formation, progressive shifts, and traditional belief consolidation. Students will also write and present a final paper in class. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

SOC199Y1 - How We Use Time in Everyday Life

Hours: 48S

This seminar examines how people use time in their everyday lives: the content, the interpersonal and structural circumstances, and the implications. The seminar will include an examination of seminal writings about people's use of time and hands-on practice in the strategies and techniques of analyzing available data, including the formulation of questions and approaches to answering them. Students will acquire an appreciation not only of the concept of time and how it helps explain important issues in the social sciences but also of how they use time in their daily lives and how time-use analysis can help them better understand many situations. Several skills will be developed in this seminar, including reading, writing, expressing points of view, and asking and answering research questions by using numerical data and computers to organize, analyze, and show results clearly. Restricted to first-year students. Not eligible for CR/NCR option.

SOC209H1 - Sexuality and Modernity

Hours: 24L

This course examines questions related to sexuality, with a special focus on the social construction of sexual identity, practice, community and desire. To do so, we proceed self consciously with a critical analysis of the modern study of sexuality, and the ways in which sexual science, as a kind of social practice, has affected the construction and regulation of sexual orientation.

Prerequisite: SOC100H1

Exclusion: SOC395H1 (taken in Winter 2015, Winter 2016), SOC387H1 (taken in Fall 2016, Fall 2017), SOC386H1 (taken in Winter 2018)

Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

SOC210H1 - Sociology of Race and Ethnicity

Hours: 24L

The course explores the concepts of race and ethnicity and major theories to understand race and ethnic relations.

Prerequisite: SOC100H1
Exclusion: SOC210Y1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

SOC212H1 - Sociology of Crime & Deviance

Hours: 24L

This course provides an overview of the study of crime and deviance. We critically examine how scholars have gone about studying crime and deviance (the methods they use and the statistics they employ) as well as the major sociological explanations for crime and deviance. We also consider the empirical evidence as it relates to the validity of these explanations and some of the policy fallout from different theoretical approaches.

Prerequisite: SOC100H1
Exclusion: SOC211H5
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

SOC213H1 - Sociological Social Psychology

Hours: 24L

This course provides an introduction to the systematic study of the influence of individuals, groups, and society on individuals' thoughts, feelings, and behaviours from a sociological perspective. The course emphasizes interaction among individuals, between an individual and a group, or among groups, all situated within particular social contexts. One core emphasis involves the ways that individual-level processes contribute to explaining social

inequality in social groups and organizations. Topics include identity processes, social cognitions, attitudes, emotions, status processes, power relations, legitimacy, and justice.

Prerequisite: SOC100H1
Exclusion: PSY220H1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

SOC214H1 - Sociology of the Family

Hours: 24L

This course examines diverse family patterns, to show the economic, political and cultural factors that influence families. A brief social history of family paves the way for an examination of the various family patterns common in Canada today. Special attention is paid to the gender relations at the heart of family.

Prerequisite: SOC100H1
Exclusion: SOCB49H3; SOC244H5
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

SOC218H1 - Asian Communities in Canada

Hours: 24L

The course will explore the structures and processes of Asian communities in Canada. Historical development of various Asian communities will be explored.

Prerequisite: SOC100H1
Exclusion: SOC342Y1/ SOC394Y1
Recommended Preparation: SOC150H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

SOC220H1 - Social Stratification

Hours: 24L

This course is concerned with the causes and consequences of economic inequality. More specifically, it explores how achieved and ascribed characteristics are related to social class and related economic outcomes. Although some of the material will be comparative and

pertain to modern Democracies generally, emphasis will be on Canadian society.

Prerequisite: [SOC100H1](#)

Mode of Delivery: In Class

SOC230H1 - Sociology of Education

Hours: 24L

In advanced economies, schooling is a near-universal and highly structured institution. During the most impressionable times in their lives, children and adolescents go nearly every day to sit in the same pattern of classes with the same peers. In theory, students both within and across schools are supposed to learn the same things, at approximately the same time, and engage in similar rituals. And yet, this level of standardization often leads to substantively different outcomes across groups. This course investigates the structure of schools and the achievement hierarchies within and across them.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

SOC240H1 - Sociology of Law

Previous Course Number: SOC293H1

Hours: 24L

This course asks students to think critically about the role of law in society, and to develop a sociological understanding of law and legal institutions. The course will include theoretical approaches to understanding the role of law and legal authority, and the constitutive ways in which law affects, shapes, and is negotiated in everyday life. In addition, attention will be paid to the legal profession, including empirical research on lawyers, legal careers, and their relationship to fields of practice, with an emphasis on the relationship between the structure of the legal profession and law as a democratic institution.

Prerequisite: [SOC100H1](#)

Exclusion: [SOC293H1](#) (Topics: Sociology of Law), offered in Summer 2018, Winter 2019, Summer 2019, [SOC396H1](#) (Topics: Sociology of Law), offered in Winter 2013

Mode of Delivery: In Class

SOC243H1 - Sociology of Health and Illness

Hours: 24L

This course examines (1) the social causes of illness and disease, (2) the experience of illness, and social processes that shape both of these issues, including medicalization. It focuses on population health, the relation between agency and structure, and macro-micro connections. Professional health care is discussed to the extent that it provides context for analyses of illness patterns and experiences.

SOC250Y1 - Sociology of Religion

Hours: 48L

This course will examine religious beliefs, practices, and experiences from a historical-sociological and comparative perspective. Classical and contemporary theories will be reviewed and applied to investigate such topics as: the social origins of religions; the formation of religious communities; heresies, schisms and the making of orthodoxies; secularization and fundamentalism; cults and new religious movements; religious regulation of the body and person; and the variable linkages of religion to politics, war, art and science.

Prerequisite: SOC100H1

Exclusion: RLG210Y1

Recommended Preparation: SOC150H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

SOC251H1 - Contemporary Sociological Theory

Hours: 24L/12T

A selective introduction to major contemporary thinkers and approaches whose ideas have achieved wide influence, as well as an on-going inquiry into the nature and role of sociological analysis. Restricted to sociology majors and specialists.

Prerequisite: SOC201H1 or SOC203H1

Exclusion: SOC376H1; SOC232H5

Recommended Preparation: SOC150H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

SOC252H1 - Intermediate Quantitative Methods in Sociology

Hours: 24L/24T

Provides students with the opportunity to develop an understanding of the logic of multivariate analysis by applying various strategies for the analysis of complex multivariate data. Restricted to sociology majors and specialists.

Prerequisite: SOC202H1

Exclusion: SOC300H1, ECO220Y1, PSY202H1, STA221H1

Recommended Preparation: SOC150H1

SOC305H1 - Sociology of Professions

Hours: 24L

Becoming a professional (doctor, accountant, lawyer, engineer, nurse, etc.) remains a coveted goal for many young adults and their parents. But what is a profession, and what do these disparate groups have in common? This course lays the groundwork for understanding how the "professional projects" define professions, limit entry, create internal inequalities and try to maintain their prestige. The role of policy is key to our understanding of the professions, and we will focus on the role of policies in the creation of professions, in the substance of professional work such as ethics, autonomy and commercialism, and on the role of policies in addressing social concerns of inequality and diversity in the professions.

Prerequisite: 1.0 SOC credit at the 200+ level
Exclusion: SOC322H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

SOC306H1 - Economic Sociology

Hours: 24L

This course offers a sociological account of economic phenomena. It examines the sociological perspectives on production, consumption, exchange and distribution, economic crises, and other economic matters. In addition to exploring economic behavior in the corporate and financial worlds, the course also examines behavior in households, markets for intimacy, and illegal markets.

Prerequisite: 1.0 SOC credit at the 200+ level

SOC309H1 - HIV and AIDS: Social Policies and Programs

Hours: 24L

Explores and discusses specific theories of action. Applies theories to various factors associated with AIDS/HIV. Examines political, scientific, health, social, economic, and cultural environments. This course forces students to examine the hidden theoretical assumptions surrounding AIDS/HIV.

Prerequisite: 1.0 SOC credit at the 200+ level
Exclusion: SOC309Y1, SOC324H1
Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

SOC310H1 - Sociology of Atrocities

Previous Course Number: SOC397H1
Hours: 24L

This course focuses on the sociology of atrocities. We focus on the range of social actors and processes involved when atrocities occur, how we identify, name, and respond to atrocities (such as genocide or crimes against humanity), the behavior of bystanders and intervenors, cultural trauma and the effects of atrocities, and processes of commemoration. We investigate the collective and social dynamics to try and explain the role of individuals, groups, and institutional actors in committing atrocities, including the role of group identities, bureaucracies, collective decision-making, shared repertoires, legacies of hate, and peer networks. We study the role of other actors – in particular legal institutions, but also humanitarian bodies, journalists, and others – in identifying, naming and sometimes responding to these atrocities, along with sociological evidence about how they do so and the efficacy of any such response.

Prerequisite: 1.0 SOC credit at the 200+ level
Exclusion: SOC330H1, SOC397H1 (Selected Topics in Sociological Research: International Criminal Justice & Atrocities), offered in Fall 2013, Winter 2015 and Winter 2016

Mode of Delivery: In Class

SOC312H1 - Population and Society

Hours: 24L

This introductory course examines Canada's population in a global context, covering a broad range of population issues and perspectives. Topics include (a) demographic data and methods, (b) population composition in terms of age, sex, and nuptiality, (c) demographic processes of fertility, mortality, internal and international migration, (d) the relationship between population change and urbanization, and (e) the role of social policy on population change. For all course topics, the instructor will examine historical and cross-national trends and review proposed explanations.

Prerequisite: 1.0 SOC credit at the 200+ level

SOC313H1 - Social Control

Hours: 24L

This course examines how society has gone about controlling specific types of deviants (e.g., gang members, sex and drug offenders) and acts of deviance (e.g., organized crime, the deviance of social control agents). In examining these individuals and acts, attention is also directed to why they are defined as deviant and sanctioned, and why some types of deviance are less likely to be detected and sanctioned than others. Finally, consideration is also given to a range of sanctions that have been used to control deviance and the empirical evidence on their effectiveness.

Prerequisite: 1.0 SOC credit at the 200+ level
Exclusion: SOC326H1
Recommended Preparation: SOC212H1
Distribution Requirements: Social Science

Mode of Delivery: In Class

SOC315H1 - Domestic Violence

Hours: 24L

This course will provide an overview of the different forms of domestic criminal violence, concentrating primarily on intimate partner violence and child abuse. We will focus on the methodological problems in assessing the nature and extent of these types of violence, the risk factors and correlates of both offending and victimization and the theoretical explanations that have been offered for these

crimes. We also consider the social and legal responses to intimate partner violence and child abuse.

SOC318H1 - Theories of Stratification

Hours: 24L/12T

Why do some people have more resources than others? Who winds up at the top of economic hierarchies, and who winds up at the bottom? These are the primary questions for the study of stratification. In this course, we focus primarily on the most influential contemporary sociological theories of status attainment and gender inequality, with additional but briefer treatments of the central theories on other topics (e.g., poverty and the welfare state, networks, rents, racial inequality). This is a program-only course and is restricted to Sociology Majors and Specialists.

Hours: 24L/12T

This course examines how society has gone about controlling specific types of deviants (e.g., gang members, sex and drug offenders) and acts of deviance (e.g., organized crime, the deviance of social control agents). In examining these individuals and acts, attention is also directed to why they are defined as deviant and sanctioned, and why some types of deviance are less likely to be detected and sanctioned than others. Finally, consideration is also given to a range of sanctions that have been used to control deviance and the empirical evidence on their effectiveness. This is a program-only course and is restricted to sociology majors and specialists.

SOC328H1 - Domestic Violence

Hours: 24L/12T

This course will provide an overview of the different forms of domestic criminal violence, concentrating primarily on intimate partner violence and child abuse. We will focus on the methodological problems in assessing the nature and extent of these types of violence, the risk factors and correlates of both offending and victimization and the theoretical explanations that have been offered for these crimes. We also consider the social and legal responses to intimate partner violence and child abuse. This is a program-only course and is restricted to sociology majors and specialists.

Prerequisite: SOC201H1, SOC202H1, SOC204H1 and 1.0 credit from SOC251H1, SOC252H1, SOC254H1

SOC329H1 - Social Movements

Hours: 24L/12T

This course introduces students to the sociological study of collective action. Students will explore how movements in a variety of historical and global contexts endeavor to produce social change. In this process, we will examine political and cultural opportunities and obstacles, organizational dynamics, resources, collective action frames, strategies and tactics. This is a program-only course and is restricted to sociology majors and specialists.

SOC330H1 - Sociology of Atrocities

Previous Course Number: SOC397H1

Hours: 24L/12T

This course focuses on the sociology of atrocities. We focus on the range of social actors and processes

involved when atrocities occur, how we identify, name, and respond to atrocities (such as genocide or crimes against humanity), the behavior of bystanders and intervenors, cultural trauma and the effects of atrocities, and processes of commemoration. We investigate the collective and social dynamics to try and explain the role of individuals, groups, and institutional actors in committing atrocities, including the role of group identities, bureaucracies, collective decision-making, shared repertoires, legacies of hate, and peer networks. We study the role of other actors – in particular legal institutions, but also humanitarian bodies, journalists, and others – in identifying, naming and sometimes responding to these atrocities, along with sociological evidence about how they do so and the efficacy of any such response. This is a program-only course and is restricted to sociology majors and specialists.

SOC336H1 - Transnational Asia

Hours: 24L/12T

This course explores how transnational flows of capital, labor, ideas, and culture are reconstituting the ways in which we organize our political, economic, and cultural life by particularly focusing on Asia, the region that has been at the center of this global transformation. How has the notion of the "transnational" evolved and invited critical re-evaluations? What has been the place of Asian countries in this global process and what political, economic, social, and cultural changes do they experience? By examining these questions, this course aims to enhance our understanding of contemporary Asian societies closely tied with each other and the rest of the world. This is a program-only course and is restricted to sociology majors and specialists.

SOC341H1 - Sociology of Scandals

Hours: 24L/12T

Scandals – corporate, political, or bureaucratic – pervade media reporting and public debate. This course takes up scandals as sociological events: what are the causes of scandals? How are scandals ‘made’? How are scandals represented? And what are the consequences of scandals: do they discredit some actors, and lead to cultural, institutional, and organizational change? Do they lead to reform, used for new professional mobilization, new forms of regulation and oversight, targeted for legal intervention, or do they generate new political shifts, or new memories or narratives? Or are they ignored? The course will also pay attention to how scandals are made public: leaks, investigations, whistleblowers, and media reporting, and the framing of events as scandals worthy of public condemnation. Finally, with scandals often thought of as singular, this course allows students to consider what is in common between these events. This is a program-only course and is restricted to Sociology Majors and Specialists.

Prerequisite: [SOC201H1](#), [SOC202H1](#), [SOC204H1](#) and 1.0 credit from [SOC251H1](#), [SOC252H1](#), [SOC254H1](#)

SOC349H1 - Deconstructing 'Muslim American' - Race, Nationalism, and Religion

Hours: 24L/12T

Since the 2016 U.S. presidential election, Muslim Americans have been once again been cast as both threatening "outsiders" as well as examples of what makes the United States a "nation of immigrants." What do these contestations teach us about how race, nationalism, and globalization shape immigrant identities? This course examines a range of topics, from everyday boundary-making to ongoing global politics pertaining to different Muslim groups in the United States, often drawing comparisons with Muslims in other Western countries. Course materials include theoretical overviews, research articles, survey reports, book chapters, newspapers, films, and T.V. shows. This is a program-only course and is restricted to sociology majors and specialists.

SOC372H1 - Transnational Asia

Previous Course Number: SOC395H1

Hours: 24L

This course approaches Asia from a transnational perspective to enhance our understanding of the complexities involved in Asia's contemporary transformations. By departing from traditional nation-state-oriented analyses, this class explores how Asia shapes and is shaped by trans-Pacific politics, war and colonial legacies, global capitalism, labor migration, international norms of citizenship, urban development, and flows of ideas and popular culture. By closely examining Asia's transnational interconnectedness, we question the prevalent notion of Asia and regional studies and highlight the contradictions and challenges Asia faces in its

political, economic, social, and cultural spheres. This critical approach is expected to offer a deeper investigation of Asia in and of itself while critiquing dominant assumptions and frameworks found in existing approaches to Asia.

Prerequisite: 1.0 SOC credit at the 200+ level

SOC373H1 - Deconstructing 'Muslim American' - Race, Nationalism, and Religion

Previous Course Number: SOC352H1

Hours: 24L/12T

Since the 2016 U.S. presidential election, Muslim Americans have once again been cast as both threatening "outsiders" as well as examples of what makes the United States a "nation of immigrants." What do these contestations teach us about how race, nationalism, and globalization shape immigrant identities? Taking Muslim Americans as a case study, this course will examine a range of topics, from everyday boundary-making to ongoing global politics pertaining to different Muslim groups in the United States, often drawing comparison with Muslims in other Western countries. More broadly, the course aims to unpack how various global and local/national forces shape the contours, dimensions, and meanings attached to an identity category. To that end, the course begins with some prominent sociological theories, such as intersectionality, double-consciousness, and Orientalism. We will apply these theoretical lenses to analyze issues of race, globalization, cultural citizenship, media representation, and political integration in Muslim American and immigrant experiences.

Prerequisite: 1.0 SOC credit at the 200+ level

Exclusion: SOC349H1, SOC394H1 (New Topics in Sociology: Deconstructing "Muslim American" - Race, Nationalism and Religion), offered in Winter 2019, SOC352H1 (New Topics in Sociology: Deconstructing "Muslim American" - Race, Nationalism and Religion), offered in Winter 2020

SOC389H1 - Sociology of Scandals

Hours: 24L

Scandals – corporate, political, or bureaucratic – pervade media reporting and public debate. This course takes up scandals as sociological events: what are the causes of scandals? How are scandals ‘made’? How are scandals represented? And what are the consequences of scandals: do they discredit some actors, and lead to cultural, institutional, and organizational change? Do they lead to reform, used for new professional mobilization, new forms of regulation and oversight, targeted for legal intervention, or do they generate new political shifts, or new memories or narratives? Or are they ignored? The

course will also pay attention to how scandals are made public: leaks, investigations, whistleblowers, and media reporting, and the framing of events as scandals worthy of public condemnation. Finally, with scandals often thought of as singular, this course allows students to consider what is in common between these events.

SOC408H1 - Advanced Studies in Organizations

Previous Course Number: SOC489H1

Hours: 24L

This course covers central issues in the field of organizational sociology. It explores different perspectives on why complex organizations look and operate the way that they do, and examines the social consequences of their behavior. The first part of the course focuses on the evolution of the modern firm. We will trace the history of different models of management and strategy, and evaluate their relative efficacy. The second part of the course examines how organizations shape, and are shaped by, their environments. The third part of the course will explore how organizational behavior influences social inequality, and how social inequality shapes the way that modern organizations function. We will make use of both social scientific analyses and Harvard Business School case studies. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC credit at the 300+ level

Exclusion: SOC489H1 (Topics: Sociology of Organizations), offered in Fall 2017 and Fall 2019

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

SOC409H1 - Sexuality and Research Design

Previous Course Number: SOC485H1

Hours: 24L

Research designs are much like jigsaw puzzles, but harder: they require scholars to carefully connect a variety of distinct yet intricately linked pieces into a thematically consistent, practical and defensible whole. Few tasks in the research process are as commonplace and as riddled with difficulty. This semester length course will provide a forum for students to compose a research design on the topic of sexuality using qualitative approaches that include in-depth interview and ethnography. Throughout the course, students will read a variety of works that describe the goals, procedures, and underlying logic of research design. These works will draw from articles and chapters on methodological problems and issues, and also from actual studies that use in-depth interview and ethnography in sexuality studies. Restricted to 4th-year sociology majors and specialists.

Prerequisite: 1.0 SOC credit at the 300+ level

Exclusion: SOC485H1 (Topics: Sexuality of Research Design), offered in Fall 2017, Winter 2019, Fall 2019, SOC497H1 (Topics: Sexuality of Research Design), offered in Fall 2016

SOC412H1 - Medicalization of Deviance

Hours: 24L

This course examines the sociological implications associated with the growing dominance of psychiatry over designating and managing the margins of 'normality' and 'deviance.' It covers the evolution of the DSM and rise of deinstitutionalization, the importance of stigma and symbolic interactionist understandings of psychiatric diagnoses, and the methods of social control used to mitigate risk and reduce social deviance within the psychiatric and criminal justice systems. Emphasis will be placed on understanding the social implications of mental health labels. Restricted to 4th-year sociology majors and specialists.

SOC448H1 - Sociology & Emotions

Hours: 24L

From social cohesion to intergroup violence, emotional processes influence social outcomes. Moral aspects of experience in particular are linked to emotions such as shame and pride. Students in this course will review major theories of, and a variety of empirical approaches to, the link between social and emotional processes. They will be encouraged to extend ideas and analyses in the published literature to new topics. Restricted to 4th-year sociology majors and specialists.

SOC460H1 - Global Inequalities and Contentious Politics

Previous Course Number: SOC495H1

Hours: 24L

Global Inequality and Contentious Politics: This is a seminar course designed to understand global inequalities and contentious politics. Inequality has been one of the primary subjects in sociological inquiries and its scope

naturally expands to a global dimension as our societies are increasingly shaped by international connections. This seminar focuses on understanding various manifestations of global inequalities intersected by international hierarchy, race, gender, and class. Yet, these divisions and injustices are neither static nor unchallenged as people react to these realities via divergent methods. This class will read major theoretical approaches to social movements and examine contentious mobilizations taking place in different geographies around the world to reshape the global order ridden with disparities. Empirical cases of contentious activism include anti-globalization protest, the Occupy movement, campaigns for migrant care workers, resistance against American military bases, and the Me Too movement. Restricted to 4th-year sociology majors and specialists.

SOC463H1 - Mental Health and Education

Previous Course Number: SOC493H1

Hours: 24L

In this course, we examine institutions of higher education as unique social contexts within which student mental health unfolds. In doing so, we will address mediating and moderating factors, which characterize the unique and varied socio-emotional experiences of students attending post-secondary. As such, we will distinguish and clarify social approaches to studying mental health – focusing on mentorship, funding, social support, academic demands and healthcare resources – from mental illness as characterized in medical disciplines. Students will be expected to read thoroughly and apply insights from the course to authentic mental health concerns facing institutions of higher education today. Restricted to 4th-year sociology majors and specialists.

SOC478H1 - Social Context of Public Policy

Hours: 24L

This course explores how policy processes and frameworks need to be evaluated in light of the social context in which they are developed. Factors to be considered include the interplay between public values and expectations and public policy; the implications of cultural diversity and demographic change, and understandings of ethical principles of conduct in public organizations. A related goal is to help students learn how to use empirical research to answer highly contested issues in policy circles and in public life. These objectives are pursued by introducing students to major trends in inequality in Canada, assessing these trends within a comparative context, reflecting on their normative implications, and examining alternative policy responses to these developments. Restricted to 4th-year sociology majors and specialists.

South Asian Studies

Introduction

Students study South Asia in an approach attentive to global formations. They are introduced to the study of South Asia—Bangladesh, India, Pakistan, Nepal, Sri Lanka—through a wide angle view of Asian modernities, political economies, and cultures, all the while delving into specialist close-ups of South Asia. With open access to comparative courses in the Contemporary Asian Studies program, students can learn from specialists in South, East, and Southeast Asia.

With a curriculum motivated by the moving present—the changing face of South Asia today—the South Asian Studies minor offers rigorous training in major debates and questions in the rich field of South Asian Studies, and provides a basic foundation for many directions of future study. From historical contexts of ethnic conflict, to postcolonial readings of ancient traditions, to the politics of religious and ethnic identities, to the workings of vast-scale democracy and capitalism, to the worlds of cinema and public culture, students are exposed to the dynamic landscapes—political, material, and mythic—that constitute South Asia today.

Students may also be interested in the closely connected Contemporary Asian Studies program.

South Asian Studies Courses

SAS114H1 - Introduction to South Asian Studies

Previous Course Number: SAS114Y1

Hours: 24L

An interdisciplinary introduction to South Asian Studies emphasizing inquiry and critical analysis, drawing attention to the specificities of individual nations as well as the factors (historical, political, economic and cultural) that define South Asia as a region. Some attention will be paid to the South Asian Diaspora.

Exclusion: [NEW114Y1](#), [SAS114Y1](#)

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

CAS200H1 - Introduction to Contemporary Asian Studies

Hours: 24L

This course is an introduction to Contemporary Asian Studies. It covers detailed case study material from South Asia, Southeast Asia, and East Asia. It introduces students to the interdisciplinary study of political, sociocultural and economic interactions among these regions, as well as the transnational forces shaping internal dynamics throughout Asia. In addition, it examines the ways that forces stemming from Asia are affecting global processes, pushing scholarship to engage questions about colonialism, nationalism, "race," religion, markets, urbanization, migration, and mass mediated culture. This course provides preparation for more advanced courses on Asia and globalization and provides an introductory gateway for the Contemporary Asian Studies major and minor. May be taken in the first year of studies.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

CAS201H1 - Global Asian Studies: Insights and Concepts

Previous Course Number: CAS200Y1

Hours: 24L

This course addresses Asia empirically in contemporary global formations and as an idea in the global imagination. It introduces students to concepts and theories central to scholarship on Asia and its transnational formations. It provides foundational theoretical and conceptual material to understand global issues as they play out in the politics, economies, cultures and contemporary social worlds of contemporary Asian sites. Interdisciplinary analytical and research concepts are introduced to provide area studies grounding. This course provides preparation to delve into deeper research on Asia connected to broad questions about the natures of democracy, authoritarianism, market formation, social justice, and the media of cultural expression. It informs students aiming to take more advanced courses on Asia and globalization and provides one part of the foundation for the Contemporary Asian Studies major and minor. [CAS201H1](#) introduces the theoretical and conceptual frameworks that are explored through further grounded empirical case studies in upper year CAS courses.

Exclusion: [CAS200Y1](#)

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

CAS202H1 - Global Asian Studies: Sites and Practices

Previous Course Number: CAS200Y1

Hours: 24L

This interdisciplinary course explores a variety of sites and topics in South, Southeast, and East Asia. It explores themes including contemporary and historical articulations of socio-economic development, (post)colonial political formations, urbanization processes, climate change, labour struggles, gender studies, migration, citizenship, and social justice. The course examines the diversity of Asian modernities, cross-regional linkages, and changing approaches to area studies over time. It provides a foundation for the Contemporary Asian Studies major and minor, preparing students for taking more advanced courses on Asia in the global context.

Exclusion: [CAS200Y1](#)

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

CAS310H1 - Comparative Colonialisms in Asia

Hours: 24L

This course analyzes the impact of colonialism in South, East, and Southeast Asia and the various ways in which pre-colonial traditions intersect with and reshape colonial and postcolonial process across the various regions of Asia. The course will examine the conjunctures of economy, politics, religion, education, ethnicity, gender, and caste, as these have played out over time in the making and re-making of Asia as both idea and place. Attention will be paid to postcolonial and indigenous theories, questions of 'the colonial' from the perspective of Asian Studies, and debates about the meaning of postcolonialism for the study of Asia now and in the future.

Prerequisite: 0.5 CAS credit at the 200-level
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

SAS318H1 - Colonialism and Tradition

Hours: 24L

This course analyzes the impact of colonialism in South Asia and the various ways in which tradition intersects with and has reshaped colonialism in postcolonial South Asia. The course will examine the role of religion, education, ethnicity, gender, and caste. Some attention will be paid to postcolonial and indigenous theory.

Prerequisite: Completion of 6.0 credits
Recommended Preparation: SAS114H1
Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

CAS320H1 - Comparative Modernities in Asia

Hours: 24L

Since at least the late 1700s, the effects of capitalism across the globe have profoundly transformed the landscapes of human livelihood, consumption, production and governance in Asia. While colonial empires have declined, new empires have emerged, and a growing number of countries have witnessed the rise of nationalism and independent states, social, political and technological revolutions, and most recently neoliberal globalization. This course theorizes and explores these dramatic changes in a comparative framework. It is aimed

at students wishing to better understand the great transformations of modern Asia in a global context.

Prerequisite: 0.5 CAS credit at the 200-level
Recommended Preparation: CAS202H1
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

CAS350H1 - Asian Youth Cultures

Hours: 24L

In focusing on youth in Asia, this course brings together two disputed cultural formations of substantial contemporary importance. Both youth and Asia are increasingly invoked on the global stage in support of a wide range of interests. Examining practices of young people and the idea of youth in the context of Asia requires critical attention to the promises and fears that attach to the rise of Asian economies, international demographic transitions, the growth of a global middle-class, increasing consumption disparities, changing immigration patterns, expanding technological skills, global/local environmental concerns, and young people's shifting political priorities and loyalties. The course may feature a significant amount of social theory, with authors such as Michel Foucault, Roland Barthes, Louis Althusser, and Stuart Hall.

Prerequisite: 6.0 credits
Recommended Preparation: 0.5 CAS credit at the 200-level
Distribution Requirements: Humanities, Social Science
Breadth Requirements: Creative and Cultural Representations (1)
Mode of Delivery: In Class

CAS360H1 - Asian Genders

Hours: 24L

This course will explore ways that gender is mobilized and produced in parts of Asia. It seeks to understand gender and sexuality in their diversity and in attempts to "fix" or locate it in various bodies and places. Attempts will be made to see how gender is made knowable in terms of sexuality, medicine, nation, class, ethnicity, religion, and other discourses. The course assumes a willingness to read challenging theory – such as the writings of Judith Butler, Michel Foucault, and Eve Sedgwick – and asks that students commit to regular attendance.

Prerequisite: 6.0 credits
Recommended Preparation: 0.5 CAS credit at the 200-level
Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

CAS370H1 - Asian Cities

Hours: 24L

This course offers a multidisciplinary perspective of urban life in Asia. The thematic focus will be on how the urban intersects with modernities and postcolonial formations. Drawing on recent scholarship in the social sciences and the humanities, we will examine the realignment of cultural, political, and economic forces associated with Asia's diverse processes of urbanization.

Prerequisite: 6.0 credits

Recommended Preparation: 0.5 CAS credit at the 200-level

Mode of Delivery: In Class

CAS400H1 - Interdisciplinary Research in Methods in Contemporary Asian Studies

Hours: 24S

This seminar addresses Asian worlds – In Asia, transnationally, and locally – to cultivate new approaches to global processes and problems. The course explores key Asian sites that open new configurations for studying interactions between economic/environmental development, political change, and migration and cultural politics. It provides an advanced and systematic overview of the research methodologies that students have been

exposed to throughout the CAS program. These include historical-archival, ethnographic, visual/media, and statistical/quantitative methods that allow us to map Asian political, economic, and cultural formations, and through them, global challenges. The seminar builds interdisciplinary conversations attentive to both critical problematizing and problem-solving, to qualitative and applied projects. It is the required capstone to the Contemporary Asian Studies major.

Prerequisite: 1.0 200-level CAS credit and 1.0 300-level CAS credit

Exclusion: CAS400Y1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

CAS414H1 - The Public Event in Asia

Hours: 24S

This upper-level seminar will introduce students to the interdisciplinary study of popular culture in Asia through a focus on public events. Readings about all kinds of performances, including ritual, popular protest, festivals, sports, cinema, television, digital media events, and the performing arts will help students learn methodological tools to interpret the politics and meanings of public culture as it articulates with class, ethnicity, religious community, gender and caste. The course will furthermore familiarize students with a range of theoretical lenses for conceptualizing the different meanings of the “event” and the “public” from a perspective grounded in the histories of South Asia, Southeast Asia, East Asia, and their diasporas.

Prerequisite: At least 14.0 credits

Exclusion: NEW414H1, SAS414H1

Recommended Preparation: 1.0 credit in 200 level CAS courses; 1.0 credit in 300 level CAS courses

Distribution Requirements: Social Science

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

CAS420H1 - Asia and the New Global Economy

Previous Course Number: JPA420H1

Hours: 24S

This course explores the rise of Asia and its integration into the new global economy (labour, capitalism, knowledge economy, economic nationalism, inequality, gender, the meaning of capitalism, democracy, among others), exposing students to diverse disciplinary

perspectives. Geographical coverage is pan-Asian, including East, Southeast and South Asia.

Prerequisite: 14.0 credits

Exclusion: JPA420H1

Recommended Preparation: 1.0 200-level CAS credit and 1.0 300-level CAS credit

Distribution Requirements: Humanities, Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

CAS430H1 - Nationalism and Revolution in Asia

Hours: 24L

This course explores the far-reaching social, political, and cultural transformations in modern East, Southeast, and South Asia, focusing on the twentieth-century revolutionary histories and struggles to establish modern nation-states. The course adopts a topical approach within a chronological and comparative framework to highlight major historical movements and theoretical issues significant to the Asian experience.

Prerequisite: 14.0 credits

Exclusion: ASI430H1

Recommended Preparation: 1.0 200-level CAS credit and 1.0 300-level CAS credit

Distribution Requirements: Humanities, Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

CAS450H1 - Asian Pathways Research Practice

Hours: 24S

This seminar builds on the systematic overview of research methodologies of the Contemporary Asian Studies major and its capstone course, CAS400H1. CAS450H1 provides students with the opportunity to research questions of contemporary relevance stemming from Asia and its transnational networks and communities. Addressing a range of methodologies, including historical-archival, ethnographic, visual/media, and statistical/quantitative, the course emphasizes research experience outside the classroom, in Asia as well as locally with communities in Toronto. Students will develop their own research contributions while working collaboratively.

Prerequisite: 14.0 credits, including 1.0 200-level CAS credit and 1.0 300-level CAS credit

Exclusion: CAS400Y1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Introduction

Overview:

Spanish is the most widely spoken language of the Americas, with 130 million speakers in North America alone, more than 400 million worldwide, and with growing numbers in Canada. It is the fourth most widely spoken language in the world, and it is the official language in 21

countries on three continents: Europe, Africa, and Latin America.

Spanish opens the door to the study of a rich range of cultural expressions in literature, film, and art, from medieval and early modern Transatlantic world, to the literary and cultural productions of contemporary Spanish and Spanish American societies. The department offers a wide selection of courses at the introductory (second year), intermediate (third year) and advanced (fourth year) level in literature, culture, and linguistics. Students are encouraged to complement and expand on the training they receive in these courses by taking courses in other academic units. By the time of their graduation, our students acquire skills to read analytically fictional and non-fictional, literary and visual texts. They thus gain a deep knowledge of Hispanic cultures, as well as the skills to reflect critically on the world in which they live.

Spanish also opens the door to the study of the Romance language family. The Department offers students the opportunity to advance their language skills through the systematic reflection on the language structure, from the sound system to the morphology and syntax. Through a variety of courses with a theoretical and experimental focus in linguistics, students acquire basic skills that can be transferred to teaching or research programs. Through collaboration with other language and linguistics programs, students are provided with opportunities and training to conduct research in linguistics with a focus on the Spanish language.

What can I do with a degree in Spanish?

Plenty! Spanish is recognized as one of the four United Nations official languages. A degree in Spanish linguistics, literature, and culture opens up career paths both domestically and internationally. The skills that students acquire through the study of Spanish and of the Spanish-speaking world either prepare them directly for or are an asset in some of the following fields:

- media, journalism, marketing, public relations
- domestic government services and NGOs; foreign services and foreign affairs specialist; international development; political aid
- commerce, finances, tourism, and hospitality
- post-graduate studies and academic careers; cultural work
- editing, publishing, translation, education
- library and information sciences
- careers in the health profession, including medicine, speech pathology and audiology
- computational linguistics, speech recognition, and synthesis

The Department offers Specialist, Major and Minor programs, as well as language citation certificate.

How is the program structured?

For many students, our program begins with the language sequence.

Language sequence:

1. The Department reserves the right to place students in the language course best suited to their linguistic preparation.
2. Students who, in the department's assessment, have adequate knowledge of Spanish may be required to take Spanish literature, culture or linguistics course instead of a language course at any level.

The progression of courses in the language sequence is designed to accommodate a wide range of previous language experience. Students are placed in the appropriate language course based on their proficiency, as determined by the online placement test and departmental assessment.

Placement test:

Students who have studied Spanish before joining the department should take the on-line placement test by going to the following link:

<https://www.spanport.utoronto.ca/undergraduate/programs/spanish>

Please, read carefully the instructions that explain how to take the test. The placement test can be taken only once.

If you cannot assess your placement level from the available information, please contact the Associate Chair, Undergraduate Studies and you will receive personal advice for placement in the language sequence.

Students with no previous knowledge of Spanish: enrol in SPA100Y1.

The recommended sequence of language courses for those students who have had little or no previous training in the language is the following:

SPA100Y1 > SPA220Y1 > SPA320Y1 > SPA420H1

Students with previous knowledge of Spanish: take the placement test.

Students who have studied Spanish before joining the department may enrol in several courses – beginners', intermediate or advanced – depending on their background and their level of preparation. This includes those students who have traveled or lived briefly in the Spanish-speaking world.

The recommended sequence of language courses for those students who join the department having mastered a beginner's level of Spanish, including those who successfully completed SPA100Y1, is the following:

SPA220Y1 > SPA320Y1 > SPA420H1 or

SPA120Y1 > SPA320Y1 > SPA420H1

The recommended sequence of language courses for those students who join the department having mastered an intermediate level of Spanish, including those who have successfully completed SPA220Y1, is the following:

SPA320Y1 > SPA420H1

Native or bilingual speakers of Spanish:

Those students who have native fluency in Spanish because they have had a life-long exposure to spoken Spanish in an informal context (i.e., those who have lived in a Spanish-speaking country, or those who live in a Spanish-speaking family) – should enrol in SPA219Y1. Students who qualify for this course have distinctly different learning needs than those students who learned Spanish as a foreign language. They have a native knowledge of the language and are able to understand and speak Spanish, but they have had little or no exposure to written Spanish. The recommended language sequence for such students is the following: SPA219Y1 > SPA420H1

Students who have completed the equivalent of a high school degree or higher level of education in a Spanish-speaking country can skip the language sequence. However, if they have not studied descriptive grammar, they should enrol in SPA420H1. Please consult the Undergraduate Coordinator for placement advice.

Throughout the language sequence, stress is laid both on the cultural component of language acquisition and on the range of practical applications to which both the spoken and the written language may be put. Courses in business Spanish and in the structure of the Spanish language

provide an array of possible options for students in the upper years.

Literature, culture and linguistics courses:

Students are encouraged to enroll early on in their academic career in several second-year courses as they transition from the language sequence (SPA219Y1 / SPA220Y1 / SPA320Y1) into the third and fourth-year courses in literature, culture, and linguistics.

SPA258H1 is a foundational course for the students who plan to pursue a major or a specialist degree in Spanish. While permitting students to advance their skills in reading and composition, this course also introduces information literacy, and the terms and methods of literary analysis through the study of a wide selection of brief literary texts. Intermediate level students (SPA220Y1) who are comfortable reading short texts, and who have well-developed writing and speaking skills for the intermediate level, may take that course while enrolled in SPA220Y1 (preferable in their second semester of SPA220Y1). Others should complete SPA220Y1 before taking SPA258H1.

The other courses offered in the 200-level (SPA221H1 and SPA259H1) are not required for a Specialist or Major degree but are recommended for students who need to hone their language skills before advancing to the upper-level literature, culture and linguistics courses.

SPA221H1 (Spanish Pronunciation) is a companion course to SPA220Y1. Students who are interested in this course are best advised to enroll while taking SPA220Y1.

SPA259H1 is a course that introduces students to the techniques of cultural analysis. Although not a degree requirement, this course is a popular option for students enrolled in the program. It has the same language requirements as SPA258H1 (students can take it either while enrolled in SPA220Y1, or upon completion of SPA220Y1).

Following the language sequence, and upon successfully completing SPA258H1, students pursuing a specialist and major degrees will fulfill in the due course of their university career the remaining degree requirements:

- One 0.5 credit in Hispanic linguistics at the 300/400-level
- One 0.5 credit in Spanish peninsular literature at the 300/400-level
- One 0.5 credit in Spanish American literature at the 300/400-level
- SPA420H1
- SPA454H1 or SPA489H1

SPA420H1 (Advanced Grammar), SPA454H1 (Cervantes: Don Quixote) and SPA489H1 (Latin American

Transculturations) are the capstone courses in the Spanish program. Students should plan to take these courses towards the end of their university studies, as by that time they will have acquired language fluency, and become versed in the reading of extended and complex texts in Spanish, and will have honed their skills in textual analysis.

Cognate courses:

- Spanish Specialist: Up to 2.0 credits may be taken from cognate departmental or college offerings
- Spanish major: Up to 1.0 credit may be taken from cognate departmental or college offerings
- Spanish minor: Up to 1.0 cognate credit may be taken in Portuguese.

First-Year Foundation Seminars

The SPA195H1/ SPA196H1/ SPA197H1/ SPA198H1/ SPA199H1 seminars are designed to provide the opportunity to work closely with an instructor in a class of no more than thirty students. These interactive seminars are intended to stimulate the students' curiosity and provide an opportunity to get to know a member of the professorial staff in a seminar environment during the first year of study.

Faculty of Arts & Science Language Citation

The Department of Spanish and Portuguese participates in the Faculty of Arts and Science's Language Citation initiative for Spanish.

To obtain a Language Citation in Spanish, students will complete the two language-sequence courses that follow the introductory level: SPA220Y1, SPA320Y1, with a minimum of B- in each one of the courses to be considered.

Native and bilingual speakers should complete SPA219Y1 and two additional 0.5 credits in Spanish at the 300- or 400-level.

Spanish Courses

SPA100Y1 - Spanish for Beginners

Hours: 48L/48T

Introduction to the Spanish language for beginning students; overview of basic grammatical structures, development of vocabulary and oral and written expression. Not eligible for CR/NCR option.

Prerequisite: No previous knowledge of Spanish, or placement test results.

Exclusion: SPA120Y1, SPA219Y1, SPA319Y1, SPA220Y1, SPA320Y1, SPA420H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

Students should note that, as explained in this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

To request the citation, e-mail your request with your student ID number to the Associate Chair, Undergraduate Studies. Submit this request as soon as you have completed the courses that will be considered.

Regarding Spanish Courses

Note:

- **see also European Studies, Latin American Studies**

Notes

1. The Department reserves the right to place students in the language course best suited to their linguistic preparation.
2. Students who, in the department's assessment, have adequate knowledge of Spanish may be required to take Spanish literature, culture or linguistics course instead of a language course at any level.
3. All courses are taught in Spanish unless otherwise specified.

SPA120Y1 - Accelerated Spanish Through Community Engaged Learning

Hours: 96L

This course is a combination of SPA100Y1 and SPA220Y1 into one year. It is designed for students with prior knowledge of Spanish, but whose level is not appropriate to enroll in SPA220Y1. The focus is on the fundamentals of Spanish grammar and cultural aspects through community service learning with the local Spanish-speaking community of Toronto. Not eligible for CR/NCR option.

Prerequisite: High School Spanish; informal knowledge of Spanish

Exclusion: Native and Heritage Speakers, SPA219Y1, SPA100Y1 and SPA220Y1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SPA195H1 - Barcelona

Hours: 24L

A deep dive into the modern experience of one of the world's most compelling cities, this course considers Barcelona from a multidisciplinary perspective that includes study of its architecture, foodways, politics and response to mass tourism. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SPA196H1 - Class and Work in the Americas

Hours: 24L

This course examines economic and social inequalities in the contemporary Americas. We look at the ways in which class divisions are represented in academic studies, literature, film, and television. From Mexican *maquiladoras* to indigenous reservations, we consider the global poor and how recent changes in the character of work (automation, outsourcing, free trade zones) have had an impact on class divisions, especially for younger members of society. Can a renewed understanding of class and work help us to negotiate power, privilege, and inequality in this century? Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SPA197H1 - Cervantes and Imperial Spain

Hours: 24L

During the lifetime of Miguel de Cervantes, the Spanish monarchy governed an empire that extended across the globe, from its traditional lands in Europe to colonies in the Philippines and the Americas. We will examine the advantages and cost of imperial rule through reading a selection of Cervantes's works. Discussions will centre on such questions as the social impact of imperial wealth, the disruptive role of soldiers in civil society, contact with non-European cultures and the sub-cultures of Spanish society. Students will be introduced to the University of

Toronto's outstanding resources for studying the literatures and cultures of early modern Europe. Readings will include some of the Exemplary Stories and selected episodes of *Don Quixote*. Restricted to first-year students. Not eligible for CR/NCR option.

Mode of Delivery: In Class

SPA198H1 - A Brief History of Love in the Western World

Hours: 24L

This course introduces students to the ways in which the foremost thinkers in the history of the Western world (Plato, Ovid, St. Augustine, Ficino, Ebreo) conceived the idea of love; how did the notions of sexuality and gender play into that idea, and how did these notions carry on – or not – into our present understanding of love, sexuality and gender. While the background readings pertain to the general Western cultural heritage, the literary texts through which we will observe particular applications of the theories of love were produced by some of the outstanding 16th and 17th century Spanish authors (for ex. Rodríguez de Montalvo; Jorge de Montemayor; Miguel de Cervantes; Tirso de Molina, María de Zayas, Sor Juana Inés de la Cruz). All the readings will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

Mode of Delivery: In Class

SPA199H1 - More than Nachos and Tequila: Mexican History and Culture

Hours: 24L

This course aims at studying the rich history of Mexico from an interdisciplinary perspective. We will cover a wide range of issues, such as identity, modernity race, immigration, gender, sexuality, globalization, and iconic figures. The issue of identity as construed from the inside, but also from the outside and particularly from the English-speaking world (i.e. current US presidential views on the wall), will be widely examined. Course materials will range from chronicles of conquest to modern reflections and representations by historians, philosophers, filmmakers, musicians, writers and artist, among others. Restricted to first-year students. Not eligible for CR/NCR option.

Considers continuities and divisions between word and action, art and politics, in short works of fiction, theatre, film and performance projects. Includes work from twentieth-century and contemporary Mexico as well as Latin American cultural production from Canada and the United States.

Prerequisite: SPA120Y1 or SPA220Y1 or SPA219Y1 or Permission of the Department

Exclusion: SPA467H1 (Topics: Latin American Performative Practices), offered in Fall 2009, Winter 2018

Recommended Preparation: SPA258H1

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SPA389H1 - Central American Literature: Narratives of War

Hours: 24L

The 70s and 80s represent a period of armed struggle, civil war, and revolution in most of Central America. Through the study of specific novels, short stories, and films, this course analyzes the representation of violence, and the political repression generated by military conflicts. (Offered every three years)

Prerequisite: SPA120Y1 or SPA220Y1 or SPA219Y1 or Permission of the Department

Recommended Preparation: SPA258H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SPA398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

Mode of Delivery: In Class

Distribution Requirements: Humanities

Mode of Delivery: In Class

SPA398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Mode of Delivery: In Class

SPA399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

Mode of Delivery: In Class

SPA420H1 - Advanced Grammar

Hours: 36L

Linguistic analysis with the objective of improving students' command of Spanish grammar. Advanced review of traditional grammatical topics, including the verbal and pronominal systems, and Spanish copulas and embedded clauses. This course assumes familiarity with the grammatical terminology introduced in SPA320Y1.

Prerequisite: SPA219Y1 or SPA320Y1, or placement test.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SPA421H1 - The Structure of Spanish

Hours: 36L

Study of Spanish morphology and syntax: syntactic categories in Spanish, the structure and interpretation of

simple and complex sentences. (Offered in alternate years)

Prerequisite: [SPA420H1](#), or permission of department

Recommended Preparation: [SPA322H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

SPA422H1 - Sociolinguistics of Spanish

Hours: 24L

Study of linguistic variation across the Spanish-speaking world; central issues in phonological, morphological, and syntactic variation, analyzed from a geographical as well as from a social point of view. (Offered in alternate years)

Prerequisite: [SPA322H1](#) or permission of the department

Recommended Preparation: [SPA420H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

SPA423H1 - Spanish Phonology

Hours: 24L/12T

Theoretical and experimental approaches to Spanish phonology. Topics include: Spanish phonemic inventory, sound patterns, suprasegmentals (stress and intonation), synchronic and diachronic variation. Methods of data collection and analysis in the discipline, with practical applications. (Offered in alternate years)

Prerequisite: [SPA322H1](#) or permission of the Department

Recommended Preparation: [SPA420H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

SPA424H1 - Experimental Approaches to Hispanic and Lusophone Linguistics

Hours: 12P/24S

This course introduces students to theoretically grounded experimental approaches in the field of linguistics, with a particular focus on Hispanic and Lusophone linguistics. Students will receive training in the use of different experimental and corpus analysis techniques and will

discuss paradigmatic examples of research papers in the areas of phonetics-phonology and morpho-syntax. Throughout the course, they will conduct their own research project under the supervision of a specialist in the field. The course can be taught in English, Spanish and Portuguese.

Prerequisite: [SPA322H1](#)/ [PRT322H1](#)

Recommended Preparation: 300-level SPA/PRT linguistic courses

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

SPA425H1 - History of the Spanish Language

Hours: 24L

Have you ever doubted where Spanish came from? Or how did it become the language we know today? This course presents a detailed study of the external and internal history of the Spanish language in which this evolution occurred. Special attention will be paid to the linguistic progress of the language from its Latin roots to Modern Spanish and to the socio-cultural, historical, political and literary influence that have affected its linguistic evolution. The main features of the Spanish language evolution will be put in practice through a close reading of representative Medieval, Renaissance and dialectal texts.

Prerequisite: [SPA320Y1](#) or [SPA219Y1](#) or permission of instructor

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SPA435H1 - Fictions of Contemporary Spain

Hours: 24L

Study of major currents in narrative fiction during the last twenty years, a period of return to democratic government, the relaxing of censorship and the opening up of Spanish culture. Analysis of works from several generations of male and female writers. (Offered every three years)

Prerequisite: At least one 300-series half-course in Spanish.

Recommended Preparation: [SPA258H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SPA439H1 - Topics in Spanish Studies

Hours: 24S

A course on specific topics in Spanish studies, designed for advanced students. Course content and instructor are established on a yearly basis.

Prerequisite: [SPA220Y1](#)/ [SPA219Y1](#)

Recommended Preparation: [SPA258H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SPA454H1 - Cervantes: Don Quixote

Hours: 36L

Detailed study of Don Quixote as a foundational text in the European literary tradition, with attention to the conventions, genres, and literary techniques that inform the text.

Prerequisite: [SPA258H1](#); [SPA219Y1](#) or [SPA320Y1](#) or permission of the department

Exclusion: [SPA350Y1](#)

Recommended Preparation: [SPA352H1](#); Another 300-series half course in Spanish

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SPA456H1 - Transatlantic Hispanic Baroque: Crisis and Disenchantment

Hours: 24L

Study of the seventeenth-century Transatlantic Hispanic world that, after the epoch of discovery and expansion in the sixteenth century, faces economic and political downfall, accompanied by a social and spiritual crisis that results in the culture baroque. Through analysis of literary texts by such authors as Cervantes, Góngora, Quevedo, Sor Juana, Sigüenza, Gracián, Zayas and Calderón, we will discuss the meanings of the term "baroque", and of the phenomena that capture its *zeitgeist*.

Prerequisite: [SPA320Y1](#); at least one other 300-level course in SPA

Recommended Preparation: [SPA352H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural

Representations (1)

Mode of Delivery: In Class

SPA467H1 - Topics in Spanish-American Literature and Culture

Hours: 24L

A course on a specific topic in Spanish American culture, designed for advanced students. Course content and instructor are established on a yearly basis.

Prerequisite: At least one 300-series half-course in Spanish.

Recommended Preparation: [SPA258H1](#)/ [SPA259H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SPA475H1 - 21st Century Latin American Culture

Hours: 24L

Contemporary Argentine and Mexican authors and visual artists will be studied through their work, online visibility, and also the institutional and discursive structures that facilitate and shape their production. In-class Skype discussions with some of the artists. (Offered every three years)

Prerequisite: At least one 300-series half-course in Spanish.

Recommended Preparation: [SPA258H1](#)/ [SPA259H1](#)

Distribution Requirements: Humanities

Mode of Delivery: In Class

SPA480H1 - Icons and Iconography in Latin American Culture

Hours: 24L

Production, circulation and meaning of icons through Latin American literary and cultural contexts. Readings are selected from the period of independence to the present, and focus on the transformative ideological charge of cultural objects across geographic space and history. Focuses on political and socio-economic tensions between popular and elite spheres of cultural production, and on the risks and limits of iconographic representation. (Offered every three years)

Prerequisite: At least one 300-series half-course in Spanish.

Recommended Preparation: [SPA258H1/ SPA259H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SPA482H1 - 20th-Century Spanish American Narrative

Hours: 24L

Detailed study of the major movements in Spanish-American narrative, including magic realism, fantastic literature, women's writing, and testimonial literature, through analysis of representative novels and short stories. (Offered every three years)

Prerequisite: At least one 300-series half-course in Spanish.

Recommended Preparation: [SPA258H1/ SPA259H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SPA486H1 - Contemporary Caribbean Literatures and Identities

Hours: 24L

Literature studied as a socio-political space for the articulation of new concepts of cultural identity; examination of cultural change and aesthetic innovation in selected poetic, dramatic, and narrative texts from different national traditions (Cuba, the Dominican Republic, Puerto Rico). (Offered every three years)

Prerequisite: At least one 300-series half-course in Spanish.

Recommended Preparation: [SPA258H1/ SPA259H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SPA488H1 - Central America Postwar Narrative

Hours: 24L

The end of civil and military conflicts in the last decade of the 20th century reshapes the political landscape of Central America. Through selected readings of novels and

short stories from representative writers, issues of immigration, displacement, and globalization are discussed to understand these changes in the region. (Offered every three years)

Prerequisite: At least one 300-series half-course in Spanish.

Recommended Preparation: [SPA258H1/ SPA259H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SPA489H1 - Latin American Transculturations

Hours: 36L

This course integrates a series of contemporary debates in Latin American cultural studies with analysis of its transdisciplinary history and global permutations. Key topics of investigation within these debates may include indigeneity; coloniality, transculturation, and subalternity; empire, nation, and globalism; revolution, state discourse, and the popular; gender and sexuality; and the production of race.

Prerequisite: [SPA258H1](#); [SPA219Y1/ SPA320Y1](#)

Recommended Preparation: Another 300-series half-course in literature

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

SPA490H1 - Independent Study

Individual study with a member of staff on a topic of common interest including readings, discussion and written assignments. Not eligible for CR/NCR option.

Prerequisite: At least one 300-series half-course in Spanish, and written approval of the Undergraduate Coordinator

Distribution Requirements: Humanities

Mode of Delivery: In Class

SPA491H1 - Independent Study

Individual study with a member of staff on a topic of common interest including readings, discussion and written assignments. Not eligible for CR/NCR option.

Prerequisite: At least one 300-series half-course in Spanish, and written approval of the Undergraduate

Coordinator

Introduction

Statistical Science is the science of learning from data. Statistical science plays a large role in data science, which broadly encompasses computational and statistical aspects of managing and learning from large and complex datasets. Statistical theory and methodology have applications in almost all areas of science, social science, public health, medicine, engineering, finance, technology, business, government and industry. Statisticians and data scientists are involved in solving problems as diverse as understanding the health risk of climate change, predicting the path of forest fires, understanding the role of genetics in human health, and creating a better search engine. New ways of collecting, organizing, visualizing, and analyzing data are increasingly driving progress in all fields and have created demand for people with data expertise.

The Department of Statistical Sciences offers specialist, major, and minor programs in Statistics and a specialist program in Data Science and a specialist and a major program in Actuarial Science (please refer to the [Actuarial Science section](#) of the academic calendar for more

information on Actuarial Science programs). All Statistics programs offer training in statistical methods, theory, computation, and communication, as well as an understanding of the role of statistical science to solve problems in a variety of contexts. The specialist program in Statistical Science: Theory and Methods emphasizes probability and statistical theory as underlying mathematical frameworks for data analysis. The specialist program in Statistical Science: Methods and Practice has greater emphasis on collaborative statistical practice. Students in this program combine their study in statistics with a focus in a discipline that relies on statistical methods. The specialist program in Data Science is offered jointly with the Department of Computer Science. Students in this program acquire expertise in statistical reasoning and methods, in the design and analysis of algorithms and data structures for handling big data, in best practices for software design, and in machine learning. The major program in Statistics offers the most flexibility in choice of courses. This program gives students a broad understanding of the methods and computational and communication skills appropriate for effective statistical problem solving. The minor program in Statistics is designed to provide students with some exposure and skills in statistical methods which is intended to complement programs in other disciplines that involve quantitative research.

Arts & Science Internship Program

Starting Fall 2021, the new Arts & Science Internship Program (ASIP) stream is available to students who are entering Year 2 or Year 3 of study and enrolled in the Data Science Specialist, the Specialist in Statistical Science: Methods and Practice, and the Specialist in Statistical Science: Theory and Methods programs.

- Enrolment is limited and requires a supplemental application. Students enrolled in the ASIP stream will be required to complete mandatory Professional Development programming plus a minimum of 12 and maximum of 20 months (Year 2 entry) or a minimum of 12 and maximum of 16 months (Year 3 entry) of paid, full-time work experience. The time to degree completion for students enrolled in ASIP will normally be 5

years. There is an additional cost to participate in the ASIP stream.

- Students will typically be admitted to the ASIP stream for the Fall term of Year 2 of study, however, in exceptional circumstances students, including transfer students, who enrolled in an eligible program in the Summer after Year 2 can be admitted to the ASIP stream for the Fall of Year 3. Acceptance into an ASIP stream in Year 3 is dependent on space and requires approval of the student's academic unit and the Faculty of Arts & Science Experiential Learning & Outreach Support (ELOS) Office. Please refer to the [ASIP eligibility page](#) for further details.
- Further details about ASIP, including eligibility requirements and application procedures, can be found [here](#). Students may also visit the [ASIP webpage](#) or contact the ELOS office at asip@utoronto.ca.

Statistical Sciences Programs

Data Science Specialist (Science Program) - ASSPE1687

The field of Data Science is a combination of statistics and computer science methodologies that enable 'learning from data'. A data scientist extracts information from data, and is involved with every step that must be taken to achieve this goal, from getting acquainted with the data to communicating the results in non-technical language. The Data Science Specialist program prepares students for work in the Data Science industry or government and for graduate studies in Data Science, Computer Science, or Statistics. Students in the program will benefit from a range of advanced courses in Computer Science and Statistics offered by the University of Toronto, as well as from a sequence of three integrative courses designed especially for the program.

The Data Science Specialist program comprises three fundamental and highly-integrated aspects. First, students will acquire expertise in statistical reasoning, methods, and inference essential for any data analyst. Second, students will receive in-depth training in computer science: the design and analysis of algorithms and data structures for handling large amounts of data, and best practices in software design. Students will receive training in machine learning, which lies at the intersection of computer and statistical sciences. The third aspect is the application of computer science and statistics to produce analyses of complex, large-scale datasets, and the communication of the results of these analyses; students will receive training in these areas by taking integrative courses that are designed specifically for the Data Science Specialist program. The courses involve experiential learning: students will be working with real large-scale datasets

from the domain of business, government, and/or science. The successful student will combine their expertise in computer and statistical science to produce and communicate analyses of complex large-scale datasets.

Skills that graduates of the program will acquire include proficiency in statistical reasoning and computational thinking; data manipulation and exploration, visualization, and communication that are required for work as a data scientist; the ability to apply statistical methods to solve problems in the context of scientific research, business, and government; familiarity and experience with best practices in software development; and knowledge of current software infrastructure for handling large data sets. Graduates of the program will be able to demonstrate the ability to apply machine learning algorithms to large-scale datasets that arise in scientific research, government, and business; create appropriate data visualizations for complex datasets; identify and answer questions that involve applying statistical methods or machine learning algorithms to complex data, and communicating the results; present the results and limitations of a data analysis at an appropriate technical level for the intended audience.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

For students admitted to Arts & Science in the Year 1 Computer Science (CMP1) admission category:

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on the number of applicants. At least 20 spaces will be available each year for students applying from Year 1 Computer Science (CMP1) within 12 months of beginning their studies:

- CSC110Y1
- CSC111H1
- MAT137Y1/ MAT157Y1
- STA130H1/ STA261H1*

* Students are strongly encouraged to take STA130H1 in their first year. STA261H1 will be used in place of STA130H1 for program admission purposes if a student has not completed STA130H1 or if they have completed both STA130H1 and STA261H1 by the time they are being considered for admission.

To ensure that students admitted to the program will be successful, applicants will not be considered for admission with a grade lower than 70% in CSC110Y1, MAT137Y1, and STA130H1/ STA261H1, or lower than 77% in CSC111H1. (MAT157Y1 grades will be adjusted to account for the course's greater difficulty.) Obtaining these

minimum grades does not guarantee admission to the program.

For students admitted to other Arts & Science Year 1 admission categories:

Special Requirement

- Students who do not have the Computer Science Admission Guarantee must complete a supplementary application to be considered for the program.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- CSC148H1
- MAT137Y1/ MAT157Y1
- STA130H1/ STA261H1*

* Students are strongly encouraged to take STA130H1 in their first year. STA261H1 will be used in place of STA130H1 for program admission purposes if a student has not completed STA130H1 or if they have completed both STA130H1 and STA261H1 by the time they are being considered for admission.

To ensure that students admitted to the program will be successful, applicants with a grade lower than 70% will not be considered for admission. (MAT157Y1 grades will be adjusted to account for the course's greater difficulty.) Obtaining these minimum grades does not guarantee admission to the program.

Notes:

1. Requests for admission will be considered in the first program request period only.
2. Due to the limited enrolment nature of this program, students are strongly advised to plan to enroll in backup programs.
3. Students admitted to the program after second or third year will be required to pay retroactive deregulated program fees.

Completion Requirements:

(13.0-13.5 credits, including at least 1.5 credits at the 400-level)

First year (3.0-3.5 credits)

MAT137Y1/ MAT157Y1, MAT223H1/ MAT240H1 (MAT240H1 is recommended), STA130H1, (CSC108H1, CSC148H1)/ (CSC110Y1, CSC111H1)

Note: Students with a strong background in an object-oriented language such as Python, Java or C++ may omit

CSC108H1 and proceed directly with CSC148H1. There is no need to replace the missing half-credit for program completion; however, please base your course choice on what you are ready to take, not on "saving" a half-credit. Consult with the Computer Science Undergraduate Office for advice on choosing between CSC108H1 and CSC148H1.

Students in this program have the option to enrol in the Arts & Science Internship Program (ASIP) stream.

Second year (3.5-4.0 credits)

MAT237Y1/ MAT257Y1, STA257H1, STA261H1, CSC207H1, (CSC165H1, CSC236H1)/ CSC236H1/ CSC240H1 (CSC240H1 is recommended), JSC270H1 (Data Science I)

Note: CSC240H1 is an accelerated and enriched version of CSC165H1 plus CSC236H1, intended for students with a strong mathematical background, or who develop an interest after taking CSC165H1. If you take CSC240H1 without CSC165H1, there is no need to replace the missing half-credit for program completion; however, please base your course choice on what you are ready to take, not on "saving" a half-credit. Consult the Computer Science Undergraduate Office for advice on choosing between CSC165H1 and CSC240H1. CSC236H1 may be taken without CSC165H1 for students who completed CSC111H1.

Later years (6.5 credits/7.0 credits for students who have not completed STA130H1 (see 4.))

1. STA302H1, one of STA303H1 or STA305H1, STA355H1, CSC209H1, CSC263H1/ CSC265H1 (CSC265H1 is recommended), CSC343H1, CSC373H1, JSC370H1 (Data Science II)
2. STA314H1/ CSC311H1/ CSC411H1
3. 2.0 credits from the following list, including at least 1.0 credit at the 400-level (see below for additional conditions): STA303H1/ STA305H1 (whichever one was not taken previously), STA347H1, CSC401H1, STA414H1/ CSC412H1, CSC413H1/ CSC421H1, any 400-level STA course; JSC470H1 (Data Science III); CSC454H1, CSC490H1, CSC491H1, CSC494H1, CSC495H1, CSC494Y1.
4. If a student has not completed STA130H1 then an additional 0.5 credit 300+ level STA course that is not used towards any other program requirement must be completed.

The choices from 3 must satisfy the requirement for an integrative, inquiry-based activity by including at least 0.5 credit from the following: JSC470H1 (Data Science III); CSC454H1, CSC490H1, CSC491H1, CSC494H1, CSC495H1, CSC494Y1, STA490Y1, STA496H1, STA497H1, STA498Y1, STA499Y1. Students who complete the Arts & Science Internship Program (ASIP) stream or PEY Co-op will also meet this requirement.

Note: January 2022 was the last opportunity for Faculty of Arts & Science students to register for PEY Co-op. Students in Year 3 in the Fall/Winter 2021-2022 session were the last group of Faculty of Arts & Science students eligible to participate in PEY Co-op. Students starting Year 2 in Fall 2021 or later are only eligible to participate in the Arts & Science Internship Program stream.

Students will be advised to develop domain expertise in at least one area where Data Science is applicable, by taking a sequence of courses in that area throughout their program. Examples of such areas will be provided to students by program advisors and will form the basis for a later proposal for program Focuses (to be approved through internal Arts & Science governance procedures).

Specialist in Statistical Science: Methods and Practice (Science Program) - ASSPE2270

Statistical Science encompasses methods and tools for obtaining knowledge from data and for understanding the uncertainty associated with this knowledge. The purposes of the undergraduate programs are to: (1) equip students with a general framework for obtaining knowledge from data; (2) give students skills that they are able to flexibly apply to a variety of problems; and (3) to provide students with the ability to learn new methods as needs, data sources, and technology change.

The Specialist Program in Statistical Science: Methods and Practice is distinguished from the specialist program in Statistical Science: Theory and Methods through its emphasis on collaborative statistical practice and advanced exposure to an allied discipline. The program includes fundamental concepts in probability and statistical theory with mathematical prerequisites relevant to statistical practice. Students in the program acquire advanced expertise in statistical reasoning, methods, and computation, and complete a focus in another discipline that permits students to become conversant in that discipline to the extent that they can effectively collaborate. Students will also acquire advanced skills in communication, consultation and collaboration and an understanding of the role of mathematical thinking to support the development and evaluate the properties of statistical methods.

Enrolment Requirements:

This is a limited enrolment program. Note there are different admission criteria depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

For students who have completed between 4.0 and 8.5 credits:

Completed Courses (some with minimum grades)

The following courses are required:

- STA130H1
- CSC108H1/ CSC110Y1/ CSC111H1/ CSC120H1/ CSC148H1
- MAT223H1/ MAT224H1/ MAT240H1
- (MAT135H1 and MAT136H1) with a minimum grade of 73% in each/ MAT137Y1 (63%)/ MAT157Y1 (63%)

Variable Minimum Grade Average

A minimum grade average in STA130H1 and (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

Note:

Students who take (MAT135H1 and MAT136H1) will typically require a higher minimum grade average than students who take MAT137Y1/ MAT157Y1.

For students who have completed 9.0 or more credits:

Completed Courses (some with minimum grades)

The following courses are required:

- CSC108H1/ CSC110Y1/ CSC111H1/ CSC120H1/ CSC148H1
- MAT223H1/ MAT224H1/ MAT240H1
- MAT235Y1/ MAT237Y1/ MAT257Y1
- (STA237H1 and STA238H1) with a minimum grade of 73% in each/ (STA247H1 and STA248H1) with a minimum grade of 73% in each/ (STA257H1 and STA261H1) with a minimum grade of 63% in each.

Variable Minimum Grade Average

A minimum grade average in (STA237H1 and STA238H1)/ (STA247H1 and STA248H1)/ (STA257H1 and STA261H1) and MAT235Y1/ MAT237Y1/ MAT257Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

Note:

Students who take (STA237H1, STA238H1)/ (STA247H1, STA248H1) will typically require a higher minimum grade average than students who take (STA257H1, STA261H1).

Completion Requirements:

(10.5 or 11.0 credits plus a disciplinary focus requiring 2.0-3.5 credits)

First year:

1. STA130H1, CSC108H1/ CSC110Y1/ CSC111H1/

CSC120H1/ CSC148H1, (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1. (MAT137Y1/ MAT157Y1 recommended)

2. Recommended: introductory course in disciplinary focus. MAT223H1/ MAT224H1/ MAT240H1 is also strongly recommended to be taken in first year and is required preparation for MAT237Y1.

Second year:

3. MAT223H1/ MAT224H1/ MAT240H1, MAT235Y1/ MAT237Y1/ MAT257Y1, (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

((STA257H1, STA261H1) recommended)

Upper years:

4. STA302H1, STA303H1, STA304H1/ STA305H1, STA313H1/ STA314H1/ STA365H1, STA355H1

5. 1.5 credits from the following list: STA414H1, STA437H1, STA442H1, STA457H1, STA465H1, STA475H1, STA480H1, STA410H1

6. STA490Y1. Students who complete the Arts & Science Internship Program (ASIP) stream will also meet this requirement.

7. 1.0 credit from the following list: MAT224H1/ MAT247H1, MAT337H1/ MAT357H1, CSC148H1, CSC207H1, or any remaining 300+ level STA courses not used toward other requirements of this program - STA304H1, STA305H1, STA313H1, STA314H1, STA347H1, STA365H1, STA410H1, STA414H1, STA437H1, STA442H1, STA447H1, STA450H1, STA452H1, STA453H1, STA457H1, STA465H1, STA475H1, STA480H1, STA492H1, STA496H1/ STA497H1 (STA399H1 and STA399Y1 may be considered on a case by case basis with the approval of the Program Director.)

Disciplinary Focuses

Students in the Specialist Program in Statistical Science: Methods and Practice program must enrol in and complete at least one disciplinary focus.

To enrol in one or more focuses, students must first be enrolled in the Specialist Program in Statistical Science: Methods and Practice program. Enrolment instructions can be found on the [Arts & Science Program Toolkit website](#). Focuses can be chosen on ACORN after admission to the program, which begins in July.

Health Studies (ASFOC2270A): (2.0 credits) HMB342H1, at least 0.5 credit from HST209H1/ HST211H1/ HST250H1, and at least 0.5 credit from HST308H1/

HST310H1/ HST405H1/ HST330H1/ HST440H1/ HST464H1

Global Health (ASFOC2270B): (3.0 credits) BIO120H1, BIO130H1, HMB203H1, HMB265H1, HMB323H1/ HMB303H1/ HMB306H1/ JNH350H1/ HMB342H1, HMB433H1/ HMB406H1/ HMB462H1/ HAJ453H1/ HMB434H1 (Recommended: HMB433H1)

Health and Disease (ASFOC2270C): (3.0 credits) BIO120H1, BIO130H1, HMB202H1, HMB265H1, HMB302H1/ HMB322H1/ HMB312H1/ HMB342H1, HMB422H1/ HMB402H1/ HMB432H1/ HMB434H1/ HMB435H1/ HMB436H1/ HMB437H1/ HMB452H1/ HMB462H1

Fundamental Genetics and its Applications (ASFOC2270D): (3.0 credits) BIO120H1, BIO130H1, HMB201H1, HMB265H1, HMB301H1/ HMB311H1/ HMB321H1/ HMB360H1, HMB421H1/ HMB441H1/ HMB401H1/ HMB431H1 (Recommended: HMB421H1)

Neuroscience (ASFOC2270E): (3.0 credits) BIO120H1, BIO130H1, HMB200H1, HMB265H1, HMB300H1/ HMB310H1/ HMB320H1/ HMB360H1/ CJH332H1, HMB420H1/ JHA410H1/ HMB430H1/ HMB450H1 (Recommended: HMB420H1)

Social Psychology (ASFOC2270F): (2.0 credits) PSY100H1, PSY220H1, PSY322H1, PSY326H1/ PSY321H1/ PSY424H1/ PSY426H1/ PSY405H1/ PSY406H1

Cognitive Psychology (ASFOC2270G): (2.0 credits) PSY100H1, PSY270H1, PSY493H1, PSY372H1/ PSY405H1/ PSY406H1/ PSY475H1

Sociolinguistics (ASFOC2270H): (3.0 credits) LIN100Y1; two of LIN228H1, LIN229H1, LIN232H1 or LIN241H1; LIN351H1 and LIN456H1

Psycholinguistics (ASFOC2270I): (3.0 credits) LIN100Y1; two of LIN228H1, LIN229H1, LIN232H1 or LIN241H1; two of JLP374H1, JLP315H1 or JLP471H1

Astronomy & Astrophysics (ASFOC2270J): (2.5 or 3.0 credits) (PHY131H1 and PHY132H1)/(PHY151H1 and PHY152H1); AST221H1, AST222H1; (PHY252H1 and AST320H1)/ AST325H1/ AST326Y1

Sociology (ASFOC2270K): (2.5 credits) (SOC100H1 and SOC150H1) with a combined minimum grade average of 65%; SOC204H1; 1.0 credit from SOC303H1, SOC312H1, SOC336H1, SOC355H1, SOC363H1, SOC364H1.

Students interested in advanced study in Sociology should consider additional courses, in particular SOC201H1, SOC251H1, and SOC254H1

Ecology (ASFOC2270L): (3.0 credits) BIO120H1, BIO220H1; 2.0 credits from (with at least a 0.5 credit at the 400-level) EEB319H1/ EEB321H1/ EEB328H1/ EEB365H1/ EEB428H1/ EEB433H1/ EEB440H1 or ENV234H1/ ENV334H1/ ENV432H1

Evolutionary Biology (ASFOC2270M): (3.5 credits) BIO120H1, BIO130H1, BIO220H1; 1.5 credits from HMB265H1/ BIO260H1, EEB318H1, EEB323H1, EEB324H1, EEB325H1, EEB362H1, EHJ352H1; 0.5 credit from EEB440H1, EEB455H1, EEB458H1, EEB459H1, EEB460H1

Notes:

- BIO260H1 requires BIO230H1 as a prerequisite.
- Students in the Focus in Evolutionary Biology can request that HMB waive the co-requisite of BIO230H1 for HMB265H1 and that EEB waive the prerequisite of BIO230H1 for EEB460H1. These waivers will only be considered for students in the Applied Statistics specialist focus in Evolutionary Biology. All other pre- and co-requisites are required.

Economics (ASFOC2270N): (3.5 credits) (ECO101H1 and ECO102H1), ECO200Y1/ ECO206Y1, ECO202Y1/ ECO208Y1, 0.5 credit 300+ series ECO course with the exception of ECO374H1 and ECO375H1

Biochemistry (ASFOC2270O): (3.0 credits) CHM135H1, CHM136H1, BCH210H1, BCH311H1, BCH370H1, BCH441H1

Physics (ASFOC2270P): (2.5 credits) PHY131H1/ PHY151H1, PHY132H1/ PHY152H1, PHY224H1, PHY252H1/ PHY254H1/ PHY256H1, PHY324H1

Pharmacology and Biomedical Toxicology (ASFOC2270Q): (3.0 credits) BIO130H1 (70%), PSL300H1, PSL301H1, PCL201H1, PCL302H1, PCL345H1/ PCL362H1/ PCL469H1/ PCL470H1

Immunology (3.0 Credits) - BIO130H1 (70%), IMM250H1, IMM340H1, IMM350H1, IMM360H1, IMM429H1/ IMM430H1/ IMM431H1/ IMM435H1

Students in the Focus in Immunology can request that Immunology waive the BIO and BCH prerequisites for IMM340H1, IMM360H1, and IMM435H1. These waivers will only be considered for students in the Specialist in Statistical Science: Methods and Practice Focus in Immunology. All other pre- and co-requisites are required.

Specialist in Statistical Science: Theory and Methods (Science Program) - ASSPE2290

Statistical Science encompasses methods and tools for obtaining knowledge from data and for understanding the uncertainty associated with this knowledge. The purposes of the undergraduate programs are to: (1) equip students with a general framework for obtaining knowledge from data; (2) give students skills that they are able to flexibly apply to a variety of problems; and (3) to provide students with the ability to learn new methods as needs, data sources, and technology change.

The Specialist Program in Statistical Science: Theory and Methods emphasizes probability and the theory of statistical inference as underlying mathematical frameworks for statistical data analysis. Students in the program acquire advanced expertise in statistical theory and methods, as well as an understanding of the role of statistical science to solve problems in a variety of contexts. The successful student will also acquire skills in mathematical reasoning, computational thinking, and communication in the context of solving statistical problems.

Enrolment Requirements:

This is a limited enrolment program. Note there are different admission criteria depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

For students who have completed between 4.0 and 8.5 credits:

Students planning to take any of these courses should ensure they have the required prerequisites

Statistics Major (Science Program) - ASMAJ2289

Statistical Science encompasses methods and tools for obtaining knowledge from data and for understanding the uncertainty associated with this knowledge. The purposes of the undergraduate programs are to: (1) equip students with a general framework for obtaining knowledge from data; (2) give students skills that they are able to flexibly apply to a variety of problems; and (3) to provide students with the ability to learn new methods as needs, data sources, and technology change.

The Major in Statistics gives students a broad understanding of the statistical methods and computational and communication skills appropriate for effective statistical problem solving. The successful student will also acquire a general understanding of the role of mathematical thinking to support the development and evaluate the properties of statistical methods. While the Major is designed to complement study in an area of application of quantitative methods, students in the Major may choose to have a greater focus in probability and statistical theory through elective courses.

Enrolment Requirements:

This is a limited enrolment program. Note there are different admission criteria depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

For students who have completed between 4.0 and 8.5 credits:

Completed Courses

The following courses are required:

- STA130H1
- (MAT135H1 and MAT136H1) / MAT137Y1 / MAT157Y1

Variable Minimum Grade Average

A minimum grade average in STA130H1 and (MAT135H1 and MAT136H1) / MAT137Y1 / MAT157Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

Note:

Students who take (MAT135H1 and MAT136H1) will typically require a higher minimum grade average than students who take MAT137Y1 / MAT157Y1.

For students who have completed 9.0 or more credits:

Completed Courses

The following courses are required:

- CSC108H1 / CSC110Y1 / CSC111H1 / CSC120H1 / CSC148H1
- MAT223H1 / MAT224H1 / MAT240H1
- MAT235Y1 / MAT237Y1 / MAT257Y1
- (STA237H1 and STA238H1) / (STA247H1 and STA248H1) / (STA257H1 and STA261H1) / ECO227Y1

Variable Minimum Grade Average

A minimum grade average in (STA237H1 and STA238H1) / (STA247H1 and STA248H1) / (STA257H1 and STA261H1) / ECO227Y1 and MAT235Y1 / MAT237Y1 / MAT257Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

Note:

Students who take (STA237H1 and STA238H1) / (STA247H1 and STA248H1) will typically require a higher minimum grade average than students who take (STA257H1 and STA261H1) / ECO227Y1.

Completion Requirements:

(7.0 or 7.5 credits, including a 0.5 credit STA 400-series course)

First Year:

STA130H1, CSC108H1 / CSC110Y1 / CSC111H1 / CSC120H1 / CSC148H1, (MAT135H1, MAT136H1) / MAT137Y1 / MAT157Y1.

(MAT223H1 / MAT224H1 / MAT240H1 recommended in first year)

Second Year:

(STA237H1 and STA238H1 are strongly recommended. MAT221H1 may not be used for this requirement.)

Higher Years:

1. STA302H1
2. 0.5 credit from STA313H1 / STA314H1 / STA365H1 / STA347H1 / STA355H1
3. 0.5 credit from STA414H1 / STA437H1 / STA442H1 / STA457H1 / STA465H1 / STA475H1 / STA480H1
4. 1.0 credit from remaining STA300+ level courses not used toward other program requirements in the following list: STA303H1, STA304H1, STA305H1, STA313H1, STA314H1, STA347H1, STA355H1, STA365H1, STA410H1, STA414H1, STA437H1, STA442H1, STA447H1, STA450H1, STA452H1, STA453H1, STA457H1, STA465H1, STA475H1, STA480H1, STA490Y1, STA492H1, STA496H1 / STA497H1 (STA399H1 and STA399Y1 may be considered on a case by case basis with the approval of the Program Director).

Statistics Minor (Science Program) - ASMIN2289

Statistical Science encompasses methods and tools for obtaining knowledge from data and for understanding the uncertainty associated with this knowledge.

The Minor in Statistics is designed to provide students with some exposure and skills in statistical methods. It complements programs in other disciplines which involve quantitative research.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

First Year:

MAT133Y1 (70%)/(MAT135H1, MAT136H1)/MAT135Y1/MAT137Y1/ MAT157Y1; CSC108H1/ CSC110Y1/CSC111H1/ CSC120H1/ CSC148H1. (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1 is strongly recommended).

STA130H1 is also strongly recommended.

Second Year:

MAT223H1/ MAT224H1/ MAT240H1, (STA220H1/ STA221H1/ ECO220Y1, STA255H1)/(STA237H1, STA238H1)/(STA247H1, STA248H1)/(STA257H1, STA261H1)/ ECO227Y1

MAT223H1/ MAT224H1/ MAT240H1 recommended in 1st year

Higher Years:

STA302H1

About Courses in Statistical Sciences

The statistics course offerings are intended not only for students in statistics programs of study, but also to serve the needs of the many other disciplines that use statistical methods.

- The first-year seminar courses, STA197H1, STA198H1 and STA199H1, are designed to provide first-year students with the opportunity to work closely with an instructor in a small class setting. Note that these courses do not count toward a Statistics program of study.
- First year students wishing to enrol in a major or specialist program in the Department of Statistical Sciences must take STA130H1, which provides a broad introduction to statistical reasoning, data science, statistical computation and communication.
- The second year foundation courses (STA220H1, STA221H1, STA237H1, STA238H1, STA247H1, STA248H1, STA255H1, STA257H1, and STA261H1) are distinguished primarily by their mathematical demands, as indicated by the prerequisites. Students interested in pursuing more advanced study in probability and theoretical statistics should take STA257H1 and STA261H1. They are the most mathematically rigorous of the 2nd year courses and provide the greatest flexibility when choosing upper-year courses. They are required by students in the specialist programs in Statistical Science: Theory and Methods and Data Science. Students in the specialist program in Statistical Science: Methods and Practice or in the major program in Statistics may instead choose STA237H1 and STA238H1. Students in computer science programs of study can take STA247H1 and STA248H1. The courses STA288H1, STA220H1 and STA221H1 provide training in statistical reasoning and methods for students in other programs of study, with STA288H1 particularly designed for students in life science programs. Students interested in completing a minor in statistics can combine STA220H1 with STA255H1, which will provide preparation in probability and statistical theory sufficient for many of the upper year courses in statistical methods.
- Pre- and co-requisites are designed to ensure that students have the appropriate preparation for their courses. They are strictly enforced. However, exceptions can be considered for students who have taken an equivalent course at another university. If you have taken courses that are exclusions to pre- or co-requisite courses, though, you should be aware that these are not always equivalent to the requisite courses and may not be allowed.

Statistical Sciences Courses

STA130H1 - An Introduction to Statistical Reasoning and Data Science

Hours: 24L/24P

This course, intended for students considering a program in Statistical Sciences, discusses the crucial role played by statistical reasoning in solving challenging problems from natural science, social science, technology, health care, and public policy, using a combination of logical thinking, mathematics, computer simulation, and oral and written discussion and analysis.

Corequisite: MAT135H1/ MAT136H1/ MAT137Y1/

MAT157Y1. Strongly recommended: CSC108H1/

CSC110Y1/ CSC120H1/ CSC148H1

Exclusion: Any of STA220H1/ STA255H1/ STA238H1/

STA248H1/ STA261H1/ ECO220Y1/ ECO227Y1/

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

Mode of Delivery: In Class

STA197H1 - Thinking Better with Statistics

Hours: 24S

This course explores how our statistical intuitions and ways of thinking can let us down. There's no need to be a math whiz to be a better statistical thinker. Everyone can become a more critical consumer of claims presented in media, advertisements and by politicians—especially those relevant to our own health and wealth. This course uses real-world examples and tours common and avoidable statistical traps and tricks. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

Mode of Delivery: In Class

STA198H1 - Probabilities Everywhere

Hours: 24S

This course examines the meaning and mathematics of probabilities, and how they arise in our everyday lives. Specific topics may include: the nature of coincidences,

the concept of luck, games involving dice and cards, long run averages in casinos, margins of error in polls, the interpretation of medical studies, crime statistics, decision making, pseudorandomness, and Monte Carlo algorithms. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Grade 12 Mathematics

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

Mode of Delivery: In Class

STA199H1 - Statistical Evidence: Truth or Myth?

Hours: 24S

This course explores the impact Statistics has made and continues to make on everyday life through science, law, and the modern methods for information processing. Statistical principles will be illustrated using examples from real life including business, romance and health. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

STA201H1 - Why Numbers Matter

Hours: 36L

This course teaches non-science students the importance of quantitative reasoning to many different areas. It explores a variety of applications to such diverse subjects as economics, gambling, politics, poetry, graphics, music, medicine, demographics, sports, secret codes, and more, using only basic high school level mathematics combined with logical thinking.

STA220H1 - The Practice of Statistics I

Hours: 36L

An introductory course in statistical concepts and methods, emphasizing exploratory data analysis for univariate and bivariate data, sampling and experimental designs, basic probability models, estimation and tests of hypothesis in one-sample and comparative two-sample studies. A statistical computing package is used but no prior computing experience is assumed. Note: STA220H1 does not count as a distribution requirement course.

Exclusion: ECO220Y1/ ECO227Y1/ GGR270H1/ PSY201H1/ SOC300Y1/ STA261H1/ STA238H1/ STA248H1/ STA288H1/ EEB225H1/ STAB22H3/ STAB57H3/ STA215H5/ STA220H5/ ECO220Y5/ ECO227Y5/ STA258H5/ STA260H5

Recommended Preparation: Grade 12 Mathematics and one University course in BR= 3/ 4/ 5

Breadth Requirements: The Physical and Mathematical Universes (5)

Mode of Delivery: Online, In Class

STA221H1 - The Practice of Statistics II

Hours: 36L/12T

Continuation of STA220H1 (or similar course), emphasizing major methods of data analysis such as analysis of variance for one factor and multiple factor designs, regression models, categorical and non-parametric methods (Note: STA221H1 does not count as a distribution requirement course).

Prerequisite: STA220H1/ STA288H1/ PSY201H1/ GGR270H1/ EEB225H1/ STAB22H3/ STA220H5

Mode of Delivery: In Class

STA288H1 - Statistics and Scientific Inquiry in the Life Sciences

Hours: 36L/18P

Introduction to statistics and its connection to all stages of the scientific inquiry process. Issues around data collection, analysis and interpretation are emphasized to inform study design and critical assessment of published research. Statistical software is used to conduct descriptive and inferential statistics to address basic life sciences research questions.

Prerequisite: BIO230H1/ BIO255H1

Exclusion: STA220H1, PSY201H1, GGR270H1, ECO220Y1, ECO227Y1, SOC202H1, EEB225H1, HMB325H1, STA238H1, STA248H1, STA261H1, PCL376H1, STA215H5, STA220H5, STAB22H3

STA313H1 - Data Visualization

Hours: 24L/12P

An introduction to data visualization and the use of visual and interactive representations of data to support human cognition. This course covers visualization techniques and algorithms based on principles from graphic design, perceptual psychology, cognitive science, and human-computer interaction. Topics include: graphic design,

interaction, perception and cognition, communication, and ethics. Computational tutorials involve design review, implementation, and testing of information visualizations.

Prerequisite: CSC108H1/ CSC110Y1/ CSC120H1/ CSC148H1/ STA238H1/ STA248H1/ STA261H1/ ECO227Y1

JSC370H1 - Data Science II

Hours: 24L/24P

This course is **restricted to** students in the Data Science Specialist program. Students will learn to identify and answer questions through the application of exploratory data analysis, data visualization, statistical methods or machine learning algorithms to complex data. Software development for data science and reproducible workflows. Communication of statistical information at various technical levels, ethical practice of data analysis and software development, and teamwork skills. Topics will be explored through case studies and collaboration with researchers in other fields.

STA452H1 - Mathematical Statistics I

Hours: 36L

Statistical theory and its applications at an advanced mathematical level. Topics include probability and distribution theory as it specifically pertains to the statistical analysis of data. Linear models and the geometry of data, least squares and the connection to conditional expectation. The basic concept of inference and the likelihood function.

Prerequisite: MAT223H1/ MAT224H1/ MAT240H1/ MATA22H3/ MATA23H3/ MAT223H5/ MAT240H5/ MATB24H3/ MAT224H5; MAT235Y1/ MAT237Y1/ MAT257Y1/ (MATB41H3, MATB42H3)/ (MAT232H5, MAT236H5)/ (MAT233H5, MAT236H5); (STA257H1, STA355H1)/ STA347H1. (Note: MAT237Y1/ MAT257Y1; (MAT223H1, MAT224H1)/ MAT240H1 very strongly recommended.)

Mode of Delivery: In Class

STA453H1 - Mathematical Statistics II

Hours: 36L

Continuation of STA452H1: statistical theory and its applications at an advanced mathematical level. Topics include classical estimation, theory with methods based on the likelihood function and the likelihood statistics. Testing hypothesis and the evaluation of confidence from both a Bayesian and frequentist point of view.

Prerequisite: STA452H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

Mode of Delivery: In Class

STA457H1 - Time Series Analysis

Hours: 36L

An overview of methods and problems in the analysis of time series data. Topics include: descriptive methods, filtering and smoothing time series, theory of stationary processes, identification and estimation of time series models, forecasting, seasonal adjustment, spectral estimation, bivariate time series models.

STA465H1 - Theory and Methods for Complex Spatial Data

Hours: 36L

Data acquisition trends in the environmental, physical and health sciences are increasingly spatial in character and novel in the sense that modern sophisticated methods are required for analysis. This course will cover different types of random spatial processes and how to incorporate them into mixed effects models for Normal and non-Normal data. Students will be trained in a variety of advanced techniques for analyzing complex spatial data and, upon completion, will be able to undertake a variety of analyses on spatially dependent data, understand which methods are appropriate for various research questions, and interpret and convey results in the light of the original questions posed.

JSC470H1 - Data Science III

Hours: 24L/24P

This course is **restricted to** students in the Data Science Specialist program. Research topics and applications of data science methods will be explored through case studies and collaboration with researchers in other fields. Data analysis, visualization, and communication of statistical information at various technical levels, ethical practice of data analysis and software development, and teamwork skills.

Prerequisite: [JSC370H1](#), [STA314H1](#)/ [CSC411H1](#)/ [CSC311H1](#), [STA303H1](#)/ [STA305H1](#)

STA475H1 - Survival Analysis

Hours: 36L

An overview of theory and methods in the analysis of survival data. Topics include survival distributions and their applications, parametric and non-parametric methods, proportional hazards regression, and extensions to competing risks and multistate modelling.

Prerequisite: [STA303H1](#)

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

Mode of Delivery: In Class

STA480H1 - Fundamentals of Statistical Genetics

Hours: 36L/9P

Statistical analysis of genetic data is an important emerging research area with direct impact on population health. This course provides an introduction to the concepts and fundamentals of statistical genetics, including current research directions. The course includes lectures and hands-on experience with R programming and state-of-the-art statistical genetics software packages.

Breadth Requirements: The Physical and Mathematical Universes (5)

Mode of Delivery: In Class

STA490Y1 - Statistical Consultation, Communication, and Collaboration

Hours: 48L/48P

Through case studies and collaboration with researchers in other disciplines, students develop skills in the collaborative practice of Statistics. Focus is on pragmatic solutions to practical issues including study design, dealing with common complications in data analysis, and ethical practice, with particular emphasis on written communication. An application must be completed during

the priority enrolment period the summer before the course is offered. This online application is available in the Special Enrollment Course section of <https://utoronto.sharepoint.com/sites/ArtSci-STA/Undergrad/SitePages/Home.aspx>. Priority will be given to students who are completing all requirements of the Specialist in Statistical Science: Methods and Practice or the Applied Statistics Specialist that academic year. Space permitting, students in the Statistics Specialist, the Specialist in Statistical Science: Theory and Methods, the Data Science Specialist, or the Statistics Major will be considered for enrolment in the order in which they applied.

STA492H1 - Seminar in Statistical Science

Hours: 36S

This course is intended for students completing the Statistical Science: Theory and Methods Specialist program. Novel influential ideas and current research topics in statistics will be explored through readings and discussion. Content will generally vary from semester to semester. Student presentations and written reports will be required.

Prerequisite: [STA355H1](#) (Permission of instructor. An application is required to be considered for this course. Introduction

Trinity College offers Trinity One, a set of first-year courses, an independent studies program, and three interdisciplinary programs: Ethics, Society, and Law; Immunology; International Relations. The Major Program in Ethics, Society, and Law assembles courses offered by a variety of Departments and Colleges, including History, Philosophy, Political Science, Religion, Sociology, Woodsworth College and Trinity College. The Specialist and Major Programs in Immunology are assembled from offerings by the Departments of Biochemistry, Immunology, Molecular Genetics. The International Relations Program encompasses courses offered by the Departments of History, Political Science, Economics and Trinity College.

The Margaret MacMillan Trinity One Program

Trinity One provides first-year students with the opportunity to explore together significant issues and ideas pertaining to the conduct of human life and world affairs. Trinity One has six streams, each linked to a prominent aspect of the College's intellectual identity: Policy, Philosophy, & Economics; Ethics, Society, & Law; International Relations; Medicine & Global Health; Biomedical Health; and Environment & Sustainability. Each stream includes two seminar courses limited to 25 students. These courses foster small-group discussion and emphasize the development of critical-thinking, oral-presentation, writing and research skills. Co-curricular events enable students in the streams of Trinity One to hear guest speakers and to engage in informal conversation with one another and with their professors. Please see the Trinity One [webpages](#).

Ethics, Society, and Law

The Ethics, Society and Law program allows undergraduates to explore some of the most crucial questions facing contemporary society, and to do so by

means of an explicitly interdisciplinary approach. The humanities, social sciences and natural sciences all provide useful lenses for study and distinctive skill sets. Students are required to cover core areas in each of the streams; they additionally select their own areas of focus from optional courses in fields like philosophy, religion, anthropology, women and gender studies, economics, geography, political science, sociology and criminology. Engaging across disciplines, E, S and L majors acquire a strong critical preparation for well-informed, effective analysis and action, which will serve them professionally, locally and as members of the global community. Please see the ES&L [webpages](#).

International Relations

The study of international relations dates back to antiquity and remains one of the most vital disciplines in the academic community. Its purpose is to explore the enduring questions of the origins of war and the maintenance of peace, prosperity, sustainability and well-being, the nature and exercise of power within the international system, and the changing character of the participants and process and outcomes in international decision-making.

Drawing on the strengths of faculty members in History, Political Science, Economics and related disciplines, the International Relations program offers a structured and interdisciplinary education. The program provides students with knowledge of the historical and contemporary dimensions of the international system while introducing them to the methodologies employed in historical, political, economic and social scientific analysis.

The International Relations Specialist and Major are limited enrolment programs. For more information, please consult the International Relations Program [webpages](#).

Immunology Studies

For more information please see the entry under [Immunology](#) or the [Immunology departmental website](#).

Independent Studies

The Trinity College Independent Studies Program is open to students of all colleges. Only full-time students are eligible to apply. The program allows you to undertake extensive research into a topic that interests you, and is an especially suitable way of doing interdisciplinary work on subjects that are not directly part of the present university curriculum. Enrolment is open until the end of the first week of the semester in which the course will begin.

Participation in the program is restricted to students who have completed at least 10.0 credits and have maintained a CGPA of at least 3.50. Students applying to the Trinity

Program must already have the agreement of a full-time faculty member of the University to act as supervisor for either a half course or a full year Independent Study course. The maximum number of independent studies half courses for which a student may receive credit is one, and the maximum number of independent studies full course equivalents for which a student may receive credit is two, typically one credit in third year and one credit in fourth year. Permission to undertake Trinity independent studies projects for the equivalent of two full courses will normally be granted only to students with a cumulative GPA of at least 3.70. Your proposal must be approved by your supervisor and accepted by the director of the program.

Course numbers are as follows: Students enrolling for the first time register for one or more of [TRN300H1](#), [TRN301Y1](#), [TRN302Y1](#) (third year), or for one or more of [TRN400H1](#), [TRN404Y1](#), [TRN405Y1](#) (fourth year), as appropriate. Those enrolling for a second time register in one of [TRN400H1](#), [TRN404Y1](#), and [TRN405Y1](#), as appropriate. Enrolment in third year TRN independent studies courses is not a prerequisite for fourth year TRN independent studies courses but students who initially enrol in fourth year TRN independent studies courses may not subsequently enrol in third year TRN independent studies courses.

Students are enrolled in TRN independent studies courses by the Dean of Arts' office at Trinity College. Students should complete the enrolment approval process in enough time to be enrolled no later than the end of the first week of classes in the relevant term.

Please note that a TRN independent studies course is not a "directed reading" course. The expectation is that students should do original research and provide a report of this research as part of their evaluation.

Students are required to identify a second reader for their final reports, in addition to their direct supervisor, whose evaluation of the paper will form part of their final grade for the course. The second reader should also be a Faculty member.

Students are required to file a graded progress report with the director of the program no later than two weeks before the last date for dropping the course without academic penalty. All work including final reports must be submitted on or before the last day of classes. The supervisor and second reader will then grade the report and copies of the final essay or report, one graded by the supervisor and one independently graded by the second reader must be emailed to the Director within one week of the last day of classes.

For more information, please see the Independent Studies [webpage](#) or consult the director.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

For students who have completed 4.0 to 8.5 credits:

- 3.0 credits from BR=2 and/or BR=3 and/or TRN170Y1

To ensure that students admitted to the program will be successful, applicants with a grade average lower than 77% will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

For students who have completed 9.0 credits:

- A minimum grade average of 77% in 3.0 credits that count toward the program, including 1.0 credit from: ETH201H1, ETH210H1, ETH220H1, ETH230H1, PHL265H1, PHL271H1, PHL275H1, and POL200Y1.

To ensure that students admitted to the program will be successful, applicants with a grade average lower than 77% will not be considered for admission. Please note

that obtaining this minimum grade average does not guarantee admission to the program.

Completion Requirements:

(7.0 credits)

1. First year: While no specific courses are required in first year, course selection should take into account the program's admission requirements above, as well as the prerequisites for 200+ level courses students plan to take to complete the program.

2. Second year: PHL271H1, TRN203H1, and TRN204H1 are required courses that students are recommended to take in second year (their first year of registration in the program).

3. Third year: TRN303H1, TRN312H1

4. Fourth year: TRN412H1.

5. 1.0 credit from ETH201H1, ETH210H1, ETH220H1, ETH230H1, ETH350H1, ETH401H1, PHL265H1, PHL275H1, POL200Y1, to be taken in any year of registration in the program.

6. 3.0 credits from Groups A-D, including at least a 0.5 credit from each of Groups A-C and at least 1.5 credits at the 300+ level. Courses taken in fulfillment of requirement 5 above may not be counted toward the Group courses here.

Group A (Ethics)

N.B. (1) The above CRI courses are available only to students enrolled in the double major program Ethics, Society, and Law/Criminology. (2) Access to courses in the Ethics, Society, and Law program is not guaranteed; students must check prerequisites.

Note: Effective Fall 2021, courses associated with St. Michael's College's Mediaeval Studies program will have the new "MST" designator.

International Relations Specialist (Arts Program) - ASSPE1469

The study of international relations dates back to antiquity and remains one of the most vital disciplines in the academic community. Its purpose is to explore the enduring questions of the origins of war and the maintenance of peace, the nature and exercise of power within an international system, and the changing character of the participants in international decision-making.

Drawing on the strengths of faculty members in History, Economics, and Political Science, the International Relations Specialist Program offers a structured and interdisciplinary education. The program provides students with knowledge of the historical and contemporary dimensions of the international system while introducing them to the methodologies employed in historical, political and economic analysis.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- (ECO101H1 and ECO102H1) with a minimum grade of 63% in each, or ECO105Y1 with a minimum grade of 80%
- 2.0 credits from GGR112H1, HIS102Y1, HIS103Y1, MUN101H1, MUN102H1, MUN105Y1, POL101H1, POL106H1, POL107H1, POL109H1, TRN150Y1, TRN151Y1, TRN152Y1, VIC181H1, VIC183H1, VIC184H1, VIC185H1, with a minimum grade of 70% in each course.

To ensure that students admitted to the program will be successful, applicants with a final grade lower than the minimum grades stated above will not be considered for admission. Please note that obtaining these minimum final grades does not guarantee admission to the program; admission will be based on the average of the required courses.

Note:

Completing ECO105Y1 limits future enrolment options in ECO courses. First-year MAT courses are a prerequisite for many optional ECO courses in the IR Program Requirements listed below. Students are strongly advised to enrol in MAT133Y1/ (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1 if they wish to pursue ECO electives.

Completion Requirements:

(13.0 credits)

Consult the Office of the International Relations Program, room 310N, Munk School of Global Affairs, 416-946-8950.

Year 1 (3.0 credits):

1. ECO101H1 and ECO102H1, OR ECO105Y1

International Relations Major (Arts Program) - ASMAJ1469

The study of international relations dates back to antiquity and remains one of the most vital disciplines in the academic community. Its purpose is to explore the enduring questions of the origins of war and the maintenance of peace, the nature and exercise of power within an international system, and the changing character of the participants in international decision-making.

Drawing on the strengths of faculty members in History, Economics, and Political Science, the International Relations Specialist Program offers a structured and interdisciplinary education. The program provides students with knowledge of the historical and contemporary dimensions of the international system while introducing them to the methodologies employed in historical, political and economic analysis.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- (ECO101H1 and ECO102H1) with a minimum grade of 63% in each, or ECO105Y1 with a minimum grade of 80%
- 1.0 credit from GGR112H1, HIS102Y1, HIS103Y1, MUN101H1, MUN102H1, MUN105Y1, POL101H1, POL106H1, POL107H1, POL109H1, TRN150Y1, TRN151Y1, TRN152Y1, VIC181H1, VIC183H1, VIC184H1, VIC185H1, with a minimum grade of 70% in each course.

To ensure that students admitted to the program will be successful, applicants with a final grade lower than the minimum grades stated above will not be considered for admission. Please note that obtaining these minimum final grades does not guarantee admission to the program; admission will be based on the average of the required courses.

Note:

Completing ECO105Y1 limits future enrolment options in ECO courses. First-year MAT courses are a prerequisite for many optional ECO courses in the IR Program Requirements listed below. Students are strongly advised to enrol in MAT133Y1/ (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1 if they wish to pursue ECO electives.

Completion Requirements:

(7.5 credits)

Year 1 (2.0 credits):

1. ECO101H1 and ECO102H1, OR ECO105Y1
2. 1.0 credit from GGR112H1, HIS102Y1, HIS103Y1, MUN101H1, MUN102H1, MUN105Y1, POL101H1, POL106H1, POL107H1, POL109H1, TRN150Y1, TRN151Y1, TRN152Y1, VIC181H1, VIC183H1, VIC184H1, VIC185H1

Year 2 (2.5 credits):

1. ECO231H1 and ECO232H1, OR ECO200Y1/ ECO202Y1/ ECO206Y1/ ECO208Y1. Students should note that completing (ECO231H1 and ECO232H1) limits future enrolment options in ECO courses.
2. POL208H1
3. TRN250Y1

Trinity College First-Year Foundations

TRN191H1 - Disaster and Terrorism: Religion and Ethics at Ground Zero

Hours: 24S

In response to contemporary terrorist attacks and natural disasters, many are led to cry, "The world will never be the same!" How should such statements be evaluated? What impact do they have on social and political life? This course explores religious and cultural responses to human tragedy and cultural shock. Discussion will attend to debates over the meaning of suffering, public reactions to terrorism, the traumas of natural disasters, and the role of media in covering such events. These themes are engaged from the perspectives of ethics, cultural theory, religious studies, and theology. The course focuses on popular responses to events that include: the Lisbon Earthquake of 1755, the First World War, the Holocaust, Hurricane Katrina, the Japanese experiences of Hiroshima and Fukushima, 9/11, and more recent examples of terrorism and disaster. Attention will be given to concerns such as the impact of trauma on social and political debate, the function of religious discourse in the face of tragedy, the nature of ideology, and the relationship between religion and violence. A thematic concern throughout the course will be the nature of ethical commitment in the midst of confusion and social disruption. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

intended to stimulate the students' curiosity and provide an opportunity to get to know a member of the professorial staff in a seminar environment during the first year of study.

Trinity One Courses

Students participating in other Foundational Year programs (e.g., Vic One, Munk One) are excluded from Trinity One.

TRN192H1 - Public Health in Canada: Health for the 21st Century

Hours: 24L

This course deals with preventive care and population health. It will also move into new areas like healthcare and the environment (climate change) and the greening of healthcare. It will look at health as an extension of democracy – of how health extends individual rights beyond the political realm to the social realm, of how it can build social capital and knit populations together. It will look at areas inimical to health, 'detriments to health' and how economic inequality can lead to health inequality. Along with this it will look at ways of empowering the individual, the public as agent and a role of public engagement by major institutions. It will also push beyond the popular determinants of health to engage students in a paradigm on next steps, the future challenges in population health. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

TRN193H1 - Canadian Health Policy: Past, Present and Future

Hours: 24L

This is a health systems course. It deals with illness care, individual health, and health insurance. It will take a comparative and historical approach. We will look at the genesis of Canadian healthcare, our benefits and those other countries provide (e.g., pharmacare, dental care). We will look at indirect contributors like childcare and basic income. We will examine the public-private debate. We will also take some novel approaches. One is that the university has an expanded role in the 21st century, one that involves public outreach, a role that includes healthcare. Recent academic literature on healthcare notes that it is nation-building. We will look at why. We will examine some cutting-edge ideas, like integrated care, the learning health system, the concept of customer-

owners. We will explore whether our healthcare system needs to be anchored by 'institutions of excellence' and identify these. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

TRN194H1 - Literature and Wicked Problems

Hours: 24L

This course explores contemporary literature in relation to the interdisciplinary framework of "wicked problems." Research emphasizes that complex, entrenched problems, like government relations with Indigenous peoples or human impacts on the climate, involve interconnected systems and require approaches that cross disciplines and types of knowledge. The course examines the role of literary works (mostly 21st-century fiction) in addressing these issues of pressing concern to students as global citizens. Critical thinking, scholarly reading and database research are foundational skills that this course strengthens in order to prepare students for their writing in disciplines across the university. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

TRN195H1 - The Literature of Heroes and Horrors

Hours: 24L

This course explores contemporary literary works that redefine heroism in light of personal and cultural trauma. What does recent literature (mostly 21st-century fiction) show us about the nature of heroism in our time? To answer this question, the course examines theories of psychological trauma, studies in the field of positive psychology, and research on gothic and dystopian literature. Critical thinking, scholarly reading and database research are foundational skills that the course strengthens in order to prepare students for their writing in disciplines across the university. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

TRN196H1 - Joy and Resistance in Diverse Storytelling

Hours: 24L

"Can we speak about joy for once?" In contemporary literature from Black, Indigenous and People of Colour (BIPOC) authors across Canada and Turtle Island, there is a resurgence in diasporic stories that capture the joy and resistance of carving space for community against the mechanisms of the state. This course explores how BIPOC literature has intersected with social problems and activist movements, creating spaces for readers to reflect on their own lived experiences. Students will expand their creative thinking, critical reading and scholarly writing skills through multi-modal assignments that offer connections to current issues and community knowledge. Restricted to first-year students. Not eligible for CR/NCR option.

TRN197H1 - In the Shadow of the Vikings: Depictions of the Early Norse in Medieval, Modern, and Post-Modern Culture

Hours: 24L

Although rarely attested during the historical era when they were active, since the early nineteenth century the word "Viking" has been popularly applied to describe groups of Scandinavian adventurers who marauded along the frontiers of Medieval Europe: in this respect, the image of "the Viking" may be regarded as much a modern, as it is a medieval, creation. The legacy of historical "Viking activities" was a factor in the development of modern nation states in Scandinavia and the Baltic region, and their contributions to the heritage of people residing in Britain, continental Europe, the Middle East, and even the Atlantic coast of Canada have been and continue to be cited to the present day. Aspects of culture attributed to "the Vikings"—their assumed independence, courage, resourcefulness, and tenacity in the face of adversity, as well as the occult characteristics of their cosmology—have, for better and worse, inspired modern artists, writers, composers, intellectuals, explorers and even political leaders, and persist in present day literature, art, music, sport and popular culture as well. Why and how do elements of historic Viking culture continue to evoke traditions and characteristics popularly attributed to "the Vikings"? What are some implications of "Viking-ness" for those people in the post-Viking Age past and/or present who we may regard—or may regard themselves—as the "cultural descendants" of the Vikings? In this seminar,

participants will study selected cultural artifacts of the “post-Viking Age,” along with recent multidisciplinary research, to observe how various “post-Viking Age” cultures and subcultures have selectively appropriated elements of the “Viking” past. Restricted to first-year students. Not eligible for CR/NCR option.

TRN198H1 - The Viking Phenomenon: Commerce, Conflict, and Communication along Europe's Frontiers, 7th – 15th Century

Hours: 24L

Perspectives on the impact that the Scandinavian raiders and traders popularly referred to as “Vikings” had on European and World history continue to develop as the work of historians, archaeologists, linguists, and scientists expands our understanding of the past. Recent research has revised the traditional view of the “Vikings” as primarily marauding warriors; in its place, a more complex and nuanced conception of the implications that “Viking activity” had on the social, economic, and political development of the peoples with whom they came in contact has emerged. This seminar will consider the relationship between the traditional conception of the “Viking warrior” and recent research that suggests the broader impact that the “Viking Phenomenon” had upon the economic revival and sociopolitical development of medieval Europe and its frontiers. In the course of the seminar, we will examine a selection of historical records and information concerning artifacts of the material culture of “The Viking Age” in order to better understand the activities of early medieval “Vikings,” not only as warriors, but also as agents of commerce, explorers, pioneers, and rulers. Restricted to first-year students. Not eligible for CR/NCR option.

TRN199H1 - Classical Social and Political Thought from the 18th Century Enlightenment to the 20th Century

Hours: 24L

In the first part of the course, via lectures and readings, we will be examining the Enlightenment, the French and

Industrial Revolutions, and the Romantic Conservative Reaction to these revolutions. In part two of the course, we will study Karl Marx, who coined the term “capitalism” to describe the new type of society that had emerged as a product of the Industrial Revolution. Marx, as the severest critic of the capitalist system, called attention to its alienating character. In the 19th Century, his ideas provoked a response that accounts, in large measure, for the character of Western political thought. The discussion of Marx is therefore followed by the intense debate with his “ghost,” the Marxian legacy. We will engage with the participants in the debate - - Weber, Pareto, Mosca, Michels, Durkheim, and Mannheim. Restricted to first-year students. Not eligible for CR/NCR option.

TRN125Y1 - Contemporary Issues in Health Science

Hours: 48S

Can the immune system be strengthened? Are some diseases incurable? What is the best way to stop the spread of a virus? This course examines the scientific principles underlying contemporary issues in the science of human health with the goal of exposing students to the current state of biomedical research. We will develop three distinct types of understanding that are essential to literacy about the science of human health: the basic concepts in science; the nature of scientific research; and the rules that govern how scientists do their work. This course will explore topics such as stem cells, gene editing, regenerative medicine, vaccination, drug development, and personalized medicine. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

TRN135Y1 - Science and Social Choice

Hours: 48S

Many of the decisions we make as a society rely on advances in scientific knowledge. In this course, we will discuss a number of contemporary medical topics that involve complex scientific discoveries about health, the human body, disease, and infection. We will consider genes and study the medical implications of our growing understanding of the human genome. We will study a number of recent cases in order to explore how scientific findings influence decision-making in hospitals and the selection of social policies. We will also discuss the background forces that shape medical research and how this affects the kinds of health problems that are prioritized. The objective of this course is to develop a solid understanding of biological concepts related to human health and consider them in their wider social and ethical contexts. Restricted to first-year students admitted to the [Trinity One Program](#). Not eligible for CR/NCR option.

TRN136Y1 - Canadian Health Policy in the Global Context

Hours: 48S

In this course we consider when our health policies support the highest standards of medical care, consistent with the latest discoveries in medical research. We examine the ways in which debates around ethics, effectiveness and efficiency shape global and national health policy. We begin by exploring the most important advancements in global health policy over the past two decades. We then assess Canada's experience in providing health care, identifying lessons for national policy reform and for Canada's role as a leader in global health research and policy. We explore a range of health challenges including universal health care, anti-microbial drug resistance, HIV AIDS, tuberculosis, reproductive, maternal, newborn and child health, cardiovascular care, oncology, environmental health, indigenous health, violence against women and mental health. Restricted to first-year students admitted to the [Trinity One Program](#). Not eligible for CR/NCR option.

TRN140Y1 - Ethics, Humans, and Nature

Hours: 48S

This course introduces students to ethical issues arising from the way humans interact with nature. Students will study some theoretical approaches for evaluating how human society affects the planet, ecosystems, and the other animals. Theories will be drawn from philosophy, theology, and ecology, and will include Western and non-Western approaches to living in harmony with one's environment. Key themes may include speciesism – the idea that human needs are the most important – as well as overpopulation, extinction, vegetarianism, and responsible resource management. The course will also look at how social policy shapes human choices and whether sustainability initiatives should be pursued through the public or private sector. The course will also discuss the spiritual connection between humans and the environment and how society can be organized to promote access to nature in urban communities. Restricted to first-year students admitted to the [Trinity One Program](#). Not eligible for CR/NCR option.

TRN141Y1 - Environmental Science and Pathways to Sustainability

Hours: 48S

This course introduces students to fundamental issues in environmental science with a multi-disciplinary focus on human impacts on physical and biological systems, and on identifying pathways to sustainability. Key themes will include energy and resources, climate change, land use, contaminants and protecting biodiversity in the context of the Anthropocene. The course challenges students to apply the scientific method to environmental monitoring, research and problem solving through project design, data collection and analysis. The course also emphasizes information literacy, skills to distinguish science from pseudo-science, and considerations around representation of environmental science in the media. Restricted to first-year students admitted to the [Trinity One Program](#). Not eligible for CR/NCR option.

TRN150Y1 - National versus International

Hours: 48S

The international system today faces extraordinary challenges. Understanding these challenges requires understanding the past. This seminar course briefly reviews the origins and development of the international system from the 17th century through the age of empires and the great wars of the 20th century. It then concentrates on the clash of nationalism with internationalism in the world since 1945, looking at such issues as what drives nationalism and what alternatives there are to it. We will study ideas and ideologies as well as the institutions that make up the current geopolitical world. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

TRN151Y1 - Global Governance

Hours: 48S

Terrorism, the proliferation of arms (including weapons of mass destruction), environmental degradation, globalization, technological change, and the rise of non-state actors all pose challenges to statecraft and the management of global order. This seminar course explores the changing dynamics of global politics and the responses to them by states (and others). Topics will include an examination of new forms of international collaboration that have developed in the wake of crises in the years following the Second World War. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

TRN152Y1 - Justice & Global Conflict

Hours: 48S

Modern states face both new and familiar challenges to protecting national security. National insecurity threatens a country's capacity to protect the well-being of its citizens while at the same time participating in international organizations and treaties. This course explores the origins and management of international conflict from the 17th to the 21st century, focusing on the precursors to war and the markers of peace. We will also consider the ways in which our current global world order promotes and preserves justice between and within nations. Students will consider different theoretical approaches to justice between nations, and apply them to recent security issues. By studying the history of conflict and the difference between justice and injustice students will gain a deeper understanding of how current geopolitical actors can structure and affect the prospects for security policy reform moving forward. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

TRN160Y1 - Public Policy and the Public Good

Hours: 48S

This course examines the sense of the public good that undergirds Canada's domestic and international obligations. We examine the notion of the "public" through investigating possible answers to a central political question: what is the purpose of government? Drawing on readings in philosophy and political theory, the course considers a variety of approaches to defining the nature of the public good and how policy makers should respond when competing goods (e.g., freedom and security) clash with each other. In addition, the course looks at the treaties and conventions that articulate the responsibilities of signatory nations regarding challenges such as climate change mitigation, refugee resettlement, and foreign aid. Students will learn how international agreements either compel or encourage participation and multilateral cooperation in the absence of robust enforcement mechanisms.

Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

TRN162Y1 - Political Economy and Social Inequality

Hours: 48S

What is the relationship between capitalism and democracy? How can understanding rational choice theory inform public policy? This course will introduce students to the methods of studying the interplay between economics and politics. We will focus on specific topics to guide our quantitative analysis, which may include intergenerational poverty, the transfer of wealth, efficiency, and social stratification. We will analyse empirical results while developing critical skills for interpreting economic data and research. The course also considers global economic dynamics, transnational governance regimes, as well as the political-economic dimensions of setting global policies. By the end of the course, students will have a better understanding of global political economy, and its connection the fields of international relations and public policy.

TRN172Y1 - Ethics and the Law

Hours: 48S

What is the relationship between moral values and the law? What role does the law play in enabling people to

live better lives? Are legal institutions and actors subject to higher ethical standards? In this course we will read texts from legal theory and political philosophy to try to explain the connection between ethics and the law. This will provide the basis for thinking about some historical and contemporary legal cases, as well as ethical issues judges, lawyers, and lawmakers face in their professional roles. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

International Relations

TRN250Y1 - Empire, Nationalism, and the History of International Relations

Hours: 24L/48T

Our modern world has its foundations in the development of a complex and changing system of international behaviours, customs, and rules. This course explores the global and often difficult transition from a world of empires to our contemporary world of nation-states, spanning the mid-eighteenth century to the present day. Using a global lens, this course offers an introductory historical survey using multiple perspectives and diverse settings, paying special attention to the dissolution of empire, popular revolution and mass movements, and the creation of international order. How global transformations were experienced, not only at the highest levels of power, but also by the people living amidst such change, will be an abiding concern of this course.

TRN350H1 - Scarcity, Sustainability, and the Future of International Relations

Hours: 24L/12T

International Relations are changing, and changing quickly. Major challenges in global affairs, including the interrelated problems of climate change, resource scarcity, great power competition, and changes in mass politics will shape our future in uncertain and possibly dangerous ways. This course seeks to evaluate the effect of these interconnected issues on our world today, and their implications for the future. Through a series of case studies, students will be encouraged to identify future international challenges and work to develop sustainable and innovative solutions to the problems that will confront our world in the next decades and beyond.

Mode of Delivery: In Class

TRN410H1 - Researching Critical Cases in Contemporary International Relations

This course allows students with majors in International Relations to apply some of the techniques and skills they have developed during their undergraduate careers to an original research project in contemporary international relations history. This course is a chronological historical survey of the world since 1968, as the origin of the present era. Within the chronology, attention is given to major developments/themes that emerged and continue to affect the present day. These include: the rise of China as a power, political dissent, the emergence of terrorism, the environment, energy as major international issues, the neo-liberal economic turn, globalization, the end of the Cold War, the human rights/humanitarian intervention revolution, and key post 2000 developments such as the War on Terror, the decline of the US "unipolar moment," the 2008 financial crisis and the return in the 2010s of nationalism and protectionism. This course is restricted to students enrolled in the International Relations major program.

Prerequisite: [TRN250Y1](#)

Exclusion: [TRN410Y1](#)

Recommended Preparation: [POL208Y1](#) or [HIS344H1](#) are recommended as preparation or taken concurrently.

Distribution Requirements: Humanities

TRN419Y1 - Comparative American, British and Canadian Foreign Policy

Hours: 48S

The origins and evolution of American, British and Canadian foreign policy from the late 18th century to the present. Policies are compared in order to understand the development of these countries as nations and actors in the international community.

Prerequisite: Students must have a background in one of Canadian, British or American history.

Distribution Requirements: Humanities, Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

TRN421Y1 - Fragile and Conflict-Affected States in Global Politics

Hours: 48S

Since the end of the Cold War, fragile and conflict-affected states have been widely viewed in the international relations field as one of the preeminent challenges to international security and global governance. Western countries have typically responded to this challenge by launching interventions aimed at building new states that can be integrated into the global, liberal order. This course will dissect the liberal peacebuilding and statebuilding project and explore its broader impact and implications for the international system.

Recommended Preparation: [POL300Y1](#) or [POL343Y1](#)

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

Other Trinity College Courses

TRN200Y1 - Modes of Reasoning

Previous Course Number: TRN200H1

Hours: 24L/24S

First term: students are taught how to recognize, analyze, evaluate, and construct arguments in ordinary English prose. Second term: one or more discipline-related modes of reasoning (e.g., scientific reasoning, ethical reasoning, legal reasoning) studied with reference to a selection of contemporary social issues.

Exclusion: [PHL247H1](#)/ [PHI247H1](#)/ [TRN200H1](#)

Mode of Delivery: In Class

TRN307H1 - International Experience I

A one semester research experience abroad. Students participate in a research project under the mentorship of a faculty supervisor in the host institution and gain experience of working and living abroad.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

TRN308H1 - International Experience II

Students who have engaged in a research project abroad participate in a regular forum in which they present their research projects and discuss their varied experiences of work and social engagement in different foreign environments. Students prepare a detailed scholarly article based on their research.

Prerequisite: TRN307H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

TRN377Y1 - Trinity Comprehensive Paper I

Students are individually mentored by faculty experts through readings from primary literature towards preparation of a quality review article. For students in third year, students identify their faculty mentor during second year and agree to become familiar with the available textbook level material during that year in their chosen topic. Not eligible for CR/NCR option.

Prerequisite: Completion of 8.0 credits and permission of the instructor

Distribution Requirements: Humanities, Science, Social Science

Mode of Delivery: In Class

TRN477H1 - Trinity Comprehensive Paper II

The preparation of a publication quality review article typically involves extensive editing. Students are individually mentored by faculty experts to take the review paper generated in TRN377Y1 and edit the structure, content and style to produce a publication quality review article. Not eligible for CR/NCR option.

Prerequisite: TRN377Y1

Distribution Requirements: Humanities, Science, Social Science

Mode of Delivery: In Class

TRN478H1 - Science Writing for Non-Scientific Audiences

The course aims to train senior-level science students in a wide range of writing genres, focusing on a diversity of non-scientific audiences and writing styles. In addition, students learn to read and analyze texts in order to understand rhetorical strategies and devices.

Prerequisite: Students in science specialist or major programs. Permission by instructor.

Exclusion: Non-science students, first or second year students.

Recommended Preparation: TRN377Y1 (the comprehensive paper will serve as writing sample).

Distribution Requirements: Humanities

Breadth Requirements: Living Things and Their Environment (4)

Introduction

University College offers a number of programs and courses outside the areas traditionally covered by departments. These include UC One and programs and courses in Asian Canadian Studies, Canadian Studies, Cognitive Science, Drama, Health Studies, and Sexual Diversity Studies, in addition to First-Year Foundation Seminars. The overall aims of the College Programs are to foster interdisciplinary work in significant areas of study and to encourage intellectual breadth. Many program courses are open to students not enrolled in the programs themselves.

UC One: Engaging Toronto

UC One is an exciting initiative that provides first-year students with a special university experience. Students choose from one of four courses, each of which is designed to engage with the city from a different perspective. Classroom learning is directly linked to real life experience.

UC One is a 0.5 credit course, one of four courses typically taken by a first-year Faculty of Arts and Science student. Enrolment in each course is limited to up to 30 students. Students enrol in one of the following four 0.5 credit courses:

- UNI101H1: Citizenship in the Canadian City

- UNI102H1: Performing the City I
- UNI103H1: Gradients of Health in an Urban Mosaic
- UNI104H1: Sex in the City

In UC One, you can choose a stream that complements your own interests.

Weekly lectures and seminars will be supplemented with prominent guest speakers, including political and business leaders, activists from non-governmental organizations, theatre directors, artists, and health practitioners. Students will have the opportunity to meet with the speakers and socialize with their fellow students after each guest lecture. Students will also participate in a range of field trips across the city.

Students enrol to the specific section during the Enrolment period. All first-year students in the Faculty of Arts and Science (St. George campus) are eligible to enrol. Those participating in other One programs are excluded from UC One.

For more information visit the UC One website at:

The Asian Canadian Studies program (Minor)

The minor in Asian Canadian Studies program focuses on community-engaged learning that explores how to understand the historical, social, cultural, economic, and political forces that affect people of Asian heritage in Canada. Our interdisciplinary courses connect students with local communities, and every course provides opportunities for students to pursue a choice of research interests. Together we critically investigate and add to knowledge about Asian Canadians.

The Canadian Studies Program (Specialist, Major, Minor)

The Canadian Studies program offers opportunities to study contemporary Canada in an interdisciplinary manner and to explore cultural, social, economical and political developments in this complex and diverse country. Students are encouraged to consider additional courses in Indigenous Studies in completing the requirements of the Program.

The Certificate in Black Canadian Studies

The Certificate in Black Canadian Studies will provide students with an opportunity to study and research the social construction of race in Canada, with a focus on Black Canada and Black Canadians, past and present. This will include attending to structural and systemic discrimination in areas including politics, judicial systems, and the arts, as well as considering counter-narratives and forms of resistance and empowerment enacted by Black Canadian communities. This certificate also offers a specialization that considers the historical roots and contemporary implications of anti-Black racism, as well as

movements that are building towards social equity, and future imaginings. While this certificate addresses local and national contexts, it also situates diasporic and transnational frameworks for understanding Blackness in Canada. As a result, the certificate also examines a comparative approach to meaning-making and belonging in solidarity with other forms of racism and oppression.

The Cognitive Science Program (Major)

The Cognitive Science Program introduces students to the field of cognitive science: the interdisciplinary study of mind in humans and machines. Our students gain an understanding of such mental phenomena as perception, language, reasoning, and consciousness, and they integrate this understanding with an account of how the human brain works.

The Cognitive Science Arts Major has three course streams: Perception and Attention; Thinking and Reasoning; and Language and Cognition. The Cognitive Science Science Major has two streams: Computational Cognition and Cognition and the Brain. Courses include: [COG250Y1](#) Introduction to Cognitive Science; [COG341H1](#) and [COG342H1](#) Issues in Cognitive Science; [COG401H1](#), [COG402H1](#), and [COG403H1](#) Seminar in Cognitive Science; [COG498H1/COG499H1](#) Independent Study; as well as courses drawn from offerings in Computer Science, Linguistics, Philosophy, and Psychology.

The Centre for Drama, Theatre & Performance Studies (Specialist, Major, Minor)

The Centre for Drama, Theatre & Performance Studies is described elsewhere in this Calendar under Drama.

The Health Studies Program (Specialist, Major)

The Health Studies Program focuses on many areas of study that surround, interact with and support bio-medical research and clinical activity in regard to health, including health policy, practices, research methods, and socio-cultural expression. The Major serves as a general introduction; the Specialist provides a more intense research focus with more methodological emphasis.

The Sexual Diversity Studies Program (Specialist, Major, Minor)

The Sexual Diversity Studies Program allows students to focus on questions of sexual identity, difference, and dissidence across disciplinary lines and cultural frameworks. By examining sexual diversity across time and place, students will learn about the ways different cultures have separated the sexual from the nonsexual, the normal from the abnormal, and what the regulation of sexuality can tell us about how power operates along the lines of gender and race, for example. Students will gain an understanding of how and why certain sexual practices have come under scrutiny, and the significance of the

various labels and identities that we have attached to them.

University College (UNI) and Drama (DRM) courses are staffed by a combination of specific program staff members and members of various University departments, and are open to all students at the University. Further information on University College Independent Study courses is available at <https://www.uc.utoronto.ca/programs-study-academic-programs-independent-study>. Further information on DRM is available at <https://www.cdtps.utoronto.ca/>.

Asian Canadian Studies Minor (Arts Program) - ASMIN2728

The Minor in Asian Canadian Studies focuses on community-engaged learning that explores how to understand the historical, social, cultural, economic, and political forces that affect people of Asian heritage in Canada. Our interdisciplinary courses connect students with local communities, and every course provides opportunities for students to pursue a choice of research interests. Together we critically investigate and add to knowledge about Asian Canadians.

The category "Asian Canadian" is widely understood to refer to people in Canada of East Asian, South Asian, Southeast Asian, and West Asian ancestry.

Students take two required 0.5 credit core courses in Asian Canadian Studies; select from an array of courses in Asian Canadian Studies; and take additional courses related to the larger contexts of Asian Canadian Studies. The Minor in Asian Canadian Studies is easily combined with other disciplines, such as Anthropology, Art, Economics, English, Geography, History, Political Science and Sociology, as well as with interdisciplinary studies such as Contemporary Asian Studies, Diaspora and Transnational Studies, Equity Studies, East Asian Studies, South Asian Studies, and Near Eastern Studies.

Students will be encouraged to take full advantage of the opportunities available through the Canadian Studies Program, including its journal, *ImagiNATIONS*, produced by and for undergraduate students and its annual undergraduate student conference. The Canadian Studies Student Union is a focal point for social as well as academic pursuits, and is open to students pursuing a Minor in Asian Canadian Studies. Students also can participate in Asian Canadian Studies student events and

in the tri-campus Asian Canadian Studies Research network. The Research network brings together professors and students to discuss current research related to Asian Canadian Studies, Asian diasporas, and global Asian migrations. Students in the minor are also invited to participate in the Asian Institute's Asian Pathways Research Lab that offers research opportunities in Toronto.

This will include attending to structural and systemic discrimination in areas including politics, judicial systems, and the arts, as well as considering counter-narratives and forms of resistance and empowerment enacted by Black Canadian communities. This certificate also offers a specialization that considers the historical roots and contemporary implications of anti-Black racism, as well as movements that are building towards social equity, and future imaginings. While this certificate addresses local and national contexts, it also situates diasporic and transnational frameworks for understanding Blackness in Canada. As a result, the certificate also examines a comparative approach to meaning-making and belonging in solidarity with other forms of racism and oppression.

Enrolment Requirements:

This is an open enrolment Certificate. A student who has completed 4.0 credits may enrol in the Certificate.

Completion Requirements:

(2.5 credits)

1. HIS265Y1
2. 0.5 credit from CAR429H1, CDN335H1,
CSE347H1, ENG356Y1, WGS390H1

3. 1.0 additional credit, either from courses not already taken to fulfill Requirement 2, or from any of the following:

- African Studies: AFR150Y1, AFR353H1
- Caribbean Studies: CAR120Y1, CAR315H1, CAR316H1, CAR428H1
- Cinema Studies: CIN337H1
- Criminology and Sociolegal Studies: CRI210H1, CRI322H1, CRI383H1
- Critical Studies in Equity and Solidarity: CSE240H1, CSE340H1, CSE341H1, CSE344H1, CSE344Y1, CSE447H1
- Drama, Theatre and Performance Studies: DRM462H1
- Diaspora and Transnational Studies: DTS200Y1
- Geography and Planning: GGR456H1
- History: HIS106Y1, HIS312H1, HIS391Y1, HIS429H1, HIS446H1
- Joint Course: JQR360H1
- Political Science: POL467H1
- Sexual Diversity Studies: SDS382H1
- Sociology: SOC210H1, SOC311H1/ SOC347H1, SOC367H1, SOC484H1
- Urban Studies: URB339H1
- Women and Gender Studies: WGS463H1, WGS481H1

Notes:

- An elective course (maximum of 1.0 credit) dealing with some aspect of Black Canadian Studies not captured in the above list may be accepted with approval of the Canadian Studies program director at University College.
- Where applicable, students may also count up to 0.5 credit from courses at UTM and UTSC towards the certificate, in accordance with the regulations of the Faculty of Arts & Science and those at UTM and UTSC, and with approval of the Canadian Studies program director at University College.
- Effective Fall 2021, courses associated with New (NEW) College's African Studies, Caribbean Studies, and Critical Studies in Equity and Solidarity programs will have the new "AFR," "CAR," and "CSE" designators respectively. In addition, courses associated with Innis (INI) College's Urban Studies program will have the new "URB" designator.

Cognitive Science Major - Arts (Language and Cognition Stream) (Arts Program) - ASMAJ1445B

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- COG250Y1 with a minimum grade, or
- 1.5 credits in CSC, LIN, PHL, or PSY with a minimum grade average based on the 1.5 credits. No more than 1.0 credits can be from any ONE of the listed course designators. If more than 1.5 credits have been completed, the minimum grade average will be based on the higher course grades.

Note:

Students are responsible for checking co- and prerequisites for all courses. Not all courses are offered on a regular basis. A list of approved Cognitive Science courses can be found on the website: <https://www.uc.utoronto.ca/cognitive-science>. For any questions, please email uc.academicsservices@utoronto.ca.

Completion Requirements:

(8.0 credits)

Where noted below, please consult the Faculty of Arts & Science Course Calendar on prerequisites.

First Year:

CSC108H1/ CSC120H1; LIN102H1 (note: LIN200H1 does not serve as prerequisite for upper year LIN courses)

Second Year:

COG250Y1 (may be taken in Year 1); STA220H1/ PSY201H1; PSY270H1

Second Year and Higher:

- COG341H1/ COG342H1, COG344H1, PHL342H1, PSY290H1
- 2.5 credits from Language and Cognition Stream courses:
 - JLP315H1/ JLP374H1; LIN232H1/ LIN241H1 and 1.5 credits of any of the following (at least a 0.5 credit must be from LIN): COG260H1/ COG341H1/ COG342H1/ COG343H1/ COG345H1/ COG415H1/ COG498H1/ COG499H1/ JLP315H1/ JLP374H1/ JLP471H1/ JLS472H1/ JLS473H1/ LIN232H1/ LIN241H1/ LIN331H1/ LIN341H1/ PHL245H1/ PHL340H1/ PHL345H1/ PHL351H1/ PHL451H1/ PSY210H1/ PSY312H1/ PSY473H1/ PSY493H1

- For those with the appropriate prerequisites: CSC401H1/ CSC485H1

Fourth Year: COG401H1/ COG404H1

Cognitive Science Major - Arts (Perception and Attention Stream) (Arts Program) - ASMAJ1445A

Cognitive Science Major - Science (Cognition and the Brain Stream) (Science Program) - ASMAJ1446B

Today's cognitive scientists are more interested than ever before in the way the brain implements the information-processing underpinnings of cognitive mental processes. The study of cognition and the brain is the study, grounded in cognitive neuroscience, of those aspects of brain activity directly relevant to the performance of cognitive functions.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

Health Studies Specialist (Arts Program) - ASSPE2085

The Health Studies Program explores how health around the world is shaped by the circumstances in which people are born, grow up, live, work, and age, and how these in turn connect to a wider set of environmental, social, cultural, economic, and political forces. Understanding health requires knowledge from a range of disciplines and sectors: Health Studies offers a stimulating interdisciplinary environment that challenges students to think about health – both locally and globally – in new ways.

Enrolment Requirements:

This is a limited enrolment program. Note there are different options depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

Variable Minimum Grade Average

A minimum grade average in required courses is normally needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

For students who have completed between 4.0 and 8.5 credits:

• 1.0 credit from: ANT100Y1/ BIO130H1/ GGR107H1/
HPS100H1/ HPS110H1/ HPS120H1/ PCL102H1/

University College Courses

UC First-Year Foundations

UNI197H1 - Hamilton: Musical and History

Hours: 24S

This course examines the American revolution and its reception in the musical "Hamilton." The American revolution generated multiple stories that included and excluded actors, peoples, perspectives, and more. This course delves into the American revolution and the diversity of those engaged in it and affected by it. The songs, performances, and reception of the musical "Hamilton" are a key resource for exploring the events and role of the American Revolution. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

CDN197H1 - Inventing Canada

Hours: 24S

This course explores the ways that Canadian history and identity have been commemorated, interpreted and experienced, now and in the past. The course focuses in particular on who has been included or excluded in commemorative efforts over time. Key topics include representations of women, Indigenous peoples, and political figures on screen and through public installations like museum exhibits, plaques and statues. Case studies highlighting a range of interpretive media will encourage students to work with and discuss a range of primary and secondary sources, build critical thinking and academic writing skills. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural

Representations (1)

Mode of Delivery: In Class

UNI198H1 - Why Go to University? The Changing Role and Purpose of Higher Education

Hours: 24S

Is higher education about job preparation or about giving students an opportunity to learn about themselves and the world around them? Can higher education in Canada achieve both these aims? This course engages with the spirited conversations and scholarly debates about the ideals of a liberal arts education and how these connect with ancient and contemporary arguments about citizenship. We explore the impact on higher education of globalization and what some call the "corporatization" of universities. Students will be encouraged to think, read, research and write about various models of higher education and explore questions suggested by these debates. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

CDN198H1 - Canada, Colonialism and Settler Relations

Hours: 24S

A First Year Foundations seminar focused on exploring Canada's colonial history and recent efforts to enact appropriate settler relations through an interdisciplinary lens. Topics will include contemporary land claims and treaty-making processes, the Royal Commission on

Aboriginal Peoples, governmental apologies for the mistreatment of Indigenous peoples, the Truth and Reconciliation Commission, land acknowledgements, practices of allyship through social movement such as Idle No More, and efforts to influence Canada's overseas mining practices. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

CDN199H1 - Canada- Hong Kong Migration

Hours: 24S

This course surveys the effects of migrations and cultural connections between Hong Kong and Canada from the 1960s. Students will discuss and analyze the impact of migrations, and study the connection between the two locations from the perspectives of history, culture and literature, politics and democracy, economic and financial development and the network of people and community. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

JRC199H1 - Truths & Reconciliations in Canada

Hours: 24S

In this course, we examine the idea of reconciliation among Indigenous and Canadian nations by considering the complicated role of religion and spirituality in "truth and reconciliation." Specifically, residential schools for Indigenous children were a collaboration of church and state that violently broke the spirit and intent of the treaties—or sacred promises—made between the Crown and Indigenous nations. The course will set the 2015 Truth & Reconciliation Commission of Canada in a longer history of twentieth-century commissions, reports, and petitions in which both Indigenous and Canadian people (and some churches) named the cultural and spiritual genocide of residential schools and called for action. Restricted to first-year students. Not eligible for CR/NCR option.

Mode of Delivery: In Class

JCI199H1 - Italians in Canada: Histories, Journeys, Struggles, Successes

Hours: 24L

This course explores the presence of people from the Italian peninsula in what is now known as Canada. The course begins with discussions on Giovanni Caboto's and other explorers' journeys to then focus on contemporary Italian-Canadian communities. This course provides students with the critical tools necessary to understand various historical, linguistic, culinary, spiritual, political, and creative elements of Italian-Canadian identity and life. Students of both Italian and non-Italian heritage are most welcome in this course, which is taught in English. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

UNI199H1 - The Construction of Race in America: A History

Hours: 24S

The course will explore the origins of racial categories in America. Drawing on primary sources such as memoirs, film, and government records as well as writings by scholars, we will examine how beliefs about these categories changed over time and with what consequences for the unfolding of American history. Arriving at the present day, we will consider such contradictory developments as the accelerating influence of Black Lives Matter and the headline-grabbing white nationalism on display at the "Unite the Right" rally in Charlottesville, Virginia, August, 2017. Restricted to first-year students. Not eligible for CR/NCR option.

COG342H1 - Issues in Cognitive Science II: Concepts, Theories of Mind, and Cognitive Evolution

Hours: 36L

An examination of core topics in cognitive science building on introductions in [COG250Y1](#). Typical topics include: concepts; theories of mind; cognitive evolution.

Prerequisite: [COG250Y1](#) and one of [PSY270H1](#)/[PHL342H1](#)

Distribution Requirements: Humanities, Social Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

COG343H1 - Issues in Cognitive Science III: Computational Cognition

Hours: 24L/12P

An examination of core topics in cognitive science building on introductions in [COG250Y1](#). Typical topics include: computational models of cognition and learning, natural language processing, computer intelligence.

Prerequisite: [COG260H1](#), [CSC148H1](#), [STA220H1](#)/[PSY201H1](#)

Corequisite: [COG250Y1](#)

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

Mode of Delivery: In Class

COG344H1 - Issues in Cognitive Science IV: Language and Communication

Hours: 36L

An examination of core topics in cognitive science building on introductions in [COG250Y1](#). Typical topics include: language and cognition; language acquisition; theories of meaning; pragmatics.

Prerequisite: [COG250Y1](#) and one of either [LIN232H1](#)/[LIN241H1](#) or [JLP315H1](#)/[JLP374H1](#).

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

COG345H1 - Issues in Cognitive Science V: Cognitive Science and Society

Hours: 36L

An examination of core topics in cognitive science building on introductions in [COG250Y1](#). Topics include central moral, social, and political questions both relevant to and raised by cognitive science research.

Prerequisite: [COG250Y1](#) and one of [PSY270H1](#)/[PHL342H1](#)

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

COG401H1 - Seminar in Cognitive Science

Hours: 36S

Advanced treatment of cognitive science topics for arts majors. Possible topics include: concepts, consciousness, the mind-body problem, cognitive science and the arts.

Prerequisite: [COG250Y1](#); [PHL342H1](#); 14.0 credits

Exclusion: [COG402H1](#), [COG403H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

COG402H1 - Seminar in Cognitive Science

Hours: 36S

Advanced treatment of cognitive science topics such as neuroscientific theories of consciousness, rationality and modelling of cognitive processes.

Prerequisite: [COG250Y1](#); [PSY270H1](#); 14.0 credits

Exclusion: [COG401H1](#); [COG403H1](#)

Distribution Requirements: Science, Social Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

COG403H1 - Seminar in Cognitive Science

Hours: 36S

Advanced treatment of cognitive science topics, including the application of core ideas from probability theory, information theory, statistics, and machine learning to modelling human cognition and artificial intelligence.

Prerequisite: 14.0 credits, CSC148H1, COG250Y1, COG260H1, (MAT135H1, MAT136H1)/ MAT137Y1, 0.5 credit in statistics

Exclusion: COG401H1, COG402H1

Distribution Requirements: Science

Breadth Requirements: The Physical and Mathematical Universes (5)

Mode of Delivery: In Class

COG404H1 - Seminar in Cognitive Science

Hours: 36S

Advanced treatment of cognitive science topics, including language processes and language representation, productions and comprehension, language acquisition, and language and theory of mind, pragmatics, reference and context.

Prerequisite: COG250Y1; JLP315H1/ JLP374H1; LIN232H1/ LIN241H1; 14.0 credits.

Exclusion: COG401H1; COG402H1; COG403H1

Distribution Requirements: Social Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

COG415H1 - Cognitive Science in Practice

Hours: 18L/15P

This course provides COG students with the opportunities to practice quantitative and qualitative evaluation and assessment methods in real world situations and juxtapose theory with practice. Placement activities will ground topics such as problem solving, logistics, decision making, etc., through practical application, individual and group / in-class critical reflection.

Prerequisite: COG250Y1, COG341H1/ COG342H1, PSY370H1

Distribution Requirements: Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

COG498H1 - Independent Study

Advanced Independent Study. Not eligible for CR/NCR option.

Students must submit an application form that includes a written proposal and confirms that a faculty member has agreed to supervise. Applications must be submitted to the UC Programs Office (UC 173) for approval by the Program Director. Applications are due before the first day of course enrolment. Application form is available at the University College website at <https://www.uc.utoronto.ca/cognitive-science-courses>.

Prerequisite: 15.0 credits and a minimum cGPA of 3.0

Distribution Requirements: Humanities, Social Science

Mode of Delivery: In Class

COG499H1 - Individual Study in Cognitive Science

Advanced Independent Study. Not eligible for CR/NCR option.

Students must submit an application form that includes a written proposal and confirms that a faculty member has agreed to supervise. Applications must be submitted to the UC Programs Office (UC 173) for approval by the Program Director. Applications are due before the first day of course enrolment. Application form is available at the University College website at <https://www.uc.utoronto.ca/cognitive-science-courses>.

Prerequisite: 15.0 credits and a minimum cGPA of 3.0

Distribution Requirements: Humanities, Social Science

Mode of Delivery: In Class

Health Studies

PHS100H1 - Discovering Global Health

Hours: 24L/24T

This course introduces students to basic public health-related concepts, significant aspects of the historical development of global health, and a selection of topics illustrating the broad and evolving nature of this field. In addition, it helps students explore the contributions that various disciplines/fields offer to global health.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

HST209H1 - Introduction to Health: Determinants of Health & Health Care

Hours: 24L

A multidisciplinary approach to understanding perspectives in health, health equity, and primary health care. Themes include critical discussion of the measurements of health outcomes and the socioeconomic and political factors that affect health, including neglected and marginalized populations in Canada and globally.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

HST211H1 - Health Policy in Canada

Hours: 24L

Introduces students to health policy in Canada, with a particular focus on the social determinants of health, and on how to improve health through policy advocacy. Examines the policy making process in the Canadian context, and the development of health policy in Canada. Explores current debates about health issues.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

JSU237H1 - Introduction to HIV/AIDS: Health, Sexuality and Gender

Hours: 24L

A critical examination of the HIV/AIDS global pandemic from a multidisciplinary perspective and with an emphasis on sexuality. The course examines the basic biology of HIV/AIDS and then covers social, historical, political, cultural, gender, and public health aspects of HIV/AIDS. Attention is given to the distinct features of vulnerable and marginalized populations, prevention, treatment, drug development, and access to medicines.

JSU237H1 is particularly intended for students in the Health Studies and/or Sexual Diversity Studies programs.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

HST250H1 - Introduction to Research Methods in Health Studies

Hours: 36L

Offers students in Health Studies a basic understanding of the logic of research methods, including research design and data collection on health topics as well as means for assessing validity, generalizability, and representativeness of data.

Distribution Requirements: Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

PHS300H1 - HIV Prevention Research

Hours: 24L

This course examines HIV prevention research across the full spectrum of sciences concerned with prevention of HIV and sexual health, including basic science, clinical science, epidemiology, behavioural science, social science, and legal, policy, economic analysis, and cultural theory. Examples are borrowed from efforts across the globe.

The course highlights prevention research related to key populations at risk of HIV infection and transmission. The course focuses on challenges and issues, with the goal of stimulating critical thinking and engagement with topics. Some material will be presented by Guest Lecturers who are experts in the areas, allowing students to learn from and interact with these experts and to hear about their current research as well as their career paths.

It is expected that at the end of this course students will have an advanced appreciation of the history and future and underlying values and ethics of effective HIV prevention research, including future possibilities and challenges. One ancillary aim is to encourage students to compare and contrast HIV Prevention with prevention research in adjacent areas (e.g., HCV, HPV).

Recommended Preparation: STA220H1 or equivalent
Distribution Requirements: Science, Social Science
Breadth Requirements: Society and its Institutions (3)
Mode of Delivery: In Class

HST305H1 - Perspectives in Health, Gender, Ethnicity and Race

Hours: 24L

This course will examine historical and contemporary health disparities with respect to gender, ethnicity, and

race. Other intersectional issues such as Colonialism, class, sexuality, and the urban/rural divide will also be considered as they to social determinants of health. Attention will be focused on examples of disparities that perpetuate and exacerbate current epidemiological challenges for underrepresented populations in Canada and globally.

Prerequisite: HST250H1/ STA220H1/ STA288H1/ GGR207H1/ EEB225H1, or other equivalent

Recommended Preparation: HST209H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

HST306H1 - Health, Nutrition and Food Security

Hours: 24L

This course examines the antecedents (for example: social structure, environments, human development and behaviour) that underlie nutrition-mediated aspects to human health and disease. This will include review and analysis of seminal, primary, and current research as well as contemporary issues surrounding nutritional literacy and deficits, food insecurity and access, as these relate to morbidity and pre-mature mortality. The course will also examine existing public health practices for health promotion and access, and population-level disease prevention and interventions.

Prerequisite: HST250H1/ STA220H1/ STA288H1/ GGR207H1/ EEB225H1, or other equivalent

Recommended Preparation: HST209H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

HST307H1 - Special Topics in Health Studies I

Hours: 24L

The specific content of this course will vary from one year to another, depending on the availability of particular health researchers and scholars. Specific course information will be available on the Health Studies website at www.uc.utoronto.ca/healthstudies/.

Distribution Requirements: Social Science

Mode of Delivery: In Class

HST308H1 - Aging and Health

Hours: 24L

Provides an understanding of the interface between health and aging, and how to maintain wellness in a rapidly aging population. Examines theories of aging, the meaning of health in old age, myths about the health of Canada's older people, and emerging national and international responses to aging populations.

Prerequisite: HST209H1, HST211H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

HST309H1 - Special Topics in Health Studies II

Hours: 24L

The specific content of this course will vary from one year to another, depending on the availability of particular health researchers and scholars. Specific course information will be available on the Health Studies website at www.uc.utoronto.ca/healthstudies/.

Distribution Requirements: Social Science

Mode of Delivery: In Class

HST310H1 - Critical Health Policy

Hours: 24L

A critical, in-depth exploration of contemporary health and social issues. Political, social and economic forces at play in Canadian society are examined in relation to specific health issues and policies, in order to understand general societal and system dynamics of evolution and change, and to identify implications for reform efforts.

Prerequisite: HST211H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

HST330H1 - Population Health

Hours: 24L

Extends students' understanding of population-based strategies of health promotion in Canada. Topics include: variations in health status as affected by population patterns, class, gender, ethnicity, employment, and family

composition; major causes of morbidity and mortality; the concept of "community health", opportunities and constraints facing public policy.

Prerequisite: HST209H1

Recommended Preparation: HST250H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

HST350H1 - Health Research & Practice

Hours: 36S

For students enrolled in the Health Studies Specialist and Major programs. Students engage in career-planning, presentation, and workshop activities that will prepare them for independent research and practicum projects as well as potential graduate-school applications. Includes, but not limited to, sessions on topic selection and project development, finding a supervisor, ethics and professionalism.

Prerequisite: HST250H1

Distribution Requirements: Social Science

Mode of Delivery: In Class

HST373H1 - Epidemiology

Hours: 36L

Introduces students to the principles and methods of epidemiology. Emphasis on descriptive methods and study design. Computational techniques, measurement problems, and issues that surround the drawing of inferences from area-level or other aggregate data will be discussed.

Prerequisite: STA220H1 or equivalent

Exclusion: HMB342H1

Distribution Requirements: Social Science

Breadth Requirements: The Physical and Mathematical Universes (5)

Mode of Delivery: In Class

HST400Y1 - Health Studies Practicum

Hours: 172P/24S

For students enrolled in the Health Studies Specialist and Major programs. Individual field placement with a health-related institution or organization, in which the student applies theory and skills to specific projects and/or tasks. Culminates in an oral and written report. Not eligible for CR/NCR option.

Prerequisite: HST350H1/ HST350Y1 or permission of the Director

Mode of Delivery: In Class

HST405H1 - Global Migration and Health

Previous Course Number: HST307H1

Hours: 24L

Over the past decades, economic globalization, widening socio-economic inequities, conflict, natural disasters, environmental degradation, and, more recently, climate change have combined to become increasingly significant forces shaping global migration fluxes. This course analyzes the impact of migration on the health of those who move and of individuals, communities and entire societies in countries of origin, transit, arrival, and resettlement. It adopts an interdisciplinary approach, incorporating scholarly work from the fields of public health, the social sciences, law, and human rights.

Prerequisite: HST209H1

Exclusion: HST307H1 (Special Topics in Health Studies I: Globalization, Migration and Health), offered in Winter 2017, Winter 2018, and Winter 2019

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

HST407H1 - Special Topics in Advanced Health Studies I

Hours: 24L

The specific content of this course will vary from one year to another, depending on the availability of particular health researchers and scholars. Specific course information will be available on the Health Studies website at www.uc.utoronto.ca/healthstudies/.

Mode of Delivery: In Class

HST409H1 - Special Topics in Advanced Health Studies II

Hours: 24S

The specific content of this course will vary from one year to another, depending on the availability of particular health researchers and scholars. Specific course information will be available on the Health Studies website at www.uc.utoronto.ca/healthstudies/.

Mode of Delivery: In Class

HST410H1 - Case Studies in Health Policy

Hours: 36S

Analyses the formation and implementation of health policy through the use of case studies. Each case deals with a substantive health policy issue. Using case studies, students will learn to understand and analyze the processes by which public policies are formed, and perform comparisons of policy alternatives.

Prerequisite: HST211H1

Recommended Preparation: HST310H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

HST411H1 - Political Economy of Health

Hours: 36S

Examines the production and distribution of health and illness within and across populations. A political economy approach is used to better understand the fundamental origins of health inequalities, the political action that is required to tackle them, and the obstacles that hinder the possibilities for such action.

Prerequisite: HST209H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

HST440H1 - Health & Pharmaceuticals

Hours: 24L

A critical examination of drug development, including the role of health professionals and the pharmaceutical industry in researching, testing, marketing, licensing, and evaluating pharmaceutical drugs. Topics include the differing needs for drug development, evaluation and dispensing in lower income countries, and potential conflicts of interest in drug development.

Prerequisite: HST209H1/ HMB303H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

HST450Y1 - Undergraduate Health Research Project

Final culminating project for students in the Health Studies Specialist. Students will prepare an undergraduate thesis by the end of the course under the supervision of a University of Toronto faculty member. Students must submit an Independent Research Course Proposal form confirming a faculty supervisor has agreed to participate and describing the content of the project by the end of August. This form is available on the University College Health Studies Program website at <https://www.uc.utoronto.ca/health-studies/courses>. Not eligible for CR/NCR option.

Prerequisite: HST250H1, STA220H1, HST350Y1 and an Independent Research Course Proposal form

Distribution Requirements: Social Science

Mode of Delivery: In Class

HST451Y1 - Independent Research in Health Studies

This two-semester course designation will permit students to gain academic credit for health studies pursued independently, or to participate in an ongoing health research project, under the supervision of a University of Toronto faculty member. Students must submit an Independent Research Course Proposal form confirming a faculty supervisor has agreed to participate and describing the content of the project by the end of August. This form is available on the University College Health Studies Program website at <https://www.uc.utoronto.ca/health-studies/courses>. Not eligible for CR/NCR option.

Prerequisite: HST209H1, HST250H1, and an Independent Research Course Proposal form

Recommended Preparation: HST350Y1

Distribution Requirements: Social Science

Mode of Delivery: In Class

HST464H1 - The Nature of Global Health

Hours: 24L

Explores the historical, ideological, economic, political, and organizational factors that shape the theory and practice of international health (IH). Students will be encouraged to critically examine some of the central tensions embedded in this field.

Prerequisite: HST209H1/ HMB303H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

HST480H1 - Independent Research in Health Studies

This one-semester course will permit students to gain academic credit for health studies pursued independently, or to participate in an ongoing health research project, under the supervision of a University of Toronto faculty member. Students must submit an Independent Research Course Proposal form confirming a faculty supervisor has agreed to participate and describing the content of the project at least two weeks prior to the first day of term. This form is available on the University College Health Studies Program website at <https://www.uc.utoronto.ca/health-studies/courses>. Not eligible for CR/NCR option.

Prerequisite: HST209H1, HST250H1, and an Independent Research Course Proposal form
Recommended Preparation: HST350Y1
Distribution Requirements: Social Science
Mode of Delivery: In Class

Other University College Courses

JUM202H1 - Mathematics as an Interdisciplinary Pursuit

Hours: 24L/12T

A study of the interaction of mathematics with other fields of inquiry: how mathematics influences, and is influenced by, the evolution of science and culture. Art, music, and literature, as well as the more traditionally related areas of the natural and social sciences may be considered. (Offered every three years)

JUM202H1 is particularly suited as a Science Distribution Requirement course for Humanities and Social Science students.

Exclusion: JUM102H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
Mode of Delivery: In Class

JUM203H1 - Mathematics as a Recreation

Hours: 24L/12T

A study of games, puzzles and problems focusing on the deeper principles they illustrate. Concentration is on

problems arising out of number theory and geometry, with emphasis on the process of mathematical reasoning. Technical requirements are kept to a minimum. A foundation is provided for a continuing lay interest in mathematics. (Offered every three years)

JUM203H1 is particularly suited as a Science Distribution Requirement course for Humanities and Social Science students.

Exclusion: JUM103H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
Mode of Delivery: In Class

JUM205H1 - Mathematical Personalities

Hours: 24L/12T

An in-depth study of the life, times and work of several mathematicians who have been particularly influential. Examples may include Newton, Euler, Gauss, Kowalewski, Hilbert, Hardy, Ramanujan, Gödel, Erdős, Coxeter, Grothendieck. (Offered every three years)

JUM205H1 is particularly suited as a Science Distribution Requirement course for Humanities and Social Science students.

Exclusion: JUM105H1
Distribution Requirements: Science
Breadth Requirements: The Physical and Mathematical Universes (5)
Mode of Delivery: In Class

UNI299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Mode of Delivery: In Class

UNI393Y1 - University College Independent Studies

An opportunity to design an independent research course of study at the 300 level not otherwise available within the Faculty of Arts and Science. Students must be registered

at UC or in a UC-affiliated program. Not eligible for CR/NCR option.

Students must submit an application form that includes a written proposal and confirms that a faculty member has agreed to supervise. Applications must be submitted to the UC Programs Office (UC 173) for approval by the Vice-Principal. Applications are due before the first day of course enrolment. Application form is available at the University College website at <https://www.uc.utoronto.ca/programs-study-academic-programs-independent...>

Prerequisite: 10.0 credits and minimum cGPA of 3.0

Mode of Delivery: In Class

UNI394H1 - University College Independent Studies

An opportunity to design an independent research course of study at the 300 level not otherwise available within the Faculty of Arts and Science. Students must be registered at UC or in a UC-affiliated program. Not eligible for CR/NCR option.

Students must submit an application form that includes a written proposal and confirms that a faculty member has agreed to supervise. Introduction

Victoria College (Vic) is committed to providing students with a personal and inclusive university experience inside and outside the classroom. This is an environment where students and faculty are engaged in building a community that welcomes diversity, embraces creativity, and is energized by challenge.

At Vic, we nurture a close-knit learning environment from the very beginning of your academic career. Our distinctive first-year offerings include the award-winning Vic One program and the Vic One Hundred series of first-year foundations seminars. Every first-year Victoria College student takes at least one small seminar course. You will experience here the academic advantages of being a student at one of Canada's leading research universities combined with the intimacy of a small liberal arts college.

More information is found on the [Victoria College website](#).

Vic One

Victoria College offers first-year Arts and Science students an opportunity for a unique educational experience that draws upon the College's history and identity. Eight streams are available in this foundation year program, known as Vic One. These small seminar courses feature lively discussion and dialogue, and are enriched by

weekly plenary sessions with dynamic professors, artists, scientists, writers, ambassadors and other public figures.

Two required courses in each stream are seminar courses given by faculty of Victoria College. They have a limited enrolment of 25 students in each class. A third co-requisite course is listed with each course description. Students who have questions about their Vic One co-requisite course must contact the Vic One Liaison Officer at vic.one@utoronto.ca.

Vic One enrolment requires an application that is found on the Vic One website (www.vic.utoronto.ca). All first-year students in the Faculty of Arts and Science (St. George campus), regardless of college membership, are eligible for admission to Vic One. Admission decisions are based on extra-curricular activities, a short original essay and the student's entering grades.

Vic One Hundred: First Year Seminars

Vic One Hundred offers first-year Arts and Science students the opportunity to experience stimulating themes and big ideas in a small class environment. These limited enrolment courses facilitate close contact with distinguished teaching faculty and fellow students, while providing an excellent foundation for future studies.

Combined Degree Programs (CDP) offered with Ontario Institute for Studies in Education (OISE)

- Combined Degree Program in HBA/HBSc and Master of Teaching (MT) (Victoria College and OISE)
- Combined Degree Program in HBA/HBSc and Master of Arts, Child Study and Education (MA-CSE) (Victoria College and OISE)

Students enrolled in the Minor in Education and Society may apply for one of these Combined Degree Programs. For details about application and program requirements, see the [Combined Degree Programs section](#).

Creative Expression and Society Program

The Minor in Creative Expression and Society allows students to develop creative and communicative proficiency by taking part in workshop-style courses in fiction, non-fiction, drama or poetry writing and/or creative expression through aural and visual media. Students will also explore the reciprocal relationship of the creative arts and society by studying social issues in the arts, the influence of writers and artists on society, and the impact of society and the marketplace on creative endeavours. Courses explore such topics as the arts and public opinion; reception and interpretation; marketing and

reviewing; censorship and criticism; ethics and accountability. This program fosters the exercise of creativity while making the relationship of creative expression and social conditions a subject for reflection and dialogue.

Education and Society Program

The Education and Society (E&S) Minor program provides students with opportunities to develop their understanding of the reciprocal relationship between social, cultural, historical, and political contexts of education. Conceived as an interdisciplinary Minor program, E&S targets students from a broad array of Major and Specialist programs with interests in education, teaching, curriculum development, learning, child development, social justice, and international education. The Minor program provides strong background for admission to a teacher education program and is required for admission to the Combined Degree Programs with OISE (Master of Teaching, and MA in Child Study and Education; separate application required).

Literature and Critical Theory Program

The Literature and Critical Theory program is based on a pair of ideas. The first is that many of the most important issues that engage our attention call for a multidisciplinary approach. The second is that the kind of critical analysis demanded by the study of literary texts offers powerful tools for investigating other cultural and social forms, both past and present. Central to the program is the comparative study of forms of representation – texts, media, institutions, and theories — in diverse cultures and historical periods. This requires thinking seriously about what it means to compare and what it means to translate.

The Literature and Critical Theory program will attract students who are interested in exploring and generating links between literature and historical, cultural, political, social, and psychological forces. The program trains students to think about how problems of the present are tied to those of the past, and to consider critically how we both represent this past and imagine possible futures. Students will be engaged in the practice of close, contextualized analyses of literary texts and other discursive forms, including artefacts, institutions and social practices, originating in different languages, geographical locations, and historical periods.

Literary production, like all forms of cultural production, invariably exceeds the boundaries of the nation, and increasingly so in today's globalized world. The boundaries between various cultural media are similarly porous, and the aesthetic values by which we identify, judge, and classify literary and cultural objects are historically shaped. For these reasons, students will be encouraged to study in more than one language and to work with a variety of media. Our courses explore literary

and cultural movements across languages, geographical regions, epochs, media, and disciplines.

Material Culture and Semiotics Program

What does it mean to live in a “material world”? What might we learn from studying the signs that surround us? In an increasingly consumer-oriented, globalized and digital age, how do objects and signs express the longstanding beliefs and values of different societies? The Minor in Material Culture and Semiotics is a unique, future-oriented program of study that combines the study of objects such as clothing, household goods, machinery, and built forms with semiotics – the science of signs, sense-making, and cultural interpretation. Courses examine the meanings people invest in their things, across cultures and time periods, and consider processes of production, consumption, invention, exchange, use, re-use, divestment, disposal, collection, and exhibition. Material Culture and Semiotics thus offers an interdisciplinary space in which to understand contemporary and emerging society through engagement with historical and theoretical perspectives on human behaviour and meaning-making. Students have the opportunity to participate in an internship course with a placement in museums, archives, cultural institutions, or creative design and advertising-oriented businesses. The Minor is designed to complement programs in such disciplines as Anthropology, Art History, History, Book and Media Studies, and History of Science and Technology and to prepare students for careers in such fields as marketing and advertising, museums and cultural institutions, communications, journalism, and education.

Renaissance Studies Program

The Renaissance Studies Program lets you study one of the most critical periods in European and world history. Changes in art and literature, in social and political development, and in technology and science transformed European concepts of the individual, society, and the world.

Many aspects of our modern world had their origin in this period: our emphasis on the study of human affairs; our irrepressible interest in the exploration of the universe, in science, and in medicine; the institutions of church and state as we know them today. The Renaissance is also a period of unparalleled European contacts with non-European civilizations – from the powerful Islamic world of the Near East and North Africa to the great pre-Columbian civilizations of the Americas, from the uncharted forests of equatorial Africa to the exotic lands of the Indian subcontinent and the Far East, nothing seemed too distant or too inaccessible for the European mind or merchant.

This interdisciplinary program is particularly attractive to students of history, politics, literature, fine art, history of

science, music and theatre, because it assembles aspects of all these studies to focus on one seminal period.

Science, Technology, and Society Program

The influence of scientific research and its applications is evident in virtually all aspects of modern life, from our conception of societal obligation and familial relations, to our interaction with the commonplace materials and objects we use to sustain ourselves. However, scientific and technological development is in turn affected by and shaped by politics, public opinion, moral beliefs and cultural practices.

Courses in this program explore topics such as ethical uses of technology, scientific revolutions and controversies, science-related policy and politics, modeling and communication of scientific research, and knowledge transfer from research to commercial and societal applications.

Education and Society Minor (Arts Program) - ASMIN1029

The Vic-sponsored Education and Society (E&S) Minor is open to all Arts and Science students. The program provides students with opportunities to develop their understanding of the social, cultural, historical, and political contexts of education and issues related to these contexts while reflecting on the reciprocal relationship between education and society.

Conceived as an interdisciplinary Minor program, E&S targets students from a broad array of Major and Specialist programs with interests in education, teaching, curriculum development, learning, child development, social justice, and international education. The Minor program provides strong background for admission to a teacher education program and is required for admission to the Combined Degree Program with OISE.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade or grade averages in required courses are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- PSY100H1/ SOC100H1/ VIC150Y1 (70%)
- 3.0 credits (minimum grade average of 73%)

To ensure that admitted students are adequately prepared to succeed in the program, applicants with a final grade and grade averages lower than those listed in the required courses will not be considered for admission. Please note

that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program.

Special requirement

Program applicants will be required to submit a supplemental application including 2 short questions related to the Education & Society Minor.

Completion Requirements:

(4.0 credits, including 1.0 credit at 300+ level)

1. PSY100H1/ SOC100H1/ VIC150Y1

Science, Technology, and Society Minor (Arts Program) - ASMIN2743

The Minor in Science, Technology, and Society is an interdisciplinary program that focuses on the different ways science and technology shape modern society and, in turn, how society shapes science and technology. From

the food we eat to the way we conceive family relations or our obligations to future generations, our daily practices and our beliefs are increasingly influenced by scientific research and its applications. In turn, politics, public opinion, moral beliefs and cultural practices affect scientific and technological development. Courses in this program address such topics as science and values, science-related policy and politics, ethical uses of technology, scientific revolutions and controversies, modeling and communication of scientific research, and knowledge transfer from research to commercial and societal applications.

VIC166H1 - Common Vices and Neglected Virtues: Intro to Ethics of Character

Hours: 24S

Vice is popular: a prestigious university press has brought out a series of seven books on the Seven Deadly Sins. This course examines such questions as the following. Are greed, lust and gluttony just bad names for necessary

and otherwise acceptable instincts? What is the place, in a good human life, of such qualities as honesty, trust, civility and the like? Are vices and virtues culturally determined or a matter of individual preference? Can character be taught, or is it rather a matter of genes and luck? Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

VIC116H1 - Politics of the Pen

Hours: 24S

A study of how literature challenges prevailing political beliefs and social norms. We will situate our discussion in the broader context of human rights and freedoms. We will examine cases where literature has been censored and writers have been imprisoned or driven into exile. Part of this course involves a community service-learning component. We will consider how this literature contributes to debate and advocacy around issues of social justice. Not eligible for CR/NCR option.

VIC117H1 - Understanding the Performing Arts: Interpretation and Expression

Hours: 24S

This course examines two key issues about the performing arts that concern both artists and theorists: the nature of interpretation and of expression. What might we mean when we say that a work, a piece of music or a dance for example expresses something? What is it to express? And what is the nature of interpretation? Are there any constraints or boundaries on interpretation? We will draw on both philosophers and non-philosophers to explore these sorts of questions. Not eligible for CR/NCR option.

VIC119H1 - Myths and Legends in Modern Contexts

Hours: 24S

This course provides an introduction to modern forms of ancient narratives, exploring the ways in which selected ancient literary sources and myths have been adapted to modern Canadian literature. Ancient narratives or 'old stories' are often reused, reinterpreted or reconstructed in modern narratives and given new relevance in a contemporary context. Students will encounter sources and contexts of ancient narratives. Not eligible for CR/NCR option.

VIC121H1 - Evaluating Healthcare: Problems and Solutions

Hours: 24S

This course introduces students to the study of healthcare by asking foundational questions about how evidence and knowledge are produced in the context of healthcare problems. Students will explore how different frameworks for clinical practise (e.g. Evidence-based Medicine, Person-Centered Healthcare) conceptualize evidence and

how different methodologies impact how healthcare research is conceived, reported, and understood. Students will learn to critically appraise healthcare research studies and assess their evidence value and implications for clinical practice. Restricted to first-year students. Not eligible for CR/NCR option.

VIC134H1 - Globalization

Hours: 24S

This interdisciplinary course explores the contemporary character of globalization. The world is shrinking as money, goods, people, ideas, weapons, and information flow across national boundaries. Some commentators assert that a more tightly interconnected world can exacerbate financial disruptions, worsen the gap between rich and poor nations, undermine democracy, imperil national cultures, harm the environment, and give unconstrained freedom to predatory corporations. Others proclaim that globalization - understood as capitalism and free markets - fosters economic growth, encourages creative collaboration, inspires technological breakthroughs, and enhances human prospects for a better life, in rich and poor countries alike, in unprecedented ways. Our task is to evaluate the evidence and draw our own conclusions. Not eligible for CR/NCR option.

VIC135H1 - The Death of Meaning

Hours: 24S

In *The Origin of Species*, Darwin concluded there was no evidence to suggest that life was designed by a higher power. A corollary of this is that our lives lack any necessary purpose or meaning. Our readings will be directed to the question of what it means to lack ‘Meaning’. Not eligible for CR/NCR option.

EDS363H1 - Teaching Math: The JUMP Approach

Previous Course Number: VIC363H1

Hours: 24S

This course will challenge the widely accepted idea that people need to be born with a special gift or natural ability to excel in mathematics. New research in education and cognitive science suggests that young learners often struggle in school because they are not taught in a way that allows their brains to work efficiently. This course will examine barriers that prevent students from learning and methods of teaching that can help all students reach their

full potential (not only in math). Math lovers and math phobic students are welcome: the course aims to help students develop deeper levels of confidence and understanding in mathematics so they can become effective teachers themselves.

MCS325H1 - Media Semiotics

Previous Course Number: VIC325H1

Hours: 24L

This course will deal with media semiotics, both in the traditional sense of the study of meanings in all media (from print to digital) and in how new digital media are changing the nature of signification and communication. The course will look at the usage of semiotics to study how meaning is negotiated in interactive media versus the older and still extant one-way media (print and radio, for example). The course will utilize actual media materials (comic books, television programs, text messages, and so on) on which semiotic analysis can be conducted.

Prerequisite: MCS223H1/ VIC223Y1

Exclusion: VIC325H1

Distribution Requirements: Social Science

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

MCS326H1 - The Material Culture of Food

Previous Course Number: VIC326H1

This course explores the material cultures which form around food and foodways in contemporary culture. It looks at foods as objects of production and consumption and at the material landscapes (culinary tools, the geography of the kitchen and restaurant, the archives - recipes, cookbooks, menus - that home cooks or chefs

use) in order to "expose" the social, cultural and political dimensions of cooking, entertaining and eating.

Prerequisite: Completion of 9.0 credits

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

MCS327H1 - Digital Material Culture

Previous Course Number: VIC327H1

Hours: 24S

This course explores the materiality of digital objects, from image and music files to digital documents to video games and other software, and considers their status as material culture. It involves the primary study of digital objects and also considers the technological infrastructures, cultural contexts, and signifying systems in which they are produced, circulated, and interpreted.

Prerequisite: Completion of 9.0 credits

Exclusion: VIC327H1

Distribution Requirements: Social Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

MCS328H1 - Materializing Cultural Identities

Previous Course Number: VIC328H1

Hours: 24S

Students examine the expression of cultural identities in objects. Students are taught to think critically about the construction, use, display, and exchange of objects with significance for cultural identity. In addition to lectures and discussions, students participate in guided visits to sites – everyday, ritual, institutional – where negotiation of identity through objects occurs.

Prerequisite: Completion of 9.0 credits

MCS373H1 - Materialities of Music

Previous Course Number: VIC373H1

Hours: 24L

Music is often understood as the most ephemeral and transcendent of the fine arts, even if that means overlooking the physical realities of music's production and dissemination. We will examine these materialities here, from paper and technologies of print, through to instruments for making and studying sound, and architectural spaces for its market circulation; we will see how music and its instruments provided the raw material for the emergence of a nineteenth-century science of acoustics.

Prerequisite: Completion of 9.0 credits

Exclusion: VIC373H1

Recommended Preparation: 0.5 credit in Creative Expression and Society, Material Culture, or Music.

An in-depth study in an aspect of the Renaissance based around lectures, seminars, and readings. Content in any given year depends on the instructor.

Prerequisite: Completion of 9.0 credits

Recommended Preparation: REN240Y1, or another course in Renaissance Studies.

Distribution Requirements: Humanities

Mode of Delivery: In Class

REN492Y1 - Renaissance Studies Independent Study

Previous Course Number: VIC492Y1

This course provides an opportunity to design an interdisciplinary course of study, not otherwise available within the Faculty, with the intent of addressing specific topics in Renaissance studies. Written application (detailed proposal, reading list and a letter of support from a Victoria College faculty member who is prepared to supervise) must be submitted for approval on behalf of Victoria College. For application procedures visit the Victoria College website. Not eligible for CR/NCR option.

Prerequisite: Completion of 9.0 credits and permission of the Program Coordinator.

Exclusion: VIC492Y1

Distribution Requirements: Humanities

Mode of Delivery: In Class

REN492H1 - Renaissance Studies Independent Study

Previous Course Number: VIC492H1

This course provides an opportunity to design an interdisciplinary course of study, not otherwise available within the Faculty, with the intent of addressing specific topics in Renaissance studies. Written application (detailed proposal, reading list and a letter of support from a Victoria College faculty member who is prepared to supervise) must be submitted for approval on behalf of Victoria College. Science, Technology, and Society

VIC206H1 - Psychology and Society

Hours: 24S

This course explores central developments and ongoing controversies in the scientific study of the human mind, brain and behaviour. It examines topics such as: psychoanalysis, behaviourism, humanistic psychology, evolutionary psychology, intelligence testing, and feminist perspectives. Goals include understanding the historical evolution and social relevance of scientific psychology.

Exclusion: VIC106H1

Distribution Requirements: Humanities, Social Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

VIC207H1 - Evolution, Genetics, and Behaviour

Hours: 24S

In this course we examine major episodes in the history of evolution and genetics in the twentieth century. Topics include Darwinian evolution, sociobiology and evolutionary psychology, eugenics, and genetic screening and therapy. We will examine different views about the control of evolution and genetic manipulation in their socio-cultural-economic context and discuss the ethical and social implications of those views.

Exclusion: VIC107H1

Distribution Requirements: Humanities, Social Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

REN242H1 - Scientific Worldviews of the Renaissance

Previous Course Number: VIC242H1

Hours: 24L

An in-depth study of late medieval and early modern scientific worldviews, with a focus on interconnections between natural philosophy, cosmology, theology, astronomy, optics, medicine, natural history, and ethics. Through a consideration of early modern ideas including free will and determinism, the finite and infinite universe, teleology and mechanism, theism and deism, and

deduction and intuition, this course investigates some of the period's key metaphysical and methodological assumptions, and reveals how an evolving scientific understanding informed the Renaissance worldview.

Exclusion: VIC242H1, HPS309H1

Recommended Preparation: Completion of 4.0 credits

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

VIC245H1 - Science Wars: Society and the Limits of Scientific Knowledge

Hours: 24L

An introduction to competing conceptions of scientific knowledge and the role of sociocultural factors in shaping scientific methods, theories, and evidence. Can science provide objective knowledge of the external mind-independent world, or are the empirical aspirations of science limited by the social, cultural, economic, political, and religious contexts that shape "science" itself? Can scientific knowledge reach certainty? How do sociocultural factors affect the process of theory acceptance? This course considers "science" as an epistemological battleground from 17th century debates on inductive reasoning to contemporary arguments about "alternative" science.

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

VIC246H1 - Animal, Vegetable, Mineral, Monster

Hours: 24L

This course introduces students to the history of natural history--or how thinkers (often called "naturalists") made sense of the world around them. Course readings, lectures, and activities will explore changing perspectives on nonhuman nature across time, from medieval bestiaries to early modern cabinets of curiosities, from colonial botany to more recent legends of Yetis, Bigfoots, and other fantastical creatures of cryptozoology.

Prerequisite: Completion of 4.0 credits

Distribution Requirements: Social Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

VIC274H1 - Wisdom of the Social Sciences

Hours: 24S

This course examines influential efforts to study human beings and society scientifically, from the seventeenth century to the present. We consider major contributions from prominent thinkers, such as Thomas Hobbes, Adam Smith, Karl Marx, and Sigmund Freud. We also review the contemporary relevance and persistent controversies about their ideas.

Distribution Requirements: Social Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

VIC278H1 - Modelling Evil and Disease

Hours: 24S

Models frame our understanding and treatment of illness and are the most fundamental element of the scientific method. Theology, history, and literature may use models in different ways than natural and medical sciences but fundamentally all modelling is an attempt to accurately predict and manipulate the future.

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

VIC377H1 - Special Topics in Science, Technology and Society

Hours: 24S

In-depth study of a topic related to science and society. Content varies with instructor. Please see the Victoria College website for current offerings.

Vic Capstone

VIC435H1 - Capstone Seminar: Community-Engaged Research

Hours: 12L/78P

This course provides students with an experiential learning opportunity in community-engaged research combined with critical reflection and academic discussion within a seminar setting. Through a placement in social enterprise organizations, students develop research-based approaches to support their organization in assessing needs, impact, and resources. Alongside this hands-on experience, interdisciplinary seminar discussions will help students understand how research methodologies, standards, and protocols are deployed in community settings. Not eligible for CR/NCR option.

Prerequisite: Completion of 15.0 credits. Application required.

Exclusion: NEW497Y1/ NEW498H1

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

VIC451H1 - Capstone: Learning Communities and Higher Education

Hours: 24S

This course examines higher education in Canada using Victoria University and Victoria's affiliates as a case study. Topics covered include learning communities, mentoring, experiential learning, and international contexts of education. Students gain practical mentorship experience through placement in first-year Victoria College courses. Not eligible for CR/NCR option.

Prerequisite: A minimum CGPA of 3.0, completion of 15.0 credits, and an application are required

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

VIC452H1 - Work-Integrated Capstone Course

Hours: 24S

This seminar provides academic support for individual work placements in a specific sector of employment, through interdisciplinary readings, integrative discussion, and critical reflection on the culture of labour and the acquisition of workplace skills and experience.

Assignments will include reflective exercises and critical analyses, leading to participation in a capstone seminar. Not eligible for CR/NCR option.

Prerequisite: Completion of 15.0 credits and an application are required

Recommended Preparation: A strong academic record

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

VIC476H1 - Capstone Seminar in Foreign Policy

The seminar involves a critical assessment of current foreign policy issues and contemporary world problems. Issues and case studies to be analyzed include: 1. International military interventions to respond to imminent threats or humanitarian crises, issues of legitimacy and effectiveness. e.g., Iraq, Afghanistan, Kosovo, Haiti. 2. Canada-US relations in international crisis management, the track record and the way ahead. 3. Globalization, international terrorism, and their effects on sovereignty, diplomacy and international institutions.

Introduction

For nearly five decades, we have trained students to think deeply about how gender and sexuality operate at individual, interpersonal, institutional and global levels. We are an interdisciplinary program with faculty expertise across a range of fields, including history and literature, sociology and law, cultural studies and queer theory, and African, Caribbean, Middle Eastern, East Asian, and Equity studies. We enable students to answer urgent and complex questions, such as how militarization can constrict men's aspirations for their lives, why pay gaps

exist, how sexual expression is scripted and can be re-scripted, and even what Lizzo might have in common with Shakespeare. In addition to training students to analyze a music video, a novel, and a government report with equal care and skill, we also focus attention on matters of scale: when to aggregate and when to parse significant distinctions; how to think comparatively across space and time.

The Women & Gender Studies Institute (WGSi) at the University of Toronto is distinctive for its transnational approach. We critically address how national borders and nationalist discourses frame constructions of gender, race, class, indigeneity, sexuality, ability, and other important differences. We study the effects of migration, diaspora, and displacement on experiences of home and heritage, family, desire, and selfhood. We provide students the conceptual tools to connect processes of imperialism and globalization with emergent economies and forms of labour and consumption. Finally, we encourage students to reflect on the varied histories of feminism when framing their own activism in the present.

Our graduates go on to do innovative work in the public service, creative, and corporate sectors, and some enter the academy. They become everything from documentary filmmakers to grassroots activists to policy analysts in economic development agencies and professors in leading universities. All of them draw on the critical lenses they develop in this program, becoming part of a rich community of graduates who maintain their connections with one another, and who come back to the diverse classrooms where they once were students to share their experiences.

WGS380H1 - Feminist Graphic Novels

Hours: 24L

Comics aren't new, and graphic novels aren't either, but feminists have built a rich array of stories about consciousness, resistance, and coming of age in this genre that warrant scholarly attention. In this case, we will read graphic novels for their subtleties, thinking about what picture and text make possible in the exploration of emotion, interconnection, and identity. Reading about

resistance to marriage in *Aya of Yop City*, a child's view of revolution in *Persepolis*, parent child reckoning in *Fun Home*, and loneliness in *Skim* will advance students' understandings of the power of narrative and the pictorial displacement of innocence.

Recommended Preparation: WGS160Y1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

WGS381H1 - Black Britain: Race, Gender and Entangled Diasporas

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

WGS385H1 - Gender and Neoliberalism

Hours: 24L

Reviews major feminist transnational, Marxist and Foucauldian approaches to the study of neoliberalism. Adopts a comparative, historical and global approach to the ways that gender is implicated in state restructuring, changing roles for corporations and non-governmental organizations, changing norms for personhood, sovereignty and citizenship, and changing ideas about time/space.

Recommended Preparation: WGS160Y1

Distribution Requirements: Humanities, Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

WGS386H1 - Gender and Critical Political Economy

Hours: 24L

Offers a critical analysis of political economy, its historical and contemporary contentions and the ruptures that open the space for alternative theorizing beyond orthodox and heterodox thinking, by inserting gender and intersecting issues of power, authority and economic valorization across multiple and changing spheres: domestic, market and state.

Recommended Preparation: WGS160Y1; WGS273Y1

Distribution Requirements: Humanities, Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

WGS390H1 - Land-ing: Indigenous and Black Futurist Spaces

Hours: 24L

Students are invited to think through the relationships between Indigenous and Afro-futurist concepts of land. This class will engage Indigenous feminist and Black queer and feminist theories of land and space, linking them to Afrofuturist and Indigenous futurist thought. We explore various texts in relation to emergent methodologies, decolonial desires, and love and radical relationalities.

Prerequisite: Completion of 4.0 credits

Exclusion: WGS335H1 (Special Topic in Women and Gender Studies: Indigenous Feminist Theory), offered in Fall 2015, WGS335H1 (Special Topic in Women and Gender Studies: Decolonial Aesthetics and Futurities), offered in Winter 2018, Winter 2019 and Winter 2020

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

WGS396H1 - Writing the Body

Hours: 24L

Examines the ways in which bodies are lived and inscribed and represented through a variety of genres. Students will work through issues of corporeality and materiality in the production and reception of texts and will practice embodied writing on a personal level through in-class workshops and written assignments.

Exclusion: WGS332H1: Writing the Body

Recommended Preparation: WGS160Y1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

WGS397H1 - The Politics of Girlhood

Hours: 24L

The course communicates the growing field of "girl studies" and provides a critical exploration of the historical, social, psychological and political definitions attached to girlhood. We will move toward a feminist understanding of how definitions of girl-child shape individual experience, historical narratives, cultural representations, political agendas and futures.

Exclusion: WGS335H1: The Politics of Girlhood

Recommended Preparation: WGS160Y1

Distribution Requirements: Humanities, Social Science

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

WGS420H1 - Asian/North American Feminist Issues

Hours: 24L

A transpacific examination of issues that have directly and indirectly shaped the feminist and other related critical inquiries in Asia and among the Asian diasporas in Canada and the United States.

WGS440H1 - Decolonial Cyborgs for Planetary Futures

Hours: 24L

Drawing together film, fiction, and theory this course invites students to explore ways of imagining other worlds. From afro-futurism to planetary humanism, from cyborgs to hauntings, from science fiction fantasies to the politics of aliens, the course examines and produces feminist, postcolonial, anti-racist, and queer visions of other worlds.

Prerequisite: 2.5 WGS credits including WGS160Y1 and 1.0 WGS credit at the 300+ level

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

WGS442H1 - Toxic Worlds, Decolonial Futures

Hours: 24S

This course explores the ways environmental violence is an integral practice of settler colonialism that affects human and non-human life, disrupts Indigenous sovereignty, and enacts ongoing racism. A typical way of addressing environmental violence is to document the harm done to bodies and communities. This class asks, how might we also refuse environmental violence and enact better obligations to land/body relations? What kind of decolonial futures can be summoned in the aftermath of environmental violence? Our readings will bring Indigenous feminist approaches together with Black feminist, queer, and feminist environmental justice approaches. Participants will build upon the readings to create their own decolonial environmental justice future projects.

Prerequisite: 2.5 WGS credits including WGS160Y1 and 1.0 WGS credit at the 300+ level

Exclusion: WGS463H1 (Advanced Topics in Gender Theory: Toxic Worlds, Decolonial Futures), offered in Winter 2018, Winter 2019 and Winter 2020

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

WGS450H1 - Modernity, Freedom, Citizenship: Gender and the Black Diaspora

Hours: 24L

Explores transnational feminist genealogies of the black diaspora. The course pays attention to the contexts and movements that generated key questions, exploring how these interventions disclose preoccupations with modernity, freedom and citizenship. Topics may include trauma and memory, sexual citizenship, Afrofuturism, indigeneity, and the crafting of political communities.

Prerequisite: 2.5 WGS credits including WGS160Y1 and 1.0 WGS credit at the 300+ level

Exclusion: WGS434H1 (Advanced Topics in Women and Gender Studies: Black Diasporic Feminisms: Modernity, Freedom, Citizenship), offered in Fall 2012

WGS481H1 - Gender, Sexuality and Black Liberation from Black Power to #BlackLivesMatter

Previous Course Number: WGS435H1

Hours: 24S

This course maps genealogies of black insurgency and transnational itineraries of intersectional theorizing, organizing, and praxis from the 20th century to our present moment. Through close study of works by and about black revolutionary migrants, exiles, intellectuals, fugitives, and so-called terrorists, participants will critique and create radical visions for emancipation. Major topics and themes may include black feminisms; queer insurgencies; transnational imaginaries and solidarities; silence and intracommunal violence; accountability and transformative justice. Through collective discussion, writing, and reflection we interrogate visions and strategies of emancipation, and imagine radical futures historically and in our own times.

Prerequisite: 2.5 WGS credits including WGS160Y1 and 1.0 WGS credit at the 300+ level

Exclusion: WGS435H1 (Topics: Sex, Gender and Revolution from Black Power to #BlackLivesMatter), offered in Winter 2017 and Fall 2017

Mode of Delivery: In Class

WGS482H1 - Translating Sexuality: Queer Migration, Queer Diasporas

Previous Course Number: WGS434H1

Hours: 24S

This course examines how notions of sexuality travel as people move within and beyond national borders. It investigates how queer and trans migrants pursue different versions of belonging, solidarity, survival, and

hope. Participants will study transnational archives (which may include popular culture, new media, film, literature, and performance) as they trace globalization's effects on racialized, queer, and trans communities. Major topics may include: queer of color critique; queer settler colonialism; transnational and global south sexualities; imperialism and militarism; neoliberalism and homonationalism; humanitarianism and sexual rights; queer and trans social movements; postcolonial intimacies.

Prerequisite: 2.5 WGS credits including WGS160Y1 and 1.0 WGS credit at the 300+ level

Exclusion: WGS434H1 (Topics: Trans/national Sexuality), offered in Fall 2016 and Fall 2017

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Introduction

Woodsworth College is named in honour of James Shaver Woodsworth (1874-1942), minister, pacifist, social activist and Member of Parliament, who was strongly committed to broadening educational opportunities for all. The College remains faithful to its mission of promoting accessibility and equity, providing two access programs for students seeking admission to the Faculty of Arts and Science: the Millie Rotman Shime Academic Bridging Program and the Diploma to Degree Transfer Program. In addition, Woodsworth offers rewarding educational experiences through its distinctive College One programs, a selection of First-Year Foundation courses, and the Summer Abroad programs. The Minor program in Digital Humanities prepares students for future paths ranging from graduate studies in literature, history, library science, and other fields, to careers as technical writers, data analysts and visualizers, project managers, and programmers. Regardless of College affiliation, you are encouraged to explore the exceptional range of programs offered by [Woodsworth College](http://www.wdw.utoronto.ca).

Digital Humanities (Minor program)

Digital humanities (DH) is a discipline at the intersections of the humanities with computing. DH studies human culture -- art, literature, history, geography, religion -- through computational tools and methodologies; and, in turn, DH studies the digital through humanist lenses. Digital humanists study social media phenomena or medieval manuscript archives; computationally analyze thousands of newspaper articles to trace economic developments; construct video games to study literary narratives; or resurrect historical cities through digital maps and virtual reality exhibits.

In introductory and advanced DH courses, students learn about the intellectual landscape of digital humanities scholarship. They learn how to build digital stories, exhibits, and maps; how to digitize rare books; how to analyze collections of data; how to construct digital models and 3D-print them; and how to manage major digital projects. By the end of the program, students conduct a major DH research project of their own or participate in the research of an established faculty project. Throughout the program, students gain a critical perspective on digital technologies, learning to consider the ways digital platforms shape, and are shaped by, the currents of wider social and cultural forces. By providing this critical and technical skillset, the Digital Humanities Minor prepares students for future paths that range from graduate studies in literature, history, library science, education, or computer science, to careers as technical writers, data analysts and visualizers, project managers, or programmers.

First-Year Foundation Options

Woodsworth College offers two kinds of First Year Foundation options: individual FYF H seminars on a variety of topics, and our College One, in two streams that consist of two H seminars each, for students interested in a deeper level of engagement in this part of their first-year experience. All our First Year Foundation seminars offer an intellectually challenging introduction to university-level studies and are designed to complement other first-year courses, thereby enhancing academic success in the first year and beyond. They promote the development of strong critical thinking, information literacy, oral and written communication skills, and awareness of both the distinctive nature of particular academic disciplines and the practices and values common to all academic work.

FYF Seminars

Woodsworth's FYF seminars, all of which are stand-alone H courses, are designed to provide first-year students with the opportunity to work closely with an instructor and

fellow students in a class of no more than 25, maximizing opportunities for class discussion and the development of essential academic skills. Each seminar focuses on specific disciplinary or interdisciplinary issues, questions or controversies of particular interest to the instructor, and introduces the students to the excitement of discovery inherent in academic research and scholarship at the University of Toronto. Wide-ranging readings and assignments encourage students to develop their ability to think critically and to express ideas and arguments clearly and coherently, both orally and in writing. Please check the [timetable](#) for Woodsworth College's [current offerings](#) of FYF seminars.

Woodsworth One

Woodsworth One has two interdisciplinary streams, both of which draw on a wide range of Social Sciences and Humanities perspectives. The Order and Disorder stream focuses on the role of laws, government policies, trade, war, and innovation in creating and disrupting both social and global order. The Popular Culture Today stream examines the products of the entertainment industry and the social behaviours associated with their consumption, exploring how popular culture works and what it means.

Students take two 0.5 credit seminars – one in each term – and participate in regular co-curricular activities that build students' sense of community within Woodsworth College and across the University of Toronto. Seminars are capped at 25 students to maximize opportunities for participation and to promote close contact with both the instructor and fellow students. The emphasis is on class discussion and problem-based learning. Students participate in role-playing games, simulations, debates and more. The co-curricular activities include field trips, film screenings, guest speakers, writing and research workshops, and test-taking seminars.

The Woodsworth One team is dedicated to supporting students' transition to university life, and to guiding their academic planning. In addition to the Program Coordinator, course instructors, and peer mentors, the team includes the College Writing Centre, the College Learning Strategist, a dedicated Registrar, and a program administrator. Each member of the team seeks to create a strong sense of community and to set students up for academic success.

Woodsworth One is geared towards first-year students enrolled in Social Sciences and Humanities within the Faculty of Arts and Sciences. In keeping with Woodsworth College's tradition of open access, there is no incoming grade requirement. Students participating in any other One program are excluded from Woodsworth One. Please note that both streams may not be offered in a given year. For more information please check the timetable for current course options.

Summer Abroad Programs

Students can prepare themselves for a future in the global village by participating in a Summer Abroad program and complete a University of Toronto course overseas in three to six weeks. These programs are designed to enrich students' academic lives by providing an exciting and educational international experience. Learning is not limited to the classroom; students will observe and experience many of the things they study, including the language, history, culture, art, religion, business, and politics of the host country.

Millie Rotman Shime Academic Bridging Program

The Academic Bridging Program is designed for individuals who have been away from formal education for some time and do not meet the University's established requirements for direct entry admission. Both part-time and full-time options are available to students interested in studies in the Humanities and Social Sciences. Those seeking admission to the Sciences must take the program's full-time science option. Students who successfully complete the program with a grade of 63% or above are admitted to the Faculty of Arts and Science with one full credit towards their degree. Students who complete either of the program's full-time options may transfer up to 2.0 credits towards their degree.

Diploma to Degree

The Diploma to Degree program is a pathway to university studies for students completing a two-year liberal arts diploma at one of our partner institutions, including George Brown College, Humber College and Seneca College. The Diploma to Degree Program is a facilitated transfer program into Woodsworth College in the Faculty of Arts and Science at the University of Toronto. The program is designed for students to transfer with up to 6 transfer credits and retained credits from courses completed at the University of Toronto.

To be eligible for transfer, students must:

- Complete the 2-year diploma with a minimum 3.0 GPA
- Receive a recommendation from their college
- Achieve a minimum grade of 60% in a qualifying course at the University of Toronto.

Digital Humanities Minor (Arts Program) - ASMIN1337

Digital humanities (DH) is a discipline at the intersections of the humanities with computing. DH studies human culture -- art, literature, history, geography, religion -- through computational tools and methodologies; and, in turn, DH studies the digital through humanist lenses. Digital humanists study social media phenomena or medieval manuscript archives; computationally analyze thousands of newspaper articles to trace economic developments; construct video games to study literary narratives; or resurrect historical cities through digital maps and virtual reality exhibits.

In introductory and advanced DH courses, students learn about the intellectual landscape of digital humanities scholarship. They learn how to build digital stories, exhibits, and maps; how to digitize rare books; how to analyze collections of data; how to construct digital models and 3D-print them; and how to manage major digital projects. By the end of the program, students conduct a major DH research project of their own or participate in the research of an established faculty project. Throughout the program, students gain a critical perspective on digital technologies, learning to consider the ways digital platforms shape, and are shaped by, the currents of wider social and cultural forces.

By providing this critical and technical skillset, the Digital Humanities Minor prepares students for future paths that range from graduate studies in literature, history, library science, education, or computer science, to careers as technical writers, data analysts and visualizers, project managers, or programmers.

Students should note that some courses at the 200, 300, and 400 levels may have additional prerequisites.

Permission to count courses that are not on the list below towards the Minor in Digital Humanities must be received from the Program Coordinator, and will be granted on a case-by-case basis when the student's work demonstrably and substantially engages Digital Humanities-related content or research methods.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, including 1.0 credit at the 300/400-level)

Students should note that some courses at the 200, 300, and 400-levels may have additional prerequisites.

Permission to count courses towards the Minor in Digital Humanities that are not in the Completion Requirements must be received by the Program Coordinator, and will be granted on a case-by-case basis when the student's work demonstrably and substantially engages Digital Humanities-related content or research methods.

It is not possible to complete this program in one year.

 - Writing and Rhetoric: [WRR303H1](#)

3. A minimum of a 0.5 credit that provides a capstone experience, chosen from the list below:
 - a. [DHU435H1](#), [DHU436H1](#), [DHU437H1](#)
 - b. Other 400-level courses with a significant DH practicum element, such as [CDN435Y1](#) (Active Citizenship), can also be considered for fulfillment of the capstone requirement, if students receive written permission of the Digital Humanities Program Coordinator within the first two weeks of enrollment in the course.

Note: Cross-listed courses are offered by other departments. Registration in these courses may be available only to students who have completed specified prerequisites and/or are enrolled in a program sponsored by the department offering the course. Course enrolment conditions are listed in the Arts and Science timetable. Course descriptions, prerequisites, corequisites and exclusions are listed in the Calendar.

Note:

- Effective Fall 2021, courses associated with Woodsworth College's Digital Humanities program will have the new "DHU" designator.
- Effective Fall 2021, active courses associated with St. Michael's College's Book and Media Studies program will have the new "BMS" designator. In addition, courses associated with Innis College's Urban Studies and Writing and Rhetoric programs will have the new "URB" and "WRR" designators respectively.

Regarding Woodsworth College Courses

Not all courses are offered every year. Please check the [timetable](#) for current course offerings and enrolment restrictions/conditions. Students without course prerequisites may be removed at any time they are discovered. Course descriptions, prerequisites, corequisites and exclusions are listed below.

Woodsworth College Courses

Woodsworth First-Year Foundations

WDW195H1 - Autobiographies of Reading: Assembling a Digital Commonplace Book

Hours: 24L/12T

This course explores the practice of reading at the juncture between printed page and digital screen through assembling a digital commonplace book, an annotated personal anthology that will document each student's intellectual path. Students will learn close reading strategies, multimodal annotation techniques, and various modes of digital engagement with texts. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
Mode of Delivery: In Class, Hybrid

WDW196H1 - From Rayguns to Light Sabers: Science Fiction in Contemporary Culture

Previous Course Number: CCR199Y1
Hours: 24S

This course examines science fiction as pop culture genre, media industry, and sociocultural phenomenon, with attention to some of its key themes, its important texts, creators, and audiences, and its place in contemporary culture. We will study some works chosen by the class as well as by the instructor. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: [ANT195H1](#), [VIC137H1](#)
Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
Mode of Delivery: In Class

WDW197H1 - Jane Austen on Film

Hours: 24S

In the 21st century, Jane Austen's early 19th-century novels of love and marriage are increasingly experienced through retellings and updates in theatrical and made-for-television movies. The course will examine highlights from the last 25 years of Austen adaptations for what they can tell us about relationships in our time, including how Austen's stories are rewritten to please a modern audience. Films in the course will include works from 1995 to 2016 (from 1995, *Clueless*, Austen's *Emma* retold as a Hollywood high school comedy and starring Alicia Silverstone; and *Sense and Sensibility*, for which Emma Thompson's screenplay won an Academy Award; and from 2016, the Hallmark Channel's *Unleashing Mr. Darcy*, Austen's *Pride and Prejudice* transferred to the present-day dog show circuit; and writer/director Whit Stillman's *Love and Friendship*, the first-ever film version of Austen's *Lady Susan*). Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities
Breadth Requirements: Creative and Cultural Representations (1)
Mode of Delivery: In Class

WDW198H1 - There and Back Again: Exploring Tolkien

Hours: 24S

Since the mid-twentieth century, J.R.R. Tolkien's *The Hobbit* and *The Lord of the Rings* have become classics of children's and fantasy literature. In this course, we read Tolkien's *The Lord of the Rings* and investigate the world-building and imagined history that lies behind the books. We trace how Tolkien's own life experience informed his work—his experience as a soldier of the Great War and a civilian during World War Two; as a scholar of medieval language and literature, and of fairy tales; as a Catholic thinker; and as a lover of nature and the past. We also survey the afterlife of the novels in fantasy, film, and the popular imagination. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

WDW199H1 - Indigenous Knowledge and Storytelling in Toronto

Hours: 12T/24S

The land now known as Toronto has a 13,000+ year old history of Indigenous presence that is still unfolding. This history is inscribed in the land – it is visible in the geographical features, place names, and contemporary urban form of the city and is represented through stories (oral and written) told by diverse members of Toronto's Indigenous community. This course engages with stories of Indigenous history and presence in Toronto through a selection of Indigenous literary works about Toronto, Indigenous guest speakers, and a series of experiential Indigenous storytelling tours of significant locations across the city. Students will be introduced to Indigenous worldviews and ways of knowing and will learn why storytelling remains a significant and culturally-appropriate means for keeping and sharing land-based Indigenous Knowledge. Students will gain a deeper appreciation of the city as a traditional Indigenous territory and will reflect on their own relationships and responsibilities within these lands. Restricted to first-year students. Not eligible for CR/NCR option.

Woodsworth One

WDW151H1 - Order and Disorder I: Issues and Perspectives

Hours: 16T/24S

Societies require law and order, but at what point does order become oppression? How do we balance our need for freedom and society's need for order? This interdisciplinary seminar allows students to explore these and related questions through selected readings introducing theories from sociology, political science, philosophy, and history. Restricted to first-year students. Not eligible for CR/NCR option.

Distribution Requirements: Social Science

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class

WDW152H1 - Order and Disorder II: Problems and Solutions

Hours: 16T/24S

This interdisciplinary seminar introduces students to some of the methods used by scholars and researchers in sociology, political science, philosophy, and history to develop, test, and debate possible solutions to the problems of social order and disorder. Topics will vary from year to year. Restricted to first-year students. Not eligible for CR/NCR option.

Digital Humanities

DHU235H1 - Introduction to Digital Humanities

Previous Course Number: WDW235H1

Hours: 24L/12P

Digital Humanities (DH) studies human culture -- art, literature, history, geography, religion -- using computational tools and methodologies, and at the same time studies digital technologies and communities through humanist lenses, as complex cultural objects shaped by wider social and political concerns and the ways we construct knowledge and meaning.

Prerequisite: 4.0 credits

Exclusion: WDW235H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

DHU236H1 - Virtual Worlds: Introduction to Spatial Digital Humanities

Previous Course Number: WDW236H1

Hours: 24L/12P

A Digital Humanities perspective on the virtual worlds in which we are increasingly immersed, from scholarly digital archives to video games. We study the theory and methods of geospatial humanities research and explore the technical and cultural implications of computer vision, augmented reality, the Internet of Things, and 3D printing.

Prerequisite: DHU235H1 or permission of the Program Coordinator

Exclusion: WDW236H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

DHU334H1 - Innovation Through a Digital Lens

Hours: 24L

After some preliminary study of the nature of innovation and the social, political, and economic implications of new ideas and technologies throughout human history, students will select a single innovation to work on as a case study over a series of term assignments, culminating in an online exhibit. Using both traditional research methods and digital tools student will examine the origins and evolution of their chosen innovation, as well as aspects of its impact. The assignments will also give students opportunities to reflect on the ways the digital lens has impacted both their research and their understanding.

Prerequisite: DHU235H1 and DHU236H1, or permission of the DH program coordinator

Distribution Requirements: Humanities

Breadth Requirements: Society and its Institutions (3)

Mode of Delivery: In Class, Hybrid

DHU335H1 - From Book to Map to Video Game: Texts and their Digital Transformations

Previous Course Number: WDW335H1

Hours: 24L/12P

An examination of the new forms of storytelling made possible by digital media from two perspectives, that of the maker and that of the scholarly reader. Students learn to critically analyze storytelling in new media and experiment with their own adaptations of a literary text to various digital platforms.

Prerequisite: DHU235H1 and DHU236H1; open to students not taking the Digital Humanities Minor by permission of the program coordinator.

Exclusion: WDW335H1

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

DHU336H1 - Research and Writing in Digital Humanities

Previous Course Number: WDW336H1

Hours: 24L

This course explores the future of digital humanities from two perspectives. We will examine some successful contributions to the humanities employing digital technology, and also look at some critical assessments of digital technology's impact on humanistic studies. Students will then develop and report on their own digital humanities research projects.

Prerequisite: DHU235H1 and DHU236H1, or permission of the program coordinator.

Exclusion: WDW336H1

Distribution Requirements: Humanities

Breadth Requirements: Thought, Belief and Behaviour (2)

Mode of Delivery: In Class

DHU337H1 - Historical Archives in the Digital Age

Previous Course Number: WDW337H1

Hours: 24L/12P

How do digital surrogates of texts and objects change how we use them? This course examines texts and archives in the digital age: the aims of building them; the new scholarly approaches that they enable; the preservation,

access, and equity questions that they raise and require us to answer responsibly.

Prerequisite: [DHU235H1](#) and [DHU236H1](#); open to students not taking the Digital Humanities Minor by permission of the program coordinator.

Exclusion: [WDW337H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

DHU338H1 - Data: Access, Creation, Curation, and Interpretation

Previous Course Number: WDW338H1

Hours: 24L/12P

A central challenge of digital humanities is the complexity of representing interpretive, narrative, and perspective-dependent humanities data through digital tools and environments. Topics include the history of “data” as term and concept; data standards, databases, and linked data; datasets, data curation and analytics, both qualitative and quantitative; and data visualization.

Prerequisite: [DHU235H1](#) and [DHU236H1](#); open to students not taking the Digital Humanities Minor by permission of the program coordinator.

Exclusion: [WDW338H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

DHU339H1 - Special Topics in Digital Humanities

Hours: 24L/12P

Topics will vary from year to year. Open to students not enrolled in the Digital Humanities Minor by permission of the program coordinator.

Prerequisite: [DHU235H1](#) and [DHU236H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

DHU435H1 - The Internet Archive

Previous Course Number: WDW435H1

Hours: 24L/12P

Digital environments change how knowledge is created, communicated, and used. Using the Internet Archive as case study, this course examines the significance of such changes from a variety of perspectives: knowledge representation; technical infrastructure; gender, class, and race issues; disability rights; intellectual property questions; and algorithmic and interpretive scholarly approaches.

Prerequisite: [DHU235H1](#) and [DHU236H1](#) plus at least 1.0 additional credit in the Digital Humanities Minor program; open to students not taking the Digital Humanities Minor by permission of the program coordinator.

Exclusion: [WDW435H1](#)

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

DHU436H1 - Advanced Topics in Digital Humanities

Previous Course Number: WDW436H1

Hours: 24L/12P

This course serves as a capstone for the Digital Humanities Minor program. It includes opportunities for students to conduct original research. The topics for this course will vary from year to year.

Prerequisite: [DHU235H1](#) and [DHU236H1](#), and 1.0 additional credit in the Digital Humanities Minor program.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Mode of Delivery: In Class

DHU437H1 - Research Projects in Digital Humanities

Previous Course Number: WDW437H1

This course is for students who wish to pursue a significant research project, usually participation in a faculty-led DH research project, though it may take other forms. Students must be enrolled in the DH Minor program or obtain special permission of the program coordinator.

Prerequisite: [DHU235H1](#) and [DHU236H1](#), and 1.0 additional credit in the Digital Humanities Minor program.

Distribution Requirements: Humanities

Breadth Requirements: Creative and Cultural Representations (1)

Writing in the Faculty of Arts & Science

The ability to think critically and to write well-organized, clear, grammatical prose is important to your work in Arts and Science courses. It will also improve your chances if you apply to graduate or professional schools and will give you an advantage in the workplace. To help you develop your writing skills, Arts and Science provides a range of instructional resources.

NOTE: For courses in creative writing, see entries under “[English](#)” (ENG), “[Innis College](#)” (WRR), and “[Victoria College](#)” (CRE) in this Calendar.

Courses

Departments and programs integrate writing instruction into many of their courses, and some offer courses that concentrate on communication in their disciplines. Check the course listings by department.

Your course instructors and teaching assistants will provide guidelines for written assignments. They will often offer instruction in class and give you the opportunity to ask questions before assignments are due. You may ask them to discuss work that has been graded and returned to you.

In addition, the university offers several courses in writing effective essays:

- [ENG100H1](#) (Effective Writing) is listed under “English” in this Calendar
- [WRR103H1](#) (Introduction to Academic Essay Writing) is listed under “Innis College”
- [WRR203H1](#) (Advanced Essay Writing) is listed under “Innis College”
- [JWE206H1](#) (Writing English Essays) is listed under “English” and “Innis College”

Innis College’s Minor Program in [Writing and Rhetoric](#) offers an array of courses that explore the worlds of oral, written, and online discourse. Rhetoric courses focus on how persuasion circulates in society, while writing courses teach students how to employ rhetoric and to write well in the modes, genres, and styles appropriate to particular disciplinary, institutional, and creative contexts. Visit course listings under [Innis College](#) in this Calendar.

Victoria College offers a minor program called [Creative Expression and Society](#). It has two components: (1) workshop-style courses allowing students to develop skills in creative expression and communication, and (2)

courses encouraging students to analyze the relationship between creative arts and society. Visit course listings under [Victoria College](#) in this Calendar.

[Trinity College](#) offers the course [TRN478H1](#) (Science Writing for Non-Scientific Audiences). It focuses on a diversity of non-scientific audiences and writing styles.

The University of Toronto at Mississauga (UTM) offers a major and minor program in Professional Writing and Communication. The University of Toronto at Scarborough (UTSC) offers a major and minor program in Creative Writing. Consult with your college registrar about taking courses at either campus, and see the UTM and UTSC calendars for more detail about courses offerings.

English Language Learning Opportunities

The [English Language Learning \(ELL\) Program](#) offers undergraduates in Arts and Science a variety of ways to develop both oral and written communication. Intensive non-credit mini-courses are offered during fall and winter reading weeks and during the summer. During the fall and winter terms, programming includes free drop-in workshops using a variety of interesting activities to improve speaking, and also an online component for improving academic reading and writing.

Writing Centres

The writing centres at undergraduate colleges will help you develop the writing and critical thinking skills you need throughout your university studies. They offer, free of charge, both group and individual instruction.

Group instruction is offered through both in-course instruction and a series of workshops called Writing Plus. These intensive group workshops help prepare you to meet the expectations of university writing. They cover all stages of writing university papers, from understanding the assignment to revising the final draft. They also provide targeted advice for handling your reading load and the challenges of studying for tests and exams. Special sessions focus on writing admissions statements for graduate and professional programs. Dates and locations are listed online in the Writing Plus section of www.writing.utoronto.ca.

In individual consultations, trained writing instructors help you improve your ability to plan, write, and revise, focusing on course writing assignments of your choice. Instructors are familiar with writing conventions in the whole range of Arts and Science courses; many have specialized training in teaching students whose first language is not English. You are entitled to use the writing centre of the college where you are registered. Most colleges also allow students from other colleges to book

appointments for writing assignments in a college program course. All the college writing centres use an online booking system that requires your UTORid for login. More information is available in the Writing Centres section of www.writing.utoronto.ca. Here is a list of Arts and Science writing centres:

- French Department Writing Labs: ask your professor or inquire at 416-926-2302
- Innis College Writing Centre, Rooms 315 and 322

Writing Resources

Campus libraries stock many reference guides for academic writing, some of them online. You will find both general handbooks on style and referencing, and guides on writing in specific disciplines. You can also consult the Advice section of the website Writing at the University of Toronto at www.writing.utoronto.ca. It contains short files addressing common issues in academic writing along with links to other useful online and print resources.
