The first half of the twentieth century was among the most vibrant and inventive in English-language fiction. This period of literary history unfolded during a time of rapid and radical change that saw the development of new communications technologies like the radio and cinema, the massive upheavals of two world wars, the decline of empire, and paradigm-crushing developments in thinking about gender, sexuality, psychology, philosophy, and science. This course explores how a diverse selection of writers responded to this world in flux — and how they sought to use literature to intervene in this world, including through techniques such as plural conceptions of the self,

stream-of-consciousness, unreliable narration, and multiple perspectives.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG328Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG329H1 - Contemporary British Fiction

Hours: 36L

This course explores six or more works by at least four British contemporary writers of fiction.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG330H1 - Medieval Drama

Hours: 36L

Plays and other texts composed for live performance across the first millennium of English history, primarily 1300-1485; morality plays, biblical pageants, solo performances, large-scale spectacles, mummings, religious rituals, rude songs, recovered fragments. Basic training in reading/translating medieval English sources and in decoding early cues for staging.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG331H1 - Drama 1485-1603

Hours: 36L

Plays and performance history across Britain, 1485 to 1603; the rise of London theatres and of named English and Scottish playwrights (Medwall, Redford, Marlowe, Shakespeare, etc.); anonymous sixteenth-century plays from Cheshire, Yorkshire, East Anglia, and Cambridgeshire; traces of lost performances in the archives.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG335H1 - Drama 1603-1642

Hours: 36L

This course explores English drama from the death of Queen Elizabeth I to the closing of the theatres, with attention to such playwrights as Jonson, Middleton, Shakespeare, Webster.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG337H1 - Drama 1660-1800

Hours: 36L

At least twelve plays, including works by Dryden, Wycherley, Congreve, and their successors, chosen to demonstrate the modes of drama practiced during the period, the relationship between these modes and that between the plays and the theatres for which they were designed.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG340H1 - Modern Drama

Hours: 36L

A study of plays in English by such dramatists as Wilde, Yeats, Shaw, Synge, Glaspell, Hughes, O'Neill, as well as plays in translation by such dramatists as Ibsen, Chekhov, Strindberg, Pirandello.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG341H1 - Post-Modern Drama

Hours: 36L

A study of plays by such dramatists as Beckett, Miller, Williams, Pinter, Soyinka, Churchill, with background readings from other dramatic literatures.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG347H1 - Victorian Literature

Previous Course Number: ENG347Y1

Hours: 36L

This is a critical introduction to major genres of Victorian literature. It offers an opportunity to explore how novelists, poets, and non-fiction prose writers such as the Brontës, Dickens, Tennyson, Darwin, Robert Browning, J.S. Mill, Thomas Hardy, and Oscar Wilde respond to crisis and transition: the Industrial Revolution, the Idea of Progress, and the Woman Question. Other topics may include the Romantic inheritance, liberty and equality, theology and natural selection, empire and nation, Art for Art's Sake, the Fin de siècle, and Decadence. The multi-genre setup of the course allows students to see how novels, poems, and non-fiction prose develop as individual genres and converse with each other in responding to the same issues. Authors and topics vary with the instructor.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG347Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG348H1 - Modern Poetry to 1960

Previous Course Number: ENG348Y1

Hours: 36L

This course explores poems by the representative poets of the modern(ist) period, such as Thomas Hardy, W.B. Yeats, Robert Frost, Ezra Pound, T.S. Eliot, H.D., W.H. Auden, Elizabeth Bishop, e.e. cummings, Langston Hughes, and others. What is unique about this period is the co-presence of and tension between elements of the chronologically modern and the radically modern (i.e. "modernist"), embodied in perspectives and issues that continue to impact our contemporary era. Students will be intrigued by the depth of anxieties and the variety of opportunities inherent in modern and modernist poetry.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG348Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG349H1 - Contemporary Poetry

Hours: 36L

Works by at least six contemporary poets, such as Ammons, Ashbery, Heaney, Hughes, Lowell, Muldoon, Plath.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG350H1 - Early Canadian Literature

Hours: 36L

Writing in English Canada before 1914, from a variety of genres such as the novel, poetry, short stories, exploration and settler accounts, nature writing, criticism, First Nations cultural production.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG352H1 - Canadian Drama

Hours: 36L

A study of major Canadian playwrights and developments since 1940, with some attention to the history of the theatre in Canada.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG353H1 - Canadian Fiction

Previous Course Number: ENG353Y1

Hours: 36L

This course introduces advanced study of Canadian fiction through provocative examples from the ethnically, geographically, and aesthetically diverse range of fiction produced in Canada. It considers key Canadian novels and short stories in their literary, historical, and critical contexts. Discussion may include topics such as Indigenous fiction, settler constructions of Canada, the Canadian versions of modernism and postmodernism, and multicultural and diasporic narratives.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG353Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG354H1 - Canadian Poetry

Previous Course Number: ENG354Y1

Hours: 36L

Beginning with movements and debates that shaped the modernist period, this course will introduce students to genres, forms, and themes that have inspired twentieth and twenty-first century poetry in English Canada. From imagist experimentation and lyric elegies to long poems, from concrete poetry to spoken word poems and, more recently, digital poetry, we will examine the role of poetry today in diverse social, cultural, and aesthetic contexts.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG354Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG355H1 - Transnational Indigenous Literatures

Previous Course Number: ENG355Y1

Hours: 36L

A study of works by Indigenous writers from North America and beyond, with significant attention to Indigenous writers in Canada. Texts engage with issues of de/colonization, representation, gender, and sexuality, and span multiple genres, such as fiction, life writing, poetry, drama, film, music, and creative non-fiction.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG355Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG357H1 - New Writing in Canada

Hours: 36L

Close encounters with recent writing in Canada: new voices, new forms, and new responses to old forms. Texts may include or focus on poetry, fiction, drama, non-fiction, or new media.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG358H1 - Early African Canadian Literature

Previous Course Number: ENG356Y1

Hours: 36L

Black Canadian Literature (poetry, drama, fiction, non-fiction) from its origin in the African Slave Trade in the 18th century to its current flowering as the expression of immigrants, exiles, refugees and ex-slave-descended and

colonial-settler-established communities. This half-course will focus on significant authors of the latter 20th century, such as Austin Clarke, Dionne Brand, Lorena Gale, Dany Laferriere, Djanet Sears, etc., while lectures will address the history and politics that inspire Canada's most dynamic and relevant, diverse and radical, insightful and outspoken assembly of scribes.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG356Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG359H1 - Later African Canadian Literature

Previous Course Number: ENG356Y1

Hours: 36L

Black Canadian Literature (poetry, drama, fiction, non-fiction) from its origin in the African Slave Trade in the 18th century to its current flowering as the expression of immigrants, exiles, refugees and ex-slave-descended and colonial-settler-established communities. This half-course will focus on established authors and significant anthologies of the early 21st century, such as Frankson's *Africanthology*, Mason-John & Cameron's *The Great Black North*, and works by Andre Alexis, Wayde Compton, Michael Fraser, Suzette Mayr, Zolika Reid-Benta, etc., while lectures will address the history and politics that inspire Canada's most dynamic and relevant, diverse and radical, insightful and outspoken assembly of scribes.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG356Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG360H1 - Early American Literature

Hours: 36L

This course explores writing in a variety of genres produced in the American colonies in the seventeenth and eighteenth centuries, such as narratives, poetry, autobiography, journals, essays, sermons, court transcripts.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG363H1 - American Literature to 1900

Previous Course Number: ENG363Y1

Hours: 36L

This course explores American writing in a variety of genres from the end of the Revolution to the beginning of the twentieth century.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG363Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG364H1 - American Literature 1900 to the present

Previous Course Number: ENG364Y1

Hours: 36L

This course explores twentieth-century American writing in a variety of genres.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG364Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG365H1 - Contemporary American Fiction

Hours: 36L

This course explores six or more works by at least four contemporary American writers of fiction.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG367H1 - African Literatures in English

Hours: 36L

What, if anything, is distinctively "African" in African texts; what might it mean to produce "African" readings of African literature? We address these, as well as other questions, through close readings of oral performances and literary and other cultural texts.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG368H1 - Asian North American Literature

Hours: 36L

Literature and cultures of Asian Canadians and Asian Americans, including fiction, poetry, theory, drama, film, and other media.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG369H1 - South Asian Literatures in English

Hours: 36L

Major authors and literary traditions of South Asia, with specific attention to literatures in English from India, Sri Lanka, Pakistan, Bangladesh, and the diaspora. The focus will be on fiction and poetry with some reference to drama.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG370H1 - Postcolonial and Transnational Discourses

Previous Course Number: ENG370Y1

Hours: 36L

This course focuses on recent theorizations of postcoloniality and transnationality through readings of fictional and non-fictional texts, along with analyses of contemporary films and media representations.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG370Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG371H1 - Topics in Indigenous, Postcolonial, Transnational Literatures

Hours: 36L

Sustained study in a topic pertaining to Indigenous, postcolonial, or transnational literatures. Content varies with instructors. See Department website for current offerings. Course may not be repeated under the same subtitle.

Prerequisite: 2.0 ENG credits and any 4.0 credits
Breadth Requirements: Creative and Cultural Representations (1)

ENG372H1 - Topics in Indigenous, Postcolonial, Transnational Literatures

Hours: 36L

Sustained study in a topic pertaining to Indigenous, postcolonial, or transnational literatures. Content varies with instructors. See Department website for current offerings. Course may not be repeated under the same subtitle.

Prerequisite: 2.0 ENG credits and any 4.0 credits
Breadth Requirements: Creative and Cultural Representations (1)

ENG373H1 - Topics in Pre-1800 British Literature

Hours: 36L

Sustained study in a topic pertaining to British literature before 1800. Content varies with instructors. See Department website for current offerings. Course may not be repeated under the same subtitle.

Prerequisite: 2.0 ENG credits and any 4.0 credits
Breadth Requirements: Creative and Cultural Representations (1)

ENG374H1 - Topics in Pre-1800 British Literature

Hours: 36L

Sustained study in a topic pertaining to British literature before 1800. Content varies with instructors. See Department website for current offerings. Course may not be repeated under the same subtitle.

Prerequisite: 2.0 ENG credits and any 4.0 credits
Breadth Requirements: Creative and Cultural Representations (1)

ENG376H1 - Topics in Theory, Language, Critical Methods

Hours: 36L

Sustained study in a topic pertaining to literary theory, critical methods, or linguistics. Content varies with instructors. See Department website for current offerings. Course may not be repeated under the same subtitle.

Prerequisite: 2.0 ENG credits and any 4.0 credits
Breadth Requirements: Creative and Cultural Representations (1)

ENG377H1 - Topics in Theory, Language, Critical Methods

Hours: 36L

Sustained study in a topic pertaining to literary theory, critical methods, or linguistics. Content varies with instructors. See Department website for current offerings. Course may not be repeated under the same subtitle.

Prerequisite: 2.0 ENG credits and any 4.0 credits
Breadth Requirements: Creative and Cultural Representations (1)

ENG378H1 - Special Topics

Hours: 36L

Sustained study in a variety of topics, including: Canadian literature, American literature, Post-1800 British literature, and genres or themes that span across nations and periods. Content varies with instructors. See Department website for current offerings. Course may not be repeated under the same subtitle.

Note: An additional fee of \$123 will apply to the "Cook the Books" subtitle offering.

Prerequisite: 2.0 ENG credits and any 4.0 credits
Breadth Requirements: Creative and Cultural Representations (1)

ENG379H1 - Special Topics

Hours: 36L

Sustained study in a variety of topics, including: Canadian literature, American literature, Post-1800 British literature,

and genres or themes that span across nations and periods. Content varies with instructors. See Department website for current offerings. Course may not be repeated under the same subtitle.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG382H1 - Literary Theory

Previous Course Number: ENG382Y1

Hours: 36L

This course explores contemporary literary theory, but may include related readings from earlier periods. Schools or movements studied may include structuralism, formalism, phenomenology, Marxism, post-structuralism, reader-response theory, feminism, queer theory, new historicism, psychoanalysis, postcolonial theory, critical race studies, and ecocriticism.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG382Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG384H1 - Literature and Psychoanalysis

Previous Course Number: ENG384Y1

Hours: 36L

An introduction to psychoanalysis for students of literature, this course considers major psychoanalytic ideas through close readings of selected texts by Freud. The course also explores critiques and applications of Freud's work and examines a selection of literary texts that engage psychoanalytic theory.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG384Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

ENG385H1 - History of the English Language

Hours: 36L

This course explores English from its prehistory to the present day, emphasizing Old, Middle, and Early Modern English and the theory and terminology needed to understand their lexical, grammatical, and phonological

structure; language variation and change; codification and standardization; literary and non-literary usage.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Thought, Belief and Behaviour (2)

ENG387H1 - Creative Writing: Creative Nonfiction

Hours: 36S

A course devoted to the study and production of creative nonfiction, with attention to such matters as literary style and rhetoric, authorial self-positioning, and political and ethical considerations. Genres to be considered may include journalism, criticism, essays, biography, memoir, and autotheory. Priority enrolment will be given to students in the Creative Writing Minor. Not eligible for CR/NCR option.

Prerequisite: 4.0 credits including ENG289H1

Exclusion: CRE279H1; INI308H1 (Selected Topics in Writing and Rhetoric: Writing Literary Journalism), offered in Summer 2021; WRR312H1

Breadth Requirements: Creative and Cultural Representations (1)

ENG388H1 - Creative Writing: Poetry

Previous Course Number: ENG389Y1

Hours: 36S

A course devoted to the craft of writing poetry, with attention to a range of forms, genres, styles, and compositional methods. The workshoping of student writing will take place alongside discussions of key texts in the field. Priority enrolment will be given to students in the Creative Writing Minor. Not eligible for CR/NCR option.

Prerequisite: 4.0 credits including ENG289H1

Exclusion: ENG389Y1, CRE280H1, ENG373H5, ENGB60H3, ENG86H3

Breadth Requirements: Creative and Cultural Representations (1)

ENG389H1 - Creative Writing: Short Fiction

Previous Course Number: ENG389Y1

Hours: 36S

A course devoted to the craft of writing short fiction, with attention to matters such as genre, narratorial perspective, characterization, plot, style, and setting. The

workshopping of student writing will take place alongside discussions of key texts in the field. Priority enrolment will be given to students in the Creative Writing Minor. Not eligible for CR/NCR option.

Prerequisite: 4.0 credits including ENG289H1

Exclusion: ENG389Y1, CRE275H1, ENG374H5, ENGB61H3, ENGC87H3, WRR311Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG390Y1 - Individual Studies

A scholarly project chosen by the student and supervised by a member of the staff. The form of the project and the manner of its execution are determined in consultation with the supervisor. Proposal forms and deadlines are available on the department website. Not eligible for CR/NCR option.

Prerequisite: 3.0 ENG credits, any 4.0 credits, and permission of the instructor and the Associate Chair

Exclusion: ENG392H1

ENG392H1 - Individual Studies

A scholarly project chosen by the student and supervised by a member of the staff. The form of the project and the manner of its execution are determined in consultation with the supervisor. Proposal forms and deadlines are available on the department website. Not eligible for CR/NCR option.

Prerequisite: 3.0 ENG credits, any 4.0 credits, and permission of the instructor and the Associate Chair

Exclusion: ENG390Y1

ENG394H1 - Creative Writing: Special Topics

Hours: 36S

Sustained study and creative practice with respect to a topic pertaining to Creative Writing: e.g., writing for children; science fiction and fantasy; digital/interactive stories; writing across culture; writing and the environment. Content varies with instructors. Class format may include seminar discussion and a workshop devoted to student writing. See Department website for current offerings. Course may not be repeated under the same subtitle. Priority enrolment will be given to students enrolled in the Creative Writing Minor.

Prerequisite: 4.0 credits including ENG289H1

Breadth Requirements: Creative and Cultural Representations (1)

ENG398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

ENG398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

ENG399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

ENG399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

ENG400H1 - Internship

Hours: 12L/96P

In this course, upper-year students will participate in partnership-based academic internships offered by a range of non-profit and for-profit organizations in a variety of cultural and commercial fields. Students will acquire practical and professional experience at the same time as

they contribute their own critical and communicative skills in a workplace setting. The course will offer structured engagement with participating organizations across the city as well as 4-5 in-class meetings and a final written assignment. Students can expect to complete a range of 80-90 hours with a partner organization (8 hours a week for up to 12 weeks). Not eligible for CR/NCR. Admission to the course will be by application (including a short writing sample).

Prerequisite: 14.0 credits, including ENG202H1, ENG203H1, ENG250H1, ENG252H1, and an additional 2.0 ENG credits; an application (including a short writing sample) is required.

Breadth Requirements: Creative and Cultural Representations (1)

ENG480H1 - Advanced Studies Seminar

Hours: 24S

Seminars are designed to provide students with the opportunity to practice their skills of research and interpretation, and to participate in critical discussion, at a particularly advanced level. All seminars demand substantial class participation and most require an oral presentation. Not eligible for CR/NCR option.

Prerequisite: 4.0 ENG credits (including ENG202H1, ENG203H1, ENG250H1, ENG252H1) and any 9.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG481H1 - Advanced Studies Seminar

Hours: 24S

Seminars are designed to provide students with the opportunity to practice their skills of research and interpretation, and to participate in critical discussion, at a particularly advanced level. All seminars demand substantial class participation and most require an oral presentation. Not eligible for CR/NCR option.

Prerequisite: 4.0 ENG credits (including ENG202H1, ENG203H1, ENG250H1, ENG252H1) and any 9.0 credits

Prerequisite: 4.0 ENG credits (including [ENG202H1](#), [ENG203H1](#), [ENG250H1](#), [ENG252H1](#)) and any 9.0 credits
Breadth Requirements: Creative and Cultural Representations (1)

ENG497H1 - Advanced Creative Writing Seminar: Literary Citizenship

Hours: 24S

A course examining efforts to build and sustain literary culture and literary communities through individual initiatives and collective efforts. Topics may include book reviewing, youth engagement, small presses, writers' organizations, and the state's role in the publishing industry. Priority enrolment will be given to students enrolled in the Creative Writing Minor.

Prerequisite: 9.0 credits including [ENG289H1](#) and 1.5 additional ENG credits.
Breadth Requirements: Creative and Cultural Representations (1)

ENG498H1 - Advanced Creative Writing Seminar: Long-Form Writing

Hours: 24S

Students study and produce long-form creative work in a genre of their choice (the novella, short stories, the long poem) or in a genre determined by the professor. Beyond craft and literary analysis, this course develops capacities that writers need to cultivate for future success, such as idea-generation, persistence, independence, and creative problem-solving. Priority enrolment will be given to students enrolled in the Creative Writing Minor.

Prerequisite: 9.0 credits including [ENG289H1](#) and 1.5 additional ENG credits.
Breadth Requirements: Creative and Cultural Representations (1)

ENG499Y1 - Advanced Research Seminar

Hours: 48S

A seminar designed to provide students with the opportunity to practice their skills of research and interpretation at a particularly advanced level, especially suited for students considering a graduate degree in English or a related discipline. The course is open to Year 4 students in English Specialist and Major programs who have achieved 80% in all English courses they have taken at the 200-level or above. Students also need 4.0 ENG credits (including ENG202H1, ENG203H1, ENG250H1, ENG252H1).

Not eligible for CR/NCR option.

Prerequisite: 14.0 credits, including ENG202H1, ENG203H1, ENG250H1, ENG252H1, and an additional 2.0 ENG credits. A minimum of 80% must be achieved in all ENG courses taken at the 200+ level.

Centre for Entrepreneurship

Introduction

The Centre for Entrepreneurship is home to innovation and entrepreneurship education and training activities. The knowledge and skills gained are useful whether

Centre for Entrepreneurship Courses

ENT200H1 - Introduction to Entrepreneurship

Hours: 24L

How can new ideas and technologies be transformed into valuable startups? This course introduces a strategic framework for innovation-driven entrepreneurs, focusing on the key choices new founders face. The course emphasizes balancing experimentation and learning with core strategic decisions to gain a competitive edge. Through interactive lectures, case studies, and exercises, students will learn how to apply an entrepreneurial strategy framework across various industries. This is a highly discussion-based course. Attendance and active participation are an important part of the assessment.

Prerequisite: 4.0 credits in any subject

Exclusion: RSM100H1

Recommended Preparation: The course is targeted at students from all disciplines (science, humanities, social sciences), who are interested in entrepreneurship.

Breadth Requirements: Society and its Institutions (3)

ENT391H1 - Exploring New Ventures

Hours: 24L/96P

This experiential learning course allows students to explore the inner working of new ventures or other

starting a new venture, or joining an existing organization, regardless of its size and stage of development. At the undergraduate level, the offerings include lecture-based and experiential-learning courses as well as a range of co-curricular programs and opportunities.

The undergraduate courses offered by the Centre are open to students from all disciplines.

Contact Information:

416-978-1457

entrepreneurship.artsci@utoronto.ca

<https://www.entrepreneurship.artsci.utoronto.ca>

innovative organizations. The majority of the course consists of activities applying entrepreneurial concepts within a local organization, with oversight from the Centre for Entrepreneurship. In-class activities facilitate the application of entrepreneurial tools to develop the students' entrepreneurial skills.

Prerequisite: 9.0 credits including ENT200H1/
RSM100H1/ MGT100H1

Exclusion: JPM400Y1

Recommended Preparation: The experiential learning activities are designed to accommodate students from all disciplines including science, social sciences and humanities.

Breadth Requirements: Society and its Institutions (3)

ENT392H1 - Creating New Ventures

Previous Course Number: ENT392Y1

Hours: 12L/48P

This experiential learning course allows students to explore the inner working of their new ventures. The majority of the course consists of activities applying entrepreneurial concepts within the student's own venture, with oversight from the Centre for Entrepreneurship. In-class activities facilitate the application of entrepreneurial tools to develop the students' entrepreneurial skills.

Prerequisite: 9.0 credits including ENT200H1/
RSM100H1/ MGT100H1

Exclusion: ENT392Y1

Recommended Preparation: The experiential learning activities accommodate students from all disciplines including science, social sciences and humanities.

Breadth Requirements: Society and its Institutions (3)

Assistant Professors, Teaching Stream

S. Appolloni, BA, BEd, MDiv, PhD

† N. Spiegelaar, MES, PhD

Senior Lecturers Emeriti

B. Savan, BSc, PhD

† Cross-appointed faculty

Introduction

The School of the Environment is an innovative interdisciplinary unit within the Faculty of Arts & Science; it brings together and leverages the enormous breadth of environmental teaching and research expertise throughout the Faculty. The School fosters opportunities for interdisciplinary research and scholarship in environment, spanning the sciences, social sciences and humanities.

Core Programs

The School offers core programs in two areas: Environmental Science BSc Major and Minor, and Environment Studies BA Major and Minor. These programs are ideally suited to be taken in conjunction with another program(s) in a related academic field. For example, the Environmental Science Major could be combined with a Major in Environment & Health, Environmental Ethics, Earth and Environmental Systems, Environmental Geography, Forest Conservation Science, Physical & Environmental Geography, Biomedical Toxicology, Chemistry, Physics, Biodiversity and Conservation Biology, or Environmental Biology, while the Environmental Studies Major could be combined with a complementary BA Major such as Political Science, Economics, Women and Gender Studies, Human Geography, Forest Conservation, Architecture, or BSc Major, such as Environmental Biology, Physics, or Forest Conservation Science. These programs of study provide students with a powerful combination of disciplinary depth and interdisciplinary breadth.

The School's Environmental Science BSc Major and Minor programs reflect the fact that most environmental issues are complex and involve aspects drawing from many different areas of science. These programs provide students with a breadth of knowledge spanning scientific disciplines, and the tools to understand and integrate scientific principles from across the physical and biological sciences, and across multiple spatial and temporal scales. At its core, environmental science is concerned with the scientific analysis and development of creative solutions to environmental problems. Students are exposed to disciplinary and interdisciplinary knowledge and research skills necessary to function as an environmental scientist.

The School's Environmental Studies BA Major and Minor are interdisciplinary programs intended for students interested in studying and working in an environmental area, primarily within the social sciences or humanities. These programs offer rigorous academic study of the economic, social, cultural and political forces that drive issues such as species extinction, loss of biodiversity, air and water pollution, and climate change. The interdisciplinary structure of the programs provides grounding in scientific literacy while advancing critical thinking skills that will help students to evaluate complex environmental problems and sustainable solutions for improved environmental health and well-being.

Environmental Science students who wish to have a foundation in Environmental Studies beyond the [ENV221H1](#) and [ENV222H1](#) core courses, are encouraged to consider adding the Minor in Environmental Studies to their Environmental Science Major. It is possible to double count a number of courses between the two programs.

Certificate in Sustainability

New to the Faculty of Arts & Science in 2021-22, and administered by the School of the Environment, the Certificate in Sustainability is part of the U of T Sustainability Scholar initiative, and is designed to complement any Arts & Science degree or discipline. Participating students will develop a sustainability-lens based in systems-thinking that can be used to approach the rest of their academic program and career path.

Collaborative Specialist, Major and Minor Programs

The School collaborates with other disciplines to offer three collaborative Science Specialist programs: Environment & Health; Environmental Geosciences; and Environment & Toxicology. Other collaborative offerings include Major programs in Environment & Health, and Environmental Ethics, as well as collaborative Minor programs in Environmental Ethics, Energy & Environment, and Environment & Behaviour. These programs combine the School's interdisciplinary core with a deliberately focused set of discipline-specific courses.

Directed Environmental Minor Programs

Environmental Minor programs are offered by a number of departments. Five of these Minors are in the sciences, and four are arts Minors. These programs are intended for students interested in acquiring a hierarchical body of environmental knowledge in a specific discipline.

These Minors are open to any student irrespective of program. As with any Minor, these programs can be combined with other programs of study (i.e., Minors and Majors) to meet the requirements for a degree. (See the [Degree Requirements section](#) of the Calendar for program requirement details).

General Program Information

All Science programs in the School include a strong First Year science component with core interdisciplinary science courses in subsequent years. Students intending to pursue Environmental Science or any of the Science Specialist programs are advised to choose First Year courses from among [\(BIO120H1, BIO130H1\); \(CHM135H1, CHM136H1\)/CHM151Y1; MAT135H1/MAT136H1/MAT137Y1/MAT157Y1;](#)

[\(PHY131H1, PHY132H1\)/\(PHY151H1, PHY152H1\), and \(JEG100H1, GGR101H1\)](#). Students should identify specific program first year course requirements as well as the prerequisites for [EEB240H1; ENV237H1; ENV238H1; ENV316H1; ENV337H1; CHM210H1](#) when selecting specific First Year science courses.

Arts programs in the School build on a base of social science and humanities courses. Environmental Studies, as well as Environmental Ethics, do not require specific First Year courses. Students intending to follow arts programs in the area of environment are recommended to take [ENV100H1](#), and might find it helpful to take [ENV200H1](#) in first year, as well as to include some First Year course choices from the 100-level offerings in Anthropology, Biology, Economics, Geography, History, Philosophy, Political Science or Sociology.

Note: Majors and Specialists in School of the Environment programs are eligible for a number of School-based scholarships. Students in School minors are also eligible for some of these scholarships. (see <https://www.environment.utoronto.ca/undergraduate/current-students/scholarships-awards>)

Students interested in School of the Environment programs should refer to the Calendar program listings below and are encouraged to consult the School's website at <https://www.environment.utoronto.ca>. For further information about the School's programs and courses, please contact:

School of the Environment Undergraduate Associate Director -
ug.director.env@utoronto.ca

School of the Environment Undergraduate Administrator -
Phoebe To
Earth Sciences Centre (33 Willcocks Street), Room ES 1020
ug.office.env@utoronto.ca

Arts & Science Internship Program

Starting Fall 2024, students entering their second year of study who are enrolled in the following programs will be eligible to apply for the Arts & Science Internship Program. Details about ASIP, including eligibility requirements and application procedures, can be found [here](#). Students may also visit the [ASIP webpage](#) or contact the ELOS office at asip@utoronto.ca.

- Environmental Science Major
- Environmental Studies Major
- Environment & Health Specialist
- Environment & Health Major
- Environmental Ethics Major

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area typically referenced with the same four-digit program code.

The School of the Environment programs impacted by this policy: [ASMAJ1076](#) and [ASMIN1555](#); [ASMAJ1254](#) and [ASMIN1254](#); [ASSPE0365](#) and [ASMAJ0365](#); [ASMAJ1107](#) and [ASMIN1107](#)

Climate Change Studies Minor (Arts Program) - ASMIN1255

The Climate Change Studies Minor is designed to complement existing programs offered at the School of the Environment, including Major and Minor programs in Environmental Science, Major and Minor programs in Environmental Studies, and various Minor, Major and Specialist programs offered collaboratively with other academic units. The School also stewards and administers the Certificate in Sustainability on behalf of the Faculty of Arts & Science.

The minor in Climate Change Studies can be paired with the School's existing programs, providing students with opportunities to add depth to their existing areas of study. Importantly, the minor can also be paired with many other programs offered at the St. George campus. The minor gives students from rich and diverse scholarly communities the opportunity to add a vitally important breadth dimension to their studies. The minor is relevant to those who plan to engage directly in sustainability, environmental, and climate change work beyond graduation, as well as for those who desire to bring a foundation of climate change knowledge to other fields.

The total number of credits required for completion of the minor is 4.0, of which 2.0 credits are required courses, 1.5 credits are electives at the 300+level, and the remaining 0.5 credit is a capstone course. Students have the opportunity to add an area of emphasis through one of three pathways; (a) ethics/thought/communication/culture, (b) civil society/policy/politics, or (c) economics/resources/science. The elective courses, drawn from units across the sciences, social sciences, and humanities, provide students with an opportunity to engage with climate change from interdisciplinary perspectives.

Enrolment Requirements:

This is a limited enrolment program.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum may change each year depending on available spaces and the number of applicants. Eligibility is based on the following criteria:

For students who have completed between 4.0 and 8.5 credits:

- [ENV101H1](#) with a grade of at least 65%.

For students who have completed 9.0 or more credits:

- [ENV222H1](#) with a grade of at least 65%.

Obtaining this minimum final grade does not guarantee admission to the program.

Completion Requirements:

For more information, please email the School of the Environment's Undergraduate Administrator at ug.office.env@utoronto.ca.

(4.0 credits, including 1.5 credits at the 300+ level)

1. [ENV101H1](#), [ENV222H1](#), [ENV200H1](#), [ENV301H1](#)

Note: Students may request to substitute an alternate science course for [ENV200H1](#) by e-mailing the Undergraduate Administrator at ug.office.env@utoronto.ca; [CHM210H1](#), [ESS262H1](#), [EEB240H1](#), [ENV237H1](#), [ENV238H1](#), [GGR314H1](#), or [PHY392H1](#) are recommended courses.

2. 1.5 credits from one or more of the groups below:

- A. Ethics/ Thought/ Communication/ Culture: [AFR460H1](#), [ANT364H1](#), [ENV333H1](#), [ENV362H1](#), [ENV464H1](#), [PHL273H1](#), [TRN312H1](#)
- B. Civil Society/ Policy/ Politics: [ENV350H1](#), [ENV441H1](#), [ENV465Y1](#), [GGR332H1](#), [GGR349H1](#), [HIS300H1](#), [JHU473H1](#), [PHL273H1](#), [POL384H1](#), [POL413H1](#), [TRN350H1](#)
- C. Economics/ Resources/ Science: [ECO314H1](#), [ECO414H1](#), [ENV237H1](#), [ENV238H1](#), [ENV335H1](#), [ENV462H1](#), [FOR302H1](#), [FOR303H1](#), [FOR310H1](#), [FOR410H1](#), [PHY392H1](#), [PHY492H1](#), [RSM436H1](#), [RSM466H1](#), [TRN350H1](#)

Note: Since the elective courses above are offered by various academic units, students are encouraged to carefully check the prerequisites and enrolment indicators and controls for the courses before enrolling.

Students may request to substitute 0.5 credit from requirement 2 with an alternate course by submitting a [nomination form](#) including: (1) the relevant pathway; (2) the course code and description; (3) the course syllabus (for completed courses); (4) a brief rationale (500 words

max.) addressing why this course belongs to the pathway(s) mentioned, how it addresses climate change, and how it fills a specific gap in personal learning objectives within the Minor.

3. One course from ENV450H1 or ENV465Y1.

Note: If students complete ENV465Y1, 0.5 credit from the course contributes to group B in requirement 2.

Core Programs

Environmental Science Major (Science Program) - ASMAJ1076

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed Courses

The following courses are required:

- BIO120H1
- CHM135H1/ CHM151Y1

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2025). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and there are program-specific year 3 entry enrolment requirements. Students applying for Year 3 entry must have been admitted to the Environmental Science Major program in the Summer after Year 2 and have completed a 0.5 credit of ENV221H1 or ENV222H1 and a 0.5 credit of EEB240H1, CHM210H1, ENV237H1/ ENV238H1, or ESS262H1 prior to ASIP entry.

Completion Requirements:

(8.0 credits)

First Year (1.5 credits):

1. BIO120H1; CHM135H1(recommended)/ CHM151Y1
2. 0.5 credit from MAT135H1/ MAT137Y1/ MAT157Y1/ JMB170Y1

Second Year (2.5 credits):

1. ENV221H1
 2. EEB240H1/ ENV234H1
 3. One of CHM210H1 (recommended) or ESS262H1/ JEG100H1
 4. ENV237H1/ ENV238H1*
- * ENV238H1 is for students who have previously taken PHY131H1/ PHY132H1/ PHY151H1/ PHY152H1
5. STA220H1/ STA288H1/ EEB225H1/ GGR270H1 or other science courses providing training in statistics as approved by the Undergraduate Associate Director.

NOTE: students interested in taking EEB Field Courses (Group B) in third/fourth year are encouraged to take BIO220H1 in second/third year.

Third Year (1.5 credits):

1. The other of CHM210H1 or ESS262H1/ JEG100H1 not taken in second year
2. ENV337H1
3. ENV316H1

Third/Fourth Year (2.0 credits):

1. 2.0 credits from among the courses in Group A, B, and C, with no more than 0.5 credit from Group C. At least 0.5 credit must be at the 300+ level

Fourth Year (0.5 credit):

1. 0.5 credit from the following: ENV432H1*/ ENV440H1/ ENV452H1*

*Note that ENV432H1 requires one of EEB319H1/ EEB321H1/ EEB365H1/ ENV334H1 as a prerequisite, and ENV452H1 requires one of ENV316H1/ ENV334H1/ ENV337H1 as a prerequisite.

Group A: Environmental Science

BIO220H1*/ CHM310H1/ CHM410H1/ CHM415H1/ EEB319H1/ EEB320H1/ EEB321H1/ EEB328H1/ EEB365H1/ EEB428H1/ EEB430H1/ EEB433H1/ EEB440H1/ EEB465H1/ ENV334H1/ ENV341H1/ ENV342H1/ ENV346H1/ ENV432H1/ ENV441H1/ ESS261H1/ ESS311H1/ ESS312H1/ ESS461H1/ GGR203H1/ GGR301H1/ GGR305H1/ GGR308H1/ GGR314H1/ GGR347H1/ GGR348H1/ GGR406H1/ GGR413H1/ JGA305H1/ PCL381H1/ PHY392H1**/ PHY492H1**

Notes: * BIO220H1 is required for all upper-year 300+ EEB series courses, with no exceptions. ** PHY392H1 and PHY492H1 include relevant environmental content, but prerequisites for these courses cannot be used towards Group A requirements.

Group B: Environmental Science-related Field Courses

ANT330Y1/ ARH306Y1/ EEB403H1/ EEB405H1/ EEB406H1/ EEB407H1/ EEB410H1/ ENV336H1/

ENV395Y0/ ENV396H0/ ENV396Y0/ ESS234H1/
ESS410H1/ ESS450H1/ GGR390H1

Note: * BIO220H1 is required for all upper-year 300+ EEB series courses, with no exceptions.

Group C: Environmental Policy & Society (no more than 0.5 credit from Group C)

ENV222H1/ (ENV360H1/ ENV261H1)/ ENV281H1/
ENV282H1/ ENV307H1/ ENV320H1/ ENV322H1/
ENV323H1/ ENV330H1/ ENV333H1/ ENV335H1/
ENV347H1/ ENV350H1/ ENV361H1/ ENV362H1/
ENV381H1/ ENV382H1/ ENV422H1/ ENV430H1/
ENV461H1/ ENV462H1/ FOR302H1

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Notes:

- Students interested in obtaining a basic understanding of the social, political, and policy issues related to the environment should consider pursuing the Environmental Studies Minor in conjunction with this Major.
- Since the elective courses above are offered by various academic units, students are encouraged to carefully check the pre-requisites and enrolment controls or restrictions for the courses before enrolling.
- Daniels students enrolled in this program may be able to fulfill up to 1.5 credits in the Third/Fourth Year Requirement with three of the following ARC courses: ARC357H1, ARC382H1, ARC386H1, and ARC387H1. Please contact the Undergraduate Administrator at ug.office.env@utoronto.ca to request that these exceptions be posted on Degree Explorer.

Environmental Science Minor (Science Program) - ASMIN1555

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed Courses

The following courses are required:

- BIO120H1
- CHM135H1(recommended)/ CHM151Y1

Completion Requirements:

(4.0 credits)

First Year (1.5 credits):

1. BIO120H1; CHM135H1 (recommended)/ CHM151Y1
2. 0.5 credit from MAT135H1/ MAT137Y1/ MAT157Y1/ JMB170Y1

Higher Years (2.5 credits):

2. ENV221H1
3. 1.0 credit from CHM210H1, EEB240H1/ ENV234H1, ENV237H1/ ENV238H1*, ESS262H1/ JEG100H1
4. ENV337H1
5. 0.5 credit from courses in Group A or B**

Notes

- * ENV238H1 is for students who have previously taken PHY131H1/ PHY132H1/ PHY151H1/ PHY152H1
- ** Students should verify the prerequisites for the courses listed under the groups below in advance of their course selection.
- BIO220H1 is required for all EEB 300+ level courses (Group A and B) and there are no exceptions.
- Since the elective courses below are offered by various academic units, students are encouraged to carefully check the pre-requisites and enrolment controls or restrictions for the courses before enrolling.
- Daniels students enrolled in this program may be able to fulfill up to 1.0 credit in the Higher Years Requirement with two of the following ARC courses, provided no other Group A or B courses are being counted: ARC357H1, ARC382H1, ARC386H1, and ARC387H1. Please contact the Undergraduate Administrator at ug.office.env@utoronto.ca to request that these exceptions be posted on Degree Explorer.

Group A: Environmental Science

PCL381H1/ PHY392H1*/ PHY492H1*

Notes: * PHY392H1 and PHY492H1 include relevant environmental content, but prerequisites for these courses cannot be used towards Group A requirements.

Group B: Environmental Science-related Field Courses

ANT330Y1/ ARH306Y1/ EEB403H1/ EEB405H1/
EEB406H1/ EEB407H1/ EEB410H1/ ENV316H1/

ENV336H1/ ENV395Y0/ ENV396H0/ ENV396Y0/
ESS234H1/ ESS410H1/ ESS450H1/ GGR390H1

Environmental Studies Major (Arts Program) - ASMAJ1254

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2025). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and there are program-specific year 3 entry enrolment requirements. Students applying for Year 3 entry must have been admitted to the Environmental Studies Major program in the Summer after Year 2 and have completed 1.0 credit of ENV221H1, ENV222H1, ENV223H1, or ENV200H1 prior to ASIP entry.

Completion Requirements:

For more information, please e-mail the School of the Environment's Undergraduate Administrator at ug.office.env@utoronto.ca.

(7.0 credits, including 2.5 credits at the 300+ level and a 0.5 credit at the 400-level)

First Year:

ENV100H1 is recommended but not required.

Higher Years:

1. ENV221H1, ENV222H1, ENV223H1, ENV338H1.

2. ENV200H1

3. 0.5 credit from the following Environmental Policy, Law & Society courses: ENV320H1, ENV322H1, ENV323H1, ENV347H1, ENV350H1, ENV422H1, JGE331H1.

4. 0.5 credit from among the following Environmental Thought & Ethics courses: ENV333H1, JGE321H1, CLA373H1, PHL273H1, WGS273H1.

5. One of (ENV421H1/ ENV421Y1/ ENV440H1/ ENV451H1/ ENV461H1/ ENV463H1/ ENV465Y1).

6. An additional 3.0 credits from any combination of courses listed in the three groups below*, with no more

than 1.0 credit from Group C: Environmental Science.

Note: If either ENV421Y1 or ENV465Y1 is taken for requirement 5 above, students need only take an additional 2.5 credits for this requirement.

*Students may choose to take these credits from courses across the three groups or within a particular group, depending on their interest.

Group A: Environmental Policy, Law & Society Courses

ANT346H1, ANT364H1, ANT374H1, CSE342H1, ECO313H1, ECO314H1, ECO414H1, ENV261H1/ ENV360H1, ENV281H1, ENV282H1, ENV307H1, ENV320H1, ENV322H1, ENV323H1, ENV335H1, ENV347H1, ENV350H1, ENV361H1, ENV362H1, ENV381H1, ENV382H1, ENV397Y0, ENV411H1, ENV422H1, ENV462H1, ENV464H1, FOR302H1, FOR303H1, FOR310H1, GGR223H1, GGR310H1, GGR329H1, GGR332H1, GGR334H1, GGR338H1, GGR341H1, GGR349H1, GGR416H1, GGR418H1, GGR434H1, GGR433H1, GGR438H1, HIS218H1, HIS300H1, HIS408H1, HPS307H1, HPS313H1, HPS316H1, HPS324H1, JGE321H1, JGE331H1, JGE481H1, JIG322H1, JIG440H1, POL205H1, POL384H1, POL413H1, RSM466H1, TRN312H1

Note: GGR223H1 is NOT a substitute for ENV222H1.

Group B: Environmental Thought & Ethics Courses

INS250H1, INS402H1, ANT368H1, ANT376H1, CLA373H1, CRE271H1, EAS479H1, ENV330H1, ENV333H1, ENV430H1, FAH446H1, FOR302H1, FOR303H1, GGR419H1, HPS316H1, JGE321H1, JIG322H1, JUG320H1, PHL273H1, PHL373H1, PSY435H1, RLG318H1, RLG345H1, WGS273H1, WGS442H1

Group C: Environmental Science Courses

EEB240H1/ ENV234H1, ENV262H1, ENV337H1, ENV341H1, ENV342H1, ENV395Y0, ENV396H0, ENV396Y0, ENV431H1, ENV441H1, FOR200H1, FOR201H1, FOR400Y1, FOR401H1, GGR272H1, GGR273H1, GGR314H1, GGR337H1, ESS205H1, JEH455H1

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Notes:

- Since the elective courses above are offered by various academic units, students are encouraged to carefully check the pre-requisites and enrolment controls or restrictions for the courses before enrolling.

- Daniels students enrolled in this program may be able to fulfill 1.5 credits in requirement 6 with [ARC357H1](#) and any two of the following courses: [ARC382H1](#), [ARC386H1](#), and [ARC387H1](#). Please contact the Undergraduate Administrator at ug.office.env@utoronto.ca to request that these exceptions be posted on Degree Explorer.

Environmental Studies Minor (Arts Program) - ASMIN1254

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

For more information, please e-mail the School of the Environment's Undergraduate Administrator at ug.office.env@utoronto.ca.

(4.0 credits, including 1.5 credits at the 300+ level)

First Year:

[ENV100H1](#) is recommended but not required.

Higher Years:

1. [ENV221H1](#), [ENV222H1](#)

2. [ENV200H1](#)

3. Additional 2.5 credits, of which a maximum 1.0 credit may be environmental courses offered by academic units other than the School of the Environment (from Group A below). The remainder must be selected from the following: [ENV261H1](#)/ [ENV360H1](#), [ENV281H1](#), [ENV282H1](#), [ENV307H1](#), [ENV320H1](#), [ENV322H1](#), [ENV323H1](#), [ENV330H1](#), [JGE321H1](#), [JGE331H1](#), [ENV333H1](#), [ENV335H1](#), [ENV338H1](#), [ENV347H1](#), [ENV350H1](#), [ENV361H1](#), [ENV362H1](#), [ENV381H1](#), [ENV382H1](#), [ENV395Y0](#), [ENV396H0](#), [ENV396Y0](#), [ENV411H1](#)*, [ENV421Y1](#)/ [ENV421H1](#)*, [ENV422H1](#)*, [ENV430H1](#)*, [ENV431H1](#)*, [ENV440H1](#)*, [ENV461H1](#), [ENV462H1](#), [ENV463H1](#), [ENV464H1](#), [ENV465Y1](#), [JGE481H1](#), [PHL273H1](#).

*with permission of Undergraduate Associate Director

Group A

[ANT364H1](#), [ANT368H1](#), [ANT450H1](#), [CHM210H1](#), [CLA373H1](#), [CRE271H1](#), [CSE342H1](#), [EAS479H1](#), [ECO313H1](#), [ECO314H1](#), [ECO414H1](#), [EEB240H1](#)/ [ENV234H1](#), [ENV262H1](#), [ENV337H1](#), [ENV341H1](#), [ENV342H1](#), [ENV397Y0](#), [ENV441H1](#), [FAH446H1](#), [FOR200H1](#), [FOR201H1](#), [FOR302H1](#), [FOR303H1](#), [FOR310H1](#), [FOR400Y1](#), [FOR401H1](#), [GGR223H1](#), [GGR272H1](#), [GGR273H1](#), [GGR310H1](#), [GGR314H1](#), [GGR332H1](#), [GGR334H1](#), [GGR338H1](#), [GGR349H1](#),

[GGR416H1](#), [GGR418H1](#), [GGR419H1](#), [GGR438H1](#), [GGR433H1](#), [HIS218H1](#), [HIS300H1](#), [HIS408H1](#), [HPS307H1](#), [HPS313H1](#), [HPS316H1](#), [HPS324H1](#), [INS250H1](#), [INS402H1](#), [JIG322H1](#), [JIG440H1](#), [PHL373H1](#), [POL205H1](#), [POL384H1](#), [POL413H1](#), [PSY435H1](#), [RLG318H1](#), [RLG345H1](#), [RSM466H1](#), [TRN312H1](#), [WGS273H1](#), [WGS442H1](#), other courses approved by School of the Environment.

Notes:

- [GGR223H1](#) is NOT a substitute for [ENV222H1](#).
- Since the elective courses above are offered by various academic units, students are encouraged to carefully check the pre-requisites and enrolment controls or restrictions for the courses before enrolling.
- Daniels students enrolled in this program may be able to fulfill 1.0 credit in requirement 6 with two of the following ARC courses, provided no other Group A courses are being counted: [ARC357H1](#), [ARC382H1](#), [ARC386H1](#), and [ARC387H1](#). Please contact the Undergraduate Administrator at ug.office.env@utoronto.ca to request that these exceptions be posted on Degree Explorer.

Collaborative Programs

Environment & Health Specialist (Science Program) - ASSPE0365

From air pollution and water contamination to climate change, the anthropogenic impact on our environment has significant repercussions on human health. A collaboration between the School of the Environment and Human Biology, the objective of the Environment and Health program is to provide students with instruction in fundamental biological sciences and to integrate a broad understanding of the environmental determinants of health.

For more information, please e-mail the School of the Environment's Undergraduate Administrator at ug.office.env@utoronto.ca.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2025). Full details about ASIP, including student eligibility, selection and enrolment, are available in

the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and there are program-specific year 3 entry enrolment requirements. Students applying for Year 3 entry must have been admitted to the Environment & Health Major program in the Summer after Year 2 and have completed a 0.5 credit of ENV221H1 or ENV222H1 and a 0.5 credit of EEB240H1 or BIO220H1 prior to ASIP entry.

Completion Requirements:

(14.0 credits, including 4.0 credits at the 300+ level, of which 1.0 credit must be at the 400-level)

To help students proceed through the program, it is recommended that the first year BIO and CHM requirements are completed before entering the program.

Year 1:

1. BIO120H1, BIO130H1
2. (CHM135H1 and CHM136H1)/ CHM151Y1 (Only transfer credits that carry exclusions to CHM135H1 and/or CHM136H1 will be accepted)
3. 1.0 credit from: JEG100H1/ GGR101H1/ MAT135H1/ MAT136H1/ JMB170Y1/ PHY131H1/ PHY132H1/ PHY151H1/ PHY152H1/ PSY100H1

Year 2: Foundations of environment and health

4. BCH210H1/ CHM247H1
5. BIO220H1, BIO230H1/ BIO255H1
6. HMB265H1/ BIO260H1
7. ENV221H1, ENV222H1
8. EEB240H1/ ENV234H1, ENV337H1
9. PHL273H1

Year 3: Selected topics in environment and health with greater depth.

10. STA220H1/ STA288H1, STA221H1
11. BCH311H1/ CSB349H1/ LMP363H1/ NFS284H1/(PSL300H1 and PSL301H1)/ PSL350H1
12. JGE321H1, ENV341H1

13. 1.0 credit from: CHM210H1/ ENV342H1/ ENV441H1/ (only one from ESS261H1/ GGR203H1/ GGR303H1/ GGR314H1/ PHY231H1)

Years 3 & 4:

14. 1.5 credits from environment and health relevant courses: HMB302H1/ HMB303H1/ HMB312H1/ HMB314H1/ HMB322H1/ HMB496Y1/ HMB499Y1/ ANA300Y1/ ANA301H1/ BCH311H1/ CSB349H1/ BCH370H1/ CHM310H1/ CSB325H1/ CSB327H1/ CSB328H1/ CSB331H1/ CSB346H1/ CSB347H1/ CSB350H1/ CSB351Y1/ EEB318H1/ EEB319H1/ EEB321H1/ EEB328H1/ EEB362H1/ EEB375H1/ EEB428H1/ ENV316H1/ ENV336H1/ ENV342H1*/ ENV441H1*/ ESS311H1/ ESS312H1/ ESS425H1/ GGR303H1/ GGR305H1/ GGR347H1/ GGR348H1/ GGR372H1/ GGR433H1/ HIS423H1/ HST405H1/ IMM340H1/ IMM350H1/ LMP301H1/ LMP363H1/ MGY377H1/ NFS382H1/ NFS386H1/ NFS488H1/ PCL381H1/ PSL350H1/ PSL372H1/ PSL420H1/ PSY435H1 or any other approved course for which the student has appropriate prerequisites. The 1.5 credits can be chosen to reflect the particular academic interests of each student. *If not taken for Requirement 13 above.

Year 4: Advanced topics in environment and health with emphasis on primary research and critical analysis

15. (ENV421Y1/ ENV421H1)/ ENV491Y1*/ ENV492H1*/ ENV493H1* or a minimum of 0.5 credit from any approved departmental or college independent research project (*the research topic for these courses must be related to environment and health)

16. JEH455H1

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Note:

- Since the elective courses listed in Requirement 14 are offered by various academic units, students are encouraged to carefully check the pre-requisites and enrolment controls or restrictions for the courses before enrolling.

Environment & Toxicology Specialist (Science Program) - ASSPE0605

This program is jointly sponsored by the Department of Pharmacology and Toxicology and the School of the Environment. For additional information see "School of the Environment" (www.environment.utoronto.ca) or consult our website: www.pharmtox.utoronto.ca.

The Environment and Toxicology Specialist program is an interdisciplinary program which spans the social, physical and life sciences and integrates study of the effects of chemicals not only on the health and behaviour of human beings but on whole ecosystems as the adverse effects associated with therapeutic and environmental chemicals are discussed. This program emphasizes the application of knowledge of environmental toxicology and risk assessment and prepares students for a variety of job opportunities following its completion. Graduates of the Environment and Toxicology program may pursue careers in scientific research, environmental science, conservation science, governmental agencies, consulting agencies, and within chemical, manufacturing or agriculture industries. Students learn to integrate basic environmental and life science with particular aspects of clinical toxicology and related areas through lectures, tutorials, and laboratory and independent research project experience. The senior independent research project course enables students to gain valuable research experience while working under the supervision of an individual faculty member in either a laboratory-based or a non-laboratory-based setting.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enroll.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1, BIO130H1
- (CHM135H1, CHM136H1)/ CHM151Y1
- 1.0 credit from (MAT135H1, MAT136H1)/
MAT137Y1/ MAT157Y1/ (PHY131H1,
PHY132H1)/ (PHY151H1, PHY152H1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in each course, or a combined grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at undergrad.pharmtox@utoronto.ca, specify which program you would like to be considered for, and provide

your student number. Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment.

Arts & Science Internship Program (ASIP)

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2025). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and there are program-specific year 3 entry enrolment requirements. Students applying for Year 3 entry must have been admitted to the Environment & Toxicology Specialist in the Summer after Year 2 and completion of PCL201H1 (with a minimum grade of 77%), PSL300H1 and PSL301H1.

Notes:

- The Environment and Toxicology Specialist cannot be combined with the Biomedical Toxicology Major or the Pharmacology Major.
- Students who wish to enroll in the program **after** their second year will be considered on a case-by-case basis. Successful completion of required prerequisite courses is required to enroll in further upper-level program courses.

Completion Requirements:

(14.0 credits, including 4.0 credits at the 300+ level, 1.0 credit of which must be at the 400-level).

First Year: BIO120H1, BIO130H1, (CHM135H1, CHM136H1)/ CHM151Y1, and at least 1.0 credit from MAT135H1, MAT136H1, MAT137Y1, MAT157Y1, PHY131H1, PHY132H1, PHY151H1, PHY152H1

Students in this program have the option to enrol in the Arts & Science Internship Program (ASIP) stream.

Second Year: BCH210H1, BIO230H1/ BIO255H1, ENV221H1, ENV222H1, PCL201H1, PSL300H1, PSL301H1 and CHM247H1 (see NOTE 1)

Third and Fourth Years:

BIO220H1, EEB240H1, JGE321H1, CHM210H1, PCL302H1, PCL381H1, PCL382H1, PCL482H1

One of: ENV341H1/ ENV337H1/ EEB320H1

One of: STA220H1/ STA221H1/ STA288H1/ EEB225H1 (see NOTE 2)

One of: ENV421Y1/ JPM400Y1/ PCL367H1/ PCL474Y1

(see NOTE 2)

At least 1.0 credit from: CHM310H1, EEB321H1, EEB365H1, EEB428H1, ENV441H1, ENV462H1, ESS313H1, JPM300H1, LMP301H1, PCL298H1, PCL386H1, PCL477H1, PCL483H1, PCL484H1, PCL490H1, PCL497H1, PCL498Y1 (see NOTE 4), PHY231H1 (see NOTE 3)

An Integrative, Inquiry-Based Activity Requirement must be satisfied.

The requirement for an integrative, inquiry-based and/or experiential activity must be met by completing at least one of the following: ENV421Y1, JPM400Y1, PCL297H1, PCL298H1, PCL367H1, PCL397Y0, PCL474Y1, PCL497H1, PCL498Y1. Students who complete the Arts & Science Internship Program (ASIP) stream will also meet this requirement.

Notes:

1. PSL300H1 and PSL301H1 require MAT 100-level/ PHY 100-level courses.
2. PCL201H1, PCL302H1, and PCL367H1 are pre-requisites for students intending to take PCL474Y1. Students intending to take PCL474Y1 must obtain permission from the Undergraduate Student Advisor of the School of the Environment 3 months prior to the intended date of enrolment. Students must also consult with the Department of Pharmacology and Toxicology at least 3 months prior to the intended date of enrolment. **Students wishing to take ENV421Y1 are advised to take the course during third year, due to scheduling conflicts with fourth year requirements.**
3. Students taking PCL477H1 must take BCH210H1 prior. **Students taking only PCL367H1 must take 1.5 credits from program electives requirement list of courses to ensure 14.0 program credits. Students may choose to take both PCL367H1 and ENV421Y1/ JPM400Y1/ PCL474Y1 and would then need to take only 0.5 credits from the program electives requirement list of courses to ensure 14.0 program credits.**
4. Students may not use more than 2.0 credits towards their program from JPM400Y1/ PCL298H1/ PCL474Y1/ PCL497H1/ PCL498Y1.

Environmental Geosciences Specialist (Science Program) - ASSPE1253

The Environmental Geosciences specialist program focusses on the interconnectedness within the Earth system (biosphere, hydrosphere, atmosphere, and geosphere) and core environmental geoscience subjects

such as earth materials, aqueous geochemistry, hydrogeology, environmental contaminants, sedimentary geology, geomorphology, and biogeochemistry. This program aims at preparing students for a variety of careers in industry (e.g. environmental consulting), government and academia that require knowledge of Earth and Environmental science, including knowledge about environmental assessment, water and food quality, climate change, waste management, mining practices, and sustainability.

Jointly sponsored by the School of the Environment and the Department of Earth Sciences. For more information, please contact the Department of Earth Sciences, undergradchair@es.utoronto.ca. Students should note that under the Professional Geoscientists Act of 2000, individuals practicing Environmental Geoscience in Ontario require education that fulfills APGO knowledge requirements (see note below).

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(12.0 credits including at least 1.0 credit from 400-level courses)

1st year required courses (2.0 credits): CHM151Y1/ (CHM135H1, CHM136H1), MAT135H1, PHY131H1/ PHY151H1

1st year elective courses: 1.0 credit from MAT136H1, PHY132H1/ PHY152H1, ENV237H1/ ENV238H1, BIO120H1, CSC108H1/ CSC110Y1/ ESS245H1/ ESS345H1

2nd year required courses (2.0 credits): ESS241H1, ESS223H1/ ENV233H1, JEG100H1/ ESS262H1, GGR201H1/ JEG201H1

2nd year elective courses: 1.0 credit from ESS224H1, ESS261H1, STA220H1/ GGR270H1, CHM210H1, MAT221H1/ MAT223H1; up to 0.5 credit of this requirement can be satisfied by taking one of the following ethics courses: IMC200H1/ INS201Y1/ PHL273H1/ PHL275H1

3rd and 4th year required courses (2.0 credits): ESS311H1, ESS312H1, ESS410H1, ESS461H1

3rd and 4th year elective courses: 4.0 credits from JGA305H1, ESS234H1, ESS313H1, ESS331H1, ESS361H1, ESS362H1, ESS363H1/ ESS462H1, GGR315H1, GGR390H1, ENV333H1, ESS431H1, ESS441H1, ESS445H1, ESS450H1, ESS463H1, ESS464H1, ESS465H1, ESS490H1, ESS491H1/ ESS492Y1

Other courses which might of interest: [ESS391H1](#), [ESS392Y1](#), [ESS381H1](#), [ESS481H1](#)

If you plan to become APGO certified, we suggest you consider the following courses to fulfill minimum qualifications. This list comprises courses which are required for the specialist as well as suggested courses; together they fulfill groups 1A, 1B, 2A and 2B of the APGO requirements and add up to 13.5 credits:

Group 1A: [CHM135H1](#), [MAT135H1](#), [PHY131H1](#)

Group 1B: [BIO120H1](#), [MAT136H1](#), [CHM136H1](#), [PHY132H1](#), [STA220H1](#), [CSC108H1](#)/ [ESS245H1](#)/ [ESS345H1](#)

Group 2A: [ESS224H1](#), [ESS241H1](#), [ESS234H1](#), [ESS331H1](#)

Group 2B: [ESS223H1](#), [ESS312H1](#), [GGR201H1](#)/ [JEG201H1](#), [GGR315H1](#), [JGA305H1](#), [ESS322H1](#), [GGR205H1](#)/ [JEG205H1](#)

Group 2C: 4.5 of 200/ 300/ 400-level ESS or other allowable courses

All students, regardless of their career aspirations, are encouraged to talk to the undergraduate chair about their selection of electives.

Environment & Health Major (Science Program) - ASMAJ0365

From air pollution and water contamination to climate change, the anthropogenic impact on our environment has significant repercussions on human health. A collaboration between the School of the Environment and Human Biology, the objective of the Environment and Health program is to provide students with instruction in fundamental biological sciences and to integrate a broad understanding of the environmental determinants of health.

For more information, please e-mail the School of the Environment's Undergraduate Administrator at ug.office.env@utoronto.ca.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry),

starting Fall 2025). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and there are program-specific year 3 entry enrolment requirements. Students applying for Year 3 entry must have been admitted to the Environment & Health Major program in the Summer after Year 2 and have completed a 0.5 credit of [ENV221H1](#) or [ENV222H1](#) and a 0.5 credit of [EEB240H1](#) or [BIO220H1](#) prior to ASIP entry.

Completion Requirements:

Required Courses (8.0 credits)

To help students proceed through the program, it is recommended that the first year BIO and CHM requirements are completed before entering the program.

Year 1:

1. [BIO120H1](#); [BIO130H1](#)
2. ([CHM135H1](#) and [CHM136H1](#))/ [CHM151Y1](#) (Only transfer credits that carry exclusions to [CHM136H1](#) and/or [CHM135H1](#) will be accepted)
3. [JEG100H1](#)/ [GGR101H1](#)/ [MAT135H1](#)/ [PHY131H1](#)/ [PSY100H1](#)

Year 2: Foundations in environment and health

4. [BCH210H1](#)/ [CHM247H1](#)
5. [BIO220H1](#); [BIO230H1](#)/ [BIO255H1](#)
6. [HMB265H1](#)/ [BIO260H1](#)

7. 1.0 credit from environmental core courses: [ENV221H1](#)/ [ENV222H1](#)/ ([EEB240H1](#)/ [ENV234H1](#))/ [ENV337H1](#)

Year 3: Third year core courses

8. [ENV341H1](#)
9. [PSL300H1](#); [PSL301H1](#)

Years 3 or 4:

10. 0.5 credit from environment and health relevant courses: [HMB302H1](#)/ [HMB303H1](#)/ [HMB312H1](#)/ [HMB314H1](#)/ [HMB322H1](#)/ [HMB496Y1](#)/ [HMB499Y1](#)/ [ANA300Y1](#)/ [ANA301H1](#)/ [BCH311H1](#)/ [CSB349H1](#)/ [PSL350H1](#)/ [BCH370H1](#)/ [CHM310H1](#)/ [CSB325H1](#)/ [CSB327H1](#)/ [CSB328H1](#)/ [CSB331H1](#)/ [CSB346H1](#)

CSB347H1/ CSB350H1/ CSB351Y1/ EEB318H1/ EEB319H1/ EEB321H1/ EEB328H1/ EEB362H1/ EEB375H1/ EEB428H1/ ESS425H1/ ENV316H1/ ENV336H1/ ENV342H1/ ENV441H1/ GGR303H1/ GGR305H1/ GGR347H1/ GGR348H1/ GGR372H1/ GGR433H1/ HIS423H1/ HST405H1/ ESS311H1/ ESS312H1/ ESS463H1/ IMM340H1/ IMM350H1/ LMP301H1/ LMP363H1/ MGY377H1/ NFS382H1/ NFS386H1/ NFS488H1/ PCL381H1/ PSL372H1/ PSL420H1/ PSY435H1

Year 4: Environment & Health Capstone Course

11. JEH455H1

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Note:

- Since the elective courses above are offered by various academic units, students are encouraged to carefully check the pre-requisites and enrolment controls or restrictions for the courses before enrolling.

Environmental Ethics Major (Arts Program) - ASMAJ1107

Jointly sponsored by the School of the Environment and the Department of Philosophy, this program explores how value judgments and worldviews affect environmental decision making. For more information, please e-mail the School of the Environment's Undergraduate Administrator at ug.office.env@utoronto.ca.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2025). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and there are program-specific year 3 entry enrolment requirements. Students applying for Year 3 entry must have been admitted to the Environmental Ethics Major program in the Summer after Year 2 and have completed a 0.5 credit of ENV221H1, ENV222H1, or PHL273H1 prior to ASIP entry.

Completion Requirements:

(6.0 credits)

1. (ENV221H1, ENV222H1), PHL273H1, JGE321H1
2. 1.0 credit from PHL373H1, ENV333H1, JGE331H1
3. 0.5 credit from ((ENV421Y1/ ENV421H1)/ ENV491Y1/ ENV492H1/ ENV493H1), ENV440H1, ENV451H1
4. 2.5 credits from Group A below. **Note:** Students taking ENV421Y1 or ENV491Y1 for requirement 3 only need to take 2.0 credits from Group A in requirement 4.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Group A:

ANT450H1, EAS479H1, CRE271H1, ECO105Y1, ENV330H1, ENV333H1, ENV335H1, ENV347H1, ENV411H1, ENV430H1, ENV464H1, ENV465Y1, FAH446H1, FOR302H1, JIG322H1, HIS218H1, HPS202H1, HPS307H1, INS402H1, JGE331H1, PHL373H1, PHL275H1, PHL295H1, PHL375H1, PHL394H1, PHL395H1, PHL413H1, PSY435H1, RLG318H1, RLG345H1, WGS273H1, WGS442H1

Note:

- Since the elective courses above are offered by various academic units, students are encouraged to carefully check the pre-requisites and enrolment controls or restrictions for the courses before enrolling.

Environment & Behaviour Minor (Science Program) - ASMIN1551

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Special Requirement

- Students must be enrolled in the Psychology Minor, Major or Specialist, to be considered for enrolment.

Completion Requirements:

For more information, please e-mail the School of the Environment's Undergraduate Administrator at ug.office.env@utoronto.ca.

(4.0 credits, including 1.0 credit at the 300+ level.)

Higher Years:

1. ENV221H1, ENV222H1, PSY220H1, PSY335H1

PSY435H1

2. 1.0 credit from: ENV333H1, ENV335H1, ENV361H1, ENV464H1, JGE321H1, JGE331H1

3. 1.0 credit from: PSY320H1, PSY321H1, PSY427H1, PSY336H1

Environmental Ethics Minor (Arts Program) - ASMIN1107

Jointly sponsored by the School of the Environment and the Department of Philosophy, this program explores how value judgments and worldviews affect environmental decision making. For more information, please e-mail the School of the Environment's Undergraduate Administrator at ug.office.env@utoronto.ca.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, including include 1.0 credit at the 300+level)

1. PHL273H1
2. One of PHL373H1, ENV333H1; JGE321H1, JGE331H1
3. ENV221H1, ENV222H1
4. Additional 2.0 PHL credits, with at least a 0.5 credit at the 300+ level. It is recommended that one course be in the History of Philosophy and the other in the Problems of Philosophy, including a 0.5 credit in ethics.

Environment and Energy Minor (Science Program) - ASMIN1552

Environment and Energy (Science Program) Joint Program with the School of the Environment

Jointly sponsored by the School of the Environment and the Department of Geography, this interdisciplinary program addresses the scientific, technological, environmental and policy aspects of energy use and supply, with a focus on the reduction of environmental impacts.

Note that the four full course equivalents that constitute the Minor Program are those listed below under Higher Years. For more information, please e-mail the School of the Environment's Undergraduate Administrator at ug.office.env@utoronto.ca.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

1. ENV221H1, ENV222H1/ GGR223H1 (1.0 credit)
2. ENV346H1, ENV350H1 (1.0 credit)
3. Any two of: GGR332H1/ ENV462H1, GGR310H1/ FOR310H1, GGR314H1, GGR347H1, GGR348H1 (1.0 credit)
4. Any two of: CHM210H1, CHM310H1, CHM415H1, ENV237H1/ ENV238H1, ENV450H1, FOR310H1*/ GGR310H1*, FOR410H1, GGR203H1, GGR314H1*, GGR347H1*, GGR348H1*, HPS313H1, PHY231H1, PHY250H1 (* if not taken for the requirement immediately above) (1.0 credit)

*Note: The following courses are recommended preparation for students in first year. They **are not completion requirements** for the Environment and Energy Minor: 1.0 credit from (MAT135H1 and MAT136H1)/ MAT137Y1, and 1.0 credit from CHM135H1, CHM136H1, CHM151Y1, PHY131H1, PHY132H1, PHY151H1, PHY152H1*

Directed Minors

Environmental Geography Minor (Arts Program) - ASMIN1252

A focus on the human-environment nexus is most explicit in these programs. Students learn about the social, spatial, and biophysical processes that shape society's relationship to nature, management of resources, and contemporary environmental change. These programs appeal to non-science students who seek an environmental program that allows them to learn more about the natural processes that interact with social factors in shaping environments. These programs offer training in quantitative and qualitative research methods, including GIS and Remote Sensing.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

First Year Geography Courses: Any course (0.5 credit) from GGR107H1 (recommended), JEG100H1, GGR101H1, GGR112H1, GGR124H1, GGR172H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1. 200/300-level GGR courses may also be used to meet this requirement. Contact the Undergraduate Administrator to update your program.

Core Course: All (0.5 credit) of GGR223H1

Physical and Environmental Geography Course: Any course (0.5 credit) from GGR201H1/ JEG201H1, GGR203H1, GGR205H1/ JEG205H1, GGR206H1/ JEG206H1, GGR305H1/ JEG305H1, GGR308H1/ JEG308H1, GGR314H1, GGR347H1, GGR348H1, ENV200H1, ENV234H1

Applications: Any 5 courses (2.5 credits) from Group A; up to 1.0 credit can be from Group B. Up to a 0.5 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department.

Note: At least 1.0 credit must be 300/400-level courses.

Group A (Environmental Geography Courses):
GGR201H1/ JEG201H1, GGR203H1, GGR205H1/ JEG205H1, GGR206H1/ JEG206H1, GGR223H1, GGR270H1, GGR271H1, GGR272H1, GGR273H1, GGR274H1, GGR301H1/ JEG301H1, GGR305H1/ JEG305H1, GGR308H1/ JEG308H1, GGR310H1, GGR314H1, GGR323H1, GGR329H1, GGR332H1, GGR334H1, GGR315H1/ GGR337H1, GGR338H1, GGR340H1, GGR341H1, GGR347H1, GGR348H1, GGR349H1, GGR372H1, GGR373H1, GGR386H1, GGR387H1, GGR388H1, GGR401H1, GGR405H1, GGR406H1/ JEG406H1, GGR413H1, GGR414H1/ GGR415H1, GGR416H1, GGR418H1, GGR419H1, GGR434H1, GGR438H1, GGR481H1, GGR491Y1, GGR492H1, GGR497H1, GGR498H1, JGE321H1, JGE331H1, JIG322H1, JIG440H1, JUG320H1

Group B (School of the Environment Courses):
ENV200H1, ENV234H1, ENV307H1, ENV323H1, ENV333H1, ENV335H1, ENV350H1, ENV395Y0, ENV396Y0, ENV422H1

Environmental Biology Minor (Science Program) - ASMIN1390

Environmental science is an interdisciplinary field that integrates biological, chemical, and physical sciences to study human interactions with their environment. The **Environmental Biology Minor** program (4.0 credits) provides students an introduction to biology that is essential to understand the impact of humans on other

organisms and their environments. It provides students with an understanding of ecology, the diversity and function of living organisms, the physical and chemical environment, and the ways organisms interact with, and affect, ecosystem processes. Students are exposed to ecosystem management, issues related to environmental change, and the consequences of interactions between humans and the environment.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits; must include at least 1.0 credit at the 300+ level)

- 1.5 credits: BIO120H1, BIO220H1, EEB240H1
2. 1.0 credits in organismal biology & biological diversity: BIO251H1, EEB263H1, EEB266H1, EEB267H1, EEB268H1, EEB340H1, EEB380H1, EEB382H1, EEB384H1, EEB386H1, EEB388H1
- 0.5 credit in core ecology: EEB314H1, EEB319H1, EEB320H1, EEB321H1, EEB322H1, EEB324H1, EEB328H1
- 1.0 credits in any EEB or ENV432H1

Environmental Chemistry Minor (Science Program) - ASMIN2543

Consult Professor J. Murphy, Department of Chemistry

The Environmental Chemistry Minor program provides a balanced fundamental background in chemistry as well as an introduction to the major issues associated with environmental chemistry. This is achieved through a combination of introductory courses at the first and second-year levels, along with specific analytical and environmental chemistry courses in upper years.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, including 1.0 credit at the 300+ level)

- (CHM135H1, CHM136H1)/ CHM151Y1

- 1.0 credit from: CHM217H1, CHM220H1/CHM222H1, (CHM236H1, CHM237H1)/CHM238Y1, CHM247H1/ CHM249H1
- CHM210H1
- CHM310H1, and 1.0 credit from: CHM317H1, CHM410H1, CHM415H1

Environmental Economics Minor (Arts Program) - ASMIN1438

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- ECO101H1 (63%) and ECO102H1 (63%)/ ECO105Y1 (80%)
- MAT133Y1 (63%)/(MAT135H1 (60%) and MAT136H1 (60%))/ MAT137Y1 (55%)/ MAT157Y1 (55%)

Completion Requirements:

(4.0 credits)

- (ECO101H1 and ECO102H1)/ ECO105Y1
- MAT133Y1/ (MAT135H1, MAT136H1)/ MAT137Y1/MAT157Y1
- ECO200Y1/ ECO204Y1/ ECO206Y1
- 1.0 credit from 300+ level ECO courses, including at least 0.5 credit from ECO313H1/ ECO314H1

Note:

Students enrolled in this Minor program cannot be enrolled in any other program in Economics.

Environmental Geosciences Minor (Science Program) - ASMIN1253

Enrolment Requirements:

Admission to the Environmental Geosciences Minor has been administratively suspended as of 1 April 2015 and is no longer admitting students. Students presently enrolled in the minor will be able to complete the program requirements as described below.

Completion Requirements:

(4 full courses or their equivalent; must include at least one full-course equivalent at the 300+-level)

- CHM136H1 (CHM138H1)
- ENV233H1; ESS221H1, ESS222H1, ESS311H1, ESS312H1, ESS410H1

Environmental Anthropology Minor (Arts Program) - ASMIN1291

Admission Requirements:

A program focused on understanding the diverse nature of interactions between humans and their environments, both in the past and in modern global society. Consult the Undergraduate Office, Department of Anthropology (416-978-6414).

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, including 1.0 credit at the 300+ level)

- ANT100Y1/(ENV221H1 and ENV222H1/ GGR223H1)
- ANT200Y1/ ARH100Y1/ (ANT204H1 and ANT207H1/0.5 credit 300-level Social Anthropology course from Anthropology Group C, or Subgroup C(i), C(ii))
- 2.0 credits from: ANT315H1, ANT336H1, ANT346H1, ANT364H1, ANT366H1, ANT374H1, ANT376H1, ANT409H1, ANT410H1, ANT415Y1, ANT420H1, ANT430H1, ANT450H1, INS250H1, INS402H1

Note: ANT courses are those offered with the following prefixes: ANT, ARH, INS, JAA, JAL, and JGA.

Group C: Society, Culture, and Language

ANT204H1, ANT205H1, ANT207H1, ANT208H1, ANT210H1, ANT215H1, ANT299Y1, ANT324H1, ANT342H1, ANT343H1, ANT344H1, ANT345H1, ANT346H1, ANT347H1, ANT348H1, ANT352H1, ANT354H1, ANT356H1, ANT357H1, ANT358H1, ANT362H1, ANT364H1, ANT366H1, ANT370H1, ANT374H1, ANT376H1, ANT378H1, ANT380H1, ANT382H1, ANT384H1, ANT385H1, ANT386H1, ANT390H1, ANT426H1, ANT435H1, ANT441H1, ANT442H1, ANT446H1, ANT450H1, ANT456H1, ANT459H1, ANT460H1, ANT462H1, ANT463H1, ANT464H1, ANT465H1, ANT473H1, ANT475H1, ANT480H1, ANT484H1, ANT485H1, ANT486H1,

ANT488H1, ANT490Y1, ANT491Y1, ANT491H1, ANT497Y1, ANT498H1, ANT499H1, JAA377H1, JNH350H1, AFR250Y1, NMC356H1, MCS225Y1

Note: ANT390H1 may be placed in a different Course Group depending on the topic, which will vary from year to year.

Subgroup C (i): (Society, Culture and Language - Area)
ANT455H1, ANT458H1, ANT472H1, ANT477H1, AFR298H1, CAR316H1, NMC241H1

Subgroup C (ii): (Society, Culture and Language – Linguistic)
ANT253H1, ANT329H1, ANT425H1, ANT483H1, ANT497Y1, ANT498H1, ANT499H1, JAL328H1, JAL355H1, JAL401H1, SLA380H1

Physical and Environmental Geography Minor (Science Program) - ASMIN2030

Physical and Environmental Geography offers science-based programs for students interested in an integrative approach to understanding the earth's biotic and abiotic systems, including their spatial dynamics and the ways they are altered by human action. The programs provide a foundation in the subfields of climatology, biogeography, hydrology, and geomorphology. Students gain practical experience in lab and field settings. Technical skills taught also include data analysis, geospatial analytical tools, including GIS and Remote Sensing.

Enrolment Requirements:

Enrolment in the Physical and Environmental Geography Minor will be administratively suspended as of January 31, 2024 and students will no longer be able to enrol in the program. Students presently enrolled in the Minor will be able to complete the program requirements as described below. Students who are not enrolled in this program but are interested in "Physical and Environmental Geography" programs are encouraged to consider the Environmental Geography and/or Human Geography Programs in the Department of Geography and Planning and are strongly recommended to consult with the Department of Geography and Planning for advising.

Completion Requirements:

First Year Geography Courses: Any 2 courses (1.0 credit) from JEG100H1 (recommended), GGR101H1, GGR107H1, GGR112H1, GGR124H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1

Core Courses: Any 2 courses (1.0 credit) from GGR201H1/ JEG201H1, GGR203H1, GGR205H1/ JEG205H1, GGR206H1/ JEG206H1

Methods Courses: Any 2 courses (1.0 credit) from GGR270H1, GGR272H1, GGR390H1

Applications: Any 2 courses (1.0 credit) from:

- Hydrology/GIS/Remote Sensing: GGR206H1/ JEG206H1, GGR273H1, GGR274H1, GGR315H1/ GGR337H1, GGR373H1, GGR375H1, GGR386H1, GGR413H1, GGR414H1/ GGR415H1, GGR462H1
- Climatology/Energy: GGR203H1, GGR314H1, GGR347H1, GGR348H1
- Geomorphology: GGR201H1/ JEG201H1, GGR301H1/ JEG301H1, GGR406H1/ JEG406H1
- Biogeography: GGR205H1/ JEG205H1, GGR305H1/ JEG305H1, GGR308H1/ JEG308H1, ESS361H1, ESS363H1, ESS461H1, ESS462H1

No more than one (0.5) of GGR273H1, GGR274H1, GGR373H1, GGR375H1, GGR386H1. At least one Applications course (0.5 credit) must be 300-level or higher. Up to one 0.5 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department.

Total credits: 4.0

Geographic Information Systems Minor (Arts Program) - ASMIN0305

The GIS program covers the on theoretical, technical and applied foundations for geographic information systems. Students learn methods for spatial data production, analysis and presentation using computer cartography, spatial analysis, remote sensing, and geovisualization. Problem solving and project design are emphasized in upper level courses, as students apply techniques to answer specific geographic questions. The GIS program is structured to provide a stand-alone minor for students in Geography and other disciplines seeking complementary skills in spatial analysis (e.g., field biology, archaeology).

Note: Students combining this program with a Specialist/Major sponsored by the Department of Geography will normally be allowed to count only 1.5 (of the 4.0) credits towards both programs.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

First Year Geography Courses: Any 2 courses (1.0 credit) from JEG100H1, GGR101H1, GGR107H1, GGR112H1, GGR124H1, GGR172H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1. 200/300-level GGR courses may also be used to meet this requirement. Contact the Undergraduate Administrator to update your program.

Methods & Core Courses: All (2.0 credits) of GGR270H1, GGR272H1, GGR273H1, GGR373H1

Applications: Any 2 courses (1.0 credit) from GGR225H1, GGR274H1, GGR315H1/ GGR337H1, GGR372H1, GGR375H1, GGR376H1, GGR377H1, GGR386H1, GGR413H1, GGR414H1/ GGR415H1, GGR462H1, GGR472H1, GGR473H1. Up to 0.5 credit can be used from GGR493Y1, based on suitability of placement for this program, and approval by department. Up to 0.5 credit from GGR491Y1, GGR492H1, GGR497H1, GGR498H1, and GGR499H1 based on suitability of research topic for this program, and approval by department.

Note: At least 1.0 credit must be 300/400-level courses

Data Science in the Social Sciences

Geographic Information Systems Minor (Arts Program) - ASMIN0305

The GIS program covers the on theoretical, technical and applied foundations for geographic information systems. Students learn methods for spatial data production, analysis and presentation using computer cartography, spatial analysis, remote sensing, and geovisualization. Problem solving and project design are emphasized in upper level courses, as students apply techniques to answer specific geographic questions. The GIS program is structured to provide a stand-alone minor for students in Geography and other disciplines seeking complementary skills in spatial analysis (e.g., field biology, archaeology).

Note: Students combining this program with a Specialist/Major sponsored by the Department of Geography will normally be allowed to count only 1.5 (of the 4.0) credits towards both programs.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

First Year Geography Courses: Any 2 courses (1.0 credit) from JEG100H1, GGR101H1, GGR107H1, GGR112H1, GGR124H1, GGR172H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1. 200/300-level GGR courses may also be used to meet this requirement. Contact the Undergraduate Administrator to update your program.

Methods & Core Courses: All (2.0 credits) of GGR270H1, GGR272H1, GGR273H1, GGR373H1

Applications: Any 2 courses (1.0 credit) from GGR225H1, GGR274H1, GGR315H1/ GGR337H1, GGR372H1, GGR375H1, GGR376H1, GGR377H1, GGR386H1, GGR413H1, GGR414H1/ GGR415H1, GGR462H1, GGR472H1, GGR473H1. Up to 0.5 credit can be used from GGR493Y1, based on suitability of placement for this program, and approval by department. Up to 0.5 credit from GGR491Y1, GGR492H1, GGR497H1, GGR498H1, and GGR499H1 based on suitability of research topic for this program, and approval by department.

Note: At least 1.0 credit must be 300/400-level courses

Data Science in the Life Sciences

Environment & Toxicology Specialist (Science Program) - ASSPE0605

This program is jointly sponsored by the Department of Pharmacology and Toxicology and the School of the Environment. For additional information see "School of the Environment" (www.environment.utoronto.ca) or consult our website: www.pharmtox.utoronto.ca.

The Environment and Toxicology Specialist program is an interdisciplinary program which spans the social, physical and life sciences and integrates study of the effects of chemicals not only on the health and behaviour of human beings but on whole ecosystems as the adverse effects associated with therapeutic and environmental chemicals are discussed. This program emphasizes the application of knowledge of environmental toxicology and risk assessment and prepares students for a variety of job opportunities following its completion. Graduates of the Environment and Toxicology program may pursue careers in scientific research, environmental science, conservation science, governmental agencies, consulting agencies, and within chemical, manufacturing or agriculture industries. Students learn to integrate basic environmental and life science with particular aspects of clinical toxicology and

related areas through lectures, tutorials, and laboratory and independent research project experience. The senior independent research project course enables students to gain valuable research experience while working under the supervision of an individual faculty member in either a laboratory-based or a non-laboratory-based setting.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enroll.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1, BIO130H1
- (CHM135H1, CHM136H1)/ CHM151Y1
- 1.0 credit from (MAT135H1, MAT136H1)/
MAT137Y1/ MAT157Y1/ (PHY131H1,
PHY132H1)/ (PHY151H1, PHY152H1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in each course, or a combined grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at undergrad.pharmtox@utoronto.ca, specify which program you would like to be considered for, and provide your student number. Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment.

Arts & Science Internship Program (ASIP)

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2025). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year

3 entry and there are program-specific year 3 entry enrolment requirements. Students applying for Year 3 entry must have been admitted to the Environment & Toxicology Specialist in the Summer after Year 2 and completion of PCL201H1 (with a minimum grade of 77%), PSL300H1 and PSL301H1.

Notes:

- The Environment and Toxicology Specialist cannot be combined with the Biomedical Toxicology Major or the Pharmacology Major.
- Students who wish to enroll in the program **after** their second year will be considered on a case-by-case basis. Successful completion of required prerequisite courses is required to enroll in further upper-level program courses.

Completion Requirements:

(14.0 credits, including 4.0 credits at the 300+level, 1.0 credit of which must be at the 400-level).

First Year: BIO120H1, BIO130H1, (CHM135H1, CHM136H1)/ CHM151Y1, and at least 1.0 credit from MAT135H1, MAT136H1, MAT137Y1, MAT157Y1, PHY131H1, PHY132H1, PHY151H1, PHY152H1

Students in this program have the option to enrol in the Arts & Science Internship Program (ASIP) stream.

Second Year: BCH210H1, BIO230H1/ BIO255H1, ENV221H1, ENV222H1, PCL201H1, PSL300H1, PSL301H1 and CHM247H1 (see NOTE 1)

Third and Fourth Years:

BIO220H1, EEB240H1, JGE321H1, CHM210H1, PCL302H1, PCL381H1, PCL382H1, PCL482H1

One of: ENV341H1/ ENV337H1/ EEB320H1

One of: STA220H1/ STA221H1/ STA288H1/ EEB225H1 (see NOTE 2)

One of: ENV421Y1/ JPM400Y1/ PCL367H1/ PCL474Y1 (see NOTE 2)

At least 1.0 credit from: CHM310H1, EEB321H1, EEB365H1, EEB428H1, ENV441H1, ENV462H1, ESS313H1, JPM300H1, LMP301H1, PCL298H1, PCL386H1, PCL477H1, PCL483H1, PCL484H1, PCL490H1, PCL497H1, PCL498Y1 (see NOTE 4), PHY231H1 (see NOTE 3)

An Integrative, Inquiry-Based Activity Requirement must be satisfied.

The requirement for an integrative, inquiry-based and/or experiential activity must be met by completing at least one of the following: ENV421Y1, JPM400Y1, PCL297H1, PCL298H1, PCL367H1, PCL397Y0, PCL474Y1,

PCL497H1, PCL498Y1. Students who complete the Arts & Science Internship Program (ASIP) stream will also meet this requirement.

Notes:

1. PSL300H1 and PSL301H1 require MAT 100-level/ PHY 100-level courses.
2. PCL201H1, PCL302H1, and PCL367H1 are pre-requisites for students intending to take PCL474Y1. Students intending to take PCL474Y1 must obtain permission from the Undergraduate Student Advisor of the School of the Environment 3 months prior to the intended date of enrolment. Students must also consult with the Department of Pharmacology and Toxicology at least 3 months prior to the intended date of enrolment. **Students wishing to take ENV421Y1 are advised to take the course during third year, due to scheduling conflicts with fourth year requirements.**
3. Students taking PCL477H1 must take BCH210H1 prior. **Students taking only PCL367H1 must take 1.5 credits from program electives requirement list of courses to ensure 14.0 program credits. Students may choose to take both PCL367H1 and ENV421Y1/ JPM400Y1/ PCL474Y1 and would then need to take only 0.5 credits from the program electives requirement list of courses to ensure 14.0 program credits.**
4. Students may not use more than 2.0 credits towards their program from JPM400Y1/ PCL298H1/ PCL474Y1/ PCL497H1/ PCL498Y1.

Certificate

Certificate in Sustainability (U of T Sustainability Scholar) - ASCER1500

The Certificate in Sustainability is part of the U of T Sustainability Scholar initiative, and is designed to complement any Arts & Science degree or discipline. Participating students will develop a sustainability-lens based in systems-thinking that can be used to approach the rest of their academic program and career path. The Certificate requires students to take a foundational course (ENV222H1); three electives drawn from a curated list of 42 half courses from 19 different units across the Faculty of Arts & Science; and a choice of capstone courses. Elective courses draw connections between multiple dimensions of sustainability (environmental, social, political, ethical, cultural, and economic).

Enrolment Requirements:

This is an open enrolment Certificate. A student who has completed 4.0 credits may enrol in the Certificate.

Completion Requirements:

(2.5 credits)

Foundations Course (0.5 credit):

- ENV222H1

Elective Courses (1.5 credits):

1.5 credits, chosen from at least two of the four clusters below:

- Cluster 1 - Environment/ Ecology/ Climate: ENV221H1, ENV200H1, ESS205H1, EEB208H1, INS250H1, HIS218H1, INS240Y1, ENV322H1, GGR314H1
- Cluster 2 - Equity/ Ethics/ Culture: CRE271H1, WGS273H1, PHL273H1, ANT204H1, HPS200H1, CSE240H1, JIG322H1, ENV333H1, FOR302H1, TRN312H1, PHL373H1, ANT366H1
- Cluster 3 - Economics/ Development/Resources: CAS202H1, GGR223H1, ENV261H1/ ENV360H1, POL205H1, GGR334H1, FOR303H1, JGE331H1, POL384H1, ENV307H1, TRN350H1, ECO313H1, ENV341H1
- Cluster 4 - Food/ Health/ Wellbeing: ENV463H1, BIO220H1, NFS284H1, CSB202H1, MCS326H1, GGR329H1, INS355H1, WGS367H1, ENV341H1, CSE342H1

Note: One 0.5 credit course at the 300- or 400-level not listed in the above clusters may count towards the elective requirement through a nomination process. Students must submit a [nomination package](#) to the Undergraduate Associate Director of the School of the Environment including: (1) the relevant cluster; (2) the course code and description; (3) the course syllabus (for completed courses); (4) a brief rationale (500 words max) addressing why this course belongs to the relevant cluster, how it addresses multiple dimensions of sustainability (environmental, social, political, ethical, cultural, or economic), and how it satisfies a gap in the student's Certificate learning objectives. Nominations for completed courses must be made at least one semester before graduation. A nomination for a course the student has not yet taken must be submitted at least one semester in advance.

Capstone Course (0.5 credit):

- 0.5 credit from: ENV411H1, ENV421Y1, ENV461H1, ENV463H1, ENV465Y1

NOTE: the Certificate in Sustainability (ASCER1500) is open to students pursuing a degree in the Faculty of Arts & Science. Students pursuing a degree in the Daniels Faculty of Architecture, Landscape and Design should enrol in the Certificate in Sustainability of the Built Environment (AHCERSUSP).

Lab Materials Fee

Some courses in this department have a mandatory Lab Materials Fee to cover non-reusable materials. The fee for

each such course is given below in the course description, and will be included on the student's invoice on ACORN.

NOTE

Many ENV courses are limited in enrolment and require specific prerequisites (check the online Arts & Science Calendar or [Timetable](#) for course prerequisites). Preference is given to students meeting the ACORN deadlines.

School of the Environment Courses

ENV100H1 - Introduction to Environmental Studies

Hours: 24L

An investigation of the relationship between human beings and their natural and built environments. This interdisciplinary course will draw from the sciences, social sciences and the humanities to explore major social, cultural, economic, regulatory, ethical, ecological and technological aspects of environmental issues.

Breadth Requirements: Society and its Institutions (3)

ENV101H1 - Confronting the Climate Crisis

Hours: 24L

This course is a comprehensive, interdisciplinary introduction to the climate crisis, suitable for any undergraduate student at U of T. The course examines the climate crisis from scientific, social, economic, political, and cultural perspectives, from the physical science basis through to the choices we now face to stabilize the climate system. The course uses a mixture of lectures, hands-on activities, group projects, online discussion, and guest speakers to give students a deeper understanding of climate change as a complex, interconnected set of problems, while equipping them with a framework to evaluate the choices we face as a society, and to cultivate a culture of hope in the face of a challenging future.

Exclusion: ENV194H1

Breadth Requirements: Society and its Institutions (3)

ENV194H1 - Topics in Climate Change

Hours: 24S

In this class we will discuss the underlying science of the climate system and also explore how this information is communicated effectively. Restricted to first-year students. Not eligible for CR/NCR option.

ENV195H1 - The Sustainability Transition

Hours: 24S

Can you imagine a sustainable future? What would it look like? How can we get there? We are often bombarded by negative images about our future and the future of the planet. In this seminar class we will explore what a sustainable world might look like and ways that we can get there. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

ENV196H1 - Environment, Culture and Film

Hours: 36S

This first-year foundation course will introduce students to the scope and seriousness of some of current ecological concerns, as well as some core principles and concepts in the field of the intersection of environment and culture, through the lens of feature films. Through journal reflections, class discussions and guided critical thinking exercises, and a paper, students will be able to build confidence and enthusiasm for further study in environmental studies, within a small seminar setting. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

ENV197H1 - Idleness and the Environment: What Does Sustainable Work Mean?

Previous Course Number: ENV198H1
Hours: 24S

In a fast-paced, high-tech world—and one that must rapidly decarbonize to address the climate crisis—the relationship between labour and environment is rapidly changing. This course explores the intersection of work and the environment, considering how ideas about leisure and idleness might offer new pathways for a more sustainable future. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

ENV198H1 - Environment & Mental Wellness

Hours: 24S

This foundations course is an introduction to Environmental Psychology and related disciplines. We will examine the mutual relationship between the human psyche and the environment, with a focus on mental wellness. Topics will include: psycho-evolutionary environments, place attachment and identity, neurological toxins and environmental health, the modern period, cultural perceptions on nature-psyche, climate anxiety and ecological grief, nature connectedness and restorative environments. As a foundations course, students will develop key academic skills such as academic literacy, communication and application, interdisciplinary critical thinking, as well as creative problem solving. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

ENV199H1 - Debating & Understanding Current Environmental Issues

Previous Course Number: SII199H1 LEC0201
Hours: 2L

The course examines current environmental issues for which there is no easy answer or consensus position. For instance, to help solve climate change should we generate more electricity from nuclear power-plants,

which have no greenhouse gas emissions? Or instead, should we phase out nuclear plants because of possible accidents, costs and radioactive wastes? The seminar examines the scientific and political aspects of such issues and debates the pros and cons of each. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

ENV200H1 - Assessing Global Change: Science and the Environment

Hours: 24L/4T

The perspective which scientists bring to the understanding and resolution of environmental concerns having global implications: atmospheric systems and climate change, the biosphere and conservation of biodiversity.

This living things and their environment breadth course is intended to fulfill the environmental literacy requirement for students in the BA programs of the School of the Environment or the living things and their environment breadth course requirement for Commerce, Humanities and Social Science students

Exclusion: BIO120H1, EEB208H1

Breadth Requirements: Living Things and Their Environment (4)

ENV221H1 - Multidisciplinary Perspectives on Environment

Hours: 24L/4T

One of two foundation courses for the School's undergraduate program. Introduces students to ways in which different disciplines contribute to our understanding of environment. Instructors and guest lecturers are drawn from the sciences, social sciences and the humanities and will present subject matter, assumptions, conceptualizations and methodologies of their disciplines.

Exclusion: TRN140Y1, TRN141Y1

ENV222H1 - Pathways to Sustainability: An Interdisciplinary Approach

Hours: 24L/12T

ENV222H1 explores the concept and practice of sustainability by integrating scientific, technological, economic, political, psychological, historical, and ethical

perspectives. The course begins by analyzing the challenges posed by the ecological crisis, including its historical roots. It then goes on to explore and evaluate a variety of approaches, strategies, and actions—at a personal, local, national, and global scale—that could move us towards authentic sustainability.

Exclusion: TRN140Y1, TRN141Y1

Breadth Requirements: Society and its Institutions (3)

ENV223H1 - Fundamental Environmental Skills

Hours: 24L

The practical, interdisciplinary and controversial nature of environmental issues, as well as the uncertainty that surrounds measures to address them demand mastery of a particular range of skills by environmental students. This course teaches the fundamental research, analysis and presentation skills required for effective environmental work. This course is for students enrolled in the Environmental Studies Major program, or permission of the Undergraduate Associate Director.

Prerequisite: Completion of 4.0 credits

Exclusion: GGR271H1

ENV237H1 - Physics of the Changing Environment A

Hours: 24L/24P

The course will cover basic physics of environmental processes and of measurement techniques in the atmosphere, the ocean, lake-land-forest systems, and other biological systems. It will place its work in the context of climate change and other aspects of environmental change. This course is solely intended for students who have NOT completed a previous first year physics core course, who are in one of the following programs: Environmental Science Major or Minor, Environmental Geosciences Specialist or Earth and Environmental Systems Major.

Prerequisite: MAT135H1/ MAT136H1/ MAT137Y1/ MAT157Y1/ JMB170Y1, CHM136H1/ CHM138H1/ CHM135H1/ CHM139H1/ CHM151Y1

Exclusion: ENV238H1, PHY131H1/ PHY132H1/ PHY151H1/ PHY152H1

Recommended Preparation: Any high school physics

Breadth Requirements: The Physical and Mathematical Universes (5)

ENV238H1 - Physics of the Changing Environment B

Hours: 24L/24P

The course will cover basic physics of environmental processes and of measurement techniques in the atmosphere, the ocean, lake-land-forest systems, and other biological systems. It will place its work in the context of climate change and other aspects of environmental change. This course is solely intended for students who have completed a previous first year physics core course, who are in one of the following programs: Environmental Science Major or Minor, Environmental Geosciences Specialist or Earth and Environmental Systems Major.

Prerequisite: MAT135H1/ MAT136H1/ MAT137Y1/ MAT157Y1/ JMB170Y1, CHM136H1/ CHM138H1/ CHM135H1/ CHM139H1/ CHM151Y1, PHY131H1/ PHY132H1/ PHY151H1/ PHY152H1

Exclusion: ENV237H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ENV262H1 - The Science of Energy in the Environment

Hours: 24L/12T

Energy is a fundamental organizing principle of Nature. It has a central role in the origin and evolution of the universe, and is the basis of the ecosystem of the Earth and of technology and the world economy. This course will explore the science of energy in all its forms. (ENV262H1 is primarily intended as a Breadth Requirement course for students in the Humanities and Social Sciences.)

Exclusion: ENV346H1, (PHY131H1, PHY132H1, PHY151H1, PHY152H1 or equivalent, taken previously or concurrently)

Breadth Requirements: The Physical and Mathematical Universes (5)

ENV281H1 - Special Topics in Environment

Hours: 24L

Special topics course designed for students in School of the Environment programs. Content in any given year depends on instructor. See School of the Environment website for more details.

Prerequisite: Completion of 4.0 credits

Breadth Requirements: Society and its Institutions (3)

ENV282H1 - Special Topics in the Environment

Hours: 24L

Special topics course designed for students in School of the Environment programs. Content in any given year depends on instructor. See [School of the Environment website](#) for more details.

Prerequisite: Completion of 4.0 credits

Breadth Requirements: Thought, Belief and Behaviour (2)

ENV299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

ENV299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

ENV301H1 - Critically Thinking about Climate Solutions

Hours: 24L/12T

This course builds on what you have learned about the nature of the climate crisis ([ENV101H1](#)), science of global change ([ENV200H1](#)) and the sustainability transition ([ENV222H1](#)). It will provide students with a comprehensive framework for evaluating and comparing climate solutions. The course will begin with an assessment of the scale and urgency of the climate crisis as a basis for assessing solutions. Students will learn how to evaluate climate solutions from the point of view of feasibility, scale, timeframe, risk, equity, governance, likely co-benefits, and

climate justice. Using a systems thinking approach, students will use a mix of qualitative and quantitative reasoning to assess current and proposed climate solutions. The course will also address current controversies and ethical dilemmas in addressing climate change, including mitigation versus adaptation, incrementalism versus system change, decoupling versus degrowth, greenwashing, and the ethics of geoengineering.

Prerequisite: Completion of 9.0 credits, including [ENV101H1](#), [ENV200H1](#)/ [ENV237H1](#)/ [ENV238H1](#), [ENV222H1](#)

ENV307H1 - Urban Sustainability

Hours: 18L/18P

This course critically examines the concept of urban sustainability in theory and application. Case studies of ongoing urban sustainability programs in the developed and developing world help students assess the successes and failures of these programs. The course also examines the current state of research and implementation efforts toward urban sustainability. Toronto's urban sustainability and sustainable needs will be investigated through the use of Geographic Information Systems (GIS) during the course (previous experience with GIS is not required).

Prerequisite: Completion of 8.0 credits including [ENV221H1](#)/ [ENV222H1](#). Students who do not meet the prerequisites are encouraged to contact the Undergraduate Associate Director.

Recommended Preparation: An environmental studies half course.

Breadth Requirements: Society and its Institutions (3)

ENV316H1 - Laboratory and Field Methods in Environmental Science

Hours: 12T/36P

This course focuses on methods of sampling and analyzing natural air, water and solid Earth materials for physical, chemical and biological properties that are relevant to current environmental issues. It will integrate approaches from chemistry, physics, geology and biology, and cover techniques in field sampling, laboratory analyses and analyses of large environmental data sets. Basic concepts related to quality control will be emphasized throughout the course: sample collection and storage methods, calibration of field and lab instruments, analyses in complex matrices, errors (accuracy, precision), and detection limits. This course is for students enrolled in the Environmental Science Major program, or permission of the Undergraduate Associate Director. A fee

of \$26 will be charged for lab supplies, lab instrument charges and technical services.

Prerequisite: EEB240H1/ ENV234H1, one of CHM210H1 (recommended) or ENV237H1/ ENV238H1, one of STA220H1/ STA288H1/ EEB225H1/ GGR270H1

Exclusion: ESS425H1

Breadth Requirements: Living Things and Their Environment (4)

ENV320H1 - National Environmental Policy

Hours: 24L/12T

Examines ways in which governments develop and implement policy to protect the environment within their borders. Primarily Canada, plus comparisons with other countries. The focus is upon the politics of environmental policy making, which is understood by examining the interests and powers of the relevant state and non-state actors.

Prerequisite: Completion of 8.0 credits including ENV221H1/ ENV222H1. Students who do not meet the prerequisites are encouraged to contact the Undergraduate Associate Director.

Breadth Requirements: Society and its Institutions (3)

JGE321H1 - Multicultural Perspectives on Environmental Management

Hours: 24L

Diverse approaches to environmental issues in a variety of multicultural settings are introduced, compared and analyzed, using case studies. Perspectives on environmental management will be discussed as they emerge from contexts such as Latin America, Asia, or Africa.

Prerequisite: ENV221H1/ ENV222H1/ GGR222H1/ GGR223H1

Exclusion: ENV321Y1

Recommended Preparation: 8.0 credits

Breadth Requirements: Society and its Institutions (3)

ENV322H1 - International Environmental Policy

Hours: 24L/12T

Examines the ways in which states negotiate and implement international agreements addressing global

environmental issues, such as the United Nations Framework Convention on Climate Change. Focus is upon factors which determine the efficacy of multilateral environmental agreements and the prospects for stronger global environmental governance.

Prerequisite: Completion of 8.0 credits including ENV221H1/ ENV222H1. Students who do not meet the prerequisites are encouraged to contact the Undergraduate Associate Director.

Breadth Requirements: Society and its Institutions (3)

ENV323H1 - Ontario Environmental Policy

Hours: 24S

Introduces students to public policy and institutional foundations of public policy in Canada, with an emphasis on environmental policy in Ontario. Provides an insiders perspective on how environmental policy has been developed in Ontario.

Prerequisite: Completion of 8.0 credits including ENV221H1/ ENV222H1. Students who do not meet the prerequisites are encouraged to contact the Undergraduate Associate Director.

Breadth Requirements: Society and its Institutions (3)

ENV330H1 - Waste Not: Faith-Based Environmentalism

Hours: 24L

This course explores religious environmentalism, its proponents and opponents, and its core values within the Abrahamic faiths of Judaism, Christianity and Islam. Religious environmentalists have used teachings from sacred texts as exemplars of sustainability. Some, however, claim that these texts teach domination, anthropocentrism and hierarchical values. Looking at a range of worldviews, we focus on the topics of wastefulness, consumption, and simplicity. Readings about barriers, motivations, and values that inform environmental behaviour are complemented with field trips to places of worship where we will hear religious leaders speak about the environmental initiatives undertaken in their communities and see sacred spaces.

Prerequisite: Completion of 8.0 credits including ENV221H1/ ENV222H1. Students who do not meet the prerequisites are encouraged to contact the Undergraduate Associate Director.

Exclusion: ENV382H1 (Special Topics in Environment: Waste Not, Want Not: Stories of Wastefulness in Religion & Society), offered in Winter 2018, Fall 2018, and Winter 2020

Breadth Requirements: Thought, Belief and Behaviour (2)

JGE331H1 - Resource and Environmental Theory

Hours: 24L

Introduction to and critical evaluation of major ideas and conceptual traditions underpinning environmental and natural resource politics and regulation. Topics include: parks and protected areas, market-based environmental regulation, property rights and conservation, Malthusianism, and biodiversity conservation. Emphasis is placed on critical reading of primary texts.

Prerequisite: GGR100H1/ JEG100H1/ GGR107H1/ ENV221H1/ ENV222H1/ GGR222H1/ GGR223H1

Recommended Preparation: 8.0 credits

Breadth Requirements: Society and its Institutions (3)

ENV333H1 - Ecological Worldviews

Hours: 24L/10T

Approaches to environmental concerns are often marked by assumptions that reflect distinct worldviews positing particular understandings of the role of the human with respect to nature. This course explores sundry economic, political, scientific, religious, and moral worldviews pertaining to the environment, including environmental ethics, Gaia, ecofeminism, scientific cosmology, and indigenous perspectives.

Prerequisite: Completion of 8.0 credits including ENV221H1/ ENV222H1. Students who do not meet the prerequisites are encouraged to contact the Undergraduate Associate Director.

Breadth Requirements: Thought, Belief and Behaviour (2)

ENV335H1 - Environmental Design

Hours: 18L/18P

Environmental design, in the context of this course, refers to design strategies that account for the ability of supporting ecosystems to continue to meet human needs and those of other lifeforms without diminishing biological diversity or environmental quality. This course takes a hands-on approach to investigating several environmental design issues: climate-responsive design, energy consumption, health and comfort, natural lighting and ventilation, and water management. Students will build up a design of a net-zero carbon residential building through

several instructive design exercises during the semester, including hands-on measurement and calculation activities.

Prerequisite: Completion of 8.0 credits including ENV221H1/ ENV222H1. Students who do not meet the prerequisites are encouraged to contact the Undergraduate Associate Director.

Breadth Requirements: Society and its Institutions (3)

ENV336H1 - Ecology in Human-Dominated Environments

A two week course offered at a Southern Ontario field station during late summer. Introduction to impacts of humans on semi-natural and human-dominated environments of southern Ontario and over-view of the most commonly used assessment tools for states of ecosystems. These environments play important roles in terms of ecosystem services.

Prerequisite: first year biology and permission of the instructor

Breadth Requirements: Living Things and Their Environment (4)

ENV337H1 - Human Interactions with the Environment

Hours: 24L/12P

The impact of 7 billion people on the planet is enormous and challenges future generations. What are these impacts today and in future? What solutions and tools can avert societal collapse? Using an integrated and interdisciplinary systems approach, we explore problems and solutions to the earth's limits to growth.

Prerequisite: (Two of CHM210H1, EEB240H1/ ENV234H1, ENV237H1/ ENV238H1, ESS262H1) or (ENV221H1/ ENV222H1/ (EEB240H1/ ENV234H1) + BIO220H1 + BIO230H1/ BIO255H1). Students who do not have all of the required prerequisites are encouraged to contact the Undergraduate Associate Director to request a waiver.

ENV338H1 - Environmental Research Data and Decision-making

Hours: 24L/12T

Understanding the natural world and human perturbations to it requires data. All data has inherent biases and constraints. In this class we will explore the world of environmental data from the perspective of those

interested in affecting positive change. The class will use case studies and current research to explore topics such as: How do environmental scientists design studies or experiments to answer specific questions? How do we characterize the limitations of the data we have and work within these constraints to answer scientific questions and make informed and meaningful decisions?

Prerequisite: Completion of 8.0 credits including [ENV221H1](#)/ [ENV222H1](#) and [ENV223H1](#). Students who do not meet the prerequisites are encouraged to contact the Undergraduate Associate Director.

Corequisite: None

Exclusion: None

Recommended Preparation: [GGR274H1](#) or [EEB125H1](#) or [ENG286H1](#)

ENV341H1 - Environment and Health

Hours: 24L

Examination of the linkages between human health and environment using an interdisciplinary, planetary health lens. Addresses basic public health and toxicological principles. Case studies are examined to highlight the multifaceted ways health and environment are interconnected and to understand key factors modulating environmental exposures and health outcomes in various populations.

Prerequisite: [ENV221H1](#)/ [ENV222H1](#) or ([BIO230H1](#)/ [BIO255H1](#), and enrolment in the HMB Specialist in Health and Disease/HMB Specialist in Global Health), and completion of at least 8.0 credits of courses. Students who do not meet all of the prerequisites are encouraged to contact the Undergraduate Associate Director.

Breadth Requirements: Living Things and Their Environment (4)

ENV342H1 - Ecology of the Mind

Hours: 24L

“Ask not what is inside your head, but what your head is inside of.” – James Gibson. This course will explore how environmental settings shape our psyche: cognition, emotions, perceptions, behaviour, and wellbeing. It approaches the mind as embodied, socio-ecologically situated, and enacted. The course title is inspired by Gregory Bateson’s “ecology of mind” theory, which views the psyche as part of a relational network with the material world that, like biological ecosystems, will interact, adapt and evolve over time. Students will uncover how natural settings enhance sense of security, curiosity, connectedness and clarity, and how nature enhances systems thinking when we attend to its patterns of relationship. Students will understand and experience

nature-based systems thinking that inspires more relational, interconnected and process-oriented perception. The course will highlight the psychological losses associated with environmental degradation, and how the benefits of above can be enhanced through nature-based mindfulness and collective environmental engagement.

Prerequisite: One of: [ENV200H1](#); or [ENV221H1](#); or [TRN140Y1](#) and [TRN141Y1](#); or [BIO120H1](#), or [PSY100H1](#). Completion of 9.0 credits.

Breadth Requirements: Living Things and Their Environment (4)

ENV346H1 - Terrestrial Energy Systems

Hours: 36L/24T

Various earth systems for energy transformation, storage and transport are explored. Geological, hydrological, biological, cosmological and oceanographic energy systems are considered in the context of the Earth as a dynamic system, including the variation of solar energy received by the planet and the redistribution of this energy through various radiative, latent and sensible heat transfer mechanisms. It considers the energy redistribution role of large-scale atmospheric systems, of warm and cold ocean currents, the role of the polar regions, and the functioning of various hydrological systems. The contribution and influence of tectonic systems on the surface systems is briefly introduced, as well the important role of energy storage processes in physical and biological systems, including the accumulation of fossil fuel reserves.

Prerequisite: ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)/ [JMB170Y1](#); [BIO120H1](#)/ [CHM136H1](#)/ [CHM138H1](#)/ [CHM135H1](#)/ [CHM139H1](#)/ [CHM151Y1](#)/ [PHY131H1](#)/ [PHY132H1](#)/ [PHY151H1](#)/ [PHY152H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

ENV347H1 - The Power of Economic Ideas

Hours: 24L

This course examines the power of economic ideas in effecting environmental change. Topics include the relation of ecological economics to mainstream economics, as well as the role of financial incentives to move the environmental agenda forward.

Prerequisite: Completion of 8.0 credits including [ENV221H1](#)/ [ENV222H1](#). Students who do not meet the prerequisite are encouraged to contact the Undergraduate Associate Director.

Breadth Requirements: Society and its Institutions (3)

ENV350H1 - Energy Policy and Environment

Hours: 24L

The course addresses: (1) physical, technological and economic aspects of energy and electricity systems and their associated environmental impacts; (2) current international, Canadian and Ontario energy policy; (3) technological, economic and political factors influencing policy which could significantly reduce environmental impacts of energy use.

Prerequisite: Completion of 8.0 credits including ENV221H1/ ENV222H1. Students who do not meet the prerequisites are encouraged to contact the Undergraduate Associate Director.

Breadth Requirements: Society and its Institutions (3)

ENV360H1 - Is the Internet Green?

Previous Course Number: ENV261H1

Hours: 36L

The Internet has deeply penetrated most aspects of society and yet we are remarkably unreflective about its impacts and sustainability. This course challenges students to critically evaluate evidence regarding the environmental and social impacts of the Internet and how the Internet contributes (or not) to goals of environmental sustainability.

Prerequisite: Completion of 8.0 credits and ENV221H1 or ENV222H1. Students who do not meet the prerequisites are encouraged to contact the Undergraduate Associate Director.

Exclusion: ENV261H1

Breadth Requirements: Society and its Institutions (3)

ENV361H1 - Social Media and Environmentalism

Previous Course Number: ENV381H1

Hours: 24L/12T

This course examines the impacts of the internet on environmental thinking and policy-making. Topics include the use of social media as a tool for community-building and collaborative design, the sharing economy, online protest movements, mass surveillance and its implications, and the impact of misinformation on climate denialism.

Prerequisite: Completion of 6.0 credits

Exclusion: BIG102Y1, ENV381H1 if taken in 2015-16 or 2016-17

Recommended Preparation: ENV221H1, ENV222H1, and/or ENV261H1

Breadth Requirements: Society and its Institutions (3)

ENV362H1 - Energy & Environment: Transitions in History

Hours: 36L

An exploration of the interactions between humans and their environments in the Holocene, focusing on the contexts and consequences of changes in energy technologies. Includes consideration of changes in food production and processing, transport and power generation technologies from the adoption of agriculture to the twentieth century.

Prerequisite: Completion of 6.0 credits

Exclusion: HPS307H1, HIS300H1

Recommended Preparation: ENV221H1, ENV222H1, and/or ENV262H1

Breadth Requirements: Society and its Institutions (3)

ENV381H1 - Special Topics in Environment

Hours: 24L

Special topics course designed for students in School of the Environment programs. Topics vary based on the year offered. See the School of the Environment website for more details.

Prerequisite: Completion of 9.0 credits

Breadth Requirements: Society and its Institutions (3)

ENV382H1 - Special Topics in Environment

Hours: 24L

Special topics course designed for students in School of the Environment programs. Content in any given year depends on instructor. See School of the Environment website for more details.

Prerequisite: Completion of 9.0 credits

Breadth Requirements: Thought, Belief and Behaviour (2)

ENV395Y0 - Special Topics Field Course

Hours: 48S

This course examines fundamental concepts in ecology, evolution, biodiversity, geology and conservation biology through lectures and fieldwork in highland, tropical and island ecosystems in Ecuador. The complex relations between these environments and the people who depend on them will also be examined through analysis of the social, cultural, and economic transformations that have taken place in recent years. Suitable for all School of the Environment programs.

Recommended Preparation: ENV200H1 or equivalent; OR BIO120H1 or equivalent

Breadth Requirements: Living Things and Their Environment (4), Society and its Institutions (3)

ENV396H0 - Special Topics Field Course

This course examines Australia's environmental, wildlife and conservation issues from an interdisciplinary perspective. In consideration of these issues, Australia's unique flora and fauna are examined through lectures and fieldwork in the various climatically varied regions of Australia that are visited throughout the course.

Recommended Preparation: ENV200H1 or equivalent; or BIO120H1 or equivalent

ENV396Y0 - Special Topics Field Course

This course examines Australia's environmental, wildlife and conservation issues from an interdisciplinary perspective. In consideration of these issues, Australia's unique flora and fauna are examined through lectures and fieldwork in the various climatically varied regions of Australia that are visited throughout the course.

Recommended Preparation: ENV200H1 or equivalent; or BIO120H1 or equivalent

Breadth Requirements: Society and its Institutions (3), Living Things and Their Environment (4)

ENV397Y0 - Costa Rica: A Living Laboratory for Sustainability in Practice

Hours: 48L

Since abolishing its army in 1948, Costa Rica has prioritized healthcare, education, conservation, and sustainability. As a result, despite a modest per capita income, it has a high human development index and a relatively low ecological footprint (one quarter of Canada's). By some measures, it may also be the happiest country in the world.

During this course, students will learn how this came about while exploring concrete sustainability initiatives in areas related to education, environmental ethics, food production, forest conservation, and energy while also examining current challenges related to transportation, democracy, migration, and poverty. In so doing, students will gain insights into how more just, sustainable, and peaceful societies might be created in practice.

Recommended Preparation: A basic course in environmental studies such as ENV100H1, ENV221H1, ENV222H1, GGR223H1.

Breadth Requirements: Society and its Institutions (3)

Course Experience: Partnership-Based Experience

ENV398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

ENV398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

ENV399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

ENV399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

ENV411H1 - Sustainability Thinking

Hours: 24L/6T

This capstone course for the Certificate in Sustainability will build on the guiding sustainability principles and journal reflections that began in the foundational course, ENV222H1, and require students to reflect on the entirety of their sustainability education and experience.

Prerequisite: ENV222H1/ (TRN140Y1, TRN141Y1), 12.0 credits and enrolment in the Certificate in Sustainability.
Breadth Requirements: Society and its Institutions (3)

ENV421Y1 - Community Research for Social & Environmental Change

Previous Course Number: ENV421H1
Hours: 24L

This research course will provide students with an opportunity to engage in an action-focused, community-based group research project. This course is restricted to students enrolled in a program or certificate at the School of the Environment, or special permission of the Undergraduate Associate Director.

Prerequisite: Completion of 10.0 credits including ENV221H1 or ENV222H1. Students who do not meet the prerequisites are encouraged to contact the Undergraduate Associate Director.
Exclusion: ENV421H1
Breadth Requirements: Society and its Institutions (3)

ENV422H1 - Environmental Law

Hours: 24S

An introduction to environmental law for students in Environmental Studies; legal methods available to resolve environmental problems and the scope and limits of those methods; common law and statutory tools as well as environmental assessment legislation; the problem of standing to sue and the limits of litigation.

Prerequisite: Completion of 12.0 credits including ENV221H1/ ENV222H1. Students who do not meet all of the prerequisites are encouraged to contact the Undergraduate Associate Director.

Breadth Requirements: Society and its Institutions (3)

ENV430H1 - Community Research in Environment and Faith

Hours: 24L

Faith-based environmentalism is rarely part of sustainability discourse but could provide opportunities to engage people in new ways. This community engaged research course explores the richness and complexity of faith-based environmentalism. Time in the classroom will be spent building knowledge of the discipline through the discussion of theories and ideas, acquiring research skills, and unpacking field experiences. Time in the field will be spent engaging with the work of community partners and learning from them. The course is designed to bridge classroom knowledge with field experiences that allow for critical reflection and creative expression.

Prerequisite: 9.0 credits
Breadth Requirements: Society and its Institutions (3)
Course Experience: Partnership-Based Experience

ENV431H1 - Urban Sustainability & Ecological Technology

Hours: 24L

Ecological technology or green infrastructure encompasses those technologies that incorporate ecosystems to replace mechanical or non-living components in a machine or a piece of infrastructure. Complex systems theory and second-law thermodynamics are used as a template to explore concepts of urban sustainability, and the role of ecological technology in this context.

Prerequisite: ENV221H1/ ENV222H1, or permission of the Undergraduate Associate Director
Breadth Requirements: Living Things and Their Environment (4)

ENV432H1 - Urban Ecology

Hours: 24L/12S

The ecology of urban areas through consideration of the biological and physical environments, in particular how the human-constructed environment alters pre-existing biophysical conditions and interactions. Encompasses a

comparative perspective to study the development of these emerging ecosystems of increasing importance given global urbanization. Saturday field trip using local transit.

Prerequisite: BIO220H1 and at least one of EEB319H1/ EEB321H1/ EEB365H1

Breadth Requirements: Living Things and Their Environment (4)

ENV440H1 - Professional Experience Course

Hours: 10S

Regular academic seminars complement work placement of 70-80 hours at an organization involved with environmental work. The course enables students to gain practical experience of the needs and demands of professional environmental agencies. Students are given a choice of placements in a variety of sectors (such as government, NGOs, private sector).

Eligible students who wish to do a work placement in the upcoming summer or fall session must submit an online application form early in the preceding winter term, which can be found on the [School's undergraduate courses webpage](#) along with instructions and the application deadline.

Prerequisite: 10.0 credits, including 3.0 ENV credits in the student's environmental program completed before ENV440H1 is taken, and an application.

Breadth Requirements: Society and its Institutions (3)

ENV441H1 - Human Health Impacts of Natural System Alteration

Previous Course Number: ENV430H1

Hours: 24S

The course introduces students to a wide range of topics and issues about the impacts of change in natural systems (e.g., forests, ocean, climate) on human health. Through readings and discussion, students will explore how the potential health effects of environmental change vary across groups of people having different socio-economic characteristics. A number of case studies or topics will be examined to exemplify why certain populations may be especially vulnerable to different types of environmental changes. Issues related to equity and justice will also be discussed.

Prerequisite: ENV337H1/ ENV341H1

Recommended Preparation: Students who do not meet the prerequisite but have completed at least 12.0 credits including 0.5 credit from one of ENV200H1, ENV221H1,

ENV222H1, EEB240H1 or BIO220H1 are encouraged to contact the Undergraduate Office at ug.office.env@utoronto.ca. Medical or public health related courses will be useful but not required.

Breadth Requirements: Living Things and Their Environment (4)

ENV450H1 - Climate Change and Environment Solutions

Hours: 12T/24S

This is an interdisciplinary course in which students address current climate change problems while incorporating technical, environmental, economic, social, and political concerns.

Prerequisite: ENV222H1, ENV301H1/ ENV350H1

Breadth Requirements: Society and its Institutions (3)

ENV451H1 - Current Environmental Topics

Hours: 24S

This capstone course for the School's core programs will explore current environmental topics, with the goal of integrating the multi- and interdisciplinary strands of each student's learning to date. This course is for students enrolled in one of the School's BA programs, or permission of the Undergraduate Associate Director.

Prerequisite: Completion of 12.0 credits including ENV221H1/ ENV222H1

Breadth Requirements: Society and its Institutions (3)

ENV452H1 - Environmental Science Seminar

Hours: 36S

Scientists from within and external to the university share and discuss challenges, findings and opportunities. Specific topics (and speakers) vary from year to year but may draw from rehabilitation techniques, contaminants in our environment, environmental health, impacts on landscapes and communities, biodiversity, water, and modelling of environmental processes. This course is for students enrolled in the School of the Environment, Environmental Science Major BSc program, or permission of the Undergraduate Associate Director.

Prerequisite: Completion of 12 credits of courses, including ENV316H1/ ENV334H1/ ENV337H1

Breadth Requirements: Living Things and Their Environment (4)

JEH455H1 - Current Issues in Environment and Health

Hours: 16L/8S

This course introduces students to complex issues at the interface between environment and health where health is broadly defined. Each year a current and controversial case study is explored from scientific, medical, political and policy perspectives. The course takes students from the molecular to individual to population and societal levels.

Prerequisite: Completion of 14.0 credits including one of ENV341H1/ HMB302H1/ HMB312H1/ HMB314H1/ HMB322H1

Breadth Requirements: Living Things and Their Environment (4)

ENV461H1 - The U of T Campus as a Living Lab of Sustainability

Hours: 24L

Sustainability is a growing priority for universities all over the world. Many are developing strong operational sustainability goals and targets, and are giving increasing emphasis to teaching and research on sustainability issues. Yet few have committed at the executive level to integrating academic and operational sustainability in the context of treating their campus as a living laboratory of sustainable practice, research and teaching. Arguably, it is such living lab approaches that offer the largest potential for universities to play a significant role in the sustainability transition. This course will explore and apply the living lab concept, in the context of operational sustainability at the University of Toronto. We will begin by looking at the literature on university sustainability and the living lab concept. The bulk of the course will involve undertaking an applied research project on some aspect of campus sustainability, working in close partnership with operational staff at the University of Toronto. Students will develop the skills needed to work across disciplines and fields of study, and with non-academic partners. This course will put students to work on operational sustainability projects identified by the staff working in or with the Sustainability Office at the University of Toronto. Students will be organized into groups, each of which will be assigned one project, to be overseen by one or more U of T staff members. The bulk of the course will consist of regular meetings with the staff "clients", with instructors, and in small groups to undertake a group project. Each group will produce a mid-term and final report, and give a mid-term and final presentation. Each student will also

submit two 360 reviews of the group process. A crucial aspect of this course is the ability of students to work collaboratively together in a group environment, and to work effectively with a university staff person acting as a "client" for their work. Students will be provided with a Handbook outlining information on working in groups and the focus of the class in the second week will be on this issue. The first 360 peer review will serve to provide information on how well each group is working. Students are encouraged to discuss and resolve group process issues in the weekly group meetings, and in their regular meetings with the instructor and TA. The second 360 review will occur at the end of the term. The results of the two 360 reviews will be used, where appropriate, to adjust individual marks from the group averages.

Prerequisite: Completion of 10.0 credits including ENV221H1 or ENV222H1; or permission of the Undergraduate Associate Director

Recommended Preparation: 1.0 credit of environment-related coursework

Breadth Requirements: Society and its Institutions (3)

ENV462H1 - Energy and Environment: Economics, Politics, and Sustainability

Hours: 24L/12T

This interdisciplinary course examines key ideas in economics, domestic politics and geopolitics that are essential to understanding energy and environmental issues. The course will cover energy markets, how these have fundamentally shaped geopolitical relations and conflicts, and the increasing role that renewable energy and sustainability plays in setting policies.

Prerequisite: Completion of 10.0 credits

Recommended Preparation: ENV221H1/ ENV222H1

Breadth Requirements: Society and its Institutions (3)

ENV463H1 - Edible Campus

Hours: 36L

This course situates students and campuses within the context of broader movements for more ecologically rational and socially-just food systems. Topics include critical food systems pedagogy; the political economy of campus food systems; student food (in)security and health; campus food systems alternatives; campus food growing spaces; student/campus-based food movements; campus-community partnerships. The course is praxis-driven and will provide students with opportunities to engage in change-making on their campus, and beyond, through an action-focused project with a campus and/or community partner.

Prerequisite: [ENV221H1](#)/ [ENV222H1](#), completion of 10.0 credits

Recommended Preparation: [GGR339H1](#)

Breadth Requirements: Society and its Institutions (3)

Course Experience: Partnership-Based Experience

ENV464H1 - Communicating Climate Change

Hours: 24L

Climate change is an urgent yet complex problem to communicate. Curiously, many young activists are still using the same messages and images that have been around for decades (i.e., burning globes and apocalyptic scenarios). How did these methods of climate communication emerge? And to what impact in terms of both public perception and policy? In this course, students will examine the historical development of climate communication from its origins in the Cold War to present day. In addition to learning how climate change is discussed and visualized, students will work together to produce creative projects and develop improved communication methods.

Prerequisite: 9.0 credits

Breadth Requirements: Society and its Institutions (3)

Course Experience: Partnership-Based Experience

ENV465Y1 - Toronto Climate Summer School

Hours: 24L/12T/36P

This is an experiential and interdisciplinary course to learn relevant methods, themes, and topics to engage with climate change in and connected to the Greater Toronto Area (GTA). Guided by place-based pedagogy and environmental justice, experiential learning, and engagement across the physical to social sciences and humanities, this course seeks to equip students with questions, approaches, tools, and community in facing climate change. Students will also gain interdisciplinary research experience by working on faculty supervised projects.

Prerequisite: 9.0 credits

Breadth Requirements: Society and its Institutions (3), Living Things and Their Environment (4)

Course Experience: University-Based Experience

ENV481H1 - Special Topics in the Environment

Hours: 24S

Special topics course designed for advanced Specialist and Major students in School of the Environment programs. This course is for students enrolled in a School Environmental program, or permission of the Undergraduate Associate Director.

Prerequisite: Completion of 10.0 credits including ([ENV221H1](#), [ENV222H1](#))

JGE481H1 - Field Course in Environmental Geography

Previous Course Number: GGR481H1

Introduction to field studies in environmental geography. The course may include individual assignments and group work. Field trips are concentrated during a one-week period in late August or early September. Some preparation during the preceding summer may be required. Periodic course meetings and shorter field trips continue, along with course work, during the Fall Term. Each student is required to pay the costs of their transportation and accommodation (field trip costs: \$107). Students must submit an application directly to the Department in the spring (see the [Geography website](#) for details in March). Course may be limited by size. Not eligible for CR/NCR option.

Prerequisite: 9.0 credits and permission of the instructor

Exclusion: [GGR481H1](#)

Recommended Preparation: 3.0 credits in Geography and/or School of the Environment (BR=3)

Breadth Requirements: Society and its Institutions (3)

ENV482H1 - Special Topics in the Environment

Hours: 24S

Special topics course designed for advanced Specialist and Major students in School of the Environment programs. This course is restricted to students enrolled in a School Environmental program.

Prerequisite: Completion of 10.0 credits and ([ENV221H1](#), [ENV222H1](#)). Students who do not meet all of the prerequisites are encouraged to contact the Undergraduate Associate Director.

ENV491Y1 - Independent Studies Project

A research project or selected topic in an area of environment not otherwise available in the Faculty, meant to develop skills in independent study of interdisciplinary

topics. This course is restricted to students enrolled in a School of the Environment program. A written proposal co-signed by the student and supervisor must be submitted for approval by the Academic Associate Director of the School normally one month prior to commencing the course. Not eligible for CR/NCR option.

Prerequisite: Completion of 14.0 credits including ENV221H1/ ENV222H1

ENV492H1 - Independent Studies Project

A research project or selected topic in an area of environment not otherwise available in the Faculty, meant to develop skills in independent study of interdisciplinary topics. This course is restricted to students enrolled in a School of the Environment program. A written proposal co-signed by the student and supervisor must be submitted for approval by the Academic Associate Director of the School normally one month prior to commencing the course. Not eligible for CR/NCR option.

Prerequisite: Completion of 14.0 credits including ENV221H1/ ENV222H1

ENV493H1 - Independent Studies Project

A research project or selected topic in an area of environment not otherwise available in the Faculty, meant to develop skills in independent study of interdisciplinary topics. This course is restricted to students enrolled in a School of the Environment program. A written proposal co-signed by the student and supervisor must be submitted for approval by the Academic Associate Director of the School normally one month prior to commencing the course. Not eligible for CR/NCR option.

Prerequisite: Completion of 14.0 credits including ENV221H1/ ENV222H1

Estonian

Given by the Department of Slavic and East European Languages and Cultures

Introduction

Estonian is spoken by approximately one million people in present-day Estonia and some 72,000 in other parts of the world, including 18,000 in Canada. Closely related to Finnish and more distantly to Hungarian, Estonian is one of the few Finno-Ugric languages to exist surrounded by speakers of Indo-European languages.

An ancient people, the Estonians have preserved their language and culture despite centuries of domination by other nations. Not only is their heritage enormously rich in folk epics and songs, but Estonians enjoy a vigorous and diversified literary tradition which continues in Estonia proper and in their adoptive countries.

Estonian studies at the University of Toronto are concerned with the language, literature, and culture of Estonia. The language courses will be of interest to those wishing to improve their language skills, as well as to students of general linguistics who desire to acquire a knowledge of a non-Indo-European language.

Estonian Courses

EST100H1 - Elementary Estonian Language and Culture I

Previous Course Number: EST100Y1
Hours: 48P

Learn essential Estonian vocabulary, basic grammar and develop elementary conversational competence. Popular songs, poetry, and structured dialogue are among the various tools for achieving these objectives. Students will learn commonly used phrases and expressions used in everyday situations, from greeting people to making purchases in stores, and ordering meals in cafes. The course is designed for students with either no fluency or minimum fluency in Estonian.

Note Regarding Estonian Studies Minor

Enrolment in the Estonian Studies Minor was administratively suspended as of February 9, 2023 and students are no longer able to enrol in the program. Students presently enrolled in the Minor will be able to complete the program requirements as described in the program record, published in the 2022-23 Arts & Science Academic Calendar.

Beginning in March 2024, all students interested in pursuing studies in Estonian language, literature, and/or culture are encouraged to enrol in one of the new programs in Slavic and East European Languages and Cultures (Minor, Major, Specialist) or in Slavic and East European Literature in Translation (Minor). All of these programs include the Estonian area of study. For more information on this new suite of programs, please consult the Slavic and East European Languages and Cultures section of the academic calendar or contact the Department of Slavic and East European Languages and Cultures directly for advising.

Estonian Studies: see Slavic and East European Languages and Cultures

Regarding Estonian Courses

The Department reserves the right to assign students to courses appropriate to their level of competence in Estonian.

Exclusion: EST100Y1
Breadth Requirements: Creative and Cultural Representations (1)

EST101H1 - Elementary Estonian Language and Culture II

Previous Course Number: EST100Y1
Hours: 48L

This course expands the student's command of Estonian from the introductory level. The course will consist of themed sessions using language for travel in Estonia, savouring the language of Estonian cuisine, and the lyrics of popular, folk and classical Estonian music. These themed sessions will also enable students to better understand the proper inflections of nouns and tenses of verbs in both dialogue and written exercises. This course is open to students with minimum fluency in Estonian.

Prerequisite: EST100H1 / Permission of instructor

Exclusion: EST100Y1

Breadth Requirements: Creative and Cultural Representations (1)

EST200H1 - Intermediate Estonian Language and Culture I

Previous Course Number: EST200Y1

Hours: 48P

This course develops the student's language skills via an exploration of Estonian culture - including its music, literature, film and media. Each of these areas will be examined through readings, writing about one's impressions, and speaking about them to others in the class. The course consists of a combination of both classroom and web-based learning. The course is open to students with some fluency in Estonian.

Prerequisite: (EST100H1, EST101H1) / Permission of instructor

Exclusion: EST200Y1

Breadth Requirements: Creative and Cultural Representations (1)

EST201H1 - Intermediate Estonian Language and Culture II

Previous Course Number: EST200Y1

Hours: 48P

Through an exploration of Estonian culture both in Estonia and the diaspora, students will further develop their skills in speaking, reading and writing in Estonian. Students will learn about the main characteristics of Estonian society – its history, way of life, the Estonian economy and business environment, and Estonian current affairs. Students will discuss recent trends and challenges in the development of Estonian society. The course will combine both classroom and web-based learning. It is open to students with elementary fluency in Estonian, both spoken and written.

Prerequisite: (EST100H1, EST101H1) / Permission of instructor

Exclusion: EST200Y1

Breadth Requirements: Creative and Cultural Representations (1)

EST202H1 - Estonian Culture in the 21st Century

Hours: 24L

The course provides an introduction to Estonian contemporary culture: literature, theatre, music, arts and architecture, environmental issues, minorities, regional dialects, and, last but not least, politics. The course is taught in English, all reading materials are in English.

Breadth Requirements: Creative and Cultural Representations (1)

EST204H1 - Introduction to Estonian Culture

Hours: 24L

This course provides an introduction to Estonian culture: Folklore and folk traditions, visual arts and architecture, and contemporary popular culture and media.

Breadth Requirements: Creative and Cultural Representations (1)

EST205H1 - Estonian Cinema

Hours: 24L

This course provides an introduction to Estonian cinema: feature films, documentaries, and animation films.

Breadth Requirements: Creative and Cultural Representations (1)

EST206H1 - Environmental Humanities in Central and Eastern Europe

Hours: 24L

The course gives an overview of the ongoing research in European environmental humanities, with an emphasis on ecocriticism and environmental history in Central and Eastern Europe - organizations, institutions, publications, online resources, current topics, theories and methodologies. Taught in English, all materials in English.

Breadth Requirements: Society and its Institutions (3)

EST207H1 - Indigenous Cultures of Northern Eurasia

Hours: 24L

The course focuses on the history and current status of various indigenous groups that live in the vicinity of the

Polar Circle across Eurasia. Geography of indigenous peoples of Northern Eurasia. Livelihood and environmental conflicts. Colonial gaze, mechanisms of repression and deprivation, and indigenous resistance. Minority language politics. Indigenous songs and stories. Current situation and awareness-building. Taught in English, all materials in English.

Breadth Requirements: Society and its Institutions (3)

EST300H1 - Estonian Language through Contemporary Media

Hours: 36P

Advanced Estonian language course focusing on media and communication. We will read and discuss the main national news channels - Aktuaalne Kaamera, Eesti Päevaleht, Vikerraadio Uudis +, as well as read the Estonian cultural weekly Sirp and observe the monthly newspaper Mürileht to get a grip of Estonian youth culture. Public speeches by the Estonian President, as well as scholars and scientists will be discussed.

Prerequisite: EST201H1 or permission of instructor.

Exclusion: EST300Y1

Breadth Requirements: Creative and Cultural Representations (1)

EST300Y1 - Advanced Estonian

Hours: 72P

Advanced grammar and stylistics through study of a variety of texts; problems of composition; translation; oral and written practice. (Offered in alternate years)

Prerequisite: EST200Y1 or permission of instructor

Breadth Requirements: Creative and Cultural Representations (1)

EST420Y1 - Independent Study

A year-long reading and research project of significant depth in a major topic in Estonian language, literature or culture approved and supervised by an instructor. Not eligible for CR/NCR option.

Prerequisite: EST300Y1/ EST400Y1; permission of instructor

EST421H1 - Independent Study

A semester-long reading and research project of significant depth in a major topic in Estonian language, literature or culture approved and supervised by an instructor. Not eligible for CR/NCR option.

Prerequisite: Permission of instructor

Centre for Ethics

Introduction

The Centre for Ethics at the University of Toronto fosters research, teaching and public discussion of the moral dimensions of contemporary individual, social and political

Centre for Ethics Courses

ETH201H1 - Contemporary Moral Problems

Hours: 24L

ETH201 is an introductory course in ethics. How should we live? Which course of action is the right one? When and why should we blame ourselves and/or others? We all have and exercise moral opinions; this course is about justifying them. The course begins with some critical reasoning skills, and then explores philosophical strategies for justifying moral beliefs. We will then examine some specific issues of moral and political significance before concluding with psychological mechanisms behind moral attitudes and behaviour.

Breadth Requirements: Thought, Belief and Behaviour (2)

ETH210H1 - Rationality and Action

Hours: 36L

An introductory survey of attempts that have been made to develop a formal model of practical rationality, with particular emphasis on the way moral considerations enter into those deliberations. Topics may include: utility-maximization theory, introductory game theory, consequentialism, and deontic reasoning, as well as the limitations of rationality.

Breadth Requirements: Thought, Belief and Behaviour (2)

ETH220H1 - Moral Psychology

Hours: 36L

life. We are committed to the proposition that universities have a distinctive capacity and responsibility to shed light on questions of the moral life, as well as to educate students for reflective citizenship. Fulfilling this responsibility requires that we promote and engage in dialogue about the theory and practice of ethics across disciplinary, cultural, religious and social divides. For information or to make an appointment for consultation contact the Assistant to the Director, 416-978-6288 or email: ethics@utoronto.ca.

A study of issues that arise at the intersection of psychology and moral philosophy. Why do people act morally? What role do reason and emotion play? Can we know what is right, yet not be motivated to do it? What role can science play in advancing our understanding of morality?

Breadth Requirements: Thought, Belief and Behaviour (2)

ETH230H1 - Morality in Cross-Cultural Perspective

Hours: 24L

Is morality universal, or does it vary by time and place? This course will examine cultural differences in moral codes from both empirical and philosophical perspectives.

Breadth Requirements: Thought, Belief and Behaviour (2)

ETH350H1 - Topics in Value Theory

Hours: 24L

Selected topics in value theory, broadly construed (ethics, political theory, law). Consult the Centre for Ethics website for offering information.

Breadth Requirements: Thought, Belief and Behaviour (2)

ETH401H1 - Seminar in Ethics

Hours: 16L/16S

The seminar will expose advanced undergraduates to cutting edge research in ethics. It meets bi-weekly over the entire academic year. Participants will attend research

presentations at the Centre for Ethics (topics have included bioethics, indigenous rights, equality and education, free speech, and workplace democracy). They will also meet individually with the instructor to plan an independent research project related to the theme of the course. In the winter term, students will present their research and discuss it with the other students in the seminar. (Note that this is an "H1Y" course -- a half-credit course taught throughout both Fall and Winter terms.)

Prerequisite: One of PHL365H1, PHL375H1, PHL271H1, POL200Y1 or an equivalent, POL330Y1 or an equivalent. Preference for enrolment will be given to students of the Department of Philosophy, the Department of Political Science, and Trinity College's program in Ethics, Society, and Law.

Breadth Requirements: Thought, Belief and Behaviour
(2)

European Affairs

Introduction

The European Affairs Program is designed to develop an interdisciplinary expertise on modern Europe, combining rigorous language training with in-depth knowledge of Europe's history, politics, and culture. For students who desire the linguistic competence, the cultural comprehension, and the specialized knowledge necessary to operate effectively in the "new" Europe, the major program provides undergraduate students with the opportunity to focus on Europe through a wide variety of courses and disciplines with a focus on economics, history, language and politics. A major in European Affairs offers preparation either for further specialized or professional study at the graduate level or for work either in Europe itself or within a Canadian-based organization/business dealing with Europe.

Language competence is at the centre of the European Affairs Program. Students majoring in European Affairs are expected to acquire, in the course of their Program, a working fluency in one or more of the following designated languages: Croatian, Czech, Estonian, Finnish, French, German, Hungarian, Italian, Macedonian, Modern Greek, Polish, Portuguese, Russian, Serbian, Slovak, Spanish, or Ukrainian. European Affairs majors may want to consider working toward language citation. To ensure that graduates in European Affairs have the historical understanding and specialized knowledge, as well as linguistic competence, necessary to comprehend contemporary Europe, a balanced syllabus is presented: core courses on the political evolution of Europe and on the economics and politics of European integration are complemented by choices from courses offered by the twelve academic departments participating in the Program. Students who choose to minor in European Affairs will acquire in-depth knowledge of modern Europe.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The European Affairs programs impacted by this policy: ASMAJ1626 and ASMIN1626

European Affairs Programs

European Affairs Major (Arts Program) - ASMAJ1626

Visit the European Affairs Program website for updated information about requirements, course offerings, and events: <https://munkschool.utoronto.ca/ceres/european-affairs-undergraduate-programs> or consult Professor Robert Austin, Undergraduate Coordinator, Room 126N, Munk School of Global Affairs (416-946-8942, robert.austin@utoronto.ca) for general program requirements.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

For students with no prior language experience:

- One Y or two H courses of the following (1.0 credit in a single language) with a final grade of 65% in each course: EST100H1 and EST101H1, FSL100H1 and FSL102H1, FSL121Y1, GER100Y1, HUN100Y1, ITA100Y1, MGR100H1 and MGR101H1, PRT100Y1, SLA100H1 and SLA101H1, SLA105Y1, SLA106H1 and SLA116H1, SLA107Y1, SLA108Y1, SLA109Y1, SPA100Y1

For students who are exempted from a first-year language course (i.e. those with some prior language skills):

- One Y or two H courses of the following (1.0 credit in a single language) with a final grade of 65% in each course: EST200H1 and EST201H1, FIN200H1 and FIN210H1, FSL221Y1, GER200Y1, GER300Y1, GER370H1 and GER372H1, HUN200Y1, ITA250Y1, MGR245Y1, PRT220Y1, SLA204Y1, SLA206H1 and SLA207H1, SLA257H1 and SLA277H1, SLA208Y1, SLA220Y1, SPA220Y1

Completion Requirements:

(7.0 credits, including at least 2.0 credits at the 300+ level, 0.5 of which must be at the 400-level.)

The distribution of the 7.0 credits is as follows:

- A two-year progressive sequence of courses in a single language totaling 2.0 credits. Specific language choices are listed below.
- An additional 1.0 credit in the single language already chosen, or 1.0 credit in **non-language** courses related to your chosen language of study. Variations on this can be discussed with the Program Coordinator.
- 2.0 credits in the required core courses: 1.0 credit offered by the Department of History (EUR200Y1) and 1.0 credit from POL219H1, POL324H1, POL358H1, POL359Y1, POL359H1, POL387H1, or any POL course with European content approved by the Program Coordinator.
- EUR498H1 - Special Topics in European Affairs: European Union, worth 0.5 credit.
- The remaining 1.5 credits in elective courses chosen from a list of eligible electives or any course with European content approved by the Program Coordinator.

Advising Notes:

- Students are expected to consult with the Program Coordinator for assistance with and advice on course selection.
- After consultation with the Program Coordinator, exceptions may be made in certain cases regarding the sequence of language courses based on prior and documented exposure to the language in question.
- Some of the courses listed below may have prerequisites; some may be offered in alternate years. Consult the Program Coordinator for up-to-date information.

First Year:

1.0 credit from one the following languages:

- Estonian: EST100H1 and EST101H1
- Finnish: FIN100H1 and FIN110H1
- French: (FSL100H1 and FSL102H1)/ FSL121Y1
- German: GER100Y1
- Hungarian: HUN100Y1
- Italian: ITA100Y1
- Modern Greek: MGR100H1 and MGR101H1
- Portuguese: PRT100Y1
- Russian: SLA100H1 and SLA101H1
- Czech: SLA105Y1
- Polish: SLA106Y1/ (SLA106H1 and SLA116H1)
- Bosnian, Croatian, and Serbian: SLA107Y1
- Ukrainian: SLA108Y1
- Macedonian: SLA109Y1
- Spanish: SPA100Y1

Second Year:

1. EUR200Y1

2. 1.0 credit from one of the following languages:

- Estonian: EST200H1 and EST201H1
- Finnish: FIN200H1 and FIN210H1
- French: FSL221Y1
- German: GER200Y1/ GER300Y1/ (GER370H1 and GER372H1)
- Hungarian: HUN200Y1
- Italian: ITA250Y1
- Modern Greek: MGR245Y1
- Portuguese: PRT220Y1
- Czech: SLA204Y1
- Polish: SLA206H1 and SLA207H1
- Bosnian, Croatian, and Serbian: SLA257H1 and SLA277H1
- Ukrainian: SLA208Y1
- Macedonian: SLA209H1
- Russian: SLA220Y1
- Spanish: SPA220Y1

Third Year:

1. 1.0 credit from POL219H1, POL324H1, POL358H1, POL359Y1, POL359H1, POL387H1, or any POL course with European content approved by the Program Coordinator.

2. 1.0 credit from one of the following languages, or 1.0 credit in **non-language** courses related to your chosen language of study, selected in consultation with the Program Coordinator:

- Estonian: EST300Y1
- Finnish: FIN300H1 and FIN340H1
- French: FSL321Y1/ FSL421Y1/ (FSL442H1 and FSL443H1)
- German: GER300Y1/ (GER370H1 and GER372H1)/ GER400H1
- Hungarian: HUN310Y1
- Italian: ITA350Y1
- Modern Greek: MGR300H1 and MGR301H1
- Portuguese: PRT320Y1/ PRT322H1/ PRT364H1/ PRT420H1
- Czech: 1.0 credit can be fulfilled through an independent study or another course approved in joint consultation with CERES and Slavic undergraduate coordinators. Please consult with CERES and Slavic departments to get approval.
- Polish: SLA306H1 and SLA336H1
- Bosnian, Croatian, and Serbian: SLA337H1, and additional 0.5 credit can be fulfilled through an independent study or another course approved in joint consultation with CERES and Slavic

undergraduate coordinators. Please consult with CERES and Slavic departments to get approval.

- Ukrainian: [SLA308Y1](#)
- Russian: [SLA320Y1/ SLA321H1](#)
- Spanish: [SPA320Y1/ SPA323H1/ \(SPA420H1 and SPA421H1\)](#)

Fourth Year:

1. [EUR498H1](#)

2. Remaining courses to be selected from the list of eligible electives below. The most up-to date list of electives is on the program website. Students may also petition the Program Coordinator to take other courses in the calendar as electives, provided they have substantial European and/or Eurasian content.

Current Eligible Electives (for approval on courses outside the list or for transfer credits, please consult the Program Coordinator):

[ANT446H1](#); [ECO230Y1](#); [ECO301Y1](#); [ECO303Y1](#); [ECO342Y1](#); [ENG329H1](#); [ENG340H1](#); [ENG341H1](#); [EST400Y1](#); [EUR300H1](#); [FCS195H1](#); [FCS297H1](#); [FCS310Y1](#); [FCS331H1](#); [FCS395H1](#); [FIN230H1](#); [FIN235H1](#); [FIN240H1](#); [FIN250H1](#); [FIN260H1](#); [FIN310H1](#); [FIN340H1](#); [FIN350H1](#); [FIN415H1](#); [FRE320H1](#); [FRE324H1](#); [FRE326H1](#); [GGR339H1](#); [GGR344H1](#); [GGR361H1](#); [GER150H1](#); [GER204H1](#); [GER205H1](#); [GER232H1](#); [GER150H1](#); [GER261H1](#); [GER321H1](#); [GER322H1](#); [GER323H1](#); [GER326H1](#); [GER336H1](#); [GER350H1](#); [GER362H1](#); [GER410H1](#); [GER421H1](#); [GER425H1](#); [HIS208Y1](#); [HIS245Y1](#); [HIS251Y1](#); [HIS302H1](#); [HIS309H1](#); [HIS317H1](#); [HIS325H1](#); [HIS330H1](#); [HIS331H1](#); [HIS334Y1](#); [HIS335H1](#); [HIS337Y1](#); [HIS338H1](#); [HIS339Y1](#); [HIS344Y1](#); [HIS349H1](#); [HIS351Y1](#); [HIS353Y1](#); [HIS354Y1](#); [HIS355H1](#); [HIS361H1](#); [HIS364H1](#); [HIS371H1](#); [HIS388H1](#); [HIS401H1](#); [HIS407H1](#); [HIS414H1](#); [HIS415H1](#); [HIS416H1](#); [HIS418H1](#); [HIS421Y1](#); [HIS422H1](#); [HIS431H1](#); [HIS433H1](#); [HIS439H1](#); [HIS442H1](#); [HIS445H1](#); [HIS449Y1](#); [HIS451H1](#); [HIS453H1](#); [HIS455H1](#); [HIS458Y1](#); [HIS459H1](#); [HIS460H1](#); [HIS461H1](#); [HIS477H1](#); [HIS488H1](#); [HIS490H1](#); [HUN335H1](#); [HUN345H1](#); [HUN355H1](#); [HUN356H1](#); [INI381H1](#); [INI382H1](#); [ITA210Y1](#); [ITA240Y1](#); [ITA245Y1](#); [ITA301H1](#); [ITA310H1](#); [ITA326H1](#); [ITA340H1](#); [ITA341H1](#); [ITA346H1](#); [ITA347H1](#); [ITA381H1](#); [ITA405H1](#); [ITA410H1](#); [ITA415H1](#); [ITA421H1](#); [ITA441H1](#); [ITA455H1](#); [ITA491H1](#); [ITA492H1](#); [JHP304Y1](#); [JHP435Y1](#); [JHP454Y1](#); [JPD439Y1](#); [JPP343Y1](#); [MUN200H1](#); [PHL210Y1](#); [PHL217H1](#); [PHL265H1](#); [PHL310H1](#); [PHL311H1](#); [PHL312H1](#); [PHL315H1](#); [PHL316H1](#); [PHL317H1](#); [PHL320H1](#); [PHL321H1](#); [PHL322H1](#); [PHL326H1](#); [PHL338H1](#); [PHL365H1](#); [PHL388H1](#); [POL207Y1](#); [POL317Y1](#); [POL320Y1](#); [POL321H1](#); [POL324Y1](#); [POL332H1](#); [POL344H1](#); [POL354H1](#); [POL359Y1](#);

European Affairs Minor (Arts Program) - ASMIN1626

Visit the European Affairs Program website for updated information about requirements, course offerings, and events: <https://munkschool.utoronto.ca/ceres/european-affairs-undergraduate-programs>

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- 1.0 credit in HIS or POL courses at the 100-level with a final grade of 70%

Completion Requirements:

(4.0 credits, including at least 1.0 credit at the 300- or 400-level)

1. [EUR200Y1](#)
2. 1.0 credit from [POL219H1](#), [POL324H1](#), [POL358H1](#), [POL359Y1](#), [POL359H1](#), [POL387H1](#), or any POL course with European content approved by the Program Coordinator.
3. 2.0 credits in eligible elective courses listed in the European Affairs Major

European Affairs Courses

MGR100H1 - Introductory Modern Greek

Hours: 24L

This course is designed for absolute beginners in the Modern Greek language. The overall goal is to facilitate understanding and use of familiar everyday expressions and phrases aimed at the satisfaction of basic communicative needs. Students will familiarize themselves with the Modern Greek alphabet, pronunciation and grammatical rules. No previous knowledge of Modern Greek required.

Exclusion: Students who have completed High School in Greece or a Grade 12 Modern Greek language credit.

Breadth Requirements: Creative and Cultural Representations (1)

MGR101H1 - Elementary Modern Greek

Hours: 24L

This course builds on MGR100H1 and aims to develop competence in the Modern Greek language at the basic level. Students will attain elementary proficiency in the spoken and written language by familiarizing themselves with a variety of grammatical and syntax structures while continuing to enrich their vocabulary. Emphasis will be placed on reading and conversational skills while students are expected to write short descriptive paragraphs.

Prerequisite: MGR100H1

Exclusion: Students who have completed High School in Greece or a Grade 12 Modern Greek language credit.

Breadth Requirements: Creative and Cultural Representations (1)

MUN120H1 - Revolutions

Hours: 24L/8T

This course transcends time and place to delve into the overarching dynamics of revolution. This exploration of revolutions goes beyond simple chronology to uncover common threads that unite these transformative events. From the spirit that ignited the English Revolution to the fervor of the American Revolution, the course navigates through the social and political forces that reshaped societies. Students will dissect the emergence of radical change, tracing its evolution from the French Revolution to the Revolutions of 1848 and the birth of modern political ideologies. The course then navigates through the 20th century, from the Russian and Chinese Revolutions to the

Cuban Revolution and the intricate web of Latin American revolutionary movements. Comparative analysis delves into the universal and unique aspects of these revolutions, offering students an understanding of the power and influence of these transformative moments.

Breadth Requirements: Thought, Belief and Behaviour (2)

EUR200Y1 - Europe: Nation-State to Supranational Union

Hours: 48L/24T

An analysis of the development of European political regimes from 1789 until the 2004 and 2007 enlargements of the European Union to include the countries of the former Soviet bloc. This course identifies the decisive forces and factors affecting the operation of constitutions and institutions within the countries which came to form the European Union: nationalism, multi-nationalism, internationalism and supranationalism.

Exclusion: HIS241H1/ HIS242H1

Recommended Preparation: HIS103Y1/ HIS109Y1

Breadth Requirements: Society and its Institutions (3)

MGR245Y1 - Intermediate Modern Greek

Hours: 78S

A course designed for students with some command of the language: vocabulary building; study of grammar and syntax; compositional skills leading to the study of a prose literary work.

Prerequisite: First year Greek or equivalent; permission of instructor that includes language placement test evaluation

Breadth Requirements: Creative and Cultural Representations (1)

EUR299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

EUR299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> . Not eligible for CR/NCR option.

MGR300H1 - Advanced Modern Greek I

Hours: 24L

This course builds on the Intermediate level background knowledge to prepare students as independent users of the Modern Greek language. In order to attain conversational fluency and communicate effectively and accurately with native Greek language speakers, students will practice on reading and interpreting magazine and newspaper articles on various topics as well as applying more complex grammatical and syntax rules to write essays on assigned subjects.

Prerequisite: Completion of [MGR245Y1](#) or permission of instructor

Breadth Requirements: Creative and Cultural Representations (1)

EUR300H1 - Special Topics in European Affairs

Hours: 24L

This course offers students the opportunity to explore key issues in European Affairs. Topics vary from year to year, depending on the instructor. See Department website for current offerings. Course may not be repeated under the same subtitle.

Prerequisite: [EUR200Y1](#) and 4.0 additional credits

Breadth Requirements: Society and its Institutions (3)

MGR301H1 - Advanced Modern Greek II

Hours: 24L

The aim of this course is to facilitate fluency both in spoken and written Modern Greek. Proficiency at this level will be attained through familiarization with various texts and genres including a Modern Greek literature anthology and selected academic articles. Emphasis will be placed on writing which will lead to the production of a short research paper in Modern Greek.

Prerequisite: Completion of [MGR300H1](#) or permission of instructor

Breadth Requirements: Creative and Cultural Representations (1)

EUR301H1 - Modernity and Its Discontents

Hours: 24L

This European intellectual history course introduces students to the temporal rupture called modernity—beginning with what Max Weber calls “disenchantment” and moving through the death of God—and ultimately the resignation from attempts to find a viable replacement for God. Topics include Marxism-Leninism, psychoanalysis, expressionism, structuralism, phenomenology, existentialism, anti-politics, and deconstruction. Authors include Nietzsche, Lenin, Kafka, Freud, Husserl, de Beauvoir, Heidegger, Arendt, Adorno, Sartre, Girard, Foucault, Derrida and Havel.

Prerequisite: 1.0 HIS or POL credit at the 100-level. Students who do not meet the requirement are encouraged to contact the department.

Recommended Preparation: A 100-level European history course; a 100-level MUN course.

Breadth Requirements: Thought, Belief and Behaviour (2)

EUR398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> . Not eligible for CR/NCR option.

EUR398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

EUR399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>

-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

EUR399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

EUR400H1 - Selected Topics in European Affairs

Hours: 24L

This course offers upper year students the opportunity for an in-depth examination of various themes in European Affairs. Topics vary from year to year, depending on the instructor. Course may not be repeated under the same subtitle. May include an International Course Module or visiting Professor.

Recommended Preparation: EUR300H1
Breadth Requirements: Society and its Institutions (3)

JRA401H1 - Topics in Comparative Politics V

Hours: 24S

Selected issues in comparative politics. Content and instructor vary from year to year.

(Given by the Department of Political Science and the Centre for European and Eurasian Studies)

Prerequisite: 2.0 credits in POL/ JPA/ JPF/ JPI/ JPR/ JPS/ JRA courses
Breadth Requirements: Society and its Institutions (3)

EUR401H1 - Selected Topics in European Affairs

Hours: 24L

This course offers upper year students the opportunity for an in-depth examination of various themes in European Affairs. Topics vary from year to year, depending on the instructor. Course may not be repeated under the same

subtitle. May include an International Course Module or visiting Professor.

Recommended Preparation: EUR300H1
Breadth Requirements: Society and its Institutions (3)

JRA402H1 - Topics in Comparative Politics VI

Hours: 24S

Selected issues in comparative politics. Content and instructor vary from year to year.

(Given by the Department of Political Science and the Centre for European and Eurasian Studies)

Prerequisite: 2.0 credits in POL/ JPA/ JPF/ JPI/ JPR/ JPS/ JRA courses
Breadth Requirements: Society and its Institutions (3)

EUR495H1 - Independent Studies

Hours: 2P

An in-depth of an issue of relevance to the European Union. Content depends on the instructor. Not eligible for CR/NCR option.

Prerequisite: Open only to students enrolled in the European Studies Major Program. Third and Fourth year students only.

Recommended Preparation: Varies year to year.

EUR498H1 - Special Topics in European Affairs: European Union

Hours: 24L

What is the European Union? Which are its core institutions and how do they work? What is the scope of its directives and programs, and how do they fit in with the member-states' policies? What is the role of the EU as an international actor? This course on *Special Topics in European Affairs* aims at answering all these questions. The course will start with an introduction to integration in Europe, the development of the EU, and some theories and approaches to its study. It will then review the main political, economic, and judiciary institutions in the EU. Last, it will examine some important policy areas and challenges at the European level, including migration and asylum, social cohesion, counterterrorist initiatives, scenarios after Brexit, relations between the EU and its neighbours, and foreign policy. Special care will be given to explaining the political interaction between the EU

institutions and the member-states, on the one hand, and the EU's Directives and policy frameworks and the members' policies, on the other hand.

Prerequisite: Completion of 12.0 credits including EUR200Y1 and one of POL207Y1/ POL359Y1/ POL359H1

Breadth Requirements: Society and its Institutions (3)

Faculty of Arts & Science Programs (299/398/399)

Research Opportunities Program: 299H1/ 299Y1/ 399H1/ 399Y1 Courses

Director: Randy Boyagoda, Vice-Dean, Undergraduate
Contact: Office of Experiential Learning and Outreach
Support (rop.artsci@utoronto.ca)

The Research Opportunities Program (ROP) provides an opportunity for Arts & Science (St. George) degree students in their second and third year to earn course credit by participating in a faculty member's research project. Each 299H1/ 299Y1/ 399H1/ 399Y1 course has a program-specific designator, such as ANT, CLA, CSB, VIC, etc. Not all departments or programs will necessarily participate in the ROP each year.

In order to be eligible for the program, students must have completed at least 4.0 but not more than 13.5 credits by the end of the term in which they applied for ROP. Students can only participate in one ROP per application cycle and can participate in a maximum of two ROP courses during their undergraduate studies. Students will be placed into a 299 course for their first ROP and a 399 course for their second ROP. Students may not participate in two ROP courses with the same professor. Students apply to ROP projects and are informed in mid-April whether they have been accepted for Summer ROP, and mid-May if they have been accepted for Fall, Fall/Winter, and Winter ROP. Successful applicants are registered by the Office of Experiential Learning & Outreach Support. Regular tuition fees apply.

Assessment and grading methods are determined by individual faculty members and may differ between projects. Students are typically expected to present a poster of their work at the Bi-annual Arts & Science Research Fair.

Details about ROP projects, application deadlines, eligibility, and how to apply are posted on the [Faculty of Arts & Science website](#).

Research Excursions Program: 398H0/ 398Y0 Courses

Director: Randy Boyagoda, Vice-Dean, Undergraduate
Contact: Office of Experiential Learning and Outreach
Support (experiential.artsci@utoronto.ca)

The 398 Research Excursions Program (REP) provides an opportunity for Arts & Science (St. George) degree students in their third year (i.e., students who have completed at least 9.0 but not more than 16.0 credits by the end of the Winter term preceding the REP) to participate in an off-campus practical or experiential research activity, under the supervision of a faculty member. The practical, experiential component can take the form of research/learning in archives, laboratories, libraries, or in a field camp, etc.— but not in a classroom at another university (that is covered by the Faculty's summer abroad and exchange programs). REPs may take place in domestic or international locations. The projects run within the May-August period, when both Faculty and students can make the time commitments necessary. The Faculty of Arts & Science covers travel and living expenses for students. Regular tuition fees apply.

Each 398H0/ 398Y0 has a program-specific designator, such as ANT, CLA, CSB, VIC, etc., and would be eligible to count towards program completion if the program sponsor (Chair or Director) so chooses. A limited number of 398H0/ 398Y0 courses are available each year. Faculty supervisors propose the projects and choose students from those who apply. Students are typically expected to present a poster of their work at the Bi-annual Arts & Science Research Fair.

Note: To provide opportunities to as many students as possible, priority will be given to students who have not already received funding for a Faculty of Arts & Science international opportunity, including [IICM](#) or [DIIIF](#).

Details about REP application deadlines, eligibility, course offerings and how to apply are posted on the [Faculty of Arts & Science website](#).

Faculty of Arts & Science- Funded International Programs

Director: Randy Boyagoda, Vice-Dean, Undergraduate
Contact: Office of Experiential Learning and Outreach
Support (experiential.artsci@utoronto.ca)

In an effort to provide opportunities to as many students as possible, for Faculty of Arts & Science-funded programs priority will be given to those students who have

not previously received funding for these programs. All participants must be current Arts & Science (St. George) degree students in good standing, and their eligibility must be confirmed by the Experiential Learning & Outreach Support Office prior to acceptance to the program. Participation in a Faculty-funded program does not affect participation in Summer Abroad or student exchange opportunities.

International/Indigenous Course Module (IICM)

The Faculty of Arts & Science's International/Indigenous Course Module (IICM) provides an opportunity for faculty members to incorporate an intensive international or Indigenous experiential module into the framework of existing undergraduate courses. The IICM is designed to enhance students' classroom learning in a wide range of areas through the application of course content to relevant settings and communities around the globe. IICMs are selected in late May and take place over Reading Week the following November or February. Students' participation in the IICM may be incorporated into the final course grade. In many cases, IICM participants share their experiences with the wider Arts & Science community through publications, presentations or web-based resources.

Locations

Courses and locations for Reading Week in the upcoming November or February will be posted in June on the [Faculty of Arts & Science Current Students page](#). Interested students can view stories and highlights of previous IICMs on the [Learning Abroad website](#).

Courses

Past IICMs have examined the role of political changes in the Republic of Georgia, geologic evolution and mining in Spain, historical biography in Uganda and urbanization in China.

Cost

Faculty of Arts & Science provides funding for students' and faculty airfare, accommodation and local transportation. Students may be asked to contribute a deposit towards the IICM, but amounts are capped at \$200.00.

Eligibility

A limited number of IICMs are offered each year and the program is only available to undergraduate Arts & Science (St. George) degree students enrolled in the course(s) in which the module is proposed.

Application

Upcoming IICMs and their corresponding courses will be listed on the [Arts & Science website](#). Students express interest to participate in the IICM through the course professor. Once they are enrolled and faculty members will be responsible for selecting student participants.

If you are interested in working with a faculty member to create an IICM for a course, and for all questions related to the ROP, REP, and IICM programs, please contact: experiential.artsci@utoronto.ca

Undergraduate Research Fund

The Undergraduate Research Fund (URF) is funded jointly by the Arts & Science Students' Union (ASSU) and the Faculty of Arts & Science. It provides funding for students to develop a research project of their own, for which there is no other available funding. The fund is open to all Arts & Science undergraduate students in good academic standing and no minimum GPA is required. Research projects must be initiated by students, related to their degree, and supervised by a faculty member with a continuing appointment in the Faculty of Arts and Science either through a regular course, an independent study, a research essay, or other academic project. For application forms and further information, please see the [URF website](#).

For further information please contact: undergrad.awards.artsci@utoronto.ca

Faculty List

Professor Emeritus

B. Vahamaki, MA, PhLic, PhD

Associate Professor

A. Muhonen, MA, PhD

Given by the Department of Slavic and East European Languages and Cultures

Introduction

A nation of five million people, Finland is situated between West and East, between Sweden and Russia, sharing for thousands of years religious, historical, political, social, and cultural influences and experiences with its neighbours and the different worlds they represent.

Finnish, a Finno-Ugric language related to Estonian and Hungarian, is spoken by 94% of Finland's population, by 300,000 in Sweden, and by large numbers in Canada, the United States, and other countries. The other constitutionally recognized group, the Finland-Swedes, comprises over six percent of the population. The Finns have a strong commitment to their languages and to their culture. Their national epic, the Kalevala, compiled in the 19th century from old Finnish epic narrative poems and incantations, soon became a national symbol and continues to this day to inspire the growth and development of the country's creative force. Today the entire world responds to Finnish achievements in music, literature, the arts and architecture, and celebrates the

Finnish Courses

SWE100H1 - Elementary Swedish I

Hours: 24L/24P

Elementary Swedish I gives students a basic knowledge of Swedish. Students learn to understand and use Swedish in everyday situations, and to read and write short texts on familiar themes, and speak about their immediate social environment and learn something about everyday life in both Finland and Sweden.

work of such outstanding figures as Jean Sibelius, Aki Kaurismäki, Alvar Aalto, and Eliel and Eero Saarinen.

Finnish studies at the University of Toronto are presently engaged in teaching the Finnish language - a three-year sequence - and in offering other courses on the literature and culture of Finland.

Note Regarding Finnish Studies Programs

Enrolment in the Finnish Studies Major and the Finnish Studies Minor is no longer available as of September 21, 2023. Students presently enrolled in the Major or Minor will be able to complete the program requirements as described in the respective program record, published in the 2022-23 Arts & Science Academic Calendar.

Beginning in March 2024, all students interested in pursuing studies in Finnish language, literature, and/or culture are encouraged to enrol in one of the new programs in Slavic and East European Languages and Cultures (Minor, Major, Specialist) or in Slavic and East European Literature in Translation (Minor). All of these programs include the Finnish area of study. For more information on this new suite of programs, please consult the Slavic and East European Languages and Cultures section of the academic calendar or contact the Department of Slavic and East European Languages and Cultures directly for advising.

Finnish Studies: see Slavic and East European Languages and Cultures

Exclusion: SWE101H1

Breadth Requirements: Creative and Cultural Representations (1)

FIN100H1 - Elementary Finnish I

Hours: 48P

The Department reserves the right to assign students to courses appropriate to their level of competence in Finnish. An introductory language course for students with no knowledge of Finnish. The acquisition of a basic vocabulary and of an understanding of elementary structural features through practice in comprehension, speaking, reading and writing.

Breadth Requirements: Creative and Cultural Representations (1)

SWE101H1 - Elementary Swedish II

Hours: 24L/24P

Elementary Swedish II, a continuation of SWE100H1 gives students a basic knowledge of Swedish. Students learn to understand and use Swedish in everyday situations, and to read and write short texts on familiar themes, and speak about their immediate social environment and learn something about everyday life in both Finland and Sweden.

Prerequisite: SWE100H1 or instructor permission
Breadth Requirements: Creative and Cultural Representations (1)

FIN110H1 - Elementary Finnish II

Hours: 48P

An introductory language course for students with no knowledge of Finnish. The acquisition of a basic vocabulary and of an understanding of elementary structural features through practice in comprehension, speaking, reading and writing.

Prerequisite: FIN100H1 or permission of instructor
Breadth Requirements: Creative and Cultural Representations (1)

FIN200H1 - Intermediate Finnish I

Hours: 48P

The four language skills (speaking, listening, reading and writing) honed by discussion of Finnish literary texts as well as by compositions in Finnish about these texts, by a series of conversation exercises, and by analysis of morphology, syntax and word formation. Translation is used to aid in language learning.

Prerequisite: FIN110H1 or permission of instructor
Exclusion: FIN200Y1
Breadth Requirements: Creative and Cultural Representations (1)

FIN210H1 - Intermediate Finnish II

Hours: 48P

The four language skills (speaking, listening, reading and writing) honed by discussion of Finnish literary texts as well as by compositions in Finnish about these texts, by a series of conversation exercises, and by analysis of morphology, syntax and word formation. Translation is used to aid in language learning.

Prerequisite: FIN200H1 or permission of instructor
Breadth Requirements: Creative and Cultural Representations (1)

FIN225H1 - Culture, Society and Politics of the Nordic Region

Hours: 24L

An introduction to the culture, society and politics of the Nordic region with a focus on Finland, Sweden and Estonia, and including other countries of the Baltic sea region. An overview of the evolution of culture and society, as well as historical and political developments, demonstrating how interactions between these two spheres have shaped life in the region today.

Breadth Requirements: Creative and Cultural Representations (1)

FIN230H1 - Finnish Culture 1800 to Present

Hours: 12L/12P

FIN230H1 offers an introduction to Finnish society, history and culture from 1800 to present. The course examines the rise of Finnish nationalism in the 1800s, its main manifestations, and concentrates on the developments of its cultural, educational and social institutions, its economic structures, demographics, cultural traditions as well as the nation's bilingual status. The focus is on contemporary themes placed in a wider societal context.

Breadth Requirements: Society and its Institutions (3)

FIN236H1 - Hot Reads from a Cool Country: Contemporary Finnish Literature

Hours: 24S

An introduction to contemporary Finnish literature which leads students through major developments in Finnish literature over the last 30 years with a focus on the major themes and trends of Finnish literature through selected

representative works. Finnish texts will be read in translation, analyzed and discussed.

Breadth Requirements: Creative and Cultural Representations (1)

FIN238H1 - The Vikings

Hours: 48L

This course examines the influence and reception of the Vikings on the Nordic countries and Europe up to the modern day, focusing on their legacy in the contemporary Nordic world in literature, film and other cultural fields.

Breadth Requirements: Creative and Cultural Representations (1)

FIN240H1 - Masterpieces of Scandinavian Literature

Hours: 12L/12S

Introduction to the greatest authors of Scandinavian literature and their greatest works, particularly August Strindberg, Henrik Ibsen, H.C. Andersen, Knut Hamsun, Selma Lagerlof, Pär Lagerkvist, Aleksis Kivi, Sigrid Undset and Halldor Laxness, etc. These are situated in their Scandinavian context and in world literature. (Offered every two or three years)

Recommended Preparation: Some background in literature

Breadth Requirements: Creative and Cultural Representations (1)

FIN250H1 - Finnish Cinema

Hours: 12P/24S

The course offers a survey of development of Finnish cinema from its parochial beginnings to its international recognition with a focus on contemporary themes. Selected films with different themes and topics will be screened and analysed. Readings and subtitles in English. (Offered in alternate years)

Breadth Requirements: Creative and Cultural Representations (1)

FIN260H1 - Scandinavian Cinema

Hours: 12P/24S

Major developments of cinema in Scandinavia in the 20th and 21st centuries focusing on Denmark, Sweden, and Finland. In addition to "old classics," most important recent films are screened and discussed. Film directors include Ingmar Bergman, Carl Th. Dreyer, Aki and Mika Kaurismäki, and many others. (Offered in alternate years)

Breadth Requirements: Creative and Cultural Representations (1)

FIN270H1 - Modern and Contemporary Finnish Architecture and Design

Hours: 24P

Finnish architecture and design from the 19th century to the present. Explores the technical and stylistic development of modern architecture and design in relation to the cultural and socioeconomic progress of the young nation. The focus is on the work of modern architects and designers. The course also examines the history of Scandinavian design more broadly.

Breadth Requirements: Creative and Cultural Representations (1)

FIN280H1 - Finnish Musical Culture from Sibelius to Heavy Metal

Hours: 24S

Analyzing the role of music in Finnish cultural identity, history, and society, this course explores both traditional and contemporary Finnish music, concentrating on what makes Finnish musical culture unique: Sibelius, kantele, folk music, heavy metal, rock and pop music. We will explore the themes of national and international music, the music industry, and the globalization of Finland's music.

Breadth Requirements: Creative and Cultural Representations (1)

FIN300H1 - Advanced Finnish I

Hours: 12P/24S

Advanced Finnish provides a continuation of [FIN210H1](#) Intermediate Finnish.

Prerequisite: FIN210H1 or permission of instructor

Breadth Requirements: Creative and Cultural Representations (1)

FIN310H1 - Finnish Folklore: The Kalevala

Hours: 12L/12S

An examination of the Finnish national epic, the Kalevala: its relationship to the tradition of folk poetry; its quality as an epic poem; the mythological, religious, and cultural dimensions of its world view; its role in Finland's nation-building in the 19th and 20th centuries. Readings in English. (Offered at least every alternate year)

Breadth Requirements: Creative and Cultural Representations (1)

FIN320H1 - The Finnish Canadian Immigrant Experience

Hours: 12L/12S

Major issues and dimensions of the culture and experience of the Finnish immigrants to Canada, including Finnish Canadian literature, theatre, and press. Conceptual and ideological contributions to working class culture, women's lives, religious and social attitudes and values. Readings in English. (Offered every three or four years)

Breadth Requirements: Society and its Institutions (3)

FIN340H1 - Advanced Finnish II

Hours: 12P/24S

Advanced Finnish II provides a continuation of [FIN300H1](#) Advanced Finnish I.

Prerequisite: [FIN300H1](#) or permission of instructor

Breadth Requirements: Creative and Cultural Representations (1)

FIN350H1 - The Finnish Short Story

Hours: 24S

Historical, structural, and thematic study of the short fiction of Finland from the Romanticism of the 19th century to contemporary post-structuralism and post-modernism. Works of Runeberg, Topelius, Kivi, Canth, Aho, Jotuni, Lehtonen, Schildt, Sillanpaa, Haanpaa, Meri, Hyry, Salama, Mukka, Liksom, and others. Readings in English. (Offered in alternate years)

Breadth Requirements: Creative and Cultural Representations (1)

FIN360H1 - Bilingualism in Finland

Hours: 12L/12S

Bilingualism in Finland as a case study in the sociology of language. A critical survey of the historical development of language politics in Finland as a bilingual society from 1800 until present.

Exclusion: [FIN340H1](#)

Breadth Requirements: Society and its Institutions (3)

FIN400H1 - Translation: Finnish-English

Hours: 24S

Written translation from Finnish to English. Students will apply their textual analysis skills in translating texts drawn from diverse sources and genres, while exploring the general theory of translation. Translation exercises will serve as the basis for training in comparative Finnish-English stylistics.

Prerequisite: [FIN300H1](#) or permission of instructor

Recommended Preparation: [FIN305H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

FIN415H1 - Finnish Literature in the 20th Century

Hours: 24S

This course examines the main literary works and genres of 20th Century Finland, especially Jotuni, Sillanpaa, Haanpaa, Meri, Manner, Linna, Tuuri and a sample of contemporary writers. All readings in Finnish.

Prerequisite: Permission of instructor

Recommended Preparation: [FIN410H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FIN420Y1 - Independent Study

A year-long reading and research project of significant depth in a major area in Finnish language, literature or culture approved and supervised by an instructor. Not eligible for CR/NCR option.

literature or culture approved and supervised by an instructor. Not eligible for CR/NCR option.

FIN421H1 - Independent Study

A semester-long reading and research project of significant depth in a major area in Finnish language,

First-Year Foundations

Introduction

First-Year Foundations Seminars, First-Year Foundations Ones Programs, and the Vic One Hundred series enable new students to engage in academically rigorous discussions and develop strong written, oral, and teamwork skills in the process. These small classes are capped at 25 students, which helps ensure that all students are active participants in discussions and have

First-Year Foundations Courses

ACT199H1 - Decipher Financial Puzzles in the Media and Pop Culture

Hours: 24L

Have you ever watched a pundit's passionate rant over financial crisis on TV and wondered whether he was right or wrong? Did you get the full story after watching movies like *Margin Call* or *The Big Short*? What was the efficiency market versus behavioral finance debate all about? Did you wonder why everyone in the financial press seem to be calling for a lower debt/equity ratio on banks in the post-crisis era? If you find yourself think about those questions, this is the course for you. We will start from some basic building blocks of finance, such as time value of money and discounting, and proceed to look at some of the important financial controversies you have read or heard in the pop culture or media. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

AFR199H1 - Africa in Toronto

Hours: 24L

Africa in Toronto offers students the unique opportunity to trace, map and document sites and encounters with "Africa" in Toronto across diverse social, political, economic, linguistic and cultural communities in the GTA.

the opportunity to build relationships with professors early on in their academic career.

All newly admitted, first-year students in the Faculty of Arts & Science can register for any of these courses, regardless of college affiliation or entry stream. Taught by some of the Faculty's leading scholars, the best researchers and teachers at U of T, First-Year Foundations focus on issues, questions and controversies surrounding a particular topic or theme.

Read below to learn more about First-Year Foundations Seminars, First-Year Foundations Ones Programs, and the Vic One Hundred series.

(Please note: Some First-Year Foundations Ones Programs require an application, while you enrol in others during summer course selection. See details below.)

What are the diasporic lives of diverse African communities in the GTA? How does Toronto become home for them? Students will get the chance to learn about, reflect on and reimagine global Africa in the GTA by exploring topics such as placemaking, community-building, the politics of belonging, organizing and activism, economic hubs, artistic creation and expressive cultures, foodways and the epic battle over jollof rice. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

Course Experience: University-Based Experience

ANT191H1 - Personhood and Technologies of Reason

Hours: 24S

The African thinker Achille Mbembe has rightly said that we need a new 'techne of reason' to respond to planetary changes. Anthropology has been good to think with the body, what is to be a person and the techniques that are salient to both. Artificial Intelligence is asking to rethink what is the limit of the body, reason and agency - the capacity to bring difference in the world. This course introduces key ideas in anthropology, psychoanalysis and religion, on bodies, personhood and forms of reason by focusing on textual and multimedia examples on anthropological accounts of personhood, Artificial Intelligence, and medieval and contemporary forms of mysticism. This is then to ask the question of how different technologies of reason may be co-existing, emerging, colliding while shaping politically different forms of being in the world. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

ANT192H1 - Murder and Other Deathly Crimes: Anthropological Perspectives

Hours: 24S

Anthropology has much to say about death. There is foundational literature on sacrifice, suicide, and the rites surrounding the end of life. Anthropology also has a lot to say about violence: war, conflict, revolution. But at the nexus of death and violence lies murder, a culturally and socially salient phenomenon that garners less scholarly attention. This seminar will explore what constitutes murder in different cultural and historical contexts, by reading across anthropology, cultural studies, and film studies. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

ANT193H1 - Making, Using, and Interpreting Stone Tools

Hours: 6L/8P/10S

Stone tools are the earliest and longest-lasting record of human technology. This course explores interpreting stone tools from a multidisciplinary perspective. In making, using, and studying stone tools, students will learn how archaeologists form hypotheses and design experiments to understand humans and their technologies in the past. This course presents research that investigate changes in human ancestors' cognition and livelihoods through the contributions of other disciplines in life and social sciences to the study of stone tools. The course introduces major stone tool discoveries and critically engages with current research through the development of new ideas for research projects. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

ANT194H1 - Human-nonhuman relations through Manga & Anime

Hours: 24S

Anthropology has examined various ways human beings imagine and engage with non-human beings in their everyday lives in particular social and cultural contexts. By using manga and anime, specific popular cultural

expressive modes developed in Japan, this course examines social and cultural aspects of human relationship with other beings, including but not restricted to animals, plants, microbes, technological objects and spirits from anthropological perspectives. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

ANT195H1 - Speculative Fiction and Social Reality

Hours: 24S

How do the imagined worlds of speculative fiction reflect, and reflect upon, the real worlds of their authors and audiences? And on the other hand, how can works of speculative fiction have real-world impacts? Is speculative fiction different, in either of these respects, than other genres of narrative? This course explores a variety of works of speculative fiction from the perspective of an anthropological interest in ideas, imaginations, and narratives in relation to social life. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

ANT197H1 - Representations of Intellectuals

Hours: 24S

This course is a First-Year Foundation Seminar and provides an opportunity for exploration of different topics and themes. The course explores ideas of intellectuals who carved transformative theories during war times or under repressive regimes in the twentieth century. Intellectuals featured in the course include Rosa Luxemburg, Frantz Fanon, Walter Benjamin, Lu Xin, Audre Lorde. Further, it would examine cultural representations of them, such as, graphic novels, fictions, essays, films and videos on them or relatable to their ideas. For example, it would assign reading of *Red Rosa*, a graphic novel of Luxemburg together with her own work *Theory of Imperialism*. Or it would juxtapose Lorde's classic, *Sister Outsider*, with Octavia Butler's science fiction, *Parable of the Sower*. First-Year Foundation Seminars are restricted to first-year students and do not normally contribute towards program completion. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

ANT199H1 - Living on the Water in Toronto

Hours: 24S

What do the Great Lakes mean to people living here? Especially Indigenous people? When and how do people care about the Great Lakes? Poems, stories, social science offer perspectives on the water from anthropology and arts. Field trips including paddling on a river, hiking; talks with local activists and artists. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

AST198H1 - Great Astronomical Issues

Hours: 24S

There are some fundamental questions which humankind has asked itself over the centuries. Many of these involve astronomical origins, events, and objects. Astronomers now have the tools with which to attempt to answer some of the most fundamental questions, such as "Where did it all begin, where are we in space and time, are we alone, and who and what are we?" This seminar will explore some of these great issues. The selection of topics will be made initially by the instructor, but will be modified by the seminar participants at the first class meeting. Topics could include: stellar evolution and the future of the Sun, origin of the elements, origin and future of the Universe, origin of the Earth, origin of life, and extinction of the dinosaurs, global warming, the scientific method, astronomy and the public. Participants will be expected to join actively in lively discussions and to prepare and lead some of the seminars. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: AST199H1

Breadth Requirements: The Physical and Mathematical Universes (5)

AST199H1 - Astronomy at the Frontier

Hours: 24S

This seminar series aims at building up general scientific literacy, by discussing selected topics in current astronomy, cosmology, and space science. We will delve into the physical foundation behind the questions being asked and how the answers are being sought. Students will have an opportunity early in the course to select topics of particular interest to them and this will govern the choice of readings as well. Topics could include: formation of stars; lives and deaths of stars; stellar corpses: white dwarfs, neutron stars, and black holes; planets around other stars; recent results from Hubble and other

telescopes; architecture of the solar system; exploration in the solar system; the invisible universe: dark energy and dark matter; first light; formation of galaxies; the age and future of the universe. Participants should be comfortable with basic mathematics and quantitative reasoning. Students will be expected to do independent research for essays, presentations, etc. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: AST198H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CDN197H1 - Inventing Canada

Hours: 24S

This course explores the ways that Canadian history and identity have been commemorated, interpreted and experienced, now and in the past. The course focuses in particular on who has been included or excluded in commemorative efforts over time. Key topics include representations of women, Indigenous peoples, and political figures on screen and through public installations like museum exhibits, plaques and statues. Case studies highlighting a range of interpretive media will encourage students to work with and discuss a range of primary and secondary sources, build critical thinking and academic writing skills. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

CDN198H1 - Canada, Colonialism and Settler Relations

Hours: 24S

A First Year Foundations seminar focused on exploring Canada's colonial history and recent efforts to enact appropriate settler relations through an interdisciplinary lens. Topics will include contemporary land claims and treaty-making processes, the Royal Commission on Aboriginal Peoples, governmental apologies for the mistreatment of Indigenous peoples, the Truth and Reconciliation Commission, land acknowledgements, practices of allyship through social movement such as Idle No More, and efforts to influence Canada's overseas mining practices. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

CDN199H1 - Canada- Hong Kong Migration

Hours: 24S

This course surveys the effects of migrations and cultural connections between Hong Kong and Canada from the 1960s. Students will discuss and analyze the impact of migrations, and study the connection between the two locations from the perspectives of history, culture and literature, politics and democracy, economic and financial development and the network of people and community. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

CHM193H1 - Chemicals in the Environment: The Good, the Bad, and the Ugly

Previous Course Number: CHM211H1

Hours: 24S

The world is made up of chemicals: some are natural and some are invented and manufactured by humans. New chemicals are often intended to make our lives safer and easier (e.g., plastics, pesticides, personal care products) but may have unanticipated consequences once they are released into the world. In this seminar course, students will discover what properties of chemicals can lead to risks for the environment and for human health. Through discussion of how chemicals in the environment are understood by scientists, and described in popular media, students will develop improved scientific literacy to better evaluate risk in their own lives. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: CHM211H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM194H1 - Science and Human Values

Hours: 24S

There is a tension between creativity and the search for truth, which in science can be looking for patterns in nature. With examples drawn particularly from reports of scientific discoveries that have generated controversy, this seminar course will introduce the underlying principles and history of science, as well as how science and its boundaries are evolving, and how these influence human values. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: Minimum level of high school science and mathematics

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM196H1 - The Quantum World and Its Classical Limit

Hours: 24S

This course seeks to demystify quantum mechanics and equip students to critically analyze popular depictions of quantum phenomena. While quantum mechanics provides a reliable description of the behavior of atoms, molecules and photons, most people are uncomfortable with some of its predictions, such as "quantum entanglement" between distant particles. In this course we will delve into key aspects of quantum mechanics and its more comfortable classical limit, focusing first on its manifestations in nature and then on fundamental issues such as uncertainty, interference, entanglement, and decoherence. This course will appeal to students with enthusiasm for physics. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: High school physics and mathematics

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM197H1 - Environmental Chemistry in a Sustainable World

Hours: 24S

Rapid and widespread industrialization is changing the chemical nature of the planet. In order to have a sustainable future, we need to manage chemicals released by humankind and understand their effects on the environment and on us. Each year, this seminar course designed for non-science students will address the fundamental science behind a specific topic in this field, such as the interactions of our energy choices and the environment, or changes in water and air quality. Emphasis is given to reading from both the popular media and scientific literature. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: Grade 12 chemistry

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM198H1 - Biosensor Technology and Applications for the Non-Scientist

Hours: 24S

This breadth course introduces uses of and key ideas behind biosensor technology. Sensors will be familiar to all, playing key roles in our everyday lives, for example in touch screens or in automotive technology. Biosensor devices are fabricated from an electrical transducer which is intimately connected to a biochemical probe such as an enzyme or antibody. The idea is that a detectable electrical signal can be obtained when a target molecule or ion binds to the probe. Such a device offers many applications. These range from the detection of biological markers in blood and serum to test for genetic and infectious disease, to the selective monitoring of biomolecules for public safety, or in biotechnology or other industrial processes. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: Reading of book chapter on biosensor technology

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM199H1 - The Context of Chemistry: Origins, Concepts, Tools, and Challenges

Hours: 24S

Chemistry is a practical as well as a conceptual science that serves as the basis for applications in many other fields. The ideas and methods have evolved from diverse inputs leading to widely accepted sets of standard of facts. This collective knowledge has led to progress in the quality and understanding of life at a molecular level. While the facts of chemistry are taught in established courses, the context of what we know, the limitations and challenges of what chemistry can do and how we got to this point will be the targets for discovery by students in this course. The course will operate in a seminar model, combining presentations, readings, reports and discussions of current and historical issues. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: Grade 12 level chemistry

Breadth Requirements: The Physical and Mathematical Universes (5)

CIN196H1 - Story Worlds and the Cinema

Hours: 24P/24S

Films create story worlds, imaginary environments in which characters live and act, and where events, large and small, transpire. Some story worlds are elaborate, fanciful constructs (think of Disney's animated films). Others stay close to reality (think of "docudramas"). But across the spectrum, all of them are framed by and provided with rules of time and space, of believable or impossible. This course offers an examination of selected story worlds from several periods of film history. Emphasis falls on the expansive story worlds of contemporary corporately-run media-franchise "universes," like the cross-media "DC Universe." Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

CIN197H1 - School Daze

Hours: 24P/24S

This first-year foundation course is a survey of sound film (with a brief selection of silent shorts) on the topic of how popular cinemas have represented going to school. Looking at one film and one scholarly text a week, the course will offer an introduction to the close reading of film texts, reading and writing film criticism, and the fundamentals of film history. By engaging with only one film/reading per week, the course emphasizes depth over breadth. Texts for the course may include excerpts from Corrigan's *A Short Guide to Writing About Film*, Sturken and Cartwright's *Practices of Looking*, Staiger's *Interpreting Films*, and Prince's *Movies and Meaning*, along with selected criticism on the movies screened. Those films may include *Zero for Conduct*, *Aparajito*, *Tom Brown's School Days*, *Tea and Sympathy*, *If, Rock and Roll High School*, *Mean Girls*, *School Daze*, *Blackboard Jungle*, or *Lady Bird*. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

CLA195H1 - Julius Caesar

Hours: 24S

Gaius Julius Caesar (100 – 44 BC) was a writer, an orator, a reformer, and a builder, as well as a general, a conqueror, an explorer, and a dictator. After his death, he was even worshipped as a god with a temple in the very heart of Rome. According to his critics, both ancient and modern, he was also a megalomaniac, an enemy of the state, a war criminal, and a tyrant. Only a very few individuals have left such an extensive and controversial mark on the history of the ancient world. We shall consider as many aspects of his life and his legacy as we can, from his conquest of Gaul to his decision to plunge

Rome into a horrific civil war, from his love-affair with Queen Cleopatra of Egypt to his brutal assassination on the Ides of March. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

CLA196H1 - Unhappy Families

Hours: 24S

Unhappy families appear throughout Greco-Roman literature and culture. Spectacular Tragic Houses were filled with several generations of disasters. These inspired a variety of poets to retell select moments in their histories. But even the comic household can mobilize hatred, suspicion, and other ugly feelings to humorous effect. Conflict between domineering fathers and the rest of the household was a staple of rhetorical training. And in many homes we can see the misery of slaves, members who are also not members of the family. This course will survey a variety of intimate disasters. We will explore norms and ideals as well as the sense that the same are fragile, contradictory, or even impossible. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

CLA197H1 - Inventing the Ancient Mediterranean: Roman Technology

Hours: 24S

Two thousand years ago Roman hydraulic engineers designed aqueducts and provided hundreds of cities in the Mediterranean region with a richer water supply than any nation could boast before the late 1800s. Ever more sophisticated ships transported goods from harbour to harbour and Roman experts on construction built the Colosseum and other amphitheatres, as well as countless temples, theatres, roads, bridges, and even high-rise apartment buildings, which in some cases survive to this very day. What was the secret of Roman civilization, and what did this level of technology mean for the empire's inhabitants? This course presents for discussion the many achievements of centuries of Roman presence on three continents around the Mediterranean Sea, while bringing into the equation also the issue of standard of living and the ecological costs. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

CLA198H1 - Homer's Odyssey down through Time

Hours: 24S

This course will survey creative works inspired by Homer's *Odyssey*. First we will read through the *Odyssey*, contextualizing the Homeric epic within the larger story of the Trojan War and the subsequent heroic return in the "Epic Cycle." Then we will study various "receptions" of the *Odyssey*, ancient and modern. Ancient works will include the satyr play *Cyclops* by Euripides and portrayals of a love-sick Cyclops in Theocritus and Ovid. In *True Story* Lucian calls Odysseus a liar but rivals his travel tale with episodes placed on the moon and inside a whale. Modern works include Atwood's *Penelopiad*, Walcott's stage version of the *Odyssey*, and the film "O Brother, Where Art Thou?" Themes will include travel literature, truth and lying, localization of the wanderings of Odysseus, culture clash, and the definition of home. All this material, various in date, media, and fidelity to their Homeric source, will provide us with a well-rounded sense of how the *Odyssey* has been re-imagined over the ages. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

CLA199H1 - The "Decline and Fall" of the Roman Empire

Hours: 24S

After a high water mark of territorial reach and economic success in the middle of the 2nd century CE, the Roman Empire eventually disintegrated. How? Why? When? In this course, we will consider some of the historical features that may have contributed to its political collapse, and we will consider some modern scholarly analyses from Edward Gibbon (late 18th century) to the present. But we will also investigate "decline and fall" as a narrative trope. Why is this story arc always with us? Who decides what qualifies as "decline"? Is the "fall" of some systems necessarily a bad thing? Among the topics to be considered in the context of the Later Roman Empire are several of relevance in the modern world, not least: climate change, disease, human migration, religious difference, and economic inequality. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

CSB195H1 - Computational Biology Foundations

Hours: 24L/12T

Our understanding of life is built from observation, abstraction, modeling, and comparison. In this First Year Foundations course we explore how these activities are based on concepts of chance and choice, of organization and dispersion, of cooperation and conflict, and how these ideas inform domains such as statistics, computer science, bioinformatics, molecular biology, physiology and ecology. Through this, we build a broad framework of relationships and connections that will make students' engagement with specialized courses throughout the sciences all the more meaningful. This course's focus on best practices of structuring project work, using tools and resources, and documentation, will be valuable preparation for all subsequent courses. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

CSB196H1 - Genes, Genomes and Us

Hours: 24L

With the completion of the human genome sequence, we now have access to more information than ever before about our genetic make-up. This course addresses topics such as what are genes, how are they identified and how does knowledge about genes impact society. Students will learn basic concepts in genetics. Using this conceptual foundation, the significance of genomic research for understanding human biology, and the social consequences that may result from it, will be discussed. Evaluation is based on class discussions, homework, oral presentation and written assignments. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

CSB197H1 - Human Viruses

Hours: 24L

This course allows students to broaden their knowledge about the most important human viruses and prions. In essence, what viruses are, what they do, what are the diseases caused by viruses and how they are transmitted, etc., and what can be done about them (vaccines, antiviral treatments, etc.). Viruses cause many diseases ranging from a benign rash to severe hemorrhages and death. Each student will select a specific topic in Virology and write an essay and present a seminar for the rest of the

class. Major "hot" problems in Virology from pandemics to controversial vaccines will also be discussed. Two tests covering all materials presented by all the students' seminars will be conducted. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

CSB198H1 - Cell and Molecular Biology in the News

Hours: 24L

The pace of knowledge creation in the fields of cell and molecular biology has greatly increased in the 21st century and with it, the need for greater scientific literacy. In this course, we will teach students to find reliable sources of information in order to understand the basic concepts underlying the research reported in these media releases, with the ultimate aim of critically evaluating these reports. Through exploration of various media articles in cell and molecular biology (with an emphasis on humans), students will be able to apply what they have learned to current events, as well as relevant issues in their lives and society as a whole. Students will be assessed through short-written assignments, class discussions, an oral presentation, and a final project where they will get the opportunity to explore the research behind a media article of their choice. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

CSB199H1 - Biotechnology and Society

Hours: 24L

From the manipulation of genes of plants for improved food production through to human tissue engineering and stem cell research, biotechnology is increasingly playing a major role in our world. Society, however, is often challenged by the rapid advances in our knowledge in these areas, and how to best apply these technologies in a manner that is socially responsible and economically viable. In this seminar course, students will research and describe various applications of biotechnology using information obtained from reputable sources, and lead discussions on the benefits and concerns that arise from this research. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

CSC194H1 - Impactful Video Game Design

Previous Course Number: PMU199H1

Hours: 24S

An introduction to the fundamental design and development principles for digital games, and their potential for real-world impact and social betterment. Topics include game design history & social issues, narrative and gameplay elements, human-computer interaction and project management. Strong focus on how design elements affect player engagement and learning. This course requires students to create a game as part of the course, with practical assignments and a final project that reflect industry milestones. No programming is required for this course. Please note that not all CSC first-year seminars will be offered in a given year; please check the Timetable for current offerings. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

CSC196H1 - Great Ideas in Computing

Hours: 36L

We will pursue the general (and very debatable) theme of GREAT IDEAS in COMPUTING (including some surprising algorithms). The ambitious goal is to try to identify some of the great ideas that have significantly influenced the field and have helped to make computing so pervasive. We will concentrate on mathematical, algorithmic and software ideas with the understanding that the importance and usefulness of these ideas depends upon (and often parallels) the remarkable ideas and progress in computing and communications hardware. As we will see, many of the great ideas were against the "prevailing opinion". The list of topics we shall discuss will depend to some degree on the background and interests of the class. Please note that not all CSC first-year seminars will be offered in a given year; please check the Timetable for current offerings. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: Some knowledge of probability theory

Breadth Requirements: Society and its Institutions (3)

CSC197H1 - Big Data and Privacy

Hours: 24S

The rapid advance of technology has brought remarkable changes to how we conduct our daily lives, from how we communicate, consume news and data, and purchase

goods. As we increase our online activity, so too do we increase the amount of personal data that we're sharing, often without realizing it. The questions of exactly what data is being collected, who is collecting and accessing this data, and how this data is being used, have significant implications for both individuals and our larger social and political institutions. Organized by a wide variety of case studies drawn from current events, we'll study how personal data can be collected and tracked, how personal and social factors may influence our own decisions about whether and how much to share our data, and what broader political and legal tools are used to either protect or subvert individual privacy. Please note that not all CSC first-year seminars will be offered in a given year; please check the Timetable for current offerings. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

CSC199H1 - Intelligence, Artificial and Human

Hours: 36S

What is human intelligence? How close are we to replicating it? How productive/reductive is the brain-computer analogy? What ethical challenges are posed by AI on workers, society, and the environment? Can we put a hold on "progress"? Is Silicon Valley the seat of a new techno-religion? What can they teach us about today's research priorities? What insight (or inspiration) can we get from works of science fiction about the future of human-AI interaction? Through reading discussion, written assignment, and workshops, this seminar will present students with the opportunity to integrate their computer science interests with philosophy, history, and literature. *There is an equivalent course offered by St. Michael's College. Students may take one or the other but not both.* Please note that not all CSC first-year seminars will be offered in a given year; please check the Timetable for current offerings. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: SMC199H1 (Intelligence, Artificial and Human)

Breadth Requirements: Society and its Institutions (3)

DTS199H1 - Superman and Other Migrants

Hours: 24S

From the 1938 debut of Superman until the spate of recent autobiographical graphic novels by immigrants and children of immigrants, the development of the comic and graphic novel form has been intricately bound up with the diaspora experience. In this course, we will explore the

emergence of the superhero from the immigrant experience; trace the depiction of migrants, immigrants and refugees in recent graphic novels; and study visual strategies for representing migration and displacement. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

EAS193H1 - What is “The Yellow Peril”?

Hours: 24L

This course explores the old and new reincarnations of “the Yellow Peril” complex. The 2020 naming of COVID-19 as “the Chinese virus” by the U.S. president Donald Trump has provoked much anger, criticism, and concerns for anti-Asian violence and the reiteration of “The Yellow Peril” panic. Yet the imaginaries of “the Yellow Peril” and their power effects have been engrained in our political modernity, the Enlightenment ideas, and its institutions in a much more complex, far-reaching, and intersecting ways in East Asia and beyond. The course will explore various types of cultural productions, including history, literature, film, news media, etc., to introduce the racial, colonial, capitalist, sexual, militarized, and other dimensions of the “Yellow Peril.” Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

EAS194H1 - East Asia through Music

Hours: 24L

This course will discuss ‘East Asia’ through music as composed, performed, recorded, processed, remembered, imagined, and represented. Questions to be asked include: what kinds of sound are recognized as music in East Asia? What are the goals and effects of music? When, where, and how is music performed in East Asia? How is music described in East Asian literature and visual art? How does music translate East Asian literature and visual art? How are certain musical elements—tonality, rhythm, genre, instruments—recognized as ‘East Asian’? How is East Asia imagined musically? How are East Asian composers and performers received globally? Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

EAS195H1 - Shan Shui Landscape: A Cultural Historical Study

Hours: 24L

This course looks into the history of cultural production of Chinese Shan Shui (lit., mountain and water) landscape representations from an environmental humanities perspective. As an artistic motif, Shan Shui travels between past and present and across various mediums as well as literary and artistic genres. What exactly are we invited to see and contemplate on in the Shan Shui? Are Shan Shui works about “nature,” spirit, Qi, or the human world? The course seeks to inquire into these and other questions through examining the concepts, arts, and transformations of selected Shan Shui works in imperial and contemporary China. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

EAS196H1 - Consumption, Taste and Culture in East Asia

Hours: 24S

This course explores the roles that consumption and taste play in personal and public lives in East Asia. Course focus may include the cultural histories of food, fashion, tourism, sports, or forms of audio and visual media. (No prior knowledge of East Asian languages or cultures is necessary.) Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

EAS197H1 - Media Worlds and East Asia

Hours: 24S

The term “world-making” is often used nowadays to refer to transmedia storytelling, or the creation of story-worlds across serial narratives in a range of entertainment media, such as novels, games, film series/franchises, television shows, comics, and webtoons. This course looks at the ways that media producers and fans, alike, engage with media worlds. More importantly, the course situates these media worlds within a broader conception of “world-making,” namely, the geopolitical and economic configuration of modern East Asia. (No prior knowledge of East Asian languages or cultures is necessary.) Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

EAS198H1 - Martial Arts in East Asian Narratives

Hours: 24S

What can we learn about East Asian history and culture through its rich tradition of narratives featuring the martial arts? This course introduces short stories and novels dealing with combat and warfare from nearly two thousand years of East Asian literature, exploring issues such as self and society, gender, power, the body, and identity. All texts will be provided in translation, and no prior knowledge of any East Asian language or culture is necessary. The texts explored will vary year to year, depending on the instructor. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

EAS199H1 - Thinking through Art in Chinese Culture

Hours: 24S

This seminar explores different visions and methods of art (textual and visual) as a way of thinking about living, knowing, and willing in Chinese culture. Examination of various theoretical texts on arts and literature, as well as works of art themselves, will provide students with knowledge and research skills on arts in Chinese culture, and an expanded sense of Chinese intellectual history. Questions explored in the course will include: How should we understand the concept of Chinese art beyond representation? How did Chinese literati pursue a sense of beauty through their poetry and painting? How is beauty apprehended in natural and constructed landscapes? What are the political and social functions of art education in Chinese culture? How do Chinese artists fit into a global cultural context? (No prior knowledge of East Asian languages or cultures is necessary.) Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

ECO196H1 - An Economist's Guide to the Galaxy

Hours: 24S

Climb aboard as we seek answers to the "Ultimate Question of Life, the Universe, and Everything" (Douglas Adams). Unlike the Hitchhiker's Guide to the Galaxy, the answer will not be 42. Prepare for a wide-ranging journey into the questions economists seek to answer and the evidence they must muster to examine these questions. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

ECO197H1 - Seminar on Classical Economic Thought

Hours: 24L/12T

This seminar examines the basic ideas of the five most notable economic thinkers before 1870: Aristotle, Adam Smith, Thomas Malthus, David Ricardo, and Karl Marx. We focus on demand as the basis of price in Aristotle; the ambiguity in Smith between a labour theory of value and a demand/supply theory of value; the principle of population in Malthus; Ricardo's labour theory of value and his theory of rent and economic growth; and Marx's labour theory of value as the explanation for the development of capital. The understanding in these authors of economics as an historical process of production gives fascinating insights into modern economic development that contrast with the modern economic concentration on the distribution of resources in a world of scarcity. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

ECO198H1 - Seminar on Modern Economic Thought

Hours: 24L/12T

This seminar examines the development of modern economic thought from the marginal revolutionaries (Jevons and Menger) who proclaimed that demand in the form of utility was the basis of price to the supply/demand analysis of Alfred Marshall that established modern microeconomics by 1890. We then look at Irving Fisher's 1907 foundation of the modern concept of the interest rate and the present value of capital before reviewing J.M. Keynes' 1936 criticism of neo-classical positions on full employment and interest rates in arguing for government manipulation of interest rates to ensure full employment. We finish with Milton Friedman's championing of the unregulated market economy through his quantity theory of money critique of Keynes. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

ECO199H1 - Economics and Sustainable, Green Development

Hours: 24L/12T

Economic growth has been a powerful force through history in improving living standards throughout the world. At the same time, there is a growing recognition that environmental damages frequently accompany this growth, whether it be at the local level (soil degradation and deforestation), or the global level (climate change). Economics studies the allocation of scarce resources, but how can it incorporate "the environment" in a meaningful way that can help guide policy-makers in the 21st century? This course is a fast review of economic approaches and tools, and a review of a wide range of environmental policies, designed to manage the possible adverse impacts of economic expansions. The major emphasis in this course is on the market-based policies that guarantee incentive compatibility of these policies, thus, a higher chance of success. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

EEB196H1 - Using Ecology and Evolution to Understand our World

Hours: 24L

Understand the living world by learning principles of ecology and evolution. Through discussion, scientific literature research, seminal readings, written reports and presentations, you will discover how scientists ask and answer questions in ecology and evolution. Specific topics will vary to emphasize the expertise of the instructor, with examples including: Are humans still evolving? What is causing the sixth extinction crisis and how can we protect endangered species? Are species shifting their ranges to mitigate the impacts of climate change, and should we be helping them? How do diseases evolve and can we use evolutionary tools to control diseases of concern? Why are there so many species, and do introduced species increase or lower this diversity? Can and should we use evolution to create improved species? For non-science students in all disciplines. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

EEB197H1 - Biodiversity and the City

Hours: 24L

Most of us are urban creatures, but we as people are not the only urban creatures. In this seminar we will explore the diversity of animal and plant species comprising the ecological community that we call "Toronto". We will learn their names, whether they are endemic (from here originally) or newcomers, general aspects of their biology that suit them to living in an urban environment, how natural selection shapes the traits similarly and differently for species in urban versus wilderness settings, and what happens when the wild and the domesticated members of the community meet one another. For non-science students in all disciplines. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

EEB198H1 - Genes and Behaviour

Hours: 24L

In this course you will experience the new paradigm in behaviour genetic research. You will learn why the concept of a nature-nurture dichotomy is passé and that it has been replaced by a new understanding gained from animal and human research in the areas of gene by environment interaction and epigenetics. We will discuss how our genome listens to our environment and the effect this has on our health and behaviour. We will learn why our early experiences are critical for the development of our brains and our bodies. Together this new body of knowledge will help us understand how individual differences in behaviour and health arise. For non-science students in all disciplines. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

EEB199H1 - Humans, Evolution and Ecology

Hours: 24L

Learn about the evolution and ecology of humans and other species. Through discussion, scientific literature research, seminal readings, written reports and presentations you will discover scientific answers to questions such as (topics vary among years): How did life originate? Why are there so many species? Where did humans come from? Will humans become extinct? How can we explain human DNA and human brain size? Need we worry about climate change? What is causing the sixth extinction crisis? Are there ecological limits to human population size? What will life be like in the Anthropocene? Are humans still evolving? For non-

science students in all disciplines. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

ENG196H1 - Cook the Books

Hours: 36S

If, as Brillat-Savarin so famously said, “you are what you eat”, then what are we? What do our eating choices reveal about us and what we value? In this class, we will examine stories about farming, cooking, and eating in order to understand how culture shapes culinary traditions and vice versa. But we don’t stop there: through cooking and eating together, we will create new stories about our food and our relationship to the earth that sustains us. Co-taught with a professional chef, this course combines literary and historical analysis with hands-on cooking classes, shared meals, and food-oriented field trips. Restricted to first-year students. Not eligible for CR/NCR option. An additional fee to cover food and field trip costs is required.

Exclusion: ENG197H1, ENG198H1, ENG199H1
Breadth Requirements: Creative and Cultural Representations (1)

ENG197H1 - Time Travel and Narrative

Hours: 24S

From H.G. Wells to *Star Trek* to *Bill and Ted’s Excellent Adventure*, tales of time travelers remain captivating. What does our fascination with time travel tell us about storytelling and narrative? This course will explore the questions that time travel raises about narrative as well as history, temporality, subjectivity, and agency. We will look at examples of time travel in film, television, and books as well as philosophical and scientific writing about it. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: ENG196H1, ENG198H1, ENG199H1
Breadth Requirements: Creative and Cultural Representations (1)

ENG198H1 - Representing Disability

Hours: 24S

Understanding disability as a cultural concept—not a medical condition or personal misfortune—that describes how human variation matters in the world, this course

asks: how do literary texts represent physical and intellectual disability? Reading drama, fiction, and poetry, we will consider how disability prompts new strategies of writing and thinking, in order to consider what new forms of representation disability can produce, and what the concept of disability can teach us about being human. We will consider literary, visual, performative, and performance-based possibilities for bodies and minds that resist normative structures, theorize ideas of access, cure, and care, and claim disability as enlivening identity. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: ENG196H1, ENG197H1, ENG199H1
Breadth Requirements: Creative and Cultural Representations (1)

ENG199H1 - Tree Stories

Hours: 24S

Trees are all around us. We climb them, tell stories about them, write on paper, at desks, in homes made from them. But most people tend to take them for granted. This course considers how we imagine trees in works of art and legend and what trees can teach us about our own place in the world. We will read stories and poems as well as exploring the trees around campus and the environment we share. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: ENG196H1, ENG197H1, ENG198H1
Breadth Requirements: Creative and Cultural Representations (1)

ENV194H1 - Topics in Climate Change

Hours: 24S

In this class we will discuss the underlying science of the climate system and also explore how this information is communicated effectively. Restricted to first-year students. Not eligible for CR/NCR option.

ENV195H1 - The Sustainability Transition

Hours: 24S

Can you imagine a sustainable future? What would it look like? How can we get there? We are often bombarded by negative images about our future and the future of the planet. In this seminar class we will explore what a sustainable world might look like and ways that we can

get there. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

ENV196H1 - Environment, Culture and Film

Hours: 36S

This first-year foundation course will introduce students to the scope and seriousness of some of current ecological concerns, as well as some core principles and concepts in the field of the intersection of environment and culture, through the lens of feature films. Through journal reflections, class discussions and guided critical thinking exercises, and a paper, students will be able to build confidence and enthusiasm for further study in environmental studies, within a small seminar setting. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

ENV197H1 - Idleness and the Environment: What Does Sustainable Work Mean?

Previous Course Number: ENV198H1

Hours: 24S

In a fast-paced, high-tech world—and one that must rapidly decarbonize to address the climate crisis—the relationship between labour and environment is rapidly changing. This course explores the intersection of work and the environment, considering how ideas about leisure and idleness might offer new pathways for a more sustainable future. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

ENV198H1 - Environment & Mental Wellness

Hours: 24S

This foundations course is an introduction to Environmental Psychology and related disciplines. We will examine the mutual relationship between the human psyche and the environment, with a focus on mental wellness. Topics will include: psycho-evolutionary environments, place attachment and identity, neurological

toxins and environmental health, the modern period, cultural perceptions on nature-psyche, climate anxiety and ecological grief, nature connectedness and restorative environments. As a foundations course, students will develop key academic skills such as academic literacy, communication and application, interdisciplinary critical thinking, as well as creative problem solving. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

ENV199H1 - Debating & Understanding Current Environmental Issues

Previous Course Number: SII199H1 LEC0201

Hours: 2L

The course examines current environmental issues for which there is no easy answer or consensus position. For instance, to help solve climate change should we generate more electricity from nuclear power-plants, which have no greenhouse gas emissions? Or instead, should we phase out nuclear plants because of possible accidents, costs and radioactive wastes? The seminar examines the scientific and political aspects of such issues and debates the pros and cons of each. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

ESS196H1 - Life and Death in the Solar System

Previous Course Number: PMU199H1

Hours: 24L

Earth is the only planet in the solar system known to support life. Through directed readings, seminars, videos and lab visits, participants in this course will work with instructors whose own research tackles important questions concerning the origin of life on earth; the limits to life on this planet; implications for life under extreme conditions elsewhere in the solar system; and the life cycles of the planets themselves. The course will involve reading of scientific literature, student-led discussions, oral presentations and research projects, as well as potential field trips to sites in Southern Ontario. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS197H1 - Earth and Life through Time

Previous Course Number: PMU199H1

Hours: 24L

This seminar will look through the lens of earth history to explore drivers of change in the biosphere and the impacts of these changes. We will focus on episodes of mass extinction, and the spectacular landscape changes and speciation events which often followed. Abrupt or gradual climatic changes, massive volcanism, asteroid impacts, catastrophic carbon releases, and human activity will be evaluated as the causes of major extinction events in Earth history. The course will involve reading of scientific literature, student-led discussions, oral presentations and research projects, as well as potential field trips to sites in Southern Ontario. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS198H1 - Resources and Sustainability

Previous Course Number: PMU199H1

Hours: 24L

The rise of humanity is intricately linked to the exploitation of natural resources. From its earliest attempts to use fire and extract metals from rocks, to coal-fired steam that brought the industrial revolution, hydrocarbons that fuel international travel and trade, nuclear energy to produce electricity, and the reliance on smartphones in our daily lives, the planet's resources have brought innovation and problems and require us to ask questions regarding sustainability. This course will explore the gamut from resource extraction and trading, to its societal consequences including global politics, environmental pollution, and remediation. The course will involve reading of scientific literature, student-led discussions, oral presentations and research projects, and potentially field trips to sites in Southern Ontario. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS199H1 - Earth Science Perspectives on Human Origins

Hours: 24L

Archaeologists and paleontologists depend on earth science to provide the contextual information that is essential to our understanding of human evolution. Among

the topics this course will examine are the methods used to determine the age of discoveries, approaches to understanding the environments human ancestors lived in, and how geologists unravel site formation processes. Our discussions will include the role of fire in human evolution, the adaptations of Neanderthals, and the timing of the first appearance of modern humans. The course will be structured around key research localities including Hadar, the Cradle of Humankind, Olduvai Gorge, Wonderwerk Cave, Kebara Cave, Hohlefelds, and Pinnacle Point. The course will involve reading of scientific literature, student-led discussions, oral presentations and research projects. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

FAH194H1 - Public Art: Local and Global

Hours: 24S

We are surrounded by public art, whether in the form of official commemorative monuments or ephemeral (some say illegal) street art. We will examine the history and current practice of this important art form in Toronto and by comparison, globally. The focus will be on discussing the nature, roles, and issues pertaining to contemporary public art that we can see in situ in downtown Toronto. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

FAH195H1 - On Foot: From Pilgrimage to the Mobile City

Hours: 24S

Walking is a basic human activity, yet it also defines and shapes us. In order to understand the permutations of this seemingly simple activity we will look at walking in a variety of contexts through the study of texts, art, movies and the built environment. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

FAH196H1 - Marco Polo's World

Hours: 24S

This course explores the visual and material worlds of the Italian traveller Marco Polo, which are described in his *Travels*. Together we will read sections of this text and explore their meaning with respect to the objects and monuments of Marco Polo's time from the regions to which he travelled. By studying cartography, art, architecture, and urban form in the expansive medieval world of Marco Polo, the course will introduce us to the global world of the Middle Ages. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

FAH197H1 - Classical Art from Greek Gods to Roman Gladiators

Hours: 24S

The ancient Greeks and Romans lived in a world full of images. Ancient visual culture comprises not only the high arts but also the everyday. This course is meant to introduce students to key ideas about how art and images in general impacted the life of ancient Greeks and Romans. Students will learn to examine various categories of visual material ranging from the pictorial and applied arts (painting, sculpture, architecture) to everyday artifacts (for example, domestic wares, jewelry or weapons). Through a series of discussion-centred seminar sessions students will explore the interconnections between art and ideology, art and identity as well as visibility and viewing. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

FAH198H1 - Shocking Artists, Shocking Art

Hours: 24S

Art causes scandals for many reasons, provoking a range of consequences, including censorship, cuts to government funding of the arts or even destruction of the work in question. In this course we will consider a number of kinds of art scandal arising from exhibition in public galleries and urban spaces, including those that have to do with legal issues such as plagiarism and vandalism; aesthetic objections on the part of the public, ranging from perceived obscenity to simple resentment of abstract art; racism; sacrilege; and political subversion, amongst others. We will consider the work of artists including Chris Ofili, Joep van Lieshout, Paul McCarthy, Damien Hirst, Michael Snow, Sally Mann, Banksy, Rachel Whiteread, Richard Prince, Andres Serrano, Robert Mapplethorpe, Carl Andre, Maya Lin, and Jeff Koons, amongst

others. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

FAH199H1 - Architecture of Toronto

Hours: 24S

The architecture of Toronto is characterized by artful and influential monuments as well as stylistically incoherent neighbourhoods, vibrant civic spaces alongside dysfunctional infrastructure. This course investigates how Canada's national metropolis came to embody such extremes of architectural richness and urban contradictions. The seminar focuses on how to "read" the buildings of Toronto and think critically about the forces that have shaped city planning, monuments, public space, and concepts of heritage. Readings and discussions will be combined with field trips, research on site or in the archives, and direct engagement with local communities and preservation initiatives. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

FCS194H1 - Urban Youth Languages of the World

Hours: 24S

Are there such phenomena as urban youth "languages"? How do they evolve and what commonalities or divergences are there? In this course, we will survey a range of urban youth languages that have emerged in African, North American and European contexts – with specific focus on their structural (linguistic) and social typicalities. Discussions and presentations will focus on the sociolinguistic concepts of language contact, bi/multilingualism, lexical innovation/renovation, language mixing, etc. in relation to youth language practices. We will be comparing major varieties of these language practices within and between the continents, and also be assessing their prospects and implications for language change. This course is taught in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

FCS196H1 - Historical, Geographic and Social Variation in French

Hours: 24S

Throughout most of its nearly 1200-year history, the language that we now call French was not a single linguistic entity, but rather a collection of related dialects. Although socio-political factors resulted in a partial unification of these dialects during the 18th and 19th centuries, the unification was, to a large extent, outweighed by French colonization of areas such as North America and Africa, which resulted in even greater linguistic diversification. The purpose of this course is to provide an overview of the extensive variation that exists throughout the French-speaking world. Topics to be covered include phonetics (pronunciation), lexicology (word selection) and morpho-syntax (grammar). This course is taught in English. No knowledge of French or linguistics is required. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

FCS197H1 - Pleasure, Pain and Nostalgia in Belle Époque

Hours: 24L

This course will explore ideas and cultural representations of 19th century France through examples from art, philosophy, and literature with an emphasis on the critical discussion of two literary narratives that challenged tradition and authority: Flaubert's "Madame Bovary" and Maupassant's "Bel-ami". The course will be held in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

FCS198H1 - The Literacy of Images: Interactions between Text and Other Media

Hours: 24L

How do images create meaning in texts? How do words guide the interpretation of images? This course will examine relations between texts from different literary genres (the Bande Dessinée, fiction and autobiography) and other media (illustration, photography, cinema) through an interdisciplinary theoretical framework, by combining perspectives from literature, cinema, illustration, and photography. The course will be held in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

FCS199H1 - Marketing in the French Speaking World

Hours: 24S

This course investigates sociocultural and linguistic issues surrounding market expansion and marketing of products and services to French-speaking audiences in Canada and elsewhere. Students consider challenges posed by increased globalization through comparisons of English- and French-speaking communities, while exploring basic marketing theory. Through case studies of successes and failures, students examine how companies develop and adapt branding and messaging for Francophone audiences by integrating differences in humour, values, politics, and financial considerations. Students thus develop an understanding of the Francophone consumer and gain skills for advertising and branding in a Francophone or bilingual environment. This course is taught in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

FOR199H1 - Trees in Architecture and Urban Design

Hours: 24L

Most depictions of "cities of the future" are a fusion of buildings and forests. Is this happening? If not, why not? This course bridges the disciplines of forestry, architecture, and landscape and urban design to examine the evolving role of trees in human habitations. The course will survey designs incorporating trees on buildings, from the hanging gardens of Babylon to the Bosque Verticale of contemporary Milan, the evolution of urban forestry and urban "green infrastructure", and history and current policy initiatives and debates. The course will involve site visits and guest lectures in the City of Toronto, readings of both popular and scholarly literature, as well as student design projects and presentations. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

Course Experience: University-Based Experience

GER194H1 - Our Vampires, Ourselves (E)

Hours: 24S

Vampires are among the most fascinating figures of popular culture. Since Bram Stoker's *Dracula* (1897) –

and, in fact, well before that – they have been haunting the human imagination in various shapes and forms. This course examines the figure of the vampire as a potent cultural metaphor in the German context and beyond, showing how every age embraces the vampires it needs and gets the vampires it deserves. The goal is to teach students to reflect critically and independently on issues of self and society and to develop a structured approach to critical thinking in general. All readings and class discussions will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

GER195H1 - Cities, Real and Imagined (E)

Hours: 24S

Cities have been described as places of desire and places of fear. They pulse with life, bringing together people from different class, gender, and ethnic backgrounds, simultaneously giving rise to a sense of freedom and oppression, a sense of belonging and alienation. This course will explore the city as a physical reality that shapes our lives, but is also a projection of our deepest imaginings. Through readings of philosophical and sociological texts by influential theorists of the city, we will consider various ancient and modern conceptions of urban space and subjectivity. Alongside these theoretical readings, we will also examine literary and filmic representations of the city as a space of desire, memory and power. All readings and class discussions are in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

GER198H1 - Technology and the Human in German Literature and Thought (E)

Hours: 24S

Technology has changed our lives, and scientific knowledge has enhanced human capacities. At the same time, though, this development is also experienced as a threat. Killing missiles, controlling 'Big Brothers,' and monstrous creatures are often considered the flip-side of technological advancement. This course asks: What is the relationship between technology and the "human"? Can there be progress of technology without a regress of humanity? Or is technology liberating us from the bonds of nature? We will discuss possible answers to these questions by looking at key texts in German literature, philosophy, and cultural history from the eighteenth

century to Post-Modernity. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

GGR196H1 - The Yard: Micro-Geographies of Household Outdoor Spaces

Hours: 24S

A "yard" is the area of land immediately adjacent to a building, often a residence. By examining micro-geographies (that is, detailed empirical studies of a small, specific locale) of these ubiquitous, everyday spaces, the course explores how yards are intimately connected with broader ecologies, cultures, and social relations, all of which can be explored using geographic theories and techniques.

The course also serves as an introduction to other subjects that are relevant to navigating post-secondary life, such as: critical reading; conducting university-level research; presenting and communicating ideas in the classroom; teamwork, and how to benefit from it; and developing social networks.

Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

GGR197H1 - Re(story)ing the Earth: Indigenous Wisdoms, Ecological Stewardship, and Global Climate Action

Hours: 24S

In current times of ecological precarity, marked by climate change, ecological degradation and mass species extinction, the task of ecological restoration has become an urgent, perhaps the most urgent challenge for humanity. At its core, this task is fundamentally about re-story-ing human relationships with the more-than-human world. It is about changing the story of who we are as humans and how we relate to and belong to the rest of the world. For this, we would do well to turn to Indigenous cultures around the world for guidance. Indigenous Peoples around the world have often maintained relationships of care, respect and reciprocity with the natural world and offer pathways healing ecologies (and us in the process). The course will draw from Indigenous worldviews, ontologies, activism, and environmental justice movements from around the world to question top-down, market-oriented, technocentric solutions to climate

change and ecological crisis; and will explore alternative ways of organizing our social and economic lives to address it. We will learn from Indigenous scholars, and from Indigenous Elders and community leaders from Canada and the global South, about ecological stewardship, efforts for decolonization and social transformation, and learn how to translate these lessons to everyday environmentalism that we can practice here and now. This learning will be facilitated by guest lectures, videos, and virtual visits with communities in different parts of the world. Action-oriented assignments will foster problem-solving and experiential learning. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

GGR198H1 - Mobility and Borders

Hours: 24S

This course examines the political geographies of transnational migration. It asks how spaces of migration and mobility are political, and how migration politics are tied to inequalities wrought through intersecting histories of race, class, and gender. It seeks to extend our understandings of migrants, borders, and mobility, and it explores the processes through which mobility is produced, delimited and structured. We will consider the transnational politics of migration, the militarization of border zones, and the political spaces of migrant displacement, dispossession, and dislocation. The seminar readings focus on classical paradigms as well as emerging approaches in immigration studies. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

GGR199H1 - Global Racial Capitalism in the 21st Century

Hours: 24S

This course uses the tools of political economy, decolonial and anti-colonial theory, and critical approaches to the study of racism to explore how the construction of racial categories continues to be integral to the working of capitalist systems. We will explore the reasons why capitalism was never meant to work for everyone by examining how and why racial categories have continued to matter since capitalism's earliest formations. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

HIS190H1 - Freedom Schools

Hours: 24S

This first-year seminar explores radical traditions of education beyond and in resistance to formal schooling. Transnational in scope—and journeying from the late nineteenth century to the present day—we will study the pedagogical innovations and grassroots struggles of anarchic youth, guerrilla intellectuals, and feminist revolutionaries who used education broadly, and historical inquiry in particular, as tools for empowerment and collective liberation. Focusing on primary sources from archives of anticapitalist, antiracist and anticolonial movements, we will investigate traditions of self-teaching and co-learning, genealogies of critical and transformative pedagogies, the construction of decolonial survival and supplementary schools, student mobilizations within and against the university, as well as abolitionist education in our contemporary moment. This course invites participants to interrogate the relationship of education to freedom and justice through collective criticism, self-reflection and creative expression. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

HIS191H1 - Pandemics and Human History

Hours: 24S

We have all just lived through a major historical disruption caused by CoViD-19. In this course, you will be invited to use your experience of the pandemic as a tool for understanding other times, other places, and the study of history itself. We will study plagues and diseases from the ancient world to the Twentieth Century, and introduce methods from social, cultural, and economic history, as well as concepts from the histories of science and medicine. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

HIS192H1 - A History of Queer Asia

Hours: 24S

A first-year seminar on the history of queerness, in all its complexity and diversity, in the no less complex and diverse settings of East, South, and Southeast Asia. Our journey will encompass empires and Indigenous peoples, rulers and rebels, and range from early recorded history down to the twentieth century. Focus will be placed on primary sources and introducing students to the evolving

definitions of "queerness" itself. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

HIS193H1 - Calls to Action: The TRC and Residential Schools in Canadian History

Hours: 24S

The last Indian Residential School in Canada closed in 1996. For more than a century and half before that, the Canadian state supported church-run residential schools intended to take Indigenous children away from their families, cultures, languages and traditions. Over 150,000 children passed through the doors of these different schools that operated from coast to coast. Using the formal report of the Truth and Reconciliation Commission as a central text, this course explores that history and the ongoing legacy of residential schools in Canada while introducing first year students to historical research methods and sources. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

HIS194H1 - Power, Resistance, and the Graphic Novel

Hours: 24S

This course will look broadly at the question of power and resistance in the Americas (Canada, the United States, and Latin America) through the prism of graphic novels. Each week we will read a graphic novel related to important historical moments or events, drawing on scholarly articles to help us contextualize the novel. We will discuss the medium of graphic novels, their history and place in the broader culture, as well as how they might help or hinder our ability to study and disseminate information about the past. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

HIS195H1 - Remembering and Forgetting

Hours: 24S

This course introduces students to the interdisciplinary study of history by exploring processes of remembering and forgetting intrinsic to every society. Topics include the

ideas of history and memory, memory cultures and narratives and counternarratives and the study of legal trials, museums, monuments, novels and films as popular vehicles of historical knowledge. The course analyzes in particular how the experiences of war and violence have been both remembered and forgotten. The intersection, and dislocation, between trauma and remembrance is a main theme, as is the topic of collective memories in post-conflict societies. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: AMS199H1

Breadth Requirements: Society and its Institutions (3)

HIS196H1 - Religion and Violence

Hours: 24S

This seminar explores the roles of religion in extreme violence. Working backward from the 1990s (Rwanda, Yugoslavia), we will consider cases including Guatemala, Cambodia, Indonesia, the Holocaust, Armenians, German Southwest Africa, and genocide of Indigenous peoples in North America. Students will produce a final project based on original research. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

HIS197H1 - Medieval Medicine

Hours: 24S

This course focuses on the theories and practices of medicine in Europe, c.500-1500, by examining surviving evidence from the period, including (in translation) pharmaceutical recipes, diagnostic guides, doctor's records, treatises on anatomy, surgery and gynecology, commentaries on Hippocrates and Galen, laws and regulations for physicians, university lectures, disputes in court records, satirical writings against physicians, and so on, as well as visual evidence of artifacts, surgical instruments, manuscript illumination/diagrams, hospital sites and design. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

HIS198H1 - Decolonizing Women's History

Hours: 24S

This course introduces students to the historiographical and theoretical debates in women's and gender history

from a global perspective, with emphasis on the local histories of women in the non-western world. Students will study the themes in women's history as articulated by first and second wave feminists. The second part of the class deconstructs the basic assumptions of Western feminism through the perspective of post-colonial feminist writings and empirical studies. The readings are structured so that you consider how examples from Asia disrupt narratives of universality in Western feminist epistemologies. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

IMM199H1 - Immunology in the News Today

Hours: 24S

Why do we get sick? How do vaccines work? Does our diet influence our immunity? This course is intended to inspire curiosity about questions generated by immunology concepts that are prevalent in the news today. Different topics will be explored each week including immunity worldwide, human vaccinations and the mucosal immune system. Topics will be placed in context through real-life case studies, immunology virtual laboratory simulation, interactions with faculty members and extensive coverage of the basic science underlying each topic. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

INI100H1 - The City Where Movies Are Made

Hours: 36S

In this course, first-year students will be introduced to film culture in Toronto from a variety of angles, including: a history of the city onscreen (both as itself and as a popular shooting location for American productions); an account of major Toronto filmmaking sites and institutions; introductions to local directors and producers; and overviews of contemporary local film festival culture (TIFF and beyond) as well as the city's film-critical community. Through a combination of lectures, screenings, field trips and special guest speakers, the students will be moved to consider both the vitality of Toronto's film scene as well as its connections to other aspects of the city. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

INI101H1 - Writing, Advocacy, and Social Media

Hours: 36S

An introduction to the concept of the city as a creative environment promoting not only growth and wealth but also social justice, equality, cooperation, and civility. Students will learn to build their own writing practice to help them to observe, interpret, and reflect upon the process of urban interaction and the relationship between creativity and justice. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

INI102H1 - Storytelling Through Creative Nonfiction

Hours: 36S

An introduction to creative writing techniques and various forms of creative nonfiction (personal essay, biographical essay, flash nonfiction, lyric essay, visual essay, and other experimental forms) through which students will explore and develop their conscious connection to the natural-urban landscape. The course will include activities such as field trips, readings, interviews, and journaling to generate the material for essays on engagement with nature in the city. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

INI106H1 - Storytelling through Literary Journalism

Hours: 36S

An introduction to literary journalism, in which students study the craft of storytelling along with interviewing, reporting, and the journalist's ethical stance. Guest speakers, field trips, writing activities and course readings will help students engage deeply with their environment and develop the skills and sensitivity required for literary reporting. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

INI196H1 - Environmental Writing

Hours: 24L

From environmental disasters and ecological collapse to climate change denial and celebrations of nature and wilderness, we will explore the diverse ways humans imagine and write about the natural world and the consequences of such writing. We will study a variety of nonfiction texts, images, and videos about ecology, the environment, nature, wilderness, and sustainability as we consider what these terms mean. From the 19th century American transcendentalists to 20th century ecologists, and 21st century scientific, Indigenous, feminist, and anti-racist perspectives, we will analyze the many ways that humans use writing to argue for certain ways of seeing and interacting with our planet and the creatures that inhabit it. Through weekly reading, written reflections, and discussion, students will hone their deep reading, research, and writing skills. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

IRE199H1 - Why We Work: Understanding Work Through the Prism of Art & Culture

Hours: 24S

Why do we work? What does work mean to the average person? These questions are not as straightforward as they appear. We work for the bulk of our lives and most of our days are spent with coworkers who are neither family nor our closest friends, but we often fail to realize how self-defining work really is. This speaks to work's centrality but also to its invisibility in reflective discourse. However, through "popular" representations of work (e.g., such as in story-telling, cave drawings, hieroglyphs, music, writing, painting, television, film, video games, etc.) we can begin to better understand the meaning of work and how this has changed over time. Readings in anthropology, history, economics, sociology and employment relations plus film and art criticism will help us explore these questions from an interdisciplinary perspective; assignments will encourage students to reflect on their own experience of work. Developing strong analytical and communication skills is an important goal of the course. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

ITA196H1 - Image and Text in Medieval and Renaissance Italian Culture

Hours: 24L

The course will explore various aspect of the interaction between literature and the visual arts in Italy from the Middle Ages to the end of the Renaissance. The focus will be on the intersection between the literary and visual modes of perception in the works of representative Italian authors from the Fourteenth to the Sixteenth Centuries. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

ITA197H1 - The Fine Art of Murder: Reading Detective Fiction

Hours: 24L

Since its inception in the Nineteenth century, detective fiction has been one of the most popular literary genres, proving adept at both entertaining and shining a critical light on social and political problems. This course will explore the many faces of detective fiction addressing questions such as: Why does crime hold such a fascination for modern audiences? What kind of pleasure do we derive from reading stories that often follow established conventions and rules? What do these novels about crime and punishment tell us about broader social and political issues? Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: VIC197H1

Breadth Requirements: Creative and Cultural Representations (1)

ITA198H1 - Machiavelli and Machiavellianism

Hours: 24L

An examination of Machiavelli's political doctrine in *The Prince* and the development of his ideas in politics, ethics and the arts. Special attention will be paid to the enduring relevance of his legacy in the modern world. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: VIC142H1

Breadth Requirements: Creative and Cultural Representations (1)

ITA199H1 - Italian Fascism and Global Responses: The Dark Side of Italianità

Hours: 24L

After WWI, Italian society faced a political, economic, and moral crisis that resulted in the rise of fascism. Using diverse sources (media, literary texts, movies, architecture and design), this course explores various reactions in Italy and abroad to the rise of Mussolini and the totalitarian State. Why did common people, intellectuals, politicians, and business and community leaders around the globe succumb to the seduction of fascism? How did other people denounce fascist violence? After an introduction to Italian fascism, the course will consider global reactions to Italian fascism and diverse responses in Italian communities abroad (e.g. Canada, USA, Argentina). Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

JCI199H1 - Italians in Canada: Histories, Journeys, Struggles, Successes

Hours: 24L

This course explores the presence of people from the Italian peninsula in what is now known as Canada. The course begins with discussions on Giovanni Caboto's and other explorers' journeys to then focus on contemporary Italian-Canadian communities. This course provides students with the critical tools necessary to understand various historical, linguistic, culinary, spiritual, political, and creative elements of Italian-Canadian identity and life. Students of both Italian and non-Italian heritage are most welcome in this course, which is taught in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

JRC199H1 - Truths & Reconciliations in Canada

Hours: 24S

In this course, we examine the idea of reconciliation among Indigenous and Canadian nations by considering the complicated role of religion and spirituality in "truth and reconciliation." Specifically, residential schools for Indigenous children were a collaboration of church and state that violently broke the spirit and intent of the treaties—or sacred promises—made between the Crown and Indigenous nations. The course will set the 2015 Truth & Reconciliation Commission of Canada in a longer

history of twentieth-century commissions, reports, and petitions in which both Indigenous and Canadian people (and some churches) named the cultural and spiritual genocide of residential schools and called for action. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

JRN199H1 - Exodus and Enslavement

Hours: 24S

Popular conceptions of enslavement in North America have influenced how we frequently imagine enslavement in Exodus and related biblical and related texts from the ancient Near East. Yet, depictions of enslavement in these ancient texts may be strikingly different from our ideas of enslavement in North America. This course explores similarities and differences between enslavement in these different historical contexts. It also examines how biblical texts were utilized in debates over and revolts against enslavement primarily in the eighteenth and nineteenth century. All readings will be in English. No knowledge of Hebrew is required. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

LIN192H1 - Sustaining Indigenous Languages

Hours: 24S

There has been much publicity in recent years about language shift and language loss and, along with it, language revitalization. In this course we examine shift involving Indigenous languages – and particularly those of Canada – from a variety of perspectives, and looking at reasons why one might want to 'save' a language. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN193H1 - African Languages and Language-based Music

Hours: 24L

The connection between language and music is one of the oldest debates in the history of humanity. In this course, we will explore this issue by surveying African languages

and language-based music (e.g., talking drums, xylophones, singing, and chants). Students will learn about the building blocks of human language and the linguistic features unique to African languages. We will focus on how various African cultures communicate by transposing linguistic features to musical melodies and how listeners comprehend this musical code. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN194H1 - The Science Behind Our Accents

Previous Course Number: TBB199H1
Hours: 24P

When we speak, the sound is transmitted through the air as a complex sound wave. How are various speech sounds – vowels and consonants – manifested acoustically? What does it mean, in physical terms, to have an accent? These and other related questions will be explored through computer-based acoustic analysis and perceptual experimentation. Upon completion of this course, students will (i) have overview knowledge of basic acoustic properties characterizing phonetic variation pertaining to speech, and accents in particular, (ii) be able to conduct simple speech production and perception experiments, and write up results in the form of scientific research reports, (iii) begin to read and understand scientific literature pertaining to acoustic phonetic variation and its relevance for communication. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN195H1 - Babel: Language in the Mind of Speakers

Hours: 24L

What is the relation between language and thought? In this course we examine how language is represented in our minds, and how language and cognitive processes interact. While the link between words and meanings is arbitrary and reflects culture, language is considered to be a universal property of our species. We will examine the place of language in the architecture of the mind; the debates about the universality of language structure vs. linguistic relativism; and how language and thought interact in children's development. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN196H1 - Language and Communication

Hours: 24L

We will explore the ways in which information is communicated in conversation. We will consider systematic ways in which what a speaker intends to communicate with language goes beyond what one says in conversation. The goal of the course is to investigate the ways in which speakers rely on knowledge of language and implicit "rules" to enrich and transform the literal content of someone's utterance.

Students will familiarize themselves with some fundamental concepts in linguistic semantics and pragmatics. They will develop analytic skills necessary to analyze a text in an academic context and beyond. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN197H1 - Language and Social Justice

Hours: 24L

This course explores how language is used to construct and reinforce unjust social structures. Topics may include: the underlying sexism, classism, racism, and ableism of prestige dialects and prescriptive language education; the history and consequences of national language movements; language endangerment, documentation, and revival; sign languages and language rights for the deaf and hard-of-hearing; popular media representations of linguistic variation, especially vocal fry, uptalk, and regional accents; and the relationships between language and sex, gender identity, and sexuality.

Students will develop research, analytic, and writing skills through critique and discussion of assigned texts, independent research projects, and regular written and oral presentation of their work. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN198H1 - Language Diversity

Hours: 24L

There are estimated to be about 7000 languages currently spoken in the world. What do they have in common? In what ways are they different? This course will explore these questions, covering such topics as meaning, sound systems, the structure of words, the order of words in sentences, question formation, concepts such as subject and object, tense systems, pronoun systems. We will also discuss language loss and revival. Students will develop analytic skills as they consult published grammars and other resources to address these issues. Students will share their findings through oral and written presentation. Examples will be drawn from a wide range of languages. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN199H1 - Exploring Heritage Languages

Hours: 24L

We will explore how speakers use Heritage Languages in Toronto, using data recently collected in the GTA, so students should be familiar with one of these languages. We will collect, organize and interpret information about heritage languages in Toronto. We will look for speech patterns that differentiate first, second and third generation speakers in Toronto from corresponding speakers in their countries of origin, and look at the effects of cultural and language attitudes and usage.

Students will develop analytic skills as they explore a range of research methods and resources to address these issues. Students will share their findings through oral and written presentation, including online formats. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

MAT192H1 - Mathematics and Art

Hours: 36L

This course will explore the various bridges between Mathematics and Art.

We will combine exploration of mathematical concepts with the artistic visualization of those concepts through a range of mediums, including fine art, architecture, origami, textile, fiber art, dance and movement, craft, and digital art. We will investigate the potential of mathematics to generate visually appealing objects that reveal some of the structure of the underlying mathematics. On the flip

side, we study existing artworks from a mathematical vantage point to uncover new aspects of their beauty.

One of the main goals of the course is to open a new window to process mathematical concepts and to link the creative processes inherent in both mathematics and the arts.

Along the way students develop insight into the diversity and overarching nature of mathematics as well as an intuitive understanding of concepts such as numerical sequences, Euclidean geometry, tiling, fractals, platonic solids, hyperbolic geometry, and topology. This course is a combination of theory and hands on activities. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: High school algebra

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT193H1 - Women's Mathematics

Hours: 36S

Mathematics has been shaped in significant ways by the work of outstanding female mathematicians such as Hypatia, Emmy Noether, Sofia Kovalevskaya, and Maryam Mirzakhani. Despite these successes, women still experience barriers to entering the field and participating at the highest levels. This course will blend an exploration of mathematics created by women with a study of the issue of women in mathematics. Students will have the opportunity to examine the complex factors that impact women's participation in STEM, learn about the lives of female mathematicians, create their own mathematics, and sharpen their spatial cognition and logical thinking skills. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: High school level algebra.

Exclusion: Not intended for students in a Mathematics Specialist or Major program.

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT194H1 - Mathematical Personalities

Hours: 24L

An in-depth study of the life, times and work of several mathematicians who have been particularly influential. Examples may include but are not limited to: Coxeter, Euler, Germain, Grothendieck, Hilbert, Kovalevskaya, Kowalewski, Mirzakhani, Newton, Noether, Ramanujan. Not intended for students in a Mathematics Specialist or

Major program. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT195H1 - Mathematics as an Interdisciplinary Pursuit

Hours: 24L

A study of the interaction of mathematics with other fields of inquiry: how mathematics influences, and is influenced by, the evolution of science and culture. Art, music, and literature, as well as the more traditionally related areas of the natural and social sciences may be considered. Not intended for students in a Mathematics Specialist or Major program. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT197H1 - Mathematics as a Recreation, Mathematical Discovery and Creative Problem Solving

Hours: 24L

This course is an exploration into the creative process and use of imagination as they arise in the context of mathematical problem solving, puzzles, and recreational mathematics. The topics for the course may include a study of games, puzzles and problems that require a pre-Calculus background. One of the course's main goals is to hone each participant's creativity and mathematical problem-solving skills while guiding them towards the 'Aha!' experience which accompanies independent discovery. Not intended for students in Mathematics Specialist or Major programs. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT198H1 - Cryptology: The Mathematics of Secrecy and Security

Hours: 24S

How do we send our own confidential information through secure channels, and how can we break codes to uncover the secret information of our adversaries? The mathematical field of cryptology is dedicated to answering

such questions. In this course we will study breakthroughs in cryptology, from secret messages in the ancient world and the Enigma cipher in World War II, to modern cryptosystems that facilitate online commerce. Along the way, you will develop a sophisticated understanding of how numbers interact and develop the ability to communicate messages secretly and mathematics clearly. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: High school level algebra.

Exclusion: Not intended for students in a Mathematics Specialist or Major program.

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT199H1 - Aha! Mathematical Discovery and Creative Problem Solving

Hours: 36S

This course is an exploration into the creative process and use of imagination as they arise in the context of mathematical problem solving. The problems, which are all at a pre-calculus level, are chosen primarily by the criterion of aesthetic appeal, and emphasize reasoning rather than technique. Still, many of them are quite challenging, and substantial independent thinking will be required, the course is therefore appropriate for students from a variety of backgrounds and disciplines, including hard sciences. Its goal will be to hone each participant's creativity and mathematical problem-solving skills while guiding them towards the 'Aha!' experience which accompanies independent discovery. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: High school level algebra

Breadth Requirements: The Physical and Mathematical Universes (5)

MUN100H1 - Global Innovation

Previous Course Number: MUN101H1

Hours: 24S

Innovation has always been a key driver of economic growth, population health, and societal success. Transformative change has historically been linked to major innovations such as urban sanitation, pasteurization, the printing press and the industrial revolution. Currently, the opportunity to enhance life chances worldwide relies on innovating for the poor, social innovation, and the ability to harness scientific and technological knowledge. What precisely is innovation? When does innovation happen? Who benefits from innovation? How can innovation be fostered, and how do

innovations spread? Relying on major global transformations and country-specific case studies (for example, South Korea, Taiwan, Israel and India), this course examines the drivers of innovation, the political, social, economic, and scientific and technological factors that are critical to promoting innovation and addressing current global challenges, and the consequences of innovation. Restricted to first-year students admitted to Munk One. Not eligible for CR/NCR option.

Prerequisite: Admission to Munk One

Breadth Requirements: Society and its Institutions (3)

MUN110H1 - Peace, Conflict and Justice in the Indo-Pacific

Hours: 24S

In recent years, countries including Canada, India, Japan, and the United States have devised Indo-Pacific strategies in recognition of the rising importance of the region. The region now accounts for half of the world's people, 60 percent of world's GDP, and two-thirds of global economic growth. Devising effective solutions for the policy challenges related to the Indo-Pacific will be crucial to prevent catastrophic conflict and promote sustainable prosperity in the 21st century. In this class, students will examine the nature of policy problems with a global scope - in areas such as the management of geopolitical conflict, economic security, and human rights and transnational justice - and devise solutions tailored to emerging challenges in the Indo-Pacific. Restricted to first-year students admitted to Munk One. Not eligible for CR/NCR option.

Prerequisite: Admission to Munk One

Breadth Requirements: Society and its Institutions (3)

MUN130H1 - Climate, Energy, and Power

Hours: 24S

Energy is at the crux of a range of pressing global issues, including climate change and the existential threat it poses across the world. This class uses energy – sometimes as a focal point, sometimes as an entry point – to examine a range of issues including inequality, emergent technologies and policy making in a global context. Restricted to first-year students admitted to Munk One. Not eligible for CR/NCR option.

Prerequisite: Admission to Munk One

Breadth Requirements: Society and its Institutions (3)

MUN140H1 - Design for Social Change and Inclusion

Hours: 24S

Framed around a design challenge, in this class students work in teams to come up with an innovative, equity-focused approach to a global problem. To this end, the course includes modules on topics such as: collecting primary data (via interviews and/or focus groups); conducting secondary research; identifying beneficiaries' needs; developing a mindset for social innovation; assessing feasibility and viability; and how to develop culturally responsive and relevant propositions. Restricted to first-year students admitted to Munk One. Not eligible for CR/NCR option.

Prerequisite: Admission to Munk One

Breadth Requirements: Society and its Institutions (3)

MUN195H1 - The Economics of Birth, Death and Everything in Between

Hours: 24L

Does welfare really encourage people to have more kids? How do contraception bans affect women's work? Do new immigrants create competition that makes wages drop? Economic demography – applying economic analysis to the study of populations – can help us understand all these questions and more. Among other topics, this class will examine how pension systems, health care, immigration policy and economic growth, marriage and divorce laws and women's labor force participation relate to public policy.

Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

Course Experience: University-Based Experience

MUN196H1 - Somebody's Watching Me: The Global Politics of Surveillance

Hours: 24L

From security cameras and cell phones, to drones and social media, our data are collected in countless ways. But who controls our data? Do we have a right to privacy? Does mass surveillance make us safer?

This course invites students to explore the global politics of mass surveillance, and the role played by states, big tech, police, activists, and ordinary people. Through in-

class discussion and analytical writing assignments, students will engage with surveillance studies through many dimensions, including public policy, human rights, international relations, economics, technological development, and race, class, and gender.

Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)
Course Experience: University-Based Experience

MUN197H1 - Strong States or Weak Parties?

Hours: 24L

This course will introduce the study of Europe by exploring the political history of European authoritarianism, and resistance to it, from the 1930s right up to the present day. The accent will be on the present: we will seek to explain the growing appeal of populist authoritarianism seven decades after World War II, the Holocaust, and the defeat of German Nazism and Italian fascism. Are current politics in Europe a matter of back to the future? Or is there something new? Is there one authoritarianism in Europe or multiple?

Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)
Course Experience: University-Based Experience

MUN198H1 - Digital Technologies and Human Rights

Hours: 24L

What are digital technologies, exactly? How do we govern them? Do they threaten or protect human rights? In this course, we'll look at the Internet, advanced computing, 'Big Data' analytics, and artificial intelligence – the technologies which form the basis of everything from facial recognition software to home appliances to social media. We'll consider how to govern and use these technologies, and the consequences of those choices for global human rights. Evaluation is based on essays, a presentation, and class participation. There is no exam.

Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)
Course Experience: University-Based Experience

NEW101H1 - The Everyday Politics of Food

Hours: 12L/24S

How often do we reflect on the environmental, social and economic impact of our everyday food choices? This course offers an introduction to the key concepts, terms and theories that underlie our current food system. The course links the food we eat to global forces and considers how these forces affect food distribution, access and consumption. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW102H1 - Exploring Multilingual Toronto

Hours: 12L/24S

How does language connect and divide people, places and communities? This course considers how interactions between people in Toronto are shaped by language as well as history, economy, architecture and urban landscapes. Students engage with the city both in and out of class to think about a range of questions linked to gender and sexuality, indigeneity, migration, race, ethnicity, and public/private space. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW103H1 - Digital Technology and Society

Hours: 12L/24S

While the internet and other forms of digital technology have created new forms of social relationships and widened access to information, they have also raised concerns. This course explores issues such as surveillance, addiction and bullying as well as the potential of digital technologies (e.g. smart cities, Big Data, and the internet of things). The course engages students' own experience of digital technology. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW104H1 - Creating Community: Art, Identity and Belonging

Hours: 12L/24S

How is art implicated in the process of community building? How does art foster a sense of community identity and belonging? This course explores how communities, in Toronto and beyond, engage a variety of art forms including graffiti, spoken-word, hip-hop, digital art, traditional dance and music to connect people and express community identity. Students will have the opportunity to visit community arts projects. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

NEW105H1 - Current Issues Without Borders

Hours: 12L/24S

This interdisciplinary course addresses a current issue that exemplifies the themes of "Learning Without Borders" in New One. It investigates how this issue is implicated in connecting us with others around the globe; it engages different kinds of knowledge and community perspectives; and integrates students' own experience as related to the issue. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW106H1 - Science, Health and Social Justice

Hours: 12L/24S

How can scientific knowledge and research be mobilized to impact individual and global health? How is health impacted by social, racial and economic inequalities? This course explores scientific research and practice with special attention to the translation of scientific knowledge in the public sphere, and its ability to inform policies, practices and laws. Students have the opportunity to meet with clinician-scientists, policy-makers, and other professionals connected to the health care system. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW111H1 - Food, Ethics and Sustainability

Hours: 12L/24S

How do we produce and ensure access to nutritious and environmentally sustainable food for all? This course explores what is involved in achieving ethical food production and food security, examining topics such as: the paradox of food waste amidst scarcity, the relationship between food production and climate change, community-led alternatives to dominant food systems, and the role of biotechnology. Research projects allow students to focus on an issue of particular interest. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW112H1 - Language Freedom and Power

Hours: 12L/24S

How do we imagine a balance between the need for communication, freedom of expression, and protection for marginalized groups? This course considers how language shapes and is shaped by the relations of power not only in such sites as colonies, nations and institutions, but also in popular culture and how we communicate online. It explores the key role of language in activism and youth cultures and allows students to focus on an issue of particular interest. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW113H1 - Unpacking Digital Technology

Hours: 12L/24S

What are the social and material implications of the digital technologies we use every day - for the present and for the future? This course explores how digital technologies have been remaking the world and affecting our lives by tracing their historical development, their social effects, and the impact of their physical presence. It also peers into scenarios of the future in this digital world. Students engage in research on a topic of their own interest. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW114H1 - Art for Social Change

Hours: 12L/24S

How does art contribute to social change? Artistic productions can draw attention to social problems, mobilize support for and symbolize social movements, and inspire new visions for imagined futures. This course will explore case studies of the role of various art forms in relation to past and current social change initiatives. Students will have the opportunity to engage in research on an art project of their choice. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

NEW115H1 - Current Issues Without Borders

Hours: 12L/24S

Explores the social and ethical implications of a current issue exemplifying the themes of "Learning Without Borders." Also considers examples of policy and community organizing responses. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW116H1 - Science and Global Threats

Hours: 12L/24S

What is the role of science in addressing current global threats? What are the possibilities and the limitations of scientific research and knowledge in tackling complex problems such as climate change, pandemics and pollution? In this course, students explore these questions by examining case studies, meeting with specialists in various scientific fields, and engaging in research on a topic of their own choice. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW197H1 - Public Intellectual Activism: Theory and Practice

Hours: 24S

Explores the role of the public intellectual in modern and contemporary societies from a theoretical and practical

lens. Specifically, investigates the interventions of this capital actor of the social fabric in specific historical junctures of the 20th century and the new millennium with the idea of informing a hands-on approach to participation in civil society debates. Students will be encouraged to examine how "marginalized communities" intervene in the public sphere to effect social change. Term work will include the writing and publishing of an op-ed article, blog, social media posts and a podcast interview. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW198H1 - Myths of French Sensuality

Hours: 24S

A study of French cultural history with respect to the French reputation for the indulgence and refinement of all the senses in visual arts, music, cuisine, perfume and fashion. Supporting mythologies are investigated, along with stereotype formation, exoticism and cultural appropriation. Through various research, writing and presentation techniques, including mini-essays, poster displays and pecha kucha, students will explore what is left of this reputation in an era of globalization. No knowledge of French is necessary. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

NEW199H1 - We Are What We Eat: The Example of French Cuisine

Hours: 24S

The historical study of French cuisine reveals a culture rich in controversy and conflicting narratives. These include contested origins, court intrigues, sensual delight, revolutions, colonialism and slavery, controversial farm practices, haute cuisine, cuisine bourgeoise, regionalism, European regulation. Through various research, writing and presentation techniques, including mini-essays, wikis and pecha kucha, students will explore what is left of French food culture in an era of globalization. No knowledge of French is necessary. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

NMC195H1 - Rebels, Misfits, and Outcasts in Modern Arabic Literature

Previous Course Number: NMC242H1

Hours: 36S

This course examines modern Arabic literary texts that portray marginalized social figures and groups who have been excluded from a protective system of resources and privileges. Students will read novels and short stories by prominent Arab authors who have represented marginal social groups in their fiction, including representations of the urban poor, the peasantry, the delinquent, the prostitute, sexual minorities, women who reject normative roles, and the political rebel. These fictional texts address issues such as political resistance and rebellion, economic precarity, and social exclusion. Students will engage with these texts by critically examining the role of literature in narrating unspoken and suppressed histories. The class will also introduce students to theoretical modes of literary analysis and interpretation. All texts will be read in English translation. Authors include Mohamed Choukri, Hanan al-Shaykh, Alifa Rifaat, Sonallah Ibrahim, and Arwa Salih. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: NMC242H1

Breadth Requirements: Creative and Cultural Representations (1)

NMC196H1 - Law and Order in the Ancient Near East

Hours: 24S

Are human beings basically evil or good? What creates order in society? Coercion? Religion? Can societies operate without law? This course explores different systems of authority and control through ancient texts, focusing on the very first ideas of law in human history. We examine actual law codes, court cases on real estate disputes and conspiracy to commit murder and rape, as well as alternative means of regulating communities such as ideology, ritual and magic. While most courses on ancient law approach the topic from the perspective of modern concerns, this course situates the first law in its own historical, social and political context. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

NMC197H1 - Myth and History in the Bible

Hours: 24S

Reading the Bible is easy, but reading it well isn't. Should we read its stories as history? All of it? Or perhaps only part of it? If so, which parts? And if some parts aren't meant to be read as history, then what are they? Was Jonah really swallowed by a large fish? Did the sun and moon stand still for Joshua? Did Moses really part the Red Sea? Did Jesus really raise Lazarus from the dead? Are miracles necessarily fiction? In this seminar, we will read together many of the most colourful stories of the Bible, sometimes alongside similar stories from the cultural context of ancient Israel, and discuss what genre (history, myth, legend, folktale) they belong to and how this affects our reading of these texts. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

NMC198H1 - Iranian Women Reveal Their Lives: The First Generation

Hours: 24S

Persian women born in the late 19th century and early decades of the 20th century grew up in a period of major political, social, and cultural change that impacted women. A course reading, *Memories of a Persian Childhood*, illustrates the important role of the family and childhood experiences in the lives of a first generation of women to have access to a modern education, and step beyond traditional boundaries. Women's personal writings are the main sources we use to learn about female aspirations, hopes and disappointments as well as the challenge of living in a patriarchal society that took for granted that a woman would devote her life to caring for home and family. We will explore how this generation navigated restraints on women in the years of Pahlavi rule (1925-1979) and served as a model of female contribution for a young generation following the 1979 Islamic Revolution. Each seminar will consist of the instructor's introductory comments, a discussion of the assigned readings and an exchange of opinions about the life of women in different environments. The final mark is based on the readings in the course syllabus, the instructor's lectures, and class discussions of assigned topics. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

NMC199H1 - Babylon: Fact vs. Fiction

Hours: 24S

The ancient city of Babylon, now a vast archaeological site in Iraq about 100km south of Baghdad, has captured people's imagination up to this day. Who has not heard of

the Hanging Gardens of Babylon, the Biblical Tower of Babel, or the sci-fi TV series *Babylon 5*? Yet, how much of that reflects the reality of ancient Babylon? This course will explore the city of Babylon through its texts and archaeology and contrast this data with the way the city has been remembered over the past two thousand years. However, the goal of the course is not only to investigate how myths about Babylon have been constructed throughout the centuries. It will also look at the shortcomings of contemporary academic research on Babylon, and how difficult it is to reconstruct humankind's distant past. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

PHL196H1 - Philosophy, Film, and Social Criticism

Hours: 48S

This course will critically examine the role of cinema in relation to selected topics and themes in social and political philosophy; these will vary from year to year, but may include race, ethnic and cultural 'other'-ness, class, social conflict, citizenship, cosmopolitanism, and human rights. Films will be screened in class and discussed against the background of focused critical and philosophical readings. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

PHL197H1 - Introduction to Philosophical Anthropology

Hours: 24S

Philosophical anthropology is the subject that poses the most fundamental questions about human nature and the human condition. Taking as its point of departure the most up-to-date scientific understanding of human nature, from anthropology broadly conceived, it goes on to inquire, in a disciplined fashion, about the implications of these views for perennial philosophical questions about human rationality, morality, the possibility of progress, the existence of god and the meaning of life. This course will examine one or more topics in this domain, as a more general introduction to the discipline. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

PHL198H1 - Philosophy of Time

Hours: 24S

The passage of time is a fundamental aspect of human experience: we are born, we grow older, and eventually we pass away. During our lives our experience of the past, present, and future are distinct. We can influence the world in the present and the future, but it does not seem that we can influence the past. We have hopes about the future, memories of the past, and experiences of the present. In this seminar we will explore insights from contemporary philosophy and physics concerning the nature of the passage of time. Questions to be considered may include the following: What does it mean to say that time passes? Does time really pass at all? How do we experience time? Why can we influence the future but not the past? Is it possible to travel backward in time? Is time even real? What is time? Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

PHL199H1 - Ethics and Fiction

Hours: 24S

The goal of this seminar is to investigate selected ethical questions via works of fiction, considering how, and with what effect, fiction functions as an ethical medium. We will reflect on what fiction can teach us about pressing challenges of the human condition; themes to be discussed will vary from year to year, but may include choice and responsibility, freedom, friendship, empathy, integrity, and our relation to the divine and to death. Genres studied may range over novels, short stories, plays, and narrative poetry. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

PHY196H1 - Emergence in Nature

Hours: 24S

The universe is not a rigid clockwork, but neither is it formless and random. Instead, it is filled with highly organized, evolved structures that have somehow emerged from simple rules of physics. Examples range from the structure of galaxies to the pattern of ripples on windblown sand, to biological and even social processes. These phenomena exist in spite of the universal tendency towards disorder. How is this possible? Self-organization challenges the usual reductionistic scientific method, and begs the question of whether we can ever really

understand or predict truly complex systems. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: No prior experience with physical science will be required, but familiarity with Grade 10 mathematics will be assumed.

Breadth Requirements: The Physical and Mathematical Universes (5)

PHY197H1 - Modern Physics for the Curious

Hours: 24S

Have you wondered about the origin and workings of the natural world around us? Have you found physical science interesting but inaccessible because it was too full of math and jargon? Have you felt a pull to become more science-literate? If so, this seminar course is for you -- or for anyone interested in understanding more about the universe, including our planet, seen through the lens of modern physics. Ideas on the menu will include: particle physics, space and time, relativity, black holes, quantum physics, unification forces, string theory, and big bang cosmology. The intriguing story of these integrated phenomena unfolds over a wide distance and a long time. Students from diverse academic backgrounds are warmly welcome. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: No prior experience with physical science will be required, but familiarity with Grade 10 mathematics will be assumed.

Breadth Requirements: The Physical and Mathematical Universes (5)

PHY198H1 - Physics at the Cutting Edge

Previous Course Number: PHY289H1

Hours: 24L/12S

A limited enrollment seminar course for First Year Science students interested in current research in Physics. Students will meet active researchers studying the universe from the centre of the earth to the edge of the cosmos. Topics may range from string theory to experimental biological physics, from climate change to quantum computing, from superconductivity to earthquakes. The course may involve both individual and group work, essays and oral presentations. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: PHY151H1

Corequisite: PHY152H1, MAT137Y1/ MAT157Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

PHY199H1 - Dark Matter and Dark Energy are the New Black

Hours: 24S

It is now 90 years since astronomers found the first evidence for a form of matter that wasn't part of the stars in our galaxies, but rather is "dark" and has a gravitational attraction to ordinary matter. Other lines of evidence lead us to believe that there is six times more dark matter than the ordinary matter we are familiar with. Despite this, we have no credible, direct evidence for what this dark matter might be. It is one of the biggest puzzles in particle physics and cosmology. In the last decade, we have also discovered that something else is going on -- the universe appears to be filled with "dark energy" that causes the expansion of our universe to speed up instead of slowdown. We will discuss what we know about the hypotheses of dark matter and dark energy, and the debates about what might really be going on. Are we seeing science in crisis, with a revolution just around the corner, or is this just the "normal science" talked about by Kuhn and other philosophers of science? Participants will be expected to participate in seminar-style discussions, as well as take the lead on at least one topic of discussion. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: No prior experience with physical science will be required, but familiarity with Grade 10 mathematics will be assumed.

Breadth Requirements: The Physical and Mathematical Universes (5)

POL191H1 - First-Year Foundation Seminar: Political Homes

Hours: 24L

Homes are core to our identities, shaping our beliefs, our social networks, and how we interact with the world. In turn, politics determines who has a home and who is homeless, whose home increases in value and whose mortgage gets foreclosed. Through careful consideration of evidence, we examine these processes.

Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

POL192H1 - First-Year Foundation Seminar: Beyond Voting: Introduction to Citizen Political Participation

Hours: 24L

This course introduces students to citizen political participation in democracies, with a focus on Canadian case studies. It examines theories of political participation and introduces students to a range of methods by which citizens engage in political life including social movements, political party membership, deliberative mini-publics and more. This course examines debates about the appropriate role for citizens in governance and considers barriers to equity in political participation in Canada.

Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

POL193H1 - First-Year Foundation Seminar: Politics and the Arts

Hours: 24S

A study of political ideas as found in literature, plays, art works and film.

Restricted to first-year students.

Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

POL195H1 - First-Year Foundation Seminar: Settler Colonialism and Enduring Indigeneity

Hours: 24S

This seminar explores the politics of representation in Indigenous multimedia. We study Indigenous cultural productions—memoir, documentary, graphic novel, film, poetry, music, and video games—to examine representations of settler colonialism and how Indigenous peoples endure it.

Restricted to first-year students.

Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

POL196H1 - First-Year Foundation Seminar: The China Challenge

Hours: 24S

China's meteoric rise to great power status has triggered an intense international debate over its global implications. While many analysts see Beijing's rise as posing a threat to global political and economic stability, Chinese leaders have argued forcefully that China's efforts to regain its historic preeminence will result in a 'win-win' outcome for all states. This course will assess the merits of these contending positions through an historical examination of China's 20th century renaissance. The course will begin by tracing the long period of imperial decline in the 19th century, culminating in China's revolutionary rebirth as a Marxist state in 1949. A major focus will be on the Mao-era legacy of revolutionary diplomacy and the foreign policy consequences of its later transformation into a market-authoritarian powerhouse.

Restricted to first-year students.

Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

POL197H1 - First-Year Foundation Seminar: Politics and Sports: Identity, Activism, and Political Economy

Hours: 24S

The course aims to introduce first year students to key themes in political science – power, race, ethnicity, gender, sexuality, class, nationalism, social movements, activism, and political economy – through the lens of sports and those who participate in them.

Restricted to first-year students.

Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

POL198H1 - First-Year Foundation Seminar: Social Justice and the City

Previous Course Number: POL198Y1
Hours: 24S

An introduction to the concept of social justice from an urban perspective. It will highlight how unequal relations of race, class, gender, sexuality, and ability operate through the urban environment, and how these conditions can be contested through political mobilization.

Restricted to first-year students.

Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

PSL190H1 - Biomedical Research at the Cutting Edge

Hours: 24L/6S

Explore the thought processes, logic, motivation, techniques, analysis and impact of recent high-profile publications to gain insight into the enterprise of science. Outstanding scientists present recent high-impact papers, and students will examine the research in depth, focusing on the underlying questions, experimental approach, results and significance. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: SBI4U and SCH4U (Grade 12 University Preparation Biology and Chemistry); permission of Department

Breadth Requirements: Living Things and Their Environment (4)

PSY194H1 - The Psychology of Student Success

Hours: 24S

University life presents students with all sorts of challenges as well as amazing opportunities for learning and growth. While there are many different ways to define a “successful student”, the goal of this seminar is for everyone to develop the knowledge, skills, and mindset needed to make the most of out of the university experience. Students will discover what research in psychological science has to say about facing and overcoming common academic, intrapersonal, and interpersonal challenges, as we cover topics including deliberate practice, imposter syndrome, and belongingness. Students will also learn evidence-based strategies for better managing their attention, energy, and emotions so that they may thrive (rather than just survive) in university. In addition to learning about psychology, students will develop useful skills in scientific literacy, critical thinking, self-reflection, written and oral communication, and teamwork. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

PSY195H1 - The Science of Babies and Children

Hours: 24S

This course will use an interdisciplinary perspective to explore how the infant mind emerges and grows. Topics could include how brain plasticity influences “critical” or “sensitive” periods for learning, or how studying infants’ perception, cognition and behaviour can offer us critical insights into long-standing philosophical questions. Note that specific content will depend on the instructor and will be posted on the Department of Psychology’s Undergraduate Course Information webpage. During the course, students will (1) engage in lively discussion and present their perspectives; (2) use exploratory writing to develop arguments and their understanding of subject matter; and (3) begin to read and summarize scientific research papers in Developmental Psychology. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

PSY197H1 - Rethinking the Human Mind

Hours: 24S

This course will use an interdisciplinary perspective to explore the quirks, achievements, and puzzles of the human mind. Topics could include how technology and tools extend our minds, or the light that our ability (and inability) to reason sheds on human nature. Note that specific content will depend on the instructor and will be posted on the Department of Psychology’s Undergraduate Course Information webpage. During the course, students will: (1) engage in lively discussion and present their perspectives; and (2) use exploratory writing to develop arguments and their understanding of the subject matter. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

PSY198H1 - The Psychology of Magic

Hours: 24S

Magicians entertain us with their tricks. What appears as “Magic” is based on fundamental aspects of human psychology: visual and auditory perception, decision

making, logic, memory, and verbal abilities. In this class, we will consider and discuss the psychological basis of magic tricks and use magic to explore aspects of psychology. The class will require reading of scientific articles and book chapters as well as watching and analyzing magical tricks. The only prerequisite is a curious and critical mind. The course puts great emphasis on writing and on starting to read primary scientific literature. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

PSY199H1 - Psychology and History of Drug Use

Hours: 24S

This seminar will examine the historical and contemporary use of drugs. Students will be introduced to the general psychological and neuroscientific mechanisms by which drugs affect human behavior, and explore highlights of current research on drug effects in animals and humans. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

RLG195H1 - Alt-Bible: What Could Have Been

Hours: 24S

Why does our contemporary Bible not include any daughters for Adam and Eve or any stories of Jesus as a young boy? What if Enoch was more prominent than Moses or Thomas more prominent than Paul? "The Bible" that we have is not a single book or a simple collection, but something that has grown over time, been the object of contention and argument, and has sometimes been a common ground across traditions. We examine side-by-side writings that have become canonical and writings that once held authority but have not found widespread canonical status, and strive to understand the processes by which we ended up with "the Bible" we have today. Restricted to first-year students. Not eligible for CR/CNR option.

Breadth Requirements: Creative and Cultural Representations (1)

RLG196H1 - Goddess Lessons: Gender, Religion and Pop

Hours: 24S

Is God a woman? How can we get to heaven without losing a piece of ourselves? What does it mean to follow Lesbian Jesus? Pop music provides us with some important – if often surprising – opportunities to think through deep questions. Increasingly, these questions tie together two of our most powerful human categories: gender and religion. This course will consider the diverse interactions between pop, gender, and religion. Examples might include Beyonce's self-representation as the Yoruba goddess Oshun and Lil Nas X's reinterpretation of the Garden of Eden in *Montero*. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

RLG197H1 - Enchantment, Disenchantment, Re-Enchantment

Hours: 24S

Modernity is associated with disenchantment, secularisation and progress, and has traditionally been understood as the successor to the enchanted, spiritual, and transcendent worldviews of antiquity and the middle ages. Re-enchantment, a term increasingly encountered in popular and academic contexts alike, demonstrates nostalgia for an enchanted past, a discomfort with the modern narrative, and a desire to recover wonder. This course will examine the history of enchantment through a series of readings taken from literature, philosophy, theology, ranging from Plato to contemporary magical realism. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

RLG198H1 - Dystopia: Religion & Gender in Science Fiction

Hours: 24S

This course will examine the "what ifs" and imagined worlds of ideal utopias and oppressive dystopias through the lens of religion and gender in Margaret Atwood's *The Handmaid's Tale* and Charlotte Perkins Gilman's *Herland*. Because science fiction and utopian/dystopian literature expresses what an author sees as possible or hopes is possible, but also fears is possible, we will consider science fiction as a political and social critique. Themes to

be covered include fundamentalism, totalitarianism, the relationship between technology and religion, religion and reproductive rights, and the potential relationship between religion, gender and oppression. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

RLG199H1 - Contagions

Hours: 24S

It is obvious that infections spread through social networks; what is less well known is that forms of human behaviour, including religious affiliation, have network characteristics. This course examines a variety of historical and contemporary contagions to introduce essential concepts in network analysis and the factors that account for the spread of innovation and other forms of human behaviour. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

SDS199H1 - Sexuality at the Intersections

Hours: 24L

This First-Year Foundations seminar will explore sexuality at the intersections of race, gender, class, disability, citizenship status, and geography, among other social relations and processes as a foundational practice in Sexual Diversity Studies. In an intimate seminar setting, students will develop reading, writing, and presentation skills necessary for engaging in Sexual Diversity Studies across a wide array of disciplinary traditions. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

SLA190H1 - Losing It

Previous Course Number: SLA201H1

Hours: 24S

How does one cope with loss, be it a nose, a leg, a pet, a name, a lover, a battle, a fortune, or one's sanity? Through literary texts from Central and Eastern Europe, we explore the trauma and poetics of losing, and the mechanisms of coping with and compensating for the lost object. Taught in English, all readings in English. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: SLA201H1

Breadth Requirements: Creative and Cultural Representations (1)

SLA191H1 - The Criminal Mind

Hours: 24S

In the mid-nineteenth century, European and American fiction became obsessed with the subject of criminals. This course examines this preoccupation and its literary and social ramifications. We discuss the changing image of the criminal in British, French, Russian and American fiction. Readings by Dickens, Dostoevsky, Balzac, Zola, Poe, Stevenson and Lombroso. Reading and discussion in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

SLA192H1 - On the Road in Eastern Europe

Hours: 24S

This course examines the function of travel within texts and films depicting journeys through Eastern Europe. We will distinguish various types of journeys, the narrative and cultural expectations they imply, and the ways that travel relates to individual identity, raising questions about nationality, race, gender, sexuality, and the Other. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

SLA193H1 - Objects of War

Hours: 24L

An object or a thing always has a collective history. It speaks of the political and the social conditions under which it was made. In this course, objects of war – the material culture of conflict – from the 20th and 21st centuries will be critically and historically examined. How do these objects speak of violence, politics, and culture, but also rewrite and influence the arenas within which they circulate? Some objects include: canned food, drones, the journalists' hotel, helmets, tents. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

SLA194H1 - Utopia Interrupted: Late and Post-Soviet Russian Literature

Hours: 24S

Almost 30 years after the collapse of the Soviet Union, what can we understand about its culture and people, and its impact on the popular imagination in the West? To answer these questions, the course introduces students to canonical literary and cinematic works from the post-Stalin era to the present, with particular attention to the literary and cultural peripheries. Some of the topics will include: Gulag, or Return of the Repressed, Counter-Culture, Space Race, Immigration, Gender, Perestroika, and Putin's Russia. All readings in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

SLA195H1 - Literature and Painting in Russia and the West

Hours: 24S

What makes literature 'visible'? How do the verbal and the visual coexist? This seminar explores the relationship between words and images, texts and pictures through history, in Russia and the West. Special attention will be paid to the figure of the artist. Is it a writer's *alter ego*, the incarnation of creativity, or just a character among others? Literary texts (mainly short stories) from Balzac and Gogol to Chekhov and O. Henry, Maugham and Bunin, Nabokov and Camus will be studied along with the paintings of some major 19th-20th century artists. The comparative dimension of the course will help students contextualize Russian literature and think about its relationship with the Western canon. We will also watch some 21st century films about artists (such as Julie Taymor's *Frida* [2002], Milos Forman *Goya's Ghosts* [2006], and Mike Leigh *Mr. Turner* [2014]). All texts will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

SLA196H1 - Russia at War

Hours: 24S

In its long history Russia has fought numerous wars, both defensive and offensive, and these wars have inspired a rich, complex, contradictory poetic response. We examine Russian war narratives starting with the medieval period

and ending with the Second World War and including epic poetry, songs, stories, novels, paintings, and films. We will study the depiction of war and the image of the soldier (or warrior) in different genres and time periods, as well as the historical circumstances in which the different works were produced and the respective audiences for which they were intended. All texts will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

SLA197H1 - The Imaginary Jew

Hours: 24S

The course examines the genesis and evolution of the image of the Jew, central to all European cultures, from the theology and psychology of Christian anti-Judaism to their reflection in folklore, visual, plastic, and verbal arts, and to the survival of the imaginary Jew in secular forms. Special attention is given to the Jews of Slavic and East European imagination. All readings are in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

SLA198H1 - The Slavic Grecian Formula: From Ancient Rhapsode to Modern Slav Song

Hours: 24S

Slav singers of heroic tales about war, lust, honour and revenge have made a special contribution to our appreciation of classical literature and mythology. We will compare Slavic epics and African-American rap songs to reveal the connection between Homer's *Iliad* and Nas's iconic *Illmatic*, between the mythical image of the pagan goddess Aphrodite and the mystique of Nicki Minaj, Lauryn Hill, and other iconic singers today. As we read *The Iliad* closely, we will study songs from the Russian, Bosnian Muslim, Croatian and Serbian traditions. Employing new performance formulaic theory, we will learn that they share much, in melody and message, with the work of today's hip-hop artists, whose roots of rap "flowing" reach back to the beginnings of Western literature and the epic singers of ancient Greece. Students will have the opportunity to interact with a unique online multimedia edition of an epic song by a traditional Slavic singer.

No knowledge of languages other than English is required. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

SLA199H1 - Invisible Kingdom, Imaginary Space

Hours: 24S

The Central European Region of Galicia gave rise to a remarkable array of literary representations -- Austrian, Jewish, Polish, and Ukrainian -- animating fantastic creatures, powerful myths, deviant pleasures, and sublime stories. Bruno Schulz created shimmering peacocks, Leopold von Sacher-Masoch seized ecstasy through pain, and Ivan Franko investigated the effects of avarice and social decay. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

SMC135H1 - SMC One: The Donovan Seminar: Visual Art and Meaning

Hours: 24L

What is the relationship between visual art and the search for meaning? How do we learn to stop and see and interpret? Focusing on the renowned art collections on the grounds and campus of St Mike's and UofT, this course explores the diverse ways in which artists have engaged with their world, with history, and with spiritual and philosophical questions. Students also explore the equally diverse ways in which viewers bring their own engagement with these questions into interpretations of painting, sculpture, and photography. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

SMC145Y1 - SMC One: Theatre as Revolution: From Melodrama to Modernity

Hours: 48L

This SMC One course examines drama in nineteenth-century and early twentieth-century Europe and North America from its initial status as an entertaining form of diversion to its evolution as a vital, at times dangerously subversive form of artistic and social challenge. Classes will explore this evolution from different perspectives: they will consider approaches to the publication and dissemination of drama as a literary form; music,

movement, and ritual; the development of theatre spaces; costume, set design, and acting style; the role of the censor; the design of popular advertisement and playbills; and various conceptualizations of the communal audience. Ranging in focus from music theatre to notorious plays and dramatists, from the role of the actor-manager to that of the literary polemicist and the visionary director, this course will also see students exploring original archival materials housed in the Kelly Library, workshopping scenes with guest lecturers, and, when possible, travelling to a relevant theatre production. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

SMC155H1 - SMC One: The McLuhan Seminar in Creativity and Technology

Hours: 12L/12S

This seminar is an interdisciplinary exploration of the relationship between creativity and technology. Inspired by the innovative thinking of Marshall McLuhan, it explores how the humanities relate to other fields of thought and research in addressing the individual, social and cultural experiences and effects of technological innovation. This course may include a compulsory travel component (location to be determined based on travel restrictions). (An ancillary fee is required to help cover a portion of the travel costs.) Not eligible for CR/NCR option.

This course is restricted to newly admitted Faculty of Arts and Science students accepted to SMC One. Applications are due before the end of April (deadline subject to change). Apply via the [JOIN U of T website](https://stmikes.utoronto.ca/program/smc-one-mcluhan-seminar).

<https://stmikes.utoronto.ca/program/smc-one-mcluhan-seminar>

Prerequisite: Admission to SMC One

Breadth Requirements: Creative and Cultural Representations (1)

SMC165H1 - SMC One: The Boyle Seminar in Scripts and Stories

Hours: 24L/12S

This seminar introduces students to university-level studies through an interdisciplinary exploration of Celtic influences in the mediaeval world, with a particular focus on early books and historical artifacts as physical objects and bearers of meaning. Students will learn how to read and analyse these books and artifacts to decode their meanings, and, in support of that, take introductory language instruction in Latin and Irish. Subjects discussed

will include intercultural encounter and dialogue, research methods with historical sources, and the relationship between the written word and lived experience, then and now. A co-curricular, optional travel opportunity to Dublin, Ireland may be associated with this course. If the trip is offered and you choose to go, an ancillary fee is required to help cover a portion of the travel costs. Not eligible for CR/NCR option.

This course is restricted to newly admitted Faculty of Arts and Science students accepted to SMC One. Applications are due before the end of April (deadline subject to change). Apply via the JOIN U of T website.

<https://stmikes.utoronto.ca/program/smc-one-boyle-seminar>

Prerequisite: Admission to SMC One

Breadth Requirements: Creative and Cultural Representations (1)

SMC175H1 - SMC One: Contemporary Ireland: An Introduction

Hours: 24L

This multidisciplinary SMC One course introduces students to the rich culture of the contemporary Republic of Ireland. Particular attention will be focused on Irish Gaelic culture: the Irish language; traditional Irish singing and dancing; sport; film, television, and radio; drama; and contemporary Irish literature (in English and in Irish). The course may include a one-week experiential learning trip to Ireland during Reading Week. If the trip is offered and you choose to go, an ancillary fee is required to help cover a portion of the travel costs. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

SMC185H1 - SMC One: The Christianity, Truth and Reconciliation Seminar

Hours: 24L/12T

This seminar critically explores the complex relations of Christianity and Indigenous peoples of Turtle Island, with a special focus on education. Sample topics include: settler colonialism and treaty relationships; prominent Indigenous Christians, critics and reformers; the residential school system; the Truth and Reconciliation Commission of Canada; recent initiatives in ecclesial repentance, dialogue, and enculturation. The course includes guest speakers and compulsory co-curricular activities, including travel to residential school site(s) and archives in Ontario during the fall reading week. The costs

of these activities are supported by the University of St. Michael's College. Not eligible for CR/NCR option.

This course is restricted to newly admitted Faculty of Arts and Science students accepted to SMC One. Applications are due before the end of April (deadline subject to change). Apply via the JOIN U of T website.

<https://stmikes.utoronto.ca/program/smc-one-christianity-truth-reconciliation-seminar>

Prerequisite: Admission to SMC One

Breadth Requirements: Thought, Belief and Behaviour (2)

SMC188H1 - SMC One: The Gilson Seminar in Faith and Ideas

Previous Course Number: SMC188Y1

Hours: 12L/12S

This seminar is an interdisciplinary exploration of leading scholarly, intellectual and public questions related to ecology, science, literature, and public life. From a variety of perspectives, the seminar considers how religion, and how different kinds of religious experience, figure in the broader context of human affairs. Not eligible for CR/NCR option. Enrolment in SMC188H1 will automatically enroll you in SMC189H1 at the departmental level. The department will enroll you in SMC189H1 before the start of the term.

<https://stmikes.utoronto.ca/program/smc-one-the-gilson-seminar-in-faith-and-ideas>

Breadth Requirements: Thought, Belief and Behaviour (2)

SMC189H1 - SMC One: The Gilson Seminar in Faith and Rome

Previous Course Number: SMC188Y1

Hours: 24L

This course provides an intensive international learning experience in Rome, Italy. It offers contemporary and historical models of integrating faith with reason, and religious practice with intellectual, creative, and public engagement, specifically the roles that the Catholic Church and Vatican play in Rome, in ecology, science, literature, and public life. This course includes a mandatory travel component to Rome, Italy, which takes place following the Winter term exam period. An ancillary fee to cover program costs will apply, excluding the costs of airfare. Not eligible for CR/NCR option.

<https://stmikes.utoronto.ca/program/smc-one-the-gilson-seminar-in-faith-and-ideas>

Prerequisite: SMC188H1

Breadth Requirements: Creative and Cultural Representations (1)

SMC192H1 - Sherlock Holmes: Mass Media and Fan Culture from the Victorians to the Present Day

Hours: 24L

This course begins by examining the creation, dissemination, and reception of the Sherlock Holmes stories in the Victorian era. Classes will focus on the relationship between the stories and print culture (particularly newspapers and illustrated magazines), criminology, and dominant social and political preoccupations of the age. The course will also examine the stories in their context as having inspired one of the first manifestations of a mass fan culture across various media, art forms, and cultures around the world. This fan culture proliferates to this day: classes will examine such phenomena as Victorian letter-writing campaigns; popular rewritings and visual representations in various forms; cartoons; film and television; and anime. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

SMC193H1 - Aliens and the Heavens: Christian Encounters with Cosmic Pluralism

Hours: 24L

While the aliens depicted in contemporary science fiction or hypothesized in astrobiology may be relatively new phenomena, inhabitants of the heavens have been parts of diverse cultures' worldviews for millennia. This course explores how various Christian thinkers and communities through history have reckoned with the possibility of extraterrestrial life by examining their cultural, scientific, theological, and ethical contexts. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

SMC194H1 - Medieval Fantasy and Modern War

Hours: 24L

This first-year foundation course explores the intricate relationship between medieval-themed fantasy literature and modern war. Drawing on the works of several of the most prolific 20th-century fantasy authors, it examines how the experience of global conflicts shaped the creation of secondary worlds informed by the Middle Ages in the works of such authors as J.R.R. Tolkien, Ursula K. LeGuin, and George R.R. Martin. This course provides important scholarly and cultural context for studying these works in relation to warfare and medievalism in fantasy literature. In so doing, it explores the complex relationship between real-life conflict and literature that has continued to shape popular culture to the present day. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

SMC197H1 - The Sistine Chapel: History, Imagery, Usage

Hours: 24S

The Sistine Chapel in Rome is a historical artifact, an artistic monument, and a house of worship—at once recognizable and mystifying. This seminar explores fifteenth-century origins, decoration by some of the most accomplished artists of the Italian renaissance, and continuing use (especially the election of popes). Topics will include: art and patronage, rhetoric and ritual, controversial restoration, and the Sistine Chapel in popular culture—with an emphasis on the close analysis of the major frescoes. The seminar will develop the academic skills needed for the analysis and discussion of texts, paintings, and ritual events. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

SMC198H1 - How to Study Video Games

Hours: 36S

Games and play are a fundamental part of human society, and today digital games occupy a central place in popular culture, media industries, and the imaginations of players around the world. This seminar introduces students to the growing academic field of game studies, with an emphasis on close analysis of specific games as cultural objects. Through lectures, discussions, and in-class play sessions, students will build a critical vocabulary and toolbox of techniques for understanding the unique formal, aesthetic, narrative, and thematic properties of games in a variety of platforms and genres, and develop basic academic reading, writing, and research skills. No previous experience or expertise with video games is required to

take this course. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

SMC199H1 - Intelligence, Artificial and Human

Hours: 36S

What is human intelligence? How close are we to replicating it? How productive/reductive is the brain-computer analogy? What ethical challenges are posed by AI on workers, society, and the environment? Can we put a hold on "progress"? Is Silicon Valley the seat of a new techno-religion? What can they teach us about today's research priorities? What insight (or inspiration) can we get from works of science fiction about the future of human-AI interaction? Through reading discussion, written assignment, and workshops, this seminar will present students with the opportunity to integrate their computer science interests with philosophy, history, and literature. *There is an equivalent course offered by the Department of Computer Science. Students may take one or the other but not both.* Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: CSC199H1

Breadth Requirements: Society and its Institutions (3)

SOC196H1 - Introduction to Arab Majority Societies

Hours: 24L

This course has two goals. It aims to familiarize students with current challenges and dynamics within Arab societies. It seeks to help students develop a critical perspective on prevalent analytical frameworks such as culturalist, orientalist analyses applied to the region. To achieve this, we will use a controversy, conflict, or current event as an entry point to illuminate one or more dimensions of the society we are studying. The countries studied will vary from session to session to reflect the socio-economic, cultural, religious, and political diversity of the region, as well as the common challenges facing these countries. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

SOC197H1 - The Courses of Lives, Histories, & Futures

Hours: 24L

This course will explore how changes in technology, economy, ecology, culture, and other factors shape how individual lives and social relations tend to unfold. Much of the research and theory that social scientists have produced on the "life course" has focused on how historical events and trends, such as war, economic depression, and trends in family-life have re-shaped life transitions and aging. Those latter changes in turn lead to broad social changes that influence subsequent generations in new ways. In this course we will not be solely concerned with changes in and from the past. We will also keep an eye on the future, and ask how technological changes related to bodies, such as genetic engineering and bioelectric implants, might alter the trajectory of lives and social relations of future generations. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

SOC198H1 - Social Theory and Sexuality

Hours: 24L

This seminar will trace the evolution of theoretical approaches to sexuality in social theory over the past century. The course will begin with an examination of critical psychoanalytic works, progressing through radical feminist and social constructionist theories. Students will then engage with Foucauldian analysis and its critiques, leading to an exploration of post-queer theoretical developments. The latter part of the course will focus on contemporary frameworks that investigate the complex relationships between sexuality and broader societal structures. Particular attention will be given to cutting-edge research in sociology that explores how sexuality intersects with state formation, late-modern capitalism, and sexual stratification. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

SOC199H1 - Demography is Destiny: A Sociological Exploration

Hours: 24S

This seminar introduces the famous idea that "demography is destiny", and then explores this assertion's relevance and validity through a series of historical and contemporary case studies. "Demography is destiny" means that a population's size, age structure, and other demographic characteristics significantly influence its future economic, social, and political trajectory, essentially dictating its "destiny". Examples include aging populations in developed countries, rapid population

growth in developing countries, brain drain(gain) due to migration, migration's effect on generational well-being, political instability from demographic shifts, gender shifts in education and professions, pandemics effects on medicine and public health, technology and labor market dynamics, and family/household change. We will apply sociological perspectives and reasoning to understand how demographic changes play a significant role, but will stress that other factors like government policies, technological advancements, and social changes also influence society. That is, we will learn how the consequences of demographic trends differ based on a society's specific economic and social conditions. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

SPA195H1 - Barcelona

Hours: 24L

A deep dive into the modern experience of one of the world's most compelling cities, this course considers Barcelona from a multidisciplinary perspective that includes study of its architecture, foodways, politics and response to mass tourism. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

SPA196H1 - Power, Privilege, and Precarity in the Americas

Hours: 24L

This course examines economic and social inequalities in the contemporary Americas. We look at the ways in which class divisions are represented in academic studies, literature, film, and television. From Mexican *maquiladoras* to indigenous reservations, we consider the global poor and how recent changes in the character of work (automation, outsourcing, free trade zones) have had an impact on class divisions, especially for younger members of society. Can a renewed understanding of class and work help us to negotiate power, privilege, and inequality in this century? Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

SPA197H1 - Cervantes and Imperial Spain

Hours: 24L

During the lifetime of Miguel de Cervantes, the Spanish monarchy governed an empire that extended across the globe, from its traditional lands in Europe to colonies in the Philippines and the Americas. We will examine the advantages and cost of imperial rule through reading a selection of Cervantes's works. Discussions will centre on such questions as the social impact of imperial wealth, the disruptive role of soldiers in civil society, contact with non-European cultures and the sub-cultures of Spanish society. Students will be introduced to the University of Toronto's outstanding resources for studying the literatures and cultures of early modern Europe. Readings will include some of the Exemplary Stories and selected episodes of *Don Quixote*. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

SPA198H1 - A Brief History of Love in the Western World

Hours: 24L

This course introduces students to the ways in which the foremost thinkers in the history of the Western world (Plato, Ovid, St. Augustine, Ficino, Ebreo) conceived the idea of love; how did the notions of sexuality and gender play into that idea, and how did these notions carry on – or not – into our present understanding of love, sexuality and gender. While the background readings pertain to the general Western cultural heritage, the literary texts through which we will observe particular applications of the theories of love were produced by some of the outstanding 16th and 17th century Spanish authors (for ex. Rodríguez de Montalvo; Jorge de Montemayor; Miguel de Cervantes; Tirso de Molina, María de Zayas, Sor Juana Inés de la Cruz). All the readings will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

SPA199H1 - More than Nachos and Tequila: Mexican History and Culture

Hours: 24L

This course aims at studying the rich history of Mexico from an interdisciplinary perspective. We will cover a wide

range of issues, such as identity, modernity race, immigration, gender, sexuality, globalization, and iconic figures. The issue of identity as construed from the inside, but also from the outside and particularly from the English-speaking world (i.e. current US presidential views on the wall), will be widely examined. Course materials will range from chronicles of conquest to modern reflections and representations by historians, philosophers, filmmakers, musicians, writers and artist, among others. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

STA197H1 - Thinking Better with Statistics

Hours: 24S

This course explores how our statistical intuitions and ways of thinking can let us down. There's no need to be a math whiz to be a better statistical thinker. Everyone can become a more critical consumer of claims presented in media, advertisements and by politicians—especially those relevant to our own health and wealth. This course uses real-world examples and tours common and avoidable statistical traps and tricks. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

STA198H1 - Probabilities Everywhere

Hours: 24S

This course examines the meaning and mathematics of probabilities, and how they arise in our everyday lives. Specific topics may include: the nature of coincidences, the concept of luck, games involving dice and cards, long run averages in casinos, margins of error in polls, the interpretation of medical studies, crime statistics, decision making, pseudorandomness, and Monte Carlo algorithms. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Grade 12 Mathematics

Breadth Requirements: The Physical and Mathematical Universes (5)

STA199H1 - Statistical Evidence: Truth or Myth?

Hours: 24S

This course explores the impact Statistics has made and continues to make on everyday life through science, law, and the modern methods for information processing. Statistical principles will be illustrated using examples from real life including business, romance and health. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

TRN125Y1 - Contemporary Issues in Health Science

Hours: 48S

Can the immune system be strengthened? Are some diseases incurable? What is the best way to stop the spread of a virus? This course examines the scientific principles underlying contemporary issues in the science of human health with the goal of exposing students to the current state of biomedical research. We will develop three distinct types of understanding that are essential to literacy about the science of human health: the basic concepts in science; the nature of scientific research; and the rules that govern how scientists do their work. This course will explore topics such as stem cells, gene editing, regenerative medicine, vaccination, drug development, and personalized medicine. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: TRN225Y1

Breadth Requirements: Living Things and Their Environment (4), Society and its Institutions (3)

TRN135Y1 - Science and Social Choice

Hours: 48S

Many of the decisions we make as a society rely on advances in scientific knowledge. In this course, we will discuss a number of contemporary medical topics that involve complex scientific discoveries about health, the human body, disease, and infection. We will consider genes and study the medical implications of our growing understanding of the human genome. We will study a number of recent cases in order to explore how scientific findings influence decision-making in hospitals and the selection of social policies. We will also discuss the background forces that shape medical research and how this affects the kinds of health problems that are prioritized. The objective of this course is to develop a solid understanding of biological concepts related to human health and consider them in their wider social and ethical contexts. Restricted to first-year students admitted

to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: TRN136Y1

Breadth Requirements: Living Things and Their Environment (4), Society and its Institutions (3)

TRN136Y1 - Canadian Health Policy in the Global Context

Hours: 48S

In this course we consider when our health policies support the highest standards of medical care, consistent with the latest discoveries in medical research. We examine the ways in which debates around ethics, effectiveness and efficiency shape global and national health policy. We begin by exploring the most important advancements in global health policy over the past two decades. We then assess Canada's experience in providing health care, identifying lessons for national policy reform and for Canada's role as a leader in global health research and policy. We explore a range of health challenges including universal health care, anti-microbial drug resistance, HIV AIDS, tuberculosis, reproductive, maternal, newborn and child health, cardiovascular care, oncology, environmental health, indigenous health, violence against women and mental health. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: TRN135Y1

Breadth Requirements: Thought, Belief and Behaviour (2), Society and its Institutions (3)

TRN140Y1 - Ethics, Humans, and Nature

Hours: 48S

This course introduces students to ethical issues arising from the way humans interact with nature. Students will study some theoretical approaches for evaluating how human society affects the planet, ecosystems, and the other animals. Theories will be drawn from philosophy, theology, and ecology, and will include Western and non-Western approaches to living in harmony with one's environment. Key themes may include speciesism – the idea that human needs are the most important – as well as overpopulation, extinction, vegetarianism, and responsible resource management. The course will also look at how social policy shapes human choices and whether sustainability initiatives should be pursued through the public or private sector. The course will also discuss the spiritual connection between humans and the environment and how society can be organized to promote access to nature in urban communities.

Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: TRN141Y1

Breadth Requirements: Thought, Belief and Behaviour (2), Society and its Institutions (3)

TRN141Y1 - Environmental Science and Pathways to Sustainability

Hours: 48S

This course introduces students to fundamental issues in environmental science with a multi-disciplinary focus on human impacts on physical and biological systems, and on identifying pathways to sustainability. Key themes will include energy and resources, climate change, land use, contaminants and protecting biodiversity in the context of the Anthropocene. The course challenges students to apply the scientific method to environmental monitoring, research and problem solving through project design, data collection and analysis. The course also emphasizes information literacy, skills to distinguish science from pseudo-science, and considerations around representation of environmental science in the media. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: TRN140Y1

Breadth Requirements: Living Things and Their Environment (4), The Physical and Mathematical Universes (5)

TRN150Y1 - National versus International

Hours: 48S

The international system today faces extraordinary challenges. Understanding these challenges requires understanding the past. This seminar course briefly reviews the origins and development of the international system from the 17th century through the age of empires and the great wars of the 20th century. It then concentrates on the clash of nationalism with internationalism in the world since 1945, looking at such issues as what drives nationalism and what alternatives there are to it. We will study ideas and ideologies as well as the institutions that make up the current geopolitical world. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: TRN151Y1

Breadth Requirements: Thought, Belief and Behaviour (2), Society and its Institutions (3)

TRN151Y1 - Global Governance

Hours: 48S

Terrorism, the proliferation of arms (including weapons of mass destruction), environmental degradation, globalization, technological change, and the rise of non-state actors all pose challenges to statecraft and the management of global order. This seminar course explores the changing dynamics of global politics and the responses to them by states (and others). Topics will include an examination of new forms of international collaboration that have developed in the wake of crises in the years following the Second World War. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: TRN150Y1/ TRN152Y1

Breadth Requirements: Thought, Belief and Behaviour (2), Society and its Institutions (3)

TRN152Y1 - Justice & Global Conflict

Hours: 48S

Modern states face both new and familiar challenges to protecting national security. National insecurity threatens a country's capacity to protect the well-being of its citizens while at the same time participating in international organizations and treaties. This course explores the origins and management of international conflict from the 17th to the 21st century, focusing on the precursors to war and the markers of peace. We will also consider the ways in which our current global world order promotes and preserves justice between and within nations. Students will consider different theoretical approaches to justice between nations, and apply them to recent security issues. By studying the history of conflict and the difference between justice and injustice students will gain a deeper understanding of how current geopolitical actors can structure and affect the prospects for security policy reform moving forward. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: TRN151Y1

Breadth Requirements: Thought, Belief and Behaviour (2), Society and its Institutions (3)

TRN160Y1 - Public Policy and the Public Good

Hours: 48S

This course examines the sense of the public good that undergirds Canada's domestic and international obligations. We examine the notion of the "public" through

investigating possible answers to a central political question: what is the purpose of government? Drawing on readings in philosophy and political theory, the course considers a variety of approaches to defining the nature of the public good and how policy makers should respond when competing goods (e.g., freedom and security) clash with each other. In addition, the course looks at the treaties and conventions that articulate the responsibilities of signatory nations regarding challenges such as climate change mitigation, refugee resettlement, and foreign aid. Students will learn how international agreements either compel or encourage participation and multilateral cooperation in the absence of robust enforcement mechanisms.

Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: TRN161Y1/ TRN162Y1

Breadth Requirements: Society and its Institutions (3), Thought, Belief and Behaviour (2)

TRN161Y1 - Making Public Policy Work

Hours: 48S

How do we know what kinds of public policy will work and what will not? How do we assess the effectiveness of a policy? An historical examination of ways in which Canadian governments have addressed a range of policy problems. Case studies of areas of federal and provincial activity today. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Trinity One

Breadth Requirements: Society and its Institutions (3)

TRN162Y1 - Political Economy and Social Inequality

Hours: 48S

What is the relationship between capitalism and democracy? How can understanding rational choice theory inform public policy? This course will introduce students to the methods of studying the interplay between economics and politics. We will focus on specific topics to guide our quantitative analysis, which may include intergenerational poverty, the transfer of wealth, efficiency, and social stratification. We will analyse empirical results while developing critical skills for interpreting economic data and research. The course also considers global economic dynamics, transnational governance regimes, as well as the political-economic dimensions of setting global policies. By the end of the course, students will have a better understanding of global

political economy, and its connection the fields of international relations and public policy.

Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: TRN160Y1

Breadth Requirements: Thought, Belief and Behaviour (2), Society and its Institutions (3)

TRN170Y1 - Ethics and the Creative Imagination

Hours: 48S

A seminar course that explores ethical issues through the study of works of the creative imagination that pose or provoke questions of right and wrong, good and evil, justice and injustice. The selected works will be drawn from such fields as literature, film, and the visual and performing arts. Open only to students admitted to Trinity One. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Trinity One

Breadth Requirements: Creative and Cultural Representations (1), Thought, Belief and Behaviour (2)

TRN171Y1 - Ethics and the Public Sphere

Hours: 48S

What does it mean to be morally required to do something? What rights do we have over ourselves, our bodies, our privacy, our choices? In this course, we will read texts from philosophy, history, political science, cultural studies and beyond that engage with the theme of ethics in the public arena. These will provide valuable analytic tools as we go on to confront contemporary issues that raise urgent ethical questions. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: TRN172Y1

Breadth Requirements: Society and its Institutions (3), Thought, Belief and Behaviour (2)

TRN172Y1 - Ethics and the Law

Hours: 48S

What is the relationship between moral values and the law? What role does the law play in enabling people to live better lives? Are legal institutions and actors subject

to higher ethical standards? In this course we will read texts from legal theory and political philosophy to try to explain the connection between ethics and the law. This will provide the basis for thinking about some historical and contemporary legal cases, as well as ethical issues judges, lawyers, and lawmakers face in their professional roles. Restricted to first-year students admitted to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: TRN171Y1

Breadth Requirements: Thought, Belief and Behaviour (2), Society and its Institutions (3)

TRN191H1 - Disaster and Terrorism: Religion and Ethics at Ground Zero

Hours: 24S

In response to contemporary terrorist attacks and natural disasters, many are led to cry, "The world will never be the same!" How should such statements be evaluated? What impact do they have on social and political life? This course explores religious and cultural responses to human tragedy and cultural shock. Discussion will attend to debates over the meaning of suffering, public reactions to terrorism, the traumas of natural disasters, and the role of media in covering such events. These themes are engaged from the perspectives of ethics, cultural theory, religious studies, and theology. The course focuses on popular responses to events that include: the Lisbon Earthquake of 1755, the First World War, the Holocaust, Hurricane Katrina, the Japanese experiences of Hiroshima and Fukushima, 9/11, and more recent examples of terrorism and disaster. Attention will be given to concerns such as the impact of trauma on social and political debate, the function of religious discourse in the face of tragedy, the nature of ideology, and the relationship between religion and violence. A thematic concern throughout the course will be the nature of ethical commitment in the midst of confusion and social disruption. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

TRN192H1 - Public Health in Canada: Health for the 21st Century

Hours: 24L

This course deals with preventive care and population health. It will also move into new areas like healthcare and the environment (climate change) and the greening of healthcare. It will look at health as an extension of democracy – of how health extends individual rights beyond the political realm to the social realm, of how it

can build social capital and knit populations together. It will look at areas inimical to health, 'detriments to health' and how economic inequality can lead to health inequality. Along with this it will look at ways of empowering the individual, the public as agent and a role of public engagement by major institutions. It will also push beyond the popular determinants of health to engage students in a paradigm on next steps, the future challenges in population health. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

TRN193H1 - Canadian Health Policy: Past, Present and Future

Hours: 24L

This is a health systems course. It deals with illness care, individual health, and health insurance. It will take a comparative and historical approach. We will look at the genesis of Canadian healthcare, our benefits and those other countries provide (e.g., pharmacare, dental care). We will look at indirect contributors like childcare and basic income. We will examine the public-private debate. We will also take some novel approaches. One is that the university has an expanded role in the 21st century, one that involves public outreach, a role that includes healthcare. Recent academic literature on healthcare notes that it is nation-building. We will look at why. We will examine some cutting-edge ideas, like integrated care, the learning health system, the concept of customer-owners. We will explore whether our healthcare system needs to be anchored by 'institutions of excellence' and identify these. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

TRN194H1 - Literature and Wicked Problems

Hours: 24L

This course explores contemporary literature in relation to the interdisciplinary framework of "wicked problems." Research emphasizes that complex, entrenched problems, like government relations with Indigenous peoples or human impacts on the climate, involve interconnected systems and require approaches that cross disciplines and types of knowledge. The course examines the role of literary works (mostly 21st-century fiction) in addressing these issues of pressing concern to students as global citizens. Critical thinking, scholarly reading and database research are foundational skills that this course strengthens in order to prepare students for

their writing in disciplines across the university. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

TRN195H1 - Poetry & The Public; Social Movements & The Ethics of Response

Hours: 24L

Poetry & The Public considers the motivation, intent, reception, and ethics of poetic response to major political events of the late 20th and 21st centuries. Through a wide survey of poems, we will investigate not only the contextual motivation for poets responding to political issues but interrogate the formal and performative means by which they present their work to the public. Poems will be read within a wider history of social movements and civil liberties; and touch upon major historical events such as the AIDS crisis, Black liberation struggles, movements for feminist and 2SLGBTQIA+ rights, ecological and climate-change concerns, and current calls for prison abolition. We will touch upon poetic "schools" or "styles," including the Poetics of Witness, persona poetry, the Black Arts Movement, and the Kootenay School of Writing.

Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

TRN196H1 - Joy and Resistance in Diverse Storytelling

Hours: 24L

"Can we speak about joy for once?" In contemporary literature from Black, Indigenous and People of Colour (BIPOC) authors across Canada and Turtle Island, there is a resurgence in diasporic stories that capture the joy and resistance of carving space for community against the mechanisms of the state. This course explores how BIPOC literature has intersected with social problems and activist movements, creating spaces for readers to reflect on their own lived experiences. Students will expand their creative thinking, critical reading and scholarly writing skills through multi-modal assignments that offer connections to current issues and community knowledge. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

TRN197H1 - In the Shadow of the Vikings: Depictions of the Early Norse in Medieval, Modern, and Post-Modern Culture

Hours: 24L

Although rarely attested during the historical era when they were active, since the early nineteenth century the word “Viking” has been popularly applied to describe groups of Scandinavian adventurers who marauded along the frontiers of Medieval Europe: in this respect, the image of “the Viking” may be regarded as much a modern, as it is a medieval, creation. The legacy of historical “Viking activities” was a factor in the development of modern nation states in Scandinavia and the Baltic region, and their contributions to the heritage of people residing in Britain, continental Europe, the Middle East, and even the Atlantic coast of Canada have been and continue to be cited to the present day. Aspects of culture attributed to “the Vikings”—their assumed independence, courage, resourcefulness, and tenacity in the face of adversity, as well as the occult characteristics of their cosmology—have, for better and worse, inspired modern artists, writers, composers, intellectuals, explorers and even political leaders, and persist in present day literature, art, music, sport and popular culture as well. Why and how do elements of historic Viking culture continue to evoke traditions and characteristics popularly attributed to “the Vikings”? What are some implications of “Viking-ness” for those people in the post-Viking Age past and/or present who we may regard—or may regard themselves—as the “cultural descendants” of the Vikings? In this seminar, participants will study selected cultural artifacts of the “post-Viking Age,” along with recent multidisciplinary research, to observe how various “post-Viking Age” cultures and subcultures have selectively appropriated elements of the “Viking” past. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

TRN198H1 - The Viking Phenomenon: Commerce, Conflict, and Communication along Europe’s Frontiers, 7th – 15th Century

Hours: 24L

Perspectives on the impact that the Scandinavian raiders and traders popularly referred to as “Vikings” had on European and World history continue to develop as the work of historians, archaeologists, linguists, and scientists expands our understanding of the past. Recent research has revised the traditional view of the “Vikings” as primarily marauding warriors; in its place, a more complex

and nuanced conception of the implications that “Viking activity” had on the social, economic, and political development of the peoples with whom they came in contact has emerged. This seminar will consider the relationship between the traditional conception of the “Viking warrior” and recent research that suggests the broader impact that the “Viking Phenomenon” had upon the economic revival and sociopolitical development of medieval Europe and its frontiers. In the course of the seminar, we will examine a selection of historical records and information concerning artifacts of the material culture of “The Viking Age” in order to better understand the activities of early medieval “Vikings,” not only as warriors, but also as agents of commerce, explorers, pioneers, and rulers. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

TRN199H1 - Classical Social and Political Thought from the 18th Century Enlightenment to the 20th Century

Hours: 24L

We begin with European social and political thought during the 18th century, including ideas of enlightenment and revolution. We move on to the 19th century to engage with the critical Marxist theorisation of the new “capitalist” social and political formation, and look at the reception of the Marxist view in the 20th century, all of which continues to affect the character of Western social and political thought. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

TRN225Y1 - The Art of Health Science Discovery

Hours: 48S

Illustrated by contemporary examples, students go through the stages of the scientific discovery process. From initial idea, through literature review, funding (grant writing and assessment), experimental design and critical analysis of data through to the public dissemination of results by publication, the patent process and development of intellectual property. Restricted to students admitted to the Trinity One Program. Not eligible for CR/NCR option.

Corequisite: [TRN125Y1](#)

Breadth Requirements: Living Things and Their Environment (4), Society and its Institutions (3)

UNI101H1 - Citizenship in the Canadian City

Previous Course Number: UNI101Y1

Hours: 36S

Who belongs? Who governs? Who decides? In this course, you will examine the concepts of citizenship, public space, political membership, civic responsibility, and belonging. You will address topics such as Indigenous sovereignty claims, urban multiculturalism, public housing, and greening the city. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

UNI102H1 - Performing the City I

Previous Course Number: UNI102Y1

Hours: 36S

In this course we learn about different practices of performative engagement with the city and experiment with them through exercises and creative activities. The goal is to gain, through this mode of embodied engagement with the city, a critical understanding of urban space as a diverse social, cultural, and physical environment. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

UNI103H1 - Gradients of Health in an Urban Mosaic

Previous Course Number: UNI103Y1

Hours: 36S

In this course, you will examine how Toronto's varied communities access and use health care, and how they may encounter barriers in doing so. You will study how economic disparities, shifting demographics, and government policies affect health policy and the right to access resources. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

UNI104H1 - Sex in the City

Previous Course Number: UNI104Y1

Hours: 36S

You will learn about the sexual politics of the city and how cities and their neighbourhoods become sexualized and desexualized spaces. In Sex in the City, you will examine what "sex" means to Toronto's varied, multicultural communities by looking at urban space, cultural productions, law enforcement, safety and health resources and more. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

UNI106H1 - Performing the City II

Previous Course Number: UNI102Y1

Hours: 36S

Further exploration of connections between the performing arts, urban spaces, and cultural diversity; complementing [UNI102H1](#). How does theatrical performance affect how people perceive the city? What are the alternatives to established theatres, and how does community activism inform performing arts in Toronto? Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

UNI197H1 - Hamilton: Musical and History

Hours: 24S

This course examines the American revolution and its reception in the musical "Hamilton." The American revolution generated multiple stories that included and excluded actors, peoples, perspectives, and more. This course delves into the American revolution and the diversity of those engaged in it and affected by it. The songs, performances, and reception of the musical "Hamilton" are a key resource for exploring the events and role of the American Revolution. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

UNI198H1 - Why Go to University? The Changing Role and Purpose of Higher Education

Hours: 24S

Is higher education about job preparation or about giving students an opportunity to learn about themselves and the world around them? Can higher education in Canada achieve both these aims? This course engages with the spirited conversations and scholarly debates about the ideals of a liberal arts education and how these connect with ancient and contemporary arguments about citizenship. We explore the impact on higher education of globalization and what some call the “corporatization” of universities. Students will be encouraged to think, read, research and write about various models of higher education and explore questions suggested by these debates. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

UNI199H1 - The Construction of Race in America: A History

Hours: 24S

The course will explore the origins of racial categories in America. Drawing on primary sources such as memoirs, film, and government records as well as writings by scholars, we will examine how beliefs about these categories changed over time and with what consequences for the unfolding of American history. Arriving at the present day, we will consider such contradictory developments as the accelerating influence of Black Lives Matter and the headline-grabbing white nationalism on display at the “Unite the Right” rally in Charlottesville, Virginia, August, 2017. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC101H1 - Conflict Theory and Practice

Hours: 24S

This course is a general orientation to conflict theory, and develops a basic understanding of essential conflict resolution principles that will complement the study of conflict theory. The course will examine the differences between conflicts and disputes, the functions and desirability of conflict, and the conditions that facilitate conversion of conflicts from destructive to constructive. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

VIC102H1 - Ethics and Choices in Times of Crisis

Hours: 24S

This course examines a specific event, or events, in relation to the public sphere. The course will use events or an event as an entry point to discuss the nature of society including topics such as major revolutions, economic crises, the impact of the appearance of significant artistic or cultural works, and the impact of technological changes. Not eligible for CR/NCR option.

Exclusion: VIC102Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC103H1 - Leadership, Narrative, and Creativity

Hours: 24S

This course examines what it means to be a leader through narrative presented in media such as text or film. Such works of creative fiction aspire not simply to depict actions and events, but also to lay bare the inner psychology of protagonists. They capture and convey realities with a psychological depth that social scientists cannot always replicate. Students will study such narratives to understand various kinds of leadership skills and leadership types. By creating narratives of their own, students will practice the communication skills that leaders need. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC105H1 - Odysseys: The Search for Meaning

Hours: 24S

Metaphors and motivations of journeying have long intrigued human beings as they have attempted to understand the meaning of their existence: the setting out, the seeking for a desired object, the pilgrimage of religious observance, and the longing to return home. Through texts, art, music and film, this course will explore some of the shaping journey-myths of our culture from classical, Hebrew, medieval and modern sources. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

VIC106H1 - Psychology and Society

Hours: 24S

This course explores central developments and ongoing controversies in the scientific study of the human mind, brain and behaviour. It examines topics such as: psychoanalysis, behaviourism, humanistic psychology, evolutionary psychology, intelligence testing, and feminist perspectives. Goals include understanding the historical evolution and social relevance of scientific psychology. Not eligible for CR/NCR option.

Exclusion: VIC206H1

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC107H1 - Evolution, Genetics, and Behaviour

Hours: 24S

In this course we examine major episodes in the history of evolution and genetics in the twentieth century. Topics include Darwinian evolution, sociobiology and evolutionary psychology, eugenics, and genetic screening and therapy. We will examine different views about the control of evolution and genetic manipulation in their socio-cultural-economic context and discuss the ethical and social implications of those views. Not eligible for CR/NCR option.

Exclusion: VIC207H1

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC108H1 - Belonging, Imagination, and Indigenous Identity

Hours: 24S

This course will examine a number of questions related to Indigenous identities as they have been constituted through collective belonging and cultural representation. Topics covered may include: language, the arts, cinema, ecology, religion, ritual, and the enduring legacy of colonialism. Not eligible for CR/NCR option.

Exclusion: VIC108Y1

Breadth Requirements: Society and its Institutions (3)

VIC109H1 - Innovators and Their Ideas

Hours: 24S

A study of the ideas and concerns of innovators who questioned traditional views and values. The course includes creative thinkers who challenged basic concepts on politics, literature, religion, and society. Not eligible for CR/NCR option.

Exclusion: VIC109Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC110H1 - Critical Perspectives on Society

Hours: 24S

By means of short texts, film or art works this course explores such themes as the effect of technology on the political, the nature of democracy, the question of resistance through art and the role of violence in the social. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC112H1 - Puzzles, Discovery and the Human Imagination

Previous Course Number: VIC112Y1

Hours: 24S

There has never been a period of time, nor has there ever been a culture, without some kind of puzzle tradition. Are puzzles just playful artefacts, intended merely to entertain? Or are they mirrors of something much more fundamental in human life? The course will take a close look at what puzzles tell us about the human mind and human culture. Not eligible for CR/NCR option.

Exclusion: VIC112Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC113H1 - Encountering Distant Climes: The Literature of Travel and Exploration

Hours: 24S

This course will study accounts of world travelers and explorers from the Middle Ages to the present, including representative examples drawn from the Age of Exploration, the Grand Tour, scientific and map-making expeditions, and the contemporary genre of travel writing. Particular attention will be given to the trans-cultural nature of travel, and the interactive aspects of the gulf between the observer and those observed. Students will analyze the diverse motivational factors behind excursions and expeditions, and apply a critique to written accounts in light of such factors as self-discovery, knowledge and imagination, Eurocentrism, orientalism, cultural relativism, colonialism/imperialism, race, gender, and eco-tourism. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

VIC114H1 - Renaissance in Popular Culture

Hours: 24S

This course explores the depiction of the Renaissance in a wide range of plays, films and novels. The focus is on the exchange between film, fiction, and 'fact', and on how the values and concerns of the present shape creative recreations of the past in popular culture. Not eligible for CR/NCR option.

Exclusion: VIC114Y1

Breadth Requirements: Creative and Cultural Representations (1)

VIC115H1 - Imagined Power: Literature and Film

Hours: 24S

In this course we will study a number of literary and cinematic works that take up questions of power, duty, rights, responsibility, and freedom. Our texts will be drawn from a long history, and from many parts of the world. The sequence however will not be chronological. Not eligible for CR/NCR option.

Exclusion: VIC115Y1

Breadth Requirements: Creative and Cultural Representations (1)

VIC116H1 - Politics of the Pen

Hours: 24S

A study of how literature challenges prevailing political beliefs and social norms. We will situate our discussion in the broader context of human rights and freedoms. We will examine cases where literature has been censored and writers have been imprisoned or driven into exile. Part of this course involves a community service-learning component. We will consider how this literature contributes to debate and advocacy around issues of social justice. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC117H1 - Understanding the Performing Arts: Interpretation and Expression

Hours: 24S

This course examines two key issues about the performing arts that concern both artists and theorists: the nature of interpretation and of expression. What might we mean when we say that a work, a piece of music or a dance for example expresses something? What is it to express? And what is the nature of interpretation? Are there any constraints or boundaries on interpretation? We will draw on both philosophers and non-philosophers to explore these sorts of questions. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

VIC119H1 - Myths and Legends in Modern Contexts

Hours: 24S

This course provides an introduction to modern forms of ancient narratives, exploring the ways in which selected ancient literary sources and myths have been adapted to modern Canadian literature. Ancient narratives or 'old stories' are often reused, reinterpreted or reconstructed in modern narratives and given new relevance in a contemporary context. Students will encounter sources and contexts of ancient narratives. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

VIC121H1 - Evaluating Healthcare: Problems and Solutions

Hours: 24S

This course introduces students to the study of healthcare by asking foundational questions about how evidence and knowledge are produced in the context of healthcare problems. Students will explore how different frameworks for clinical practice (e.g. Evidence-based Medicine, Person-Centered Healthcare) conceptualize evidence and how different methodologies impact how healthcare research is conceived, reported, and understood. Students will learn to critically appraise healthcare research studies and assess their evidence value and implications for clinical practice. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

VIC122H1 - Scientific Evidence in Public Policy

Hours: 24S

This course investigates issues arising from the translation of scientific evidence for public consumption, including in the development of public policy and in confronting problems of social and global significance. Areas of focus will include climate change, global health, and clinical medicine. Students will explore concepts including the perception and communication of risk, the generalizability of research findings, probabilistic and mechanistic thinking, and the use and abuse of scientific authority and “expertise” in public discourse. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

VIC134H1 - Globalization

Hours: 24S

This interdisciplinary course explores the contemporary character of globalization. The world is shrinking as money, goods, people, ideas, weapons, and information flow across national boundaries. Some commentators assert that a more tightly interconnected world can exacerbate financial disruptions, worsen the gap between rich and poor nations, undermine democracy, imperil national cultures, harm the environment, and give unconstrained freedom to predatory corporations. Others proclaim that globalization - understood as capitalism and free markets - fosters economic growth, encourages creative collaboration, inspires technological

breakthroughs, and enhances human prospects for a better life, in rich and poor countries alike, in unprecedented ways. Our task is to evaluate the evidence and draw our own conclusions. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

VIC135H1 - The Death of Meaning

Hours: 24S

In *The Origin of Species*, Darwin concluded there was no evidence to suggest that life was designed by a higher power. A corollary of this is that our lives lack any necessary purpose or meaning. Our readings will be directed to the question of what it means to lack ‘Meaning’. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC136H1 - How to Study Everyday Life

Hours: 24S

An introduction to the academic study of everyday life. A cross-disciplinary discussion class drawing on a wide variety of examples from ordinary life, fantasy, and culture. We situate the apparently innocuous within larger patterns of social relations and social change. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

VIC137H1 - Science and Science Fiction

Hours: 24S

Based on reading and discussion of science fiction and popular science in the context of social issues, this seminar course explores the fantastic visions of humanity's future inspired by scientific advances during the twentieth century. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC141H1 - Discovery and Revolution

Hours: 24S

This course examines the emergence of a global modern world in relation to the upheavals of the Renaissance (1350-1700) and its discoveries and innovations in culture and society. Not eligible for CR/NCR option.

Exclusion: VIC141Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC142H1 - Machiavelli: The Politics of Power

Hours: 24S

The name of Machiavelli unleashes powerful opinions and responses and conjures up trickery, duplicity and cynicism. Yet Machiavelli himself is arguably the least Machiavellian of political figures of the Italian Renaissance. This course examines the writings of Niccolò Machiavelli, placing them in their historical context in order to understand this most controversial figure of the Renaissance, his influence and his lasting legacy. Not eligible for CR/NCR option.

Exclusion: ITA198H1 (Machiavelli and Machiavellianism); VIC141Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC145H1 - Mental Health Literacy in Education

Hours: 24L

This course introduces students to fundamental concepts and issues related to wellbeing and mental health through the lens of mental health literacy. Mental health literacy refers to the knowledge and understanding of mental health conditions, including the ability to recognize symptoms, seek help and know how to support others. Students will investigate varied and global approaches towards achieving wellbeing and situate mental health within individual and social contexts with an emphasis on lived experience. Indigenous, Eastern and spiritual conceptions of wellbeing will be introduced. Mental health literacy in schools and other contexts of learning, will be discussed. The course will equip students with knowledge of how to support their own wellbeing, community wellbeing, and the wellbeing of those they serve now and will serve in the future. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion:

VIC150H1, VIC151H1, VIC152H1, VIC153H1

Breadth Requirements: Society and its Institutions (3)

VIC150H1 - Theory and Practice of Teaching: Theoretical Perspectives

Previous Course Number: VIC151Y1

Hours: 24S

This course introduces past and contemporary theories and perspectives on teaching and learning in schools and broader society. While there is consensus on the fundamental role that both learning and teaching play in society, a range of perspectives exists on what comprises “teaching” and “learning”, how they occur, and how they might be facilitated through designed environments. The course begins with an exploration of major theories of learning and their implications for practice. It then examines several pedagogical frameworks and perspectives of teaching and their implications for educational practice. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC151H1, VIC152H1, VIC153H1, 0.5 credit in any 100-level course in MAT or ENG or HIS or PSY or SOC.

Breadth Requirements: Society and its Institutions (3)

VIC151H1 - Theory and Practice of Teaching: Professional Practice

Previous Course Number: VIC151Y1

Hours: 24S

This course introduces the theories and practices of teaching through analysis of three main themes: planning and implementing inclusive instruction, establishing a classroom context to support diverse learners, and analyzing professional concerns for teachers. Students will be involved in a volunteer placement in a school or community-based setting. Field experience is central to the course with students expected to apply course ideas in their volunteer work and reflect on their experiences in seminars. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC150H1, VIC152H1, VIC153H1, 0.5 credit in any 100-level course in MAT or ENG or HIS or PSY or SOC.

Breadth Requirements: Society and its Institutions (3)

VIC152H1 - School and Society: Historical and Contemporary Contexts

Previous Course Number: VIC150Y1

Hours: 24S

This course investigates the historical and contemporary roles of the school and formal education system and explore changes in these organizations over time. The course examines schools and learning as social, political, intellectual, and economic phenomena. Topics covered include the history of Canada's education system, the purposes of formal schooling, the role of the school, education and the law, education policy and school curriculum. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC150H1, VIC151H1, VIC153H1, 0.5 credit in any 100-level course in MAT or ENG or HIS or PSY or SOC.

Breadth Requirements: Society and its Institutions (3)

VIC153H1 - School and Society: Equity and Social Justice in Education

Previous Course Number: VIC150Y1

Hours: 24S

This course will examine education as a human right and through a human-rights- based lens, explore themes of equity and diversity, global education, Indigenous knowledge and perspectives, and decolonizing education. Contexts of discussion will include early-years learning, elementary and secondary school, post-secondary education, and other community-based learning settings, both locally and globally. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC150H1, VIC151H1, VIC152H1, 0.5 credit in any 100-level course in MAT or ENG or HIS or PSY or SOC

Breadth Requirements: Society and its Institutions (3)

VIC159H1 - Vic One Hundred Special Topics Seminar

Hours: 24S

Topics vary from year to year. Not eligible for CR/NCR option. Breadth requirement will vary from year to year depending on the course topic. Please refer to course website for more information:

<https://vic.utoronto.ca/academic-programs/special-topics-courses/vic159h>

VIC159Y1 - Vic One Hundred Special Topics Seminar

Hours: 48S

Topics vary from year to year. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1), Thought, Belief and Behaviour (2)

VIC162H1 - Cultural Forms and Their Meanings

Hours: 24S

A study of culture with a view to developing basic concepts with examples drawn from the visual arts, music, film, literature, architecture, and/or local urban artefacts. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC163H1, VIC164H1, VIC165H1, and 1.0 credit in any 100-level course in ENG or FAH or PHL

Breadth Requirements: Creative and Cultural Representations (1)

VIC163H1 - Cultural Forms and Their Meanings: People and Ideas

Hours: 24S

A study of culture with a view to developing basic concepts with examples drawn from the visual arts, music, film, architecture, and/or local urban artefacts. We will emphasize how contemporary thought has affected the practice of everyday life. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC162H1, VIC164H1, VIC165H1, and 1.0 credit in any 100-level course in ENG or FAH or PHL

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC164H1 - Ideas and Their Consequences: Literary and Artistic Realms of the Imagination

Hours: 24S

A study of the ideas and concerns of creative thinkers and their impact upon cultures. The course includes literary, scientific and/or religious intellectuals from the major traditions. Attention to modes of reasoning, cultural definition and expression. Emphasis on philosophical and artistic concepts. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC162H1, VIC163H1, VIC165H1, and 1.0 credit in any 100-level course in ENG or FAH or PHL

Breadth Requirements: Society and its Institutions (3)

VIC165H1 - Ideas and Their Consequences: Isolation and Communion in Modern Culture

Hours: 24S

A study of art, with a focus on poetry, as an essential mode of experience and knowledge, in the context of contemporary and modern society. Along with literary artists, the course includes writers on history and sociology and presents the interplay between artistic vision and socio-political situations. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC162H1, VIC163H1, VIC164H1, and 1.0 credit in any 100-level course in ENG or FAH or PHL

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC166H1 - Common Vices and Neglected Virtues: Intro to Ethics of Character

Hours: 24S

Vice is popular: a prestigious university press has brought out a series of seven books on the Seven Deadly Sins. This course examines such questions as the following. Are greed, lust and gluttony just bad names for necessary and otherwise acceptable instincts? What is the place, in a good human life, of such qualities as honesty, trust, civility and the like? Are vices and virtues culturally determined or a matter of individual preference? Can

character be taught, or is it rather a matter of genes and luck? Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC167H1, VIC168H1, VIC169H1, and 1.0 credit in any 100-level course in ANT or PHL or RLG

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC167H1 - Ideas and Fine Thoughts

Hours: 24S

This course examines how political ideas are formed and developed through literature, art, plays, essays and philosophical works in the twentieth century. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC166H1, VIC168H1, VIC169H1, and 1.0 credit in any 100-level course in ANT or PHL or RLG

Breadth Requirements: Creative and Cultural Representations (1)

VIC168H1 - Identity and Equality in the Public Sphere

Hours: 24S

This course explores current legal and philosophical debates around equality, discrimination, and the shaping of individual and group identities. It addresses the way values, affiliation, and identities have an impact on the public sphere of law and policy-making – and the ways in which law and policy, in turn, shape our conceptions (and misconceptions) of people's identities. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC166H1, VIC167H1, VIC169H1, and 1.0 credit in any 100-level course in ANT or PHL or RLG

Breadth Requirements: Society and its Institutions (3)

VIC169H1 - Ethical Living in a Pluralistic World

Hours: 24S

This course examines different values, beliefs, and traditions relating to the natural and social world, ethical

living, and the common good. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC166H1, VIC167H1, VIC168H1, and 1.0 credit in any 100-level course in ANT or PHL or RLG

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC170Y1 - The Impact of Science on Our Society

Hours: 48S

How rhetoric and statistical analysis are used to communicate scientific observations and theories to different audiences will be examined in lectures and seminars. Uncertainty, belief, evidence, risk assessment, random error and bias will be discussed using examples drawn from literature, the arts and the physical, life and social sciences. Students will prepare a research grant application on a scientific topic of their own choice. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC171Y1 and 1.0 credit selected from first-year course offerings in the sciences (0.5 credit must be a BIO course)

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC171Y1 - Methodology, Theory and Practice in the Natural Sciences

Hours: 48S

An examination of scientific theories and their logic in life and physical sciences. Experimental design, novel device production, data analysis and modeling will be discussed using examples drawn from primary source material in the natural sciences. Students will prepare a research paper on a topic designed in consultation with the instructor. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC170Y1 and 1.0 credit selected from first-year course offerings in the sciences (0.5 credit must be a BIO course)

Breadth Requirements: Creative and Cultural Representations (1)

VIC172Y1 - Physical Sciences Today

Hours: 48S

How is science performed and what enables scientific progress? What are our responsibilities as scientists? We base the discussion mostly on the development of microscopy tools. We look at how scientific discoveries affect and were affected by society. This course explores the complementary skills and knowledge needed by modern scientists. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC173Y1 and 1.0 credit selected from first-year course offerings in the sciences (0.5 credit must be a CHM, MAT or PHY course)

Breadth Requirements: Society and its Institutions (3)

VIC173Y1 - Philosophy of Science for Physical Scientists

Hours: 48S

This course introduces students to some of the issues in the philosophy of science, in general, and in the philosophy of physics, in particular. Topics include the scientific method and its controversies, the meaning of time and its properties, realism versus competing approaches, thought experiments, and quantum mechanics. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC172Y1 and 1.0 credit selected from first-year course offerings in the sciences (0.5 credit must be a CHM, MAT or PHY course)

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC181H1 - Events in the Public Sphere: World Affairs

Hours: 24S

This course will review issues in contemporary world affairs, from the fall of the Berlin Wall to the present day. The course will examine the politics and practice of foreign policy decision making. Issues to be covered include the collapse of the Soviet Union, intervention in humanitarian crises, and the conflicts in Afghanistan and Iraq. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: [VIC183H1](#), [VIC184H1](#), [VIC185H1](#), and 1.0 credit in any 100-level course in ECO, HIS or POL

Breadth Requirements: Society and its Institutions (3)

VIC183H1 - Issues in the Public Sphere: Understanding Public Policy

Hours: 24S

This course explores how public service and citizenship are developed. Topics may include the role of law and government, civil liberties, rights and responsibilities, and the creation of policy, as well as how these factors shape collective memory. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: [VIC181H1](#), [VIC184H1](#), [VIC185H1](#), and 1.0 credit in any 100-level course in ECO, HIS or POL

Breadth Requirements: Creative and Cultural Representations (1)

VIC184H1 - Individuals and the Public Sphere: History, Historiography and Making Cultural Memory

Hours: 24S

A seminar course that examines the contribution of an individual or individuals to the public sphere. The course will explore how public service and citizenship are developed in social, philosophical, and cultural contexts. We will examine our evolving role in developing collective, cultural and counter memory. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: [VIC181H1](#), [VIC183H1](#), [VIC185H1](#), and 1.0 credit in any 100-level course in ECO, HIS or POL

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC185H1 - Democracy and Dictatorship

Hours: 24S

This course uses events to discuss the nature of society including major revolutions, economic crises, and the impact of significant artistic, cultural and technological developments. Emphasis on our responsibilities towards

social justice. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: [VIC181H1](#), [VIC183H1](#), [VIC184H1](#), and 1.0 credit in any 100-level course in ECO, HIS or POL

Breadth Requirements: Society and its Institutions (3)

VIC186H1 - The Art and Literature of Leadership 1

Previous Course Number: VIC186Y1

Hours: 24S

What is a leader? Are leaders born or are they made, and if they are made is there a craft to being able to lead others? Through works of art, film, and literature, this course examines the various types of men and women who become leaders from natural-born talents to statesmen and state-crafters and individual entrepreneurs with the purpose of defining those qualities that make for the leaders of tomorrow. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: [VIC187H1](#), [VIC188H1](#), [VIC189H1](#), [ECO101H1](#) and [ECO102H1](#)

Exclusion: [VIC186Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

VIC187H1 - Prosperity, Justice, and Sustainability: Introduction to Public Policy

Hours: 24S

This course introduces policy applications of measurement tools and economic concepts by analyzing current issues in the news, such as public spending and debt, health care, social security, energy, climate change, innovation, and education. Concepts from the philosophy and history of economic thought will be used to address such questions as: What is the nature of economic explanations? Do they tell us the truth about reality? Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: [VIC186Y1](#), [VIC188H1](#), [ECO101H1](#) and [ECO102H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC188H1 - Corporate Citizenship, Sustainability, and Ethics

Hours: 24S

Drawing together philosophical background readings with contemporary applications, this course addresses issues of corporate social responsibility, business ethics, human rights, diversity, and equity, and considers how these topics intersect with a wide range of global practices. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC186H1, VIC187H1, VIC189H1, (ECO101H1 and ECO102H1)/ ECO105Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC189H1 - The Art and Literature of Leadership 2

Previous Course Number: VIC186Y1

Hours: 24S

What is a leader? Are leaders born or are they made, and if they are made is there a craft to being able to lead others? Through works of art, film, and literature, this course examines the various types of men and women who become leaders from natural-born talents to statesmen and state-crafters and individual entrepreneurs with the purpose of defining those qualities that make for the leaders of tomorrow. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC186H1, VIC187H1, VIC188H1, ECO101H1 and ECO102H1

Exclusion: VIC186Y1

Breadth Requirements: Creative and Cultural Representations (1)

VIC190Y1 - The Arts and Society

Hours: 48S

The artist, filmmaker, poet or dramatist has changed society and how we imagine our future. The course explores a number of paradigm cases of how the arts have interacted with social problems. Both historical and current examples of the role of the imaginative arts will be

explored. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC191Y1 and 1.0 credit in any 100-level course in ARC or CIN or DRM or ENG or MUS or VIS

Breadth Requirements: Society and its Institutions (3)

VIC191Y1 - Artistic Creation and Public Issues

Hours: 72S

This course addresses social issues through the exploration of creative activity and the imaginative arts. Topics will be discussed from historical, ethical and philosophical perspectives, and might be considered either in a group or individually. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: Admission to Vic One:

<https://vic.utoronto.ca/future-students/vic-one/>

Corequisite: VIC190Y1 and 1.0 credit in any 100-level course in ARC or CIN or DRM or ENG or MUS or VIS

Breadth Requirements: Creative and Cultural Representations (1)

VIC196H1 - Renaissance Queens

Hours: 24S

This course examines Renaissance queens and queenship by exploring historical and fictional queens and empresses. Topics may include the varied roles queens played within their societies, their relationship with religious and political institutions, the ways in which they negotiated sovereignty vis-a-vis the gender they embodied, and all the ways in which queens were celebrated, criticized, and imagined by artists, writers, and communities of their time and today. Discussion will delve into broad questions around identity and politics and feature a broad range of case studies from Europe to colonial America and beyond. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

VIC197H1 - Detective Fiction

Hours: 24L

This course considers detective fiction from its inception in the late nineteenth century to the present day. Students will be introduced to canonical and lesser known authors

of detective fiction, evolving generic conventions, and reception history. Course content may include mystery stories, connections to emerging legal processes, and critical writing on detective fiction. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: ITA197H1

Breadth Requirements: Society and its Institutions (3)

VIC198H1 - Posters and Propaganda

Hours: 24L

How and when have political posters been used? What forms do they take? How have they changed over time? What can these visual artifacts tell us about the relationship between art and propaganda, and about the political movements that have mobilized visual strategies to advance their aims? This course involves visits to several poster collections, develops visual literacy skills, and highlights the role of the visual in societies past and present. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

VIC199H1 - The Secret Life of Objects: Analyzing the Culture of Things

Hours: 24S

This course will examine the materiality of objects with a view to understanding how artefacts are made, their circulation, consumption, and the importance of *things* to social and cultural life. An investigation of artefacts from various collections in and around the university will be undertaken to develop basic methods for the study, description and analysis of material culture. In addition to hands-on exploration of objects, topics may include antiquarians and their methods, material culture in colonial contexts, and materials in contemporary user-friendly design. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

WDW151H1 - Order and Disorder I: Issues and Perspectives

Hours: 16T/24S

Societies require law and order, but at what point does order become oppression? How do we balance our need for freedom and society's need for order? This

interdisciplinary seminar allows students to explore these and related questions through selected readings introducing theories from sociology, political science, philosophy, and history. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

WDW152H1 - Order and Disorder II: Problems and Solutions

Hours: 16T/24S

This interdisciplinary seminar introduces students to some of the methods used by scholars and researchers in sociology, political science, philosophy, and history to develop, test, and debate possible solutions to the problems of social order and disorder. Topics will vary from year to year. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

WDW194H1 - Freedom, Coercion and Ethics

Hours: 24S

We understand freedom as a basic human need and an inalienable right. Yet, as individuals and citizens, we face complex barriers to exercising our freedoms, especially in the Digital Age. This interdisciplinary course explores classic and contemporary arguments about freedom with an emphasis on feminist and decolonize perspectives. What does it mean to engage in ethical decision-making in the twenty-first century? How do gender, race, class, and ability shape our range of choices? Are some limitations on our freedom of expression necessary and legitimate? How do algorithms and artificial intelligence technologies allow governments and corporations to shape our needs and wants? Students will have the opportunity to address these and other questions through specific case studies and to work with multimedia and digital methods. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: n/a

Breadth Requirements: Thought, Belief and Behaviour (2)

WDW195H1 - From Page to Screen: Reading in the Digital Age

Hours: 24L/12T

This course explores the practice of reading at the juncture between printed page and digital screen through assembling a digital commonplace book, an annotated personal anthology that will document each student's intellectual path. Students will learn close reading strategies, multimodal annotation techniques, and various modes of digital engagement with texts. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

WDW196H1 - From Rayguns to Light Sabers: Science Fiction in Contemporary Culture

Previous Course Number: CCR199Y1
Hours: 24S

This course examines science fiction as pop culture genre, media industry, and sociocultural phenomenon, with attention to some of its key themes, its important texts, creators, and audiences, and its place in contemporary culture. We will study some works chosen by the class as well as by the instructor. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: [ANT195H1](#), [VIC137H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

WDW197H1 - Jane Austen on Film

Hours: 24S

In the 21st century, Jane Austen's early 19th-century novels of love and marriage are increasingly experienced through retellings and updatings in theatrical and made-for-television movies. The course will examine highlights from the last 25 years of Austen adaptations for what they can tell us about relationships in our time, including how Austen's stories are rewritten to please a modern audience. Films in the course will include works from 1995 to 2016 (from 1995, *Clueless*, Austen's *Emma* retold as a Hollywood high school comedy and starring Alicia Silverstone; and *Sense and Sensibility*, for which Emma Thompson's screenplay won an Academy Award; and from 2016, the Hallmark Channel's *Unleashing Mr. Darcy*, Austen's *Pride and Prejudice* transferred to the present-day dog show circuit; and writer/director Whit Stillman's *Love and Friendship*, the first-ever film version of Austen's *Lady Susan*). Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

WDW198H1 - There and Back Again: Exploring Tolkien

Hours: 36S

Since the mid-twentieth century, J.R.R. Tolkien's *The Hobbit* and *The Lord of the Rings* have become classics of children's and fantasy literature. In this course, we read Tolkien's *The Lord of the Rings* and investigate the world-building and imagined history that lies behind the books. We trace how Tolkien's own life experience informed his work—his experience as a soldier of the Great War and a civilian during World War Two; as a scholar of medieval language and literature, and of fairy tales; as a Catholic thinker; and as a lover of nature and the past. We also survey the afterlife of the novels in fantasy, film, and the popular imagination. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

WDW199H1 - Indigenous Knowledge and Storytelling in Toronto

Hours: 12T/24S

The land now known as Toronto has a 13,000+ year old history of Indigenous presence that is still unfolding. This history is inscribed in the land – it is visible in the geographical features, place names, and contemporary urban form of the city and is represented through stories (oral and written) told by diverse members of Toronto's Indigenous community. This course engages with stories of Indigenous history and presence in Toronto through a selection of Indigenous literary works about Toronto, Indigenous guest speakers, and a series of experiential Indigenous storytelling tours of significant locations across the city. Students will be introduced to Indigenous worldviews and ways of knowing and will learn why storytelling remains a significant and culturally-appropriate means for keeping and sharing land-based Indigenous Knowledge. Students will gain a deeper appreciation of the city as a traditional Indigenous territory and will reflect on their own relationships and responsibilities within these lands. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

Rasoul Yousefpour, BSc, MSc, PhD

Professors Emeriti

David Balsillie
Roarke Bryan
Terry Carleton
Paul Cooper
Martin Hubbes
Andy Kenney
Jay Malcolm
David Martell
Vic Timmer

Introduction

In the past, Forestry programs have traditionally focused on the management of forests as sources of timber and revenue. However, with the increasing recognition of their immense cultural, social, and environmental role, the focus of forest management has shifted to include biodiversity maintenance, ecological sustainability, and the protection of wildlife and their habitats. Our Forest Conservation programs prepare students for this critically important role by combining traditional ecological and physical sciences with social sciences. Graduates can pursue a wide range of new career opportunities developing in private, government, and non-government environmental organizations where forest conservationists increasingly work as members of multidisciplinary teams of environmental and resource managers focusing on complex, emerging social and community issues, such as Aboriginal rights and land tenure, protection of wilderness

parklands, preservation of urban green space, and the use of forests for carbon sequestration.

The Undergraduate Forestry program at the University of Toronto is designed to provide students with a comprehensive understanding of the biological, social, and operational fundamentals of forestry and its relationship to our ecosystems. The program offers courses in forest conservation, tree biology and identification, arboriculture, wood science and forest products, wildlife and insect ecology, agroforestry, urban forestry, bioenergy, and forest fire behaviour and management.

Students may take a specialist degree leading to a Bachelor of Arts in Forest Conservation or a Bachelor of Science in Forest Conservation Science. The arts program focuses on communal forest management, development of forest policies, forest economics and forest product trade, with electives in social sciences, while the science program concentrates on forest biology and ecology with electives in life and physical sciences.

The major programs in Forest Conservation are intended to build on a student's interest in forestry and related issues. Students should consider combining these programs with a major in another related discipline such as environment, geography, biology, chemistry, or urban studies. A minor in Forest Conservation Science (Science program) and a minor in Forest Conservation (Arts program) are also available.

Foresters play a critical role in managing our natural resources, and as a forestry student you will learn how to take care of our forests while addressing some of the biggest challenges facing our forest landscapes, ecosystems, and communities.

If you are passionate about the sustainability of natural resources, value experiential learning in the outdoors and classroom, and want to gain an understanding of the natural and social sciences needed to tackle the challenges of resource management in the face of future climates, then one of our forestry programs may be perfect for you.

Note About Enrolment in the Forest Biomaterials Science Major and Minor

Enrolment in the Forest Biomaterials Science Major ([ASMAJ1098](#)) and Minor ([ASMIN1098](#)) was

administratively suspended October 1, 2020 and new students are no longer being admitted. Students presently enrolled in the Major or Minor will be able to complete the respective program requirements.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Forest Conservation and Forest Biomaterials Science programs impacted by this policy: ASSPE1102, ASMAJ1102, and ASMIN1102; ASSPE1100, ASMAJ1100, and ASMIN1100

Forest Conservation and Forest Biomaterials Science Programs

Forest Conservation Science Specialist (Science Program) - ASSPE1102

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(12.0 credits, including at least 3.5 credits at the 300-level and 2.0 credits at the 400-level; other equivalent and approved courses offered by other Faculties, University of Toronto Mississauga or University of Toronto Scarborough may be eligible for inclusion.)

First Year:

BIO120H1; plus 2.5 first year Science credits (GGR101H1; CHM135H1, CHM136H1 recommended)

Second Year:

1. FOR200H1, FOR201H1
2. 1.0 credit from ECO220Y1, ECO227Y1; GGR270H1, GGR271H1; STA220H1, STA221H1
3. 1.5 credits from BIO220H1, BIO251H1, BIO260H1; GGR201H1, GGR203H1, GGR205H1, GGR206H1, GGR223H1, GGR272H1, GGR273H1; PHL273H1; ENV221H1, ENV222H1; ENV234H1/ EEB240H1, ENV237H1, ENV238H1

Third Year:

1. FOR301H1, FOR305H1; 1.0 credit from FOR300H1, FOR302H1, FOR303H1, FOR306H1, FOR307H1, FOR310H1; ENV334H1
2. 0.5 credit from EEB319H1, EEB321H1, EEB323H1, EEB328H1; CSB340H1
3. 1.0 credit from EEB324H1, EEB365H1, EEB386H1, EEB388H1; GGR305H1, GGR314H1; ENV320H1, ENV322H1, ENV323H1

Fourth Year:

1. FOR400Y1, FOR401H1
2. 0.5 credit from FOR403H1, FOR405H1, FOR410H1, FOR413H1, FOR416H1, FOR417H1, FOR418H1, FOR419H1, FOR420H1, FOR423H1; ENV347H1; EEB403H1, EEB406H1, EEB407H1

To substitute courses not currently on offer, please contact the Forestry Undergraduate Administrator to discuss course options from other departments.

Note: If the FOR301H1 is not on offer, a student may use a substitute field or research course from another department. Contact the Forestry Undergraduate Administrator for details and confirmation.

Forest Conservation Specialist (Arts Program) - ASSPE1100

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(12.0 credits, including at least 3.0 credits at the 300-level and 2.5 credits at the 400-level; other equivalent and approved courses offered by other Faculties, University of Toronto Mississauga or University of Toronto Scarborough may be eligible for inclusion.)

First Year:

BIO120H1; plus 1.5 first year Social Science credits

Second Year:

1. ENV234H1/ EEB240H1; FOR200H1, FOR201H1
2. 1.0 credit from ECO220Y1, ECO227Y1; GGR270H1; STA220H1, STA221H1, STA255H1
3. 1.0 credit from ANT204H1; ENV221H1, ENV222H1; GGR223H1; INS201Y1; PHL273H1

Third Year:

1. FOR301H1, FOR305H1; At least 1.0 credit from FOR300H1, FOR302H1, FOR303H1, FOR306H1, FOR307H1, FOR310H1; EEB321H1

2. At least 1.0 credit from JGE321H1, JGE331H1; ENV320H1, ENV323H1, ENV347H1, JIG322H1

Fourth Year:

1. FOR400Y1, FOR401H1
 2. 1.0 credit from ANT450H1; FOR403H1, FOR416H1, FOR417H1, FOR418H1; ENV421H1, ENV422H1, ENV440H1; GGR416H1

An additional 1.0 credit can be taken from any 3rd or 4th year elective listed above.

To substitute courses not currently on offer, please contact the Forestry Undergraduate Administrator to discuss course options from other departments.

Note: If the FOR301H1 is not on offer, a student may use a substitute field or research course from another department. Contact the Forestry Undergraduate Administrator for details and confirmation.

Forest Biomaterials Science Major (Science Program) - ASMAJ1098

Enrolment Requirements:

Enrolment in the Forest Biomaterials Science Major is being administratively suspended as of 1 October 2020 and no new students will be admitted thereafter. Students presently enrolled in the Major will be able to complete the program requirements as described below.

Completion Requirements:

The Forest Biomaterials major or minor may be strengthened by an accompanying major or minor(s) in Biology (major, minor), Biochemistry (major), Forest Conservation (major, minor), Chemistry (major, minor), Environmental Chemistry (minor), Materials Chemistry (minor) or Environment & Science (major, minor).

Questions about the program should be submitted to programs@daniels.utoronto.ca.

(8.0 credits, including at least 2.0 credits at the 300-level and 2.0 credits at the 400-level; other equivalent and approved courses offered by other Faculties may be eligible for inclusion.)

1. BIO120H1; 1.0 credit from MSE101H1; ECO101H1, ECO102H1, ECO105Y1; CHM135H1, CHM136H1; MAT135H1
 2. FOR200H1, STA220H1; 1.0 credit from CHM220H1; ENV221H1, ENV234H1/ EEB240H1; MSE219H1; BCH210H1; BCH242Y1; STA221H1; EEB225H1;

MGT201H1, RSM100Y1; BIO220H1, BIO251H1
 3. FOR300H1, FOR310H1; 1.0 credit from FOR302H1, FOR305H1; ENV350H1; MSE316H1; BCH370H1; GGR348H1
 4. FOR401H1, FOR410H1; 1.0 credit from FOR403H1, FOR405H1, FOR420H1, FOR423H1; CHE475H1

An additional 0.5 credit can be taken from any 3rd or 4th year elective listed above.

Forest Conservation Major (Arts Program) - ASMAJ1100

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(8.0 credits, including at least 1.5 credits at the 300-level and 1.0 credit at the 400-level; other equivalent and approved courses offered by other Faculties, University of Toronto Mississauga or University of Toronto Scarborough may be eligible for inclusion.)

First Year:

BIO120H1; plus 1.5 first year Social Science credits

Second Year:

1. ENV234H1/ EEB240H1; FOR200H1, FOR201H1
 2. 1.0 credit from ANT204H1; ECO220Y1, ECO227Y1; GGR270H1; INS201Y1; STA221H1; ENV221H1, ENV222H1; PHL273H1; STA220H1, STA255H1

Third Year:

FOR305H1; 1.0 credit from FOR300H1, FOR301H1, FOR302H1, FOR303H1, FOR306H1, FOR307H1, FOR310H1; EEB321H1

Fourth Year:

FOR400Y1

An additional 1.0 credit can be taken from any 3rd or 4th year elective listed above or under the Forest Conservation Specialist (Arts Program).

To substitute courses not currently on offer, please contact the Forestry Undergraduate Administrator to discuss course options from other departments.

Forest Conservation Science Major (Science Program) - ASMAJ1102

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(8.0 credits, including at least 2.0 credits at the 300-level and 1.0 credit at the 400-level; other equivalent and approved courses offered by other Faculties, University of Toronto Mississauga or University of Toronto Scarborough may be eligible for inclusion.)

First Year:

BIO120H1; plus 2.5 first year Science credits (JEG100H1, GGR101H1, CHM135H1, CHM136H1 recommended)

Second Year:

FOR200H1, FOR201H1; 1.0 credit from ENV234H1/EEB240H1, ENV237H1, ENV238H1, GGR201H1, GGR203H1, GGR205H1, GGR206H1, GGR223H1, GGR272H1, GGR273H1, BIO220H1

Third Year:

FOR305H1; 1.5 credits from FOR300H1, FOR301H1, FOR302H1, FOR303H1, FOR306H1, FOR307H1, FOR310H1, EEB321H1

Fourth Year:

FOR400Y1

To substitute courses not currently on offer, please contact the Forestry Undergraduate Administrator to discuss course options from other departments.

Forest Biomaterials Science Minor (Science Program) - ASMIN1098

Enrolment Requirements:

Enrolment in the Forest Biomaterials Science Minor is being administratively suspended as of 1 October 2020 and no new students will be admitted thereafter. Students presently enrolled in the Minor will be able to complete the program requirements as described below.

Completion Requirements:

The Forest Biomaterials major or minor may be strengthened by an accompanying major or minor(s) in Biology (major, minor), Biochemistry (major), Forest Conservation (major, minor), Chemistry (major, minor), Environmental Chemistry (minor), Materials Chemistry (minor) or Environment & Science (major, minor).

Questions about the program should be submitted to programs@daniels.utoronto.ca.

(4.0 credits, including at least 1.5 credits at the 300-level and 1.0 credit at the 400-level)

1. 1.5 credits from BIO120H1; MSE101H1; ECO105Y1; CHM135H1, CHM136H1, CHM220H1; FOR200H1; ENV234H1/ EEB240H1; MGT201H1
2. FOR300H1, FOR310H1; 0.5 credit from ENV350H1; MSE219H1, MSE316H1; FOR305H1, BCH370H1; GGR348H1
3. 1.0 credit from FOR401H1, FOR405H1, FOR410H1, FOR420H1, FOR423H1

Forest Conservation Minor (Arts Program) - ASMIN1100

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

First Year: 1.0 credit from ANT100Y1; ECO101H1, ECO102H1; ENV200H1; GGR101H1, JEG100H1

Higher Years: 3.0 credits from FOR200H1, FOR201H1, FOR300H1, FOR301H1, FOR302H1, FOR303H1, FOR305H1, FOR306H1, FOR307H1, FOR310H1, FOR400Y1, FOR401H1

To substitute courses not currently on offer, please contact the Forestry Undergraduate Administrator to discuss course options from other departments.

Forest Conservation Science Minor (Science Program) - ASMIN1102

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, including at least 1.0 credit at the 300-level and 1.0 credit at the 400-level)

First Year: 1.0 credit from BIO120H1; GGR101H1; CHM135H1, CHM136H1

Second Year: FOR200H1, FOR201H1

Forest Conservation and Forest Biomaterials Science Courses

FOR199H1 - Trees in Architecture and Urban Design

Hours: 24L

Most depictions of “cities of the future” are a fusion of buildings and forests. Is this happening? If not, why not? This course bridges the disciplines of forestry, architecture, and landscape and urban design to examine the evolving role of trees in human habitations. The course will survey designs incorporating trees on buildings, from the hanging gardens of Babylon to the Bosque Verticale of contemporary Milan, the evolution of urban forestry and urban “green infrastructure”, and history and current policy initiatives and debates. The course will involve site visits and guest lectures in the City of Toronto, readings of both popular and scholarly literature, as well as student design projects and presentations. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

Course Experience: University-Based Experience

FOR200H1 - Conservation of Canada's Forests

Hours: 24L

Forest conservation issues in Canada; fundamentals of forest biology and ecology; forest biodiversity; development of forest management philosophy in Canadian forested regions; concepts of sustainability. Sustainable forest management strategies; forest policy and economics in a Canadian context; forest certification; protected areas.

Third Year: 1.0 credit from FOR300H1, FOR301H1, FOR302H1, FOR303H1, FOR305H1, FOR306H1, FOR307H1, FOR310H1

Fourth Year: FOR400Y1

To substitute courses not currently on offer, please contact the Forestry Undergraduate Administrator to discuss course options from other departments.

Breadth Requirements: Living Things and Their Environment (4)

FOR201H1 - Conservation of Tropical and Subtropical Forests

Hours: 24L

The world's major tropical and subtropical forest biomes; prospects for conservation and sustainable management; consequences of different forest development strategies; tropical deforestation and selective logging; agroforestry; biodiversity and non-timber forest products; the fuelwood crisis; large carnivore conservation; ecological, economic and social perspectives.

Breadth Requirements: Living Things and Their Environment (4)

FOR300H1 - Forest Products in Sustainable Forestry

Hours: 24L/24P

Traditional and non-traditional forest products; wood structure; properties and material attributes; functional characteristics and logistics of wood product industry. Contribution of innovative product development to conservation; adding value; residue use; biorefinery; under-utilized species; wood protection. Forest product certification; eco-labelling; life cycle analysis.

Recommended Preparation: FOR200H1, FOR201H1

Breadth Requirements: The Physical and Mathematical Universes (5)

FOR301H0 - Field Methods in Forest Conservation

A practical introduction to the field methods used by forest conservationists in Ontario. The overnight field camp portion is approximately seven days taking place during August. Field exercises will provide students with practical

training in tree identification, forest ecosystem classification, forest inventory, stand management prescriptions, tree marking, and silvicultural systems. Each student is required to pay an ancillary fee of approximately \$875 to cover the costs of transportation, food, and accommodation. Interested students should contact the Forestry Program Administrator to register. Later registrations will be considered if class size permits.

Recommended Preparation: ENV234H1/ EEB240H1, FOR200H1, FOR201H1

Breadth Requirements: Living Things and Their Environment (4)

FOR301H1 - Field Methods in Forest Conservation

A practical introduction to the field methods used by forest conservationists in Ontario. The overnight field camp portion is approximately seven days taking place during August. Field exercises will provide students with practical training in tree identification, forest ecosystem classification, forest inventory, stand management prescriptions, tree marking, and silvicultural systems. Each student is required to pay an ancillary fee of approximately \$875 to cover the costs of transportation, food, and accommodation. Interested students should contact the Forestry Program Administrator to register. Later registrations will be considered if class size permits.

Recommended Preparation: ENV234H1/ EEB240H1, FOR200H1, FOR201H1

Breadth Requirements: Living Things and Their Environment (4)

FOR302H1 - Societal Values and Forest Management

Hours: 24L

This course will explore the diverse societal values, interests, and perspectives that informs forest management in rural and urban settings. It will examine the social and political environment in which forest management takes place, and the different approaches to balancing social, economic, and environmental objectives in forest management. Topics include Indigenous stewardship and traditional ecological knowledge, climate change, ecosystem services, urban forestry, community forestry, recreation, human health and well-being, biodiversity conservation, equity and environmental justice, and adaptive management.

Recommended Preparation: FOR200H1, FOR201H1
Breadth Requirements: Society and its Institutions (3)

FOR303H1 - Human Dimensions of Global Forests

Hours: 24L

Global forest resources and forest economics; relationships between societies and forests, consumption, trade and valuation of timber and non-timber products; ecosystem services, climate change and forestry, tropical deforestation and softwood lumber dispute.

Recommended Preparation: FOR200H1, FOR201H1
Breadth Requirements: Society and its Institutions (3)

FOR305H1 - Biology of Trees and Forests

Hours: 24L/40P

An overview of the biology of trees and the ecological principles that govern the structure and function of forests. Topics in tree biology will include tree identification, wood anatomy, tree architecture, resource acquisition and allocation, tree growth and mortality. Topics in forest ecology will include resource competition, stand development, species succession, and the cycling of nutrients and energy. This course will include a substantial field and lab component.

Recommended Preparation: FOR200H1, FOR201H1, BIO120H1, BIO220H1, BIO251H1

Breadth Requirements: Living Things and Their Environment (4)

FOR306H1 - Tropical Forest Ecology and Conservation Field Course

Hours: 24P

This course will provide practical experience in tropical forest conservation, introducing tools for rapid assessment of biodiversity, analysis of human use and natural disturbance impacts on forest structure and diversity, and the development of effective forest conservation strategies. See Forestry website for details.

Not eligible for CR/NCR option.

Prerequisite: FOR201H1, FOR301H1 or FOR305H1
Breadth Requirements: Living Things and Their Environment (4)
Course Experience: University-Based Experience

FOR307H1 - Forest Insect Ecology & Management

Hours: 24L/24P

Insect identification and ecology, biodiversity and conservation, invasive species, insect-tree interaction, biological control, pesticide use, and integrated pest management.

Recommended Preparation: FOR200H1, FOR201H1
Breadth Requirements: Living Things and Their Environment (4)

FOR310H1 - Bioenergy from Sustainable Forest Management

Hours: 24L/12T

Socio-economic, technical, political and environmental issues associated with the utilization of forest biomass (e.g., harvesting residues, thinnings, salvage, short rotation woody crops) for a source of renewable energy.

Recommended Preparation: Completion of at least 5.0 Science credits
Breadth Requirements: Society and its Institutions (3)

FOR400Y1 - Advanced Seminar in Forest Conservation

Hours: 48S

Examination of current and emerging critical issues affecting sustainable management and conservation of global forests. Seminars led by students, faculty and visiting speakers.

Prerequisite: FOR200H1 or FOR201H1 and at least 1.0 credit from: FOR300H1/ FOR301H1/ FOR302H1/ FOR303H1/ FOR305H1/ FOR306H1/ FOR307H1/ FOR310H1; or with permission of the instructor or program administrator
Breadth Requirements: Living Things and Their Environment (4), Society and its Institutions (3)

FOR401H1 - Research Paper/Thesis in Forest Conservation

A research project requiring the prior consent of a member of the Department to supervise the project. Individual in-depth student research projects on significant forest conservation and forest biomaterial issues, based

on field and/or laboratory research, or literature survey. Not eligible for CR/NCR option. Please contact Program Administrator for further enrollment details.

Prerequisite: 1.0 credit from: FOR300H1, FOR301H1, FOR302H1, FOR303H1, FOR305H1, FOR306H1, FOR307H1, FOR310H1 or with supervisor or program administrator approval

FOR403H1 - Directed Readings

Hours: 24S

Requires the prior consent of a member of the Department to supervise the readings and assignments. Provides opportunities for students to carry out an individual in-depth study of current forest conservation and forest biomaterials issues. Please contact the Program Administrator for further enrollment details. Not eligible for CR/NCR option.

Prerequisite: 1.0 credit from: FOR300H1/ FOR301H1/ FOR302H1/ FOR303H1/ FOR305H1/ FOR306H1/ FOR307H1/ FOR310H1 or Supervisor or Program Administrator approval

FOR404H1 - Arboriculture

Hours: 24L

The management and care of individual trees in the places we live, work, and play, from rural communities to urban centres, is critical to protecting human life and property, and to maximizing the many social, environmental, and economic benefits that trees provide. Students will develop a professional level of knowledge and skills in arboriculture expected of tree care professionals like arborists and urban foresters, including: tree biology, tree identification and selection, soil management, installation and establishment, pruning, diagnosis and treatment, trees and construction, tree risk management, safe work practices, and urban forestry. Emphasis will be placed on application, real-world scenarios, and problem-based learning. Professionalism, ethics, career pathways and professional development will also be covered.

Prerequisite: 8.0 credits
Recommended Preparation: FOR305H1
Breadth Requirements: Living Things and Their Environment (4)
Course Experience: University-Based Experience

FOR410H1 - Bioenergy and Biorefinery Technology

Hours: 24L/24T

Technological advances and approaches in deriving biofuels and chemical feedstocks from forest and other biomass. Fundamental chemical attributes of biomass, as they affect the fuel value and potential for deriving liquid, solid and gaseous fuels and valuable chemicals for other applications will be discussed.

Prerequisite: 10.0 credits

Exclusion: FOR425H1 (APSC)

Recommended Preparation:

Breadth Requirements: The Physical and Mathematical Universes (5)

FOR413H1 - Wildlife Ecology & Conservation

Hours: 24L

Temperate and tropical wildlife ecology and conservation; roles of wildlife in forest conservation; impacts of forestry practices and landscape modification on wildlife; ecology and viability of wildlife populations; human uses and abuses of game and non-game species.

Prerequisite: 1.0 credit from: FOR300H1, FOR301H1, FOR302H1, FOR303H1, FOR305H1, FOR306H1, FOR307H1, FOR310H1 or with permission of the instructor/program administrator

Exclusion: EEB255H1, EEB365H1

Breadth Requirements: Living Things and Their Environment (4)

FOR416H1 - Green Urban Infrastructure

Hours: 24L

Trees in and around the city are key to providing multiple engineered and ecological services that only recently have been brought into the responsible fiscal planning of every municipality around the globe. Reviews the role of trees and woodlands in providing environmental, social and economic benefits to urban and peri-urban residents and to the broader environment. Examines approaches to the characterization of urban forest ecosystems, and their planning and management.

Prerequisite: Completion of 4.0 credits

Exclusion: FOR421H1 (APSC)

Recommended Preparation: FOR200H1, FOR201H1

Breadth Requirements: Living Things and Their Environment (4)

FOR417H1 - Agroforestry

Hours: 24L

This course explores the roles of trees and forests in agricultural land-use systems and examines the biological and management aspects of agroforestry. The sustainability of agroforestry systems is examined within the context of socio-economic constraints, geopolitical forces, and Indigenous perspectives.

Prerequisite: 8.0 credits

Recommended Preparation: FOR201H1, FOR302H1

Breadth Requirements: Living Things and Their Environment (4)

FOR418H1 - Urban Forest Conservation Field Camp

Hours: 45L/15P

A ten-day field course examining urban forestry issues in the GTA, southern and eastern Ontario and Quebec. Topics include: urban forest inventories, nursery production, arboricultural techniques, urban woodland management, urban forest health, urban forest administration, urban dendrology, and urban forestry research. Additional fees for field course (e.g. accommodation, food, other within course travel expenses) will apply. See Forestry website for details. Not eligible for CR/NCR option.

Prerequisite: FOR200H1, FOR201H1, or permission of the instructor.

Breadth Requirements: Living Things and Their Environment (4)

FOR419H1 - Forest Fire Behaviour and Management

Hours: 24L/24P

Understanding forest fire activity is important for predicting fire's impact on forests and the wildland-urban interface, as well as understanding the impacts of climate change. Basic principles of forest fuel moisture exchange, fire occurrence and fire behaviour are explored. Emphasis is placed on application of these models to real fire management problems.

Prerequisite: 10.0 credits

Recommended Preparation: FOR303H1

Breadth Requirements: Living Things and Their Environment (4)

FOR420H1 - Green Process Chemistry

Hours: 24L/12T

This course provides an overview of the chemistry of wood and wood materials involving cellulose, hemicellulose, lignin, extractives. It also covers some reaction chemistry associated with these chemical components.

Recommended Preparation: Completion of at least 10.0 Science credits

Breadth Requirements: The Physical and Mathematical Universes (5)

FOR423H1 - Sustainable Materials Design and Manufacturing

Hours: 24L/24T

This course focuses on the manufacturing processes, properties and uses of wood and agricultural fibre based products including wood based composites, ligno-cellulosic/thermoplastic composites and structural or

engineered composites, and the practical use of these products in design.

Prerequisite: 10.0 credits

Exclusion: FOR424H1 (APSC)

Breadth Requirements: Living Things and Their Environment (4)

FOR426H1 - Working with Wood

Hours: 24L/3T/6P/3S

Wood has been an important building material throughout the ages and in today's world has taken on the added importance of being a renewable and sustainable material that assists with greenhouse gas mitigation strategies. This course will provide students with an understanding of wood's unique physical properties, the variability of these properties within different species and how these properties can inform its proper use in various applications. The Canadian forestry industry sets the context for this course acknowledging that forests transcend political borders and reach around the world.

Prerequisite: Canada Forests

Breadth Requirements: The Physical and Mathematical Universes (5)

Course Experience: University-Based Experience

S. Bello, MA, PhD (SM)

Part-time Assistant Professor, Teaching Stream

P. Bessler, MA, PhD (OH)

Introduction

French is not only one of the official languages of Canada: it is also one of the world's major international languages. Courses in French Studies provide a varied, flexible, and in-depth examination of the French language and the multitude of cultures that it serves. The skills and knowledge acquired lay the groundwork for careers in teaching, journalism, translation, publishing, law, and government service as well as research in a variety of fields. On the Canadian job market, command of the French language is an enormous asset. The Department offers students a diversified curriculum, which brings together courses in language, linguistics, literature, and French culture. Unless specified otherwise, the language of instruction of all courses is French.

Placement

If you have absolutely no prior experience studying French, FSL100H1 is the appropriate starting point for French classes. Do not take the Department of French placement test.

If you are a native, near-native or fluent speaker of French, you are invited to enrol immediately in FRE and FCS courses that have no other prerequisite FRE courses (see the description below). You are typically not allowed to enrol in FSL courses or FRE courses that have other prerequisites. Near-native and fluent speakers of French are invited to enrol in most Department programs (with the exception of the Minor in French Language); they will need to replace most or all of the required FSL program credits with additional credits in other course categories. Special permission from the Department is required if your personal history justifies exemption from FRE prerequisites and/or exceptional permission to enrol in a specific FSL course. Do not take the Department of French placement test unless asked to do so after you have contacted the Department.

Otherwise, you must take the Department of French placement test. You will normally only receive credit if you enrol in the level indicated by the test. If your test results indicate placement in FSL320 or higher, you may also take FRE courses that have no other FRE courses as prerequisites.

Explanation of Course Codes

FCS (French Cultural Studies) courses are taught in English and enrolment is open to the entire University community and does not require prerequisite courses. Some FCS courses may count towards Department program requirements if certain components of the course are completed in French.

JFL (Joint French-Linguistics) courses are taught in English in collaboration with the Department of Linguistics. Certain JFL courses are required for programs in French Language Learning and French Linguistics programs and may count towards requirements in other Department programs if certain components of the course are completed in French.

FSL courses are taught in French. Their primary objective is to improve students' language proficiency. FSL courses are required as part of all Department programs. Near-native and fluent speakers are only allowed to enrol in FSL courses under special circumstances with Department permission. If this applies to you, contact the Department for details.

FRE courses are taught in French and are content based. Topics covered in FRE courses are centred around French literature, linguistics, language learning and/or culture. All FRE courses require students to have either completed FSL222H1 or to have been placed at the 300-level or higher in FSL courses based on the Department of French placement test. Native and fluent speakers are typically exempted from this FSL requirement.

For any further inquiries, please contact the Department.

Programs

It is possible to enrol in more than one program in the Department of French. In such cases, students are allowed to double-count a maximum of 1.0 credit towards their French programs. All programs include **FSL courses** to help students improve their French writing and speaking skills in a variety of contexts.

The **major** program in **French Language Learning** focuses on allowing students to receive the highest possible level of French proficiency, as well as readiness to function in professional environments requiring the use of French, as well as the ability to discuss the linguistic structures of French with accuracy and precision. This program has the most significant FSL component of all Department programs and also includes a variety of courses related specifically to language-learning and teaching strategies, contemporary French and Francophone culture, and linguistic theory focused on second language acquisition and bilingualism.

The **specialist** and **major** programs in **French Language and French Linguistics** include FRE and JFL courses that introduce students to the analysis of contemporary French and its historical development, including formal linguistic theory, bilingualism, second language acquisition, computational methods and language contact.

The **specialist** and **major** programs in **French Language and French Literature** include FRE courses that introduce students to concepts, methodologies, and critical tools explore disciplinary and interdisciplinary perspectives on French and Francophone literature and literary thought.

The **Minor in French Studies** allows students flexibility to choose from a variety of topic courses conducted in French, based on their interests. Students can either concentrate in French Literature or French Linguistics, or take a combination of courses in both areas. Students often choose this program as a starting point if they are unsure of which Major program to pursue before deciding to focus on French Literature, French Linguistics or French Language Learning by switching to a Major program.

The **Minor in French Language** is designed to enhance the French language proficiency of non-native speakers—encompassing grammar, reading, writing, and oral communication—for both personal and professional development. The program requires the completion of a minimum of 3.0 credits in FSL-designated courses for a total of 4.0 credits.

Important Policies re French as a Second Language (FSL) Courses

The following policies must be respected when registering for French courses. Failure to do so may result in students

being automatically withdrawn by the Department from the course in which they are registered:

1. Placement in French language courses is based on the results of the Department's Placement Test, which assesses linguistic competence. Since FSL 100-, 200-, 300-, and 400-level courses reflect language proficiency rather than year of study, students may be placed in a course level that does not correspond to their academic year. The Placement Test, available at <https://uttf.artsci.utoronto.ca/login>, is mandatory for all students who wish to register in an FRE or FSL course for the first time (except true beginners with no knowledge of French who may enrol directly in FSL100H1). The Test can be taken only ONCE and the results of the first test will prevail in the event of multiple attempts. Ideally, the Placement Test should be taken in the term preceding the one in which students wish to register (e.g., for a course starting in September, students should take the Placement Test in the summer term, prior to their registration date on ACORN and before the beginning of classes). Students will receive their results by email shortly after taking the test. Self-placement is not allowed in the Department of French. The administration reserves the right to conduct an additional test if in doubt about a student's undeclared proficiency in French.
2. Sequencing: Students are reminded that they must take FSL courses in the appropriate sequencing (100>200>300>400).
3. Auditing: No auditing is allowed in FSL courses.

Study Elsewhere Programs

For more information, please go to <https://www.french.utoronto.ca/undergraduate-program/study-elsewhere> or email: french.elsewhere@utoronto.ca

Quebec and France

Students who have completed at least one year of full-time studies and wish to study abroad for one or two semesters should contact the University of Toronto Centre for International Experience Office, or consult their [website](#). Students may request credit for a course offered by the Department of French, subject to the general rules for eligibility.

Transfer Credits

Please note a maximum of 5.0 credits may be applied toward the Specialist Program, 3.5 credits toward the Major Program, and 2.0 credits toward the Minor Program.

- For FSL Courses:
Students may apply for transfer credits for

language courses taken at any accredited or degree-granting university in Canada or abroad; this is done through the Office of the Faculty Registrar. In order to be recommended for transfer credits, students should arrange, before returning to Toronto, for the university in which the course(s) were taken to send an official transcript of their results directly to the Office of the Faculty Registrar.

As soon as possible upon their return from the program, students who wish to obtain a transfer credit are required to book an appointment to take the placement test at the Department of French. They should call 416 926 2302 or email french.secretary@utoronto.ca. They must qualify for entry in the next language course above the level of the one for which they desire the credit. Students must enrol in the course recommended by the placement test results. No self-placement is allowed.

- For FRE Courses:
Transfer credits for studies in areas other than language may be requested directly upon return through the Office of the Faculty Registrar and will be processed in the normal way. It is recommended that a Letter of Permission and pre-approval of proposed courses be requested through the Office of the Faculty Registrar well in advance of departure from Toronto. Students are reminded that only courses taken at accredited universities or degree-granting institutions will be considered for credit.

Exclusions and prerequisites: Students must abide by all requirements stated in the exclusions and prerequisites to register in a course. Students who do not have the prerequisites for a given course must obtain the permission of the Department prior to registration. The Department will assess the students' admissibility to the course in consultation with the instructor. For FSL courses, exclusions ensure that students follow the best progression in language learning.

Further Information: The French Studies Undergraduate Brochure, available online at www.french.utoronto.ca/undergraduate, contains more detailed information concerning the courses and programs listed below.

Associate Chair, Undergraduate: Room 227, Odette Hall, 50 St. Joseph St., 416-926-2312, french.undergradchair@utoronto.ca

Undergraduate Counsellor: Room 226, Odette Hall, 50 St. Joseph St., 416-926-2333, french.undergraduate@utoronto.ca

General Enquiries: Room 210, Odette Hall, 50 St. Joseph St., 416-926-2302, french.secretary@utoronto.ca

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The French programs impacted by this policy: ASSPE0525 and ASMAJ0525; ASSPE1295 and ASMAJ1295

French Programs

French Language and French Linguistics Specialist (Arts Program) - ASSPE0525

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(10.0 credits)

1) (FSL220H1, FSL222H1)/ FSL221Y1, FSL224H1.

2) FRE272H1, FRE273H1, FRE210H1/ FRE245H1, (FSL320H1, FSL322H1)/ FSL321Y1.

3) FRE376H1, FRE378H1, FRE379H1, FRE383H1, FRE386H1/ FRE387H1, JFL388H1/ JFG388H1/ CSC108H1/ ENG286H1.

4) 1.5 credit selected from FRE471H1/ FRE483H1/ JFL484H1/ FRE486H1/ FRE487H1/ FRE488H1/ FRE489H1/ FRE490Y1/ FRE491H1/ FRE492H1.

5) 1.5 additional credit of FRE at the 200+ level or FSL at the 300+ level.

N.B.

i) Students not placed in FSL220H1 or higher by the Placement test must first complete FSL122H1 before starting this program.

ii) Students exempted from any of the required FSL courses based on placement test result or Department decision must replace these with the equivalent number of credits of additional FSL or FRE courses.

French Language and Literature Specialist (Arts Program) - ASSPE1295

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(10.0 credits):

1) (FSL220H1 and FSL222H1) / FSL221Y1 , FSL225H1

2) FRE210H1, FRE245H1, FRE246H1, FRE272H1, FRE273H1, (FSL320H1 and FSL322H1)/ FSL321Y1

3) 3.0 credits from among the following courses, including at least 0.5 credit from each group:

Group 1 – Literary History: FRE318H1/ FRE319H1/ FRE320H1/ FRE324H1/ FRE326H1

Group 2 – Genres and Gender: FRE304H1/ FRE310H1/ FRE345H1

Group 3 – Quebec and Francophone Literatures: FRE314H1/ FRE332H1/ FRE334H1/ FRE336H1/ SLA263H1

4) FSL442H1, FSL443H1

5) 1.0 credit from the following 400-level FRE literature courses: FRE410H1/ FRE438H1/ FRE441H1/ FRE443H1/ FRE446H1

N.B.

i) Students not placed in FSL220H1 or higher by the Placement test must first complete FSL122H1 before starting this program. Students exempted from FSL220H1/ FSL222H1 may replace it with any FRE 200+ or FSL 300+ level course.

ii) Students exempted from FSL320H1/ FSL322H1 may replace it with any FRE course at the 300+ level.

French Language and French Linguistics Major (Arts Program) - ASMAJ0525

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(7.0 credits)

1) (FSL220H1 and FSL222H1)/ FSL221Y1, FSL224H1.

2) FRE272H1, 1.0 credit selected from FRE210H1/FRE245H1/FRE273H1/FRE379H1/JFL388H1/JFG388H1, (FSL320H1, FSL322H1)/ FSL321Y1.

3) FRE376H1, FRE378H1, FRE383H1/CSC108H1/ENG286H1, FRE386H1.

4) 0.5 credit selected from FRE471H1/FRE483H1/JFL484H1/FRE486H1/FRE487H1/FRE488H1/FRE489H1/FRE491H1/FRE492H1.

5) 0.5 additional credit of FRE at the 200+ level or FSL at the 300+ level.

N.B.

i) Students may also satisfy requirements (4) and (5) through completion of a senior essay (FRE490Y1).

ii) Students not placed in FSL220H1 or higher by the Placement test must first complete FSL122H1 before starting this program.

iii) Students exempted from any of the required FSL courses based on placement test result or Department decision must replace these with the equivalent number of credits of additional FSL or FRE courses.

Regardless of exemptions, a maximum of 1.0 total program credits may be drawn from courses taught in English.

French Language and Literature Major (Arts Program) - ASMAJ1295

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(7.0 credits)

1) (FSL220H1, FSL222H1)/ FSL221Y1, FSL225H1

2) FRE210H1, FRE245H1, FRE246H1, FRE272H1/FRE273H1, (FSL320H1, FSL322H1)/ FSL321Y1.

3) 1.5 credits from the following three groups (students are strongly encouraged to include 0.5 credit from each group):

Group 1 – Literary History: FRE318H1/FRE319H1/FRE320H1/FRE324H1/FRE326H1

Group 2 – Genres and Gender: FRE304H1/FRE310H1/FRE345H1

Group 3 – Quebec and Francophone Literatures: FRE314H1/FRE332H1/FRE334H1/FRE336H1

4) 0.5 credit from the following 400-level FRE literature courses: FRE410H1/FRE438H1/FRE441H1/FRE443H1/FRE446H1/FRE471H1/FRE491H1/FRE492H1

5) 0.5 additional credit from the list of courses in (3) or (4).

N.B.

i) Students may also satisfy requirements (4) and (5) through completion of a senior essay (FRE490Y1).

ii) Students not placed in FSL220H1 or higher by the Placement test must first complete FSL122H1 before starting this program. Students exempted from FSL220H1/FSL222H1 may replace it with any FRE 200+ or FSL 300+ level course.

iii) Students exempted from FSL320H1/FSL322H1 may replace it with any FRE course.

French Language Learning Major (Arts Program) - ASMAJ0556

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(7.0 credits)

1) (FSL220H1 and FSL222H1)/ FSL221Y1

2) FSL226H1, FRE272H1, (FSL320H1 and FSL322H1)/ FSL321Y1

3) FRE379H1, JFG388H1/JFL388H1, FRE384H1

4) 0.5 credit selected from [FRE210H1](#)/ [FRE245H1](#)/ [FRE273H1](#)/ [FRE274H1](#)

5) ([FSL420H1](#), 0.5 additional credit of FRE at the 200+ level or FSL at the 300+ level)/ [FSL421Y1](#)

6) [FSL442H1](#), [FSL443H1](#)

N.B.

i) Students not placed in [FSL220H1](#) or higher by the Placement test must first complete [FSL122H1](#) before starting this program. Students exempted from any of the FSL program courses based on placement test result or Department decision must replace these with the equivalent number of credits of additional FSL or FRE courses.

French Studies Minor (Arts Program) - ASMIN1135

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

1) ([FSL220H1](#), [FSL222H1](#))/ [FSL221Y1](#)

2) [FSL224H1](#)/ [FSL225H1](#)

3) 1.0 credit selected from [FRE245H1](#), [FRE246H1](#), [FRE272H1](#), [FRE274H1](#)

4) 0.5 credit selected from [CDN202H1](#), [JFG388H1](#)/ [JFL388H1](#), or any FRE or FCS half-course at the 200+ level

5) 1.0 FRE credit at the 300/400-level

N.B. Students not placed in [FSL220H1](#) or higher by the Placement test must first complete [FSL122H1](#) before starting this program. Students exempted from any of [FSL220H1](#)/ [FSL222H1](#)/ [FSL224H1](#)/ [FSL225H1](#) must replace these credits with any combination of the following two options:

(a) any additional credit(s) from category (4) above, or

(b) any FSL credit(s) at the 300/400 level.

Regardless of exemptions, a maximum of 0.5 total program credits may be drawn from courses taught in English.

Minor in French Language (Arts Program) - ASMIN0120

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

1) ([FSL120H1](#), [FSL122H1](#))/ [FSL121Y1](#)

2) ([FSL220H1](#), [FSL222H1](#))/ [FSL221Y1](#)

3) ([FSL320H1](#), [FSL322H1](#))/ [FSL321Y1](#)

4) 1.0 credit of FSL or FRE courses at the 200+ level

Note: Students not placed in [FSL120H1](#) or higher by the Placement test must first complete [FSL102H1](#) before starting this program. Students exempted from any of the required courses must replace these courses with the equivalent number of credits of additional FSL courses at the 200+ level.

Faculty of Arts & Science Language Citation

The Department of French participates in the Faculty of Arts & Science's Language Citation initiative for French.

In order to receive a language citation in French Studies, students should have completed 2.0 credits of FSL courses at the 300+ level or 2.0 credits of FRE courses at the 200+ level with a minimum grade of B- in each course. Please note that a combination of both FRE and FSL courses cannot qualify for the citation.

Students should note that, as explained in the [Academic Record - Recognition of Academic Achievement](#) section of this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

French Courses

French First-Year Foundations

FCS194H1 - Urban Youth Languages of the World

Hours: 24S

Are there such phenomena as urban youth “languages”? How do they evolve and what commonalities or divergences are there? In this course, we will survey a range of urban youth languages that have emerged in African, North American and European contexts – with specific focus on their structural (linguistic) and social typicalities. Discussions and presentations will focus on the sociolinguistic concepts of language contact, bi/multilingualism, lexical innovation/renovation, language mixing, etc. in relation to youth language practices. We will be comparing major varieties of these language practices within and between the continents, and also be assessing their prospects and implications for language change. This course is taught in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

FCS196H1 - Historical, Geographic and Social Variation in French

Hours: 24S

Throughout most of its nearly 1200-year history, the language that we now call French was not a single linguistic entity, but rather a collection of related dialects. Although socio-political factors resulted in a partial unification of these dialects during the 18th and 19th centuries, the unification was, to a large extent, outweighed by French colonization of areas such as North America and Africa, which resulted in even greater linguistic diversification. The purpose of this course is to provide an overview of the extensive variation that exists throughout the French-speaking world. Topics to be covered include phonetics (pronunciation), lexicology (word selection) and morpho-syntax (grammar). This course is taught in English. No knowledge of French or linguistics is required. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

FCS197H1 - Pleasure, Pain and Nostalgia in Belle Époque

Hours: 24L

This course will explore ideas and cultural representations of 19th century France through examples from art, philosophy, and literature with an emphasis on the critical discussion of two literary narratives that challenged tradition and authority: Flaubert's “Madame Bovary” and Maupassant's “Bel-ami”. The course will be held in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

FCS198H1 - The Literacy of Images: Interactions between Text and Other Media

Hours: 24L

How do images create meaning in texts? How do words guide the interpretation of images? This course will examine relations between texts from different literary genres (the Bande Dessinée, fiction and autobiography) and other media (illustration, photography, cinema) through an interdisciplinary theoretical framework, by combining perspectives from literature, cinema, illustration, and photography. The course will be held in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

FCS199H1 - Marketing in the French Speaking World

Hours: 24S

This course investigates sociocultural and linguistic issues surrounding market expansion and marketing of products and services to French-speaking audiences in Canada and elsewhere. Students consider challenges posed by increased globalization through comparisons of English- and French-speaking communities, while exploring basic marketing theory. Through case studies of successes and failures, students examine how companies develop and adapt branding and messaging for Francophone audiences by integrating differences in humour, values, politics, and financial considerations. Students thus develop an understanding of the Francophone consumer and gain skills for advertising and branding in a

Francophone or bilingual environment. This course is taught in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

French Cultural Studies

FCS194H1 - Urban Youth Languages of the World

Hours: 24S

Are there such phenomena as urban youth “languages”? How do they evolve and what commonalities or divergences are there? In this course, we will survey a range of urban youth languages that have emerged in African, North American and European contexts – with specific focus on their structural (linguistic) and social typicalities. Discussions and presentations will focus on the sociolinguistic concepts of language contact, bi/multilingualism, lexical innovation/renovation, language mixing, etc. in relation to youth language practices. We will be comparing major varieties of these language practices within and between the continents, and also be assessing their prospects and implications for language change. This course is taught in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

FCS195H1 - French Culture from Napoleon to Asterix

Hours: 24L

A multi-media course, analyzing the contributions the French have made to world culture in such domains as architecture, art, literature, and music, as well as some of the implications of the appropriation of French cultural icons by big business and the media.

Breadth Requirements: Creative and Cultural Representations (1)

FCS196H1 - Historical, Geographic and Social Variation in French

Hours: 24S

Throughout most of its nearly 1200-year history, the language that we now call French was not a single linguistic entity, but rather a collection of related dialects.

Although socio-political factors resulted in a partial unification of these dialects during the 18th and 19th centuries, the unification was, to a large extent, outweighed by French colonization of areas such as North America and Africa, which resulted in even greater linguistic diversification. The purpose of this course is to provide an overview of the extensive variation that exists throughout the French-speaking world. Topics to be covered include phonetics (pronunciation), lexicology (word selection) and morpho-syntax (grammar). This course is taught in English. No knowledge of French or linguistics is required. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

FCS197H1 - Pleasure, Pain and Nostalgia in Belle Époque

Hours: 24L

This course will explore ideas and cultural representations of 19th century France through examples from art, philosophy, and literature with an emphasis on the critical discussion of two literary narratives that challenged tradition and authority: Flaubert’s “Madame Bovary” and Maupassant’s “Bel-ami”. The course will be held in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

FCS198H1 - The Literacy of Images: Interactions between Text and Other Media

Hours: 24L

How do images create meaning in texts? How do words guide the interpretation of images? This course will examine relations between texts from different literary genres (the Bande Dessinée, fiction and autobiography) and other media (illustration, photography, cinema) through an interdisciplinary theoretical framework, by combining perspectives from literature, cinema, illustration, and photography. The course will be held in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

FCS199H1 - Marketing in the French Speaking World

Hours: 24S

This course investigates sociocultural and linguistic issues surrounding market expansion and marketing of products and services to French-speaking audiences in Canada and elsewhere. Students consider challenges posed by increased globalization through comparisons of English- and French-speaking communities, while exploring basic marketing theory. Through case studies of successes and failures, students examine how companies develop and adapt branding and messaging for Francophone audiences by integrating differences in humour, values, politics, and financial considerations. Students thus develop an understanding of the Francophone consumer and gain skills for advertising and branding in a Francophone or bilingual environment. This course is taught in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

FCS290H1 - Special Topics in French Cultural Studies I

Hours: 24L

The relation of French popular culture to society. For more information, see <https://www.french.utoronto.ca/course-offerings-2020-2021/french-cultural-studies-courses-fcs>.

Breadth Requirements: Creative and Cultural Representations (1)

FCS291H1 - Special Topics in French Cultural Studies I

Hours: 24L

The relation of French popular culture to society. For more information, see <https://www.french.utoronto.ca/course-offerings-2020-2021/french-cultural-studies-courses-fcs>.

Breadth Requirements: Society and its Institutions (3)

FCS292H1 - Love, Sex and Desire in French Literature and Cinema

Hours: 24L

This online, asynchronous course will explore the themes of love, sex and desire in French literature and cinema through close reading, analysis, and interpretation of three major novels from the eighteenth to the twentieth literature. A comparative approach based on various examples taken from literary, philosophical texts and from film adaptations will examine the concept of love and its many definitions. Selections from ancient and modern philosophical texts on love, sex, and desire will be the starting point of our discussions: Ovid, "The Art of Love", Plato, "The Symposium", Bataille, "Eroticism", Beauvoir, "The Woman in Love", and Foucault, "The History of Sexuality".

The course will be taught in English.

Students who are proficient in French and intend to complete their readings and major tests in French (Online Essay and Online Film Analysis) in order to count this course towards a program in French (Major or Specialist only), should inform the Course Instructor of their decision by the end of the first week of classes.

N.B. Discussion Forum contributions will be submitted in English only.

Breadth Requirements: Creative and Cultural Representations (1)

FCS310H1 - French Cinema

Previous Course Number: FCS310Y1

Hours: 24L/24P

Cinema in France with emphasis on theory and practical criticism, on auteurs and movements such as the avant-garde of the twenties and the New Wave of the late fifties. Films shown are subtitled.

Prerequisite: Completion of 4.0 credits

Exclusion: FCS310Y1

Recommended Preparation: CIN105Y1

Breadth Requirements: Creative and Cultural Representations (1)

FCS369Y0 - The Culture of Touraine

Hours: 48L

This course will offer a unique opportunity to study the culture of the Touraine region while living an experience of complete immersion in Tours, a city located in the Loire Valley, a UNESCO World Heritage Site and the seat of power of the French monarchy until the 17th Century. Not eligible for CR/NCR option.

Prerequisite: Completion of 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

FCS390H1 - Special Topics in French Cultural Studies II

Hours: 24L

Studies on an individual writer or specific area of literature. For more information, see <https://www.french.utoronto.ca/course-offerings-2020-2021/french-cultural-studies-courses-fcs>.

Prerequisite: Completion of 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

FCS391H1 - Special Topics in French Cultural Studies II

Hours: 24L

Studies on an individual writer or a specific area of literature. For more information, see <https://www.french.utoronto.ca/course-offerings-2020-2021/french-cultural-studies-courses-fcs>.

Prerequisite: Completion of 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

FCS392H1 - Special Topics in French Cultural Studies II

Hours: 24L

Studies on an individual writer or specific area of literature. The relation of French popular culture to society. For more information, see <https://www.french.utoronto.ca/course-offerings-2020-2021/french-cultural-studies-courses-fcs>.

Prerequisite: Completion of 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

French Linguistics

FRE272H1 - The French Language: A Linguistic Introduction

Hours: 24L/12T

A general introduction to the structure of French language, from a linguistic perspective. Students will become acquainted with the various components of the language (sound, meaning, word formation, sentence structure) through detailed description and basic analysis of Canadian and European varieties of French. Students will also be introduced to the study of French in the context of bilingualism (second language acquisition, sociolinguistics). **This course is mandatory in all specialist and major programs.**

Prerequisite: [FSL221Y1](#)/ [FSL222H1](#). Students may also fulfill this prerequisite requirement based on the results of their French Placement Test.

Recommended Preparation: [FSL224H1](#)/ [FSL225H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

FRE273H1 - Introduction to the History of the French Language

Hours: 24L/12T

A discovery of a long and fascinating history, stretching from the spoken Latin of the Gauls to the many varieties of French found today all over the world via the investigation of the social, political, and cultural causes of language change. Our focus includes topics such as medieval bilingualism, the regulation of language through the Académie française, the political use of the French language, the emergence of the Francophonie and modern Canadian French.

Prerequisite: [FSL221Y1](#)/ [FSL222H1](#). Students may also fulfill this prerequisite requirement based on the results of their French Placement Test.

Recommended Preparation: [FRE272H1](#) and [FSL224H1](#)/ [FSL225H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

FRE274H1 - Introduction to the Linguistic Analysis of French

Hours: 24L/12T

An analytical study of contemporary French phonetics and phonology, morphology, syntax and semantics. This

course is designed to prepare students for more advanced study of French linguistics at the 300 and 400 levels.

Prerequisite: [FRE272H1](#), [FSL224H1](#)/ [FSL225H1](#)/ [FSL320H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

FRE376H1 - French Phonology and Phonetics

Hours: 36L

Why does French sound the way it does? What does it mean to have a (regional or foreign) accent? How can linguistic and socio-historical factors explain pronunciation differences in the French-speaking world? Which differences are perceptible and/or carry social meaning, and why? This course provides an introduction to the formal study of sound, as applied to French data. Through transcription and acoustic analysis, students enhance their ability to distinguish sound contrasts used in French and other languages and work collectively to formulate and evaluate hypotheses about sound systems.

Prerequisite: [FRE272H1](#)

Recommended Preparation: [FRE274H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

FRE378H1 - French Syntax

Hours: 36L

A study of the distribution and relationships of the syntagmatic components of contemporary French; of sentential structure, including the principles of coordination, subordination and expansion; and of major theoretical approaches.

Prerequisite: [FRE272H1](#)

Recommended Preparation: [FRE274H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

FRE379H1 - Sociolinguistics of Quebec and Canadian French

Hours: 36L

The relationship between language use and social factors such as socio-economic status, social context and gender identity. Theoretical notions are derived through exploration of quantitative analyses, focusing on variation

and change in French in Quebec and elsewhere in Canada.

Prerequisite: [FRE272H1](#)

Recommended Preparation: Any course in quantitative or experimental analysis of data.

Breadth Requirements: Society and its Institutions (3)

FRE383H1 - Quantitative Methods for the Study of French

Hours: 24L/12T

An introduction to the foundations of quantitative research on French. Topics include differences between quantitative and qualitative analyses; hypothesis formulation; experimental design; and data collection and analysis including basic statistical methods. Phenomena investigated come from Canadian and European varieties as well as studies of second language learners.

Prerequisite: [FRE272H1](#)

Breadth Requirements: Society and its Institutions (3)

FRE384H1 - Teaching French as a Second Language

Hours: 36L

This course is designed for students who aim for a career in teaching French as a second language or who wish to apply academic learning in a professional context, build their network, and explore potential career paths. It introduces recent methods and approaches and includes a significant experiential learning component in partnership with local school boards and private schools. This course welcomes the participation of students who are fluent French speakers or whose command of the French language is equivalent to near-native proficiency.

Prerequisite: [FRE272H1](#), [FSL322H1](#)/ [FSL321Y1](#)/

Placement in [FSL420H1](#) or higher through the French Placement Test or by Department permission based on demonstration of native-like French proficiency.

Corequisite: [FSL226H1](#)/ [JFG388H1](#)/ [JFL388H1](#)

Recommended Preparation: [JFG388H1](#), [FSL375H1](#)/ [FSL420H1](#)/ [FSL421Y1](#)/ [FSL442H1](#)/ [FSL443H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FRE386H1 - French Semantics and Pragmatics

Hours: 36L

What do words and sentences mean? How do language users access meaning? How do child and adult learners of French determine the meanings of words and complex sentences in context? What kinds of inferences do people make during conversation? This course provides an introduction to the formal study of linguistic meaning, as applied to French data. Students are introduced to analytical and experimental approaches to semantics and pragmatics.

Prerequisite: [FRE272H1](#)

Recommended Preparation: [FRE274H1](#), [FRE378H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

FRE387H1 - French Morphology

Hours: 36L

A study of the morphological system of modern French, its relationship to syntax and phonology; theoretical notions derived from the analysis of specific data.

Prerequisite: [FRE272H1](#)

Recommended Preparation: [FRE274H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

JFL388H1 - Bilingualism, Multilingualism, and Second Language Acquisition

Previous Course Number: JFG388H1

Hours: 24L/12T

Using and encountering multiple languages is the everyday norm of people living in much of the world, including in multicultural cities like Toronto. This course offers a broad exploration of the cognitive and social underpinnings of the dynamic field of bilingualism, multilingualism, and second language acquisition. We will (i) explore the differences between bilinguals/multilinguals and monolinguals in the ways they process and use language; (ii) examine the language acquisition patterns of children and adults; (iii) investigate the interactions between an individual's language repertoires and those of their peers and local community.

Prerequisite: 4.0 credits, and any 100-level or higher language course OR introductory linguistics course (e.g., [LIN200H1](#), [FRE272H1](#), [ITA360H1](#), [SLA323H1](#)/[SLA380H1](#), [SPA322H1](#))

Exclusion: [FRE388H1](#), [JFG388H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

FRE471H1 - Medieval French Language

Hours: 12T/24S

This course aims to ensure an understanding of Old French, to read most of the medieval texts. From a selection of texts, it explores the form of the language in various centuries and regions and provide a basis for understanding the history of the French language. This course is also listed in the offerings of the Graduate department of French.

Prerequisite: [FRE272H1](#)/ [FRE273H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FRE483H1 - Experimental Methods in French Linguistics

Hours: 36L

This course is designed to provide students with the skills and knowledge required to carry out language-related research with human subjects. The course introduces students to research design and ethics, common experimental methodologies in linguistics research, and data analysis. The course includes a practical component that will provide students with the opportunity to design and carry out a corpus study or web-based linguistics experiment. Throughout the course, students will also be encouraged to reflect on how language research can contribute to broader domains in society, including education and health.

Prerequisite: [FRE383H1](#) or with permission of instructor

Breadth Requirements: Thought, Belief and Behaviour (2)

JFL484H1 - Computational Tools for Language Corpora

Hours: 24L/12T

This is a practical course dealing with digital collections of written language or transcribed oral language (corpora). It will introduce both the practical steps involved in building digital text corpora (text normalization, digitizing, tag set construction, and so on), as well as provide an understanding of, and hands-on experience with, fundamental techniques from computational linguistics and natural language processing, including techniques using machine learning, such as part-of-speech tagging, language models, and vector semantics. By working with real corpora, students will use these techniques to construct and defend hypotheses about texts, about languages, and about human language in general. An

emphasis will be placed on using French language corpora from several periods (including medieval and modern) to situate French historically and in the Canadian context. Students will be given opportunities to work with other languages. Lectures will be in English, and students will take tutorials either in English or in French.

Priority enrolment for students in major or specialist programs in Linguistics, French, or the Applied Data Science minor

Prerequisite: FRE272H1/ SPA322H1/ (LIN101H1, LIN102H1)/ LIN200H1, ENG286H1/ CSC108H1/ LIN240H5/ LINB30H3.

Exclusion: LIN340H5.

Recommended Preparation: CSC108H1.

Breadth Requirements: The Physical and Mathematical Universes (5)

FRE486H1 - Special Topics in French Linguistics

Previous Course Number: JFL477H1, JFL478H1
Hours: 12T/24S

An advanced course on a particular topic in the use, acquisition, history or synchronic analysis of French. Please see the French Department website <https://www.french.utoronto.ca/undergraduate> for the description of the particular course in a given year

Prerequisite: Will vary depending upon year. Consult department website.

Exclusion: JFL478H1

Breadth Requirements: Thought, Belief and Behaviour (2)

FRE487H1 - Advanced Topics in Bilingualism and L2 acquisition

Hours: 12T/24S

This course examines how adult learners acquire various aspects of French language (vocabulary, syntax and/or phonology). It also provides in-depth, practical training in methodological design and quantitative analysis culminating in students' undertaking of individual experimental studies.

Prerequisite: FRE376H1 + FRE378H1 + FRE383H1 + FRE388H1/ JFG388H1

Breadth Requirements: Thought, Belief and Behaviour (2)

FRE488H1 - Special Topics in Advanced Linguistics I

Hours: 12T/24S

An advanced seminar on a specific aspect of French linguistics. For more information, see <https://www.french.utoronto.ca/undergraduate>.

Prerequisite: Varies according to particular course offering; consult the French Studies Undergraduate brochure (www.french.utoronto.ca/undergraduate) for exact prerequisites.

Breadth Requirements: Thought, Belief and Behaviour (2)

FRE489H1 - Special Topics in Advanced Linguistics II

Hours: 12T/24S

An advanced seminar on a specific aspect of French linguistics. For more information, see <https://www.french.utoronto.ca/undergraduate>.

Prerequisite: Varies according to particular course offering; consult the French Studies Undergraduate brochure (www.french.utoronto.ca/undergraduate) for exact prerequisites

Breadth Requirements: Thought, Belief and Behaviour (2)

French Literature

FRE210H1 - Introduction to Québec Literature and Culture

Hours: 24L/12T

An introduction to various aspects of Québec literature and culture through the study of literary texts, cinema, and artistic productions, and their role in the evolution of a distinct Québec society. The course also familiarizes students with important socio-cultural and political events, which participated in the evolution of Québec society and provide a better understanding of Québec literature.

Prerequisite: FSL221Y1/ FSL222H1. Students may also fulfill this prerequisite requirement based on the results of their French Placement Test.

Recommended Preparation: FSL224H1/ FSL225H1

Breadth Requirements: Creative and Cultural Representations (1)

FRE245H1 - Introduction to French Cultural and Literary Studies

Previous Course Number: FRE240H1

Hours: 24L/12T

This course is a practical introduction to concepts, methods and problems of literary analysis as well as an overview of French artistic culture. Using elements of comparison from fine arts, contemporary and popular culture (including novels and movies) and a variety of emblematic works of French and Francophone literatures (among others: essays by Voltaire, Montesquieu and Simone de Beauvoir; poems by Ronsard, Hugo, Baudelaire and Césaire; excerpts from novels by George Sand, Albert Camus and Patrick Chamoiseau), its objective is to provide students with a practical introduction to the tools of literary analysis, but also to help them better read, understand and appreciate literary texts.

Prerequisite: FSL221Y1/ FSL222H1. Students may also fulfill this prerequisite requirement based on the results of their French Placement Test.

Exclusion: FRE240H1

Recommended Preparation: FSL224H1/ FSL225H1

Breadth Requirements: Creative and Cultural Representations (1)

FRE246H1 - Introduction to French Literary Analysis

Previous Course Number: FRE241H1

Hours: 36L

This course provides a general introduction to French and francophone literature of different genres and periods. Special emphasis will be placed on concepts, methods, and problems of literary analysis with the goal of helping students to improve their ability to write literary essays. Among the questions to be explored are: *What are the rules and conventions of scholarly writing? How does one develop and structure arguments to ensure that a paper is well organized? How are rhetorical devices analyzed? When and how should bibliographical references be inserted?*

Prerequisite: FRE245H1, FSL224H1/ FSL225H1/ FSL320H1

Exclusion: FRE241H1

Breadth Requirements: Creative and Cultural Representations (1)

FRE304H1 - Contemporary French Women's Prose Fiction

Hours: 24L

An analysis of selected prose texts of the last hundred years written by major French women authors, emphasizing themes and textual strategies used to represent the female subject, her relationship to language, and the role of ethnicity, class, and gender in the construction of identity.

Prerequisite: FRE240H1/ FRE245H1, FRE241H1/ FRE246H1

Breadth Requirements: Creative and Cultural Representations (1)

FRE310H1 - Relations between Text and Other Media

Hours: 24L

Literary texts and other forms of media (photographs, cinematographic images, paintings) have been associated in a fascinating relation in hundreds of works of French literature. An exploration of this inextricable weaving together of verbal and visual experiences as it pertains to literature through the study of interdisciplinary theoretical texts focused on photography, painting, and cinema.

Prerequisite: FRE240H1/ FRE245H1, FRE241H1/ FRE246H1

Breadth Requirements: Creative and Cultural Representations (1)

FRE314H1 - Quebec and French-Canadian Literature

Hours: 24L

This course aims to explore the literature from Quebec and other French-speaking parts of Canada. Literary texts by French Canadian authors will be analyzed, and various themes such as identity (self, others, multiculturalism, nationalism), heritage (family, tradition, culture), and representations of place and linguistic values will be studied.

Prerequisite: FRE240H1/ FRE245H1, FRE241H1/ FRE246H1

Breadth Requirements: Thought, Belief and Behaviour (2)

FRE318H1 - Medieval French Literature

Hours: 24L

Religious fervour, chivalry, romance and ribald humour, heroic deeds, marvellous adventures, and exotic travels as found in selected texts from the French Middle Ages. Readings in modern French translations with appropriate reference to the original language.

Prerequisite: [FRE240H1](#)/ [FRE245H1](#), [FRE241H1](#)/
[FRE246H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FRE319H1 - Laughter and Thought in French Renaissance Literature

Hours: 24L

An overview of the fascinating literary diversity, prose, theatre and poetry essential to the changing humanistic discourse of the French Renaissance and Baroque periods. The underscoring of important historical events - Reformation, Great Discoveries, Printing - to explain the philosophical and literary values produced by such violent times.

Prerequisite: [FRE240H1](#)/ [FRE245H1](#), [FRE241H1](#)/
[FRE246H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FRE320H1 - French Literature of Classicism and Enlightenment

Hours: 24L

An introduction to French literature between Classicism and the French Revolution with particular emphasis on its relationship to philosophical, cultural, and political movements of the Enlightenment, providing historical depth to philosophical and socio-political foundations of today's life. A privileged access to, and critique of, modernity in the postmodern age.

Prerequisite: [FRE240H1](#)/ [FRE245H1](#), [FRE241H1](#)/
[FRE246H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FRE324H1 - French Literature in the Time of Revolutions and Industrialization

Hours: 24L

The long 19th century (1789-1914) is characterized by change: from political upheavals to literary, scientific, and media revolutions, the spread of literacy, and the rapid development of industrialization and colonization. A study of the evolution of literature (genres, forms, movements), as influenced by these changing socio-political and economic contexts.

Prerequisite: [FRE240H1](#)/ [FRE245H1](#), [FRE241H1](#)/
[FRE246H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FRE326H1 - Contemporary French Literature

Hours: 24L

Characterized by experimentation and the crisis of representation, French literature of the 20th and 21st centuries has undergone numerous transformations in form, content, and generic boundaries. A study of these literary movements, trends, and transgressions in poetry, prose, and theatre.

Prerequisite: [FRE240H1](#)/ [FRE245H1](#), [FRE241H1](#)/
[FRE246H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FRE332H1 - Francophone Literatures

Hours: 24L

A comprehensive introduction to Francophone literatures and cultures, examining the linguistic, aesthetic, and discursive specificities as represented by authors of the Francophone world. Focus on the concepts of colonialism, representation, alienation, emigration, and nationalism.

Prerequisite: [FRE240H1](#)/ [FRE245H1](#), [FRE241H1](#)/
[FRE246H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FRE334H1 - Francophone Cinema

Hours: 24L

Through films from across the spectrum of the Francophone world, a study of the diversity of the French colonial empire as well as the different aesthetic, historical, and cultural effects of colonialism and post-independence experience on various cinematic representations.

Prerequisite: [FRE240H1](#)/ [FRE245H1](#), [FRE241H1](#)/
[FRE246H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FRE336H1 - Postcolonialism: Francophone Literatures

Hours: 24L

The fundamentals of postcolonial theories, with emphasis on how they relate to the Francophone world. The dialogue between fiction and theory, as well as the modalities of a coherent Francophone postcolonial identity in a global world.

Prerequisite: [FRE240H1](#)/ [FRE245H1](#), [FRE241H1](#)/
[FRE246H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

FRE345H1 - Literary Genres

Hours: 24L

Survey of the main literary genres and analysis of their features, with in-depth study of two of the genres: narrative (epic poem, novel, short narrative), lyric poetry, drama (tragedy, comedy, farce, mystery play), essay. Readings of selected texts, chosen for their representative potential and their historical relevance.

Prerequisite: [FRE240H1](#)/ [FRE245H1](#), [FRE241H1](#)/
[FRE246H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FRE410H1 - Advanced Topics in Quebec Literature

Hours: 24S

An advanced interdisciplinary research seminar devoted to specific issues of Québécois literature and culture. Focus on a literary genre, a particular subject matter, a literary movement, or based on a multidisciplinary approach to cinema, arts, and music. For more

information, see

<https://www.french.utoronto.ca/undergraduate>

Prerequisite: [FRE246H1](#), 1.0 credit from 300-level French literature courses: [FRE310H1](#), [FRE314H1](#), [FRE318H1](#), [FRE319H1](#), [FRE320H1](#), [FRE324H1](#), [FRE326H1](#), [FRE332H1](#), [FRE334H1](#), [FRE336H1](#), [FRE345H1](#).

Breadth Requirements: Creative and Cultural Representations (1)

FRE438H1 - Advanced Topics in Francophone Literatures

Hours: 24S

An advanced seminar dedicated to specific issues of the Francophone literature and culture. Focusing on an author, a literary genre, or based on a multidisciplinary approach involving cinema, arts and music, each seminar reflects the professor's current research. For more information, see

<https://www.french.utoronto.ca/undergraduate>

Prerequisite: [FRE246H1](#), 1.0 credit from 300-level French literature courses: [FRE310H1](#), [FRE314H1](#), [FRE318H1](#), [FRE319H1](#), [FRE320H1](#), [FRE324H1](#), [FRE326H1](#), [FRE332H1](#), [FRE334H1](#), [FRE336H1](#), [FRE345H1](#).

Breadth Requirements: Creative and Cultural Representations (1)

FRE441H1 - Advanced Topics in French Literature

Hours: 24S

An advanced, research-oriented seminar devoted to specific issues of French literature and culture. Focus on a literary genre, a particular subject or literary movement, or based on a multidisciplinary approach involving cinema, arts, and music. For more information, see <https://www.french.utoronto.ca/undergraduate>

Prerequisite: [FRE246H1](#), 1.0 credit from 300-level French literature courses: [FRE310H1](#), [FRE314H1](#), [FRE318H1](#), [FRE319H1](#), [FRE320H1](#), [FRE324H1](#), [FRE326H1](#), [FRE332H1](#), [FRE334H1](#), [FRE336H1](#), [FRE345H1](#).

Breadth Requirements: Creative and Cultural Representations (1)

FRE443H1 - Advanced Topics: Authors

Hours: 24S

An advanced, research-oriented seminar devoted to questions concerning the authors practice, originality, and oeuvre. Production, performance and prominence, characteristic genres, religious and philosophical thought, theoretical reflection on literature, language, and belonging as aspects of the analysis of one single authors body of writing. For more information, see <https://www.french.utoronto.ca/undergraduate>

Prerequisite: FRE246H1, 1.0 credit from 300-level French literature courses: FRE310H1, FRE314H1, FRE318H1, FRE319H1, FRE320H1, FRE324H1, FRE326H1, FRE332H1, FRE334H1, FRE336H1, FRE345H1.

Breadth Requirements: Creative and Cultural Representations (1)

FRE446H1 - Advanced Studies in Literary Theory

Hours: 24S

An advanced, research-oriented course devoted to specific issues in French literary theory. Focus on particular theoretical concepts, paradigms, schools, trends, movements or major thinkers. For more information, see <https://www.french.utoronto.ca/undergraduate>

Prerequisite: FRE246H1, 1.0 credit from 300-level French literature courses: FRE310H1, FRE314H1, FRE318H1, FRE319H1, FRE320H1, FRE324H1, FRE326H1, FRE332H1, FRE334H1, FRE336H1, FRE345H1.

Breadth Requirements: Creative and Cultural Representations (1)

French as a Second Language

FSL100H1 - Elementary French I

Hours: 36L

An intensive basic course in spoken and written French for students who have absolutely no prior knowledge of French: comprehension, speaking, reading, and writing.

Prerequisite: No previous knowledge of French.

Exclusion: FSL102H1, FSL120H1, FSL121Y1, FSL122H1, FSL 200+ level courses

Breadth Requirements: Creative and Cultural Representations (1)

FSL102H1 - Elementary French II

Hours: 36L

An intensive basic course in spoken and written French for students who have minimal French experience.

Prerequisite: FSL100H1 or placement in FSL102H1 based on the results of the French Placement Test.

Exclusion: FSL120H1, FSL121Y1, FSL122H1, FSL 200+ level courses, placement in FSL120H1, FSL122H1, FSL200+ level courses based on the results of the French Placement Test

Breadth Requirements: Creative and Cultural Representations (1)

FSL120H1 - Elementary French III

Previous Course Number: FSL121Y1

Hours: 36L/12T

This course is intended for students having some knowledge of French but wishing to increase their proficiency in written and spoken French comprehension and production. Students also gain an introduction to a variety of French-speaking cultures.

Prerequisite: FSL102H1 or placement in FSL120H1 based on the results of the French Placement Test.

Exclusion: FSL121Y1, FSL122H1, FSL 200+ level courses, placement in FSL122H1 or FSL200+ level courses based on the results of the French Placement Test.

Breadth Requirements: Creative and Cultural Representations (1)

FSL122H1 - Elementary French IV

Previous Course Number: FSL121Y1

Hours: 36L/12T

This course is intended for students having some knowledge of French but wishing to further increase their proficiency in written and spoken French comprehension and production. The focus will be on developing greater autonomy and exploring a variety of French-speaking cultures.

Prerequisite: FSL120H1 or placement in FSL122H1 based on the results of the French Placement Test.

Exclusion: FSL121Y1, FSL 200+ level courses, placement in FSL200+ level courses based on the results of the French Placement Test.

Breadth Requirements: Creative and Cultural Representations (1)

FSL195Y0 - French Language in Tours I

Hours: 48L/48T

Intended for students having some knowledge of French but wishing to increase their proficiency to that of normal University entrance through complete immersion in French language and culture in Tours, France. Offers training in written and spoken French; reinforcement of reading comprehension and aural abilities; and an introduction to French culture of the Touraine region. Specific course content will depend on language placement according to the Institut de Touraine. Students must write the in-person Faculty of Arts & Science (St. George) Department of French placement test upon their return to Toronto to determine their appropriate next level.

(This course is offered only during the Summer Session through the Summer Abroad Program. Details related to the timetable and deadlines are posted on the Summer Abroad website at <https://summerabroad.utoronto.ca/>.)

Prerequisite: Placement as determined by the Institut de Touraine Placement Test. Details related to the timetable and deadlines are posted on the Summer Abroad website at <https://summerabroad.utoronto.ca/>.

Exclusion: FSL121Y1, FSL121Y0, FSL122H1, FSL220H1, FSL221Y1, FSL221Y0, FSL222H1, FSL224H1, FSL225H1, FSL226H1, FSL271H1, FSL295Y0, FSL312H1, FSL313H1, FSL314H1, FSL315H1, FSL320H1, FSL321Y1, FSL321Y0, FSL322H1, FSL375H1, FSL375Y1, FSL415H1, FSL420H1, FSL421Y1, FSL421Y0, FSL442H1, FSL443H1, FSL442H0, FSL443H0, FSL472H1, FSL473H1, FSL475H1, FRE210H1, FRE245H1, FRE272H1, FRE273H1

Breadth Requirements: Creative and Cultural Representations (1)

FSL220H1 - Intermediate French I

Previous Course Number: FSL221Y1

Hours: 36L/12T

This course provides students with the opportunity to become proficient, focused, autonomous French language learners. The course's main objective is to provide a communicative learning environment through activities structured around real-world, everyday contexts.

Prerequisite: FSL121Y1/ FSL122H1 or placement in FSL220H1 based on the results of the French Placement Test. Students who are fluent French speakers, whose command of the French language is equivalent to near-native proficiency are not permitted to take this course.

Exclusion: FSL221Y1, FSL222H1, FSL224H1, FSL225H1, FSL226H1, FSL271H1, FSL300+ level courses, placement in FSL222H1 or higher based on the

results of the French Placement Test.

Breadth Requirements: Creative and Cultural Representations (1)

FSL222H1 - Intermediate French II

Previous Course Number: FSL221Y1

Hours: 36L/12T

This course provides students with the opportunity to become proficient, focused, autonomous French language learners. The course provides a communicative learning environment that develops cultural competence and linguistic awareness through activities in structured around real-world, everyday contexts. Students who are fluent French speakers, whose command of the French language is equivalent to near-native proficiency are not permitted to take this course.

Prerequisite: FSL220H1 or placement in FSL222H1 based on the results of the French Placement Test.

Exclusion: FSL221Y1, FSL271H1, FSL 300+ level courses, any FRE course, placement in FSL300+ level courses based on the results of the French Placement Test.

Breadth Requirements: Creative and Cultural Representations (1)

FSL224H1 - Practical French for Exploring Linguistics

Hours: 24L/12T

This course is designed to present students with the practical skills, grammatical knowledge and metalinguistic awareness needed to engage with introductory French linguistics courses. Students will hone higher-order analytical skills related to French language and linguistics through comprehension and production exercises and activities. A variety of textual excerpts selected from several subfields of linguistics will allow exposure to the basic elements of French linguistics through which students will develop awareness and comfort with academic writing and academic discourse in French. Emphasis is on the appropriate use of formal registers, terminology, incorporation of logical connectors and analytical thinking in written and spoken French.

Prerequisite: FSL220H1. Students may also fulfill this prerequisite requirement based on the results of their French Placement Test.

Corequisite: FSL222H1

Exclusion: FSL225H1, FSL312H1, FSL313H1, FSL314H1, FSL315H1, FSL322H1, FSL375Y1, FSL375H1, FSL 400-level courses.

Breadth Requirements: Creative and Cultural Representations (1)

FSL225H1 - Practical French for Exploring Literature

Hours: 24L/12T

This course is designed to present students with the practical skills, grammatical knowledge and metalinguistic awareness needed to engage with introductory French literature courses. Students will hone higher-order analytical skills related to French language and literature through comprehension and production exercises and activities. A variety of textual excerpts selected from geographically diverse essays, poetry and novels will allow exposure to the basic elements of French literary analysis through which students will develop awareness and comfort with academic writing and academic discourse in French. Emphasis is on the appropriate use of formal registers, terminology, incorporation of logical connectors and analytical thinking in written and spoken French.

Prerequisite: FSL220H1. Students may also fulfill this prerequisite requirement based on the results of their French Placement Test.

Corequisite: FSL222H1

Exclusion: FSL224H1, FSL312H1, FSL313H1, FSL314H1, FSL315H1, FSL322H1, FSL375Y1, FSL375H1, FSL 400-level courses.

Breadth Requirements: Creative and Cultural Representations (1)

FSL226H1 - Strategies for Autonomous Learning in French as a Second Language

Previous Course Number: FRE226H1

Hours: 24L/12T

This course provides French language learners with an understanding of how one best acquires French as a second or third language including various FSL strategies that allow for effective, autonomous learning. It further implements a structure to encourage continuous active reflection and self-assessment. Students will first learn about the types of knowledge and sub-skills that must be acquired to master French including vocabulary and grammar. Language benchmarks and self-evaluation tools are then introduced to help learners to profile their four main competences (reading, writing, listening, and speaking). Subsequently, they will receive practical training in the use of specific online resources (e.g., *Bon Patron*) geared towards improving French writing.

Prerequisite: FSL221Y1/ FSL222H1

Corequisite: FSL321Y1/ FSL320H1/ FSL322H1, as determined by the French Placement Test

Exclusion: FRE226H1, FRE225Y1/ JFI225Y1, FSL375H1, FSL375Y1, FSL 400-level courses

Breadth Requirements: Thought, Belief and Behaviour (2)

FSL295Y0 - French Language in Tours II

Hours: 48L/48T

Intended for those who have some knowledge of French, this course provides students with the opportunity to become proficient, focused, autonomous French language learners through complete immersion in French language and culture in Tours, France. The course's main objective is to provide a communicative learning environment through activities based in real-world, everyday contexts, as well as an introduction to French culture of the Touraine region. Specific course content will depend on language placement according to the Institut de Touraine. Students must write the in-person Faculty of Arts & Science (St. George) Department of French placement test upon their return to Toronto to determine their appropriate next level.

(This course is offered only during the Summer Session through the Summer Abroad Program. Details related to the timetable and deadlines are posted on the Summer Abroad website at <https://summerabroad.utoronto.ca/>.)

Prerequisite: Placement as determined by the Institut de Touraine Placement Test. Details related to the timetable and deadlines are posted on the Summer Abroad website at <https://summerabroad.utoronto.ca/>.

Exclusion: FSL312H1, FSL313H1, FSL314H1, FSL315H1, FSL320H1, FSL321Y1, FSL321Y0, FSL322H1, FSL375H1, FSL375Y1, FSL415H1, FSL420H1, FSL421Y1, FSL421Y0, FSL442H1, FSL443H1, FSL442H0, FSL443H0, FSL472H1, FSL473H1, FSL475H1

Breadth Requirements: Creative and Cultural Representations (1)

FSL312H1 - Writing French: the Language of the Media

Previous Course Number: FSL362H1

Hours: 36L

Using current online French media, broaden your understanding of the French language; deepen your grammatical knowledge; expand your vocabulary (including idioms); review key aspects of French syntax; and fine-tune your reading skills in French. Weekly reading and writing workshops are an integral part of this course.

Prerequisite: FSL221Y1 (63%)/ FSL222H1 (63%).

Students may also fulfill this prerequisite requirement based on the results of their French Placement Test.

Exclusion: FSL320H1, FSL321Y1, FSL322H1, FSL375H1, FSL375Y1, FSL 400-level courses. Students who are fluent French speakers or whose command of the French language is equivalent to near-native proficiency must contact the Department of French before enrolling in this course.

Breadth Requirements: Creative and Cultural Representations (1)

FSL314H1 - French for the Arts

Previous Course Number: FSL364H1

Hours: 36L

Introduction to the study of central themes in French artistic expression, designed to familiarize students with key concepts and vocabularies relevant to the subject. Study of modes of artistic representation, (visual, performing arts) and their contribution to the rich heritage and identity of French culture. Observation, description and analysis of various artistic mediums.

Prerequisite: FSL221Y1 (63%)/ FSL222H1 (63%).

Students may also fulfill this prerequisite requirement based on the results of their French Placement Test.

Exclusion: FSL320H1, FSL321Y1, FSL322H1, FSL375H1, FSL375Y1, FSL 400-level courses. Students who are fluent French speakers or whose command of the French language is equivalent to near-native proficiency must contact the Department of French before enrolling in this course.

Breadth Requirements: Creative and Cultural Representations (1)

FSL315H1 - French Oral Communication for Professional and Academic Contexts

Hours: 36L

This course is designed for students who wish to develop their oral communication skills in French in preparation for bilingual employment, community service, and academic activities in Canada and abroad. Emphasis is placed on the development of skills for accurate oral language use in professional and academic contexts: researched oral presentations, debates, interviews, and student-led discussions. Students will learn how to adapt their speaking style and register to different audiences and situations, use appropriate vocabulary, and self-correct.

Prerequisite: FSL221Y1 (63%)/ FSL222H1 (63%). Students may also fulfill this prerequisite requirement based on the results of their French Placement Test.

Exclusion: FSL320H1, FSL321Y1, FSL322H1, FSL375H1, FSL375Y1, FSL 400-level courses. Students who are fluent French speakers or whose command of the French language is equivalent to near-native proficiency must contact the Department of French before enrolling in this course.

Breadth Requirements: Creative and Cultural Representations (1)

FSL320H1 - Intermediate French III

Previous Course Number: FSL321Y1

Hours: 36L

This course is intended for students who have already mastered the basic competences in French language proficiency. The materials used in this course adopt an active approach which puts emphasis on the student being at the centre of the learning process. Students will solidify writing, and speaking skills as well as understanding of written and spoken French through exploration of a variety of cultures and viewpoints.

Prerequisite: FSL221Y1/ FSL222H1 or placement in FSL320H1 based on the results of the French Placement Test.

Exclusion: FSL321Y1, FSL322H1, FSL375Y1, FSL375H1, FSL 400-level courses. Placement in FSL322H1 or higher based on the results of the French Placement Test.

Breadth Requirements: Creative and Cultural Representations (1)

FSL322H1 - Intermediate French IV

Previous Course Number: FSL321Y1

Hours: 36L

This course is intended as a transition from intermediate- to advanced-level French language proficiency. The materials used in this course adopt an active approach which puts emphasis on the student being at the centre of the learning process. Students will solidify writing, and speaking skills as well as understanding of written and spoken French of various registers through exploration of a variety of cultures and viewpoints.

Prerequisite: FSL320H1 or placement in FSL322H1 based on the results of the French Placement Test.

Exclusion: FSL321Y1, FSL375Y1, FSL375H1, any FSL 400-level course, placement at the FSL400+ level based on the results of the French Placement Test. May not be taken concurrently with FSL312H1, FSL313H1, FSL314H1, FSL315H1.

Breadth Requirements: Creative and Cultural Representations (1)

FSL375H1 - Practical Translation: French - English

Previous Course Number: FSL375Y1

Hours: 36L

This introduction to translation, is designed to improve students' mastery of French stylistics through English to French and French to English translations. Emphasis is on the practice of translation of a variety of texts and documents with an introduction to the practice of oral interpretation from one language to the other.

Prerequisite: 1.0 credit in FSL at the 300-level or placement in FSL420H1 based on the results of the French Placement Test

Exclusion: FSL375Y1, FSL415H1, FSL442H1, FSL443H1, FSL472H1, FSL473H1, FSL475H1. Students who are fluent French speakers or whose command of the French language is equivalent to near-native proficiency must contact the Department of French before enrolling in this course.

Breadth Requirements: Creative and Cultural Representations (1)

FSL415H1 - Business French

Hours: 36S

This course is designed to strengthen oral and written communication skills in French and develop intercultural competence for a variety of career paths including public relations, international development, federal and provincial government. Students will gain expertise in spoken and written French through in-class activities supported by multimedia.

Prerequisite: FSL321Y1/ FSL322H1/ FSL315H1. Students may also fulfill this prerequisite requirement based on the results of their French Placement Test.

Exclusion: Students who are fluent French speakers or whose command of the French language is equivalent to near-native proficiency must contact the Department of French before enrolling in this course.

Breadth Requirements: Thought, Belief and Behaviour (2)

FSL420H1 - Advanced French I

Previous Course Number: FSL421Y1

Hours: 36L

This advanced course in French aims to provide students with a broader understanding and appreciation of French and Francophone culture through the reading and discussion of a variety of texts and multimedia materials. Emphasis is placed on mastery of language skills such as

reading comprehension and vocabulary, oral and written communication.

Prerequisite: FSL321Y1/ FSL322H1 or placement in FSL420H1 based on the results of the French Placement Test.

Exclusion: FSL421Y1, FSL442H1, FSL443H1, FSL472H1. Students who are fluent French speakers or whose command of the French language is equivalent to near-native proficiency must contact the Department of French before enrolling in this course.

Breadth Requirements: Creative and Cultural Representations (1)

FSL442H1 - Advanced Written French II

Hours: 36L

Designed for students who wish to consolidate and perfect their writing abilities. Skills developed include the mastery of register-based differences; use of rhetorical and stylistic techniques and systematic self-correction.

Prerequisite: FSL421Y1/ FSL420H1. Students may also fulfill this prerequisite requirement based on the results of their French Placement Test.

Exclusion: Students who are fluent French speakers or whose command of the French language is equivalent to near-native proficiency must contact the Department of French before enrolling in this course.

Breadth Requirements: Creative and Cultural Representations (1)

FSL443H1 - Advanced Oral French II

Hours: 36L

This course is designed for students who wish to consolidate and perfect their oral (speaking and listening) abilities. Oral production and improvement of pronunciation will be practiced through reading exercises, presentations, debates, and discussions focusing on a rich vocabulary and contextually appropriate speech registers. Training in the comprehension of spoken French will aim at the development of students' listening skills through the study of recordings related to various situations and topics.

Prerequisite: FSL421Y1/ FSL420H1/ FSL375Y1/ (FSL375H1, 0.5 credit in FRE at the 200-level). Students may also fulfill this prerequisite requirement based on the results of their French Placement Test.

Exclusion: FSL473H1. Students who are fluent French speakers or whose command of the French language is equivalent to near-native proficiency must contact the Department of French before enrolling in this course.

Breadth Requirements: Creative and Cultural Representations (1)

FSL472H1 - Reading and Writing Fiction and Non-Fiction in French

Hours: 36L

An online course designed for students who wish to further develop their reading and writing skills in French. Students will acquire analytic tools to comprehend, analyze and write fiction and non-fiction texts. Multimedia approach to understanding the cultural experiences of francophone world.

Prerequisite: FSL375Y1/ (FSL375H1, 0.5 credit in FRE at the 200-level)/ FSL420H1

Exclusion: FSL442H1. Students who are fluent French speakers or whose command of the French language is equivalent to near-native proficiency must contact the Department of French before enrolling in this course.

Breadth Requirements: Creative and Cultural Representations (1)

FSL475H1 - Creative Writing in French

Hours: 36L

Do you like creative writing? Are you simply curious about it? Do you want to hone your writing skills in French and develop your creative voice in the process? Then this course is for you. Part workshop in which constructive and supportive feedback will help you develop your writing in French and your creativity, part literary discussion on various aspects of literary technique such as character, setting, plot, point of view, structure or revision (through reading).

Prerequisite: FSL375Y1/ FSL375H1/ FSL421Y1/ FSL420H1

Exclusion: Students who are fluent French speakers or whose command of the French language is equivalent to near-native proficiency must contact the Department of French before enrolling in this course.

Breadth Requirements: Creative and Cultural Representations (1)

Geography and Planning

Faculty List

Professors Emeriti

L.S. Bourne, MA, PhD, FRSC, DES Hons
 J.N.H. Britton, MA, PhD

Assistant Professor, CLTA

Ignacio Tiznado Aitken

Introduction

The Department offers programs in Geography and in Urban Studies. It also has a stand-alone Minor in Geographic Information Systems.

Geography is the study of environments shaped by both natural forces and human activity. The Department offers Majors, Minors, and Specialists in Human Geography and Environmental Geography. The Human Geography programs provide the opportunity to learn about theories, patterns, and processes of how people create and organize space and place, considering economic and social dynamics, historical development, and the management of built and natural environments. Human Geography students may also pursue a Focus in Urban Geography or Planning. Environmental Geography Programs explore the social, spatial, and biophysical processes that shape society's relationship to nature, management of resources, and contemporary environmental change. Geography students often take related courses across the natural sciences, social sciences, and humanities alongside their core studies.

Urban Studies Majors, Minors, and Specialists explore the complex and evolving relationships among institutions, people, and built environments that shape urban life. The

programs are interdisciplinary, allowing students to tailor their studies with courses from across the university, including geography, economics, political science, sociology, and architectural studies. Many courses focus on real-world problem solving through community-engaged learning, providing hands-on experience with opportunities for field research, internships, and placements with city-building organizations, municipal offices, and non-profit partners. Students are also encouraged to participate in opportunities to study elsewhere and learn about cities in other contexts.

The Minor in Geographic Information Systems (GIS) provides students with theoretical, technical, and applied foundations in GIS, including computer cartography, spatial analysis, remote sensing, and geo-visualization. It can be combined with programs within or outside of the Department.

The Department also contributes courses to a wide range of interdisciplinary programs, including American Studies; Anthropology; Archaeology; Canadian Studies; Caribbean Studies; Critical Studies in Equity and Solidarity; Diaspora and Transnational Studies; East Asian Studies; Earth Sciences; Environmental Science and Environmental Studies; Indigenous Studies; Peace and Conflict Studies; and Women and Gender Studies.

Graduates of geography and urban studies programs and those with GIS training find employment in a wide range of sectors, including international and local non-profit organizations, all levels of government, industry, and education. Career paths include roles such as policy analysts, geographic data science specialists, community organizers, and educators. Professional opportunities span environmental management, community development, land and resource analysis, urban transportation and planning, community social services, GIS design and data analysis, and the processing of archival, survey, and cartographic information.

Regarding Geography and Planning Programs

Admission to major and specialist programs will be determined by a student's mark in 0.5-1.0 GGR credits at the 100 and/or 200-level. See program descriptions for details on the entry requirements. These are limited enrolment programs that can only accommodate a limited number of students. Achieving the marks required does not necessarily guarantee admission to the program in any given year.

Double majors in Geography may only overlap 1.0 credit. Students combining any of our Minor programs with a Specialist/Major program would normally be allowed to overlap only 1.5 credits towards both programs. Double minors can overlap 1.0 credit. Students combining the Focus in Planning and the Focus in Urban Geography can overlap 1.5 credits. Students that choose to specialize or major in one of the three Geography programs cannot minor in the same program but may do so in another Geography program.

Generally, students may only take 1.0 credit of an Independent Research Project toward their program requirements.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Geography and Planning programs impacted by this policy: [ASSPE1667](#), [ASMAJ1667](#), and [ASMIN1667](#); [ASSPE1252](#), [ASMAJ1252](#), and [ASMIN1252](#); [ASSPE2030](#), [ASMAJ2030](#), and [ASMIN2030](#); [ASSPE2207](#), [ASMAJ2207](#), and [ASMIN2207](#)

Geography and Planning Programs

Environmental Geography Major (Arts Program) - ASMAJ1252

A focus on the human-environment nexus is most explicit in these programs. Students learn about the social, spatial, and biophysical processes that shape society's relationship to nature, management of resources, and contemporary environmental change. These programs appeal to non-science students who seek an environmental program that allows them to learn more

about the natural processes that interact with social factors in shaping environments. These programs offer training in quantitative and qualitative research methods, including GIS and Remote Sensing.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- 0.5 credit in GGR courses at the 100- or 200-level, with a minimum grade of 67%, or
- 1.0 credit in GGR courses at the 100- or 200-level, with a minimum grade of 63%

To ensure that students admitted to the program will be successful, applicants with a final grade or grade average lower than the minimum grades stated above will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program. Jointly-offered GGR courses will also be considered (e.g. JEG, JGI, JGE).

Completion Requirements:

First Year Geography Courses: Any 2 courses (1.0 credit) from GGR107H1 (recommended), JEG100H1, GGR101H1, GGR112H1, GGR124H1, GGR172H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1. 200/300-level GGR courses may also be used to meet this requirement. Contact the Undergraduate Administrator to update your program.

Physical and Environmental Geography Courses: Any 2 courses (1.0 credit) from GGR201H1/JEG201H1, GGR203H1, GGR205H1/JEG205H1, GGR206H1/JEG206H1, GGR305H1/JEG305H1, GGR308H1/JEG308H1, GGR314H1, GGR347H1, GGR348H1, EEB240H1, ENV200H1

Methods & Core Courses: All (1.5 credits) of GGR223H1, GGR270H1, GGR271H1

Regional Geography Courses: Any course (0.5 credit) from GGR240H1, GGR246H1, GGR254H1, GGR341H1, GGR342H1, GGR343H1, GGR344H1

Fourth Year Course: Any course (0.5 credit) at the 400-level from Group A.

Applications: Any 5 courses (2.5 credits) from Group A; up to 1.0 credit can be from Group B; up to 0.5 credit can be from Group C.

Note: At least 2.0 credits must be 300/400-level courses. Of these, at least one 0.5 credit must be at the 400-level (includes Fourth Year Course requirement).

Total credits: 7.0

Group A (Environmental Geography Courses)

GGR201H1/JEG201H1, GGR203H1, GGR205H1/JEG205H1, GGR206H1/JEG206H1, GGR223H1, GGR272H1, GGR273H1, GGR274H1, GGR301H1/JEG301H1, GGR305H1/JEG305H1, GGR308H1/JEG308H1, GGR310H1, GGR314H1, GGR323H1, GGR329H1, GGR332H1, GGR334H1, GGR315H1/GGR337H1, GGR338H1, GGR340H1, GGR341H1, GGR347H1, GGR348H1, GGR349H1, GGR372H1, GGR373H1, GGR386H1, GGR387H1, GGR388H1, GGR401H1, GGR405H1, GGR406H1/JEG406H1, GGR413H1, GGR414H1/GGR415H1, GGR416H1, GGR418H1, GGR419H1, GGR434H1, GGR438H1, GGR481H1, GGR491Y1, GGR492H1, GGR497H1, GGR498H1, JGE321H1, JGE331H1, JIG322H1, JIG440H1, JUG320H1

Group B (EEB and ENV Courses)

EEB240H1, ENV200H1, ENV307H1, ENV323H1, ENV333H1, ENV335H1, ENV350H1, ENV395Y0, ENV396Y0, ENV422H1

Group C

Any other GGR, JGE, JIG, JUG courses at the 200/300/400-level not listed in Group A.

Environmental Geography Minor (Arts Program) - ASMIN1252

A focus on the human-environment nexus is most explicit in these programs. Students learn about the social, spatial, and biophysical processes that shape society's relationship to nature, management of resources, and contemporary environmental change. These programs appeal to non-science students who seek an environmental program that allows them to learn more about the natural processes that interact with social factors in shaping environments. These programs offer training in quantitative and qualitative research methods, including GIS and Remote Sensing.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

First Year Geography Courses: Any course (0.5 credit) from GGR107H1 (recommended), JEG100H1, GGR101H1, GGR112H1, GGR124H1, GGR172H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1. 200/300-level GGR courses may also be used to meet this requirement. Contact the Undergraduate Administrator to update your program.

Core Course: All (0.5 credit) of GGR223H1

Physical and Environmental Geography Course: Any course (0.5 credit) from GGR201H1/ JEG201H1, GGR203H1, GGR205H1/ JEG205H1, GGR206H1/ JEG206H1, GGR305H1/ JEG305H1, GGR308H1/ JEG308H1, GGR314H1, GGR347H1, GGR348H1, ENV200H1, ENV234H1

Applications: Any 5 courses (2.5 credits) from Group A; up to 1.0 credit can be from Group B. Up to a 0.5 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department.

Note: At least 1.0 credit must be 300/400-level courses.

Group A (Environmental Geography Courses):
GGR201H1/ JEG201H1, GGR203H1, GGR205H1/ JEG205H1, GGR206H1/ JEG206H1, GGR223H1, GGR270H1, GGR271H1, GGR272H1, GGR273H1, GGR274H1, GGR301H1/ JEG301H1, GGR305H1/ JEG305H1, GGR308H1/ JEG308H1, GGR310H1, GGR314H1, GGR323H1, GGR329H1, GGR332H1, GGR334H1, GGR315H1/ GGR337H1, GGR338H1, GGR340H1, GGR341H1, GGR347H1, GGR348H1, GGR349H1, GGE372H1, GGR373H1, GGR386H1, GGR387H1, GGR388H1, GGR401H1, GGR405H1, GGR406H1/ JEG406H1, GGR413H1, GGR414H1/ GGR415H1, GGR416H1, GGR418H1, GGR419H1, GGR434H1, GGR438H1, GGR481H1, GGR491Y1, GGR492H1, GGR497H1, GGR498H1, JGE321H1, JGE331H1, JIG322H1, JIG440H1, JUG320H1

Group B (School of the Environment Courses):
ENV200H1, ENV234H1, ENV307H1, ENV323H1, ENV333H1, ENV335H1, ENV350H1, ENV395Y0, ENV396Y0, ENV422H1

Environmental Geography Specialist (Arts Program) - ASSPE1252

A focus on the human-environment nexus is most explicit in these programs. Students learn about the social, spatial, and biophysical processes that shape society's relationship to nature, management of resources, and contemporary environmental change. These programs appeal to non-science students who seek an environmental program that allows them to learn more about the natural processes that interact with social factors in shaping environments. These programs offer training in quantitative and qualitative research methods, including GIS and Remote Sensing.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- 0.5 credit in GGR courses at the 100- or 200-level, with a minimum grade of 75%, or
- 1.0 credit in GGR courses at the 100- or 200-level, with a minimum grade of 70%

To ensure that students admitted to the program will be successful, applicants with a final grade or grade average lower than the minimum grades stated above will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program. Jointly-offered GGR courses will also be considered (e.g. JEG, JGI, JGE).

Completion Requirements:

First Year Geography Courses: Any 2 courses (1.0 credit) from GGR107H1 (recommended), JEG100H1, GGR101H1, GGR112H1, GGR124H1, GGR172H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1. 200/300-level GGR courses may also be used to meet this requirement. Contact the Undergraduate Administrator to update your program.

Physical and Environmental Geography Courses: Any 2 courses (1.0 credit) from GGR201H1/ JEG201H1, GGR203H1, GGR205H1/ JEG205H1, GGR206H1/ JEG206H1, GGR305H1/ JEG305H1, GGR308H1/ JEG308H1, GGR314H1, GGR347H1, GGR348H1, ENV200H1, ENV234H1

Methods & Core Courses: All (2.5 credits) of GGR223H1, GGR270H1, GGR271H1, GGR272H1, JGE331H1

Regional Geography Courses: Any course (0.5 credit) from GGR240H1, GGR246H1, GGR254H1, GGR341H1, GGR342H1, GGR343H1, GGR344H1

Fourth Year Courses: Either GGR491Y1 or one of GGR416H1, GGR492H1, GGR497H1 and one additional 0.5 credit 400 level course from Group A or Group B (1.0 credit). Up to one 0.5 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department.

Application: Any 8 courses (4.0 credits) from Group A; up to 1.5 credits can be from Group B; up to 1.0 credit can be from Group C. Up to 1.0 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department.

Note: At least 4.0 credits must be 300/400-level courses. Of these, at least 1.0 credit must be at the 400-level (includes Fourth Year Course requirement).

Total credits: 10.0

Group A (Environmental Geography Courses):
GGR201H1/ JEG201H1, GGR203H1, GGR205H1/
JEG205H1, GGR206H1/ JEG206H1, GGR223H1,
GGR272H1, GGR273H1, GGR274H1, GGR301H1/
JEG301H1, GGR305H1/ JEG305H1, GGR308H1/
JEG308H1, GGR310H1, GGR314H1, GGR323H1,
GGR329H1, GGR332H1, GGR334H1, GGR315H1/
GGR337H1, GGR338H1, GGR340H1, GGR341H1,
GGR347H1, GGR348H1, GGR349H1, GGR372H1,
GGR373H1, GGR386H1, GGR387H1, GGR388H1,
GGR401H1, GGR405H1, GGR406H1/ JEG406H1,
GGR413H1, GGR414H1/ GGR415H1, GGR416H1,
GGR418H1, GGR419H1, GGR434H1, GGR438H1,
GGR481H1, GGR491Y1, GGR492H1, GGR497H1,
GGR498H1, JGE321H1, JGE331H1, JIG322H1,
JIG440H1, JUG320H1

Group B (School of the Environment Courses):
ENV200H1, ENV234H1, ENV307H1, ENV323H1,
ENV333H1, ENV335H1, ENV350H1, ENV395Y0,
ENV396Y0, ENV422H1

Group C:

Any other GGR, JGE, JIG, JUG courses at the 200/300/400-level not listed in Group A.

Human Geography Major (Arts Program) - ASMAJ1667

The Human Geography programs provide the opportunity to learn about the relations between landscapes, places, people and nature, and the spatial organization of human

activities. While students are encouraged to explore the breadth of the discipline, we also identify courses by theme for students who wish to develop expertise in one or two subfields (e.g., urban geography, cultural and historical geography). The Human Geography programs appeal to students who wish to develop an integrative understanding of the cultural, economic, political and social forces that shape how people use and experience the environments they live in. These programs offer training in quantitative and qualitative research methods, including GIS and Remote Sensing.

Note: Double majors in Geography may only overlap 1.0 credit. Students combining any of our Minor programs with a Major Geography program will normally be allowed to overlap only 1.5 credits towards both programs.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- 0.5 credit in GGR courses at the 100- or 200-level, with a minimum grade of 67%, or
- 1.0 credit in GGR courses at the 100- or 200-level, with a minimum grade of 63%

To ensure that students admitted to the program will be successful, applicants with a final grade or grade average lower than the minimum grades stated above will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program. Jointly-offered GGR courses will also be considered (e.g. JEG, JGI, JGE).

Completion Requirements:

First Year Geography Courses: Any two courses (1.0 credit) from JEG100H1, GGR101H1, GGR107H1, GGR112H1, GGR124H1, GGR172H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1. 200/300-level GGR courses may also be used to meet this requirement. Contact the Undergraduate Administrator to update your program.

Physical and Environmental Geography Course: Any course (0.5 credit) not used to satisfy first year course requirement from JEG100H1, GGR101H1, GGR201H1/
JEG201H1, GGR203H1, GGR205H1/ JEG205H1,
GGR206H1/ JEG206H1, GGR223H1

Methods Courses: All (1.0 credit) of GGR270H1, GGR271H1

Regional Geography Course: Any course (0.5 credit) from GGR240H1, GGR246H1, GGR254H1, GGR341H1, GGR342H1, GGR343H1, GGR344H1

Fourth Year Course: Any course (0.5 credit) from 400-level courses from Group E.

Applications: Any 7 courses (3.5 credits) from Group E; Up to 1.0 credit can be from Group F. Up to 1.0 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department.

Note: At least 2.0 credits must be 300/400-level courses. Of these, at least 0.5 must be at the 400-level (includes Fourth Year Course requirement).

Total credits: 7.0

Group E (Human Geography Courses)

GGR217H1, GGR221H1, GGR223H1, GGR225H1, GGR240H1, GGR246H1, GGR251H1, GGR252H1, GGR254H1, GGR259H1, GGR272H1, GGR273H1, GGR274H1, GGR299Y1, GGR320H1, GGR323H1, GGR324H1, GGR326H1, GGR327H1, GGR328H1, GGR329H1, GGR332H1, GGR334H1, GGR336H1, GGR338H1, GGR339H1, GGR340H1, GGR341H1, GGR342H1, GGR343H1, GGR344H1, GGR349H1, GGR354H1, GGR357H1, GGR359H1, GGR360H1, GGR363H1, GGR372H1, GGR373H1, GGR374H1, GGR375H1, GGR376H1, GGR377H1, GGR382H1, GGR386H1, GGR387H1, GGR389H1, GGR400H1, GGR416H1, GGR418H1, GGR419H1, GGR421H1, GGR424H1, GGR428H1, GGR429H1, GGR430H1, GGR431H1, GGR432H1, GGR433H1, GGR434H1, GGR437H1, GGR438H1, JGC439H1, GGR456H1, GGR458H1, GGR460H1, GGR462H1, GGR472H1, GGR473H1, GGR481H1, GGR482H1, GGR491Y1, GGR492H1, GGR496H1, GGR497H1, GGR499H1, JGE321H1, JGE331H1, JIG322H1, JIG440H1, JUG320H1, JUG325H1, JGI216H1, JGU216H1, JGI346H1, JGU346H1, JGI454H1, JGU454H1

Group F (Optional Science Courses for Human Geography)

GGR201H1, JEG201H1, GGR203H1, GGR205H1, JEG205H1, GGR206H1, JEG206H1, GGR301H1, JEG301H1, GGR305H1, JEG305H1, GGR308H1, JEG308H1, GGR310H1, FOR310H1, GGR314H1, GGR315H1, GGR337H1, GGR347H1, GGR348H1, GGR388H1, GGR401H1, GGR405H1, GGR406H1, JEG406H1, GGR413H1, GGR414H1, GGR415H1, GGR498H1

Human Geography Minor (Arts Program) - ASMIN1667

The Human Geography programs provide the opportunity to learn about the relations between landscapes, places, people and nature, and the spatial organization of human activities. While students are encouraged to explore the breadth of the discipline, we also identify courses by theme for students who wish to develop expertise in one or two subfields (e.g., urban geography, cultural and historical geography). The Human Geography programs appeal to students who wish to develop an integrative understanding of the cultural, economic, political and social forces that shape how people use and experience the environments they live in. These programs offer training in quantitative and qualitative research methods, including GIS and Remote Sensing.

Note: Double minors in Geography may only overlap 1.0 credit. Students combining any of our Minor programs with a Major/Specialist Geography program will normally be allowed to overlap only 1.5 credits towards both programs.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

First Year Geography Courses: Any 2 courses (1.0 credit) from JEG100H1, GGR101H1, GGR107H1, GGR112H1, GGR124H1, GGR172H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1. 200/300-level GGR courses may also be used to meet this requirement. Contact the Undergraduate Administrator to update your program.

Applications: Any 6 courses (3.0 credits) from Group E, including at least 1.0 credit at the 300/400-level. One course (0.5 credit) can be from Group F. Up to 1.0 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department.

Group E (Human Geography Courses):

GGR217H1, GGR221H1, GGR223H1, GGR225H1, GGR240H1, GGR246H1, GGR251H1, GGR252H1, GGR254H1, GGR259H1, GGR270H1, GGR271H1, GGR272H1, GGR273H1, GGR274H1, GGR299Y1, GGR320H1, GGR323H1, GGR324H1, GGR326H1, GGR327H1, GGR328H1, GGR329H1, GGR332H1, GGR334H1, GGR336H1, GGR338H1, GGR339H1, GGR340H1, GGR341H1, GGR342H1, GGR343H1, GGR344H1, GGR349H1, GGR354H1, GGR357H1, GGR359H1, GGR360H1, GGR363H1, GGR372H1, GGR373H1, GGR374H1, GGR375H1, GGR376H1, GGR377H1, GGR382H1, GGR386H1, GGR387H1, GGR389H1, GGR400H1, GGR416H1, GGR418H1,

GGR419H1, GGR421H1, GGR424H1, GGR428H1,
GGR429H1, GGR430H1, GGR431H1, GGR432H1,
GGR433H1, GGR434H1, GGR437H1, GGR438H1,
JGC439H1, GGR456H1, GGR458H1, GGR460H1,
GGR462H1, GGR472H1, GGR473H1, GGR481H1,
GGR482H1, GGR491Y1, GGR492H1, GGR496H1,
GGR497H1, GGR499H1, JGE321H1, JGE331H1,
JIG322H1, JIG440H1, JUG320H1, JUG325H1,
JGI216H1, JGU216H1, JGI346H1, JGU346H1,
JGI454H1, JGU454H1

Group F (Optional Science Courses for Human Geography):

GGR201H1, JEG201H1, GGR203H1, GGR205H1/
JEG205H1, GGR206H1, JEG206H1, GGR301H1/
JEG301H1, GGR305H1, JEG305H1, GGR308H1/
JEG308H1, GGR310H1, FOR310H1, GGR314H1,
GGR315H1, GGR337H1, GGR347H1, GGR348H1,
GGR388H1, GGR401H1, GGR405H1, GGR406H1/
JEG406H1, GGR413H1, GGR414H1, GGR415H1,
GGR498H1

Human Geography Specialist (Arts Program) - ASSPE1667

The Human Geography programs provide the opportunity to learn about the relations between landscapes, places, people and nature, and the spatial organization of human activities. While students are encouraged to explore the breadth of the discipline, we also identify courses by theme for students who wish to develop expertise in one or two subfields (e.g., urban geography, cultural and historical geography). The Human Geography programs appeal to students who wish to develop an integrative understanding of the cultural, economic, political and social forces that shape how people use and experience the environments they live in. These programs offer training in quantitative and qualitative research methods, including GIS and Remote Sensing.

Note: Students combining any of our Specialist programs with a Minor Geography program will normally be allowed to overlap only 1.5 credits towards both programs.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- 0.5 credit in GGR courses at the 100- or 200-level, with a minimum grade of 75%, or

- 1.0 credit in GGR courses at the 100- or 200-level, with a minimum grade of 70%

To ensure that students admitted to the program will be successful, applicants with a final grade or grade average lower than the minimum grades stated above will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program. Jointly-offered GGR courses will also be considered (e.g. JEG, JGI, JGE).

Completion Requirements:

First Year Geography Courses: Any 2 courses (1.0 credit) from JEG100H1, GGR101H1, GGR107H1, GGR112H1, GGR124H1, GGR172H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1. 200/300-level GGR courses may also be used to meet this requirement. Contact the Undergraduate Administrator to update your program.

Physical and Environmental Geography Course: Any course (0.5 credit) not used to satisfy first year course requirement from JEG100H1, GGR101H1, GGR201H1/JEG201H1, GGR203H1, GGR205H1/JEG205H1, GGR206H1/JEG206H1, GGR223H1

Methods Courses: All (1.5 credits) of GGR270H1, GGR271H1, GGR272H1

Regional Geography Course: Any course (0.5 credit) from GGR240H1, GGR246H1, GGR254H1, GGR341H1, GGR342H1, GGR343H1, GGR344H1

Fourth Year Courses: Any 2 (1.0 credit) 400-level GGR courses, at least one of which must be from Group E. Up to one 0.5 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department.

Applications: Any 11 courses (5.5 credits) from Group E; Up to 1.5 credits can be from Group F. Up to 1.0 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department.

Note: At least 4.0 credits must be 300/400-level courses. Of these, at least 1.0 credit must be at the 400-level (includes Fourth Year Course requirement).

Total credits: 10.0

Group E (Human Geography Courses):

GGR217H1, GGR221H1, GGR223H1, GGR225H1,
GGR240H1, GGR246H1, GGR251H1, GGR252H1,
GGR254H1, GGR259H1, GGR272H1, GGR273H1,
GGR274H1, GGR299Y1, GGR320H1, GGR323H1,
GGR324H1, GGR326H1, GGR327H1, GGR328H1,
GGR329H1, GGR332H1, GGR334H1, GGR336H1,
GGR338H1, GGR339H1, GGR340H1, GGR341H1,
GGR342H1, GGR343H1, GGR344H1, GGR349H1,
GGR354H1, GGR357H1, GGR359H1, GGR360H1,

GGR363H1, GGR372H1, GGR373H1, GGR374H1,
GGR375H1, GGR376H1, GGR377H1, GGR382H1,
GGR386H1, GGR387H1, GGR389H1, GGR400H1,
GGR416H1, GGR418H1, GGR419H1, GGR421H1,
GGR424H1, GGR428H1, GGR429H1, GGR430H1,
GGR431H1, GGR432H1, GGR433H1, GGR434H1,
GGR437H1, GGR438H1, JGC439H1, GGR456H1,
GGR458H1, GGR460H1, GGR462H1, GGR472H1,
GGR473H1, GGR481H1, GGR482H1, GGR491Y1,
GGR492H1, GGR496H1, GGR497H1, GGR499H1,
JGE321H1, JGE331H1, JIG322H1, JIG440H1,
JUG320H1, JUG325H1, JGI216H1, JGU216H1,
JGI346H1, JGU346H1, JGI454H1, JGU454H1

Group F (Optional Science Courses for Human Geography):

GGR201H1, JEG201H1, GGR203H1, GGR205H1/
JEG205H1, GGR206H1, JEG206H1, GGR301H1/
JEG301H1, GGR305H1, JEG305H1, GGR308H1/
JEG308H1, GGR310H1, GGR314H1, FOR310H1,
GGR315H1, GGR337H1, GGR347H1, GGR348H1,
GGR388H1, GGR401H1, GGR405H1, GGR406H1/
JEG406H1, GGR413H1, GGR414H1, GGR415H1,
GGR498H1

Focus in Planning (Major) - ASFOC1667A

The Planning Focus provides students with the opportunity to learn about how planning is a key component of the dynamic relations that exist between places, policy, power, and people. It focuses in on the conscious choices and decision made by various groups to shape the spatial organization of human activities. The Planning Focus will appeal to students who wish to develop an integrative understanding of the cultural, economic, political and social forces that shape the development and redevelopment of metropolitan and rural regions. Students are encouraged to explore the breadth of our courses that engage planning questions in relation to transportation, social segregation, health and housing, economic policy, environment change, and globalization.

The Planning Focus is not an accredited planning program. Students interested in a career in planning should consider the Masters of Science in Planning in our graduate program. The Planning Focus is good background preparation for applying to this and other accredited master's programs in planning.

Enrolment Requirements:

Enrolment in the Human Geography Major (ASMAJ1667) program is required.

Completion Requirements:

Core (required) Courses: 1.0 credit from GGR217H1 and JGI346H1/JGU346H1

Planning Electives: 1.5 credits from GGR241H1, GGR259H1, JIG322H1, GGR338H1, GGR339H1, GGR343H1, GGR349H1, GGR354H1, GGR357H1, GGR359H1, GGR416H1, GGR424H1, GGR428H1, GGR433H1, GGR434H1, GGR456H1, GGR460H1, GGR493Y1 (0.5 credit can be used based on internship)

Note: At least 1.0 credit must be 300/400-level courses.

Focus in Planning (Specialist) - ASFOC1667B

The Planning Focus provides students with the opportunity to learn about how planning is a key component of the dynamic relations that exist between places, policy, power, and people. It focuses in on the conscious choices and decision made by various groups to shape the spatial organization of human activities. The Planning Focus will appeal to students who wish to develop an integrative understanding of the cultural, economic, political and social forces that shape the development and redevelopment of metropolitan and rural regions. Students are encouraged to explore the breadth of our courses that engage planning questions in relation to transportation, social segregation, health and housing, economic policy, environment change, and globalization.

The Planning Focus is not an accredited planning program. Students interested in a career in planning should consider the Masters of Science in Planning in our graduate program. The Planning Focus is good background preparation for applying to this and other accredited master's programs in planning.

Enrolment Requirements:

Enrolment in the Human Geography Specialist (ASSPE1667) program is required.

Completion Requirements:

Core (required) Courses: 1.0 credit from GGR217H1 and JGI346H1/JGU346H1

Planning Electives: 1.5 credits from GGR241H1, GGR259H1, JIG322H1, GGR338H1, GGR339H1, GGR343H1, GGR349H1, GGR354H1, GGR357H1, GGR359H1, GGR416H1, GGR424H1, GGR428H1, GGR433H1, GGR434H1, GGR456H1, GGR460H1, GGR493Y1 (0.5 credit can be used based on internship)

Note: At least 1.0 credit must be 300/400-level courses.

Focus in Urban Geography (Major) - ASFOC1667M

The Focus in Urban Geography provides students with the opportunity to emphasize urban geography as part of their Human Geography specialist or major. Urban geography focuses on the political, social, cultural and economic processes that shape city life, development and policy. This focus will appeal to students registered in the Human Geography specialist or major program who wish to develop an integrative understanding of the dynamics that shape the urban realm. Students are encouraged to explore the breadth of our course offerings in housing, historical, political and transportation.

Enrolment Requirements:

Enrolment in the Human Geography Major (ASMAJ1667) program is required.

Completion Requirements:

Required Urban Geography Courses: 1.0 credit from GGR124H1, GGR241H1, JGI216H1/ JGU216H1, GGR259H1

Urban Geography Electives: 1.5 credits from GGR241H1, GGR259H1, GGR336H1, GGR339H1, GGR349H1, GGR357H1, GGR359H1, GGR374H1, GGR382H1, GGR424H1, GGR458H1, GGR460H1, GGR482H1

Note: At least 1.0 credit must be 300/400-level courses.

Focus in Urban Geography (Specialist) - ASFOC1667S

The Focus in Urban Geography provides students with the opportunity to emphasize urban geography as part of their Human Geography specialist or major. Urban geography focuses on the political, social, cultural and economic processes that shape city life, development and policy. This focus will appeal to students registered in the Human Geography specialist or major program who wish to develop an integrative understanding of the dynamics that shape the urban realm. Students are encouraged to explore the breadth of our course offerings in housing, historical, political and transportation.

Enrolment Requirements:

Enrolment in the Human Geography Specialist (ASSPE1667) program is required.

Completion Requirements:

Required Urban Geography Courses: 1.0 credit from GGR124H1, GGR241H1, JGI216H1/ JGU216H1, GGR259H1

Urban Geography Electives: 1.5 credits from GGR241H1, GGR259H1, GGR336H1, GGR339H1, GGR349H1, GGR357H1, GGR359H1, GGR374H1, GGR382H1, GGR424H1, GGR458H1, GGR460H1, GGR482H1

Note: At least 1.0 credit must be 300/400-level courses.

Physical and Environmental Geography Major (Science Program) - ASMAJ2030

Physical and Environmental Geography offers science-based programs for students interested in an integrative approach to understanding the earth's biotic and abiotic systems, including their spatial dynamics and the ways they are altered by human action. The programs provide a foundation in the subfields of climatology, biogeography, hydrology, and geomorphology. Students gain practical experience in lab and field settings. Technical skills taught also include data analysis, geospatial analytical tools, including GIS and Remote Sensing.

Enrolment Requirements:

Enrolment in the Physical and Environmental Geography Major will be administratively suspended as of January 31, 2024 and students will no longer be able to enrol in the program. Students presently enrolled in the Major will be able to complete the program requirements as described below. Students who are not enrolled in this program but are interested in "Physical and Environmental Geography" programs are encouraged to consider the Environmental Geography and/or Human Geography Programs in the Department of Geography and Planning and are strongly recommended to consult with the Department of Geography and Planning for advising.

Completion Requirements:

Introductory Courses: Any 4 half courses or the equivalent (2.0 credits) from JEG100H1, BIO120H1/ BIO130H1, CHM135H1, CHM136H1, PHY131H1, PHY132H1, MAT135H1

Core Courses: Any 3 courses (1.5 credits) from GGR201H1/ JEG201H1, GGR203H1, GGR205H1/ JEG205H1, GGR206H1/ JEG206H1

Regional Geography Course: Any course (0.5 credit) from GGR240H1, GGR246H1, GGR254H1, GGR308H1/ JEG308H1, GGR341H1, GGR342H1, GGR343H1, GGR344H1

Methods Courses: All (1.5 credits) of GGR270H1, GGR272H1, GGR390H1

Applications: Any 4 courses (2.0 credits) from:

- Hydrology/GIS/Remote Sensing: GGR273H1, GGR274H1, GGR315H1/ GGR337H1, GGR373H1, GGR375H1, GGR386H1, GGR413H1, GGR414H1/ GGR415H1, GGR462H1, GGR472H1
- Climatology/Energy/Resources: GGR314H1, GGR334H1, GGR347H1, GGR348H1, GGR416H1
- Geomorphology: GGR301H1/ JEG301H1, GGR406H1/ JEG406H1, ESS241H1, ESS331H1
- Biogeography: GGR305H1/ JEG305H1, GGR308H1/ JEG308H1, ESS361H1, ESS363H1, ESS461H1, ESS462H1

Up to 1.0 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department. Any GGR course from the list for Core Courses and Fourth Year Courses not already used. Any course (0.5 credit) from Group I. No more than one from GGR273H1, GGR373H1.

Fourth Year Course: Any course (0.5 credit) from GGR401H1, GGR406H1/ JEG406H1, GGR413H1, GGR414H1/ GGR415H1, GGR491Y1, GGR498H1

Total credits: 8.0

Group I:

EEB319H1, EEB321H1, EEB324H1, EEB328H1, EEB428H1, ENV346H1, ESS262H1, ESS311H1, ESS361H1, ESS363H1, ESS461H1, ESS464H1, FOR301H1, FOR305H1, FOR306H1, FOR417H1, JEE337H1, PHY392H1, PHY408H1

Physical and Environmental Geography Minor (Science Program) - ASMIN2030

Physical and Environmental Geography offers science-based programs for students interested in an integrative approach to understanding the earth's biotic and abiotic systems, including their spatial dynamics and the ways they are altered by human action. The programs provide a foundation in the subfields of climatology, biogeography, hydrology, and geomorphology. Students gain practical experience in lab and field settings. Technical skills taught also include data analysis, geospatial analytical tools, including GIS and Remote Sensing.

Enrolment Requirements:

Enrolment in the Physical and Environmental Geography Minor will be administratively suspended as of January 31, 2024 and students will no longer be able to enrol in the program. Students presently enrolled in the Minor will be able to complete the program requirements as described below. Students who are not enrolled in this program but are interested in "Physical and Environmental Geography" programs are encouraged to consider the Environmental Geography and/or Human Geography Programs in the Department of Geography and Planning and are strongly recommended to consult with the Department of Geography and Planning for advising.

Completion Requirements:

First Year Geography Courses: Any 2 courses (1.0 credit) from JEG100H1 (recommended), GGR101H1, GGR107H1, GGR112H1, GGR124H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1

Core Courses: Any 2 courses (1.0 credit) from GGR201H1/ JEG201H1, GGR203H1, GGR205H1/ JEG205H1, GGR206H1/ JEG206H1

Methods Courses: Any 2 courses (1.0 credit) from GGR270H1, GGR272H1, GGR390H1

Applications: Any 2 courses (1.0 credit) from:

- Hydrology/GIS/Remote Sensing: GGR206H1/ JEG206H1, GGR273H1, GGR274H1, GGR315H1/ GGR337H1, GGR373H1, GGR375H1, GGR386H1, GGR413H1, GGR414H1/ GGR415H1, GGR462H1
- Climatology/Energy: GGR203H1, GGR314H1, GGR347H1, GGR348H1
- Geomorphology: GGR201H1/ JEG201H1, GGR301H1/ JEG301H1, GGR406H1/ JEG406H1
- Biogeography: GGR205H1/ JEG205H1, GGR305H1/ JEG305H1, GGR308H1/ JEG308H1, ESS361H1, ESS363H1, ESS461H1, ESS462H1

No more than one (0.5) of GGR273H1, GGR274H1, GGR373H1, GGR375H1, GGR386H1. At least one Applications course (0.5 credit) must be 300-level or higher. Up to one 0.5 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department.

Total credits: 4.0

Physical and Environmental Geography Specialist (Science Program) - ASSPE2030

Physical and Environmental Geography offers science-based programs for students interested in an integrative approach to understanding the earth's biotic and abiotic systems, including their spatial dynamics and the ways they are altered by human action. The programs provide a foundation in the subfields of climatology, biogeography, hydrology, and geomorphology. Students gain practical experience in lab and field settings. Technical skills taught also include data analysis, geospatial analytical tools, including GIS and Remote Sensing.

Enrolment Requirements:

Enrolment in the Physical and Environmental Geography Specialist will be administratively suspended as of January 31, 2024 and students will no longer be able to enrol in the program. Students presently enrolled in the Specialist will be able to complete the program requirements as described below. Students who are not enrolled in this program but are interested in "Physical and Environmental Geography" programs are encouraged to consider the Environmental Geography and/or Human Geography Programs in the Department of Geography and Planning and are strongly recommended to consult with the Department of Geography and Planning for advising.

Completion Requirements:

Introductory courses: Any 6 half courses or the equivalent (3.0 credits) from JEG100H1, BIO120H1/ BIO130H1, CHM135H1, CHM136H1, PHY131H1/ PHY151H1, PHY132H1/ PHY152H1, MAT135H1, at least two of which must be Math or Physics half courses.

Core Courses: Any 4 courses (2.0 credits) from GGR201H1/ JEG201H1, GGR203H1, GGR205H1/ JEG205H1, GGR206H1/ JEG206H1, up to one half course from Group H.

Regional Geography Courses: Any course (0.5 credit) from GGR240H1, GGR246H1, GGR254H1, GGR308H1/ JEG308H1, GGR341H1, GGR342H1, GGR343H1, GGR344H1

Methods Courses: All (2.0 credits) of GGR270H1, GGR272H1, GGR337H1, GGR390H1

Applications: Any 7 courses (3.5 credits) from the Following:

- Hydrology/GIS/Remote Sensing: GGR273H1, GGR274H1, GGR315H1/ GGR337H1, GGR373H1, GGR375H1, GGR386H1, GGR413H1, GGR414H1/ GGR415H1, GGR462H1, GGR472H1
- Climatology/Energy/Resources: GGR314H1, GGR334H1, GGR347H1, GGR348H1, GGR416H1
- Geomorphology: GGR301H1/ JEG301H1, GGR406H1/ JEG406H1, ESS241H1, ESS331H1
- Biogeography: GGR305H1/ JEG305H1, GGR308H1/ JEG308H1, ESS361H1, ESS363H1, ESS461H1, ESS462H1
-

No more than one from GGR273H1, GGR373H1. Up to 1.0 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department. Any GGR course from the list for Core Courses and Fourth Year Courses not already used. Up to 1.5 credits from Group I. No more than one of GGR273H1, GGR373H1.

Fourth Year Courses: Any 2 courses (1.0 credit) from GGR401H1, GGR406H1/ JEG406H1, GGR413H1, GGR415H1, GGR491Y1, GGR498H1, and 400-level courses in Group I. The total number of half courses from Group I (including 300-level courses) must not exceed 3 (1.5 credits). Up to one 0.5 credit can be used from GGR493Y1, based on suitability of placement for this program, and approved by department.

Total credits: 12.0

Group H:
CHM217H1, CHM310H1, ESS224H1, ESS261H1

Group I:
EEB319H1, EEB321H1, EEB324H1, EEB328H1, EEB428H1, ENV346H1, ESS262H1, ESS311H1, ESS361H1, ESS363H1, ESS461H1, ESS464H1, FOR301H1, FOR305H1, FOR306H1, FOR417H1, JEE337H1, PHY392H1, PHY408H1

Geographic Information Systems Minor (Arts Program) - ASMIN0305

The GIS program covers the on theoretical, technical and applied foundations for geographic information systems. Students learn methods for spatial data production, analysis and presentation using computer cartography, spatial analysis, remote sensing, and geovisualization. Problem solving and project design are emphasized in upper level courses, as students apply techniques to answer specific geographic questions. The GIS program is structured to provide a stand-alone minor for students in

Geography and other disciplines seeking complementary skills in spatial analysis (e.g., field biology, archaeology).

Note: Students combining this program with a Specialist/Major sponsored by the Department of Geography will normally be allowed to count only 1.5 (of the 4.0) credits towards both programs.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

First Year Geography Courses: Any 2 courses (1.0 credit) from JEG100H1, GGR101H1, GGR107H1, GGR112H1, GGR124H1, GGR172H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1. 200/300-level GGR courses may also be used to meet this requirement. Contact the Undergraduate Administrator to update your program.

Methods & Core Courses: All (2.0 credits) of GGR270H1, GGR272H1, GGR273H1, GGR373H1

Applications: Any 2 courses (1.0 credit) from GGR225H1, GGR274H1, GGR315H1, GGR337H1, GGR372H1, GGR375H1, GGR376H1, GGR377H1, GGR386H1, GGR413H1, GGR414H1, GGR415H1, GGR462H1, GGR472H1, GGR473H1. Up to 0.5 credit can be used from GGR493Y1, based on suitability of placement for this program, and approval by department. Up to 0.5 credit from GGR491Y1, GGR492H1, GGR497H1, GGR498H1, and GGR499H1 based on suitability of research topic for this program, and approval by department.

Note: At least 1.0 credit must be 300/400-level courses

Environment and Energy Minor (Science Program) - ASMIN1552

Environment and Energy (Science Program) Joint Program with the School of the Environment

Jointly sponsored by the School of the Environment and the Department of Geography, this interdisciplinary program addresses the scientific, technological, environmental and policy aspects of energy use and supply, with a focus on the reduction of environmental impacts.

Note that the four full course equivalents that constitute the Minor Program are those listed below under Higher Years. For more information, please e-mail the School of

the Environment's Undergraduate Administrator at ug.office.env@utoronto.ca.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

1. ENV221H1, ENV222H1/ GGR223H1 (1.0 credit)
2. ENV346H1, ENV350H1 (1.0 credit)
3. Any two of: GGR332H1/ ENV462H1, GGR310H1/ FOR310H1, GGR314H1, GGR347H1, GGR348H1 (1.0 credit)
4. Any two of: CHM210H1, CHM310H1, CHM415H1, ENV237H1/ ENV238H1, ENV450H1, FOR310H1*/ GGR310H1*, FOR410H1, GGR203H1, GGR314H1*, GGR347H1*, GGR348H1*, HPS313H1, PHY231H1, PHY250H1 (* if not taken for the requirement immediately above) (1.0 credit)

*Note: The following courses are recommended preparation for students in first year. They are **not** completion requirements for the Environment and Energy Minor: 1.0 credit from (MAT135H1 and MAT136H1)/ MAT137Y1, and 1.0 credit from CHM135H1, CHM136H1, CHM151Y1, PHY131H1, PHY132H1, PHY151H1, PHY152H1*

Urban Studies Major (Arts Program) - ASMAJ2207

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

For students with 4.0 to 8.5 credits:

2.0 credits from two of the following groups:

- 1.0 credit in Economics: ECO101H1, ECO102H1, ECO105Y1
- 1.0 credit in Geography: GGR107H1, GGR112H1, GGR124H1
- 1.0 credit in Political Science: POL101H1, POL106H1, POL107H1, POL109H1
- 1.0 credit in Sociology: SOC100H1, SOC150H1
- 1.0 credit in Architectural/Visual Studies: JAV120H1, JAV151H1, JAV152H1, ARC181H1

For students with 9.0 or more credits:

URB235H1 (formerly INI235H1) and URB236H1 (formerly INI236H1), and:

2.0 credits from two of the following groups:

- 1.0 credit in Economics: ECO101H1, ECO102H1, ECO105Y1
- 1.0 credit in Geography: GGR107H1, GGR112H1, GGR124H1
- 1.0 credit in Political Science: POL101H1, POL106H1, POL107H1, POL109H1
- 1.0 credit in Sociology: SOC100H1, SOC150H1
- 1.0 credit in Architectural/Visual Studies: JAV120H1, JAV151H1, JAV152H1, ARC181H1

To ensure that students admitted to the program will be successful, applicants with a combined grade average lower than 70% in the required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Students are invited to inquire with the program office about possible appropriate substitutions for the courses above.

Completion Requirements:

(7.0 credits including at least 2.0 credits at the 300+ level, 0.5 of which must be at the 400-level)

First Year:

1. Two of the following selections:

- 1.0 credit from the following First year Economics courses: ECO101H1, ECO102H1, ECO105Y1;
- 1.0 credit from the following First year Geography courses: GGR107H1, GGR112H1, and GGR124H1;
- 1.0 credit from the following First year Political Science courses: POL101H1 (formerly POL101Y1), POL106H1, POL107H1, POL109H1;
- 1.0 credit from the following First year Sociology courses: SOC100H1, SOC150H1

- 1.0 credit from the following First year Architectural/Visual Studies courses: JAV120H1, JAV151H1, JAV152H1, ARC181H1

Higher Years:

2. URB235H1 and URB236H1

3. 1.5 credits in URB or JGU courses at the 300-level or above, including at least 0.5 credit at the 400-level.

4. 2.5 credits in at least two of the following groups, including at least 0.5 credit at the 300-level or above

Urban Studies:

Any URB or JGU courses not already taken to fulfill requirement 3.

Economics:

Note: Effective Fall 2021, courses associated with Innis College's Urban Studies program will have the new "URB" designator. Joint JGI courses will also see their designator changed to "JGU."

Geography and Planning Courses

JEG100H1 - Introduction to Physical Geography and Earth Science

Hours: 24L/12P

This introduction to Physical Geography and Earth Sciences examines the atmosphere, lithosphere, hydrosphere, cryosphere and biosphere, emphasizing processes, flows of energy and materials, and the interconnectedness of these Earth systems. Specific topics include weather and climate, earth materials, geological and geomorphic processes involved in the genesis of landforms, river systems, glaciers, soils, and biomes.

Exclusion: GGR100H1, ESS102H1, EESA06H3

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR101H1 - Histories of Environmental Change

Hours: 24L

This course will investigate geological, biological and archaeological evidence of environmental change. We will examine the processes that have driven and will drive environmental change and how past societies have shaped and responded to these changes. The emphasis is on the current interglacial period, or Holocene, and how shifts in population and technologies have affected human-environment interactions. As language of the Holocene gives way, for many, to that the Anthropocene,

Regarding Geography and Planning Courses

Prerequisites

Recommended Preparation: The course will be taught in a manner that assumes students have achieved the level of study (e.g., third year standing) and completed courses listed (or equivalent background).

Prerequisites: These are strictly monitored requirements. In some cases, prerequisites may be waived if equivalent background exists. Please consult the Associate Chair, Undergraduate or the course instructor.

the implications of environmental change for present and future human societies will be our concluding concern.

Breadth Requirements: Living Things and Their Environment (4)

GGR107H1 - Environment, Food and People

Hours: 24L/12T

Examines the relations between food, nature, and society. Food is fundamental to human existence, and central to most cultures; it also has significant and widespread effects on the physical and social environments. Food is used as a lens to explore human-environment interactions locally and globally. Serves as an introduction to environmental and human geography.

Breadth Requirements: Society and its Institutions (3)

GGR112H1 - Geopolitics, Globalization, and Inequality

Hours: 24L/8T

This course is an introduction to key approaches and concepts in political, cultural, and economic geography. Our focus will be on pressing contemporary phenomena with deep historical roots, including border initiatives, colonialism and development, globalization and global health, migration, and diplomacy and militarization. Without aiming for a comprehensive approach, examples will be diverse and drawn from around the planet.

Breadth Requirements: Society and its Institutions (3)

GGR124H1 - Cities and Urban Life

Hours: 24L/6T

Offers an introduction to North American cities and urbanization in a global context. It explores social, cultural, political and economic forces, processes, and events that shape contemporary urbanism. The course adopts the lens of 'fixity' and 'flow' to examine how the movement of people, ideas, goods, and capital, as well as their containment in the infrastructure and space of the city, give rise to particular urban forms.

Exclusion: GGR207H5

Breadth Requirements: Society and its Institutions (3)

GGR172H1 - Digital Earth

Hours: 24L/12T

This course examines the changing role of geographic information and maps in society. It considers how spatial information is produced, organized, and used in different historical, cultural, and political contexts. Topics examined include: the effects of the shift from print to digital mapping; implications of mobile spatial technologies and the geoweb; open source and open access; production and control of spatial data and information; and alternative cartographies. Introduces concepts of Geospatial Literacy, Critical Mapping and Critical GIS.

Exclusion: GGR225H1

Breadth Requirements: Society and its Institutions (3)

GGR196H1 - The Yard: Micro-Geographies of Household Outdoor Spaces

Hours: 24S

A "yard" is the area of land immediately adjacent to a building, often a residence. By examining micro-geographies (that is, detailed empirical studies of a small, specific locale) of these ubiquitous, everyday spaces, the course explores how yards are intimately connected with broader ecologies, cultures, and social relations, all of which can be explored using geographic theories and techniques.

The course also serves as an introduction to other subjects that are relevant to navigating post-secondary life, such as: critical reading; conducting university-level research; presenting and communicating ideas in the classroom; teamwork, and how to benefit from it; and developing social networks.

Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

GGR197H1 - Re(story)ing the Earth: Indigenous Wisdoms, Ecological Stewardship, and Global Climate Action

Hours: 24S

In current times of ecological precarity, marked by climate change, ecological degradation and mass species extinction, the task of ecological restoration has become an urgent, perhaps the most urgent challenge for humanity. At its core, this task is fundamentally about re-story-ing human relationships with the more-than-human world. It is about changing the story of who we are as humans and how we relate to and belong to the rest of the world. For this, we would do well to turn to Indigenous cultures around the world for guidance. Indigenous Peoples around the world have often maintained relationships of care, respect and reciprocity with the natural world and offer pathways healing ecologies (and us in the process). The course will draw from Indigenous worldviews, ontologies, activism, and environmental justice movements from around the world to question top-down, market-oriented, technocentric solutions to climate change and ecological crisis; and will explore alternative ways of organizing our social and economic lives to address it. We will learn from Indigenous scholars, and from Indigenous Elders and community leaders from Canada and the global South, about ecological stewardship, efforts for decolonization and social transformation, and learn how to translate these lessons to everyday environmentalism that we can practice here and now. This learning will be facilitated by guest lectures, videos, and virtual visits with communities in different parts of the world. Action-oriented assignments will foster problem-solving and experiential learning. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

GGR198H1 - Mobility and Borders

Hours: 24S

This course examines the political geographies of transnational migration. It asks how spaces of migration and mobility are political, and how migration politics are tied to inequalities wrought through intersecting histories of race, class, and gender. It seeks to extend our understandings of migrants, borders, and mobility, and it explores the processes through which mobility is produced, delimited and structured. We will consider the transnational politics of migration, the militarization of

border zones, and the political spaces of migrant displacement, dispossession, and dislocation. The seminar readings focus on classical paradigms as well as emerging approaches in immigration studies. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

GGR199H1 - Global Racial Capitalism in the 21st Century

Hours: 24S

This course uses the tools of political economy, decolonial and anti-colonial theory, and critical approaches to the study of racism to explore how the construction of racial categories continues to be integral to the working of capitalist systems. We will explore the reasons why capitalism was never meant to work for everyone by examining how and why racial categories have continued to matter since capitalism's earliest formations. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

JEG201H1 - Geomorphology

Previous Course Number: GGR201H1

Hours: 24L/8P

This course introduces the principles of geomorphology, including the landforms and processes associated with water, wind, waves, and ice, as well as the human impacts on earth surface processes. Laboratory sessions occur irregularly during the semester to introduce assignments and provide support. A local field trip may be offered (transportation and entrance cost: approximately \$26).

Exclusion: GGR201H1, GGR201H5

Recommended Preparation: JEG100H1

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR203H1 - Introduction to Climatology

Hours: 36L

Introduction to the large scale processes responsible for determining global and regional climate and atmospheric circulation patterns, as well as the small scale processes responsible for determining the microclimates of specific environments.

Prerequisite: Physics SPH3U

Recommended Preparation: JEG100H1; MAT133Y1, MAT135H1, MAT136H1, MAT137Y1; PHY131H1, PHY132H1, PHY151H1, PHY152H1

Breadth Requirements: The Physical and Mathematical Universes (5)

JEG205H1 - Introduction to Soil Science

Previous Course Number: GGR205H1

Hours: 24L/4P

This course introduces the fundamentals of soil science, including the chemical, physical, and biological properties of soils as well as soil formation and development, the classification of soils, and the applications of soil science. A field trip may be offered (transportation cost: approximately \$26).

Exclusion: GGR205H1

Recommended Preparation: CHM136H1, CHM135H1, JEG100H1

Breadth Requirements: The Physical and Mathematical Universes (5)

JEG206H1 - Introduction to Hydrology

Previous Course Number: GGR206H1

Hours: 30L/4P

Introduction to the hydrologic cycle with emphasis on the physical processes, including precipitation, interception, evaporation, runoff, ground water and soil water. Basic hydrological models will be practiced. Potential field trip, cost: approximately \$21.

Exclusion: GGR206H1

Recommended Preparation: JEG100H1; MAT135H1

Breadth Requirements: The Physical and Mathematical Universes (5)

JGU216H1 - Globalization and Urban Change

Previous Course Number: JGI216H1

Hours: 24L

Focusing on the impacts that global flows of ideas, culture, people, goods, and capital have on cities throughout the globe, this course explores some of the factors that differentiate the experiences of globalization and urban change in cities at different moments in history and in various geographic locations.

Exclusion: JGI216H1

Recommended Preparation: GGR124H1

Breadth Requirements: Society and its Institutions (3)

GGR217H1 - Urban Landscapes and Planning

Hours: 24L/4T

Considers the role of planning in shaping the urban landscape through historical and contemporary examples that illustrate the interplay of modernist and post-modernist approaches to city building. Traces the origins, competing rationalities and lingering effects of planning in the production of urban space. Broaches possibilities for engaging planning critically to address challenges of social and environmental justice in cities today.

Exclusion: GGR361H1

Breadth Requirements: Society and its Institutions (3)

GGR221H1 - New Economic Spaces

Hours: 24L/4T

Provides an introduction to economic geography and economic geography theory from the 1970s on, illustrating the different ways that geographers have conceptualized the restructuring of resource industries, manufacturing and services. The crisis of Fordism and the rise of new production models will be given particular attention, along with the reorganization of finance, the rise of cultural industries and the globalization of commodity chains. New regimes of governance of the economy will also be considered.

Breadth Requirements: Society and its Institutions (3)

GGR223H1 - Environment, Society and Resources

Previous Course Number: GGR222H1

Hours: 24L/6T

Focuses on society-environment relations and different approaches to resource governance and management. This includes exploration of the spatial, social, and political economic origins and implications of humans' changing relations to nature. Drawing on debates from environmental governance and political ecology literatures, the course also investigates the ways that different actors and institutions have framed and sought solutions to environmental and resource challenges.

Breadth Requirements: Society and its Institutions (3)

URB234H1 - Cities in Popular Culture

Previous Course Number: INI234H1

Hours: 24L

By exploring different popular culture phenomena such as the emergence of hip-hop in the Bronx, Batman's Gotham, and Nollywood, this course works to examine the contributions of popular culture in shaping our understandings of cities (as well as providing different perspectives of the city and the urban experience than is generally captured in scholarly/academic literature). Popular culture becomes a vehicle by which we will explore different aspects of urban life and urban representation.

Prerequisite: Completion of 4.0 credits

Exclusion: INI234H1

Breadth Requirements: Society and its Institutions (3)

URB235H1 - A Multidisciplinary Introduction to Urban Studies I: Theoretical Foundations of City Building

Previous Course Number: INI235H1

Hours: 24L

Focuses on the theoretical foundations of urbanization, urban change, and city building, with particular attention on global urban growth, history of contemporary urbanization, urban planning, governance, built form, and economic development. These topics are explored through a multidisciplinary lens, with an emphasis on understanding urban transitions over time and their meaning for contemporary urban experience.

Prerequisite: Completion of 4.0 credits, including 1.0 credit from any of the following courses: ECO101H1, ECO102H1, ECO105Y1, GGR107H1, GGR112H1, GGR124H1, POL101H1, POL106H1, POL107H1, POL109H1, SOC100H1, SOC150H1, JAV120H1, JAV151H1, JAV152H1, ARC181H1

Exclusion: INI235H1, INI235Y1

Breadth Requirements: Society and its Institutions (3)

URB236H1 - A Multidisciplinary Introduction to Urban Studies II: Urban Challenges and Theoretical Application

Previous Course Number: INI236H1

Hours: 24L

Cities are centres of innovation and creative energy, but they also face significant and pressing challenges. This course explores various urban issues including inequality, eroding infrastructure, and concerns arising from globalization, while also examining the ways in which municipal governments and urban citizens are imagining and implementing potential solutions to these challenges.

Prerequisite: URB235H1

Exclusion: INI235Y1, INI236H1

Breadth Requirements: Society and its Institutions (3)

GGR240H1 - Geographies of Colonialism in North America

Hours: 24L/5T

This course considers the creation and consolidation of settler colonies in the region known to many as North America. With an eye to the colonial present, the course focuses on the period from the 15th century to the early 20th century. Cultural texts and place-specific cases are used to ground themes and processes that also bear on the wider field of historical geography, including narratives of discovery and possession; ecological imperialism and environmental transformation; the (re)settlement of land and colonial government; enslavement and industrialization; frontiers, borders, and resource extraction; and some of the Indigenous geographies that preceded, were transformed by and transformed, and exceeded the reach of colonial power. Potential field trip.

Breadth Requirements: Society and its Institutions (3)

GGR246H1 - Geography of Canada

Hours: 24L

Social and economic differences have been, and continue to be, a prominent feature of Canada's geography. In this course these differences are examined at a regional and local scale. The course adopts a thematic approach and considers issues such as historical development, urbanization, industrialization, immigration and population change, Canada's cultural mosaic and native issues. Emphasis will be placed on the evolution of social and economic policies and Canada's incorporation into a global economy.

Exclusion: GGR202H5

Recommended Preparation: GGR107H1, GGR124H1

Breadth Requirements: Society and its Institutions (3)

GGR251H1 - Geography of Innovation

Hours: 24L

Explores how new technologies and industries are generated and sustained, or failed to be. Focuses on the dynamics of leading technological sectors such as electronics, automobiles and biotechnology in their geographical and historical contexts. We critically scrutinise the iconic Silicon Valley along with other major innovative regions/nations, and investigate the key role of universities and finance in driving innovation and entrepreneurship.

Exclusion: GGR300H1 (2014-15)

Breadth Requirements: Society and its Institutions (3)

GGR252H1 - Marketing Geography

Hours: 24L/4T

Geography matters in the success of both public and private sector organizations. Using mostly retail examples contemporary location problems are addressed. The geographies of demand and supply are analyzed and trade area and site selection techniques are applied. The relevance of the planning context and utility of geovisualization techniques such as GIS are also briefly considered.

Exclusion: GGR252H5

Breadth Requirements: Society and its Institutions (3)

GGR254H1 - Geography USA

Hours: 24L

After a short historical overview of the making of America, this course focuses on contemporary issues in American society, economy, politics, race, regional distinctions and disparities, urban development.

Breadth Requirements: Society and its Institutions (3)

GGR259H1 - Urban Growth and Decline

Hours: 24L

The growth and decline of cities have been and continue to be preoccupations of scholars and practitioners alike. This course is an introduction to the causes and consequences of urban growth and decline at the neighbourhood, municipal, and regional levels. Special attention will be paid to North American cities, but others outside of that sphere will be discussed as well. Concepts

and topics will include a consideration of the following: rural to urban migration; industrialization and deindustrialization; urban renewal; suburbanization; austerity and neoliberalism; racial avoidance and discrimination; gentrification; and capital switching and uneven development.

Breadth Requirements: Society and its Institutions (3)

GGR270H1 - Introductory Analytical Methods

Hours: 24L/12T

Theory and practical application of elementary quantitative techniques in geography emphasizing descriptive, inferential and spatial statistical analysis, probability, and sampling.

Exclusion: ECO220Y1/ ECO227Y1/ EEB225H1/ GGR270Y1/ LIN305H1/ POL232H1/ PSY201H1/ SOC202H1/ STA220H1/ STA248H1/ STA261H1

Recommended Preparation: 0.5 credit in Geography

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR271H1 - Social Research Methods

Hours: 24L

Practical course on field methods designed to enable students to carry out their own research projects. Behavioural observation, interviewing, questionnaire design, sampling theory, content analysis of written and graphic material, data coding and focus groups.

Exclusion: SOC200H1/ SOC204H1/ CRI350H1/ ENV223H1

Breadth Requirements: Society and its Institutions (3)

GGR272H1 - Geographic Information and Mapping I

Hours: 24L/24P

Introduction to digital mapping and spatial analysis using geographic information systems (GIS). Students learn how to use GIS software to find, edit, analyze and map geographic data to create their own maps, analyze geographic problems and use techniques that can be applied to a variety of subject areas.

Exclusion: GGRB30H3, GGR278H5

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR273H1 - Geographic Information and Mapping II

Hours: 24L/24P

Builds on GGR272H1 by providing students with practical spatial analysis methods and the underlying theory needed to understand how to approach various geographic problems using geographic information system (GIS) software and a variety of data types and sources.

Prerequisite: GGR272H1

Exclusion: GGRB32H3

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR274H1 - Introductory Computation and Data Science for the Social Sciences

Hours: 24L/12T

Social scientists are increasingly working with big and complex datasets that contain spatial, group-level, and individual-level dimensions to answer questions about society. In this course, students will develop introductory programming knowledge and data acumen in order to create and run computer programs to explore where, when, and why social processes occur, drawing on theories from geography, linguistics, sociology, anthropology, economics, political science, and psychology. Instruction will focus on applying current data analysis libraries, communicating and translating data science methods to both researchers and the public, distinguishing causation from correlation and coincidence, and negotiating tradeoffs between different computational and statistical approaches.

Exclusion: CSC111H1, CSC148H1, STA130H1, STA238H1, STA248H1, STA261H1, EEB125H1

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

GGR299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities....> Not eligible for CR/NCR option.

JEG301H1 - Fluvial Geomorphology

Previous Course Number: GGR301H1
Hours: 24L/4P

Elements of drainage basin morphology and hydrology, classification of rivers, stream patterns and hydraulic geometry. Elements of open channel flow, sediment transport and the paleohydrology of river systems. River channel adjustments to environmental change, human impact and the management/design of river habitats. Exercises include experimentation in a laboratory flume. A field trip may be offered (at no cost). **Course usually offered every other year.**

Prerequisite: GGR201H1/ JEG201H1. Students who do not meet the prerequisite are encouraged to contact the instructor.

Exclusion: GGR301H1

Recommended Preparation: 9.0 credits including JEG100H1/ GGR100H1 and ECO220Y1/ ECO227Y1/ EEB225H1/ GGR270H1/ GGR270Y1/ LIN305H1/ POL222H1/ POL242Y1/ PSY201H1/ SOC202H1/ STA220H1/ STA248H1/ STA250H1/ STA261H1

Breadth Requirements: The Physical and Mathematical Universes (5)

JEG305H1 - Biogeography

Previous Course Number: GGR305H1
Hours: 24L

Biogeography aims to identify and explain patterns of plant and animal distributions through space and time. This course considers topics including ecological and evolutionary dynamics, dispersal, migration, plate tectonics, speciation, extinction, paleoenvironments, and island biogeography. We will examine terrestrial and marine biomes, the meaning of biodiversity, conservation challenges, and recent biogeographic changes associated with human activities.

Prerequisite: 9.0 credits

Exclusion: GGR305H1, GGR305H5

Recommended Preparation: JEG100H1 or (BIO120H1, BIO130H1)

Breadth Requirements: Living Things and Their Environment (4)

JEG308H1 - Canadian Arctic Environments

Previous Course Number: GGR308H1
Hours: 24L

This course explores the unique physical geography of Canada's Arctic regions by covering topics on climate, the cryosphere, hydrology, geomorphology, and ecosystems. Throughout the course, we will consider the impacts of climate change in communities, landscapes, and ecosystems in Arctic regions.

Prerequisite: 9.0 credits

Exclusion: GGR308H1

Recommended Preparation: JEG100H1

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR314H1 - Global Warming

Hours: 30L/6T

A comprehensive examination of the greenhouse warming problem, beginning with economic, carbon cycle, and climate model projections; impacts on and adaptive responses of agriculture, forests, fisheries, and water resources; options and policies to reduce greenhouse gas emissions.

Exclusion: GGR377H5

Recommended Preparation: Completion of a secondary/high school physics course will be beneficial. 8.0 credits including 1.0 credit from JEG100H1; MAT133Y1, MAT135H1, MAT136H1, MAT137Y1; PHY131H1, PHY132H1, PHY151H1, PHY152H1

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR315H1 - Environmental Remote Sensing

Previous Course Number: GGR337H1
Hours: 24L/24P

Principles of optical, active and passive microwave remote sensing; satellite orbit and sensor characteristics; image processing and analysis techniques and software; and environmental remote sensing applications.

Exclusion: GGR337H1, GGR337H5

Recommended Preparation: 8.0 credits, JEG100H1/ GGR100H1, GGR272H1

Breadth Requirements: The Physical and Mathematical Universes (5)

JUG320H1 - The Canadian Wilderness

Hours: 24L

The idea of wilderness permeates narratives of Canadian national identity, while policy-makers seek to manage and contain natural areas. This course compares and contrasts historical and contemporary wilderness narratives in literature, painting and film with policies in areas such as conservation, urban planning, land claims and tourism.

Recommended Preparation: 8.0 credits

Breadth Requirements: Thought, Belief and Behaviour (2)

GGR320H1 - Geographies of Transnationalism, Migration, and Gender

Hours: 24L

This course examines recent changes in global migration processes. Specifically, the course addresses the transnationalization and feminization of migrant populations and various segments of the global labor force. The coursework focuses on analyzing classical paradigms in migration studies, as well as emerging theoretical approaches to gender and migration. In addition, it traces the shifting empirical trends in gendered employment and mobility patterns. It uses in-depth case study material to query the frameworks employed in migration studies and to understand the grounded implications of gendered migration. It pays particular attention to the interventions made by feminist geographers in debates about work, migration, place, and space.

Recommended Preparation: 8.0 credits

Breadth Requirements: Society and its Institutions (3)

JGE321H1 - Multicultural Perspectives on Environmental Management

Hours: 24L

Diverse approaches to environmental issues in a variety of multicultural settings are introduced, compared and analyzed, using case studies. Perspectives on environmental management will be discussed as they emerge from contexts such as Latin America, Asia, or Africa.

Prerequisite: [ENV221H1](#)/ [ENV222H1](#)/ [GGR222H1](#)/ [GGR223H1](#)

Exclusion: [ENV321Y1](#)

Recommended Preparation: 8.0 credits

Breadth Requirements: Society and its Institutions (3)

JIG322H1 - Indigenous Worlds, Worldviews and the Environment

Hours: 24L

Explores the diverse ways of understanding and responding to the world that emerge from indigenous cultures around the world. Examines how indigenous ways of being and relating to their natural environment can help us understand and address the current environmental crisis. Using examples of indigenous activism from Canada and around the world, examines how colonial histories shape dispossession and marginalization and inform visions for the future. Topics include traditional ecological knowledge, place-based social movements, environmental concerns of indigenous peoples, bio-cultural restoration and decolonization of nature-human relations.

Prerequisite: 8.0 credits including one of [INS200H1](#), [INS201Y1](#)/ ([INS201H1](#), [INS202H1](#)), [INS250H1](#), [GGR107H1](#), [GGR124H1](#), [GGR240H1](#), [GGR246H1](#), [GGR254H1](#)

Breadth Requirements: Society and its Institutions (3)

GGR323H1 - Commons, Commoning and Nature

Previous Course Number: GGR387H1

Hours: 24L

This course examines the role of commons and commoning practices in rethinking how we share natural resources, nurture life-in-common and build more meaningful worlds. Topics covered include: the political and economic history of the commons and their erasure; social and environmental movements; geographies of commons governance; urban commons; more-than-human commons; and post-capitalist alternatives to address ecosystem emergencies. The course draws from Institutional and complexity theory; feminist decolonial theory; Indigenous philosophy; Black feminist thought; new materialism and posthumanism to understand the challenges and possibilities of reviving commons and commoning practices.

Prerequisite: 8.0 credits

Exclusion: [GGR387H1](#) (Special Topics in Environmental Geography: Commons, Commoning and Ecologies of Care in a Post-Covid World), offered in Winter 2021

Recommended Preparation: 1.0 credit in GGR, including

GGR223H1**Breadth Requirements:** Society and its Institutions (3)**GGR324H1 - Spatial Political Economy****Previous Course Number:** POL371H1**Hours:** 24L

This course aims to explore how economic agents act and interact in space and how this creates subdivisions within the global, national and regional political economy. In a largely conceptual and interdisciplinary manner, the course investigates the role of institutions in the relational economy and the spatial construction of the political economy. Institutions are viewed as formal or informal stabilizations of economic interaction. Questions which guide the analysis are related to how institutions are established, how they evolve, how they impact economic action, and how they are changed through political and economic action at different spatial scales. Through this, the course introduces a relational and spatial perspective to the analysis of economic action and institutions. This perspective is based on the assumption that economic action is situated in socio-institutional contexts, evolves along particular paths and, at the same time, remains fundamentally contingent. Topics to be discussed include the social construction of economic space, industrial organization and location, the establishment and maintenance of economic networks, as well as processes of firm formation, learning and knowledge creation.

Prerequisite: 8.0 credits**Exclusion:** POL371H1**Recommended Preparation:** One of ECO101H1, GGR112H1, GGR221H1, GGR251H1, GGR252H1**Breadth Requirements:** Society and its Institutions (3)**JUG325H1 - Landscapes of Violence in Canada****Hours:** 24L

This course examines how violence is enacted in Canada, at various scales, and across domestic, urban, national, and international landscapes. We will interrogate what is meant by violence; examine its colonial, racial and patriarchal dimensions; explore the impact on people and communities; and attend to forms of resistance and repair.

Recommended Preparation: CDN267H1, CDN268H1**Breadth Requirements:** Society and its Institutions (3)**GGR326H1 - Remaking the Global Economy****Hours:** 24L

Examines links between global economic integration and geographically uneven economic development. Focuses on debates and empirical studies on global production networks (GPNs), and associated issues such as offshoring, outsourcing, and upgrading. Blends analysis of both theory and practice of business firms and regional development. Seeks to develop an in-depth understanding of the key actors driving contemporary global economic transformation, within the 'transnational space' constituted and structured by transnational firms, state institutions, and ideologies.

Prerequisite: 8.0 credits**Exclusion:** GGR300H1 (Special Topics in Geography I: Remaking the Global Economy), offered in Winter 2014**Recommended Preparation:** GGR112H1/ GGR220H1/ GGR221H1/ GGR251H1, 1.0 credit in Geography (SOC SCI/BR=3) at the 200+ level**Breadth Requirements:** Society and its Institutions (3)**GGR327H1 - Geography and Gender****Hours:** 24L

Introduction to the work of feminist geographers. The course will explore the relationship between gender and space, emphasizing spatial cognition, architecture, and layout of the city.

Exclusion: GGR313H5**Recommended Preparation:** 8.0 credits including 1.0 credit in Geography (SOC SCI/BR=3)**Breadth Requirements:** Society and its Institutions (3)**GGR328H1 - Labour Geographies****Hours:** 24L

Explores changes in the nature of work and the structure and geography of labour markets. Topics will include globalization, lean production, flexibility and risk, industrial relations, workfare, the body at work, and gender and work.

Prerequisite: 8.0 credits including 1.0 credit in Geography (SOC SCI/BR=3)**Breadth Requirements:** Society and its Institutions (3)

GGR329H1 - The Global Food System

Hours: 24L

Explores the changing global geographies of food by tracing international movements of food through both mainstream and 'alternative' supply chains. The implications for sustainability, food security, community autonomy and health are investigated.

Exclusion: GGR287H5

Recommended Preparation: 8.0 credits including 1.0 credit in Geography (SOC SCI/BR=3). GGR107H1 recommended.

Breadth Requirements: Society and its Institutions (3)

JGE331H1 - Resource and Environmental Theory

Hours: 24L

Introduction to and critical evaluation of major ideas and conceptual traditions underpinning environmental and natural resource politics and regulation. Topics include: parks and protected areas, market-based environmental regulation, property rights and conservation, Malthusianism, and biodiversity conservation. Emphasis is placed on critical reading of primary texts.

Prerequisite: GGR100H1/ JEG100H1/ GGR107H1/ ENV221H1/ ENV222H1/ GGR222H1/ GGR223H1

Recommended Preparation: 8.0 credits

Breadth Requirements: Society and its Institutions (3)

GGR332H1 - Social Geographies of Climate Change

Previous Course Number: GGR387H1

Hours: 24L

Analyses the social and behavioural geographies of climate change, including: climate change communication (how we interpret and communicate climate science); climate change prevention strategies, from the macro to micro scale; and possibilities for climate change adaptation.

Exclusion: GGR387H1 (Special Topics in Environmental Geography: The Social Geographies of Climate Change), offered in Winter 2020

Recommended Preparation: 8.0 credits, GGR223H1, GGR271H1

Breadth Requirements: Society and its Institutions (3)

URB333H1 - Social Justice in the City

Previous Course Number: INI333H1

Hours: 24L

How do power and dominance consolidate in urban settings? How do individuals and communities contest this consolidation, and claim spaces and rights in the city? These questions will be taken up through a range of critical approaches, including Indigenous, critical race feminist, political economy, queer, and anarchist perspectives. Students will have the opportunity to carry out interview-based research on an issue of equality and social justice that matters to them.

Exclusion: INI333H1

Breadth Requirements: Society and its Institutions (3)

URB334H1 - Urban Field Course

Previous Course Number: INI334H1

Hours: 12S

Students will have the opportunity to travel to a destination city for a week-long examination of specific social, economic, physical, and/or environmental issues. The trip will include meetings with municipal representatives and other decision-makers (public and possibly private). The findings of the trip supplemented by bibliographic research and in-class discussion will form the basis of a major research essay. Each student is required to pay the cost of transportation and accommodation. Not eligible for CR/NCR option.

Prerequisite: URB235H1 and URB236H1

Exclusion: INI334H1

Breadth Requirements: Society and its Institutions (3)

GGR334H1 - Water Resource Management

Hours: 24L

Managing demand and supply; linkages between water quality and human health. Case studies from the industrial world and from developing countries, rural and urban. Implications of population growth and climate change for water resource management.

Exclusion: GGR288H5

Recommended Preparation: 8.0 credits including one of JEG100H1/ GGR100H1, GGR107H1, GGR223H1

Breadth Requirements: Society and its Institutions (3)

URB335H1 - City Challenges, City Opportunities in a 21st Century Toronto

Hours: 12L/12S

Over the last 50+ years, Toronto has become a national and international centre of economic activity, with a vibrant arts and culture scene and world-renowned research, educational, and health institutions. Additionally, the City has become one of the most culturally diverse cities in the world. That said, Toronto also struggles with deep inequalities along many different axes, an affordable housing crisis, underfunded infrastructure needs, and many other challenges. This course provides a window into how the leadership at the City of Toronto think and approach these and other issues as the City works to plan for the recovery from COVID-19.

Prerequisite: Completion of 9.0 credits

Exclusion: URB338H1 (Advanced Topics in Urban Studies I: City Challenges, City Opportunities in a 21st Century Toronto), offered in Fall 2021

Recommended Preparation: URB235H1, URB236H1, GGR124H1

Breadth Requirements: Society and its Institutions (3)

URB336H1 - Creative Cities

Previous Course Number: INI336H1

Hours: 24L

A prominent thesis in the fields of planning and economic geography is that the presence of creative occupations in a city correlates positively with the overall health of urban regions. This course will investigate the nature of this link from theoretical and empirical perspectives and examine its potential usefulness in a planning/policy context.

Exclusion: INI336H1, INI336Y1

Recommended Preparation: URB235H1/ URB236H1/ GGR124H1

Breadth Requirements: Society and its Institutions (3)

GGR336H1 - Urban Historical Geography of North America

Hours: 24L

This course explores the emergence and reproduction of class and racial social spaces, the development of new economic spaces, and the growing importance of the reform and planning movements. Emphasis is on metropolitan development between 1850 and 1950.

Recommended Preparation: 8.0 credits including one of GGR124H1, GGR241H1, GGR254H1

Breadth Requirements: Society and its Institutions (3)

URB337H1 - Housing and Homelessness

Previous Course Number: INI337H1

Hours: 24L

Toronto, like other global cities, is characterized by a stark dichotomy: upscale residential and commercial development transforms the landscape, even while increasing numbers of residents are forced to live on the streets, in encampments, in shelters, or crowded into unaffordable and substandard housing. This course will examine that paradox and activism that is trying to achieve the federal government's stated goal: "By 2030, everyone in Canada has a home that they can afford and that meets their needs". Through readings, discussions, guest presenters, and activities, we will trace the links between housing, homelessness, and urban politics; review policies and trends at the municipal, provincial/territorial and national levels; and connect with urban movements to contest displacement.

Exclusion: INI337H1

Recommended Preparation: GGR124H1/ (URB235H1, URB236H1)

Breadth Requirements: Society and its Institutions (3)

URB338H1 - Advanced Topics in Urban Studies I

Previous Course Number: INI338H1

Hours: 24L

This course will expose students to a range of contemporary theoretical, analytical, and policy oriented debates in Urban Studies. The emphasis will be on establishing a broad knowledge base in the multifaceted field of urban studies. The exact topics to be covered will fall broadly under the banner of urban socioeconomic change, and specific syllabi, year to year, will follow contemporary and emerging debates.

Breadth Requirements: Society and its Institutions (3)

GGR338H1 - Social Transformation and Environment in the Majority World

Hours: 24L

This course draws upon a number of geographical theories, debates and case studies to explore the

geographical implications of an increasingly interconnected global capitalist economy for interactions among the people and environments in places in the 'majority world'. Situated within the context of climate change this course examines the evolution of discourses of 'development' and their relationship to western (Anglo-American) racialized notions of progress and modernity.

Recommended Preparation: 8.0 credits including one of [GGR107H1](#), [GGR223H1](#)

Breadth Requirements: Society and its Institutions (3)

GGR339H1 - Urban Political Geographies

Hours: 24L

Investigates North American urban political geography, exploring conflicts over immigration, environment, gentrification, homelessness, labour market restructuring, 'race' and racism, urban sprawl, nature and environment, gender, sexuality, security, and segregation. Explores competing visions of city life and claims on urban space. The course investigates how these struggles connect to economic, social and environmental politics at larger spatial scales, and considers different theoretical frameworks that geographers have developed to make sense of both the persistence of old problems and the emergence of new ones. Potential field trip, cost: approximately \$21.

Exclusion: [GGR349H5](#)

Recommended Preparation: 8.0 credits including [GGR124H1](#), [GGR246H1](#)/ [GGR254H1](#)

Breadth Requirements: Society and its Institutions (3)

URB339H1 - Divided City / United City

Previous Course Number: INI339H1

Hours: 24L

Focus on the impact of increased economic inequality and economic polarization trends that are reshaping Canada's metropolitan areas, changing neighbourhoods, and affecting the lives of our diverse urban population. Using the Toronto area as an example, students explore the consequences of these trends and the implications for public policy.

Prerequisite: Completion of 8.0 credits

Exclusion: [INI339H1](#)

Breadth Requirements: Society and its Institutions (3)

GGR340H1 - Health Geography

Hours: 24L

An exploration of the aspects of health in which place or location matters. Particular attention will be paid to the role of environments (physical, social, etc.) in explaining differences in health between places, the structuring of health-related behaviour in place, and the development of health policy for places.

Prerequisite: [GGR270H1](#), or the combination of [STA220H1](#) and [HST250H1](#)

Recommended Preparation: 8.0 credits, including [GGR223H1](#)

Breadth Requirements: Society and its Institutions (3)

GGR341H1 - The Changing Geography of Latin America

Hours: 24L

Seeks to develop a general understanding of present-day Latin America by focusing on human-environment interactions, past and present. Case studies are used to understand the diversity of Latin American landscapes (physical and cultural), and how they are changing within the context of globalization.

Recommended Preparation: 8.0 credits including 1.0 in Geography (SOC SCI/BR=3)

Breadth Requirements: Society and its Institutions (3)

GGR342H1 - The Changing Geography of Southeast Asia

Hours: 24L

Examines changes in the social, political and economic geography of Southeast Asian countries. Examples drawn from Thailand, Singapore, Indonesia, Vietnam and the Philippines as these emerging newly industrialized countries enter the 21st century. Emphasis on political-economy, urbanization and environment since 1950.

Recommended Preparation: 8.0 credits including 1.0 credit in Geography (SOC SCI/BR=3)

Breadth Requirements: Society and its Institutions (3)

URB342H1 - Qualitative Research in Urban Studies

Previous Course Number: INI342H1

Hours: 24S

This course provides students an opportunity to craft and initiate an Urban Studies capstone research project. Students will gain knowledge, experience and insight in utilizing qualitative research methods including interviewing, focus groups, observational analysis and other techniques. Seminars and assignments focus on the application of qualitative methods to each student's selected urban research question.

Exclusion: INI342H1

Recommended Preparation: URB235H1

Breadth Requirements: Society and its Institutions (3)

GGR343H1 - The Changing Geography of China

Hours: 36L

The evolving social, political and economic landscape of China. Focus on development strategies and their effects on agriculture, industry, urbanization, city planning and the environment since 1949. Special attention paid to the interconnected development trajectories shaping urban and rural areas, together with the complex interactions between the built and social environments.

Prerequisite: 8.0 credits

Recommended Preparation: 1.0 credit in Geography (SOC SCI/BR=3)

Breadth Requirements: Society and its Institutions (3)

GGR344H1 - Institutions and Governance: Germany in Comparative Perspective

Previous Course Number: POL372H1

Hours: 24L

The goal of this course is to explore the structure and geography of the German political economy in the context of economic globalization by systematically comparing institutional conditions with those in other countries. This perspective enables us to identify different capitalist systems and characterize Germany as a more socially balanced economic governance model compared with market-liberal systems in the US, UK and Canada. Drawing on the varieties-of-capitalism and other approaches, the main themes in the course address the institutional conditions for development. In a comparative perspective, the course explores topics, such as the role of collective agents and collective bargaining, corporate governance and finance, inter-firm co-operation and regional networks, social security systems, and population structure and immigration. To better understand the current challenges to the German governance model, the institutional opportunities and limitations are investigated

under which different regional economies develop in unequal ways.

Prerequisite: 8.0 credits

Exclusion: POL372H1

Recommended Preparation: 1.0 GGR or POL credit

Breadth Requirements: Society and its Institutions (3)

JGU346H1 - The Urban Planning Process

Previous Course Number: JGI346H1

Hours: 24L

Overview of how planning tools and practice shape the built form of cities. This course introduces twentieth century physical planning within its historical, social, legal, and political contexts. Community and urban design issues are addressed at local and regional scales and in both central cities and suburbs. The focus is on Toronto and the Canadian experience, with comparative examples from other countries, primarily the United States. Transportation costs: \$20.

Exclusion: JGI346H1, GGR361H5

Recommended Preparation: 8.0 credits including GGR124H1, URB235H1, URB236H1

Breadth Requirements: Society and its Institutions (3)

GGR347H1 - Energy Efficiency and Beyond

Previous Course Number: JGE347H1

Hours: 24L/6T

Examines the options available for dramatically reducing our use of primary energy with no reduction in meaningful energy services, through more efficient use of energy at the scale of energy-using devices and of entire energy systems. Topics covered include energy use in buildings, transportation, industry, and agriculture. **Offered alternate years from GGR348H1.**

Prerequisite: Physics SPH3U

Exclusion: GGR333H1, JGE347H1

Recommended Preparation: 8.0 credits including first year Math and/or Physics

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR348H1 - Carbon-Free Energy Systems

Previous Course Number: JGE348H1

Hours: 24L/6T

Examines the options available for providing energy from carbon-free energy sources: solar, wind, biomass, nuclear, and fossil fuels with capture and sequestration of CO₂. The hydrogen economy is also discussed. **Offered alternate years from GGR347H1.**

Prerequisite: Physics SPH3U

Exclusion: GGR333H1, JGE348H1

Recommended Preparation: 8.0 credits including first year Math and/or Physics

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR349H1 - Managing Urban Natures

Hours: 24L

Recent calls to action by the Intergovernmental Panel on Climate Change and the World Wildlife Fund indicate we are at a crossroads in responding to accelerating global warming and biodiversity loss. Cities are often at the forefront of these transformations, both in feeling their effects but also initiating responses. How might we reimagine our cities in a way that promotes thriving and equitable ecosystems? What tools exist in the policy landscape to initiate needed changes? What innovative responses are emerging to confront the challenges of increased flooding, rising temperatures, habitat fragmentation, and food insecurity? How might we reimagine an urban commons? With a primary focus on Canadian cities, in this course we explore the ways divergent conceptualizations of urban-nature have informed policies and practices drawing largely from critical, political ecology, and Indigenous perspectives; the policy landscape that informs current urban planning; and new and innovative approaches that help us to reshape and reimagine our relationships to urban nature, including initiatives led by municipalities, non-government organizations and citizens groups.

Prerequisite: 8.0 credits

Exclusion: GGR300H1 (Topics: Managing Urban Natures), offered in Fall 2017

Recommended Preparation: GGR223H1

Breadth Requirements: Society and its Institutions (3)

GGR353H1 - Planning for Local and Regional Economic Development

Hours: 24L

Years of post-War socioeconomic convergence notwithstanding, scholars and policymakers at all spatial scales have noted a relatively recent and alarming trend toward rapidly accelerating socioeconomic polarization. Rich nations are diverging from poorer ones on myriad metrics as are rich and poor localities. In response, social

scientists generally, and economic development planners in particular, have been attempting to understand what lies behind this trend and, more importantly, to conceive of methods of intervening in the market to produce more sustainable outcomes while also addressing the effects of spatially uneven development. This course will introduce students to the study and practice of planning for local and regional development, largely and the local and regional scales.

Prerequisite: 8.0 credits

Exclusion: GGR389H1 (*Planning for Community Economic Development*) offered in Fall 2024

Recommended Preparation: GGR124H1, GGR221H1, GGR270H1

Breadth Requirements: Society and its Institutions (3)

GGR354H1 - Infrastructure

Previous Course Number: GGR300H1 (20175)

Hours: 24L

Infrastructure is the term that describes the transportation systems, sewers, pipes, and power lines that provide urban dwellers with necessary public services. In recent years, billions of dollars of public money have been spent upgrading existing infrastructure, and planning and delivering new facilities. Infrastructure has many impacts on the way that people in cities live. The way that infrastructure systems are planned, financed, and distributed impact on environmental sustainability, job creation, social equity, economic development, and urban livability. Moreover, infrastructure has the potential to both serve existing populations, and shape the way that future communities are built. Through lectures, discussions, workshops, readings of scholarly articles and case studies, the course will aim to engage students in the key topics and debates related to the provision of urban infrastructure. Topics to be covered will include: project planning, causes and cures for cost overruns, funding models, financing mechanisms such as public-private partnerships, and the politics of facility planning and management.

Prerequisite: 8.0 credits

Exclusion: GGR300H1 (Topics: Infrastructure), offered in Summer 2017

Breadth Requirements: Society and its Institutions (3)

GGR357H1 - Housing and Community Development

Hours: 24L

Focuses on the importance of adequate housing and quality neighbourhoods. It roots theoretical explanations and policy debates in realities using Canada and Toronto

as examples. Topics covered include the evolution of public policies relating to social housing, rental housing, homeownership, neighborhoods, and homelessness.

Recommended Preparation: 8.0 credits including GGR124H1 and 1.0 credit in Geography (SOC SCI/BR=3)
Breadth Requirements: Society and its Institutions (3)

GGR359H1 - Comparative Urban Policy

Hours: 24L

This course considers urban public policy. Urban policy is not natural or inevitable response to urban problems. It is actively produced (and contested) by an array of voices, institutions, and social forces. Actualized urban policies are thus best understood and evaluated as products of these influences. The first half of the course will cover broad theoretical matters pertaining to the production of urban policy. The second half of the course will focus more intensively on one problem—urban decline—and explore the actualized approaches that have been brought to bear to manage it.

Prerequisite: 8.0 credits including 1.0 credit in Geography (SOC SCI/BR=3)
Breadth Requirements: Society and its Institutions (3)

GGR360H1 - Culture, History, and Landscape

Hours: 24L

The history of approaches to the idea of landscape. A consideration of the origins and uses of the term in geographical inquiry will be followed by a series of case studies, global in scope, from the Early Modern period to the present. Emphasis will be placed on the representational and lived aspects of landscapes, as well as struggles over their definition, interpretation, and use.

Recommended Preparation: 8.0 credits including 1.0 credit in Geography (HUM/BR=1 or SOC SCI/BR=3)
Breadth Requirements: Creative and Cultural Representations (1)

GGR363H1 - Critical Geographies: An Introduction to Radical Ideas on Space, Society and Culture

Hours: 36L

Introduces a diversity of critical perspectives for geographers and others, including anarchism, Marxism,

feminism, sexual politics, postcolonialism, anti-imperialism and anti-racism. In so doing it illustrates how such radical ideas about space, society and culture have contributed to our political thought and action.

Recommended Preparation: 8.0 credits including 1.0 credit in Geography (SOC SCI/BR=3)
Breadth Requirements: Society and its Institutions (3)

GGR372H1 - GIS for Public Health

Hours: 24L/12P

The goal of this course is to leave students with appreciation of the power of Geographic Information Systems (GIS) to explore and analyze spatial health and medical data. The course will focus on organizing health data in a GIS, clustering detection methods, and basic spatial statistics. Other topics like agent-based models and visualization techniques will be touched upon. Lab work will provide hands on experience with example data, leaving students with a firm grasp of contemporary health and medical problems and a skill set of spatial analytical methods that can be used to solve them.

Prerequisite: 8.0 credits including GGR272H1
Exclusion: GGR335H5
Recommended Preparation: GGR270H1, GGR273H1
Breadth Requirements: Society and its Institutions (3)

GGR373H1 - Advanced Geographic Information Systems

Hours: 24L/24P

Advanced theory, techniques, and applications in geographic information systems (GIS), including interpolation, geostatistics, modeling, and raster and vector analysis. GIS project design and implementation.

Prerequisite: 8.0 credits including GGR273H1
Breadth Requirements: The Physical and Mathematical Universes (5)

GGR374H1 - Urban Dynamics

Hours: 24L

This course will focus on the social and economic repercussions associated with the formation and evolution of polynuclear urban regions in response to global economic restructuring. Foci will include the importance of knowledge and innovation in the process of economic development, social and economic polarization at multiple spatial scales, planning interventions to address these

polarities, and strategies and tactics in the promotion of more sustainable urban-centred regional economies.

Recommended Preparation: 8.0 credits including 2.0 credits in Geography (SOC SCI/BR=3). A statistics course ([GGR270H1](#) or other) will be an asset.

Breadth Requirements: Society and its Institutions (3)

GGR375H1 - Introduction to Programming in GIS

Hours: 24L

This course will introduce students to the fundamentals of programming, followed by an applied focus on using these skills in geographic information systems. Students will learn how to programmatically edit spatial data, automate common processes, and conduct complex spatial analyses. The course will emphasize open-source software that enriches geospatial data analysis alongside the data processing and analytical capabilities of existing GIS software. Classroom time will be a mix of short lectures and laboratory exercises.

Prerequisite: 8.0 credits including [GGR272H1](#)/[GGR274H1](#)

Exclusion: [GGR386H1](#) (Special Topics in Geographic Information Systems: Programming in GIS), offered in Fall 2019 and Winter 2021

Recommended Preparation: One of [CSC108H1](#)/[GGR273H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR376H1 - Geovisualization

Hours: 24L

Visualizing geographic information forms an important step in aiding visual thinking, generating hypotheses, and communicating findings relating to places.

Geovisualization not only involves the display of spatial data through static maps, but also the process of creating 3D, dynamic, or interactive visualizations for data exploration, insights, and analysis. This course will introduce the foundations and capabilities of geovisualization for scientific communication, and students will learn techniques and tools to develop and critically appraise a range of geovisual outputs.

Prerequisite: 8.0 credits including [GGR272H1](#)/[GGR274H1](#)

Exclusion: [GGR386H1](#) (Special Topic: Geovisualization), offered in Fall 2022

Recommended Preparation: [GGR273H1](#)

Breadth Requirements: The Physical and Mathematical

Universes (5)

Course Experience: University-Based Experience

GGR377H1 - Introduction to Urban Data Analytics

Hours: 24L/12P

This course draws on census and economic data collection, processing, and analysis to teach written and visual storytelling about cities with data and maps, while exploring the uses of real-time data and analytics to solve urban problems. It provides a socio-economic and political context for the use of big data and the smart cities movement, focusing on data ethics and governance.

Prerequisite: 8.0 credits

Recommended Preparation: [GGR270H1](#)/[ECO220Y1](#)/[ECO227Y1](#)/[EEB225H1](#)/[GGR270Y1](#)/[LIN305H1](#)/[POL222H1](#)/[POL242Y1](#)/[PSY201H1](#)/[SOC202H1](#)/[STA220H1](#)/[STA248H1](#)/[STA250H1](#)/[STA261H1](#), [GGR272H1](#), [GGR274H1](#)

Breadth Requirements: Society and its Institutions (3)

GGR382H1 - Field Course in Human Geography

Introduction to field studies in human geography. The course includes exercises and a project during a one-week field study in late August or early September, some preparation during the preceding summer and complementary practical work and/or seminars during the Fall Term. Each student is required to pay the costs of their transportation and accommodation (field trip costs: \$600). Students must submit an application directly to the Department in the spring (see the [Geography website](#) for details in March). Course may be limited by size. Not eligible for CR/NCR option.

Prerequisite: Permission of instructor

Exclusion: [GGR389H5](#)

Recommended Preparation: 8.0 credits

Breadth Requirements: Society and its Institutions (3)

GGR385H1 - Special Topics in Geography

Previous Course Number: GGR300H1

Hours: 24L

Content in any given year varies by instructor. Students must meet the prerequisites set by the department (see the Geography website for details in May). The program in which this course can be used depends on its content.

GGR386H1 - Special Topics in Geographic Information Systems

Previous Course Number: GGR300H1
Hours: 24L

Content in any given year varies by instructor. Students must meet the prerequisites set by the department (see the Geography website for details in May). Can be used towards GIS, Human Geography, and Environmental Geography programs.

Prerequisite: GGR272H1

GGR387H1 - Special Topics in Environmental Geography

Previous Course Number: GGR300H1
Hours: 24L

Content in any given year varies by instructor. Students must meet the prerequisites set by the department (see the Geography website for details in May). Can be used towards Environmental Geography and Human Geography programs.

Breadth Requirements: Society and its Institutions (3)

GGR388H1 - Special Topics in Physical & Environmental Geography

Previous Course Number: GGR300H1
Hours: 24L

Content in any given year varies by instructor. Students must meet the prerequisites set by the department (see the Geography website for details in May). Can be used towards Physical & Environmental Geography and Environmental Geography programs.

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR389H1 - Special Topics in Human Geography

Previous Course Number: GGR300H1
Hours: 24L

Content in any given year varies by instructor. Students must meet the prerequisites set by the department (see

the Geography website for details in May). Can be used towards Human Geography programs.

Breadth Requirements: Society and its Institutions (3)

GGR390H1 - Field Methods

Introduction to field methods in geomorphology, vegetation mapping/analysis, soils, hydrology, and climatology. The course includes exercises and a group project during a one-week field camp, a little preparation during the preceding summer, and complementary practical work and/or seminars during the Fall Term. Each student is required to pay the costs of their transportation and accommodation (field trip costs: approximately \$495). This course meets the field requirement for Physical & Environmental Geography programs. The field camp normally runs for one week at the end of August. Students must submit an application directly to the Department in the spring (see the Geography website for details in March). Course may be limited by size. Not eligible for CR/NCR option.

Prerequisite: 1.0 credit from JEG100H1, GGR201H1, GGR203H1, GGR205H1, GGR206H1, GGR305H1, ENV234H1, or permission of the instructor

Recommended Preparation: 8.0 credits including GGR270H1

GGR398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

GGR398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

GGR399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

GGR399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

GGR400H1 - Special Topics in Geography I

Hours: 24S

Content in any given year depends on instructor. The program in which this course can be used depends on its context. Consult Departmental Office in April.

Prerequisite: 10.0 credits

Recommended Preparation: 2.0 GGR credits (HUM/BR=1 or SOC SCI/BR=3)

GGR401H1 - Special Topics in Geography II

Content in any given year depends on instructor. The program in which this course can be used depends on its context. Consult Departmental Office in April.

Prerequisite: 10.0 credits

Recommended Preparation: 2.0 credits (SCI/BR=4) in any of GGR/ESS/BIO/CHM/EEB/FOR

JEG406H1 - Geomorphology and the Anthropocene

Previous Course Number: GGR406H1

Hours: 12L/12S

In this seminar course, we will use lectures, readings, and classroom activities to investigate the ways in which Earth's surface has been impacted by humans while considering the role of geomorphology as a science for understanding these changes.

Prerequisite: [GGR201H1](#)/ [JEG201H1](#)

Exclusion: [GGR406H1](#)

Recommended Preparation: 9.0 credits, [GGR272H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR413H1 - Watershed Hydroecology

Hours: 24L

Modern developments in hydrology and ecology, including form and process models, interactions of hydrology, ecology and geomorphology; the course emphasizes the use of computer simulation models of drainage basin processes.

Prerequisite: 10.0 credits

Recommended Preparation: [GGR201H1](#), [GGR206H1](#), [GGR270H1](#), [GGR272H1](#) or [GGR337H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR415H1 - Advanced Remote Sensing

Previous Course Number: GGR414H1

Hours: 18L/8T/4P/2S

Building on [GGR315H1](#) (formerly [GGR337H1](#)) Environmental Remote Sensing with advanced theories and techniques for land cover mapping, vegetation biophysical and biochemical parameter retrievals, optical and thermal remote sensing of urban environment, and application of satellite remote sensing to terrestrial water and carbon cycle estimation. Basic radiative transfer theories as applied to vegetation will be given in some detail as the basis for various remote sensing applications. Optical instruments for measuring vegetation structural parameters will be demonstrated in the field.

Prerequisite: 10.0 credits including [GGR315H1](#)/[GGR337H1](#)

Exclusion: [GGR414H1](#)

Recommended Preparation: [GGR272H1](#), [GGR273H1](#), [GGR373H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR416H1 - Environmental Impact Assessment

Hours: 24L/4T

Environmental impact assessment (EIA) has emerged as a key component of environmental planning and management. EIAs are planning tools to predict and assess the potential costs and benefits of proposed projects, policies, and plans and avoid or mitigate the adverse impacts of these proposals. This course focuses on the origins, principles, scope, and purpose of EIA from theoretical and practical perspectives, emphasizing the Canadian context. We will also explore the various components of EIAs and critically evaluate techniques to assess, predict, and mitigate impacts. Through course

readings, in-class activities, and assignments, we will engage critiques of EIAs, particularly as they relate to considerations of climate change, sustainability, long-term monitoring, meaningful public engagement, indigenous people's rights, dispossession and resettlement, and environmental justice. Case studies will allow students to learn about current practices in EIA and develop skills to examine and improve EIA processes.

Prerequisite: 10.0 credits and 2.0 GGR credits including GGR270H1, GGR271H1

Recommended Preparation: One of GGR222H1/GGR223H1 or ENV236H1/JGE236H1

Breadth Requirements: Society and its Institutions (3)

GGR418H1 - Geographies of Extraction

Hours: 24S

Examines political aspects of the appropriation of natural resources, including policy and regulation, environmental impacts, and social justice. Emphasis is placed on reading contemporary literature on the politics of resource access and control from geography and other social science disciplines.

Prerequisite: 10.0 credits including GGR223H1

Breadth Requirements: Society and its Institutions (3)

GGR419H1 - Environmental Justice

Hours: 24S

Examines how environmental problems affect people, communities and societies differentially and how marginalized communities and people often bear the brunt of environmental costs, while contributing little to their creation. It uses readings and case studies from across the globe to address the production of environmental injustice and the struggle for environmental justice.

Prerequisite: 10.0 credits

Recommended Preparation: 1.0 credit in Geography (SOC SCI/BR=3)

Breadth Requirements: Society and its Institutions (3)

GGR421H1 - Histories of Geographical Thought

Hours: 24S

The history of geography as an intellectual subject, focusing primarily on the modern period, and on the genealogies of central concepts. Disciplinary developments will be situated next to broader contexts,

including imperialism and militarism, the relationship between culture and nature, and the shifting social role of the academy.

Prerequisite: 10.0 credits

Recommended Preparation: 2.0 credits in Geography (HUM/BR=1 or SOC SCI/BR=3)

Breadth Requirements: Society and its Institutions (3)

GGR424H1 - Transportation Geography and Planning

Previous Course Number: GGR324H1

Hours: 24L

Introductory overview of major issues in interurban and intraurban transportation at the local, national and international scale. Topics include urban transportation, land use patterns and the environment, causes of and cures for congestion, public transit, infrastructure finance, and transport planning and policy setting.

Prerequisite: 10.0 credits including one of GGR124H1/GGR217H1/GGR221H1

Exclusion: CITC18H3

Recommended Preparation: GGR270H1

Breadth Requirements: Society and its Institutions (3)

GGR429H1 - Innovation and Governance

Previous Course Number: POL408H1

Hours: 24S

The course focuses on a broad range of topics related to innovation and governance, such as (i) technological change and its social and economic consequences, (ii) the spatial effects which result from this, and (iii) the necessities for economic policies at different territorial levels. Since international competitiveness of industrialized economies cannot be based on cost advantages alone, future growth in the knowledge-based economy will be increasingly associated with capabilities related to creativity, knowledge generation and innovation. As a consequence, questions regarding the performance in innovation and effectiveness of policy support become decisive at the firm level, regional level and national level. The first part of the course deals with conceptual foundations of innovation processes, such as evolutionary and institutional views of innovation. In the second part, national configurations of innovation processes are investigated. The third part deals with innovation at the subnational level, focusing on regional clustering, institution building, multilevel governance, and regionalized innovation systems.

Prerequisite: 10.0 credits

Exclusion: POL408H1

Recommended Preparation: One of GGR221H1, GGR251H1, GGR324H1, GGR326H1, GGR328H1, GGR374H1

Breadth Requirements: Society and its Institutions (3)

GGR430H1 - Geographies of Markets

Hours: 36S

Focuses on actually-existing markets and their geographically-mediated formation and assemblage. Explores how markets are produced, stabilized, reshaped and fall apart at multiple geographic scales. We examine issues such as the debates on states versus markets, embeddedness of markets, neoliberalism and moral justification of markets, varieties of capitalism, regionally variegated capitalism, post-socialist market transitions, and the dynamic evolution of market institutions and economic landscapes.

Prerequisite: 10.0 credits including at least 1.0 credit in 300+ level Geography (SOC SCI/BR=3)

Exclusion: GGR400H1 (2013-14)

Recommended Preparation: GGR220H1/ GGR221H1, GGR326H1

Breadth Requirements: Society and its Institutions (3)

URB430H1 - Advanced Topics in Urban Studies II

Previous Course Number: INI430H1

Hours: 24L

This course is meant to be a senior complement to URB338H1 whereby important theoretical, analytical and/or policy debates are addressed in a research seminar format. Students in URB430H1 will be expected to extend, or refine research topics identified and explored in URB338H1 in a major independent research project. Students will present their proposals, their progress reports, and their final results to the instructor and the class.

Prerequisite: Completion of 9.0 credits, including URB235H1, URB236H1

Breadth Requirements: Society and its Institutions (3)

GGR431H1 - Regional Dynamics

Hours: 24L

Economic activity, and related indices of socioeconomic well-being and human capital, have always tended to

concentrate in space, leaving specific regions to be classified as “creative”, “developed”, or “core” regions and others as “have-not”, “less-developed”, “peripheral”, or “marginal” regions. As a result, regional economic change has been very difficult to fully explain (and certainly predict) using conventional (orthodox) theories and methods. This course examines the theoretical linkage between related trends in terms of globalization, vertical disintegration, specialization, innovation, and the locational behaviour of firms. We will focus on the seemingly counter-intuitive finding that regional economic change in a time of increasing global interdependence is increasingly dependent on the local context. Topics will include evolutionary economic geography, path dependence, economic clusters, learning regions, the role of institutions, knowledge spill-overs, and the geography of innovation, among others. We will see why the economic activity is becoming ever more concentrated in space even as it globalizes. The course makes extensive use of empirical case studies from around the globe.

Prerequisite: 10.0 credits including GGR221H1/ GGR251H1

Recommended Preparation: GGR326H1, GGR270H1. A statistics course (GGR270H1 or other) will be an asset.

Breadth Requirements: Society and its Institutions (3)

URB431Y1 - Special Topics in Urban Studies

Previous Course Number: INI431Y1

Special topics courses are offered periodically for senior students in the Urban Studies Program. Offerings in any given year will depend on program priorities, availability of specialized expertise and funding. Not eligible for CR/NCR option.

Recommended Preparation: URB235H1, URB236H1, completion of research design and research methods courses, 14.0 credits in an aligned social science program.

URB432H1 - Special Topics in Urban Studies

Previous Course Number: INI432H1

Special topics courses are offered periodically for senior students in the Urban Studies Program. Offerings in any given year will depend on program priorities, availability of specialized expertise and funding. Not eligible for CR/NCR option.

Recommended Preparation: URB235H1 and URB236H1, completion of research design and research

methods courses, 14.0 credits in an aligned social science program.

GGR432H1 - China in the Global Political Economy

Hours: 24S

Set against the backdrop of the rise of China, and following the perspective of geographic political economy, this seminar course examines the interactions between and mutual transformations of the Chinese economy and the global economy. We will focus on the evolving political and institutional foundations of China's post-Mao, hybrid, hierarchical market-authoritarian system. Key sectors – telecoms, Internet, semiconductor, and automobile – will be examined to understand the nuances of China's integration into the global production through state-directed uneven domestic development, and in turn the challenges raised by escalating international conflicts.

Prerequisite: 10.0 credits

Exclusion: GGR389H1 (Special Topic: China in the Global Political Economy), offered in Fall 2022

Recommended Preparation: 1.0 credit from GGR221H1, GGR251H1, GGR343H1, GGR324H1, GGR343H1, JPA331H1, ANT341H1

Breadth Requirements: Society and its Institutions (3)

URB433H1 - Special Topics in Urban Studies

Previous Course Number: INI433H1

Hours: 24S

Special topics courses are offered periodically for senior students in the Urban Studies Program. Offerings in any given year will depend on program priorities, availability of specialized expertise and funding. Not eligible for CR/NCR option.

Recommended Preparation: URB235H1 and URB236H1, completion of research design and research methods courses, 14.0 credits in an aligned social science program.

GGR433H1 - Built Environment and Health

Hours: 36S

Linking across fields that include public health, geography and planning, this course examines the growing evidence and ways in which human health is affected by the design and development of the built environment in which we live,

work and play. The course considers how various planning and development decisions impact population and individual health, particularly in relation to chronic diseases, injuries, and mental health. Potential of several local field trips (transportation costs: approximately \$20).

Prerequisite: 10.0 credits

Exclusion: GGR400H1 (Special Topics in Geography I: Built Environments & Health), offered in Winter 2013

Recommended Preparation: 1.0 credit in Geography (SOC SCI/BR=3)

Breadth Requirements: Society and its Institutions (3)

URB434Y1 - Independent Research in Urban Studies

Previous Course Number: INI434Y1

Designed to allow strong students in the Major and Specialist programs to extend a piece of urban research under the supervision of a faculty member from any aligned department. Choice of 'H' or 'Y' session pursuant to the scope of the research envisioned, the proposed supervisor's assessment of depth of the inquiry, and the approval of the program director. Proposals, including a letter from an agreeable supervisor should be submitted to the program director by June 1 for a Fall or Year session course and by November 1 for a Spring session course. Not eligible for CR/NCR option.

Prerequisite: Completion of 14.0 credits including URB235H1 and URB236H1

Exclusion: INI434Y1

GGR434H1 - Building Community Resilience

Hours: 36S

Examines concepts of resilience as a way of building the capacity of communities to (a) respond to predicted disruptions/shocks associated with climate change, global pandemics, anticipated disruptions in global food supply, energy insecurity, and environmental degradation; and (b) nurture the development of alternative spaces that support the emergence of more life-sustaining structures and practices. Includes explicit attention to equity and public health, and explores issues such as: participatory governance of social-ecological systems, the nature of social change, complexity science, the role of social movements, indigenous and political ecology perspectives.

Prerequisite: 10.0 credits

Exclusion: GGR400H1 (2011-12)

Recommended Preparation: 1.0 credit in Geography

Breadth Requirements: Society and its Institutions (3)

URB435H1 - Independent Research in Urban Studies

Previous Course Number: INI435H1

Designed to allow strong students in the Major and Specialist programs to extend a piece of urban research under the supervision of a faculty member from any aligned department. Choice of 'H' or 'Y' session pursuant to the scope of the research envisioned, the proposed supervisor's assessment of depth of the inquiry, and the approval of the program director. Proposals, including a letter from an agreeable supervisor should be submitted to the program director by June 1 for a Fall or Year session course and by November 1 for a Spring session course. Not eligible for CR/NCR option.

Prerequisite: Completion of 14.0 credits including URB235H1 and URB236H1

Exclusion: INI435H1

URB436H1 - Independent Research in Urban Studies

Previous Course Number: INI436H1

Designed to allow strong students in the Major and Specialist programs to extend a piece of urban research under the supervision of a faculty member from any aligned department. Choice of 'H' or 'Y' session pursuant to the scope of the research envisioned, the proposed supervisor's assessment of depth of the inquiry, and the approval of the program director. Proposals, including a letter from an agreeable supervisor should be submitted to the program director by June 1 for a Fall or Year session course and by November 1 for a Spring session course. Not eligible for CR/NCR option.

Prerequisite: Completion of 14.0 credits including URB235H1 and URB236H1

Exclusion: INI436H1

URB437Y1 - Urban Experiential Learning in Toronto & the GTA

Previous Course Number: INI437Y1

Hours: 72S

A method of studying city issues that combines readings, seminar discussions, and field trips with an 8 hour / week internship in the office of a municipal politician, local government, or non-profit organization. Readings focus on community development, urban planning, economic development and local governance. Students must fill out

a ballot for the course (available by contacting the Urban Studies Program Office) by June 1st. Enrolment in this course is competitive and at the discretion of the Urban Studies Director and/or course instructor.

Prerequisite: URB235H1, URB236H1. Priority is given to students enrolled in the Urban Studies Minor, Major, or Specialist Programs. However, consideration may be given to students with suitable course background as determined by the Program Director.

Exclusion: INI437Y1, INI306Y1

Breadth Requirements: Society and its Institutions (3)

GGR437H1 - Geographies of Waste

Hours: 36S

This seminar course examines how waste is made and how it circulates locally, regionally, and globally. It considers changing conceptions of 'waste' and the wider systems that have shaped efforts to manage waste through a selection of historic and contemporary geographies of waste. We will examine waste as a resource (e.g., recycling, composting) and waste avoided (e.g., reuse, repair). Through case studies, we will analyze waste – including urban wastewater – in relation to policy and planning, political economy, forms of labour and infrastructure, and the social norms and values that have shaped people's relationship to it.

Prerequisite: 10.0 credits

Recommended Preparation: 1.0 credit in Geography (SOC SCI/BR=3)

Breadth Requirements: Society and its Institutions (3)

GGR438H1 - Environment and Development

Hours: 36S

Examines the implications of development – as an economic and social project – for how the environment is used, by whom, and to what ends. Draws on literatures in political ecology and critical development geography. Topics include: interpretations of scarcity and degradation, questions of consumption, and the greening of development. Examines expansion of and struggles over new forms of green infrastructure in urban and rural settings.

Prerequisite: 10.0 credits

Recommended Preparation: 1.0 credit in Geography (SOC SCI/BR=3)

Breadth Requirements: Society and its Institutions (3)

URB438H1 - Advanced Urban Research Project

Previous Course Number: INI438H1

Hours: 24S

This course will allow students to investigate an urban topic of their choice in a guided seminar environment. This course will guide students through the various steps of the research process including: proposal writing and refinement, secondary research, primary data acquisition, analysis and the production of a senior research paper. The course emphasizes the connections between the design, implementation and write-up of an in-depth research paper. Not eligible for CR/NCR option.

Prerequisite: URB235H1 and URB236H1

Exclusion: INI438H1, INI438Y1

Recommended Preparation: URB342H1

Breadth Requirements: Society and its Institutions (3)

URB439H1 - Cities and Mega-events: Place-making, Contestation and Urban Citizenship

Previous Course Number: INI439H1

Hours: 24S

Mega-events, like the Olympics, give cities the opportunity to showcase themselves to the world, but the production of television-friendly urban images do much to obscure the processes, compromises and social consequences in host cities. These events are powerful tools for city branding. They are also potential opportunities for social movements and other groups and individuals to highlight their own sets of concerns. This course will explore the challenges and opportunities that cities face in hosting such events.

Prerequisite: Completion of 12.0 credits

Exclusion: INI439H1; INI430H1 (Advanced Topics in Urban Studies II: Cities and Mega-Events: Conflicts and Opportunity) offered in Winter 2014; INI332H1; INI432H1 (Special Topics in Urban Studies: Cities and Mega-Events), offered in Fall 2016

Breadth Requirements: Society and its Institutions (3)

JGC439H1 - The Problem and Promise of Caribbean Freedom

Hours: 24L

This course surveys the institutional and ideological structures that have historically internally and externally governed the Caribbean; the patterns of uneven

development and crisis they have produced and the forms of agency, resistance they have produced. Centering the social, economic, and spatial inter-connectedness of the Caribbean territorial region and its increasingly de-territorialized diaspora, we explore possibilities for economic, social and climate justice for all Caribbean communities.

Prerequisite: 10.0 credits

Exclusion: GGR400H1 (Special Topic: The Problem and Promise of Caribbean Freedom), offered in Winter 2023

Recommended Preparation: 1.0 credit in Geography (SOC SCI/BR = 3)

Breadth Requirements: Society and its Institutions (3)

JIG440H1 - Indigenous Geographies

Hours: 36S

This course draws on theoretical texts of Indigeneity, with a primary focus on Indigenous spaces in the Americas. Course participants will examine how core geographic concepts such as place, territory, land, movement and the scale of the body are sites of colonial dispossession and violence, as well as sites for decolonial and liberatory thought and practice. We will primarily engage with Indigenous-led scholarship within Geography and Indigenous Studies, and creative forms of knowledge production generated across Indigenous communities.

Prerequisite: 10.0 credits including one of INS200H1, INS201Y1/ (INS201H1, INS202H1), INS250H1, GGR107H1, GGR124H1, GGR240H1, GGR246H1, GGR254H1

Breadth Requirements: Society and its Institutions (3)

URB440H1 - The Changing Culture of Regent Park

Previous Course Number: URB430H1, INI430H1

Hours: 24L

This course is a collaboration with the organization Regent Park Focus Youth Media Arts Centre, a not-for-profit organization that was established to counter negative stereotypes about the Regent Park community. Together, University of Toronto students and Regent Park Focus youth members will learn about media projects initiated by young people across the world, and how these creative forms of communication, organizing, and expression spurred change and social movements in their respective communities. U of T students and Regent Park Focus youth will work together to create their own media project about the neighborhood.

Prerequisite: URB235H1, URB236H1, URB342H1 (or other qualitative research methods course); or permission

of instructor

Exclusion: [URB430H1](#) (*The Changing Culture of Regent Park*, offered in Fall 2022, Winter 2024), [INI430H1](#) (*Youth, Arts and Engagement in Cities*, offered in Winter 2019, Winter 2020)

Breadth Requirements: Society and its Institutions (3)

URB442H1 - Urban Studio: Public Participation in Policy Making

Previous Course Number: URB432H1, INI432H1

Hours: 24S

This course will provide a broad overview of the roles of both the citizen and the professional practitioner in advancing effective and meaningful public participation in the policy-making process, particularly as it relates to city planning. Through an examination of a mix of theoretical frameworks and case studies from Toronto and elsewhere, you will gain an understanding of the ways in which effective public participation can contribute to the maintenance of a healthy democratic society while also exploring some of the key challenges and opportunities faced by public participation practitioners today. The course has two key objectives: to give you a practical understanding of all of the elements of an effective public participation process, and to explore how public participation processes can be designed to be more inclusive and effective. In addition, students will be able to apply this knowledge towards the development of a project or report for a client.

Prerequisite: 9.0 credits

Exclusion: *Urban Studio: Public Participation in Policy Making* taken under [URB432H1](#) (offered in Fall 2022)/[INI432H1](#) (offered in Summer 2017, 2018, 2019, 2020, 2021)

Recommended Preparation: [URB235H1](#), [URB236H1](#), completion of 14.0 credits

Breadth Requirements: Society and its Institutions (3)

JGU454H1 - The Role of the Planner: Making a Difference

Previous Course Number: JGI454H1

Hours: 24L

Focuses on the role of a planning practitioner in contemporary society using a wealth of examples drawn from recent issues and debates in Canadian cities and regions. The course will walk students through the demands made of planners in terms of both technical expertise as well as political necessity and ask them to think actively about how to prepare for the extraordinary growth of cities during the next century. Examples of issues that will be discussed in some detail include the myths surrounding the city vs. the suburbs, the creativity

and passion involved in planning work and the need to see Toronto's future from a regional perspective.

Prerequisite: 14.5 credits, 5.0 of which must be GGR/URB

Exclusion: [JGI454H1](#)

Breadth Requirements: Society and its Institutions (3)

GGR456H1 - Entanglements of Power: Race, Sexuality and the City

Hours: 24S

This course investigates the city as a space sculpted by particular configurations and relations of power, and productive of those forms. It considers shifting urban geographies of identity, economy and desire with a focus on race and racism, settler colonialism, empire, the laboring body, sexuality, and sexual identity. Course participants will engage a series of case studies of particular urban spaces and struggles, drawing on conceptual support from scholarship in urban geography, anti-colonial thought, political economy, black studies, feminist and queer theory, Indigenous and settler colonial studies, as well as literature and other artistic work.

Prerequisite: 10.0 credits

Exclusion: [GGR400H1](#) (Special Topics in Geography I: Entanglements of Power: Race, Sexuality and the City), offered in Fall 2018

Recommended Preparation: 2.0 credits in GGR

Breadth Requirements: Society and its Institutions (3)

GGR458H1 - Selected Topics in Urban Geography

Hours: 24L

This course focuses on a special topic in urban geography and covers it with more depth than would otherwise be the case in a survey-oriented class. The aim is to utilize this single topic as a vehicle to understanding how urban geographical ideas are produced more widely. Check the department website for the theme (updated each year).

Prerequisite: 10.0 credits

Breadth Requirements: Society and its Institutions (3)

GGR460H1 - Global Cities, Urban Planning, Critical Theory

Previous Course Number: GGR400H1 (20181)

Hours: 36S

This seminar addresses the relationship between urbanization and global economic, political, cultural, social, demographic, technological and ecological dynamics. It does so with an emphasis on the contested legacies of city planning, urban design, architecture and urban political activism, by drawing on historical studies of global cities as well as critical-theoretical perspectives on the 'production of space'. While broaching the question what's 'production of space' got to do with social justice, we explore—with reference to pioneering thinkers in the fields of planning, architecture and critical theory—such concepts as radical planning, the urban revolution and the right to the city.

Prerequisite: 10.0 credits

Exclusion: GGR400H1 (Topics: Planning and Global Cities), offered in Winter 2018

Recommended Preparation: 1.0 credit in Geography (SOC SCI/BR=3)

Breadth Requirements: Society and its Institutions (3)

GGR462H1 - GIS Research Project

Hours: 24L

Students work in groups to develop their own research project and then acquire, organize and analyze geographic data to complete it. Emphasis is placed on research design, project management and the application of GIS concepts and skills learned in previous courses to a practical problem.

Prerequisite: 10.0 credits including GGR373H1

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR472H1 - Developing Web Maps

Hours: 24L

Explores the power of web mapping and CyberGIS, with a focus on hands-on learning and open source software. Students will learn about relevant software (exploring various APIs), data structures, methods, and cartographic and visualization techniques. Finally, students will work in groups to develop and deliver their own online web maps from scratch, on a topic of their choosing.

Prerequisite: 10.0 credits including GGR272H1 and one of GGR273H1 or GGR274H1

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR473H1 - Geospatial Big Data

Hours: 24L

Advances in sensing and mobile technologies have contributed to the increasing availability of large volume georeferenced data such as geo-tagged social media content, GPS traces, and crowdsourced maps. While geospatial big data provide a major source for innovation and analysis, challenges relating to data handling, processing, and interpretation have simultaneously arisen. In this course, students will build a critical understanding of the evolution, potential, and biases of geospatial big data. Knowledge of geo-computational techniques to handle geospatial big data and perform meaningful analysis will also be developed and applied.

Prerequisite: 10.0 credits including one of GGR272H1 or GGR274H1

Exclusion: GGR401H1 (Special Topic: *Geospatial Big Data*), offered in Fall 2022

Recommended Preparation: GGR273H1

Breadth Requirements: Society and its Institutions (3)

JGE481H1 - Field Course in Environmental Geography

Previous Course Number: GGR481H1

Introduction to field studies in environmental geography. The course may include individual assignments and group work. Field trips are concentrated during a one-week period in late August or early September. Some preparation during the preceding summer may be required. Periodic course meetings and shorter field trips continue, along with course work, during the Fall Term. Each student is required to pay the costs of their transportation and accommodation (field trip costs: \$107). Students must submit an application directly to the Department in the spring (see the Geography website for details in March). Course may be limited by size. Not eligible for CR/NCR option.

Prerequisite: 9.0 credits and permission of the instructor

Exclusion: GGR481H1

Recommended Preparation: 3.0 credits in Geography and/or School of the Environment (BR=3)

Breadth Requirements: Society and its Institutions (3)

GGR482H1 - Toronto Field Course

Examines the production of urban landscapes, built environments and social spaces in Toronto and surrounding areas through in-depth case studies. Coverage will vary some depending on instructor. The course consists of local field trips and in-class seminars and lectures. Students must submit an application directly to the Department in the spring (see the Geography website for details in March). Course may be limited by size. Not eligible for CR/NCR option. Field trip costs are normally low, but may go up to \$153.

Prerequisite: 10.0 credits

Recommended Preparation: 2.0 GGR credits

Breadth Requirements: Society and its Institutions (3)

GGR491Y1 - Research Project

Specially designed for students wishing to gain experience in conducting research in their area of specialization. Of particular value for geographers interested in graduate study, or positions in government, planning and consulting firms where research skills may be an asset. Students select a research problem and complete a project under the supervision of a faculty member. Enrolment requires written permission from a faculty supervisor and Associate Chair, Undergraduate; early discussion with a likely supervisor is encouraged. Enrolment may be completed at any time up to September; open to students in a Specialist or Major Program sponsored by the Department of Geography. Not eligible for CR/NCR option.

Prerequisite: 10.0 credits

GGR492H1 - Senior Practicum

Students design and implement an independent applied geography/planning project in consultation with an employer (paid or volunteer), who will act as their "client." Enrolment requires written permission from a staff supervisor and Associate Chair, Undergraduate. Only open to students who are enrolled in a Specialist or Major program sponsored by the Department of Geography. Not eligible for CR/NCR option.

GGR492Y1 - Senior Practicum

Students design and implement an independent applied geography/planning/GIS project in consultation with an employer (paid or volunteer), who will act as their "client." Enrolment required written permission from a staff supervisor and Associate Chair, Undergraduate. Only open to students who have completed 10.0 credits and who are enrolled in a Specialist, Major or GIS minor program sponsored by the Department of Geography. Not eligible for CR/NCR option.

GGR493Y1 - Geography Professional Experience

Undertake professional placement matching academic interests and career goals. Students meet regularly during the year in class to cover topics such as: reflective writing,

project management, career planning, and the application of academic skills in professional contexts. Research project required that connects a topic related to placement with academic literatures. Normally, one day per week spent at placement site. For students in their final year of a Geography major or specialist program of study, or the GIS Minor. Satisfies program requirements based on placement. Students must submit an application directly to the Department in the spring (see the [Geography website](#) for details in March). Course may be limited by size. Not eligible for CR/NCR option.

Prerequisite: 14.5 credits and an application

GGR496H1 - Independent Research

Independent research extension to one of the courses already completed in Geographic Information Systems. Enrolment requires written permission from a faculty supervisor and Associate Chair, Undergraduate. Only open to students who are in Year 3 or higher and who are enrolled in the GIS program sponsored by the Department of Geography. Not eligible for CR/NCR option.

Prerequisite: 10.0 credits

GGR497H1 - Independent Research

Independent research extension to one of the courses already completed in Environmental Geography. Enrolment requires written permission from a faculty supervisor and Associate Chair, Undergraduate. Only open to students who are in Year 3 or higher and who are enrolled in a Specialist or Major program sponsored by the Department of Geography. Not eligible for CR/NCR option.

Prerequisite: 10.0 credits

GGR498H1 - Independent Research

Independent research extension to one of the courses already completed in Physical Geography. Enrolment requires written permission from a faculty supervisor and Associate Chair, Undergraduate. Only open to students in Year 3 or higher and who are enrolled in a Specialist or Major program sponsored by the Department of Geography. Not eligible for CR/NCR option.

Prerequisite: 10.0 credits

GGR499H1 - Independent Research

Independent research extension to one of the courses already completed in a social science or humanities branch of Geography. Enrolment requires written permission from a faculty supervisor and Associate Chair, Undergraduate. Only open to students in Year 3 or higher who are enrolled in a Specialist or Major program sponsored by the Department of Geography. Not eligible for CR/NCR option.

Prerequisite: 10.0 credits

Associate Professors

M. Hager, DrPhil
 C. Lehleiter, MA, PhD
 S. Soldovieri, MA, PhD
 M. Stock, DrPhil

Associate Professor, Teaching Stream

E. Boran, MA, PhD

Introduction

German-speaking countries enjoy a long tradition at the cultural and political core of Europe. During the last two hundred years their importance has steadily increased, and with the recent developments in Eastern Europe their influence seems certain to expand even more.

The importance of the German language has grown correspondingly: it is the second foreign language after English in the countries of central and Eastern Europe, and its use is spreading within the European Community. Learning German opens the door to many fields of intellectual, technical and politico-economic endeavor. German scholars have been leaders in philosophy, the sciences, history, archaeology, sociology and political science. German literature is equally distinguished: writers like Goethe, Kafka, Rilke, Brecht, Mann, Wolf, Grass,

Jelinek, Özdamar, etc., have dealt with the widest possible range of human problems and concerns, and have been recognized worldwide.

The Department of Germanic Languages and Literatures offers courses on literature from the Middle Ages to the present, so that the student may acquire an overview of this significant element of German life and culture. We offer language courses from beginning and intermediate to advanced levels, with practice in reading, writing, comprehending and speaking German, as well as stylistics, linguistics, and the specialized vocabulary and concepts of business. Language and literature instruction is integrated as far as possible, with the aim of teaching students advanced critical literacy in German. The department offers a minor in Yiddish, with instruction offered from beginning and intermediate to advanced levels. German combines well with other modern languages and literatures, and double-majors are encouraged. Students in a variety of programs, such as Cinema Studies, European Studies, Literary Studies, Drama, Music and others, will benefit from courses in German language, literature and culture. The Department supports opportunities for students to study and work in Germany, by encouraging participation in programs established by the German government, by Canadian universities, and by our own Arts and Science Faculty's Study Abroad Program.

A knowledge of German is a virtual necessity for specialists in many disciplines; it is also very useful in certain career areas (e.g., the foreign service, interpretation and translation, librarianship, business and commerce, music, tourism, and of course teaching). The successful completion of a four-year program, including seven approved courses in German, may entitle the student to enter the M.A. or Ph.D. program in the Graduate Division of the Department.

Students entering with some previous knowledge of German are required to contact the department to write an initial assessment test (placement test) and will then be advised to take courses at the appropriate level. Please check the department's website at german.utoronto.ca for more information.

Information on studies in German Language and/or Literature can be obtained from the Associate Chair for Undergraduate Studies at german.undergrad@utoronto.ca.

Faculty of Arts & Science Language Citation

The Department of Germanic Languages and Literatures will no longer participate in the Faculty of Arts & Science's Language Citation initiative going forward. Students who complete one or more of the courses required for the Language Citation with the minimum required mark by the end of the Winter 2026 term will remain eligible for the citation going forward (students can find the requirements for the Language Citation published in the archived [2024-25 Arts & Science Academic Calendar](#), or contact the Undergraduate Administrator german.undergradadmin@utoronto.ca). Interested students are also encouraged to refer to the Department's German Language Certificate.

The study of German is a demanding and intellectually rewarding educational experience, providing students with excellent resources for understanding the culture of the German speaking world. German is now the second foreign language after English in the countries of central and Eastern Europe, and its use is spreading within the European Community. Learning German opens the door to many intellectual, technical, political, and economic fields. Successful study of German demonstrates intelligence, discipline, analytical sophistication, and an excellent memory. The study of any foreign language provides invaluable insights into the varieties of human culture and expression.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The German programs impacted by this policy: [ASSPE1400](#), [ASMAJ1400](#), and [ASMIN1400](#)

German Programs

German Studies Specialist (Arts Program) - ASSPE1400

Enrolment Requirements:

Enrolment in the German Studies Specialist program (ASSPE1400) will be administratively suspended as of January 15, 2025 and students will no longer be able to enrol in the program. Students presently enrolled in the Specialist will be able to complete the program requirements as described below. Students who are not enrolled in this program but are interested in

German Language and Literature programs are strongly recommended to consult with the Department of Germanic Languages and Literatures for advising.

Completion Requirements:

(10.0 credits)

1. [GER100Y1](#), [GER200Y1](#), [GER300Y1](#), [GER400H1](#)
2. [GER150H1](#) (to be taken as early as possible), [GER205H1](#) (should be taken together with [GER200Y1](#), must be taken prior to completing [GER300Y1](#)), [GER305H1](#)
3. At least 2.5 additional credits in GER courses on the 300-level
4. At least 1.0 additional credit in GER courses on the 400-level (except [GER401H1](#))
5. No more than 3.0 credits taught in English
6. Up to 2.0 credits in identified or preapproved cognate courses may count (i.e. courses offered by other departments containing a relevant Germanic component and a final paper on a Germanic topic); please inquire at the Department and get approved in advance.

Notes: (a) All specialists should schedule an appointment with the Undergraduate Coordinator for personalized counselling as early in their studies as possible; (b) students with prior German knowledge are required to contact the department to take a placement test; self-placement is not allowed; (c) Completion of [GER205H1](#) is a prerequisite for taking ANY 300-level literature courses taught in German; (d) completion of [GER305H1](#) is a prerequisite for taking ANY 400-level literature courses taught in German; (e) 300-level courses may be replaced by 400-level courses (inquire in advance); (f) [GER401H1](#) is not a program requirement, but recommended.

German Studies Major (Arts Program) - ASMAJ1400

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(7.0 credits)

1. [GER100Y1](#), [GER200Y1](#), [GER300Y1](#)
2. [GER150H1](#) (to be taken as early as possible), [GER205H1](#) (should be taken together with [GER200Y1](#), must be taken prior to completing [GER300Y1](#))
3. At least 2.5 additional credits in GER courses at the 300-level and 400-level (except [GER401H1](#))

4. No more than 2.0 credits taught in English
5. Up to 1.0 credit in identified or pre-approved cognate courses may count (i.e. courses offered by other departments containing a relevant Germanic component and a final paper on a Germanic topic); please inquire at the Department and get approved in advance.

Notes: (a) All majors should schedule an appointment with the Undergraduate Coordinator for personalized counselling as early in their studies as possible; (b) students with prior German knowledge are required to contact the department to take a placement test; self-placement is not allowed; (c) Completion of GER205H1 is a prerequisite for taking ANY 300-level literature courses taught in German; (d) GER400H1 is not a program requirement, but recommended.

Al and Malka Green Yiddish Program Minor (Arts Program) - ASMIN1163

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

1. (GER260Y1/ (GER261H1 and GER262H1) and GER360H1)/ GER463Y1
2. GER460H1/ GER462H1*
3. The remaining courses should be taken from: GER361H1, GER367H1, JGJ360H1, GER100Y1, GER150H1, or any course offered by and cross-listed by the Centre for Jewish Studies

*NOTE:

1. Students who took GER463Y1 cannot take GER260Y1/ GER261H1/ GER262H1 or GER360H1; students who took GER260Y1/ GER261H1/ GER262H1 or GER360H1 cannot take GER463Y1.
2. Students who took GER462H1 cannot take GER460H1.

Course Groups

Centre for Jewish Studies Courses:
CJS200H1, CJS201H1, CJS390H1, CJS498Y1, CJS499H1

Anthropology Courses:
ANT384H1, ANT426H1

Canadian Studies Courses:
CDN380H1

Diaspora and Transnational Studies Courses:
DTS200Y1, DTS300H1, DTS404H1

School of the Environment Courses:
ENV382H1

History Courses:
HIS208Y1, HIS242H1, HIS304H1, HIS317H1, HIS338H1, HIS339H1, HIS351Y1, HIS353Y1, HIS361H1, HIS442H1, HIS444H1, HIS451H1

Near and Middle Eastern Civilizations Courses:
NML155H1, NML156H1, HIS303H1, NML255H1, NML220Y1, NML256H1, NML350H1, NML355H1, NML356H1

Philosophy Courses:
PHL338H1, PHL362H1, PHL370H1, PHL410H1

Political Science Courses:
POL345Y1, POL430Y1, POL438H1, POL484H1, POL486H1

Religion Courses:
MHB155H1, MHB156H1, MHB255H1, MHB256H1, MHB355H1, MHB356H1, RLG100Y1, RLG202H1, RLG220H1, RLG241H1, RLG280Y1, RLG316H1, RLG322H1, RLG326H1, RLG336H1, RLG341H1, RLG342H1, RLG347H1, RLG389H1, RLG411H1, RLG418H1, RLG431H1, RLG452H1

Slavic Languages and Literatures Courses:
SLA202H1, SLA230H1, SLA495H1

Sociology Courses:
SOC201H1, SOC251H1

Business German Minor (Arts Program) - ASMIN2453

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 GER credits)

1. GER100Y1/ GER200Y1, OR proof of comparable German level
2. GER370H1 and GER372H1

3. 1.0 credit must be taken from [GER270H1](#)/ [GER272H1](#)/ [GER290H1](#)/ [GER391H1](#)

4. 1.0 additional GER or JGJ credit excluding [GER150H1](#), [GER194H1](#), [GER195H1](#), [GER197H1](#), [GER198H1](#), [GER199H1](#), [GER220H1](#), [GER251H1](#), [GER275H1](#), [GER354Y0](#), [JGJ360H1](#), [GER361H1](#), and [GER410H1](#). Cognate courses may be substituted with approval of the department.

Note: Students enrolled in the German Studies Specialist of Major Program may not simultaneously enroll for a Business German Minor Program.

German Studies Minor (Arts Program) - ASMIN1400

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

1. [GER100Y1](#), [GER200Y1](#), [GER300Y1](#)
2. 1.0 credit in courses with a GER designator, but cannot be [GER400H1](#) or [GER401H1](#).
3. No more than a 0.5 credit may be taken in English

Note: (a) Students registered for a German Specialist or Major may not simultaneously be registered for a German Minor program; (b) students with prior German knowledge are required to take a placement test and to see the adviser; (c) the exclusion of [GER400H1](#) and [GER401H1](#) does not apply if the student's entry level is post-[GER100Y1](#).

German Studies in English (Arts Program) - ASMIN1405

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Requirements:

1. The Minor Program requires 4.0 credits, of which 3.0 credits must be GER courses.
2. [GER150H1](#) is required.
3. A maximum of 1.0 credit in cognate courses is allowed (i.e. courses offered by other departments

containing a relevant Germanic component and a final paper on a Germanic topic); please inquire at the Department and get approved in advance.

For a list of courses taught in English, please check the German Department website.

Note: Students registered for a German Specialist or Major may not simultaneously be registered for a German Minor program.

Certificate in German Language - ASCER1402

The Certificate in German Language would formally recognize intermediate-level proficiency in German (as a minimum), broadening academic and professional opportunities for students across disciplines. German language skills directly benefit students in programs such as International Relations, Philosophy, History, Music, Political Science, and Sociology by enabling them to analyze primary sources, engage with case studies, and conduct research in German-speaking contexts. For students in the sciences, engineering or business programs, knowledge of German provides essential communicative skills and cross-cultural competencies, enhancing students' ability to collaborate effectively in diverse environments and expand their reach into German-speaking markets and communities worldwide.

Enrolment Requirements:

This is an open enrolment Certificate. A student who has completed 4.0 credits may enrol in the Certificate. This Certificate is not open to students enrolled in a Specialist, Major, or Minor in German.

Completion Requirements:

Total: 2.0 credits

2.0 GER credits taught in German

- Courses taught in English – [GER150H1](#) or [GER275H1](#), for instance – are not included for consideration in the Certificate.
- Courses taught at UTM or UTSC are not included for consideration.
- Courses taken in Summer Abroad programs will need to be pre-approved.
- No more than 1.0 transfer credits will be eligible for consideration in the Certificate
- Courses that have been taken as Credit/No Credit cannot be used to fulfill Certificate requirements.

For questions about the completion requirements, students can contact the department's Undergraduate Administrator at german.undergradadmin@utoronto.ca.

Certificate in Global German Studies (UofT Global Scholar) - ASCER1401

Enrolment Requirements:

This is an open enrolment Certificate. A student who has completed 4.0 credits may enrol in the Certificate.

Completion Requirements:

(Total: 2.0 credits)

- 1.0 credit in German language at any level, including GER100Y1, GER101H1, GER200Y1, GER201H1, GER272H1, GER300Y1, GER301H1, GER370H1, GER372H1, GER400H1.
 - Students with very advanced previous knowledge of German may in consultation with the Department take a combination of other 300 or 400-level GER topics courses (taught in German) to meet the requirement.
- GER290H1 'Global Issues / German Contexts'.

German Courses

GER100Y1 - Introduction to German

Hours: 96P

This is the language course to take if you have had no previous experience of the German language. The emphasis is on comprehension, speaking, reading, writing, vocabulary and basic grammar. This course can be counted towards all programs in German.

Note: Students with any previous knowledge of German are **REQUIRED** to take a placement test offered at the department.

Exclusion: Senior high school German or equivalent.
Note: Students with any previous knowledge of German are required to take a placement test offered at the department.
Breadth Requirements: Creative and Cultural Representations (1)

GER101H1 - Introduction to German b

Hours: 48P

- 0.5 credit in global experience. May take the form of an internship course, GER391H1 'iPRAKTIKUM Experiential Learning and Internationalization Internship'. Students may also complete a study abroad course in a German-speaking country, such as GER354Y0. International Course Modules (ICM) or the GER398H0 Research Excursion Program also fulfil the global experience requirement with the previous consent of the department.

Notes:

1. All students with previous knowledge of the German language, as well as students returning from extended stays in German-speaking countries, are **REQUIRED** to take a placement test offered at the Department.
2. The Department reserves the right to place students in the language course appropriate to their level of language skill.
3. More detailed course descriptions and reading lists for the various courses are available from the instructor.
4. Courses that indicate "(E)" in the title are taught in English.

This course is intended for students with some prior knowledge of German. It is equivalent to the Spring Term of GER100Y1. The emphasis is on comprehension, speaking, reading, writing, vocabulary and basic grammar.

Exclusion: Senior high school German or equivalent.
GER100Y1.

Breadth Requirements: Creative and Cultural Representations (1)

GER150H1 - Introduction to German Culture (E)

Hours: 24L/12T

This course taught in English is intended for students who are unfamiliar with German culture. It examines historical, political and cultural developments in Germany from about 1871 to the present focusing on literary and non-literary texts. (Note: This course is required for the major and specialist program; it should be taken within the first two years.)

Breadth Requirements: Creative and Cultural Representations (1)

GER194H1 - Our Vampires, Ourselves (E)

Hours: 24S

Vampires are among the most fascinating figures of popular culture. Since Bram Stoker's *Dracula* (1897) – and, in fact, well before that – they have been haunting the human imagination in various shapes and forms. This course examines the figure of the vampire as a potent cultural metaphor in the German context and beyond, showing how every age embraces the vampires it needs and gets the vampires it deserves. The goal is to teach students to reflect critically and independently on issues of self and society and to develop a structured approach to critical thinking in general. All readings and class discussions will be in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

GER195H1 - Cities, Real and Imagined (E)

Hours: 24S

Cities have been described as places of desire and places of fear. They pulse with life, bringing together people from different class, gender, and ethnic backgrounds, simultaneously giving rise to a sense of freedom and oppression, a sense of belonging and alienation. This course will explore the city as a physical reality that shapes our lives, but is also a projection of our deepest imaginings. Through readings of philosophical and sociological texts by influential theorists of the city, we will consider various ancient and modern conceptions of urban space and subjectivity. Alongside these theoretical readings, we will also examine literary and filmic representations of the city as a space of desire, memory and power. All readings and class discussions are in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

GER198H1 - Technology and the Human in German Literature and Thought (E)

Hours: 24S

Technology has changed our lives, and scientific knowledge has enhanced human capacities. At the same time, though, this development is also experienced as a threat. Killing missiles, controlling 'Big Brothers,' and

monstrous creatures are often considered the flip-side of technological advancement. This course asks: What is the relationship between technology and the "human"? Can there be progress of technology without a regress of humanity? Or is technology liberating us from the bonds of nature? We will discuss possible answers to these questions by looking at key texts in German literature, philosophy, and cultural history from the eighteenth century to Post-Modernity. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

GER200Y1 - Intermediate German 1

Hours: 96P

This course continues the work done in [GER100Y1](#) / [GER101H1](#). It further expands on basic grammar and vocabulary, practice in comprehension, composition, and conversation.

Prerequisite: [GER100Y1](#) / [GER101H1](#) or German placement test, Senior high school German or equivalent
Breadth Requirements: Creative and Cultural Representations (1)

GER201H1 - Intermediate German 1b

Hours: 48P

This course is equivalent to the Spring Term of [GER200Y1](#). It further expands on basic grammar and vocabulary, practice in comprehension, composition, and conversation. The Department reserves the right to place students in the appropriate language course on the 200- and 300 levels.

Prerequisite: German placement test
Exclusion: [GER200Y1](#)
Breadth Requirements: Creative and Cultural Representations (1)

GER205H1 - Masterpieces of German Literature 1

Hours: 36S

This course offers a transition from the language courses to the topic courses on the 300-level. It introduces students to German literature and provides them with working methods and analytical tools relevant for the study of German literary texts in the original German.

Note: This course is required for the major program. It should be taken as early as possible, and cannot be taken after completion of GER300Y1 or GER301H1. This course is the prerequisite course for 300-level topic courses in German.

Prerequisite: GER100Y1

Corequisite: GER200Y1

Exclusion: GER300Y1, GER301H1

Breadth Requirements: Creative and Cultural Representations (1)

GER210H1 - Poets and Power: Art, Media, and the Nazis (E)

Previous Course Number: GER197H1

Hours: 12T/24S

To the surprise of many, aesthetics played a vital role in the lives of Nazis and their politics. Hitler was a failed painter, Goebbels a poet, and Göring a collector; other high-ranking officials likewise fashioned themselves as artists. In this course, we will examine how these personal predilections transformed into an aesthetic vision of politics: through the fascist cult of physical perfection, the theatrics of political media, anti-Semitic entertainment films, and the eroticization of the Führer-figure. We will investigate this marriage of beauty and violence and ask how it helped to make the "Third Reich" attractive to many Germans. Beginning with the great avant-garde experiments of the pre-Nazi era, we will analyze why Hitler banned this "degenerate" art – even though he adopted some of its style in propaganda posters. We will continue by examining the Nazis' glorification of Greek and Roman images of beauty and their aesthetic justifications for genocide. Throughout the course, we will consider some of the high points of German culture – in philosophy, music, and literature – and ask: How did a society that produced such works of genius also create Nazism and the Holocaust? Is high culture necessarily a bulwark against barbarism? And do we have similarly seductive combinations of culture and politics in our world today? How might we notice such allures yet still mark their dangers, maintain our critical distance, and resist?

Recommended Preparation: 1.0 GER credit

Breadth Requirements: Creative and Cultural Representations (1)

GER220H1 - Great Works of German Literature in Translation (E)

Hours: 24L/12T

This course taught in English is an introduction to major authors of German literature, such as J.W. Goethe, F.

Kafka, T. Mann, G. Grass, C. Wolf and E.S. Özdamar, focusing on their key works and introducing central topics.

Breadth Requirements: Creative and Cultural Representations (1)

GER251H1 - German and European Cinema (E)

Hours: 24P/24S

This course examines German cinema against the backdrop of European film history. European films share common references points anchored in the cataclysms of two world wars, and have also negotiated analogous postwar transformations in family life, urbanization, the regional and the national, cultural identity, labour relations, post-socialist societies, and state security. A comparative approach enables examination of what binds German cinema to European cinema – shared histories and political concerns--as well as what is nationally unique and distinctive. By matching select films with readings from social theory, cultural studies, and film studies, we will compare and contrast these socio-historical concerns while also attending to the medium specificities of film style, aesthetics, and narrative form.

Breadth Requirements: Creative and Cultural Representations (1)

GER261H1 - Elementary Yiddish 1

Previous Course Number: GER260Y1

Hours: 36L

This course introduces Yiddish language, literature, music, theater, and cinema through interactive multi-media seminars, designed to build proficiency in reading, writing and comprehending. No prior knowledge of Yiddish is required.

Exclusion: GER260Y1

Breadth Requirements: Creative and Cultural Representations (1)

GER262H1 - Elementary Yiddish 2

Previous Course Number: GER260Y1

Hours: 36L

This course is the continuation of GER261H1, Elementary Yiddish 1. While learning the language the course will also introduce students to Yiddish literature & culture, providing a greater understanding of the historical and

contemporary, religious and secular communities that speak and spoke this language.

Prerequisite: GER261H1

Exclusion: GER260Y1

Breadth Requirements: Creative and Cultural Representations (1)

GER270H1 - Money and Economy in German Literature and Culture (E)

Hours: 24L/12T

In this course, we examine key literary, philosophical, and cultural texts, in order to understand how modern culture approaches problems such as property, debt, and exchange value.

Breadth Requirements: Creative and Cultural Representations (1)

GER272H1 - Introduction to Business German

Hours: 36P

This course introduces students to basic concepts and vocabulary necessary for the German business context. All the language skills (reading, writing, listening, and speaking) will be practiced in appropriate business contexts.

Corequisite: GER200Y1

Breadth Requirements: Creative and Cultural Representations (1)

GER275H1 - Marx, Nietzsche, Freud (E)

Hours: 24L/12T

This is an introductory course to the thought of Karl Marx, Friedrich Nietzsche, and Sigmund Freud and their pioneering contributions to the understanding of the individual and society in modernity. Readings include selections from writings of the early Marx, the Communist Manifesto, and Capital, Nietzsche's critique of culture, academe, and nationalism, and Freud's theory of culture, his views on the psychopathology of everyday life, on the meaning of dreams, symptoms, the return of the repressed, and what it might mean to live in a free society.

Breadth Requirements: Creative and Cultural Representations (1)

GER290H1 - Global Issues - German Contexts (E)

Hours: 24S

The movement of cultural products, material goods, capital, people, ideas, and information across national borders has resulted in a new quality of global interdependency. The course explores the contemporary character of globalization patterns and problems as they bear on German-speaking contexts. Readings in globalization history and theory.

Recommended Preparation: 2.0 credits of German language instruction in consultation with department
Breadth Requirements: Society and its Institutions (3)

GER299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

GER299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

GER300Y1 - Intermediate German 2

Hours: 96P

Continuing the work done in GER100Y1 and GER200Y1, this course offers German at the intermediate level focusing on extension of vocabulary, specific problems of grammar, essay-writing, reading and conversation. The Department reserves the right to place students in the appropriate course in the series GER200Y1 and GER300Y1.

Prerequisite: GER200Y1/ GER201H1 or German placement test

Breadth Requirements: Creative and Cultural Representations (1)

GER301H1 - Intermediate German 2b

Hours: 48P

This course is equivalent to the Spring Term of [GER300Y1](#). It further expands on basic grammar and vocabulary, practice in comprehension, composition, and conversation at the intermediate level. The Department reserves the right to place students in the appropriate language course on the 200- and 300 levels.

Prerequisite: German placement test

Exclusion: [GER300Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

GER310H1 - Contemporary German Culture and Media

Hours: 24S

This course focuses on contemporary German culture as expressed through a variety of media. It approaches Germany and Germany's position within Europe and the world mainly (but not exclusively) through non-literary texts.

Prerequisite: [GER200Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

GER320H1 - Age of Goethe: Revolution and Romanticism

Hours: 24S

Goethe and his contemporaries saw themselves faced with a rapidly changing world. This course examines the innovative literary experiments they developed in response to these changing times.

Prerequisite: [GER205H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

GER321H1 - Literary Realism in the Industrial Age

Hours: 24S

This course focuses on German authors of the nineteenth century. Literary, political and philosophical texts are analyzed as a discussion of political uprisings, the

industrial revolution and the emergence of German nationalism.

Prerequisite: [GER205H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

GER322H1 - Kafka's World

Hours: 24S

Franz Kafka's texts are read in the literary, historical, and philosophical context of fin-de-siècle Prague and central Europe.

Prerequisite: [GER205H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

GER323H1 - Weimar: Sex and Politics in the Roaring Twenties

Hours: 24S

Focusing roughly on the period from 1918 to 1945, this course examines literary and artistic movements like Dada, Bauhaus, the Golden Age in German film in the decades between World War I and Nazism.

Prerequisite: [GER205H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

GER325H1 - Open Topics in German Studies

Hours: 12S

This third-year course taught in German offers an in-depth exploration of diverse themes within German Studies, with a focus that varies from year to year. This course covers a wide range of topics, which may include contemporary issues in German-speaking societies, seminal German-language literary works, influential films, and philosophical movements.

Prerequisite: [GER205H1](#)

Recommended Preparation: [GER150H1](#)

GER326H1 - Writing Memory: Post 1945

Hours: 24S

An examination of post-World War II German literature and culture from Zero Hour through to present-day debates about the Holocaust and its memorialization within a German context.

Prerequisite: GER205H1

Breadth Requirements: Creative and Cultural Representations (1)

GER330H1 - Open Topics in German Studies

Hours: 12S

This third-year course taught in English offers an in-depth exploration of diverse themes within German Studies, with a focus that varies from year to year. This course covers a wide range of topics, which may include contemporary issues in German-speaking societies, seminal German-language literary works, influential films, and philosophical movements.

Recommended Preparation: GER150H1

GER332H1 - Deviance - Madness - Outsiders

Hours: 24S

An analysis of the artistic confrontation with deviance, madness, and outsiders. The course covers expressions of this confrontation in a variety of genres.

Prerequisite: GER205H1

Breadth Requirements: Creative and Cultural Representations (1)

GER334H1 - Post-Migrant Germany

Previous Course Number: GER423H1

Hours: 24S

This course investigates contemporary German culture by paying attention to its other or alternate voices and perspectives, i.e. those not usually prevalent in mainstream cultural and sociopolitical discourses.

Prerequisite: GER205H1

Exclusion: GER423H1

Breadth Requirements: Creative and Cultural Representations (1)

GER336H1 - Berlin Between East and West

Hours: 24S

This course offers an exploration of the cultural developments of one of the most exciting capitals of the world, from the Bismarckian era to German reunification and beyond.

Prerequisite: GER205H1

Breadth Requirements: Creative and Cultural Representations (1)

GER340H1 - German Theater Production

Hours: 48S

The course offers close reading, rehearsing and staging of a play. Students will become familiar with the different steps of a theater production, be introduced to basic acting and staging techniques and get acquainted to leading theories of theater.

Prerequisite: GER200Y1

Breadth Requirements: Creative and Cultural Representations (1)

GER345H1 - Nietzsche

Hours: 24L/12T

This course introduces students to Nietzsche, the philosopher, critic, and cultural theorist and examines the critically enduring significance of his legacy. Students will be familiarized with his critical contributions to epistemology, ethics, psychology, the theory of history, culture, and education as well as his impact on rethinking the agenda of philosophy. A particular aspect of the course will be the contextualization of his interventions in the intellectual landscape of his period and Nietzsche's notoriously provocative writing style.

Prerequisite: 4.0 credits

GER350H1 - German Visual Cultures

Hours: 24P/24S

This course presents students with a survey of the history and development of the German cinema. It examines major trends of German cinematography focusing on thematic and formal aspects.

Prerequisite: [GER205H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

GER354Y0 - Special Topics Summer Course in Berlin (E)

The topics of this course taught in English and open to students from other disciplines vary from year to year. Interested students can address questions to Woodsworth College.

Recommended Preparation: 100-level HIS/POL/GER course/International or European Studies

Breadth Requirements: Creative and Cultural Representations (1)

GER360H1 - Intermediate Yiddish

Hours: 36P

The course conducted in Yiddish offers a review of basic grammar, stylistics, study of short literary texts.

Prerequisite: [GER260Y1](#)

Exclusion: [GER463Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

JGJ360H1 - Holocaust in Literature (E)

Hours: 24S

This course examines literary works written in different languages, in ghettos and concentration camps during the Holocaust, as well as those reflecting on the genocide in its aftermath. We focus on literature as a means of engaging with the unimaginable and on the cross analysis of eye-witness and memory writing.

Prerequisite: Completion of 4.0 credits

Exclusion: [CJS220H1](#), [GER367H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

GER361H1 - Yiddish Literature in Translation (E)

Hours: 24S

An overview of the major figures and tendencies in modern Yiddish literature and culture from the beginning

of the 19th century to the present. Readings (in English) of modern Yiddish prose, poetry, drama and cinema.

Breadth Requirements: Creative and Cultural Representations (1)

GER367H1 - Topics in Yiddish or German Jewish Literature and Culture [E]

Hours: 24S

Topics in modern Yiddish or German Jewish literature and culture from the beginning of the 19th century to the present, featuring a selection of readings of modern Yiddish prose, poetry, drama and cinema. Taught in English and open to students across disciplines.

Prerequisite: Completion of 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

GER370H1 - German Business Culture

Hours: 36P

This course provides students with a working knowledge of German business culture that allows them to navigate the German workplace. The main focus is to deepen students' knowledge of business concepts.

Note: This course is required for the minor program in Business German

Prerequisite: [GER272H1](#)/ [GER200Y1](#)/ [GER201H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

GER372H1 - Navigating German Work Environments

Hours: 36P

This course offers an intensive development of the linguistic skills needed in the context of business transactions and management in German-speaking countries. Through materials from various sources, students develop oral and written skills for competence in German business communication as well as cross-cultural awareness.

Prerequisite: [GER370H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

GER391H1 - iPRAKTIKUM Experiential Learning and Internationalization Internship

Hours: 24P

The course provides curricular support for a variety of work and community-engaged, experiential learning placements in the GTA and in German-speaking countries. The placements are designed to deepen linguistic, cultural, and analytical skills acquired in the classroom in work-related environments, create an awareness of the translatability of academic knowledge to other contexts, promote global competency, and foster links to the community. The number of weekly hours spent in the field, the scope of learning objectives, and the nature of reflective activities are determined on an individual basis in consultation with the host institution, the German Department, and other units in which the student is pursuing a program degree (as required). In addition to successfully achieving the formulated learning goals, students must complete assignments such as eJournals and research papers as well as participate in peer-to-peer reporting and post-placement interviews.

Prerequisite: GER100Y1 and GER200Y1 or consent of department (equivalent proficiency level B1)

Recommended Preparation: 3.0 credits in GER courses

Breadth Requirements: Society and its Institutions (3)

GER398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

GER398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

GER399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at

<https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

GER399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

GER400H1 - Advanced German 1

Hours: 48P

This is a course for advanced learners of German reviewing complex features of the language and introducing them to aspects of German stylistics. The emphasis lies on oral and written communication.

Prerequisite: GER300Y1/ GER301H1

Breadth Requirements: Creative and Cultural Representations (1)

GER401H1 - Advanced German 2

Hours: 48P

This is a course for advanced learners of German reviewing complex features of the language and introducing them to aspects of German stylistics. The emphasis lies on oral and written communication.

Prerequisite: GER400H1

Breadth Requirements: Creative and Cultural Representations (1)

GER410H1 - Topics in German Intellectual History (E)

Hours: 24S

This course taught in English offers an examination of key moments and themes in German intellectual history from the Enlightenment to the present.

Prerequisite: Advanced status: permission of the department

Breadth Requirements: Thought, Belief and Behaviour (2)

GER426H1 - Medieval Language and Culture [E]

Hours: 36S

This course offers an introduction to the language, literature and culture of Medieval Germany. The reading and translation of exemplary medieval German texts will introduce students to Middle High German and provide an insight into epochal concepts like courtly love and chivalry as well as courtly and monastic designs of identity.

Prerequisite: GER300Y1, GER205H1

Breadth Requirements: Creative and Cultural Representations (1)

GER430H1 - Topics in German Literature and Culture

Hours: 24S

An open course which explores specific aspects of German literature and culture.

Prerequisite: GER305H1

Breadth Requirements: Creative and Cultural Representations (1)

GER431H1 - Topics in Germanic Studies

Hours: 24S

An open course which explores specific aspects of Germanic Studies.

Prerequisite: GER305H1

Breadth Requirements: Creative and Cultural Representations (1)

GER460H1 - Advanced Yiddish

Previous Course Number: GER462H1

Hours: 36P

This course conducted entirely in Yiddish focuses on advanced reading, writing, vocabulary and conversation, the study of poetry, short fiction, and memoir literature by leading authors. Selected advanced grammatical topics are presented in conjunction with the study of texts.

Prerequisite: GER360H1

Exclusion: GER462H1

Breadth Requirements: Creative and Cultural Representations (1)

GER463Y1 - Yiddish Language for German Speakers

Hours: 48P

The course is designed as an intensive Yiddish language training. The goal is to teach German speakers to read, write and speak in Yiddish. The curriculum relies on the German language skills of the students, and focuses on differences between Yiddish and German grammar and vocabulary. Upon the completion of the course, students should be able to read Yiddish literary texts with a minimal use of dictionary.

Note: Graduate students can take the course in preparation for their Yiddish competency test.

Prerequisite: 3.0 credits in German language or fluency in German language

Exclusion: GER260Y1, GER360H1, GER462H1

Breadth Requirements: Creative and Cultural Representations (1)

GER490H1 - Independent Study

Hours: 24S

A reading & research project in Germanic literature and/or culture involving a substantive research component. Not eligible for CR/NCR option.

Prerequisite: Advanced status: permission of the department. Note: permission needs to be obtained by May 1st for the Fall Term and by Nov. 1st for the Spring Term

GER491Y1 - Individual Studies

Hours: 48S

A scholarly project chosen by the student and supervised by a member of the staff. The form of the project and the manner of its execution are determined in consultation with the supervisor. Not eligible for CR/NCR option.

Prerequisite: Advanced status: permission of the department. Note: project proposals need to be submitted by June 1st

Introduction

History is an active, future-shaping discipline and a contested area in politics. Historians study the past to understand it on its own terms, to gain insight into how our world has developed, and in order to influence the present. Authoritarian regimes aim to control the work that historians do - why is that? Why is knowledge of the past so feared by those who seek to have power over the lives of others? What can the experience of the past teach us about the challenges humanity faces now?

History students gain both a broad overview of the contours of history and in-depth knowledge of one or more specific regions, time periods, or thematic specializations. They come to understand how social processes, political ideologies, economic trends, and environmental changes have intersected with individual and collective human actions to shape historical change and, ultimately, the world we live in today. Our diverse, award-winning faculty teach students the skills and methods of historical research, how to make rigorous arguments, and how to speak and write effectively. History students learn how history is written, including the use and interpretation of evidence, and the choices involved in various theoretical and analytical frameworks.

We offer Specialist, Major and Minor Programs of Study, as well as a Focus in Law and History for Majors and Specialists which introduces students to the study of legal history and is an excellent foundation for law school. Majors and Specialists can also apply for the Arts & Science Internship Program in History (ASIP). History graduates put their training directly to use in such fields as law, politics, public policy, business, government, education, the GLAM sector (galleries, libraries, archives and museums), filmmaking, journalism, international relations, urban planning, content creation and many others.

Curriculum

The History curriculum is designed to allow you a great deal of flexibility to follow your own interests. However, breadth requirements (described in program requirements below) ensure that you acquire an understanding of the more distant as well as more recent past, and that you study the histories of different peoples around the globe.

The 100-level courses are thematically based and introduce students to the craft and tools of historical research and writing. The 200-level courses are broad chronological surveys of countries, regions, or time periods. They are open to first-year students and have no prerequisites. The 300-level courses enable students to pursue topics in greater depth and methodological sophistication. They are not open to first-year students

and frequently have prerequisites or recommended preparation that will prepare you to be successful. The 400-level courses represent the culmination of an undergraduate's study of history. They are taught by faculty as small-group seminars in which students draw upon the skills they have developed through the course of their History program in research, analysis, and oral and written presentation. Students are responsible for ensuring that they have prerequisites or recommended background preparation for upper-level courses.

Arts & Science Internship Program (ASIP)

The new Arts & Science Internship Program (ASIP) stream is available to students who are entering Year 2 or Year 3 of study and are enrolled in the History Specialist and History Major. Enrolment is limited and requires a supplemental application. Students enrolled in the ASIP stream will be required to complete mandatory Professional Development programming plus a minimum of 12 and a maximum of 20 months (Year-2 entry) or a minimum of 12 and a maximum of 16 months (Year-3 entry) of paid, full-time work experience. The time to degree completion for students enrolled in ASIP will normally be 5 years. There is an additional cost to participate in the ASIP stream. Students will typically be admitted to the ASIP stream for the Fall term of Year 2 of study, however, in exceptional circumstances students, including transfer students, who enrolled in an eligible program in the Summer after Year 2 can be admitted to the ASIP stream for the Fall of Year 3. Acceptance into an ASIP stream in Year 3 is dependent on space and requires approval of the student's academic unit and the Faculty of Arts & Science Experiential Learning & Outreach Support (ELOS) Office. Please refer to the ASIP eligibility page for further details.

Combined Degree Program (CDP) offered with Victoria College and Ontario Institute for Studies in Education (OISE)

- Combined Degree Program in HBA/HBSc and Master of Teaching (MT)

Students enrolled in the Minor in Education and Society and Major in History may apply for this Combined Degree Program. For details about application and program requirements, see the [Combined Degree Programs section](#).

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The History programs impacted by this policy: [ASSPE0652](#), [ASMAJ0652](#), and [ASMIN0652](#)

History Programs

History Specialist (Arts Program) - ASSPE0652

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

2.0 HIS credits to be made up in one of the following ways:

Option 1:

- 1.0 credit at the 100-level excluding the following HIS First-Year Foundations (FYF) courses: [HIS190H1](#), [HIS191H1](#), [HIS192H1](#), [HIS193H1](#), [HIS194H1](#), [HIS195H1](#), [HIS196H1](#), [HIS197H1](#), [HIS198H1](#), [HIS199H1](#)
- 1.0 credit at the 200+ level

Option 2:

- 0.5 credit from HIS111H1, HIS112H1, HIS115H1 or the following HIS First-Year Foundations (FYF) courses: HIS190H1, HIS191H1, HIS192H1, HIS193H1, HIS194H1, HIS195H1, HIS196H1, HIS197H1, HIS198H1, HIS199H1
- 1.5 credits at the 200+ level

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 70% in each course will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the History Specialist in the Summer after Year 2.

Completion Requirements:

A total of 10.0 credits of which no more than 1.0 credit can be at the 100-level and of which at least 5.0 credits must be at the 300+ level, including 1.5 credits at the 400-level. Some courses may contribute to both the Geographic Distribution and Temporal requirements (requirements 1 and 2).

The Specialist program gives students in-depth training in historical research, analysis, and writing for future professional use or graduate study. To tailor the program to your needs, in your third year you have a choice between two pathways: a higher level course-work option in order to further the development of excellent skills via a wider variety of courses or a thesis option where you will be able to do the same while also concentrating on a specific research topic.

1. Geographic Distribution (200+ level):

- 2.0 credits in Africa/Asia/Middle East with at least one 0.5 credit in 2 of the 3 areas. This requirement cannot be met by more than 1.0 credit from any area.
- 1.0 credit in Canada/US/Latin America/The Caribbean
- 1.0 credit in Europe

2. Temporal Requirement: 1.0 credit in pre-1800 history course(s) listed below.

Note 1: HIS courses listed with (.50) indicate that they fulfill half of the Temporal Requirement.

3. 1.0 credit from one of the following pathways below:

- Thesis Option: HIS475H1 and HIS476H1 taken in that order. (see Note 2)
- Coursework option: 1.0 credit of Senior (300 or 400-level) Methodology course(s), listed below

Note 2: Students interested in the Thesis Option should contact the Undergraduate Associate Chair for advice about the pathway, thesis topics, and the selection of an appropriate faculty advisor.

4. Additional HIS, JIH, JHA, JHM, JHN, JMH, JSH or Equivalent courses (listed below) to a total of 10.0 credits. No more than 1.0 credit from the Equivalent courses can contribute to program completion.

Geographic Area a): Africa, Asia, Middle East

Thematic Streams

Although thematic streams are not an official program requirement, you may find it enriching to follow a particular theme across different time periods or geographical divisions.

Colonialism, Post-Colonialism, Trans-Nationalism

HIS106Y1, HIS208Y1, HIS280Y1, HIS282Y1, HIS283Y1,
HIS291H1, HIS292H1, HIS303H1, HIS312H1, HIS314H1,
HIS326H1, HIS353Y1, HIS380H1, HIS416H1, HIS445H1,
HIS446H1, HIS467H1, HIS470H1, HIS480H1,
NMC278H1, NMC376H1

Indigenous History

HIS101Y1, HIS102Y1, HIS230H1, HIS264H1, HIS291H1,
HIS292H1, HIS359H1, HIS419H1, INS200H1, INS201Y1,
INS300Y1, INS352H1, JIH366H1, JIH369H1, JIH460H1

International Relations

HIS103Y1, HIS311H1, HIS343H1, HIS344H1, HIS401H1,
HIS405Y1, HIS451H1, HIS465H1

Medieval

HIS220Y1, HIS303H1, HIS320H1, HIS321H1, HIS323H1,
HIS403H1, HIS424H1, HIS427H1, HIS428H1, HIS432H1,
HIS438H1, NMC376H1

Women and Gender

HIS297Y1, HIS302H1, HIS323H1, HIS348H1, HIS363H1,
HIS383Y1, HIS406H1, HIS446H1, HIS465H1, HIS481H1

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Note: HIS262H1, *Canada: A Short Story of Here*, is designed for non-History students, this introductory survey fulfills the Society and Its Institutions breadth requirement. It cannot be counted towards a History program, program requirements or as a pre-requisite for upper-level History courses.

Focus in Law and History (Specialist) - ASFOC0652A

The Focus in Law and History gives students the critical skill-set to interrogate the 'force of law', not only in the sense of law as enforced, but also as a vehicle of cultural, social, and economic knowledge. Importantly, it will ask students to interrogate assumptions of what counts as law across time and space. At the core of this Focus to the Major are fundamental questions of both law and society: Who has law? What does (or should) it look like? Who decides? What sorts of critical histories can be written from and about legal archives that span time, space, and language tradition?

Enrolment Requirements:

Enrolment in the History Specialist is required.

Completion Requirements:

3.0 credits

1. Methodological Training Requirement: HIS268H1: Law and History.
2. Law and History Focus Enrichment: 2.5 credits from the following list, including at least 1.0 credit at the 300+ level.

HIS101Y1, HIS221H1, HIS230H1, HIS231H1,
HIS282Y1, HIS283Y1, HIS310H1, HIS324H1,
HIS332H1, HIS335H1, HIS374H1, HIS375H1,
HIS379H1, HIS382H1, HIS390H1, HIS397H1,
HIS411H1, HIS417H1, HIS419H1, HIS424H1,

HIS426H1, HIS438H1, HIS443H1, HIS470H1,
HIS492H1, HIS493H1, JHM307H1, JHN323H1,
JIH366H1, JIH369H1, JMH385H1

Some offerings of HIS389H1, HIS466H1 and HIS496H1 may also count towards this focus. Check with the department for current offerings.

Up to a 0.5 credit from non-HIS courses may be substituted for requirement 2, with permission of the department. Substitutions will be reviewed based on a copy of the course syllabus.

History Major (Arts Program) - ASMAJ0652

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses

The following courses are required:

HIS credits to be made up in one of the following ways:

- 1.0 credit from HIS courses excluding the following HIS First-Year Foundations courses: HIS190H1, HIS191H1, HIS192H1, HIS193H1, HIS194H1, HIS195H1, HIS196H1, HIS197H1, HIS198H1, HIS199H1; or
- 0.5 credit from HIS111H1, HIS112H1, HIS115H1 or the following HIS First-Year Foundations courses: HIS190H1, HIS191H1, HIS192H1, HIS193H1, HIS194H1, HIS195H1, HIS196H1, HIS197H1, HIS198H1, HIS199H1, and 0.5 HIS credit at the 200+ level

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the History Major in the Summer after Year 2.

Completion Requirements:

A total of 7.0 credits of which no more than 1.0 credit can be at the 100-level and of which at least 2.0 credits must be at the 300+ level, including 0.5 credit at the 400-level. Some courses may contribute to both the Geographic

Distribution and Temporal requirements (requirements 1 and 2).

1. Geographic Distribution (200+ level):

a) 2.0 credits Africa/Asia/Middle East with at least one 0.5 credit in 2 of the 3 areas. This requirement cannot be met by more than 1.0 credit from any area.

b) 1.0 credit Canada/US/Latin America/The Caribbean

c) 1.0 credit Europe

2. Temporal Requirement: 1.0 credit in pre-1800 history course(s) listed below.

Note 1: The HIS courses listed with (.50) indicate that they fulfill half of the Temporal Requirement.

3. Additional HIS, JIH, JHA, JHM, JHN, JMH, JSH or Equivalent courses (listed below) to a total of 7.0 credits. No more than 1.0 credit from the Equivalent courses can contribute to program completion.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Note 2: HIS262H1, Canada: A Short Story of Here, is designed for non-History students, this introductory survey fulfills the "Society and Its Institutions" breadth requirement. It cannot be counted towards a History program, program requirements or as a pre-requisite for upper-level History courses.

Focus in Law and History (Major) - ASFOC0652B

The Focus in Law and History gives students the critical skill-set to interrogate the 'force of law', not only in the sense of law as enforced, but also as a vehicle of cultural, social, and economic knowledge. Importantly, it will ask students to interrogate assumptions of what counts as law across time and space. At the core of this Focus to the Major are fundamental questions of both law and society: Who has law? What does (or should) it look like? Who decides? What sorts of critical histories can be written from and about legal archives that span time, space, and language tradition?

Enrolment Requirements:

Enrolment in the History Major is required.

Completion Requirements:

3.0 credits

1. Methodological Training Requirement: HIS268H1: Law and History.
2. Law and History Focus Enrichment: 2.5 credits from the following list, including at least 1.0 credit at the 300+ level.

HIS101Y1, HIS221H1, HIS230H1, HIS231H1, HIS282Y1, HIS283Y1, HIS310H1, HIS324H1, HIS332H1, HIS335H1, HIS374H1, HIS375H1, HIS379H1, HIS382H1, HIS390H1, HIS397H1, HIS411H1, HIS417H1, HIS419H1, HIS424H1, HIS426H1, HIS438H1, HIS443H1, HIS470H1, HIS492H1, HIS493H1, JHM307H1, JHN323H1, JIH366H1, JIH369H1, JMH385H1

Some offerings of HIS389H1, HIS466H1 and HIS496H1 may also count towards this focus. Check with the department for current offerings.

Up to a 0.5 credit from non-HIS courses may be substituted for requirement 2, with permission of the

department. Substitutions will be reviewed based on a copy of the course syllabus.

History Minor (Arts Program) - ASMIN0652

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

The minor program provides a useful grounding for students interested in the study of the past and contributes to their development of interdisciplinary perspectives from across the Humanities and Social Sciences.

(4.0 credits, of which only 1.0 credit at the 100-level may be used to fulfill program requirements)

Completion Requirements: HIS courses to a total of 4.0 credits, including at least 1.0 credit at the 300- or 400-level.

Courses in other departments: Students may take up to a 0.5 credit from the Equivalent Courses list below.

Equivalent Courses

AFR290H1, AFR370H1, CDN230H1, CDN280H1, CDN340H1, CDN390H1, CLT337H1, CLT341H1, CLT348H1, CLT377H1, CLT378H1, CLT413H1, CLT416H1, CLT444H1, EAS245H1, EAS246H1, EAS247H1, EAS271H1, EAS285H1, EAS348H1, EAS364H1, EAS372H1, EAS374H1, EAS459Y1, EAS473H1, EAS475Y1, EUR200Y1, INS200H1, INS201Y1, INS300Y1, INS352H1, JPI201H1, NMC275H1, NMC278H1, NMC355H1, NMC372H1, NMC373H1, NMC376H1, NMC378H1, NMC386H1, NMC475H1, NMC477H1, NMC479H1, REN240Y1, REN348Y0, REN441H1, TRN250Y1, WGS481H1

Note: HIS262H1, *Canada: A Short Story of Here*, is designed for non-History students, this introductory survey fulfills the Society and Its Institutions breadth requirement. It cannot be counted towards a History program, program requirements or as a pre-requisite for upper-level History courses.

Regarding History Courses

Note: Not all of these courses are taught every year. Please check the [Arts & Science timetable](#) or the [History Department website](#) for the list of courses offered in 2025-2026.

First-Year Foundations Seminars

First-Year Foundations Seminars are open only to newly-admitted, Faculty of Arts & Science students (3.5 credits or less). They are 1.0 credit or 0.5 credit courses that focus on discussion of issues, questions and controversies surrounding a particular discipline (or several disciplines) in a small-group setting that encourages the development of critical thinking, writing skills, oral presentation and research methods. FYF seminars are as rigorous and demanding as any other first-year course and require in addition the acquisition of those skills expected of successful undergraduate students. With a maximum enrolment of 30 students each, they are an ideal way to have an enjoyable and challenging small-class experience in your first year. Details can be found at www.artsci.utoronto.ca/future/academic-opportunities/first-year-opportunities/first-year-foundations-seminars.

All First-Year Foundations Seminars:

- Count as 1.0 or 0.5 of the 20 credits required for an HBA, HBSc or BCom.
- First-Year Foundations Seminars are not required to get into any Program of Study. However, they may count towards your Program. Please check with your college registrar for further details.
- Can be counted towards the breadth requirement.

100-Level Courses

All 100-series HIS courses are mutually exclusive, with the exception of AP, IB, CAPE, or GCE transfer credits. Students may enrol in only one 100-level History course. Students enrolled in more than one of these courses (or who have completed one of these courses or a previous HIS 100-level course with a mark of 50% or greater) will be removed at any time. First-Year students can also enrol in 200-level HIS courses.

History Courses

HIS100Y1 - History of the Arctic

Hours: 48L/20T

People have made the Arctic home for millennia, creating circumpolar cultures in its challenging climate. This course compares and examines connections in the contested polar region through several themes: cultures in contact, trade and exploration, environment, crime and punishment, and defense and sovereignty.

Exclusion: [HIS101Y1](#), [HIS102Y1](#), [HIS103Y1](#), [HIS106Y1](#), [HIS107Y1](#), [HIS108Y1](#), [HIS109Y1](#), [HIS110Y1](#)

Breadth Requirements: Living Things and Their Environment (4), Society and its Institutions (3)

HIS101Y1 - Histories of Violence

Hours: 48L/20T

Ranging widely chronologically and geographically, this course explores the phenomenon of violence in history. It examines the role and meanings of violence in particular societies (such as ancient Greece and samurai Japan), the ideological foundations and use of violence in the clash of cultures (as in slavery, holy wars, colonization, and genocide), and the effects and memorialization of violence.

Exclusion: [HIS100Y1](#), [HIS102Y1](#), [HIS103Y1](#), [HIS106Y1](#), [HIS107Y1](#), [HIS108Y1](#), [HIS109Y1](#), [HIS110Y1](#)

Breadth Requirements: Society and its Institutions (3), Thought, Belief and Behaviour (2)

HIS102Y1 - Empires, Encounters and Exchanges

Hours: 48L/20T

Can we speak of “international relations” before the modern concept of nation-states was established? What forms did globalization take in the pre-modern era? How did early global exchange shape our world today? Students in this course study interactions among peoples, empires, and cultures, in multiple regions of the world (specific areas and time periods will change depending on the professors teaching in any given year). Topics include the impact of new goods and technologies; dissemination of ideas and religions; voyages of migration and exploration; and episodes of conquest and colonization. Analysis of primary sources and intensive focus on becoming strong writers.

Exclusion: [HIS100Y1](#), [HIS101Y1](#), [HIS103Y1](#), [HIS106Y1](#), [HIS107Y1](#), [HIS108Y1](#), [HIS109Y1](#), [HIS110Y1](#), [HISA04H3](#)/[HISA05H3](#)

Breadth Requirements: Society and its Institutions (3), Thought, Belief and Behaviour (2)

HIS103Y1 - Strategy and Statecraft: War, Diplomacy, and the Development of the International System, 1600–1945

Hours: 48L/20T

This course explores the history of the international state system, encouraging students to consider how this system has been constantly adapting and evolving for hundreds of years as states compete for power. It examines how wars between European states, along with diplomacy, empire-building, and the quest for wealth, led—unintentionally in many ways—to a broader, international system not confined only to European “great powers.” Students will study themes such as strategy and war, empire and imperialism, and trade, diplomacy, and state-building to understand the rise and fall of major states and empires over the centuries.

Key events include the Thirty Years War in Europe; the global implications of the Seven Years War and Napoleonic Wars; and the roles of non-European regions like China, India, Japan, and the United States in the 18th and 19th centuries. The course also considers the effects of imperial competition in Africa and Asia, both for the imperial powers and the peoples and states of those continents; the diplomacy and competition that led to the First World War; and the global impact of the Second World War, with the rise of “superpowers” and the collapse of the European and Japanese empires.

Exclusion: [HIS100Y1](#), [HIS101Y1](#), [HIS102Y1](#), [HIS106Y1](#), [HIS107Y1](#), [HIS108Y1](#), [HIS109Y1](#), [HIS110Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS106Y1 - The African Diaspora in the Americas, 1492-1804

Hours: 48L/20T

This course introduces the history of the African Diaspora in the Americas, from 1492-1804. Lectures and readings will draw from primary sources and historical scholarship to focus on a range of topics, including slavery and the slave trade, race relations, gender and sexuality, religious and cultural practices, and liberation struggles.

Exclusion: [HIS100Y1](#), [HIS101Y1](#), [HIS102Y1](#), [HIS103Y1](#), [HIS107Y1](#), [HIS108Y1](#), [HIS109Y1](#), [HIS110Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS107Y1 - Approaches to East Asian History

Hours: 48L/20T

This course draws on the history of China, Korea and Japan between 1600 to 1950 to explore historical issues of gender, nationalism, war and relations with the West.

Exclusion: [HIS100Y1](#), [HIS101Y1](#), [HIS102Y1](#), [HIS103Y1](#), [HIS106Y1](#), [HIS108Y1](#), [HIS109Y1](#), [HIS110Y1](#), [HIS284H5/EAS204Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS108Y1 - What is History?

Hours: 48L/20T

This course offers an introduction to history as a discipline - to the history of the discipline itself, to the questions, categories, and methodologies that constitute it, to the ways these interrogations and methods have evolved in varied times and places, and to the methodologies students need to acquire to engage in historical inquiry and writing. The course will be part methodological workshop, part epistemological reflection. Designed for any students interested in the study of the past or considering the History major.

Exclusion: [HIS100Y1](#), [HIS101Y1](#), [HIS102Y1](#), [HIS103Y1](#), [HIS106Y1](#), [HIS107Y1](#), [HIS109Y1](#), [HIS110Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS109Y1 - The Development of European Civilization, 1350-1945

Hours: 48L/20T

The shape of traditional society; the forces at work on the social, political, economic, cultural and intellectual structures of Western Europe since the high Middle Ages: the Structure of Traditional Society; the First Period of Challenges, 1350-1650; the Second Period of Challenges, 1650-1815; Confidence, Stability and Progress, 1815-1914; the Collapse of the Old Order and the Condition of Modern Europe, 1914-1945.

Exclusion: [HIS100Y1](#), [HIS101Y1](#), [HIS102Y1](#), [HIS103Y1](#), [HIS106Y1](#), [HIS107Y1](#), [HIS108Y1](#), [HIS110Y1](#)

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

HIS110Y1 - History of the Indian Ocean World

Hours: 48L/20T

This course introduces you to the connected and interdependent world people who lived between the present day cities of Dakar, in West Africa, and Jakarta, in Indonesia, from about 1000 to the present. We explore in this class the three "C"s which have linked human experience in Africa and Asia via routes which connected the Indian Ocean World: Connectedness, Contingency, and Cosmopolitanism. We study how people who lived more than a thousand years before our time transported ideas, products, and scripts by land and sea via routes that connected large parts of Africa, Central & South Asia, and East and Southeast Asia, and their histories. The land and sea routes connected these communities and the cosmopolitan outlook of the hosts provided the contingent conditions for a Buddhist monks to travel from all over China to Southern and Southeast Asia; Muslim scholars to travel from West Africa to Indonesia; and merchants and writers to move within these worlds. Human migration, economic trade, and religious conversion had linked the lands and the seas, making it possible for our imams, merchants, monks, and servants to traverse these territories, across the Africa and Asia. This vibrant and wealthy world of African and Asian thinkers, merchants, leaders, and communities became the envy of the world, and as late as the seventeenth century, these crazy rich Africans and Asians dominated the world as it was known. We'll see how history is contingent--and that human migration, economic exploitation, lack of reciprocity, and legacies of European colonial racism have disrupted the cosmopolitan worlds of the Indian Ocean. The world is different today, but more than three quarters of the human population still live in Africa and Asia--see the richness of their worlds as it was for thousands of years, and what will be left for the people of this world as climate change makes the seas rise.

Exclusion: [HIS100Y1](#), [HIS101Y1](#), [HIS102Y1](#), [HIS103Y1](#), [HIS106Y1](#), [HIS107Y1](#), [HIS108Y1](#), [HIS109Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS111H1 - Artificial Intelligence and the Fourth Industrial Revolution: Lessons from History

Hours: 24L/10T

The AI Age is driving a new, "Fourth Industrial Revolution," according to World Economic Forum founder, Klaus Schwab. Could the real histories of the first three industrial revolutions help us navigate the disinformation crisis and the social, political, economic and environmental impact of this shift? Algorithmic platforms and AI tools, like those used in Instagram, TikTok, and

YouTube are relatively new, but the hidden power structures that have shaped their rise and use are not. This course explores the big histories behind algorithmic technologies in two ways. First, class discussions, workshops, and guest lectures introduce students to overlooked histories behind our present moment, from the wild history of venture capital and tech monopolies to the rise of the early internet, and the big histories behind issues like facial recognition, celebrity, militarization, and privacy. Second, we explore the human reasons behind how and why social media platforms and AI tools, have amplified and automated disinformation and historical biases online. Hands-on research and projects help students explore and develop real solutions to displace disinformation, protect democratic elections, and provide the public better access to accurate historical content on social media. Restricted to first-year students.

Breadth Requirements: Society and its Institutions (3)

HIS112H1 - Ten Events that Changed the World

Hours: 24L/10T

This course examines ten events changed the world and continue to have ramifications today. Events may change year to year, depending on the instructor. Students will learn how historians work to understand the significance of these moments, human agency, and the idea of an “event,” itself.

Breadth Requirements: Society and its Institutions (3)

HIS115H1 - History Now: How the Past Shapes the Present

Hours: 24L/20T

In this introduction to the discipline of history, the instructor chooses several pressing issues facing the world today and delves into their pasts. The course helps us understand what the study of history can and cannot teach us about the present moment, and the challenges and opportunities of using history to understand our present – and potentially our future, as well. Students will assess historical “truth claims” made across multiple media, how to find and make use of credible scholarship, and how historians make use of primary sources. Assignments will focus on the development of critical reading and strong writing skills. In tutorial discussions, students will practice making effective oral arguments.

Breadth Requirements: Society and its Institutions (3)

HIS190H1 - Freedom Schools

Hours: 24S

This first-year seminar explores radical traditions of education beyond and in resistance to formal schooling. Transnational in scope—and journeying from the late nineteenth century to the present day—we will study the pedagogical innovations and grassroots struggles of anarchic youth, guerrilla intellectuals, and feminist revolutionaries who used education broadly, and historical inquiry in particular, as tools for empowerment and collective liberation. Focusing on primary sources from archives of anticapitalist, antiracist and anticolonial movements, we will investigate traditions of self-teaching and co-learning, genealogies of critical and transformative pedagogies, the construction of decolonial survival and supplementary schools, student mobilizations within and against the university, as well as abolitionist education in our contemporary moment. This course invites participants to interrogate the relationship of education to freedom and justice through collective criticism, self-reflection and creative expression. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

HIS191H1 - Pandemics and Human History

Hours: 24S

We have all just lived through a major historical disruption caused by CoViD-19. In this course, you will be invited to use your experience of the pandemic as a tool for understanding other times, other places, and the study of history itself. We will study plagues and diseases from the ancient world to the Twentieth Century, and introduce methods from social, cultural, and economic history, as well as concepts from the histories of science and medicine. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

HIS192H1 - A History of Queer Asia

Hours: 24S

A first-year seminar on the history of queerness, in all its complexity and diversity, in the no less complex and diverse settings of East, South, and Southeast Asia. Our journey will encompass empires and Indigenous peoples, rulers and rebels, and range from early recorded history down to the twentieth century. Focus will be placed on primary sources and introducing students to the evolving

definitions of "queerness" itself. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

HIS193H1 - Calls to Action: The TRC and Residential Schools in Canadian History

Hours: 24S

The last Indian Residential School in Canada closed in 1996. For more than a century and half before that, the Canadian state supported church-run residential schools intended to take Indigenous children away from their families, cultures, languages and traditions. Over 150,000 children passed through the doors of these different schools that operated from coast to coast. Using the formal report of the Truth and Reconciliation Commission as a central text, this course explores that history and the ongoing legacy of residential schools in Canada while introducing first year students to historical research methods and sources. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

HIS194H1 - Power, Resistance, and the Graphic Novel

Hours: 24S

This course will look broadly at the question of power and resistance in the Americas (Canada, the United States, and Latin America) through the prism of graphic novels. Each week we will read a graphic novel related to important historical moments or events, drawing on scholarly articles to help us contextualize the novel. We will discuss the medium of graphic novels, their history and place in the broader culture, as well as how they might help or hinder our ability to study and disseminate information about the past. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

HIS195H1 - Remembering and Forgetting

Hours: 24S

This course introduces students to the interdisciplinary study of history by exploring processes of remembering and forgetting intrinsic to every society. Topics include the

ideas of history and memory, memory cultures and narratives and counternarratives and the study of legal trials, museums, monuments, novels and films as popular vehicles of historical knowledge. The course analyzes in particular how the experiences of war and violence have been both remembered and forgotten. The intersection, and dislocation, between trauma and remembrance is a main theme, as is the topic of collective memories in post-conflict societies. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: AMS199H1

Breadth Requirements: Society and its Institutions (3)

HIS196H1 - Religion and Violence

Hours: 24S

This seminar explores the roles of religion in extreme violence. Working backward from the 1990s (Rwanda, Yugoslavia), we will consider cases including Guatemala, Cambodia, Indonesia, the Holocaust, Armenians, German Southwest Africa, and genocide of Indigenous peoples in North America. Students will produce a final project based on original research. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

HIS197H1 - Medieval Medicine

Hours: 24S

This course focuses on the theories and practices of medicine in Europe, c.500-1500, by examining surviving evidence from the period, including (in translation) pharmaceutical recipes, diagnostic guides, doctor's records, treatises on anatomy, surgery and gynecology, commentaries on Hippocrates and Galen, laws and regulations for physicians, university lectures, disputes in court records, satirical writings against physicians, and so on, as well as visual evidence of artifacts, surgical instruments, manuscript illumination/diagrams, hospital sites and design. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

HIS198H1 - Decolonizing Women's History

Hours: 24S

This course introduces students to the historiographical and theoretical debates in women's and gender history

from a global perspective, with emphasis on the local histories of women in the non-western world. Students will study the themes in women's history as articulated by first and second wave feminists. The second part of the class deconstructs the basic assumptions of Western feminism through the perspective of post-colonial feminist writings and empirical studies. The readings are structured so that you consider how examples from Asia disrupt narratives of universality in Western feminist epistemologies. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

HIS200H1 - Drunk History

Hours: 24L/12T

Histories of wine or beer or vodka often focus either on the production of these alcoholic beverages and their role in national or local economies, or on the ways that drinking is part of celebration. But drunkenness enters the historical record in other ways, too—not just as a social lubricant but as a social ill, one associated with intimate violence or violence to the self and with mass protest. From worries about the Gin Craze to race-based restrictions on consumption, from tax policies to policing, this class will consider the many ways that drunkenness has been accepted, denounced, and legislated in societies around the world.

Exclusion: HIS195H1 (*Drunk History*), offered in Fall 2019 and Winter 2021.

Breadth Requirements: Society and its Institutions (3)

HIS205Y1 - Topics in Women's History

Hours: 48L/20T

This course introduces students to the diverse experiences of women from a comparative perspective. Students will study how women's strategies have shaped the major cultural, economic, political and social processes in the world and how these processes have affected women's experiences in their particular societies. By studying women's history from both local and global perspectives, students will engage critically with claims that women's history is universal. The local focus of the course will rotate between Africa, Asia, Europe, and North America, depending on the expertise of the instructors.

Exclusion: HIS245Y1

Breadth Requirements: Society and its Institutions (3), Thought, Belief and Behaviour (2)

HIS205H1 - From Women's History to Gender History

Hours: 24L/10T

This course critically examines gender in the context of politics, society, culture, and economics across a range of comparative times and spaces depending on instructor expertise. In what ways have gendered norms and transgressions been part of human societies and lived experiences? How have those norms shifted across historical and geographical contexts? How has the history of gender impacted gender as it is lived and made political today? Throughout the course, we will be querying the theoretical assumptions underlying and framing the historical texts we are studying, as well as assessing the different kinds of primary sources used to recover women's and gender history.

Exclusion: HIS245Y1

Breadth Requirements: Society and its Institutions (3)

HIS208Y1 - History of the Jewish People

Hours: 48L/20T

This course explores the origins of the Jewish people, beginning with the Bible and ending in the 21st Century. We will follow the development of Jewish social and cultural life across the Muslim and Christian worlds and discuss how Jews adapted to the constraints and opportunities provided by the non-Jewish majority. We will also learn about key Jewish books and concepts, including the Talmud, Kabbalah (Jewish mysticism), Halakhah (Jewish law), and Jewish philosophy. Finally, we will investigate the Jewish movements that arose in response to the challenges of modernity and new ideologies.

Breadth Requirements: Society and its Institutions (3)

HIS218H1 - Environmental History

Hours: 24L/8T

A lecture-based course designed to introduce students to key moments and concepts in the field of environmental history since c. 1400. This course will track the reciprocal influence of humans and the non-human world since the so-called "Columbian Exchange," emphasizing the ways in which the non-human world—from plants, animals, and disease organisms to water, topography, and geography—have shaped human endeavours. At the same time, students will engage with many of the ways in which human beings have shaped the world around us, from empire and colonization, to industrial capitalism, nuclear power, and modern wildlife conservation.

Prerequisite: any 100-level History course

Breadth Requirements: Society and its Institutions (3)

HIS219Y1 - Medieval Mediterranean History

Hours: 48L/20T

A new approach to medieval history, this course focuses on the Mediterranean world as a site for the convergence of Western and Eastern Christian, Muslim, Jewish, sub-Saharan African, and East Asian peoples and cultures. It treats topics such as political and military conflict, including Muslim conquests and the Crusades; the situation of religious minorities; religious conversion; cultural exchange; commerce; slavery; aspects of material culture, such as art and architecture; and family and gender from a comparative perspective.

Exclusion: HIS303H1, HIS308H1

Breadth Requirements: Society and its Institutions (3)

HIS220Y1 - The Shape of Medieval Society

Hours: 48L/20T

Immersion in medieval western Europe with extensive readings of primary sources from late Roman times to 1500 and use of works of art. The goal is to understand medieval society on its own terms, as much as possible.

Exclusion: HIS220Y5/ HIS220H5/ HIS221H5/ HISB60H3/ HISB61H3

Breadth Requirements: Society and its Institutions (3)

HIS221H1 - African American History to 1865

Hours: 24L/10T

An introduction to the history of Africans and people of African descent in the Americas generally, and the United States in particular. Major themes include modernity and the transatlantic slave trade; capitalism and reparations; Atlantic crossings; African women, gender, and racial formations; representation, resistance, and rebellion; nation-building; abolitionism and civil war; historical method and the political uses of the past.

Exclusion: HIS298Y1 (2016-17)

Recommended Preparation: Any 100-level course in Arts or Humanities

Breadth Requirements: Society and its Institutions (3)

HIS222H1 - African American History from 1865 to the Present

Hours: 24L/10T

This course examines the history of black people in the United States after the abolition of slavery. Major themes include the promise and tragedy of Reconstruction; gender and Jim Crow; race and respectability; migration, transnationalism, and 20th century black diasporas; black radical traditions and freedom movements; intersectionality and black feminisms; the drug war and mass incarceration; sexuality and the boundaries of blackness.

Exclusion: HIS 298Y1 (2016-17)

Recommended Preparation: Any 100 level course in Arts or Humanities

Breadth Requirements: Society and its Institutions (3)

HIS230H1 - Indigenous and Early Colonial Caribbean History

Hours: 24L/12P

This course introduces students to the study of Caribbean history from first human settlement to the late 18th century. Subject matter covered includes indigenous social structures, cosmology and politics; the process of European conquest; the economics, society and political order of colonial society; the Middle Passage; the everyday lives and struggles of enslaved peoples.

Exclusion: HIS294Y1

Breadth Requirements: Society and its Institutions (3)

HIS231H1 - Revolution and Emancipation in the Colonial Caribbean

Hours: 24L/12P

This course explores the history of the late eighteenth and nineteenth century Caribbean, from the Haitian Revolution to the U.S. occupation of Cuba and Puerto Rico. Students learn about the first struggles for political independence; the struggle to abolish the slave trade; slave emancipation; indentureship and struggles to define freedom after emancipation.

Exclusion: HIS294Y1

Breadth Requirements: Society and its Institutions (3)

HIS240H1 - The First World War: A Global History

Hours: 24L/10T

This course offers an introduction to the global history of the First World War. It aims to introduce students to the different ways historians have sought to understand the war, as well as scholarly and intellectual challenges that come with studying an event of this magnitude and horror. In general, students will examine the origins and causes of the conflict, survey the factors that shaped the course of the war, and consider how and why the fighting came to an end when it did. These broad approaches will be supplemented with consideration of specific examples from around the world.

Breadth Requirements: Society and its Institutions (3)

HIS241H1 - Europe in the Nineteenth Century, 1815-1914

Hours: 24L/10T

Intellectual changes in Britain, France, Germany, Austria-Hungary, Italy, Russia and other countries are discussed. The course examines large-scale political, social and cultural changes that created today's modern world.

Exclusion: [EUR200Y1/](#) [EUR200Y5/](#) [FGI200Y5/](#) [HIS241H5/](#) [HISB93H3](#)

Recommended Preparation: [HIS103Y1/](#) [HIS109Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS242H1 - Europe in the 20th Century

Hours: 24L/10T

The evolution of European politics, culture, and society from 1914: the two world wars, Fascism and Nazism, the post-1945 reconstruction and the movement towards European integration.

Exclusion: [EUR200Y1/](#) [EUR200Y5/](#) [FGI200Y5/](#) [HIS242H5/](#) [HISB94H3](#)

Breadth Requirements: Society and its Institutions (3)

HIS243H1 - Early Modern Europe (15th-17th Centuries)

Hours: 24L/10T

The shape of modern European society is set in the early modern period. Expansion overseas sets some European

nations on a path of imperial and colonial development which shapes international relations into the twenty-first century. The revival of classical forms revolutionizes art and architecture, and provides new models for education, politics, law, science, and gender relations. The split of the Christian Church into Protestant and Catholic denominations inspires intellectual and artistic creativity, sparks violent wars, and is brought around the globe by missionaries. Modern states and our fascination with determining 'national identity' take shape out of the competition between dynasties, social classes, faiths and territories.

Breadth Requirements: Society and its Institutions (3)

HIS244H1 - Early Modern Europe, 1648-1815

Hours: 24L/10T

This course will survey the history of Europe from the Thirty Year's War to the Napoleonic Empire. We will explore the principal themes which transformed Europe during this period: the birth of the modern nation-state; the increasing scale of warfare; the scientific revolution and the Enlightenment; the emergence of capitalist economies; the consolidation of transatlantic colonial empires; and the French Revolution. Students will read a range of primary and secondary source materials; attendance at lectures, participation in tutorials, course reading, and writing are all required components for this course.

Breadth Requirements: Society and its Institutions (3)

HIS245H1 - European Colonialism, 1700- 1965

Hours: 24L/10T

This course will introduce students to the history of European colonialism. It will analyze the nature of colonial rule, the impact of empire on both colonies and metropolises, and delve into questions of power, gender and culture. It considers slavery and abolition, imperial networks, colonial capital, colonial competition, colonial cultures, the twilight of colonial rule, and a variety of settings.

Breadth Requirements: Society and its Institutions (3)

HIS247H1 - The Second World War: A Global History

Hours: 24L/12T

This course offers an introduction to the global history of the Second World War. It aims to expose students to historiographical debates regarding the war, the use of primary sources, and the scholarly and intellectual challenges that come with studying an event of this magnitude and horror. In general, students will examine the origins and causes of the conflict, survey the factors that shaped the course of the war, and consider how and why the fighting came to an end when it did. These broad approaches will be supplemented with consideration of specific examples from around the world.

Breadth Requirements: Society and its Institutions (3)

HIS250Y1 - History of Russia

Previous Course Number: HIS250H1

Hours: 48L/20T

This course introduces the history of the modern Russian Federation and its predecessor states from the founding of Moscow through the ages of the Russian Empire and of the Soviet Union to the present day. Emphasis is placed on reading primary source documents.

Exclusion: HIS250H1/ HIS250H5

Breadth Requirements: Society and its Institutions (3)

HIS251Y1 - History of East Central Europe

Hours: 48L/20T

The Polish, Czech, and Hungarian background; the Balkans in the late medieval and early modern periods. Renaissance, Reformation and Counter-reformation, decline and national awakening to the beginning of the 19th century. Partitioned Poland, nationalism in the 19th century; World War I, Peace Settlement, interwar years and the Communist period.

Breadth Requirements: Society and its Institutions (3)

HIS252H1 - Soccer: History of the World's Game

Hours: 24L/10T

This course examines the history of the world's most popular sport, soccer, in broader social, economic, and cultural context. We will retrace the emergence of the modern game in nineteenth-century Britain; its mobilization as a vehicle for political, social, cultural, and gendered identities; fandom and supporter culture; and the economics of soccer. Students will engage with a wide

range of primary sources and scholarly literature from an array of disciplinary perspectives (including history, cultural anthropology, sociology, literature, and economics). While the course is appropriate for History majors, it is accessible to students from other units as well.

Breadth Requirements: Society and its Institutions (3)

HIS262H1 - Canada: A Short History of Here

Hours: 24L/10T

Designed for non-history students, this introductory survey fulfills the Society and Its Institutions breadth requirement. It is open to all who want to know more about Canada. Make sense of politics today and develop a deeper understanding of Canadian society and its institutions through study of the major events and demographic trends that have shaped the development of this country. Topics will include First Nations/newcomer relations (including treaties and the Truth & Reconciliation report), French/English relations (including Quebec separatism), regionalism, the North, economic history, constitutional developments, and the development of Canadian identity, including common symbols associated with Canada. No essay requirement. Instead, enhance your critical reading and thinking skills through short writing assignments and weekly discussions of tutorial readings.

This course will not count towards History program requirements or as a prerequisite for upper level courses

Exclusion: HIS263Y1, HIS264H1

Breadth Requirements: Society and its Institutions (3)

HIS264H1 - Critical Issues in Canadian History

Hours: 24L/12T

This course introduces key issues in Canadian history and foundational principles of historical analysis. It is particularly suited to potential History majors/specialists, although other students are welcome. It is not a comprehensive survey. Examples serve to deepen analysis and introduce important methods and debates, preparing students for upper year courses in Canadian history.

Exclusion: HIS262H1, HIS263Y1

Breadth Requirements: Society and its Institutions (3)

HIS265Y1 - Black Canadian History

Hours: 48L/20T

This course explores the historical experiences of persons of African descent in Canada. We begin by examining the presence of free and enslaved Africans in New France and British North America, moving into twentieth century themes exploring Black liberation, immigration and resistance in Canada. The course brings into sharp focus the historical production of racial categories and racist thought and practice in Canada and examines the experiences of Black Canadians within the context of 'multiculturalism.'

Breadth Requirements: Society and its Institutions (3)

HIS266H1 - Asian Canadian History

Hours: 24L/10T

The course examines the history of Asian Canadians from the mid-1800s to the present by analyzing their contributions to the socio-cultural, economic, and political development of Canada. It explores how Asian Canadian history reconfigures prevailing understanding of race, migration, multiculturalism, and national identity through intersectional, comparative, and transnational frameworks.

Exclusion: CDN230H1, UNI230H1

Breadth Requirements: Society and its Institutions (3)

HIS267H1 - Business History

Hours: 24L/10T

Business, and its history and evolution, is a fundamental aspect of understanding modernity. Capitalism and globalization, two of the most important aspect of business and its history, shape our world in profound ways. Utilizing a "glocal" approach that combines global and Canadian business history cases within a transnational context, this course seeks to interrogate and understand the evolution and development of modern business, capitalism and globalization from the late 19th Century into the early 21st.

Breadth Requirements: Society and its Institutions (3)

HIS268H1 - Law and History

Hours: 24L/10T

The Federal Interpretation Act of Canada states that the 'law is always speaking'. If the law is always speaking, then it must be speaking in present tense. But if it only speaks in present tense, does it have a past? How might we consider the field of law from different historical angles? This course will introduce students to different historical approaches to and uses of law. Using examples from a wide array of legal traditions (e.g. Common Law, Civil Law, Indigenous Law, Islamic Law), the course will help students gain a greater appreciation for the function, study, and development of law across different times and places.

Breadth Requirements: Society and its Institutions (3)

HIS271Y1 - American History Since 1607

Hours: 48L/20T

A survey of the economic, social, cultural, and political history of the United States from the colonial era to present times.

Exclusion: HIS271H5/ HIS272H5/ HISB30H3/ HISB31H3

Breadth Requirements: Society and its Institutions (3)

HIS280Y1 - History of China

Hours: 48L/20T

A critical history of the place we today call China from prehistoric times to the 21st century, tracing shifting borders, identities, governments, and cultures while challenging any singular definition of "China."

Breadth Requirements: Society and its Institutions (3)

HIS282Y1 - History of South Asia

Hours: 48L/20T

A rigorous survey of major themes in the history of South Asia (mapped largely but not exclusively by India, Pakistan and Bangladesh), using primary and secondary sources and addressing historiographical debates. Delves into regional complexities and considers broad questions about political economy, colonial governing, anti-colonial nationalism, capitalism, gender and cultural politics. Emphasizes the period after 1750; begins with an overview of ancient, medieval and Mughal history before turning to the British Empire. Addresses how understandings of pre-modern worlds inform contemporary politics and cultures; contextualizes South Asia within current global formations.

Exclusion: [HIS282H5/ HISB57H3](#)

Breadth Requirements: Society and its Institutions (3)

HIS283Y1 - History of Southeast Asia: How the Lands Below the Winds Reshaped the World

Hours: 48L/20T

This course examines how the cultural, economic, religious, and social histories of "Southeast Asia" [Brunei, Cambodia, East Timor, Indonesia, Laos, Malaysia, Myanmar (Burma), the Philippines, Thailand, & Vietnam] shaped the world as we see it today. Lectures will demonstrate how the millennia-long cultural and material exchanges Southeast Asians engaged via water across the Indian and Pacific Oceans and the lands across Eurasia affected the lives of its inhabitants and the proximal and distant regions with which it had contact. In Tutorials, students will be trained to read primary sources. Themes to be explored include economic exchange, colonialism and its impact, gender and sexual diversity, and religion and society.

Breadth Requirements: Society and its Institutions (3)

HIS285H1 - History of Chinese Diasporas in the Americas

Hours: 24L/12T

Explores histories of ethnic Chinese and Chinese diasporas in the Americas, especially in Canada and the United States. Investigates events from the 19th, 20th, and 21st centuries. Topics include migrations, diasporas, transnationalism, identities, families, communities, cultures, and racialization, as well as relations with their host societies and with China.

Breadth Requirements: Society and its Institutions (3)

HIS291H1 - Latin America: The Colonial Period

Previous Course Number: HIS291Y1

Hours: 24L/10T

The evolution of Spanish and Portuguese America from pre-Columbian civilizations to the wars of independence.

Exclusion: [HIS291Y1/ HIS290H5](#)

Breadth Requirements: Society and its Institutions (3)

HIS292H1 - Latin America: The National Period

Previous Course Number: HIS292Y1

Hours: 24L/10T

A survey of Latin American history from the wars of independence to the present day.

Exclusion: [HIS292Y1/ HIS290H5](#)

Breadth Requirements: Society and its Institutions (3)

HIS293H1 - The Making of the Atlantic World, 1480-1804

Hours: 24L/10T

This course introduces students to the social, economic, cultural and political history of the Atlantic world resulting from European exploration and colonization in the Americas beginning in the 1490s and the growth of the transatlantic slave trade. It focuses on interactions between Africans, Europeans, and Amerindians around the Atlantic Ocean.

Breadth Requirements: Society and its Institutions (3)

HIS295Y1 - History of Africa

Hours: 48L/24T

An introduction to African history and the methodology of history more broadly, this course sets out to question how historians do history, examine differences in theories of knowledge, and explore the relationship between academic and cultural representations of the past. The course also draws on anthropology and related disciplines.

Exclusion: [HIS295H5](#)

Breadth Requirements: Creative and Cultural Representations (1), Thought, Belief and Behaviour (2)

HIS297Y1 - History of Africa from a Gender Perspective

Hours: 48L/20T

This survey of African history is analytical rather than narrative in its approach. It rethinks the way that African history has hitherto been conceptualized and taught by placing the question of gender at the center of the story of Africa.

Breadth Requirements: Society and its Institutions (3)

HIS298Y0 - Themes & Issues in History

Hours: 48L/20T

This is a thematic survey course addressing issues of gender, class, ethnicity, religion, war, economics and political strife through broad-sweep coverage of a region's history. Prepares students for upper-level study through exposure to eyewitness primary sources and conflicting secondary interpretations of events.

Breadth Requirements: Society and its Institutions (3)

HIS299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

HIS299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

JSH300H1 - Literature and History in Russia

Hours: 24L

History and Literature were always interconnected in Russia. Writers not only sought to reflect the society around them, but were themselves often social critics and political figures. The course examines key texts in Russian literary tradition both as works of art and as primary sources for the historian. All readings in English.

Recommended Preparation: [HIS250H1/ HIS250Y1](#) or [SLA240H1/ SLA241H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

HIS300H1 - Energy and Environment in Canadian History

Hours: 24L

This course examines the history of energy in Canada from the perspective of environment, business, state, daily life, and culture, with emphasis on the twentieth century. Topics include Big Oil, large dams, nuclear power, energy colonialism, pipeline disputes, climate change, daily life, and the relationship between energy and social power.

Breadth Requirements: Society and its Institutions (3)

HIS301H1 - World War II France

Hours: 24L

This third-year lecture course examines the experience of the Second World War in France. Special attention is paid to questions of collaboration, resistance and accommodation. Other topics include the role of the French overseas colonies in this era, the issue of internal vs. external resistance, and the fate of civilian populations. Students engage with a set of primary and secondary sources as well as visual material that includes films.

Exclusion: [VIC102H1](#)

Recommended Preparation: A course in modern European history

Breadth Requirements: Society and its Institutions (3)

HIS302H1 - Material Culture in Victorian Britain

Hours: 24L

An examination of the products of the first and second industrial revolutions in Victorian England, including food, drugs, clothing, and trains. This course focuses on the cultural history of commercialization and consumerism.

Prerequisite: 1.0 HIS credit

Recommended Preparation: [HIS109Y1](#), [HIS241H1/ HIS349H1](#)

Breadth Requirements: Society and its Institutions (3)

HIS304H1 - Topics in Middle East Histories

Hours: 24L

An in-depth examination of Middle East historical issues. Content in any given year depends on instructor. See History Website for more details.

Breadth Requirements: Society and its Institutions (3)

HIS305H1 - Death and Life in Plantation America

Hours: 24L

This course examines the experiences of enslaved people in the Americas and introduces students to the complex history of the 'plantation' as a site of violence; social, economic, labour and political organization and experimentation; kinship, culture and community recreation and rebellion. The course will focus on the 17th to 19th century Caribbean in comparative and transnational relationship to the continental Americas.

Prerequisite: HIS230H1/ HIS271Y1/ HIS291H1/ HIS295Y1

Breadth Requirements: Society and its Institutions (3)

HIS307H1 - Oral Histories of Asian Canadians

Previous Course Number: HIS286H1

Hours: 24L

This course explores the cultural and social history of everyday life as it affected Asian Canadians with focus on Chinese, Filipinos and South Asians from the 1960s to present. It introduces oral history and documentary film as key research methods for understanding changing cultural practices and identities within families, in food, and in social settings within and beyond ethnic communities.

Exclusion: HIS286H1

Recommended Preparation: HIS266H1

Breadth Requirements: Society and its Institutions (3)

JHM307H1 - Islamic Legal History: Formation and Encounters

Hours: 24L

This course examines the formation and encounters of Islamic Law with Legal Others from roughly the 8th century CE to the early formation of the Ottoman Empire. The Islamic legal tradition arose in a complex historical context in which legal traditions mapped onto, and gave legal cover to, imperial polities. As the Islamic polity expanded, so too did the imagination of jurists having to

contend with new realities (political, geographic, economic, and otherwise). This course will introduce students to the formation of Islamic law in a context of contending legal orders, its ongoing encounters with legal orders in the course of Islamic expansion, and the retraction of Islamic legal orders and institutions as a tradition that anticipated political sovereignty experienced the limits of that sovereignty. Examples will be drawn from the Middle East, Africa, South Asia, and South East Asia. The course will introduce students to the disciplinary focus of Law and History through a focus on doctrine, institution, and the implications on both as territory and people are subject to varying waves of imperial designs and local resistance.

Prerequisite: HIS268H1

Breadth Requirements: Society and its Institutions (3)

HIS309H1 - Global Reformations

Hours: 36L

The Reformation has traditionally been approached as a 16th century European phenomenon. This course will consider religious reform movements from the 15th to 18th centuries and set these into a global framework, considering spatial and sensory dimensions, cross-cultural engagements and exchanges, and intersections with race and colonization.

Prerequisite: One of HIS102Y1/ HIS109Y1/ HIS243H1.

Students who do not meet these prerequisites are encouraged to contact the Department.

Exclusion: HIS340H5/ RLG346H5

Breadth Requirements: Society and its Institutions (3)

HIS310H1 - Democracy and Dissent in Postwar Canada

Hours: 24L

This course will explore the background, experience, and legacy of protest movements in Canada in the post-1945 era. The course will draw on the latest historical literature and will situate Canadian social movements in the broad transnational context in which they unfolded. Topics will include anti-racist movements, feminism, nationalism, Indigenous politics, environmentalism, labour, and the New Right and the New Left.

Prerequisite: 1.0 HIS/ JHA/ JHM/ JHN/ JIH/ JSH credit

Recommended Preparation: HIS264H1/ HIS262H1

Breadth Requirements: Society and its Institutions (3)

HIS311H1 - Canada in the World

Previous Course Number: HIS311Y1

Hours: 24L

Ranging from the fifteenth through to the turn of the twenty-first century, students will learn about the treaties, trade agreements and alliances, as well as the informal traditions, working relationships and cultural ties that shape relations of people living within the boundaries of present-day Canada with the world. For this course, "international relations" is broadly defined, including military, political, economic, environmental and immigration policies, both official and informal.

Exclusion: HIS311Y1/ HIS311H5/ HISC46H3

Recommended Preparation: A course in Canadian history or politics

Breadth Requirements: Society and its Institutions (3)

HIS312H1 - Immigration to Canada

Hours: 24L

From the colonial settlement to 21st century, immigration has been a key experience and much debated in Canadian life. Drawing on primary sources, as well as historical and contemporary scholarship, this course will discuss migration, citizenship and belonging as central features in Canada's experience of immigration. This course focuses on the individuals, groups, and collectives who built, defined, contested, and reimagined this country, to help make and remake Canada through immigration.

Recommended Preparation: HIS263Y1/ HIS264H1

Breadth Requirements: Society and its Institutions (3)

HIS313H1 - People and Other Animals in History

Hours: 24L

What happens to history when we consider nonhuman animals as subjects and actors alongside humans? This course revisits episodes, events, and historical processes with nonhuman animals in mind to explore the interpretive and analytic possibilities that emerge when other animals are considered as full participants in the historical record. Thematic focus is located in the Atlantic world since the early modern period.

Recommended Preparation: HIS218H1

Breadth Requirements: Society and its Institutions (3)

HIS314H1 - Twentieth-Century Quebec

Previous Course Number: HIS314Y1

Hours: 24L

This course will explore the history of Quebec in the 20th century. In addition to looking at more traditional themes focused on nationalism and constitutional politics, we will also look at the history of encounter between groups of different backgrounds and origins. As such, we will place a large emphasis on colonialism and Indigenous history, and the politics of language, race, and immigration. Themes will include, among others, the history of Quebec in an era of British imperialism, jazz, the art world, literature, the Oka Crisis, and Quebec's ties to Haiti and other parts of the non-Western world.

Exclusion: HIS314Y1

Breadth Requirements: Society and its Institutions (3)

HIS315H1 - Decolonial Vietnamese Histories

Hours: 24L

This course introduces students to the narratives that diverse actors have used to talk about Vietnamese histories. We will focus on the histories and perspectives of the indigenous peoples of the peninsula, ethnic minority groups, as well as that of the majority "Kinh people." We'll explore themes which have been central to shaping the geographic space, the socio-political regimes, and the cultural entity we now call "Viet Nam," while examining how varying types of historical method and archival strategies can influence the telling of histories. What kinds of techniques did Vietnamese and Western political actors, scholars, and writers, employ to narrate the Vietnamese past(s) and how do these visions tell us about the crafter of these narratives? What counts as "history" and who gets/got to decide? Whose experiences were relevant in the different epistemological approaches?

Breadth Requirements: Society and its Institutions (3)

HIS316H1 - Competing Colonialism in Northeast China The Harbin Experiment

Hours: 24L

This course explores the political, social, and cultural history of Harbin, one of the major cities of Manchuria/Northeast China, the product of competing Russian, Japanese, and international colonialism during the first half of the twentieth century, and an early case of multi-ethnic emigration and multiculturalism.

Prerequisite: [HIS250Y1](#) or [HIS280Y1](#) or [HIS281Y1](#)
Breadth Requirements: Society and its Institutions (3)

HIS317H1 - 20th Century Germany

Hours: 36L

A survey of modern German history in the twentieth century. Topics include World War I and the postwar settlement, the Weimar Republic, the National Socialist dictatorship, the Holocaust, the division of Germany, the Cold War, German reunification, Germany and the European Union, nationalism, political culture, war and revolution, religious and ethnic minorities and questions of history and memory.

Prerequisite: One of the following is required: [HIS103Y1](#)/[HIS109Y1](#)/ ([HIS241H1](#), [HIS242H1](#))/ [EUR200Y1](#)
Breadth Requirements: Society and its Institutions (3)

HIS318H1 - Histories of the "Wild" West

Hours: 24L

What happens when histories of North America begin in the West? This course examines the critical challenges that the myths and legacies of the West pose to North American history, from pre-contract to 1990. Themes include First Nations and colonialism, immigration, racism, economic development, regionalism, prostitution and illegal economies.

Breadth Requirements: Society and its Institutions (3)

HIS319H1 - Histories of the Horn of Africa

Hours: 24L

A critical, introductory survey exploring major themes in the political, social, economic, and cultural histories of the Horn of Africa [Somalia, Ethiopia, Djibouti, Eritrea, Sudan, South Sudan] and surrounding Red Sea and Indian Ocean from prehistoric times to the present.

Recommended Preparation: A course in African History such as [HIS295Y1](#), [AFR290H1](#), [AFR370H1](#)
Breadth Requirements: Society and its Institutions (3)

HIS320H1 - Barbarian Invasions and the Fall of the Roman Empire

Hours: 24L

Covers major events and themes for the period 300-600, including decline of Greco-Roman paganism, conversion to Christianity, individual barbarian groups (Ostrogoths, Visigoths, Huns, Burgundians, Vandals, Franks, Lombards), their culture and impact on empire, Justinian's reconquests.

Recommended Preparation: [HIS220Y1](#)
Breadth Requirements: Society and its Institutions (3)

HIS321H1 - Dark Age Europe, 7th-10th Centuries

Hours: 24L

Surveys major events and figures for the period c. 600-1000, including: Pope Gregory the Great, the Merovingian Franks, Lombard Italy, Byzantine civilization, the rise of Islam, Charlemagne, the Carolingian Renaissance, the Vikings, Anglo-Saxon England to King Alfred, the Ottonians.

Exclusion: [HIS320Y1](#)
Recommended Preparation: Some ancient history, ancient Greek or Latin language, early Christianity, Celtic history, Old Irish and Old English languages.
Breadth Requirements: Society and its Institutions (3)

HIS322H1 - Topics in African History

Hours: 24L

Selected topics on a specific period, aspect or themes in African history. Topics in any given year depend on the instructor.

Recommended Preparation: [HIS295Y1](#)
Breadth Requirements: Society and its Institutions (3)

HIS323H1 - Rites of Passage and Daily Life in the Middle Ages

Hours: 36L

Reflecting on the life cycle and rites of passage in the medieval period gives the opportunity to study the daily lives of peasants, nobles, monks, nuns, and (Christian and Jewish) burghers, and to observe from an interesting angle the differences between female and male life experiences.

Recommended Preparation: [HIS220Y1](#) or a course on the Middle Ages in any discipline
Breadth Requirements: Society and its Institutions (3)

JHN323H1 - Indigeneity in the Caribbean

Hours: 24L

Explores the legacies of the pre-Columbian era, as well as the post-1492 experiences of people of pre-Columbian Caribbean ancestry. Examines the origins and consequences of the Caribbean's narrative of "indigenous absence", as well as the relationship between indigeneity, globalization and diaspora.

Prerequisite: INS201Y1/ (INS201H1, INS202H1)/ HIS230H1/ HIS231H1/ CAR120Y1/ CAR220H1/ CAR221H1/ NEW224Y1/ CAR225H1/ CAR226H1
Breadth Requirements: Society and its Institutions (3)

HIS324H1 - The Criminalization of Protest in Latin American History

Hours: 24L

The criminalization of protest is generally understood in terms of policing, and the use of legal measures, including states of exception, to quell dissent. Criminalization can also refer to the stigmatization of individuals, groups, and communities by the state, and the marginalization of working class or racialized groups. This course invites students to study lived experiences of criminalization in Latin American history.

Prerequisite: HIS292H1
Recommended Preparation: HIS397H1, or a course on policing/human rights
Breadth Requirements: Society and its Institutions (3)

HIS325H1 - Imperial Russia

Hours: 24L

This course focuses on Russia's history during a period of remarkable change and turbulence, when the country more firmly established its far-flung empire while simultaneously attempting to define itself as a nation. From the wars and reforms of Peter the Great through the end of the empire during the First World War, the course touches on questions of social and cultural change, and the political events that allowed or constrained them.

Prerequisite: 1.0 HIS credit at the 200+ level
Breadth Requirements: Society and its Institutions (3)

HIS326H1 - Topics in Asian Histories

Hours: 24L

A specific period in some aspect of Asian histories. Topics in any given year depend on the instructor.

Prerequisite: HIS280Y1
Breadth Requirements: Society and its Institutions (3)

HIS327H1 - Rome: The City in History

Hours: 24L

This course investigates the development of Rome from its mythical foundations, through the Empire, the Middle Ages, Renaissance and Baroque to the modern city, illustrating the shift from the pagan to the papal city and its emergence as the capital of a united Italy after 1870 and a modern European metropolis.

Prerequisite: At least 1.0 credit European History course(s)
Exclusion: VIC348Y1 (offered in Fall/Winter 2012-2013, 2013-2014, 2014-2015 and 2015-2016) and VIC162H1 (offered in Fall 2016, Fall 2017 and Fall 2018)
Breadth Requirements: Society and its Institutions (3)

HIS328H1 - Modern China

Previous Course Number: HIS328Y1
Hours: 24L

An examination of political, social and economic developments in modern Chinese history to the present day. Main topics may include the decline of the Imperial order and the challenge of Western imperialism; the Republican period; the rise of the Communist movement; the People's Republic of China.

Prerequisite: HIS280Y1
Exclusion: JMC201Y1, HIS328Y1, EAS285H1
Recommended Preparation: HIS380H1
Breadth Requirements: Society and its Institutions (3)

HIS329H1 - Central Middle Ages (900-1200)

Hours: 36L

A chronological survey from 900, with the foundation of Cluny by the Duke of Aquitaine, the last waves of Vikings, and the decline and end of the Carolingian Empire, up to 1200, with the Battle of Bouvines, the more formal

organization of the first universities and the construction of the Gothic cathedrals. The main question will be: what happens when there is no real central power? Why did the term "Feudalism," now nicknamed the F word by medievalists, was judged inappropriate to describe the situation?

Recommended Preparation: [HIS219Y1](#), [HIS220Y1](#) or a course on the Middle Ages from any discipline

Breadth Requirements: Society and its Institutions (3)

HIS330H1 - Germany from Frederick the Great to the First World War

Hours: 24L

Topics include German reactions to the French Revolution, Napoleonic occupation, the Wars of Liberation, industrial expansion, the Revolutions of 1848, unification in 1871, Bismarck and Kaiser Wilhelm II, everyday life, gender relations, avant-garde culture, nationalism, antisemitism, colonialism, and the Great War of 1914-18.

Prerequisite: 1.0 HIS credit at the 100- or 200-level excluding [HIS262H1](#)

Exclusion: [HIS341Y1](#)

Recommended Preparation: [HIS241H1](#)

Breadth Requirements: Society and its Institutions (3)

HIS331H1 - Modern Baltic History

Hours: 24L

The history of the Baltic countries, Estonia, Latvia and Lithuania from 1900 to the present day, with emphasis on the emergence of independent Baltic states, World War II, communist era, the Baltic Revolution, the restoration of independence and European integration.

Recommended Preparation: [HIS250H1](#)/ [HIS250Y1](#)/ [HIS251Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS332H1 - Crime and Society in England, 1500-1800

Hours: 24L

The changing nature of crime and criminal justice in early-modern England; the emergence of modern forms of policing, trial and punishment.

Prerequisite: 9.0 credits, including 1.0 HIS credit excluding [HIS262H1](#)

Breadth Requirements: Society and its Institutions (3)

HIS333H1 - Catholic Asia in the Early Modern Era, 1500-1800

Hours: 24L

This course examines the impact of Catholicism in Asia, from its introduction to its relevance in the contemporary global order. Students will be introduced to how Catholicism and the technologies accompanying it affected historical transitions in local communities in Asia as well as how the growth of these communities has affected the global Catholic Church.

Prerequisite: 1.0 credit in European or Asian history. Students who do not meet the prerequisite are encouraged to contact the Department.

Breadth Requirements: Society and its Institutions (3)

HIS334H1 - The Great Wall of China

Hours: 24L

Why was the Great Wall built? Did it keep the people of Mongolia out, or to keep the people of China in? How has it come to represent China's past and present as a paradoxical symbol of civilizational glory and political tyranny? For almost 2,000 years, the question of how to handle the nomads of Mongolia was a central question of China's foreign policy. Wall construction, in various places and times, was one of the consistent responses to the "nomad problem." The Great Wall came to symbolize the economic, military, political, and cultural clash between China and Mongolia. It was also a site of diplomacy, markets, and peace-making. Students will explore fundamental questions in frontier history and international relations: do contrasting environments create contrasting cultures? do culture and ideology constrain the responses of policy makers to foreign threats? does crossing a frontier change us? The class covers the 3rd century BCE to the 20th century CE, considering perspectives from both sides of the wall, and the legacy of the Great Wall as an international symbol in the present day.

Prerequisite: A 100-level HIS course

Breadth Requirements: Society and its Institutions (3)

HIS335H1 - Canadian Legal Histories

Hours: 24L

This course examines Canadian legal history through differing Indigenous, civil, and common law legal traditions, using multiple categories of analysis, including race, gender, class, spirituality and sexuality. Legal history is a strong and engaging field of study in Canada. Topics will include constitutional histories, treaties, law-making, differing systems of land tenure, the franchise and the structure of deliberative bodies (e.g. legislatures), courts and systems of justice, policing and criminal law, punishment (including histories of incarceration and alternatives).

Prerequisite: 4.0 credits including [HIS263Y1/ HIS264H1](#). Students who do not meet the prerequisite are encouraged to contact the Department.

Breadth Requirements: Society and its Institutions (3)

HIS336H1 - The History of Amazonia

Hours: 24L

Contrary to traditional images, Amazonia is not a pristine forest with sparse human presence. This course explores the complex societies developed around the Amazon River Basin and how they shaped the forest's configuration. The course centers on the development of European colonialism in the region, the different modes of commodity extraction, and projects to incorporate Amazonia into nation-states. Amazonia's history – and the history of the people who live there – helps us imagine the region's role in our era of acute climate challenges. Topics may include empire, Indigenous history, economic development, and environment.

Prerequisite: 9.0 credits

Recommended Preparation: [HIS218H1/ HIS230H1/ HIS291H1/ HIS292H1](#)

Breadth Requirements: Society and its Institutions (3)

HIS337H1 - Culture, Politics and Society in 18th Century Britain

Previous Course Number: HIS337Y1

Hours: 24L

Deals with England, Scotland, Ireland and the Atlantic World. Addresses major political, social, economic, intellectual and cultural highlights of the "long" eighteenth century. Deals with enlightenment, industrialization and the loss of the first British empire. Interrogates Britain's emerging status as a world power.

Exclusion: [HIS337Y1](#)

Recommended Preparation: [EUR200Y1/ HIS109Y1/ HIS243H1/ HIS244H1/ HIS368H1](#)

Breadth Requirements: Society and its Institutions (3)

HIS338H1 - The Holocaust, to 1942

Previous Course Number: HIS338Y1, HIS398Y1

Hours: 24L/5T

German state policy towards the Jews in the context of racist ideology, bureaucratic structures, and varying conditions in German-occupied Europe. Second Term considers responses of Jews, European populations and governments, the Allies, churches, and political movements.

Prerequisite: Completion of 6.0 credits

Exclusion: [HIS388Y1/ HIS398Y1/ HIS338H5](#)

Recommended Preparation: A course in modern European history

Breadth Requirements: Society and its Institutions (3)

HIS339H1 - History of Modern Israel

Hours: 24L

This course explores the history of the Jewish state from the rise of Zionism to the present. Topics include the Zionist-Arab conflict, immigration, the construction of a new Hebrew identity, interactions between religion and state, the impact of the Holocaust, and the relationship between Israel and the Jewish diaspora.

Prerequisite: [HIS208Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS340H1 - The Ottoman Empire, 1800-1922

Hours: 24L

The course examines the history of the Ottoman Empire from the beginning of the 19th c. until its dissolution in the course of World War I. Topics include Ottoman reforms, relations between the Empire's populations and the state, the diplomatic interactions known as "the Eastern Question," the Young Turk revolution, gender, and intellectual, cultural and artistic developments.

Prerequisite: 1.0 HIS credit at the 200-level excluding [HIS262H1](#)

Exclusion: [HIS389H1](#) (The Ottoman Empire, 1800-1922)

Breadth Requirements: Society and its Institutions (3)

HIS341Y1 - Germany Among the Global Empires 1840-2010

Hours: 48L

This course places Germany's long national history in a transnational and global context, exploring its place among the global empires of Britain, Russia, France and the United States from the mid-seventeenth century to the present. Events of the German nation-state's political, social and cultural developments are analyzed through a framework focused on both military expansion and the development of the world economy after 1700. Particular attention is paid to the interplay between strategies for a global expansion and transformations in national culture, looking at Germany in the world and the world in Germany.

Prerequisite: Two HIS courses from the following: [HIS102Y1/](#) [HIS103Y1/](#) [HIS107Y1/](#) [HIS109Y1/](#) [HIS241H1/](#) [HIS242H1/](#) [HIS243H1/](#) [HIS244H1/](#) [EUR200Y1/](#) [HIS250Y1/](#) [HIS271Y1](#)

Recommended Preparation: [HIS102Y1/](#) [HIS109Y1/](#) [HIS241H1/](#) [HIS242H1](#)

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

HIS342H1 - Political and Psychological Liberation in 20th Century Africa

Hours: 24L

This course examines the growth of movements for the political liberation of Africa and the psychological liberation of Africans from Western imperialism and cultural hegemony. Postcolonial thinking and art was fundamental to the project of decolonization. It uses primary text and films to explore African cultural and intellectual history.

Breadth Requirements: Society and its Institutions (3)

HIS343H1 - History of Modern Intelligence

Hours: 24L

This course explores the rise of modern intelligence over the long 20th century, from Anglo-Russian imperial competition before World War I through to the post-9/11 era. Students will study the contribution of intelligence services to victories and defeats in war, peace, and the grey areas in between. The course will also examine the relationship between intelligence services and society. Occasionally, this course will emphasize a specific theme of modern intelligence history; a specific type of intelligence; or the evolution of intelligence in a particular

state. Details regarding specific topics will be available on the department's website on an annual basis.

Prerequisite: 9.0 credits

Exclusion: [HIS343Y1](#)

Recommended Preparation: [HIS240H1](#) and [HIS247H1](#)

Breadth Requirements: Society and its Institutions (3)

HIS344H1 - The Global Cold War

Hours: 24L

This course examines the Cold War through its global dimensions, going beyond the American-Soviet bipolar rivalry to explore the impact of the Cold War in Latin America, Asia, and Africa. Students will work closely with original primary sources and interrogate historical interpretations of the Cold War through different regional and thematic perspectives.

Exclusion: [HIS344Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS345H1 - History and Film

Hours: 24L

This course is designed to further students knowledge of films relationship to the events they depict and their undeniable power as representational systems to render history effectively. This will necessarily entail both close examination of the formal systems film rely upon and an understanding of the distinction between fictional and non-fictional forms in film.

Prerequisite: 2.0 HIS credits excluding [HIS262H1](#).

Students who do not meet these prerequisites are encouraged to contact the Department.

Recommended Preparation: [CIN201Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS346H1 - Rice, Sugar, and Spice in Southeast Asia: a History of Food in the Region

Hours: 24L

This course examines the importance of food products in the livelihoods of the inhabitants of Southeast and in the world economy. It traces the circulation of these products within the Southeast Asian region in the pre-modern period, into the spice trade of the early modern era, and the establishment of coffee and sugar plantations in the late colonial period, and the role of these exports in the contemporary global economy.

Recommended Preparation: 1.0 credit in Asian or European history

Breadth Requirements: Creative and Cultural Representations (1)

HIS347H1 - The Country House in England 1837-1939

Hours: 24L

This course examines class distinction and community through the lens of the English country house from 1837 to 1939. Topics include owners, servants, houses, collections, gardens and rituals such as fox hunting.

Prerequisite: 1.0 HIS credit

Recommended Preparation: HIS109Y1, HIS241H1/HIS349H1

Breadth Requirements: Society and its Institutions (3)

HIS348H1 - Topics in Gender History

Hours: 24L

An in-depth examination of issues in gender history. Content in any given year depends on instructor. See History website for more details.

Breadth Requirements: Society and its Institutions (3)

HIS349H1 - History of Britain: Struggle for Power

Hours: 24L

An introduction to the history of modern Britain with emphasis on the crown, class, gender, political parties, race, ethnicity, European Union and Brexit.

Prerequisite: 4.0 credits

Breadth Requirements: Society and its Institutions (3)

HIS350H1 - Topics in European Histories

Hours: 24L

Selected topics on a specific period and/or region in European Histories

Prerequisite: 4.0 credits

Breadth Requirements: Society and its Institutions (3)

HIS351H1 - The Soviet Union and After

Previous Course Number: HIS351Y1

Hours: 24L

A survey of the history of the Soviet Union and its successor states beginning with the collapse of the Russian Empire. The course draws on scholarly literature, memoirs, and often film to understand the social, cultural, and political developments of the Soviet state, including famine, terror, and war.

Prerequisite: 1.0 HIS credit at the 200+ level

Exclusion: HIS351Y1/ HIS351H5

Breadth Requirements: Society and its Institutions (3)

HIS352H1 - A History of Women in Pre-colonial East Africa

Hours: 24L

This course examines the lived experience of women in societies, communities and polities of varying sizes across territories that cover eight contemporary East African states. It encompasses the period from 1000 B.C to the end of the nineteenth century. Topics covered are clustered under four broad themes: a) Ecology, work in commodity production, wealth and exchange relations; b) "Institutional" power, ideology and structures; c) "Creative" power particularly in the areas of healing, resistance/contestation and transformation; and d) Violence, war and vulnerability.

The course challenges present day gender and identity categories applied to Africa's deep past and highlights critical nuances of gender, identity and power dynamics in Africa.

Prerequisite: AFR150Y1 or any course in African History

Breadth Requirements: Society and its Institutions (3)

HIS353Y1 - Poland: A Crossroads of Europe

Hours: 48L

Social and political history of Poland from the 10th to the 20th century. Analysis of the political history in a broader, central European context; consequences of Christianization of medieval Poland and the Polish-Lithuanian union; Sarmatian culture, Antemurale, Polish Messianism and Cordon sanitaire.

Prerequisite: HIS251Y1/permission of the instructor
Breadth Requirements: Society and its Institutions (3)

HIS354H1 - Jews of Arab Lands: From the Prophet Muhammad to European Colonialism

Hours: 24L

This course introduces the Jewish communities of Arab lands by examining their social, cultural, and political experiences from the Arab conquests to European colonialism. We will examine the sometimes “symbiotic” relationship that existed between Jews and Muslims as well as the factors that threatened it by considering both the history of everyday life and of high culture. Many of Judaism’s formative institutions and literary works were developed in the Middle East and we will explore how they developed in dialogue with Islamic culture. Finally, we will study the impact of Western colonialism and nineteenth-century encounters between “Western” and “Eastern” Jews.

Prerequisite: 4.0 credits
Recommended Preparation: HIS208Y1/ HIS219Y1
Breadth Requirements: Society and its Institutions (3)

HIS355H1 - A History of Pre-modern Medicine

Hours: 24L

This course surveys major themes and developments in the history of medicine from c.600 BCE to 1800 CE. Topics include: Hippocrates, Galen and their reception in the Middle Ages; monasteries, medicinal gardens and hospitals; medieval licensing of physicians and pharmacists; medieval scholastic medicine; the Black Death; Renaissance anatomy and charlatans; New World drug discoveries; William Harvey’s heart, William Withering’s foxglove, the isolation of morphine.

Prerequisite: 1.0 credit in medieval or pre-modern history. Students who do not meet the prerequisite are encouraged to contact the Department.
Recommended Preparation: HIS220Y1
Breadth Requirements: Society and its Institutions (3)

HIS356H1 - War in Canadian History

Hours: 24L

This course examines war as a major force in the history of Canada from the so-called colonial period to recent times. In addition to key dynamics in military history (e.g.

battles, military organization), the course will stress the links between war and society, politics, empire and colonialism, technology and environment, memory and commemoration, and identity. Topics may include indigenous warfare and diplomacy, imperial rivalry in early North America, Canada and the British Empire, the world wars, the Cold War, and peacekeeping. Soldiers and peaceniks are both welcome and will be equally happy and annoyed.

Recommended Preparation: HIS264H1
Breadth Requirements: Society and its Institutions (3)

HIS357Y0 - The Renaissance

Exclusion: HIS357Y1/ HIS357H1/ HIS357Y5/ HIS357H5

HIS358H1 - Canadian History in 100 Objects

Hours: 24L

The Canadian history course focuses on museums and material culture (history of objects). Using museum visits, lectures, and workshops, students in this course have an opportunity to conduct original research on how artefacts (and the institutions that house them) offer us new ways of thinking about the past.

Prerequisite: HIS264H1 or HIS263Y1
Exclusion: HIS389H1 (Material Culture in Canada)
Breadth Requirements: Society and its Institutions (3)

HIS359H1 - Regional Politics and Radical Movements in the 20th Century Caribbean

Hours: 24L

The role of nationalism, race and ethnicity, class conflict and ideologies in the recent development of Caribbean societies; Europe’s replacement by the United States as the dominant imperial power in the Caribbean; how this mixture of regional and international pressures has led to widely differing political systems and traditions.

Recommended Preparation: HIS294Y1/(HIS230H1, HIS231H1)
Breadth Requirements: Society and its Institutions (3)

HIS360H1 - Critical Histories of the Black Canadian Experience

Previous Course Number: HIS360Y1

Hours: 24L

This course addresses the long and diverse historical experiences of black people in Canada. Each year the course is offered, it will emphasize a specific theme which may include slavery and its afterlife, black liberation and resistance, black geographies, (im)migration, education, black diasporic communities, and black womanhood and gendered politics. Discussions in this course will consider the place of Canada within broader transnational debates about race and blackness. Details regarding specific topics will be available on the department's website on an annual basis.

Prerequisite: 1.0 HIS credit

Exclusion: HIS360Y1

Recommended Preparation: Any 100/ 200-level HIS course

Breadth Requirements: Society and its Institutions (3)

HIS361H1 - The Holocaust, from 1942

Hours: 24L/5T

Follows on HIS338H1. Themes include: resistance by Jews and non-Jews; local collaboration; the roles of European governments, the Allies, the churches, and other international organizations; the varieties of Jewish responses. We will also focus on postwar repercussions of the Holocaust in areas such as justice, memory and memorialization, popular culture and politics.

Prerequisite: Completion of 6.0 credits and HIS338H1

Exclusion: HIS338Y1/ HIS361H5

Recommended Preparation: A course in modern European history

Breadth Requirements: Society and its Institutions (3)

HIS362H1 - Topics in Early American History

Hours: 24L

Special topics in Early American History (to 1830). Topics will vary by the instructor and year.

Prerequisite: 4.0 credits

Recommended Preparation: HIS271Y1

Breadth Requirements: Society and its Institutions (3)

HIS363H1 - Dynamics of Gender in Canadian History

Hours: 24L

A lecture course which deals thematically with gender issues in Canadian history (including familial roles, changing patterns of work and employment, and participation in the public sphere).

Prerequisite: HIS263Y1/ HIS264H1

Breadth Requirements: Society and its Institutions (3)

HIS364H1 - From Revolution to Revolution: Hungary Since 1848

Hours: 24L

This course offers a chronological survey of the history of Hungary from the 1848 revolution until the present. It is ideal for students with little or no knowledge of Hungarian history but who possess an understanding of the main trends of European history in the 19th and 20th centuries. The focus is on the revolutions of 1848-1849, 1918-1919, the 1956 Revolution against Soviet rule and the collapse of communism in 1989. The story has not been invariably heroic, violent and tragic.

Prerequisite: A 100 level HIS course

Breadth Requirements: Society and its Institutions (3)

HIS365H1 - History of the Great Lakes Region

Hours: 24L

This course is a survey of the Great Lakes Region as a "trans-national space" from the 1780s to recent times. Attention is focused on the development of the region from indigenous space to industrial heartland and its subsequent deindustrialization. Key themes include economic development, colonialism and re-settlement, environmental history (particularly of the lakes themselves), and the role of the Canada-US border in shaping the region. The course includes material from both Canadian and American history. Considerable attention is paid to Toronto as a Great Lakes city.

Recommended Preparation: HIS264H1 or HIS271Y1

Breadth Requirements: Society and its Institutions (3)

JIH366H1 - Indigenous Histories of the Great Lakes, 1815 to the Present

Previous Course Number: HIS366H1

Hours: 24L

Explores the history of Aboriginal peoples (Indigenous and Métis) living in the Great Lakes Region after the Great Lakes were effectively split between British North America (later Canada) to the north and the United States to the south, when a rapidly increasing newcomer population on both sides of the border marginalized Indigenous peoples and settled on their land. Topics include a comparative examination of Indigenous experiences of colonialism, including treaties and land surrenders as well as the development of government policies aimed at removing and/or assimilating Great Lakes peoples. This course will also study resistance by First National and Tribal Councils to those programs over nearly two centuries and assess local strategies used for economic and cultural survival.

Prerequisite: HIS263Y1/ HIS264H1/ HIS271Y1/ INS200H1/ INS201Y1/ (INS201H1, INS202H1)

Exclusion: HIS366H1/ HIS369Y1

Breadth Requirements: Society and its Institutions (3)

HIS367H1 - The British Home Front: Britain in the Second World War, 1939-45

Hours: 24L

This course examines how British civilians responded to the Second World War at home in Britain. Topics include the Blitz, rationing, propaganda, directed labour, enemy internment, evacuees, the changing role of women, radio and movies.

Breadth Requirements: Society and its Institutions (3)

HIS368H1 - Early Modern Britain, 1485-1660

Hours: 24L

Introduction to the political, social and religious history of early modern England, Scotland and Ireland. Particular attention will be paid to the history of the monarchy, the Protestant Reformation, gender issues and relations between different parts of the British Isles.

Recommended Preparation: EUR200Y1, HIS109Y1/ HIS243H1/ HIS244H1

Breadth Requirements: Society and its Institutions (3)

JIH369H1 - Great Lakes Indigenous Histories to 1830

Previous Course Number: HIS369H1

Hours: 24L

Explores the history of Aboriginal Peoples (Indigenous and Métis) living in the Great Lakes Region from the 16th century to the aftermath of the War of 1812. Weaving together interdisciplinary sources, this course examines central events in Great Lakes history including the formation of the Wendat and Haudenosaunee Confederacies and key Anishinabek alliances, the arrival of European newcomers into an Indigenous landscape, the social-political impact of new diseases, reactions to European missionaries, the fur trade, major conflicts and peace processes including the Great Peace of Montreal, the Treaty of Niagara and the 60 Years War for the Great Lakes; and ending with the period of significant encroachment of new settlers on Indigenous lands.

Prerequisite: HIS263Y1/ HIS264H1/ HIS271Y1/ INS200H1/ INS201Y1/ (INS201H1, INS202H1)

Exclusion: HIS369H1/ HIS369Y1

Breadth Requirements: Society and its Institutions (3)

JJH370H1 - Soviet Jewish History, Culture, and Diaspora

Hours: 24L

The course examines history, culture and diaspora of Russian-speaking Jews in the 20th and 21st century. We will discuss how Jews experienced Russian Revolutions of 1917, Stalinism, Soviet Great Terror of 1937, World War II and the Holocaust, post-war challenges, the "Thaw" of the 1960s, "Stagnation of the 1980s", Dissident movement, Perestroika, collapse of the Soviet Union and the development of post-Soviet diasporas. We will read works by both Soviet Jewish authors, including Vassily Grossman, Shira Gorshman, Isaac Babel, Rivka Levin and post-Soviet ones, such as David Bezmozgis, Lara Vapnyar and Boris Fishman, study artifacts of anti-religious propaganda such as Red Passover Celebration scripts, discuss oral histories of Soviet Jews, read scripts of Yiddish theater performances (in English translation), and scrutinize (and maybe even try) recipes of Soviet Jewish food. No prior knowledge is required, but if you took a course on European history or Jewish history, it will be an asset.

Prerequisite: Completion of 4.0 credits.

Exclusion: CJS391H1 (*Soviet Jewish History, Culture, and Diaspora*), offered in Fall 2024.

Recommended Preparation: CJS201H1 or HIS208Y1

Breadth Requirements: Society and its Institutions (3)

HIS370H1 - Modern Palestine

Hours: 24L

Weekly lectures provide an overview of the political struggles over Palestine between Zionist and Palestinian national movements in the twentieth century in the context of British colonialism, UN negotiations and resolutions, Third-Worldism, superpower rivalry and everyday cooperation and occupation on the ground.

Exclusion: [HIS339H1](#)

Recommended Preparation: [HIS340H1](#)

Breadth Requirements: Society and its Institutions (3)

HIS371H1 - Canadian Political History

Hours: 24L

This course examines the history of Canadian politics from the late colonial period to the recent past. Lectures and discussions will focus attention on specific political issues (responsible government, Confederation, war, welfare, battles over voting rights, campaigns for social change, etc.) but also consider the deeper structural, social, economic, and cultural dynamics that shaped politics over time. The course takes a broad view of politics (elections and parties but also social movements, interest groups, bureaucracy). A key theme is the nature of political power in a democratic polity.

Prerequisite: [HIS264H1](#)/ [HIS263Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS372H1 - Topics in U.S. History

Hours: 24L

In-depth examination of selected periods or themes in U.S. history. Topic in any given year depends on instructor. See History website for more details.

Exclusion: [HIS372H5](#)/ [HISD36H3](#)

Recommended Preparation: [HIS271Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS373H1 - Servants and Masters, 1000-1700

Hours: 36L

To explore the history of all types of servants, from the domestic slaves to the ladies-in-waiting, in Western Europe between 1000 and 1700. The goal will be to observe their working and living conditions, including the ones of life-cycle servants (between adolescence and early adulthood), as well as the changing perception of service through time.

Recommended Preparation: [HIS220Y1](#), [HIS243H1](#) or a course on the Middle Ages or Early Modern Europe.

Breadth Requirements: Society and its Institutions (3)

HIS374H1 - Mass Incarceration in the United States

Hours: 24L

The United States is home to five percent of the world's population but twenty-five percent of the world's prisoners, including a disproportionate number of African American, Latinx, and Native American people. This vast carceral archipelago is the subject of extensive scholarly and public debate over the history, ethics, and function of incarceration in the United States. In this course, we will explore the rise of contemporary mass incarceration from an interdisciplinary perspective that draws upon history, sociology, and legal studies to reveal the linkages among state-formation, politics, capitalism, and modern punishment as well as community responses to mass incarceration.

Prerequisite: [HIS271Y1](#)/ ([HIS221H1](#), [HIS222H1](#))

Exclusion: [HIS389H1](#) (Topics in History: Mass Incarceration in the United States) offered in Fall 2018, 2019, and 2022.

Breadth Requirements: Society and its Institutions (3)

HIS375H1 - Crime and Punishment in the Early Modern World

Hours: 36L

What did it take to break the law in the period 1400-1800, and how were people prosecuted and punished when they did? We will review the kinds of crimes that triggered arrest, the different types of law codes in place and the importance of the revival of Roman law, ways of avoiding prosecution, the criminalization of "deviance", judicial processes in colonization, and variations based on age and gender. We'll also look at forms of punishment, including the varieties of corporal and capital punishment, the operation of prisons, the use of exile and transportation.

Prerequisite: 4.0 credits

Exclusion: [HIS357Y1](#)

Recommended Preparation: [HIS243H1/ HIS244H1](#)
Breadth Requirements: Society and its Institutions (3)

HIS377H1 - The United States in the World

Previous Course Number: HIS377Y1

Hours: 24L

An exploration of the history of American foreign relations.

Each year, this course will emphasize a specific era of the history of American foreign relations (For instance: foreign relations during the Revolution and Early Republic; the long nineteenth century; the rise of American power since 1898); or a specific theme (for instance: America as an imperial power; America at war; the presidency and foreign policy, etc.) Details regarding specific topics will be available on the department's website on an annual basis.

Prerequisite: 9.0 credits

Recommended Preparation: [HIS271Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS378H1 - America in the 1960s

Hours: 24L

A survey of one of the most turbulent decades in American history. Examines the political, social, economic and cultural revolutions that transformed the face of America.

Prerequisite: [HIS271Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS379H1 - Vietnam at War

Hours: 24L

This course examines war in modern Vietnam, beginning with Vietnamese nationalism in the 19th century to the conflicts with France, the United States, and China. We will consider the military, political, economic, and cultural contexts of these complex and interconnected wars, especially from the viewpoint of the Vietnamese people.

Prerequisite: 1.0 HIS credit in any field excluding [HIS262H1](#)

Exclusion: [HIS400H1](#)

Breadth Requirements: Society and its Institutions (3)

HIS380H1 - Chinese Canadian History

Hours: 24L

Explores histories of Chinese in Canada, and how scholars have researched, interpreted and analyzed them in ethnic, multicultural, transnational and diasporic contexts. Students will be exposed to a wide range of research approaches including: archives, oral history, community studies, visual studies, popular culture, racial-ethnic studies, and food studies. Chinese in Greater Toronto will be a focus.

Recommended Preparation: [HIS266H1](#)

Breadth Requirements: Society and its Institutions (3)

HIS381H1 - Youth in the Early Modern World

Hours: 36L

Adolescence is a time of adaptation between childhood and adulthood, and it's often described as a modern invention. This course will look at how people in their teens and twenties navigated social demands and expectations around work, law, education, and marriage in the period 1400-1700. The course will address issues around biology, gender, violence, sexuality, mobility, and forced labour, with attention to comparing experiences between distinct traditions in different parts of the early modern world.

Prerequisite: 4.0 credits

Exclusion: [HIS357Y1](#)

Recommended Preparation: Any one of [HIS205H1/ HIS220Y1/ HIS230H1/ HIS243H1/ HIS244H1/ HIS265Y1/ HIS280Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS382H1 - China from the Mongols to the Last Emperor

Hours: 24L

This course traces the history of Chinese empire from its political reorganization, economic expansion, and cultural efflorescence in the 11th century, through its peak of power in the 18th century, and to its decline during the 19th. We will consider how these centuries broke with as well as continued previous developments, and how they have influenced Chinese and world history in the last 150 years.

Prerequisite: [HIS280Y1](#)/ [EAS103H1](#)/ [EAS209H1](#) or comparable course in E. Asian/Chinese history
Breadth Requirements: Society and its Institutions (3)

HIS383Y1 - Women in African History

Previous Course Number: HIS383H1
Hours: 48L

This course subjects our increasing knowledge about African women's history from the mid-19th century to the present to critical analysis. It goes beyond restoring women to history and seeing African women as victims impacted upon and struggling against colonialism and neo-colonialism. It examines how African women's lived experiences have been represented, packaged, and delivered to different audiences.

Prerequisite: [HIS295Y1](#)/ [HIS297Y1](#)/ [AFR150Y1](#)/ [AFR250Y1](#)/ [AFR351Y1](#)/ [POL301Y1](#) or permission from the Instructor
Exclusion: [HIS383H1](#)/ [HISC97H3](#)
Breadth Requirements: Society and its Institutions (3)

HIS384H1 - The Baltic Sea Region from the Vikings to the Age of Nationalisms

Hours: 24L

This course traces political, cultural and socio-economic developments in North-Eastern Europe, the Baltic Sea region, from the Viking Age to the end of the 19th century. Topics include the crusades, the Hanseatic League and trade, the Reformation, the struggle for hegemony between the Swedish and Russian empires, the Enlightenment, national movements, and industrialization.

Prerequisite: 9.0 credits including 1.0 HIS credit
Recommended Preparation: A course in European History
Breadth Requirements: Society and its Institutions (3)

JHA384H1 - Japan in the World, Mid-16th to Mid-20th century

Hours: 24L

This course examines Japan within the context of world history from the mid-16th to the mid-20th century. Rather than seek comprehensive coverage of Japan's national history along a linear timeline, we will use Japan as a lens through which to consider key moments in the history of the modern world.

Prerequisite: One course from: [HIS102Y1](#), [HIS103Y1](#), [HIS107Y1](#), [HIS241H1](#), [HIS242H1](#), [HIS244H1](#), [HIS250H1](#), [HIS250Y1](#), [HIS271Y1](#), [HIS280Y1](#), [HIS281Y1](#), [HIS282Y1](#), [HIS283Y1](#), [HIS291H1](#), [HIS291Y1](#), [HIS292H1](#), [HIS292Y1](#), [HIS297Y1](#), or 1.0 credit from [CAS200H1](#), [CAS201H1](#), [CAS202H1](#), [CAS310H1](#), [CAS320H1](#).
Breadth Requirements: Society and its Institutions (3)

JMH385H1 - Islamic Law and the Modern State

Previous Course Number: NMC385H1
Hours: 24L

What happens to the shari'a when it is applied by modern nation-states? This course introduces students to the way states, with Muslim majorities and minorities, from Canada to Malaysia, passing by Nigeria, Palestine, Iran, and Pakistan approach, accommodate, or apply Islamic law. We also discuss the way Muslims, lay and scholarly, talk about, practice, and follow Islamic law under modern states. Based on an examination of law in practice, we will be able to theorize modern transformations of the shari'a and provincialize the modern state and its legal regime.

Prerequisite: [NMC103H1](#)/ [RLG204H1](#)
Breadth Requirements: Thought, Belief and Behaviour (2)

HIS386H1 - Fascism

Hours: 24L

A comparative and transnational examination of fascist movements and regimes in Europe during 1919-1945. Beginning with Mussolini in Italy and Hitler in Germany, this course analyzes manifestations of the phenomenon in various European countries, including France, Spain, the Baltic states, Central Europe and Scandinavia. We analyze the factors that led to fascist movements obtaining power in certain countries and to their failure in others. Collaboration with Nazi Germany during the Second World War is also explored. Finally, we discuss whether the concept of 'generic' fascism can also be applied to other regions and periods.

Prerequisite: 9.0 credits, including 1.0 HIS credit excluding [HIS262H1](#)
Exclusion: [HIS389H1](#) (Topics in History: Fascism), offered in Winter 2018 and Winter 2019
Recommended Preparation: A course in European History
Breadth Requirements: Society and its Institutions (3)

HIS387H1 - France 1610-1830

Previous Course Number: HIS388Y1

Hours: 24L

This course considers the history of France, from the rise of absolutist monarchy under the seventeenth-century, Bourbon monarchs, through the Enlightenment, the Revolution and Napoleonic Empire, and the Restoration, to the fall of the constitutional monarchy in 1848.

Prerequisite: One HIS/FRE course

Breadth Requirements: Society and its Institutions (3)

HIS388H1 - France Since 1830

Previous Course Number: HIS388Y1

Hours: 24L

A study of French society, politics and culture from 1830 to the present. Special attention is paid to watersheds like the Paris Commune, the Dreyfus Affair and the Vichy regime, to issues of regionalism/nationalism, cultural pluralism, women's rights, intellectual and cultural trends, and decolonization.

Prerequisite: EUR200Y1 or one course in HIS/ FRE

Exclusion: HIS388Y1

Breadth Requirements: Society and its Institutions (3)

HIS389H1 - Topics in History

Hours: 24L

In-depth examination of historical issues. Content in any given year depends on the instructor and further prerequisites vary from year to year. See History website for more details.

Prerequisite: 4.0 credits, including 1.0 HIS credit excluding HIS262H1

HIS389Y1 - Topics in History

Hours: 48L

In-depth examination of historical issues. Content in any given year depends on instructor. See History website for more details.

Prerequisite: 9.0 credits, including 1.0 HIS credit excluding HIS262H1. Further prerequisites vary from year to year, consult the department.

HIS390H1 - Slavery in Latin America

Hours: 24L

This course focuses on the history of slavery in Latin America from its origins in the fifteenth century to its abolition in the nineteenth century. Readings will draw from primary sources and historical scholarship related to a range of topics, including the slave trade, gender, religious and cultural practices, and emancipation.

Prerequisite: HIS231H1/ HIS291H1. Students who do not meet the prerequisite are encouraged to contact the Department.

Breadth Requirements: Society and its Institutions (3)

HIS393H1 - Digital History

Hours: 24L

Explores implications for history and its methods of the shift from print to digital sources. Imparts introductory skills in the manipulation digital media, such as the use of maps, GIS and big data.

Prerequisite: 200-level History course/ DHU235H1/ DHU236H1

Exclusion: HIS389H1 (Topics in History: Digital History), offered in Summer 2015, Winter 2016, and Winter 2017

Breadth Requirements: Society and its Institutions (3)

JHA394H1 - The Asia Pacific War

Hours: 24L

This course examines the Second World War in the Asia Pacific region and highlights: (1) how imperialism and colonialism of both the Euro-American and Japanese varieties were central to the War's outbreak, conduct, and "resolution"; (2) various "local" rather than simply national experiences and memories of the War, including those of marginalized groups in Japan and its colonies, "comfort women," victims of war atrocities, Asian North Americans, African Americans, and Pacific Islanders.

Prerequisite: One course from: HIS107Y1, HIS242H1, HIS250H1, HIS251H1, HIS263Y1, HIS271Y1, HIS280Y1, HIS281Y1, HIS282Y1, HIS283Y1, HIS284Y1, HIS292Y1, HIS311Y1, HIS317H1, HIS328H1, HIS338H1, HIS343H1, HIS343Y1, HIS344H1, HIS344Y1, HIS351Y1, HIS361Y1, HIS377H1, HIS385H1, HIS385Y1, or 1.0 credit from CAS200H1, CAS201H1, CAS202H1, CAS310H1, CAS320H1.

Recommended Preparation: One or more courses on Japan, China, Korea, or Southeast Asia in any department.

Breadth Requirements: Society and its Institutions (3)

HIS394H1 - 20th and 21st Century African Icons: Media and Biography

Hours: 24L

Superseding 19th century European missionary and explorers' accounts of Africa; media in the 20th and 21st centuries have unequivocally played a key role in shaping the globe's views of Africa and Africans. In 2005, BBC Focus on Africa put out an impressive list of more than 100 "African Icons". Since then, a number of websites have come up with various lists of African icons. Who are the African icons and what makes them icons? How have the media contributed in making them icons?

Prerequisite: HIS295Y1/ HIS297Y1/ HIS383H1/ HIS383Y1/ HIS386H1/ HIS481H1/ NEW160Y1/ NEW261Y1/ AFR351Y1/ POL301Y1/ POL361H1 or by permission from the Instructor.

Breadth Requirements: Society and its Institutions (3)

HIS395H1 - Independent Studies

This course provides an opportunity for exceptional third-year students to undertake an independent research project on a topic for which there is not a suitable course offering. Students must find an appropriate supervisor from the Department, submit a proposal, and receive approval for the project. Students must be enrolled in either a History Specialist or Major program; have taken at least 3.0 HIS credits with a B+ average; and have approval of an instructor willing to supervise the project. Not eligible for CR/NCR option.

Prerequisite: 9.0 credits (Year 3 or higher) including a 77% average in 3.0 HIS credits (excluding HIS262H1)

HIS395Y1 - Independent Studies

This course provides an opportunity for exceptional third-year students to undertake an independent research project on a topic for which there is not a suitable course offering. Students must find an appropriate supervisor from the Department, submit a proposal, and receive approval for the project. Students must be enrolled in either a History Specialist or Major program; have taken at least 3.0 HIS credits with a B+ average; and have approval of an instructor willing to supervise the project. Not eligible for CR/NCR option.

Prerequisite: 9.0 credits (Year 3 or higher) including a 77% average in 3.0 HIS credits (excluding HIS262H1)

HIS396H1 - The Progressive Era and Rise of Big Business in America

Hours: 24L

This course examines the rise of big business in America and its relationship to social and economic changes in United States in the so-called Progressive Era (roughly 1880-1920). We will focus on several themes: the evolution and characteristics of big business; rise of organized labor; evolution of business-government relations; social and economic reform movements; and the changing status of immigrants, African Americans, and women (both white and African-American). In short, we will be studying a pivotal moment in the transformation of modern American society.

Exclusion: HIS389H1 (Topics in History: Business and Society), offered in Fall 2016 and HIS372H1 (Topics in U.S. History: The Progressive Era and Rise of Big Business), offered in Winter 2018

Recommended Preparation: HIS271Y1

Breadth Requirements: Society and its Institutions (3)

HIS397H1 - Political Violence and Human Rights in Latin America

Hours: 24L

This course will explore human rights theory and practice from a Latin American perspective. There will be a focus on the local derivation, development and impact of the movement for human rights in Latin America. The course will focus on the history of organized protest against violence in the twentieth century.

Prerequisite: HIS292H1

Breadth Requirements: Society and its Institutions (3)

HIS398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities....> Not eligible for CR/NCR option.

HIS398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities....> Not eligible for CR/NCR option.

HIS399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

HIS399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

HIS400H1 - The American War in Vietnam

Hours: 24S

This course examines the French and American Wars (1945-75) in Vietnam and its effects on the population of Vietnam and Southeast Asia. It begins with a brief overview of pre-colonial Vietnamese history and moves into a study of the impact and legacies of colonial rule and centres on the impact of the Wars on the cultures, economies, and societies of Southeast Asia.

Prerequisite: [HIS379H1](#) and 14.0 credits or permission of the instructor

Exclusion: [HIS315H1](#)

Breadth Requirements: Society and its Institutions (3)

HIS401H1 - The Cold War through its Archives

Previous Course Number: HIS401Y1

Hours: 24S

The course reviews the history of the Cold War in light of formerly-secret archival documents. Examples include the US White House Tapes and Venona decrypts; massive declassification of records in the ex-Soviet bloc; and parallel developments in China, Cuba, and other Communist states. Archival discoveries have cast new light, not just on individual episodes (e.g., Cuban Missile Crisis of 1962, Soviet invasion of Afghanistan in 1979) but on the origins, strategies, and driving forces of this 45-

year conflict. The focus will be mainly on the superpowers and their alliance systems.

Prerequisite: [HIS311Y1/ HIS344H1/ HIS344Y1/ HIS377H1](#)

Exclusion: [HIS401Y1](#), [HIS306H5](#)

Breadth Requirements: Society and its Institutions (3)

HIS402H1 - Sephardim: The Jews of Spain and their Diasporas

Hours: 24S

This course follows the journey of Sephardic Jews from their beginnings in Iberia to their diasporas in the Ottoman Empire and the New World. We begin by studying Jewish life and culture in Iberia itself. We then study the expulsion from Spain and Portugal and how Sephardic Jews managed to reconstruct their communities and maintain their identity in new lands until the Nineteenth Century. Themes discussed include mysticism and messianism, conversos and heresy, and trade and exploration. We will conclude by looking at how Sephardic Jews shaped ideas of modernity that were distinct from those of their Ashkenazi coreligionists.

Prerequisite: 9.0 credits including 1.0 HIS/ JHA/ JHM/ JHN/ JIH/ JSH credit

Breadth Requirements: Society and its Institutions (3)

HIS403H1 - Jews and Christians in Medieval and Renaissance Europe

Previous Course Number: HIS403Y1

Hours: 24S

The course focuses on aspects of Jewish-Christian relations ca.300-1600, such as royal and ecclesiastical Jewish policies; religious polemics; intellectual collaboration; social and economic interaction; anti-Judaism and religious violence. (Joint undergraduate-graduate)

Exclusion: [HIS403Y1](#)

Recommended Preparation: [HIS208Y1/ HIS220Y1/ HIS243H1/ HIS322Y1/ HIS357Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS404H1 - Advanced Topics in U.S. History

Hours: 24S

Selected topics in U.S. history. Topics in any given year depend on the instructor. Please see History website for details.

Prerequisite: [HIS271Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS405Y1 - Canadian Foreign Relations

Hours: 48S

A course on Canadian external relations since 1945. Topics include Canada and the Cold War, the Korean War, the Suez crisis and the war in Vietnam, membership in international organizations, and bilateral relations with other countries. (Joint undergraduate-graduate)

Prerequisite: [HIS311Y1](#)/ [POL312Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS406H1 - Advanced Topics in Gender History

Hours: 24S

An in-depth examination of issues in gender history. Content in any given year depends on instructor. See History website for more details.

Breadth Requirements: Society and its Institutions (3)

HIS407H1 - Imperial Germany, 1871-1918

Hours: 24S

Historiographical controversies and the latest empirical findings concerning social conflict and political mobilization under Bismarck and Wilhelm II. Problems raised by competing schools of interpretation include definitions of the authoritarian state, bourgeois hegemony, localism and regionalism, radical nationalism, workers' culture, and gender relations. (Joint undergraduate-graduate)

Prerequisite: [HIS317H1](#), [HIS330H1](#). Students who do not meet the prerequisite are encouraged to contact the Department.

Exclusion: [HIS407H5](#)

Breadth Requirements: Society and its Institutions (3)

HIS408H1 - Topics in Environmental History

Hours: 24S

This advanced undergraduate seminar will explore themes in environmental history. Thematic focus will vary from year to year, and may include extinction, nuclear power in environmental history, empire and environment, toxicity and contamination, climate change, the Columbian exchange, the Anthropocene, agriculture, animals, and/or other themes. Time period and geographical focus will also vary in keeping with the thematic focus of this course.

Prerequisite: [HIS218H1](#) or [HPS316H1](#)

Breadth Requirements: Society and its Institutions (3)

HIS409H1 - Spas and Water Cures

Hours: 24S

This fourth-year seminar immerses students into the rich world of mineral water cures. It explores the relationship between the medical sciences and society, and the connections between prescriptive and normalizing medical rituals and sites of pilgrimage, capitalism, and sociability. The seminar will also focus on shifting medical meanings, on gender dynamics at these sites, and on uses and practices surrounding hot water springs, as well as varied experiences of spa towns as sites of leisure and tourism. The course is transnational and features case studies in Mexico, Madagascar, Britain, Germany, Tunisia, Japan, France, Austria, Hungary, Greece, and Canada.

Prerequisite: 2.0 HIS credits

Breadth Requirements: Society and its Institutions (3)

HIS410H1 - The Mongol Century

Hours: 24S

This course traces the emergence, expansion, consolidation, and fragmentation of the medieval empire of the Mongols through translated primary sources produced by those conquered by and in contact with the empire (Chinese, Islamic, European) and the conquerors (Mongolian). Topics include the life of Chinggis (Genghis) Khan, medieval Eurasian geopolitics and society, Mongol administration of China and Persia, military strategies and technology, the role of religion in imperial administration, cross-cultural encounter and exchange, and the legacy of the Mongols in the world.

Prerequisite: 14.0 credits including 2.0 HIS credits

Breadth Requirements: Society and its Institutions (3)

HIS411H1 - Great Trials in History

Hours: 24S

This seminar course will study a handful of great trials in close detail. Using materials from the modern period in Europe and North America, we will look at the clash of ideas represented in these high-profile cases, the historical setting in which they were embedded, the human drama, legal and sometimes constitutional issues, and their impact both on their societies and our own.

Breadth Requirements: Society and its Institutions (3)

HIS413H1 - Slave Emancipation in the Atlantic World

Hours: 24S

This course explores the long process of the 'unfinished revolution' of abolition in the Atlantic World from the 18th-late 19th century Atlantic World. It will take a comparative and transnational approach, with materials that include primary printed sources, classic texts, current historiography, literature, explorations of the history of emancipation through digital and visual culture. We will examine scholarship and historical debates about abolition in the Caribbean, North and South America, West Europe and Africa.

Prerequisite: 0.5 credit from: HIS221H1, HIS230H1, HIS231H1, HIS244H1, HIS245H1, HIS265Y1, HIS271Y1, HIS291H1, HIS295Y1, HIS357Y1, HIS373H1

Breadth Requirements: Society and its Institutions (3)

HIS414H1 - Down and Out in Medieval Europe

Hours: 24S

Explores the life conditions of individuals on the lower echelons of medieval society (the poor, servants and apprentices, the exiled, prisoners, slaves, foreigners and lepers). In parallel, we will discuss the various conceptions of poverty that prevailed in the Middle Ages. These objectives will allow us to glimpse the European Middle Ages from an unusual angle as well as reflect on important socio-economic and religious changes.

Recommended Preparation: A course on the Middle Ages in any discipline

Breadth Requirements: Society and its Institutions (3)

HIS415Y1 - Nationalism & Memory in Modern Europe

Previous Course Number: HIS415H1

Hours: 48S

Investigates the modern concept of the nation and its connections to the idea of collective memory in twentieth-century Europe. Through reading and discussing seminal works on nationalism and national memory, we will discuss the connections between modern notions of nation and practices of remembering.

Prerequisite: Two history courses from the following:

HIS102Y1, HIS103Y1, HIS109Y1, HIS241H1, HIS242H1, HIS243H1, HIS244H1, HIS245H1, EUR200Y1, HIS317H1

Exclusion: HIS415H1

Recommended Preparation: HIS102Y1, HIS109Y1, HIS241H1, HIS242H1, HIS243H1

Breadth Requirements: Society and its Institutions (3)

HIS416H1 - Orientalism and Nationalism in Nineteenth-Century Germany

Hours: 24S

In 1771, with the translation of the Zend-Avesta by the French Scholar Anquetil-Duperron, a new era opened in German national culture. From the philosophy of Johann Gottfried von Herder to the novels of Thomas Mann, this course analyzes the ways in which German writers defined the substance and place of national culture in their writings about India, Central Asia and the East.

Prerequisite: HIS241H1, and one of HIS242H1/HIS317H1

Breadth Requirements: Society and its Institutions (3)

HIS417H1 - Sex Work History in North America, 1763 onwards

Previous Course Number: HIS417Y1

Hours: 24S

This seminar explores the historical effects of the "world's oldest profession" in Canada and beyond. Using a range of texts, including film, memoirs, oral history and visual culture, it seeks to enhance both historical and contemporary discussions of the sex trade by examining its rich, difficult and problematic pasts. Seminar readings and discussions will examine the lives and experiences of multiple sex trade-involved populations, from affluent 19th-century madams to streetwalkers and queer and trans communities.

Prerequisite: [HIS263Y1/ HIS264H1](#)

Exclusion: [HIS417Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS418H1 - Themes in Canadian Environmental History

Hours: 24S

Environmental historians study the reciprocal relationship between humans and nature over time. This course examines key themes in the history of Canada's environment. Possible topics include food, energy, pollution, cities, parks, and environmental movements. Specific themes vary by year, depending on the focus of the instructor. Strong emphasis is placed on reading and research.

Prerequisite: 9.0 credits

Recommended Preparation: [HIS263Y1/ HIS264H1](#)

Breadth Requirements: Society and its Institutions (3)

HIS419H1 - Canada By Treaty: Alliances, Title Transfers and Land Claims

Hours: 24S

A detailed study of the treaty process between indigenous peoples and newcomers in Canadian history, with examination of the shift between alliance treaties to land surrender agreements from the colonial period through to the signing of recent treaties including the Nunavut Land Claims Agreement and the Nisga'a Final Agreement.

Prerequisite: [HIS263Y1/ HIS264H1](#)

Breadth Requirements: Society and its Institutions (3)

HIS421H1 - Oral History

Hours: 24S

Exploration of oral history interview research methods, their contributions to the History field, and practical training in the skills and art of doing oral history. This is a research workshop course, oriented to developing student research projects, and each student will do oral history research. Topics include: memory, interviewing, ethics, interpreting oral testimonies and issues in community-engaged research.

Breadth Requirements: Society and its Institutions (3)

HIS422H1 - Early Modern English Popular Culture, 1500-1800

Hours: 24S

Deals with issues of orality, literacy, gender, class, cultural bricolage and vernacular epistemology – the constituents of popular, as opposed to elite knowledge - through the study of folklore, magic, religion, drink, sex, riot and festivity in early modern England. Some background in medieval and/or early modern history or literature is highly recommended. Extensive work will be undertaken with primary printed sources.

Prerequisite: [HIS101Y1/ HIS109Y1/ HIS220Y1/ HIS243H1/ HIS244H1/ HIS368H1/ HIS337H1/ HIS349H1/ HIS357Y1](#)

Exclusion: [HIS496H1](#) (Topics in History: Early Modern English Popular Culture, 1600-1800), offered in Summer 2018

Breadth Requirements: Society and its Institutions (3)

HIS423H1 - Social History of Medicine in the 19th & 20th Centuries

Hours: 24S

Introduces students to current issues in the social history of medicine and some of the major developments in the modern history of the discipline. The format is class discussion based on themes covered in the course textbook, covering such topics as the history of the doctor-patient relationship, changes in physicians' social status, changing attitudes toward the body, and the evolution of various medical and surgical specialties including obstetrics and gynecology. (Joint undergraduate-graduate).

Exclusion: [HIS423Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS424H1 - Violence in Medieval Society

Hours: 24S

This seminar explores the social function and meaning of violence in medieval society, and the development of rituals and institutions to control violence. Among the topics treated: Germanic blood feud, aristocratic violence and chivalry, criminal justice systems, violence against minorities, and violence and gender. (Joint undergraduate-graduate)

Prerequisite: [HIS220Y1/ HIS320H1/ HIS321H1/ HIS322H1](#)

Exclusion: [HIS327Y5](#)

Breadth Requirements: Society and its Institutions (3)

HIS425H1 - From the Weimar Republic to Nazi Germany: How Do Democracies Die?

Hours: 24S

This seminar on Weimar and National Socialist Germany analyzes the advent of the country's first democracy after WWI, its destruction between 1929 and 1933 and the subsequent building of the National Socialist dictatorship. How does the destruction of Germany's first democratic republic provide a map for how democracies die? What lessons can Germany's history provide for the current political moment? In analyzing the country's movement from democracy to dictatorship an interdisciplinary variety of texts will be studied, covering topics from political violence and economic instability, to the languages of civil society and the importance of trust in a democratic polity.

Prerequisite: 14.0 credits including 2.0 HIS credits

Exclusion: [HIS496H1](#) (offered as "Weimar and Nazi Germany: How do Democracies Die?") taken in Fall 2019, 2022.

Recommended Preparation: At least one of [HIS241H1](#), [HIS242H1](#), [HIS330H1](#), or [HIS317H1](#).

Breadth Requirements: Society and its Institutions (3)

HIS426H1 - Early Medieval Italy 300-1000 CE

Hours: 24S

This seminar examines major developments in Italy 300-1000, including the Christianization of Italy, the collapse of Roman rule, the establishment of several barbarian successor kingdoms, and changes in architecture, art and literature in a period known as Italy's Dark Ages.

Breadth Requirements: Society and its Institutions (3)

HIS427H1 - History and Historiography in the Golden Legend

Hours: 24S

The Golden Legend or Readings on the Saints, compiled by Jacobus de Voragine c. 1260, serves as the basis for a seminar on the relation of history and legend as understood in the High Middle Ages. (Joint undergraduate-graduate)

Prerequisite: [HIS220Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS428H1 - Medieval Institutes of Perfection

Hours: 24S

The first goal of this seminar is to help students read complex primary sources with a more critical eye, especially narrative sources (Lives of Saints) and "normative" sources (rules and customaries). The second goal is to study the evolution of the monastic ideal from its origin to the 12th century. (Joint undergraduate-graduate)

Prerequisite: A course specifically on the Middle Ages such as [HIS220Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS430H1 - The Two Germanies and the Cold War, 1949-1989

Hours: 24S

This course explores central themes of the field of postwar German and Cold War history from national, European and global history perspectives. It familiarizes students with significant events, texts, dates and actors in its analysis of the histories of the two postwar German states and explores German history as a microcosm of Cold War relations. In analyzing the two Germanies after 1949 an interdisciplinary variety of texts will be studied, covering topics from diplomacy and economy, to gender, memory, politics and geopolitics.

Prerequisite: 14.0 credits including 2.0 HIS credits

Exclusion: [HIS496H1](#) (offered as "The Two Germanies and the Cold War, 1949-1990") taken in Winter 2019, (offered as "The Two Germanies and the Cold War") taken in Fall 2020.

Recommended Preparation: [HIS241H1](#), [HIS242H1](#), [HIS330H1](#), [HIS317H1](#)

Breadth Requirements: Society and its Institutions (3)

HIS431H1 - Historical Memory and Transitional Justice in Latin America

Hours: 24S

Transitional justice encompasses a broad range of experiences, including amnesties, peace agreements, memorial building, and criminal prosecutions, as well as truth and reconciliation commissions. Enthusiasm for transitional justice is understandable, and critical reflection on the politics of memory is imperative. In what ways has

memory in Latin America been mobilized by various groups to confront serious violations of human rights? We will address the connections between memory, accountability and social reconstruction, and each student will be asked to write a research paper on a case study or topic of their choice.

Prerequisite: 14.0 credits including 2.0 HIS/ JHA/ JHM/ JHN/ JIH/ JSH credits

Breadth Requirements: Society and its Institutions (3)

HIS432H1 - Advanced Topics in Medieval History

Hours: 24S

The students define together with the professor eight different topics (e.g. relics, masculinity, leprosy, clothes, recluses, peasants houses, gynecology and the peace of God). Each topic is approached through a class discussion, on the basis of a common corpus of secondary sources, plus presentations by the students.

Prerequisite: A course in Medieval history such as HIS220Y1

Breadth Requirements: Society and its Institutions (3)

HIS433H1 - Polish Jews Since the Partition of Poland

Hours: 24S

To explore the history of Polish Jews from the Partitions of Poland to the present time, concentrating on the 19th and the first half of the 20th centuries: situation of Polish Jews in Galicia; Congress Kingdom of Poland; Prussian-occupied Poland before 1914; during World War II; and post-war Poland. Focus on an analysis of primary sources. (Joint undergraduate-graduate)

Prerequisite: HIS208Y1/ HIS251Y1/permission of the instructor

Breadth Requirements: Society and its Institutions (3)

HIS434Y1 - Kievan Rus

Hours: 48S

The origin of Rus, international trade, the impact of nomadic peoples, the introduction of Christianity, the economic system and the problem of feudalism, the political structure and the dilemma of princely succession; literature and architecture; the displacement of political power centres and depopulation, the preservation of the Kievan heritage. (Joint undergraduate-graduate)

Prerequisite: HIS220Y1/ HIS250H1/ HIS250Y1/ HIS320H1/ HIS321H1/ HIS322H1

Breadth Requirements: Society and its Institutions (3)

HIS435H1 - Themes in Toronto History

Hours: 24S

This course will examine aspects of Toronto's history. It is not a general survey of Toronto history; instead, the course will normally revolve around a specific theme or group of themes. Specific themes vary by year, depending on the focus of the instructor. Strong emphasis will be placed on reading and research.

Prerequisite: HIS263Y1/ HIS264H1

Breadth Requirements: Society and its Institutions (3)

HIS436H1 - Stalinist Terror

Hours: 24S

This research seminar explores topics and issues of violence in the Soviet Union in the 1930s, beginning with forced collectivization and ending with the Great Terror. The seminar focuses on new archivally-based research and aims to contextualize Stalinist terror within larger theories of political and social violence.

Prerequisite: HIS250Y1 (B or higher) or HIS351Y1 (B or higher)

Breadth Requirements: Society and its Institutions (3)

HIS438H1 - Inquisition and Society in Medieval and Early Modern Europe

Hours: 24S

Focusing on the institution of the inquisition, this seminar explores the response of ecclesiastical and secular authorities to religious heterodoxy. Among the groups prosecuted by the inquisition discussed: Cathar heretics in France, crypto-Jews and crypto-Muslims in Spain, and witches in Italy.

Recommended Preparation: HIS220Y1

Breadth Requirements: Society and its Institutions (3)

HIS439H1 - Russia's Empire

Hours: 24S

The collapse of the Soviet Union along national lines brought about a renewed interest in the non-Russian parts of the Imperial Russian state. This so-called “imperial turn” has altered the ways that we think about Tsarist Russian rule. In this course we address different approaches to the study of Empire as reflected in the Russian case from its origins in the sixteenth century until the collapse of the Tsarist state — but not precisely of its empire — in 1917.

Prerequisite: [HIS325H1](#), [HIS351H1](#). Students who do not meet the prerequisites are encouraged to contact the Department.

Breadth Requirements: Society and its Institutions (3)

HIS440H1 - Maps and History

Hours: 24S

Examines the use of maps through the ages to depict spatial relationships and political, social, or cultural authority. Explores the visual display of quantitative information, the evolution of historical atlases, and cartographic crime. Such topics as Lebensraum and gerrymandering illustrate how maps can distort historical processes and communal relationships.

Recommended Preparation: At least three History courses at the 200/300 level

Breadth Requirements: Society and its Institutions (3)

HIS442H1 - Jews and the Holocaust in the Soviet Union

Hours: 24S

This course is an advanced research seminar in Soviet history. It will explore the Jewish experience in the Soviet Union, with a focus on the Holocaust. The seminar will begin with an examination of the history of Jews in the Russian Empire and the Soviet Union in the years leading up to the Second World War. Then the course will pivot directly to the topic of the Holocaust on Soviet soil. How did the Holocaust in the “east” differ from the Holocaust in the “west”? How did the conduct of war condition genocide in the Soviet Union? How did Soviet Jews and non-Jews respond to the German genocide? What was the response of Stalin and the Soviet government to the Holocaust? How is the Holocaust remembered by the states and people of the former Soviet Union.

Prerequisite: [HIS351Y1](#) or a course on the Holocaust

Breadth Requirements: Society and its Institutions (3)

HIS443H1 - Space and Sense in the Early Modern World

Hours: 24S

How did early moderns experience sense and space and how did the expanding cultural, political, and social horizons of the period emerge from and shape those experiences? This course explores Florence, Amsterdam, Boston, Manila to compare how experiences of space and sense varied by age, gender, race, and class.

Prerequisite: [HIS243H1](#)/ [HIS244H1](#)/ [HIS357Y1](#). Students who do not meet the prerequisite are encouraged to contact the instructor.

Breadth Requirements: Society and its Institutions (3)

HIS444H1 - Advanced Topics in Jewish History

Hours: 24S

Selected topics on a specific period or theme in Jewish history. Topic in any given year will depend on the instructor. Please see History website for details.

Prerequisite: A course in modern European or Jewish history

Recommended Preparation: A course in Jewish history

Breadth Requirements: Society and its Institutions (3)

HIS445H1 - Nationalism

Hours: 24S

What is a nation? Are nations ancient or modern, unchanging or malleable? Do nations create states, or does the state create the nation? This course seeks to answer these questions through an examination of nationalism, primarily in Europe, from the 1700s through the present.

Prerequisite: 2.0 HIS credits in European history.

Students who do not meet the prerequisite are encouraged to contact the Department.

Breadth Requirements: Society and its Institutions (3)

HIS446H1 - Gender and Slavery in the Atlantic World

Previous Course Number: HIS446Y1

Hours: 24S

The course examines the relationship between gender and the experience of slavery and emancipating several Atlantic world societies from the 17th-19th centuries. Areas to be covered are the Caribbean, Brazil, the U.S. South, West and South Africa and Western Europe.

Prerequisite: HIS291H1/ HIS294Y1/ (HIS230H1, HIS231H1)/ HIS295Y1

Exclusion: HIS446Y1

Breadth Requirements: Society and its Institutions (3)

HIS447H1 - Globalization and Empire

Hours: 24S

What is globalization? What is empire? What are the relationships between them? Globalization, one of the most widely-used concepts today, is often taken out of the historical contexts out of which it arose. This course analyzes its connections with European imperial projects (British, French, German and Russian) of "world making" and the types of connections--economic, political and cultural--that they fostered. The connections between globalization, the forging of the world economy and the histories of capitalism are a central focus of the course. The goal is to seek to understand the types of globalization active today, including the creation of a world based on global inequality and environmental degradation in which older colonial relationships of power (vis a vis the global south, for example) continue to hold sway. In other words, through a historical analysis of globalization and empire the course explores processes of economic and political transformation that created the modern present.

Methodologically the course is an introduction to the field(s) of transnational and global history.

Prerequisite: 14.0 credits

Recommended Preparation: Two of the following: HIS112H1, HIS241H1, HIS242H1, HIS245H1, HIS344H1, HIS377H1, HIS388H1

Breadth Requirements: Society and its Institutions (3)

HIS449Y1 - Ukrainian National Revival

Hours: 48S

The role of the intelligentsia in East European national revivals; the ethnographic and literary revival; the language question; the press and cultural organizations; education; religion; and political movements. (Joint undergraduate-graduate)

Recommended Preparation: One of the following: JHP204Y1/ HIS241H1/ HIS251Y1/ HIS445H1

Breadth Requirements: Society and its Institutions (3)

HIS450H1 - Advanced Topics in African Histories

Hours: 24S

Senior seminar discussing readings on a specific period, aspect or themes in African history. Topics in any given year depend on the instructor.

Prerequisite: HIS295Y1 or 1.0 credit alternative African History course

Breadth Requirements: Society and its Institutions (3)

HIS451H1 - World War II in East Central Europe

Hours: 24S

The fall of the Versailles system, German and Soviet diplomatic and military activities and their occupational policies in East Central Europe during World War II, economic exploitation, collaboration, resistance, and genocide in the discussed region, its liberation and sovietization in 1944-1945. (Joint undergraduate-graduate)

Prerequisite: EUR200Y1/ HIS251Y1/ HIS334H1

Breadth Requirements: Society and its Institutions (3)

HIS452H1 - Advanced Topics in European History

Hours: 24S

Selected topics in a specific period of European History. Content in any given year depends on instructor. Please see the History Department website for complete description.

Prerequisite: 9.0 credits including one of HIS241H1, HIS242H1, HIS243H1, HIS244H1, and a minimum 1.0 HIS credit

Breadth Requirements: Society and its Institutions (3)

HIS453H1 - Slavery in North America

Hours: 24S

Slavery has existed in many human societies. Beginning in the sixteenth century, European empires pioneered a novel system of racialized chattel slavery that ensnared unknown numbers of Indigenous people and spurred the transportation of millions of African captives to various plantation zones in the Americas. This course examines

the history of slavery in North America, Canada, and the United States (c. 1500-1865). Topics include Indigenous and Atlantic slaveries; slavery and the rise of British, French, and Spanish colonialism in North America; racial formation; the Atlantic and domestic slave trades; gender and reproduction; enslaved people's politics and social worlds; and the gradual abolition of slavery in the United States and Canada (1780-1865).

Prerequisite: [HIS271Y1/](#) ([HIS221H1](#), [HIS222H1](#)).

Students who do not meet the prerequisite are encouraged to contact the instructor.

Exclusion: [HIS404H1](#) (Senior Seminar in U.S. History: American Slavery) offered in Winter 2021 and [HIS404H1](#) (Senior Seminar in U.S. History: Slavery in North America) offered Winter 2023.

Breadth Requirements: Society and its Institutions (3)

HIS455Y1 - Hacking History: Digital Projects Capstone Class

Hours: 48S

This course provides a unique opportunity to grapple with the challenges of public history, while exploring new methods and technologies in the digital humanities. Each year, we partner with one or more community groups to create historical websites which endure well beyond the school year. Topics vary annually.

Prerequisite: [HIS393H1](#), equivalent experience, or instructor's permission

Recommended Preparation: Basic HTML/CSS skills as learned in self-paced online introductions

Breadth Requirements: Society and its Institutions (3)

HIS457H1 - The French Revolution and the Napoleonic Empire

Hours: 24S

Explores the central themes in the history of the French Revolution: the causes of the Revolution; the contested varied efforts to build a new regime; the invention of a novel republican political culture; counterrevolution and Terror; the Haitian Revolution; Napoleon and the Empire; the Revolution as a global phenomenon; the Restoration; the Revolution's legacy today.

Prerequisite: [HIS243H1/](#) [HIS244H1/](#) [HIS319H1/](#) [HIS341Y1/](#) [HIS387H1](#)

Exclusion: [HISC26H3](#)

Breadth Requirements: Society and its Institutions (3)

HIS459H1 - Soviet History and Film, 1921-1946

Hours: 24S

The history of Soviet cinema and the importance of film as a historical source. Documentary and fiction film; editing, narration, and sound; film distribution and exhibition; the Soviet school of montage and socialist realism; nationality and gender; the Soviet musical comedy of the Stalin era; resistance and dissidence.

Prerequisite: [CIN105Y1/](#) [HIS250Y1/](#) [HIS250H1/](#) [HIS335H1](#)

Exclusion: [HIS450Y1/](#) [SLA233H1/](#) [SLA234H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

HIS460H1 - Soviet History and Film, 1941-1991

Hours: 24S

Soviet film as a historical source and the institutional and ideological history of Soviet film production, distribution, and exhibition. Fiction and documentary film during World War II; the cinema of the Cold War and the Thaw; Soviet new realism and the return of the village; avant-garde cinema of the 1960s-80s; memory and historical revision in late Soviet film. Screenings include never-before-seen archival footage, as well as films and film clips subtitled by the instructor.

Prerequisite: [CIN105Y1/](#) [HIS250Y1/](#) [HIS335H1](#)

Exclusion: [HIS450Y1/](#) [SLA233H1/](#) [SLA234H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

JIH460H1 - Indigenous Histories of North America

Hours: 24S

This senior seminar takes a regional approach, featuring work written by or in collaboration with Indigenous scholars and Indigenous communities, to draw students into discussion of comparative historiographies, the role of worldview in historical writing and the significant methodological interventions made by Indigenous Studies. Students explore oral history and material culture as sources for writing history and discuss ethical research practices for community-based scholarship. In addition to active participation, each student will write a major paper, approximately 15 pages in length, in the form of a review essay on the historiography of either a region or a topic. This course is a joint graduate/undergraduate seminar.

Prerequisite: INS200H1/ INS201Y1/ (INS201H1, INS202H1)/ INS205H1/ HIS230H1/ HIS366H1/ HIS369H1

Recommended Preparation: INS390H1

Breadth Requirements: Society and its Institutions (3)

HIS461H1 - Poland in the 20th Century

Hours: 24S

The 20th century has been an age of experiments for Poland. Universal, general problems of democracy, authoritarianism, totalitarianism, communism, socialism, free market and centrally planned economies, are examined, as are the ongoing adjustments made by the Polish people. (Joint undergraduate-graduate)

Prerequisite: HIS334H1/ HIS353Y1/permission of the instructor

Breadth Requirements: Society and its Institutions (3)

HIS464H1 - Religion and Violence in Comparative Perspective

Hours: 24S

Examines varying roles of religion in cases of genocide and extreme violence. Seminar proceeds from recent cases (Darfur, Rwanda, wars associated with break-up of Yugoslavia) backward through the 20th century (Cambodia, Indonesia, the Holocaust, Armenians, Herero) and the 19th century (Belgian Congo, Caucasus, native peoples in the Americas).

Prerequisite: one course in HIS/REL/Peace and Conflict (excluding HIS262H1)

Breadth Requirements: Society and its Institutions (3)

HIS465H1 - Gender and International Relations

Previous Course Number: HIS465Y1

Hours: 24S

This seminar explores the use of gender as a category of analysis in the study of international relations. Topics include gendered imagery and language in foreign policymaking; beliefs about women's relationship to war and peace; issues of gender, sexuality, and the military; gender and global governance; gender and the global economy; sexual violence; and contributions of feminist theory to international relations theory.

Recommended Preparation: 0.5 credit at the 300-level in HIS/POL/WGS

Breadth Requirements: Thought, Belief and Behaviour (2)

HIS466H1 - Advanced Topics in Canadian History

Previous Course Number: HIS466Y1

Hours: 24S

Selected topics in a specific period of Canadian history. Content in any given year depends on instructor. Please see the History Department website for complete description.

Prerequisite: HIS263Y1/ HIS264H1 or permission of the instructor

Breadth Requirements: Society and its Institutions (3)

HIS467H1 - French Colonial Indochina: History, Cultures, Texts, Film

Previous Course Number: HIS467Y1

Hours: 24S

Examines French colonial Indochina through several different lenses. Themes include the cross-cultural contact zones between colonial and colonized societies, imperial culture, expressions of colonial power, and forms of opposition. Colonial novels, translated resistance literature, documentaries, and films are utilized as primary sources to be examined critically.

Prerequisite: ANT344Y1/ EAS204Y1/ GGR342H1/ HIS104Y1/ HIS107Y1/ HIS280Y1/ HIS283Y1/ HIS284Y1/ HIS315H1/ HIS388H1/ NEW369Y1

Exclusion: HIS467Y1

Breadth Requirements: Society and its Institutions (3)

HIS468H1 - Commemorations and Public History in Canada, 1800-2000

Hours: 24S

This course explores selected topics in the history of commemoration, public memory, and public history in Canada. Remembering the past has often involved various groups - political, economic, and social elites - who have attempted to create 'pasts' or 'traditions' for themselves and others in society, often as part of creating socio-economic and political hegemony. We also will read about their contestation by women, working-class people, and ethnic and racialized groups to counter the powerful's apparent monopoly on public memory. As well, we will explore how historical memories have shaped and created landscapes, in ways both discursive and material.

Prerequisite: [HIS264H1](#)

Exclusion: [HIS466H1](#) (offered as "History of Commemoration in Canada") taken in Winter 2015, Fall 2016 or 2018, (offered as "Commemorations and Public History, Canada, 1800s-2000") taken in Fall 2020 or 2021, (offered as "Commemoration in Canada") taken in Fall 2022.

Breadth Requirements: Society and its Institutions (3)

HIS469H1 - Upper Canada: Creating a Settler Society, 1790s-1860s

Hours: 24S

This course explores selected topics in the history of Upper Canada: its formation in the crucible of transatlantic and imperial warfare, relationships with Indigenous people, the creation of multiple institutions, and colonial leisure and culture. As well as having its own particular local characteristics and features, not least its proximity to the United States, Upper Canada was one of a number of settler societies within the British Empire. The course explores various dimensions of these aspects and considers the relationships between local dynamics and imperial currents.

Prerequisite: [HIS264H1](#)/ [HIS263Y1](#)

Exclusion: [HIS466H1](#) (offered as "Upper Canada: Creating a Settler Society") taken in Fall 2014, Winter 2016, 2017, 2019, 2022 or 2023, (offered as "Upper Canada") taken in Fall 2019, (offered as "Upper Canada: Creating a Settler Society, 1790s-1860s") taken in Winter 2021.

Breadth Requirements: Society and its Institutions (3)

HIS470H1 - History, Rights, and Difference in South Asia

Hours: 24S

Addressing South Asian history after 1750, this course examines ideas of rights, contract, and the rule of law in colonial and postcolonial contexts. Attention is paid to the intellectual history of rights and the central place of colonial and postcolonial questions within that history. Topics include rights and questions concerning indigenous culture, caste and customary practice, gender and capitalist development.

Prerequisite: A mark of 73% or higher in [HIS282Y1](#) or instructor's permission

Recommended Preparation: Background in political and social theory and some background in South Asia

Breadth Requirements: Society and its Institutions (3)

HIS474H1 - Emancipate Yourselves from Mental Slavery? Historical Narratives of Caribbean Decolonization

Hours: 24S

This course is a critical intellectual history of Caribbean decolonization. It begins with the Haitian Revolution, exploring and comparing how history was mobilized to structure anti-colonial theories about the making of postcolonial Caribbean societies. Key conceptual frameworks to be examined include indigenism, noirism, creolization, métissage; Caribbean interpretations of Marxism, Negritude and Pan-Africanism.

Prerequisite: [HIS294Y1](#)/([HIS230H1](#), [HIS231H1](#))

Breadth Requirements: Society and its Institutions (3)

HIS475H1 - Senior Research Seminar

Hours: 24S

In this seminar, students will learn the historical methodology skills required to undertake their major independent research project for future professional use or graduate studies, including the development of a topic, formal literature reviews, and the writing of research and grant proposals. History Specialists & Majors only (priority enrollment for Specialists). Not eligible for CR/NCR option. See department website for prerequisite details and registration instructions. Students may count [HIS475H1](#) towards the Specialty methodology pathway or carry on to [HIS476H1](#): Senior Thesis.

Prerequisite: Consent of supervisor and department

Exclusion: [HIS498H1](#), [HIS499Y1](#), [HIS476Y1](#), [HIS491Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS476H1 - Senior Thesis Seminar

Previous Course Number: [HIS476Y1](#)

Hours: 24S

Students research and write a primary-sourced based thesis of approximately 7,000 words, building on the prospectus and literature review developed in [HIS475H1](#). Students attend seminar meetings to discuss the hypotheses they have formulated, present their work in progress and engage in constructive critique of other students' work. History Specialists & Majors only (priority enrollment for Specialists). Students must find topics and thesis supervisors. Not eligible for CR/NCR option. See department website for prerequisite details and registration instructions.

Prerequisite: [HIS475H1](#) and consent of supervisor and department

Exclusion: [HIS476Y1](#), [HIS498H1](#), [HIS499Y1](#), [HIS491Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS477H1 - Topics in the Social and Cultural History of Victorian Britain

Hours: 24S

Examination of the impact of industrialism on Victorian society and values. Concentration on Victorian social critics including Engels, Owen, Mayhew, Dickens and Morris.

Prerequisite: 9.0 credits including 1.0 credit in History

Recommended Preparation: A course in modern British History/Victorian literature

Breadth Requirements: Society and its Institutions (3)

HIS479H1 - US Foreign Policy Since World War II

Hours: 24S

An in-depth study of U.S. behaviour in the global arena since World War II. Particular attention will be paid to the origins and evolution of the Cold War, the Vietnam War, the initiatives of the Nixon-Kissinger years, the end of the Cold War, and the relevance of globalization.

Prerequisite: [HIS271Y1](#)/ [HIS377H1](#)

Breadth Requirements: Society and its Institutions (3)

HIS480H1 - Modernity and its Others: History and Postcolonial Critique

Hours: 24S

Engaging with influential perspectives in postcolonial historiography, this seminar tracks three major themes in the history of the idea of modernity from the late 18th through the 20th centuries: political freedom, citizenship and the nation-state; capitalism and its critique; and the relationship of history, memory, and identity. (Joint undergraduate-graduate)

Prerequisite: A mark of 73% or higher in [HIS282Y1](#), or instructor's permission; [HIS470H1](#)

Recommended Preparation: History of colonialism, political theory, or postcolonial literatures

Breadth Requirements: Society and its Institutions (3)

HIS481H1 - Elite Women, Power, and Modernity in Twentieth-Century Africa

Hours: 24S

The role of elite women in twentieth-century Africa has been overshadowed by studies of non-elite women so much so as to suggest that all women lacked power. This course aims to show how a very limited but important group of women negotiated power in a century of increasing patriarchy. It combines gender with class analysis.

Prerequisite: 300-level African History course or any of the African Studies courses offered at U of T.

Breadth Requirements: Society and its Institutions (3)

HIS483H1 - Space and Power in Modern Africa

Hours: 24S

This course examines the production, experience, and politics of space in modern Africa from a historical perspective. How is space - local, national, and imperial - produced? In what ways does power inscribe these spaces? This course will explore these questions through a variety of readings examining historical examples and cases from across the continent.

Prerequisite: A course in African History such as [HIS319H1](#), [AFR290H1](#), [AFR370H1](#)

Breadth Requirements: Society and its Institutions (3)

HIS484H1 - The Car in North American History

Hours: 24S

This seminar examines the history of the car in North America from the perspective of technology, business, landscape and popular culture. Particular attention is paid to issues of production, consumption, geography, and daily life, and to the importance of class race, gender, region, and age in shaping the meaning and experience of car culture.

Prerequisite: [HIS263Y1](#)/ [HIS264H1](#)/ [HIS271Y1](#)

Breadth Requirements: Society and its Institutions (3)

HIS485H1 - Advanced Topics in Asian Histories

Previous Course Number: HIS485Y1

Hours: 24S

A seminar on selected aspects of Asian history from 1368 to the present. Please see History website for detailed description of topic in any given year.

Prerequisite: EAS102Y1/ HIS280Y1/ JMC201Y1

Breadth Requirements: Society and its Institutions (3)

HIS487H1 - Animal and Human Rights in Anglo-American Culture

Hours: 24S

Examines the parallel discourses of animal and human rights in Anglo-American culture from the eighteenth century to the present. The course explores issues of subjectivity and consciousness as well as cruelty and pain. Topics include slavery and abolition, animal welfare and antivivisection, anti-colonial liberation movements, and animal rights campaigns.

Breadth Requirements: Society and its Institutions (3)

HIS488H1 - Advanced Topics in Latin American Histories

Hours: 24S

A seminar course in which students engage in advanced reading and discussion of topics, themes, periods or problems in some aspect of Latin American history. The focus in any given year will depend upon the instructor offering the course. Students should have existing coursework in Latin American History. Please see the History Department website for complete description and course specific recommended preparation.

Prerequisite: 14.0 credits and one of HIS291H1, HIS292H1

Recommended Preparation: HIS291H1 or HIS292H1

Breadth Requirements: Society and its Institutions (3)

HIS489H1 - The History of Psychiatry and Psychiatric Illness

Hours: 24S

Introduces students to current issues in the history of psychiatry and some of the major developments in the evolution of this unique medical specialty. The format is class discussion based on themes covered in the course textbook, covering such topics as changing perspectives on the nature of psychotic illness, the psychoneuroses, disorders of the mind/body relationship, psychiatric diagnosis, and presentations of illness. (Joint undergraduate-graduate).

Exclusion: HIS423Y1

Breadth Requirements: Society and its Institutions (3)

HIS490H1 - Everyday Stalinism

Hours: 24S

This seminar explores issues of everyday life in Soviet Russia during the Stalin era. What was the Soviet normal? Topics will include belief systems, dreams and myths, terror, fear, repression, and resistance. Texts include a range of different sources, memoirs, diaries, official state documents, and secondary sources.

Recommended Preparation: Any course in Russian history, culture or politics

Breadth Requirements: Society and its Institutions (3)

HIS491Y1 - Senior Thesis

Hours: 48S

Students research and write a primary-sourced based thesis of approximately 7,000 words. They attend seminar to provide training in reviewing literature, writing research proposals, formulating hypotheses, oral presentation of findings and constructive critique of other students work. History Specialists & Majors only (priority enrollment for Specialists). Students must find topics and thesis supervisors. Not eligible for CR/NCR option. See department website for prerequisite details and registration instructions.

Prerequisite: Consent of Supervisor and department

Exclusion: HIS476Y1, HIS498H1, HIS499Y1

Breadth Requirements: Society and its Institutions (3)

HIS492H1 - Empire & Colonization in the French Atlantic World

Hours: 24S

The first French empire (1604-1791) is typically considered a failed empire. Beginning with the first French exploratory expeditions in the South Atlantic in the mid-

16th century, this course examines the social, economic and political history of French imperial expansion during the *Ancien régime* in order to consider the meaning of success, as applied to empire during this period. The focus is on the development of the two colonial centres of the French New World: New France and the French Caribbean.

Prerequisite: HIS244H1/ HIS294Y1/ (HIS230H1, HIS231H1)

Recommended Preparation: HIS387H1

Breadth Requirements: Society and its Institutions (3)

HIS493H1 - Humanity in War: The Modern Evolution of the Law of Armed Conflict

Hours: 24S

This course explores the development of international humanitarian law over the course of the nineteenth and twentieth centuries. Questions asked will include how modern warfare has been understood as a political, cultural, social and legal phenomenon, and the ways in which such perspectives developed into a program of restraint.

Prerequisite: HIS241H1/ HIS242H1/ HIS344H1/ HIS344Y1/ EUR200Y1 or another course in modern history excluding HIS262H1

Breadth Requirements: Society and its Institutions (3)

HIS494H1 - Gandhi's Global Conversations

Hours: 24S

Primary source analysis of global circuits of ethico-political thought via work and life of Gandhi. Charts transnational environment of Gandhian thought (eg. Ruskin and Tolstoy), its critics (advocates of minority rights, also revolutionary violence) and global afterlife (eg. King, Mandela). Teaches methods in intellectual and political history of the global.

Prerequisite: HIS282Y1 with a mark of 76% or above

HIS495H1 - Advanced Topics in History

Previous Course Number: HIS495Y1

Hours: 24S

An in-depth examination of historical issues. Content in any given year depends on instructor. See History website for more details.

Prerequisite: 14.0 credits, including 2.0 HIS credits excluding HIS262H1. Further prerequisites vary from year to year, consult the department.

Recommended Preparation: Varies from year to year

HIS495Y1 - Advanced Topics in History

Hours: 48S

An in-depth examination of historical issues. Content in any given year depends on instructor. See History website for more details.

Prerequisite: 14.0 credits, including 2.0 HIS credits excluding HIS262H1. Further prerequisites vary from year to year, consult the department.

Recommended Preparation: Varies from year to year

HIS496H1 - Advanced Topics in History

Hours: 24S

An in-depth examination of historical issues. Content in any given year depends on instructor. See History website for more details.

Prerequisite: 14.0 credits including 2.0 HIS credits. Further prerequisites vary from year to year, consult the department.

HIS497H1 - Animal Politics and Science

Hours: 24S

Why is thinking about the animal unsettling for some or strange for others? Especially since Darwin, the question of the animal-what it says about being or not being human-has been at the core of important philosophical and scientific debates. This course examines the ways that question has been answered over time.

Prerequisite: 1.0 credit in political theory, history of science, or intellectual history. Students who do not meet the prerequisite are encouraged to contact the Department.

Breadth Requirements: Thought, Belief and Behaviour (2)

HIS498H1 - Independent Studies

History Majors and Specialists only. These courses result in the production of an independent research project. This may not necessarily take the form of a thesis. Students must find topics and project supervisors. Not eligible for CR/NCR option. See department website for specific registration instructions.

Prerequisite: Minimum 80% over 3.0 HIS credits at the 200-level or above

HIS499Y1 - Independent Studies

History Majors and Specialists only. These courses result in the production of an independent research project. This may not necessarily take the form of a thesis. Students must find topics and project supervisors. Not eligible for CR/NCR option. See department website for specific registration instructions.

Prerequisite: Minimum 80% over 3.0 HIS credits at the 200-level or above

History and Philosophy of Science and Technology

Faculty List

Associate Professor and Director

E. Jones-Imhotep, BA, PhD (V)

Associate Professor and Director of Graduate Studies

R. Woods, BA MA, PhD (V)

Professor and Director of Undergraduate Studies

D. Walsh, BSc, BA, M Phil, PhD, PhD (V)

Professors

N. Kremmentsov, BSc, MSc, PhD (V)

M. Vicedo, BA, MA, PhD, PhD (V)

D. Walsh, BSc, BA, M Phil, PhD, PhD (V)

Associate Professors

B. Baigrie, BA, MA, PhD (V)

J. Berkovitz, BSc, MA, PhD (V)

L. Dacome, BA, M Phil, PhD (V)

Y. Fehige, BSc, BPhil, BTheol, MPhil, MTheol, PhD, PhD (V)

C.-P. Yeang, BS, SM, PhD, Sc D (V)

Assistant Professors

E. Abrams, BS, MA, PhD

E.K. Burton, BA, AM, PhD (V)

K. Vold, BA, PhD (V)

A. Zakar, MA, MA, MPhil, PhD

Professors Emeriti

C. Fraser, MA, PhD (V)

B.S. Hall, BA, PhD (V)

P.M.H. Mazumdar, MB, M Tech, PhD (V)

P. Thompson, MA, PhD (V)

M.P. Winsor, M Phil, PhD (V)

science and technology examine. Courses in the philosophy of science engage with the structure of science, its methods, and its special claims to the production of knowledge. Courses in the philosophy of technology examine the ethical implications and philosophical underpinnings of new technologies and consider how new technologies encourage us to rethink our conceptions of human nature, social justice, and the political order. Courses in the history of science and technology situate scientific and technological advances in their cultural, socio-economic, and political contexts, in the process revealing their relevance to many important matters such as race, gender, equality, diversity, nation-building, empire, colonialism, international relations, conflict, war, peace, health, and sustainability. Students taking HPS courses deepen their understanding of major ideas in science; they learn to think critically about the past and present role of science in human societies, and they improve their skills in oral presentation and debate, research, and writing.

Students pursuing History and Philosophy of Science and Technology programs will be ideally suited to any professional or academic context that requires an understanding of science, technology, science and technology in society, and the relation between the sciences, technological developments, and the humanities.

The Minor programs - both the History and Philosophy of Science minor, and the Science, Technology, and Society minor - are designed to complement a wide range of Major or Specialist programs including those in the sciences, history, philosophy, or any other program for which the combination of sciences - including the natural, social and psychological, engineering, health, mathematical and environmental sciences - technology and the humanities could prove beneficial. The Major program is useful for students considering careers in teaching and education, museum and library work, science writing and editing, law, medicine, government, industry, and other fields where competence in science, technology, and the humanities is valuable.

Introduction

How are scientific theories developed? How do new technologies emerge and evolve over time? Do values affect science and technology, and do science and technology influence social values? What is the role of science and technology in a democratic society? Are scientific claims to knowledge justified? These are some of the deep questions that historians and philosophers of

Follow us on social media - [@UofT_IHPST](#) on X (formerly Twitter) Our History and Philosophy of Science Student Union (HPSUS) has a full array of social and intellectual events for students, runs a mentorship program, publishes an undergraduate journal, and hosts an international undergraduate research conference:

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The History and Philosophy of Science and Technology programs impacted by this policy: [ASMAJ0667](#) and [ASMIN0667](#)

History and Philosophy of Science and Technology Programs

History and Philosophy of Science and Technology Major (Arts Program) - ASMAJ0667

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Students are encouraged to meet with the Director of Undergraduate Studies prior to registering for this program.

(7.0 credits)

First Year (recommended):
0.5 credit from any HPS 100-level courses; up to 1.0 credit at the 100 level will count towards the major.

Higher Years (required):
Additional HPS courses, to a total of 7.0 credits and meeting the following two conditions:

1. At least 1.0 credit at the 200+ level.
2. At least 2.0 credits at the 300+ level, 0.5 of which must be at the 400-level.

[JHE353H1](#), [JHE355H1](#), [JPH311H1](#), [PHL245H1](#), [PHL355H1](#), [PHL356H1](#), or [PHL357H1](#) may also be used in meeting the above two conditions.

History and Philosophy of Science and Technology Minor (Arts Program) - ASMIN0667

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

1. Recommended: 0.5 credit from any HPS 100-level courses. Up to 1.0 credit in HPS courses at the 100-level will be counted towards the minor.
2. Recommended: at least 0.5 credit from any HPS 200-level courses.
3. Additional HPS courses to a total of 4.0 credits, with at least 1.0 credit at the 300+level.
[JHE353H1](#), [JHE355H1](#), [JPH311H1](#), [PHL245H1](#), [PHL356H1](#), or [PHL357H1](#) may also be used to fulfill this requirement.

Science, Technology, and Society Minor (Arts Program) - ASMIN2743

The Minor in Science, Technology, and Society is an interdisciplinary program that focuses on the different ways science and technology shape modern society and, in turn, how society shapes science and technology. From the food we eat to the way we conceive family relations or our obligations to future generations, our daily practices and our beliefs are increasingly influenced by scientific research and its applications. In turn, politics, public opinion, moral beliefs and cultural practices affect scientific and technological development. Courses in this program address such topics as science and values, science-related policy and politics, ethical uses of technology, scientific revolutions and controversies, modeling and communication of scientific research, and knowledge transfer from research to commercial and societal applications.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, no more than 1.0 credit at the 100-level, at least 1.0 credit at the 300+ level)

- 0.5 credit from: HPS200H1, HPS201H1, HPS202H1, HPS205H1
- 1.0 credit from: VIC106H1, VIC107H1, VIC109H1, VIC121H1, VIC122H1, VIC137H1, VIC170Y1, VIC172Y1, VIC206H1, VIC207H1, CRE210H1, CRE235H1, REN242H1, VIC245H1, VIC246H1, CRE247H1, VIC248H1, VIC274H1, VIC301H1, VIC302H1, VIC452H1, REN343H1, CRE335H1, CRE345H1, CRE371H1, VIC377H1, VIC493H1
- 1.0 credit from: HPS110H1, HPS206H1, HPS212H1, HPS220H1, HPS225H1, HPS240H1, HPS245H1, HPS246H1, HPS255H1, HPS260H1, HPS270H1, HPS272H1, HPS318H1, HPS319H1, HPS321H1, HPS324H1, HPS331H1, HPS340H1,

HPS345H1, HPS346H1, HPS347H1, HPS351H1, HPS354H1, HPS401H1, HPS402H1, HPS430H1, HPS431H1, HPS440H1, HPS442H1, HPS444H1, HPS450H1, HPS455H1, JPH441H1

- An additional 0.5 credit from program requirements (1), (2) and (3) above.
- An additional 1.0 credit from program requirements (1), (2) and (3) above and/or from the approved list of cognate courses: ANT204H1, ANT205H1, ANT345H1, ANT357H1, ANT358H1, ANT364H1, AST210H1, BIO220H1, CHC232H1, COG345H1, CSB202H1, CSC300H1, EAS328H1, EEB215H1, ENV200H1, ETH220H1, GGR223H1, GGR251H1, HIS300H1, HIS355H1, HIS423H1, HIS497H1, HMB301H1, JFP450H1, JIG322H1, JGE321H1, PCL389H1, PHL256H1, PHL273H1, PHL281H1, PHL342H1, PHL373H1, PHL377H1, PHL381H1, PHL384H1, PHY202H1, PSY328H1, SOC243H1, SOC250Y1, SOC331H1, SOC356H1, WGS367H1 or another course approved by the program coordinator.

History and Philosophy of Science and Technology Courses

HPS100H1 - Introduction to History and Philosophy of Science and Technology

Hours: 24L/10T

An investigation of some pivotal periods in the history of science with an emphasis on the influences of philosophy on the scientists of the period, and the philosophical and social implications of the scientific knowledge, theory and methodology that emerged.

Breadth Requirements: Thought, Belief and Behaviour (2)

HPS110H1 - The Science of Human Nature

Hours: 24L/10T

Why do we do what we do? What factors play a role in shaping our personality? What biological and social elements help configure a person's moral and emotional character? In this course, we examine landmark studies that shook standard beliefs about human nature in their time. We analyze those studies in their historical context and discuss their relevance to social, ethical, and policy

debates. The studies may include research on obedience, conformity, prejudice, aggression, attachment, empathy, altruism, race and gender stereotypes, happiness, resilience.

Breadth Requirements: Thought, Belief and Behaviour (2)

HPS120H1 - How to Think about Science

Hours: 24L/10T

This course addresses the nature of science and its importance to our understanding of ourselves. Questions include: What is a science? Is science objective? What is scientific reasoning? Has our conception of science changed through history? How does science shape our moral image? Does science reveal our natures as humans?

Breadth Requirements: Thought, Belief and Behaviour (2)

HPS200H1 - Science and Values

Hours: 24L

An introduction to issues at the interface of science and society. Including the reciprocal influence of science and social norms, the relation of science and religion, dissemination of scientific knowledge, science and policy.

Issues may include: Nuclear, Biological and Chemical Weapons; Genetic Engineering; The Human Genome Project; Climate Change.

Breadth Requirements: Society and its Institutions (3)

HPS201H1 - Science, Technology, and Society: Methods and Approaches

Hours: 24L/12T

This course introduces students to the methods and concepts of STS, an interdisciplinary approach to studying science and technology in society. Students will gain familiarity with some of the major theoretical tools used by STS scholars, including but not limited to: actor-network theory (ANT); the sociology of scientific knowledge (SSK); technopolitics and the social construction of technology (SCOT); feminist and postcolonial approaches to the study of science, technology and society; and more. STS methods will be paired with a variety of case studies related to past and present controversies, institutions, artifacts, policies, and cultures.

Exclusion: VIC172Y1

Breadth Requirements: Society and its Institutions (3)

HPS202H1 - Technology in the Modern World

Hours: 24L/10T

This course examines the reciprocal relationship between technology and society since 1800 from the perspectives of race, class, and gender. From the role of European imperial expansion in 19th-century industrialization and mechanization to the development of nuclear technology, smartphones, and digital computers in the 20th century, we consider cultural responses to new technologies, and the ways in which technology operates as an historical force in the history of the modern world.

Breadth Requirements: Society and its Institutions (3)

HPS203H1 - Making Sense of Uncertainty

Hours: 24L/12T

This course examines issues of uncertainty in various contexts of science, technology, and society since the 19th century. Topics may include randomized controlled trials, statistical identification of normal and pathological, biopolitics, philosophical interpretations of probability,

Brownian motions, uncertainty principle in quantum mechanics, cybernetic mind, and chance in avant-garde arts.

Breadth Requirements: Thought, Belief and Behaviour (2)

HPS205H1 - Science, Technology, and Empire

Hours: 24L/6T

This gateway course introduces the emergence of modern science and technology and the rise of European mercantile and colonial empires as closely intertwined processes. Beginning with the European discovery of the Americas, this course provides a broad thematic overview of the transformation of scientific practices in imperial contexts, including but not limited to geography and cartography; medical botany and plantation agriculture; biogeography and evolutionary biology; ecology and environmentalism; and race science and anthropology. The course primarily focuses on British and French colonial contexts in South Asia, Africa, Australasia and the Americas, but also considers Iberian, Russian, Dutch, and other imperial formations.

Breadth Requirements: Society and its Institutions (3)

VIC207H1 - Genetic Technologies: Scientific Promises and Ethical Dilemmas

Hours: 24L/12T

This course examines the ethical dilemmas raised by new genetic technologies. It explores the scientific possibilities they open as well as the moral questions they raise. The topics covered might include: Eugenics, the human genome project, behavioral genetics, genetics and race, genetic screening, gene editing and therapy, gene doping in sports, animal and human cloning, and genetic enhancement.

Breadth Requirements: Society and its Institutions (3)

HPS208H1 - How We Think About Life

Hours: 24L/12T

What is the difference between living and non-living things? How should living things be classified? How do various kinds of life relate to each other and to the non-living environment? These are perennial questions, dealt

with by every culture throughout history, and still debated today. This course surveys historical and cultural contexts of efforts to understand life, taxonomy, and ecology, and modern questions in the philosophy of the life sciences. The historical and cultural approach will help us to understand changing views, similarities, and differences among various understandings of life. And our approach to philosophy will be critical, asking what the best arguments for various current views are. Topics covered may include ecology, evolution, heredity, natural history, taxonomy, and definitions of life.

Recommended Preparation: 0.5 credit in HPS/ PHL/ VIC (Science, Technology, and Society courses)

Breadth Requirements: Living Things and Their Environment (4)

HPS212H1 - Global Digital: Information, Computing, and Communication in the Modern World

Hours: 24L/6T

From integrated circuits and the internet to social media and machine learning, digital technologies are a crucial part of modern life. How have they been developed in the contexts of the Cold War, neoliberal economic order, mass media, and crowdsourcing? In what ways have they shaped sociability, governance, production, and reasoning? How have they intertwined with the changing scientific understandings of the worlds? In this course, we examine select digital technologies and their co-production with society. We emphasize their global aspects: international tech ecosystems, transnational research and development, and political or cultural transformations facilitated by digital devices or systems.

Exclusion: [HPS301H1](#) (offered as "Global Digital: Information, Computing, and Communication in the Modern World") taken in Winter 2023

Recommended Preparation: 0.5 HPS credit

Breadth Requirements: Society and its Institutions (3)

HPS220H1 - Machines

Hours: 24L/11T

Machines pervade our lives and their influences are woven through countless contemporary debates in both academic and public discourse. The term 'machine' is used frequently in ordinary language, in literature, as well as in philosophical and scientific discussions, yet the concept itself—it's history, meaning, and impact—rarely gets the analysis it deserves. This course explores the meanings and influence of machines for knowledge, culture, and society in different periods and places, both real and imaginary, through the lens of the history and

philosophy of technology. We will draw on scholarship and expertise from a range of fields, including history, philosophy, anthropology, human-machine interaction, computer science, sociology, and literary studies, to explore what machines have been, what they have become, and what they mean for our societies.

Prerequisite: Completion of 4.0 credits

Breadth Requirements: Society and its Institutions (3)

HPS222H1 - Science, Paradoxes, and Knowledge

Hours: 24L/10T

What is the nature of science and scientific knowledge? What is the nature of space, time and motion? Does science tell us the truth about the world? What are scientific revolutions and how they occur? The course will address these and various other questions about science. It will focus on the bearings that philosophical views had on science in different periods in history, starting from ancient Greece and concluding in the 20th C.

Breadth Requirements: Thought, Belief and Behaviour (2)

HPS225H1 - Remaking the Past: The Re-creation and Re-enactment of Science and Technology

Hours: 24L/12T

One path to understanding the knowledge of the past is by attempting to re-create it. From rebuilding and sailing ancient sea vessels to reenacting scientific experiments, re-creation is used to investigate past approaches to technology and science. Using such methods, researchers seek to understand what was known, and also to experience *how* it was known. But, a persistent question remains: are authentic experiences truly possible across distances of time and culture?

The course surveys several academic domains to explore how an array of approaches to re-creation are used and understood. As a term assignment, participants will design and share their own hypothetical re-creation project.

Recommended Preparation: 0.5 HPS credit

Breadth Requirements: Thought, Belief and Behaviour (2)

HPS240H1 - The Influence of the Eugenics Movement on Contemporary Society

Hours: 24L/10T

This course explores present-day topics such as reproductive issues (including “designer babies” and genetic counselling), gender, racism/colonialism, disability and euthanasia through the lens of the history of eugenics. A “scientific” movement which became popular around the world in the early twentieth century, eugenics was based on the principle that certain undesirable human characteristics were hereditary and could be eliminated by controlled reproduction. It resulted in the enactment of laws in numerous places, including Canada, authorizing coerced reproductive sterilization of certain individuals, and other measures intended to “improve” humanity. Today, we see its influences woven through contemporary debates, a number of which we will consider.

Breadth Requirements: Society and its Institutions (3)

HPS245H1 - Visions of Society and Progress

Previous Course Number: HPS352H1

Hours: 24L/12T

This course explores influential visions of society and progress found in the history of the human sciences. It addresses questions such as: Are human beings naturally selfish or cooperative? Is society in harmony with the individual or opposed to the individual? It explores the significance of race, class, population growth, capitalism, and gender in debates about the good society.

Exclusion: [HPS352H1](#)

Recommended Preparation: 0.5 credit in any of the following: HPS, history, sociology, economics, political science, anthropology, or another field that intersects with the social sciences such as criminology

Breadth Requirements: Thought, Belief and Behaviour (2)

HPS246H1 - Data and Society: What's Behind the Numbers?

Hours: 24L/12T

“Big data” and “data-driven” approaches have become central to our modern scientific, cultural, and political landscapes. Yet rarely do we stop to think about what these notions mean or how they relate to ways of living in and knowing the world around us. Students in this course

will consider what it means to produce data, who/what gets in/excluded, and how a critical examination of the data-making process can inform a more socially just and equitable future.

Breadth Requirements: Thought, Belief and Behaviour (2)

VIC248H1 - Genetics in the Movies: Mad Scientists, Clones, Superhumans, and Designer Babies

Hours: 24L/12T

This course explores how scientific and technological advances in genetics have been presented in the movies, focusing on American cinema. We will consider how selected films have influenced social perceptions of the role of scientists and genetic technologies in various areas. The movies and topics covered might include: *The Black Stork* (1917), *A Bill of Divorcement* (1932), *Tomorrow's Children* (1934) for eugenics; *The Boys from Brazil* (1978), and *Blueprint* (2003) for human cloning; *Jurassic Park* (1993) for de-extinction or bringing extinct animal species back to life; *Blade Runner* (1982) for synthetic biology and human nature; *Gattaca* (1997) for human genetic enhancement; *The Fly* (1958) and *The Island of Dr. Moreau* (1996) for chimeras; *My Sister's Keeper* (2009) for savior siblings; and *Okja* (2017) for genetically modified animals. We will also analyze the role of documentaries, such as *Human Nature* (2019) and *Make People Better* (2022).

Breadth Requirements: Society and its Institutions (3)

HPS250H1 - Introductory Philosophy of Science

Hours: 24L/10T

This course introduces and explores central issues in the philosophy of science, including scientific inference, method, and explanation. Topics may include underdetermination, realism, empiricism, scientific revolutions, feminist epistemology, and laws of nature.

Breadth Requirements: Thought, Belief and Behaviour (2)

HPS255H1 - History and Philosophy of Artificial Intelligence

Hours: 24L/12T

This course introduces students to the historical and philosophical issues around artificial intelligence (AI). We will cover the geopolitical, economic, and cultural contexts from which the field of AI emerged, as well as the troubled history of the scientific concept of intelligence and how that has influenced the development of AI. The course will also introduce students to foundational and normative questions, such as how we should define and measure AI, how to evaluate the accomplishments of AI systems, and what the benefits and risks of relying on such systems might be.

Breadth Requirements: Society and its Institutions (3)

HPS260H1 - Biology and the Future: Science and Science Fiction

Hours: 24L/6T

This lecture course explores the fantastic visions of humanity's future inspired by the advance of the biological sciences during the twentieth century. Biology provided the scientific underpinning for societal hopes and fears embodied in such cultural icons as robots, aliens, "brains in a vat," and super-humans.

Exclusion: HMB444H1

Breadth Requirements: Creative and Cultural Representations (1)

HPS270H1 - Science and Literature

Hours: 24L/10T

This course will focus on the interplay between science and literature from ancient Greece to the present day. We'll examine the impact of major scientific paradigm shifts on the literature of their time, and situate literary texts within the context of contemporary scientific discoveries and technological innovations.

Breadth Requirements: Thought, Belief and Behaviour (2)

HPS272H1 - Science against Religion? A Complex History

Previous Course Number: HPS326H1

Hours: 24L

This course introduces students to the central topics arising from the encounter between modern science and religion. It aims to integrate historical and philosophical perspectives about science and religion. Did modern science arise because of Christianity or despite of it? Are

science and religion necessarily in conflict? Have they factually always been in conflict throughout history? Are proofs of God's existence obsolete? Has science secularized society? What role should religions play in liberal democracies?

Exclusion: HPS326H1

Breadth Requirements: Society and its Institutions (3)

HPS299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

HPS299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

HPS300H1 - Topics in History and Philosophy of Science and Technology

Hours: 24L/10T

Topics vary year to year.

Prerequisite: 4.0 Credits

Recommended Preparation: 1.0 credit in HPS courses, including 0.5 at the 200-level

Breadth Requirements: Thought, Belief and Behaviour (2)

HPS301H1 - Topics in the History of Science and Technology

Hours: 24L/10T

This course can concern topics of special interest in the history of science from Antiquity until present. Topics may focus on specific-time periods, fields of inquiry, individuals, scientific institutions, or geographic locations. Content in any given year depends on instructor. Refer to

the [Institute for the History & Philosophy of Science & Technology website](#) for more information.

Prerequisite: 4.0 credits

Recommended Preparation: 1.0 HPS credit, of which a 0.5 credit must be at the 200+ level

Breadth Requirements: Creative and Cultural Representations (1)

HPS302H1 - Topics in Philosophy of Science and Technology

Hours: 24L/10T

This course can concern topics of special interest in the philosophy of science from Antiquity until present. Topics may include scientific change, rationality, method, evidence, progress, reduction, scientific laws, models, representation etc. The course may also focus on specific-time periods, fields of inquiry, individuals, scientific institutions, geographic locations, etc.

Prerequisite: 4.0 credits, including a 0.5 credit in BR= 1/ BR= 2

Recommended Preparation: 1.0 credit in HPS/ PHL/ VIC (Science, Technology, and Society courses), including a 0.5 credit at the 200+ level.

Breadth Requirements: Thought, Belief and Behaviour (2)

HPS304H1 - A History Lab: Biomedical Sciences, Past and Present

Hours: 36S

Offers a hands-on introduction to historical research. Through a close examination of classic scholarly texts, archival materials, and recent media publications, this advanced seminar explores the sources, methods, and approaches in historical studies of biomedical twentieth century-sciences.

Breadth Requirements: Creative and Cultural Representations (1)

JPH311H1 - From Universal Gravity to Quantum Information: The Making of Modern Physics

Hours: 24L

Topics in the history of physics from antiquity to the 20th century, including Aristotelian physics, Galileo, Descartes, electromagnetism, thermodynamics, statistical mechanics,

relativity, quantum physics, and particle physics. The development of theories in their intellectual and cultural contexts.

Prerequisite: 0.5 credit PHY course

Breadth Requirements: The Physical and Mathematical Universes (5)

HPS316H1 - Environment, Technology, and Nature

Hours: 24L/10T

This course examines the intersection of technology and environment in the modern world. Whether simple or complex, whether designed for recreation, work, or warfare, our tools and how we use them filter our perceptions of, and engagements with, non-human nature.

Prerequisite: 0.5 credit in HPS/HIS

Recommended Preparation: 1.0 HPS/ HIS credit. [HPS202H1](#)/ [HPS205H1](#)/ [HPS220H1](#) would be especially useful.

Breadth Requirements: Creative and Cultural Representations (1)

HPS318H1 - History of Medicine I

Hours: 24L/10T

This course explores how medicine was practiced, taught and theorized from ancient Greece to the early modern period. It focuses on the historical development of western medicine in relation to societies, politics and culture, and considers topics such as the creation of medical traditions, the transmission and communication of medical knowledge, the pluralistic world of healers, the role of religion, magic and natural philosophy, the cultural meaning of disease, and the emergence of institutions such as the hospital.

Prerequisite: 4.0 credits

Exclusion: [HPS314Y1](#)

Recommended Preparation: 0.5 HPS/ HIS credit, or course with health care content including [ANT205H1](#), [ANT345H1](#), [ANT357H1](#), [HST211H1](#), [HST350H1](#), [SOC243H1](#), [WGS367H1](#).

Breadth Requirements: Society and its Institutions (3)

HPS319H1 - History of Medicine II

Hours: 24L/10T

This course examines the development of medicine from the seventeenth to the twentieth century. It focuses on the historical development of western medicine in relation to societies, politics and culture and considers topics such as changing views of the body, the development of medical institutions such as hospitals, asylums and laboratories, the diversifies world of healing and the place of visual and material culture in the production and dissemination of medical knowledge.

Prerequisite: 4.0 credits

Exclusion: HPS314Y1, HPS315H1

Recommended Preparation: 0.5 HPS/ HIS credit, or course with health care content

Breadth Requirements: Society and its Institutions (3)

HPS321H1 - Understanding Engineering Practice: From Design to Entrepreneurship

Hours: 6T/24S

This course seeks to understand the nature of engineering practice, which comprises complex social, intellectual, and technical actions at various stages from design to entrepreneurship. Building upon the history and social studies of technology, philosophy of engineering, business history, and management science, we introduce ways to analyze such complex actions.

Prerequisite: 0.5 credit in BR=1/ BR=2 and 1.0 credit from any of AER, ANA, APS, AST, BCB, BCH, BIO, BME, CHE, CHM, CIV, ECE, EEB, ENV, ESC, ESS, FOR, GGR, HMB, LMP, MGT, MGY, MIE, MSE, PHY, RSM, TEP

Breadth Requirements: Society and its Institutions (3)

HPS322H1 - Complexity, Order, and Emergence

Hours: 10T/24S

A survey of the history of and recent developments in the scientific study of complex systems and emergent order. There will be particular emphasis on the biological and cognitive sciences. Topics covered may include: mechanism and teleology in the history of science, 19th and 20th century emergentism, complex systems dynamics, order and adaptiveness, self-organization in biology and cognitive development.

Prerequisite: 4.0 credits, including a 0.5 credit in HPS/ PHL

Recommended Preparation: 1.0 HPS/ PHL credit.

PHL232H1 or any course in the philosophy of science or in the history and philosophy of biology would be

especially useful.

Breadth Requirements: Thought, Belief and Behaviour (2)

HPS324H1 - Natural Science and Social Issues

Hours: 24L

Historical examination of the interactions of science (both as body of knowledge and as enterprise) with ideological, political and social issues. The impact of science; attacks on and critiques of scientific expertise as background to contemporary conflicts. Subjects may vary according to students interests. (offered irregularly)

Breadth Requirements: Society and its Institutions (3)

HPS325H1 - Modern Science and Holy Texts

Hours: 24L

This course explores interdisciplinary topics related to the encounter between modern science and texts accepted as holy by religious communities, such as the Bible in Christianity. What role did holy texts play in the emergence of modern science? Did modern science change the way religious communities interpret their holy texts? What to do with claims such as that the Quran contains quantum physics? Does modern science exhibit the same kind of rationality that we find in rabbinical Judaism? Do holy texts only exist to assist humanity's attempts at understanding the meaning of the world, while modern science actually explains the world? What role do texts play in modern science compared to holy texts in religious communities? And, what has modern science to say about the very idea of holy texts?

Breadth Requirements: Society and its Institutions (3)

HPS331H1 - How Maps Transform the World, Society, and Ourselves

Hours: 24L/12T

Maps are pervasive in our world: so indispensable, and so disposable that thousands are made, used, and discarded every day. Yet not long ago, maps were both rare and strange technological things. When and why did modern mapping systems come into being? Behind this transformation lie contentious stories of objects and people, makers and users, global forces and local dynamics, metropolises and colonies, and technologies and cultures. Focusing on the modern period, each week

illuminates maps and their importance in our world by focusing on a keyword, such as power, territory, worldmaking, boundaries, imperialism, capitalism, literacy, verticality, and countermapping.

Prerequisite: 0.5 HPS/HIS credit at the 200/ 300-level. Students who do not meet the prerequisite are encouraged to contact the Department.

Exclusion: HPS301H1 (Topics in the History of Science: *A Global History of Mapping Sciences*), offered in Winter 2022

Breadth Requirements: Society and its Institutions (3)

HPS340H1 - The Limits of Machine Intelligence

Hours: 24L/11T

With the recent headline-making breakthroughs in deep learning neural networks (DNNs), it might seem that we are on the cusp of living with artificial systems that match or exceed human intelligence. But there remain longstanding philosophical challenges around the definition of intelligence that AI researchers use, how they measure the performance of their systems, and what DNNs could really be capable of, that still need addressing. For example, how close are DNNs to passing the Turing test? How close are we to building general intelligence and what do we need to get us there? How can we draw fair and meaningful comparisons between artificial and biological systems? We will draw on material from the history and philosophy of science to evaluate and inform current debates around the limits of AI. For example, we'll consider what kinds of explanations DNNs can provide. We'll also look at how debates between the rationalists and empiricists (e.g. Locke, Hume, and Kant) inform current debates between AI nativists and empiricists. This course explores these questions through contemporary texts across the fields of philosophy of science, artificial intelligence, comparative psychology, and cognitive science, among others.

Prerequisite: Completion of 4.0 credits including 0.5 credit in any HPS/ PHL/ COG course. Students who do not have all of these prerequisites are encouraged to contact the instructor.

Exclusion: HPS300H1 (Topics in History and Philosophy of Science and Technology: The Limits of Machine Intelligence), offered in Winter 2021 and Fall 2021

Recommended Preparation: One of HPS220H1/ HPS255H1/ PHL342H1/ COG250Y1/ CSC199H1/ SMC199H1

Breadth Requirements: Society and its Institutions (3)

HPS345H1 - Quantifying the World: Debates on the Ethical and Epistemic Implications of AI and Automation

Hours: 24L/12T

The effects of automation, computing, and information technology have had a great impact on our society. The rise of automation and computing the almost cult-like trust in mechanization have transformed our society both at the material and the epistemological level. This course will examine the epistemological and ethical debates that AI and automation have produced in all sectors of society. It will consider a variety of media and instruments from data visualization and mapping, to the use of AI and robotics, contextualizing them within popular and hotly contested examples in the military field and in cybersecurity, in medical diagnostics and epidemiology, in the automotive industry, and in the personal realm.

Prerequisite: 4.0 credits

Recommended Preparation: 1.0 credit in BR=1/ BR=2, including a 0.5 credit in HPS/ PHL/ VIC (Science, Technology, and Society courses)

Breadth Requirements: Society and its Institutions (3)

HPS346H1 - Modifying and Optimizing Life: on the Peculiar Alliance between AI, Biology, and Engineering

Hours: 24L/12T

Taking cue from the entanglements that historically have pervaded the relation between biology and information technology since the early 20th century, this course interrogates the sociocultural and technological conjuncture that has brought computer science, biology and engineering together into peculiar, ingenious, and often controversial alliances. What do AI, synthetic biology, and biotechnology have in common? How have they come to be associated? What are the debates and ethics emerging from such associations? The course will focus on topics such as: geoengineering and bioremediation; GMO and Robotic insects; the use of expert systems and machine learning to optimize synthetic biology; the flourishing and marketing of precision and personalized medicine/immunotherapy; and the ethics behind CRISPR babies.

Prerequisite: 4.0 credits

Recommended Preparation: 1.0 credit in BR=1/ BR=2, including a 0.5 credit in HPS/ PHL/ VIC (Science, Technology, and Society courses)

Breadth Requirements: Society and its Institutions (3)

HPS347H1 - History of Autism Across Time and Cultures

Hours: 24L/12T

What is autism? When was it first identified as a condition? How has its meaning changed over time? How does the autistic experience vary across cultures?

This course covers the history of autism, the social understandings and cultural meanings of autism, and the autistic experience through time and across cultures. It introduces students to both historical and contemporary perspectives, including scientific accounts, cultural representations, and the voices of autistic people. Through the case of autism we will grapple with larger issues such as the role of medical and social views in shaping definitions of mental normality and pathology, the changing meaning of disability in different cultures, and the experience of living with a developmental disability.

Prerequisite: 4.0 credits, of which 0.5 should be an HPS credit.

Breadth Requirements: Society and its Institutions (3)

HPS351H1 - Biomedical Sciences and Technologies in Global Society

Hours: 24L/12T

This course examines how the contemporary life sciences intersect with global geopolitics through an introduction to the field of science and technology studies (STS). Using interdisciplinary methodologies and global perspectives, the course addresses key questions including: Who benefits from the development of new biotechnologies, and who is exploited in the process? Who sets the international norms of bioethics and medical market regulation? How are biologists and medical practitioners redefining life for different societies and their diverse constituencies? The course predominantly focuses on humans, but also introduces new scholarship on animal studies and synthetic life forms. It has significant coverage of the Middle East, Africa, and East and South Asia.

Prerequisite: 4.0 credits, including a 0.5 credit in BR=1/BR=2

Recommended Preparation: 1.0 credit in ANT/ HPS/ HIS/ SOC/ VIC (Science, Technology, and Society courses)

Breadth Requirements: Society and its Institutions (3)

JHE353H1 - History of Evolutionary Biology

Hours: 24L/10T

A historical examination of major ideas about biological evolution, with an emphasis on the period from the 18th century to the 1950s, and of their impact on scientific and social thought. Topics include the diversity of life and its classification, the adaptation of organisms to their environments, Wallace's and Darwin's views on evolution by natural selection, sexual selection, concepts and mechanisms of biological inheritance, and the implications of evolutionary theory for the organization of human society.

Prerequisite: 6.0 credits including a 0.5 credit from HPS/ EEB/ BIO

Exclusion: HPS353H1

Recommended Preparation: 2.0 HPS/ EEB/ BIO credits including 1.0 credit at the 200+ level

Breadth Requirements: Society and its Institutions (3)

HPS354H1 - History of Medicine and Public Health in the Middle East

Hours: 24L/6T

This course provides a broad thematic overview of the history of medicine and public health in the Middle East. Focusing on the modern period, the course highlights the region as a contact zone of medical traditions and a key site in the emergence of colonial medicine and international public health. Students examine the social and cultural effects of new developments in medical thought and practice, including ideas about contagion and disease prevention, the notion of public health and hygiene, and the construction of colonial and postcolonial medical schools and hospitals.

Recommended Preparation: A prior course in HPS, HIS, or NMC

Breadth Requirements: Society and its Institutions (3)

JHE355H1 - History and Philosophy of Evolutionary Biology

Hours: 24L/10T

An examination of the place of the organism in evolutionary theory from the early 1900s to the present. Biology is the science of living things, and yet, paradoxically, living things--organisms--have been comprehensively left out of the Modern Synthesis theory of evolution that developed in the twentieth century. This course surveys the reasons--historical, philosophical and empirical--for the marginalization of organisms from evolutionary theory. It examines the ways in which evolutionary developmental biology attempts to restore the organisms to a central place in evolutionary biology. Offered by faculty in the Institute for the History and Philosophy of Science and Technology.

Prerequisite: 6.0 credits, of which 1.0 credit is from EEB/BIO/ HPS courses

Recommended Preparation: JHE353H1

Breadth Requirements: Society and its Institutions (3)

HPS370H1 - Philosophy of Medicine

Hours: 24L/12T

This course introduces students to philosophical issues in the study of medicine. The course will cover foundational questions, such as what constitutes evidence that a therapy is effective, how do we define health and disease, and information derived from research is used to support clinical practice. Students will be introduced to different movements in contemporary clinical medicine, such as Evidence-based Medicine, Person-Centered Healthcare, and Precision Medicine.

Prerequisite: 4.0 credits, including a 0.5 credit in BR=1/BR=2

Recommended Preparation: 0.5 credit in HPS/PHL courses, HPS250H1 or another philosophy of science course would be particularly useful

Breadth Requirements: Society and its Institutions (3)

HPS371H1 - COVID-19: Epistemology and Societal Implications

Hours: 24L/12T

The COVID-19 pandemic led to significant changes in our daily lives, society, medicine, and public health. This course will examine the pandemic and the public response through a philosophy of science lens. In particular, students will explore philosophical issues about how the healthcare community generates knowledge and how that knowledge is used to inform responses to a major public health crisis. The course will also provide a brief history of pandemics and examine Coronavirus in a historical context. Epistemological issues regarding pandemic modelling and epidemiology, clinical research and generalizability of findings, diagnostic testing, public health response (e.g. border closures, protective masks, social distancing, isolation, testing and tracking), and economic and social impact will be covered. Portrayals of the pandemic by media, government, and scientists will also be examined. Readings will be drawn from a variety of academic disciplines and popular sources.

Prerequisite: 6.0 credits

Recommended Preparation: 1.0 credit of HPS courses or courses required for the Science, Technology, and Society minor

Breadth Requirements: Thought, Belief and Behaviour (2)

HPS372H1 - The Epistemology of Medical Misinformation

Hours: 24L/12T

The epistemology of misinformation is a branch of epistemology with the objective of providing insight into the nature and spread of misinformation, fake news, conspiratorial theories, echo chambers, and epistemic pathologies in the formation of public opinion. This course focuses on medical misinformation, what harms it can cause, how it spreads, and strategies that have been advanced to minimize the harm of medical misinformation. Through a series of case studies, it also provides a critical perspective on the difference between misinformation and disinformation with an overview of how threat actors weaponize information during public health emergencies to cause harm. Topics covered may include concepts of scientific objectivity and universality; the communication of risk and risk perception; and the changing role of expertise in a fragmented public sphere; and the key role played by mainstream and social media in spreading both information and disinformation, propaganda, conspiracy theories, and fake news.

Prerequisite: 4.0 credits, of which at least 0.5 credits in HPS100H1, HPS200H1, HPS120H1, HPS250H1, VIC173H1, PHL250H1, or PHL255H1

Recommended Preparation: PHL255H1, HPS370H1

Breadth Requirements: Society and its Institutions (3)

HPS390H1 - The Story of Number: Mathematics from the Babylonians to the Scientific Revolution

Hours: 24L/12T

A survey of ancient, medieval, and early modern mathematics with emphasis on historical issues.

Prerequisite: 1.0 credit at the 200+ level from CSC/ MAT/ STA

Exclusion: HPS310Y1; MAT220Y1

Breadth Requirements: Society and its Institutions (3)

HPS391H1 - Rebels Who Count: The History of Mathematics from 1700 to the Present

Hours: 24L/12T

A survey of the development of mathematics from 1700 to the present with emphasis on historical issues.

Prerequisite: 1.0 credit at the 200+ level from CSC/ MAT/ STA

Exclusion: HPS310Y1; MAT220Y1, MAT391H1

Breadth Requirements: Society and its Institutions (3)

HPS399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

HPS399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

HPS401H1 - Scientific Artifacts

Hours: 24S

This course explores the history of science through direct engagement with local scientific artifacts within the University of Toronto Scientific Instrument Collection (UTSIC.org). Each student will undertake a research project focused on a single artifact within the collection in order to explore both the local history of science and the methodology of material culture research as it relates to science.

Prerequisite: 9.0 credits including a 0.5 credit from HPS or a course required for the Science, Technology, and Society minor

Recommended Preparation: 2.0 credits from HPS or courses required for the Science, Technology, and Society minor including a 0.5 credit at the 300+ level

Breadth Requirements: Society and its Institutions (3)

HPS402H1 - Animals in the Histories of Science and Technology

Hours: 24S

What can a focus on nonhuman animals reveal about the knowledge practices and politics of science and technology? This course approaches the history of science from the perspective of nonhuman animals in

order to revisit—and retell—the history of various scientific disciplines and practices. We will consider how the various ways in which animals have been enrolled into the formation of scientific knowledge, from laboratory settings to ecological fieldwork, to colonial natural history. Students will learn to interrogate anthropocentric biases in the histories of science and technology, and to assess the significance of nonhuman animals in the formation of scientific knowledge.

Prerequisite: 9.0 credits, including 0.5 HPS credit at the 300+ level.

Recommended Preparation: 2.0 credits from HPS or HIS or courses required for the Science, Technology, and Society minor

Breadth Requirements: Society and its Institutions (3)

HPS403H1 - Vegetarianism and Veganism: Science, Technology, Human Health, Animal Welfare, and the Environment

Hours: 24S

This is an advanced undergraduate seminar that examines the past, present, and future of vegetarianism and veganism, with a focus on five central themes: science, technology, human health, animal welfare, and the environment. Along the way, we will consider many other important issues and contexts as well, such as: factory farming, capitalism, social identities and inequalities associated with gender, race, and class, religious beliefs and practices, high-performance sports, and cultural resources such as documentary films, television programs and music videos. Students will engage in discussions, make class presentations, and carry out original research projects.

Prerequisite: 9.0 credits, including 1.5 HPS credits with 0.5 at the 300+ level

Recommended Preparation: 3.0 credits from HPS/ HIS/ PHL courses or other courses that are primarily concerned with the historical, philosophical, and/or social studies analysis of science, technology, and/or medicine

Breadth Requirements: Society and its Institutions (3)

HPS410H1 - History of Mathematics

Hours: 24S

Historical examination of mathematics, focusing on certain themes and time periods, to show how mathematics has changed and evolved.

Prerequisite: 9.0 credits

Recommended Preparation: 2.0 HPS credits including a

0.5 credit at the 300+ level; [HPS390H1](#)/ [HPS391H1](#)

Breadth Requirements: Society and its Institutions (3)

HPS411H1 - Conceptual Foundations of Mathematics

Hours: 24S

An examination of foundational and conceptual aspects of mathematics such as: the nature of mathematical objects, logicism, Church's elementaristic mathematics, Gödel's theorem and formal systems, postulational methods, mathematics and reality, the cardinal, ordinal and abstract approaches to numbers, infinity, and Euclidean and non-Euclidean geometries.

Prerequisite: 9.0 credits

Recommended Preparation: 2.0 HPS credits including a 0.5 credit at the 300+ level; [PHL245H1](#)/ [HPS390H1](#)/ [HPS391H1](#)/ [HPS410H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

HPS412H1 - History of the Biological Sciences

Hours: 24S

Historical examination of the biological sciences, focusing on certain themes and time periods.

Prerequisite: 9.0 credits including a 0.5 HPS credit

Recommended Preparation: 2.0 HPS credits including a 0.5 HPS credit in the biological sciences (e.g. [HPS240H1](#), [HPS346H1](#), [HPS351H1](#), or [JHE353H1](#))

Breadth Requirements: Society and its Institutions (3)

HPS413H1 - Reading and Writing about Physics

Hours: 24S

Historians, philosophers, and sociologists have produced a wealth of literature on the analysis and examination of physics from the early modern period to the present. In this seminar, we read and discuss in depth a collection of recent classics and cutting-edge works on the historical studies of physics. Students also conduct research based on this literature. We aim to use physics as a lens to understanding key themes in the making of modern science, from incommensurability, epistemic cultures, and historical ontology, to materiality, social construction, pedagogy, and countercultures.

Prerequisite: 9.0 credits including a 0.5 HPS credit

Recommended Preparation: 2.0 HPS credits including a 0.5 credit at the 300+ level

Breadth Requirements: Thought, Belief and Behaviour (2)

HPS422H1 - History of Data

Hours: 24S

This seminar examines the meaning and value of data in a variety of historical contexts. Important moments in the history of science will be considered through scholars' attempts to catalog and quantify human lives, social dynamics, and natural phenomena. Course material will focus on the relationship between the production of data and different forms of knowledge, power, and governance.

Prerequisite: 9.0 credits

Recommended Preparation: 1.5 credits in the history and/or philosophy of science, of which a 0.5 credit is at the 300-level; [HPS390H1](#)/ [HPS391H1](#) would be ideal.

Breadth Requirements: Thought, Belief and Behaviour (2)

HPS430H1 - History of Technology

Hours: 24S

This course offers a focused discussion of various topics and themes within the history of technology. Content in any given year varies by instructor. Not eligible for CR/NCR option.

Prerequisite: 9.0 credits

Recommended Preparation: 1.5 credits in HPS/ HIS/ VIC (Science, Technology, and Society courses), of which a 0.5 credit is at the 300-level. [HPS202H1](#)/ [HPS205H1](#)/ [HPS205H1](#)/ [HPS316H1](#) particularly useful.

Breadth Requirements: Society and its Institutions (3)

HPS440H1 - Topics in History of Medicine

Previous Course Number: HPS303H1

Hours: 24S

This course offers a focused discussion of several aspects of the history of medicine. Various themes are examined in depth year to year so as to familiarize students with different topics and methodological approaches.

Prerequisite: 9.0 credits including [HPS318H1](#)/ [HPS319H1](#)/ 1.0 HPS credit at the 200+ level

Exclusion: [HPS303H1](#)

Recommended Preparation: 2.0 HPS credits including a 0.5 credit at the 300+ level

Breadth Requirements: Society and its Institutions (3)

JPH441H1 - Physical Science in Contemporary Society

Hours: 24L

This course will discuss the complex, real-life, ethical, and philosophical issues behind how science gets done, including questions such as how we as scientists strive to determine the truth; who determines what science is done, and on what basis; how we as a community manage science and make decisions about education, authorship, publication, hiring, et cetera (including issues related to equity, inclusivity, and diversity); and how we as a society fund science and apply its discoveries.

Prerequisite: PHY224H1/ PHY250H1/ PHY252H1/ PHY254H1/ PHY256H1, or by permission of the instructor.

Breadth Requirements: Society and its Institutions (3)

HPS442H1 - Sciences of Whiteness in the Middle East & Its Diasporas

Hours: 24S

This research seminar traces the historical response of Middle Eastern societies and diasporas to Western scientific discourses of race and ethnicity from the 19th century to the present. We examine notions of racial classification and hierarchy as they emerged in Islamicate and European imperial contexts and their scientific application to Middle Eastern populations. We further investigate how the nationalist ideologies of modern Middle Eastern nation-states relied on and perpetuated race science. Finally, we consider the experience of Middle Eastern migrants to Europe and North America and their engagement with scientific definitions of Aryan, Caucasian and white racial identity.

Prerequisite: 9.0 credits including a 0.5 credit HPS/ HIS/ NMC course at the 300+ level

Recommended Preparation: 2.0 HPS/ HIS/ NMC credits including a 0.5 credit at the 300+ level

Breadth Requirements: Society and its Institutions (3)

HPS444H1 - Health, Medicine, and Society in the Mediterranean World

Hours: 24S

This course examines healing practices and medical knowledge in the Mediterranean world, focusing on the early modern period. We will address topics such as the interplay between medicine and religion, the relationship between patients and practitioners, and the role of women as both healers and patients and across Mediterranean shores. We will also consider how individuals in different Mediterranean regions experienced the relationship between health and the environment, explore the bearings that medical pursuits had on the creation and consolidation of notions of sex and gender, and examine how medical knowledge shaped views of the body and informed health policies.

Prerequisite: 1.0 credit from the following: HPS205H1, HPS240H1, HPS245H1, HPS260H1, HPS301H1, HPS304H1, HPS316H1, HPS318H1, HPS319H1, HPS331H1, HPS351H1, HPS354H1, HPS402H1, HPS412H1, HPS430H1, HPS431H1, HPS442H1, HIS218H1, HIS313H1. At least one 0.5 credit must be at the 300+ level. Students who do not meet the prerequisites are encouraged to contact the academic unit.

Recommended Preparation: This course presupposes having some background in the history of medicine and/or history of science and having engaged in historical research projects. It is highly recommended that students have taken one or more courses in History of Medicine (or History of Science and/or Technology).

Breadth Requirements: Society and its Institutions (3)

HPS445H1 - Slavery, Medicine, and Science

Hours: 24S

This course will study historical entanglements of slavery, science, and medicine. On the one hand, it will examine 1) the different ways in which medicine and science supported the institution of slavery; and 2) the sites in which slavery was integral to processes of production, movement and transfer of medical and scientific knowledge and practices. On the other hand, it will consider the voices of enslaved individuals, and accordingly cast light on the epistemic role of enslaved communities in the histories of science, medicine, and technology.

Prerequisite: 1.0 credit from HPS318H1/ HPS319H1/ HPS202H1/ HPS205H1/ HPS240H1/ HPS245H1/ HPS260H1/ HPS301H1/ HPS304H1/ HPS316H1/ HPS331H1/ HPS351H1/ HPS354H1/ HPS379H1/ HPS402H1/ HPS412H1/ HPS430H1/ HPS431H1/ HPS442H1/ HIS218H1/ HIS313H1/ NMC379H1/ HIS305H1/ HIS390H1/ HIS446H1/ HIS453H1, of which a 0.5 credit is at the 300-level

Recommended Preparation: Background in the history of medicine and/or history of science and having engaged in historical research projects; HIS230H1/ HIS231H1/

HIS360H1**Breadth Requirements:** Society and its Institutions (3)**HPS450H1 - Revolutions in Science****Previous Course Number:** HPS350H1**Hours:** 24S

A detailed investigation into a highly celebrated and important philosophical idea concerning the development of scientific knowledge: the notion of scientific revolutions. We will consider the process of theory change, whether theory choice is rational, and whether theoretical terms, such as light and space preserve their meanings across revolutions. In addition to classic work by Kuhn, we shall consider approaches that were inspired by Kuhn's work. In particular, we will consider the approaches of sociologists of scientific knowledge. The course is taught as a seminar in which the students play an active role in presenting and discussing the readings.

Prerequisite: 9.0 credits including a 0.5 HPS credit at the 200+ level**Exclusion:** HPS350H1**Breadth Requirements:** Society and its Institutions (3)**HPS455H1 - Well-being and Policy Analysis****Hours:** 24L

The research seminar will consider some central questions in the philosophy of economics and political philosophy and their intersection with, and relevance for questions concerning social justice, the environment, well-being, and policy analysis. The aim is to provide some background and analytical tools for policy analysis concerning issues related to well-being, distributive justice, poverty, disability, and environmental sustainability.

Prerequisite: 9.0 credits including a 0.5 HPS credit at the level of 200+ level**Breadth Requirements:** Society and its Institutions (3)**HPS480H1 - Special Topics in History and Philosophy of Science and Technology****Hours:** 24S

This course will focus on matters of special interest in the history and philosophy of science and technology. Topics will change each time the course is offered, but may include a focus on specific-time periods, fields and

methods of inquiry, individuals, institutions, geographic regions, controversies, etc.

Prerequisite: 9.0 credits, including 1.5 credits from courses that count toward the History and Philosophy of Science (HPS), Science, Technology and Society (STS), History, or Philosophy programs of study. Of these 1.5 credits, at least a 0.5 credit at the 300-level.

HPS485H1 - Special Research Opportunity in HPS**Hours:** 24L

This course offers advanced undergraduate students the opportunity to undertake original research in the history and/or philosophy of science, technology, or medicine, under the guidance of a faculty mentor. Of particular value to students interested in graduate study.

Prerequisite: Permission of the Department**Recommended Preparation:** 9.0 credits; 3.0 credits in HPS courses, of which a 0.5 credit is at the 300-level**HPS495Y1 - Individual Studies**

This course offers advanced undergraduate students the opportunity to undertake a reading and/or research project in HPS, supervised by a faculty member in the history and/or philosophy of science, technology, or medicine. Of particular value to students interested in graduate study.

Prerequisite: Departmental approval**Recommended Preparation:** 9.0 credits; 3.0 credits in HPS courses, of which a 0.5 credit is at the 300-level**Breadth Requirements:** Thought, Belief and Behaviour (2)**HPS496H1 - Individual Studies in HPS**

This course offers advanced undergraduate students the opportunity to undertake a reading and/or research project in HPS, supervised by a faculty member in the history and/or philosophy of science, technology, or medicine. Of particular value to students interested in graduate study.

Prerequisite: Departmental approval**Recommended Preparation:** 9.0 credits; 3.0 credits in HPS courses, of which a 0.5 credit is at the 300-level.

HPS497H1 - Individual Studies

A reading and research project in some aspect of the social, cultural or intellectual history of science and technology, supervised by a faculty member.

Prerequisite: Two HPS courses

Human Biology

Faculty List

Professor, Teaching Stream and Director

M. Neumann, MSc, PhD

Associate Professor, Teaching Stream and Associate Director

R. Wilson, MSc, PhD

Professor, Teaching Stream

W. Ju, MSc, PhD

Associate Professors, Teaching Stream

A. Dias, MSc, PhD

C. Dockstader, PhD

M. Papaconstantinou, PhD

F. Taverna, PhD

Assistant Professors, Teaching Stream

A. Cortinois, MPh, PhD

L. De Souza-Kenney, MSc, PhD

G. Dong MMath, PhD

N. Li, PhD

N. Levy-Strumpf, PhD

A. Malinowski, PhD

H. Zubyk, PhD

Given by the Department of Cell and Systems Biology

Introduction

The Human Biology Program is an undergraduate collaborative program homed in Cell and Systems Biology with strong connections between the Faculty of Arts and Science and the Faculty of Medicine. With community-engaged learning courses, undergraduate research opportunities, and award-winning faculty members, we offer an exciting educational experience for students. Our programs examine the biology of our species through interdisciplinary lenses by integrating topics from the biological and medical sciences, social sciences, and the humanities. The overall structure of the collaborative program is designed to expose students to the transdisciplinary field of human biology with opportunities to specialize in selected areas of inquiry in the field.

A central objective to the Human Biology Program (HMB) is to facilitate the development of core competencies in our students: critical and creative thinking, self-directed learning, quantitative and analytical reasoning, and effective communication and research. HMB aims to

prepare students for future careers where an interdisciplinary education in biological and health sciences would be an asset. HMB offers diverse experiential learning opportunities for students which includes a faculty that is at the cutting-edge of teaching innovation, strong academic relationships with other departments and faculties at the University, service learning with organizations in Toronto, and undergraduate research in laboratories on campus and affiliated hospital research institutes.

After first year life science courses, undergraduate students may enter the Human Biology program in their selected HMB program: Applied Genetics and Biotechnology (formerly Fundamental Genetics and its Applications), Global Health, Health and Disease, Human Biology, and Neuroscience. HMB students start by taking foundational courses to provide background on their subject area and introduce students to topics integral to the study of human biology. Students then progress to more specialized topics and have more detailed instruction but are also encouraged to participate in self-directed and group learning. In their final year, HMB students are further engaged to practice critical analysis by taking one of our specialized seminar courses in their program, which focuses on expanding the depth of knowledge the student has acquired while studying human biology at the University of Toronto.

Regarding Human Biology Programs

The Human Biology Program offers five areas of study, all of which offer a major program, and four of which offer a specialist program.

Students are allowed to switch between Human Biology major programs, but should first obtain written permission from the Program Office to determine which of their completed courses will transfer to their new Human Biology major program. Students seeking advice on which HMB major to choose or advice for program completion pathways should view the [HMB Program Pathway Tools webpage](#).

Note: Students are not permitted to be enrolled in more than one Human Biology major program.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Human Biology programs impacted by this policy: [ASSPE1053](#) and [ASMAJ1053](#); [ASSPE2575](#) and [ASMAJ2575](#); [ASSPE2013](#) and [ASMAJ2013](#); [ASSPE1472](#) and [ASMAJ1472](#)

Human Biology Programs

Applied Genetics and Biotechnology Specialist (Science Program) - ASSPE1053

HMB: Applied Genetics and Biotechnology

The objective of the HMB: Applied Genetics and Biotechnology specialist and major programs are to provide students with a solid foundation in the biological sciences with a focus on genetics and its applications in medicine, environment and biotechnology.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Note there are different options depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

For students who have completed between 4.0 and 8.5 credits:

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- [BIO130H1](#)
- ([CHM135H1](#), [CHM136H1](#))/ [CHM151Y1](#)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in [BIO130H1](#) will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

For students who have completed 9.0 or more credits:

Variable Minimum Grade

Minimum grades are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- [BIO220H1](#)
- [BIO230H1](#)/ [BIO255H1](#)
- [HMB265H1](#)/ [BIO260H1](#)
- [BCH210H1](#)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in either [BIO220H1](#) or ([BIO230H1](#)/ [BIO255H1](#)) will not be considered for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

Students applying for admissions to the program utilizing transfer credits will be considered on a case-by-case basis. Students entering from CEGEP or from another university should contact hmb.undergrad@utoronto.ca after their transfer credit assessment has been complete for program enrolment assessment. Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2025). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and there are program-specific year 3 entry enrolment requirements. Students applying for Year 3 entry must have been admitted to the Fundamental Genetics and its Applications Specialist program in the Summer after Year 2 and have completed [BIO230H1](#), [HMB265H1](#) and [HMB201H1](#) prior to ASIP entry.

Completion Requirements:

Required Courses (12.0 credits, including at least 1.0 credit at the 400 level)

Chemical and Physical Foundations of Biological Systems

1. ([CHM135H1](#), [CHM136H1](#))/ [CHM151Y1](#)
Transfer credits will be accepted in lieu of the chemistry requirements only if they carry a direct exclusion or equivalency to a pre-approved chemistry course

2. MAT135H1/ PHY131H1/ PHY151H1/ CSC108H1/ CSC110Y1/ CSC148H1
 3. BCH210H1

Biological Foundations of Living Systems

4. BIO120H1, BIO130H1
 5. BIO220H1
 6. BIO230H1/ BIO255H1

Courses in Fundamental Genetics

7. HMB265H1/ BIO260H1
 8. HMB321H1

9. 1.5 credits from: HMB360H1/ HMB385H1/ HMB421H1/ HMB435H1/ HMB437H1/ HMB474H1/ BCH311H1/ BCH350H1/ BCH425H1/ BCH426H1/ BCH440H1/ BCH445H1/ BCH448H1/ CSB328H1/ CSB331H1/ CSB340H1/ CSB349H1/ CSB351Y1/ CSB353H1/ CSB428H1/ CSB429H1/ EEB318H1/ EEB323H1/ EEB365H1/ EHJ352H1/ MGY314H1/ MGY315H1/ MGY340H1/ MGY428H1/ MGY441H1/ MGY470H1/ PSL350H1

Courses in Applied Genetics

10. HMB201H1
 11. HMB301H1/ HMB360H1/ BCH311H1/ CSB349H1/ PSL350H1

12. 1.5 credits from: HMB301H1/ HMB401H1/ HMB431H1/ HMB436H1/ HMB441H1/ HMB489H1/ BCH311H1/ BCH340H1/ BCH441H1/ BCH447H1/ CSB352H1/ CSB458H1/ CSB459H1/ CSB472H1/ CSB473H1/ CSB474H1/ EEB325H1/ EEB459H1/ EEB460H1/ NFS487H1/ PHL384H1/ PSL350H1/ PSL404H1/ PSY390H1

Data Analysis and Research-Based Courses

13. 0.5 credit in statistics: STA288H1
 14. 0.5 credit from bioethics: HMB306H1/ HMB406H1/ PHL281H1
 15. 0.5 credit from upper-year lab course: HMB311H1/ HMB314H1/ MGY314H1/ MGY315H1
 16. 0.5 credit from: HMB342H1/ HMB360H1/ HST373H1/ MGY377H1/ MGY378H1
 17. 1.0 credit from project course: HMB490Y1/ HMB491Y1/ HMB496Y1*

** A research project from a different unit may be accepted with prior written approval from Human Biology.*

Applied Genetics and Biotechnology Specialists Notes:

1. Courses can only count toward one requirement, even if listed as options to multiple requisites of the program .
2. Not all courses listed have priority enrolment for Applied Genetics and Biotechnology specialists. Students are

responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Global Health Specialist (Science Program) - ASSPE2575

HMB: Global Health

The objective of the HMB: Global Health program is to provide students with instruction in fundamental biological sciences and to integrate a broad understanding of the socio-economic and cultural determinants of health to populations around the world.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Note there are different options depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

For students who have completed between 4.0 and 8.5 credits:

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO130H1
- (CHM135H1, CHM136H1)/ CHM151Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in BIO130H1 will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

For students who have completed 9.0 or more credits:

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Neuroscience Specialist (Science Program) - ASSPE1472

HMB: Neuroscience

Neuroscience is an interdisciplinary field aimed at understanding the brain and nervous system utilizing integration of research at the molecular, cellular, and organismal levels, and through all stages of human development. The application of neuroscience has important implications for understanding human behaviour and for promoting the development of effective strategies for diagnosing and treating nervous system disorders. The objective of the HMB: Neuroscience specialist and major programs is to provide students with a solid foundation and facilitates the integration of concepts from multiple fields to their understanding of neuroscience.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Note there are different options depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

For students who have completed between 4.0 and 8.5 credits:

Variable Minimum Grade

Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO130H1
- (CHM135H1, CHM136H1)/ CHM151Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 70% in BIO130H1, a final grade average lower than 70% in (

CHM135H1, CHM136H1), or a final grade lower than 70% in CHM151Y1 will not be considered for admission.

Please note that obtaining the minimum grades does not guarantee admission to the program.

For students who have completed 9.0 or more credits:

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO230H1/ BIO255H1
- HMB265H1/ BIO260H1
- BCH210H1
- PSL300H1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 70% in BIO230H1/ BIO255H1 will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Students applying for admissions to the program utilizing transfer credits will be considered on a case-by-case basis. Students entering from CEGEP or from another university should contact hmb.undergrad@utoronto.ca after their transfer credit assessment has been complete for program enrolment assessment. Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2025). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and there are program-specific year 3 entry enrolment requirements. Students applying for Year 3 entry must have been admitted to the Neuroscience Specialist program in the Summer after Year 2 and have completed BIO230H1, HMB265H1 and HMB200H1 prior to ASIP entry.

Completion Requirements:

Required Courses (12.0 credits, including at least 1.0 credit at the 400-level)

Chemical and Physical Foundations of Biological Systems

1. (CHM135H1, CHM136H1)/ CHM151Y1
*Transfer credits will be accepted in lieu of the chemistry requirements **only** if they carry a direct*

exclusion or equivalency to a pre-approved chemistry course.

2. MAT135H1/ PHY131H1/ PHY151H1/ CSC108H1/ CSC110Y1/ CSC148H1
3. BCH210H1

Biological Foundations of Living Systems

4. BIO120H1, BIO130H1
5. BIO230H1/ BIO255H1
6. HMB265H1/ BIO260H1
7. PSL300H1

Neuroscience Concentration Courses

8. PSY100H1 *Transfer credits from AP and IB Psychology are not accepted*
9. HMB200H1
10. HMB300H1
11. CJH332H1
12. HMB320H1
13. JHA410H1/ ANA300Y1

14. 2.0 credits from HMB360H1/ HMB385H1/ HMB420H1/ HMB430H1/ HMB440H1/ HMB442H1/ HMB450H1/ HMB460H1/ HMB471H1/ HMB473H1/ HMB490Y1/ CSB345H1/ CSB346H1/ CSB430H1/ CSB432H1/ CSB434H1/ CSB445H1/ CSC421H1/ LMP410H1/ NEW335H1/ BPM335H1/ NFS489H1/ PCL475H1/ PCL476H1/ PSL374H1/ PSL432H1/ PSL440Y1/ PSL445H1/ PSL446H1/ PSL450H1/ PSL452H1/ PSL472H1/ PSY342H1/ PSY371H1/ PSY372H1/ PSY390H1/ PSY395H1/ PSY460H1/ PSY470H1/ PSY471H1/ PSY473H1/ PSY480H1/ PSY490H1/ PSY492H1/ PSY493H1/ PSY492H1/ PSY493H1/ PSY494H1/ PSY496H1

Data Analysis and Research-Based Courses

15. 0.5 credit in statistics: STA288H1
16. 0.5 credit from bioethics: HMB306H1/ HMB406H1/ PHL281H1
17. 0.5 credit from upper-year lab course: HMB310H1/ HMB314H1/ PSY369H1
18. 1.0 credit from project course: HMB490Y1/ HMB491Y1/ HMB496Y1*

** A research project from a different unit may be accepted with prior written approval from Human Biology.*

Neuroscience Specialists Notes:

1. *Courses can only count toward one requirement, even if listed as options to multiple requisites of the program.*
2. *Not all courses listed have priority enrolment for Neuroscience specialists. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.*

3. *Effective Fall 2021, courses associated with New College's Buddhism, Psychology and Mental Health program will have the new "BPM" designator.*

Course Group

Neuroscience Centric Courses:

HMB200H1, HMB300H1, HMB310H1, HMB320H1, CJH332H1, HMB360H1, JHA410H1, HMB420H1, HMB430H1, HMB440H1, HMB442H1, HMB450H1, HMB460H1, HMB473H1

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Applied Genetics and Biotechnology Major (Science Program) - ASMAJ1053

HMB: Applied Genetics and Biotechnology

The objective of the HMB: Applied Genetics and Biotechnology specialist and major programs are to provide students with a solid foundation in the biological sciences with a focus on genetics and its applications in medicine, environment and biotechnology.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Required Courses (8.0 credits, including a 0.5 credit at the 400-level)

To help students proceed through the program, it is recommended that first year life science requirements are completed before entering the program.

Chemical and Physical Foundations of Biological Systems

1. (CHM135H1 and CHM136H1)/ CHM151Y1
Transfer credits will be accepted in lieu of the chemistry requirements only if they carry a direct exclusion or equivalency to a pre-approved chemistry course
2. MAT135H1/ PHY131H1/ PHY151H1/ CSC108H1/ CSC110Y1/ CSC148H1
3. BCH210H1

Biological Foundations of Living Systems

4. BIO120H1, BIO130H1
5. BIO220H1
6. BIO230H1/ BIO255H1

Courses in Fundamental Genetics

7. HMB265H1/ BIO260H1
8. HMB321H1

9. 0.5 credit from: HMB360H1/ HMB421H1/ HMB435H1/ HMB437H1/ HMB474H1/ BCH311H1/ BCH425H1/ BCH426H1/ BCH440H1/ BCH445H1/ BCH448H1/ CSB328H1/ CSB331H1/ CSB340H1/ CSB349H1/ CSB351Y1/ CSB353H1/ CSB428H1/ CSB429H1/ EEB318H1/ EEB323H1/ EEB365H1/ EHJ352H1/ MGY314H1/ MGY315H1/ MGY340H1/ MGY428H1/ MGY470H1/ PSL350H1

Courses in Applied Genetics

10. HMB201H1
11. HMB301H1/ HMB360H1/ BCH311H1/ CSB349H1/ PSL350H1

12. 0.5 credit from: HMB301H1/ HMB385H1/ HMB401H1/ HMB431H1/ HMB436H1/ HMB441H1/ HMB489H1/ BCH311H1/ BCH340H1/ BCH350H1/ BCH441H1/ BCH447H1/ CSB352H1/ CSB458H1/ CSB459H1/ CSB472H1/ CSB473H1/ CSB474H1/ EEB325H1/ EEB459H1/ EEB460H1/ MGY441H1/ NFS487H1/ PHL384H1/ PSL350H1/ PSL404H1/ PSY390H1

Data Analysis and Research-Based Courses

13. 0.5 credit in statistics: STA288H1 (Recommended)/ STA220H1/ EEB225H1/ PSY201H1

14. 0.5 credit from: HMB311H1/ HMB314H1/ MGY315H1/ HMB342H1/ HMB360H1/ HMB490Y1/ HMB491Y1/ HMB496Y1*/ HST373H1/ MGY314H1/ MGY377H1/ MGY378H1

** A research project from a different unit may be accepted with prior written approval from Human Biology.*

Applied Genetics and Biotechnology Major Notes:

1. Courses can only count toward one requirement, even if listed as options to multiple requisites of the program.
2. Not all courses listed have priority enrolment for Applied Genetics and Biotechnology majors. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.
3. The Applied Genetics and Biotechnology major cannot be paired with any other Human Biology Program managed major program.

HMB491Y1

Global Health Major (Science Program) - ASMAJ2575

HMB: Global Health

The objective of the HMB: Global Health program is to provide students with instruction in fundamental biological sciences and to integrate a broad understanding of the socio-economic and cultural determinants of health to populations around the world.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Required Courses (8.0 credits, including a 0.5 credit at the 400-level)

To help students proceed through the program, it is recommended that first year life science requirements are completed before entering the program.

Chemical and Physical Foundations of Biological Systems

1. (CHM135H1 and CHM136H1)/ CHM151Y1
Transfer credits will be accepted in lieu of the chemistry requirements only if they carry a direct exclusion or equivalency to a pre-approved chemistry course.
2. MAT135H1/ PHY131H1/ PHY151H1

Biological Foundations of Living Systems

Health & Disease Major (Science Program) - ASMAJ2013

HMB: Health & Disease

The objective of the HMB: Health & Disease program is to provide students with a solid foundation in the biological sciences as it relates to basic human physiology and the mechanisms of disease and to facilitate the integration of concepts from across the life sciences, social sciences and humanities. In addition, students will acquire skills in laboratory science, experience with quantitative approaches, and develop effective communication skills to provide an appropriate background essential to research and problem solving in this field.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Required Courses (8.0 credits, including a 0.5 credit at the 400-level)

To help students proceed through the program, it is recommended that first year life science requirements are completed before entering the program.

Human Biology Major (Science Program) - ASMAJ2035

HMB: Human Biology

Human Biology is a transdisciplinary field concerned with the study of human health from a biological, sociological, and evolutionary perspective. Research in human biology focuses on impact that genetic variations, development,

physical fitness, and nutrition have on the general health of populations and how this compares across cultures and through history. The objective of the HMB: Human Biology major program is to provide students with a solid foundation in the life sciences as it relates to human biology and to facilitate the integration of concepts from across the social sciences and humanities, and to equip them with quantitative skills essential to research and success in this field.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Required Courses (8.0 credits, including a 0.5 credit at the 400-level)

To help students proceed through the program, it is recommended that first year life science requirements are completed before entering the program.

Chemical and Physical Foundations of Biological Systems

1. (CHM135H1 and CHM136H1)/ CHM151Y1

**A research project from a different unit may be accepted with prior written approval from Human Biology.*

Human Biology Major Notes:

1. Courses can only count toward one requirement, even if listed as options to multiple requisites of the program.
2. Not all courses listed have priority enrolment for Human Biology majors. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.
3. The Human Biology major cannot be paired with any other Human Biology Program managed major program.

Neuroscience Major (Science Program) - ASMAJ1472

HMB: Neuroscience

Neuroscience is an interdisciplinary field aimed at understanding the brain and nervous system utilizing integration of research at the molecular, cellular, and organismal levels, and through all stages of human development. The application of neuroscience has important implications for understanding human behaviour and for promoting the development of effective strategies for diagnosing and treating nervous system disorders. The objective of the HMB: Neuroscience specialist and major programs is to provide students with a solid foundation and facilitates the integration of concepts from multiple fields to their understanding of neuroscience.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Note there are different options depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

For students who have completed between 4.0 and 8.5 credits:

Variable Minimum Grade

Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO130H1
- (CHM135H1, CHM136H1)/ CHM151Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 55% in BIO130H1, a final grade average lower than 70% in (CHM135H1, CHM136H1), or a final grade lower than 70% in CHM151Y1 will not be considered for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

For students who have completed 9.0 or more credits:

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO230H1/ BIO255H1
- HMB265H1/ BIO260H1
- BCH210H1
- PSL300H1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 55% in BIO230H1/ BIO255H1 will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Students applying for admissions to the program utilizing transfer credits will be considered on a case-by-case basis. Students entering from CEGEP or from another university should contact hmb.undergrad@utoronto.ca after their transfer credit assessment has been complete for program enrolment assessment. Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment.

Completion Requirements:

Required Courses (8.0 credits, including at least 0.5 credit at the 400-level)

Chemical and Physical Foundations of Biological Systems

1. (CHM135H1, CHM136H1)/ CHM151Y1
Transfer credits will be accepted in lieu of the chemistry requirements only if they carry a direct

exclusion or equivalency to a pre-approved chemistry course.

2. MAT135H1/ PHY131H1/ PHY151H1/ CSC108H1/ CSC110Y1/ CSC148H1
3. BCH210H1

Biological Foundations of Living Systems

4. BIO120H1, BIO130H1

12. 0.5 credit from HMB360H1/ HMB385H1/ HMB420H1/ HMB430H1/ HMB440H1/ HMB442H1 / HMB450H1/ HMB460H1/ HMB471H1/ HMB473H1 / HMB490Y1/ HMB491Y1/ HMB496Y1*/ JHA410H1/ CSB345H1/ CSB346H1/ CSB430H1/ CSB432H1/ CSC434H1/ CSB445H1/ CSC421H1/ LMP410H1/ NEW335H1/ BPM335H1/ NFS489H1/ PCL475H1/ PCL476H1/ PSL374H1/ PSL432H1/ PSL440Y1/ PSL445H1/ PSL446H1/ PSL450H1/ PSL452H1/ PSL472H1/ PSY342H1/ PSY371H1/ PSY372H1/ PSY390H1/ PSY395H1/ PSY460H1/ PSY470H1/ PSY471H1/ PSY473H1/ PSY480H1/ PSY490H1/ PSY492H1/ PSY493H1/ PSY492H1/ PSY493H1/ PSY494H1/ PSY496H1

Data Analysis and Research-Based Courses

13. 0.5 credit in statistics: STA288H1 (Recommended) / STA220H1/ EEB225H1/ PSY201H1
14. 0.5 credit from a higher-year lab course: HMB310H1/ HMB314H1/ PSY369H1

** A research project from a different unit may be accepted with prior written approval from Human Biology.*

Neuroscience Major Notes:

1. *Courses can only count toward one requirement, even if listed as options to multiple requisites of the program.*
2. *Not all courses listed have priority enrolment for Neuroscience majors. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.*
3. *The Neuroscience major cannot be paired with any other Human Biology Program managed major program.*
4. *Effective Fall 2021, courses associated with New College's Buddhism, Psychology and Mental*

Health program will have the new "BPM" designator.

Course Group

Neuroscience Centric Courses:

HMB200H1, HMB300H1, HMB310H1, HMB320H1,
CJH332H1, HMB360H1, JHA410H1, HMB420H1,
HMB430H1, HMB440H1, HMB442H1, HMB450H1,
HMB460H1, HMB473H1

Important Notes About Human Biology Courses

Human Biology Course Prerequisites & Co-requisites

Students are advised that the Human Biology Program enforces prerequisites and co-requisites on all courses offered by the program. Students are expected to know the prerequisites of courses they wish to take and ensure they have the necessary prerequisites prior to enrolment.

Should a student wish to seek a prerequisite waiver, the request must be made prior to enrolling in the course. Please email the program office at hmb.undergrad@utoronto.ca with such requests. If a student is enrolled in a Specialist in Statistical Science: Methods and Practice, or is planning on using transfer credits, or credits obtained from UTSC/UTM, in lieu of stated prerequisites/co-requisites, please contact the program office prior to enrolling in courses to ensure your alternate credits will be accepted.

Please note that if a prerequisite is a credit count, we generally will allow a 0.5 credit difference (i.e., have 13.5 credits complete when 14.0 credits is required). Should a student have all other prerequisites and if enrolment pressure is not too high, the credit prerequisite will be

waived. An email request for a waiver of this type of prerequisite is not necessary.

Please note that 300-level courses with the following joint course codes are automatically accepted when the prerequisite states "A HMB 300-level course:" CJH, EHJ, JNH.

Regarding Human Biology 400-level Courses

Given that all students enrolled in a Human Biology program require, at least, 0.5 credit of HMB 400-level courses and due to the popularity of these courses, student entering their 4th year of study will be given the opportunity to ballot for 0.5 credit of HMB 400-level fall/winter courses. The balloting process will be conducted during the period immediately preceding course enrolment and students who have successfully completed this process will be pre-enrolled in 0.5 credit of HMB 400-level courses; students will then be able to enrol and/or waitlist for other HMB 400-level courses during the regular course enrolment period. Students who have completed or will complete their HMB 400-level course requirements by the Fall of their 4th year are not eligible to participate in balloting.

There are no individual prerequisite exceptions on any HMB 400-level course. Students are required to check all prerequisites prior to enrolling in HMB 400-level courses. Students who enrol in and do not meet the stated prerequisites of an HMB course will be removed.

Students planning to use transfer credits in lieu of the prerequisites must email hmb.undergrad@utoronto.ca before enrolling in the course to request that transfer credits be accepted in lieu of the stated prerequisites.

Regarding Human Biology "Tiered Waitlists"

The Human Biology Program employs "tiered waitlists" on all courses that have the enrolment indicator of R1 or P that has unequal spots. (HMB does not use the R2 enrolment control). For an explanation of how Tiered Waitlists work please visit the "[HMB Tiered Waitlist Explained](#)" webpage.

An introductory course that explores the development, physiology and continually changing function of the nervous system as it relates to certain types of human behaviour. Critical analysis of scientific evidence is used to enrich learning.

Prerequisite: BIO120H1, BIO130H1
Recommended Preparation: PSL300H1
Breadth Requirements: Living Things and Their Environment (4)

Human Biology Courses

HMB200H1 - Introduction to Neuroscience

Hours: 24L/12T

HMB201H1 - Introduction to Applied Genetics and Biotechnology

Hours: 24L/12T

The course provides a comprehensive introduction to a variety of therapeutic approaches including gene therapy, CRISPR-based gene editing, epigenetic manipulations & regenerative medicine. This course consists of three parts: tools and techniques of gene & genome manipulations; medical, environmental and agricultural biotechnology applications; and ethical, legal and social aspects of modern biotechnology as it pertains to human health and wellbeing.

Prerequisite: BIO120H1, BIO130H1

Corequisite: EEB225H1/ STA220H1/ STA288H1/ PSY201H1

Recommended Preparation: HMB265H1/ BIO260H1

Breadth Requirements: Living Things and Their Environment (4)

HMB202H1 - Introduction to Health and Disease

Hours: 24L/12P

An introductory course in Health and Disease using an interdisciplinary approach that integrates bacteriology and virology with other aspects of human biology, including chronic disease and neoplasia. An exploration of the key concepts and approaches that are necessary for understanding the dynamic nexus of human health and disease. (Lab Materials Fee: \$30)

Prerequisite: BIO120H1, BIO130H1

Exclusion: HMB203H1/ HMB204H1

Recommended Preparation: BIO230H1/ BIO255H1

Breadth Requirements: Living Things and Their Environment (4)

HMB203H1 - Introduction to Global Health

Hours: 24L/12T

An introductory course covering the theories, operational components and strategies of implementing health care in resource-poor settings. Topics may include education, control of vector-borne diseases, essential drug provision, maternal and child health, nutrition, incorporation of alternative and complementary technologies, community participation and deployment of health service providers

Prerequisite: BIO120H1, BIO130H1

Exclusion: HMB202H1/ HMB204H1

Breadth Requirements: Living Things and Their Environment (4)

HMB204H1 - Introduction to Human Biology

Hours: 24L/12T

An introduction to the biological, health, environmental, and sociopolitical issues that influence human health and well-being. Topics include genetic variation within and across human populations, biological variation related to the environment, determinants of health and disease, and human behaviour and development.

Prerequisite: BIO120H1, BIO130H1

Exclusion: HMB202H1/ HMB203H1

Breadth Requirements: Living Things and Their Environment (4)

HMB226H1 - Indigenous Holistic Health

Hours: 2P/22S

What is holistic health in an Indigenous framework? How can holistic health (physical, mental, emotional, and spiritual) be ethically explored to inform health and healing? What is cultural safety in health care systems? This course explores the effects of traditional practices, culture, activities, arts, land-based healing, music and ceremony in health and healing.

Enrolment is by application. Detailed application instructions are available on the HMB Special Enrolment website: <https://www.hmb.utoronto.ca/special-enrolment>. The application will ask about motivation and/or relevant experience. Applications are received during priority course enrollment, and late applications considered if space remains. Applications will be assessed based on prerequisites, submitted answers to application prompts and cGPA. This course is open to all Human Biology students.

Corequisite: HMB200H1/ HMB201H1/ HMB202H1/ HMB203H1/ HMB204H1/ HST209H1

Breadth Requirements: Living Things and Their Environment (4)

HMB265H1 - General & Human Genetics

Hours: 24L/12T

An introduction to classical and modern methods of genetic analysis. Topics include Mendelian genetics, the

genetics of human population and disease, genomics, and applications of genetics to human society.

Prerequisite: BIO120H1, BIO130H1, (CHM135H1/CHM139H1, CHM136H1/CHM138H1)/CHM151Y1

Exclusion: BIO260H1/ BIO207H5

Recommended Preparation: Recommended Co-requisite: BIO230H1/ BIO255H1

Breadth Requirements: Living Things and Their Environment (4)

HMB299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

HMB299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

HMB300H1 - Neurobiology of Behaviour

Hours: 24L/12T

This neuroscience course focuses on higher brain functions and the mechanisms underlying human and animal behaviours. Topics may include the emerging role of the gut microbiome's impact on behaviour, pathogens that alter neuronal development and the biological basis of mindfulness and placebos. In addition, the impact that exercise and sleep play in modulating these behaviours are examined. Common experimental techniques used in neuroscience research such as brain imaging and cellular genetics are emphasized.

Prerequisite: BIO230H1/ BIO255H1, HMB200H1/ PSY290H1/ PSL300H1/ CJH332H1

Breadth Requirements: Living Things and Their Environment (4)

HMB301H1 - Biotechnology

Hours: 24L/12T

Students gain an appreciation for how science, government and society drive the development of biotechnology products. Topics include emerging immunotherapies, "living therapeutics", emerging challenges, CRISPR-based therapeutics, emerging diagnostics, and stem cells and regenerative medicine.

Prerequisite: HMB201H1, HMB265H1/ BIO260H1, EEB225H1/ STA220H1/ STA288H1/ PSY201H1

Breadth Requirements: Living Things and Their Environment (4)

HMB302H1 - Vertebrate Histology and Histopathology

Hours: 24L/36P

Laboratory and lecture course studying the structure of the cell, various tissues and organ systems. Emphasis is on functional morphology and the adaptive response (including the inflammatory reaction) by comparing histological sections of normal tissues and organs with common diseases including neoplasia, respiratory, and liver disease. (Lab Materials Fee: \$27)

Prerequisite: BIO230H1/ BIO255H1

Breadth Requirements: Living Things and Their Environment (4)

HMB303H1 - Global Health and Human Rights

Hours: 28L/8S

The Global Health & Human Rights course uses a multidisciplinary approach to consider the theory and practice of global health as well as human rights from a global health perspective. The course has an emphasis on the social, historical, economic and political determinants of global health and human rights. The critical approach used in the course will also allow students to begin to consider the limitations and contradictions inherent in the theory and practice of global health and in human rights.

Prerequisite: Completion of 9.0 credits including one of HMB202H1/ HMB203H1/ HMB204H1/ HST209H1/ HST211H1/ HST250H1

Breadth Requirements: Society and its Institutions (3)

HMB304H1 - Challenges of Antimicrobial Resistance in Human Biology

Hours: 24L/12T

Pathogens are becoming increasingly resistant to our available treatments, driving the spread and worsening the impact of infectious diseases. This course offers an in-depth examination of the key challenges of antimicrobial resistance in human biology, with a focus on the complexities of human health. Students will investigate how microbes develop drug resistance, how this knowledge can be used to counteract resistance, and how environmental and societal factors influence our responses to this growing global threat.

Prerequisite: [BIO230H1](#), [BCH210H1](#), [HMB204H1](#), [HMB265H1](#)

Breadth Requirements: Living Things and Their Environment (4)

HMB306H1 - Ethical Considerations in Emerging Technology

Hours: 14L/10S

Advancing technology increases our ability to intervene in the course of natural events involving human health and well being. Questions arise as whether we ought to and who will benefit or be harmed. This course considers the far-reaching bioethical implications of emerging biotechnology. Topics to be explored include-but are not limited to- ethical considerations in emerging reproductive technologies, genetic alteration/genetic enhancement. Use of life support technologies, synthetic life, life extension.

Prerequisite: [BIO230H1](#), [HMB265H1](#)/ [BIO260H1](#)

Breadth Requirements: Living Things and Their Environment (4)

HMB310H1 - Laboratory in Neuroscience

Hours: 12L/36P

A laboratory course based on current research techniques for students in the Neuroscience program. Lab topics may include human brain imaging and disorders, electrophysiology, cell culture, and changes in gene expression during neuronal development. Labs start in the first week of term. (Lab Materials Fee: \$67)

Prerequisite: Completion of 9.0 credits including one of [HMB200H1](#)/ [PSY290H1](#), one of [HMB265H1](#)/ [BIO260H1](#), and one of [BIO230H1](#)/ [BIO255H1](#)

Corequisite: [PSL300H1](#)

Exclusion: [HMB311H1](#)/ [HMB312H1](#)/ [HMB314H1](#)/ [PSY359H1](#)

Breadth Requirements: Living Things and Their Environment (4)

HMB311H1 - Laboratory in Fundamental Genetics and its Applications

Hours: 12L/36P

A laboratory course based on current research techniques for students in the Fundamental Genetics and its Applications programs. Lab topics may include molecular biology and animal cell culture techniques, nutrigenomics; an overview of microarrays and a CRISPR module. Labs start in the first week of term. (Lab Materials Fee: \$162)

Prerequisite: Completion of 9.0 credits including [HMB201H1](#), one of [HMB265H1](#)/ [BIO260H1](#), and one of [BIO230H1](#)/ [BIO255H1](#)

Exclusion: [HMB310H1](#)/ [HMB312H1](#)/ [HMB314H1](#)

Breadth Requirements: Living Things and Their Environment (4)

HMB312H1 - Laboratory in Health and Disease

Hours: 12L/36P

A laboratory course based on current research techniques and topics which may include basic microbiology, molecular biology and animal cell culture techniques, immunocytochemistry, changes in gene expression, and histological techniques. Labs start in the first week of term. (Lab Materials Fee: \$105)

Prerequisite: Completion of 9.0 credits including one of [HMB202H1](#)/ [HMB203H1](#)/ [HMB204H1](#), one of [HMB265H1](#)/ [BIO260H1](#), and one of [BIO230H1](#)/ [BIO255H1](#)

Corequisite: [BCH210H1](#)

Exclusion: [HMB310H1](#)/ [HMB311H1](#)/ [HMB314H1](#)

Breadth Requirements: Living Things and Their Environment (4)

HMB314H1 - Laboratory in Human Biology

Hours: 12L/36P

Students analyze whole body, cellular, and molecular responses to stress. Techniques range from those standard in medical practice (e.g., fitness measures, blood pressure, lung function) to current research techniques (cell culture, changes in gene expression). Students gain technical and analytical skills as they work at the bench to design and carry out individual and group experiments. Labs start in the first week of term. (Lab Materials Fee: \$61)

Prerequisite: Completion of 9.0 credits including one of [HMB265H1](#)/ [BIO260H1](#), and one of [BIO230H1](#)/ [BIO255H1](#)

Corequisite: PSL300H1, PSL301H1

Exclusion: HMB310H1/ HMB311H1/ HMB312H1

Breadth Requirements: Living Things and Their Environment (4)

HMB320H1 - Neuroanatomy

Hours: 24L/4T/10P

This is a rigorous, introductory course that addresses the structure of the vertebrate central nervous system with an emphasis on functional human neuroanatomy. It is designed for students who intend to continue with studies in the Neurosciences and related areas.

Prerequisite: Completion of 9.0 credits including PSL300H1, HMB200H1, and one of BIO230H1/ BIO255H1

Breadth Requirements: Living Things and Their Environment (4)

HMB321H1 - Topics in Genetics

Hours: 24L/12T

The overall theme of this course is human genetics in disease. Topics include the molecular basis of human disease, using model organisms to identify disease-related genes, and genetic counseling. Expert guest lectures from clinical and basic sciences as well as small group work in tutorials build in-depth understanding.

Prerequisite: Completion of 9.0 credits including one of HMB265H1/ BIO260H1

Breadth Requirements: Living Things and Their Environment (4)

HMB322H1 - Topics in Health & Disease

Hours: 24L/12T

Explore the scientific basis and interdisciplinary healthcare practices of several diseases (diseases vary by year). Discuss current issues related to the biology and the impact of these diseases.

Prerequisite: Completion of 9.0 credits including one of HMB202H1/ HMB203H1/ HMB204H1, one of BIO230H1/ BIO255H1, and PSL300H1

Corequisite: PSL301H1

Recommended Preparation: HMB302H1

Breadth Requirements: Living Things and Their Environment (4)

HMB323H1 - Global Health Research

Hours: 24L/12T

Health is a responsibility shared worldwide. Globalization of health has impacted biomedical research. Students will explore current global health research advances and build skills in the design and conduct of global health research studies.

Prerequisite: Completion of 9.0 credits including one of HMB202H1/ HMB203H1/ HMB204H1, and one of BIO230H1/ BIO255H1

Breadth Requirements: Living Things and Their Environment (4)

CJH332H1 - Cellular and Molecular Neurobiology of the Synapse

Previous Course Number: CSB332H1

Hours: 36L

Examination of all aspects of the synapse in both the peripheral and central nervous systems of invertebrates and vertebrates. Topics include: neuroplasticity, synapse formation, synaptic transmission, synaptic modulation, and the molecular biological basis of neurodegenerative disorders.

Prerequisite: BIO271H1/ PSL300H1

Exclusion: CSB332H1

Breadth Requirements: Living Things and Their Environment (4)

HMB342H1 - Epidemiology of Health & Disease

Hours: 24L/12T

This course engages students in the fundamental science of epidemiology applied to health and disease. After an introduction to various measures of health and disease, the scientific methods used to investigate, analyze, prevent and control health problems will be illustrated using social, biomedical and public health examples

Prerequisite: Completion of 9.0 credits including one of BIO120H1/ BIO130H1/ HST209H1

Exclusion: HST373H1

Recommended Preparation: STA220H1/ STA288H1/ EEB225H1/ PSY201H1

Breadth Requirements: The Physical and Mathematical Universes (5)

JAH350H1 - AIDS, Outbreaks, Pandemics: Challenges and Successes in Africa

Previous Course Number: JNH350H1

Hours: 24L

Explores a range of historical and current outbreaks, pandemics and epidemics such as AIDS, COVID-19 and Ebola in Africa through a social science lens. It introduces students to major concepts, events and debates that have and continue to shape understanding of the HIV/AIDS epidemic, Ebola outbreak and COVID-19 pandemic, and the challenges and responses to these distinct health crises. Through a critical lens, students will engage diverse and interdisciplinary scholarship from public health, medical anthropology, sociology, African studies, and related fields within the health and social sciences fields to explore the converging factors that influence responses to health crises and their broader implications.

Prerequisite: 9.0 credits

Exclusion: JNH350H1

Recommended Preparation: AFR150Y1/ AFR290H1 or HMB203H1/ HMB202H1 or interested students with relevant background

Breadth Requirements: Society and its Institutions (3)

EHJ352H1 - Human Evolutionary Genomics

Hours: 24L/12T

Human genome diversity and evolution with a focus on current research. The course integrates applications of human evolutionary genomics to the understanding of human history and adaptation, the causes of disease, and genome structure and function. Topics include: comparative genomics, population genomics of adaptation, association mapping, polygenic scores, and repetitive/selfish DNA.

Prerequisite: BIO220H1, BIO260H1/ HMB265H1

Breadth Requirements: Living Things and Their Environment (4)

HMB360H1 - Neurogenomics

Hours: 24L/12T

This course covers two main themes: Emerging gene or cell-based therapies to treat neurological disorders and genome engineering tools and techniques to investigate both normal and abnormal brain function. Topics may include cell reprogramming & stem cell technologies, brain organoids & tissue engineering, emerging genome

engineering approaches to treat neurodegenerative diseases and behavioural disorders, and optogenetics to probe neural circuit function. Tutorials emphasize critical analysis of primary research.

Prerequisite: Completion of 9.0 credits including one of HMB265H1/ BIO260H1, and one of HMB200H1/ HMB201H1

Breadth Requirements: Living Things and Their Environment (4)

HMB385H1 - The Human Microbiome in Health & Disease

Hours: 24L/12T

The gut microbiome affects numerous aspects of human health and disease, from metabolic and neurodevelopmental disorders to cancer and host behaviour. This course explores the physiological role of the microbiome in human development, human disease, drug efficacy and drug resistance and the emerging gut microbiome as diagnostic and therapeutic target.

Prerequisite: BIO230H1/ BIO255H1, HMB265H1/ BIO260H1, HMB200H1/ HMB201H1/ HMB202H1/ HMB203H1/ HMB204H1

Recommended Preparation: HMB201H1, HMB301H1

Breadth Requirements: Living Things and Their Environment (4)

HMB394Y0 - International Research Project in Human Biology

Your individual, independent research project is supervised by a faculty member in an approved university. This unique opportunity to conduct a lab-based research project is open to students in any Human Biology program. Coordinated by Centre for International Experience. Not eligible for CR/NCR option.

Prerequisite: 8.5 credits including relevant courses in human biology.

HMB395Y0 - Summer Abroad Topics in Human Biology

Hours: 48L/48S

Topics in Human Biology for the Summer Abroad Program. Course topics, content, and instructor may vary from one year to another. More information about Human Biology and other course offerings can be obtained from the Summer Abroad website at

<https://summerabroad.utoronto.ca/>. For students in any Human Biology Program.

Prerequisite: Completion of 9.0 credits

Breadth Requirements: Living Things and Their Environment (4)

HMB396Y0 - International Research Project in Human Biology

Your individual, independent research project is supervised by a faculty member in an approved university. This unique opportunity to conduct a lab-based research project is open to students in any Human Biology program. Not eligible for CR/NCR option. Coordinated by Woodsworth College.

Prerequisite: An approved 300-series science laboratory course and permission of the Human Biology Program from which application forms may be obtained.

HMB398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

Prerequisite: Completion of 9.0 credits and permission of the Human Biology Program from which application forms may be obtained.

HMB399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

HMB399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

HMB401H1 - Biomedical Advances & Technologies

Hours: 24L/12T

This course introduces life science students to biomedical advances and technologies in medicine, including drug patents, medical device implants, diagnostic and medical device software. Limitations of patent protection in commercializing medical products, and limitations to scalability may also be discussed. Specific topics vary from year to year and will be based on the course instructor's area(s) of expertise.

Prerequisite: Completion of 14.0 credits including one of HMB301H1/ HMB321H1/ HMB360H1/ BCH311H1/ CSB349H1/ MGY311Y1/ PSL350H1

Recommended Preparation: A statistics course

Breadth Requirements: Living Things and Their Environment (4)

HMB402H1 - Topics in Translational Medicine

Hours: 18L/6S

The bridge between basic scientific research and clinical practice integrates fundamental knowledge about molecular/cellular mechanisms and clinical disorders to increase the potential for new medical treatments, therapies and interventions as well as understanding of disease processes. Specific topics vary from year to year and will be based on the instructor's area(s) of expertise.

Prerequisite: Completion of 14.0 credits including BCH210H1, one of BIO230H1/ BIO255H1, one of HMB302H1/ HMB321H1/ HMB322H1/ BCH311H1/ CSB349H1/ MGY311Y1/ PSL350H1

Recommended Preparation: BCH311H1/ CSB349H1/ MGY311Y1/ PSL350H1

Breadth Requirements: Living Things and Their Environment (4)

HMB406H1 - Health Care Ethics

Hours: 8L/16S

Since research involving human subjects lays the foundation for innovation in modern health care, this course examines health care ethics along a continuum from bench to bedside. Ethical issues are discussed in the context of specific cases involving human research, as well as contemporary clinical practice.

Prerequisite: Completion of 14.0 credits including 0.5 HMB/CJH/EHJ/JNH credit at the 300-level, and 0.5

additional credit from HMB306H1, PHL281H1, or another ethics course with prior approval from the unit

Breadth Requirements: Living Things and Their Environment (4)

JHA410H1 - Clinical Neuroimaging

Hours: 24L/12T

This course focuses on the use of neuroimaging techniques in understanding how trauma, disorders, and disease impact neural structure and function. Lectures will focus on introduction to techniques and clinical/research applications. Lab work will focus on the development of practical skills including image processing, analyses, and experimental design.

Prerequisite: Completion of 9.0 credits including PSL300H1, BIO230H1/ BIO255H1, and one of HMB200H1/ PSY290H1/ ANA300Y1

Recommended Preparation: HMB320H1

Breadth Requirements: Living Things and Their Environment (4)

HMB420H1 - Seminar in Neurobiology of Behaviour

Hours: 12L/12S

This seminar course focuses on recent research into the neurobiology underlying human behaviour. A variety of normal and abnormal human behaviours are studied which may include: voluntary action; moral cognition; hedonism; aggression; mental health; addiction; the impact of the gut microbiome on brain development and health.

Prerequisite: Completion of 14.0 credits including HMB200H1, HMB300H1, and one of HMB320H1/ ANA300Y1

Breadth Requirements: Living Things and Their Environment (4)

HMB421H1 - Seminar in Fundamental Genetics and its Applications

Hours: 12L/12S

Theme based lecture and seminar course underlining current medical research in relation to the areas of genes and genetics. Topics vary yearly.

Prerequisite: Completion of 14.0 credits including HMB201H1 and one of HMB265H1/ BIO260H1

Recommended Preparation: HMB321H1/ BCH311H1

CSB349H1/ MGY311Y1/ PSL350H1

Breadth Requirements: Living Things and Their Environment (4)

HMB422H1 - Seminar in Health & Disease

Hours: 16L/8S

This course focuses on various medical research related to human disease. Topics vary based on course instructor's area(s) of expertise.

Prerequisite: Completion of 14.0 credits including PSL300H1, PSL301H1, one of HMB302H1/ HMB322H1

Breadth Requirements: Living Things and Their Environment (4)

HMB423H1 - Non-Communicable Diseases: A Global Health Challenge

Hours: 24L

This course explores the connection between biological processes involved in the development of non-communicable diseases that affect Canadians and the greater global community. Students will critically examine precursors of disease from early life throughout the life course to understand metabolic processes and disease etiology and their manifestation across populations against a backdrop of an everchanging sociocultural, geopolitical, and environmental climate. The course explores the intersection of biological factors and processes, and the evolution of chronic disease management alongside learning about the application of historical medical/public health practices. Students will also critically examine the intersection of biology and developmental determinants of health involved in the perpetuation of racial disparities of chronic disease and implications for effective population-level interventions and prevention efforts.

Prerequisite: Completion of 14.0 credits including HMB203H1, PSL300H1, PSL301H1

Breadth Requirements: Living Things and Their Environment (4)

HMB430H1 - Trends in Neuroscience

Hours: 18L/6S

Current research covering the breadth of neuroscience is showcased by members of the Collaborative Program in Neuroscience. Topics vary yearly, but cover the spectrum from molecular through genetic, cellular, developmental,

systems, behavioural and modelling. As well, approaches to studying neurodegenerative diseases and clinical neurophysiology are introduced.

Prerequisite: Completion of 14.0 credits including HMB200H1, CJH332H1, and one of HMB320H1/JHA410H1/ANA300Y1

Breadth Requirements: Living Things and Their Environment (4)

HMB431H1 - Innovation in Genome Engineering and Translational Research

Hours: 8L/16S

From bench to bedside, this seminar-based course explores innovation in research and technology and their application in the medical field. Special emphasis on innovative genetic engineering approaches used in combination with stem cell technologies to transform the field of personalized and regenerative medicine.

Prerequisite: Completion of 14.0 credits including one of HMB301H1/HMB360H1/HMB321H1

Breadth Requirements: Living Things and Their Environment (4)

HMB432H1 - Topics in Histology & Histopathology

Hours: 12L/12S

Lecture and seminar course emphasizing current research. Topics may include the digestive system, cardiovascular system, respiratory system, stem cells, and neoplasia. Topics vary depending on class interest.

Prerequisite: Completion of 14.0 credits including one of HMB302H1/HMB322H1

Recommended Preparation: BCH311H1/CSB349H1/MGY311Y1/PSL350H1

Breadth Requirements: Living Things and Their Environment (4)

HMB433H1 - Topics in Global Health

Hours: 16L/8S

Seminar and theme based course examining the opportunity to apply basic knowledge of biological determinants of disease to designing health system interventions and informatics that can have a global impact in the near term.

Prerequisite: Completion of 14.0 credits including one of HMB303H1/HMB323H1

Breadth Requirements: Living Things and Their Environment (4)

HMB434H1 - Complementary & Integrative Medicine

Hours: 20L/4S

Introduction to complementary and alternative medical therapies. Topics include, Traditional Chinese Medicine, Naturopathy, Ayurvedic, and Mind-Body Practices. Biological mechanisms will be emphasized and therapies will be critically analyzed from an evidence-based research perspective. Integrating alternative therapies into Western practices with a focus on personalized medicine will be discussed.

Prerequisite: Completion of 14.0 credits including BCH210H1, one of BIO230H1/BIO255H1, one of HMB302H1/HMB312H1/HMB314H1/HMB322H1/HMB323H1/HMB342H1

Recommended Preparation: HMB342H1/CSB349H1/PSL350H1/BCH311H1

Breadth Requirements: Living Things and Their Environment (4)

HMB435H1 - Selected Topics in Molecular Cell Biology

Hours: 16L/8S

Theme-based lecture and seminar course underlining current basic science research in the area of molecular and cell biology, focusing on cell migration and its relevance to human health and disease. Topics may focus on the impact of fundamental processes underlying the cell biology, physiology and pathophysiology of cell motility in a variety of systems (e.g. immune, nervous system, cancer context).

Prerequisite: Completion of 14.0 credits including one of BCH311H1/CSB349H1/MGY311Y1/PSL350H1

Breadth Requirements: Living Things and Their Environment (4)

HMB437H1 - The Biology of the Human Metallome

Hours: 24L

This course will discuss how heavy metals are integral to organ function through various biological pathways, the importance of metal regulation and control and its

relationship with gene transcription. An introduction of metallo-therapeutics will also be featured, ranging from neurodegenerative therapies to cancer treatment.

Prerequisite: Completion of 14.0 credits including one of HMB265H1/ BIO260H1, one of BIO230H1/ BIO255H1, and BCH210H1

Breadth Requirements: Living Things and Their Environment (4)

HMB440H1 - Dementia

Hours: 24L

This course, featuring a service-learning component, explores dementia. In patients with dementia, intellectual, social and occupational functioning deteriorate. The course addresses the multi-disciplinary aspects of dementia (clinical, genetic, molecular, social) with a focus on the most common cause of dementia, Alzheimer's disease.

Enrolment is by application. Detailed application instructions are available on the HMB Special Enrolment website: <https://www.hmb.utoronto.ca/special-enrolment>. The application will ask about motivation and/or relevant experience. Applications are received during priority course enrollment, and late applications considered if space remains. Specific application review and response dates will be available on the HMB Special Enrolment website. Applications will be assessed based on prerequisites, submitted answers to application prompts and cGPA. This course is open to all Human Biology students.

Prerequisite: Completion of 14.0 credits including PSL300H1, one of HMB265H1/ BIO260H1, and one of HMB300H1/ HMB302H1/ HMB320H1/ HMB321H1/ ANA300Y1

Breadth Requirements: Living Things and Their Environment (4)

HMB441H1 - Genetics of Human Disease

Hours: 24L

This advanced course aims to provide students with current, in-depth knowledge of the genetics of specific human diseases, including single gene (e.g., Huntington disease), multifactorial (e.g. Alzheimer's disease), and non-Mendelian (e.g. mitochondrial DNA-related disease) disorders, and how the use of genetics to elucidate disease mechanisms can lead to treatments and personalized medicine in order to improve healthcare.

Prerequisite: Completion of 14.0 credits including BCH210H1, one of HMB265H1/ BIO260H1, one of

HMB302H1/ HMB321H1/ HMB322H1/ HMB360H1/ BCH311H1/ CSB349H1/ MGY311Y1/ PSL350H1
Recommended Preparation: HMB321H1, PSL300H1, PSL301H1

Breadth Requirements: Living Things and Their Environment (4)

HMB442H1 - Brain Tumours: From Diagnosis to Treatment Effects

Hours: 16L/8S

This course focuses on current insights in brain tumour etiology and pathology as well as treatment options and side-effects. Based on a seminar format, this course is highly discussion-based and collaborative in nature.

Prerequisite: Completion of 14.0 credits including PSL300H1, and one of HMB302H1/ HMB322H1/ HMB300H1/ HMB360H1/ CJH332H1

Breadth Requirements: Living Things and Their Environment (4)

HMB443H1 - Global Hidden Hunger

Hours: 18L/6S

Vitamin and mineral deficiencies, termed 'hidden hunger,' affect about half the world's population. Explore the global nature, catastrophic consequences, and causes of these deficiencies. Discuss formulation and implementation of international, national, and local policies to alleviate 'hidden hunger' especially in infants and young children. A service-learning opportunity is integrated. Students will be required to contribute to a local community organization while using course knowledge to develop a project or initiative beneficial to the organization and community.

Enrolment is by application. Detailed application instructions are available on the HMB Special Enrolment website: <https://www.hmb.utoronto.ca/special-enrolment>. The application will ask about motivation and/or relevant experience. Applications are received during priority course enrollment, and late applications considered if space remains. Specific application review and response dates will be available on the HMB Special Enrolment website. Applications will be assessed based on prerequisites, submitted answers to application prompts and cGPA. This course is open to all Human Biology students.

Prerequisite: Completion of 14.0 credits including one of BIO230H1/ BIO255H1, and 0.5 HMB/CJH/EHJ/JNH credit at the 300-level/ NFS382H1

Recommended Preparation: PSL301H1, CSB349H1/ PSL350H1/ BCH311H1

Breadth Requirements: Society and its Institutions (3)

HMB450H1 - Neurodevelopmental Diversity and Diseases

Hours: 24L/12T

Brain development plays a critical role in human health as early neurological mechanisms provide the foundation for future complex neurological processes. This course will examine how neurodevelopmental differences contribute to neurological diversity, disorders and/or diseases, such as autism, epilepsy, and paediatric multiple sclerosis. Current research from basic, translational, and clinical perspectives will be examined. Case studies, the impact of neurodevelopmental differences, and respect for neurodiversity will be emphasized.

Prerequisite: Completion of 14.0 credits including HMB200H1, and one of HMB320H1/ ANA300Y1/ JHA410H1

Breadth Requirements: Living Things and Their Environment (4)

HMB452H1 - Personalized Medicine

Hours: 12L/12S

The bridge between basic scientific research and clinical practice integrates fundamental knowledge about molecular/cellular mechanisms and clinical disorders to increase the potential for new medical treatments and technologies as well as understanding of disease processes. Specific topics vary from year to year and will be based on the course instructor's area(s) of expertise.

Prerequisite: Completion of 14.0 credits including one of HMB302H1/ HMB321H1/ HMB322H1

Breadth Requirements: Living Things and Their Environment (4)

HMB453H1 - AIDS: A Global Perspective

Hours: 6L/18S

Seminars explore the global AIDS crisis. Varying epidemiological profiles of AIDS are placed in broader biological, social, and cultural frameworks. The impact of globalization and structural inequality on local cultures and lifestyles provides a backdrop to the discussions.

Prerequisite: Completion of 14.0 credits including 0.5 HMB/CJH/EHJ/JNH credit at the 300-level/ JSU237H1/ PHS300H1/ JNH350H1

Exclusion: HAI453H1

Breadth Requirements: Living Things and Their Environment (4)

JEH455H1 - Current Issues in Environment and Health

Hours: 16L/8S

This course introduces students to complex issues at the interface between environment and health where health is broadly defined. Each year a current and controversial case study is explored from scientific, medical, political and policy perspectives. The course takes students from the molecular to individual to population and societal levels.

Prerequisite: Completion of 14.0 credits including one of ENV341H1/ HMB302H1/ HMB312H1/ HMB314H1/ HMB322H1

Breadth Requirements: Living Things and Their Environment (4)

HMB460H1 - Seminars in Neurobiology of Mental Health

Hours: 12L/12S

This seminar course focuses on recent research into the neurobiology underlying mental health issues and is highly discussion-based and collaborative in nature. Specific topics are indicated by subtopic (which may vary yearly).

Prerequisite: Completion of 14.0 credits including HMB200H1, HMB300H1, and one of HMB320H1/ ANA300Y1/ JHA410H1

Breadth Requirements: Living Things and Their Environment (4)

HMB462H1 - Topics in Epidemiology

Hours: 12L/12S

The focus is on the theory and application of biostatistics and epidemiology to current developments in special topics in substantive areas of epidemiology (e.g., chronic disease, environmental & occupational health, infectious disease, methods, social, etc.).

Prerequisite: Completion of 14.0 credits including HMB342H1

Breadth Requirements: Living Things and Their Environment (4)

HMB470H1 - Exercise and Sports Medicine

Hours: 22L/4S

This course considers the health benefits and risks of different forms of exercise, with a goal of understanding how people should exercise, and how much, depending on their athletic and health goals. It introduces elements of exercise science including the biomechanics of tissues and injuries to develop an understanding of how both the quantity and quality of movement and loading contribute to healthy training and/or injury. Some common injuries in sport such as knee injuries and concussions are used as examples of how various patterns of loading can cause injuries.

Prerequisite: Completion of 14.0 credits including PSL300H1, PSL301H1, and 0.5 HMB/CJH/EHJ/JNH credit at the 300-level

Breadth Requirements: Living Things and Their Environment (4)

HMB471H1 - Performance Enhancement

Hours: 24L/4P

Enhancing performance has broad appeal. This course explores current developments for achieving peak performance academically, physically and emotionally. We focus on the scientific basis of the links between performance and stress, and of the benefits and risks of pharmacological methods to achieve performance enhancement. Various stress management skills are introduced.

Prerequisite: Completion of 14.0 credits including PSL300H1, and 0.5 HMB/CJH/EHJ/JNH credit at the 300-level

Breadth Requirements: Living Things and Their Environment (4)

HMB472H1 - Exercise Physiology

Hours: 20L/4S

Examine the physiological and biochemical responses of the human body to both acute and chronic bouts of physical activity. The impact of activity on health, and health on physical activity, is explored by examining adaptations from the cellular to the systemic level of bodily function.

Prerequisite: Completion of 14.0 credits including PSL300H1, PSL301H1, and 0.5 HMB/CJH/EHJ/JNH credit at the 300-level

Breadth Requirements: Living Things and Their Environment (4)

JHU473H1 - Environmental Crises, Human Mobility, and Health

Hours: 24S

Multiple environmental crises – climate change, environmental degradation, loss of biodiversity, resource depletion – are already affecting every inhabited region of the globe, impacting human health in direct, indirect, and systemic ways. At the systemic level, they act as risk multipliers, compounding the effects of pre-existing social and political determinants of health, including human mobility. This course discusses the interactions between environmental crises and human mobility, and their impact on human health.

Prerequisite: HST209H1/ HMB203H1/ HMB303H1

Recommended Preparation: HMB203H1, HST405H1

Breadth Requirements: Society and its Institutions (3)

HMB473H1 - Exercise and Mental Health

Hours: 18L/10P/6S

This course, featuring a service-learning component, discusses how mental well-being is a critical element of total health. We explore the evidence underpinning the role of physical activity in the avoidance of mental disorders, recovery from mental disorders, and the quality of life of those with or without mental disorders.

A short application to enrol in this course is required. Information may be found via the [Human Biology Program website](#).

Prerequisite: Completion of 14.0 credits including PSL300H1, PSL301H1, and 0.5 HMB/CJH/EHJ/JNH credit at the 300-level

Breadth Requirements: Living Things and Their Environment (4)

HMB474H1 - Dental Sciences

Hours: 20L/4S

Dentistry is one of the oldest branches of medicine responsible for the treatment of diseases of oral cavity. This course will introduce students to the key concepts as well as the latest research in the dental sciences, including but not limited to craniofacial structures, bone physiology, odontogenesis, pathogenesis of oral diseases, and technology in dental sciences.

Prerequisite: Completion of 14.0 credits including PSL300H1, PSL301H1, and 0.5 HMB/CJH/EHJ/JNH credit at the 300-level

Breadth Requirements: Living Things and Their Environment (4)

HMB489H1 - Advanced Laboratory in Human Biology

Hours: 36P/12S

Building on their experience in 3rd-year labs, students participate in inquiry-based laboratory experiments in diverse areas of current human biology research. Open to students in any Human Biology program. Labs start in the first week of term. (Lab Materials Fee: \$132)

Prerequisite: Completion of 14.0 credits including one of HMB310H1/ HMB311H1/ HMB312H1/ HMB314H1

Breadth Requirements: Living Things and Their Environment (4)

HMB490Y1 - Health in Community

Hours: 24L/24T

An experiential learning course exploring health-related challenges and social determinants of health in partnership with local community organizations. Lectures and tutorials will support learning of selected biological and social aspects of health and disease, neuroscience, genetics or population health, and the development of scientific knowledge translation skills relevant to the community agencies. Cannot be taken concurrently with a full year research project course.

Enrolment is by application. Detailed application instructions are available on the HMB Special Enrolment website: <https://www.hmb.utoronto.ca/special-enrolment>. The application will ask about motivation and/or relevant experience. . Applications are received during priority course enrollment, and late applications considered if space remains. Specific application review and response dates will be available on the HMB Special Enrolment website. Applications will be assessed based on prerequisites, submitted answers to application prompts and cGPA. This course is open to all Human Biology students.

Prerequisite: BIO230H1/ BIO255H1, HMB265H1/ BIO260H1, BCH210H1, PSL300H1, PSL301H1, HMB200H1/ HMB201H1/ HMB202H1/ HMB203H1/ HMB204H1

Exclusion: HMB473H1

Recommended Preparation: A 300-level science lab course

Breadth Requirements: Living Things and Their Environment (4), Society and its Institutions (3)

HMB491Y1 - Project in Biotechnology Industry

Hours: 12L/200P/12S

Students undertake an academic internship in the biotechnology sector, in addition to meeting regularly in class to discuss and share their experiences. The course is designed to provide students with an opportunity to apply academic learning in a professional context, build their network, and explore potential career paths. Students will be required to complete 200 hours with a placement partner over the duration of the course (normally 8 hours/week).

The course is open to fourth year students. Students work with course staff to secure their internship with our partner organizations.

Enrolment is by application. Detailed application instructions are available on the HMB Special Enrolment website: <https://www.hmb.utoronto.ca/special-enrolment>. Application packages will be accepted in April every year, and specific due date, course/placement information, and the application form can be found in the website. The application will ask about goals, course expectations and relevant knowledge & experience. Applications will be assessed based on prerequisites, submitted answers to application prompts and relevant knowledge.

Course enrolment will be based on the number of internship opportunities available (which will vary from year-to-year), student qualifications (e.g. performance in relevant courses, qualifications related to the internship positions on offer, and interview performance). Final acceptance into the course is dependent on the official acceptance of a student as an intern with a partner organization.

Not eligible for CR/NCR option.

Prerequisite: 14.0 credits and an application, STA288H1 (Recommended) / STA220H1/ PSY201H1/ EEB225H1

Exclusion: ASIP Program, HMB490Y1, not recommended to take with another full year project course. Anyone considering taking two projects needs course instructors approval first.

Recommended Preparation: HMB201H1/ HMB301H1/ HMB360H1 (NOTE: students that did not take HMB201H1 & HMB301H1 would be required to complete 16 CS-Biotech online modules)

Breadth Requirements: Living Things and Their Environment (4)

HMB496Y1 - Research Project in Human Biology

A research project course for students enrolled in a Human Biology program, supervised by a faculty member appointed in a faculty or division at St. George Campus (Faculties of Arts & Science, Medicine, Engineering, Dalla Lana School of Public Health, etc.). Open to third and fourth year students.

Enrolment is by application. Detailed application instructions are available on the HMB Special Enrolment website: <https://www.hmb.utoronto.ca/special-enrolment>. For your application to be submitted and considered, you must first secure a supervisor for your research project. Applications are due by May 1 for the summer term or September 1 for the fall/winter terms, though students are encouraged to start looking for a supervisor at least 6 months in advance. This course is open to all Human Biology students.

Should a HMB Specialist require help securing a supervisor, the request must be made by email to the Human Biology Program Office no later than July 20 for Academic year projects and January 30 for Summer projects.

Not eligible for CR/NCR option.

Prerequisite: Permission of the Human Biology Program; please refer to the Human Biology Program website for more details

Exclusion: Students are not permitted to do a HMB research project concurrently with another research project

Should a HMB Specialist require help securing a supervisor, the request must be made by email to the Human Biology Program Office no later than July 20 for Academic year projects and January 30 for Summer projects.

Not eligible for CR/NCR option.

Prerequisite: HMB496Y1, and permission of the program

Exclusion: Students are not permitted to do a HMB research project concurrently with another research project.

HMB499Y1 - Research Project in Human Biology II

A research project course for students enrolled in a Human Biology program, supervised by a faculty member appointed in a faculty or division at St. George Campus (Faculties of Arts & Science, Medicine, Engineering, Dalla Lana School of Public Health, etc.). Open to third and fourth year students.

Enrolment is by application. Detailed application instructions are available on the HMB Special Enrolment website: <https://www.hmb.utoronto.ca/special-enrolment>. For your application to be submitted and considered, you must first secure a supervisor for your research project. Applications are due by May 1 for the summer term or September 1 for the fall/winter terms, though students are encouraged to start looking for a supervisor at least 6 months in advance. This course is open to all Human Biology students.

Hungarian

Given by the Centre for European and Eurasian Studies

Introduction

Hungarian is spoken by ten and a half million inhabitants of present-day Hungary, about three million people in the neighbouring countries, and perhaps as many as an additional two million around the world. These figures make Hungarian, which is related to Finnish, Estonian, and Lappish, but virtually no other language in Europe, by far the largest minority language in the great Indo-European language territory.

Despite the isolation that might have been imposed by the uniqueness of their language, Hungarians have been engaged with, and participants in, greater European affairs since their arrival in the Carpathian basin more than a thousand years ago. Hungarians have made significant contributions in the fields of arts, science, and mathematics, winning Nobel prizes in Chemistry (4), Medicine (3), Physics (3), Economics, and Literature. In the music world the names Bartók, Kodály, Lehár, Liszt, Széll, Ormandy, Schiff, and many others are internationally famous. Leo Szilárd, Edward Teller, Paul Erdős, and John von Neumann are famous figures in theoretical physics and mathematics. Joseph Biró developed the ball-point pen and to this day the British call a ball-point pen, a biro. Hungarians have also become famous in sports, particularly soccer, boxing, and fencing, and in the world of cinema. And who has not played with the Rubik's cube?

Hungarian studies at the University of Toronto focus on the language, literature, cinema and culture of Hungary and on the international role of Hungary and Hungarians—particularly on Hungarian immigration to Canada. For many of the courses no prior knowledge of the Hungarian language is necessary, making them easily accessible to students in other programs.

Program Coordinator:
Professor Robert Austin, robert.austin@utoronto.ca, 416-946-8942

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Hungarian programs impacted by this policy:
[ASMAJ1124](#) and [ASMIN1124](#)

Hungarian Programs

Hungarian Studies Major (Arts Program) - ASMAJ1124

Enrolment Requirements:

Enrolment in the Hungarian Studies Major will be administratively suspended as of 7 July 2023 and students will no longer be able to enrol in the program. Students presently enrolled in the Major will be able to complete the program requirements as described below. Students who are not enrolled in this Major but are interested in studies in the Hungarian language, film, history and politics are strongly recommended to consult the European Affairs section of the Academic Calendar as well as the Centre for European and Eurasian Studies (CEES) for advising.

Completion Requirements:

(6.0 credits, including 2.0 credits in Hungarian language study)

First Year:
[HUN100Y1](#)

Higher Years:

1. [HUN200Y1](#), [HUN310Y1](#), [HUN320Y1](#)
2. 2.0 credits from: [EUR200Y1](#), [HIS241H1](#), [HIS242H1](#), [HIS251Y1](#), [HIS389H1](#) (Hungarian History), [HIS453H1](#), [HUN355H1](#), [HUN345H1](#), [HUN355H1](#), [HUN356H1](#), [HUN440Y1](#), [HUN450H1](#), [HUN455H1](#), [INI381H1](#)

Hungarian Studies Minor (Arts Program) - ASMIN1124

Enrolment Requirements:

Enrolment in the Hungarian Studies Minor will be administratively suspended as of 7 July 2023 and students will no longer be able to enrol in the program. Students presently enrolled in the Minor will be able to complete the program requirements as described below. Students who are not enrolled in

this Minor but are interested in studies in the Hungarian language, film, history and politics are strongly recommended to consult the European Affairs section of the Academic Calendar as well as the Centre for European and Eurasian Studies (CEES) for advising.

Completion Requirements:

(4.0 credits, including at least 1.0 credit at the 300+ level)

4.0 credits from: HUN100Y1, HUN200Y1, HUN310Y1, HUN320Y1, HUN335H1, HUN345H1, HUN351H1, HUN440Y1, HUN450H1, HUN455H1; HIS241H1, HIS251Y1, HIS389H1 (Hungarian History), HIS453H1; INI381H1

Faculty of Arts & Science Language Citation

The Hungarian program participates in the Faculty of Arts & Science's Language Citation initiative. Students may achieve this Citation in Hungarian.

Language study is a demanding and intellectually rewarding educational experience. Our students learn to communicate both orally and in writing in other languages and are thus able to experience other parts of the world in more intimate ways. Their access to other cultures opens

Hungarian Courses

HUN100Y1 - Elementary Hungarian

Hours: 120P

This course is aimed at students interested in Hungarian but have no prior knowledge of the language. The course emphasizes essential vocabulary, basic comprehension, speaking, reading and writing skills with a balance between communicative activities and grammar practices. Communicative activities will include group and partner work to encourage interactive learning.

Breadth Requirements: Creative and Cultural Representations (1)

HUN200Y1 - Intermediate Hungarian

Hours: 96P

doors for further study and employment. Students in our department also have the opportunity to read a vast array of world-renowned authors in the original languages, as well as works—normally not available in English—in other areas of study, for example, cinema studies, drama, folklore, history, intellectual history, philosophy, mathematics, and political science.

The Language Citation recognizes a significant level of achievement in language study. For course selection students should consult the Undergraduate Coordinator as early as possible since not every language course is offered each year. Students who begin language study at the Intermediate level should consult the Undergraduate Coordinator for approval of advanced literature and culture courses that may satisfy the requirements for the Language Citation.

The Language Citation in Hungarian is available to students who complete HUN200Y1 and HUN310Y1 with a grade of at least B-.

Students should note that, as explained in the Academic Record - Recognition of Academic Achievement section of this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

Note

The Department reserves the right to assign students to courses appropriate to their level of competence in Hungarian.

Review of descriptive grammar; studies in syntax; vocabulary building; intensive oral practice; composition; reading and translation.

Prerequisite: Permission of instructor

Breadth Requirements: Creative and Cultural Representations (1)

HUN310Y1 - Advanced Hungarian

Hours: 48S

This course is intended to build on the skills and knowledge acquired by the students in the previous Hungarian language courses. It will consist of a more advanced study of grammar, more complex vocabulary, higher level of oral skills and longer reading, writing and translation exercises. Communicative activities will include group and partner work to encourage interactive learning.

Breadth Requirements: Creative and Cultural Representations (1)

HUN320Y1 - A Survey of Hungarian Literature

Hours: 48S

A chronological study of the development of Hungarian literature since the 12th century; emphasis both on outstanding writers and on significant movements or themes. Transformations of ideas and changes in language and style. No knowledge of Hungarian required.

Breadth Requirements: Creative and Cultural Representations (1)

HUN335H1 - Urban vs. Rural: Immigration to and Settlement in North America

Hours: 12L/12S

This course will provide an examination of the history of Hungarian Immigration to and settlement in North America. The course will examine the "push" and "pull" factors, the socio-economic factors involved, their patterns of migration and the organizational development of the communities they founded in North America. The course will compare and contrast the reception the immigrants and later refugees received in the United States and Canada and examine how they adapted to their new homelands.

Breadth Requirements: Society and its Institutions (3)

HUN345H1 - The Dynamic of Hungarian Culture, Ethnography, and Folklore

Hours: 12L/12S

Explore the cultural traditions, historical processes, myths, and figures that have shaped and redefined Hungarian civilization and national identity. Theoretical and practical classes on ethno-genesis, anthropology, and folklore. Readings in English (also available in Hungarian).

Breadth Requirements: Creative and Cultural Representations (1)

HUN355H1 - One Hundred Years of Dramatic Change: History of the Past Century and Reflections of Society in Hungarian Culture

Hours: 12L/12S

Explore Hungary's rapidly changing place in Europe. Focus on political, sociological, and historical understandings of nationalism and identity as they manifest themselves in literature, history, and culture. Knowledge of Hungarian not required.

Breadth Requirements: Society and its Institutions (3)

HUN455H1 - Hungary and Europe: Cultural Adaptation in the Late 20th Century

Hours: 12L/12S

Focus on literature, art, mass media, and popular culture in post-1990 Hungary with special emphasis on the past ties to European culture and the impact of European integration. Readings in English (also available in Hungarian).

Breadth Requirements: Creative and Cultural Representations (1)

HUN497Y1 - Independent Study (Hungarian)

Translation course concentrating on Hungarian prose translation. Not eligible for CR/NCR option.

Prerequisite: Permission of Department

HUN498H1 - Independent Study (Hungarian)

Translation course concentrating on Hungarian prose translation. Not eligible for CR/NCR option.

Prerequisite: Permission of Department

Introduction

Immunology is an integrative branch of the medical sciences that draws upon the more traditional disciplines of Molecular Biology, Microbiology, Pathology, and Biochemistry. In essence, Immunology is the study of the physiological responses that result when foreign (i.e., non-self) materials are introduced into a vertebrate organism such as humans. Traditionally, the discipline has focused on the body's response to infectious micro-organisms, with the purpose of developing effective vaccines. However, the scope of modern Immunology now

encompasses all aspects of self vs. non-self recognition phenomena including organ transplantation, tumour immunology and autoimmune diseases. Recent major advances in our understanding of the cellular and molecular basis of the immune response promise to provide us with a new generation of prophylactic, therapeutic and diagnostic reagents of relevance to human and animal health.

The Department of Immunology, in collaboration with Trinity College, co-ordinates specialist, major, and minor programs in Immunology. The emphasis of the specialist program is to provide students with a sound theoretical understanding of the cellular and molecular basis of non-self recognition, together with sufficient laboratory experience to enable the students to consider embarking on a career in the discipline. The major and minor programs offer students fundamental training in Immunology and gives them the opportunity to combine Immunology with another program in Life Sciences, Basic Sciences, or within the Arts.

Immunologists may have careers in universities and other centres of learning and research, as well as in the biotechnology industries, diagnostic laboratories and various government agencies. Courses in this specialist program are drawn from offerings by the Department, together with courses from other Departments, taught in some cases by members of the Department of Immunology. As enrolment in the specialist, major and minor programs are restricted, please consult specific requirements outlined in the program description section.

Associate Chair, Undergraduate Studies:
Dr. J. Singh

Enquiries:
undergraduate.immunology@utoronto.ca
Department of Immunology, Room 7201, Medical Sciences Building
<https://immunology.utoronto.ca/administration-contacts>

More information is available on our website: <https://www.immunology.utoronto.ca/>

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Immunology programs impacted by this policy: ASSPE1002, ASMAJ1002, and ASMIN1002

Immunology Programs

Immunology Specialist (Science Program) - ASSPE1002

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade and Variable Minimum Grade Average

Minimum grades combined with a minimum grade average in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1 and BIO130H1
- CHM135H1 and CHM136H1, or CHM151Y1
- MAT135H1 and MAT136H1, or MAT137Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 70% in each course, or a final grade average lower than 75% in these required courses will not be considered for admission. Please note that obtaining the minimum final grades and grade average does not guarantee admission to the program. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at admissions.immunology@utoronto.ca, specify which program you would like to be considered for, and provide your student number.

Please consult the Arts & Science Program Toolkit for more information on program enrolment. Additional information is also available on the Immunology website at www.immunology.utoronto.ca.

Note: The Immunology Specialist cannot be combined with the Biochemistry Major or the Molecular Genetics and Microbiology Major.

Completion Requirements:

(13.5 credits)

First Year:

BIO120H1; BIO130H1; (CHM135H1, CHM136H1)/
CHM151Y1; (MAT135H1, MAT136H1)/ MAT137Y1

First Year or upper years:

(PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1)
(Note 1)

Second Year:

1. BCH242Y1; BIO230H1; BIO260H1/ HMB265H1;
IMM250H1; STA288H1

2. One course from the following list: BIO220H1/
TRN225Y1/ CHM220H1/ CHM247H1/ CHM249H1

Third Year:

1. BCH377H1; IMM341H1; IMM351H1; MGY311Y1;
IMM360H1

2. MGY377H1/ MGY378H1

Fourth Year:

1. IMM435H1

2. 1.0 credit from the following list: IMM428H1/
IMM429H1/ IMM430H1/ IMM431H1/ IMM432H1/
MIJ485H1

3. IMM450Y1 or 1.0 credit at the 400-level in ANA, BCH,
IMM, LMP, MGY, CSB.

Notes:

1. (PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1)
may be taken in the first year or subsequent years and are
not required for entrance into the specialist program.

2. IMM435H1 is capped at 40 students. Priority will be
given to Immunology Specialist students, followed by
Immunology Major students.

3. Students considering graduate school are encouraged to
take IMM385Y1.

Immunology Major (Science Program) - ASMAJ1002

Enrolment Requirements:

This is a limited enrolment program. Students must have
completed 4.0 credits and meet the requirements listed
below to enrol.

Variable Minimum Grade and Variable Minimum Grade Average

Minimum grades combined with a minimum grade
average in required courses or their equivalents are
needed for entry, and these minimums change each year
depending on available spaces and the number of
applicants. The following courses must be completed:

- BIO120H1 and BIO130H1

- CHM135H1 and CHM136H1, or CHM151Y1

To ensure that students admitted to the program will be
successful, applicants with a final grade lower than 65% in
each course, or a final grade average lower than 70% in
these required courses will not be considered for
admission. Please note that obtaining the minimum final
grades and grade average does not guarantee admission
to the program. The underlying numeric final mark in each
of your courses required for program enrolment will be
used by the relevant academic unit to determine your
eligibility.

Applications from students lacking numerical grades in
one or more of the specified prerequisites, or students
applying in their second or later years, may be considered
on the basis of their entire academic record and the
availability of space in the program. In addition to applying
through ACORN, students applying in their second year or
later are asked to please contact the department directly
at admissions.immunology@utoronto.ca, specify which
program you would like to be considered for, and provide
your student number.

Please consult the Arts & Science Program Toolkit for
more information on program enrolment. Additional
information is also available on the Immunology website at
www.immunology.utoronto.ca.

Completion Requirements:

(8.0 credits, including 1.0 credit at the 400-level)

First Year:

BIO120H1; BIO130H1; (CHM135H1, CHM136H1)/
CHM151Y1

Second Year:

1. BCH210H1; BIO230H1; IMM250H1; BIO260H1/
HMB265H1; STA288H1

2. 0.5 credit from the following list: BIO220H1/ TRN225Y1/
CHM247H1/ CHM249H1

Third Year:

IMM340H1; IMM350H1; CSB349H1/ BCH311H1; 0.5
credit from the following list: BCH370H1/ IMM360H1/
MGY377H1/ MGY378H1/ MGY381H1

Fourth Year:

1.0 credit from the following list: IMM428H1/ IMM429H1/
IMM430H1/ IMM431H1/ IMM432H1/ IMM435H1/
MIJ485H1

Notes:

1. Students considering graduate school are
encouraged to add the additional non-compulsory
IMM450Y1 research course, if space permits.
2. MIJ485H1 requires MGY377H1 & MGY378H1 as
pre-requisites.

3. IMM435H1 is capped at 40 students. Priority will be given to Immunology Specialist students, followed by Immunology Major students.

Immunology Minor (Science Program) - ASMIN1002

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed Courses (some with minimum grades)

The following courses are required:

- (BIO120H1, BIO130H1), with a minimum grade of at least 60% in each course
- (CHM135H1, CHM136H1) or CHM151Y1, with a minimum grade of at least 60% in each course

Variable Minimum Grade Average

A minimum grade average in (BIO120H1, BIO130H1) and

Immunology Courses

IMM199H1 - Immunology in the News Today

Hours: 24S

Why do we get sick? How do vaccines work? Does our diet influence our immunity? This course is intended to inspire curiosity about questions generated by immunology concepts that are prevalent in the news today. Different topics will be explored each week including immunity worldwide, human vaccinations and the mucosal immune system. Topics will be placed in context through real-life case studies, immunology virtual laboratory simulation, interactions with faculty members and extensive coverage of the basic science underlying each topic. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

IMM221H1 - Origins of Immunology

Hours: 24L/12T

This course will examine the milestones in the field of immunology from ancient to current times, with specific emphasis on 1880 to 1980. It will observe how the concept of immunity has changed over time and examine

(CHM135H1 and CHM136H1)/ CHM151Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

Completion Requirements:

For more information, refer to the Immunology website at: www.immunology.utoronto.ca.

(4.0 credits)

First Year:

BIO120H1; BIO130H1; (CHM135H1, CHM136H1)/CHM151Y1

Second Year:

BIO230H1; IMM250H1

Third Year:

IMM340H1; IMM350H1

the major events and discoveries that shaped how immunology is viewed today. Pioneers, such as Edward Jenner, Louis Pasteur, Robert Koch, Paul Ehrlich and Brigitte Askonas, and their contributions to the field will be discussed in both historical and scientific context as well as their impact on society. Assignments are staggered for students to build upon instructor's feedback.

Recommended Preparation: BIO120H1, BIO130H1

Breadth Requirements: Society and its Institutions (3)

IMM250H1 - The Immune System and Infectious Disease

Hours: 24L

Students will be introduced to the basic concepts of immunity to infectious disease and how breakdown of the immune response can lead to auto-immunity. We will trace the history of current ideas in immunology and the immune response by examining how bacteria and viruses cause disease and the initial discoveries that led to such developments as vaccination. Current topical and newsworthy infectious diseases (HIV, tuberculosis, SARS, avian flu) will be used as examples of how the immune system copes with microbial infections.

Recommended Preparation: BIO120H1, BIO130H1

Breadth Requirements: Living Things and Their Environment (4)

IMM299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

IMM299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

IMM340H1 - Fundamental Immunology

Hours: 24L/12T

This course introduces the basic principles and key players of the immune system: differences and interplay between innate and adaptive immunity, how immune cells develop and function, how immune cells recognize threats and danger and mount an appropriate and measured response.

Prerequisite: [BIO230H1](#)

Exclusion: [IMM341H1](#)

Recommended Preparation: [IMM250H1](#)

Breadth Requirements: Living Things and Their Environment (4)

IMM341H1 - Fundamental Immunology (Advanced)

Hours: 24L/12T

This course introduces the fundamental principles and key players of the immune system: differences and interplay between innate and adaptive immunity, how immune cells develop and function, how immune cells recognize threats and danger and mount an appropriate and measured response. Intended for students specializing in Immunology and related programs.

Prerequisite: [BIO230H1](#)

Exclusion: [IMM340H1](#)

Recommended Preparation: [IMM250H1](#)

Breadth Requirements: Living Things and Their Environment (4)

IMM350H1 - The Immune System in Action

Hours: 24L/12T

This course illustrates how different elements of the immune system come together to mount efficient and measured responses. Topics include response to infectious microorganisms, allergy and autoimmunity, immune responses against cancer, and transplantation immunology.

Prerequisite: [IMM340H1](#)/ [IMM341H1](#)

Exclusion: [IMM351H1](#)

Breadth Requirements: Living Things and Their Environment (4)

IMM351H1 - The Immune System in Action (Advanced)

Hours: 24L/12T

This course illustrates how different elements of the immune system come together to mount efficient and measured responses. Topics include response to infectious microorganisms, allergy and autoimmunity, immune responses against cancer, and transplantation immunology. Intended for students specializing in Immunology and related programs.

Prerequisite: [IMM341H1](#)/ [IMM340H1](#)

Exclusion: [IMM350H1](#)

Breadth Requirements: Living Things and Their Environment (4)

IMM360H1 - Scientific Methods and Research in Immunology

Hours: 24L/24T

This course will provide students with an opportunity to advance their understanding of research in Immunology in accordance with scientific methodology. Students will critically appraise scientific articles, design and analyze scientific experiments, and develop the core skills of data and statistical literacy. This course is well suited for anyone interested in discovering knowledge in Immunology, providing students with a methodology for the achievement of scientific research activities.

Prerequisite: IMM250H1, BCH210H1/ BCH242Y1, BIO230H1/ BIO255H1, BIO260H1/ HMB265H1, STA288H1/ STA220H1

Breadth Requirements: Living Things and Their Environment (4)

IMM385Y1 - Special Research Project in Immunology

Hours: 180P

This course provides an opportunity for students to conduct a research project under the supervision of a member of the Faculty. Students are expected to devote a minimum of seven hours per week to the course from the week the fall term lectures begin to the last week of the spring term. Research projects will involve experimental design and work, data analyses, literature reading etc.

Prerequisite: IMM250H1

Corequisite: IMM340H1/ IMM341H1

Breadth Requirements: Living Things and Their Environment (4)

IMM428H1 - Molecular Immunology

Hours: 24L

This course will focus on the molecular and cellular biology of immune recognition. The course will emphasize historical and recent experimental evidence leading to our current understanding of immune recognition. Subtopics are subject to change and have recently included mechanisms of diversification of immunoglobulin receptors, T cell –MHC interactions, T cell activation and signaling mechanisms; receptors of the innate immune system, immune recognition by natural killer cells.

Prerequisite: BCH210H1/ BCH242Y1, BCH311H1/ CSB349H1/ MGY311Y1/ PSL350H1, IMM350H1/ IMM351H1

Breadth Requirements: Living Things and Their Environment (4)

IMM429H1 - Developmental Immunology

Hours: 24L

Hematopoiesis, myelopoiesis, lymphopoiesis, a study of the development of cells involved in the immune system including their ontogeny, physical, molecular, and biochemical characteristics, regulation of differentiation and maturation, positive and negative selection of lymphocytes.

Prerequisite: IMM350H1/ IMM351H1

Breadth Requirements: Living Things and Their Environment (4)

IMM430H1 - Clinical Immunology

Hours: 24L/24T

This course will address the underlying pathogenesis as well as highlight the challenges of treating immune-related conditions such as autoimmunity, cancer, HIV, and transplantation and graft rejection. Half of the lectures will address the genetics and cellular pathogenesis of autoimmune diseases such as multiple sclerosis, type I diabetes and lupus. Other lectures will overview a number of immunological challenges faced in the clinic, such as preventing graft rejection after transplantation or boosting the immune system to fight cancer and HIV.

Prerequisite: IMM350H1/ IMM351H1

Breadth Requirements: Living Things and Their Environment (4)

IMM431H1 - Immunotherapy

Hours: 24L/12T

Therapies that enhance, or suppress, the body's immune response have proven remarkably efficient for the treatment of human diseases such as cancer, autoimmunity and chronic inflammation. Some of these therapies, such as the so-called checkpoint inhibitors and CAR-T cell therapies have recently leaped from bench to bedside. This course will cover the fundamental immune principles at play, how they were discovered, as well as the existing and future immune therapies to treat these diseases.

Prerequisite: IMM350H1/ IMM351H1

Recommended Preparation: IMM428H1

Breadth Requirements: Living Things and Their Environment (4)

IMM432H1 - Case Studies in Autoimmune Diseases

Hours: 36S

Understanding autoimmune diseases and identifying molecular targets that either slow or stop disease progression is critical for the development of novel and effective therapies that improve patient quality of life. This course will use case-based learning and an interactive seminar format to provide an advanced overview of autoimmune diseases and their treatments, and will

include the in-depth study of selected autoimmune diseases highlighting the patient's perspective.

Prerequisite: IMM340H1/ IMM341H1, IMM350H1/ IMM351H1

Recommended Preparation: IMM360H1

Breadth Requirements: Living Things and Their Environment (4)

IMM433H1 - Neuroimmunology

Hours: 24L

This course will provide students with an opportunity to advance their understanding of the emerging interdisciplinary research in Neuroimmunology. Topics covered include neural regulation of immune cells and lymphoid organs, and the reciprocal immune-mediated regulation of the central and peripheral nervous system. An in-depth analysis of microglial cells, meningeal immunity, as well as peripheral immunity will be discussed in the context of neurodevelopmental and neurodegenerative diseases.

Prerequisite: IMM340H1/ IMM341H1, IMM350H1/ IMM351H1

Breadth Requirements: Living Things and Their Environment (4)

IMM435H1 - Practical Immunology

Hours: 72P

Application of basic principles acquired from IMM350H1/ IMM351H1; immunological procedures performed in research and diagnostic laboratories using molecular and cellular approaches; instruction through lectures, video tapes, and practical exercises in the laboratory. (Lab Materials Fee: \$50)

Prerequisite: BCH210H1/ BCH242Y1, IMM350H1/ IMM351H1

Breadth Requirements: Living Things and Their Environment (4)

IMM450Y1 - Research Project in Immunology

Hours: 154P

An opportunity for specialized research in Immunology under the supervision of a member of the Faculty. There are no pre- or co-requisites, although preference is given to Immunology Specialist and Major students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

MIJ485H1 - Vaccines and Immunity

Hours: 36L

Analysis of the strategies used by pathogenic microbes to evade specific and innate immune responses, and the strategies used to combat infectious disease using vaccines, with an emphasis on molecular and immunological aspects. Special topics include: molecular basis of pathogenicity and immune-evasion strategies; vaccination strategies; challenges to vaccine implementation (given jointly by the Departments of Molecular Genetics and Immunology).

Prerequisite: (IMM340H1/ IMM341H1), (IMM350H1/ IMM351H1), MGY377H1, MGY378H1

Exclusion: MBY480H1, MGY485H1

Breadth Requirements: Living Things and Their Environment (4)

Introduction

Indigenous Studies is an interdisciplinary undergraduate program dedicated to the study and research of Indigenous peoples in Canada and throughout the world. The program offers courses that engender a rigorous and respectful understanding of Indigenous peoples' languages, knowledges, cultures, histories, politics, arts, intellectual traditions and research methodologies. INS offers Specialist, Major, and Minor Programs within the Faculty of Arts & Science. Students are encouraged to seek counselling and information about this program from indigenous.studies@utoronto.ca or on our website at <https://www.indigenoustudies.utoronto.ca>.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Immunology programs impacted by this policy: [ASSPE0115](#), [ASMAJ0115](#), and [ASMIN0115](#)

Indigenous Studies Programs

Indigenous Studies Specialist (Arts Program) - ASSPE0115

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(10.0 credits, including at least 1.0 credit at the 400-level)

1. [INS201Y1](#)/ ([INS201H1](#) and [INS202H1](#))
2. [INS210Y1](#)/ [INS220Y1](#)/ ([INS230H1](#) and [INS231H1](#))
3. [INS300Y1](#)/ [INS301Y1](#) and ([INS303H1](#) and [INS304H1](#))/ ([JPI201H1](#) and [JIG322H1](#))
4. [INS390H1](#) and [INS460H1](#)
5. 4.0 credits from Group A (note: some of these courses have prerequisites)
6. 1.0 credit from Group A or Group B below (note: some of these courses have prerequisites)
7. For numbers 5 and 6 above, 2.0 credits must be at the 300-level and a 0.5 credit must be at the 400-level.

Group A:

[INS200H1](#), [INS201Y1](#)/ ([INS201H1](#), [INS202H1](#)), [JPI201H1](#), [INS205H1](#), [INS210Y1](#), [INS215Y1](#), [INS220Y1](#), [INS230H1](#), [INS231H1](#), [INS240Y1](#), [INS250H1](#), [INS261H1](#), [INS300Y1](#), [INS301Y1](#), [INS302H1](#), [INS303H1](#), [INS304H1](#), [INS310Y1](#), [INS320Y1](#), [INS322H1](#), [JIG322H1](#), [INS340Y1](#), [INS341H1](#), [INS350H1](#), [INS351Y1](#), [INS352H1](#), [INS355H1](#), [INS352H1](#), [INS353H1](#), [INS354H1](#), [INS360Y1](#), [INS371H1](#), [INS372H1](#), [INS380H1](#), [INS390H1](#), [INS398H0](#), [INS398Y0](#), [INS491Y1](#), [INS402H1](#), [INS403H1](#), [INS404H1](#), [INS405H1](#), [INS407H1](#), [JIG440H1](#), [JFP450H1](#), [INS460H1](#), [INS480H1](#), [INS491Y1](#), [INS493H1](#), [INS494Y1](#), [INS495Y1](#), [INS496H1](#), [INS497H1](#), [INS498Y1](#), [ANT210H1](#), [ANT315H1](#), [ANT327H1](#), [ANT384H1](#), [ANT458H1](#), [AST310H1](#), [CRI364H1](#), [CRI422H1](#), [CSE341H1](#), [ENG254H1](#), [ENG355Y1](#), [FAH255H1](#), [FAH452H1](#), [HIS262H1](#), [HIS366H1](#), [HIS369H1](#), [HIS419H1](#), [HIS472H1](#), [LIN458H1](#), [RLG331H1](#), [SDS385H1](#), [WGS395H1](#)

Group B:

[ANT200Y1](#), [ANT204H1](#), [ANT319Y1](#), [ANT311Y1](#), [ANT317H1](#), [ANT319H1](#), [ANT320H1](#), [ANT327H1](#), [ANT348H1](#), [ANT366H1](#), [ANT407H1](#), [ANT410H1](#), [CAR225H1](#), [CAR226H1](#), [CSE240H1](#), [ENG270H1](#), [ENG350H1](#), [ENG371H1](#), [ENG372H1](#), [HIS106Y1](#), [HIS230H1](#), [HIS264H1](#), [HIS318H1](#), [HIS365H1](#), [HIS402H1](#), [JHN323H1](#), [LAS350H1](#), [LIN351H1](#), [RLG307H1](#), [SDS382H1](#)

Indigenous Studies Major (Arts Program) - ASMAJ0115

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(7.0 credits, including at least 2.0 credits at the 300+ level)

1. INS201Y1/ (INS201H1 and INS202H1)
2. INS210Y1/ INS220Y1/ (INS230H1 and INS231H1)
3. INS300Y1/ INS301Y1 and (INS303H1 and INS304H1)/ (JPI201H1 and JIG322H1)
4. INS390H1
5. 2.0 credits from INS, JFP, JIG or JPI (note: some of these courses have prerequisites)
6. One 0.5 credit from Group A or one 0.5 credit from Group B below (note: some of these courses have prerequisites)
7. Of the courses chosen, at least 2.0 credits must be at the 300+ level, of which a 0.5 credit must be at the 400-level.

Group A:

INS200H1, INS201Y1/ (INS201H1, INS202H1), JPI201H1, INS205H1, INS210Y1, INS215Y1, INS220Y1, INS230H1, INS231H1, INS240Y1, INS250H1, INS261H1, INS300Y1, INS301Y1, INS302H1, INS303H1, INS304H1, INS310Y1, INS320Y1, INS322H1, JIG322H1, INS340Y1, INS341H1, INS350H1, INS351Y1, INS352H1, INS355H1, INS352H1, INS353H1, INS354H1, INS360Y1, INS371H1, INS372H1, INS380H1, INS390H1, INS398H0, INS398Y0, INS491Y1, INS402H1, INS403H1, INS404H1, INS405H1, INS407H1, JIG440H1, JFP450H1, INS460H1, INS480H1, INS491Y1, INS493H1, INS494Y1, INS495Y1, INS496H1, INS497H1, INS498Y1, ANT210H1, ANT315H1, ANT327H1, ANT384H1, ANT458H1, AST310H1, CRI364H1, CRI422H1, CSE341H1, ENG254H1, ENG355Y1, FAH255H1, FAH452H1, HIS262H1, HIS366H1, HIS369H1, HIS419H1, HIS472H1, LIN458H1, RLG331H1, SDS385H1, WGS395H1

Group B:

ANT200Y1, ANT204H1, ANT319Y1, ANT311Y1, ANT317H1, ANT319H1, ANT320H1, ANT327H1, ANT348H1, ANT366H1, ANT407H1, ANT410H1, CAR225H1, CAR226H1, CSE240H1, ENG270H1, ENG350H1, ENG371H1, ENG372H1, HIS106Y1, HIS230H1, HIS264H1, HIS318H1, HIS365H1, HIS402H1, JHN323H1, LAS350H1, LIN351H1, RLG307H1, SDS382H1

Indigenous Studies Minor (Arts Program) - ASMIN0115

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, including at least 1.0 credit at the 300+ level)

1. INS201Y1/ (INS201H1 and INS202H1)
2. INS300Y1/ INS301Y1/ (INS303H1 and INS304H1)/ (JPI201H1 and JIG322H1)
3. 1.0 additional credit from INS, JFP, JIG or JPI (note: some of these courses have prerequisites)
4. 1.0 additional credit from Group A below (note: some of these courses have prerequisites)

Group A:

INS200H1, INS201Y1/ (INS201H1, INS202H1), JPI201H1, INS205H1, INS210Y1, INS215Y1, INS220Y1, INS230H1, INS231H1, INS240Y1, INS250H1, INS261H1, INS300Y1, INS301Y1, INS302H1, INS303H1, INS304H1, INS310Y1, INS320Y1, INS322H1, JIG322H1, INS340Y1, INS341H1, INS350H1, INS351Y1, INS352H1, INS355H1, INS352H1, INS353H1, INS354H1, INS360Y1, INS371H1, INS372H1, INS380H1, INS390H1, INS398H0, INS398Y0, INS491Y1, INS402H1, INS403H1, INS404H1, INS405H1, INS407H1, JIG440H1, JFP450H1, INS460H1, INS480H1, INS491Y1, INS493H1, INS494Y1, INS495Y1, INS496H1, INS497H1, INS498Y1, ANT210H1, ANT315H1, ANT327H1, ANT384H1, ANT458H1, AST310H1, CRI364H1, CRI422H1, CSE341H1, ENG254H1, ENG355Y1, FAH255H1, FAH452H1, HIS262H1, HIS366H1, HIS369H1, HIS419H1, HIS472H1, LIN458H1, RLG331H1, SDS385H1, WGS395H1

Faculty of Arts & Science Language Citation

Indigenous Studies participates in the Faculty of Arts & Science Language Citation Initiative for Anishinaabemowin. The study of the Anishinaabe language is a demanding and intellectually rewarding educational experience. Successful study of this language demonstrates intelligence, discipline, analytical sophistication, and an excellent memory. The study of any language provides invaluable insights into the varieties of human culture and expression.

In each language the Language Citation recognizes a significant level of achievement in language study with a high level of academic success. The Citation in Anishinaabemowin is available to students who complete INS210Y1 and earn a grade of at least B- in INS310Y1 and INS301Y1/ INS351Y1.

Students should note that, as explained in the Academic Record - Recognition of Academic Achievement section of this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

Indigenous Studies Courses

INS110H1 - Introduction to Conversational Anishinaabemowin

Hours: 36L

This course will introduce students to Anishinaabemowin, the language of the Anishinaabe people (an Indigenous people of the Great Lakes), with a focus on greetings and basic conversation. The course is highly interactive and will engage students in dialogues that reflect real-life uses while also introducing them to nuances in how the language functions in different settings. This course is intended to give students some speaking skills along with an appreciation for the importance of the language to Anishinaabe communities. While the course is appropriate for Indigenous Studies majors, it is accessible to students from other units as well.

Exclusion: INS210Y1, INS310Y1

Breadth Requirements: Society and its Institutions (3)

INS200H1 - Introduction to Indigenous Truth and Resilience

Hours: 24L/12T

This course is an interdisciplinary introduction to the historical and contemporary experiences of Indigenous peoples in Canada, with an emphasis on local lands and peoples. The course will explore Indigenous resilience, relationships with settlers and settler states, and principles and ethics of Indigenous Knowledge. Tutorials will focus on critical discussion and experiential learning.

Breadth Requirements: Society and its Institutions (3)

JPI201H1 - Indigenous Politics in Canada

Previous Course Number: POL308H1

Hours: 24L/12T

This course explores key issues in Indigenous politics in Canada. Provides students with an overview of historical and contemporary socio-political issues in Indigenous societies and institutions such as Indigenous self-governance, land claims and treaty negotiations.

Prerequisite: 4.0 credits, or 1.0 credit in POL/ JPA/ JPF/ JPI/ JPR/ JPS/ JRA courses, or INS201Y1/ (INS201H1, INS202H1)

Exclusion: POL308H1/ POLC56H3

Recommended Preparation: POL214H1/ POL224H1

Breadth Requirements: Creative and Cultural Representations (1)

INS201H1 - Introduction to Indigenous Studies: Foundations

Previous Course Number: INS201Y1

Hours: 24L/12T

This course is designed to introduce students to the ideas, methods and themes of the discipline of Indigenous Studies. The course will explore the development of the field of Indigenous Studies in Canada. Topics will include explorations into Indigenous thought, philosophies, knowledge systems, and ways of being. The focus will be on North America with comparative discussions of Indigenous peoples and their experiences from other parts of the world.

Exclusion: INS201Y1

Breadth Requirements: Society and its Institutions (3)

INS202H1 - Introduction to Indigenous Studies: History & Politics

Previous Course Number: INS201Y1

Hours: 24L/12T

This course is designed to introduce students to Indigenous history and politics as they inform the field of Indigenous Studies. The course will provide an overview of the history and politics of Indigenous peoples in Canada. Topics will include Indigenous creation stories, Indigenous treaty-making traditions, settler contact and conflict, history of education, Indigenous rights within the Canadian State and contemporary issues such as food sovereignty, language revitalization, arts, and international relations. The focus will be on North America with comparative discussions of Indigenous peoples and their experiences from other parts of the world.

Exclusion: INS201Y1

Breadth Requirements: Society and its Institutions (3)

INS205H1 - Indigenous Worldviews, Spiritual and Healing Traditions

Hours: 24L

This course will discuss the relationship between spiritual philosophies, beliefs, traditions and practices that contribute to meaning in Indigenous communities. This course will emphasize traditions and teachings and

understanding the role of spirituality historically and within contemporary Indigenous societies, including governance, treaties, environment, culture, healing and everyday life.

Prerequisite: INS200H1/ INS201Y1/ INS201H1/ INS202H1

Breadth Requirements: Thought, Belief and Behaviour (2)

INS210Y1 - Introduction to Anishinaabemowin

Hours: 72L

An introduction to the Anishinaabe language.

Breadth Requirements: Creative and Cultural Representations (1)

INS215Y1 - Introduction to an Indigenous Language of Canada

Hours: 72L

This course will offer an introduction to one of Canada's Indigenous languages, including its writing system. Speaking skills will be emphasized.

Exclusion: ABS215H1; ABS215Y1

Breadth Requirements: Creative and Cultural Representations (1)

INS220Y1 - Introduction to Kanien'kéha (Mohawk Language)

Hours: 72L

An introduction to Kanien'kéha (Mohawk Language), a member of the Iroquoian language family.

Breadth Requirements: Creative and Cultural Representations (1)

INS230H1 - Introduction to Inuktitut

Hours: 24L

An introduction to one dialect of Inuktitut, the language of the Inuit, including aspects of other dialects and the syllabic writing system.

Exclusion: ABS230H1

Breadth Requirements: Creative and Cultural Representations (1)

INS231H1 - Elementary Inuktitut

Hours: 24L

This course builds on the introduction to Inuktitut from ABS230H. Emphasis will be placed on developing grammatical complexity and vocabulary in students oral skills, as well as dialect and cultural awareness.

Prerequisite: INS230H1

Exclusion: ABS231H1

Breadth Requirements: Creative and Cultural Representations (1)

INS240Y1 - Ecological Interactions: Intro to Indigenous and Western Sciences

Hours: 72L/72P

Introduction to methodologies and applications of Indigenous and Western sciences, with an emphasis on environmental change, animal behaviour, evolution, sustainable practices, and implications of intrinsic ecological connections. Exploratory labs, often outdoors, develop literacy and skills in each paradigm as well as critical thought, creative reflection, and synthesis of knowledge.

Prerequisite: INS201Y1/ (INS201H1, INS202H1)

Exclusion: ABS240Y1

Breadth Requirements: Living Things and Their Environment (4)

INS250H1 - Introduction to Indigenous Environmental Studies

Hours: 24L

This course is an examination of Indigenous environmental knowledge and practices. The course provides an overview of Indigenous peoples' relationships with the natural world and a range of environmental issues, including climate change, water governance and Indigenous approaches to conservation and ecological restoration. Drawing on examples of Indigenous-led research, activism and policy, the course explores a range of topics in the field of Indigenous environmental studies through readings, lectures, films, and creative works.

Prerequisite: [INS201Y1](#)/ [INS201H1](#)/ [INS202H1](#)

Breadth Requirements: Society and its Institutions (3)

INS261H1 - Contemporary Challenges Facing Indigenous Communities

Hours: 24L

This is a survey course focusing on the contemporary challenges faced by Indigenous peoples in Canada. In this course students research specific challenges facing Indigenous communities today. This includes specific challenges that arise out of the broader topic areas of language and culture, land rights, economics, governance, youth, education, health, social services, environment, violence, healing, community development, repatriation of cultural property, and decolonization.

Prerequisite: [INS201Y1](#)/ [INS201H1](#)/ [INS202H1](#)

Breadth Requirements: Society and its Institutions (3)

INS300Y1 - Worldviews, Indigenous Knowledges, and Oral Tradition

Hours: 48L

A study of the languages and culture of Indigenous peoples through exploration of oral histories, from creation stories until present times, including the role of oral history and methods for studying oral history through accounts told by elders.

Prerequisite: 5.0 credits including [INS201Y1](#)/ ([INS201H1](#), [INS202H1](#)), plus 1.0 additional INS credit

Breadth Requirements: Creative and Cultural Representations (1)

INS301Y1 - Indigenous Languages and Cultures

Hours: 48L

Examination of the historical interplay of Indigenous languages and cultures in Canada. Particular focus is on the languages and cultures of Indigenous peoples of the Great Lakes.

Prerequisite: 5.0 credits including [INS201Y1](#)/ ([INS201H1](#), [INS202H1](#)), plus 1.0 additional INS credit

Breadth Requirements: Creative and Cultural Representations (1)

INS302H1 - Indigenous Representation in the Mass Media and Society

Hours: 24L

A survey of historical and contemporary representations of Indigenous people in the mass media. Introduction to basic techniques for evaluating, analyzing, and understanding the construction of Indigeneity as it is communicated through film, television, and other media. Examination of racial stereotypes and the role of mass communication in perpetuating and challenging stereotypes, cultural appropriation, Indigenous media production, impact of media portrayal of Indigenous peoples.

Prerequisite: 8.0 credits including [INS201Y1](#)/ ([INS201H1](#), [INS202H1](#)), plus 1.0 additional INS credit

Breadth Requirements: Creative and Cultural Representations (1)

INS303H1 - Understanding Indigenous Language Vitality and Endangerment

Hours: 24S

There is a broad consensus among Indigenous communities and within scholarly discourse concerning the profound and inseparable connection between Indigenous languages and Indigenous ways of knowing and being. This course will begin by examining the centrality of Indigenous languages to Indigenous peoples, as well as their broader societal significance. Building upon this foundation, the course will critically investigate the various factors contributing to Indigenous endangerment and vitality, both within Canada and internationally. Through this exploration, students will engage in a comprehensive analysis of the challenges and strategies associated with Indigenous language revitalization.

Prerequisite: 5.0 credits including [INS201Y1](#)/ ([INS201H1](#), [INS202H1](#)), plus 1.0 additional INS credit

Breadth Requirements: Creative and Cultural Representations (1)

INS304H1 - Best Practices in Indigenous Language Revitalization

Hours: 24L

Building on the foundational concepts and issues surrounding Indigenous endangerment and vitality introduced in [INS303H1](#), this course provides an in-depth exploration of the challenges, opportunities, and strategies for Indigenous language revitalization (ILR) at both

community and national levels. Focusing on language policy, planning, and best practices in revitalization, this course will examine a wide range of social, political, and linguistic factors that influence language use, particularly within Indigenous communities in Canada but also globally.

Prerequisite: 5.0 credits including INS201Y1/ (INS201H1, INS202H1), plus 1.0 additional INS credit

Breadth Requirements: Creative and Cultural Representations (1)

INS310Y1 - Anishinaabemowin II

Hours: 72L

Further study of the Anishinaabe language with emphasis on speaking and writing.

Prerequisite: INS210Y1

Exclusion: ABS310Y1

Breadth Requirements: Creative and Cultural Representations (1)

INS320Y1 - Kanien'kéha II

Previous Course Number: INS323Y1

Hours: 72L

Further study of Kanien'kéha (Mohawk Language), a member of the Iroquoian language family.

Prerequisite: INS220Y1

Exclusion: INS323Y1

Breadth Requirements: Creative and Cultural Representations (1)

INS322H1 - Indigenous Narratives of Empowerment

Hours: 24L

This course explores Indigenous decolonization and empowerment by analysing comparatively theoretical and literary debates that focus on issues of sovereignty, gender, grass-roots activism, and anti-racism. It analyses several emerging paradigm approaches to this set of debates including intersectional critical-race theory, Indigenous feminisms, and decolonization practices in theoretical and literary texts.

Prerequisite: 8.0 credits including INS201Y1/ (INS201H1, INS202H1), plus 1.0 additional INS credit

Breadth Requirements: Creative and Cultural Representations (1)

JIG322H1 - Indigenous Worlds, Worldviews and the Environment

Hours: 24L

Explores the diverse ways of understanding and responding to the world that emerge from indigenous cultures around the world. Examines how indigenous ways of being and relating to their natural environment can help us understand and address the current environmental crisis. Using examples of indigenous activism from Canada and around the world, examines how colonial histories shape dispossession and marginalization and inform visions for the future. Topics include traditional ecological knowledge, place-based social movements, environmental concerns of indigenous peoples, bio-cultural restoration and decolonization of nature-human relations.

Prerequisite: 8.0 credits including one of INS200H1, INS201Y1/ (INS201H1, INS202H1), INS250H1, GGR107H1, GGR124H1, GGR240H1, GGR246H1, GGR254H1

Breadth Requirements: Society and its Institutions (3)

INS331H1 - Indigenous Music: Technical and Theoretical Aspects

Contemporary and historical musical theory of sacred spiritual ceremonial music and social-public performance practices of Indigenous people of North America. This course will have a participatory emphasis on the music of the Haudenosaunee (Longhouse People) of the Great Lakes.

Prerequisite: 8.0 credits including INS201Y1/ (INS201H1, INS202H1), plus 1.0 additional INS credit

Breadth Requirements: Creative and Cultural Representations (1)

INS340Y1 - Indigenous Health Science

Hours: 48L/48P

This course is themed in six-week quarters addressing four aspects of Western Science (basic, applied, clinical and population health). Within each quarter, the Western Science theme is examined holistically using Indigenous Science and the four aspects of the Medicine Wheel (physical, mental, emotional, spiritual).

Prerequisite: 8.0 credits including INS201Y1/ (INS201H1, INS202H1), plus 1.0 additional INS credit

Breadth Requirements: Living Things and Their Environment (4)

INS341H1 - North American Indigenous Theatre

Hours: 24L

An introduction to the evolution of Indigenous theatre in North America, examining traditional oratory, ceremony, community responsibility, and social construct and their impact on current Indigenous theatre.

Prerequisite: 8.0 credits including [INS201Y1](#) / ([INS201H1](#), [INS202H1](#)), plus 1.0 additional INS credit
Breadth Requirements: Creative and Cultural Representations (1)

INS350H1 - Indigenous Health Systems

Hours: 24L

An overview of Indigenous health systems, internationally, nationally, provincially and locally, with a focus on Ontario. Discussion of health models and strategies, policy, legislation, jurisdictional issues, Indigenous health initiatives.

Prerequisite: 8.0 credits including [INS201Y1](#) / ([INS201H1](#), [INS202H1](#)) or [INS200H1](#)
Breadth Requirements: Society and its Institutions (3)

INS352H1 - Indigenous Leadership, Policy and Practices in Canada

Hours: 24L

A historical and contemporary overview of leadership and politics in First Nation, Inuit and Metis communities in Canada. This course will focus on pre-contact governance structures, contemporary effects of colonization, and processes and strategies for decolonization. Various policy initiatives from Indigenous organizations will be examined.

Prerequisite: 5.0 credits including [INS201Y1](#) / ([INS201H1](#), [INS202H1](#)), plus 1.0 additional INS credit
Breadth Requirements: Society and its Institutions (3)

INS353H1 - First Nations Politics in Canada

Hours: 24L

This course examines recent trends in First Nations politics and their effects on the social, economic and political lives of First Nations Peoples. It provides students with an in-depth understanding of the socio-political and cultural context for First Nations societies in contemporary settings. It explores the legacies of the *Indian Act*, the tabling of the 1969 White Paper and responses to it, the emergence of current Indigenous political movements, Constitutional issues, and First Nations citizenship.

Prerequisite: 5.0 credits including [INS201Y1](#) / ([INS201H1](#), [INS202H1](#)), plus 1.0 additional INS credit
Breadth Requirements: Society and its Institutions (3)

INS354H1 - Indigenous Governance and Self-Determination

Hours: 24L

This course examines the theory and practice of Indigenous governance and self-determination in Canada and abroad. It studies forms of Indigenous governance and self-determination past, present and future, with a special section on Indigenous self-government agreements in Canada.

Prerequisite: [INS353H1](#) or equivalent or permission of instructor
Exclusion: [ABS354H1](#)
Breadth Requirements: Society and its Institutions (3)

INS355H1 - Current Issues in Indigenous Health

Hours: 24L

This course will examine current views about Indigenous peoples' health. The course will focus on Indigenous peoples' perceptions of health and contemporary health systems, including policy, politics and practices.

Prerequisite: 8.0 credits including [INS201Y1](#) / ([INS201H1](#), [INS202H1](#)), plus 1.0 additional INS credit
Breadth Requirements: Society and its Institutions (3)

INS360Y1 - Politics and Process of Reconciliation in Canada

This course uses relationship-building methodologies to develop skills to examine and explore the concept and processes, practice and promises of reconciliation. Through class discussion/seminars, guest speakers, and comparative readings in: Canadian and Indigenous colonial history; the findings of the Canadian Truth and Reconciliation Commission; Canadian Human Rights

Tribunal Decisions; and Indigenous solidarity movements in Canada. Students will examine reconciliation and determine whether it is a different process than 'decolonization'.

Prerequisite: INS201Y1/ (INS201H1, INS202H1), or permission of instructor

Breadth Requirements: Society and its Institutions (3)

JH366H1 - Indigenous Histories of the Great Lakes, 1815 to the Present

Previous Course Number: HIS366H1

Hours: 24L

Explores the history of Aboriginal peoples (Indigenous and Metis) living in the Great Lakes Region after the Great Lakes were effectively split between British North America (later Canada) to the north and the United States to the south, when a rapidly increasing newcomer population on both sides of the border marginalized Indigenous peoples and settled on their land. Topics include a comparative examination of Indigenous experiences of colonialism, including treaties and land surrenders as well as the development of government policies aimed at removing and/or assimilating Great Lakes peoples. This course will also study resistance by First National and Tribal Councils to those programs over nearly two centuries and assess local strategies used for economic and cultural survival.

Prerequisite: HIS263Y1/ HIS264H1/ HIS271Y1/ INS200H1/ INS201Y1/ (INS201H1, INS202H1)

Exclusion: HIS366H1/ HIS369Y1

Breadth Requirements: Society and its Institutions (3)

JH369H1 - Great Lakes Indigenous Histories to 1830

Previous Course Number: HIS369H1

Hours: 24L

Explores the history of Aboriginal Peoples (Indigenous and Métis) living in the Great Lakes Region from the 16th century to the aftermath of the War of 1812. Weaving together interdisciplinary sources, this course examines central events in Great Lakes history including the formation of the Wendat and Haudenosaunee Confederacies and key Anishinabek alliances, the arrival of European newcomers into an Indigenous landscape, the social-political impact of new diseases, reactions to European missionaries, the fur trade, major conflicts and peace processes including the Great Peace of Montreal, the Treaty of Niagara and the 60 Years War for the Great Lakes; and ending with the period of significant encroachment of new settlers on Indigenous lands.

Prerequisite: HIS263Y1/ HIS264H1/ HIS271Y1/ INS200H1/ INS201Y1/ (INS201H1, INS202H1)

Exclusion: HIS369H1/ HIS369Y1

Breadth Requirements: Society and its Institutions (3)

INS371H1 - Topics in Indigenous Literatures

Hours: 24S

This seminar provides an in-depth examination of Indigenous literatures in a comparative context. Content in any given year depends on the instructor. See Indigenous Studies website for more details.

Prerequisite: 8.0 credits including INS201Y1/ (INS201H1, INS202H1)

Breadth Requirements: Creative and Cultural Representations (1)

INS372H1 - Special Topics in Indigenous Language

Hours: 36S

This seminar provides an in-depth examination of Indigenous language revitalization efforts in Canada and internationally. Content in any given year depends on the instructor. See Indigenous Studies website for more information.

Prerequisite: 8.0 credits including INS201Y1/ (INS201H1, INS202H1), and INS210Y1/ INS220Y1/(INS230H1 and INS231H1)

Breadth Requirements: Creative and Cultural Representations (1)

INS380H1 - Special Topics in Indigenous Studies

Hours: 24L

This seminar provides an in-depth examination of trends and topics within Indigenous Studies. Content in any given year depends on the instructor. See Indigenous Studies website for more detail.

Prerequisite: 5.0 credits including INS201Y1/ (INS201H1, INS202H1), plus 1.0 additional INS credit

INS390H1 - Research and Ethics in Indigenous Studies

Hours: 24S

This course examines research approaches, strategies, methods and techniques used in Indigenous studies. It explores a range of topical issues including research ethics and protocols, intellectual property rights, research agreements and community-based research. This course includes the study of quantitative, qualitative and Indigenous methodologies. Critically examines research theories, methodologies and practices used by academic disciplines to study Indigenous peoples. Decolonized research methodologies will form a focus of this course.

Prerequisite: 8.0 credits including INS201Y1/ (INS201H1, INS202H1), and at least 1.0 additional INS credit

Breadth Requirements: Society and its Institutions (3)

INS398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

Prerequisite: 8.0 credits including INS201Y1/ (INS201H1, INS202H1)

INS398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

Prerequisite: 8.0 credits including INS201Y1/ (INS201H1, INS202H1)

INS402H1 - Traditional Indigenous Ecological Knowledge

Hours: 36L

An overview of the relationships between Indigenous peoples and their environments, including an exploration of cultural, historical, and contemporary aspects of Indigenous environmental philosophies; the nature, control and transmission of Traditional Ecological Knowledge (TEK), and historical uses of TEK in managing the environment.

Prerequisite: 10.0 credits, INS201Y1/ (INS201H1, INS202H1), plus 2.0 additional INS credits

Breadth Requirements: Thought, Belief and Behaviour (2)

INS403H1 - Indigenous Peoples and the Urban Context

Hours: 24S

Critically examines Indigenous peoples' experiences, encounters and interactions in urban areas in Canada. This course explores the historical and contemporary conditions of Indigenous peoples, including urban governance and the development of Indigenous organizations. This course will focus on youth perspectives and how traditions, cultures and knowledges are expressed in urban settings.

Prerequisite: 10.0 credits, INS201Y1/ (INS201H1, INS202H1), plus 2.0 additional INS credits

Breadth Requirements: Society and its Institutions (3)

INS405H1 - Indigenous Thought & Expression: Creative Non-fiction

Hours: 24S

An investigation of (Anishnaabe, Iroquoian, Athapaskan, Salish), examined through the study of research and writing of creative-nonfiction.

Prerequisite: 10.0 credits, INS201Y1/ (INS201H1, INS202H1), plus 2.0 additional INS credits

Breadth Requirements: Thought, Belief and Behaviour (2)

INS406H1 - Indigenous Makers Studio

Hours: 36L

In this course students will create pieces of material culture reflective of Indigenous knowledge values and principles with a focus on producing utilitarian items. Students will journal about their creative process and provide an artist's statement for each item created in the course. Assessment will be based on a combination of written submissions and created pieces. Specific projects may include sewing, quilting, beadwork, pottery, basketry, etc.

Prerequisite: 10.0 credits, including INS201Y1/ (INS201H1, INS202H1) and 2.0 additional INS credits

Breadth Requirements: Society and its Institutions (3)

INS407H1 - Indigenous Environmental Justice

Hours: 36L

In this course, we will examine how Indigenous land and water governance have been impacted by colonial policies and extractive capitalist developments. We will discuss how Indigenous peoples negotiate and resist such impacts while also renewing responsibilities with land, water, and animal and plant relations. The course is primarily focused on the North American context, with many case studies taking place in Canada.

Prerequisite: Completion of 14.0 credits, including INS201Y1/ (INS201H1, INS202H1), and 2.0 additional INS credits or GGR321H1. Permission of the instructor is required.

Breadth Requirements: Society and its Institutions (3)

INS410H1 - Anishinaabewin Intellectual Traditions, Narrative and Culture

Previous Course Number: INS404H1

Hours: 24S

An examination of oral narratives with an emphasis on the significance of language. This course will give students an in-depth understanding of Anishinaabewin philosophies, teachings and values.

Prerequisite: 10.0 credits, including INS201Y1/ (INS201H1, INS202H1) and at least 2.0 additional INS credits

Exclusion: INS404H1

Breadth Requirements: Creative and Cultural Representations (1)

INS411H1 - Advanced Anishinaabemowin

Hours: 36L

This course will allow students to further their speaking and writing skills in Anishinaabemowin after completing the two levels of foundational grammar and speaking. The course is highly interactive and will engage students in speaking with advanced language speakers. Students will produce advanced language written and audio materials such as scripts, podcasts, short stories, etc. Assessments will include individual and group projects in written and oral forms.

Prerequisite: 10.0 credits including INS201Y1/ (INS201H1, INS202H1), INS210Y1 and INS310Y1. Students who do not meet the prerequisites are

encouraged to contact the instructor.

Breadth Requirements: Society and its Institutions (3)

JIG440H1 - Indigenous Geographies

Hours: 36S

This course draws on theoretical texts of Indigeneity, with a primary focus on Indigenous spaces in the Americas. Course participants will examine how core geographic concepts such as place, territory, land, movement and the scale of the body are sites of colonial dispossession and violence, as well as sites for decolonial and liberatory thought and practice. We will primarily engage with Indigenous-led scholarship within Geography and Indigenous Studies, and creative forms of knowledge production generated across Indigenous communities.

Prerequisite: 10.0 credits including one of INS200H1, INS201Y1/ (INS201H1, INS202H1), INS250H1, GGR107H1, GGR124H1, GGR240H1, GGR246H1, GGR254H1

Breadth Requirements: Society and its Institutions (3)

JFP450H1 - Indigenous Issues in Health and Healing

Hours: 24L

The basic premise of this course is that the health of Indigenous peoples is inseparable from the health of the planet. The aim of the course is to facilitate collective healing from our current social and economic system in a process of awareness-based learning of our relationship to each other, the planet and ourselves. Starting with students' reflection of their relationship to colonialism and traditional teachings, the course is built around a collaborative, interdisciplinary team project of selecting a domain of mutual interest, researching the existing decolonizing programs in the community within that domain, and developing an ethical, real-world prototype of action that they would want to continue to develop after the course is completed.

Breadth Requirements: Society and its Institutions (3)

JIH460H1 - Indigenous Histories of North America

Hours: 24S

This senior seminar takes a regional approach, featuring work written by or in collaboration with Indigenous scholars and Indigenous communities, to draw students into discussion of comparative historiographies, the role of

worldview in historical writing and the significant methodological interventions made by Indigenous Studies. Students explore oral history and material culture as sources for writing history and discuss ethical research practices for community-based scholarship. In addition to active participation, each student will write a major paper, approximately 15 pages in length, in the form of a review essay on the historiography of either a region or a topic. This course is a joint graduate/undergraduate seminar.

Prerequisite: INS200H1/ INS201Y1/ (INS201H1, INS202H1)/ INS205H1/ HIS230H1/ HIS366H1/ HIS369H1

Recommended Preparation: INS390H1

Breadth Requirements: Society and its Institutions (3)

INS460H1 - Indigenous Theory, Research and Methods

Hours: 36L

This course explores the basis of Indigenous knowledge and how that translates into research theory and methodology. Students will design a research project, consider Indigenous research governance and conduct an ethics review. This is a service learning course. This course is only open to students enrolled in a Specialist or Major in Indigenous Studies.

Prerequisite: 10.0 credits, including INS201Y1/ (INS201H1, INS202H1) and INS390H1, and 1.0 additional INS credit

Breadth Requirements: Society and its Institutions (3)

INS480H1 - Advanced Special Topics in Indigenous Studies

Hours: 24L

This seminar provides an advanced in-depth examination of trends and topics within Indigenous Studies. Content in any given year depends on the instructor. See Indigenous Studies website for more detail.

Prerequisite: 10.0 credits, including INS201Y1/ (INS201H1, INS202H1) and at least 2.0 additional INS credits.

Breadth Requirements: Creative and Cultural Representations (1)

INS491Y1 - Topics in International Indigenous Studies

Hours: 48S

This seminar provides an in-depth examination of Indigenous studies in international contexts. Content in any given year depends on the instructors. See Indigenous Studies website for more detail. Not eligible for CR/NCR option.

Prerequisite: INS201Y1/ (INS201H1, INS202H1) and 2.0 additional INS credits

Recommended Preparation: INS360Y1

Breadth Requirements: Society and its Institutions (3)

INS492H1 - Topics in International Indigenous Studies

Hours: 24S

This seminar provides an in-depth examination of Indigenous studies in international contexts. Content in any given year depends on the instructors. See Indigenous Studies website for more detail. Not eligible for CR/NCR option.

Prerequisite: INS201Y1/ (INS201H1, INS202H1) and 2.0 additional INS credits

Recommended Preparation: INS360Y1

Breadth Requirements: Society and its Institutions (3)

INS493H1 - Independent Experiential Studies

Students design and implement an independent experiential Indigenous studies research project in consultation with an Indigenous organization and a faculty supervisor. Students must be enrolled in a major or specialist program in Indigenous Studies, and require written permission from a faculty supervisor and the Director of Indigenous Studies. Not eligible for CR/NCR option.

Prerequisite: 10.0 credits and INS390H1

Exclusion: ABS493H1

INS494Y1 - Independent Experiential Studies

Students design and implement an independent experiential Indigenous studies research project in consultation with an Indigenous organization and a faculty supervisor. Students must be enrolled in a major or specialist program in Indigenous Studies, and requires written permission from a faculty supervisor and the Director of Indigenous Studies. Not eligible for CR/NCR option.

Prerequisite: 10.0 credits and INS390H1

Exclusion: ABS494Y1

INS495Y1 - Independent Research

Supervised independent research on a topic agreed on by the student and the supervisor before enrolment in the course. Available only when someone is willing and able to supervise. Not eligible for CR/NCR option.

Prerequisite: INS201Y1/ (INS201H1, INS202H1) plus 1.0 additional INS credit

INS496H1 - Independent Research

Supervised independent research on a topic agreed on by the student and the supervisor before enrolment in the course. Available only when someone is willing and able to supervise. Not eligible for CR/NCR option.

Prerequisite: INS201Y1/ (INS201H1, INS202H1) plus 1.0 additional INS credit

INS497H1 - Independent Research

Supervised independent research on a topic agreed on by the student and the supervisor before enrolment in the course. Available only when someone is willing and able to supervise. Not eligible for CR/NCR option.

Prerequisite: INS201Y1/ (INS201H1, INS202H1) plus 1.0 additional INS credit

INS498Y1 - Independent Research

Supervised independent research on a topic agreed on by the student and the supervisor before enrolment in the course. Available only when someone is willing and able to supervise. Not eligible for CR/NCR option.

Prerequisite: INS201Y1/ (INS201H1, INS202H1) plus 1.0 additional INS credit

Introduction

Since 1965, the Centre for Industrial Relations and Human Resources (CIRHR) has brought together professors from many different disciplines to teach and conduct research on all aspects of work, the workplace, labour markets, and labour relations. The CIRHR's graduate programs rank among the best in North America and its faculty reflects the depth, breadth, and diversity of our university.

The overarching goal of the undergraduate program in Industrial Relations and Human Resources (IRHR) is to offer an interdisciplinary learning opportunity in which to study the 'world of work and employment' in a Canadian and global context from the perspectives of economics,

history, law, human resource management, political science, psychology, and sociology. The program provides students with a theoretical background and knowledge of current developments in the field that will serve as a basis for careers areas such as a Human Resources Generalist, Recruitment Specialist, HR Consultant, Employment Equity Officer, Training and Development Consultant, Corporate Trainer, Policy Advisor in the Ministry of Labour, Union Representative and Labour Relations Specialist. The undergraduate program in IRHR is also a perfect platform from which to enter post-graduate programs in Industrial Relations and Human Resources, Law with a specialization in labour and employment, as well as policy and labour studies programs.

The Work and Organization majors (IRW) adopt an interdisciplinary approach to understanding the changing nature of work as well as the operation of different types of organizations. Work and Organizations will provide the skills necessary to undertake the development and implementation of solutions to contemporary societal challenges through coordination of economic and social action in organizations and communities. IRW will meet the increasing demand among A&S students for access to courses on work and organizations that provide foundational knowledge in these areas while complementing and enriching their other chosen programs. Students will be able to navigate an evolving labour market upon graduation.

Students are encouraged to use the resources available in both the [CIRHR Library](#) and [Career Centre](#) in order to investigate current labour market trends and career options in Industrial Relations and Human Resources. In Ontario, the [Human Resources Professionals Association](#) (HRPA) regulates the HR profession and issues the Certified Human Resources Professional (CHRP) designation, the national standard for excellence in human resources management. IRHR students are also encouraged to explore the services offered by HRPA. The IRHR Program Office is located in Woodsworth College and students continue to benefit from the rich academic support services and facilities available at the College.

Regarding Program Enrolment

Admission to major and specialist programs will be determined by grades achieved in specific courses. These are limited enrolment programs that can only accommodate a limited number of students. Achieving the grade requirements does not necessarily guarantee

admission to the program in any given year. Requests for admission will be considered in the first program request period only. For detailed program application instructions, please consult the [Arts & Science Program Toolkit](#). Do not change your program after Year 3 if you are required to complete your degree in four years as prerequisites and program requirements will not be waived. Due to the limited enrolment nature of this program students are strongly advised to enrol in backup programs.

Arts & Science Internship Program (ASIP)

The new [Arts & Science Internship Program](#) (ASIP) stream is available to students who are entering Year 2 or Year 3 of study and are enrolled in the Industrial Relations & Human Resources Specialist or Major.

- Enrolment is limited and requires a supplemental application. Students enrolled in the ASIP stream will be required to complete mandatory Professional Development programming plus a minimum of 12 and a maximum of 20 months (Year-2 entry) or a minimum of 12 and a maximum of 16 months (Year-3 entry) of paid, full-time work experience. The time to degree completion for students enrolled in ASIP will normally be 5 years. There is an additional cost to participate in the ASIP stream.
- Students will typically be admitted to the ASIP stream for the Fall term of Year 2 of study, however, in exceptional circumstances students, including transfer students, who enrolled in an eligible program in the Summer after Year 2 can be admitted to the ASIP stream for the Fall of Year 3. Acceptance into an ASIP stream in Year 3 is dependent on space and requires approval of the student's academic unit and the Faculty of Arts & Science Experiential Learning & Outreach Support (ELOS) Office. Please refer to the ASIP eligibility page for further details.

Further details about ASIP, including eligibility requirements and application procedures, can be found [here](#). Students may also visit the [ASIP webpage](#) or contact the ELOS office at asip@utoronto.ca.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area typically referenced with the same four-digit program code.

The Centre for Industrial Relations and Human Resources (CIRHR) programs impacted by this policy: [ASSPE1536](#) and [ASMAJ1536](#); [ASMAJ1532](#), [ASMAJ1534](#), and

[ASMAJ1533](#). Please note that students completing [ASSPE1536](#) or [ASMAJ1536](#) cannot be enrolled in or complete [ASMAJ1532](#), [ASMAJ1534](#), or [ASMAJ1533](#).

Industrial Relations and Human Resources Programs

Industrial Relations & Human Resources - Specialist Program (Arts Program) - [ASSPE1536](#)

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants.

The following two requirements must be completed:

1. 0.5 credit with a minimum grade of 67% from [ECO101H1](#)/ [IRW230H1](#)*, or a minimum grade of 80% from [ECO105Y1](#)
2. 1.5 credits from SOC/ PSY/ IRE/ IRW, at any level, of which no more than 0.5 credit can be IRE/ IRW, with a combined minimum average grade of 75%

To ensure that students admitted to the program will be successful, students with a final grade/grade average lower than the grades listed above will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Requests for admission will only be considered in the first program request period. Due to the limited enrolment nature of this program students are strongly advised to apply to backup programs.

* [IRW230H1](#) cannot be used for enrolment/program requirements in Economics. For all other programs, consult with the offering department.

Notes:

- For the first requirement, only a 0.5 credit can be counted toward the completion of the IRHR specialist.

- Students must meet prerequisites and/or enrolment requirements for ECO, PSY, IRE, IRW courses. Check the Faculty of Arts and Science's [timetable](#) for details.
- Students enrolled in this program cannot be simultaneously enrolled in or complete any other CIRHR programs.

Arts & Science Internship Program

Students in the Industrial Relations & Human Resources - Specialist (Arts Program) - ASSPE1536 program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Enrolment Requirements: Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2. Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and there are program-specific year 3 entry enrolment requirements. Students applying for Year 3 entry must have been admitted to the Industrial Relations & Human Resources – Specialist in the Summer after Year 2 and have completed 2.0 credits with the IRE course designator before starting their first work term. For more information visit [Arts & Science Internship Program \(ASIP\)](#).

Completion Requirements:

(10.0 credits, including 4.0 credits at the 300+ level, of which 1.0 credit must be a 400-level IRE course, as noted below.)

- Courses with a [CR/NCR](#) status may not be used to satisfy program requirements.

First Year:

0.5 credit from [ECO101H1](#)/ [ECO105Y1](#)/ [IRW230H1](#)*
1.5 credits from SOC/ PSY/ IRE/ IRW, at any level, of which no more than 0.5 credit can be IRE/ IRW

Higher Years (must include 4.0 credits at the 300+ level, of which 1.0 credit must be a 400-level IRE course)

- All of [IRE242H1](#), [IRE244H1](#), [IRE260H1](#), [IRE339H1](#), [IRE430H1](#), [IRE431H1](#) (3.0 credits in total)
- 0.5 credit from [IRE379H1](#) or [IRW220H1](#)
- 0.5 credit from [IRE446H1](#)/ [IRE447H1](#)/ [IRE472H1](#)
- 2.0 credits from Group A
- 2.0 credits (excluding those already counted) from Group A and/or B

Group A: [IRE342H1](#)/ [IRE346H1](#)/ [IRE347H1](#)/ [IRE348H1](#)/ [IRE367H1](#)/ [IRE378H1](#)

Group B: [GGR221H1](#)/ [IRE332Y0](#)/ [IRE345H1](#)/ [IRE349H1](#)/ [IRE395H1](#)/ [IRE396H1](#)/ [IRE432Y0](#)/ [IRE446H1](#)/ [IRE447H1](#)/ [IRE472H1](#)/ [IRE494H1](#)/ [IRW300H1](#)/ [IRW410H1](#)/ [IRW420H1](#)/ [IRW432Y1](#)/ [IRW452Y1](#)/ [JGI216H1](#)/ [JGU216H1](#)/ [SOC207H1](#)/ [SOC366H1](#)/ [SOC367H1](#)/ [SOC370H1](#)/ [WRR300H1](#)

* IRE/IRW courses may not be used for enrolment/program requirements in Economics. For all other programs, consult with the offering department.

Notes:

- Students enrolled in this program cannot be simultaneously enrolled in any other CIRHR program.
- The above requirements apply to students admitted to the program next year; Students follow the program requirements listed on Degree Explorer.
- IRE /IRW courses cannot be used to fulfill enrolment/program requirements in Economics. For all other programs, consult with the offering department before enrolling in IRE/courses.
- Non 'IRE' courses may be available only to students who have completed specified prerequisites and/or are enrolled in a program sponsored by the department offering the course. Check the Faculty of Arts and Science's [timetable](#) for details.

Industrial Relations & Human Resources - Major (Arts Program) - ASMAJ1536

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- 0.5 credit from [ECO101H1](#)/ [ECO105Y1](#)/ [IRW230H1](#)*
- 1.5 credits from SOC/ PSY/ IRE/ IRW, at any level, of which no more than 0.5 credit can be IRE/ IRW

Admission is competitive and in recent years the combined average in the 2.0 credits has been in the 68% to 70% range. Please note that obtaining this minimum grade average does not guarantee admission to the program.

Requests for admission will only be considered in the first program request period. Due to the limited enrolment nature of this program students are strongly advised to apply to backup programs.

* IRW230H1 cannot be used for enrolment/program requirements in Economics. For all other programs, consult with the offering department.

Notes:

- For the first requirement, only a 0.5 credit can be counted toward the completion of the IRHR major.
- Students must meet prerequisites and/or enrolment requirements for ECO, PSY, IRE, IRW courses.
- Students enrolled in this program cannot be simultaneously enrolled in any other CIRHR program.

Arts & Science Internship Program

Students in the Industrial Relations & Human Resources - Major (Arts Program) - ASMAJ1536 program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Enrolment Requirements: Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2. Full details about ASIP, including student eligibility, selection, and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and there are program-specific year 3 entry enrolment requirements. Students applying for Year 3 entry must have been admitted to the Industrial Relations & Human Resources – Major in the Summer after Year 2 and have completed 2.0 credits with the IRE course designator before starting their first work term. For more information visit Arts & Science Internship Program (ASIP).

Completion Requirements:

(7.0 credits, including 2.0 credits at the 300+ level, of which one 0.5 credit must be at the 400-level, as noted below.)

- Courses with a CR/NCR status may not be used to satisfy program requirements.

First Year:

1. 0.5 credit from ECO101H1/ ECO105Y1/ IRW230H1
2. 1.5 credits from SOC/ PSY/ IRE/ IRW, at any level, of which no more than 0.5 credit can be IRE/IRW

Higher Years (must include 2.0 credits at the 300+ level, of which one 0.5 credit must be at the 400-level):

3. All of IRE242H1, IRE244H1, IRE260H1, (IRE379H1/ IRW220H1), IRE430H1, IRE431H1

4. 0.5 credit in 300-level IRE course from Group A

5. 1.5 credits (excluding those already counted) from Groups A and/or B

Group A: IRE339H1/ IRE342H1/ IRE346H1/ IRE347H1/ IRE348H1/ IRE367H1/ IRE378H1

Group B: GGR221H1/ IRE332Y0/ IRE345H1/ IRE349H1/ IRE395H1/ IRE396H1/ IRE432Y0/ IRE446H1/ IRE447H1/ IRE472H1/ IRE494H1/ IRW300H1/ IRW410H1/ IRW420H1/ IRW432Y1/ IRW452Y1/ JGI216H1/ JGU216H1/ SOC207H1/ SOC366H1/ SOC367H1/ SOC370H1/ WRR300H1

Notes:

1. Students enrolled in this program cannot be simultaneously enrolled in any other CIRHR program.
2. The above requirements apply to students admitted to the program next year; Students follow the program requirements listed on Degree Explorer.
3. IRE /IRW courses cannot be used to fulfill enrolment/program requirements in Economics. For all other programs, consult with the offering department before enrolling in courses.
4. Non "IRE" courses may be available only to students who have completed specified prerequisites and/or are enrolled in a program sponsored by the department offering the course. Check the Faculty of Arts and Science's timetable for details.

Work and Organizations Major: Humanities Contexts (Arts Program) - ASMAJ1532

The Work and Organizations program adopts an interdisciplinary approach to understanding the changing nature of work as well as the operation of different types of organizations. Work and Organizations will provide the skills necessary to undertake the development and implementation of solutions to contemporary societal challenges through coordination of economic and social action in organizations and communities. Students will be able to navigate an evolving labour market upon graduation.

The Major in Work and Organizations has three streams: Humanities Contexts, Social Sciences Contexts, and Sciences Contexts. It is generally intended that students will enrol in the stream that corresponds to the sector of their other program(s) – e.g., a student enrolled, or planning to enrol, in a Political Science program would

apply to the Social Sciences Contexts stream of the Work and Organizations Major.

Students may only complete one stream in the Work and Organizations Major, and students enrolled in the Work and Organizations Major cannot be simultaneously enrolled in the Industrial Relations and Human Resources Major or Specialist.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. One of the following courses (0.5 credit) must be completed:

- ENG100H1/ GER100Y1/ GER101H1/ GER150H1/ HIS109Y1/ HPS100H1/ HPS110H1/ HPS120H1/ PHL100Y1/ PHL101Y1/ RLG100Y1/ RLG102H1/ RLG103H1

To ensure that students admitted to the program will be successful, students with a final grade in the completed course lower than 67% will not be considered for admission. Please note that obtaining this minimum grade does not guarantee admission to the program. If more than one course (0.5 credit) has been completed from this list, the minimum grade will be based on the higher course grade. Please note that some of the courses listed are 1.0 credit courses; if one of these courses is completed for enrolment in the program, only 0.5 credit will count toward the completion requirements of the Work and Organizations Major.

If students have not taken a course from this list, they can request approval from the unit to consider other relevant courses for admission.

Note:

- Due to the limited enrolment nature of this program students are strongly advised to apply to backup programs.

Completion Requirements:

(8.0 credits)

Courses with a CR/NCR status may not be used to satisfy program requirements.

First Year:

1. 0.5 credit from the following set of 100-level courses: ENG100H1/ GER100Y1/ GER101H1/ GER150H1/ HIS109Y1/ HPS100H1/ HPS110H1/ HPS120H1/ PHL100Y1/ PHL101Y1/ RLG100Y1/ RLG102H1/ RLG103H1

Note: Some of the above course options are 1.0 credit courses, but only 0.5 credit can be counted toward the completion of this major.

Higher Years:

1. IRW240H1, IRE260H1, PHL295H1, IRW300H1, IRE379H1, IRW410H1, IRW420H1
2. 0.5 credit from: IRW220H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ PSY201H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1
3. 0.5 credit from: IRW230H1/ ECO101H1/ ECO102H1/ ECO105Y1
4. 0.5 credit from: IRE342H1/ MGT201H1
5. 1.0 credit from: IRW432Y1/ IRW446Y1/ IRW452Y1
6. 1.5 credits of electives chosen from the following courses below, of which at least 1.0 credit must be at the 300- or 400-level:

PHL394H1/ PHL395H1/ PHL446H1/ HIS302H1/ HIS310H1/ HIS347H1/ HIS373H1/ HIS396H1/ ENG213H1/ ENG215H1/ ENG254H1/ ENG270H1/ ENG287H1/ ENG355Y1/ ENG357H1/ ENG370Y1/ ENG371H1/ ENG372H1/ DTS417H1/ DTS414H1/ RLG230H1/ RLG236H1/ JAR301H1/ RLG307H1/ RLG308H1/ RLG309H1/ RLG318H1/ RLG337H1/ RLG353H1/ RLG385H1/ RLG387H1/ RLG426H1/ RLG428H1/ GER270H1/ GER272H1/ GER290H1/ GER310H1/ GER370H1/ GER372H1/ HPS200H1/ HPS202H1/ HPS245H1/ HPS316H1/ HPS321H1/ HPS351H1/ JHE353H1/ HPS430H1/ HPS431H1

Note: Non-"IRE" and non-"IRW" courses are offered by other departments. These courses may be available only to students who have completed specified prerequisites or who are enrolled in a program sponsored by the department offering the course. Check the Faculty of Arts & Science's timetable for details to ensure you are able to complete the required electives in the Work & Organizations program.

Work and Organizations Major: Sciences Contexts (Arts Program) - ASMAJ1534

The Work and Organizations program adopts an interdisciplinary approach to understanding the changing nature of work as well as the operation of different types

of organizations. Work and Organizations will provide the skills necessary to undertake the development and implementation of solutions to contemporary societal challenges through coordination of economic and social action in organizations and communities. Students will be able to navigate an evolving labour market upon graduation.

The Major in Work and Organizations has three streams: Humanities Contexts, Social Sciences Contexts, and Sciences Contexts. It is generally intended that students will enrol in the stream that corresponds to the sector of their other program(s) – e.g., a student enrolled, or planning to enrol, in a Political Science program would apply to the Social Sciences Contexts stream of the Work and Organizations Major.

Students may only complete one stream in the Work and Organizations Major, and students enrolled in the Work and Organizations Major cannot be simultaneously enrolled in the Industrial Relations and Human Resources Major or Specialist.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. One of the following courses (0.5 credit) must be completed:

- BIO120H1/ BIO130H1/ CHM135H1/ CHM136H1/ CSC108H1/ CSC148H1/ CSC110Y1/ MAT157Y1/ PHY151H1/ PHY152H1/ PSY100H1/ STA130H1

To ensure that students admitted to the program will be successful, students with a final grade in the completed course lower than 67% will not be considered for admission. Please note that obtaining this minimum grade does not guarantee admission to the program. If more than one course (0.5 credit) has been completed from this list, the minimum grade will be based on the higher course grade. Please note that some of the courses listed are 1.0 credit courses; if one of these courses is completed for enrolment in the program, only 0.5 credit will count toward the completion requirements of the Work and Organizations Major.

If students have not taken a course from this list, they can request approval from the unit to consider other relevant courses for admission.

Completion Requirements:

(8.0 credits)

Courses with a CR/NCR status may not be used to satisfy program requirements.

First Year:

1. 0.5 credit from the following set of 100-level courses: BIO120H1/ BIO130H1/ CHM135H1/ CHM136H1/ CSC108H1/ CSC148H1/ CSC110Y1/ MAT157Y1/ PHY151H1/ PHY152H1/ PSY100H1/ STA130H1

Note: Some of the above course options are 1.0 credit courses, but only 0.5 credit can be counted toward the completion of this major.

Higher Years:

1. IRW240H1, IRE260H1, PHL295H1, IRW300H1, IRE379H1, IRW410H1, IRW420H1
2. 0.5 credit from: IRW220H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ PSY201H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1
3. 0.5 credit from: IRW230H1/ ECO101H1/ ECO102H1/ ECO105Y1
4. 0.5 credit from: IRE342H1/ MGT201H1
5. 1.0 credit from: IRW432Y1/ IRW446Y1/ IRW452Y1
6. 1.5 credits of electives chosen from the following courses below, of which at least 1.0 credit must be at the 300- or 400-level:

EEB208H1/ EEB214H1/ EEB215H1/ EEB255H1/ EEB321H1/ EEB375H1/ EEB428H1/ HMB303H1/ HMB306H1/ PSY220H1/ PSY270H1/ PSY320H1/ PSY321H1/ PSY322H1/ PSY326H1/ PSY328H1/ PSY426H1/ JAR301H1/ RLG318H1/ HPS200H1/ HPS202H1/ HPS245H1/ HPS316H1/ HPS321H1/ HPS351H1/ JHE353H1

Note: Non-"IRE" and non-"IRW" courses are offered by other departments. These courses may be available only to students who have completed specified prerequisites or who are enrolled in a program sponsored by the department offering the course. Check the Faculty of Arts & Science's timetable for details to ensure you are able to complete the required electives in the Work & Organizations program.

Work and Organizations Major: Social Sciences Contexts (Arts Program) - ASMAJ1533

The Work and Organizations program adopts an interdisciplinary approach to understanding the changing

nature of work as well as the operation of different types of organizations. Work and Organizations will provide the skills necessary to undertake the development and implementation of solutions to contemporary societal challenges through coordination of economic and social action in organizations and communities. Students will be able to navigate an evolving labour market upon graduation.

The Major in Work and Organizations has three streams: Humanities Contexts, Social Sciences Contexts, and Sciences Contexts. It is generally intended that students will enrol in the stream that corresponds to the sector of their other program(s) – e.g., a student enrolled, or planning to enrol, in a Political Science program would apply to the Social Sciences Contexts stream of the Work and Organizations Major.

Students may only complete one stream in the Work and Organizations Major, and students enrolled in the Work and Organizations Major cannot be simultaneously enrolled in the Industrial Relations and Human Resources Major or Specialist.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. One of the following courses (0.5 credit) must be completed:

- ECO101H1/ ECO102H1/ ECO105Y1/ GGR112H1/ GGR124H1/ POL101H1/ POL106H1/ POL107H1/ POL109H1/ PSY100H1/ SOC100H1/ SOC150H1

To ensure that students admitted to the program will be successful, students with a final grade in the completed course lower than 67% will not be considered for admission. Please note that obtaining this minimum grade does not guarantee admission to the program. If more than one course (0.5 credit) has been completed from this list, the minimum grade will be based on the higher course grade. Please note that some of the courses listed are 1.0 credit courses; if one of these courses is completed for enrolment in the program, only 0.5 credit will count toward the completion requirements of the Work and Organizations Major.

If students have not taken a course from this list, they can request approval from the unit to consider other relevant courses for admission.

Note:

- Due to the limited enrolment nature of this program students are strongly advised to apply to backup programs.

Completion Requirements:

(8.0 credits)

Courses with a CR/NCR status may not be used to satisfy program requirements.

First Year:

1. 0.5 credit from the following set of 100-level courses: ECO101H1/ ECO102H1/ ECO105Y1/ GGR112H1/ GGR124H1/ POL101H1/ POL106H1/ POL107H1/ POL109H1/ PSY100H1/ SOC100H1/ SOC150H1

Note: Some of the above course options are 1.0 credit courses, but only 0.5 credit can be counted toward the completion of this major.

Higher Years:

1. IRW240H1, IRE260H1, PHL295H1, IRW300H1, IRE379H1, IRW410H1, IRW420H1
2. 0.5 credit from: IRW220H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ PSY201H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1
3. 0.5 credit from: IRW230H1/ ECO101H1/ ECO102H1/ ECO105Y1
4. 0.5 credit from: IRE342H1/ MGT201H1
5. 1.0 credit from: IRW432Y1/ IRW446Y1/ IRW452Y1
6. 1.5 credits of electives chosen from the following courses below, of which at least 1.0 credit must be at the 300- or 400-level and no more than 0.5 credit can be from IRE courses:

GGR221H1/ GGR223H1/ GGR251H1/ GGR252H1/ GGR324H1/ GGR326H1/ GGR328H1/ GGR354H1/ GGR428H1/ GGR429H1/ GGR430H1/ PSY220H1/ PSY320H1/ PSY321H1/ PSY322H1/ PSY326H1/ PSY328H1/ PSY426H1/ POL201H1/ POL214H1/ POL356H1/ POL435H1/ SOC207H1/ SOC306H1/ SOC319H1/ SOC338H1/ SOC408H1/ IRE242H1/ IRE244H1/ IRE346H1/ IRE430H1/ IRE472H1/ RLG230H1/ RLG236H1/ RLG307H1/ RLG308H1/ RLG309H1/ RLG353H1/ RLG385H1/ RLG426H1/ RLG428H1/ HPS200H1/ HPS202H1/ HPS245H1/ HPS351H1/ JHE353H1

Note: Non-"IRE" and non-"IRW" courses are offered by other departments. These courses may be available only to students who have completed specified prerequisites or who are enrolled in a program sponsored by the department offering the course. Check the Faculty of Arts

& Science's timetable for details to ensure you are able to complete the required electives in the Work & Organizations program.

Industrial Relations and Human Resources Courses

IRE199H1 - Why We Work: Understanding Work Through the Prism of Art & Culture

Hours: 24S

Why do we work? What does work mean to the average person? These questions are not as straightforward as they appear. We work for the bulk of our lives and most of our days are spent with coworkers who are neither family nor our closest friends, but we often fail to realize how self-defining work really is. This speaks to work's centrality but also to its invisibility in reflective discourse. However, through "popular" representations of work (e.g., such as in story-telling, cave drawings, hieroglyphs, music, writing, painting, television, film, video games, etc.,) we can begin to better understand the meaning of work and how this has changed over time. Readings in anthropology, history, economics, sociology and employment relations plus film and art criticism will help us explore these questions from an interdisciplinary perspective; assignments will encourage students to reflect on their own experience of work. Developing strong analytical and communication skills is an important goal of the course. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

IRW220H1 - Statistics for Work and Organizations

Hours: 24L

This course covers the fundamentals of statistical data analysis including the principles of data visualization, descriptive statistics, sampling distribution, hypothesis testing, and regression analysis using free statistical software (R/R Studio). The emphasis is on fostering a conceptual understanding of different statistical techniques and analysis applicable to the workplace and within organizations.

Prerequisite: Completion of 4.0 credits

Exclusion: [ECO220Y1](#)/ [EEB225H1](#)/ [GGR270H1](#)/ [POL222H1](#)/ [PSY201H1](#)/ [SOC202H1](#)/ [STA220H1](#)/

Not all courses are offered every year. Please check the [timetable](#) for current course offerings and enrolment restrictions/conditions. Students without course prerequisites may be removed at any time they are discovered. Course descriptions, prerequisites, corequisites and exclusions are listed below.

[STA238H1](#)/ [STA248H1](#)/ [STA288H1](#)/ [MGE12H3](#)/ [PSYB07H3](#)/ [STAB22H3](#)/ [STAB23H3](#)/ [ECO227Y5](#)/ [PSY201H5](#)/ [STA215H5](#)/ [STA218H5](#)/ [STA220H5](#)

Breadth Requirements: Society and its Institutions (3)

IRW230H1 - Economics of Work and Organizations

Hours: 24L

The foundations of economic thinking as well as an introduction to economic theories that explain why organizations exist, the central economic theories of work and worker behaviour; the incentives that make workers and firms behave optimally and an introduction to the new behavioural economic theories of work and organizations are all part of this course. Note: Course will not count towards Economics program requirements.

Exclusion: [ECO101H1](#)/ [ECO105Y1](#)/ [ECO101H5](#)/ [MGEA01H3](#)/ [MGEA02H3](#)

Breadth Requirements: Society and its Institutions (3)

IRW240H1 - Introduction to Work and Organizations

Hours: 24L

The study of work and the history and development of organizations, their central theories and concepts; the behaviours, outcomes, practices and institutions that emerge from or affect work and organizations; contemporary issues in work and organizations.

Prerequisite: Completion of 4.0 credits

Exclusion: [IRE240H1](#)

Breadth Requirements: Society and its Institutions (3)

IRE242H1 - HRM for Industrial Relations and HR Professionals

Hours: 12L/24P

This course explores the relationship between human resource management, employment relations, and industrial relations. Extensive practical course work will expose students to the functions human resource

professionals execute to recruit, select, compensate, train, and evaluate the performance of employees. The course prepares students for advanced HR topics in upper level IRE courses.

Note: Course will not count towards Rotman Commerce program requirements.

Prerequisite: 4.0 credits

Exclusion: RSM361H1

Breadth Requirements: Society and its Institutions (3)

IRE244H1 - Labour Relations

Hours: 36L

Introduction to the institutions, issues and legislation affecting the employment relationship in the public and private sectors in Canada, with emphasis on collective bargaining. The economic and political environment, history of the labour movement, union organization, certification, contract negotiation, strikes, dispute resolution, contract administration and grievances.

Prerequisite: 4.0 credits

Breadth Requirements: Society and its Institutions (3)

IRE260H1 - Organizational Behaviour

Hours: 24L

Introduction to the nature of organizations and the behaviour of individuals and groups within organizations, including topics such as culture and diversity, reward systems, motivation, leadership, politics, communication, decision-making, conflict and group processes. Not recommended for students in Commerce programs.

Prerequisite: 4.0 credits

Exclusion: PSY332H1, RSM260H1

Breadth Requirements: Society and its Institutions (3)

IRE299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

IRE299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

IRW300H1 - Effective Communication and Strategic Writing in Organizations

Hours: 24L

This course is focused on understanding and crafting strategic, effective, and ethical written and verbal communications in organizations. We will learn scholarly approaches from the social sciences and humanities regarding organizational communications and miscommunications, including those directed internally and externally from complex organizations.

Prerequisite: 4.0 credits

Exclusion: WRR300H1

Breadth Requirements: Society and its Institutions (3)

IRE332Y0 - Topics in Industrial Relations and Human Resources (Summer Abroad Program)

Topics in Industrial Relations and Human Resources offered in an international setting. The content may vary from year to year. For more information check the [Summer Abroad](#) website.

Breadth Requirements: Society and its Institutions (3)

IRE339H1 - Labour Markets and Public Policy

Hours: 36L

This course is designed to provide students in the IRHR program with knowledge of how the labour market affects the employment relationship. The basic tools of labour economics are developed and applied to various issues of organizational and government policy such as: the incentive effects of compensation arrangements, government income support programs, and minimum wage policy; the determinants of preferences for hours of work including job-sharing, overtime and retirement; the impacts of unions on compensation and productivity; public-sector employment and alternatives to the right to strike; discrimination in employment on the basis of gender and race as well as related government policies

such as pay and employment equity.

Note: [IRE339H1](#) will not count towards an ECO program.

Prerequisite: [ECO101H1](#)/ [ECO105Y1](#)/ [IRW230H1](#)

Exclusion: [ECO339H1](#)

Breadth Requirements: Society and its Institutions (3)

IRE342H1 - Essentials of Finance and Accounting

Hours: 24L/12T

This course introduces students to accounting and finance procedures and concepts used by organizational leaders and professionals. The course covers both managerial and financial accounting topics with applications to organizational decision-making. Note: Course will not count towards Rotman Commerce program requirements.

Prerequisite: [IRE242H1](#) or [IRW240H1](#) and 0.5 credit from [IRE379H1](#)/ [IRW220H1](#)/ [ECO220Y1](#)/ [EEB225H1](#)/ [GGR270H1](#)/ [POL222H1](#)/ [PSY201H1](#)/ [SOC202H1](#)/ [STA220H1](#)/ [STA238H1](#)/ [STA248H1](#)/ [STA288H1](#)/ [MGB12H3](#)/ [PSYB07H3](#)/ [STAB22H3](#)/ [STAB23H3](#)/ [ECO227Y5](#)/ [PSY201H5](#)/ [STA215H5](#)/ [STA218H5](#)/ [STA220H5](#)

Recommended Preparation: [IRW230H1](#)/ [ECO101H1](#)

Breadth Requirements: Society and its Institutions (3)

IRE344H1 - Topics in Industrial Relations and Human Resources

Hours: 36L

Topics vary from year to year, but the objective of the course is to discuss current IRHR issues and their economic, legal, political and social implications.

Prerequisite: [IRE242H1](#)

Breadth Requirements: Society and its Institutions (3)

IRE345H1 - Topics in Industrial Relations and Human Resources

Hours: 36L

Topics vary from year to year, but the objective of the course is to discuss current IRHR issues and their economic, legal, political and social implications.

Prerequisite: [IRE242H1](#)

Breadth Requirements: Society and its Institutions (3)

IRE346H1 - HR Planning & Strategy

Hours: 36L

An understanding is developed of how essential elements of the human resource planning process support organizational goals and strategies. Topics such as environmental influences, job analysis, forecasting human resource needs and ascertaining supply, succession planning, downsizing and restructuring, mergers and acquisitions, outsourcing, and strategic international issues are examined.

Prerequisite: 0.5 credit from: [IRE240H1](#), [IRE244H1](#), [IRE260H1](#), [IRW220H1](#), [IRW230H1](#), [IRW240H1](#)

Breadth Requirements: Society and its Institutions (3)

IRE347H1 - Training & Development

Hours: 24L

The role of training and development initiatives in organizations. Students acquire the knowledge and skills to conduct a training needs assessment, identify training objectives, explore strategies to increase the transfer of training, design and deliver a training activity using various training methodologies, and evaluate its effectiveness.

Prerequisite: [IRE242H1](#)

Breadth Requirements: Society and its Institutions (3)

IRE348H1 - Recruitment & Selection

Hours: 24L

The principles, legal issues, and emerging trends affecting the recruitment process and selection of staff in organizations. Development of recruitment strategies, assessment of applications for employment, interviewing candidates, and the role of testing and measurement of competencies in making hiring decisions.

Prerequisite: [IRE242H1](#)

Breadth Requirements: Society and its Institutions (3)

IRE367H1 - Compensation

Hours: 24L

The theory and process of developing and administering compensation systems. Through the core compensation principles of efficiency, equity, consistency and

competitiveness we consider such topics as: job analysis, job evaluation, pay levels and structures, pay for performance, benefits, and compensating special groups of workers.

Prerequisite: IRE242H1

Breadth Requirements: Society and its Institutions (3)

IRE378H1 - Employment Health

Hours: 36L

The influence of legislation, the labour market and collective bargaining on health policies and programs in the workplace. The rights and responsibilities of employers, employees, unions and governments for the regulation and promotion of workplace health and safety; and the implications of evolving demographic, economic, and social factors.

Prerequisite: IRE244H1/ IRE260H1

Breadth Requirements: Society and its Institutions (3)

IRE379H1 - Research and Data Analytics

Hours: 24L/12T

Data science is changing the way organizations make decisions and the way work is done. This course introduces basic data analytics concepts for understanding the measurement of performance, analysis of organizational policies, and effective communication and visualization of data. Students will develop basic data skills in the R statistical computing environment.

Prerequisite: 0.5 credit from: IRE240H1, IRE244H1, IRE260H1, IRW220H1, IRW230H1, IRW240H1

Exclusion: ECO220Y1

Breadth Requirements: Society and its Institutions (3)

IRE395H1 - Independent Study

Independent study under the direction of a faculty member. Open only when a faculty member is willing and available to supervise. Application form is due one week before the start of term. Consult the program website for additional information. Not eligible for CR/NCR option.

Prerequisite: IRE244H1, IRE260H1 and at least 68% in 0.5 credit in IRE at the 300+ level. Approval of the Program Coordinator.

Breadth Requirements: Society and its Institutions (3)

IRE396H1 - Research Participation

Credit course for supervised participation in a faculty research project. Offered only when a faculty member is willing and available to supervise. Consult the program website for additional information. Not eligible for CR/NCR option.

Prerequisite: IRE244H1, IRE260H1 and an average of at least 70% in 1.0 credit in IRE at the 300+ level. Approval of the Program Coordinator.

Breadth Requirements: Society and its Institutions (3)

IRE399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

IRE399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

IRW410H1 - Organizational Governance and Design

Hours: 24L

Governance and design refers to “who gets to decide what and how” in organizations. This course examines the development of different types of organizations and governance arrangements, and different design archetypes within organizations. Focus is placed on how different governance and design arrangements support different strategic objectives and goals and ways of coordinating work effort.

Prerequisite: IRE260H1 and 0.5 credit from IRE242H1/ IRW240H1

Breadth Requirements: Society and its Institutions (3)

IRW420H1 - Management Skills for Project and Strategy Implementation

Hours: 36L

The course focuses on understanding the challenges, constraints, and opportunities associated with formulating and implementing organizational strategy, with a focus on developing practical tools and skills required to effectively “get things done” in organizations. Course begins by giving students a framework to analyze organizations from strategic, political and cultural lenses. Subsequently, the course addresses three main issues central to “getting things done” in organizations: 1. how to gain influence in organizations (topics: decision-making, power, and networks), 2. how to manage others (topics: performance management, motivation, negotiations), and 3. how to drive organization change (topics: organizational culture, organizational change).

Prerequisite: [IRE260H1](#) and 0.5 credit from [IRE242H1/IRW240H1](#)

Breadth Requirements: Society and its Institutions (3)

IRE430H1 - Canadian Employment Law & the Non-Union Workplace

Hours: 24L

The course will focus on the law governing employment in a non-unionized workplace. Specifically, it will cover every phase of the employment relationship from hiring to termination and beyond and the rights and obligations of employers and employees as developed by the Courts and under employment-related statutes (namely the [Employment Standards Act, 2000](#) and the [Human Rights Code](#).) The course will also cover provisions from the [Occupational Health and Safety Act](#).

Prerequisite: 1.0 credit from [IRE242H1/IRE244H1/IRE260H1/IRW240H1](#) and 0.5 IRE/IRW credit at the 300-level

Breadth Requirements: Society and its Institutions (3)

IRE431H1 - Canadian Labour Law & the Unionized Workplace

Hours: 24L

The course will focus on the laws impacting unionized workplaces. It will cover every phase of the Ontario Labour Relations Act, 1995 (the “LRA”) from union organizing, certification, negotiation and bargaining, collective agreement arbitration, retention of bargaining rights and decertification and termination of bargaining rights.

Prerequisite: [IRE430H1](#)

Breadth Requirements: Society and its Institutions (3)

IRW432Y1 - Entrepreneurship

Hours: 24L/24P

Students will learn about the theory and practice of entrepreneurship as well as determinants of entrepreneurial success by developing a business or organizational plan to bring their “proposed” product and service ideas to market, to achieve a local community or social development objective, to learn how to secure funding for a new venture creation through individual and/or collective entrepreneurship.

Prerequisite: 14.0 credits including 1.0 credit from [IRE260H1](#), [IRE244H1](#), [IRW220H1](#), [IRW240H1](#), [PHL295H1](#) and 1.0 credit from [IRE342H1](#), [IRE379H1](#), [IRW300H1](#), [IRW410H1](#), [IRW420H1](#)

Exclusion: [RSM493H1](#)

Breadth Requirements: Society and its Institutions (3)

IRE432Y0 - Advanced Topics in Industrial Relations and Human Resources (Abroad)

Advanced topics in Industrial Relations and Human Resources offered in an international setting. The content may vary from year to year. Offered by the [Professional & International Programs Office](#).

Prerequisite: 13.0 credits including [IRE244H1](#), [IRE260H1](#) and 1.0 credit in IRE at the 300+ level

Breadth Requirements: Society and its Institutions (3)

IRE444H1 - Seminar in Industrial Relations and Human Resources

Hours: 24S

An advanced seminar examining contemporary issues in the IRHR field. Topics vary from year to year, but the objective of the course is to discuss current issues and their economic, legal and social implications.

Prerequisite: [IRE244H1](#), [IRE260H1](#) and 1.0 credit in IRE at the 300+ level

Breadth Requirements: Society and its Institutions (3)

IRW446Y1 - Working as an Organizational Consultant

Hours: 24L/24P

In this capstone course, students will learn about the growth and development of consulting and its intellectual foundations. After this background, consulting models and approaches will be explored and applied to real world problems. Students will work in groups on an actual organizational challenge. This challenge will either be internal to an organization or will involve external market research.

Prerequisite: 14.0 credits including 1.0 credit from IRE260H1, IRE244H1, IRW220H1, IRW240H1, PHL295H1 and 1.0 credit from IRE342H1, IRE379H1, IRW300H1, IRW410H1, IRW420H1

Exclusion: IRE446H1

Breadth Requirements: Society and its Institutions (3)

IRE446H1 - Working as an Internal Organizational Consultant

Hours: 24S

This course examines the various elements of the consulting process and the interpersonal skills required to build trust, influence others, contract with clients, and establish and maintain strong working relationships. This seminar may include a compulsory learning format component using a service-learning placement with a community-based agency or organization.

Prerequisite: 0.5 credit in IRE at the 300+ level

Exclusion: IRW446Y1

Breadth Requirements: Society and its Institutions (3)

IRE447H1 - Contemporary Challenges Facing Today's Organizations

Hours: 24S

An advanced seminar exploring significant developments in organizations, and the challenges and opportunities facing professionals in the employment relations field. Emphasis is placed on developing problem solving and critical thinking skills and examining theories and concepts of employment relations.

Prerequisite: 0.5 credit in IRE at the 300+ level

Breadth Requirements: Society and its Institutions (3)

IRW452Y1 - Capstone Research Project

Hours: 24L/24P

In this capstone course, students will have the opportunity to design and implement an original research project on work and organizations. Students will receive in-class training and guidance on: 1) developing and refining a research question, 2) identifying and implementing appropriate research methods, 3) locating or collecting relevant data, 4) identifying the significance of their work to various audiences, and 5) effectively writing a research paper. Not eligible for CR/NCR option.

Prerequisite: 14.0 credits including 1.0 credit from IRE260H1, IRE244H1, IRW220H1, IRW240H1, PHL295H1 and 1.0 credit from IRE342H1, IRE379H1, IRW300H1, IRW410H1, IRW420H1

Breadth Requirements: Society and its Institutions (3)

IRE472H1 - Negotiations

Hours: 24S

Resolving conflicts constructively is a challenge faced by all organizations and most individuals. This course will cover fundamentals of the negotiation process and conflict resolution. This course will apply multiple cases and simulations providing students with several opportunities to build their skills.

Prerequisite: 1.0 credit from IRE242H1/ IRE260H1/ IRE240H1 and 0.5 IRE/ IRW credit at the 300+ level

Breadth Requirements: Society and its Institutions (3)

IRE494H1 - Advanced Topics in Industrial Relations and Human Resources

Hours: 24S

Advanced topics vary from year to year, but the objective of the course is to explore theories, concepts and emerging issues in IRHR and their impact on internal and external environments.

Prerequisite: IRE244H1, IRE260H1 and 1.0 credit in IRE at the 300+ level

Breadth Requirements: Society and its Institutions (3)

Introduction

Innis College is home to a close-knit and diverse community of about 2,200 students. Our small size shapes a friendly, inclusive, and active environment where students are central to college life — including through full parity in our unique governance structure, which provides students with an equal voice when it comes to important decisions concerning the College. Innis students experience the breadth of a world-class research university through the lens of a warm and supportive academic community.

Innis houses the interdisciplinary Writing and Rhetoric Program (WRR), which builds strong critical thinking, research, and communication skills across fields. The College also hosts the Cinema Studies Institute, whose courses (CIN) are listed separately in the Calendar. Our distinctive Innis One Program offers experiential learning and co-curricular events in small first-year courses that are inspired by the values of WRR and our special relationship with CIN. These programs are open to all students enrolled in the Faculty of Arts & Science.

More information can be found on the [Innis College website](#).

Innis One: Storytelling and Society

Innis One: Storytelling and Society is a first-year foundations program for students eager to develop their writing across diverse forms and genres. Rooted in the College's Writing and Rhetoric program and enriched by its connection to the Cinema Studies Institute, Innis One invites students to venture beyond the academy walls as writers in the world, actively engaging in an imaginative, inquiry-based, and creative learning experience. They will discover the power of narrative through engagement with personal essays, cultural criticism, and other forms of writing that engage with social change.

In small seminars, students will experiment with style, voice, and perspective, bringing their own experiences, passions, and history into conversation with the world around them. Seminars featuring guest lecturers, films, and special field trips offer a unique experiential learning opportunity that will also help students to develop writing-focused research and analytical skills.

All first-year students in the Faculty of Arts & Science (St. George campus) are eligible for admission. Further information is available at <https://innis.utoronto.ca/academics/about-innis-one/>.

Urban Studies

As of January 1, 2025, Urban Studies is no longer administered by Innis College. Please see the [Geography and Planning section](#) of the Calendar for more information on Urban Studies courses and programs.

Writing and Rhetoric

Innis College's Minor Program in Writing and Rhetoric offers a diverse array of courses that explore the worlds of oral, written, and online discourse.

Writing and rhetoric go hand in hand. In an increasingly digital world, where the variety and sheer number of texts are rapidly proliferating, the ability to produce persuasive and eloquent writing, as well as analyze and interpret texts, couldn't be more foundational. Guiding our program is the premise that students must be equipped to engage both theoretically and practically with the multimedial world of discourse.

Rhetoric, one of the oldest disciplines in the humanities, is fundamentally concerned with how *persuasion* circulates in society: what transpires *in* texts necessarily reflects, deflects, and impacts what happens *outside* of them. The study of rhetoric includes analyzing the circulation of influence, identities, seductions, ideologies, narratives, tropes, ideas, compromises, and effects across a wide variety of contexts: for example, digital media environments (digital rhetoric), marketing campaigns (advertising rhetoric), medical and scientific settings (rhetoric of science and technology), and the contemporary world of political activity and activism (rhetoric of social change—including feminist rhetoric, rhetoric of race, and environmental rhetoric).

Writing, one of the most important rhetorical skills that anyone can develop, is an invaluable craft both in academic programs and beyond the university. Rhetors—those who can adapt their language to audience and context and use language skillfully—exert a powerful influence in almost any setting. Our writing courses teach

students how to write well in the modes, genres, and styles appropriate to particular disciplinary, institutional, and creative contexts. Each course is oriented towards the specialized writing, reading, research, and editing skills involved in a specific writing genre.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, including 1.0 credit at the 300/400-level.)

1. 2.5 credits in WRR or JWE courses
2. 1.5 credits from the following courses not already used to fulfill requirement 1. Courses outside these lists, which include WRR topics and independent study courses, may be included as designated by the Program Director.

Regarding Innis College Courses

Note

Courses are listed in this order:

- First-Year Foundations Seminars
- Innis One
- Writing and Rhetoric
- Other Innis College courses

For Cinema Studies Courses, see [Cinema Studies Institute](#).

From environmental disasters and ecological collapse to climate change denial and celebrations of nature and wilderness, we will explore the diverse ways humans imagine and write about the natural world and the consequences of such writing. We will study a variety of nonfiction texts, images, and videos about ecology, the environment, nature, wilderness, and sustainability as we consider what these terms mean. From the 19th century American transcendentalists to 20th century ecologists, and 21st century scientific, Indigenous, feminist, and anti-racist perspectives, we will analyze the many ways that humans use writing to argue for certain ways of seeing

and interacting with our planet and the creatures that inhabit it. Through weekly reading, written reflections, and discussion, students will hone their deep reading, research, and writing skills. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

Innis One Courses

INI100H1 - The City Where Movies Are Made

Hours: 36S

In this course, first-year students will be introduced to film culture in Toronto from a variety of angles, including: a history of the city onscreen (both as itself and as a popular shooting location for American productions); an account of major Toronto filmmaking sites and institutions; introductions to local directors and producers; and overviews of contemporary local film festival culture (TIFF and beyond) as well as the city's film-critical community. Through a combination of lectures, screenings, field trips and special guest speakers, the students will be moved to consider both the vitality of Toronto's film scene as well as its connections to other aspects of the city. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

INI101H1 - Writing, Advocacy, and Social Media

Hours: 36S

An introduction to the concept of the city as a creative environment promoting not only growth and wealth but also social justice, equality, cooperation, and civility. Students will learn to build their own writing practice to help them to observe, interpret, and reflect upon the process of urban interaction and the relationship between creativity and justice. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

INI102H1 - Storytelling Through Creative Nonfiction

Hours: 36S

An introduction to creative writing techniques and various forms of creative nonfiction (personal essay, biographical essay, flash nonfiction, lyric essay, visual essay, and other experimental forms) through which students will explore and develop their conscious connection to the natural-urban landscape. The course will include activities such as field trips, readings, interviews, and journaling to generate the material for essays on engagement with nature in the city. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

INI105H1 - Nature and the City

Hours: 36S

This course introduces first-year students to nature in the city from a variety of perspectives: from contemplative to activist discourse, private gardens to public parks, and biodiversity to inequality. Through texts, images, films, and field trips, students will figuratively and literally explore the city and its relationship to the natural, the wild, and other contested ideas. Students write weekly journals in response to the course materials from which they develop a term project that focuses on an aspect of nature in the city.

Breadth Requirements: Creative and Cultural Representations (1)

INI106H1 - Storytelling through Literary Journalism

Hours: 36S

An introduction to literary journalism, in which students study the craft of storytelling along with interviewing, reporting, and the journalist's ethical stance. Guest speakers, field trips, writing activities and course readings will help students engage deeply with their environment and develop the skills and sensitivity required for literary reporting. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

Writing and Rhetoric Courses

WRR103H1 - Introduction to Academic Writing

Previous Course Number: INI103H1
Hours: 36L

This course introduces students to the strategies and practices of successful writing at the university and beyond. WRR103H1 challenges students to reflect on and cultivate their strengths as readers and writers as they enter the university. Students will develop their critical reading abilities and written communication skills through meaningful writing projects in diverse genres, including multimodal composition.

Exclusion: INI103H1
Breadth Requirements: Thought, Belief and Behaviour (2)

WRR104H1 - Writing Reports

Previous Course Number: INI104H1
Hours: 36S

Students will learn the fundamentals of report writing, including how to write abstracts and conduct literature reviews as well as qualitative and quantitative research. Students also learn to communicate visually, including how to create tables, charts, and graphs with attention to purpose, audience, structure, style, skills they apply to a formal report and a poster presentation.

Exclusion: INI104H1
Breadth Requirements: Thought, Belief and Behaviour (2)

WRR201H1 - Theories of Rhetoric: A Brief History of Persuasion

Previous Course Number: INI201H1
Hours: 36S

When contemporary critics seek to discredit dishonest politicians, they tend to refer to their discourse as “mere rhetoric.” But there is so much more to rhetoric than deception. This course examines the history of rhetoric, the art of persuasion, from its birth in Greco-Roman antiquity to its rebirth in twentieth and twenty-first century thought. In addition to tracking the history of Western ideas about persuasion, we will bring rhetorical theories to bear on vital questions about philosophy, psychology, media, and advertising.

Prerequisite: Completion of 4.0 credits
Exclusion: INI201H1
Breadth Requirements: Creative and Cultural Representations (1)

JWE206H1 - Writing English Essays

Previous Course Number: JEI206H1
Hours: 24L/12T

This course teaches students who already write effectively how to write clear, compelling, research-informed English essays. The course aims to help students recognize the function of grammar and rhetoric, the importance of audience, and the persuasive role of style.

Prerequisite: Completion of 1.0 ENG credit or any 4.0 credits
Exclusion: JEI206H1
Breadth Requirements: Creative and Cultural Representations (1)

WRR211H1 - Introduction to Creative Writing

Previous Course Number: INI211H1
Hours: 36S

This introductory course focuses on the process and craft of creative writing. Students will study short fiction, creative nonfiction and poetry by established writers, and learn to respond to works-in-progress by their peers. A variety of activities will help students generate, develop, and revise a portfolio of original creative work.

Prerequisite: Completion of 4.0 credits
Exclusion: INI211H1
Breadth Requirements: Creative and Cultural Representations (1)

WRR300H1 - Strategic Writing in Business and the Professions: Theory and Practice

Previous Course Number: INI300H1
Hours: 36S

Students learn the theory and practice of effective and ethical communication in the workplace, including business, government, and non-profit organizations. Students apply ethical reasoning models to case studies. Students have an opportunity to work directly with a community partner, helping them to solve an industry-specific problem or concern. This experiential learning enables students to work together as a team to develop

relevant solutions as they strengthen their written and verbal communication skills.

Prerequisite: Completion of 4.0 credits

Exclusion: INI300H1, INI302H1, WRR302H1

Breadth Requirements: Creative and Cultural Representations (1)

WRR302H1 - Writing in Business and the Professions for Rotman Commerce Students

Previous Course Number: INI302H1

Hours: 24L/12T

Designed for and restricted to Rotman Commerce undergraduates, the course reflects the program's learning goals, which include critical thinking, ethical reasoning, and business and professional communication (oral and written). Students apply business communication theory and ethical reasoning models to business cases. Students have an opportunity to work directly with a community partner, helping them to solve an industry-specific problem or concern. This experiential learning enables students to work together as a team to develop relevant solutions as they strengthen their written and verbal communication skills

Prerequisite: Completion of 4.0 credits

Exclusion: INI300H1, INI302H1, WRR300H1

Breadth Requirements: Creative and Cultural Representations (1)

WRR303H1 - Digital Rhetoric

Previous Course Number: INI303H1

Hours: 36S

This course explores the pivotal role that media plays in our culture. Beginning with U of T rhetorician Marshall McLuhan's far-reaching ideas about media environments, WRR303H1 takes students on a journey through a wide variety of ideas about media, technology, and rhetoric. Topics include the rhetorical dimensions of social media platforms, the strengths and shortcomings of online activism, the emergence of surveillance capitalism, and the operation of persuasion in dating apps.

Prerequisite: 4.0 credits

Exclusion: INI303H1

Breadth Requirements: Creative and Cultural Representations (1)

WRR305H1 - Word and Image in Modern Writing

Previous Course Number: INI305H1

Hours: 36S

This course examines the persuasive power of writing about visual art and texts. Students will analyze a variety of texts about visual images from several disciplines and genres: journalism, informal essays, poetry, and scholarly writing.

Prerequisite: Completion of 4.0 credits

Exclusion: INI305H1

Breadth Requirements: Creative and Cultural Representations (1)

WRR306H1 - Writing About Plants and the Environment

Hours: 36S

This course uses rhetoric, the study of persuasion, to analyze the cultural, political, and scientific importance of plants. We examine Indigenous knowledge related to plants and the environment as well as debates about plant communication, urban tree coverage and inequality, and environmental justice issues. We also explore the social and health benefits of community gardening, horticultural therapy, and forest bathing. Students reflect on their own relation to land as they deepen their knowledge and appreciation of plants and develop expertise in communicating with public audiences through multimodal writing projects (such as podcasts and video essays) and local field trips.

Prerequisite: 4.0 credits

Exclusion: WRR308H1 (Selected Topics in Writing and Rhetoric: Writing About Plants and the Environment) offered in Fall 2023 and Winter 2023.

Breadth Requirements: Thought, Belief and Behaviour (2)

WRR307H1 - Rhetoric of Health and Medicine

Hours: 36S

Since its inception, rhetoric has been concerned with persuasion and its relationship to human flourishing. This course brings rhetorical thought into important dialogue with health research, medical practices, and pharmaceutical advertising. Medicalized phenomena—like hypochondria, depression, sexual dysfunction, and death & dying—are all bound up with influence. A rhetorical perspective on health and wellness tracks this influence

through networks of individuals, institutions, texts, media forms, genres, and narratives.

Prerequisite: Completion of 4.0 credits

Exclusion: INI308H1 (Selected Topics in Writing and Rhetoric: Rhetoric of Health and Medicine) offered in Fall 2019, and WRR308H1 (Selected Topics in Writing and Rhetoric: Rhetoric of Health and Medicine) offered in Winter 2022

Breadth Requirements: Thought, Belief and Behaviour (2)

WRR308H1 - Selected Topics in Writing and Rhetoric

Previous Course Number: INI308H1

Hours: 24S

Courses on selected topics in Writing and Rhetoric.

Prerequisite: Completion of 4.0 credits

Breadth Requirements: Thought, Belief and Behaviour (2)

WRR309H1 - Professional Communication with Environmental Groups

Hours: 36S

Given the climate crisis, how do environmental groups use communication to advance their aims? In this community-engaged learning course, students work with environmental organizations on professional communication projects. Students learn about rhetoric and communication as they refine and reflect on their writing processes and practice writing in multiple genres. Students create a variety of multimodal communication projects such as social media and web content for community partners. Through readings, reflection, discussion, and projects involving feedback from peers, instructor, and community partners, students learn principles and strategies to inform and persuade a variety of audiences about environmental issues.

Prerequisite: Completion of 4.0 credits

Breadth Requirements: Thought, Belief and Behaviour (2)

WRR310H1 - Stylistic Editing and Copy Editing

Previous Course Number: INI310H1

Hours: 36S

This course introduces students to professional editorial conventions at two later stages of the editorial process. Both stages require analytical skills and sentence expertise. Through stylistic editing, students learn how to improve a writer's literary style; through copy editing, they learn how to ensure both accuracy and consistency (editorial style).

Prerequisite: Completion of 4.0 credits

Exclusion: INI310H1

Breadth Requirements: Creative and Cultural Representations (1)

WRR311H1 - Seminar in Creative Writing – Fiction

Previous Course Number: WRR311Y1, INI311Y1

Hours: 36S

This workshop-based course teaches students about the creative writing process and the fundamentals of writing fiction specifically. Through readings of fiction in various genres, discussions, creative writing prompts and longer assignments, students learn how storytellers work with setting, character, scenes, structure, point-of-view, style and other elements. Students will learn how to take creative risks and grow through writing fiction, how to develop solid work from shaky drafts, how to be generous yet shrewd editors of their own and others' work, and how and why to be active in a writing community.

Prerequisite: 4.0 credits

Exclusion: WRR311Y1, INI311Y1

Breadth Requirements: Creative and Cultural Representations (1)

WRR312H1 - Writing Literary Journalism

Hours: 36L

This course introduces students to works by some of the most influential literary journalists of the twentieth and twenty-first centuries. Classes will be devoted to individual literary-journalistic genres: the personal essay, the profile, the polemic, the memoir, literary reportage, and cultural criticism. Students will look closely at key writers who worked across these genres: George Orwell, James Baldwin, Joan Didion, Joyce Carol Oates. Over the semester, students will develop and write a feature-length work of literary journalism in a genre of their choice, to be refined through peer workshop and instructor feedback.

Prerequisite: Completion of 4.0 credits

Exclusion: INI308H1 (Selected Topics in Writing and Rhetoric: Writing Literary Journalism), offered in Summer 2021

Recommended Preparation: Experience or strong interest in writing journalism.

Breadth Requirements: Creative and Cultural Representations (1)

WRR313H1 - Visual Rhetoric

Previous Course Number: INI413H1, WRR413H1

Hours: 36L

This course examines how images and objects communicate with and persuade viewers. Visual rhetoric is part of the broader academic field known as rhetorical studies. This course will introduce students to the "language" of display, exploring questions such as the following: How does physical arrangement, context, and architectural space give voice to the silent object? How are fine art and decorative art objects invested with meaning? Students will be introduced to object-based learning and material culture and learn to analyze and interpret visual grammar in international exhibitions, in auction and exhibition catalogues, in reviews of exhibits, and in museum collections. Objects will include ceramics, jewellery, interiors, architecture, and fashion in the eighteenth, nineteenth, and twentieth centuries.

Prerequisite: Completion of 4.0 credits

Exclusion: INI413H1, WRR413H1

Recommended Preparation: WRR103H1/ WRR203H1/ WRR204H1

Breadth Requirements: Society and its Institutions (3)

WRR315H1 - Writing from Territory: Creative Writing in Fiction and Nonfiction

Hours: 36S

This course guides students in a creative writing process that is engaged with place and time. Classes are held outdoors at various locations in Toronto. Through guided writing activities, discussions, assignments and writing workshops, students learn how writing grounded in and informed by territory can expand their work, adding intimacy, immediacy, authenticity and depth. Readings and techniques are drawn from literary fiction of different genres (e.g., realism, speculative, YA, fantasy), and a range of creative nonfiction. Students are invited to explore any genre.

Prerequisite: Completion of 4.0 credits

Exclusion: WRR308H1 (Selected Topics in Writing and Rhetoric: Writing From Territory: Creative Writing in Fiction and Nonfiction) offered in Summer 2023

Breadth Requirements: Creative and Cultural Representations (1)

WRR316H1 - Developmental and Substantive Editing

Previous Course Number: INI316H1

Hours: 36S

This course introduces professional editorial conventions at two early stages of the editorial process. Both stages require editors to think critically and creatively as they assess content, organization, and argument. Students learn how to analyze and evaluate these elements, envision possible improvements, and explain these suggestions persuasively.

Prerequisite: Completion of 4.0 credits

Exclusion: INI316H1

Breadth Requirements: Creative and Cultural Representations (1)

WRR317H1 - Advanced Academic Writing

Previous Course Number: WRR203H1

Hours: 36S

The course covers various kinds of academic writing, including the essay, the long form book review, the annotated bibliography, and the undergraduate thesis. Students learn to recognize the rhetorical frames, persuasive strategies, elements of style, and uses of scholarly evidence that are features of academic writing. Readings include academic and non-academic prose from a variety of disciplines. Through reading, research, reflection, writing, and citation of sources, students learn to engage in the scholarly conversation that is foundational to all advanced academic writing. Students will develop voices as writers in dialogue with other writers, scholars, and commentators.

Prerequisite: Completion of 4.0 credits

Exclusion: WRR203H1

Recommended Preparation: Any first or second-year writing course.

Breadth Requirements: Thought, Belief and Behaviour (2)

JWB318H1 - The Art of Journalism: Literary Approaches to Reporting

Hours: 36S

Journalism largely goes unconsidered as a subject for literary analysis, the writing dismissed as formulaic and artless. But from the genre's inception, there have been writers who approached it as a literary endeavour, committed to not just telling true stories about the world

around us but doing so in ways that captivate and engage a reader's imagination, with all the nuance and precision that literary techniques can afford. In this course, we will read and consider canonical works of journalism from the last 75 years, discussing them as literary works as well as exploring the reporting methods they draw on and the ethical questions they raise. Students will have a choice of assignment tracks, and either develop their own literary reporting projects or write analyses of the works we study.

Prerequisite: Completion of 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

WRR319H1 - Rhetoric of Race

Hours: 36L

This course will introduce students to an array of thinkers who scrutinize the history of rhetoric and communication from the standpoints of critical race studies. Over the last decade, scholars working in the field of rhetorical studies have dedicated a great deal of attention to the importance of race to critical interrogations of communication. Black and Indigenous scholars, in particular, have been at the forefront of thinking about communication through the lens of race. From persuasive oratory to recent calls for a rhetoric of sovereignty, the rhetoric of race takes up the intersections of communication, justice, and history. This course provides students with an opportunity to reflect on traditional rhetorical concerns about persuasion and influence in relation to colonialism, systemic racial prejudice, and conceptions of social justice.

Prerequisite: Completion of 4.0 credits

Breadth Requirements: Thought, Belief and Behaviour (2)

WRR405Y1 - Independent Studies in Writing and Rhetoric

Previous Course Number: INI405Y1

Independent research projects devised by students and supervised by the Writing and Rhetoric staff. Open only to students who are completing the Minor Program in Writing and Rhetoric Program. Applications should be submitted to the Program Director by June 1 for a Fall session course or by November 1 for a Spring session course. Not eligible for CR/NCR option.

Prerequisite: 1.0 credit from WRR103H1/ WRR104H1, WRR201H1, WRR203H1, WRR303H1, WRR305H1, WRR413H1, WRR414H1
Exclusion: INI405Y1

WRR406H1 - Independent Studies in Writing and Rhetoric

Previous Course Number: INI406H1

Independent research projects devised by students and supervised by the Writing and Rhetoric staff. Open only to students who are completing the Minor Program in Writing and Rhetoric Program. Applications should be submitted to the Program Director by June 1 for a Fall session course or by November 1 for a Spring session course. Not eligible for CR/NCR option.

Prerequisite: 1.0 credit from WRR103H1/ WRR104H1, WRR201H1, WRR203H1, WRR303H1, WRR305H1, WRR413H1, WRR414H1
Exclusion: INI406H1

WRR407H1 - Independent Studies in Writing and Rhetoric

Previous Course Number: INI407H1

Independent research projects devised by students and supervised by the Writing and Rhetoric staff. Open only to students who are completing the Minor Program in Writing and Rhetoric Program. Applications should be submitted to the Program Director by June 1 for a Fall session course or by November 1 for a Spring session course. Not eligible for CR/NCR option.

Prerequisite: 1.0 credit from WRR103H1/ WRR104H1, WRR201H1, WRR203H1, WRR303H1, WRR305H1, WRR413H1, WRR414H1
Exclusion: INI407H1

WRR408Y1 - Special Topics in Writing and Rhetoric

Previous Course Number: INI408Y1

Seminars in special topics designed for students who are completing the Minor Program in Writing and Rhetoric.

Prerequisite: Permission of instructor.

WRR409H1 - Special Topics in Writing and Rhetoric

Previous Course Number: INI409H1
Hours: 36S

Seminars in special topics designed for students who are completing the Minor Program in Writing and Rhetoric.

Prerequisite: Completion of 9.0 credits

WRR410H1 - Special Topics in Writing and Rhetoric

Previous Course Number: INI410H1

Hours: 36S

Seminars in special topics designed for students who are completing the Minor Program in Writing and Rhetoric.

Prerequisite: Completion of 4.0 credits

WRR414H1 - Writing for Social Change

Previous Course Number: INI414H1

Hours: 36S

We will read and write a variety of texts focused on understanding and effecting social change. Students will be encouraged to engage with different theories of social change and an array of writing genres, ranging from journalism to critical theory to fiction. Ultimately, students will focus on one or several key social issues that they wish to write about for their final project.

Prerequisite: Completion of 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

Other Innis College Courses

INI299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

Introduction

To study Italian is not only to acquire a language, but also to study a rich literature and a many-sided culture which have played an important, and sometimes dominant, role in Western civilization. For Canadians, the Italian contribution bears a special significance: the vast influx of Italians has brought changes in our way of life and a living presence to reinforce traditional Italian influences, thus enriching the meaning of the term Canadian. Italian combines well with other modern languages and literatures, and other programs such as European Studies, Literary Studies, and Mediaeval and Renaissance Studies, but is by no means restricted to these. Students may choose from Specialist, Major and Minor programs in Italian Studies. Italian courses are offered for beginners as well as for students who may have prior knowledge or instruction in Italian. Oral practice is included in all language courses. Students well qualified in the Italian language may be excused from language courses in first year (please see the Undergraduate Coordinator). 300 and 400-level courses are available to qualified third and fourth-year students and may be taken concurrently. These courses offer a wide range of options in language, literature, linguistics, culture and cinema. There are courses in Italian literature, culture and cinema that are given in English and have no language requirement. In conjunction with Woodsworth College, ITA courses may be taken in Italy at the University of Siena during July and August. A number of bursaries are available. Students may apply to take their Third Year in Italy under the Study Abroad Program in conjunction with the Centre for International Experience (<https://internationalexperience.utoronto.ca/>).

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Italian programs impacted by this policy: ASSPE2524, ASMAJ2524, and ASMIN2524

Italian Programs

Italian Specialist (Arts Program) - ASSPE2524

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(10.0 credits, including at least 1.0 credit at the 400-level)

1. The following language courses: [ITA100Y1](#), [ITA250Y1](#), [ITA350Y1](#), [ITA450H1](#)
2. An additional 1.0 ITA credit at the 200-level
3. 2.0 credits at the 300+ level in literature, including a 0.5 credit in each of the THREE periods of Italian literature:

Medieval / Renaissance: [ITA300H1](#)/ [ITA311H1](#)/
[ITA312H1](#)/ [ITA320H1](#)/ [ITA321H1](#)/ [ITA332H1](#)/
[ITA370H1](#)/ [ITA400H1](#)/ [ITA420H1](#)/ [ITA455H1](#)

Baroque / Enlightenment: [ITA301H1](#)/ [ITA348H1](#)/
[ITA390H1](#)/ [ITA420H1](#)/ [ITA455H1](#)

Modern / Contemporary: [ITA301H1](#)/ [ITA310H1](#)/
[ITA330H1](#)/ [ITA380H1](#)/ [ITA381H1](#)/ [ITA410H1](#)/
[ITA421H1](#)/ [ITA455H1](#)

4. One 0.5 credit from the following: [ITA360H1](#)/
[ITA363H1](#)/ [ITA364H1](#)/ [ITA431H1](#)/ [ITA432H1](#)/
[ITA433H1](#)
5. One 0.5 credit from the following: [ITA311H1](#)/
[ITA320H1](#)/ [ITA321H1](#)/ [ITA330H1](#)/ [ITA332H1](#)/
[ITA340H1](#)/ [ITA341H1](#)/ [ITA342H1](#)/ [ITA345H1](#)/
[ITA348H1](#)/ [ITA370H1](#)/ [ITA380H1](#)/ [ITA400H1](#)/
[ITA420H1](#)/ [ITA441H1](#)/ [ITA445H1](#)
6. 2.0 credits at the 300+ level with at least one 0.5 credit at the 400-level
7. [ITA495H1](#)

NOTE: No more than **2.0 credits** where the language of instruction is English may be counted towards the Specialist Program.

Italian Major (Arts Program) - ASMAJ2524

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(7.0 credits, including at least one 0.5 credit at the 400 level)

1. The following language courses: [ITA100Y1](#), [ITA250Y1](#), [ITA350Y1](#)
2. One additional 200-series ITA full course equivalent

3. One full course or equivalent at the 300+ level in literature
4. One half course from the following: [ITA360H1](#)/
[ITA363H1](#)/ [ITA364H1](#)/ [ITA431H1](#)/ [ITA432H1](#)/
[ITA433H1](#)
5. One half course from the following: [ITA311H1](#)/
[ITA320H1](#)/ [ITA321H1](#)/ [ITA330H1](#)/ [ITA332H1](#)/
[ITA340H1](#)/ [ITA341H1](#)/ [ITA342H1](#)/ [ITA345H1](#)/
[ITA348H1](#)/ [ITA370H1](#)/ [ITA380H1](#)/ [ITA400H1](#)/
[ITA420H1](#)/ [ITA441H1](#)/ [ITA445H1](#)
6. One additional 300+ series course of which at least one half course must be at the 400 level

Italian Culture and Communication Studies Minor (Arts Program) - ASMIN1245

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

4.0 credits including 1.0 credit from any of the following:

[ITA340H1](#)/ [ITA341H1](#)/ [ITA342H1](#)/ [ITA345H1](#)/ [ITA441H1](#)/
[ITA445H1](#) (Italian cinema courses)

[ITA360H1](#)/ [ITA363H1](#)/ [ITA364H1](#)/ [ITA431H1](#)/ [ITA432H1](#)/
[ITA433H1](#) (Italian linguistics courses)

[ITA356Y0](#)/ [ITA357Y0](#)/ [ITA358Y0](#)/ [ITA359Y0](#) (Italian culture courses)

Italian Minor (Arts Program) - ASMIN2524

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 full courses or their equivalent)

Any 4 ITA courses (at least one full course equivalent must be a 300/400-level literature course)

Faculty of Arts & Science Language Citation

The Department of Italian, Spanish, Portuguese and Latin American Studies participates in the Faculty of Arts & Science's Language Citation initiative for Italian. Proficiency in Italian is an invaluable asset for those wishing to pursue a career in social work, business, applied science, government, law, medicine or education. A knowledge of Italian complements undergraduate studies in other areas, such as music, fine art, literary studies, European history or political science, to name a few.

The Language Citation recognizes a significant level of achievement in language study with a high level of academic success. The Citation in Italian is available to students who, having completed a first-year language course in Italian (ITA100Y1) (or the equivalent prerequisite training), earn a grade of at least B- in a second-year language course (ITA250Y1) and in a third-year language course (ITA350Y1).

Students should note that, as explained in the Academic Record - Recognition of Academic Achievement section of this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

Italian Courses

ITA100Y1 - Italian Language for Beginners

Hours: 72S

An introduction to the main elements of the Italian language. The development of speaking, reading, and writing skills. Introduction to Italian culture and texts.

A questionnaire on students' knowledge of and background in Italian will be administered shortly before or during the first class.

Exclusion: Grade 11 and/or 12 Italian (U or M level) or previous experience or instruction in Italian.

Breadth Requirements: Creative and Cultural Representations (1)

Guidelines for students who wish to begin the study of the Italian language at the university level

ITA100Y1 - Italian Language for Beginners – An introductory course for students with no previous knowledge of the Italian language. Not open to students with grade 11 and/or 12 U or M Italian or with previous experience, exposure or instruction in Italian.

ITA250Y1 - Intermediate Italian – The subsequent course for students who have completed ITA100Y1.

This course is also open to students who have completed Grade 11 and/or 12 Italian (U or M level) or with previous experience or instruction in Italian. For this group, the Department may conduct assessment to determine appropriate placement.

Self-placement is not allowed in the Department of Italian, Spanish, Portuguese and Latin American Studies. The Department reserves the right to place students in the language course appropriate to their level of language skill. In ITA100Y1 students will be asked to fill out a questionnaire on their knowledge of, past studies and background in Italian. The questionnaire will also be filled out by all other language students who do not have the proper prerequisite in all other languages. The Department may conduct assessment to determine appropriate placement.

ITA102Y0 - Practical Italian

Hours: 48L/24P

A course specifically designed for students who wish to take Italian as a breadth requirement. Emphasis will be given to basic aspects of communication in a functional context. This course cannot be used towards any Minor, Major or Specialist program in Italian. (Offered in Siena only)

Exclusion: 4U Italian or any previous university level Italian language course

Breadth Requirements: Creative and Cultural Representations (1)

ITA196H1 - Image and Text in Medieval and Renaissance Italian Culture

Hours: 24L

The course will explore various aspect of the interaction between literature and the visual arts in Italy from the

Middle Ages to the end of the Renaissance. The focus will be on the intersection between the literary and visual modes of perception in the works of representative Italian authors from the Fourteenth to the Sixteenth Centuries. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

ITA197H1 - The Fine Art of Murder: Reading Detective Fiction

Hours: 24L

Since its inception in the Nineteenth century, detective fiction has been one of the most popular literary genres, proving adept at both entertaining and shining a critical light on social and political problems. This course will explore the many faces of detective fiction addressing questions such as: Why does crime hold such a fascination for modern audiences? What kind of pleasure do we derive from reading stories that often follow established conventions and rules? What do these novels about crime and punishment tell us about broader social and political issues? Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: VIC197H1

Breadth Requirements: Creative and Cultural Representations (1)

ITA198H1 - Machiavelli and Machiavellianism

Hours: 24L

An examination of Machiavelli's political doctrine in *The Prince* and the development of his ideas in politics, ethics and the arts. Special attention will be paid to the enduring relevance of his legacy in the modern world. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: VIC142H1

Breadth Requirements: Creative and Cultural Representations (1)

JCI199H1 - Italians in Canada: Histories, Journeys, Struggles, Successes

Hours: 24L

This course explores the presence of people from the Italian peninsula in what is now known as Canada. The course begins with discussions on Giovanni Caboto's and other explorers' journeys to then focus on contemporary Italian-Canadian communities. This course provides students with the critical tools necessary to understand various historical, linguistic, culinary, spiritual, political, and creative elements of Italian-Canadian identity and life. Students of both Italian and non-Italian heritage are most welcome in this course, which is taught in English. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

ITA199H1 - Italian Fascism and Global Responses: The Dark Side of Italianità

Hours: 24L

After WWI, Italian society faced a political, economic, and moral crisis that resulted in the rise of fascism. Using diverse sources (media, literary texts, movies, architecture and design), this course explores various reactions in Italy and abroad to the rise of Mussolini and the totalitarian State. Why did common people, intellectuals, politicians, and business and community leaders around the globe succumb to the seduction of fascism? How did other people denounce fascist violence? After an introduction to Italian fascism, the course will consider global reactions to Italian fascism and diverse responses in Italian communities abroad (e.g. Canada, USA, Argentina). Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

ITA200H1 - Major Italian Authors in Translation: from Dante to Tasso

Hours: 24L

The course will focus on authors from the Middle Ages to the Renaissance who had a defining influence on Western literature, such as Dante, Petrarca, Boccaccio, Machiavelli, Ariosto and Tasso. This course includes a component designed to enhance students' research experience. (Given in English)

Exclusion: ITA300H1

Breadth Requirements: Creative and Cultural Representations (1)

ITA201H1 - Major Italian Authors in Translation: from Marino to Calvino

Hours: 24L

The course will focus on authors from the Baroque to the Twentieth Century who had a defining influence on Western literature, such as Marino, Goldoni, Manzoni, Pirandello, Calvino. This course includes a component designed to enhance students' research experience. (Given in English)

Exclusion: ITA301H1

Breadth Requirements: Creative and Cultural Representations (1)

ITA210H1 - "The Most Beautiful Language": Italian between Past, Present and Future Challenges

Hours: 24L

In his recent book, titled "The most beautiful language" (*La più bella del mondo*, Turin: Einaudi, 2018), Stefano Jossa eulogizes Italian, arguing that it should be learned by many. However, what do we really know about it? The course will try to answer some crucial questions: How was the Italian language born and developed? What are its main characteristics? How are the many dialects perceived in Italy today? What status do they have vis-à-vis the national language? What about the expansion of English? Are the dialects disappearing or still surviving? How is Italian language facing the new social questions (gender, diversity, etc.)? How are social media changing the way the Italian language is written and spoken?

Breadth Requirements: Thought, Belief and Behaviour (2)

ITA233H1 - Italian-Canadian Literature

Hours: 24L

The course will explore how notions of identity and (self)-representation emerge in literature by Canadian writers of Italian descent, illustrating the critical evolution of the immigrant journey from its historical experience to its current condition. This course includes a component designed to enhance students' research experience. (Given in English)

Breadth Requirements: Society and its Institutions (3)

ITA240Y1 - History of Italian Cinema

Hours: 48L/72P

This course surveys the history of Italian cinema and the sociopolitical circumstances surrounding the film industry, from its early days to the present, while also introducing the students to methods of analysis and research appropriate to the field. Emphasis will be placed on films from the silent era to the 1960s, and from the 1960s to the present. This course includes a component designed to introduce students to methods of scholarly research appropriate to the field.

The course is given in English and all films shown have English subtitles.

Breadth Requirements: Creative and Cultural Representations (1)

ITA250Y1 - Intermediate Italian

Hours: 72S

Grammar review, readings of Italian authors and oral practice to enhance comprehension and expressive skills.

Students without the prerequisite will be asked to fill out a questionnaire on their knowledge of and background in Italian.

Prerequisite: ITA100Y1/ ITA151Y1; Grade 11 and/or 12 Italian (U or M level), or previous experience or instruction in Italian, or permission of the Department.

Exclusion: ITA251Y1

Breadth Requirements: Creative and Cultural Representations (1)

JCI250H1 - Italian Canadian Communities

Hours: 24S

This course examines the past and present settlement patterns of those of Italian descent in Canada, in rural areas and cities, including increasing suburbanization. Students will address issues such as work and employment and political participation. Challenges and opportunities will be examined, with respect to issues such as migration, community-building, belonging, and discrimination.

Breadth Requirements: Society and its Institutions (3)

ITA299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

ITA299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

ITA300H1 - History of Italian Literature: Middle Ages and Renaissance

Hours: 24L

This course provides a chronological, comprehensive view of Italian literature and its major authors and trends, in their socio-historical contexts from its beginnings to the Renaissance. This course includes a component designed to enhance students' research experience.

Prerequisite: [ITA250Y1/ ITA251Y1](#)

Exclusion: [ITA200H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

ITA301H1 - History of Italian Literature: Baroque to Contemporary

Hours: 24L

This course provides a chronological, comprehensive view of Italian literature and its major authors and trends, in their socio-historical contexts from the Baroque period to the present day. This course includes a component designed to enhance students' research experience.

Prerequisite: [ITA250Y1/ ITA251Y1](#)

Exclusion: [ITA201H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

ITA310H1 - The 'Journey' in 19th Century Italian Literature

Hours: 24L

The course illustrates Italy's contribution to the history of the trope during a time when countries became increasingly interdependent and conscious of each other's cultures. Through literary and social analysis the course traces the most vital aspects of the journey motif. This course includes a component designed to enhance students' research experience. (Given in English)

Breadth Requirements: Creative and Cultural Representations (1)

ITA311H1 - Mediaeval Italian Literature in Translation: Dante

Hours: 24L

A study of the *Vita Nuova* and of the *Divine Comedy* within the literary and cultural contexts of the Middle Ages. This course includes a component designed to enhance students' research experience. (Given in English)

Exclusion: [ITA320H1/ ITA321H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

ITA312H1 - Mediaeval Italian Literature in Translation: Petrarch and Boccaccio

Hours: 24L

A study of Petrarch's *Canzoniere* and of Boccaccio's *Decameron* in relation to later Middle Ages. This course includes a component designed to enhance students' research experience. (Given in English)

Breadth Requirements: Creative and Cultural Representations (1)

ITA314H1 - Italian Design: Fashion, Artistry, Genius

Hours: 24S

"Made in Italy" is a global standard for creativity and excellence in fashion, architecture, and industrial design. This course will explore how art, imagination, and craft have intersected in different areas of Italian culture over time. Based on an individual instructor's area of expertise,

themes explored may include studies of the Italian fashion industry, food culture, commercial art, and industrial design. Primary materials will include artworks, literary texts, material objects, and mixed media that demonstrate the importance of design culture in Italy and the impact of Italian design culture in the world. This course includes a component designed to enhance students' research experience.

Prerequisite: 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ITA315H1 - Sex and Gender in Contemporary Italy

Hours: 24S

This course will focus on theoretical and cultural productions that deal with issues of sexuality and gender in (contemporary) Italy. Based on an individual instructor's area of expertise, themes explored may include feminism and women's rights, sexual liberation and LGBTQ+ rights, Queer-of-Colour critique, and other topics within the study of sexual and gender diversity. Primary materials will include manifestos, theoretical essays, novels, short stories, and films that deal with gender and sexual diversity in the Italian-speaking world and from a transnational perspective. Linguistic issues will also be discussed. This course includes a component designed to enhance students' research experience.

Prerequisite: 4.0 credits

Breadth Requirements: Society and its Institutions (3)

ITA320H1 - Dante: Vita Nuova and Divina Commedia (Inferno)

Hours: 24L

Dante's poetry and great Christian epic of conversion explode with the passions of this world. This course focuses on intertextual and rhetorical strategies used to fashion the author's complex vision of contemporary society within the framework of providential history. This course includes a component designed to enhance students' research experience.

Prerequisite: ITA250Y1/ ITA251Y1

Exclusion: ITA311H1

Breadth Requirements: Creative and Cultural Representations (1)

ITA321H1 - Dante: Divina Commedia (Purgatorio and Paradiso)

Hours: 24L

A continuation of ITA320H1, this course examines the *Purgatorio* and the *Paradiso* in the context of Dante's vision of contemporary society. This course includes a component designed to enhance students' research experience.

Prerequisite: ITA320H1

Exclusion: ITA311H1

Breadth Requirements: Creative and Cultural Representations (1)

ITA332H1 - Love in the Renaissance

Hours: 24L

An exploration of the theme of love in the Renaissance and its development in a variety of literary forms. Analysis of treatises, poetry, short stories and letters with the purpose of examining intertextuality and the practice of imitation, as well as the social and political aspects of love, such as marriage, women's position in society, pornography, homosexuality and other issues. This course includes a component designed to enhance students' research experience. (Given in English)

Breadth Requirements: Creative and Cultural Representations (1)

ITA333H1 - Identity Politics in Renaissance Italy

Hours: 24L

This course explores the intersection of religion, gender, and race in the literature and culture of Renaissance Italy. Between 1350 and 1650, constructs of identity based on these categorizations consolidated into cultural norms that influenced modern colonialism and contemporary nationalism. In this course, we will investigate how texts and ideas that we normally place at the core of the myth of the Italian Renaissance were always in dialogue with fantasies of power, exceptionalism, and orientalism. We will pair close reading of a wide range of literary genres (romance, dramaturgy, fiction, travelogues, political writing) with visual artifacts and archival materials. Authors to be studied include Boccaccio, Petrarch, and Ariosto.

Prerequisite: Completion of 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ITA340H1 - Italian Neorealist Cinema

Hours: 24L/36P

The focus of this course is the films of Italian Neorealism, one of the most influential, artistic, and intellectual movements in the history of world cinema. While emphasis will be placed primarily on the work of Roberto Rossellini, Vittorio De Sica, and Luchino Visconti, the course will also offer a detailed discussion of the historical context and of the sociopolitical issues of postwar Italy. This course includes a component designed to enhance students' research experience. (Given in English)

Recommended Preparation: [ITA240Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

ITA341H1 - Gender and Genre in Italian Cinema

Hours: 24L/36P

The course looks at Italian cinema from the perspective of gender and genre studies. While the focus will be primarily on film, the course will also engage with different media and discuss how these have informed and influenced Italian notions of masculinity and femininity throughout the Twentieth Century. The emphasis on genre will provide the structure to organize a discourse that will embrace very diverse and multifaceted texts, and will enable students to develop their analytical and critical skills in the field. This course includes a component designed to enhance students' research experience. (Given in English)

Breadth Requirements: Creative and Cultural Representations (1)

ITA342H1 - Popular Italian Cinema

Hours: 24L

This course discusses the notion of the *Popular* as applied to Italian cinema. By focusing on the number of films that have appropriated popular international genres such as *Spaghetti Westerns*, *Horror*, and *Poliziotteschi*, this course will discuss Italian cinema in a global context, drawing parallels and comparisons with other national industries. Students will gain a broader understanding of Italian film culture, and will apply their critical and research skills to a wide range of texts. This course includes a component designed to enhance students' research experience. (Given in English)

Breadth Requirements: Creative and Cultural Representations (1)

ITA345H1 - Cinema of the Italian Diasporas

Hours: 24L/36P

This course will examine how several filmmakers of Italian descent engage with the representation of their diasporic identity. Particular emphasis will be placed on Italian-Canadian and Italian-American cinema, as well as on Italian cineastes working in Argentina, Brazil, and Australia. The course will analyze films that span from silent to contemporary, from the formation of the stereotypical images to the re-appropriation of archetypes on the part of "ethnic" filmmakers. This course includes a component designed to enhance students' research experience. (Given in English)

Breadth Requirements: Creative and Cultural Representations (1)

ITA348H1 - Mass Media in Italy: The European Context

Hours: 24L

This course investigates Italy's pivotal role in epochal cultural changes: from manuscript to print and from print to computers. The impacts of Print Technology in the Renaissance and of Electronic Technology from Marconi onward are thoroughly analyzed. This course includes a component designed to enhance students' research experience. (Given in English)

Breadth Requirements: Creative and Cultural Representations (1)

ITA349H1 - Black Italian Cultural Production

Hours: 24L

This interdisciplinary course will explore the landscape of cultural production made by Italians of African descent. The course provides students with relevant historical and sociological background necessary to understand entanglements of race, gender, identity, and citizenship occurring in contemporary Italy. The analysis of cultural production includes literature, music, cinema, television, visual arts and fashion. Students read not only academic material but also short stories, novels and poems; listening to and analyzing rap, trap and hip-hop tracks; watching online exhibitions and documentaries; examining

Netflix series and Instagram pages. When possible, the course will also host Italian artists and activists engaging in conversations about their work.

Prerequisite: Completion of 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ITA350Y1 - Language Practice

Hours: 24P/48S

For students who have completed ITA250Y1/ ITA251Y1. Discussion of problems of grammar, style, and composition. Language analysis based on readings of Italian authors. One hour a week of oral practice. This course includes a component designed to enhance students' research experience.

Students without the prerequisite(s) will be asked to fill out a questionnaire on their knowledge of and background in Italian.

Prerequisite: ITA250Y1/ ITA251Y1

Exclusion: ITA351Y1

Breadth Requirements: Creative and Cultural Representations (1)

JCI350H1 - Italian Canadian Culture and Identity

Hours: 24S

This course examines the contributions of Canadians of Italian descent to arts, culture, identity and heritage in Canada, with attention to the diversity of the community with respect to issues such as language, religion, gender, class, sexuality, etc. A core concept addressed by the course is immigration, whether from the experiences of migrants themselves or later generations.

Recommended Preparation: JCI250H1/ ITA233H1

Breadth Requirements: Society and its Institutions (3)

ITA358Y0 - Modern Italian Culture

Hours: 24L/24T

Analysis of a selection of philosophical, artistic, musical, and literary works from the age of the Baroque to the present. The main topics of discussion include: Romanticism, Italian unification, theatre, opera, Futurism, fascism, Neorealism, regional differences, and industrialization. Field trips and viewing of movies included. This course includes a component designed to

enhance students' research experience. (Offered in Siena only)

ITA358Y0: This course is taught in English and is open to students from other disciplines.

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

ITA359Y0 - Modern Italian Culture

Hours: 24L/24T

Analysis of a selection of philosophical, artistic, musical, and literary works from the age of the Baroque to the present. The main topics of discussion include: Romanticism, Italian unification, theatre, opera, Futurism, fascism, Neorealism, regional differences, and industrialization. Field trips and viewing of movies included. This course includes a component designed to enhance students' research experience. (Offered in Siena only)

ITA359Y0: Students who wish to petition the Department for credit towards a Specialist or Major in Italian will be required to do the readings in Italian.

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

ITA360H1 - Italian Linguistics

Hours: 24L

For students having a knowledge of Italian and/or Italian dialects but no background in linguistics. Concepts of general linguistics. Italy as a linguistic entity. The structure of contemporary Italian, with special regard to its sound system and grammatical categories. This course includes a component designed to enhance students' research experience. (Given in English)

Prerequisite: ITA250Y1/ ITA251Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

ITA363H1 - Italian Sociolinguistics

Hours: 24L

Starting with a survey of the sociolinguistic situation in Italy before Unification, this course deals with the complex relationship between regional languages and dialects on the one hand and Common Italian on the other. The recent rise of regional variants of Italian and its impact on

the dialects are also discussed. This course includes a component designed to enhance students' research experience.

Prerequisite: [ITA250Y1/ ITA251Y1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

ITA364H1 - Italian and Social Media

Hours: 24L

The aim of this course is to examine how media can influence the evolution of language in contemporary Italy. The first part of this course has an historical goal and will be devoted to the role played by 'traditional' media (television, radio, newspapers) in the linguistic history of Italian. The second part will be devoted to the impact that social media is having on Italian. Empirical quantitative research will be based on the most important databases for contemporary Italian.

Prerequisite: [ITA250Y1/ ITA251Y1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

ITA367H1 - Topics in Italian Linguistics

Hours: 2L

An open course that explores specific aspects of Italian Linguistics. This course includes a component designed to enhance students' research experience. (Given in English)

Prerequisite: [ITA250Y1/ ITA251Y1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

ITA378H1 - Topics in Italian Studies

Hours: 24L

An open course that explores specific aspects of Italian Studies. This course includes a component designed to enhance students' research experience. (Given in English)

Breadth Requirements: Creative and Cultural Representations (1)

ITA379H1 - Topics in Italian Studies

Hours: 24L

An open course that explores specific aspects of Italian Studies. This course includes a component designed to enhance students' research experience.

Prerequisite: [ITA250Y1/ ITA251Y1/ ITA252Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

ITA380H1 - The Prose of the World: The Modern Italian Novel and the Realist Tradition

Hours: 24L

This course examines the development of modern Italian novel by taking as its focus the question of the relationship between narrative and the world. The course analyzes some of the major figures of Nineteenth-Century realist tradition such as Manzoni and Verga, as well as the resurgence of realist narrative in the post-World War II period with authors such as Pavese and Calvino. This course includes a component designed to enhance students' research experience. (Given in English)

Breadth Requirements: Creative and Cultural Representations (1)

ITA390H1 - The Commedia dell'Arte

Hours: 24L

A study of the conventions of the Commedia dell'Arte tradition in the context of its performance history from the late Renaissance to the present. Issues examined include acting techniques, improvisation, masks and costumes, iconography and adaptation to film. This course includes a component designed to enhance students' research experience. (Given in English)

Breadth Requirements: Creative and Cultural Representations (1)

ITA395Y0 - Special Topics in Italian Studies

Hours: 48S

The area of concentration will depend upon the instructor teaching the course in any given year. (Offered only during the summer through the Summer Abroad Program.) Not available for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

ITA398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

ITA398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

ITA399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

ITA399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

ITA400H1 - Machiavelli

Hours: 24S

An intensive study of Machiavelli's major works in English translation, including his political treatises (*The Prince*, excerpts from *The Discourses*), plays (*The Mandrake Root*), letters, and short story (*Belfagor*), in the context of Renaissance Florence, the history of Machiavelli criticism, and modern ethical debates. This course includes a component designed to enhance students' research experience. (Given in English)

Prerequisite: Completion of 10.0 credits
Breadth Requirements: Thought, Belief and Behaviour (2)

ITA410H1 - Masterpieces of Modern Drama

Hours: 24L

This course will study works by the major Italian playwrights of the Twentieth Century, including two of Italy's Literature Nobel Prize winners, Luigi Pirandello and Dario Fo. Particular attention will be paid to the relationship between individual works and broader literary and cultural movements, as well as to issues regarding staging and production of the plays under discussion. The course includes a component designed to enhance students' research experience.

Prerequisite: [ITA250Y1](#) / [ITA251Y1](#), and at least 0.5 credit in ITA literature courses at the 300-level
Breadth Requirements: Creative and Cultural Representations (1)

ITA420H1 - Spinning a Tale: The Italian Short Story from Boccaccio to Basile

Hours: 24L

The short story genre and its development from the Middle Ages to the Baroque. In addition to Boccaccio's tales, included are some of the most famous stories of Western literature, which later inspired masterpieces in all art forms, such as *Romeo and Juliet*, *Othello* and *Puss in Boots*. This course includes a component designed to enhance students' research experience.

Prerequisite: [ITA250Y1](#) / [ITA251Y1](#), and at least one 0.5 credit ITA literature course at the 300-level
Breadth Requirements: Creative and Cultural Representations (1)

ITA421H1 - Spinning a Tale: The Italian Short Story after 1800

Hours: 24L

Focusing on short stories by some of the most important authors of the Twentieth Century, such as Pirandello and Calvino, this course will provide an introduction to the major tendencies of contemporary Italian literature. This course includes a component designed to enhance students' research experience.

Prerequisite: [ITA250Y1](#) / [ITA251Y1](#), and at least one 0.5 credit ITA literature course at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

ITA425H1 - Special Topics in Italian Studies

Hours: 24L

A course on specific topics in Italian Studies, designed for advanced students. This course includes a component designed to enhance students' research experience. (Given in English)

Prerequisite: Completion of 7.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ITA426H1 - Special Topics in Italian Studies

Hours: 24L

A course on specific topics in Italian Studies, designed for advanced students. This course includes a component designed to enhance students' research experience.

Prerequisite: [ITA250Y1](#)/ [ITA251Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

ITA427H1 - Special Topics in Italian Linguistics

Hours: 24L

A course on specific topics in Italian Linguistics, designed for advanced students. This course includes a component designed to enhance students' research experience.

Prerequisite: [ITA250Y1](#)/ [ITA251Y1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

ITA431H1 - History of Italian Language I- from Middle ages to Cinquecento

Hours: 24L

An historical overview of the Italian language from the first Medieval documents to the texts of the *Questione della Lingua*. It deals with historical grammar and the analyses of early Italian texts. An introduction to notions of linguistic

statistics. Empirical quantitative methods are based on the three most important databases of old Italian: TLIO, OVI, BIZ. This course includes a component designed to enhance students' research experience.

Prerequisite: [ITA250Y1](#)/ [ITA251Y1](#)

Exclusion: [ITA430H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

ITA432H1 - History of Italian Language II- from Cinquecento to Contemporary

Hours: 24L

The evolution of the Italian Language from the *Questione della lingua* to Contemporary issues pertaining to reading of literary and non-literary documents and analyses of the social, political and economic conditions which influenced Early Modern, Modern and Contemporary Italian. Introduction to techniques pertaining to notions of linguistic statistics. Quantitative methods will be based on the three most important databases for the Early modern, Modern and Contemporary Italian: *Vocabolario della Crusca* (online), BaDIP and BIZ. This course includes a component designed to enhance students' research experience.

Prerequisite: [ITA250Y1](#)/ [ITA251Y1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

ITA433H1 - Italian Language and Italian Dialects in Toronto

Hours: 24L

Through an historical overview of Italian immigration in Toronto, the role of Italian and Italian dialects in the city will be examined. As part of the topic studied in course, students will contribute to the website of the OIM by collecting varied forms of empirical linguistic evidence.

Prerequisite: [ITA250Y1](#)/ [ITA251Y1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

ITA441H1 - Italian Cinematic Adaptation

Hours: 24L

An analysis of the process of adaptation in an exploration of the ideological and narratological perspectives as well as the stylistic elements of literary and cinematic discourse. Selections include novels by Verga, Tomasi di

Lampedusa, Moravia, Bassani and their filmic adaptations by directors such as Visconti, De Sica, Bertolucci. This course includes a component designed to enhance students' research experience. (Given in English)

Recommended Preparation: One of: [ITA240Y1](#)/[ITA340H1](#)/[ITA341H1](#)/[ITA347H1](#). Knowledge of Italian recommended

Breadth Requirements: Creative and Cultural Representations (1)

ITA445H1 - Literature of the Italian Diasporas

Hours: 24L

This course examines works by writers of Italian descent, focusing on themes linked to the second-generation experience, such as intergenerational conflict, gender relations, the return journey, and the quest for identity. The comparative approach of this investigation will bring within the same framework the diasporic literatures of Canada, the United States, Argentina, Brazil, Australia, and of other countries. (Texts available in English and in their original language). This course includes a component designed to enhance students' research experience. (Given in English)

Recommended Preparation: [ITA233H1](#)/[ITA345H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

ITA450H1 - Advanced Italian

Hours: 36S

This advanced-level course is designed to provide students with further study of the Italian language and culture with emphasis on varied methods of expression. This course will improve students' oral and written communication skills.

Prerequisite: [ITA350Y1](#) / [ITA351Y1](#)

Exclusion: [ITA451H1](#)/[ITA452H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

ITA453H1 - At the Movies: History and Practice of Italian Film Criticism

Hours: 24S

This course will provide students with a blend of history, methodology, and practice of Italian film criticism. The first module will survey the primary trends and methodological

developments in the long history of Italian film criticism, from the days of silent cinema to the most recent changes caused by online platforming. The second module will offer students the opportunity to write their own criticism, and to collaborate with Italian online film magazines. Given in Italian.

Prerequisite: At least 1.0 credit from [ITA240Y1](#), [ITA340H1](#), [ITA341H1](#), or CIN courses, ([ITA350Y1](#)/[ITA351Y1](#))

Breadth Requirements: Creative and Cultural Representations (1)

ITA455H1 - Women Writers in Italy

Hours: 24L

The course will focus on the writings of women in different periods of Italian history. Spanning a variety of genres, from the novel to autobiography, from poetry to essayism, the course will discuss various aspects of the debate regarding the changing roles of women in society. This course includes a component designed to enhance students' research experience.

Prerequisite: [ITA250Y1](#)/[ITA251Y1](#), and at least one 0.5 credit ITA literature course at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

ITA460Y1 - Internship in Italian

Hours: 48P

Opportunity to apply acquired knowledge in a work placement environment. The placement will take place in local community organizations, Private Business Associations and local media.

Prerequisite: [ITA350Y1](#)/[ITA351Y1](#)/[ITA352Y1](#) or [ITA371Y1](#)

Corequisite: Must be enrolled in 4th year. 3.0 CGPA required. Departmental interview.

ITA489H1 - Independent Studies

An opportunity to pursue at the 400-level an independent course of study not otherwise available. A written proposal, co-signed by the instructor, must be submitted on the appropriate proposal form for approval by the Department of Italian Studies. Application deadline: April 30 for F courses, November 30 for S courses.

Prerequisite: Permission of Department

ITA490Y1 - Independent Studies

In exceptional circumstances, students may request to pursue at the 400-level an independent course of study not otherwise available. A written proposal, co-signed by the instructor, must be submitted on the appropriate proposal form for approval by the Department of Italian Studies. Application deadline April 30.

Prerequisite: Permission of Department

ITA495H1 - Directed Research

Based on a professor's research project currently in progress, this course will enable an undergraduate student to play a useful role in the project while receiving concrete training in research. This course is mandatory for all students enrolled in the specialist's program.

Prerequisite: Permission of Department

ITA496H1 - Research Methods

This course, linked to the instructor's research project, will provide training in a variety of research methods. This course includes a component designed to enhance students' research experience.

Prerequisite: Permission of Department

Ayelet Kuper (Temerty Faculty of Medicine, Department of Medicine)

LIBRARIAN

Nadav Sharon (Judaica Librarian at the Thomas Fisher Rare Book Library)

Our undergraduate program provides students with a comprehensive education in Jewish Studies, a field that aims to situate the cultural, social, and economic diversity of the Jews and their faith within broader cultural contexts. Students who take our courses are trained in various methodological and disciplinary approaches across historical periods, geographical regions, textual corpora, and literary genres. Consequently, our students are pursuing education in Jewish history (ancient, medieval, modern, and contemporary), Jewish literary and artistic creativity, and Jewish languages (mainly Modern Hebrew, Biblical Hebrew, and Yiddish) but also about Judaism, Jewish thought, theology, philosophy, mysticism, and modern Israel.

The program is interdisciplinary, each student can pick and choose courses that broaden their disciplinary knowledge. The program provides intensive training in the historical, religious, cultural, and political experience of Jewish communities in their diverse civilizational contexts. A primary objective of our three undergraduate programs in Jewish studies has been to provide students with forward-thinking tools to shape their interaction with and understanding of questions through Jewish prisms while at the same time encouraging them to think with the potentialities found in the Jewish historical experience. We teach students how to use a variety of methodologies to explore the experiences of Jews through interdisciplinarity, transnationally, historically, and contemporarily.

We offer the following pathways in Jewish Studies:

- Jewish Philosophy and Thought
- Jewish History
- Jewish Visual Art and Archeology
- Jewish Literature and Culture
- Origins of Judaism/Hebrew Bible Studies
- German Jewish Studies
- Antisemitism Studies
- Jewish Christian Encounters
- Yiddish Studies
- Modern Hebrew Culture
- Israel Studies
- Holocaust and post-Holocaust Studies
- European Jewish Studies
- Jewish Environmentalism
- Jewish-Muslim Relations
- Sephardi and Middle Eastern Jewish Studies
- Gender, Women, Queer and Sexuality and Jewish Studies

For more information, we encourage students to visit our website and contact us at any time by email or phone:

Introduction

The Anne Tanenbaum Centre for Jewish Studies offers a Specialist in Jewish Studies, a Major in Jewish Studies, and a Minor in Jewish Studies.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Jewish Studies programs impacted by this policy: [ASSPE0385](#), [ASMAJ0385](#), and [ASMIN0385](#)

Centre for Jewish Studies Programs

Jewish Studies Specialist (Arts Program) - ASSPE0385

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(10.0 credits, including 4.0 credits at the 300+ level, of which 1.0 credit must be at the 400-level)

1. [CJS200H1](#)/ [CJS201H1](#) (See Note)
2. 1.0 credit at the 400-level; fulfilled by any 400-level courses listed in the [Centre for Jewish Studies Undergraduate Course Handbook](#).
3. 3.0 credits in Hebrew or Yiddish:

Hebrew language courses: [MHB155H1](#)/ [MHB156H1](#)/ [MHB255H1](#)/ [MHB256H1](#)/ [MHB355H1](#)/ [MHB356H1](#)/ [NML155H1](#)/ [NML156H1](#)/ [NML255H1](#)/ [NML256H1](#)/ [NML355H1](#)/ [NML356H1](#)

Yiddish language courses: [GER260Y1](#)/ [GER261H1](#)/ [GER262H1](#)/ [GER360H1](#)/ [GER460H1](#)/ [GER463Y1](#).

Students entering the program with proof of requisite linguistic proficiency in Aramaic, Hebrew, Yiddish will choose any 3.0 credits in an area of study (see above) in addition to the regular requirements described in section 4. Other languages are accepted with special permission of the Undergraduate Director.

4. 5.0 credits in any of the four areas of Jewish Studies. All courses in the [Centre for Jewish Studies Undergraduate Course Handbook](#) count towards this requirement.

5. Note: From section 3 and 4, at least 4.0 credits at the 300+ level.

6. [DTS300H1](#) or a 0.5 credit to satisfy the Quantitative Reasoning competency of the program, to be chosen from courses in the [Centre for Jewish Studies Undergraduate Course Handbook](#) developing this competency. If none is available, a 0.5 credit from Breadth Requirement Category #5: The Physical & Mathematical Universe, or a 0.5 credit approved by the Undergraduate Director.

Note: There are no specific first-year requirements; however, first-year students are welcome to take [CJS200H1](#), [CJS201H1](#), Hebrew Language courses ([MHB155H1](#) and [MHB156H1](#)) and Yiddish ([GER260Y1](#) or [GER261H1](#) and [GER262H1](#)), which count towards the Jewish Studies Specialist.

Jewish Studies Major (Arts Program) - ASMAJ0385

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(6.5 credits, including 2.0 credits at the 300+ level, of which a 0.5 credit must be at the 400-level)

1. [CJS200H1](#)/ [CJS201H1](#) (See Note)
2. 0.5 credits at the 400-level; fulfilled by any 400-level courses listed in the [Centre for Jewish Studies Undergraduate Course Handbook](#).

3. 5.0 credits in any of the four areas of Jewish Studies. All courses in the [Centre for Jewish Studies Undergraduate Course Handbook](#) count towards this requirement. At least 2.0 out of the 5.0 credits must be at the 300+ level.

4. [DTS300H1](#) or a 0.5 credit to satisfy the Quantitative Reasoning competency of the program, to be chosen from courses in the [Centre for Jewish Studies Undergraduate Course Handbook](#) developing this competency. If none is available, a 0.5 credit from Breadth Requirement Category #5: The Physical & Mathematical Universe, or a 0.5 credit approved by the Undergraduate Director.

Note: There are no specific first-year requirements; however, first-year students are welcome to take [CJS200H1](#), [CJS201H1](#), Hebrew Language courses ([MHB155H1](#) and [MHB156H1](#)), and Yiddish ([GER260Y1](#) or [GER261H1](#) and [GER262H1](#)), which count towards the Jewish Studies Major.

Jewish Studies Minor (Arts Program) - ASMIN0385

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, including 1.0 credit at the 300+ level)

1. CJS200H1/ CJS201H1 (See Note)

2. 3.5 credits in any of the four areas of Jewish Studies. All courses in the Centre for Jewish Studies Undergraduate Course Handbook count towards this requirement. 1.0 out of the 3.5 credits must be at the 300+ level.

Note: There are no specific first-year requirements; however, first-year students are welcome to take CJS200H1, CJS201H1, and Hebrew Language courses (MHB155H1 and MHB156H1) and Yiddish Language courses (GER260Y1 or GER261H1 and GER262H1), which count towards the Jewish Studies Minor.

Centre for Jewish Studies Courses

CJS200H1 - Introduction to Jewish Thought

Hours: 24L

A balanced presentation of the multifaceted approach to the discipline by treating Jewish religion and thought. The course introduces students not only to a chronological and thematic overview of the subject, but also to different methodological approaches.

Breadth Requirements: Thought, Belief and Behaviour (2)

CJS201H1 - Introduction to Jewish Cultures

Hours: 24S

General introduction to history, literatures and cultures of Jewish people from antiquity to contemporary. A balanced presentation of multi-disciplinary approaches and multi-methodological approaches to Jewish studies, with a special emphasis on Jewish cultural studies and Jewish secularity.

Breadth Requirements: Creative and Cultural Representations (1)

CJS205H1 - People of the Books: The Classics of Jewish Literature

Hours: 24L

This course introduces some of the most influential and evocative books of the Jewish tradition. Students will explore how these books reflect central themes of Jewish history and questions about Judaism, Jewish life, and Jewish identity. Possible texts include excerpts from the Bible, Midrash, Talmud, Zohar and Lurianic kabbalah, Maimonides' Mishneh Torah and responsa, the poetry and trickster tales of the Takhkemoni, the autobiographies of Leon of Modena and Solomon Maimon, the travelogues of Haim Azulai and Hayyim Habshush, and the tales of Rabbi Nachman of Bratslav.

This course will delve into the historical contexts of each of the books and analyze both how they reflect the concerns of the particular communities that produced them and how they helped to shape future Jewish communities worldwide. Through close reading and discussion, participants will gain insight into the Jewish literary heritage. All readings will be given in English.

Breadth Requirements: Society and its Institutions (3)

CJS207H1 - The Jewish Life Cycle

Hours: 24L

This course introduces the events and rituals that demarcate key moments in Jewish lives including birth, coming-of-age, marriage, and death. Through close textual analysis, we will explore the historical development of Jewish life cycle rituals and how they sometimes shifted in meaning over time. We will explore these rituals as they developed among Jewish communities living in both the Christian and Islamic worlds. Special attention will be paid

to how these rituals reflect attitudes towards gender and how they have been shaped in response to the presence of the majority non-Jewish culture, so as to adapt and adopt attractive ideas and respond to the threats and temptations the majority culture posed. By the end of the course, students will have developed a rich understanding of the diversity within Jewish traditions and the complex interplay between ritual and interpersonal religious law, and between individual, familial and communal forms of religious practice.

Breadth Requirements: Society and its Institutions (3)

CJS220H1 - The Holocaust in Fiction

Hours: 24S

The course examines literary works written in different languages, in ghettos and concentration camps during the Holocaust, as well as those reflecting on the genocide in its aftermath. We focus on literature as a means of engaging with the unimaginable and on the cross analysis of eye-witness and memory writing.

Recommended Preparation: CJS201H1

Breadth Requirements: Creative and Cultural Representations (1)

CJS230H1 - God, Nation, and Self Transformed: The Secularization of the Jewish Experience

Hours: 24S

The course provides a theoretical background to the issue of secularization and examines the diverse attempts to define on a secular basis the Jew, the Jewish nation, and the Jewish God since the breakdown of traditional Jewish society. A variety of Jewish secularisms are examined in a larger, non-Jewish context.

Recommended Preparation: CJS200H1

Breadth Requirements: Thought, Belief and Behaviour (2)

CJS290H1 - Topics in Jewish Studies

Hours: 24L/24T

An examination of issues in Jewish Studies. Content in any given year depends on instructor.

CJS301H1 - Community

Hours: 24L

Ethno-religious groups like Jewry or the Jews are not merely aggregates of individuals but rather collectives whose members are bound to each other in a common historical identity, life, and fate. To understand any such group, we must therefore understand what binds these people together into a community, why the burdens and benefits or responsibilities and resources of the community are distributed among its members as they are, and both how and how well internal conflicts are managed. This course considers the ways in which the Jewish community -- in its local and global guises -- has reflected upon and dealt with these issues in classical and contemporary contexts.

Breadth Requirements: Thought, Belief and Behaviour (2)

CJS320H1 - Jews in the Modern World

Hours: 24L

Jews of all sorts today are the product of historical processes that have changed the place of religion in their lives, their intellectual and moral outlook, their political standing and aspirations, their social relations and opportunities, and their means and modes of culture expression. In this course, we will try to understand the forces and counterforces as well as the decisions and reactions that determine ways of being Jews in the modern world.

Recommended Preparation: 4.0 credits in any area

Breadth Requirements: Thought, Belief and Behaviour (2)

CJS325H1 - Authority in Judaism

Hours: 24L

Why should Jews obey God's commands? Does Judaism understand the relation of God's rule over His people to the sovereign's rule over his? Why and to what extent do Jews respect the decisions of rabbis, and how do the rabbis enforce their decision when their power to coerce compliance is limited? What force do prophetic criticisms of the people's religious and moral failings have? All of these are question of authority discussed in Judaism until today, and we will explore them together in this course.

Recommended Preparation: 4.0 credits in any area.

Breadth Requirements: Thought, Belief and Behaviour (2)

CJS330H1 - Who's a Jew? Theory, Myth, and Practice

Hours: 24L

This course introduces students to the host of core concepts in terms of which Jewish identity has been and continues to be defined and debated. Topics include: the difference between insiders and outsiders; collective vs individual identity; the nature of the bond between group members; identification across time, space, and disagreements; social and gendered hierarchies; joining and leaving the group; the identities of outsiders.

Exclusion: CJS290H1 (Topics in Jewish Studies: Who is a Jew?), offered in Fall 2014 and Fall 2015

Recommended Preparation: CJS200H1 or CJS201H1

Breadth Requirements: Thought, Belief and Behaviour (2)

CJS331H1 - Encounters between Jewish and Modern Thought

Previous Course Number: CJS430H1

Hours: 24L

A detailed exploration of how Jewish thought develops in relationship to key figures or moments in modern European philosophy (e.g., Spinoza, Kant, Hegel, Kierkegaard, Marx, Nietzsche, Heidegger). The particular focus varies from year to year.

Prerequisite: 4.0 credits

Recommended Preparation: CJS200H1

Breadth Requirements: Thought, Belief and Behaviour (2)

CJS340H1 - Mizrahim in Israel: History, Politics, and Culture

Hours: 24L

What is the significance of the designation “Mizrahi” in Israel today? Does it refer to people who share a common geographical and ethnic origin or does it indicate a shared worldview that draws upon Middle Eastern Arabic culture? What are its relations with other terms, such as “Sephardi,” “Oriental,” or “Levantine”? What kind of political membership does it entail? Does it possess a certain cultural, religious, or political vocabulary? And, ultimately, does the diasporic concept of “Mizrahiyut” (mizrahiness) undermine national homogeneity or rather facilitate and enable its enforcement?

Exclusion: CJS390H1 (Special Topics in Jewish Studies: Mizrahim in Israel: History, Politics, and Culture), offered

in Summer 2017

Recommended Preparation: CJS201H1

Breadth Requirements: Society and its Institutions (3)

JGJ360H1 - Holocaust in Literature (E)

Hours: 24S

This course examines literary works written in different languages, in ghettos and concentration camps during the Holocaust, as well as those reflecting on the genocide in its aftermath. We focus on literature as a means of engaging with the unimaginable and on the cross analysis of eye-witness and memory writing.

Prerequisite: Completion of 4.0 credits

Exclusion: CJS220H1, GER367H1

Breadth Requirements: Creative and Cultural Representations (1)

JJH370H1 - Soviet Jewish History, Culture, and Diaspora

Hours: 24L

The course examines history, culture and diaspora of Russian-speaking Jews in the 20th and 21st century. We will discuss how Jews experienced Russian Revolutions of 1917, Stalinism, Soviet Great Terror of 1937, World War II and the Holocaust, post-war challenges, the “Thaw” of the 1960s, “Stagnation of the 1980s”, Dissident movement, Perestroika, collapse of the Soviet Union and the development of post-Soviet diasporas. We will read works by both Soviet Jewish authors, including Vassily Grossman, Shira Gorshman, Isaac Babel, Rivka Levin and post-Soviet ones, such as David Bezmozgis, Lara Vapnyar and Boris Fishman, study artifacts of anti-religious propaganda such as Red Passover Celebration scripts, discuss oral histories of Soviet Jews, read scripts of Yiddish theater performances (in English translation), and scrutinize (and maybe even try) recipes of Soviet Jewish food. No prior knowledge is required, but if you took a course on European history or Jewish history, it will be an asset.

Prerequisite: Completion of 4.0 credits.

Exclusion: CJS391H1 (*Soviet Jewish History, Culture, and Diaspora*), offered in Fall 2024.

Recommended Preparation: CJS201H1 or HIS208Y1

Breadth Requirements: Society and its Institutions (3)

CJS383H1 - Jews and Power

Hours: 24L

This course will explore the relationship of Jews to political power. Among the themes to be covered are: How has the relationship of the Jewish community to political authority changed over time? What is the Jewish conception of political authority? How did Jews protect their communal and individual rights in the absence of sovereignty? How did the dynamics of antisemitism, philosemitism, and anti-Jewish violence change over time? How did Zionism and the revival of Jewish sovereignty change the position of Jews in the political order? What are the political and moral dilemmas posed by statehood? And what are the implications of Jewish sovereignty for Jews in the Diaspora?

Prerequisite: POL101Y1 or CJS200H1 or CJS201H1

Exclusion: POL383H1

Breadth Requirements: Society and its Institutions (3)

CJS389H1 - Jewish Secularism and Messianic Thought: From Spinoza to Derrida

Hours: 24S

This course examines the critical role that Messianic thought plays in the emergence of modern Jewish secular thought. A study of the secular dimension of Messianism in the writings of Jewish philosophers, from Spinoza to Derrida, leading to the larger question of its place in the project of Jewish modernity.

Recommended Preparation: CJS200H1

Breadth Requirements: Thought, Belief and Behaviour (2)

CJS390H1 - Special Topics in Jewish Studies

Hours: 24L

An examination of issues in Jewish Studies. Content in any given year depends on instructor.

Prerequisite: Completion of at least 4.0 credits.

CJS391H1 - Special Topics in Jewish Studies

Hours: 24L

An examination of issues in Jewish Studies. Content in any given year depends on instructor.

Prerequisite: Completion of at least 4.0 credits.

CJS392H1 - Special Topics in Jewish Studies

Hours: 24L

An examination of issues in Jewish Studies. Content in any given year depends on instructor.

Prerequisite: Completion of at least 4.0 credits.

CJS396H1 - Independent Study

A scholarly project on an approved topic supervised by a faculty affiliated with the Centre for Jewish Studies. For details, please visit [the ATCJS webpage on Independent Studies Courses](#). Not eligible for CR/NCR option.

Prerequisite: CJS200H1 or CJS201H1, and permission from the CJS Undergraduate Director. For instructions on how to enrol in this course, please visit the ATCJS webpage on Independent Studies Courses: <https://www.jewishstudies.utoronto.ca/undergraduate/curriculum-course-i...>

Recommended Preparation: At least 2.0 credits in Jewish Studies courses (this can include courses listed in the CJS Undergraduate Handbook)

CJS400H1 - Research Seminar in Jewish Studies

Hours: 24S

An interdisciplinary seminar in which Jewish Studies topics are explored intensively, culminating in a major research paper by each student. Not eligible for CR/NCR option.

Prerequisite: CJS200H1 or CJS201H1; permission of the instructor/program

CJS401H1 - Identity & Conflict

Previous Course Number: CJS401Y1

Hours: 24L

A well-known saying "two Jews, three opinions" captures succinctly just how ubiquitous conflicts and disagreements are in Jewish life. These contestations are indeed not only common but also deep: they run all the way down to very foundations of Jewish identity, to questions of who belongs to and who should be excluded from the community. This course looks at some historical and

current conflicts that have fundamentally divided Jew from Jew as well as various responses to such conflicts from within the Jewish tradition, asking why some conflicts are managed successfully while others aren't and how the answer to that question might be applicable within the groups to which we each belong. Not eligible for CR/NCR option.

Prerequisite: CJS200H1 or CJS201H1 and at least two other 0.5 credit courses in Jewish Studies. Students who do not meet the requirement are encouraged to contact the instructor.

Exclusion: CJS401Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

CJS440H1 - The Arab Jew: A History of a Concept

Hours: 24L

This course invites students to explore the debates around the term "Arab Jews." A cultural, historical, and historiographical designation, the term encompasses a range of experiences for Arabic-speaking Jews. These Jews lived in diverse cultural worlds across the Middle East and North Africa, where they developed deep and enduring relationships with non-Jews, and were instrumental in shaping local, regional and national cultures and politics. By engaging with the term "Arab Jews" in its various incarnations, the course offers new perspectives on questions of Zionism and nationalism, colonialism and geography, religion and secularization, as well as historiography and memory.

Exclusion: CJS491H1 (Advanced Topics in Jewish Studies: The Arab Jew: A History of a Concept), offered in Winter 2017

Recommended Preparation: CJS201H1

Breadth Requirements: Creative and Cultural Representations (1)

CJS444H1 - Topics in the Study of Antisemitism

Hours: 24L

This seminar explores in depth one of the many theoretical or methodological issues that confront scholars of antisemitism. Possible topics include: definitions of antisemitism and their purposes; philosemitism and its conceptual and real connection with antisemitism; Jewish self-hatred; contextualist vs eternalist accounts of antisemitism; classic and contemporary theories of antisemitism.

Recommended Preparation: RLG344H1

Breadth Requirements: Thought, Belief and Behaviour (2)

CJS490H1 - Advanced Topics in Jewish Studies

Hours: 24S

An in-depth investigation of topics in Jewish Studies. Content in any given year depends on instructor.

Prerequisite: Permission of the instructor/program

CJS491H1 - Advanced Topics in Jewish Studies

Hours: 24S

An in-depth investigation of topics in Jewish Studies. Content in any given year depends on instructor.

Prerequisite: Permission of the instructor/program

CJS498Y1 - Independent Study

A scholarly project on an approved topic supervised by a faculty affiliated with the Centre for Jewish Studies. For details, please visit [the ATCJS webpage on Independent Studies Courses](#). Not eligible for CR/NCR option.

Prerequisite: CJS200H1 or CJS201H1, and permission from the CJS Undergraduate Director. For instructions on how to enrol in this course, please visit the ATCJS webpage on Independent Studies Courses: <https://www.jewishstudies.utoronto.ca/undergraduate/curriculum-course-i...>

CJS499H1 - Independent Study

A scholarly project on an approved topic supervised by a faculty affiliated with the Centre for Jewish Studies. For details, please visit [the ATCJS webpage on Independent Studies Courses](#). Not eligible for CR/NCR option.

Prerequisite: CJS200H1 or CJS201H1, and permission from the CJS Undergraduate Director. For instructions on how to enrol in this course, please visit the ATCJS webpage on Independent Studies Courses: <https://www.jewishstudies.utoronto.ca/undergraduate/curriculum-course-i...>

Laboratory Medicine and Pathobiology

Faculty List

Professor and Chair of the Department

R. Kandel, MD (Professor and Chair)

Associate Chair, Undergraduate Life Science Education

 L. Yuan, PhD, FACMG
 S. Yuzwa, PhD

Lecturer

P. Kim, MD

Introduction

The Department of Laboratory Medicine and Pathobiology provides a bridge between the basic sciences and medicine. Investigating the molecular mechanisms of disease is an important priority of the department. Faculty are concerned with the biochemical changes that may be associated with cell and tissue injury and with the etiology, pathogenesis and behaviour of disease. Research is carried out in such areas as cardiovascular disease, immunopathobiology, neuropathology, endocrinology and metabolism, neoplasia, bone and connective tissue disease, clinical and molecular epidemiology, antibiotic resistance, and molecular pathogenesis of infectious disease.

The Pathobiology Specialist program gives students a broad understanding of contemporary medical research and basic scientific insights that have revolutionized our understanding of disease in recent years. Aspects of biochemistry, chemistry, cellular and molecular biology, and genetics are brought to bear upon human pathology. Graduates from the program will frequently pursue graduate studies in medical research and eventual research careers in academic, industrial, pharmaceutical, or governmental laboratories. A knowledge of cellular and molecular mechanisms of disease processes is also useful in a wide variety of multidisciplinary careers in government, regulatory agencies, law, and environment.

Associate Chair, Undergraduate Life Science Education:
 Dr. Jeffrey Lee (Imp.undergradcoordinator@utoronto.ca)

Undergraduate Office/General inquiries:
 Louella D'Cunha (Imp.undergrad@utoronto.ca; Medical Sciences Building, Room 6209; 416-946-0136)

More information is available on our website:
<https://Imp.utoronto.ca/undergraduate>

Consult the [Arts & Science Specialist Program in Pathobiology website](#) for additional contact information aimed at specific LMP courses.

Laboratory Medicine and Pathobiology Programs

Pathobiology Specialist (Science Program) - ASSPE2025

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade or Variable Minimum Grade Average

A minimum grade/minimum grade average in required courses or their equivalents is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1 and CHM136H1)/ CHM151Y1
- (MAT135H1 and MAT136H1)/ MAT137Y1/
MAT157Y1

The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at imp.undergrad@utoronto.ca and provide your student number.

Please consult the [Arts & Science Program Toolkit](#) for program enrolment information.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and there are program-specific year 3 entry enrolment requirements. Students applying for Year 3 entry must have been admitted to the Pathobiology Specialist in the Summer after Year 2.

Completion Requirements:

(14.0-15.5 credits, including at least 2.0 credits at the 400-level)

First Year:

- BIO120H1, BIO130H1
- (CHM135H1, CHM136H1)/ CHM151Y1
- (MAT135H1, MAT136H1)/ MAT137Y1/
MAT157Y1

First or Second Year:

- (PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1)

Second Year:

- BCH210H1
- BIO230H1
- BIO260H1/ HMB265H1
- CHM220H1
- CHM247H1/ CHM249H1
- PSL300H1, PSL301H1
- STA288H1/ STA220H1/ BIO220H1
- LMP200H1

Third Year:

- BCH370H1, BCH311H1
- LMP310H1, LMP320H1, LMP330H1

Choose one of the options below:

- Option A: Immunology: (IMM341H1, IMM351H1)
- Option B: Microbiology: (MGY377H1, MGY378H1)
- Option C: Anatomy: ANA300Y1
- Option D: Metabolic and Signaling Pathways: PSL425H1 and PCL386H1
- Option E: Research: LMP305Y1 and one of the above four options

Fourth Year:

Students should choose four of the following 400-level courses (2.0-2.5 credits):

- LMP405Y1, LMP410H1, LMP415H1, LMP420H1,
LMP430H1, LMP440H1, LMP450H1, LMP460H1

Note: If the research course LMP405Y1 is taken, an additional three 400-level courses from the list are still required (totalling 2.5 credits).

Laboratory Medicine and Pathobiology Courses

LMP200H1 - Pathobiology of the Cell

Previous Course Number: LMP340H1

Hours: 24L/12T

This course builds on concepts in cellular pathobiology to develop an advanced understanding of the function and dynamics of the cell in the context of health and disease. Concepts in cell injury, cell adaptation, migration, cell stress, cell survival, cell death, oxidative stress, endocytosis, ion homeostasis, protein folding, and their implications for disease are covered.

Prerequisite: BIO230H1, PSL300H1; enrolment is limited to students in the Pathobiology Specialist program

Exclusion: LMP301H1, LMP363H1, LMP340H1

Recommended Preparation: BCH210H1

Breadth Requirements: Living Things and Their Environment (4)

LMP299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

LMP299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

LMP301H1 - Introduction to the Biochemistry of Human Disease

Hours: 24L

Introduces concepts and mechanisms of disease processes as they arise from disturbances of normal biochemical and physiological functions. The rational use of the clinical biochemistry laboratory in the diagnosis and

management of disease is explained. Not intended for students in the Pathobiology Specialist program.

Prerequisite: BCH210H1/ BCH242Y1

Exclusion: LMP310H1, LMP320H1

Recommended Preparation: PSL201Y1/ PSL300H1/ PSL301H1

Breadth Requirements: Living Things and Their Environment (4)

LMP305Y1 - Pathobiology Research Analysis and Project

Hours: 24L/100P

This course is designed to introduce third-year students to biomedical research, and to provide them with the analytical skills required to be a successful scientist. Students will have the opportunity to carry out a full-year research project under the supervision of an LMP faculty member (6-8 hours/week in lab). A lecture component will cover laboratory practice, experimental design, basic logic/argument, statistics, data analysis and scientific communication. The fundamentals taught in these lectures will be used to critique and analyze scientific literature. This course is recommended for students with a general interest in research and especially to students who will conduct additional research projects as part of the LMP summer research program and/or the LMP405Y1 fourth-year research project course.

Prerequisite: STA288H1/ STA220H1, BCH210H1, BIO230H1 Students are required to secure an LMP supervisor. This course is open to non-Pathobiology Specialist students, but students must carry out a research project under the supervision of an LMP faculty member.

Breadth Requirements: Living Things and Their Environment (4)

LMP310H1 - Fundamentals of Pathobiology

Hours: 24L/12T

This course covers the major molecular mechanisms that impact human health and disease. Specifically, it is divided into three blocks that focus on the fundamentals of pathobiology in cancer, cardiovascular diseases and infection. It is intended to introduce the cellular and molecular concepts of health and disease that will be explored with more depth in fourth-year LMP courses.

Prerequisite: LMP200H1, BCH210H1

Breadth Requirements: Living Things and Their Environment (4)

LMP320H1 - Pathobiology of Stem Cells

Hours: 24L/12T

This course introduces stem cells and their impact on human health and disease. Stem cells are studied from the perspective of development and disease, with a focus on the nervous system, respiratory system and cancer. This course is intended to provide a foundation in the basis of stem cells in preparation for fourth-year courses.

Prerequisite: LMP200H1

Breadth Requirements: Living Things and Their Environment (4)

LMP330H1 - Genetic and Computational Modeling in Human Development and Disease

Previous Course Number: LMP408H1

Hours: 24L/12T

Introduces the use and impact of genetic model systems and organisms in exploring aspects of human reproduction, development, aging and disease. Ethical issues in animal research, genetic manipulation, and disease modeling are highlighted. This course also introduces the bioinformatics concepts and methods used in biological data analysis.

Prerequisite: LMP200H1, BIO260H1/ HMB265H1

Exclusion: LMP408H1

Breadth Requirements: Living Things and Their Environment (4)

LMP363H1 - Principles of Pathobiology

Hours: 24L

Pathological changes brought on by foreign compounds; mechanisms of pathologic, toxic and carcinogenic change.

Prerequisite: BIO230H1, CHM247H1/ CHM249H1

Exclusion: LMP310H1, LMP320H1

Breadth Requirements: Living Things and Their Environment (4)

LMP399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

LMP399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

LMP405Y1 - Project in Pathobiology

Hours: 154P

A self-contained research project to be completed under the supervision of a faculty member. The main areas of research are as listed in the Department's section of the Academic Calendar. The student will normally have completed three full years of study, and is expected to devote at least one full day per week to the project. Admission is by arrangement with the Department and with a particular supervisor. A list of potential supervisors is available from the Departmental Office and on our web site. Not eligible for CR/NCR option.

Prerequisite: BCH210H1/ BCH242Y1, LMP310H1, LMP320H1, LMP330H1

Breadth Requirements: Living Things and Their Environment (4)

LMP410H1 - Pathobiology of Neurodegenerative Disease

Hours: 24L

Molecular basis of neurodegenerative diseases of the central and peripheral nervous systems. Emphasis on the molecular pathobiology of neurodegenerative diseases, current research developments and guidance with writing of research proposals. Mid-term and final exams will practice assembly of a succinct research proposal and query neurodegenerative disease material taught in course.

Prerequisite: BCH311H1/ (PSL300H1, PSL301H1)

Breadth Requirements: Living Things and Their Environment (4)

LMP415H1 - Forensic Pathobiology

Hours: 24L

A thematic review of the major scientific areas and research controversies in forensic medicine. The approach is mechanistic analysis and evidence-based medicine. Classical forensic medicine is critically analyzed with emphasis on experimental methods to resolve controversies. We also explore how the justice system utilizes medical and scientific data.

Prerequisite: LMP310H1, LMP320H1

Breadth Requirements: Living Things and Their Environment (4)

LMP420H1 - Cancer Pathogenesis

Hours: 24L/12T

A general introduction to the cellular and molecular aspects of cancer and its etiology. Topics include pathophysiology of cancer, invasion and metastases, role of the immune system, immune evasion, understanding biological targets, chemotherapeutic and immunotherapeutic agents and its mechanism of action, and resistance mechanisms of cancer.

Prerequisite: LMP310H1. Life sciences students who do not have all of the required prerequisites are encouraged to contact the academic unit to seek a waiver.

Recommended Preparation: PCL386H1

Breadth Requirements: Living Things and Their Environment (4)

LMP430H1 - Metabolic Disorders

Hours: 24L/12T

This is an advanced-level course that focuses on the pathobiology of metabolic disorders, whether inherited or acquired. It covers enzymatic pathways and diseases associated with fat/energy metabolism, dyslipidemia, dysglycemia, aminoacidopathies and lysosomal storage disorders.

Prerequisite: BCH210H1, PSL300H1. Life sciences students who do not have all of the required prerequisites are encouraged to contact the academic unit to seek a waiver.

Recommended Preparation: PSL425H1

Breadth Requirements: Living Things and Their Environment (4)

LMP440H1 - Mechanisms in Host-Microbe Interactions

Previous Course Number: LMP402H1 & LMP436H1

Hours: 24L

Mechanisms that allow microbial pathogens to cause disease and the host to detect infection, mount an inflammatory response and resolve the infection. Primary research articles are discussed. Topics include commensal and pathogenic bacteria, microbe recognition, programmed cell death, immunometabolism, inflammatory diseases.

Prerequisite: (IMM340H1, IMM350H1) / (IMM341H1, IMM351H1) / (MGY377H1, MGY378H1) / LMP310H1. Life sciences students who do not have all of the required prerequisites are encouraged to contact the academic unit to seek a waiver.

Exclusion: LMP402H1, LMP436H1

Breadth Requirements: Living Things and Their Environment (4)

LMP450H1 - Organogenesis in Health and Disease

Hours: 24L/12T

This course introduces advanced topics in stem cell biology and focuses on the latest developments related to the use of stem cells in the design and generation of organoids and organs for use in research. The use of organogenesis within basic and clinical research settings will be highlighted with a focus on several human diseases. This course will build on the third-year courses, through which students will have been introduced to stem cell biology within the context of human diseases.

Prerequisite: LMP320H1, LMP330H1. Life sciences students who do not have all of the required prerequisites are encouraged to contact the academic unit to seek a waiver.

Breadth Requirements: Living Things and Their Environment (4)

LMP460H1 - Pathobiology of the Cardiovascular System

Previous Course Number: LMP406H1

Hours: 24L

Pathobiology of the heart, blood vessels, and lymphatic system. Congenital diseases of the heart, ischemic injury, stroke. Treatments of vascular disease and cardiovascular biomaterials. Major focus on atherosclerosis and hypertension. The emphasis is on the underlying cell biology of these processes.

Prerequisite: (PSL300H1, PSL301H1) / PSL302Y1. Life sciences students who do not have all of the required prerequisites are encouraged to contact the academic unit to seek a waiver.

Exclusion: LMP406H1

Breadth Requirements: Living Things and Their Environment (4)

Latin American Studies

Faculty List

Professors

Anne-Emanuelle Birn (International Development, Public Health)
 Gustavo J. Bobonis (Economics)
 Laura Colantoni (Italian, Spanish, Portuguese and Latin American Studies)
 Kevin L. O'Neill (Religion)
 Ana Teresa Pérez-Leroux (Italian, Spanish, Portuguese and Latin American Studies)
 Jeffrey M. Pilcher (History)
 Rosa Sarabia (Italian, Spanish, Portuguese and Latin American Studies)
 Judith Teichman (Political Science)

Associate Professors

Christian Abizaid (Geography and Planning; School of the Environment)
 Susan Antebi (Italian, Spanish, Portuguese and Latin American Studies)
 Kevin P. Coleman (Historical Studies)
 María Cristina Cuervo (Italian, Spanish, Portuguese and Latin American Studies)
 Rubén Gaztambide-Fernández (OISE)
 Gustavo Indart (Economics)
 Eva-Lynn Jagoe (Italian, Spanish, Portuguese and Latin American Studies; Centre for Comparative Literature)
 Teresa Kramarz (Munk School of Global Affairs and Public Policy)
 Christopher Krupa (Anthropology)
 Mariana Mota Prado (Law)
 Valentina Napolitano (Anthropology)
 Melanie J. Newton (History)
 Alejandro Paz (Anthropology)
 Néstor E. Rodríguez (Italian, Spanish, Portuguese and Latin American Studies)
 Luisa Farah Schwartzman (Sociology)
 Edward R. Swenson (Anthropology)
 Sanda Munjic (Italian, Spanish, Portuguese and Latin American Studies)

Assistant Professors

Martha Balaguera (Political Science)
 Laura Doering (Rotman Commerce)
 Jerry Flores (Sociology)
 Ryan Isakson (Geography and Planning)
 Suzi Lima (Linguistics)
 Sharlene Mollet (Critical Development Studies, Human Geography)
 Lena Mortensen (Anthropology)

Jeff Packman (Music History and Culture)
 Victor Rivas (Italian, Spanish, Portuguese and Latin American Studies)
 Luis van Isschot (History)

Associate Professor, Teaching Stream

Manuel Ramírez (Italian, Spanish, Portuguese and Latin American Studies)

Assistant Professor, Teaching Stream

Juan Carlos Rocha Osornio (Spanish and Portuguese)

Sessional Lecturers

Bernardo García Domínguez (New College; Italian, Spanish, Portuguese and Latin American Studies)
 Donald Kingsbury (Political Science; Italian, Spanish, Portuguese and Latin American Studies)

Professors Emeriti

Albert Berry (Economics)
 Peter Blanchard (History)
 Ricardo Sternberg (Italian, Spanish, Portuguese and Latin American Studies)

Introduction

The Latin American Studies program at the Department of Italian, Spanish, Portuguese and Latin American Studies is an interdisciplinary undergraduate program that provides students with the opportunities to deepen their understanding of Latin America/ Abiayala. This vast, biodiverse region with massive natural resources is home to heterogenous populations with unique cultural expressions and histories and with complex economic, political and social issues.

Courses that lead towards a Latin American Studies program (a Major, a Minor or a Certificate) encourage students to pursue their special academic and professional interests while becoming proficient in the contemporary debates about Latin America within a broad and flexible interdisciplinary framework. Students engage with faculty of varied academic backgrounds and a broad disciplinary range of texts; this engagement trains them in critical readings of colonial histories, literary and anthropological genres, comparative politics, politics of indigeneity and human rights, geography and urban planning, and public health, as well as in environmental policies and the political economy of Latin America and the Americas as a transnational whole. Such knowledge is increasingly necessary for Canada, as the country enters new trade, political, environmental, and academic agreements with our hemispheric partners.

Curricular and co-curricular activities in some of the advanced level courses offer important career-development opportunities as well as personal and academic enrichment through experiential learning in

Latin America. The program is ideal for students intending to pursue a variety of careers, be they in academic, public, cultural and intellectual work, diplomacy and policy making, journalism and reporting, or business and commerce, among many others.

For any questions regarding courses and programs, feel free to email the Program Director, at las.program@utoronto.ca.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Latin American Studies programs impacted by this policy: [ASMAJ0552](#) and [ASMIN0552](#)

Latin American Studies Programs

Latin American Studies Major (Arts Program) - ASMAJ0552

The Latin American Studies program at the Department of Spanish & Portuguese provides students in the social sciences and humanities an opportunity to engage and deepen their understanding of Latin American regions, their histories, politics, cultures, economies and societies. Courses encourage students to situate both their special interests and the contemporary debates in fields such as anthropology, political science, geography, literature, or history within a broader interdisciplinary framework, while at the same time committing themselves to an understanding of the historical, cultural and political experiences of Spanish and Portuguese America. Through an engagement with different texts and faculty expertise, this program trains students in current themes such as postcolonial thinking, critical readings of colonial histories, literary and anthropological genres, comparative politics, politics of indigeneity and human rights, as well as in environmental policies and political economy of Latin America and the Americas as a transnational whole. With the possibility to carry out curricula experience in Latin America, this program also offers an important lead for career development experiences on Latin America. This knowledge is increasingly necessary for Canada, as the country enters into new trade, political, environmental, and academic agreements with our emerging hemispheric partners.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(7.0 credits, including a minimum of 2.0 LAS credits at the 300+ level, of which a 0.5 credit must be at the 400-level)

1. [LAS200H1](#), [LAS201H1](#).
 2. 1.5 LAS credits at the 300-level.
 3. 0.5 LAS credit at the 400-level, or an equivalent 0.5 credit at the 400-level, approved by the Associate Chair of Latin American Studies or the Department of Spanish and Portuguese.
 4. 0.5 credit from: [JQR360H1](#), [POL222H1](#), [GGR270H1](#), [DTS300H1](#) or another 0.5 credit course on a combination of quantitative and qualitative reasoning / research design approved by the Associate Chair of Latin American Studies or the Department of Spanish and Portuguese.
 5. 2.5 LAS credits or pre-approved courses from Lists A and B, of which a maximum of 0.5 credit may be from List B.
- Students must successfully complete (with a minimum grade of 65%) at least the second level of language instruction in Spanish or Portuguese by the end of the third year of study. This requirement is normally met through 1.0 credit from either the list of Spanish courses in Group A or from the list of Portuguese courses in List A. Students can also demonstrate equivalent proficiency in the given language through completion of 1.0 credit from the list of Latin American Cultural Expressions courses in List A at a second-year level of instruction or higher.

List A (Thematic Group):

Latin American Studies Minor (Arts Program) - ASMIN0552

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, including at least 1.0 credit at the 300+ level.)

1. LAS200H1 and LAS201H1
2. 0.5 LAS credit at the 300-level.
3. 2.5 LAS credits, or pre-approved courses from cognate units listed below (List A). Of the 2.5 credits, a minimum of 0.5 credit must be from the Social Sciences/BR=3; another 0.5 credit must be from the Humanities/BR=1 or 2. (LAS300H1 or LAS370H1 can be used to cover the Social Science requirement and LAS301H1, LAS310H1, LAS320H1, LAS350H1 for the Humanities requirement).

Spanish or Portuguese language study is recommended, but not a requirement.

Certificate in Global Latin America - ASCER0552

The certificate is unique for its combination of language study, Latin American cultural and political history, and an in-depth course focused on a topic relevant to Latin American perspectives on global debates. The growing demographic of Latin Americans in Canada and in Toronto and a University-wide emphasis on internationalization and on Latin America as a priority region suggests that interest in this area is likely to enjoy continued growth.

Enrolment Requirements:

This is an open enrolment Certificate. A student who has completed 4.0 credits may enrol in the Certificate. This Certificate is not open to students enrolled in a Major or Minor in Latin American Studies.

Completion Requirements:

(2.5 credits)

1. 1.0 credit of SPA and/or PRT language courses
2. LAS200H1, LAS201H1
3. 0.5 LAS credit at the 300+ level

Notes:

- Students who begin the Certificate with an advanced level of language proficiency are encouraged to begin studies in the other language option if so desired.
- Courses taken in our unit-run Summer Abroad programs will be considered; however, they are not guaranteed to be approved.
- Courses that have been taken as Credit/No Credit cannot be used to fulfill Certificate requirements.
- No more than 1.0 transfer credits will be eligible for consideration in the Certificate.

Latin American Studies Courses

LAS200H1 - Inventing Latin America: Foundational Themes

Hours: 36L

An introductory course studying the development of Latin American societies from their pre-Columbian past to the 19th century building of modern nations. Cultural, historical, political, and social topics are examined combining historical documents with art, music and other texts from popular culture.

Exclusion: [IAS200Y1](#), [LAS200Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

LAS201H1 - Defining Latin America: Current Issues

Hours: 36L

An introductory course studying the development of Latin American societies from the 20th century to the present. Cultural, historical, political, and social topics are examined combining historical documents with art, music and other texts from popular culture.

Exclusion: [IAS200Y1](#) and [LAS200Y1](#)

Recommended Preparation: [LAS200H1](#)

Breadth Requirements: Society and its Institutions (3)

LAS300H1 - Topics in the Social Sciences

Hours: 24S

The goal of this course is to critically analyze the current economic, social, and political realities of Latin America, based on an insightful knowledge of its past and present. Topics of the course vary depending on the needs of the program and the interests of students.

Prerequisite: [IAS200Y1](#)/ [LAS200Y1](#)/([LAS200H1](#), [LAS201H1](#))/ [POL305Y1](#)

Breadth Requirements: Society and its Institutions (3)

LAS301H1 - Topics in the Humanities

Hours: 24S

The goal of this course is to critically analyze the Latin American social imaginaries as expressed in art, literature and/or film, based on close readings of texts. Topics of the course vary depending on the needs of the program and the interests of students.

Prerequisite: [IAS200Y1](#)/ [LAS200Y1](#)/ [LAS201H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

LAS302H1 - Topics in Latin American Studies

Hours: 24S

The goal of this course is to critically explore debates and perspectives on development and on the politics of inequality in Latin American contexts. Topics of the course may vary, depending on the needs of the program and the interests of students and instructors.

Recommended Preparation: [LAS200H1](#), [LAS201H1](#), [LAS300H1](#), [POL305Y1](#)

LAS310H1 - The Postcolonial Imaginary in Latin America

Hours: 24L

This seminar style course explores the postcolonial status of Latin America as a controversial issue, through critical analysis of the Latin American social imaginary. The course considers works by Simón Bolívar, José Martí, Ernesto Guevara, Pablo Neruda, Rigoberta Menchú, Subcomandante Marcos, Sergei Eisenstein, Walter Salles, Tomás Gutiérrez Alea, as well as films that illustrate the rich visual culture of the continent. Readings and seminar discussions are conducted in English.

Prerequisite: [LAS200H1](#) + [LAS201H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

LAS320H1 - Latin American Thought

Hours: 24L

This seminar-style course explores critical thinking about culture, history, politics, and society by some of the most influential Latin American intellectuals of the 20th and 21st centuries. Emphasis on theoretical contributions, in English translation, of Latin American thinkers such as Rodó, Vasconcelos, Mariategui, Zea, Dussel, García Canclini, Cornejo Polar, Quijano and Lugones. Topics covered include questing identities, cultural diversity, indigenism, liberation theology, colonialism, neocolonialism, postcolonialism, coloniality, and decoloniality. Readings and seminar discussions in English.

Prerequisite: [LAS200H1](#) + [LAS201H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

JLN327H1 - Culture and Modernity in the Hispanic Caribbean

Hours: 24L

Explores the Hispanic areas of the Caribbean including the Caribbean areas of continental Spanish-speaking America. Topics may include: regional politics, state and economy; revolutions and authoritarian regimes; popular culture, the arts and media; religion and society; gender and sexuality; state structures; diasporas and migration.

Prerequisite: [HIS230H1](#)/ [HIS231H1](#)/ [CAR120Y1](#)/ [CAR220H1](#)/ [CAR221H1](#)/ [NEW224Y1](#)/ [CAR225H1](#)/ [CAR226H1](#)/ [LAS200H1](#)/ [LAS201H1](#)

Breadth Requirements: Society and its Institutions (3)

LAS348H1 - The Renaissance Mexico City

Hours: 24S

By exploring history, art, architecture, literature and music of sixteenth century Mexico City as a geographical and cultural point of reference, this course explores the historical event known as “the Renaissance” outside of its traditional localities. By the mid 16th century, colonial Mexico City became the contact zone and the hub for the exchange of peoples, goods and ideas that migrated across the Atlantic. Mexico City gives an alternative perspective to how local political and social-historical contexts shape ideas and cultural forms and illustrates the processes and effects of cultural cross-fertilization in the Renaissance. Taught in English.

Recommended Preparation: [LAS200H1](#), a History course on Early Modern Hispanic world or a course in the Renaissance Studies Program ([VIC346H1](#), “The Idea of the Renaissance”), or permission of the instructor

Breadth Requirements: Creative and Cultural Representations (1)

LAS350H1 - Indigenous Realities in Latin America

Hours: 24L

This course studies the past and present realities of the diverse indigenous societies of the regions we now call Latin America. Eurocentric texts such as the chronicles of the conquest of Mexico, are critically contrasted with diverse indigenous peoples’ self-representing narratives that respond to more than five hundred years of Spanish and Portuguese occupation of their lands. These texts include Nahuatl poetry and accounts of the conquest of Mexico, literary creations from multiple Maya linguistic groups, multi-lingual chronicles from the colonial Inca period, diverse indigenous political manifestos and movements, indigenous testimonios, and decolonizing indigenous literature and criticism. Taught in English.

Recommended Preparation: ([LAS200H1](#) + [LAS201H1](#))/ [INS201Y1](#)/ [POL305Y1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

JQR360H1 - The Canadian Census: Populations, Migrations and Demographics

Hours: 24L/12T

Examines the Canadian population census through the experience of diasporic groups in Canada. Approaches the census as a statistical tool, an historical source and an ideological project of citizenship and nationalism. Uses census data to explore mathematical and statistical concepts and to integrate numerical ways of thinking with qualitative analysis. (Jointly sponsored by African Studies, Diaspora and Transnational Studies, Caribbean Studies, Critical Studies in Equity and Solidarity, and Latin American Studies).

Prerequisite: [DTS200H1](#)/ [DTS200Y1](#)/ [HIS230H1](#)/ [HIS231H1](#)/ [LAS200H1](#)/ [LAS201H1](#)/ [CAR120Y1](#)/ [AFR150Y1](#)/ [CAR220H1](#)/ [CAR221H1](#)/ [NEW224Y1](#)/ [CAR225H1](#)/ [CAR226H1](#)/ [CSE240H1](#)/ [NEW240Y1](#)

Breadth Requirements: Society and its Institutions (3)

LAS370H1 - Critical Perspectives of Development in Latin American Contexts

Hours: 24L

A seminar-style course that engages in critical analysis of local and global development initiatives in a Latin American context. The seminar is organized around the interrelated themes of health, economics, education, globalization, and infrastructure. Topics of discussion may include: challenges and ethics of sustainable development initiatives in theory and practice, medical missions and global health, community-based transnational public health projects, developing localities and sustainable economics, local infrastructure development and environmental impacts, ethics and implications of volunteerism, local and global cultural perspectives, the colonial legacies of inequality, dependency and sustainability of development projects.

Readings and lectures in English.

Prerequisite: 4.0 credits

Recommended Preparation: ([LAS200H1](#) + [LAS201H1](#))/
[POL305Y1](#)

Breadth Requirements: Society and its Institutions (3)

LAS400H1 - Topics in Latin American Studies

Hours: 24S

An upper level seminar. Topics of the course vary from year to year, depending on the needs of the program and the interests of students. Offered in alternate years.

Prerequisite: [LAS200Y1](#)/([LAS200H1](#), [LAS201H1](#)) &
[LAS300H1](#)/ [LAS301H1](#)

LAS401H1 - Latinos in Canada

Hours: 24S

A historical survey of migration from Latin American countries to Canada, this course examines mediation strategies of Latinos as they adjust to a new home: negotiation of national identities, political participation, entrepreneurship, cultural representations, and charitable work.

Prerequisite: [LAS200H1](#), [LAS201H1](#)

Recommended Preparation: [JQR360H1](#), 0.5 credit in LAS 300-level course

Breadth Requirements: Society and its Institutions (3)

LAS410H1 - Independent Study

This course provides an opportunity for students to do academic research related to Latin American issues under the supervision of a faculty member. The intent is that the student, aided and advised by the supervisor, will read relevant literature, and plan, execute, analyze and report on an original and independent investigation of an appropriate topic. For application forms, please visit the "Resources" section of the program's website. Not eligible for CR/NCR option.

Prerequisite: [LAS200Y1](#)/([LAS200H1](#), [LAS201H1](#)), and [LAS300H1](#)/ [LAS301H1](#)

LAS411Y1 - Independent Study

This course provides an opportunity for students to do academic research related to Latin American issues under the supervision of a faculty member. The intent is that the student, aided and advised by the supervisor, will read relevant literature, and plan, execute, analyze and report on an original and independent investigation of an appropriate topic. For application forms, please visit the "Resources" section of the programme's website. Not eligible for CR/NCR option.

Prerequisite: [LAS200Y1](#)/([LAS200H1](#), [LAS201H1](#)) and [LAS300H1](#)/ [LAS301H1](#)/ [LAS302H1](#)

Exclusion: [LAS410H1](#)

JLN427H1 - Advanced Topics: The Hispanic Caribbean

Hours: 24S

Explores, in depth, a country in the Hispanic Caribbean or a theme relating to the Hispanic Caribbean. Topics vary each year and may include: Cuban society; Hispanic Caribbean revolutions; Hispanic Caribbean music, art and popular cultures; Hispanic Caribbean diasporas.

Prerequisite: [HIS230H1](#)/ [HIS231H1](#)/ [JLN327H1](#)/ [LAS200H1](#)/ [LAS201H1](#)/ [CAR120Y1](#)/ [CAR220H1](#)/ [CAR221H1](#)/ [NEW224Y1](#)/ [CAR225H1](#)/ [CAR226H1](#)

Exclusion: [NEW427H1](#)

Breadth Requirements: Society and its Institutions (3)

Life Sciences

The following Life Science departments and programs are listed in this Calendar:

- [Biochemistry](#)
- [Biology](#)
- [Cell & Systems Biology](#)
- [Ecology & Evolutionary Biology](#)
- [Human Biology](#)
- [Immunology](#)
- [Laboratory Medicine & Pathobiology](#)
- [Molecular Genetics & Microbiology](#)
- [Nutritional Sciences](#)
- [Pharmaceutical Chemistry](#)
- [Pharmacology & Toxicology](#)
- [Physiology](#)
- [Psychology](#)

Many of the Life Science programs are collaborative programs given by the Faculty of Arts and Science and departments in the Faculty of Medicine. The Life Sciences all focus on the scientific study of life. The study of biological processes has enormous importance for:

- Understanding one's own body and those of other organisms sharing our planet, both in health and sickness;
- Analysing the behaviour of humans and other organisms;
- Understanding the interdependent web of living organisms on the planet, and their evolutionary relationships;
- Preparing for ethical, social and political questions arising from our increasing ability to modify living systems;
- Enhancing our ability to protect the delicate and complex ecological balance that sustains this world.

Today, the biological sciences are experiencing a revolution. Important discoveries occur almost weekly as scientists and students around the world develop and use techniques, theories and approaches. Increasingly, we need people with advanced knowledge and training who can contribute to these discoveries and their application. Equally, we need people who know enough about life sciences generally to make informed judgments about critical issues such as global warming, population growth, the emergence of drug resistance and new diseases, and the degradation of the environment.

On the St. George campus, undergraduate education, graduate education and research in the Life Sciences is

carried out in departments within the Faculty of Arts and Science and the Faculty of Medicine.

The programs offered in the Life Sciences are listed below. Admission to all programs occurs after completion of 4.0 credits. Admission to some programs is limited. Please see individual program listings for admission criteria and procedures. Also check the [Arts & Science Program Toolkit](#) for details and application procedures.

Specialist Programs

Biochemistry, Biological Chemistry (Chemistry), Bioinformatics and Computational Biology (Cell & Systems Biology), Biology, Biophysics (Physics), Cell and Molecular Biology (Cell & Systems Biology), Ecology and Evolutionary Biology (Ecology & Evolutionary Biology), Environment and Health (School of the Environment), Fundamental Genetics and its Applications (Human Biology), Global Health (Human Biology), Health and Disease (Human Biology), Immunology, Molecular Genetics & Microbiology, Neuroscience (Human Biology), Pathobiology, Pharmaceutical Chemistry (Chemistry), Pharmacology, Physiology, Psychology, Psychology Research, Toxicology.

Major Programs

Animal Physiology (Cell & Systems Biology), Biochemistry, Biodiversity and Conservation Biology (Ecology & Evolutionary Biology), Biology, Cell and Molecular Biology (Cell & Systems Biology), Ecology & Evolutionary Biology, Environmental Biology (Ecology & Evolutionary Biology), Environment and Health (School of the Environment), Fundamental Genetics and its Applications (Human Biology), Genome Biology (Biology), Global Health (Human Biology), Health & Disease (Human Biology), Human Biology, Immunology, Neuroscience (Human Biology), Nutritional Sciences, Pharmacology, Physiology, Psychology, Toxicology.

Minor Programs

Biology, Environmental Biology (Ecology & Evolutionary Biology), Immunology, Physiology, Psychology.

Animal Use in Laboratories

Laboratory investigations are part of life science programs at the University of Toronto. Programs in life sciences at the University of Toronto include courses that involve observation, handling, or experimentation on animals or on samples derived from animals. The use of animals in teaching and research is regulated by ethical and procedural guidelines and protocols. These are approved on an ongoing basis by the University Animal Care Committee, and follow provincial and federal government rules. We recognize, however, that some students may have strong reservations about personal exposure to any

use of animal material in teaching. Students who want to avoid registration in programs or courses that include such labs are, therefore, encouraged to check in advance with the departments involved.

Introduction

Linguistics can trace its roots back to the ancient Sanskrit grammarians, and the study of language is probably as old as language itself. However, the twentieth century has produced an explosion in the scientific study of language. As our understanding of the nature and structure of human language develops, linguistics is becoming relevant to many other areas of research such as Cognitive Science, Artificial Intelligence, Speech-Language Pathology, Audiology, Psychology, and Philosophy.

On its own, linguistics represents an invaluable key to the nature of the mind and the diverse elements of human culture; as a tool, linguistics is unmatched in preparing one for the learning and teaching of languages and for integrating language with technology.

In addition to the undergraduate curriculum within the Department of Linguistics, there are courses relating to linguistics offered in other departments such as the language departments, Anthropology, Computer Science, Philosophy, and Psychology, and in the Cognitive Science and Artificial Intelligence program.

Part-time students should note that most of the summer and evening courses available to them are offered on a rotating basis only. Consequently, students wishing to take such courses should enrol in them at the earliest opportunity after completing the necessary prerequisites.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Linguistics programs impacted by this policy:
ASSPE0506, ASMAJ0506, and ASMIN0506

Linguistics Programs

Linguistics Specialist (Arts Program) - ASSPE0506

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(12.0 credits)

Required Courses (5.5 credits):

First Year: LIN101H1, LIN102H1

Second Year: LIN228H1, LIN229H1, LIN232H1,
LIN241H1, LIN251H1

Third and Fourth Years: LIN322H1, LIN331H1,
JAL401H1, JLP374H1/ JLP315H1

Elective Courses (4.5 credits):

A total of 4.5 credits in LIN/JAL/JFL/JLP/JLS (excluding LIN200H1, LIN203H1, LIN204H1, LIN206H1, LIN207H1, LIN208H1, LIN211H1) including 2.0 credits at the 300+ level including at least 0.5 credit at the 400 level

Up to 1.0 credit may be from other departments. Approved courses include ANT253H1, ANT329H1, ANT425H1; COG250Y1; CSC384H1, CSC401H1, CSC448H1, CSC485H1; FRE272H1, FRE273H1, FRE274H1, FRE376H1, FRE378H1, FRE379H1, FRE379H1, FRE383H1, FRE386H1, FRE387H1, FRE471H1, FRE487H1, FRE488H1, FRE489H1; HPS250H1, HPS322H1; ITA360H1, ITA363H1; MCS223H1; NMC480H1; PHL210Y1, PHL245H1, PHL310H1, PHL311H1, PHL325H1, PHL340H1, PHL342H1, PHL345H1, PHL347H1, PHL351H1, PHL355H1, PHL405H1, PHL451H1, PHL479H1, PHL480H1, PHL481H1; PRT364H1; SLA232H1; SPA322H1, SPA324H1, SPA421H1, SPA422H1, SPA423H1. Other courses might also qualify; consult the Department of Linguistics for approval.

Note: LIN courses from other campuses are considered courses from other Departments.

Language Requirement (2.0 credits):

Two years of study or its equivalent of one non-Germanic, non-Romance language in courses using the spoken language. We encourage you to begin this language study

in your first or second year. Approved sequences of courses include CLT141Y1, CLT251H1, and CLT252H1; EAS100Y1 and EAS200Y1; EAS120Y1 and EAS220Y1; EAS110Y1 and EAS210Y1; EST100H1, EST101H1, EST200H1, and EST201H1; FIN100H1, FIN110H1, FIN200H1, and FIN210H1; HUN100Y1 and HUN200Y1; INS220Y1 and INS323Y1/ INS320Y1; INS210Y1 and INS310Y1; AFR280Y1/ NEW280Y1 and AFR380Y1/ NEW380Y1; MGR100H1, MGR101H1, and MGR245Y1; NML110Y1 and NML210Y1; NML155H1, NML156H1, NML255H1, and NML256H1; NML260Y1 and NML360Y1; NML270Y1 and NML370Y1; SLA105Y1 and SLA204Y1; SLA106H1, SLA116H1, SLA206H1, and SLA207H1; SLA100H1, SLA101H1, and SLA220Y1; SLA107Y1, SLA257H1, and SLA277H1; SLA108Y1 and SLA208Y1. Other courses might also qualify, but must be pre-approved by the Department of Linguistics. Note that access to some language courses will be determined through priority enrolment.

Linguistics Major (Arts Program) - ASMAJ0506

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(7.0 credits)

1) All of: LIN101H1, LIN102H1

2) All of: LIN228H1, LIN229H1, LIN232H1, LIN241H1, LIN251H1

3) 0.5 credit from: JLP374H1 or JLP315H1

4) A further 1.0 LIN/JAL/JFL/JLP/JLS credit at the 300+ level

5) 0.5 LIN/JAL/JFL/JLP/JLS credit at the 400-level

6) An additional 1.5 credits in LIN/JAL/JFL/JLP/JLS (excluding LIN200H1, LIN203H1, LIN204H1, LIN206H1, LIN207H1, LIN208H1, LIN211H1)

Up to 1.0 credit may be from other departments. Approved courses include ANT253H1, ANT329H1, ANT425H1; COG250Y1; CSC384H1, CSC401H1, CSC448H1, CSC485H1; FRE272H1, FRE273H1, FRE274H1, FRE376H1, FRE378H1, FRE379H1, FRE379H1, FRE383H1, FRE386H1, FRE387H1, FRE471H1, FRE487H1, FRE488H1, FRE489H1; HPS250H1, HPS322H1; ITA360H1, ITA363H1; MCS223H1; NMC480H1; PHL210Y1, PHL245H1, PHL310H1, PHL311H1, PHL325H1, PHL340H1, PHL342H1,

PHL345H1, PHL347H1, PHL351H1, PHL355H1, PHL405H1, PHL451H1, PHL479H1, PHL480H1, PHL481H1, PRT364H1, SLA232H1, SPA322H1, SPA324H1, SPA421H1, SPA422H1, SPA423H1. Other courses might also qualify; consult the Department of Linguistics for approval.

Note: LIN courses from other campuses are considered courses from other Departments.

Linguistics Minor (Arts Program) - ASMIN0506

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

First Year: LIN101H1, LIN102H1

Linguistics Courses

LIN101H1 - Introduction to Linguistics: Sound Structure

Hours: 24L/12T

Introduction to fundamental principles of linguistics with particular attention to sound structure and its acquisition, processing, and variation; practice in elementary analytic techniques using data from a broad spectrum of languages.

Exclusion: LIN100Y1, LIN101H5, LINA01H3, LINA02H3

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN102H1 - Introduction to Linguistics: Sentence Structure and Meaning

Hours: 24L/12P

Introduction to fundamental principles of linguistics with particular attention to sentence and meaning structure, their acquisition, processing, and variation; practice in elementary analytic techniques using data from a broad spectrum of languages.

Higher Years: 3.0 credits in LIN/JAL/JFL/JLP/JLS (excluding LIN200H1 and LIN211H1) of which 1.0 credit must be at the 300+ level

Up to 1.0 credit may be from other departments. Approved courses include ANT253H1, ANT329H1, ANT425H1, COG250Y1, CSC384H1, CSC401H1, CSC448H1, CSC485H1, FRE272H1, FRE273H1, FRE274H1, FRE376H1, FRE378H1, FRE379H1, FRE379H1, FRE383H1, FRE386H1, FRE387H1, FRE471H1, FRE487H1, FRE488H1, FRE489H1, HPS250H1, HPS322H1, ITA360H1, ITA363H1, MCS223H1, NMC480H1, PHL210Y1, PHL245H1, PHL310H1, PHL311H1, PHL325H1, PHL340H1, PHL342H1, PHL345H1, PHL347H1, PHL351H1, PHL355H1, PHL405H1, PHL451H1, PHL479H1, PHL480H1, PHL481H1, PRT364H1, SLA232H1, SPA322H1, SPA324H1, SPA421H1, SPA422H1, SPA423H1. Other courses might also qualify; consult the Department of Linguistics for approval.

Note: LIN courses from other campuses are considered courses from other Departments.

Exclusion: LIN100Y1, LIN102H5, LINA01H3, LINA02H3

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN192H1 - Sustaining Indigenous Languages

Hours: 24S

There has been much publicity in recent years about language shift and language loss and, along with it, language revitalization. In this course we examine shift involving Indigenous languages – and particularly those of Canada – from a variety of perspectives, and looking at reasons why one might want to 'save' a language. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN193H1 - African Languages and Language-based Music

Hours: 24L

The connection between language and music is one of the oldest debates in the history of humanity. In this course, we will explore this issue by surveying African languages and language-based music (e.g., talking drums,

xylophones, singing, and chants). Students will learn about the building blocks of human language and the linguistic features unique to African languages. We will focus on how various African cultures communicate by transposing linguistic features to musical melodies and how listeners comprehend this musical code. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN194H1 - The Science Behind Our Accents

Previous Course Number: TBB199H1
Hours: 24P

When we speak, the sound is transmitted through the air as a complex sound wave. How are various speech sounds – vowels and consonants – manifested acoustically? What does it mean, in physical terms, to have an accent? These and other related questions will be explored through computer-based acoustic analysis and perceptual experimentation. Upon completion of this course, students will (i) have overview knowledge of basic acoustic properties characterizing phonetic variation pertaining to speech, and accents in particular, (ii) be able to conduct simple speech production and perception experiments, and write up results in the form of scientific research reports, (iii) begin to read and understand scientific literature pertaining to acoustic phonetic variation and its relevance for communication. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN195H1 - Babel: Language in the Mind of Speakers

Hours: 24L

What is the relation between language and thought? In this course we examine how language is represented in our minds, and how language and cognitive processes interact. While the link between words and meanings is arbitrary and reflects culture, language is considered to be a universal property of our species. We will examine the place of language in the architecture of the mind; the debates about the universality of language structure vs. linguistic relativism; and how language and thought interact in children's development. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN196H1 - Language and Communication

Hours: 24L

We will explore the ways in which information is communicated in conversation. We will consider systematic ways in which what a speaker intends to communicate with language goes beyond what one says in conversation. The goal of the course is to investigate the ways in which speakers rely on knowledge of language and implicit "rules" to enrich and transform the literal content of someone's utterance.

Students will familiarize themselves with some fundamental concepts in linguistic semantics and pragmatics. They will develop analytic skills necessary to analyze a text in an academic context and beyond. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN197H1 - Language and Social Justice

Hours: 24L

This course explores how language is used to construct and reinforce unjust social structures. Topics may include: the underlying sexism, classism, racism, and ableism of prestige dialects and prescriptive language education; the history and consequences of national language movements; language endangerment, documentation, and revival; sign languages and language rights for the deaf and hard-of-hearing; popular media representations of linguistic variation, especially vocal fry, uptalk, and regional accents; and the relationships between language and sex, gender identity, and sexuality.

Students will develop research, analytic, and writing skills through critique and discussion of assigned texts, independent research projects, and regular written and oral presentation of their work. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN198H1 - Language Diversity

Hours: 24L

There are estimated to be about 7000 languages currently spoken in the world. What do they have in common? In

what ways are they different? This course will explore these questions, covering such topics as meaning, sound systems, the structure of words, the order of words in sentences, question formation, concepts such as subject and object, tense systems, pronoun systems. We will also discuss language loss and revival. Students will develop analytic skills as they consult published grammars and other resources to address these issues. Students will share their findings through oral and written presentation. Examples will be drawn from a wide range of languages. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN199H1 - Exploring Heritage Languages

Hours: 24L

We will explore how speakers use Heritage Languages in Toronto, using data recently collected in the GTA, so students should be familiar with one of these languages. We will collect, organize and interpret information about heritage languages in Toronto. We will look for speech patterns that differentiate first, second and third generation speakers in Toronto from corresponding speakers in their countries of origin, and look at the effects of cultural and language attitudes and usage.

Students will develop analytic skills as they explore a range of research methods and resources to address these issues. Students will share their findings through oral and written presentation, including online formats. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN200H1 - Introduction to Language

Hours: 24L/12T

Introduction to Language is a general-interest course on language. Possible topics include: the structure of language; how language changes over time, the social and psychological aspects of language, language and culture, the origin of language, writing systems, and language acquisition. (This course does not count towards the Linguistics minor, major, or specialist programs.)

Exclusion: LIN100Y1, LIN101H1, LIN102H1, LIN101H5, LIN102H5, LINA01H3, LINA02H3, LIN200H5

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN201H1 - Canadian English

Hours: 24L

A study of English spoken in Canada. Topics include: vocabulary items, usage surveys, non-standard dialect enclaves, regional variation and historical development. Students will develop original research projects in linguistics.

Prerequisite: (LIN101H1, LIN102H1)/ LIN200H1

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN202H1 - Introduction to Indigenous Languages of the Americas

Hours: 24L

This is an introduction to Indigenous languages and cultures of Central, North, and South America. Students will be exposed to discussions about what is an indigenous language, social status of indigenous languages as well as indigenous movements towards language documentation and revitalization and language education in the Americas.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN203H1 - English Words

Hours: 24L/12T

English has a rich vocabulary. We will learn how it has developed over time, and investigate aspects of the meaning and pronunciation of words. Most of all, we will study how words are put together, so that students will be able to recognize and analyze unfamiliar words. (This course does not count for the Linguistics major or specialist programs).

Exclusion: LIN203H5, LIN233H5

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN204H1 - English Grammar

Hours: 24L/12T

How the English language works: students analyze a wide variety of English grammatical structures and learn how

they vary across dialects and change through time. (This course does not count towards the Linguistics major or specialist programs).

Exclusion: [LIN204H5](#), [LINB18H3](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN206H1 - Languages of the World

Hours: 24L/12T

This course is a survey of languages and language families around the world. The course focuses on their linguistic similarities and differences, as well as their historical and social relationships. Course content will be explored through individual and comparative analysis of the linguistic structures of a representative sample of languages. (This course does not count towards the Linguistics major or specialist programs.)

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN207H1 - Language and Technology

Hours: 24L/12T

This course is a survey of the history and nature of language technologies, from the emergence of writing in ancient civilizations to modern large language models. Topics may include literacy, mechanized speech, speech recognition, machine translation, large language models, generative pre-trained transformers, and the ethics of language technologies. Note that this is not a computational linguistics course and does not cover the mathematical foundations or computational implementation of language models in any depth. The focus of this course is on the historical development of language technologies and their relationship to natural languages, language communities, and the field of linguistics. (This course does not count towards the Linguistics major or specialist programs.)

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN208H1 - Linguistic Discrimination and Justice

Hours: 24L/12T

This course explores the relationship between language and unjust social structures and practices, with a focus on discrimination against users of particular language

varieties. A key component of the course is understanding and practicing methods from the field of sociolinguistics to identify and combat linguistic discrimination, contextualized through discussion of examples from multiple languages and communities. Topics may include dialect discrimination, language ideologies, language and the law, linguistic colonialism, language rights, prescriptivism, slurs and linguistic abuse, language and gender, and audism. (This course does not count towards the Linguistics major or specialist programs.)

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN211H1 - American Sign Language 1

Hours: 36L

This course is an introductory language course for students with little or no prior knowledge of American Sign Language (ASL). It provides an immersive introduction to ASL, with a focus on basic vocabulary, grammar, conversation, and appropriate behaviours for everyday interactions in a variety of social situations. The language is taught through various immersive activities, such as lecture/discussion, interactive games, and situational conversations, supplemented with readings and videos. A significant emphasis throughout the course is placed on Deaf culture and issues facing the Deaf community. (This course does not count towards the Linguistics minor, major, or specialist programs.)

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN212H1 - American Sign Language 2

Hours: 36L

This course is an introductory language course for students with minimal prior knowledge of American Sign Language (ASL). It builds on the knowledge and skills gained in American Sign Language 1 and further immerses students in the language, literature, culture, and community associated with ASL. Additionally, it offers students opportunities to enhance their comprehension and production skills through content-specific conversations and interactive activities that utilize accurate ASL vocabulary, classifiers, phrases, grammatical structures, and non-manual markers across different contexts and purposes. (This course does not count towards the Linguistics minor, major, or specialist programs.)

Prerequisite: [LIN211H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN228H1 - Phonetics

Hours: 24L/12T

Phonetics is a linguistics course that investigates the sounds most commonly used in languages from an articulatory and acoustic point of view, with practice in their recognition and production. Students will learn the International Phonetic Alphabet (IPA) and practice transcribing a wide variety of speech sounds.

Exclusion: LIN228H5, LINB09H3

Recommended Preparation: LIN101H1/ LIN200H1

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN229H1 - Phonological Patterns in Language

Hours: 24L/12T

The nature and organization of phonological systems, with practical work in linguistic analysis.

Prerequisite: LIN101H1, LIN228H1

Exclusion: LIN229H5, LINB04H3

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN232H1 - Syntactic Patterns in Language

Hours: 24L/12T

The nature and organization of syntactic systems; their relation to semantic systems and the linguistic organization of discourse; practical work in linguistic analysis.

Prerequisite: LIN102H1

Exclusion: LIN232H5, LINB06H3

LIN241H1 - Introduction to Semantics

Hours: 24L/12T

An introduction to meaning within linguistics and the interpretation of language in context. Topics include logical and semantic relations, pragmatic concepts such as presupposition and implicature, the nature of thematic roles, quantifiers and scope relations, the expressions of temporal and modal relations in natural language.

Prerequisite: LIN102H1

Exclusion: LIN237H5, LIN247H5, LINC12H3, FREC12H3

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN251H1 - Introduction to Sociolinguistics

Hours: 24L/12T

How does linguistic variation construct identity? Introduction to recent sociolinguistic literature on language contact, multilingualism, code-switching, expressions of ethnic solidarity and regional identity, sex and gender differentiation, dialect geography, sociophonetics, perceptual dialectology, diffusion of norms in mobile populations, documentation of variation in lesser studied languages, and changes across the life-span.

Prerequisite: LIN101H1, LIN102H1

Exclusion: LIN256H5, LINB20H3

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

LIN299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

LIN302H1 - South American Indigenous Languages

Previous Course Number: PRT368H1

Hours: 36L

This course is an overview of linguistic diversity in South America, centred on Brazilian indigenous languages and peoples. Students will be introduced to current practices in

the maintenance and revitalization of Brazilian indigenous languages and current strategies for empowering indigenous peoples (such as training indigenous filmmakers and music production). We will study aspects of the grammar of Brazilian languages through the analysis of small data sets, and we will discuss the influence of Brazilian indigenous languages on Brazilian Portuguese. Not offered every year.

Prerequisite: (LIN101H1, LIN102H1)/ LIN200H1/
ANT253H1

Exclusion: LIN303H1, PRT368H1

Breadth Requirements: Thought, Belief and Behaviour
(2)

LIN303H1 - Central American Indigenous Languages

Hours: 36L

This course is about indigenous languages of Central America, focusing on Mayan languages and culture. Students will be introduced to current movements in the maintenance and revitalization of indigenous languages and current strategies for empowering indigenous people (such as training indigenous linguists, music production in indigenous languages, and intercultural bilingual education). Students will also study grammatical features of indigenous languages through the analysis of small data sets, and discuss the contact between indigenous languages and Spanish. Not offered every year.

Prerequisite: (LIN101H1, LIN102H1)/ LIN200H1/
ANT253H1

Exclusion: LIN302H1

Breadth Requirements: Thought, Belief and Behaviour
(2)

LIN305H1 - Quantitative Methods in Linguistics

Hours: 36L

Principles of research design, data collection, and a wide variety of statistical techniques for research in various subfields of linguistics.

Prerequisite: LIN101H1, LIN102H1, 1.0 credit in
LIN/JAL/JFL/JLP

Exclusion: LIN318H5, LINB29H3

Breadth Requirements: Thought, Belief and Behaviour
(2)

LIN306H1 - Language Diversity and Language Universals

Hours: 24L

This linguistics course examines cross-linguistic typological features found in the languages of the world. Special attention is given to describing morphological and syntactic patterns found cross-linguistically. The goal of the course is to draw on the diversity of languages in order to uncover language universals. (Not offered every year)

Prerequisite: LIN232H1

Exclusion: LIN476H5, LINC13H3

Breadth Requirements: Thought, Belief and Behaviour
(2)

JLP315H1 - Language Acquisition

Hours: 36L

Infants' abilities at birth, prelinguistic development, the first words, phonological, syntactic and semantic development. Social variables influencing language acquisition, bilingualism, models of development, language play. (Sponsored by the Departments of Linguistics and Psychology, but administered solely by the Dept. of Linguistics).

Prerequisite: 1.0 credit at the 200+ level in
LIN/JAL/JUP/PSL/PSY/COG

Exclusion: PSY315H5, PLIC24H3

Breadth Requirements: Thought, Belief and Behaviour
(2)

LIN322H1 - Phonological Theory

Hours: 36L

Basic issues in current phonological theory. Problems focusing on analysis and theory. (Students who want to pursue graduate studies in linguistics are strongly advised to include this course in their program.)

Prerequisite: LIN229H1

Exclusion: LIN322H5, LIN329H5, LINC02H3

Breadth Requirements: Thought, Belief and Behaviour
(2)

LIN323H1 - Acoustic Phonetics

Hours: 24L

This linguistics course is an introduction to the acoustic phonetics of the vocal tract, including acoustic properties of speech and its analysis using instrumental techniques.

Prerequisite: [LIN101H1](#), [LIN102H1](#), [LIN228H1](#)

Exclusion: [LIN328H5](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

JAL328H1 - Writing Systems

Hours: 36L

Introduction to writing systems; their historical development, their relationship to language, and their role in culture and society. (Given by the Departments of Anthropology and Linguistics) (Not offered every year)

Prerequisite: [ANT100Y1](#)/ [LIN101H1](#)/ [LIN200H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN331H1 - Syntactic Theory

Hours: 36L

A course in syntactic theory and analysis within a current formal framework. (Students who want to pursue graduate studies in linguistics are strongly advised to include this course in their program.)

Prerequisite: [LIN232H1](#)

Exclusion: [LIN332H5](#), [LINC11H3](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN333H1 - Morphological Patterns in Language

Hours: 36L

The nature and organization of morphological systems, with practical work in linguistic analysis.

Prerequisite: [LIN229H1](#), [LIN232H1](#)

Exclusion: [LIN231H5](#), [LINB10H3](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN341H1 - Semantic Theory

Hours: 36L

This linguistics course focuses on the study of natural language semantics and the relation between interpretation and syntactic structure. Topics include predication and quantification, scope and anaphora, problems of discourse analysis, the interpretation of different types of pronouns, and ellipsis.

Prerequisite: [LIN241H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN351H1 - Sociolinguistic Patterns in Language

Hours: 24L/12T

In this sociolinguistics course, we explore linguistic variation and its social implications, especially the quantitative study of phonological and grammatical features and their correlations with age, sex, ethnicity, and other social variables.

Prerequisite: [LIN251H1](#), or permission of the instructor

Breadth Requirements: Society and its Institutions (3)

JAL355H1 - Language and Gender

Hours: 24L

An introduction to some of the principal questions of feminist theory, as viewed from sociolinguistics. Topics include: socialization into gendered discourse patterns; cultural and ethnic differences in gendered interactions; the role of language and gender in legal, medical and labour settings; multilingualism, migration, imperialism and nationalism; sexuality, desire and queer linguistics, language, gender and globalization.

Prerequisite: 1.0 credit at the 200-level in [LIN](#)/[ANT](#)/[JAL](#)/[SOC](#)/[WGS](#)

Recommended Preparation: [ANT204H1](#)/ [ANT253H1](#)/ [SOC200H1](#)/ [SOC214H1](#)

Breadth Requirements: Society and its Institutions (3)

LIN362H1 - Historical Linguistics

Hours: 24L

An introduction to diachronic linguistics. Theories of language change; the comparative method, internal reconstruction, linguistic geography, the origin of languages; language death.

Prerequisite: [LIN229H1](#)

Exclusion: [LIN360H5](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

JLP374H1 - Psychology of Language

Hours: 36L

In Psychology of Language, we investigate human and other animal communication, structure of human language, word meaning and semantic memory, psychological studies of syntax, bilingualism, language and thought, language errors and disorders. (Sponsored by the Departments of Linguistics and Psychology, but administered solely by the Dept. of Linguistics).

Prerequisite: 1.0 credit from [LIN228H1](#), [LIN229H1](#), [LIN232H1](#), [LIN241H1](#), [PSY260H1](#), [PSY270H1](#), [PSY280H1](#), [PSY290H1](#), [COG250Y1](#)

Exclusion: [LIN258H5](#), [PSY374H5](#), [PLIC55H3](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

JFL388H1 - Bilingualism, Multilingualism, and Second Language Acquisition

Previous Course Number: JFG388H1

Hours: 24L/12T

Using and encountering multiple languages is the everyday norm of people living in much of the world, including in multicultural cities like Toronto. This course offers a broad exploration of the cognitive and social underpinnings of the dynamic field of bilingualism, multilingualism, and second language acquisition. We will (i) explore the differences between bilinguals/multilinguals and monolinguals in the ways they process and use language; (ii) examine the language acquisition patterns of children and adults; (iii) investigate the interactions between an individual's language repertoires and those of their peers and local community.

Prerequisite: 4.0 credits, and any 100-level or higher language course OR introductory linguistics course (e.g., [LIN200H1](#), [FRE272H1](#), [ITA360H1](#), [SLA323H1](#)/[SLA380H1](#), [SPA322H1](#))

Exclusion: [FRE388H1](#), [JFG388H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at

<https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

LIN398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at

<https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

LIN399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at

<https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

LIN399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at

<https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

JAL401H1 - Field Linguistics

Hours: 48P

Field Linguistics provides practice in language analysis based on elicited data from a native speaker of an indigenous or foreign language, emphasizing procedures and techniques. (Given by the Departments of Anthropology and Linguistics)

Prerequisite: Completion of [LIN322H1](#) and [LIN331H1](#) or permission of the instructor

Exclusion: [LIND46H3](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN402H1 - Linguistic Typology and Constructed Languages

Hours: 36L

This course uses constructed languages (e.g., Esperanto, Klingon, Dothraki) to explore crosslinguistic patterns in language structure. Topics include phonological and morphosyntactic typology, language change over time, effects of culture and environment on language, history of language construction, standards in writing descriptive grammars, and critical analysis of research on language diversity.

Prerequisite: 5 required 200-level courses ([LIN228H1](#), [LIN229H1](#), [LIN232H1](#), [LIN241H1](#), [LIN251H1](#)), AND [LIN322H1](#) Phonological Theory OR [LIN331H1](#) Syntactic Theory, or permission of the instructor.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN405H1 - Advanced Quantitative Methods in Linguistics

Hours: 36L

This course introduces advanced statistical modeling techniques using the statistical software R, tailored specifically to the needs of linguistic research.

Prerequisite: [LIN305H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN409H1 - Structure of a Specific Language

Hours: 24L

Topics may include: the phonological, morphological, syntactic, and semantic systems; the writing system; a brief diachronic sketch; linguistic variation and sociolinguistic aspects. (Not offered every year).

Prerequisite: [LIN228H1](#), [LIN229H1](#), [LIN232H1](#), 1.0 credit at the 300/400- level in LIN/JAL/JFL/JLP/JLS

Exclusion: [LIN479H5](#) or [LINC61H3](#) if the same language was analyzed.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN423H1 - Phonetic Analysis

Hours: 36S

This course provides students with hands-on experience with main methods of linguistic phonetic (acoustic and articulatory) analysis through project-based group work and training in writing up experimental results.

Prerequisite: [LIN323H1](#)

Exclusion: [LIND09H3](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

LIN429H1 - Research in Phonology

Hours: 24S

Research in Phonological Theory, including guided instruction in how to undertake critical reading of primary literature, develop an original topic, write a research paper, an abstract, a handout, and give an oral presentation. Not eligible for CR/NCR option.

Prerequisite: [LIN322H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN432H1 - Advanced Morphology

Hours: 24L

Current research involving morphology, including the role of morphology in the grammar, the nature of inflectional paradigms, affixes affecting grammatical relations constitute this linguistics course. Each year one topic will be a special focus and will be dealt with at length. (Not offered every year)

Prerequisite: [LIN333H1](#)

Corequisite: [LIN331H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN439H1 - Research in Syntax

Hours: 24S

Research in Syntactic Theory, including guided instruction in how to undertake critical reading of primary literature, develop an original topic, write a linguistics research paper, an abstract, a handout, and give an oral presentation. Not eligible for CR/NCR option. (Not offered every year)

Prerequisite: [LIN331H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN441H1 - Advanced Semantics and Pragmatics

Hours: 24S

This course covers current research in formal semantics and pragmatics. Topics may vary from year to year. The course is intended to be a seminar-style course; it includes reading primary literature and writing a research paper.

Prerequisite: LIN341H1

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN451H1 - Urban Dialectology

Hours: 24L

Ways in which urban sub-cultures differ in their use of language. How speakers dialects reflect their ethnicity, group affiliation, and other social categories. Practice in dialect analysis based on data from the speech community, emphasizing procedures and techniques.

Prerequisite: LIN351H1 plus 2.0 credits at the 200+ level in LIN/JAL/JLP

Breadth Requirements: Society and its Institutions (3)

LIN456H1 - Language Variation and Change: Theory and Analysis

Hours: 36L

The theory and practice of sociolinguistics. The inter-relationship between language and society from the perspective of collecting, organizing, and analyzing patterns in natural speech data, including field methods and quantitative methods for correlating linguistic and social variables.

Prerequisite: LIN351H1

Exclusion: LIN458H5

Breadth Requirements: Society and its Institutions (3)

LIN458H1 - Revitalizing Languages

Hours: 24L

A study of language endangerment and language revitalization efforts. The languages of focus will vary from year to year, depending on the instructor. Topics include language classification and a survey of major features of the languages, what it means for a language to be

endangered, the factors that contribute to language shift, and efforts to reverse language shift, including discussion of literacy, documentary linguistics and dictionaries.

Prerequisite: LIN101H1, LIN102H1 plus 2.0 credits at the 200+ level in LIN/JAL

Breadth Requirements: Society and its Institutions (3)

JLP471H1 - Advanced Psycholinguistics

Hours: 24S

Seminar in advanced topics in psycholinguistics. Content varies from year to year. (Sponsored by the Departments of Linguistics and Psychology, but administered solely by the Dept. of Linguistics).

Prerequisite: JLP374H1

Breadth Requirements: Thought, Belief and Behaviour (2)

JLS472H1 - Child Language Disorders

Hours: 36L

Students are introduced to the etiologies and characteristics of speech and language disorders in children, associated with autism, intellectual disabilities, and specific language impairment. Theoretical underpinnings of the major intervention approaches for children with speech and language disorders are discussed. (Given by the Departments of Linguistics and Speech Language Pathology)

Prerequisite: LIN101H1, LIN102H1, LIN228H1, and 1.0 credit at the 300+ level

Breadth Requirements: Living Things and Their Environment (4)

JLS473H1 - Adult Speech and Language Disorders

Hours: 36L

Students are introduced to the etiologies and characteristics of speech and language disorders in adults, associated with aphasia, neurodegenerative disorders, and head injuries. The effects of communication handicaps on the individual and theoretical underpinnings of the major intervention approaches for adults are discussed. Given by the Departments of Linguistics and Speech Language Pathology. (Not offered every year)

Prerequisite: [LIN101H1](#), [LIN102H1](#), and 1.0 credit at the 300+ level

Breadth Requirements: Living Things and Their Environment (4)

JLS475H1 - Literacy and Reading Disorders

Hours: 36L

Literacy and Reading Disorders is an introduction to the typical development of emergent literacy skills, including oral language, phonological awareness, narratives, and emergent writing in children; a discussion of the effects of language disorders on emergent literacy skills; a survey of approaches to intervention for children's emergent literacy skills. Given by the Departments of Linguistics and Speech Language Pathology. (Not offered every year)

Prerequisite: [LIN101H1](#), [LIN102H1](#), and 1.0 credit at the 300+ level

Breadth Requirements: Living Things and Their Environment (4)

JLS476H1 - Linguistics in the Workforce: Clinical Practice and Research

Hours: 36S

This course exposes students to research and practical approaches in the context of health professions of relevance to linguistics students, especially audiology and speech-language pathology. Students learn about evidence-informed practice, research methodologies, practice approaches and theories in the health professions. Students will be poised to benefit from optional service learning placements during or following the course, in research laboratories or clinical settings. Successful completion of this course provides students with exposure and experience of use in their applications to audiology, speech-language pathology, and other clinical programs and in their future health or graduate studies. Not eligible for CR/NCR option. (Not offered every year).

Prerequisite: [LIN101H1](#), [LIN102H1](#), and 1.0 credit at the 200+ level

Breadth Requirements: Living Things and Their Environment (4)

LIN481H1 - Introduction to Analysis and Argumentation

Hours: 36L

Linguistic argumentation, practice in constructing and evaluating hypotheses, and critical evaluation of representative articles. Emphasis on the structure of arguments rather than on the analysis of a particular language.

Prerequisite: [LIN322H1](#)/ [LIN331H1](#)

Exclusion: [LIN411H5](#), [LINC10H3](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

JFL484H1 - Computational Tools for Language Corpora

Hours: 24L/12T

This is a practical course dealing with digital collections of written language or transcribed oral language (corpora). It will introduce both the practical steps involved in building digital text corpora (text normalization, digitizing, tag set construction, and so on), as well as provide an understanding of, and hands-on experience with, fundamental techniques from computational linguistics and natural language processing, including techniques using machine learning, such as part-of-speech tagging, language models, and vector semantics. By working with real corpora, students will use these techniques to construct and defend hypotheses about texts, about languages, and about human language in general. An emphasis will be placed on using French language corpora from several periods (including medieval and modern) to situate French historically and in the Canadian context. Students will be given opportunities to work with other languages. Lectures will be in English, and students will take tutorials either in English or in French.

Priority enrolment for students in major or specialist programs in Linguistics, French, or the Applied Data Science minor

Prerequisite: [FRE272H1](#)/ [SPA322H1](#)/ ([LIN101H1](#), [LIN102H1](#))/ [LIN200H1](#), [ENG286H1](#)/ [CSC108H1](#)/ [LIN240H5](#)/ [LINB30H3](#).

Exclusion: [LIN340H5](#).

Recommended Preparation: [CSC108H1](#).

Breadth Requirements: The Physical and Mathematical Universes (5)

LIN490H1 - Special Topics in Linguistics

Hours: 24S

A specific topic in linguistics will be explored in depth in Special Topics in Linguistics. Students will learn about a narrowly-focused area of linguistics, including guided instruction in how to undertake critical reading of primary literature, develop a research topic and write a linguistics research paper. Not eligible for CR/NCR option. (Not offered every year)

Prerequisite: 2.0 LIN credits at the 200+ level, of which 1.0 LIN credit must be at the 300+ level. Permission of the instructor will also be required.

Breadth Requirements: Thought, Belief and Behaviour (2)

LIN495Y1 - Individual Project

A research or reading project in linguistics undertaken by the student under the supervision of a staff member. Open only when a faculty member is willing and available to supervise. Students are required to submit an application to the department by the first day of classes or earlier (preferred). Not eligible for CR/NCR option.

Application found at
<https://www.linguistics.utoronto.ca/undergraduate/curriculum-course-information/research-opportunities-and-independent-studies>.

Prerequisite: At least 10.0 credits, including 3.0 credits from LIN/ JAL/ JFL/ JLP/ JLS (excluding [LIN200H1](#), [LIN203H1](#), [LIN204H1](#), [LIN211H1](#))

LIN496H1 - Individual Project

A research or reading project in linguistics undertaken by the student under the supervision of a staff member. Open only when a faculty member is willing and available to supervise. Students are required to submit an application to the department by the first day of classes or earlier (preferred). Not eligible for CR/NCR option.

Application found at
<https://www.linguistics.utoronto.ca/undergraduate/curriculum-course-information/research-opportunities-and-independent-studies>.

Prerequisite: At least 10.0 credits, including 3.0 credits from LIN/ JAL/ JFL/ JLP/ JLS (excluding [LIN200H1](#), [LIN203H1](#), [LIN204H1](#), [LIN211H1](#))

LIN497Y1 - Individual Project

A research or reading project in linguistics undertaken by the student under the supervision of a staff member. Open only when a faculty member is willing and available to supervise. Students are required to submit an application to the department by the first day of classes or earlier (preferred). Not eligible for CR/NCR option.

Application found at
<https://www.linguistics.utoronto.ca/undergraduate/curriculum-course-information/research-opportunities-and-independent-studies>.

Prerequisite: At least 10.0 credits, including 3.0 credits from LIN/ JAL/ JFL/ JLP/ JLS (excluding [LIN200H1](#), [LIN203H1](#), [LIN204H1](#), [LIN211H1](#))

LIN498H1 - Individual Project

A research or reading project in linguistics undertaken by the student under the supervision of a staff member. Open only when a faculty member is willing and available to supervise. Students are required to submit an application to the department by the first day of classes or earlier (preferred). Not eligible for CR/NCR option.

Application found at
<https://www.linguistics.utoronto.ca/undergraduate/curriculum-course-information/research-opportunities-and-independent-studies>.

Prerequisite: At least 10.0 credits, including 3.0 credits from LIN/ JAL/ JFL/ JLP/ JLS (excluding [LIN200H1](#), [LIN203H1](#), [LIN204H1](#), [LIN211H1](#))

LIN499H1 - Individual Project

A research or reading project in linguistics undertaken by the student under the supervision of a staff member. Open only when a faculty member is willing and available to supervise. Students are required to submit an application to the department by the first day of classes or earlier (preferred). Not eligible for CR/NCR option.

Application found at
<https://www.linguistics.utoronto.ca/undergraduate/curriculum-course-information/research-opportunities-and-independent-studies>.

Prerequisite: At least 10.0 credits, including 3.0 credits from LIN/ JAL/ JFL/ JLP/ JLS (excluding [LIN200H1](#), [LIN203H1](#), [LIN204H1](#), [LIN211H1](#))

Materials Science

Introduction

Materials science is the study of the structure, properties and applications of all types of materials including metals, ceramics, glasses and polymers. Currently many exciting scientific developments are in the materials field. Notable advances have been made recently in studies of amorphous metals, the quasicrystalline state, liquid crystals, semiconductors, nanostructured materials, high critical temperature superconductors, biomaterials, high strength polymers, materials processing techniques such as ion implantation and laser melting, and in new categories of engineered materials such as advanced industrial ceramics or composite materials.

Materials science is interdisciplinary, drawing on the basic sciences of chemistry and physics and on more applied subjects such as metallurgy, ceramics and polymer science. Its tools and techniques include electron microscopy, x-ray diffraction, surface analysis using Auger emission spectroscopy, x-ray photoelectron spectroscopy, etc.

Materials Engineering, Processing and Application, MSE120H1, is designed to appeal to a wide variety of student interests. Other materials science courses are available to students having the prescribed prerequisites and the approval of the Undergraduate Student Counsellor. The specialist program in Materials Science is coordinated jointly by the Departments of Chemistry and Materials Science and Engineering. For further information on the program, consult the undergraduate coordinators for both departments.

Materials Science Programs

Materials Science Specialist (Science Program) - ASSPE2424

Consult Professor Andrew Dicks, Department of Chemistry.

This program draws both on the basic sciences of chemistry and physics, and on the more applied areas such as metallurgy or ceramics. Courses dealing with these latter fields are offered through the Department of Materials Science in the Faculty of Applied Science and Engineering. This is an appropriate program for students

with career interests in solid-state, polymer, or composite materials industries, or for graduate work in either chemistry or materials science, with an appropriate choice of options. Students may follow the Materials Chemistry path by taking the research course CHM499Y1 or the Materials Science and Engineering path by taking the research courses MSE492H1 and MSE493H1. This program is accredited by the Canadian Society for Chemistry.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirement listed below to enrol. Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

(CHM135H1, CHM136H1)/CHM151Y1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 63% in any of the required courses will not be considered for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Materials Science Specialist in the Summer after Year 2.

Completion Requirements:

(14.0 credits, including 1.0 credit from 400-level courses)

First Year:

1. BIO120H1
2. CHM151Y1 (strongly recommended)/ (CHM135H1, CHM136H1)
3. (MAT135H1, MAT136H1)/ MAT137Y1/MAT157Y1
4. MSE120H1

First or Second Year:

1. BIO130H1/ BIO220H1
2. (PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1)

Second Year and Higher Years:

1. CHM220H1/ CHM222H1/ MSE202H1*,
CHM223H1, (CHM236H1, CHM237H1)/
CHM238Y1, CHM247H1/ CHM249H1
2. MSE219H1, (MSE218H1/ MSE318H1),
MSE335H1
3. CHM327H1, CHM338H1, CHM343H1/
CHM348H1, CHM325H1/ CHM355H1,
CHM434H1/ CHM455H1, CHM426H1/
CHM457H1
4. At least 1.5 credits from the following, of which 0.5 credit must be at the 400-level: MSE302H1,
MSE316H1, MSE343H1, CHM446H1/
CHM456H1, CHM458H1, MSE415H1,
MSE419H1, MSE430H1, MSE431H1, (
MSE432H1/ MSE443H1/ MSE543H1),
MSE440H1, MSE458H1, MSE459H1,
MSE461H1, MSE465H1
5. CHM499Y1/ (MSE492H1, MSE493H1)

*It is highly recommended that students in the Materials Science Specialist Program complete MSE202H1.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Materials Science Courses

MSE120H1 - Materials Engineering, Processing and Application

Hours: 38.4L/6.4T/12.8P

This course covers an introduction to the field of materials science and engineering following a design-led approach. Application areas such as stiffness-limited design, fracture-limited design, strength-limited design will be used to guide further investigations into elements of the processing-structure-properties-performance paradigm. Topics covered will include material property charts, computer-aided design and materials selection, crystallographic planes and directions, crystal structures, stiffness, strength, plasticity, yielding, ductility, fracture and fracture toughness, cyclic loading and fatigue, friction and wear, thermal properties of materials, electrical properties, optical properties, materials corrosion, and materials processing.

MSE218H1 - Phase Transformations

Hours: 39L/13T/20P

A key part of MSE is focused on explaining how material systems transform from one condensed phase to another.

Regarding Materials Science Courses

Notes

1. The MSE courses below are administered by the Faculty of Applied Science and Engineering, and are subject to the rules and regulations of that Faculty, including those for term dates, examination periods and deferral practices.
2. The CHM courses listed for the Materials Science program are described in the Chemistry section of this Calendar.
3. Enrollment in MSE courses is done through your own College Registrar. It is not necessary to petition as the courses listed below have been pre-approved for this Specialist Program.
4. Deferment of Final Exams is NOT generally granted in the Faculty of Applied Science and Engineering.

These phase transformations are a critical aspect of understanding the behaviour of a material. MSE 218 builds on the thermodynamics and phase stability of MSE 202 and runs in parallel to the rates of transformation seen in MSE 217. In MSE 218 we will consider phase transformations in one component, two component, and multicomponent systems. We will look at both diffusional and diffusionless transformations, focusing on the nucleation and growth aspects of each case. Specific examples will include: solidification, precipitation, recrystallization, spinodal, massive, and order-disorder transformations. Both experimental and computational labs will be used to outline specific transformations in more depth.

Prerequisite: MSE202H1, MSE219H1; or equivalent

Corequisite: MSE217H1

MSE219H1 - Structure and Characterization of Materials

Hours: 39L/13T/39P

Introduction to two and three-dimensional crystallography and crystal structures of solids. Topics include: Pearson and Hermann-Mauguin symbols, reciprocal space, point group and space group symmetry analysis, stereographic projections. Introduction to tensor analysis of crystalline material properties, and symmetry breakdown by imperfections in crystals. Experimental techniques used to interpret structure and chemistry of solids and their defects will be covered theoretically and in the laboratory

including: X-ray diffractometry, optical, electron and scanning probe microscopy, and surface/bulk spectroscopies based on optical, X-ray, electron and ion-beam analysis methods.

Prerequisite: APS110H1/ MSE120H1/ MSE160H1 or equivalent

MSE316H1 - Mechanical Behaviour of Materials

Hours: 38.4L/12.8T/25.6P

The mechanical behaviour of engineering materials including metals, alloys, ceramics and polymeric materials. The following topics will be discussed: macro- and micro-structural response of materials to external loads; load-displacement and stress-strain relationships, processes and mechanisms of elastic, visco-elastic, plastic and creep deformation, crystallographic aspects of plastic flow, effect of defects on mechanical behaviour, strain hardening theory, strengthening mechanisms and mechanical testing.

Prerequisite: MSE218H1; MSE219H1; MSE222H1; or equivalent

MSE335H1 - Materials Physics

Hours: 38.4L/25.6T

Application of solid state physics to describe properties of materials. Thermal properties of solids: lattice vibrations (phonons), heat capacity, thermal conductivity. Electrical properties of metals: simple circuits, resistivity of metals (classical and quantum descriptions), Seebeck, Peltier, and Thomson effects. Electrical properties of semiconductors: band structure and occupancy, conductivity, Hall effect, simple devices. Electrical properties of insulators: polarization, capacitance, optical properties, ferroelectric and piezoelectric materials. Magnetic properties: diamagnetism and paramagnetism, ferromagnetic and ferrimagnetic materials, magnetic domains, B-H curves.

Prerequisite: MAT294H1, MSE219H1; or equivalent

MSE343H1 - Biomaterials

Hours: 26L/13P

Provides an overview of the field of biomaterials, introducing fundamental biological and materials design and selection concepts, and is open to CHE students. Key applications of materials for biomedical devices will be

covered, along with an introduction to the expected biological responses. The concept of biocompatibility will be introduced along with the essential elements of biology related to an understanding of this criterion for biomaterial selection and implant design. In addition, structure-property relationships in both biological and bio-inspired materials will be highlighted.

MSE351H1 - Design and Sim of Materials Processes

Hours: 36.6L/12.2T/24.4P

An overview of computer modeling approaches to analyze various macro-scale phenomena involved in materials processing, product design, and manufacturing. These approaches will include weighted residual methods, finite element and finite difference methods, computational fluid dynamics, and multiphysics simulations. The students will apply these methods to study heat transfer, fluid flow, stress analysis, structural dynamics, and coupled behavior. Practical experience will be provided on commercial finite element (FE) and computer-aided design (CAD) packages such as ANSYS and SOLIDWORKS.

Prerequisite: MSE218H1; MSE238H1; MSE316H1; MSE332H1

MSE430H1 - Electronic Materials

Hours: 26L/13T

Materials parameters and electronic properties of semiconductors are discussed as basic factors in the engineering of semiconductor devices. Materials parameters are related to preparation and processing methods, and thus to the electronic properties. The implications of materials parameters and properties on selected simple devices are discussed.

MSE440H1 - Emerging Applications in Biomaterials

Hours: 39L/13T

Currently used biomaterials for formation of surgical implants and dental restorations include selected metals, polymers, ceramics, and composites. The selection and processing of these materials to satisfy biocompatibility and functional requirements for applications in selected areas will be presented. Materials used for forming scaffolds for tissue engineering, and strategies for repair,

regeneration and augmentation of degenerated or traumatized tissues will be reviewed with a focus on biocompatibility issues and required functionality for the intended applications.

Prerequisite: MSE343H1 or equivalent

MSE459H1 - Synthesis of Nanostructured Materials

Hours: 39L/26P

Various synthesis techniques to produce nanostructured materials will be introduced. These synthesis techniques are categorized into chemical methods and physical methods. The chemical methods module discusses the general principles of nucleation and growth and covers specific chemical reactions for nanomaterial synthesis. The physical methods module introduces nanomaterials synthesis by solid-state processing, liquid-phase processing, vapor-phase processing, etc. In addition, the fundamental properties of nanomaterials introduced and the basic solid-state physics for nanocrystalline materials and advanced technologies for nanomaterial characterizations reviewed.

Prerequisite: MSE219H1; MSE244H1; or equivalent

MSE461H1 - Engineered Ceramics

Hours: 39L/24T

The unique combinations of physical, electrical, magnetic, and thermomechanical properties exhibited by advanced technical ceramics has led to a wide range of applications including automobile exhaust sensors and fuel cells, high speed cutting tool inserts and ball bearings, thermal barrier coatings for turbine engines, and surgical implants. This course examines the crystal and defect structures which determine the electrical and mass transport behaviours and the effects of microstructure on optical, magnetic, dielectric, and thermomechanical properties. The influence of these structure-property relations on the performance of ceramic materials in specific applications such as sensors, solid oxide fuel cells, magnets, and structural components is explored.

MSE498Y1 - Capstone Project: Design of Materials Processes

Hours: 12.8L/25.6T/12.8P

The students, working in small groups complete a project involving design of a materials processing plant, leading to

a design report delivered at the conclusion of the course. The topics covered in the lectures and design process include basic materials processing flowsheet for primary processing and recycling of materials, materials and energy balance of individual units and of overall process flowsheets, use of computer software for flowsheet evaluation, translating process flowsheets to resource and utility requirements, energy analysis, capital/operating cost, basics of equipment sizing, operation scheduling, safety and HAZOP, plant layout, and design for sustainability.

Prerequisite: All Y3 core courses.

Exclusion: CHM499Y1

Senior Lecturers Emeriti

F. Recio, MSc, PhD

real and complex analysis, ordinary and partial differential equations, differential geometry, topology, commutative algebra, graph theory, mathematical logic, number theory, and functional analysis.

The department offers eight specialist programs in addition to the major and minor programs.

In the Mathematics, Applied Mathematics, Mathematics and Physics, and Mathematics and Philosophy specialist programs, students acquire an in-depth knowledge and expertise in mathematical reasoning and the language of mathematics, with its emphasis on rigor and precision. These programs are designed for students wishing to pursue graduate studies; most of the graduates of these programs continue on to graduate school with some of them gaining admission to the world's best graduate schools.

The Mathematical Applications in Economics and Finance specialist program is designed to prepare students for direct entry into the world of finance. It can also serve as a gateway to an MBA or a Master of Finance degree, possibly followed by an eventual doctorate.

The Mathematics and its Applications specialist programs offer three areas of concentration: teaching, physical science, and probability/statistics. These specialist programs are designed as 'enhanced double majors.' The required courses for these concentrations are almost identical for the first two years, but they diverge in the upper years. Students in these programs can also continue on to graduate studies.

The Major and Minor programs are intended for students who want to combine mathematical skills with work in other subjects. These programs require less coursework than the specialist programs, but still require the completion of some upper year mathematics courses.

Students interested in becoming K-12 teachers should consider applying to the combined degree program --- a six-year program that leads to an Honours Bachelor of Science (HBSc) from the University of Toronto and a Master of Teaching (MT) from the Ontario Institute for Studies in Education (OISE). The HBSc part of this program involves completing a Math Major, a Minor in Education and Society (offered by Victoria College) and a Minor in an area that would lead to a second "teachable" subject. Please see the Victoria College website for more information.

Arts & Science Internship Program

As of Fall 2021, the new Arts & Science Internship Program (ASIP) stream is available to students who are entering Year 2 or Year 3 of study and enrolled in the

Introduction

Mathematics is the study of shape, quantity, pattern and structure. It serves as a tool for our scientific understanding of the world. Knowledge of mathematics opens gateways to many different professions such as economics, finance, computing, engineering, and the natural sciences. Aside from practical considerations, mathematics can be a highly satisfying intellectual pursuit, with career opportunities in teaching and research.

The department counts many of Canada's leading research mathematicians among its faculty. Our mathematics programs are flexible, allowing students to select courses based on specialization and interest. Contents range from calculus and linear algebra in the non-specialist programs to more advanced topics such as

Mathematics Specialist, Applied Mathematics Specialist, Mathematics & Physics Specialist, Mathematics & Philosophy Specialist, Mathematical Applications in Economics & Finance Specialist, Mathematics & its Applications Specialist, and Mathematics Major.

Enrolment is limited and requires a supplemental application. Students enrolled in the ASIP stream will be required to complete mandatory Professional Development programming plus a minimum of 12 and maximum of 20 months (Year 2 entry) or a minimum of 12 and maximum of 16 months (Year 3 entry) of paid, full-time work experience. The time to degree completion for students enrolled in ASIP will normally be 5 years. There is an additional cost to participate in the ASIP stream.

Students will typically be admitted to the ASIP stream for the Fall term of Year 2 of study, however, in exceptional circumstances students, including transfer students, who enrolled in an eligible program in the Summer after Year 2 can be admitted to the ASIP stream for the Fall of Year 3. Acceptance into an ASIP stream in Year 3 is dependent on space and requires approval of the student's academic unit and the Faculty of Arts & Science Experiential Learning & Outreach Support (ELOS) Office. Please refer to the [ASIP eligibility page](#) for further details.

Further details about ASIP, including eligibility requirements and application procedures, can be found [here](#). Students may also visit the [ASIP webpage](#) or contact the ELOS office at asip@utoronto.ca.

Introductory Courses

The Department of Mathematics offers introductory courses for incoming students to foster the development of mathematics skills.

PUMP Level 1 and PUMP Level 2 (Preparing for University Mathematics Program)

Both programs are non-credit courses that equip students with the necessary background knowledge required to succeed in first year mathematics courses. The content for the courses may be viewed at <https://www.mathematics.utoronto.ca/undergraduate/prospective-students/preparing-university-math-program-pump>.

PUMP Level 1 provides a quick math review during the months of July and August, for students who would like to take six weeks prior to the start of the first semester to practice pre-calculus math skills. During other terms, it is scheduled as a longer course, for students who have not taken the appropriate high school mathematics prerequisites for university calculus and linear algebra. This course is recommended for any student who wish to

close any existing gap between high school math and University level math courses or anyone who wishes to review high school math before attempting University level math or other science courses.

PUMP Level 2 is an Introduction to Proofs course. The curriculum provides background knowledge that is a preparation for [MAT137Y1](#), [MAT157Y1](#), [MAT240H1](#), [MAT247H1](#), [MAT237Y1](#), and other proof-oriented advanced courses. The course covers the reading and comprehension of mathematical statements, analyzing definitions and properties, formulation of arguments, and strategies for proofs. This course is recommended for any student who wish to add to their knowledge by joining the group of students who will commence their preparation for the more challenging concepts in the advance analytical programs, during the months of July and August.

Visit

<https://www.mathematics.utoronto.ca/undergraduate/prospective-students/PUMP-courses> for up-to-date information on the availability of PUMP Level 1 and PUMP Level 2.

If you have questions about the content of these courses, e-mail 1styear@math.toronto.edu.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Mathematics programs impacted by this policy: [ASSPE1165](#), [ASMAJ1165](#), and [ASMIN1165](#)

Mathematics Programs

Mathematics Specialist (Science Program) - ASSPE1165

The Specialist Program in Mathematics is directed toward students who aim to pursue mathematical research as a career.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students are encouraged to take their introductory analysis and algebra in their first year of study (MAT157Y1, MAT240H1, MAT247H1).

Arts & Science Internship Program

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and students applying for Year 3 entry must have been admitted to the Mathematics Specialist in the Summer after Year 2.

Completion Requirements:

12.5 credits, including at least 3.0 credits at the 400-level

Mathematics Fundamentals

1. Analysis: MAT157Y1, MAT257Y1
2. Algebra: MAT240H1, MAT247H1
3. Advanced Ordinary Differential Equations: MAT267H1

Ethical and Social Responsibility

4. 0.5 credit with a significant emphasis on ethics and social responsibility (list below)

Higher Studies in Mathematics

5. Topology: MAT327H1
6. Groups, Rings and Fields: MAT347Y1
7. Partial Differential Equations: MAT351Y1
8. Complex and Real Analysis: MAT354H1, MAT357H1
9. Geometry: MAT363H1/ MAT367H1
10. Advanced Topics: 4.0 credits of further APM/MAT 300+ level courses including at least 2.5 credits of APM/MAT courses at the 400-level

Research Seminar in Mathematics

11. MAT477H1

Notes:

- Not all courses listed have priority enrolment for students enrolled in this program. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.
- Each course can count toward only one requirement, even if listed as options to multiple requisites of the program.
- Students may use CR/NCR on the course they use toward the ethics and social responsibility credits.
- Students may be permitted to take Math graduate courses. A 0.5 credit of these courses may count toward specialist program requirements, where relevant (e.g., as courses “at the 400-level”). To review eligibility criteria and apply for graduate courses as an undergraduate student, find more information on the A&S Math website.
- Students may be permitted to take an independent reading course. A 0.5 credit of these courses may count towards program requirements, where relevant (e.g., as courses “at the 400-level”). To review eligibility criteria and apply for independent reading courses as an undergraduate student, find more information on the A&S Math website.
- To enrich your studies in mathematics, students in the Mathematics Specialists are encouraged to take PHY151H1 and PHY152H1 in the first year of study, as well as CSC148H1 and STA257H1 before graduation. If a student has not taken a year-long high school programming course, students are advised to take CSC108H1 prior to CSC148H1, or CSC110Y1.

Courses accepted towards this program's ethics requirement:

CSC300H1/ CSE240H1/ CSE270H1/ EEB215H1/ ENV200H1/ ESS205H1/ any ETH200+/ FOR201H1/ HIS286H1/ HPS200H1/ HPS202H1/ INS200H1/ JPH441H1/ PHL265H1/ PHL271H1/ PHL273H1/ PHL275H1/ PHL281H1/ PHL295H1/ SDS256H1/ another

suitable course with permission from the Associate Chair, Undergraduate

Applied Mathematics Specialist (Science Program) - ASSPE2053

The Specialist Program in Applied Mathematics is directed toward students who aim to pursue applied mathematical research as a career.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students are encouraged to take their introductory analysis, algebra, and computer programming in their first year of study (MAT157Y1, MAT240H1, MAT247H1, CSC108H1, CSC148H1).

Completion Requirements:

13.0-13.5 credits, including at least 1.5 credits at the 400-level

Applied Mathematics Fundamentals

1. Analysis: MAT157Y1, MAT257Y1
2. Algebra: MAT240H1, MAT247H1
3. Advanced Ordinary Differential Equations: MAT267H1
4. Computer Programming: CSC108H1, CSC148H1/
CSC110Y1
5. Probability and Statistics: STA237H1/ STA257H1,
STA238H1/ STA261H1, STA347H1/ MAT370H1

Ethical and Social Responsibility

6. 0.5 credit with a significant emphasis on ethics and social responsibility (list below)

Higher Studies in Mathematics

7. Topology: MAT327H1
8. Groups, Rings and Fields: MAT347Y1
9. Partial Differential Equations: MAT351Y1
10. Complex and Real Analysis: MAT354H1, MAT357H1
11. Geometry: MAT363H1/ MAT367H1
12. Advanced Applied Mathematics: 1.0 credit from
APM421H1/ APM426H1/ APM441H1/ APM446H1/
APM461H1/ APM462H1/ APM466H1
13. Related Topics: 1.5 credits from: MAT332H1/
MAT344H1/ MAT454H1/ MAT457H1/ MAT458H1/

MAT464H1/ STA302H1/ STA457H1/ CSC336H1/
CSC436H1/ CSC446H1/ CSC456H1

Research Seminar in Mathematics

14. MAT477H1

Notes:

- Not all courses listed have priority enrolment for students enrolled in this program. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.
- Each course can count toward only one requirement, even if listed as options to multiple requisites of the program.
- CSC108H1 is waived for students who complete CSC148H1 first. If a student has not taken a year-long course in programming in secondary school, it is strongly recommended that students take CSC108H1 first.
- Students may use CR/NCR on the course they use toward the ethics and social responsibility credit.
- Students may be permitted to take Math graduate courses. A 0.5 credit of these courses may count toward specialist program requirements, where relevant (e.g., as courses “at the 400-level”). To review eligibility criteria and apply for graduate courses as an undergraduate student, find more information on the A&S Math website.
- Students may be permitted to take an independent reading course. A 0.5 credit of these courses may count towards program requirements, where relevant (e.g., as courses “at the 400-level”). To review eligibility criteria and apply for independent reading courses as an undergraduate student, find more information on the A&S Math website.

Courses accepted towards this program's ethics requirement:

Mathematics and Physics Specialist (Science Program) - ASSPE0397

The Specialist in Mathematics and Physics is directed toward students who want a strong background in both Mathematics and Physics, with the goal of applying sophisticated Mathematical techniques to the study of Physics, especially theoretical Physics.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students are encouraged to take their introductory analysis, algebra, and physics in their first year of study (MAT157Y1, MAT240H1, MAT247H1, PHY151H1, PHY152H1).

Arts & Science Internship Program

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and students applying for Year 3 entry must have been admitted to the Mathematics and Physics Specialist in the Summer after Year 2.

Completion Requirements:

14.5 credits, including at least 1.0 credit at the 400-level

Mathematics and Physics Fundamentals

1. Analysis: MAT157Y1, MAT257Y1
2. Algebra: MAT240H1, MAT247H1
3. Advanced Ordinary Differential Equations: MAT267H1
4. Foundations of Physics: PHY151H1, PHY152H1

Ethical and Social Responsibility

5. 0.5 credit with a significant emphasis on ethics and social responsibility (list below)

Further Studies in Physics

6. Practical Physics: PHY224H1, PHY324H1
7. Electricity and Magnetism: PHY250H1, PHY350H1
8. Thermal Physics: PHY252H1
9. Classical Mechanics: PHY254H1, PHY354H1
10. Quantum Physics: PHY256H1, PHY356H1
11. Topics: 1.0 credit further from PHY450H1/ PHY452H1/ PHY454H1/ PHY456H1/ PHY460H1

Further Studies in Mathematics

12. Partial Differential Equations: MAT351Y1
13. Advanced Math related to the study of Physics: 1.0 credit from MAT334H1/ MAT354H1/ MAT357H1
14. Algebra, Topology, and Differential Geometry: 0.5 credit from MAT327H1/ MAT347Y1/ MAT363H1/ MAT367H1
15. Mathematical Techniques for Physics: 1.0 credit from APM421H1/ APM426H1/ APM446H1/ APM441H1

Research and Exploration in Mathematics and Physics

16. 0.5 credit from MAT477H1/ PHY424H1/ PHY478H1/ PHY479Y1

Notes:

- Not all courses listed have priority enrolment for students enrolled in this program. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.
- Each course can count toward only one requirement, even if listed as options to multiple requisites of the program.
- CSC108H1 is waived for students who complete CSC148H1 first. If a student has not taken a year-long course in programming in secondary school, it is strongly recommended that students take CSC108H1 first.
- Students may use CR/NCR on the course they use toward the ethics and social responsibility credit.
- Students may be permitted to take an independent reading course. A 0.5 credit of these courses may count towards program requirements, where relevant (e.g., as courses “at the 400-level”). To review eligibility criteria and apply for independent reading courses as an undergraduate student, find more information on the A&S Math website.
- Students may be permitted to take Math graduate courses. A 0.5 credit of these courses may count toward specialist program requirements, where relevant (e.g., as courses “at the 400-level”). Mathematics and Philosophy Specialist (Science Program) - ASSPE1361

The Specialist in Mathematics and Philosophy is directed toward students who are fascinated by the confluence of Mathematical and Philosophical precision.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students are encouraged to take their introductory analysis and algebra required for the program (MAT157Y1, MAT240H1, MAT247H1) as well as PHL100Y1/ PHL101Y1, which is recommended preparation for the program, in their first year of study.

Arts & Science Internship Program

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and students applying for Year 3 entry must have been admitted to the Mathematics and Philosophy Specialist in the Summer after Year 2.

Completion Requirements:

12.0 credits including at least 1.0 credit at the 400-level

Mathematics and Philosophy Fundamentals

1. Analysis: MAT157Y1, MAT257Y1
2. Algebra: MAT240H1, MAT247H1

3. Philosophy related to science: 0.5 credit from PHL232H1/ PHL233H1/ PHL255H1

Further Studies in Philosophy

4. History of Philosophy: 1.0 credit from PHL200Y1/ PHL205H1/ PHL206H1/ PHL210Y1
5. Logic: 1.0 credit from MAT309H1/ PHL348H1, PHL345H1
6. Politics and Ethics: PHL265H1/ PHL275H1
7. Topics: 2.0 credits further from PHL325H1/ PHL331H1/ PHL332H1/ PHL346H1/ PHL354H1/ PHL347H1/ PHL349H1/ PHL355H1/ PHL451H1/ PHL480H1

Further Studies in Mathematics

8. Topology: MAT327H1
9. Groups, Rings and Fields: MAT347Y1
10. Complex or Real Analysis: MAT354H1/ MAT357H1
11. Topics: 2.0 credits further of PHL/ APM/ MAT courses at the 300+ level

Notes:

- Not all courses listed have priority enrolment for students enrolled in this program. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.
- Each course can count toward only one requirement, even if listed as options to multiple requisites of the program.
- Students may be permitted to take Math graduate courses. A 0.5 credit of these courses may count toward specialist program requirements, where relevant (e.g., as courses "at the 400-level"). Mathematical Applications in Economics and Finance Specialist (Science Program) - ASSPE1700

The Specialist in Mathematical Applications in Economics and Finance is directed toward students who need a

strong Mathematics grounding for use in the study of Economics and Finance. It is an excellent preparation for an MBA.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students are encouraged to take their introductory calculus, algebra, and economics in their first year of study (MAT157Y1/ MAT137Y1, MAT223H1, MAT224H1, ECO101H1, ECO102H1).

Arts & Science Internship Program

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and students applying for Year 3 entry must have been admitted to the Mathematical Applications in Economics and Finance Specialist in the Summer after Year 2.

Completion Requirements:

12.0-12.5 credits

Fundamentals for Mathematical Applications in Economics and Finance

1. Calculus, Analysis, and Proofs: 2.0 – 2.5 credits from MAT157Y1/ (MAT137Y1, MAT246H1), MAT237Y1
2. Linear Algebra: MAT223H1, MAT224H1
3. Ordinary Differential Equations: MAT244H1/ MAT267H1
4. Principles in Economics: ECO101H1, ECO102H1
5. Probability and Statistics: STA237H1/ STA257H1, STA238H1/ STA261H1, STA347H1/ MAT370H1

Ethical and Social Responsibility

6. 0.5 credit with a significant emphasis on ethics and social responsibility (list below)

Further Studies in Economics and Finance

7. Microeconomics: ECO206Y1
8. Financial Economics: ECO358H1, ECO359H1
9. Analyzing Data relevant to Finance: STA302H1/

ECO375H1

10. Mathematical Theory of Finance: APM466H1

Further Studies in Mathematics

11. Partial Differential Equations: APM346H1
12. Real Analysis: MAT337H1
13. Special Interest Topics: 0.5 credit further from MAT332H1/ MAT344H1/ MAT475H1
14. Time Series Analysis: STA457H1
15. Nonlinear Optimization: APM462H1

Notes:

- Not all courses listed have priority enrolment for students enrolled in this program. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.
- Each course can count toward only one requirement, even if listed as options to multiple requisites of the program.
- Students may use CR/NCR on the course they use toward the ethics and social responsibility credit.
- Students may be permitted to take Math graduate courses. A 0.5 credit of these courses may count toward specialist program requirements, where relevant (e.g., as courses “at the 400-level”). To review eligibility criteria and apply for graduate courses as an undergraduate student, find more information on the A&S Math website.
- Students may be permitted to take an independent reading course. A 0.5 credit of these courses may count towards program requirements, where relevant (e.g., as courses “at the 400-level”). To review eligibility criteria and apply for independent reading courses as an undergraduate student, find more information on the A&S Math website.

Courses accepted towards this program's ethics requirement:

CSC300H1/ CSE240H1/ CSE270H1/ EEB215H1/ ENV200H1/ ESS205H1/ any ETH200+/ FOR201H1/ HIS268H1/ HPS200H1/ HPS202H1/ INS200H1/ JPH441H1/ PHL265H1/ PHL271H1/ PHL273H1/ PHL275H1/ PHL281H1/ PHL295H1/ SDS256H1/ another suitable course with permission from the Associate Chair, Undergraduate

Mathematics & Its Applications Specialist (Physical Science) (Science Program) - ASSPE1758

The Specialist in Mathematics & Its Applications (Physical Science) is directed toward students who enjoy Mathematics and who wish to use it to pursue studies in another Physical Science discipline. It can provide an entrée into the vast and rapidly growing array of subjects that rely on Mathematical techniques.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students are encouraged to take their introductory calculus/analysis, algebra, physics, and computer programming in their first year of study (MAT157Y1/ MAT137Y1, MAT223H1/ MAT240H1, MAT224H1/ MAT247H1, PHY151H1, PHY152H1, CSC108H1, CSC148H1).

Arts & Science Internship Program

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and students applying for Year 3 entry must have been admitted to the Mathematics & Its Applications Specialist (Physical Science) in the Summer after Year 2.

Completion Requirements:

12.5-13.0 credits

Fundamentals for Mathematical Applications in the Physical Sciences

1. Calculus, Analysis and Proofs: 2.0 – 2.5 credits from MAT157Y1/ (MAT137Y1, MAT246H1), MAT235Y1/ MAT237Y1/ MAT257Y1
2. Algebra: 1.0 credit from MAT223H1/ MAT240H1, MAT224H1/ MAT247H1
3. Ordinary Differential Equations: MAT244H1/ MAT267H1
4. Computer Programming: CSC108H1, CSC148H1/

CSC110Y1

5. Probability and Statistics: STA237H1/ STA257H1
6. Foundations of Physics: PHY151H1, PHY152H1
7. Foundations of Astronomy and Astrophysics: AST221H1

Ethical and Social Responsibility

8. 0.5 credit with a significant emphasis on ethics and social responsibility (list below)

Further Studies in the Physical Sciences:

9. Topics in Physics: 1.5 credits from AST222H1/ PHY250H1/ PHY252H1/ PHY254H1/ PHY256H1
10. Additional Topics: 1.5 credits from AST320H1/ AST325H1/ MAT337H1/ MAT363H1/ MAT367H1/ PHY350H1/ PHY354H1/ PHY356H1/ PHY357H1/ PHY358H1

Further Studies in Mathematics

11. Groups and Symmetries: MAT301H1
12. Complex Variables: MAT334H1
13. Partial Differential Equations: 0.5 credit from APM346H1/ MAT351Y1
14. Advanced Topics: 1.0 credit from APM421H1/ APM426H1/ APM441H1/ APM446H1/ PHY407H1/ PHY408H1/ PHY456H1

Notes:

- Not all courses listed have priority enrolment for students enrolled in this program. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.
- Each course can count toward only one requirement, even if listed as options to multiple requisites of the program.
- CSC108H1 is waived for students who complete CSC148H1 first. If a student has not taken a year-long course in programming in secondary school, it is strongly recommended that students take CSC108H1 first.
- Students may use CR/NCR on the course they use toward the ethics and social responsibility credit.
- Students may be permitted to take Math graduate courses. A 0.5 credit of these courses may count toward specialist program requirements, where relevant (e.g., as courses “at the 400-level”). To review eligibility criteria and apply for graduate courses as an undergraduate student, find more information on the A&S Math website.
- Students may be permitted to take an independent reading course. A 0.5 credit of these courses may count towards program requirements, where relevant (e.g., as courses “at the 400-level”). To review eligibility criteria and

apply for independent reading courses as an undergraduate student, find more information on the A&S Math website.

Courses accepted towards this program's ethics requirement:

CSC300H1/ CSE240H1/ CSE270H1/ EEB215H1/ ENV200H1/ ESS205H1/ any ETH200+/ FOR201H1/ HIS268H1/ HPS200H1/ HPS202H1/ INS200H1/ JPH441H1/ PHL265H1/ PHL271H1/ PHL273H1/ PHL275H1/ PHL281H1/ PHL295H1/ SDS256H1/ another suitable course with permission from the Associate Chair, Undergraduate

Mathematics & Its Applications Specialist (Probability/Statistics) (Science Program) - ASSPE1890

The Specialist in Mathematics & Its Applications (Probability/Statistics) is directed toward students whose interests include both Mathematics and its applications in Probability and Statistics. These skills are in high demand in a world in which the uses of AI are expanding by leaps and bounds.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students are encouraged to take their introductory calculus/analysis, algebra, and computer programming in their first year of study (MAT157Y1/ MAT137Y1, MAT223H1/ MAT240H1, MAT224H1/ MAT247H1, CSC108H1, CSC148H1).

Arts & Science Internship Program

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year

3 entry and students applying for Year 3 entry must have been admitted to the Mathematics & Its Applications Specialist (Probability/Statistics) in the Summer after Year 2.

Completion Requirements:

11.5-12.5 credits

Fundamentals for Mathematical Applications in Probability and Statistics

1. Calculus, Analysis and Proofs: 2.0 – 2.5 credits from MAT157Y1/ (MAT137Y1, MAT246H1), MAT237Y1/ MAT257Y1
2. Algebra: 1.0 credit from MAT223H1/ MAT240H1, MAT224H1/ MAT247H1
3. Ordinary Differential Equations: MAT244H1/ MAT267H1
4. Computer Programming: CSC108H1, CSC148H1/ CSC110Y1
5. Probability and Statistics: STA237H1/ STA257H1, STA238H1/ STA261H1, STA347H1/ MAT377H1/ MAT370H1

Ethical and Social Responsibility

6. 0.5 credit with a significant emphasis on ethics and social responsibility (list below)

Further Studies in Probability and Statistics

7. Data Analysis: STA302H1
8. Related Structures: 1.0 credit from STA355H1/ MAT332H1/ MAT344H1/ APM348H1/ APM461H1
9. Advanced Statistics: 1.0 credit from STA452H1/ STA453H1/ STA437H1/ STA442H1/ STA447H1/ STA465H1/ STA410H1

Further Studies in Mathematics

10. Groups and Symmetries: MAT301H1
11. Complex Variables: MAT334H1
12. Real Analysis: MAT337H1
13. Partial Differential Equations or Optimization: 0.5 credit from APM346H1/ MAT351Y1/ APM462H1
14. Advanced Topics: Additional 1.0 credit at the 300+ level from APM/MAT courses

Notes:

- Not all courses listed have priority enrolment for students enrolled in this program. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.
- Each course can count toward only one requirement, even if listed as options to multiple requisites of the program.

- CSC108H1 is waived for students who complete CSC148H1 first. If a student has not taken a year-long course in programming in secondary school, it is strongly recommended that students take CSC108H1 first.
- Students may use CR/NCR on the course they use toward the ethics and social responsibility credit.
- Students may be permitted to take Math graduate courses. A 0.5 credit of these courses may count toward specialist program requirements, where relevant (e.g., as courses “at the 400-level”). To review eligibility criteria and apply for graduate courses as an undergraduate student, find more information on the A&S Math website.
- Students may be permitted to take an independent reading course. A 0.5 credit of these courses may count towards program requirements, where relevant (e.g., as courses “at the 400-level”). To review eligibility criteria and apply for independent reading courses as an undergraduate student, find more information on the A&S Math website.

Courses accepted towards this program’s ethics requirement:

CSC300H1/ CSE240H1/ CSE270H1/ EEB215H1/ ENV200H1/ ESS205H1/ any ETH200+/ FOR201H1/ HIS268H1/ HPS200H1/ HPS202H1/ INS200H1/ JPH441H1/ PHL265H1/ PHL271H1/ PHL273H1/ PHL275H1/ PHL281H1/ PHL295H1/ SDS256H1/ another suitable course with permission from the Associate Chair, Undergraduate

Mathematics & Its Applications Specialist (Teaching) (Science Program) - ASSPE1580

The Specialist Mathematics & Its Applications Specialist (Teaching) is directed toward students who are interested in teaching at the elementary or secondary level and who wish to bring a strong Mathematics background to bear in the classroom.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students are encouraged to take their introductory analysis, algebra, and programming in their first year of

study (MAT157Y1/ MAT137Y1, MAT223H1/ MAT240H1, MAT224H1/ MAT247H1, CSC108H1).

Arts & Science Internship Program

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and students applying for Year 3 entry must have been admitted to the Mathematics & Its Applications Specialist (Teaching) in the Summer after Year 2.

Completion Requirements:

10.5-11.0 credits, including at least 1.0 credit at the 400-level

Fundamentals for Mathematical Applications related to Teaching

1. Calculus, Analysis and Proofs: 2.0 – 2.5 credits from MAT157Y1/ (MAT137Y1, MAT246H1), MAT235Y1/ MAT237Y1/ MAT257Y1
2. Algebra: 1.0 credit from MAT223H1/ MAT240H1, MAT224H1/ MAT247H1
3. Ordinary Differential Equations: MAT244H1/ MAT267H1
4. Computer Programing: CSC108H1/ CSC110Y1
5. Probability and Statistics: STA237H1/ STA257H1

Ethical and Social Responsibility

6. 0.5 credit with a significant emphasis on ethics and social responsibility (list below)

Further Studies in Mathematics related to Teaching

7. Concepts in Elementary Mathematics: MAT329Y1
8. History of Mathematics: 1.0 credit from HPS390H1/ MAT390H1, HPS391H1/ MAT391H1
9. Intriguing Topics: 1.0 credit from MAT309H1/ MAT315H1/ STA302H1/ STA347H1/ MAT370H1

Further Studies in Mathematics:

10. Groups & Symmetries: MAT301H1
11. Complex Variables: MAT334H1
12. Advanced Topics: 1.0 credit further from MAT332H1/ MAT335H1/ MAT337H1/ MAT344H1/ MAT363H1/ MAT367H1
13. Further Topics: 1.0 credit of any APM/MAT 400-level courses, MAT401H1/ MAT402H1 recommended

Notes:

- Not all courses listed have priority enrolment for students enrolled in this program. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.
- Each course can count toward only one requirement, even if listed as options to multiple requisites of the program.
- Students may use CR/NCR on the course they use toward the ethics and social responsibility credit.
- Students may be permitted to take Math graduate courses. A 0.5 credit of these courses may count toward specialist program requirements, where relevant (e.g., as courses “at the 400-level”). To review eligibility criteria and apply for graduate courses as an undergraduate student, find more information on the A&S Math website.
- Students may be permitted to take an independent reading course. A 0.5 credit of these courses may count towards program requirements, where relevant (e.g., as courses “at the 400-level”). To review eligibility criteria and apply for independent reading courses as an undergraduate student, find more information on the A&S Math website.

Courses accepted towards this program's ethics requirement:

CSC300H1/ CSE240H1/ CSE270H1/ EEB215H1/ ENV200H1/ ESS205H1/ any ETH200+/ FOR201H1/ HIS268H1/ HPS200H1/ HPS202H1/ INS200H1/ JPH441H1/ PHL265H1/ PHL271H1/ PHL273H1/ PHL275H1/ PHL281H1/ PHL295H1/ SDS256H1/ another suitable course with permission from the Associate Chair, Undergraduate

Mathematics Major (Science Program) - ASMAJ1165

The Major in Mathematics is directed toward students who are interested in combining a solid knowledge of Mathematics with studies in other disciplines. While typically less in-depth than the Specialist Programs, it still covers a broad swath of the subject.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students are encouraged to take their introductory calculus/analysis and algebra in their first year of study [(MAT135H1, MAT136H1)/ (MAT137Y1/ MAT157Y1)], (MAT223H1/ MAT240H1, MAT224H1/ MAT247H1)

Arts & Science Internship Program

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and students applying for Year 3 entry must have been admitted to the Mathematics Major in the Summer after Year 2.

Completion Requirements:

7.5 credits, including 2.5 credits at the 300+ level with a minimum of 0.5 credit at the 400 level

Mathematics Fundamentals

1. 2.5 credits from (MAT135H1, MAT136H1, MAT246H1)/ (MAT137Y1, MAT246H1)/ (MAT157Y1, 0.5 credit from APM/MAT200+ courses), MAT235Y1/ MAT237Y1/ MAT257Y1

2. Algebra: 1.0 credit from MAT223H1/ MAT240H1, MAT224H1/ MAT247H1

3. Ordinary Differential Equations: MAT244H1/ MAT267H1

Ethical and Social Responsibility

4. 0.5 credit with a significant emphasis on ethics and social responsibility (list below)

Higher Studies in Mathematics

5. Groups and Symmetries: MAT301H1

6. Mathematical Logic or Number Theory: MAT309H1/ MAT315H1

7. Complex Variables: MAT334H1

8. Further Topics: 1.5 credits including 1.0 credit at the 300+ level including 0.5 credit at the 400-level: ACT240H1/ ACT230H1/ APM236H1/ APM346H1/ any APM400-level course/ HPS390H1/ HPS391H1/ MAT309H1/ MAT315H1/ MAT332H1/ MAT335H1/ MAT337H1/ MAT344H1/ MAT363H1/ MAT390H1/

MAT391H1/ any MAT400-level course/ PSL432H1/ STA247H1/ STA257H1

Notes:

- Only 0.5 credit of HPS390H1/ MAT390H1/ HPS391H1/ MAT391H1 may count toward the major completion requirement of "further topics."
- Each course can count toward only one requirement, even if listed as options to multiple requisites of the program.
- Not all courses listed have priority enrolment for students enrolled in this program. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.
- Students may use CR/NCR on the course they use toward the ethics and social responsibility credit.
- Students may be permitted to take Math graduate courses. A 0.5 credit of these courses may count toward specialist program requirements, where relevant (e.g., as courses "at the 400-level"). To review eligibility criteria and apply for graduate courses as an undergraduate student, find more information on the A&S Math website.
- Students may be permitted to take an independent reading course. A 0.5 credit of these courses may count towards program requirements, where relevant (e.g., as courses "at the 400-level"). To review eligibility criteria and apply for independent reading courses as an undergraduate student, find more information on the A&S Math website.
- Students interested in becoming K-12 teachers should consider applying to the combined degree program --- a six-year program that leads to an Honours Bachelor of Science (HBSc) from the University of Toronto and a Master of Teaching (MT) from the Ontario Institute for Studies in Education (OISE). The HBSc part of this program involves completing a Math Major, a Minor in Education and Society (offered by Victoria College) and a Minor in an area that would lead to a second "teachable" subject. Please see the Victoria College website for more information.

Courses accepted towards this program's ethics requirement:

CSC300H1/ CSE240H1/ CSE270H1/ EEB215H1/ ENV200H1/ ESS205H1/ any ETH200+/ FOR201H1/ HIS268H1/ HPS200H1/ HPS202H1/ INS200H1/ JPH441H1/ PHL265H1/ PHL271H1/ PHL273H1/ PHL275H1/ PHL281H1/ PHL295H1/ SDS256H1/ another

suitable course with permission from the Associate Chair, Undergraduate

Mathematics Minor (Science Program) - ASMIN1165

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students are encouraged to take their introductory calculus/analysis and algebra in their first year of study [(MAT135H1, MAT136H1/ MAT137Y1/ MAT157Y1)], (MAT223H1/ MAT240H1, MAT224H1/ MAT247H1)

Completion Requirements:

4.0 credits, including 1.0 at the 300+ level

1. Calculus: 2.0 credits from (MAT135H1, MAT136H1/ MAT137Y1/ MAT157Y1, MAT235Y1/ MAT237Y1/ MAT257Y1)
2. Algebra: MAT221H1(80%+)/ MAT223H1/ MAT240H1
3. Further Fundamentals in Mathematics: MAT224H1/ MAT244H1/ MAT246H1/ APM236H1/ MAT247H1
4. Advanced Topics: 1.0 credit at the 300+ level from APM/MAT courses

Notes:

- Only 0.5 credit of APM306Y1 may count toward the Minor program
- A minimum of 80% is required for MAT221H1 so that it may be used as a pre-requisite for higher level courses that accept MAT221H1 as a pre-requisite option.
- PSL432H1, HPS390H1, HPS391H1 may count toward the "Advanced Topics" requirement.
- Each course can count toward only one requirement, even if listed as options to multiple requisites of the program.
- Not all courses listed have priority enrolment for students enrolled in this program. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.

Combined Degree Program (CDP) offered with Victoria College and Ontario Institute for Studies in Education (OISE)

- Combined Degree Program in HBA/HBSc and Master of Teaching (MT)

Students enrolled in the Minor in Education and Society and Major in Mathematics may apply for this Combined Degree Program. For details about application and

Mathematics Courses

MAT133Y1 - Calculus and Linear Algebra for Commerce

Hours: 72L

Mathematics of finance. Matrices and linear equations. Review of differential calculus; applications. Integration and fundamental theorem; applications. Introduction to partial differentiation; applications. Course material expects at minimum high school calculus has been completed prior to undertaking course. This course will be useful for students interested in learning applied calculus in relation to future studies in commerce and/or social science programs.

Prerequisite: High school level calculus

Exclusion: MAT133Y5/ (MATA32H3, MATA33H3)

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT135H1 - Calculus I

Hours: 36L/12T

In this first introduction to Calculus, students will be introduced to the tools of differential calculus, the branch of calculus that is motivated by the problem of measuring how quantities change. Students will use these tools to solve other problems, including simplifying functions with straight lines, describing how different types of change are related, and computing maximum and minimum quantities. This course will focus on developing a deep understanding of why the tools of calculus make sense and how to apply them to the social, biological, and physical sciences. It will also emphasize translating between algebraic, graphical, numerical and verbal descriptions of each concept studied. This course will be

program requirements, see the [Combined Degree Programs](#) section.

Joint Programs

- Economics and Mathematics, see [Economics](#)
- Statistics and Mathematics, see [Statistical Sciences](#)
- Combined Degree Program: STG, Honours Bachelor of Science, Major in Mathematics / Master of Teaching

useful for students interested in learning applied calculus in relation to future studies in economics, life science, and physical and mathematical science programs. The following concepts will be studied: Limits, asymptotes, continuity, derivatives, linear approximation of functions, the notion of a differential equation (DE) and a solution of a DE, slope fields, and Euler's method.

Prerequisite: High school level calculus

Exclusion: MAT135H5/ MAT136H5/ MATA30H3/ MATA31H3/ MATA36H3/ APS162H1/ APS163H1/ ESC194H1/ ESC195H1/ MAT186H1/ MAT187H1/ MAT196H1/ MAT197H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT136H1 - Calculus II

Hours: 36L/12T

This second part of the introductory Calculus sequence focuses on integral calculus beginning with the Fundamental Theorem of Calculus, the connection between two seemingly unrelated problems: measuring changing quantities and finding areas of curved shapes. Students will develop a deep understanding of the integral, and use it to: unpack equations involving derivatives; to make sense of infinite sums; to write complicated functions as 'infinite polynomials'; and to compute areas, volumes, and totals in applied problems. This course will further develop students' abilities to translate between algebraic, graphical, numerical, and verbal descriptions of mathematics in a variety of applied contexts. This course is a continuation of [MAT135H1](#) and will be useful for students interested in learning applied calculus in relation to future studies in economics, life science, and physical and mathematical science programs. The following concepts will be studied: Integration, basic techniques of integration (substitution and by parts), improper integrals, using computer algebra systems (CAS) for integration, Taylor polynomials and Taylor series, ratio test for power series, radius of

convergence of power series, first-order differential equations and systems of differential equations: modelling, separable DEs, and using CAS to study and find solutions.

Prerequisite: MAT135H1/ MAT135H5/ MATA30H3/ MATA31H3/ APS162H1/ ESC194H1/ MAT186H1/ MAT196H1

Exclusion: MAT136H5/ MATA36H3/ APS163H1/ ESC195H1/ MAT187H1/ MAT197H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT137Y1 - Calculus with Proofs

Hours: 72L/24T

A conceptual approach for students interest in theoretical foundations of mathematics. Attention is given to computational aspects as well as problem-solving techniques. Limits and continuity, mean value theorem, elementary transcendental functions including trigonometric functions, inverse function theorem, differentiation, integration, fundamental theorem of calculus, Taylor's theorem, sequences and series, power series, and applications. This course will be useful for students interested in learning theoretical calculus and proofs in relation to future studies in computer science, economics, mathematics, physics, and statistics.

Prerequisite: High school level calculus

Exclusion: MAT137Y5/ (MAT137H5, MAT139H5)/ (MATA30H3/ MATA31H3, MATA37H3)

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT138H1 - Introduction to Proofs

Hours: 36L/12T

The goal of this course is for students to become comfortable with abstraction, rigour, logic, and proofs. They will practice reading and understanding mathematical statements, analyzing definitions and properties, formulating conjectures and generalizations, providing and writing reasonable and precise arguments, writing and critiquing proofs. The instructor may use specific mathematical content, which could vary from year to year, to practice these skills. Students who take MAT135H1 and MAT136H1 and wish to take MAT237Y1 are required to take MAT138H1 prior to undertaking MAT237Y1. Students who are taking MAT137Y1 or MAT157Y1 and/or MAT240H1 and are interested in more preparation with logical arguments are encouraged to take MAT138H1 concurrently.

Prerequisite: High school level calculus

Exclusion: MAT137Y1/ MAT137Y5/ (MAT137H5, MAT139H5)/ (MATA30H3/ MATA31H3, MATA37H3)/ MAT157Y1/ MAT157Y5

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT157Y1 - Analysis I

Hours: 72L/48T

A theoretical course in calculus; emphasizing proofs and techniques. Elementary logic, limits and continuity, least upper bounds, intermediate and extreme value theorems. Derivatives, mean value and inverse function theorems. Integrals, fundamental theorem, elementary transcendental functions. Techniques of integration. Taylor's theorem; sequences and series; uniform convergence and power series. This course is required for the Mathematics Specialist, the Applied Mathematics Specialist, the Mathematics and Physics Specialist, and the Mathematics and Philosophy Specialist program and provides a strong theoretical mathematics background.

Prerequisite: High school level calculus

Exclusion: MAT157Y5/ (MAT157H5, MAT159H5)

Recommended Preparation: Preparing for University Math (PUMP) Level II. Students may also want to take MAT138H1 concurrently with MAT157Y1.

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT192H1 - Mathematics and Art

Hours: 36L

This course will explore the various bridges between Mathematics and Art.

We will combine exploration of mathematical concepts with the artistic visualization of those concepts through a range of mediums, including fine art, architecture, origami, textile, fiber art, dance and movement, craft, and digital art. We will investigate the potential of mathematics to generate visually appealing objects that reveal some of the structure of the underlying mathematics. On the flip side, we study existing artworks from a mathematical vantage point to uncover new aspects of their beauty.

One of the main goals of the course is to open a new window to process mathematical concepts and to link the creative processes inherent in both mathematics and the arts.

Along the way students develop insight into the diversity and overarching nature of mathematics as well as an intuitive understanding of concepts such as numerical sequences, Euclidean geometry, tiling, fractals, platonic

solids, hyperbolic geometry, and topology. This course is a combination of theory and hands on activities. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: High school algebra

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT193H1 - Women's Mathematics

Hours: 36S

Mathematics has been shaped in significant ways by the work of outstanding female mathematicians such as Hypatia, Emmy Noether, Sofia Kovalevskaya, and Maryam Mirzakhani. Despite these successes, women still experience barriers to entering the field and participating at the highest levels. This course will blend an exploration of mathematics created by women with a study of the issue of women in mathematics. Students will have the opportunity to examine the complex factors that impact women's participation in STEM, learn about the lives of female mathematicians, create their own mathematics, and sharpen their spatial cognition and logical thinking skills. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: High school level algebra.

Exclusion: Not intended for students in a Mathematics Specialist or Major program.

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT194H1 - Mathematical Personalities

Hours: 24L

An in-depth study of the life, times and work of several mathematicians who have been particularly influential. Examples may include but are not limited to: Coxeter, Euler, Germain, Grothendieck, Hilbert, Kovalevskaya, Kowalewski, Mirzakhani, Newton, Noether, Ramanujan. Not intended for students in a Mathematics Specialist or Major program. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT195H1 - Mathematics as an Interdisciplinary Pursuit

Hours: 24L

A study of the interaction of mathematics with other fields of inquiry: how mathematics influences, and is influenced by, the evolution of science and culture. Art, music, and literature, as well as the more traditionally related areas of the natural and social sciences may be considered. Not intended for students in a Mathematics Specialist or Major program. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT197H1 - Mathematics as a Recreation, Mathematical Discovery and Creative Problem Solving

Hours: 24L

This course is an exploration into the creative process and use of imagination as they arise in the context of mathematical problem solving, puzzles, and recreational mathematics. The topics for the course may include a study of games, puzzles and problems that require a pre-Calculus background. One of the course's main goals is to hone each participant's creativity and mathematical problem-solving skills while guiding them towards the 'Aha!' experience which accompanies independent discovery. Not intended for students in Mathematics Specialist or Major programs. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT198H1 - Cryptology: The Mathematics of Secrecy and Security

Hours: 24S

How do we send our own confidential information through secure channels, and how can we break codes to uncover the secret information of our adversaries? The mathematical field of cryptology is dedicated to answering such questions. In this course we will study breakthroughs in cryptology, from secret messages in the ancient world and the Enigma cipher in World War II, to modern cryptosystems that facilitate online commerce. Along the way, you will develop a sophisticated understanding of how numbers interact and develop the ability to communicate messages secretly and mathematics clearly. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: High school level algebra.

Exclusion: Not intended for students in a Mathematics Specialist or Major program.

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT199H1 - Aha! Mathematical Discovery and Creative Problem Solving

Hours: 36S

This course is an exploration into the creative process and use of imagination as they arise in the context of mathematical problem solving. The problems, which are all at a pre-calculus level, are chosen primarily by the criterion of aesthetic appeal, and emphasize reasoning rather than technique. Still, many of them are quite challenging, and substantial independent thinking will be required, the course is therefore appropriate for students from a variety of backgrounds and disciplines, including hard sciences. Its goal will be to hone each participant's creativity and mathematical problem-solving skills while guiding them towards the 'Aha!' experience which accompanies independent discovery. Restricted to first-year students. Not eligible for CR/NCR option.

Prerequisite: High school level algebra

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT221H1 - Applied Linear Algebra

Hours: 36L/12T

An application-oriented approach to linear algebra, based on calculations in standard Euclidean space. Systems of linear equations, matrices, Gaussian elimination, subspaces, bases, orthogonal vectors and projections. Matrix inverses, kernel and range, rank-nullity theorem. Determinants, eigenvalues and eigenvectors, Cramer's rule, diagonalization. This course has strong emphasis on building computational skills in the area of algebra. Applications to curve fitting, economics, Markov chains and cryptography.

Prerequisite: High school level calculus

Exclusion: MAT223H1/ MAT223H5/ MATA22H3/ MATA23H3/ MAT224H1/ MAT224H5/ MATB24H3/ MAT240H1/ MAT240H5/ MAT185H1/ MAT188H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT223H1 - Linear Algebra I

Hours: 36L/12T

A first course on linear algebra in \mathbb{R}^n emphasizing the interplay between algebraic and geometric perspectives. Topics include systems of equations, Gaussian elimination, representations of lines and planes, dot products, subspaces and translated subspaces, bases and change of basis, projections, the rank and nullity of a linear transformation, the rank/nullity/row space/column space of a matrix, matrix inverses, determinants, eigenvectors and eigenvalues, and matrix diagonalization. While not emphasizing proofs, this course does maintain a careful distinction between vectors and their representation in a basis as well as between matrices and linear transformations.

Prerequisite: High school level calculus

Exclusion: MAT223H5/ MATA22H3/ MATA23H3/ MAT224H1/ MAT224H5/ MATB24H3/ MAT240H1/ MAT240H5/ MAT247H1/ MAT247H5/ MAT185H1/ MAT188H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT224H1 - Linear Algebra II

Hours: 36L/12T

Fields, complex numbers, vector spaces over a field, linear transformations, matrix of a linear transformation, kernel, range, dimension theorem, isomorphisms, change of basis, eigenvalues, eigenvectors, diagonalizability, real and complex inner products, spectral theorem, adjoint/self-adjoint/normal linear operators, triangular form, nilpotent mappings, Jordan canonical form.

Prerequisite: MAT221H1(80%)/ MAT223H1/ MAT223H5/ MATA22H3/ MATA23H3/ MAT240H1/ MAT240H5

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT235Y1 - Multivariable Calculus

Hours: 72L

Parametric equations and polar coordinates. Vectors, vector functions and space curves. Differential and integral calculus of functions of several variables. Line integrals and surface integrals and classic vector calculus theorems. Examples from life sciences and physical science applications.

Prerequisite: MAT133Y1/ MAT133Y5/ (MATA32H3, MATA33H3)/ (MAT135H1, MAT136H1)/ (MAT135H5, MAT136H5)/ (MATA30H3/ MATA31H3, MATA36H3/ MATA37H3)/ MAT137Y1/ MAT137Y5/ (MAT137H5, MAT139H5)/ MAT157Y1/ MAT157Y5/ (MAT157H5, MAT159H5)

Exclusion: MAT235Y5/ (MAT232H5/ MAT233H5, MAT236H5/ MAT368H5)/ (MATB41H3, MATB42H3)/ MAT237Y1/ MAT291H1/ MAT294H1

Recommended Preparation: MAT223H1/ MAT223H5/ MATA22H3/ MATA23H3/ MAT240H1/ MAT240H5

Breadth Requirements: The Physical and Mathematical Universes (5)

APM236H1 - Applications of Linear Programming

Hours: 36L

Introduction to linear programming including a rapid review of linear algebra (row reduction, matrix inversion, linear independence), the simplex method with applications, the duality theorem, complementary slackness, the dual simplex method and the revised simplex method.

Prerequisite: MAT221H1/ MAT223H1/ MAT223H5/ MATA22H3/ MATA23H3/ MAT240H1/ MAT240H5

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT237Y1 - Multivariable Calculus with Proofs

Hours: 72L

Elementary topology in Euclidean space. Differential calculus of vector valued functions of a vector variable. Implicit and inverse function theorems, regular surfaces. Optimization, Lagrange multipliers, multivariable Taylor polynomials. Integral calculus with the Jordan measure. Fubini's theorem, change of variables. Line and surface integrals. Vector calculus in two- and three-dimensions. Green's theorem, Divergence theorem, Stokes' theorem. Fourier series. This course is recommended for students interested in proof-based multivariable calculus with balanced emphasis between theory and applications.

Prerequisite: [MAT133Y1/ (MAT135H1, MAT136H1)/ (MAT135H5, MAT136H5)/ (MATA30H3/ MATA31H3, MATA36H3), MAT138H1/ MAT102H5/ MAT246H1]/ MAT137Y1/ MAT137Y5/ (MAT137H5, MAT139H5)/ (MATA30H3/ MATA31H3, MATA37H3)/ MAT157Y1/ MAT157Y5/ (MAT157H5, MAT159H5), MAT223H1/ MATA22H3/ MATA23H3/ MAT240H1/ MAT240H5

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT240H1 - Algebra I

Hours: 36L/24T

A theoretical approach to: vector spaces over arbitrary fields, including \mathbb{C} and \mathbb{Z}_p . Subspaces, bases and dimension. Linear transformations, matrices, change of basis, similarity, determinants. Polynomials over a field (including unique factorization, resultants). Eigenvalues, eigenvectors, characteristic polynomial, diagonalization. Minimal polynomial, Cayley-Hamilton theorem.

Prerequisite: High school level calculus

Corequisite: MAT157Y1/ (MAT157H5, MAT159H5)

Exclusion: MAT240H5

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT244H1 - Introduction to Ordinary Differential Equations

Hours: 36L

First order ordinary differential equations: Direction fields, integrating factors, separable equations, homogeneous equations, exact equations, autonomous equations, modeling. Existence and uniqueness theorem. Higher order equations: Constant coefficient equations, reduction of order, Wronskian, method of undetermined coefficients, variation of parameters. Solutions by series and integrals. First order linear systems, fundamental matrices. Non-linear equations, phase plane, stability. Applications in life and physical sciences and economics.

Prerequisite: (MAT133Y1/ MAT135H1/ MAT135H5/ MATA35H3/ MATA30H3/ MATA31H3, MAT136H1/ MAT136H5/ MATA36H3/ MATA37H3)/ MAT135Y5/ MAT137Y1/ MAT137Y5/ (MAT137H5, MAT139H5)/ MAT157Y1/ MAT157Y5/ (MAT157H5, MAT159H5), MAT223H1/ MATA23H3/ MAT223H5/ MAT240H1/ MAT240H5

Corequisite: MAT235Y1/ MAT237Y1/ MAT257Y1

Exclusion: MAT242H5/ MAT244H5/ MATB44H3/ MAT212H5/ MAT258Y5/ MAT292H1/ MAT267H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT245H1 - Mathematical Methods in Data Science

Hours: 36L/24P

An introduction to the mathematical methods behind scientific techniques developed for extracting information from large data sets. Elementary probability density functions, conditional expectation, inverse problems, regularization, dimension reduction, gradient methods, singular value decomposition and its applications, stability, diffusion maps. Examples from applications in data science and big data.

Prerequisite: [MAT137Y1/ MAT157Y1](#), [MAT223H1/ MAT240H1](#), [MAT224H1/ MAT247H1](#)

Corequisite: [MAT237Y1/ MAT257Y1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT246H1 - Concepts in Abstract Mathematics

Hours: 36L/12T

Designed to introduce students to mathematical proofs and abstract mathematical concepts. Topics may include modular arithmetic, sizes of infinite sets, and a proof that some angles cannot be trisected with straightedge and compass.

Prerequisite: [MAT133Y1/ MAT133Y5](#)/ ([MATA32H3](#), [MATA33H3](#)/ ([MAT135H1](#), [MAT136H1](#)/ ([MAT135H5](#), [MAT136H5](#)/ ([MATA30H3/ MATA31H3](#), [MATA36H3/ MATA37H3](#)/ [MAT137Y1/ MAT137Y5](#)/ ([MAT137H5](#), [MAT139H5](#)), [MAT223H1/ MATA22H3/ MATA23H3/ MAT240H1/ MAT240H5](#)

Exclusion: [MAT157Y1/ MAT157Y5/ MAT157H5/ MAT159H5](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT247H1 - Algebra II

Hours: 36L

A theoretical approach to real and complex inner product spaces, isometries, orthogonal and unitary matrices and transformations. The adjoint. Hermitian and symmetric transformations. Spectral theorem for symmetric and normal transformations. Polar representation theorem. Primary decomposition theorem. Rational and Jordan canonical forms. Additional topics including dual spaces, quotient spaces, bilinear forms, quadratic surfaces, multilinear algebra.

Prerequisite: [MAT240H1/ MAT240H5](#)

Corequisite: [MAT157Y1/ \(MAT157H5, MAT159H5\)](#)

Exclusion: [MAT247H5](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT257Y1 - Analysis II

Hours: 72L/48T

Topology of \mathbb{R}^n ; compactness, functions and continuity, extreme value theorem. Derivatives; inverse and implicit function theorems, maxima and minima, Lagrange

multipliers. Integration; Fubini's theorem, partitions of unity, change of variables. Differential forms. Manifolds in \mathbb{R}^n ; integration on manifolds; Stokes' theorem for differential forms and classical versions. Some topics may vary year-to-year.

Prerequisite: [MAT157Y1/ \(MAT157H5, MAT159H5\)](#)/ [MAT157Y5, MAT247H1/ MAT247H5](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT267H1 - Advanced Ordinary Differential Equations

Hours: 36L/12T

A theoretical course on Ordinary Differential Equations. First-order equations: separable equations, exact equations, integrating factors. Variational problems, Euler-Lagrange equations. Linear equations and first-order systems. Fundamental matrices, Wronskians. Non-linear equations. Existence and uniqueness theorems. Method of power series. Elementary qualitative theory; stability, phase plane, stationary points. Oscillation theorem, Sturm comparison. Applications in mechanics, physics, chemistry, biology and economics.

Prerequisite: [MAT157Y1/ \(MAT157H5, MAT159H5\)](#)/ [MAT157Y5, MAT247H1/ MAT247H5](#)

Corequisite: [MAT257Y1](#)

Exclusion: [MAT234H1/ MAT292H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT271H1 - Insights from Mathematics

Hours: 36L/6T

This breadth course is accessible to students with limited mathematical background. Various mathematical techniques will be illustrated with examples from humanities and social science disciplines. Some of the topics will incorporate user friendly computer explorations to give participants the feel of the subject without requiring skill at calculations.

Note: This course cannot be used to satisfy requirements of program in the math department.

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT282H1 - Topics in Mathematics

Hours: 36L

A course in mathematics on a topic outside the current undergraduate offerings. For information on the specific topic to be studied and possible additional prerequisites, go to <http://www.math.toronto.edu/cms/current-students-ug/>

Prerequisite: 1.0 MAT credit at the 100-level. Possible additional topic-specific prerequisites.

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT295H1 - Independent Reading in Mathematics

Independent study under the direction of a faculty member. Topic must be outside undergraduate offerings. Similar workload to a 36L course. Not eligible for CR/NCR option.

Completed applications for this course are due to the Math Undergraduate Program Office no later than the third day of the term that the reading course will start.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT296H1 - Independent Reading in Mathematics

Independent study under the direction of a faculty member. Topic must be outside undergraduate offerings. Workload equivalent to a 36L course. Not eligible for CR/NCR option.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT297Y1 - Research Project in Mathematics

Independent research under the direction of a faculty member. Similar workload to a 72L course. Not eligible for CR/NCR option.

Completed applications for this course are due to the Math Undergraduate Program Office no later than the third day of the term that the reading course will start.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

MAT299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

MAT301H1 - Groups and Symmetries

Hours: 36L

Congruences and fields. Permutations and permutation groups. Linear groups. Abstract groups, homomorphisms, subgroups. Symmetry groups of regular polygons and Platonic solids, wallpaper groups. Group actions, class formula. Cosets, Lagrange theorem. Normal subgroups, quotient groups. Classification of finitely generated abelian groups. Emphasis on examples and calculations.

Prerequisite: MAT257Y1/ (MAT224H1/ MAT247H1, MAT235Y1/ MAT237Y1, MAT246H1/ MAT157Y1/ (MAT157H5, MAT159H5)/ MAT157Y5/ CSC236H1/ CSC240H1)/ (MAT185H1, MAT194H1, MAT195H1)

Exclusion: MAT347Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

APM306Y1 - Mathematics and Law

Hours: 72L

This course examines the relationship between legal reasoning and mathematical logic; provides a mathematical perspective on the legal treatment of interest and actuarial present value; critiques ethical issues; analyzes how search engine techniques on

massive databases transform legal research and considers the impact of statistical analysis and game theory on litigation strategies.

NOTE

This course counts as 0.5 credit in BR=3 and 0.5 credit in BR=5.

This course will only contribute 0.5 credit to the Math Minor program.

Prerequisite: MAT133Y1/ MAT135H1/ MAT135H5/ MAT136H1/ MAT136H5/ MAT137Y1/ MAT137Y5/ (MAT137H5, MAT139H5)/ MAT157Y1/ MAT157Y5/ (MAT157H5, MAT159H5), MAT221H1/ MAT223H1/ MAT240H1

Breadth Requirements: The Physical and Mathematical Universes (5), Society and its Institutions (3)

MAT309H1 - Introduction to Mathematical Logic

Hours: 36L

Predicate calculus. Relationship between truth and provability; Gödel's completeness theorem. First order arithmetic as an example of a first-order system. Gödel's incompleteness theorem; outline of its proof. Introduction to recursive functions.

Prerequisite: MAT257Y1/ [MAT223H1/ MATA23H3/ MAT223H5/ MAT240H1/ MAT240H5, MAT235Y1/ MAT235Y5/ (MAT232H5, MAT236H5)/ (MATB41H3, MATB42H3/ MATB43H3)/ MAT237Y1/ MAT237Y5, MAT246H1/ MAT157Y1/ (MAT157H5, MAT159H5)/ MAT157Y5/ CSC236H1/ CSC240H1]

Exclusion: CSC438H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT315H1 - Introduction to Number Theory

Hours: 36L

Elementary topics in number theory: arithmetic functions; polynomials over the residue classes modulo m , characters on the residue classes modulo m ; quadratic reciprocity law, representation of numbers as sums of squares.

Prerequisite: (MAT223H1/ MATA23H3/ MAT223H5/ MAT240H1/ MAT240H5, MAT235Y1/ MAT235Y5/ (MAT232H5, MAT236H5)/ (MATB41H3, MATB42H3)/ MAT237Y1/ (MATB41H3, MATB42H3, MATB43H3)/

MAT237Y5, MAT246H1/ CSC236H1/ CSC240H1)/ MAT157Y1/ MAT157Y5/ (MAT157H5, MAT159H5)/ MAT247H1/ MAT247H5

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT327H1 - Introduction to Topology

Hours: 36L

Metric spaces, topological spaces and continuous mappings; separation, compactness, connectedness. Fundamental group and covering spaces. Brouwer fixed-point theorem. Students in the math specialist program wishing to take additional topology courses are advised to obtain permission to take MAT1300H, MAT1301H.

Prerequisite: MAT157Y1/ MAT157Y5/ (MAT157H5, MAT159H5)/ [(MAT237Y1/ (MATB41H3, MATB42H3/ MATB43H3)/ MAT237Y5), MAT246H1]

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT329Y1 - Concepts in Elementary Mathematics

Hours: 72L

This course is aimed at students intending to become elementary school teachers. Emphasis is placed on the formation and development of fundamental reasoning and learning skills required to understand and to teach mathematics at the elementary level. Topics may include: Problem Solving and Strategies, Sets and Elementary Logic, Numbers and Elements of Number Theory, Introductory Probability and Fundamentals of Geometry.

The course may include an optional practicum in school classrooms.

Prerequisite: 5.0 credits with a CGPA of at least 2.5, and MAT137Y1/ MAT137Y5/ (MAT137H5, MAT139H5)/ MAT138H1/ (MAT223H1/ MAT240H1)/ [MAT246H1/ MAT157Y1/ MAT157Y5/ (MAT157H5, MAT159H5)]

Exclusion: MAT382H5

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT332H1 - Introduction to Graph Theory

Hours: 36L

This course will explore the following topics: Graphs, subgraphs, isomorphism, trees, connectivity, Euler and

Hamiltonian properties, matchings, vertex and edge colourings, planarity, network flows and strongly regular graphs. Participants will be encouraged to use these topics and execute applications to such problems as timetabling, tournament scheduling, experimental design and finite geometries.

Prerequisite: [MAT224H1](#)/ [MATB24H3](#)/ [MAT224H5](#)/ [MAT247H1](#)/ [MAT247H5](#)

Recommended Preparation: Students are encouraged to take [MAT301H1](#) or [MAT347Y1](#) concurrently or prior to undertaking this course.

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT334H1 - Complex Variables

Hours: 36L

Theory of functions of one complex variable, analytic and meromorphic functions. Cauchy's theorem, residue calculus, conformal mappings, introduction to analytic continuation and harmonic functions.

Prerequisite: [MAT223H1](#)/ [MATA23H3](#)/ [MAT223H5](#)/ [MAT240H1](#)/ [MAT240H5](#), [MAT235Y1](#)/ [MAT235Y5](#)/ ([MAT232H5](#), [MAT236H5](#))/ ([MATB41H3](#), [MATB42H3](#))/ [MAT237Y1](#)/ ([MATB41H3](#), [MATB42H3](#), [MATB43H3](#))/ [MAT237Y5](#)/ [MAT257Y1](#)

Exclusion: [MAT354H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT335H1 - Chaos, Fractals and Dynamics

Hours: 36L

An elementary introduction to a modern and fast-developing area of mathematics. One-dimensional dynamics: iterations of quadratic polynomials. Dynamics of linear mappings, attractors. Bifurcation, Henon map, Mandelbrot and Julia sets. History and applications.

Prerequisite: [MAT137Y1](#)/ ([MATA30H3](#), [MATA31H3](#), [MATA37H3](#))/ [MAT137Y5](#)/ ([MAT137H5](#), [MAT139H5](#))/ [MAT157Y1](#)/ [MAT157Y5](#)/ ([MAT157H5](#), [MAT159H5](#))/ [MAT235Y1](#)/ [MAT235Y5](#)/ ([MAT232H5](#), [MAT236H5](#))/ ([MATB41H3](#), [MATB42H3](#))/ [MAT237Y1](#)/ ([MATB41H3](#), [MATB42H3](#), [MATB43H3](#))/ [MAT237Y5](#), [MAT223H1](#)/ [MATA23H3](#)/ [MAT223H5](#)/ [MAT240H1](#)/ [MAT240H5](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT336H1 - Elements of Analysis

Hours: 36L/12T

This course provides the foundations of analysis and rigorous calculus for students who will take subsequent courses where these mathematical concepts are central of applications, but who have only taken courses with limited proofs. Topics include topology of \mathbb{R}^n , implicit and inverse function theorems and rigorous integration theory.

Prerequisite: [MAT223H1](#)/ [MATA23H3](#)/ [MAT223H5](#)/ [MAT240H1](#)/ [MAT240H5](#), [MAT235Y1](#)/ [MAT235Y5](#)/ ([MAT232H5](#), [MAT236H5](#))/ ([MATB41H3](#), [MATB42H3](#))/ [MAT237Y1](#)/ ([MATB41H3](#), [MATB42H3](#), [MATB43H3](#))/ [MAT237Y5](#)/ ([MAT185H1](#), [MAT195H1](#)/ [ESC195H1](#))

Exclusion: [MAT257Y1](#)/ [MAT337H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT337H1 - Introduction to Real Analysis

Hours: 36L

Construction of Real Numbers. Metric spaces; compactness and connectedness. Sequences and series of functions, power series; modes of convergence. Interchange of limiting processes; differentiation of integrals. Function spaces; Weierstrass approximation; Fourier series. Contraction mappings; existence and uniqueness of solutions of ordinary differential equations. Countability; Cantor set; Hausdorff dimension.

Prerequisite: [MAT257Y1](#)/ [[MAT224H1](#)/ [MATA24H3](#)/ [MAT224H5](#)/ [MAT247H1](#)/ [MAT247H5](#), [MAT235Y1](#)/ [MAT235Y5](#)/ ([MAT232H5](#), [MAT236H5](#))/ ([MATB41H3](#), [MATB42H3](#)/ [MATB43H3](#))/ [MAT237Y1](#)/ [MAT237Y5](#), [MAT246H1](#)/ [MAT157Y1](#)]

Exclusion: [MAT357H1](#)/ [MAT378H5](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT344H1 - Introduction to Combinatorics

Hours: 36L

Basic counting principles, generating functions, permutations with restrictions. Fundamentals of graph theory with algorithms; applications (including network flows). Combinatorial structures including block designs and finite geometries.

Prerequisite: [MAT223H1](#)/ [MATA23H3](#)/ [MAT223H5](#)/ [MAT240H1](#)/ [MAT240H5](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

APM346H1 - Partial Differential Equations

Hours: 36L

Sturm-Liouville problems, Green's functions, special functions (Bessel, Legendre), partial differential equations of second order, separation of variables, integral equations, Fourier transform, stationary phase method.

Prerequisite: MAT235Y1/ MAT235Y5/ (MAT232H5, MAT236H5)/ (MATB41H3, MATB42H3)/ MAT237Y1/ MAT237Y5/ MAT257Y1, (MAT244H1/ MATB44H3/ MAT244H5/ MAT267H1)

Exclusion: MAT351Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT347Y1 - Groups, Rings and Fields

Hours: 72L/24T

Groups, subgroups, quotient groups, Sylow theorems, Jordan-Hölder theorem, finitely generated abelian groups, solvable groups. Rings, ideals, Chinese remainder theorem; Euclidean domains and principal ideal domains: unique factorization. Noetherian rings, Hilbert basis theorem. Finitely generated modules. Field extensions, algebraic closure, straight-edge and compass constructions. Galois theory, including insolubility of the quintic.

Prerequisite: MAT257Y1/(85% in MAT247H1/ MAT247H5)

Breadth Requirements: The Physical and Mathematical Universes (5)

APM348H1 - Mathematical Modelling

Previous Course Number: MAT482

Hours: 36L/22P

An overview of mathematical modelling. A variety of approaches for representing physical situations mathematically followed by analytical techniques and numerical simulations to gain insight. Questions from biology, economics, engineering, medicine, physics, physiology, and the social sciences formulated as problems in optimization, differential equations, and probability. Precise content varies with instructor.

Prerequisite: MAT244H1/ MAT267H1, MAT224H1/ MAT247H1, STA237H1/ STA247H1/ STA257H1/ MAT370H1/ MAT377H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT351Y1 - Partial Differential Equations

Hours: 72L

This is a first course in Partial Differential Equations, intended for Mathematics students with interests in analysis, mathematical physics, geometry, and optimization. The examples to be discussed include first-order equations, harmonic functions, the diffusion equation, the wave equation, Schrodinger's equation, and eigenvalue problems. In addition to the classical representation formulas for the solutions of these equations, there are techniques that apply more broadly: the notion of well-posedness, the method of characteristics, energy methods, maximum and comparison principles, fundamental solutions, Green's functions, Duhamel's principle, Fourier series, the min-max characterization of eigenvalues, Bessel functions, spherical harmonics, and distributions. Nonlinear phenomena such as shock waves and solitary waves are also introduced.

Prerequisite: MAT257Y1/ MAT237Y1 (85%), MAT267H1

Exclusion: APM351Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT354H1 - Complex Analysis I

Hours: 36L

Complex numbers, the complex plane and Riemann sphere, Möbius transformations, elementary functions and their mapping properties, conformal mapping, holomorphic functions, Cauchy's theorem and integral formula. Taylor and Laurent series, maximum modulus principle, Schwarz' lemma, residue theorem and residue calculus.

Prerequisite: MAT257Y1/ (MAT237Y1 (85%), MAT327H1)

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT357H1 - Foundations of Real Analysis

Hours: 36L

Function spaces; Arzela-Ascoli theorem, Weierstrass approximation theorem, Fourier series. Introduction to Banach and Hilbert spaces; contraction mapping principle, fundamental existence and uniqueness theorem for ordinary differential equations. Lebesgue integral; convergence theorems, comparison with Riemann integral, L^p spaces. Applications to probability.

Prerequisite: MAT257Y1/ (MAT237Y1 (85%), MAT327H1)

Exclusion: MAT438H5

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT363H1 - Geometry of Curves and Surfaces

Hours: 36L

Curves and surfaces in 3-spaces. Frenet formulas. Curvature and geodesics. Gauss map. Minimal surfaces. Gauss-Bonnet theorem for surfaces. Surfaces of constant curvature.

Prerequisite: MAT224H1/ MATB24H3/ MAT224H5/ MAT247H1/ MAT247H5, MAT237Y1/ (MATB41H3, MATB42H3, MATB43H3)/ MAT237Y5/ MAT257Y1 (MAT257Y1 can be taken concurrently). For FASE students, MAT185H1, MAT194H1, MAT195H1, AER210H1.

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT367H1 - Differential Geometry

Hours: 36L

Manifolds, partitions of unity, submersions and immersions, vector fields, vector bundles, tangent and cotangent bundles, foliations and Frobenius' theorem, multilinear algebra, differential forms, Stokes' theorem, Poincare-Hopf theorem.

Prerequisite: MAT257Y1/ [MAT224H1/ MAT247H1, MAT237Y1, MAT246H1/ MAT157Y1/ MAT157Y5/ (MAT157H5, MAT159H5)]

Recommended Preparation: MAT257Y1, MAT240H1, MAT247H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT370H1 - Introduction to Mathematical Probability

Hours: 36L/12T

A rigorous introduction to the basic concepts of probability without measure theory. Random variables and their distributions, Independence, Limit theorems, Conditional Probability, Markov chains

Prerequisite: MAT224H1/ MAT224H5, MAT235Y1/ (MAT232H5, MAT236H5)/ MAT237Y1/ MAT257Y1, MAT246H1

Exclusion: MAT377H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT377H1 - Mathematical Probability Theory

Hours: 36L/12T

This course introduces students to various topics in mathematical probability theory. Topics include basic concepts (such as probability, random variables, expectations, conditional probability) from a mathematical point of view, examples of distributions and stochastic processes and their properties, convergence results (such as the law of large numbers, central limit theorem, random series, etc.), various inequalities, and examples of applications of probabilistic ideas beyond statistics (for example, in geometry and computer science).

Prerequisite: MAT247H1/ MAT247H5 and MAT257Y1/ (MAT237Y1 (85%), MAT327H1)

Exclusion: MAT370H1, STA347H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT382H1 - Topics in Mathematics

Hours: 36L

A course in mathematics on a topic outside the current undergraduate offerings. For information on the specific topic to be studied and possible additional prerequisites, go to <http://www.math.toronto.edu/cms/current-students-ug/>

Prerequisite: 2.5 AMP/MAT credits at the 100/200-level. Possible additional topic-specific prerequisites.

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT390H1 - History of Mathematics up to 1700

Hours: 24L/12T

A survey of ancient, medieval, and early modern mathematics with emphasis on historical issues.

Prerequisite: 1.0 APM/MAT credit at the 200-level

Exclusion: HPS309H1/ HPS310Y1/ HPS390H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT391H1 - History of Mathematics after 1700

Hours: 24L/12T

A survey of the development of mathematics from 1700 to the present with emphasis on technical development.

Prerequisite: 1.0 APM/MAT credit at the 200 level

Exclusion: HPS309H1/ HPS310H1/ HPS391H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT395H1 - Independent Reading in Mathematics

Independent reading under the direction of a faculty member. Topic must be outside current undergraduate offerings. Similar workload to a 36L course. Not eligible for CR/NCR option.

Completed applications for this course are due to the Math Undergraduate Program Office no later than the third day of the term that the reading course will start.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor
Breadth Requirements: The Physical and Mathematical Universes (5)

APM396H1 - Independent Reading in Applied Mathematics

Independent study under the direction of a faculty member. Topic must be outside undergraduate offerings. Similar workload to a 36L course. Not eligible for CR/NCR option.

This course requires an application. Completed applications for this course are due to the Math Undergraduate Program Office no later than the third day of the term that the reading course will start.

Prerequisite: Minimum GPA 3.5 for APM and MAT courses, permission of the Associate Chair for

Undergraduate Studies and of the prospective supervisor.
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT396H1 - Independent Reading in Mathematics

Independent study under the direction of a faculty member. Topic must be outside undergraduate offerings. Similar workload to a 36L course. Not eligible for CR/NCR option.

Completed applications for this course are due to the Math Undergraduate Program Office no later than the third day of the term that the reading course will start.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT397Y1 - Research Project in Mathematics

Independent research under the direction of a faculty member. Workload similar to a 72L course. Not eligible for CR/NCR option.

Completed applications for this course are due to the Math Undergraduate Program Office no later than the third day of the term that the reading course will start.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

MAT398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

MAT399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities....> Not eligible for CR/NCR option.

MAT399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities....> Not eligible for CR/NCR option.

MAT401H1 - Polynomial Equations and Fields

Hours: 36L

Commutative rings; quotient rings. Construction of the rationals. Polynomial algebra. Fields and Galois theory: Field extensions, adjunction of roots of a polynomial. Constructibility, trisection of angles, construction of regular polygons. Galois groups of polynomials, in particular cubics, quartics. Insolvability of quintics by radicals.

Prerequisite: MAT301H1

Exclusion: MAT347Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT402H1 - Classical Geometries

Hours: 36L

Euclidean and non-Euclidean plane and space geometries. Real and complex projective space. Models of the hyperbolic plane. Connections with the geometry of surfaces.

Prerequisite: MAT224H1/ MAT247H1, MAT235Y1/ MAT237Y1/ MAT257Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT403H1 - Classical Geometries II

Hours: 36L/12T

This course is the second part of the "Classical Geometries" MAT402H1 course. It is mainly dedicated to detailed study of classical real projective geometry and projective geometry over other fields. It is also devoted to the study of spherical and elliptic geometry.

Prerequisite: MAT235Y1/ MAT237Y1/ MAT257Y1, MAT301H1/ MAT347Y1

Recommended Preparation: MAT402H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT409H1 - Set Theory

Hours: 36L

Set theory and its relations with other branches of mathematics. ZFC axioms. Ordinal and cardinal numbers. Reflection principle. Constructible sets and the continuum hypothesis. Introduction to independence proofs. Topics from large cardinals, infinitary combinatorics and descriptive set theory.

Joint undergraduate/graduate course -
MAT409H1/MAT1404H

Prerequisite: MAT357H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT415H1 - Algebraic Number Theory

Hours: 36L

A selection from the following: finite fields; global and local fields; valuation theory; ideals and divisors; differentials and discriminants; ramification and inertia; class numbers and units; cyclotomic fields; Diophantine equations.

Joint undergraduate/graduate course -
MAT415H1/MAT1200H

Prerequisite: MAT347Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT417H1 - Analytic Number Theory

Hours: 36L

A selection from the following: distribution of primes, especially in arithmetic progressions and short intervals; exponential sums; Hardy-Littlewood and dispersion methods; character sums and L-functions; the Riemann zeta-function; sieve methods, large and small; Diophantine approximation, modular forms.

Joint undergraduate/graduate course -
MAT417H1/MAT1202H

Prerequisite: MAT334H1/ MAT354H1

Breadth Requirements: The Physical and Mathematical Universes (5)

APM421H1 - Mathematical Foundations of Quantum Mechanics and Quantum Information Theory

Hours: 36L

Key concepts and mathematical structure of Quantum Mechanics, with applications to topics of current interest such as quantum information theory. The core part of the course covers the following topics: Schroedinger equation, quantum observables, spectrum and evolution, motion in electro-magnetic field, angular momentum and $O(3)$ and $SU(2)$ groups, spin and statistics, semi-classical asymptotics, perturbation theory. More advanced topics may include: adiabatic theory and geometrical phases, Hartree-Fock theory, Bose-Einstein condensation, the second quantization, density matrix and quantum statistics, open systems and Lindblad evolution, quantum entropy, quantum channels, quantum Shannon theorems.

Joint undergraduate/graduate course -
APM421H1/MAT1723H

Prerequisite: (MAT224H1/ MAT247H1, MAT337H1)/
MAT357H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT425H1 - Differential Topology

Hours: 36L

Smooth manifolds, Sard's theorem and transversality. Morse theory. Immersion and embedding theorems. Intersection theory. Borsuk-Ulam theorem. Vector fields and Euler characteristic. Hopf degree theorem. Additional topics may vary.

Prerequisite: MAT257Y1, MAT327H1

Breadth Requirements: The Physical and Mathematical Universes (5)

APM426H1 - General Relativity

Hours: 36L

Einstein's theory of gravity. Special relativity and the geometry of Lorentz manifolds. Gravity as a manifestation of spacetime curvature. Einstein's equations. Cosmological implications: big bang and inflationary universe. Schwarzschild stars: bending of light and perihelion precession of Mercury. Topics from black hole dynamics and gravitational waves. The Penrose singularity theorem.

Joint undergraduate/graduate course -
APM426H1/MAT1700H

Prerequisite: MAT363H1/ MAT367H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT436H1 - Introduction to Linear Operators

Hours: 36L

The course will survey the branch of mathematics developed (in its abstract form) primarily in the twentieth century and referred to variously as functional analysis, linear operators in Hilbert space, and operator algebras, among other names (for instance, more recently, to reflect the rapidly increasing scope of the subject, the phrase non-commutative geometry has been introduced). The intention will be to discuss a number of the topics in Pedersen's textbook Analysis Now. Students will be encouraged to lecture on some of the material, and also to work through some of the exercises in the textbook (or in the suggested reference books).

Joint undergraduate/graduate course -
MAT436H1/MAT1011H

Prerequisite: 5.0 MAT credits, including MAT224H1/ MAT247H1 and MAT237Y1/ MAT257Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT437H1 - K-Theory and C^* Algebras

Hours: 36L

The theory of operator algebras was begun by John von Neumann eighty years ago. In one of the most important innovations of this theory, von Neumann and Murray introduced a notion of equivalence of projections in a self-adjoint algebra ($*$ -algebra) of Hilbert space operators that was compatible with addition of orthogonal projections (also in matrix algebras over the algebra), and so gave rise to an abelian semigroup, now referred to as the Murray-von Neumann semigroup.

Later, Grothendieck in geometry, Atiyah and Hirzebruch in topology, and Serre in the setting of arbitrary rings (pertinent for instance for number theory), considered similar constructions. The enveloping group of the semigroup considered in each of these settings is now referred to as the K-group (Grothendieck's terminology), or as the Grothendieck group.

Among the many indications of the depth of this construction was the discovery of Atiyah and Hirzebruch that Bott periodicity could be expressed in a simple way using the K-group. Also, Atiyah and Singer famously showed that K-theory was important in connection with the Fredholm index. Partly because of these developments, K-theory very soon became important again in the theory of operator algebras. (And in turn, operator algebras became increasingly important in other branches of mathematics.)

The purpose of this course is to give a general, elementary, introduction to the ideas of K-theory in the operator algebra context. (Very briefly, K-theory generalizes the notion of dimension of a vector space.)

The course will begin with a description of the method (K-theoretical in spirit) used by Murray and von Neumann to give a rough initial classification of von Neumann algebras (into types I, II, and III). It will centre around the relatively recent use of K-theory to study Bratteli's approximately finite-dimensional C^* -algebras---both to classify them (a result that can be formulated and proved purely algebraically), and to prove that the class of these C^* -algebras---what Bratteli called AF algebras---is closed under passing to extensions (a result that uses the Bott periodicity feature of K-theory).

Students will be encouraged to prepare oral or written reports on various subjects related to the course, including basic theory and applications.

Joint undergraduate/graduate course - [MAT437H1](#)/[MAT1016H](#)

Prerequisite: 5.0 MAT credits, including [MAT224H1](#)/[MAT247H1](#) and [MAT237Y1](#)/[MAT257Y1](#)

Recommended Preparation: Students are encouraged to execute basic research that answers the question, what is an abelian group?

Breadth Requirements: The Physical and Mathematical Universes (5)

APM441H1 - Asymptotic and Perturbation Methods

Hours: 36L

Asymptotic series. Asymptotic methods for integrals: stationary phase and steepest descent. Regular perturbations for algebraic and differential equations. Singular perturbation methods for ordinary differential equations: W.K.B., strained co-ordinates, matched asymptotics, multiple scales. (Emphasizes techniques; problems drawn from physics and engineering)

Prerequisite: [APM346H1](#)/[MAT351Y1](#), [MAT334H1](#)/[MAT354H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT445H1 - Representation Theory

Hours: 36L

A selection of topics from: Representation theory of finite groups, topological groups and compact groups. Group algebras. Character theory and orthogonality relations. Weyl's character formula for compact semisimple Lie groups. Induced representations. Structure theory and representations of semisimple Lie algebras. Determination of the complex Lie algebras.

Joint undergraduate/graduate - [MAT445H1](#)/[MAT1196H](#)

Prerequisite: [MAT347Y1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

APM446H1 - Applied Nonlinear Equations

Hours: 36L

Partial differential equations appearing in physics, material sciences, biology, geometry, and engineering. Nonlinear evolution equations. Existence and long-time behaviour of solutions. Existence of static, traveling wave, self-similar, topological and localized solutions. Stability. Formation of singularities and pattern formation. Fixed point theorems, spectral analysis, bifurcation theory. Equations considered in this course may include: Allen-Cahn equation (material science), Ginzburg-Landau equation (condensed matter physics), Cahn-Hilliard (material science, biology), nonlinear Schrodinger equation (quantum and plasma physics, water waves, etc). mean curvature flow (geometry, material sciences), Fisher-Kolmogorov-Petrovskii-Piskunov (combustion theory, biology), Keller-

Segel equations (biology), and Chern-Simons equations (particle and condensed matter physics).

Joint undergraduate/graduate course -
APM446H1/MAT1508H

Prerequisite: APM346H1/ MAT351Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT448H1 - Introduction to Commutative Algebra and Algebraic Geometry

Hours: 36L

Basic notions of algebraic geometry, with emphasis on commutative algebra or geometry according to the interests of the instructor. Algebraic topics: localization, integral dependence and Hilbert's Nullstellensatz, valuation theory, power series rings and completion, dimension theory. Geometric topics: affine and projective varieties, dimension and intersection theory, curves and surfaces, varieties over the complex numbers. This course will be offered in alternating years.

Joint undergraduate/graduate course -
MAT448H1/MAT1155H

Prerequisite: MAT347Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT449H1 - Algebraic Curves

Hours: 36L

Projective geometry. Curves and Riemann surfaces. Algebraic methods. Intersection of curves; linear systems; Bezout's theorem. Cubics and elliptic curves. Riemann-Roch theorem. Newton polygon and Puiseux expansion; resolution of singularities. This course will be offered in alternating years.

Joint undergraduate/graduate course -
MAT449H1/MAT1194H

Prerequisite: MAT347Y1, MAT354H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT454H1 - Complex Analysis II

Hours: 36L

Harmonic functions, Harnack's principle, Poisson's integral formula and Dirichlet's problem. Infinite products and the gamma function. Normal families and the Riemann mapping theorem. Analytic continuation, monodromy theorem and elementary Riemann surfaces. Elliptic functions, the modular function and the little Picard theorem.

Joint undergraduate/graduate course -
MAT454H1/MAT1002H

Prerequisite: MAT354H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT457H1 - Advanced Real Analysis I

Hours: 36L

Lebesgue measure and integration; convergence theorems, Fubini's theorem, Lebesgue differentiation theorem, abstract measures, Caratheodory theorem, Radon-Nikodym theorem. Hilbert spaces, orthonormal bases, Riesz representation theorem, compact operators, L^p spaces, Hölder and Minkowski inequalities.

Joint undergraduate/graduate course -
MAT457H1/MAT1000H

Prerequisite: MAT357H1

Exclusion: MAT457Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT458H1 - Advanced Real Analysis II

Hours: 36L

Fourier series and transform, convergence results, Fourier inversion theorem, L^2 theory, estimates, convolutions. Banach spaces, duals, weak topology, weak compactness, Hahn-Banach theorem, open mapping theorem, uniform boundedness theorem.

Joint undergraduate/graduate course -
MAT458H1/MAT1001H

Prerequisite: MAT457H1

Exclusion: MAT457Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

APM461H1 - Combinatorial Methods

Hours: 36L

A selection of topics from such areas as graph theory, combinatorial algorithms, enumeration, construction of combinatorial identities.

Joint undergraduate/graduate course -
APM461H1/MAT1302H

Prerequisite: MAT224H1/ MAT247H1, MAT137Y1/ MAT137Y5/ (MAT137H5, MAT139H5)/ MAT157Y1/ MAT157Y5/ (MAT157H5, MAT159H5), MAT301H1/ MAT347Y1

Recommended Preparation: MAT344H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT461H1 - Hamiltonian Mechanics

Hours: 36L

This course focuses on key notions of classical mechanics: Newton equations, variational principles, Lagrangian formulation and Euler-Lagrange equations, the motion in a central force, the motion of a rigid body, small oscillations, Hamiltonian formulation, canonical transformations, Hamilton-Jacobi theory, action-angle variables, and integrable systems.

Prerequisite: MAT244H1/ MAT267H1, MAT337H1/ MAT367H1, APM346H1/ MAT351Y1

Recommended Preparation: MAT267H1, MAT367H1

Breadth Requirements: The Physical and Mathematical Universes (5)

APM462H1 - Nonlinear Optimization

Hours: 36L

An introduction to first and second order conditions for finite and infinite dimensional optimization problems with mention of available software. Topics include Lagrange multipliers, Kuhn-Tucker conditions, convexity and calculus of variations. Basic numerical search methods and software packages which implement them will be discussed.

Prerequisite: (MAT223H1, MAT224H1) / MAT247H1, MAT235Y1/ MAT237Y1/ MAT257Y1

Recommended Preparation: MAT336H1/ MAT337H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT464H1 - Riemannian Geometry

Hours: 36L

Riemannian metrics. Levi-Civita connection. Geodesics. Exponential map. Second fundamental form. Complete manifolds and Hopf-Rinow theorem. Curvature tensors. Ricci curvature and scalar curvature. Spaces of constant curvature.

Joint undergraduate/graduate course -
MAT464H1/MAT1342H

Prerequisite: MAT367H1

Breadth Requirements: The Physical and Mathematical Universes (5)

APM466H1 - Mathematical Theory of Finance

Hours: 36L

Introduction to the basic mathematical techniques in pricing theory and risk management: Stochastic calculus, single-period finance, financial derivatives (tree-approximation and Black-Scholes model for equity derivatives, American derivatives, numerical methods, lattice models for interest-rate derivatives), value at risk, credit risk, portfolio theory.

Joint undergraduate/graduate course -
APM466H1/MAT1856H

Prerequisite: APM346H1, STA347H1

Corequisite: STA457H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT475H1 - Problem Solving Seminar

This course addresses the question: How do you attack a problem the likes of which you have never seen before? Students will apply Polya's principles of mathematical problem solving, draw upon their previous mathematical knowledge, and explore the creative side of mathematics in solving a variety of interesting problems and explaining those solutions to others.

Prerequisite: MAT224H1/ MAT247H1, MAT235Y1/ MAT237Y1/ MAT257Y1, and at least 1.0 credit at the 300+ level in APM/MAT

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT477H1 - Seminar in Mathematics

Seminar in an advanced topic. Content will generally vary from semester to semester. Student presentations are required.

Prerequisite: MAT347Y1, MAT354H1, MAT357H1
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT478H1 - Seminar in Mathematics

Seminar in an advanced topic. Content will generally vary from semester to semester. Student presentations are required.

Prerequisite: MAT347Y1, MAT354H1, MAT357H1
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT482H1 - Topics in Mathematics

Hours: 36L

A course in mathematics on a topic outside the current undergraduate offerings. For information on the specific topic to be studied and possible additional prerequisites, go to <http://www.math.toronto.edu/cms/current-students-ug/>.

Joint undergraduate/graduate course -
MAT482H1/MAT1901H

Prerequisite: 6.0 APM/MAT credits at the 100, 200 and 300-level. Possible additional topic-specific prerequisites.
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT483H1 - Topics in Mathematics

Hours: 36L

A course in mathematics on a topic outside the current undergraduate offerings. For information on the specific topic to be studied and possible additional prerequisites, go to <http://www.math.toronto.edu/cms/current-students-ug/>.

Prerequisite: 6.0 APM/MAT credits at the 100, 200 and 300-level. Possible additional topic-specific prerequisites.
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT495H1 - Independent Reading in Mathematics

Independent study under the direction of a faculty member. Topic must be outside undergraduate offerings.

Workload equivalent to a 36L course. Not eligible for CR/NCR option.

Completed applications for this course are due to the Math Undergraduate Program Office no later than the third day of the term that the reading course will start.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT496H1 - Independent Reading in Mathematics

Independent study under the direction of a faculty member. Topic must be outside undergraduate offerings. Workload equivalent to a 36L course. Not eligible for CR/NCR option.

Completed applications for this course are due to the Math Undergraduate Program Office no later than the third day of the term that the reading course will start.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.
Breadth Requirements: The Physical and Mathematical Universes (5)

APM496H1 - Independent Readings in Applied Mathematics

Independent study under the direction of a faculty member. Topic must be outside current undergraduate offerings. Similar workload to a course that has 36 lecture hours. Not eligible for CR/NCR option.

Completed applications for this course are due to the Math Undergraduate Program Office no later than the third day of the term that the reading course will start.

Prerequisite: minimum GPA 3.5 for APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT497Y1 - Research Project in Mathematics

Independent research under the direction of a faculty member. Not eligible for CR/NCR option. Similar workload to a 72L course.

Completed applications for this course are due to the Math Undergraduate Program Office no later than the third day of the term that the reading course will start.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor
Breadth Requirements: The Physical and Mathematical Universes (5)

MAT499Y1 - Readings in Mathematics

Independent study under the direction of a faculty member. Topic must be outside undergraduate offerings. Workload equivalent to a 72L course. Not eligible for CR/NCR option.

Completed applications for this course are due to the Math Undergraduate Program Office no later than the third day of the term that the reading course will start.

Prerequisite: Minimum GPA of 3.5 in APM and MAT courses. Permission of the Associate Chair for Undergraduate Studies and of the prospective supervisor.
Breadth Requirements: The Physical and Mathematical Universes (5)

Introduction

The Centre for Medieval Studies provides a course in the thousand-year period from the Fall of Rome to the Fall of Constantinople, and beyond. Students can expect to cross the disciplinary boundaries of history, art, literature, philosophy, religion, and history of science, focusing not only on Europe but on the broader Mediterranean and North Sea regions. These courses open up the Centre for the first time to undergraduate students and provide a valuable humanities breadth experience for students who want to experience the culture, poetry, and art of the Middle Ages, as well as medieval music, drama performance and manuscript studies.

Prerequisite: MST201H1, or MST202H1, or Permission of Instructor

Breadth Requirements: Creative and Cultural Representations (1)

Centre for Medieval Studies Courses

MST300H1 - Alexander the Great in the Middle Ages

Hours: 24L/12T

Alexander the Great (356-323 BCE), king of Macedon, was one of the most successful military campaigners the world has ever seen. By the time he was thirty, he had established a vast empire stretching from Greece in the west to India in the east. Fantastic stories and legends about Alexander the Great circulated throughout the medieval world, from Iceland to Iran and from Ethiopia to England. In this course, we explore what different representations of the same figure can tell us about the range of medieval cultures. Through the use of digital tools, students and the instructor work together to explore this rich material. We trace the transmission of Alexander's legend using digital maps. We compare different versions of the same story using text analysis tools. And we curate a small selection of the lavishly-illustrated manuscripts of the Alexander Romance in a digital exhibition.

MST399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

MST399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

MST404H1 - Languages in Medieval Studies: Palaeography I

Hours: 24L/12T

The course is designed as a practicum in the transcription of scripts from the late Roman Empire to the twelfth century. The goal is to offer students the opportunity to participate in a graduate course in manuscript studies where comparable offerings at the undergraduate level are unavailable.

Prerequisite: Level One Latin pass, permission of the instructor, 8.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

MST405H1 - Languages in Medieval Studies: Palaeography II

Hours: 24L/12T

Study of Latin Scripts from 1200 to 1600, with attention to background of Gothic writing, physical characteristics of manuscripts, library practices and bibliographical resources. The goal is to offer students the opportunity to participate in a graduate course in manuscript studies where comparable offerings at the undergraduate level are unavailable.

Prerequisite: Level One Latin pass, permission of the instructor, 8.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

MST410H1 - Languages for Medieval Studies: Old Norse

Hours: 24L

Introduction to Old Norse language and literature, focusing on basic instruction in Old Norse grammar and short readings from poetic and prose texts. The goal is to offer students the opportunity to participate in a graduate course in medieval languages where comparable offerings at the undergraduate level are unavailable.

Prerequisite: 8.0 credits, permission of the instructor

Recommended Preparation: Previous language study

Breadth Requirements: Creative and Cultural Representations (1)

Introduction

Molecular biology has revolutionized the fields of genetics and microbiology. The Department of Molecular Genetics offers Specialist and Major programs in Molecular Genetics and Microbiology, which emphasize the molecular aspects of both disciplines. Genetics, the science of heredity, and microbiology, the study of microorganisms (microbes), have long served as meeting grounds for a variety of biological disciplines. Developments in genetics and microbiology have contributed greatly to our basic understanding of the fundamental processes of life as well as to the treatment of genetic and infectious diseases.

Of particular significance in molecular genetics has been the development of techniques that permit the cloning of genes responsible for specific traits, and the detailed analysis of their regulation, interactions, and products. More recently the advent of genome sequencing has fueled efforts to understand in full the information content of the genome and to assign function to every gene, using methods that allow systematic, genome-scale analyses of gene expression, the phenotypic consequences of gene disruption, and the interactions between genes and gene products. Now, as we move into an era in which we can leverage gene editing tools such as CRISPR to address issues that have previously been intractable, our ability to understand and interpret our genomes at a molecular level is more important than ever.

Molecular techniques have also dramatically increased our ability to diagnose and understand viral and bacterial infectious disease, and the complex microbe/host interactions that are involved. The impact of these and other technological advances extend to such diverse fields as plant and animal developmental biology, virology, immunology, cancer biology, and biotechnology. Studies at a molecular level are essential to understanding the consequences to life when fundamental processes are altered by mutation, by infection, or by the environment.

The Molecular Genetics and Microbiology Specialist programs are research-intensive programs designed to provide in-depth discipline-specific training. This includes critical analyses of scientific concepts and literature, advanced laboratory experience, and a detailed understanding of the applications of field-specific techniques. Specialists enter the program in 2nd year, selecting one of two available Streams: Genetics or Microbiology. Each Stream provides focused training, but there is considerable overlap between the streams, reflective of both the cross-disciplinary requirements of these two rapidly evolving disciplines and the impact of each on areas spanning modern biomedical science and research.

The Molecular Genetics and Microbiology Major program offers students fundamental training in both molecular genetics and microbiology. Students have the flexibility to tailor their own program and may focus their studies on microbiology, genetics, or a combination of the two by choosing a path to suit their specific interests. Students take several advanced courses in these disciplines, but the Major allows them to choose the breadth of their training by combining the MGY Major with another Major of interest.

The Department of Molecular Genetics is also a co-sponsor of the Major program in Genome Biology, with the Departments of Cell and Systems Biology (CSB), and Ecology and Evolutionary Biology (EEB). See the Biology program listings for details of the Genome Biology Major.

Career opportunities for graduates include employment in research institutes, universities and other educational institutions, and industry. The programs provide excellent preparation for post-graduate research and professional programs.

Molecular Genetics and Microbiology Programs

Molecular Genetics And Microbiology Specialist: Genetics Stream (Science Program) - ASSPE1388

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enroll.

Variable Minimum Grade and Variable Minimum Grade Average

Minimum grades combined with a minimum grade average in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- [BIO120H1](#), [BIO130H1](#)
- ([CHM135H1](#) and [CHM136H1](#))/ [CHM151Y1](#)
- ([MAT135H1](#) and [MAT136H1](#))/ [MAT137Y1](#)/ [MAT157Y1](#)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 75% in each course, or a grade average lower than 80% in these required courses will not be considered for admission. Please note that obtaining the minimum final grades and grade average does not guarantee admission to the program. While it is difficult to predict what will constitute "competitive" course marks in a given year, based on previous years the estimate is: course marks = mid 80s; average = mid 80s.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at studentservices.mogen@utoronto.ca, specify which program you would like to be considered for, and provide your student number.

Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment. Additional information is also available by contacting the

Undergraduate Program Coordinator
(studentservices.mogen@utoronto.ca).

Completion Requirements:

(14.0 credits)

First Year:

([BIO120H1](#), [BIO130H1](#)); ([CHM135H1](#), [CHM136H1](#))/ [CHM151Y1](#); ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)

First or Second Year:

([PHY131H1](#), [PHY132H1](#))/ ([PHY151H1](#), [PHY152H1](#))

Second Year:

[BCH242Y1](#); [BIO230H1](#)/ [BIO255H1](#), [HMB265H1](#); [MGY280H1](#), [CHM247H1](#), [STA220H1](#)/ [STA288H1](#)

Third Year:

1. [MGY340H1](#), [MGY350H1](#), [MGY311Y1](#), [MGY314H1](#), [MGY315H1](#)

2. 0.5 credit from [BCH340H1](#), [BCH377H1](#), [MGY360H1](#), [MGY377H1](#), [MGY378H1](#)

Fourth Year:

1. [MGY420H1](#),

plus 2.5 credits from Genetics Lists 1 and 2, distributed as follows:

2. At least 1.5 credits must be taken from list 1:

[MGY425H1](#), [MGY428H1](#), [MGY460H1](#), [MGY470H1](#)

3. Up to 1.0 credit may be taken from list 2:

[MGY440H1](#), [MGY480Y1](#)/ one or both of ([MGY481H1](#) and [MGY482H1](#)), [BCH428H1](#), [BCH440H1](#), [MGY441H1](#)/ [BCH441H1](#)/ [CSB472H1](#), [BCH448H1](#), [EEB460H1](#)

Molecular Genetics And Microbiology Specialist: Microbiology Stream (Science Program) - ASSPE1389

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enroll.

Variable Minimum Grade and Variable Minimum Grade Average

Minimum grades combined with a minimum grade average in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- [BIO120H1](#), [BIO130H1](#)

Molecular Genetics and Microbiology Major (Science Program) - ASMAJ1387

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade and Variable Minimum Grade Average

Minimum grades combined with a minimum grade average in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- [BIO120H1](#), [BIO130H1](#)
- ([CHM135H1](#) and [CHM136H1](#))/ [CHM151Y1](#)
- ([MAT135H1](#) and [MAT136H1](#))/ [MAT137Y1](#)/
[MAT157Y1](#)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60% in each course, or a grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining the minimum final grades and grade average does not guarantee admission to the program. While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 70s; average = mid 70s. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at studentservices.mogen@utoronto.ca, specify which program you would like to be considered for, and provide your student number.

Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment. Additional information is also available by contacting the Undergraduate Coordinator.

Completion Requirements:

(8.0 credits)

First Year:

BIO120H1, BIO130H1; (CHM135H1, CHM136H1)/
CHM151Y1; (MAT135H1, MAT136H1)/ MAT137Y1

Second Year:

BCH210H1; BIO230H1/ BIO255H1, BIO260H1/
HMB265H1, MGY200H1

Third and Fourth Years:

BCH311H1/ CSB349H1/ MGY311Y1; 2.5 credits from

Molecular Genetics and Microbiology Courses

MGY200H1 - An Introduction to Molecular Genetics and Microbiology

Hours: 24L

Introduction to the core concepts of genetics and microbiology. Included are also topical biological problems and cutting-edge scientific approaches with some examples from world-class Toronto labs. Historical context is often used to deliver material. Topics include: core concepts in genetics, an introduction to cancer and stem cells; the genetic regulation of aging; core concepts in microbiology; emerging and recurring microbial threats; genetic engineering.

Prerequisite: BIO120H1, BIO230H1/ BIO255H1

Breadth Requirements: Living Things and Their Environment (4)

MGY250H1 - Introduction to Medical Genetics

Hours: 36L

Explore how our rapidly advancing understanding of genomics is revolutionizing medicine from researchers and clinicians at the forefront of the field. Students will start by learning the fundamentals of genome function, then move on to the mechanisms of genetic disease and their translation into clinical practice. Throughout the course, students will confront the ethical issues inherent to medical genetics, necessary preparation for understanding the complex landscape of genetic testing and treatment later in the course. Lectures are delivered online, asynchronously. The final exam is held in person on the St. George campus.

Prerequisite: BIO120H1, BIO130H1

Breadth Requirements: Living Things and Their Environment (4)

MGY314H1, MGY315H1, MGY340H1, MGY350H1,
MGY360H1, MGY377H1, MGY378H1, MGY379Y1/
MGY380H1, MGY381H1, MGY420H1, MGY425H1,
MGY428H1, MGY434H1, MGY440H1, MGY441H1,
MGY460H1, MGY470H1, MIJ485H1, BCH428H1 (at least
0.5 credit must be a laboratory course and at least 0.5
credit must be a 400-level course, 0.5 credit additional are
given if taking MGY311Y1 in lieu of BCH311H1/
CSB349H1)

MGY277H1 - Introduction to Medical Microbiology

Hours: 36L

An online introductory survey course that explores the agents of infectious disease including bacteria, viruses, and parasites as well as the host immune response. Other topics include the fundamentals of disease diagnosis and epidemiology. This course will use web-based delivery of lectures and tutorials and utilize a range of communication tools equivalent to approximately three lectures per week. The final exam will require student attendance on the St. George campus.

Prerequisite: BIO120H1, BIO130H1

Breadth Requirements: Living Things and Their Environment (4)

MGY280H1 - Second Year Specialist Research

Hours: 48P/12S

This course gives students enrolled in the Molecular Genetics and Microbiology Specialist or Biochemistry Specialist program an opportunity to conduct an original research project in the second semester of their second year in a research laboratory in either of those Departments. Laboratory assignments are chosen during the first semester of second year by agreement with a Departmental faculty member and the Course Coordinator. Attendance at a weekly meeting is mandatory and students will present a report at the end of term. Details can be found on the departmental website. Not eligible for CR/NCR option. Students are discouraged from enrolling in this course concurrently with another research opportunity course (e.g. MGY299Y1, MGY399Y1).

Prerequisite: Students cannot have completed more than 8.5 credits

Breadth Requirements: Living Things and Their Environment (4)

MGY299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

MGY299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

MGY311Y1 - Molecular Biology

Hours: 72L

This course examines the design and interpretation of experiments that have led to our current understanding of the biological roles of DNA, RNA and proteins. Intended for students considering graduate or professional work in molecular biology or a related field or wanting a deeper understanding of these topics.

Prerequisite: BIO120H1, BIO230H1/ BIO255H1, BCH242Y1 (Note: BCH210H1 may be acceptable with permission of instructor)

Exclusion: BCH311H1, CSB349H1, JBC372H5(UTM), PSL350H1

Breadth Requirements: Living Things and Their Environment (4)

MGY314H1 - Principles of Genetic Analysis I

Hours: 12T/36P

Laboratory experiments in genetics, with the focus on microbial and prokaryotic genetics. Topics and experiments include mutagenesis and genetic selection, linkage and recombination, genetic crosses, gene regulation, suppressor analyses, and genetic mapping. (Approximate Lab Materials Fee: \$27; Lab Manual Fee: \$7)

Prerequisite: BIO230H1/ BIO255H1, BIO260H1/ HMB265H1

Exclusion: MGY312H1

Breadth Requirements: Living Things and Their Environment (4)

MGY315H1 - Principles of Genetic Analysis II

Hours: 12T/36P

Laboratory experiments in eukaryotic genetics, using two of the most powerful eukaryotic model systems, the yeast *Saccharomyces cerevisiae* and fruit fly *Drosophila melanogaster*. The course follows MGY314H1; topics include analysis of genetic networks and pathways, meiotic segregation analysis, recombination mapping, genetic crosses, and phenotypic analyses. (Approximate Lab Materials Fee: \$27; Lab Manual Fee: \$20)

Prerequisite: BIO230H1/ BIO255H1, BIO260H1/ HMB265H1, MGY314H1/ MGY340H1

Exclusion: MGY312H1

Breadth Requirements: Living Things and Their Environment (4)

MGY340H1 - Molecular Genetics

Hours: 36L

This course gives students an in-depth understanding of how genetics, the study of mutations and their resulting phenotypes, are used to probe and understand a variety of biological phenomena ranging from metabolism, to development, to cancer.

Prerequisite: BIO120H1, BIO130H1, BIO230H1/ BIO255H1, BIO260H1/ HMB265H1

Breadth Requirements: Living Things and Their Environment (4)

MGY350H1 - Model Systems to Disease

Hours: 36L

The concepts of genetics in the context of human development, disease and evolution. Topics include genetic interactions and complex traits, variation in disease phenotype, signalling and development, stem cells and epigenetic regulation.

Prerequisite: BIO120H1, BIO230H1/ BIO255H1, BIO260H1/ HMB265H1

Corequisite: BCH311H1/ CSB349H1/ MGY311Y1

Breadth Requirements: Living Things and Their Environment (4)

MGY360H1 - Whole-Genome Sequencing and Analysis Laboratory

Hours: 36P

The principles and practice of whole-genome sequencing. Each student team will sequence an entire eukaryotic genome and analyze it. Topics will include: modern sequencing technology, yeast husbandry, genomic library construction and quality control, 'next-generation' sequencing, sequence assembly using a reference genome, principles of genome organization, mutation detection and interpretation.

Prerequisite: BIO230H1/ BIO255H1, BIO260H1/ HMB265H1

Breadth Requirements: Living Things and Their Environment (4)

MGY377H1 - Microbiology I: Bacteria

Hours: 36L

An in depth study of bacteria including their structure, their biology, their ability to adapt, and their effects on human health. Provides a foundation for advanced studies in bacterial physiology, bacterial genetics, molecular pathogenesis of disease, immunology, and environmental studies.

Prerequisite: BCH210H1/ BCH242Y1, BIO120H1, BIO230H1/ BIO255H1

Exclusion: BIO370Y5

Breadth Requirements: Living Things and Their Environment (4)

MGY378H1 - Microbiology II: Viruses

Hours: 36L

Detailed study of viruses in terms of structure, classification, replication and interaction with the host. Basis for advanced study in virology. Requires some familiarity with molecular and cellular biology. A concurrent course in immunology (IMM340H1, IMM350H1) or (IMM341H1, IMM351H1) is recommended.

Prerequisite: BCH210H1/ BCH242Y1; BIO120H1, BIO230H1/ BIO255H1; BIO260H1/ HMB265H1

Corequisite: BCH311H1/ CSB349H1/ MGY311Y1

Exclusion: BIO351Y1, CSB351Y1

Breadth Requirements: Living Things and Their Environment (4)

MGY380H1 - Microbiology Laboratory I: Bacteria

Previous Course Number: MGY379Y1

Hours: 12L/36P

A laboratory course in bacteriology. Students will perform a variety of genetic and biochemical experiments to identify and characterize unknown organisms, and learn how bacteria live together in biofilm and become resistance to antibiotics. Students will also learn important research tools and concepts including CRISPRi, transduction, and conjugation through experiments. Valuable not only for advanced work in microbiology but also in related fields that make use of bacteria and bacteriophages as research tools. (Approximate Lab Materials Fee: \$27; Lab Manual Fee: \$20)

Prerequisite: BIO120H1, BIO230H1/ BIO255H1, HMB265H1/ BIO260H1

Corequisite: MGY377H1

Exclusion: MGY379Y1

Breadth Requirements: Living Things and Their Environment (4)

MGY381H1 - Microbiology Laboratory II: Viruses

Previous Course Number: MGY379Y1

Hours: 12L/36P

Hands-on experience with clinically relevant virology and immunologic assays and human viruses will provide a foundational understanding of viral dynamics, propagation, and replication kinetics. Students will explore virus-host interactions through an analysis of their own immunologic responses. Valuable not only in the study of microbiology, but also in many other areas of biomedical research, clinical practice, public health and industry. MGY380H1 is strongly recommended as preparation for this course. (Approximate Lab Materials Fee: \$27; Lab Manual Fee: \$20)

Prerequisite: BIO120H1, BIO230H1/ BIO255H1, HMB265H1/ BIO260H1

Corequisite: MGY378H1

Exclusion: MGY379Y1

Recommended Preparation: MGY380H1

Breadth Requirements: Living Things and Their Environment (4)

MGY399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

MGY399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

MGY420H1 - Regulation of Gene Expression

Hours: 24L

Regulatory mechanisms controlling gene expression in eukaryotes; students will read, discuss, and present the primary research literature in class. Topics include: assembly of the initiation complex; roles of transcription factors, co-activators and cis-acting regulatory elements; promoter escape; mechanisms that control elongation, termination and anti-termination of transcription; chromatin control of transcription.

Prerequisite: BCH311H1/ CSB349H1/ MGY311Y1
Exclusion: BIO477H5 (UTM)
Breadth Requirements: Living Things and Their Environment (4)

MGY425H1 - Signal Transduction and Cell Cycle Regulation

Hours: 24L

This course presents and integrates molecular aspects of signal transduction and cell cycle regulation in eukaryotic cells from yeast to humans. Emphasis is on recent advances in growth factor receptor signalling, modular protein domains, and the recurrent role of protein phosphorylation and protein-protein interactions in cell regulation.

Prerequisite: BCH311H1/ MGY311Y1
Breadth Requirements: Living Things and Their Environment (4)

MGY428H1 - Functional Genomics

Hours: 24L

A broad-ranging course that covers many aspects of genomics and functional genomics, which is the discipline of defining and attributing function to all of the heritable material of an organism on a genome-wide scale, as applied to invertebrates and vertebrates. The primary and review literature will be the basis of all lectures.

Prerequisite: BCH210H1/ BCH242Y1; BIO260H1/ HMB265H1; MGY311Y1/ CSB349H1/ BCH311H1
Breadth Requirements: Living Things and Their Environment (4)

MGY440H1 - Virus-Host Interactions

Hours: 36L

Analysis of virus/host interactions at the molecular level with a view to understanding how viruses cause disease. Course material is based on recent research publications. Topics will be selected from two or three themes that may include virus entry, intracellular trafficking, activation of host cell signaling pathways in response to infection, assembly and release of progeny virus, viral and host determinants of tissue tropism within the host and virus transmission between hosts.

Prerequisite: BCH311H1/ CSB349H1/ MGY311Y1; CSB351Y1/ MGY378H1
Recommended Preparation: IMM340H1/ IMM341H1, IMM350H1/ IMM351H1
Breadth Requirements: Living Things and Their Environment (4)

MGY441H1 - Bioinformatics

Previous Course Number: BCH441H1
Hours: 24L/12T

This course is an introduction to computational methods and internet resources in modern biochemistry and molecular biology. The main topics include: sequence and genome databases, sequence alignment and homology search, use and interpretation of molecular structure, and phylogenetic analysis. Assignments focus on hands-on competence building with web-based bioinformatics tools and databases, downloadable software including a molecular viewer and a multiple sequence alignment editor, and the statistics workbench and programming language "R".

Note: BCB420H1 extends this syllabus to computational topics of systems biology.

Prerequisite: BCH210H1/ BCH242Y1; STA220H1/ STA288H1/ STA237H1/ STA247H1/ STA255H1/ STA257H1; BCH311H1/ MGY311Y1/ PSL350H1.

Students who do not have all of the required prerequisites are encouraged to contact the course coordinator to seek a waiver.

Exclusion: BCH441H1

Recommended Preparation: A basic understanding of the R statistical language.

Breadth Requirements: The Physical and Mathematical Universes (5)

MGY460H1 - Genetic Analysis of Development

Hours: 24L

Basic and advanced principles of genetic analysis applied to the study of the best-understood eukaryotic model organisms including the nematode worm *Caenorhabditis elegans*, the zebrafish, and the laboratory mouse. We emphasize the use of genetic approaches to address problems in cell biology and development, such as the regulation of cell fate and tissue development. Much of the knowledge gained from these experimentally tractable organisms has proven broadly applicable, and the same principles of developmental genetic analysis underlie efforts to understand the development of humans.

Prerequisite: BIO260H1/ HMB265H1, MGY311Y1/ CSB349H1/ BCH311H1

Exclusion: MGY451H1, MGY452H1

Recommended Preparation: MGY340H1, MGY350H1

Breadth Requirements: Living Things and Their Environment (4)

MGY470H1 - Human and Molecular Genetics

Hours: 24L

Current aspects of human and molecular genetics including: chromosome structure and function, inheritance of mutations and disease, the human genome and disease gene mapping, cancer genetics, mouse disease models and gene based diagnostics and therapies.

Prerequisite: BCH311H1/ MGY311Y1 (Note: CSB349H1 is acceptable with permission of the instructor)

Breadth Requirements: Living Things and Their Environment (4)

MGY480Y1 - Special Research Project

An opportunity for specialized individual research in molecular genetics and microbiology by arrangement with the course coordinator. Students are required to perform an original research project and attend relevant research seminars. Not eligible for CR/NCR option.

Prerequisite: (MGY314H1/ MGY315H1/ MGY379Y1/ MGY380H1/ MGY381H1), (MGY311Y1/ BCH311H1/ CSB349H1)

Breadth Requirements: Living Things and Their Environment (4)

MIJ485H1 - Vaccines and Immunity

Hours: 36L

Analysis of the strategies used by pathogenic microbes to evade specific and innate immune responses, and the strategies used to combat infectious disease using vaccines, with an emphasis on molecular and immunological aspects. Special topics include: molecular basis of pathogenicity and immune-evasion strategies; vaccination strategies; challenges to vaccine implementation (given jointly by the Departments of Molecular Genetics and Immunology).

Prerequisite: (IMM340H1/ IMM341H1), (IMM350H1/ IMM351H1), MGY377H1, MGY378H1

Exclusion: MBY480H1, MGY485H1

Breadth Requirements: Living Things and Their Environment (4)

Introduction

Munk One at the Munk School of Global Affairs & Public Policy is an interdisciplinary academic program in global affairs for first-year students. It offers students the opportunity to deepen their understanding of global affairs topics such as global innovation, peace, conflict and justice, sustainability, and social and economic inequality. Participating in Munk One ignites intellectual curiosity, elevates knowledge of world affairs, and connects first-year students to the Munk School community.

Munk One is an application-based, selective academic program that consists of four half-credit courses (2.0 credits in total) and is limited to an enrolment of 25 students. Students must submit an [online application](#) with a resumé and supplementary application material immediately after gaining admission to the University of Toronto. Newly admitted students in the Faculty of Arts & Science (St. George campus) are eligible for admission. Students who demonstrate strong intellectual vitality, commitment to public service, and integrity are encouraged to apply. We welcome students from diverse backgrounds, experiences, and academic interests.

Students enrolled in Munk One belong to a vibrant, dynamic, and diverse community of Munk undergraduates as well as graduate students in the Munk School's two professional graduate programs. Courses in Munk One are taught by top scholars and award-winning faculty. Munk One students engage with distinguished Munk Fellows such as current and former Canadian ambassadors, members of the federal and provincial public service, private sector innovators, influential journalists, and global affairs and public policy leaders from around the world. Students are encouraged to participate in the vast array of academic and professional opportunities offered at the Munk School, such as conferences, symposia, seminars, co-curricular activities,

and faculty-led research projects. Munk One students are mentored by Munk One alumni and also engage in academic programming typically offered only to graduate students, such as a case competition.

MUN100H1: Global Innovation explores innovation's role as a key driver of economic growth, population health, and societal success. Using contemporary and historical cases from across the globe, this course asks: When does innovation occur? How do we recognize moments of innovation? Who benefits from innovation? How can we foster equitable innovation?

In MUN110H1: Peace, Conflict and Justice in the Indo-Pacific, students focus on a specific region and explore issues in that area related to sustainable development, geopolitical conflicts, social inequality, and regional stability. Students also propose policy pathways designed to promote sustainable prosperity in the Indo-Pacific.

In MUN130H1: Climate, Energy, and Power, students explore the relationship between energy practices and social and economic power. This class considers the inequality caused by climate change, emergent energy technologies, and the institutional and regulatory conditions that shape national, regional, and international environmental policies.

MUN140H1: Design for Social Change and Inclusion is Munk One's capstone course. In this hands-on, experiential learning class, students tackle real-world problems in partnership with an organization working on global challenges.

Munk One serves as a gateway to other undergraduate courses offered at the Munk School, such as American Studies, Contemporary Asian Studies/South Asian Studies, European Affairs, Peace, Conflict and Justice and Public Policy and Governance. It may also interest students who wish to pursue studies in a range of fields that engage in global problem solving.

Program Director: Professor Rie Kijima,
rie.kijima@utoronto.ca

Program and Events Coordinator: Simone DeFacendis,
munk.one@utoronto.ca or 416-946-0326

Regarding Munk One Courses

Munk One students intending to pursue Peace, Conflict and Justice, Contemporary Asian Studies, and Public Policy programs (undergraduate programs run through the Munk School of Global Affairs & Public Policy), are also eligible to count some of their Munk One coursework toward their degree requirements.

Munk One Courses

MUN100H1 - Global Innovation

Previous Course Number: MUN101H1

Hours: 24S

Innovation has always been a key driver of economic growth, population health, and societal success. Transformative change has historically been linked to major innovations such as urban sanitation, pasteurization, the printing press and the industrial revolution. Currently, the opportunity to enhance life chances worldwide relies on innovating for the poor, social innovation, and the ability to harness scientific and technological knowledge. What precisely is innovation? When does innovation happen? Who benefits from innovation? How can innovation be fostered, and how do innovations spread? Relying on major global transformations and country-specific case studies (for example, South Korea, Taiwan, Israel and India), this course examines the drivers of innovation, the political, social, economic, and scientific and technological factors that are critical to promoting innovation and addressing current global challenges, and the consequences of innovation. Restricted to first-year students admitted to Munk One. Not eligible for CR/NCR option.

Prerequisite: Admission to Munk One

Breadth Requirements: Society and its Institutions (3)

MUN110H1 - Peace, Conflict and Justice in the Indo-Pacific

Hours: 24S

In recent years, countries including Canada, India, Japan, and the United States have devised Indo-Pacific strategies in recognition of the rising importance of the region. The region now accounts for half of the world's people, 60 percent of world's GDP, and two-thirds of global economic growth. Devising effective solutions for the policy challenges related to the Indo-Pacific will be crucial to prevent catastrophic conflict and promote sustainable prosperity in the 21st century. In this class, students will examine the nature of policy problems with a global scope - in areas such as the management of geopolitical conflict, economic security, and human rights and transnational justice - and devise solutions tailored to emerging challenges in the Indo-Pacific. Restricted to first-year students admitted to Munk One. Not eligible for CR/NCR option.

Prerequisite: Admission to Munk One

Breadth Requirements: Society and its Institutions (3)

MUN130H1 - Climate, Energy, and Power

Hours: 24S

Energy is at the crux of a range of pressing global issues, including climate change and the existential threat it poses across the world. This class uses energy – sometimes as a focal point, sometimes as an entry point – to examine a range of issues including inequality, emergent technologies and policy making in a global context. Restricted to first-year students admitted to Munk One. Not eligible for CR/NCR option.

Prerequisite: Admission to Munk One

Breadth Requirements: Society and its Institutions (3)

MUN140H1 - Design for Social Change and Inclusion

Hours: 24S

Framed around a design challenge, in this class students work in teams to come up with an innovative, equity-focused approach to a global problem. To this end, the course includes modules on topics such as: collecting primary data (via interviews and/or focus groups); conducting secondary research; identifying beneficiaries' needs; developing a mindset for social innovation; assessing feasibility and viability; and how to develop culturally responsive and relevant propositions. Restricted to first-year students admitted to Munk One. Not eligible for CR/NCR option.

Prerequisite: Admission to Munk One

Breadth Requirements: Society and its Institutions (3)

Munk School of Global Affairs and Public Policy

Are you curious about the world? Do you want to work on pressing problems with insights from across the globe? The Munk School of Global Affairs & Public Policy offers a wide range of undergraduate programs. You can major in regions, such as Europe, Asia, or the United States, or you can major in topics, such as peace, conflict and justice or public policy and governance. If you want to find new ways to analyze the world around us and learn to address complex problems, the Munk School is the place for you.

Across our exciting undergraduate programs, the Munk School offers experiential learning, small class sizes,

Munk School of Global Affairs and Public Policy Courses

MUN120H1 - Revolutions

Hours: 24L/8T

This course transcends time and place to delve into the overarching dynamics of revolution. This exploration of revolutions goes beyond simple chronology to uncover common threads that unite these transformative events. From the spirit that ignited the English Revolution to the fervor of the American Revolution, the course navigates through the social and political forces that reshaped societies. Students will dissect the emergence of radical change, tracing its evolution from the French Revolution to the Revolutions of 1848 and the birth of modern political ideologies. The course then navigates through the 20th century, from the Russian and Chinese Revolutions to the Cuban Revolution and the intricate web of Latin American revolutionary movements. Comparative analysis delves into the universal and unique aspects of these revolutions, offering students an understanding of the power and influence of these transformative moments.

Breadth Requirements: Thought, Belief and Behaviour (2)

expert faculty, and many opportunities to connect with other students and with practitioners beyond the classroom. Our graduates pursue successful careers in law, policy, the not-for-profit sector, the private sector, local, national and international governmental organizations, and international affairs.

Learn more about our programs, and the enriched experience waiting for you at the Munk School.

MUN150H1 - Successful Societies

Hours: 24L/10T

What is a "successful society"? What makes a society "successful"? How do we identify, measure, and assess "success"? What data do we need and what data should we collect? And what data are we able to collect and compare? The answers to these questions are surprisingly complex and differ across the social sciences, political theory, philosophy, and law. This course invites students to engage with theories and ideals about societies while doing a deep dive into cross-national and sub-national data, exploring the trade-offs of different societal outcomes. Students will grapple with questions about health, crime, security, creativity, inequality, belonging, solidarity, and institutions.

Breadth Requirements: Society and its Institutions (3)

MUN160H1 - Digital and Algorithmic Disruptions

Hours: 24L/10T

This course interrogates how the digital turn – social media, algorithms, monitoring, digital disruption in business models, security, militaries, and more - is shifting social, political, and economic life. Drawing together expertise in both public policy and digital technologies, the course combines the study of technical capacities and future trajectories of digital change with analyses of

political institutions, labour markets, social relations, political segmentation, and changing areas of public and private concern. The course will grapple with the implications of digital and algorithmic disruptions for ethics, leadership, our everyday institutions and public policy making.

Breadth Requirements: Society and its Institutions (3)

MUN170H1 - Democracy in Crisis: Democratic Breakdown and Resilience in the 21st century

Hours: 24L/10T

Democracy in Crisis provides an in-depth introduction to theories of democratization and the roots of contemporary populism. The course will cover democratic transitions in developing countries in the late 20th and early 21st centuries as well as threats to democratic survival in high-income Western countries. We will focus in particular on the roots of the democratic crisis in the United States. Why is the world's oldest and wealthiest democracy facing such serious challenges today?

Breadth Requirements: Society and its Institutions (3)

MUN180H1 - Hitler and Stalin Today

Hours: 24L/10T

Democracy requires strategies for the future, but these depend upon a reckoning with the past. How is freedom defined in a post-colonial world? How can a mass society protect individual citizens? A study of European totalitarianism and the American present prepares us to answer these questions. To that end, this course studies the Stalinist and Nazi regimes, reviews the mass atrocities of the mid-twentieth century, and considers the legacies of these regimes in contemporary memory and politics.

Breadth Requirements: Society and its Institutions (3)

MUN195H1 - The Economics of Birth, Death and Everything in Between

Hours: 24L

Does welfare really encourage people to have more kids? How do contraception bans affect women's work? Do new immigrants create competition that makes wages drop? Economic demography – applying economic analysis to the study of populations – can help us understand all these questions and more. Among other topics, this class

will examine how pension systems, health care, immigration policy and economic growth, marriage and divorce laws and women's labor force participation relate to public policy.

Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

Course Experience: University-Based Experience

MUN196H1 - Somebody's Watching Me: The Global Politics of Surveillance

Hours: 24L

From security cameras and cell phones, to drones and social media, our data are collected in countless ways. But who controls our data? Do we have a right to privacy? Does mass surveillance make us safer?

This course invites students to explore the global politics of mass surveillance, and the role played by states, big tech, police, activists, and ordinary people. Through in-class discussion and analytical writing assignments, students will engage with surveillance studies through many dimensions, including public policy, human rights, international relations, economics, technological development, and race, class, and gender.

Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

Course Experience: University-Based Experience

MUN197H1 - Strong States or Weak Parties?

Hours: 24L

This course will introduce the study of Europe by exploring the political history of European authoritarianism, and resistance to it, from the 1930s right up to the present day. The accent will be on the present: we will seek to explain the growing appeal of populist authoritarianism seven decades after World War II, the Holocaust, and the defeat of German Nazism and Italian fascism. Are current politics in Europe a matter of back to the future? Or is there something new? Is there one authoritarianism in Europe or multiple?

Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)
Course Experience: University-Based Experience

MUN198H1 - Digital Technologies and Human Rights

Hours: 24L

What are digital technologies, exactly? How do we govern them? Do they threaten or protect human rights? In this course, we'll look at the Internet, advanced computing, 'Big Data' analytics, and artificial intelligence – the technologies which form the basis of everything from facial recognition software to home appliances to social media. We'll consider how to govern and use these technologies, and the consequences of those choices for global human rights. Evaluation is based on essays, a presentation, and class participation. There is no exam.

Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)
Course Experience: University-Based Experience

MUN200H1 - Understanding Global Controversies

Hours: 24L/12T

This course provides students from different programs with a forum to discuss and engage with major global issues within the framework of thematic and regional studies and with comparative and multidisciplinary perspectives. Because this course will be team-taught by Munk faculty from the Humanities and Social Sciences, it will provide students with an introduction to interdisciplinary studies. The course envisions examining several topics which will be based on current global controversies including climate change, sustainability, inequality, democracy, migration and conflict.

This course is restricted to students who have either completed MUN105Y1 or MUN100H1, or enrolled in one of the following programs: American Studies Major; American Studies Minor; Contemporary Asian Studies Major; Contemporary Asian Studies Minor; European Affairs Major (formerly European Studies Major); European Affairs Minor (formerly European Union Studies Minor); Peace, Conflict and Justice Major; Peace, Conflict and Justice Specialist; Major in Public Policy; South Asian Studies Minor.

Prerequisite: MUN105Y1 or MUN100H1, or enrolled in at least one of the following programs: American Studies Major (ASMAJ0135); American Studies Minor (ASMIN0135); Contemporary Asian Studies Major

(ASMAJ0235); Contemporary Asian Studies Minor (ASMIN0235); European Affairs Major (formerly European Studies Major) [ASMAJ1626 (formerly ASMAJ1625)]; European Affairs Minor (formerly European Union Studies Minor) [ASMIN1626 (formerly ASMIN1011)]; Peace, Conflict and Justice Major (ASMAJ1228); Peace, Conflict and Justice Specialist (ASSPE1228); Major in Public Policy (ASMAJ2660); South Asian Studies Minor (ASMIN1333)

Breadth Requirements: Society and its Institutions (3)

MUN310H1 - Independent Study in Global Affairs & Public Policy

This course is an independent research project on a global affairs or public policy topic. Students must find a faculty supervisor appointed at the Munk School, submit a proposal, and receive approval for the project. Contact hours with the supervisor may vary, but typically comprise one hour per week.

To enrol, please contact the Munk School Undergraduate Program Coordinator at undergraduatecoordinator.munkschool@utoronto.ca to request an application form, which should be filled out in consultation with the faculty supervisor and include a detailed description of the course topic, reading list, and assignments/marking scheme, at least three weeks before the start of term.

Prerequisite: MUN105Y1/ MUN200H1, or enrolled in at least one of the following programs: American Studies Major (ASMAJ0135); American Studies Minor (ASMIN0135); Contemporary Asian Studies Major (ASMAJ0235); Contemporary Asian Studies Minor (ASMIN0235); European Affairs Major (formerly European Studies Major) [ASMAJ1626 (formerly ASMAJ1625)]; European Affairs Minor (formerly European Union Studies Minor) [ASMIN1626 (formerly ASMIN1011)]; Peace, Conflict and Justice Major (ASMAJ1228); Peace, Conflict and Justice Specialist (ASSPE1228); Major in Public Policy (ASMAJ2660); South Asian Studies Minor (ASMIN1333).

Lecturer

L. Kuzmenko, Mus Bac

Courses with the prefix MUS are open to any student of the University. Even students with a strong music background should find them stimulating explorations of the world of music. Various large ensembles are also open to students across the University (see [MUS120Y1](#)/[MUS220Y1](#) [audition required] and [MUS167Y1](#)/[MUS267Y1](#) [no audition required]).

The Specialist and Major programs provide excellent preparation for a variety of professional activities including music criticism, library science, positions in the publishing, broadcasting, and recording industries, as well as for graduate studies in musicology, ethnomusicology, and music theory, leading to careers in university teaching. The programs lead to the degree of Bachelor of Arts (Honours). For programs leading to the degree of Bachelor of Music, students should consult the [Calendar of the Faculty of Music](#).

Students are encouraged to attend events sponsored by the Faculty of Music such as the Thursdays at Noon and Faculty Artists' Series, opera productions, student recitals, and numerous other concerts. All concerts are free upon presentation of a TCard.

Regarding Music Programs

Enrolment in Specialist and Major programs, which include Faculty of Music HMU and TMU courses, is by audition-interview, held annually in August. Prospective candidates must perform at the Royal Conservatory of Music Grade 8 level or demonstrate comparable skills on a non-Western instrumental or vocal performing tradition. All prospective candidates must demonstrate music-theoretical skills equivalent to RCM Level 8 Theory (formerly Advanced Rudiments) and RCM Level 9 Harmony (formerly Basic Harmony). Students interested in pursuing the Specialist or Major with the Ensemble option are required to pass an additional audition-interview for ensemble placement. Please refer to [MUS120Y1](#). (Note: No audition is required for the Music Minor program, see below; and no audition is required for [MUS167Y1](#)/[MUS267Y1](#).)

Introduction

In the Faculty of Arts and Science, Music is approached as one of the liberal arts and taught as cultural history. This humanistic emphasis aims at a high degree of correlation with other disciplines such as Fine Art, Cultural Anthropology, Languages and Literatures, History, and Philosophy. Note that unlike students in the Mus.Bac. program at the Faculty of Music, students in the Specialist and Major programs are not given individual applied music instruction (e.g., piano or voice lessons). They are, however, offered a thorough grounding in musicology, and strong training in both ethnomusicology and music theory, with the option of increasing their exposure to the latter two disciplines via their upper-year option courses.

Students are required to complete and submit the Student Profile available at <https://music.utoronto.ca/programs/artsci> under "Music Major/Specialist", prior to August 1st. Auditions will be completed via video recordings, with interviews completed virtually over Zoom. Interviews will be assigned after the Music Major/Specialist Student Profile and audition recordings have been received. Detailed information is available on the Faculty of Music website.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Music programs impacted by this policy: [ASSPE2276](#) and [ASMAJ2276](#); [ASSPE2027](#) and [ASMAJ2027](#)

Music Programs

Music Specialist (Arts Program) - ASSPE2276

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Special Requirement

- Students must pass an audition-interview to enroll in the program. The audition is held annually in August. Students are required to complete and submit the Student Profile available on-line, prior to August 1st. Detailed information is available on the [Faculty of Music](#) website.
- Prospective candidates must perform at the Royal Conservatory of Music Grade Eight level, and demonstrate that they have RCM Level 8 Theory (or equivalent) and RCM Level 9 Harmony (or equivalent). Students who do not meet the Level 9 Harmony requirement (or equivalent) will be required to attend an additional hour of tutorial during the fall term of [TMU140Y1](#).

Completion Requirements:

(10 credits)

First Year:

[HMU111H1](#), [HMU126H1](#), [TMU115H1](#), [TMU140Y1](#) (2.5 credits)

Higher Years:

1. [HMU225H1](#), [TMU240Y1](#) (1.5 credits)
2. 3.0 credits from: [HMU425H1](#), [HMU426H1](#), [HMU430H1](#), [HMU431H1](#), [HMU432H1](#), [HMU433H1](#), [HMU435H1](#), [HMU450H1](#)
3. 2.0 credits in music history (HMU) or music theory (TMU) with at least 1.0 credit at the 300-level
4. 1.0 credits at the 100-level or above in a language other than English

Music Specialist with Ensemble Option (Arts Program) - ASSPE2027

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Special Requirement

- Students must pass an audition-interview to enroll in the program. The audition is held annually in August. Students are required to complete and submit the Student Profile available on-line, prior to August 1st. Detailed information is available on the [Faculty of Music](#) website.
- Prospective candidates must perform at the Royal Conservatory of Music Grade Eight level, and demonstrate that they have RCM Level 8 Theory (or equivalent) and RCM Level 9 Harmony (or equivalent). Students who do not meet the Level 9 Harmony requirement (or equivalent) will be required to attend an additional hour of tutorial during the fall term of [TMU140Y1](#).
- Students interested in pursuing the Major or Specialist with the Ensemble option are required to pass an additional audition-interview for ensemble placement. Please refer to [MUS120Y1](#). Completion Requirements:

(11.5 credits)

First Year:

[HMU111H1](#), [HMU126H1](#), [MUS120Y1](#), [TMU115H1](#), [TMU140Y1](#) (3.5 credits)

Higher Years:

1. [HMU225H1](#), [TMU240Y1](#) (1.5 credits)

2. MUS220Y1 (1.0 credits)
3. 3.0 credits from: HMU425H1, HMU426H1, HMU430H1, HMU431H1, HMU432H1, HMU433H1, HMU435H1
4. 1.5 credit in music history (HMU) or music theory (TMU) at the 300+ level
5. 1.0 credit at the 100-level or above in a language other than English

Music Major (Arts Program) - ASMAJ2276

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Special Requirement

- Students must pass an audition-interview to enroll in the program. The audition is held annually in August. Students are required to complete and submit the Student Profile available on-line, prior to August 1st. Detailed information is available on the Faculty of Music website.
- Prospective candidates must perform at the Royal Conservatory of Music Grade Eight level, and demonstrate that they have RCM Level 8 Theory (or equivalent) and RCM Level 9 Harmony (or equivalent). Students who do not meet the Level 9 Harmony requirement (or equivalent) will be required to attend an additional hour of tutorial during the fall term of TMU140Y1.

Completion Requirements:

(7 credits)

First Year:

HMU111H1, HMU126H1, TMU115H1, TMU140Y1 (2.5 credits)

Higher Years:

1. HMU225H1, TMU240Y1 (1.5 credits)
2. 2.0 credits in music history (HMU), including at least one half-course at the 300+ level and one half-course at the 400-level
3. 1.0 credit at the 300+ level in music history (HMU) or music theory (TMU)

Music Major with Ensemble Option (Arts Program) - ASMAJ2027

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Special Requirement

- Students must pass an audition-interview to enroll in the program. The audition is held annually in August. Students are required to complete and submit the Student Profile available on-line, prior to August 1st. Detailed information is available on the Faculty of Music website.
- Prospective candidates must perform at the Royal Conservatory of Music Grade Eight level, and demonstrate that they have RCM Level 8 Theory (or equivalent) and RCM Level 9 Harmony (or equivalent). Students who do not meet the Level 9 Harmony requirement (or equivalent) will be required to attend an additional hour of tutorial during the fall term of TMU140Y1.
- Students interested in pursuing the Major or Specialist with the Ensemble option are required to pass an additional audition-interview for ensemble placement. Please refer to MUS120Y1. Completion Requirements:

(8 credits)

First Year:

HMU111H1, HMU126H1, MUS120Y1, TMU115H1, TMU140Y1 (3.5 credits)

Higher Years:

1. HMU225H1, TMU240Y1 (1.5 credits)
2. MUS220Y1 (1.0 credit)
3. 1.0 credit in music history (HMU) at the 300+ level, including at least one half-course at the 400-level
4. 1.0 credit at the 300+ level in music history (HMU) or music theory (TMU)

Music History & Culture Minor (Arts Program) - ASMIN0695

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4 full courses or equivalent)

1. MUS110H1, MUS111H1
2. MUS200H1 or an alternative 200-level 0.5 credit in

world music ([MUS209H1](#), [MUS211H1](#), [MUS212H1](#), or [MUS215H1](#))

3. 2.5 credits in MUS courses from the list below, including one credit at the 300+ level. Either [MUS120Y1](#) or [MUS220Y1](#) can be counted towards the 2.5 credits in MUS courses

Regarding Music Courses

HMU and TMU Courses

Music Courses

MUS110H1 - Introduction to Music History and Culture

Hours: 24L

Introduction to form, style and the interrelationship of music and culture. A basic ability to read music is required.

Exclusion: [HMU111H1](#), [VPMA80H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

MUS111H1 - Historical Survey of Western Music

Historical survey of Western art music from the Middle Ages to the present. A basic ability to read music is required.

Exclusion: [HMU111H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

HMU111H1 - Introduction to Music and Society

An examination of musical thought and practice in non-Western and Western traditions.

Exclusion: Does not count as an HMU elective.

HMU111H1, TMU115H1, and TMU140Y1 are Prerequisites for all other HMU/TMU courses which are offered annually. Full details on these and other HMU/TMU courses may be found in the [Calendar of the Faculty of Music](#).

HMU111H1, TMU115H1, and TMU140Y1, for the purposes of an Arts & Science degree, are considered category 1 (Creative and Cultural Representations) for breadth requirements, and are considered as Humanities courses for distribution requirements.

TMU115H1 - Musical Skills I & II

Reading and listening skills for diatonic and chromatic materials. Topics include sight singing, rhythm reading, keyboard harmony, and dictation.

Prerequisite: RCM Level 8 Theory, RCM Level 9 Harmony, RCM Grade 8 level performing audition, and permission of Department.

Corequisite: [HMU111H1](#) and [TMU140Y1](#).

Recommended Preparation: This course is offered simultaneously with [TMU132H1](#) (F) and [TMU133H1](#) (S) at the Faculty of Music.

MUS120Y1 - Vocal and Instrumental Ensembles I

Hours: 144P

Students rehearse and perform in concerts and reading sessions as assigned by the Faculty of Music. Provides experience in choral groups, orchestra, or in concert band and large wind groups of diverse instrumentation. Development of musicianship skills through performance of large ensemble works; emphasis on sight-reading, ear-training, and musical knowledge.

Attendance at all sessions is required. Placement audition and permission of the Department required.

Download the excerpt that is relevant to the instrument you would like to audition on; excerpts will be available at www.music.utoronto.ca beginning early July.

Exclusion: [MUS291Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

HMU126H1 - Historical Survey II

Western music from 1750 to the present.

Exclusion: HMU226H1. Does not count as an HMU elective.

TMU140Y1 - Music Theory I & II

Diatonic harmony, including principles of voice leading and harmonic progression. Chromatic harmony, including modulation, mixture, Neapolitan and augmented sixths. Course requirements include part-writing, analysis, and keyboard harmony/skills.

Prerequisite: RCM Level 8 Theory, RCM Level 9 Harmony, RCM Grade 8 level performing audition and permission of Department.

Corequisite: HMU111H1 and TMU115H1

Recommended Preparation: This course is offered simultaneously with TMU130H1 (F), TMU131H1 (S) and TMU105Y/107Y1 at the Faculty of Music.

MUS167H1 - University of Toronto Faculty of Music Gospel Choir

Hours: 72P

This course will explore various forms of gospel music repertoire, from its roots in African American spirituals to mainstream contemporary gospel choir music. Students will develop their aural musicianship skills and their ability to 'learn by ear' through a rote style of teaching. Students will also be encouraged to develop their improvisation skills in solo and group settings. Students will have the opportunity to engage in several authentic gospel choir performances during the course.

Breadth Requirements: Creative and Cultural Representations (1)

MUS200H1 - Music of the World's Peoples

Hours: 24L

A survey of musical traditions from various regions of the world, with particular emphasis on the sociocultural contexts in which those musics are created and appreciated. No prior background in music or ability to read music is required.

Exclusion: HMU111H1, VPMA99H3

Breadth Requirements: Creative and Cultural Representations (1)

MUS202H1 - Beethoven

Hours: 24L

A study of Beethoven's musical style in historical context, including a non-technical consideration of Beethoven's innovations based on listening to music and reading history. No prior background in music or ability to read music is required.

Exclusion: HMU111H1, VPMC85H3

Breadth Requirements: Creative and Cultural Representations (1)

MUS204H1 - The Age of Bach & Handel

Hours: 24L

A study of the representative major works in their social and cultural setting with emphasis on the high baroque style of Bach and Handel. No prior background in music or the ability to read music is required.

Exclusion: HMU111H1

Breadth Requirements: Creative and Cultural Representations (1)

MUS206H1 - The World of Opera

Hours: 24L

Examination of selected operas from the eighteenth to the early twentieth century. Musical and dramatic styles will be considered in their cultural context. The ability to read music is not required.

Exclusion: HMU111H1

Breadth Requirements: Creative and Cultural Representations (1)

MUS207H1 - Music for Orchestra

Hours: 24L

Study of selected orchestral works from 1700 to the present. No prior background in music or ability to read music is required.

Exclusion: HMU111H1

Breadth Requirements: Creative and Cultural Representations (1)

MUS209H1 - Performing Arts of South Asia

Hours: 24L

Survey of classical, devotional, folk and popular musics and dances from the Indian subcontinent and their toll in the sociocultural life of the region. No prior background in music or ability to read music is required.

Exclusion: HMU111H1

Breadth Requirements: Creative and Cultural Representations (1)

MUS210H1 - Music in Film

Hours: 24L

This course introduces students to the history and theory of music in film, beginning in the so-called silent era and ending in recent years. Students will become familiar with basic film music concepts and be able to identify the main ways in which music works in the movies.

Breadth Requirements: Creative and Cultural Representations (1)

MUS211H1 - The World of Popular Music

Hours: 24L

A survey of popular music traditions from various regions of the world with particular emphasis on the sociocultural contexts in which those musics are created and appreciated. Explores the role of the recording industry, media, festivals, and local institutions in shaping these music cultures both at home and in the international arena. No prior background in music or ability to read music is required.

Exclusion: HMU111H1

Breadth Requirements: Creative and Cultural Representations (1)

MUS212H1 - Music, Sound & Power in the Middle East

Hours: 24L

An investigation of the social life of classical, devotional, folk and popular music and dance from across the Middle East, North Africa and Central Asia.

Breadth Requirements: Creative and Cultural Representations (1)

MUS215H1 - Performing Arts of East Asia

Hours: 24L

An investigation of the social life of classical, devotional, theatrical, folk, and popular music and dance across East Asia.

Breadth Requirements: Creative and Cultural Representations (1)

MUS220Y1 - Vocal and Instrumental Ensembles II

Hours: 144P

Students rehearse and perform in concerts and reading sessions as assigned by the Faculty of Music. Provides experience in choral groups, orchestra, or in concert band and large wind groups of diverse instrumentation. Development of musicianship skills through performance of large ensemble works; emphasis on sight-reading, ear-training, and musical knowledge.

Attendance at all sessions is required. Placement audition and permission of the Department required.

Download the excerpt that is relevant to the instrument you would like to audition on; excerpts will be available at www.music.utoronto.ca beginning early July.

Prerequisite: MUS120Y1. Placement audition and permission of the Department required.

Breadth Requirements: Creative and Cultural Representations (1)

MUS225H1 - Music: Islamic World

Hours: 24L

A survey of the musical systems of Muslim societies from North Africa to Southeast Asia, with special focus on the broader cultural contexts in which they are created, used, and appreciated. No prior background in music or ability to read music is required.

Exclusion: HMU111H1

Breadth Requirements: Creative and Cultural Representations (1)

HMU225H1 - Historical Survey I

Western music up to 1750.

Prerequisite: In Year 2.

Exclusion: Does not count as an HMU elective.

MUS230H1 - Music of the 1960s

Hours: 24L

Examination of musical and cultural aspects of the decade, with emphasis on North America. No prior background in music or ability to read music is required.

Exclusion: HMU111H1

Breadth Requirements: Creative and Cultural Representations (1)

MUS235H1 - Survivors' Music

Hours: 24L

Investigating music's myriad roles in the lives of survivors of violence and traumatic experience, for example, in health and recovery, witnessing, and advocacy—and the hidden histories these musics reveal. We encounter survivors of the Holocaust, Hiroshima, the Japanese “comfort women” system, and quotidian domestic and sexual violence.

Exclusion: HMU111H1

Breadth Requirements: Creative and Cultural Representations (1)

MUS240H1 - Heavy Music

An investigation of different world genres of “heavy music” as creations of sounding figures of social order, practices of destruction, practices of personal and collective power, social critique, parody, and so on. Includes obvious suspects—metal, punk, gangsta rap—but also opera, military musics, ritual musics, and others.

Exclusion: HMU111H1

Breadth Requirements: Creative and Cultural Representations (1)

TMU240Y1 - Music Theory and Skills III & IV

The first semester focuses on the study of forms and analysis of repertoire from c.1700-c.1900; forms to be studied include binary, ternary, sonata, rondo, variation, and fugue. The second semester focuses on post-tonal theory and analysis of music post-1900 along with reading and listening skills suitable for understanding post-tonal music.

Prerequisite: TMU115H1, TMU140Y1

Exclusion: TMU230H1, TMU231H1, TMU232H1

MUS267H1 - University of Toronto Faculty of Music Gospel Choir

Hours: 72P

This course will explore various forms of gospel music repertoire, from its roots in African American spirituals to mainstream contemporary gospel choir music. Students will develop their aural musicianship skills and their ability to ‘learn by ear’ through a rote style of teaching. Students will also be encouraged to develop their improvisation skills in solo and group settings. Students will have the opportunity to engage in several authentic gospel choir performances during the course.

Prerequisite: MUS167H1

Breadth Requirements: Creative and Cultural Representations (1)

Course Experience: University-Based Experience

MUS300H1 - Music, Media and Technology

Hours: 24L

This course explores some of the ways in which music has been shaped through history, and particularly during the last 100 years, by technology and the media. Special attention will be paid to the record industry, broadcasting, and cinema. Examples from popular and art music traditions of the world will be used to illustrate the symbolic relationship between music and media. No prior background in music or ability to read music is required.

Exclusion: HMU111H1

Breadth Requirements: Creative and Cultural Representations (1)

MUS301H1 - African Popular Music

Hours: 24L

A survey of popular music in Sub-Saharan Africa from the 1920s to today. Students will listen to and think critically about a range of musical genres in their historical and social contexts. Case studies include Ghanaian highlife, Congolese rumba, Ethiopian jazz, South African kwaito, and Nigerian afrobeat(s). In our exploration of popular genres, we will engage topics of colonialism, nationalism, ethnicity, aesthetics, commodification, and appropriation, among others. No prior background in music is required.

Breadth Requirements: Creative and Cultural Representations (1)

MUS302H1 - Symphony

Hours: 24L

Masterpieces in the symphonic genre from the eighteenth to the twentieth centuries. No prior background in music or ability to read music is required.

Exclusion: [HMU111H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

MUS303H1 - Music in the Contemporary World

Hours: 24L

The modern musical repertoire, including popular and traditional music from various parts of the world, will be studied from a variety of theoretical perspectives. No prior background in music or ability to read music is required.

Exclusion: [HMU111H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

MUS305H1 - Latin American and Caribbean Music

Hours: 24L

A survey of popular, folk, and religious music from Latin America and the Caribbean. Each practice will be considered in its socio-cultural context with attention to the histories and discourses of racial and cultural mixing that deeply inform everyday life in nation-states including Peru, Brazil, Haiti, and Jamaica among others.

Exclusion: [HMU111H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

MUS306H1 - Popular Music in North America

Hours: 24L

A selected survey of North American popular music from the 1930s through present. Students will develop a critical framework for listening to and analyzing popular music in historical and social context by focusing on aspects of performance, representation, composition, mass media, aesthetics, and commodification. No prior background in music or ability to read music is required.

Exclusion: [HMU111H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

MUS308H1 - Handel

Hours: 24L

Handel's life and music will be examined in its cultural contexts.

Exclusion: [HMU111H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

MUS315H1 - North American Vernacular Music

Hours: 24L

Explores vernacular music in North America, considering how musical performances and festivals of vernacular music map local, regional, and ethnic identities in North America. Specific case studies will include Scottish Highland, Tejano Conjunto, Métis Fiddling, Powwow, and Zydeco. No prior background in music or ability to read music is required.

Exclusion: [HMU111H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

MUS321H1 - The Beatles

Hours: 24L

In The Ultimate Encyclopedia Of Rock, it was written of the The Beatles that "From three-minute pop classics to the psychedelic extravaganza of 'Sgt. Pepper', their songs soundtracked the Sixties. They were the greatest group in history. They probably always will be". In addition to a survey of the group's history, their recordings, and their films, this course aims to answer two basic questions: (1) what made the songs of The Beatles so successful? (2) in what ways did the band's artistic output "soundtrack" the 1960s? No prior background in music or ability to read music is required.

Exclusion: HMU111H1

Breadth Requirements: Creative and Cultural Representations (1)

MUS325H1 - The Age of Haydn & Mozart

Hours: 24L

Selected works from the second half of the eighteenth century by Haydn, Mozart, and their contemporaries will be examined in cultural and historical context. No prior background in music or ability to read music is required.

Exclusion: HMU111H1

Breadth Requirements: Creative and Cultural Representations (1)

MUS330H1 - Music, Violence, and War

Hours: 24L

An inquiry into the social life of music in situations of violence, war, social domination, and traumatic experience. Case studies include music and African-American slavery, the First World War, Nazi Germany and the Holocaust, the Asia-Pacific War, Khmer Rouge Cambodia, the Iraq Wars and others.

Breadth Requirements: Creative and Cultural Representations (1)

MUS335H1 - A Social History of the Piano

Hours: 24L

A survey of the changing roles and gendered associations of the piano c.1700 to the present day. Examples from the western art music tradition are compared to the acculturating force of the piano in other cultures, representations in the visual arts and film, and contemporary contexts of piano performance.

Exclusion: VPMB76

Breadth Requirements: Creative and Cultural Representations (1)

MUS340H1 - 20th Century Music for Theatre

Hours: 24L

An examination of the role that music has played in modern Western theatre, with specific case studies drawn from one or more of the following genres: ballet, modern dance, musical theatre, opera, spoken theatre.

Breadth Requirements: Creative and Cultural Representations (1)

HMU345H1 - Global Popular Musics

Global Popular Musics is an introduction to popular music in its social and cultural context in a variety of international settings. Genres to be covered may include, but are not limited to, rock, hip-hop, country, and "world music". The course will take an issues-based approach to the study of popular music, focusing on topics such as the interplay of tradition and modernity; media and technology; race, gender, sexuality, class, and other facets of identity; urbanization and migration; and the markets and legal structures surrounding music.

Prerequisite: HMU111H1, HMU126H1, HMU225H1/
JMU210H1

Exclusion: HMU245H1

MUS408H1 - Wagner

Hours: 24L

A study of the life and works of the composer Richard Wagner, and of his influence on European cultural life from his time to the present day.

Breadth Requirements: Creative and Cultural Representations (1)

HMU425H1 - Topics: Medieval Music

Plainchant and polyphony, including topics for individual research.

Prerequisite: Completion of 4-course History requirement and one additional HMU elective, or P.I.

Exclusion: HMU330H1

HMU431H1 - Topics: Romantic Music

Instrumental and vocal genres, including topics for individual research.

Prerequisite: Completion of 4-course History requirement and one additional HMU elective, or P.I.

HMU432H1 - Topics: 20th Century Music

Developments and trends since 1910, including topics for individual research.

Prerequisite: Completion of 4-course History requirement and one additional HMU elective, or P.I.

HMU433H1 - Topics: Ethnomusicology

The history of the discipline from its roots in Comparative Musicology in the 1880s to the modern, holistic study of music and society. Other topics include transcription, transmission, and cultural appropriation. A variety of the world's traditions are illustrated with audio-visual materials, and students contribute personal surveys, analyses and debates.

Prerequisite: Completion of 4-course History requirement and one additional HMU elective, or P.I.

Introduction

The Department is concerned with the interdisciplinary study of the civilizations and cultures of the Near and Middle East from Neolithic times until the present, including their archaeology, history, mythology, religion and thought, art and architecture, and language and literature (Akkadian, Ancient Egyptian, Arabic, Aramaic, Coptic, Ge'ez, Hebrew, Persian, Sumerian, Syriac, and Turkish). The Department's programs provide students with a unique opportunity to study non-Western complex societies and civilizations.

The term Near East has been used in scholarship to refer to the region of Southwest Asia at the eastern end of the Mediterranean, including the Levant, Mesopotamia, Egypt, and Anatolia, from ancient times until the advent of Islam in the seventh century AD. The term Middle East refers to a broader geographical area stretching from North Africa to West and Central Asia. Although Islam became the predominant religious culture and remains so to the present day, the Middle East has been home to many religious communities, including Christians, Jews, Zoroastrians, and others. And while Arabic functioned as the interlanguage in much the same way as Latin did in the Christian West, many other languages and cultures (notably Persian and Turkish) contributed to the formation of Islamic civilization.

The Department welcomes students of all academic backgrounds who wish to learn about the Near and Middle East. Many courses do not require knowledge of the languages of the region. However, the Department strongly believes that a deeper understanding of the

cultures of the Near and Middle East can be achieved through the study of one or more of its languages.

Additional information about programs and courses offered in a particular year, as well as about the NMC Students' Union, can be found on the Department's website: www.nmc.utoronto.ca. Undergraduate enquiries should be directed to the NMC Undergraduate Office, Bancroft Building, 4 Bancroft Ave., BF204 (nmc.undergrad@utoronto.ca).

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Near and Middle Eastern Civilizations programs impacted by this policy: [ASSPE1019](#), [ASMAJ1019](#), and [ASMIN1019](#); [ASSPE2665](#) and [ASMAJ2665](#); [ASSPE2667](#) and [ASMAJ2667](#); [ASSPE2669](#) and [ASMAJ2669](#)

Near and Middle Eastern Civilizations Programs

Near and Middle Eastern Civilizations Specialist (General) (Arts Program) - ASSPE1019

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(11.0 credits, including at least 4.0 credits at the 300+ level, of which 1.0 credit must be at the 400-level.)

At least 9.0 credits must be NMC and/or NML courses. 2.0 credits may be taken from courses offered by other departments pending approval by the Associate Chair Undergraduate of NMC.

1. First Year: 1.0 credit from [NMC101H1](#)/ [NMC102H1](#)/ [NMC103H1](#)/ [NMC104H1](#).

2. 4.0 credits in one or two primary source languages (with NML designator) from among the following languages: Akkadian, Ancient Egyptian, Arabic, Aramaic, Coptic, Ge'ez, Hebrew, Persian, Syriac, Turkish.

3. Higher years: 3.0 credits from [NMC238H1](#), [NMC239H1](#), [NMC241H1](#), [NMC242H1](#), [NMC245H1](#), [NMC248H1](#), [NMC249H1](#), [NMC267H1](#), [NMC269H1](#), [NMC270H1](#), [NMC272H1](#), [NMC274H1](#), [NMC275H1](#), [NMC276H1](#), [NMC277H1](#), [NMC278H1](#), [NMC280H1](#), [NMC281H1](#), [NMC282H1](#), [NMC308H1](#), [NMC340H1](#), [NMC341H1](#), [NMC342H1](#), [NMC343H1](#), [NMC344H1](#), [NMC346H1](#), [NMC347H1](#), [NMC348H1](#), [NMC355H1](#), [NMC356H1](#), [NMC358H1](#), [NMC359H1](#), [NMC362H1](#), [NMC365H1](#), [NMC370H1](#), [NMC372H1](#), [NMC373H1](#), [NMC375H1](#), [NMC376H1](#), [NMC378H1](#), [NMC379H1](#), [NMC386H1](#), [NMC387H1](#), [NMC388H1](#), [NMC389H1](#), [NMC446H1](#), [NMC447H1](#), [NMC449H1](#), [NMC452H1](#), [NMC454H1](#), [NMC471H1](#), [NMC472H1](#), [NMC473H1](#), [NMC475H1](#), [NMC476H1](#), [NMC477H1](#), [NMC478H1](#), [NMC479H1](#) (History & Society courses) and [JHM307H1](#), [JMH385H1](#), [JRN301H1](#), [NMC240H1](#), [NMC247H1](#), [NMC254H1](#), [NMC257H1](#), [NMC271H1](#), [NMC284H1](#), [NMC289H1](#), [NMC330H1](#), [NMC331H1](#), [NMC371H1](#), [NMC380H1](#), [NMC381H1](#), [NMC384H1](#), [NMC484H1](#) (Religion & Thought courses).

2.0 credits from [NMC249H1](#), [NMC250H1](#), [NMC260H1](#), [NMC261Y0](#), [NMC262H1](#), [NMC263H1](#), [NMC264H1](#), [NMC265H1](#), [NMC266H1](#), [NMC267H1](#), [NMC268H1](#), [NMC269H1](#), [NMC290H0](#), [NMC291H0](#), [NMC345H1](#), [NMC349H1](#), [NMC360H1](#), [NMC361H1](#), [NMC362H1](#), [NMC364H1](#), [NMC365H1](#), [NMC366H1](#), [NMC367H1](#), [NMC368H1](#), [NMC369H1](#), [NMC398Y0](#), [NMC445H1](#), [NMC459H1](#), [NMC460H1](#), [NMC461H1](#), [NMC462H1](#), [NMC463H1](#), [NMC464H1](#), [NMC465H1](#), [NMC466H1](#), [NMC467H1](#), [NMC468H1](#), [NMC469Y1](#), [NMC470H1](#), [NMC474H1](#) (Archaeology courses) and [NMC243H1](#), [NMC244H1](#), [NMC246H1](#), [NMC251H1](#), [NMC252H1](#), [NMC253H1](#), [NMC255H1](#), [NMC256H1](#), [NMC258H1](#), [NMC259H1](#), [NMC315H1](#), [NMC316H1](#), [NMC350H1](#), [NMC351H1](#), [NMC352H1](#), [NMC353H1](#), [NMC354H1](#), [NMC357H1](#), [NMC394H1](#), [NMC395H1](#), [NMC396H1](#), [NMC450H1](#), [NMC480H1](#), [NMC491H1](#) (Art, Architecture, & Literature courses).

4. 1.0 credit of NMC or NML courses or those from a list of pre-approved courses offered by other departments.

Near and Middle Eastern Civilizations Specialist (Ancient) (Arts Program) - ASSPE2665

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(11.0 credits, including at least 4.0 credits at the 300+ level, of which 1.0 credit must be at the 400-level.)

At least 9.0 credits must be NMC and/or NML courses. 2.0 credits may be taken from courses offered by other departments, pending approval by the Associate Chair Undergraduate of NMC.

1. First Year: 1.0 credit from NMC101H1/ NMC102H1/ NMC103H1/ NMC104H1.

2. 4.0 credits in one or two primary source languages (with NML designator) from among the following languages: Akkadian, Ancient Egyptian, Aramaic, Coptic, Ge'ez, Hebrew (Biblical, Middle), Persian (Old Persian, Avestan, Pahlavi), Syriac.

3. Higher years:

3.0 credits from NMC238H1, NMC239H1, NMC245H1, NMC248H1, NMC249H1, NMC267H1, NMC269H1, NMC270H1, NMC276H1, NMC277H1, NMC343H1, NMC344H1, NMC346H1, NMC347H1, NMC359H1, NMC362H1, NMC365H1, NMC370H1, NMC446H1, NMC447H1, NMC449H1, NMC471H1, NMC472H1 (History & Society courses) and JRN301H1, NMC247H1, NMC254H1, NMC257H1, NMC289H1, NMC330H1, NMC331H1, NMC371H1, NMC380H1 (Religion & Thought courses).

Near and Middle Eastern Civilizations Major (Modern) (Arts Program) - ASMAJ2669

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(6.0 credits including at least 2.0 credits at the 300+ level, of which 1.0 credit must be at the 400-level)

At least 5.0 credits must be NMC and/or NML courses. 1.0 credit may be taken from courses offered by other departments, pending approval by the Associate Chair Undergraduate of NMC.

1. First Year: 0.5 credit from NMC101H1/ NMC102H1/ NMC103H1/ NMC104H1.

2. Higher years:

2.0 to 3.0 credits from Group C and 1.0 credit from Group A/Group B.

1.0 to 2.0 credits in Modern Stream languages: Arabic, Hebrew, Persian, Turkish.

Group A (Ancient Stream)

NMC196H1, NMC197H1, NMC199H1, NMC238H1, NMC239H1, NMC245H1, NMC246H1, NMC247H1, NMC248H1, NMC249H1, NMC250H1, NMC251H1, NMC252H1, NMC253H1, NMC254H1, NMC257H1, NMC259H1, NMC260H1, NMC261Y0, NMC262H1, NMC263H1, NMC264H1, NMC265H1, NMC266H1, NMC267H1, NMC268H1, NMC269H1, NMC270H1, NMC276H1, NMC277H1, NMC289H1, NMC290H0, NMC291H0, NMC299Y1, NMC330H1, NMC331H1, NMC343H1, NMC344H1, NMC345H1, NMC346H1, NMC347H1, NMC349H1, NMC351H1, NMC352H1, NMC359H1, NMC360H1, NMC361H1, NMC362H1, NMC362Y1, NMC364H1, NMC365H1, NMC366H1, NMC369H1, NMC370H1, NMC371H1, NMC380H1, NMC382Y1, NMC398Y0, NMC399Y1, NMC445H1, NMC446H1, NMC447H1, NMC449H1, NMC450H1, NMC459H1, NMC460H1, NMC461H1, NMC462H1,

Near and Middle Eastern Civilizations Minor (Arts Program) - ASMIN1019

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

4.0 credits, including at least 1.0 credit at the 300+ level. All 4.0 credits must be NMC and/or NML courses.

Faculty of Arts & Science Language Citation

The Department of Near and Middle Eastern Civilizations participates in the Faculty of Arts & Science's Language Citation for Arabic, modern Hebrew, Persian, Turkish, Biblical Hebrew, and Ancient Egyptian. The study of languages is a demanding and intellectually rewarding educational experience that provides access to the varieties of human culture and expression. The Language Citation requires the completion of 3.0 credits and recognizes a significant level of achievement in the advanced study of a language.

The Citation in Arabic is available to students who, having completed the introductory course in Arabic ([NML110Y1](#) or the equivalent prerequisite training), earn a grade of at least B- in two additional credits in Arabic language ([NML210Y1](#), [NML310Y1](#), or [NML410Y1](#)).

The Citation in modern Hebrew is available to students who, having completed the introductory courses in modern Hebrew ([NML155H1](#) and [NML156H1](#) or the equivalent prerequisite training), earn a grade of at least B- in two additional credits in modern Hebrew language ([NML255H1](#), [NML256H1](#), [NML355H1](#), and [NML356H1](#)).

The Citation in Persian is available to students who, having completed the introductory Persian language course ([NML260Y1](#) or the equivalent prerequisite training), earn a grade of at least B- in two additional credits in Persian language/literature ([NML360Y1](#), [NML460H1](#), [NML461H1](#), [NML462H1](#), [NML463H1](#), [NML466H1](#), [NML467H1](#), or [NML468H1](#)).

The Citation in Turkish is available to students who, having completed the introductory course in Turkish ([NML270Y1](#) or the equivalent prerequisite training), earn a grade of at least B- in two additional credits in Turkish language ([NML370Y1](#), [NML371H1](#), and [NML470Y1](#)).

The Citation in Biblical Hebrew is available to students who, having completed the introductory course in Biblical Hebrew ([NML250Y1](#) or the equivalent prerequisite training), earn a grade of at least B- in two additional credits in Biblical Hebrew language ([NML350H1](#), [NML351H1](#), [NML450H1](#), and [NML459H1](#)).

The Citation in Ancient Egyptian is available to students who, having completed the introductory course in Ancient Egyptian ([NML240Y1](#) or the equivalent prerequisite training), earn a grade of at least B- in two additional credits in Ancient Egyptian language/literature ([NML340Y1](#), [NML440H1](#), [NML441H1](#), and [NML442Y1](#)).

Students should note that, as explained in the [Academic Record - Recognition of Academic Achievement](#) section of this Calendar, the Language Citation is not equivalent to

an academic program for purposes of degree completion; however, language courses taken as part of the Requirements for an NMC Program of study may count towards a Language Citation in the relevant language(s).

Regarding Near and Middle Eastern Civilizations Courses

Not all courses are taught every year. Please check the [Timetable Builder](#) for the list of courses offered in 2024-2025. Courses with the designator NML indicate courses devoted to the study of the languages of the Near and Middle East (at Introductory, Intermediate, and Advanced levels), as well as courses that study texts written in the original languages. The Department reserves the right to place students in the course level best suited to their linguistic preparation.

First-Year Foundations Courses

First-Year Foundations Seminars are open only to newly-admitted Faculty of Arts & Science students. They offer the opportunity to explore interesting and often controversial topics in a small-group setting with professors who are among the Faculty's leading scholars. Students engage in academically rigorous discussions and develop strong written and oral communication skills in the process. The Department offers six FYF Seminars on topics ranging from the ancient to the modern. First-Year Foundations Seminars:

- Count as 0.5 of the 20.0 credits required for an HBA, HBSc or BCom.
- First-Year Foundations Seminars may count towards your Program. Please check with your college registrar or the NMC Department for further details.
- Can be counted towards the breadth requirement.

For the list of [NMC First-Year Foundations Seminars](#) see the Faculty of Arts & Science Calendar.

Gateway Courses

These courses are designed to introduce students to the major civilizations and cultures of the Near and Middle East—ancient, medieval, and modern—and to present students with the range of possibilities for further study in their chosen area of interest. These courses provide an opportunity for students to improve their writing skills under the supervision of the Writing Integrated Teaching (WIT) program of the Faculty of Arts & Science. Students pursuing any one of the NMC Specialist Programs are required to take two of these Gateway courses, whereas students opting to do any one of the Major Programs are required to take only one.

Near and Middle Eastern Civilizations Courses

NMC First-Year Foundations

NMC195H1 - Rebels, Misfits, and Outcasts in Modern Arabic Literature

Previous Course Number: NMC242H1

Hours: 36S

This course examines modern Arabic literary texts that portray marginalized social figures and groups who have been excluded from a protective system of resources and privileges. Students will read novels and short stories by prominent Arab authors who have represented marginal social groups in their fiction, including representations of the urban poor, the peasantry, the delinquent, the prostitute, sexual minorities, women who reject normative roles, and the political rebel. These fictional texts address issues such as political resistance and rebellion, economic precarity, and social exclusion. Students will engage with these texts by critically examining the role of literature in narrating unspoken and suppressed histories. The class will also introduce students to theoretical modes of literary analysis and interpretation. All texts will be read in English translation. Authors include Mohamed Choukri, Hanan al-Shaykh, Alifa Rifaat, Sonallah Ibrahim, and Arwa Salih. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: NMC242H1

Breadth Requirements: Creative and Cultural Representations (1)

NMC196H1 - Law and Order in the Ancient Near East

Hours: 24S

Are human beings basically evil or good? What creates order in society? Coercion? Religion? Can societies operate without law? This course explores different systems of authority and control through ancient texts, focusing on the very first ideas of law in human history. We examine actual law codes, court cases on real estate disputes and conspiracy to commit murder and rape, as well as alternative means of regulating communities such as ideology, ritual and magic. While most courses on ancient law approach the topic from the perspective of modern concerns, this course situates the first law in its own historical, social and political context. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

NMC197H1 - Myth and History in the Bible

Hours: 24S

Reading the Bible is easy, but reading it well isn't. Should we read its stories as history? All of it? Or perhaps only part of it? If so, which parts? And if some parts aren't meant to be read as history, then what are they? Was Jonah really swallowed by a large fish? Did the sun and moon stand still for Joshua? Did Moses really part the Red Sea? Did Jesus really raise Lazarus from the dead? Are miracles necessarily fiction? In this seminar, we will read together many of the most colourful stories of the Bible, sometimes alongside similar stories from the cultural context of ancient Israel, and discuss what genre (history, myth, legend, folktale) they belong to and how this affects our reading of these texts. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

NMC198H1 - Iranian Women Reveal Their Lives: The First Generation

Hours: 24S

Persian women born in the late 19th century and early decades of the 20th century grew up in a period of major political, social, and cultural change that impacted women. A course reading, *Memories of a Persian Childhood*, illustrates the important role of the family and childhood experiences in the lives of a first generation of women to have access to a modern education, and step beyond traditional boundaries. Women's personal writings are the main sources we use to learn about female aspirations, hopes and disappointments as well as the challenge of living in a patriarchal society that took for granted that a woman would devote her life to caring for home and family. We will explore how this generation navigated restraints on women in the years of Pahlavi rule (1925-1979) and served as a model of female contribution for a young generation following the 1979 Islamic Revolution. Each seminar will consist of the instructor's introductory comments, a discussion of the assigned readings and an exchange of opinions about the life of women in different environments. The final mark is based on the readings in the course syllabus, the instructor's lectures, and class discussions of assigned topics. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

NMC199H1 - Babylon: Fact vs. Fiction

Hours: 24S

The ancient city of Babylon, now a vast archaeological site in Iraq about 100km south of Baghdad, has captured people's imagination up to this day. Who has not heard of the Hanging Gardens of Babylon, the Biblical Tower of Babel, or the sci-fi TV series *Babylon 5*? Yet, how much of that reflects the reality of ancient Babylon? This course will explore the city of Babylon through its texts and archaeology and contrast this data with the way the city has been remembered over the past two thousand years. However, the goal of the course is not only to investigate how myths about Babylon have been constructed throughout the centuries. It will also look at the shortcomings of contemporary academic research on Babylon, and how difficult it is to reconstruct humankind's distant past. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

JRN199H1 - Exodus and Enslavement

Hours: 24S

Popular conceptions of enslavement in North America have influenced how we frequently imagine enslavement in Exodus and related biblical and related texts from the ancient Near East. Yet, depictions of enslavement in these ancient texts may be strikingly different from our ideas of enslavement in North America. This course explores similarities and differences between enslavement in these different historical contexts. It also examines how biblical texts were utilized in debates over and revolts against enslavement primarily in the eighteenth and nineteenth century. All readings will be in English. No knowledge of Hebrew is required. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

Gateway Courses

NMC101H1 - Land of the Pharaohs

Hours: 24L/12T

Egypt is one of the oldest known civilizations on the African continent. Deeply embedded within early African history, Egypt was also inextricably linked with the history

of many civilizations in the Ancient Near East. From pyramids to mummies and from King Tut to the Hanging Gardens of Babylon, the course will trace the history of ancient Egypt from its foundation around 3050 BCE to its incorporation into the Roman Empire in the 1st Century BCE. The focus will be on various aspects of Egyptian culture, including the institution of kingship, the role of women, and the characteristic features of Egyptian art, literature, and religion. Emphasis will be placed on the methods by which knowledge about this ancient civilization can be obtained.

Breadth Requirements: Society and its Institutions (3)

NMC102H1 - Heartland of Ancient Empires

Hours: 24L/12T

Mesopotamia and the ancient Near East—the area of modern Iraq and adjacent regions—witnessed the rise of the first cities in the fourth millennium BC and the emergence of the world's first empires in the first millennium BC. This course traces Mesopotamian history from the beginnings of agriculture through to the earliest cities, following the trajectory of political development from city states, to territorial states, and finally to the great empires of Assyria, Babylonia, and Achaemenid Persia and their aftermath. It studies the peoples and polities of the ancient Near East, including the Sumerians, Assyrians, Babylonians, and Persians. It also examines their cultural contributions, from the development of cuneiform writing to their achievements in law, administration, science, art and architecture, religion, and literature.

Breadth Requirements: Society and its Institutions (3)

NMC103H1 - The Islamic World

Hours: 24L/12T

A broad introduction to Islam, including the history, culture, and religion of the people and places that came to be influenced by Islam and that constitute a world civilization. What makes something (an empire or state, or a work of art or music) Islamic? When and how did that which we think of today as Islamic come about? How has "the Islamic" changed over time? With these questions in mind, this course introduces students to major figures, events, themes, institutions, and intellectual currents in Islamic history, from its beginnings in the 7th century to the modern period. Key topics to be covered include the rise and spread of Islam, the Qur'an and the role of Arabic, political thought, law and society, and literary and artistic expressions. Attention is paid to the geographical and ethno-linguistic scope of the Muslim world,

demonstrating the diversity of peoples and traditions that make up Islamic civilizations.

Breadth Requirements: Society and its Institutions (3)

NMC104H1 - The Biblical World

Hours: 24L/12T

Examine the history, lands, peoples, religions, literatures and cultures that produced the Hebrew Bible/Old Testament. Topics to be covered include an overview of the geography and history of Ancient Israel and Judea, the role of the Hebrew, Aramaic, and Greek languages, the literary genres reflected in biblical and some contemporary non-biblical texts, and the scholarly methods by which the Bible is studied.

Breadth Requirements: Society and its Institutions (3)

Culture and Civilization Courses

NMC238H1 - The Persian Empire: Superpower of the Ancient World

Hours: 12L/12S

The Achaemenid Persian Empire (550-323 BCE) ruled communities stretching from Egypt and Greece to Central Asia and the Indus River. Persian rule transformed the eastern Mediterranean and Middle East: the Persians conquered the great civilizations of Mesopotamia and Egypt, they were the first rivals of the Greek world, and they impacted the formation of Judaism. This course will survey the political, cultural, religious, social, and economic history of the Persian Empire. Students will read primary written sources in translation such as Greek historical texts, Egyptian papyri, and cuneiform tablets. Students will also learn about the archaeology of the Persian heartland in Iran, as well as the Persian impact in places like Turkey, Israel, and Afghanistan.

Prerequisite: 4.0 credits

Recommended Preparation: NMC102H1

Breadth Requirements: Society and its Institutions (3)

NMC239H1 - Women and Gender in the Near and Middle East

Hours: 24L

A team-taught survey course that explores the lives and societal roles of women in various cultures of the ancient, medieval, and modern Near and Middle East, including ancient Egypt and Mesopotamia, ancient and medieval Zoroastrianism, ancient Judaism, late antique Christianity, medieval Islam, and the modern Middle East. The course is co-taught by different specialists in these various fields. By tracing continuities and differences across regions, religions, and cultures, as well as changes over time, it seeks to enhance students' understanding of women's history and gender construction by exposing them to a variety of sources and methodological approaches. Textual as well as material culture evidence stemming from various backgrounds is considered. The aim of the course is to reflect critically on what is possible to know about women's lives across history and on what insights may be gained through a comparative perspective.

Prerequisite: 4.0 Credits

Exclusion: NMC 277H1 (*Women and Gender in the ancient and modern Near and Middle East*) offered in Fall 2024

Recommended Preparation: Any Humanities course

Breadth Requirements: Society and its Institutions (3)

NMC240H1 - For the Love of the Prophet: Muhammad in the Islamic Tradition

Hours: 24L

The Prophet Muhammad became a focal point of the Islamic tradition. This course covers the development of this relationship with Muhammad, through various forms of expressions, from poetic to religious to artistic. Various emotional rubrics were given to the relationship to Muhammad: from honoring him, to emulating him to loving him. The course covers the theological debates about the status of Muhammad (his nature, his relationship to God, his powers to intercede). The course includes the Sufi movement relationship to Muhammad and culminates in the study of the poetic corpus that Muslims call *madih*.

Recommended Preparation: NMC103H1 or RLG204H1

Breadth Requirements: Thought, Belief and Behaviour (2)

NMC241H1 - Anthropology of the Middle East

Hours: 24L

This course aims to familiarize students with the anthropological study of the contemporary Middle East. It introduces key questions and concepts for anthropological study: who speaks for the Middle East? What is culture? What is ethnography? It analyzes systems of power and

exclusion, and everyday life and relations in countries like Egypt, Turkey, Iran, Iraq, Syria, Lebanon, Palestine, Israel, and Kuwait. The course will provide critical perspectives on gender, religion, family relations, national belonging, migrant workers, and refugees. Students will apply anthropological methods learned in class to do an independent project.

Exclusion: [RLG355H1](#)

Recommended Preparation: [NMC278H1](#)/ [ANT207H1](#)

Breadth Requirements: Society and its Institutions (3)

NMC242H1 - Women and Money in the Medieval Middle East

Hours: 24S

Money can be a source of power, a way of building and affirming relationships, and a means of demonstrating a person's values and commitments. In this course, we will explore women's social roles, power, vulnerabilities, choices, fears, and desires by examining how they gained and spent their money. We will be looking at the experiences of royal women and enslaved women; Muslims, Christians, and Jews; conservative and rebellious; married and single; those who worked within the home, and those who worked outside of it. The course is centered primarily on texts originally written in Arabic between the 9th and 14th centuries, but all sources will be offered in English translation.

Prerequisite: 2.0 credits in BR= 1/ BR= 2

Exclusion: [NMC277H1](#) (Topics in Near & Middle Eastern Civilizations: *Women and Money in the Medieval Middle East*) offered in Fall 2023

Breadth Requirements: Society and its Institutions (3)

NMC243H1 - The Arabic Novel

Hours: 24L

This course focuses on the origins and development of the novel genre in the modern Arabic literary tradition. The course examines the aesthetic qualities of the novel as an artistic form as well as the ways it has represented and intervened in the modern social, political, and cultural upheavals that have shaped the Arabic-speaking world from the mid 19th century to the 21st century. Students will read literary criticism that addresses the Arabic novel's emergence and consolidation as a major literary form and will engage with contemporary methods of literary analysis and interpretation. Topics addressed in the course include textual representations of colonialism and post-colonialism, gender and sexuality, representations of the peasantry, the nation-state and Arab nationalism, and discourses of progress and modernity. Authors include Ahmad Faris al-Shidyaq, Yahya Haqqi, Naguib Mahfouz,

Tayeb Salih, Latifa al-Zayyat, Mohamad Choukri, and Hanan al-Shaykh. Readings of novels and criticism in English translation.

Breadth Requirements: Creative and Cultural Representations (1)

NMC244H1 - The Arab Spring and Cultural Production

Hours: 24L

This course examines the Arab revolutions that began in 2011 and their ongoing repercussions through the lens of cultural production. How have Arab writers and artists contributed to and reflected upon the Arab revolutions known as the Arab Spring? How has cultural production mediated the demands, aspirations, and struggles of the Arab peoples during and after these transformative revolutionary struggles? The cultural texts examined in this course range from those that mediate the euphoric optimism heralded by the revolutions to those that narrate and reflect upon the dystopian aftermath after revolutionary failure, including fiction and art that considers the reassertion of authoritarian rule, the violence of civil war, and the homelessness of exile. Through novels, poetry, music, art, and film, the course will broadly consider the role of culture as an alternative mode of narrating and historicizing the Arab revolutions.

Prerequisite: 3.0 credits at the 100-level

Breadth Requirements: Creative and Cultural Representations (1)

NMC245H1 - Women in the Ancient Near East

Hours: 24L

The course examines written and archaeological sources to discuss the status and role of women in the ancient Near East, focusing in particular on the first millennium BCE.

Recommended Preparation: [NMC101H1](#), [NMC102H1](#)

Breadth Requirements: Society and its Institutions (3)

NMC246H1 - Sumerian and Babylonian Literature in Translation

Hours: 24L

This course explores some of the world's oldest literature, including the Epic of Gilgamesh and the Babylonian Epic

of Creation. It surveys the major literary genres from ancient Mesopotamia, including epics, myths, lyrical poetry, wisdom literature, and humorous tales. It covers literary compositions written in the Sumerian and Babylonian languages using the cuneiform script, ranging in date from the third millennium BC through to the first millennium BC. The course also examines the scholarly and cultural context in which these works were created and preserved for posterity, including the role of scribal training, the nature of Mesopotamian scholarship, royal sponsorship, and the formation of ancient libraries.

Recommended Preparation: [NMC102H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NMC247H1 - The Intellectual History of the Ancient Near East

Hours: 24L

Survey of the intellectual life in the Ancient Near East from the emergence of writing in Mesopotamia and Egypt at the end of the third millennium BCE until the Hellenistic and Roman periods. Covers issues of orality vs. literacy, state and scribal control, notions of progress, origins and purpose of knowledge, as well as areas such as taxonomy of the natural world, astronomy, mathematics, medicine, divination.

Recommended Preparation: [NMC101H1](#), [NMC102H1](#), or [NMC104H1](#)

Breadth Requirements: Society and its Institutions (3)

NMC248H1 - Ancient Bureaucracies

Hours: 24L

Where were taxes first collected? When was the first receipt issued? What did the first account ledgers look like? This course offers an introduction to the development of early bureaucracies in ancient Mesopotamia (Iraq), Iran and Syria. Find out how accounting procedures evolved after 6,500 BC, from closing storage containers in Neolithic villages with seals and sealings to complex recording procedures in urban settings that ultimately led to the development of writing on clay tablets around 3,100 BC. Learn how different patterns of irrigation in river-based agricultural societies such as Mesopotamia, Egypt, and China led to similar yet distinct systems of resource management and administration, using different writing materials (e.g. clay tablets, papyrus) based on available raw materials. And see how bureaucratic procedures, while helping to maximize efficiency in an ancient society, could also create a lack of flexibility, ultimately leading to political decline or collapse.

Recommended Preparation: [NMC102H1](#)

Breadth Requirements: Society and its Institutions (3)

NMC249H1 - Health and Healing on the Nile: Ancient Egyptian Medicine

Hours: 24L

The course provides an overview of medicine and medical practices from ancient Egypt between the 3rd millennium BCE to first millennium CE, primarily drawing on Egyptian evidence. Materials from neighbouring cultures are also included for comparative reasons. The focus of the class is on interpreting and reconstructing ancient healing practices and theories based on original sources (in translation) through a modern methodological approach, combining perspectives from both the humanities and the medical sciences. Both written and material sources are examined and discussed. One of the main objectives of the module is to make students aware of the importance of culture in interpreting ancient medicine.

Prerequisite: 2.0 100-level credits

Breadth Requirements: Thought, Belief and Behaviour (2)

NMC250H1 - Pyramids, Temples, and Tombs: An Introduction to Ancient Egyptian Architecture

Hours: 24L

Monuments like the Great Pyramid of Giza or the incredible temple at Karnak are some of the defining elements of Pharaonic civilization. This course will introduce students to ancient Egyptian architecture and trace its development from the Predynastic through the New Kingdom. Using textual, archaeological, and pictorial evidence, this course will investigate the emergence of mudbrick and stone architecture, how the construction of pyramids and other monuments was organized, and changes in tomb and temple construction over time.

Prerequisite:

1.0 credit at the 100+-level in BR= 1/ BR= 2/ BR= 3

Recommended Preparation: [NMC101H1](#)

Breadth Requirements: Society and its Institutions (3)

NMC251H1 - Voices from Ancient Egypt

Hours: 24L

This course introduces students to the culture of ancient Egypt through the study of "functional" textual materials.

After a brief introduction to the Ancient Egyptian language and writing system, we will read texts from domestic, religious (comprising funerary and ritual), historical, and scientific backgrounds to paint a rich picture of the daily life and experiences of the ancient Egyptians. By way of example, we will illustrate Egyptian funerary beliefs on the basis of texts found in tombs, such as autobiographies, offering formulae, and letters left there for the dead by their families; or the role of the pharaoh for the Egyptian state by studying monumental inscriptions left on temple walls, boundary stelae, and in the tombs of the Egyptian elite. No knowledge of Ancient Egyptian required; all texts read in translation.

Recommended Preparation: NMC101H1

Breadth Requirements: Creative and Cultural Representations (1)

NMC252H1 - Hebrew Bible

Hours: 24L

An introduction to the critical study of the Hebrew Bible/Old Testament and the related literature of ancient Jewish communities (Apocrypha, Pseudepigrapha, Dead Sea Scrolls). English translations used; no knowledge of Hebrew is required.

Recommended Preparation: NMC104H1

Breadth Requirements: Creative and Cultural Representations (1)

NMC253H1 - Egyptian Myths

Hours: 24L

This course explores ancient Egyptian mythical writings and representations, starting with the myths contained in the Pyramid Texts of the 3rd millennium BCE and ending with the narrative mythical tales of the 1st millennium BCE and beyond. Definitions and theories of ancient Egyptian myth as well as historical developments will be discussed, and we will attempt to explain why religious beliefs and stories changed. The course is structured systematically, focusing in particular on mythical accounts that elucidate Egyptian cosmic, royal, and funerary beliefs as well as the intersection of these domains. All texts read in translation.

Recommended Preparation: NMC101H1

Breadth Requirements: Creative and Cultural Representations (1)

NMC254H1 - The Mummy: Technology and Transformation

Hours: 24L

This course explores the significance of mummies in contexts ranging from ancient Egyptian to modern, tracing the development of Egyptian mummification techniques and the roles and uses of mummies as transformative elements allowing access to the afterlife, sources of information about ancient individuals, characters in literature and film, and objects for display in museums.

Breadth Requirements: Thought, Belief and Behaviour (2)

NMC255H1 - Love, Battle, and Wit: Classics of Premodern Arabic Literature

Hours: 24L

This course surveys the premodern Arabic literary heritage, from pre-Islamic poetry to literature of the Mamluk period, focusing on texts that remained influential sometimes until the present day. Students read classic works in translation each week, while discussion focuses on social context and close reading. Throughout, we note the development of literary forms over time, and the way authors reference previous works. Readings include: the animal fable book *Kalila wa Dimna*, excerpts from anecdote collections (*adab*), multilingual Andalusí songs (*muwashshah*), the linguistically playful trickster tales called *maqamat*, an obscene shadow play by Ibn Daniyal, popular epic, and some of the most famous poems by Labid, Jarir, Abu Nuwas, Abu Tammam, al-Mutanabbi, and Ibn Nubata.

Recommended Preparation: 1.0 credit in Humanities/BR=1 or 2

Breadth Requirements: Creative and Cultural Representations (1)

NMC256H1 - 1001 Nights Around the World

Hours: 24L

The 1001 Nights has had many lives, in many languages, and across many media. This course starts off with a detailed reading, in translation, of one of the oldest surviving Arabic versions of the text, with consideration of its literary and social context, and its sources. We then move forward in time to examine how the 1001 Nights was expanded, adapted, and disseminated from then until today. A key transformation moment occurred between 1704-1717 with the publication of Antoine Galland's

French version, composed with the input of Syrian storyteller Hanna Diab. This version was widely disseminated and became a basis for most subsequent modern adaptations. We consider adaptations both before and after this turning point, including manuscripts, translations, novels, ballets, short stories, and films produced around the world. Throughout, we consider the politics and aesthetics of these historical translations, adaptations, and transformations.

Recommended Preparation: 1.0 credit in Humanities/BR=1 or 2

Breadth Requirements: Creative and Cultural Representations (1)

NMC257H1 - Vice and Virtue in Biblical Traditions

Hours: 24L

This course examines the formation and development of ancient Jewish literary traditions, centering around complex narrative and poetic figures such as Eve, Abraham, Moses, David, Esther, Job, and Lady Wisdom. Traditions to be studied will be selected from the Hebrew Bible (Old Testament) and from early Jewish interpretive writings: the apocrypha, pseudepigrapha, and Dead Sea Scrolls.

Exclusion: NMC277H1 (Topics in Near & Middle Eastern Civilizations: Valor and Failure in Biblical Traditions), offered in Fall 2019

Breadth Requirements: Thought, Belief and Behaviour (2)

NMC258H1 - The Book of Kings: Persian Myth, History, and Art

Hours: 24L

The *Shahnameh*, or Book of Kings, is the single most important book in Iranian national culture and one of the great epics of world literature. Composed in Persian by the poet Ferdowsi in the late 10th–early 11th centuries, it had a deep and lasting impact not only on Iran, but also on those cultures that came under the influence of Persian language, literature, and courtly traditions. The course examines, in English translation, the *Shahnameh*'s presentation of the history of the mythical dynasties of the ancient kings of Iran from the creation of the world to the Sasanians, the last historical dynasty to rule Iran before the Muslim Arab conquests. As the *Shahnameh* was frequently illustrated, attention will also be devoted to the manuscript tradition, which exhibits some of the finest examples of medieval Persian painting.

Breadth Requirements: Creative and Cultural Representations (1)

NMC259H1 - Literature of Ancient and Late Antique Iran

Hours: 24L

This course explores the most important texts of the Zoroastrian literature of ancient and late antique Iran and serves as a broad introduction to the mythical and ritual world of Zoroastrianism and the contours of pre-Islamic Iranian thought. The course is divided into two parts: a) Old Iranian literature, such as the Avestan religious literature and the Old Persian inscriptions, and b) Middle Persian (Pahlavi) literature, including epic poetry (Chronicle of Ardakhshir, narrating the deeds of the first Sasanian king), didactic and wisdom literature (Memorial of the Vizier Wuzurgmihr; Explanation of Chess and Backgammon), apocalyptic and visionary literature (Book of the Righteous Wiraz, describing his journey to heaven and hell), texts on cosmology (Primordial Creation), and encyclopaedic works (Acts of the Zoroastrian Religion), as well as specimens of Manichaean literature in Middle Iranian languages. All readings are in English translation.

Breadth Requirements: Creative and Cultural Representations (1)

NMC260H1 - From Agriculture to Urbanism: The Archaeology of the Pre- and Proto-historic Near East

Hours: 48L

The ancient Near East was the birthplace of the world's first complex societies. Between 10,000 BCE and 2,000 BCE, Near Eastern societies shifted away from mobile lifestyles to form sedentary villages and eventually cities, developing agriculture, writing systems and bureaucracies, and commercial and political networks. This course explores the archaeological evidence for these transformations, asking what it would have been like for people in the ancient Near East as their world underwent the profound changes wrought by domestication, farming, urbanism, and state formation.

Breadth Requirements: Society and its Institutions (3)

NMC262H1 - Empires and Internationalism: The Archaeology of the Historic Near East

Hours: 48L

From 3000 to 333 BCE, the ancient Near East saw the growth and expansion of the world's first empires, the birth of international diplomacy, burgeoning land- and sea-trade and the emergence of languages and cultures that would go on to shape the Mediterranean world for centuries. This course will explore the archaeological evidence for these developments in Mesopotamia, Egypt, Anatolia and the Levant.

Breadth Requirements: Society and its Institutions (3)

NMC263H1 - The Archaeology of Gods, Ghosts, Witches and Demons

Hours: 24L

This class investigates archaeological traces of human interaction with the supernatural world in the ancient Near East, including figurines, temples, skulls, statues, and cylinder seals. In order to contextualize different ways of thinking about other worlds, we also look at cross-cultural comparisons ranging from Africa to the Americas.

Recommended Preparation: NMC102H1

Breadth Requirements: Thought, Belief and Behaviour (2)

NMC264H1 - The Archaeology of Stuff

Previous Course Number: NMC369Y1

Hours: 24L

Discover how the structure of animal skin enables the making of leather and tattoos; why mighty kings boasted about tree-cutting expeditions; how chariots, stirrups, and gunpowder changed the very structure of contemporary societies; why spears are better than swords. Understand and appreciate the materials in the world around you.

Exclusion: NMC369Y1

Breadth Requirements: Creative and Cultural Representations (1)

NMC265H1 - Archaeology in War Zones: Syria, Iraq, Afghanistan

Hours: 24L

This course addresses difficult questions about how we value cultural heritage, who it belongs to, and how we should protect it during times of crisis. Focusing on the conflicts in Syria, Iraq and Afghanistan, we examine what went wrong, and discuss the role of cultural heritage in nationalistic discourses, ideologically motivated performative heritage destruction, and the contribution

that cultural heritage can make to post-conflict peacebuilding. We will also cover such issues as the limitations of current cultural heritage protection laws, methods for threat monitoring and assessment, and the role of the illicit antiquities trade in the ongoing destruction of cultural heritage.

Breadth Requirements: Creative and Cultural Representations (1)

NMC266H1 - Archaeologies of Power

Hours: 36L

Who were the first powerful leaders? How did they portray themselves, and what was the source and basis of their power? This course provides a comprehensive survey of the origins and rise of political leadership in the Near East from its beginnings in the Neolithic period to the famous kings and military leaders of Sumer, Assyria, and Babylon. Sources consulted include archaeological data (architecture, monuments, narrative art) as well as historical sources. The course is intended as an introduction to a broader understanding of the mechanisms that result in the formation of political power structures. Although it focuses on the ancient Near East, the course will discuss parallels from other parts of the world, both ancient and modern, that are relevant to understanding manifestations of political power in our present-day world.

Recommended Preparation: NMC102H1

Breadth Requirements: Society and its Institutions (3)

NMC267H1 - Everyday Life in Ancient Egypt

Hours: 24L/12T

The course focuses on lived experience for people from many different socio-economic levels in ancient Egypt. Through the analysis of archaeological and mortuary evidence, artifacts, and human, animal, and plant remains we will explore the daily lives of Egyptians over time as the natural, social and technological landscape changed, posing questions such as what they ate, how they made things, what kinds of social connections they formed, how they defined their identities, what kind of houses and village, town, or urban settings they lived in, what things they feared, how they died, and what they might have believed. We will look at remains from settlements like Hierakonpolis, Abydos, Giza, Kahun, Tell el-Dab'a, Amarna, Deir el-Medina, and Thebes in detail to understand aspects of the lives of the people who inhabited them.

Exclusion: NMC362Y1

Recommended Preparation: NMC101H1

Breadth Requirements: Society and its Institutions (3)

NMC268H1 - Data Science Applications in Archaeology

Hours: 12L/12P/12S

Digital technology and the growth of “big data” are transforming not only the ways in which archaeologists present and communicate their research, but also increasingly the ways they collect and analyze data. This course uses underlying concepts from the emerging field of data science and helps students develop hands-on skills in various critical techniques in archaeological data analysis and modelling, focusing on case studies from the Near East.

Prerequisite: 3.0 credits at the 100-level.

Breadth Requirements: Society and its Institutions (3)

NMC269H1 - Ancient Egyptian Science

Hours: 24L

The course introduces the history of knowledge and science in ancient Egypt by providing overviews of topics such as biology, astronomy, calendars, and mathematics, but also magic, divination, and alchemy are considered as part of the ancient scientific curriculum focusing on the period from the 3rd millennium BCE to the 1st millennium CE, drawing primarily on Egyptian evidence, including both written sources and material culture, including those from contemporary neighbouring cultures as comparanda. The focus of the course is on the interpretation and reconstruction of ancient practices and theories based on original sources (in translation) using a modern methodological approach, combining perspectives from philology, archaeology, and the history of science. One of the main aims of the class is to make students aware of the importance of culture and society in interpreting and understanding ancient cultures of science and knowledge and the practices associated with them.

Prerequisite: 2.0 100-level credits

Breadth Requirements: Thought, Belief and Behaviour (2)

NMC270H1 - Christians of the Middle East

Hours: 24L

The course will introduce students to the Christian communities living in the Middle East since the distant past, identified by ecclesiastical and or ethnic terms, including Armenian, Copt, Greek-Melkite, Maronite, and Syriac. The course will discuss the plurality of their cultural, literary, and theological traditions, the social and intellectual roles of their monasteries, the contributions of their top religious authorities in diplomacy between Byzantium and the Sassanians, their position in the Islamic world and contributions to Islamic culture, philosophy, sciences, and theology, interreligious dialogues and polemics with Islam.

Recommended Preparation: NMC102H1

Breadth Requirements: Society and its Institutions (3)

NMC271H1 - The Sufi Tradition in Islam

Hours: 24L

The history of asceticism and mysticism in the Islamic tradition, with particular attention to the formative period as well as the breadth and diversity of Sufism across the Islamic world, from West Africa and Spain, to the Balkans and Central Asia, to China and Southeast Asia. We begin with the origins of the piety movement in early Islam, and the ways in which it responded to late antique Christian monasticism. We then examine the emergence of classical Sufism in the 9th century, its basic concepts and practices, the rise of saints, the formation of Sufi orders, the social and cultural context for key developments, as well as the reasons for the contested legacy of Sufism in the modern world. Major figures for discussion include Rabi'a, Junayd, Hallaj, Ghazali, Ibn Arabi, and Rumi.

Breadth Requirements: Thought, Belief and Behaviour (2)

NMC272H1 - Hajj and History

Hours: 12L/12S

The history of the hajj (Muslim pilgrimage to Mecca) reflects important political, theological, social, artistic, and technological developments in Middle Eastern and Islamic history. This course begins with an exploration of Mecca as a pilgrimage site before the Islamic era and continues with an examination of how the history of the hajj reflects and intersects with important moments and trends in the history of Muslims around the world from medieval times to the 21st century. We will discuss the significance of the pilgrimage especially during periods of transformation such as the fitna (civil wars) of early Islamic history, the rise of hadith scholars and the ulama as religious leaders in the Abbasid era, the aesthetic and political Ottomanization of the Arab world, British naval domination over the Indian ocean and colonization of India, the evolution the Saudi state and its religious program, pan-

Islamic movement in the post-colonial era, and the growth of Muslim minority communities around the world in the 21st century.

Prerequisite: 4.0 credits

Recommended Preparation: NMC103H1

Breadth Requirements: Thought, Belief and Behaviour (2)

NMC274H1 - The Turks in History: From Nomads of the Steppe Frontier to Islamic Rulers

Hours: 24L

The course examines the roles of Turks and other primarily nomadic peoples as raiders, migrants, slave-soldiers, and empire-builders in the ancient and medieval history of Eurasia (including Central Asia, the Middle East, and Eastern Europe) and in the formation of the Islamic world. Topics covered include long-distance economic and cultural contacts ("silk roads") facilitated by "steppe empires"; the Islamization of the Turks and their gradual takeover of Iranian, Arab, and other Muslim lands; lifeways (especially pastoral nomadism); the relationship between nomadic and sedentary societies; political structures; steppe warfare; the role of physical geography and the environment. Students explore the histories and landscape geographies of Turks through fascinating primary sources and internet resources. The course illustrates the key role that Turks played in the formation of the modern world on the Eurasian continent.

Exclusion: NMC274Y1

Recommended Preparation: NMC103H1

Breadth Requirements: Society and its Institutions (3)

NMC275H1 - The Mongol Empire and the World It Made

Hours: 24L

Most of Eurasia (the Middle East, East and South Asia, Eastern Europe) was once incorporated into the Mongol Empire and greatly influenced by Mongol rule. It may be said that the beginnings of modern history on the Eurasian continent were shaped by the impact of the Mongols and their non-Mongol (mainly Turkic) partners. This course explores the history of the pan-Eurasian empire founded by Chinggis Khan (Genghis Khan) in the 13th century and the smaller empires into which it devolved: Yuan China-Mongolia, Chaghatayid Mongolia-Central Asia, Ilkhanid Iran-Anatolia, and the Golden Horde Eastern Europe-Western Siberia. The course also surveys various post-Mongol successor states, such as the Timurid and Mughal Empires, and the Kazakh, Uzbek, and Crimean Tatar Khanates, as well as touches upon important non-

Chinggisid successor polities, such as Muscovy-Russia and Slavic Cossacks. Students explore the history and landscape geographies of the Mongol venture through fascinating primary sources and internet resources.

Exclusion: NMC274Y1

Recommended Preparation: NMC103H1, NMC274H1

Breadth Requirements: Society and its Institutions (3)

NMC276H1 - Topics in Near & Middle Eastern Civilizations

Topics vary from year to year, depending on instructor.

NMC277H1 - Topics in Near & Middle Eastern Civilizations

Topics vary from year to year, depending on instructor.

NMC278H1 - Introduction to the Modern Middle East

Hours: 24L/12T

This course is an introduction to the modern history of the region commonly known as the Middle East, from the early-19th-century until the present. The course is designed to be an in-depth "overview" of central questions of geography itself: What is the region? How might we rethink its history through a focus on forms of sociality, economy, culture, and violence that extend well-beyond the limits of the "Middle East"?

The course begins in the 19th-century, a period of state-building, intellectual revival, and global imperialism. We will focus on the Arab, Ottoman and Persian worlds to follow the processes of social and institutional reforms, militarization, capital expansion, and the refashioning of divine authority. Each week, we will focus on a particular theme such as imperial reform, sectarianism, colonialism, expert practices, resistance, the making of citizens, publics, subjects and cultural politics.

The questions that frame the course, which proceeds chronologically, include: How did global forces and local dynamics coalesce to shape the politics of the modern Middle East? How might we understand the region's history from the 19th-century onward while integrating institutional, political, social, and cultural currents? How were global ideological trends woven together with local ideas about authority, identity, community and the state?

Recommended Preparation: NMC103H1

Breadth Requirements: Society and its Institutions (3)

NMC280H1 - The Caliphate: Early Islamic History from Ancient Arabia to the Abbasid Empire

Previous Course Number: NMC273Y1

Hours: 24L/12T

The formative period of Islam, including the Prophet and origins of the caliphate. This course surveys the history of the Middle East and its religious, social, and political transformations between late antiquity and the medieval period, from roughly the 6th to the 10th century CE. Starting with the available evidence on pre-Islamic Arabs, we study the making of the Islamic empire from Spain to Central Asia, the early caliphates (Umayyads, Abbasids, and Fatimids), the emergence of competing traditions in Islam (Sunnis, Shi'is, and Ibadis), and other developments of enduring significance. Particular attention is paid to primary sources and scholarly debates on the challenges of early Islamic historiography.

Exclusion: NMC273Y1

Recommended Preparation: NMC103H1

Breadth Requirements: Society and its Institutions (3)

NMC281H1 - Islamic History from the Crusades to Slave Sultans

Previous Course Number: NMC273Y1

Hours: 24L/12T

The medieval Islamic world from the decline of the early empire and the fall of Baghdad to the flourishing commonwealth during the lifetime of Ibn Khaldun. This course surveys key developments in religion, politics, and society across the Middle East from the 11th century up to the 15th century CE. Starting with the situation on the eve of the Crusades, we trace broader patterns in Islamic history through the emergence of various sultanates (including the dynasty of Salah al-Din Ayyubi and the Mamluks) as well as regional dynamics from North Africa and Spain in the West to Iran and India in the East.

Exclusion: NMC273Y1

Recommended Preparation: NMC103H1

Breadth Requirements: Society and its Institutions (3)

NMC282H1 - Medicine in the Medieval Islamic World

Hours: 24S

The course examines both the scientific and social history of medicine in the medieval Middle East. We will examine the history of Arabic medicine and its relation to Greek and Sanskrit traditions of medicine and pharmacology. We will also look at "Prophetic medicine," medical magic, pilgrimage healing sites, and folk practices, and how they interacted with the so-called "medicine of the physicians." We will consider how doctors from different religious groups perceived each other and were perceived by their patients, and how desperation for healing made people willing to cross social boundaries and seek out help from people of different religions, ethnicities, and genders. We will also examine the lives of some of the great physicians of medieval history.

Prerequisite: 2.0 credits in BR= 1/ BR= 2

Breadth Requirements: Thought, Belief and Behaviour (2)

NMC284H1 - Judaism and Feminism: Legal Issues from Menstruation to Ordination

Hours: 24L

Agitation for change exists in religious practice worldwide in areas of access, status, inclusion, and egalitarianism. Traditional religion is often in conflict with egalitarian modernity. This sometimes results in difficulties with religious identification. This course will explore the interaction between feminism and Judaism. We will examine how Jewish law (*halakhah*) sometimes conflicts with ideas of egalitarianism particularly in legal disabilities for women such as divorce, lack of access to high-level Torah study, and discrimination in public religious roles. The traditional exemption of women from the obligation of Torah study had great impact on women's religious responsibility and status. Various movements within Judaism competed in efforts to resolve these difficulties. In this course we will consider to what extent inclusion and egalitarianism have become complementary to traditional Judaism.

Breadth Requirements: Thought, Belief and Behaviour (2)

NMC289H1 - Introduction to Coptic Studies

Hours: 24L

Overview of the history of the Copts from political, religious, social and economic perspectives. Literary and documentary sources will illustrate these different aspects of Coptic Civilization. The focus on Coptic Monasticism will underline the role of monasteries as conservers of the Coptic Orthodox Church tradition.

Breadth Requirements: Thought, Belief and Behaviour
(2)

NMC290H0 - Field Archaeology 1

Previous Course Number: NMC261Y0
Hours: 24L/48P

This course is designed as a general practicum in archaeological field methods. As a field course, emphasis will be placed on active participation in the ongoing research of the Gadachrili Gora Regional Archaeological Project Expedition (G.R.A.P.E.) in the Republic of Georgia or Life by the Imperial Roads Project in Romania. Students will receive extensive training in excavation methods, recording procedures, and the preliminary processing of artifacts. Lectures exploring the archaeology and culture of the region will supplement the primary focus on field experience. All students are eligible to participate. No prior field experience is necessary. Not eligible for CR/NCR option.

Prerequisite: 4.0 credits
Exclusion: NMC261Y0
Breadth Requirements: Creative and Cultural Representations (1)

NMC291H0 - Field Archaeology 2

Previous Course Number: NMC261Y0
Hours: 24L/48P

This course is designed as a continued practicum in archaeological field methods from NMC 290. As a second-level field course, continued emphasis will be placed on active participation in the ongoing research programs of the Gadachrili Gora Regional Archaeological Project Expedition (G.R.A.P.E.) in the Republic of Georgia or Life by the Imperial Roads Project in Romania. Students will receive additional training in archaeological excavation methodology, recording procedures, and the processing of samples and artifacts. Detailed lectures and presentations on archaeological method and theory as well as the archaeology and culture of the region will supplement the primary focus on field experience. All students are eligible to participate. No prior field experience is necessary. Not eligible for CR/NCR option.

Prerequisite: NMC290H0
Exclusion: NMC261Y0
Breadth Requirements: Creative and Cultural Representations (1)

JRN301H1 - Disability in the Hebrew Bible and Related Texts

Hours: 24L

The Hebrew Bible (sometimes called the Old Testament) has influenced ideas about disability in societies across the globe for thousands of years. Yet, notions of disability in the Hebrew Bible may be strikingly different from what we might imagine. This course explores how some biblical texts and related ancient literature conceptualize disability in relation to issues of ethnicity, sexuality, beauty, age, social class, religious expression and so on. We will examine a number of these issues both in their ancient context and in some more recent interpretations of the Hebrew Bible. All readings will be in English. No knowledge of Hebrew is required.

Prerequisite: Completion of 4.0 credits
Breadth Requirements: Creative and Cultural Representations (1)

JHM307H1 - Islamic Legal History: Formation and Encounters

Hours: 24L

This course examines the formation and encounters of Islamic Law with Legal Others from roughly the 8th century CE to the early formation of the Ottoman Empire. The Islamic legal tradition arose in a complex historical context in which legal traditions mapped onto, and gave legal cover to, imperial polities. As the Islamic polity expanded, so too did the imagination of jurists having to contend with new realities (political, geographic, economic, and otherwise). This course will introduce students to the formation of Islamic law in a context of contending legal orders, its ongoing encounters with legal orders in the course of Islamic expansion, and the retraction of Islamic legal orders and institutions as a tradition that anticipated political sovereignty experienced the limits of that sovereignty. Examples will be drawn from the Middle East, Africa, South Asia, and South East Asia. The course will introduce students to the disciplinary focus of Law and History through a focus on doctrine, institution, and the implications on both as territory and people are subject to varying waves of imperial designs and local resistance.

Prerequisite: HIS268H1
Breadth Requirements: Society and its Institutions (3)

NMC308H1 - Getting Justice: Women, Slaves, and Religious Minorities in the Courts in the Pre-modern Middle East

Hours: 12L/12S

Legal systems play an important role in the lives of vulnerable people. Courts both enforce laws which render people vulnerable in the first place and also help protect those same people from further harm. Because legal documents constitute our main source of information about the experiences of lower-status people, they are also important for historians of the Middle East. In this course, we use legal documents to learn about women, slaves, and non-Muslims. Students learn about women's personal and property rights, their roles as petitioners and witnesses, and the intersection of public legal appearances with modesty concerns. We examine how enslaved people accessed court systems, and how the law treated those who were considered both possessions of others and, at the same time, possessors of free will. Finally, we explore the dhimma system; the existence of separate, non-Muslim laws and courts; and the experiences of non-Muslims in Islamic courtrooms.

Prerequisite: 9.0 credits

Recommended Preparation: NMC103H1

Breadth Requirements: Society and its Institutions (3)

NMC315H1 - The Structure of Arabic Language

Previous Course Number: NML315H1

Hours: 24L

This course investigates formal properties of Arabic language. It provides students with an in-depth knowledge of the grammar of the language focussing on the areas of phonetics, phonology, morphology, syntax, and the interaction between phonology and morphology.

Prerequisite: NML210Y1 or LIN100Y1, or permission of the instructor

Exclusion: NML315H1

Recommended Preparation: LIN229H1, LIN232H1

Breadth Requirements: Creative and Cultural Representations (1)

NMC316H1 - Cultural Encounter in Arabic Narrative

Hours: 36S

This course examines historical and literary texts that narrate Muslim and Arab encounters with cultural

difference. Students will read travel narratives, autobiographies, and fictional texts that chronicle encounters with the Arab-Islamic world's cultural "others." The course first examines travel narratives from the medieval Islamic period, including al-Sirafi's travels to India and China, and Ibn Fadlan's encounters with peoples inhabiting lands north of the Abbasid Empire, such as the Vikings. Students then consider how travel narratives in the modern period are transformed due to radical changes in the balance of power between Europe and the Middle East, first reading 19th-century travel narratives to Paris (al-Tahtawi), and then focusing on 20th-century texts that narrate the travels of Arab men and women to Europe and North America (Leila Ahmed, Sayyid Qutb, Nawal El Saadawi). Students will also read texts that depict encounters with non-Arabs within the modern Arab world, such as literary depictions of American oil workers in the Arab Gulf (Munif). All readings are in English translation.

Prerequisite: 3.0 credits in BR 1/BR 2

Breadth Requirements: Creative and Cultural Representations (1)

NMC330H1 - King David: Musician, Monarch, or Murderer?

Hours: 24L

For many people, King David is one of the most beloved characters in the Bible. But where did our ideas about David come from? Was he a brilliant poet who wrote many of the Psalms, a youthful champion who defeated the giant Goliath or as a ruthless monarch capable of killing his political opponents? This course will explore attempts to reconstruct the historical David from various biblical texts, comparable ancient literature, and what historians know (and don't know) about the time in which his story is set. All readings will be in English. No knowledge of Hebrew is required.

Prerequisite: 4.0 credits at the 200-level

Breadth Requirements: Thought, Belief and Behaviour (2)

NMC331H1 - Samson: Lover, Liar, lion-slayer

Hours: 24L

Over the centuries, Samson has captured the imagination of countless scholars, artists, and poets. Although often stereotyped as little more than a thoughtless strong man prone to violent outbursts, he is actually one of the most complex and enigmatic characters in the Bible. This course will explore biblical depictions of this often misunderstood figure and his complicated relationships

with his family, his lovers, and his enemies. We will analyze his story within its ancient historical context and in some more recent interpretations. All readings will be in English. No knowledge of Hebrew is required.

Prerequisite: 4.0 credits at the 200-level

Breadth Requirements: Thought, Belief and Behaviour (2)

NMC340H1 - History of Late Antique & Early Islamic Iran

Previous Course Number: NMC348Y1

Hours: 24L

The political, religious, and cultural history of greater Iran from Late Antiquity to the Mongol invasions in the early 13th century. The course surveys the reigns of the kings of the Sasanian empire (3rd–7th centuries); traces the progress of the Muslim Arab conquests in the mid-7th century that resulted in the Persian empire's collapse and the gradual Islamization of its population; and examines the subsequent formation of regional Iranian dynasties that were instrumental in the creation of a new Perso-Islamic cultural identity.

Exclusion: NMC348Y1

Recommended Preparation: NMC280H1

Breadth Requirements: Society and its Institutions (3)

NMC341H1 - Safavid Iran: Reign of the Shahs

Previous Course Number: NMC348Y1

Hours: 24L

The course focuses on the period of the Safavid dynasty (16th–18th centuries) which represented a watershed in the history of Iran not only because of its adoption and promotion of Shi'ism as the state religion, but also on account of its fostering an imperial court culture that patronized the arts and architecture. The reigns of the Safavid shahs will be examined from the point of view of their political, religious, economic, and cultural history, as well as their relationship to the polities that immediately preceded them and their interactions with the contemporary Muslim states they neighboured, in particular, the Ottomans in the west and the Mughals in the east.

Exclusion: NMC348Y1

Recommended Preparation: NMC274H1, NMC340H1

Breadth Requirements: Society and its Institutions (3)

NMC342H1 - History & Sources of Egyptian Monasticism

Hours: 24L

Presents an historical overview on the origins of Egyptian monasticism based on written sources. Comparison of written sources with archaeological artifacts reveals the relation between spiritual and material aspects of monastic life. Literary sources produced for different monastic orders -- such as sermons, canons and biographies -- will be studied.

Recommended Preparation: NMC289H1/ NMC368H1

Breadth Requirements: Society and its Institutions (3)

NMC343H1 - Farmers to Pyramid Builders: Cultural and Political History of Ancient Egypt I

Hours: 24L/12T

Exploration of the primary archaeological, architectural, and inscriptional sources, questioning and analyzing ideas about Egypt's development from farming communities at the dawn of history to an early state that built great pyramids for its kings, collapsed into civil war, and grew to become a colonizing power in the Middle Kingdom.

Prerequisite: 5.0 credits in any field or 1.0 credit in NMC

Breadth Requirements: Society and its Institutions (3)

NMC344H1 - Hyksos Subjects to Empire Builders: Cultural and Political History of Ancient Egypt II

Hours: 24L/12T

Exploration of the primary archaeological, architectural, and inscriptional sources, questioning interpretations and analyzing how Egypt confronted foreign domination and developed into a major empire in the New Kingdom under Thutmose III, Hatshepsut, Akhenaten, and Ramesses II, then fragmented politically in the Third Intermediate Period and ultimately became a colony itself.

Prerequisite: 5.0 credits in any field or 1.0 credit in NMC

Breadth Requirements: Society and its Institutions (3)

NMC345H1 - Nubian Archaeology

Hours: 24S

This course introduces students to the archaeology of ancient Nubia. For far too long, Nubia's rich archaeological past has been overlooked or interpreted through the lens of Egyptian sources. This course seeks to understand the archaeological past of the Nubian Nile Valley (and deserts) on its own terms. This course will proceed chronologically from the Neolithic through to the end of the Napatan period. Beyond learning about the development of Nubian archaeological cultures, this seminar will also introduce students to some of the most dynamic current scholarly debates in this vibrant field.

Prerequisite:

2.0 credit at the 200+-level in BR= 1/ BR= 2/ BR= 3

Breadth Requirements: Society and its Institutions (3)

NMC346H1 - Ancient Mesopotamia I: Sumerians and Akkadians

Hours: 24L

The political and cultural history of the peoples of ancient South-Western Asia from 3000 BCE to the destruction of Babylon by the Hittites ca. 1600 BCE. (Offered in alternate years)

Prerequisite: 3.0 credits in Humanities/BR= 1 or 2

Breadth Requirements: Society and its Institutions (3)

NMC347H1 - Ancient Mesopotamia II: Assyrians and Babylonians

Hours: 24L

This course traces the political development and cultural history of Mesopotamia, from the territorial states of the Late Bronze Age to the world's first empires in the 1st millennium BC, those of Assyria, Babylonia, and Achaemenid Persia. It also traces the subsequent history of Mesopotamia through the Seleucid and early Parthian eras, down to the end of cuneiform writing around the end of the 1st millennium BC. The course emphasizes the critical analysis of primary written sources (in translation) for reconstructing the history of the peoples of Mesopotamia. It also examines their achievements in literature, science and scholarship, and art and architecture.

Prerequisite: 3.0 credits in Humanities

Breadth Requirements: Society and its Institutions (3)

NMC348H1 - Kurdish Studies: A Critical Introduction

Hours: 24S

This is a 300-level course that will provide a holistic exploration of the multifaceted aspects of Kurdish life, delving deep into the vibrant traditions, struggles, and achievements of the Kurdish people. As we traverse through the diverse regions of Kurdistan and its diasporas, we will critically examine the current situations, challenges, and triumphs, offering an insightful perspective on a community that has played a significant role in the socio-political landscape of the Middle East. We will critically engage with classic and modern texts in Kurdish studies and examine them in the context of modern Middle East studies. We will aim to foster a deep understanding of the Kurdish identity and the complex forces that have shaped it.

Prerequisite: 1.5 NMC credits at the 200-level

Breadth Requirements: Society and its Institutions (3)

NMC349H1 - Climate and Collapse in the Ancient Near East

Hours: 36S

Discussions of climate change and its repercussions for modern society have become pervasive in the media and in general social discourse. The past offers a deep timescale within which to examine the plethora of ways in which humans have interacted with their environment and responded and adapted to climate variability in various periods. However, when we find stories about past civilizations and their relationship with their environment in the media, these are almost exclusively framed as stories of unavoidable collapse. Is this legitimate, or over-dramatic? What can we learn from past societies and how they adapted to ancient climate change—or perhaps failed to do so? This course addresses the methods used to reconstruct past climate, the details of what we know about Near Eastern palaeoclimate, and the frameworks of collapse and resilience that are frequently employed in explaining episodes of rapid climate change in the Near East.

Prerequisite: 9.0 credits, including one of: [ARH100Y1](#), [ARH205H1](#), [NMC260H1](#), [NMC262H1](#). Students who do not meet the prerequisites are encouraged to contact the department.

Breadth Requirements: Society and its Institutions (3)

NMC350H1 - Christian Literature from the Middle East in Translation

Hours: 24L

Survey of various literary genres from works produced by Armenian, Coptic, Maronite, Melkite, and Syriac authors between the 3rd and the 19th centuries CE. Genres include theology in poetry, biblical commentaries, historiography and chronicles, hagiography, songs and epics, apologetics, and travel accounts.

Prerequisite: NMC270H1

Recommended Preparation: NMC102H1

Breadth Requirements: Creative and Cultural Representations (1)

NMC351H1 - Dead Sea Scrolls

Hours: 24L

This course provides an examination of the historical and cultural context in which the Dead Sea Scrolls were authored and copied, the types of writings included in the Scrolls, and the ancient Jewish groups behind these texts. It also discusses the significance of the Scrolls for understanding the textual development of the Hebrew Bible, ancient scriptural interpretation, and the thought world of the Jews during the period that gave birth to both Rabbinic Judaism and early Christianity. No knowledge of Hebrew or Aramaic is required. (Offered alternate years)

Prerequisite: 9.0 credits

Recommended Preparation: NMC104H1 or NMC252H1, or equivalent in another humanities department

Breadth Requirements: Creative and Cultural Representations (1)

NMC352H1 - Ancient Egyptian Literature

Hours: 24L

This course focuses on the analysis of Ancient Egyptian literary texts from a variety of different genres. We will read examples of instructional and wisdom literature, poetry, literary narratives, and mythical tales. Issues such as how to best define terms like "literature" or "genre" for such an ancient culture will be discussed, and we will try to trace the development of literary texts in pharaonic Egypt—from the earliest attestations of coherent prose in the tombs of the Egyptian Old Kingdom (around 2500 BCE), via the full-blown Late Egyptian narratives of the Ramesside Period (around 1200 BCE), to instances of reiterations of the older genres in the Late and Ptolemaic

Periods (to about 300 BCE). No knowledge of Ancient Egyptian is required; all texts will be read in translation

Prerequisite: Any 0.5 credit on ancient Egypt offered by academic units within the Faculty of Arts & Science

Recommended Preparation: NMC101H1

Breadth Requirements: Creative and Cultural Representations (1)

NMC353H1 - Possible Worlds: Arabic Speculative Fiction

Hours: 24S

This course examines the relationship between political critique and the textual production of "possible worlds" distinct from the familiar, tangible world around us, taking the premodern Arabic literary canon as our example. We will read a variety of modern critical theorists in connection with premodern Arabic texts including: Qur'anic apocalyptic suras, the philosophical novel Hayy ibn Yaqzan, Sindbad the Sailor and other travel narratives, al-Ma'arri's satirical narrative of a visit to the afterlife, and trickster tales of the maqama genre. We then turn to early modern popular narratives, concluding with a discussion of how the 19th-century novels by al-Muwaylihi and al-Shidyaq merged novelistic forms, selfhoods, and conceptions of political organization with those of the classical maqama.

Prerequisite: 4.0 credits in Humanities/BR= 1 or 2

Breadth Requirements: Creative and Cultural Representations (1)

NMC354H1 - Abbasid Literature and the Sciences

Hours: 24S

This course examines Arabic literary works of the Abbasid empire (750-1258 CE) that engaged with the flourishing study of natural sciences, Greek philosophy, and the philosophies of language and knowledge in the Islamic sciences. Students will read narrative works by Ibn al-Muqaffa', al-Jahiz, Ibn Qutayba, al-Tanukhi, al-Tawhidi, 'Abd al-Latif al-Baghdadi, as well as poetry dealing with scientific and philosophical concepts. Students will ask how (and whether) Abbasid authors differentiated between the categories of literature, science, beauty, knowledge, and narrative, and how they imagined interactions between them. All readings are in English translation.

Prerequisite: 3.0 BR= 1/ 2 credits at the 200+ level

Breadth Requirements: Creative and Cultural Representations (1)

NMC355H1 - Ottoman Empire: The Age of Reform

Hours: 24L

The course examines the history of the Ottoman Empire beginning with the inauguration of the first Western-inspired reforms at the end of the 18th century until the empire's dissolution over the course of World War I. It explores the transformation of Ottoman politics, society, and intellectual and cultural life during a period marked by active reform efforts and increasing contacts with the West, which had an impact on the empire's diverse populations. Topics include the Nizam-i Cedid (New Order), the Tanzimat, the Hamidian era, the Young Turk revolution, constitutionalism, women, and the emergence of artistic expressions of modernity, such as theatre and painting. The course also provides insights into the Ottoman legacy in modern Turkey, the Middle East, and the Balkans, and seeks to situate the Ottoman experience in a global context.

Prerequisite: 4.0 credits

Recommended Preparation: [NMC278H1](#), [NMC377Y1](#), [NMC378H1](#)

Breadth Requirements: Society and its Institutions (3)

NMC356H1 - Anthropology of Islam

Hours: 24L

This course introduces students to studies of contemporary Islam that are based on extensive periods of research with Muslim communities in their own languages using anthropological methods. What do such studies teach us about the varied ways Muslims engage with their religious tradition in the modern world? And how can such studies make us think differently about gender, economy, science, and secularism? We will discuss examples from Nigeria to Somalia, Egypt, Turkey, and Iran, to India, Pakistan, and Indonesia, to Canada, the US, and Europe. Students will apply anthropological methods learned in class to do research among a Muslim community in Toronto or online.

Exclusion: [RLG355H1](#)

Recommended Preparation: [NMC103H1](#)/ [RLG204H1](#)/ [NMC241H1](#)/ [ANT207H1](#)

Breadth Requirements: Society and its Institutions (3)

NMC357H1 - Gender and Sexuality in Premodern Arabic Literature

Hours: 24S

Students read translations of Arabic literary texts composed by women or dealing with gender and sexuality. Class discussion considers debates in the field about how to analyze these texts in their historical context and in a theoretically grounded manner. Topics addressed include: popular and elite narrative representations of gender and sexuality; pre-Islamic and Abbasid poetry and remarks composed by women, and their transmission in male-authored anthologies; hetero- and homoerotic obscenity and eroticism in Arabic poetry, epistles, and scientific texts; and literary representations of sexual minorities like eunuchs, intersex people, and *mukhannathūn* (people with apparently male biology who dressed and behaved as women, and had a specific social position at certain times).

Recommended Preparation: 4.0 credits in Humanities

Breadth Requirements: Creative and Cultural Representations (1)

NMC358H1 - Gender and Sexuality in Modern Middle Eastern Cultures

Hours: 24L

This course examines questions of gender and sexuality in the broader Middle East (Iran, Turkey, and the Arab world) from the colonial period (19th to early 20th centuries) to the present through readings of religious, cultural, historical, visual, and literary texts. We will begin the course by thinking critically about colonial and Orientalist legacies that continue to structure contemporary debates on representations of women, gender, and sexuality in the Middle East and North Africa. Students will read and analyze a range of primary historical texts written by Middle Eastern women reflecting the ways in which women of different backgrounds (religious, class, urban/rural) and generations have conceptualized and inhabited their gendered and sexual identities. Topics students will explore include the development of modern secular and religious feminist thought; cultural representations of gender, sexuality, and queerness; fictional texts that represent non-normative expressions of gender and sexuality; and critical approaches to theorizing gender and sexuality in the Middle East. All readings are in English translation.

Prerequisite: 3.0 credits in Humanities/BR= 1 or 2

Breadth Requirements: Creative and Cultural Representations (1)

NMC359H1 - Nomads in the Ancient Near East

Hours: 24L

Using ancient archaeological and textual sources as well as modern ethnographies and political theories, this class takes a critical look at the role of mobile populations in Near Eastern history from the fourth to first millennium BCE, assessing modern perspectives as well as the ancient evidence.

Recommended Preparation: [NMC102H1](#)

Breadth Requirements: Society and its Institutions (3)

NMC360H1 - The Archaeology of the Biblical World I: The Bronze Age

Hours: 24L

The archaeology of Syria-Palestine from prehistoric times until the end of the Late Bronze Age (ca. 1200 BCE), with a special emphasis on the development of complex society, and inter-relations with the neighboring regions of Egypt and Syro-Mesopotamia. Attention will also be given to the history of archaeological research in the region, current field techniques and methods of archaeological analysis, and the relationship between archaeological evidence and contemporary written records, including the Hebrew Bible.

Prerequisite: 1.0 credit in Humanities/BR= 1 or 2

Recommended Preparation: [NMC102H1](#)/ [NMC104H1](#)/ [NMC260H1](#)/ [NMC262H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NMC361H1 - The Archaeology of the Biblical World II: The Iron Age

Hours: 24L

The archaeology of Syria-Palestine from the collapse of the Late Bronze Age until the Persian Period, with a special emphasis on the emergence of Israel and the small territorial nation-states of the eastern Mediterranean seaboard. Particular attention will be given to the relationship between the archaeological evidence and contemporary written records, including the Hebrew Bible.

Prerequisite: 1.0 credit in Humanities/BR= 1 or 2

Recommended Preparation: [NMC102H1](#) or [NMC104H1](#) or [NMC260H1](#) or [NMC262H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NMC362H1 - The World of the Last Pharaohs: History, Culture, and Society in Graeco-Roman Egypt

Hours: 24L/12T

Graeco-Roman Egypt is one of the best-documented ancient societies, affording us unparalleled opportunities to reconstruct the lives and thoughts of the people living along the two banks of the Nile at the time. The course provides a holistic view of Egypt from the conquest of Alexander in the 4th century BCE, until the 3rd century CE. In addition to a chronological overview of the region's political history, topics include religion and religious change, multiculturalism, intellectual, social and economic history, and the impact of foreign domination on everyday life. The course also examines how Egypt's incorporation into ancient Mediterranean empires affected these realms. Both written sources in Greek and Egyptian (in translation) and material culture – archaeology, art, and architecture – are studied to understand Egyptian society in the Graeco-Roman period. One of the goals of the course is to provide students with a foundational understanding of historiographical practices. This includes how combining critical thinking and different approaches to writing history with various sources can yield a more nuanced and balanced view of one of the most significant and richly recorded regions of the ancient world.

Prerequisite: 2.0 credits at the 200+ level in BR 1 or BR 2 or BR 3 or a combination of BR 1, BR 2, and BR 3.

Exclusion: [CLAC05H3](#) and [HISC10H3](#)

Breadth Requirements: Society and its Institutions (3)

NMC364H1 - Art and Archaeology of Syria

Hours: 36S

Discover the wonders of Syria's past, from 10,000 year-old burials to the world heritage sites of Palmyra and the Citadel of Aleppo. Explore headless skeletons, royal marriages, desert castles and Roman streetscapes.

Prerequisite: 3.0 credits in any field

Breadth Requirements: Creative and Cultural Representations (1)

NMC365H1 - Women and Gender in Egyptian Archaeology

Hours: 36S

The course explores issues related to gender within the ancient Egyptian context and investigates the activities of

women through the study of many different kinds of archaeological and material evidence. We'll build a foundation for this work with an overview of current developments in gender theory and consider their applications for research on ancient Egyptian society and culture. No prior knowledge of theoretical approaches is expected. From this basis, we'll go on to consider how archaeological material can contribute to the understanding of gender roles and examine how excavators may unconsciously impose their own gender perspectives on ancient contexts, creating biased views of ancient societies that become entrenched in scholarly tradition. The same methods of critical analysis will inform our study of women in ancient Egypt, incorporating archaeological data and artifactual material that can inform our understanding of the complex roles that women played in Egyptian culture, society, and religious practice.

Prerequisite: 3.0 credits in BR=1/2/3

Recommended Preparation: [NMC101H1](#) or ([NMC343H1](#)/ [NMC344H1](#)) or [NMC251H1](#)

Breadth Requirements: Society and its Institutions (3)

NMC366H1 - Archaeology of Mesopotamia I: Rise of Civilization

Previous Course Number: NMC363H1

Hours: 36L

A comprehensive survey class on the archaeology of Mesopotamia during prehistoric periods (10,000 – 2300 BC), covering the rise of villages, the Agricultural Revolution, the development of cities, cultic centers, and complex bureaucracy, and the rise of state entities during the Neolithic, Chalcolithic and Early Bronze Ages. This class will focus on the area of modern-day Iraq but will also consult materials from western Iran, eastern Syria, and southeastern Turkey.

Prerequisite: [NMC102H1](#)

Exclusion: [NMC363H1](#)

Recommended Preparation: [NMC248H1](#), [NMC262H1](#), [NMC266H1](#)

Breadth Requirements: Society and its Institutions (3)

NMC367H1 - Archaeology & Architecture of Egyptian Monasticism

Hours: 24L

Underlines the role of some Egyptian monasteries as active institutions carrying out numerous economic activities, and reveals the forces that enabled their survival and changing function. Exploration of these rich sites of cultural exchange, as manifested in their architecture and religious art and written material.

Recommended Preparation: [NMC260H1](#), [NMC262H1](#), [NMC342H1](#), [NMC368H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NMC368H1 - Coptic Art & Archaeology

Hours: 24L

A survey of Coptic art, archaeology and architecture. The course will cover aspects of the religious, civil and daily life of the Copts: their houses, religious architecture, funerary monuments, art and artefacts

Recommended Preparation: [NMC260H1](#), [NMC262H1](#), [NMC289H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NMC369H1 - Archaeology of Mesopotamia II: States and Empires

Previous Course Number: NMC363H1

Hours: 36L

A comprehensive survey class on the archaeology of Mesopotamia during historic time periods (Sumer, Assyria, and Babylon; 2300 – 333 BC), covering the rise of the Akkadian Empire, the Neo-Sumerian “renaissance” of the Ur III State, Hammurapi’s Babylon, the Late Bronze Age under Kassite and Mittani rule, the rise and dominance of Assyria, and the splendor and fall of Babylon. This class will focus on the area of modern-day Iraq but also will consult materials from western Iran, eastern Syria, and southeastern Turkey.

Prerequisite: [NMC102H1](#)

Exclusion: [NMC363H1](#)

Recommended Preparation: [NMC248H1](#), [NMC262H1](#), [NMC266H1](#)

Breadth Requirements: Society and its Institutions (3)

NMC370H1 - History of Ancient Israel

Hours: 24L

The course is concerned with the political and cultural history of ancient Israel and the Hebrew people from origin stories set in the pre-monarchic period to early Roman Palestine. Israel is the land that bequeathed the Bible, the Jewish people, and hosted the birth of Christianity. Much of its history witnessed hostile interactions with imperial forces, from Babylon to Rome. While the focus is on key people, events, and essential chronology, the course also addresses critical questions

concerning the use of sources (primary among which is the Hebrew Bible/Old Testament); differences between ancient history-writing and modern history-writing; and the assumptions and methods involved in reconstructing historical events.

Prerequisite: [NMC104H1](#), [NMC252H1](#)

Recommended Preparation: [NMC101H1](#), [NMC102H1](#)

Breadth Requirements: Society and its Institutions (3)

NMC371H1 - Topics in Hebrew Bible

Hours: 24S

This course will cover various aspects of the Hebrew Bible, from the study of a book (e.g., Genesis), a group of books (e.g., the Prophetic books) to a topic (e.g., women in the Bible).

Prerequisite: 2.0 credits at the 200+-level

Recommended Preparation: [NMC252H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NMC372H1 - Islam and Muslims in the Balkans

Previous Course Number: HIS306H1

Hours: 24L

The Balkans has been in contact with Islam and inhabited by Muslims for six centuries. Nowadays it is the home of over eight million Muslims of various ethnic backgrounds who constitute the second largest religious group in the region. This course examines the history of Islam, Muslims, and Muslim culture in the Balkans from the Ottoman conquest in the fourteenth century until the present day while placing it in a wider transregional context. Topics covered include formation of Muslim communities, Sufi groups, the Muslims and the Balkan national imagination, responses to modernity, Muslims as minorities, Muslim experiences in communist states, and the breakup of Yugoslavia.

Prerequisite: Any of [NMC103H1](#)/ [NMC273Y1](#)/ [NMC278H1](#)/ [NMC377Y1](#)/ [NMC355H1](#)/ [NMC386H1](#)

Exclusion: [HIS306H1](#)

Breadth Requirements: Society and its Institutions (3)

NMC373H1 - Modern Iran

Hours: 24L

This course covers the history of Iran from the early modern period to the present. Following an overview of

the Safavid revolution and the empire it created (1501–1722), we examine the political upheavals experienced in post-Safavid Iran throughout the 18th century that culminated in the rise of the Qajar polity. This review of early modern Iranian history will set the stage for our investigation of the defining moments in the modern history of Iran, including the Constitutional Revolution (1905–1911), the subsequent toppling of the Qajar dynasty, and the establishment of Pahlavi rule under Reza Shah. We then focus on the events leading up to and including the Islamic Revolution of 1979 and the making of the Islamic Republic. The course concludes with an exploration of society and culture in contemporary Iran.

Recommended Preparation: [NMC348Y1](#)

Breadth Requirements: Society and its Institutions (3)

NMC375H1 - Conversion to Islam in Medieval History

Hours: 24S

How did Islam spread in the world? The question has puzzled historians for years. For centuries after the rise of Islam, much of the Middle East was still largely comprised of diverse communities of non-Muslims. This course on the complex history of “Islamization” examines when, how, and why various societies became majority Muslim, through a close look at case studies and sources from across the medieval world including Spain, North Africa, Central Asia and India. Topics covered include religious tolerance, polemic, cultural assimilation, minority identities, interreligious marriages, children of mixed families, and the contentious issues of apostasy and forced conversion.

Prerequisite: [NMC103H1](#) or [NMC273Y1](#)

Breadth Requirements: Society and its Institutions (3)

NMC376H1 - History of Islamic Spain and North Africa (640-1492)

Hours: 24L

Muslim conquest of North Africa and Spain, history of Spain under Muslim rule to 1492. Attention given to institutional and cultural development, Islamic Spain's relations with the Islamic east and neighbours in Europe.

Prerequisite: [NMC273Y1](#)

Breadth Requirements: Society and its Institutions (3)

NMC378H1 - Modern Arab History

Hours: 36L

A thematic treatment of the Arab lands of the Middle East and North Africa from 1700 onward, focusing on the Ottoman and colonial periods.

Prerequisite: NMC278H1 and permission of instructor
Breadth Requirements: Society and its Institutions (3)

NMC379H1 - Capital, Technology, and Utopia in the Modern Middle East

Hours: 12L/12S

How does the workings of capital intersect with technological innovation and political visions in the modern Middle East? This course approaches this question through critical reading in the histories of capitalism, crisis, science, politics, and intersections between cultural history and technology studies using the Middle East as a starting point for the study of global phenomena. We will examine the ways in which constructions like race and ethnicity, gender, and the human/non-human divide have mediated the social and spatial expansion of capital in the region, especially through technological infrastructure and utopias between the late 18th and the 21st centuries.

Prerequisite: 0.5 credit in NMC/HIS/HPS at the 200+ level. Students who do not meet these prerequisites are encouraged to contact the Department.
Breadth Requirements: Society and its Institutions (3)

NMC380H1 - Religion in the Ancient Near East

Hours: 48S

This course examines a variety of different sources of evidence for religion in the ancient Near East, especially in Mesopotamia, the Levant, and Anatolia, including original written sources, archaeological evidence and iconography. Where possible, the focus will be on reading primary Near Eastern texts, and interpreting them within their contemporary social and political context. We also will discuss links between ancient Near Eastern texts and material that later came to be incorporated into Jewish, Christian and Islamic religious texts.

Prerequisite: 3.0 credits in any field
Breadth Requirements: Thought, Belief and Behaviour (2)

NMC381H1 - Modern Islamic Thought

Hours: 24L

Survey of major intellectual trends in the Islamic tradition, particularly those identified with Middle Eastern Muslim thinkers, from the early 19th century to the present. Topics include reformism, modernism, hermeneutics, feminism, Islamism, and liberal and progressive trends in contemporary Muslim thought. Readings in English translation.

Prerequisite: NMC103H1
Recommended Preparation: NMC278H1, NMC283Y1, RLG204Y1/ RLG204H1
Breadth Requirements: Thought, Belief and Behaviour (2)

NMC384H1 - Marking Time: Legal Issues and Personal Status in Judaism

Hours: 24S

This course will examine certain aspects of status and family law in Judaism, as well as Zoroastrianism, Eastern Christianity, and Islam. We will review some literature in legal theory to test its applicability to religious-based law. Our main topics include virginity (marital age, proof of virginity or its absence, rape or seduction of virgins, economics and theology of virginity); menstrual laws (impurity, punishment, sexuality, purification); mysticism (practitioners, purity requirements, theology); and sexuality (marriageability, prohibited partners, sex acts). Sectarian approaches to these legal issues will be examined, for example, how biblical law is interpreted in Qumran, by the rabbis, and how these topics are addressed by Zoroastrian law, the Eastern Church Fathers and the Four Schools in Islamic law.

Prerequisite: Completion of 4.0 credits in Humanities/BR=1 or 2
Breadth Requirements: Thought, Belief and Behaviour (2)

JMH385H1 - Islamic Law and the Modern State

Previous Course Number: NMC385H1
Hours: 24L

What happens to the shari'a when it is applied by modern nation-states? This course introduces students to the way states, with Muslim majorities and minorities, from Canada to Malaysia, passing by Nigeria, Palestine, Iran, and Pakistan approach, accommodate, or apply Islamic law. We also discuss the way Muslims, lay and scholarly, talk about, practice, and follow Islamic law under modern states. Based on an examination of law in practice, we will be able to theorize modern transformations of the shari'a and provincialize the modern state and its legal regime.

Prerequisite: [NMC103H1/ RLG204H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

NMC386H1 - Muslims, Christians, and Jews in the Ottoman Empire

Hours: 24L

Although ruled by a Muslim dynasty and frequently characterized as an Islamic empire, the Ottoman state was inhabited by diverse religious and ethnic populations, many of them non-Muslim. This course examines how the Ottoman Empire governed and organized its subjects, Muslims and non-Muslims alike, of various ethnic backgrounds. It explores the relations among these communities and their interactions with the state, raising questions about tolerance, co-existence, conflict, loyalty, and identity. By looking into a selection of topics from the wide territorial span of the Ottoman Empire (Anatolia, the Balkans, and the Arab Middle East) the course seeks to provide insights into the organization, functioning, and transformation of a multi-confessional state and society in the premodern and modern eras.

Recommended Preparation: [NMC241H1](#), [NMC278H1](#), [NMC355H1](#), [NMC377Y1](#)

Breadth Requirements: Society and its Institutions (3)

NMC387H1 - Women, Gender, and Sexuality in the Ottoman Empire

Hours: 24L

The course explores key aspects of the history of women, gender, and sexuality in the Ottoman Empire from the early fourteenth century until the empire's collapse over the course of the First World War. It examines the experiences of women of various social and religious backgrounds, and the transformation of concepts and expressions of sexuality. Topics include gender and law, the harem as a social and political institution, discourses of sexuality, reproductive politics, women's movements, labour history, fashion, and gendered experiences of displacement, violence, and war.

Prerequisite: 2.0 credits at the 200+-level

Recommended Preparation: At least 0.5 credits from the following courses: [NMC278H1](#), [NMC355H1](#), [NMC357H1](#), [NMC358H1](#), [NMC386H1](#), [NMC388H1](#), and [NMC389H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2), Society and its Institutions (3)

NMC388H1 - The Rise of the Ottomans

Previous Course Number: NMC377Y1

Hours: 24L

A survey of the Ottoman Turks from their late 13th–early 14th century origins on the frontiers of the Seljuk, Mongol, and Byzantine empires to their establishment of an Islamic empire. Topics include the principalities known as *beyliks* that came into being in Anatolia as the above empires declined, the nature of the early Ottoman *beylik*, conquests in the Balkans, the destruction of the early Ottoman state by Timur and its rebirth, and Mehmed II's conquest of Constantinople. Coverage includes Ottoman institutions, economy, society, and culture.

Exclusion: [NMC377Y1](#)

Recommended Preparation: [NMC280H1](#)

Breadth Requirements: Society and its Institutions (3)

NMC389H1 - The Ottoman Empire in its Classical Age

Previous Course Number: NMC377Y1

Hours: 24L

A survey of the Ottoman Empire in the 16th and 17th centuries. From the victory by Selim I the Grim over Safavid Iran and conquest of Syria and Egypt to the resplendent age of Süleyman the Magnificent to the internal and external challenges that forced transformation or decline. Topics include wars in Europe, the Mediterranean and Black Seas, and with Iran; internally, the rise of the harem and "sultanate of the women," rebellions in Anatolia, military reform, religious controversies, and art and architecture. The endpoint is the Treaty of Karlowitz (1699) when the expansion of the empire ended.

Exclusion: [NMC377Y1](#)

Recommended Preparation: [NMC274H1](#), [NMC388H1](#)

Breadth Requirements: Society and its Institutions (3)

NMC394H1 - Persianate Art and Architecture

Hours: 24L

Covering art and material culture in the eastern Islamic lands from the late 13th century to the modern period. Objects from the collections of Islamic art in the Royal Ontario Museum will also be studied.

Prerequisite: 1.0 credit from FAH or NMC in medieval art/history/culture

Breadth Requirements: Creative and Cultural Representations (1)

NMC395H1 - Iconography of the Art and Material Culture of the Islamic World

Hours: 24S

The art and material culture of the Islamic world is rich in iconography - from Persian paintings to Afghan war rugs - with complex layers of meaning that are not necessarily understood at first glance. Such imagery can be comprehended through numerous lenses, from pre-Islamic concepts and literary themes to politically-driven motivations or religious beliefs and practices. Through a series of case studies of examples of painting, ceramics, metalwork, textiles, and contemporary art, the course examines the meanings behind the iconography on objects from across the Middle East and Central Asia, dating from the medieval period to the present day.

Breadth Requirements: Creative and Cultural Representations (1)

NMC396H1 - The Art of the Qur'an

Hours: 24L

The holy Qur'an, believed by Muslims to be the Word of God, has been a source of creative and artistic inspiration for Muslims around the world and through the ages. The language and interpretation of the Qur'an have engaged the minds of artists, craftspeople, and patrons of the arts as much as the minds of theologians and jurists. This course explores expressions of the Qur'an through a wide range of visual and material culture—from illuminated manuscripts to the use of the sacred text on coins, amulets, architecture, ceramics, metalwork, textiles, and modern and contemporary works of art. The course will include visits to the Royal Ontario Museum to examine Qur'ans in its Islamic collection.

Prerequisite: Completion of 4.0 credits in Humanities/BR=1 or 2

Recommended Preparation: Knowledge of Arabic or the Arabic script beneficial though not essential.

Breadth Requirements: Creative and Cultural Representations (1)

NMC445H1 - Sacred versus Secular Space: Mesopotamian Architecture in Context

Hours: 36L

When and where did the first buildings come about? Learn how some 10,000 years ago, the first permanent dwellings were constructed in the ancient Near East. Discover how the agricultural revolution and the domestication of animals resulted in the formation of villages during the Neolithic period (9,000–5,000 BC) with house types that grew in size and complexity. Observe how religious architecture evolved from simple, household-based cultic installations to large public complexes that dominated cities during the Uruk and Early Dynastic periods (4,000–2,300 BC). See how the rise and manifestation of powerful political leaders is reflected in the development, layout and decoration of their palaces. Beyond a typological approach to architecture, this course will also address challenges created by environmental conditions and limitations in available building materials. While focusing on Mesopotamia and Syria, it will also incorporate examples from Iran, Anatolia and the Levant.

Prerequisite: Students in other areas of study are encouraged to contact the Department.

Recommended Preparation: NMC260H1 or NMC363H1
Breadth Requirements: Society and its Institutions (3)

NMC446H1 - The Babylonian City

Hours: 24L

Ancient Mesopotamia is well known as the birthplace of some of the world's earliest cities. This course investigates the physical form of the city in 2nd and 1st millennium BC Babylonia (southern Mesopotamia) as the setting for the daily activities of its inhabitants. It examines the key components of the Babylonian city: houses; neighbourhoods and city districts; palaces; temples and ziggurats; streets and alleys; shops and markets; city walls, gates, and moats, as well as canals, orchards and gardens. The course emphasizes the reading and critical evaluation of written sources in translation, including selected royal inscriptions, topographical texts, and legal and administrative documents. It also considers ways of approaching the study of ancient cities and addresses the integration of textual and archaeological evidence. The focus is on investigating the relationship between Babylonian city form and contemporary social structure.

Prerequisite: 9.0 credits in any field

Recommended Preparation: NMC102H1, NMC346H1/
NMC347H1

Breadth Requirements: Society and its Institutions (3)

NMC447H1 - The Neo-Assyrian Empire

Hours: 24L

The course offers a detailed introduction to the Neo-Assyrian empire and how it functioned, based on study of a representative selection of written sources (in

translation). It examines Assyrian kingship, imperial administration, and daily life as reflected in the texts, including the royal inscriptions, official correspondence, astrological reports, and everyday legal and administrative documents. The course studies a cross-section of Assyrian society taking into account various perspectives, from the king and his highest officials and court scholars to the lowest-ranking subjects and deportees. It also investigates the economic basis of the Assyrian empire, including taxation and tribute, booty from military conquest, specialist craft production, and agriculture. The course emphasizes the historical evaluation and interpretation of the primary written sources.

Prerequisite: 9.0 credits in any field

Recommended Preparation: [NMC102H1](#), [NMC346H1](#)/
[NMC347H1](#)

Breadth Requirements: Society and its Institutions (3)

NMC449H1 - Mesopotamian Society and Economy

Hours: 24L

This course presents a thematic overview of Mesopotamian society and economy from the third millennium to the 1st millennium BC. The emphasis is on critical evaluation of the primary sources (in translation), such as everyday legal contracts and the so-called "Laws". It also explores different approaches to the study of ancient social structures and economies. Topics include: freedom, slavery, and social class; ethnicity; women, children, and the elderly; marriage, family, and household; crime and punishment, and the judicial system; the priesthood; palace and temple, private and state; merchants and trade; money, markets, and prices, and the question of whether there was a market economy; labour and wages; land ownership and tenure, and wealth and social inequality.

Prerequisite: 9.0 credits in any field

Recommended Preparation: [NMC102H1](#), [NMC346H1](#)/
[NMC347H1](#)

Breadth Requirements: Society and its Institutions (3)

NMC450H1 - Research Seminar on Ancient Jewish Literature

Hours: 24S

A seminar focusing on the critical analysis of the Hebrew Bible and related ancient Jewish texts. Literary genre and critical topics will vary according to instructor's research interests. Focus will be given to developing research skills by working with accepted critical methodologies. Not eligible for CR/NCR option.

Prerequisite: Permission of the instructor.

Breadth Requirements: Creative and Cultural Representations (1)

NMC452H1 - Iranian Modernity

Hours: 36S

This course explores competing conceptions of Iranian modernity within a comparative historical framework on "multiple modernities." A major theme is the exploration of the temporality and historicity in discussions of Iranian modernity.

Prerequisite: Completion of 9.0 credits

Breadth Requirements: Society and its Institutions (3)

NMC454H1 - Mapping the Ottoman World

Hours: 24S

This highly visual course explores the history of cartography in the Ottoman World between the 15th and 20th centuries. Focusing on the social life of images, it examines how the Ottomans and their rivals governed the territory through navigation, astronomy, architecture, property, and geographical surveys. From religious to scientific visualizations, maps make history. Yet not long ago, they were rare and strange technical objects, and their value as historical source has shifted again and again. Each week illuminates moments of this story by centering on a topic including empire, image, boundaries, print, reform, visualization, infrastructure, spatial literacy, map wars, and verticality.

Prerequisite: 1.0 credit in NMC/HIS/HPS at the 200+ level. Students who do not meet these prerequisites are encouraged to contact the Department.

Exclusion: [NMC471H1](#) (Advanced Topics in Near and Middle Eastern Civilizations: Mapping the Ottoman World), offered in Fall 2021

Breadth Requirements: Society and its Institutions (3)

NMC459H1 - Advanced Data Science Applications in Archaeology

Hours: 12P/24S

Digital technology and "big data" are transforming not only the ways in which archaeologists present and communicate their research, but also increasingly the ways they collect and analyze data. Modern archaeology is also becoming progressively more multi-disciplinary, and reliant on the analysis of growing bodies of disparate

forms of data, both archaeological data and data from related fields. This course exposes students to common approaches to the analysis of archaeological data (e.g. settlement scaling theory, summed probability distributions, agent-based modelling, etc.) and helps them develop hands-on skills in these critical techniques in archaeological data analysis. Where possible, this course will focus on case studies from the Near Eastern world.

Prerequisite: 9.0 credits including one of [NMC268H1](#) or [ARH312Y1](#). Students who do not meet the prerequisites are encouraged to contact the department.

Breadth Requirements: Society and its Institutions (3)

NMC460H1 - The Archaeology of Borders in Egypt and the Ancient Near East

Hours: 24S

Borders impact all kinds of aspects of our daily lives, and the same was true for peoples in the ancient Near East. This course will analyze premodern societies from the perspective of these boundaries, from “natural” geographic boundaries to the strict registers of action that define the aesthetics of Pharaonic and Near Eastern art. Using cutting edge theoretical approaches developed by anthropologists, geographers, art historians, and archaeologists to study modern (and ancient) border-making, this course will investigate Pharaonic and Near Eastern societies through the prism of the political, cultural, administrative, and economic boundaries they created and maintained.

Prerequisite: 1.0 credit at the 300+-level in NMC or ARH archaeology courses

Breadth Requirements: Society and its Institutions (3)

NMC461H1 - The History and Archaeology of the Horn of Africa and South Arabia

Previous Course Number: NMC461Y1

Hours: 24S

The cultures of the Horn of Africa and South West Arabia, separated by the Red Sea, have long been intertwined. This course explores the history and archaeology from the emergence of the hominids in Ethiopia, to the rise of the Sabeian and Axumite kingdoms, until the Middle Ages, highlighting their interactions and the roles they played in the development of their respected cultures.

Prerequisite: [NMC260H1](#) or [NMC262H1](#)

Exclusion: [NMC461Y1](#)

Breadth Requirements: Society and its Institutions (3)

NMC462H1 - Polarized-light Microscopy in Archaeology I: Foundations

Hours: 24L/24P

This course provides students with training in the use of polarized-light microscopy in the examination of archaeological materials, particularly pottery (ceramic petrology). Students will apply the knowledge they gain from lectures to hands-on work with materials in the lab, covering instruction in crystallography, optics, mineralogy, lithology, and other aspects of the petrology of ceramics and other materials. Labs comprise eight three-hour sessions during the term, working with the polarized-light microscope to examine and analyze thin-sections. No prior knowledge of geology is required. Students should plan to take [NMC470H1](#) Polarized-light Microscopy in Archaeology II: Applications, in the following term to complete their training.

Prerequisite: [NMC264H1](#) or permission of the instructor.

Exclusion: [NMC462Y1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

NMC463H1 - Warfare: The Archaeology of Conflict in the Ancient Near East

Hours: 36L

When did humans start fighting each other, and how far back can we trace the history of warfare? This course investigates the origin, nature, and manifestation of military conflicts in the ancient Near East and studies their impact on political, economic, and social developments in the region. Following a review of the relevant terminology (e.g., “warfare” vs “skirmish”) in archaeological literature, we will investigate the archaeological and historical data for a time span that extends from 9,000 to 300 BC. Evidence from archaeological sites (notably violent destructions of ancient settlements) will be compared with available artistic representations of warfare in sculpture, reliefs, inlays, and glyptics, complemented by textual accounts. While the course focuses on Mesopotamia, evidence from Syria, Turkey, Iran, the Levant, and Egypt will also be included.

Prerequisite: [NMC260H1](#)

Recommended Preparation: [NMC102H1](#), [NMC363H1](#)

Breadth Requirements: Society and its Institutions (3)

NMC464H1 - The Archaeology of Stuff at the ROM

Previous Course Number: NMC369Y1

Hours: 36P

Hands-on analysis of actual materials from the Middle and Near East, including Egypt, Iraq, Iran, Syria, and Turkey. Students learn the techniques by which archaeologists understand objects from the past: what they are made of, how they were made, and what they reveal about the people who made them.

Prerequisite: NMC264H1

Exclusion: NMC369Y1

Breadth Requirements: Creative and Cultural Representations (1)

NMC465H1 - Ceramic Analysis

Hours: 6P/36S

A survey of methods of classification and analysis (form, fabric and style) involved in the study of archaeological ceramics, and the use of ceramics to infer patterns of production, distribution, and social organization; linking research questions with appropriate analytical techniques.

Prerequisite: 9.0 credits, including one of the following: ARH312Y1, NMC260H1, NMC262H1, NMC264H1, NMC360H1, NMC361H1, NMC464H1.

Breadth Requirements: Creative and Cultural Representations (1)

NMC466H1 - Near Eastern Ceramics

Hours: 36S

An introduction to the basic corpus of Near Eastern ceramics, from the invention of pottery production in the Neolithic until the Persian period, utilizing existing collections at the University and in the Royal Ontario Museum.

Prerequisite: 9.0 credits, including one of the following: ARH312Y1, NMC260H1, NMC262H1, NMC264H1, NMC360H1, NMC361H1, NMC464H1, NMC465H1.

Breadth Requirements: Creative and Cultural Representations (1)

NMC467H1 - Seminar in Egyptian Archaeology I

Hours: 24S

Seminar focuses on the social and cultural development of Egypt from the Predynastic Period through the Middle Kingdom, engaging with major theories regarding social complexity, state formation, urbanism, social organization, and regionalism. An independent research project and hands-on experience with artifacts at the ROM are important features of the course.

Prerequisite: NMC101H1 or NMC343H1. Students who do not meet these prerequisites are encouraged to contact the Department.

Breadth Requirements: Creative and Cultural Representations (1)

NMC468H1 - Seminar in Egyptian Archaeology II

Hours: 24S

Seminar focuses on the social and cultural development of Egypt from the Middle Kingdom through the Ptolemaic Period, engaging with major theories regarding urbanism, ethnicity, core-periphery relationships, cultural interaction, and social organization. An independent research project and hands-on experience with artifacts at the ROM are important features of the course.

Prerequisite: NMC101H1 or NMC344H1. Students who do not meet these prerequisites are encouraged to contact the Department.

Breadth Requirements: Creative and Cultural Representations (1)

NMC469Y1 - Medieval Middle Eastern Ceramics

Hours: 72S

An introduction to the ceramics of the Middle or Near East from the time of Alexander until recent times. A particular emphasis will be the elite glazed wares of the mediaeval and Islamic periods. Apart from providing a history of the production of ceramics and their social and archaeological context, this course is intended to train archaeologists and art-historians in the fundamental field recognition and identification of the various types and their production origins, and the course will rely heavily on the collections of the ROM.

Prerequisite: NMC260H1, NMC262H1, and at least one other 0.5 credit 300- or 400-level course in archaeological materials

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

NMC470H1 - Polarized-light Microscopy in Archaeology II: Applications

Previous Course Number: NMC462Y1

Hours: 24L/24P

This course explores further applications of polarized-light microscopy in the examination of archaeological materials, particularly pottery (ceramic petrology). The focus is on foundational research and case-studies of materials from around the world with particular attention to material culture from the Middle East, Central America, and East Asia, where University of Toronto researchers have worked, ranging in date from the Neolithic period to the modern day. Class and lab discussions will include critical examination of the application and integration of ceramic petrology in archaeological research design and how petrology can address relevant research questions successfully. Labs comprise eight three-hour sessions during the term, working with the polarized-light microscope to examine and analyze thin-sections.

Prerequisite: NMC462H1

Exclusion: NMC462Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

NMC471H1 - Advanced Topics in Near and Middle Eastern Civilizations

Hours: 24S

An advanced seminar organized around readings on a topic selected by the instructor.

Breadth Requirements: Society and its Institutions (3)

NMC472H1 - Theory & Method in Middle East Studies

Hours: 24S

Examines current theoretical and methodological trends in the study of the Near/Middle East. A seminar course, it consists of presentations, discussions, lectures, guest speakers, and documentaries. No previous knowledge of methodology required. Special attention will be paid to the politics, culture, political economy, gender, and ethics of various research practices. Intended for 4th year students only.

Prerequisite: Permission of the instructor

Breadth Requirements: Society and its Institutions (3)

NMC473H1 - Intellectuals of the Modern Arab World

Hours: 24S

The course is designed to re-examine the role of intellectuals in the Arab world and political events that shaped their thinking. It introduces the life and thought of some leading thinkers of the Arab world and relates their thought to the lived experience of political, social, economic and cultural change in the Middle East.

Prerequisite: 1.0 credit from NMC278H1, NMC377Y1, NMC378H1

Recommended Preparation: Fluency in reading Arabic

Breadth Requirements: Society and its Institutions (3)

NMC474H1 - The Archaeology of Death

Hours: 36S

Death is an unavoidable part of the human experience, and each culture has its own unique ways of handling the loss of family and community members and conceptualizing the relationships between the living and the dead. This course represents an intensive education in the archaeology of death. Participants in this class will read a variety of theoretical and methodological literature outlining several approaches to reconstructing the ways that people have disposed of the dead throughout history, and will use these frameworks to examine in detail the primary archaeological data for mortuary practices from sites in the ancient Near East.

Prerequisite: ANT200Y1 or NMC260H1 or NMC262H1

Recommended Preparation: ANT334H1

Breadth Requirements: Creative and Cultural Representations (1)

NMC475H1 - Orientalism & Occidentalism

Hours: 24S

This course probes the contemporaneous formation of modern Oriental Studies in Europe and the emergence of discourses on Europe (Ifrañj/Farang) in the Middle East from the eighteenth century to the present. Special emphasis will be devoted to encounters between scholars in Western Europe, Iran, India, and the Ottoman Empire. This seminar-style course explains that Orientals gazed and returned the gaze, and in the process of cultural looking, they, like their Occidental counterparts, exoticized and eroticized the Farangi-Other. In the interplay of looks between Orientals and Occidentals, there was no steady

position of spectatorship, no objective observer, and no aperspectival position. Intended for upper year students.

Prerequisite: Permission of the instructor.

Breadth Requirements: Society and its Institutions (3)

NMC476H1 - Politics of Archaeology in the Modern Middle East

Hours: 24S

This course examines the role nineteenth and twentieth-century archaeology played in Middle Eastern politics, the culture of colonialism and in nationalist struggles. The course will first familiarize the students with the diplomatic and intellectual context of the formation of archaeology as a field of study in Europe and analyse the role archaeology played in the production of knowledge about the Middle East. Next, the course will examine the archaeological practices on the ground (and underground) and inquire what happens in the contact zone between foreign and local archaeologists. Finally, we will trace the ways in which emergent nationalist discourse challenge, appropriate and imitate the historical narratives of Western archaeology.

Prerequisite: Permission of instructor is required.

Breadth Requirements: Society and its Institutions (3)

NMC477H1 - Modern Turkey

Hours: 24S

The course examines the history of modern Turkey from the beginning of the 20th century until the present day. Topics include transition from empire to nation-state; the establishment of the Turkish republic; the Kemalist reforms and legacy; nationalism and nation-building; Islam and politics; gender and sexuality; as well as recent political, social, and cultural developments. The course seeks to situate the history of Turkey in a broader regional context and introduces students to some historiographical debates. In seminar discussions, students are encouraged to explore topics from a critical post-nationalist perspective and to think about current events in a historical context.

Recommended Preparation: [NMC278H1](#), [NMC355H1](#), or permission of instructor

Breadth Requirements: Society and its Institutions (3)

NMC478H1 - Modern Arab Societies

Hours: 24S

A weekly seminar built around thematic readings of social and economic history of the modern Arab world. Sometimes, the course is geographically extensive, encompassing the predominantly Arabic-speaking lands of North Africa and the Middle East from Morocco in the west to Iraq in the east. At other times, the course focuses on a more narrowly defined geographic region—one country or a group of countries in the Arabic-speaking lands. Readings and discussions emphasize the experiences of broad sectors of the population, not just of elites. This framework of “history from below” also invites scrutiny of historically-marginalized populations (“subalterns”), or at least of silences in the literature about these populations.

Prerequisite: [NMC378H1](#). Students who do not meet the prerequisite are encouraged to contact the Department.

Breadth Requirements: Society and its Institutions (3)

NMC479H1 - Nationalism in the Arab World

Hours: 24S

A seminar that critically examines the types and varieties of national expression in Arab societies of the Middle East and North Africa, through a reading of common texts and students' individual research projects.

Prerequisite: [NMC378H1](#) and permission of instructor

Breadth Requirements: Society and its Institutions (3)

NMC480H1 - Structural Development of the Iranian Languages

Previous Course Number: NML463H1

Hours: 24S

This interdisciplinary course focuses on the structural development and contrastive analysis of Iranian languages including Dari, Farsi, Tajiki, Balochi, Kurdish, Pashto, and Zazaki. The lectures begin with an overview of ancient and medieval Iranian languages and then describe modern Iranian languages' historical and structural development. The course also examines the role of language in maintaining cultural identity and demonstrates the type and mechanism of the development of Iranian languages. The lecture materials are based on texts and articles written by theoretical linguists, sociolinguists, typologists, and descriptive and historical linguists.

Prerequisite: Completion of 9.0 credits in BR= 1/ BR= 2

Exclusion: [NML463H1](#)

Recommended Preparation: 1.0 credit from ([LIN232H1](#)/ [LIN232H5](#)), ([LIN333H1](#)/ [LIN231H5](#)), ([LIN362H1](#)/ [LIN360H5](#))

Breadth Requirements: Creative and Cultural Representations (1)

NMC484H1 - Gender Issues in Jewish Law

Hours: 36S

Among the topics addressed in this course in various years are the requirement for women divorced or widowed (either from betrothal or marriage) to wait three months before remarriage to determine paternity or for pregnant or nursing women to protect the fetus or infant; legal disabilities for women in marriage and divorce (consent, unilateral acquisition, power differentials, exit options); legal status according to age (fetus, infant, before and after age six, approaching legal majority, legal majority, anomalies); sexuality (age, sexual acts and their legal repercussions, prohibitions, consent, intergenerational sexual connections, homosexuality); rabbinic ordination of women in the various streams of Judaism; and abortion (contraception, status of embryo or fetus, viability, reasons). These issues will be discussed in terms of gender and modern law.

Prerequisite: Completion of 9.0 credits in Humanities/BR=1 or 2

Breadth Requirements: Thought, Belief and Behaviour (2)

NMC491H1 - Mesopotamian Material Culture: Art versus Artifact

Hours: 36L

What is an artifact, and to what degree does it represent art? At what point in the evolution of ancient human society does art emerge? What does it express, what is its purpose, and who are the agents that create and propagate it? This course addresses these questions by examining artifacts from the Palaeolithic to the Iron Age (15,000-300 BC). Students will learn to categorize works of ancient Near Eastern art using descriptive (materials, size, object type) as well as interpretive (iconography, style, themes) parameters, in order to engage critically with art-historical studies. Techniques of reading visual narratives will be exemplified by discussing selected examples in detail, showing ways of identifying a messenger and the message that they are trying to convey, the selective inclusion or omission of elements within a visual narrative, and the possible propagandistic intent in doing so.

Prerequisite: Permission of the instructor

Recommended Preparation: NMC260H1 or NMC363H1

Breadth Requirements: Creative and Cultural Representations (1)

Research Courses

NMC299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

NMC299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

NMC398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

NMC399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

NMC399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

NMC495Y1 - Independent Studies

The student must obtain the consent of an appropriate full-time NMC faculty member to supervise the proposed topic, which is subject to approval by the Associate Chair, Undergraduate. The course application form is available from the NMC Undergraduate Administrator. Not eligible for CR/NCR option.

Prerequisite: Permission of the Department

NMC496H1 - Independent Studies

The student must obtain the consent of an appropriate full-time NMC faculty member to supervise the proposed topic, which is subject to approval by the Associate Chair, Undergraduate. The course application form is available from the NMC Undergraduate Administrator. Not eligible for CR/NCR option.

Prerequisite: Permission of the Department

NMC497H1 - Independent Studies

The student must obtain the consent of an appropriate full-time NMC faculty member to supervise the proposed topic, which is subject to approval by the Associate Chair, Undergraduate. The course application form is available from the NMC Undergraduate Administrator. Not eligible for CR/NCR option.

Prerequisite: Permission of the Department

NMC499Y1 - Senior Thesis

A 40-60 page (15,000-20,000 word) research paper (100% of the final mark) written under the supervision of a full-time NMC faculty member. Not eligible for CR/NCR option.

Prerequisite: 4th year status in NMC Specialist program; supervisor's approval; departmental approval.

Exclusion: NMC495Y1/ NMC496H1/ NMC497H1 may not be taken in the same session

Language and Literature Courses

NML110Y1 - Elementary Standard Arabic

Hours: 96L/24T

This course is designed for students with no prior knowledge of Arabic. It places equal emphasis on the development of all language skills: reading, writing, listening, and speaking. The learning philosophy underlying this approach is that proficiency in a foreign language is best achieved through consistent, deliberate, and systematic practice. From the outset, students are strongly encouraged to develop the habit of consistently practicing learned material.

Prerequisite: Priority enrollment will be given to declared NMC majors/specialists.

Exclusion: Native speakers/ NML210Y1

Breadth Requirements: Creative and Cultural Representations (1)

NML155H1 - Elementary Modern Hebrew I

Hours: 48L

See MHB155H1 in Religion.

NML156H1 - Elementary Modern Hebrew II

Hours: 48L

See MHB156H1 in Religion.

NML210Y1 - Intermediate Standard Arabic I

Previous Course Number: NML211Y1

Hours: 96L/24T

This course assumes active knowledge of the content covered in NML110Y. It places equal emphasis on the development of all language skills. As the course progresses, students are introduced to the fundamentals of Arabic morphology and syntax. This is achieved

through analysis of texts covering a wide range of topics. By the end of the course, students are expected to achieve upper intermediate level of proficiency.

Prerequisite: NML110Y1 or permission of the instructor.
Exclusion: Native speaker. Priority enrollment will be given to declared NMC majors/specialists.
Breadth Requirements: Creative and Cultural Representations (1)

NML211H1 - Arabic Poetry: the Abbasid Period

Previous Course Number: NML413H1
Hours: 24S

Read the classics in the original Arabic! Learn how to decipher a poem on your own and how to identify the meters. We will read famous and lesser-known Arabic poems composed between 750-1258 CE, including poems by Abu Nuwas, Abu al-Atahiya, al-Buhturi, al-Mutanabbi, Abu Firas, al-Ma'arri, as well as various muwashshahat. Themes include love, piety, battle, carousing, poverty, and grief. We will focus on close reading, historical context, and the historical development of genres and styles over time. Heritage speakers of Arabic are encouraged to register; please contact the instructor to confirm your Arabic level before the start of class.

Prerequisite: NML310Y1. Students who do not meet the prerequisites are encouraged to contact the department.
Exclusion: NML413H1
Breadth Requirements: Creative and Cultural Representations (1)

NML212H1 - Classical Arabic Prose

Previous Course Number: NML412H1
Hours: 24S

Read the classics in the original Arabic! This class surveys the rich and varied literary prose traditions in the Arabic language from early Islam to the Mamluk period, including an early Arabic version of Majnūn Laylā, the Maqāmāt, al-Jāhiz, Ibn Qutayba, and stories from the 1001 Nights. The course focuses on developing reading skills specific to classical Arabic texts, and on developing an ability to analyze the themes, literary techniques, genres, and ideas within those texts. Throughout, we will seek an understanding of the historic notion of adab as a concept that overlaps with, but is also distinct from, the modern concept of literature. Heritage speakers of Arabic are encouraged to register; please contact the instructor to confirm your Arabic level before the start of class.

Prerequisite: NML310Y1. Students who do not meet the prerequisites are encouraged to contact the department.
Exclusion: NML412H1
Breadth Requirements: Creative and Cultural Representations (1)

NML220Y1 - Introductory Aramaic

Hours: 72S

Introduction to Aramaic grammar. Readings from biblical Aramaic.

Prerequisite: NML250Y1
Breadth Requirements: Creative and Cultural Representations (1)

NML230H1 - Elementary Coptic I

Hours: 48S

Introduces the student to the last stage of the Egyptian language, written mostly in Greek characters. The course will first concentrate on the grammar of the language and go on to read short texts.

Breadth Requirements: Creative and Cultural Representations (1)

NML231H1 - Elementary Coptic II

Hours: 48S

A continuation of NML230H1.

Breadth Requirements: Creative and Cultural Representations (1)

NML240Y1 - Introduction to Middle Egyptian

Hours: 72S

This course introduces students to the hieroglyphic script and the classical form of the Ancient Egyptian language. After the basic elements of grammar are mastered, the class will begin reading simple hieroglyphic texts.

Breadth Requirements: Creative and Cultural Representations (1)

NML250Y1 - Introductory Biblical Hebrew

Hours: 24T/72S

An introduction to biblical Hebrew prose. Grammar and selected texts. For students with no previous knowledge of Hebrew.

Exclusion: Those who have completed Grade 8 Hebrew (or Grade 6 in Israel)

Breadth Requirements: Creative and Cultural Representations (1)

NML255H1 - Intermediate Modern Hebrew I

Hours: 48L

Intensive study of written and spoken Hebrew.

Prerequisite: MHB156H1/ NML156H1

Exclusion: Those who have completed Grade 8 Hebrew (or Ulpan level 2 in Israel), MHB255H1

Breadth Requirements: Creative and Cultural Representations (1)

NML256H1 - Intermediate Modern Hebrew II

Hours: 48L

Continued intensive study of written and spoken Hebrew.

Prerequisite: NML255H1/ MHB255H1

Exclusion: Those who have completed Grade 8 Hebrew (or Ulpan level 2 in Israel), MHB256H1

Breadth Requirements: Creative and Cultural Representations (1)

NML260Y1 - Introductory Persian

Hours: 72L/24T

This course is for students who have minimal or no prior knowledge of Persian focusing on reading, writing and conversation. Students start by learning how to write and pronounce the sound and alphabet, how to connect letters to form basic vocabulary in Persian in order to express basic ideas orally and in writing; then they develop their language comprehension through expanding their vocabulary and grammar. By the end of the course, students' skills in listening, speaking, reading, and writing in Persian improves and they should be able to read, write

and translate sentences in Persian at intermediate low level.

Exclusion: Native speakers, PRS210Y5, PRS210H5, PRS211H5

Breadth Requirements: Creative and Cultural Representations (1)

NML270Y1 - Introductory Turkish

Hours: 96L

This course is designed to provide an introduction to Turkish for learners with no previous experience with the language. A variety of speaking, listening, reading, and writing activities will be included to develop both spoken and written language skills. By the end of the course, students will be able to carry out basic conversations in Turkish in everyday social encounters, have a grasp of the basics of the Turkish grammar, and understand elementary texts such as simple excerpts from news articles or literary works. They will also have gained a basic understanding of the cultural contexts in which Turkish is spoken.

Exclusion: Native speakers

Breadth Requirements: Creative and Cultural Representations (1)

NML305Y1 - Introduction to Akkadian

Hours: 48S

Introduction to Old Babylonian. Grammar and the reading of selected texts.

Breadth Requirements: Creative and Cultural Representations (1)

NML310Y1 - Intermediate Standard Arabic II

Hours: 96L

This course assumes active knowledge of the content covered in NML210Y1. As the course progresses, students are introduced to increasingly complex morphological and syntactic patterns of Arabic. This is achieved through analysis of texts covering a wide range of genres. By the end of the course, students are expected to achieve advanced level of proficiency.

Prerequisite: NML210Y1 or permission of the instructor.

Exclusion: Native speakers. Priority enrollment will be given to declared NMC majors/specialists.

Breadth Requirements: Creative and Cultural Representations (1)

NML320H1 - Targum - Aramaic Bible Translations

Hours: 36S

This course is an intensive study of various Aramaic Bible translations (Targumim) to the Pentateuch: Onkelos, Pseudo-Jonathan, Neophyti, Samaritan and Syriac (both transliterated into Hebrew letters), and Fragment Targumim. A comparative study of the Targumim will be made in reference to vocabulary, syntax, verb usage, and translation strategies. We will address their relationship to the Palestinian midrashim. Students will learn to use the online Comprehensive Aramaic Lexicon and the relevant dictionaries and grammars. The texts studied will be from legal sections of the Pentateuch, generally from Deuteronomy on levirate marriage or war captives, Exodus on abortion and personal injury, as well as narrative sections from Genesis such as the Garden of Eden, the binding of Isaac, and the accounts of the Patriarchs.

Prerequisite: Intermediate-level Hebrew or experience in Babylonian Talmud or [NML220Y1](#).

Breadth Requirements: Thought, Belief and Behaviour (2)

NML340Y1 - Intermediate Middle Egyptian

Hours: 72S

A continuation of [NML240Y1](#), in which the student is exposed to a wide range of hieroglyphic texts in the Middle Egyptian dialect. Sources of historical, literary, religious, and economic significance will be studied. The grammar and syntax covered in [NML240Y1](#) are reviewed intensively.

Prerequisite: [NML240Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NML350H1 - Intermediate Biblical Hebrew I

Hours: 48S

A continuation of the study of ancient Hebrew grammar and texts. Focus is given to covering a wide variety of genres, e.g., narrative, chronicle, genealogy, oracle, prayer, hymn, and proverb.

Prerequisite: [NML250Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NML351H1 - Intermediate Biblical Hebrew II

Hours: 48S

A continuation of the study of ancient Hebrew grammar and texts. Focus is given to covering a wide variety of genres, e.g., narrative, chronicle, genealogy, oracle, prayer, hymn, and proverb.

Prerequisite: [NML350H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NML355H1 - Advanced Modern Hebrew I

Hours: 48S

Advanced intensive study of written and spoken Hebrew.

Prerequisite: [MHB256H1](#)/ [NML256H1](#)

Exclusion: OAC Hebrew, [MHB355H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NML356H1 - Advanced Modern Hebrew II

Hours: 48S

Continued advanced intensive study of written and spoken Hebrew.

Prerequisite: [NML355H1](#)/ [MHB355H1](#)

Exclusion: OAC Hebrew, [MHB356H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NML357H1 - Legends of the Jews (Aggadah)

Hours: 24S

This course is an introduction to the exegetical methods of the rabbinic sages in their analysis of biblical texts, with special attention to issues of intertextuality. After a quick overview of the genres of midrashic literature, we shall examine the midrashic methods used to transition from

the biblical text to the midrash. Our main focus will be on Original Sin in the Garden of Eden and its repercussions. Our primary texts will be *Bereishit Rabbah*, *Avot de Rabbi Natan*, and *Alphabeta de Ben Sirah*. We shall follow these midrashim in other midrash collections such as *Midrash HaGadol*, *Tanhuma*, *Bereishit Rabbati*, and *Aggadot Bereishit*. The motif of Original Sin has had significant reverberations in Judaism and Christianity and societies influenced by these traditions.

Prerequisite: Intermediate-level Hebrew (Modern or Biblical)

Breadth Requirements: Thought, Belief and Behaviour (2)

NML358H1 - Middle Hebrew: Mishnah and Tosefta

Hours: 24S

This course introduces Mishnah and Tosefta which are two of the three foundational documents of Middle Hebrew I from the Tannaitic period ending *circa* 250 CE in the Galilee. In addition to studying specific features of this level of Hebrew (e.g. syntax, grammar, vocabulary), we shall examine these compositions independently and analyze their interaction (textuality and intertextuality). Students will read recent scholarly literature on these documents and their relationship to each other and to orality. Students will be introduced to the manuscripts of these documents and the variant readings will be studied philologically. Decisions on original readings will be made. Finally, we shall explore redaction and source critical issues allowing identifications of anonymous statements with specific authorities (sages). The Tractate may vary from year to year.

Prerequisite: Intermediate Hebrew (Modern or Biblical)

Breadth Requirements: Thought, Belief and Behaviour (2)

NML359Y1 - Eastern Aramaic – Babylonian Talmud

Hours: 72S

This course introduces the student to Talmudic texts through selections from a particular tractate for representative study. We shall study the Mishnah of the chapter in preparation for the Talmud. Recognition of the dialogic structure of the legal discussions centered on the Mishnah and its elucidation is emphasized. The classical commentaries (Rashi, Tosafot, R. Hananel), the use of dictionaries, concordances, biographies of sages, parallels and other sources will gradually become familiar to the student as aids in understanding the text under consideration. A brief presentation of the essential

features of Babylonian Aramaic will be included in the course to facilitate study. Students will also be taught to make use of the Bar Ilan Responsa Project, the Lieberman database, and the Friedberg Jewish Manuscript Society database. We shall also discuss redactional issues as they appear.

Prerequisite: Intermediate-level Hebrew or experience in Babylonian Talmud

Breadth Requirements: Thought, Belief and Behaviour (2)

NML360Y1 - Intermediate Persian

Hours: 96L

This course is an intermediate/advanced level of Persian language for students who passed [NML260Y1](#) or demonstrate commensurate Persian skills. The course continues to develop students' Persian language knowledge by focusing on more complex readings, writing, grammatical structure, translation, audio/visual, and conversational activities such as group discussion, language games, movies, dialogue, and playing roles at an advanced level. By the end of this course, students are able to reach the intermediate high/advanced level of proficiency in Persian. The course also serves as preparation for courses on classical and contemporary Persian literature.

Exclusion: Native speakers, [PRS310H5](#)

Recommended Preparation: [NML260Y1](#) and/or adequate knowledge of modern Persian

Breadth Requirements: Creative and Cultural Representations (1)

NML362Y1 - Middle Persian (Pahlavi)

Hours: 48L

An introduction to the grammar and syntax of Middle Persian, or Pahlavi, language; the special script it was written in; and the connections of Pahlavi to Old Persian and New Persian languages. Knowledge of Pahlavi provides access to the most important Zoroastrian religious texts, and the epic and wisdom literature composed during the period of the Sasanian empire (3rd–7th centuries CE) and early Islamic Iran (8th–10th centuries CE). Students will read excerpts, in the original Pahlavi, from such works as *Arda Wiraz Namag* (Book of the Righteous Wiraz, describing his journey to heaven and hell), *Karnamag i Ardakhshir i Pabagan* (Chronicle of Ardakhshir, Son of Pabag, narrating the deeds of the first Sasanian king), and *Bundahishn* (Primordial Creation, on Zoroastrian cosmology).

Recommended Preparation: NML260Y1/ NML360Y1/ NMC259H1

Breadth Requirements: Creative and Cultural Representations (1)

NML370Y1 - Intermediate Turkish

Hours: 96L

This course is designed for students who have already completed NML270Y1 Introductory Turkish or have an equivalent level of proficiency in Turkish. It aims to expand students' communicative skills, grammatical knowledge, and vocabulary. A variety of intermediate-level speaking, listening, reading, and writing activities will be included to further develop both spoken and written language skills. By the end of the course, students will be able to read, understand, and translate various authentic texts of intermediate difficulty. They will be able to write short essays and talk about a wide range of general topics. They will also have gained a deeper understanding of the cultural contexts in which Turkish is spoken. The course also serves as a preparation for the advanced study of Turkish.

Prerequisite: NML270Y1 or permission of instructor based on previous language knowledge.

Exclusion: Advanced speakers of Turkish

Breadth Requirements: Creative and Cultural Representations (1)

NML371H1 - Conversational Turkish: Oral Communication in Context

Hours: 24S

This course is designed for students who wish to consolidate their communicative and conversational skills in Turkish. Emphasis is placed on improving listening and speaking skills in diverse formal and informal contexts to prepare the students for real-life oral communication situations. Students will gain experience with different styles and registers while also improving their grasp of the Turkish culture.

Prerequisite: NML270Y1 or equivalent proficiency. A placement test will be administered to assess previous language proficiency.

Exclusion: Permission of instructor required for native speakers

Breadth Requirements: Creative and Cultural Representations (1)

NML372H1 - Turkish Language through Television, Film, and Media

Hours: 24S

This dynamic Turkish language course aims to enhance students' proficiency through Turkish television series which have gained significant international popularity in recent years and through Turkish films from both classical and modern "Yeşilçam", the Turkish cinema industry. The course will also familiarize the students with the use of the Turkish language in traditional and social media. By the end of the course, students will have improved their receptive, expressive, and interactional skills in spoken and written modalities.

Prerequisite: NML270Y1

Exclusion: Native speakers

Breadth Requirements: Creative and Cultural Representations (1)

NML380H1 - Introduction to Ge'ez (Classical Ethiopic)

Hours: 36L

This course covers the essentials of Ge'ez (Classical Ethiopic) grammar, and introduces students to Ge'ez texts of elementary to intermediate difficulty.

Designed for students with no previous knowledge of Ge'ez.

Prerequisite: NML110Y1/ NML220Y1/ NML250Y1

Breadth Requirements: Creative and Cultural Representations (1)

NML381H1 - Intermediate Ge'ez

Hours: 36L

This course continues the study of Ge'ez (Classical Ethiopic) grammar and progresses to a survey of classical Ge'ez literature. Linguistic connections to Amharic and Tigrinye will also be introduced.

Prerequisite: NML380H1 or permission of instructor

Breadth Requirements: Creative and Cultural Representations (1)

NML405Y1 - Selected Standard Babylonian Texts

Hours: 48S

This intermediate Akkadian course is devoted to the study of the literary Akkadian dialect of the late second and first

millennia, usually known as Standard Babylonian. Students will read excerpts of literary texts and royal inscriptions in R. Borger's *Babylonisch-Assyrische Lesestücke* and eventually proceed to more ambitious compositions such as *The Annals of Sennacherib* and *Enuma Elish*. Students are also expected to deepen their knowledge of the NeoAssyrian cuneiform script. (Offered in alternate years)

Prerequisite: NML305Y1

Breadth Requirements: Creative and Cultural Representations (1)

NML410Y1 - Advanced Standard Arabic

Hours: 96S

This course assumes active knowledge of the content covered in NML310Y. Its goal is to strengthen the students reading and writing skills, refine their knowledge of syntax and morphological patterns, and enrich their cultural background. This is achieved through analysis of sophisticated authentic texts covering a wide range of genres. In addition, Classical Arabic literary texts will be incrementally introduced. By the end of the course, students are expected to reach a superior level of proficiency.

Prerequisite: NML310Y1 or permission of instructor.

Exclusion: Native speakers.

Breadth Requirements: Creative and Cultural Representations (1)

NML411H1 - Media Arabic

Hours: 24S

This course familiarizes advanced students of Arabic with structural properties, styles, and discourse features of the language used in the Arabic media. Class time is devoted to analysis of authentic texts covering a wide range of topics and drawn from various online media outlets.

Prerequisite: NML310Y1 or adequate reading knowledge of Arabic.

Exclusion: Native speakers of Arabic must obtain permission of instructor.

Breadth Requirements: Creative and Cultural Representations (1)

NML415H1 - The Arabic Short Story

Hours: 24S

This course examines the origins and development of the modern Arabic short story as a literary genre by reading selected works in Arabic of major figures in the genre. The course historicizes the emergence of the short story, exploring the genre's consolidation as a major literary form in Arabic in the early 20th century. As part of an exploration of modern narrative in Arabic, students will read literary criticism that theorizes the emergence of modern Arabic narrative prose, paying close attention to questions of language, form, style and theme. The course also focuses on issues such as innovations in narrative technique, plot structure, complexity of characterization, and point of view. Authors include Mahmud Tahir Lashin, Yusif Idris, Zakariyya Tamir, Ghada al-Samman, Hanan al-Shaykh, and Fu'ad al-Takarli.

Prerequisite: NML310Y1 or permission of instructor.

Breadth Requirements: Creative and Cultural Representations (1)

NML420Y1 - Western Aramaic – Jerusalem Talmud

Hours: 72S

The Talmud of the Land of Israel, also called Talmud Yerushalmi or Palestinian Talmud, is written in a mixture of Jewish Western Aramaic and Middle Hebrew. It is the principal document of the Land of Israel in Late Antiquity. The course examines the legal argumentation, terminology and language which differ from those of the Babylonian Talmud. Recognition of the dialogical structure of the legal discussions concerning the Mishnah and its elucidation will be emphasized. Terminology, grammar, and syntax of Western Aramaic will be addressed. We shall also investigate when the text uses Hebrew versus Aramaic. Students will be taught the use of the Bar Ilan Responsa Project and the Lieberman bibliographic database. Close attention will be paid to its relationship to Tosefta.

Prerequisite: Intermediate-level Hebrew (Modern or Biblical)

Recommended Preparation: NML220Y1/ NML320H1

Breadth Requirements: Creative and Cultural Representations (1), Thought, Belief and Behaviour (2)

NML421Y1 - Classical Syriac

Hours: 48S

This course is primarily a reading course in Syriac literature with reference to specific points in grammar and syntax as contrasted with Aramaic. The texts are read with reference to the history of Syriac literature.

Prerequisite: [NML220Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NML440H1 - Ancient Egyptian Historical Texts

Hours: 36S

This is an advanced language seminar that introduces the student to the analysis, in terms of both language/grammar and content, of Ancient Egyptian texts of historical significance. Texts from the periods of the Old Kingdom up to the Late Period will be studied, and all texts will be read in the (mostly Middle Egyptian) original. Particular attention will be paid to the cultural and social context of the texts, and questions such as how to best define "historical texts," and to what extent literary texts may be used as historical sources, will be discussed.

Prerequisite: [NML340Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NML441H1 - Ancient Egyptian Religious and Funerary Texts

Hours: 36S

This is an advanced language seminar that introduces the student to the analysis, in terms of both language/grammar and content, of texts that elucidate ancient Egyptian religious conceptions. Texts from all periods of Pharaonic history will be studied and all texts will be read in the original. While the focus will be on texts from funerary contexts, for which the most complete sources can be found, cultic, magical, and theological sources will also be studied.

Prerequisite: [NML340Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NML442Y1 - Late Egyptian Texts

Hours: 72S

The course introduces students to the Late Egyptian dialect attested from the New Kingdom and spanning the period from ca. 1300 to 700 BCE. Students will be introduced to grammar, syntax, and orthography through readings of original texts; these will include stories, letters, business documents, and formal inscriptions. Standard grammars and dictionaries are supplemented by the instructor's notes and handouts. Students will also be

provided a basic introduction to the hieratic script through contemporary manuscripts.

Prerequisite: [NML240Y1](#)

Corequisite: [NML340Y1](#)

Recommended Preparation: [NML440H1](#), [NML441H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NML443H1 - Demotic I

Hours: 24L/24S

Demotic refers to both a stage of the ancient Egyptian language and the associated cursive script, which was in use for over a millennium (from the 7th century BCE to the 5th century CE). Various types of texts were written in Demotic, ranging from epic tales, scientific treatises, and religious texts to court documents, letters, and tax receipts. This course aims to introduce students to Demotic grammar and script. A small selection of original texts will be read once the grammar review is completed.

Prerequisite: [NML340Y1](#) or [NML442Y1](#)

Recommended Preparation: [NML230H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NML444H1 - Demotic II

Hours: 36S

The course aims at improving reading proficiency in Demotic by studying a wide array of different text genres in original, including literary, para-literary, religious and documentary texts written in early, middle, and late Demotic. This will familiarize students with the grammatical, paleographical, and orthographical developments of the language.

Prerequisite: [NML443H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NML450H1 - Advanced Biblical Hebrew

Hours: 24S

Continuation of the study of Biblical Hebrew language. Combination of reading more advanced texts and Hebrew composition exercises. Introduction to the standard reference works for advanced study of the phonology, morphology, syntax, and semantics of Biblical Hebrew.

Prerequisite: NML350H1 or NML351H1

Breadth Requirements: Creative and Cultural Representations (1)

NML452H1 - Halakhic Midrashim

Hours: 36S

Halakhic Midrash, the rabbinic continuation of biblical law, is written in Middle Hebrew I and is one of the three major literary creations of the Tannaitic period. It is an important part of ancient Jewish biblical interpretation which often differs from sectarian interpretation as found in Qumran. A study of the terminology and methodology indicates the existence of two midrashic systems: Devei R. Akiba and Devei R. Ishmael. This course familiarizes students with the methodology and terminology of these two midrashic schools. We will examine the scholarly debate concerning the exact time in which the halakhic midrashim were composed and redacted as well as the transfer of terminology and material between the schools. Sections from all the midrash halakhah (*Mekhiltot*, *Sifra* and *Sifre*) are studied and compared to other tannaitic materials.

Prerequisite: Intermediate-level Hebrew (Modern or Biblical)

Breadth Requirements: Thought, Belief and Behaviour (2)

NML455H1 - Modern Hebrew Poetry

Hours: 24S

This course is designed for the advanced students of Modern Hebrew who wish to pursue the study of Hebrew literature. We will examine the way in which this literature relates to ideas of land, homeland, peoplehood, and religious identities. We will continue with Yehuda Amichai's poetry with particular attention to his love poetry. Our major concentration will be on Haim Nahman Bialik's poetry and include at least one of his major epic poems. We shall focus on what makes Amichai and Bialik national poets. Our method of poetic analysis will include an inter-textual examination of the sources of poetic inspiration. Students will be taught to use the Bar Ilan Responsa Project as an aid to tracking allusions. We will also use historical Hebrew dictionaries.

Prerequisite: High Intermediate-level Modern Hebrew

Breadth Requirements: Creative and Cultural Representations (1)

NML456H1 - Modern Hebrew Prose

Hours: 24S

This course is designed to introduce advanced students of Modern Hebrew to modern prose written primarily in today's state of Israel. To this end we will spend two weeks looking at the motifs and styles available in contemporary children's literature with an eye to their use of biblical allusions. This serves as background to a study of short stories by the Nobel laureate Agnon. The sources of the stories will be studied from the perspective of intertextuality where the source is both inspirational and in turn explicated by the novelist. The use of online search engines and databases will facilitate this analysis. The course teaches advanced reading skills in prose literature in Hebrew with emphasis on interpreting the texts, close readings, and tracking allusions. Use will be made of historical Hebrew dictionaries.

Prerequisite: High Intermediate-level Modern Hebrew

Recommended Preparation: NML225H1, NML256H1

Breadth Requirements: Creative and Cultural Representations (1)

NML459H1 - Readings in Second Temple Period Texts

Hours: 24S

This course provides an advanced investigation of selected issues in ancient Jewish texts stemming from the Second Temple Period (5th cent. BCE 1st cent. CE), and includes comparative study of biblical writings, apocrypha and pseudepigrapha, the Dead Sea Scrolls, and writings of ancient Jewish historians and philosophers. The specific topic for the course varies from one semester to another. The course has a strong research and writing component.

Prerequisite: NML350H1 or NML351H1. Depending on the specific topic of the semester, knowledge of Greek or Aramaic may be recommended.

Recommended Preparation: NMC252H1, NMC351H1

Breadth Requirements: Thought, Belief and Behaviour (2)

NML460H1 - Advanced Persian I

Hours: 36S

This course is designed for students who have already completed NML360Y1 Intermediate Persian or have an equivalent level of proficiency in Persian. This course aims to develop students' abilities at an advanced level, with a focus on complex reading materials including historical, socio-political, media and journalistic texts. Students will improve their reading comprehension, strengthen writing skills, and advance speaking and listening skills through class discussions and oral presentations.

Prerequisite: NML360Y1. Students who have an equivalent level of proficiency should contact the instructor concerning enrolling in the course.

Exclusion: Native Speakers

Breadth Requirements: Creative and Cultural Representations (1)

NML461H1 - Modern Persian Poetry

Hours: 36S

This course examines Persian literature, mainly modern Persian poetry from the 19th to the 21st centuries, focusing on linguistics and literary approaches in contemporary poetry. The course includes a brief overview of different factors which shaped modern Persian poetry, then concentrates on the works of well-known modern poets who had great influence on establishing and developing Persian contemporary poets such as Nima Yushij, Ahmad Shamlu, Mehdi Akhavan Sales, Sohrab Sepehri, Forugh Farrokhzad, Hushang Ebtehaj, Simin Behbahani, and Mohammad Reza Shafi'i-Kadkani. After presenting a short biography and the works of each poet, students read selected poems of each poet and discuss the structure, poetic styles, figures of speech, themes and motifs in the poems. (Conducted in Persian)

Prerequisite: NML360Y1 or permission of instructor.

Breadth Requirements: Creative and Cultural Representations (1)

NML462H1 - Modern Persian Prose

Hours: 36S

This course examines contemporary Persian prose, focusing on fiction, especially the novel and short story. After an overview of different genres of prose writing, the main elements of a story, such as plot, scene, character, theme, topic, point of view, and conflict, are discussed. The literary knowledge and abilities of students will be developed by analyzing different genres of prose writing, especially Persian short stories. At the end of this course students will be able to examine and analyze any form of story-writing and compose their own short stories. (Conducted in Persian.)

Prerequisite: NML360Y1 or permission of instructor.

Breadth Requirements: Creative and Cultural Representations (1)

NML463H1 - Advanced Persian II

Hours: 36S

This course is designed for students who have already completed NML460H1 Advance Persian I or have an equivalent level of proficiency in Persian. Its goal is to strengthen the students reading and writing skills and enrich their cultural and literary background. This is achieved through analysis of sophisticated authentic literary texts covering a wide range of literary genres.

Prerequisite: NML460H1. Students who have an equivalent level of proficiency should contact the instructor concerning enrolling in the course.

Exclusion: Native Speakers

Breadth Requirements: Creative and Cultural Representations (1)

NML464H1 - Old Persian

Previous Course Number: NML464Y1

Hours: 24L/24S

This course will survey the language, main epigraphical texts, historical context, and political ideology of the Old Persian inscriptions of the Achaemenid Empire (550–330 BCE). The Old Persian version of the famous inscriptions of Darius I in Bisotun will be read in the original, cuneiform script, linguistically analyzed, commented, and translated into English. By this training, students will be able to comfortably read the entire inscriptional corpus in Old Persian. By the end of the year, they will have acquired a strong understanding of the simplified Old Persian cuneiform script, the main phonological, morphological and syntactical features of the Old Persian language, and its connections with the Middle and modern Persian languages.

Prerequisite: 14.0 credits. Students who do not meet the prerequisites are encouraged to contact the department

Exclusion: NML464Y1

Recommended Preparation: NMC259H1F, NML362Y1, NML465Y1

Breadth Requirements: Creative and Cultural Representations (1)

NML465Y1 - Avestan

Hours: 48L

This course surveys the grammar and syntax of the language of the Young Avestan corpus, belonging to the Old Iranian linguistic group. The *Avesta* was a compendium of Zoroastrian texts composed orally in northern Iran and Central Asia in two dialects spoken in different periods: Old Avestan (2nd millennium BCE) and Young Avestan (1st millennium BCE). Most foundational texts of Zoroastrianism were composed in Young Avestan language, which attests a more simplified grammar than Old Avestan and in this regard is closer to Old Persian. Knowledge of Young Avestan provides access to the

mythical and ritual context of pre-Islamic Iran and Central Asia. Students will be introduced to the main phonological, morphological, and syntactical features of the Young Avestan language; its script; its most important texts; and its connections with Old Persian and Middle Persian, or Pahlavi.

Recommended Preparation: [NML260Y1](#)/ [NML360Y1](#)/ [NML464Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NML466H1 - Theory and Practice of Translation from and into Persian

Hours: 24S

An introduction to theories and techniques involved in English/Persian translation, focusing on translation practice and theoretical discussions on linguistic, cognitive, socio-political, and cultural aspects of translation. Through analysis and application of translation theory, students practice the art of translation and develop awareness of issues that translators face.

Prerequisite: [NML360Y1](#) or permission of instructor based on previous language knowledge.

Breadth Requirements: Creative and Cultural Representations (1)

NML467H1 - Persian Literature: The Epic Tradition

Previous Course Number: NML460Y1

Hours: 36S

Selected representative readings from the iconic masterpieces of classical heroic and romantic epic poetry, including the Persian national epic, *Shahnameh*, or Book of Kings; the magisterial ode of Khaqani on the ruins of a Sasanian palace; and tales from the *Khamseh*, or Quintet, of Nezami about the star-crossed lovers Laili and Majnun and the world-conqueror Iskandar, or Alexander the Great. Emphasis is on close reading and analysis of the linguistic and literary content and style of these works, and discussion of their historical and cultural backgrounds. All readings are in the original Persian. During the course, students will acquire essential skills in the technical requirements of classical Persian poetry, such as prosody, rhyme, and poetic devices.

Prerequisite: [NML360Y1](#) or adequate knowledge of Persian

Exclusion: [NML460Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NML468H1 - Persian Literature: Ethical, Erotic, and Mystical

Previous Course Number: NML460Y1

Hours: 36S

The companion course to [NML467H1](#) (Persian Literature: The Epic Tradition). Selected representative readings from the ethical works of Sa'di (*Bustan* and *Gulistan*); the mystical parable *Mantiq al-tayr* of 'Attar and the *Masnavi-ma'navi* of Rumi; and the *ghazals*, or mystico-erotic lyrical poems, of Rumi and Hafiz. Emphasis is on close reading and analysis of the linguistic and literary content and style of these works, and discussion of their historical, cultural, and religious backgrounds. All readings are in the original Persian. During the course, students will acquire essential skills related to the technical requirements of classical Persian poetry, such as prosody, rhyme, and poetic devices, as well as an understanding of the key concepts and terminology of Persian Sufism.

Prerequisite: [NML360Y1](#) or adequate knowledge of Persian

Exclusion: [NML460Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

NML470Y1 - Advanced Turkish

Hours: 96L

This course is designed for students who have already completed [NML370Y1](#) Intermediate Turkish or have an equivalent level of proficiency in Turkish. It aims to build upon the existing competence of the students in Turkish and to further improve their four skills through a variety of advanced speaking, listening, reading, and writing activities. By the end of this comprehensive course, students will be able to read, understand and translate various authentic texts of different genres such as literary works. They will be able to write essays on a wide range of topics. They will demonstrate the ability to express themselves both orally and in writing through complex grammatical structures and a rich vocabulary. They will also have gained thorough understanding of the social and cultural contexts in which Turkish is spoken. The course will enable students to pursue independent studies in Turkish.

Prerequisite: [NML370Y1](#) or permission of instructor based on previous language knowledge.

Breadth Requirements: Creative and Cultural Representations (1)

NML471H1 - Selected Readings in Turkish Literature

Hours: 24S

This course focuses on the analysis of representative examples of both poetry and prose from various periods of Turkish literature. Students will gain familiarity with different literary genres, themes, and traditions. Focusing on major works, the course will enhance students' understanding of the cultural context in which the literature was produced. It will also help students further enrich their vocabulary and improve their grasp of grammatical phenomena.

Prerequisite: NML370Y1 or adequate knowledge of Turkish (Native speakers are allowed to take this course).

Exclusion: NML490H1 (Topics in Near and Middle

Eastern Languages: Readings From Modern Turkish Literature and Media), offered in Fall 2021

Breadth Requirements: Creative and Cultural Representations (1)

NML490H1 - Topics in Near and Middle Eastern Languages

Hours: 36S

An advanced language seminar organized around grammatical issues or texts selected by the instructor.

Prerequisite: Permission of the Instructor

Breadth Requirements: Creative and Cultural Representations (1)

R. Buiani, PhD (New One)

M. Levin, BA, MSc, PhD (New College/African Studies Centre)

C. Ramsaroop, BA (Hons), MEd (Critical Studies in Equity and Solidarity/New One)

E. Weisbaum, BFA, MES, PhD (Buddhism, Psychology and Mental Health)

Introduction

New College courses have in common a commitment to socially engaged learning and to explorative and inventive pedagogy that widens students' experience by critically examining relationships among academic disciplines. We offer two degree programs: Buddhism, Psychology and Mental Health; and Critical Studies in Equity and Solidarity. These programs are open to all students in the Faculty of Arts and Science.

We also offer interdisciplinary courses that can enhance any degree program. Integration of student experience is a major priority in a college with students from all faculties

in the University. The Independent Studies courses provide an opportunity for students to design their own programs and to test their research, analytic, synthetic, and creative skills by writing a major research paper. The Community Engaged Learning program supports course-based service learning and independent community engaged learning opportunities. These allow students to integrate their theoretical knowledge with practical experience, while engaging in meaningful work in campus and community organizations.

New College, Room 107 (416-978-2460)

New One: Learning Without Borders

New One provides first year students with a comprehensive foundation for successful undergraduate study. It encourages active, engaged learning and creative forms of inquiry, and supports students in developing their research, writing and oral communication abilities. In New One, students develop skills in research and knowledge presentation, showcasing their projects at our Knowledge Fair.

New One offers up to ten interdisciplinary small-class seminars annually. Students join the program by simply registering in one of our courses, whether in the Fall or Winter term. The courses explore themes that connect to our daily lives such as the food we eat, the languages we speak, the technology we use, the art that we create and surrounds us, and the science that impacts our lives. We encourage students to take a course in both the Fall and Winter terms for a more complete experience.

New One gives students the tools to think deeply, critically, and creatively and to see the ways our lives are connected "beyond borders." Inspired by the social advocacy focus of New College's academic programs, the program grapples with the core question: how do we imagine responsible global citizenship and build a more equitable and just society?

New One courses meet for 3 hours each week. The first two hours are usually dedicated to course content, while the third hour is allocated to "Learning Labs." All students come together in these Learning Labs to engage in joint activities and explore issues that are common to the themes of the courses. Both in seminars and Learning Labs, students will experience a variety of ways of learning (through, for example, guest lectures, group

work, workshops, field trips to local community organizations, and panels of senior students sharing their experience and insights).

New One does not require a specific application. All first-year students in the Faculty of Arts and Science on the St. George campus are eligible to register in our courses. Students, however, can only take courses in one College One program in the same term. For more information about the program, go to <http://uoft.me/NewOne> or contact new.one@utoronto.ca.

The Buddhism, Psychology and Mental Health Program

(Minor) The Buddhism, Psychology and Mental Health (BPMH) Program is an interdisciplinary undergraduate Minor that allows students to choose from a wide range of courses in Buddhist Studies, cognitive science, medical anthropology, psychology of religion, health psychology, and sociological analyses of physical and mental health. With this training, students acquire an understanding of how Buddhist traditions have interacted with and contributed to global and diverse understandings of consciousness, mental health and distress, and determinants of health. Students study global and diverse models of mental health and well-being through a self-reflective, meta-cognitive, and phenomenological study of Buddhism and health in contexts of relational, intersectional, and global interconnections.

For general enquiries, call 416-978-2667 or email nc.undergradadmin@utoronto.ca.

Critical Studies in Equity and Solidarity

(Major, Minor) Critical Studies in Equity and Solidarity (CSES) is an interdisciplinary program that explores how social relations and practices of power and privilege are (re)produced locally and transnationally. In CSES we question the dominant conceptualization of equity by the state, educational programs, the non-profit sectors and community organizations as individualized and de-historicized social differences. CSES is a hub of critical disability studies teaching and learning. The program provides students with theoretical and practical tools to study social, political, economic and historical injustices. CSES takes a unique approach to undergraduate education that values student experiential learning and community knowledge. The learning goal of CSES is to provide frameworks on theories of transformative social change rooted in political activism and formations of solidarity. The program encourages students to apply theory in action through organizing and practicing solidarity in making a more just world. CSES creates a dynamic learning environment that extends far beyond the university walls. With a vibrant student body, dynamic faculty members, connection with a wide range of community partners and a bold curriculum, CSES at New College is a leader in studies of social justice, settler

colonialism, race, gender, sexuality, disability, land/water and sustainability, activism, solidarity and the art of resistance, and global food equity and security.

For general enquiries, call 416-978-2667 or email nc.undergradadmin@utoronto.ca.

Community Engaged Learning (CEL)

New College offers several community engaged courses. These provide students the opportunity to integrate academic, experiential and practice-based learning as they participate in meaningful work in community or campus organizations.

Two forms of community engaged learning courses are offered: embedded and independent. In the former, a community service component is either a mandatory or optional component of the course syllabus. (Examples of such courses are [CSE342H1](#) and [BPM232H1](#)). In the *independent* community engaged learning courses, upper level students, with various academic backgrounds, are placed with a social purpose community or campus-based organization for several hours per week, contributing to the mission of that organization in program support work or research. Through seminar discussions and critical reflection on their experiences, students learn how to mobilize their academic knowledge, deepen their appreciation of community engagement and social justice, explore social and ethical issues, and build professional dispositions and work-place skills relevant to the social sector.

Information about CEL can be found at <https://www.newcollege.utoronto.ca/programs/cel/>.

Enquiries: nc.engagedlearning@utoronto.ca.

Independent Studies

New College Independent Study courses are designed both to complement regular offerings in New College Programs and to provide an opportunity for New College students in any program to enrich their studies. The normal expectation of a project course is that the student, aided and advised by their supervisor, will read relevant literature, and plan, analyze and report on an original and independent investigation of an appropriate topic. Written applications, including a detailed proposal, should be made through the Programs Office for approval by the Vice Principal of New College or a designate by April 15 for the Summer Session; by July 15 for the Fall Term; or by November 15 for the Winter Term. Should the deadline fall on a weekend, applications will be accepted until the following Monday. Students will be notified of the acceptance or rejection of an application. If the project requires ethics approval, please be advised that you should find and consult with a supervisor about meeting this requirement at least a semester in advance of these deadlines. For more information and application forms,

please see the Independent Studies website: <https://www.newcollege.utoronto.ca/independent-studies/>.

Enquiries: New College Program Administrator - Wetmore Hall, room 122; nc.undergradadmin@utoronto.ca or 416-978-2667.

Interdisciplinary Courses on Jungian Theory

This suite of courses offers students opportunities for sustained, interdisciplinary engagement with the thought of Carl Jung. Courses invite students to consider Jung's thought and practice in relation to a range of disciplinary and cultural issues in order to open up conversations about models of consciousness and mind.

Enquiries: New College Program Administrator - Wetmore Hall, room 122; nc.undergradadmin@utoronto.ca or 416-978-2667.

International Foundation Program

This program is designed for international students who need to meet the University's English language requirement. The program is offered to students in the Faculties of Arts and Science, Music, and the Daniels Faculty of Architecture, Landscape and Design. The program consists of five courses that are designed to develop students' language and critical skills through the modalities of reading, writing, listening, and speaking as well as develop students' academic literacy in a course related to their admitted program of study. The program approaches language development from a social perspective and language learning is situated within authentic academic contexts. Students learn to master foundational academic skills such as research and digital literacy, time management, exam, and study skills. Students take a history course, *Themes in World History*, which applies critical skills that have been scaffolded in the language courses (e.g., paraphrasing, summarizing, citing sources, etc.). In the history course, students learn how to understand the relationship of human beings and their environment, cross-cultural and gender relations, and how global patterns affect local developments making students better able to assess the historical context of challenges society faces today.

Core courses include one first-year history credit course ([IFP100Y1](#)), three non-credit language courses and one non-credit discipline-specific course. Courses are open only to students admitted to the program. For program and admission information, please see <https://internationalprograms.utoronto.ca>.

The African Studies Program

(Specialist, Major, Minor) provides students unique opportunities to study the complexity and dynamism of African societies, the dynamics processes of socio-economic, cultural, environmental, and political transformations in Africa, the varied histories, ideas and institutions of Africa and its diasporas through interdisciplinary and transdisciplinary lenses. It fosters a vibrant intellectual, social and cultural hub of academic excellence with a shared ethos and commitment to public scholarship, social justice, global citizenship, engaged scholarship and a praxis of inclusivity, epistemic diversity, and reflexive community engagement.

The administration of the existing undergraduate programs and courses in African Studies moved from New College to the new African Studies Centre on July 1, 2023. See the [African Studies](#) section of the Calendar for a complete listing of programs and courses.

The Caribbean Studies Program

(Specialist, Major, Minor) offers a combined interdisciplinary and area studies approach to examining a wide range of issues including gender, religion, culture, ethnicity, race, development, language, colonialism, the environment and regional common markets.

The administration of the existing undergraduate programs and courses in Caribbean Studies moved from New College to the new Centre for Caribbean Studies on July 1, 2022. See the [Caribbean Studies](#) section of the Calendar for a complete listing of programs and courses.

The Women and Gender Studies Program

(Specialist, Major, Minor) provides an interdisciplinary and culturally inclusive approach to understanding gender (see the [Women and Gender Studies](#) section of the Calendar.)

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The New College programs impacted by this policy: [ASMAJ1141](#) and [ASMIN1141](#)

New College Programs

Buddhism, Psychology and Mental Health Minor (Arts Program) - ASMIN1017

Enrolment Requirements:

Enrolment in the Buddhism, Psychology and Mental Health Minor was administratively suspended as of January 31, 2024 and students are no longer able to enrol in the program. Students presently enrolled in the Minor will be able to complete the program requirements as described below. Students who are not enrolled in this Minor but are interested in related disciplines are strongly recommended to consult the Anthropology, Cognitive Science (University College), Psychology, and Religion sections of the Academic Calendar for program options.

Completion Requirements:

Consult Program Administrator:
nc.undergradadmin@utoronto.ca or 416-978-2667.

(4.0 credits, including 1.0 credit at the 300+ level)

First Year:

No specific first-year courses required.

Higher Years:

1. BPM232H1

2. 2.0 credits from the Core Group: BPM100H1, BPM214H1, BPM330H1, BPM332H1, BPM333H1, BPM334H1, BPM335H1, BPM336H1, BPM337H1, BPM338H1, BPM339H1, BPM381H1, BPM430H1, BPM432H1, BPM433H1, BPM438H1, BPM499H1, JNR301H1

3. 1.5 credits from Group A

Group A:

Critical Studies in Equity and Solidarity Minor (Arts Program) - ASMIN1141

Critical Studies in Equity and Solidarity (CSES) is an interdisciplinary program that explores how social relations and practices of power and privilege are (re)produced locally and transnationally. In CSES we question the dominant conceptualization of *equity* by the state, educational programs, the non-profit sectors and community organizations as individualized and de-historicized social differences. CSES is a hub of critical disability studies teaching and learning. The program provides students with theoretical and practical tools to study social, political, economic and historical injustices. CSES takes a unique approach to undergraduate education that values student experiential learning and community knowledge. The learning goal of CSES is to provide frameworks on theories of transformative social change rooted in political activism and formations of solidarity. The program encourages students to apply theory in action through organizing and practicing solidarity in making a more just world. Equity Studies creates a dynamic learning environment that extends far beyond the university walls. With a vibrant student body, dynamic faculty members, connection with a wide range of community partners and a bold curriculum, CSES at New College is a leader in studies of social justice, settler colonialism, race, gender, sexuality, disability, land/water and sustainability, activism, solidarity and the art of resistance, and global food equity and security.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Consult Program Administrator:
nc.undergradadmin@utoronto.ca or 416-978-2667.

(4.0 credits, including at least 1.0 credit at the 300+ level)

First Year:

No specific first-year courses required.

Higher Years:

1. CSE240H1
2. 1.0 credit in any area from the Core Group: JNS450H1, CAR315H1, CSE241Y1, CSE270H1, CSE340H1, CSE341H1, CSE342H1, CSE344H1, CSE344Y1, CSE345H1, CSE346H1, CSE347H1, CSE348H1, CSE349H1, CSE439H1, CSE440Y1, CSE441H1, CSE442H1, CSE443H1, CSE444H1, CSE445H1, CSE446H1, CSE447H1, CSE448H1, CSE449H1, CSE469Y1, CSE499H1
3. 1.5 additional credits in any area from the Core Group, or 1.5 credits from Groups A, B, C, D
4. An additional 1.0 credit from Groups A, B, C, D

Group A: Gender

Breadth Requirements: Society and its Institutions (3)

New College Courses

New College First-Year Foundations

NEW197H1 - Public Intellectual Activism: Theory and Practice

Hours: 24S

Explores the role of the public intellectual in modern and contemporary societies from a theoretical and practical lens. Specifically, investigates the interventions of this capital actor of the social fabric in specific historical junctures of the 20th century and the new millennium with the idea of informing a hands-on approach to participation in civil society debates. Students will be encouraged to examine how “marginalized communities” intervene in the public sphere to effect social change. Term work will include the writing and publishing of an op-ed article, blog, social media posts and a podcast interview. Restricted to first-year students. Not eligible for CR/NCR option.

NEW198H1 - Myths of French Sensuality

Hours: 24S

A study of French cultural history with respect to the French reputation for the indulgence and refinement of all the senses in visual arts, music, cuisine, perfume and fashion. Supporting mythologies are investigated, along with stereotype formation, exoticism and cultural appropriation. Through various research, writing and presentation techniques, including mini-essays, poster displays and pecha kucha, students will explore what is left of this reputation in an era of globalization. No knowledge of French is necessary. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

NEW199H1 - We Are What We Eat: The Example of French Cuisine

Hours: 24S

The historical study of French cuisine reveals a culture rich in controversy and conflicting narratives. These include contested origins, court intrigues, sensual delight, revolutions, colonialism and slavery, controversial farm practices, haute cuisine, cuisine bourgeoise, regionalism, European regulation. Through various research, writing and presentation techniques, including mini-essays, wikis and pecha kucha, students will explore what is left of French food culture in an era of globalization. No knowledge of French is necessary. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

New One: Learning Without Borders

NEW101H1 - The Everyday Politics of Food

Hours: 12L/24S

How often do we reflect on the environmental, social and economic impact of our everyday food choices? This course offers an introduction to the key concepts, terms and theories that underlie our current food system. The course links the food we eat to global forces and considers how these forces affect food distribution, access and consumption. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW102H1 - Exploring Multilingual Toronto

Hours: 12L/24S

How does language connect and divide people, places and communities? This course considers how interactions between people in Toronto are shaped by language as well as history, economy, architecture and urban landscapes. Students engage with the city both in and out of class to think about a range of questions linked to gender and sexuality, indigeneity, migration, race, ethnicity, and public/private space. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW103H1 - Digital Technology and Society

Hours: 12L/24S

While the internet and other forms of digital technology have created new forms of social relationships and widened access to information, they have also raised concerns. This course explores issues such as surveillance, addiction and bullying as well as the potential of digital technologies (e.g. smart cities, Big Data, and the internet of things). The course engages students' own experience of digital technology. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW104H1 - Creating Community: Art, Identity and Belonging

Hours: 12L/24S

How is art implicated in the process of community building? How does art foster a sense of community identity and belonging? This course explores how communities, in Toronto and beyond, engage a variety of art forms including graffiti, spoken-word, hip-hop, digital art, traditional dance and music to connect people and express community identity. Students will have the opportunity to visit community arts projects. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

NEW105H1 - Current Issues Without Borders

Hours: 12L/24S

This interdisciplinary course addresses a current issue that exemplifies the themes of "Learning Without Borders" in New One. It investigates how this issue is implicated in connecting us with others around the globe; it engages different kinds of knowledge and community perspectives; and integrates students' own experience as related to the issue. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW106H1 - Science, Health and Social Justice

Hours: 12L/24S

How can scientific knowledge and research be mobilized to impact individual and global health? How is health impacted by social, racial and economic inequalities? This course explores scientific research and practice with special attention to the translation of scientific knowledge in the public sphere, and its ability to inform policies, practices and laws. Students have the opportunity to meet with clinician-scientists, policy-makers, and other professionals connected to the health care system. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW111H1 - Food, Ethics and Sustainability

Hours: 12L/24S

How do we produce and ensure access to nutritious and environmentally sustainable food for all? This course explores what is involved in achieving ethical food production and food security, examining topics such as: the paradox of food waste amidst scarcity, the relationship between food production and climate change, community-led alternatives to dominant food systems, and the role of biotechnology. Research projects allow students to focus on an issue of particular interest. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW112H1 - Language Freedom and Power

Hours: 12L/24S

How do we imagine a balance between the need for communication, freedom of expression, and protection for marginalized groups? This course considers how language shapes and is shaped by the relations of power not only in such sites as colonies, nations and institutions, but also in popular culture and how we communicate online. It explores the key role of language in activism and youth cultures and allows students to focus on an issue of particular interest. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW113H1 - Unpacking Digital Technology

Hours: 12L/24S

What are the social and material implications of the digital technologies we use every day - for the present and for the future? This course explores how digital technologies have been remaking the world and affecting our lives by tracing their historical development, their social effects, and the impact of their physical presence. It also peers into scenarios of the future in this digital world. Students engage in research on a topic of their own interest. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW114H1 - Art for Social Change

Hours: 12L/24S

How does art contribute to social change? Artistic productions can draw attention to social problems, mobilize support for and symbolize social movements, and inspire new visions for imagined futures. This course will explore case studies of the role of various art forms in relation to past and current social change initiatives. Students will have the opportunity to engage in research on an art project of their choice. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

NEW115H1 - Current Issues Without Borders

Hours: 12L/24S

Explores the social and ethical implications of a current issue exemplifying the themes of "Learning Without Borders." Also considers examples of policy and community organizing responses. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

NEW116H1 - Science and Global Threats

Hours: 12L/24S

What is the role of science in addressing current global threats? What are the possibilities and the limitations of scientific research and knowledge in tackling complex problems such as climate change, pandemics and pollution? In this course, students explore these questions by examining case studies, meeting with specialists in various scientific fields, and engaging in research on a topic of their own choice. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

Buddhism, Psychology and Mental Health Courses

BPM100H1 - The Art & Science of Human Flourishing

Hours: 12L/12P

A multi-cultural survey of recipes for a life of “flourishing,” through satisfaction, well-being, resilience, and accomplishment, as well as critical scholarship on concepts and practices of human flourishing. Students explore perspectives from the sciences and the humanities about what it means to flourish across diverse cultures and contexts, each week covering a specific theme and set of practices that expand self-awareness, enhance social connectivity, and facilitate purpose and passion.

Breadth Requirements: Thought, Belief and Behaviour (2)

BPM214H1 - Socially Engaged Buddhism

Previous Course Number: NEW214H1
Hours: 24L

Explores how Socially Engaged Buddhism has developed in response to global conversations on systemic oppression, climate justice, equity, decolonization, and trauma. We examine the roots of Engaged Buddhism in countries such as Vietnam, China & Taiwan, Sri Lanka, Thailand, and India, and its transformation into a global movement. Themes include Buddhist environmental activism, and Buddhist protest movements, along with research on the application of Buddhist teachings in healthcare, education, business, and the criminal justice system.

Exclusion: NEW214H1, NEW214Y1

Breadth Requirements: Society and its Institutions (3)

BPM232H1 - Buddhism and Psychology

Previous Course Number: NEW232H1, NEW232Y1
Hours: 36L

An overview of the encounter between Buddhism and psychology over the last century, with cross-disciplinary study of topics such as self, embodiment, impermanence, suffering, liberation, and insight. We explore how (and why) scientists, psychologists, and Buddhist reformers have reinterpreted Buddhism as “science” and how Buddhist contemplative practices such as mindfulness or compassion training have been transformed and promoted by modern psychology.

Exclusion: NEW232H1, NEW232Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

JNR301H1 - The History of Buddhist Meditation

Hours: 36L

This course will survey historical, cultural, and textual contexts for Buddhist meditative and contemplative practices and techniques.

Prerequisite: RLG206H1/ NEW232Y1/ BPM232H1

Breadth Requirements: Thought, Belief and Behaviour (2)

BPM330H1 - Mindfulness-Informed Interventions for Mental Health

Previous Course Number: NEW330H1
Hours: 36L

An exploration of how mindfulness-based approaches are being used in biomedical mental health interventions. We study mindfulness from historical, societal, structural, cultural, professional, and personal perspectives, with an emphasis on its Buddhist foundations and on concepts of the embodied mind. We look at how recent socio-political phenomena are inspiring diverse applications and adaptations of mindfulness-based interventions.

Prerequisite: Completion of 9.0 credits

Exclusion: NEW330H1

Recommended Preparation: BPM232H1/ NEW232H1/ NEW232Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

BPM332H1 - Buddhism and Psychotherapy

Previous Course Number: NEW332H1
Hours: 36L

A multi-cultural and interdisciplinary study of therapeutically-oriented practices and theories of the mind. Areas considered include positive psychology, psychoanalysis, cognitive-behavioural therapy, mindfulness meditation, and Jungian psychology, with comparison to various Buddhist teachings and practices.

Exclusion: NEW332H1

Recommended Preparation: BPM232H1/ NEW232Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

BPM333H1 - Buddhism and Cognitive Science

Previous Course Number: NEW333H1
Hours: 36L

An interdisciplinary exploration of how cognitive science may connect with Buddhist terms, concepts, and practices, studying topics such as wisdom, mindfulness, meditation, insight, self-control, flow, or mystical experience.

Exclusion: NEW333H1

Recommended Preparation: BPM232H1/ NEW232Y1/ RLG206H1

Breadth Requirements: Thought, Belief and Behaviour (2)

BPM334H1 - Science of Wisdom: Buddhist and Western Traditions

Previous Course Number: NEW334H1
Hours: 36L

Provides a conceptual and contemplative interdisciplinary exploration of "wisdom traditions." Buddhist approaches to self-actualization and wisdom will be compared to traditions from Mesopotamia, classical Greece, Christianity, the Renaissance, etc. Coursework includes guided experiential exercises for various traditions.

Exclusion: NEW334H1

Recommended Preparation: BPM232H1/ NEW232Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

BPM335H1 - Meditation and the Body

Previous Course Number: NEW335H1
Hours: 36L

An overview of scientific research on the psychological and neurophysiological effects of meditation. We explore the effects of different meditation styles on brain structure, brain activity, neurochemistry and other biological processes. Effects of meditation on mental health, pain, social behavior, aging, memory, and cardiovascular function are also a major focus. The use of meditation in the treatment and prevention of illness is critically reviewed.

Prerequisite: Completion of 9.0 credits

Exclusion: NEW335H1

Recommended Preparation: BPM232H1/ NEW232Y1

Breadth Requirements: Living Things and Their Environment (4)

BPM336H1 - Special Topics in Buddhism, Psychology and Mental Health

Previous Course Number: NEW336H1
Hours: 36L

Topics vary from year to year depending on the instructor.

Recommended Preparation: BPM232H1/ NEW232Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

BPM337H1 - Special Topics in Buddhism, Psychology and Mental Health

Previous Course Number: NEW337H1
Hours: 36L

Topics vary from year to year.

Prerequisite: 0.5 credits from the Buddhism, Psychology and Mental Health Core Course Group.

Recommended Preparation: BPM232H1/ NEW232Y1

BPM338H1 - Exploring Mindful Awareness

Previous Course Number: NEW338H1
Hours: 36L

An overview of mindfulness as a systematic investigation of subjective experience, with a survey of classic descriptions and contemporary scientific literature. Students will explore meditative practices in class and maintain a meditation practice outside class.

Prerequisite: [BPM232H1](#)/ [NEW232Y1](#)/ [BPM332H1](#)/ [BPM333H1](#)/ [BPM334H1](#)/ [BPM335H1](#)/ [BPM339H1](#)

Exclusion: [NEW338H1](#), [NEW432H1](#) (Advanced Special Topics in Buddhism, Psychology and Mental Health: Cultivating Consciousness), offered in Fall 2012, Fall 2013, Fall 2014, Summer 2015, and Winter 2016

Breadth Requirements: Thought, Belief and Behaviour (2)

BPM339H1 - Mind, Consciousness and the Self

Previous Course Number: NEW339H1

Hours: 36L

An interdisciplinary study of theories of mind, consciousness, and the self, placing Buddhist traditions in dialogue with scientific theories of the mind in psychology.

Exclusion: [NEW339H1](#)

Recommended Preparation: [BPM232H1](#)/ [NEW232Y1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

BPM381H1 - Buddhist Perspectives on Current Social Issues

Hours: 36L

Explores teachings and principles in Buddhist canonical sources and considers their application to a wide range of social, political, and environmental crises we are facing today, including climate justice, systemic racism, burnout and mental health. We explore how Buddhist teachings are applied and adapted across different sectors of society including healthcare, education and business.

Exclusion: [NEW214Y1](#)/ [NEW336H1](#) (Special Topics in Buddhism, Psychology and Mental Health: Buddhist Perspectives on Current Social Issues), offered in Winter 2020 or Winter 2021/ [BPM336H1](#) (Special Topics in Buddhism, Psychology and Mental Health: Buddhist Perspectives on Current Social Issues), offered in Winter 2022

Recommended Preparation: [BPM214H1](#)/ [BPM232H1](#)/ [NEW214H1](#)/ [NEW232H1](#)/ [NEW232Y1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

BPM432H1 - Advanced Research in Meditation, Psychology and Neuroscience

Previous Course Number: NEW432H1

Hours: 36L

This seminar-based course prepares students for advanced research on meditation by exposing them to diverse theories, tools and techniques used in the field. Students will learn about the scientific method and develop critical thinking skills; critique scientific research articles on meditation; practice communication skills; and propose their own original study on meditation.

Recommended Preparation: [BPM232H1](#)/ [NEW232Y1](#)/ [RLG206H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

BPM433H1 - Advanced Exploration of Buddhist Psychology and Practice

Previous Course Number: NEW433H1

Hours: 36S

An in-depth, interdisciplinary exploration of how Buddhist teachings are set in conversation with contemporary scientific research on topics such as suffering, wellbeing, and compassion, through a mixture of lecture, textual analysis, discussion, and hands-on experiential practice.

Recommended Preparation: [BPM232H1](#)/ [NEW232Y1](#)/ [RLG206H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

BPM438H1 - Mindfulness Meditation: Science and Research

Previous Course Number: NEW438H1

Hours: 36S

An exponential increase of scientific research on aspects of Buddhist theories of mind and mindfulness meditation has contributed to the growing popularity of mindfulness across the sectors of healthcare, education and business. Examines the theoretical and empirical basis of mindfulness-based interventions and applications in healthcare settings and beyond. Critically addresses the roots of mindfulness, current models and adaptations, relevant applications, interventions and outcomes. Quantitative and qualitative research methodology will be reviewed, and conceptual, methodological, statistical, and interpretive limitations of the scientific literature will be

discussed. The course aims to build scientific literacy skills through the assessment, critique, and discussion of peer reviewed journal articles.

Prerequisite: A statistics course (e.g. PSY201H1, SOC202H1, STA220H1)

Exclusion: NEW438H1

Recommended Preparation: BPM232H1/ NEW232Y1/ NEW232H1/ NEW331H1/ BPM333H1

Breadth Requirements: The Physical and Mathematical Universes (5)

BPM498H1 - Advanced Topics in Buddhism, Psychology and Mental Health

Hours: 24S

An upper-level seminar. Topics vary from year to year, depending on the instructor.

Prerequisite: BPM232H1, at least 1.0 credit from the BPMH Core Group at the 300+ level. Students who do not meet the prerequisites are encouraged to contact the Program Office.

BPM499H1 - Advanced Topics in Buddhism, Psychology and Mental Health

Hours: 24S

A joint graduate/undergraduate upper-level seminar. Topics vary from year to year, depending on the instructor. Consult the Program Office for course enrolment procedures.

Prerequisite: BPM232H1, at least 1.0 credit from the BPMH Core Group at the 300+ level. Students who do not meet the prerequisites are encouraged to contact the Program Office.

Critical Studies in Equity and Solidarity Courses

CSE240H1 - Introduction to Critical Equity and Solidarity Studies

Previous Course Number: NEW240H1, NEW240Y1
Hours: 24L/12T

An interdisciplinary intersectional interrogation and examination of systemic inequity, structural oppression and social justice in local and global contexts. Provides a foundation for studies in critical equity and solidarity through a concentrated focus on theory and practice as it relates to major concepts, historical perspectives, key debates, lived experience and radical grassroots community resistance to inequity and oppression. Introduces critical equity as a theoretical framework through which to approach social relations of race, ethnicity, class, gender, sexuality and disability and as a site for thinking through formations of solidarity and transformative social change. The concept of self-defense articulated historically by the Black Panther Party for Self-Defense among others is a key component.

Exclusion: NEW240H1, NEW240Y1

Breadth Requirements: Society and its Institutions (3)

CSE241Y1 - Introduction to Critical Disability Studies

Previous Course Number: NEW241Y1

Hours: 48L/24T

Draws on an intersectional history and politics of normativity and bodily difference to understand disability as a diverse and materially salient social category that can be used as a lens to better understand systems and experiences of colonization, race, class, gender, age, etc. Explores scenes of disability or 'crip' solidarity, resistance and cultural production, disability D/deaf and mad arts, coalitional movements for disability justice, collective approaches to access and other non-normative ways of knowing and being.

Exclusion: NEW241Y1

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

CSE270H1 - Community Dis/Engagement and Solidarity

Previous Course Number: NEW270H1

Hours: 24L/12T

An introduction to issues and questions arising from the field of 'community engagement'. Explores the meaning, practices and implications of/for 'community' and 'community (dis)engagement' from multiple perspectives (e.g. the State and its agencies, institutional power, colonial discourse, communities of embodied difference, etc.) Takes a multi-media and arts-based approach to examining self-care from an anti-colonial perspective of central importance in the practice and pedagogy of critical equity and solidarity in the collective struggle for freedom and transformation.

Exclusion: [NEW270H1](#)

Breadth Requirements: Society and its Institutions (3)

CSE339H1 - Special Topics in Equity and Solidarity Studies

Hours: 24L

An upper-level course. Topics of study vary from year to year, depending on the instructor.

Prerequisite: [CSE240H1/ NEW240H1/ NEW240Y1](#)

CSE340H1 - Abolition in the Global Context: Theorizing Uprisings and Youth Activism against Policing and Prisons

Previous Course Number: NEW340H1

Hours: 24L

Considers the question: what does abolition mean in a global context? An analysis of how nation-states use prisons, (im)migrant detention centers, black sites, detention camps, military prisons, border checkpoints, refugee camps, walls, and concentration camps, to surveil, contain, and lock up disposable populations, and/or to suppress those that resist state violence. Explores these carceral spaces through a historical and political economic investigation of the processes that have produced these sites. Draws on anti-carceral perspectives on abolition and reform to examine uprisings and political activism, particularly youth activism, against prisons, policing, and forms of militarized, capitalist violence transnationally.

Prerequisite: [CSE240H1/ NEW240H1/ NEW240Y1](#)

Exclusion: [NEW340H1](#) (Special Topics in Equity Studies: Youth, Activism and Social Change), offered in Fall 2017, Fall 2018, Fall 2019 and Fall 2020

Breadth Requirements: Society and its Institutions (3)

CSE341H1 - Theorizing Settler Colonialism, Capitalism and Race

Previous Course Number: NEW341H1

Hours: 24S

Provides students with a theoretical background for understanding settler colonialism, capitalist social relations and difference (including race, class, gender, disability and sexuality) and solidarity. Provides an analysis of state violence and the formation of hegemonic power relations. Introduces students to the method of

thinking *dialectically* to examine the social world as a set of relations between multiple phenomena occurring at the same time. Articulates an emancipatory politics of knowledge production and strategies of building solidarities to enable the imagination of a different future.

Prerequisite: [CSE240H1/ NEW240Y1](#)

Exclusion: [NEW341H1](#)

Breadth Requirements: Society and its Institutions (3)

CSE342H1 - Theory and Praxis in Food Security

Previous Course Number: NEW342H1

Hours: 24S

Explores the concept of food security in the context of equity issues related to global food systems. Students participate in food-related field work activities outside of regular classroom time.

Prerequisite: [CSE240H1/ NEW240Y1](#)

Exclusion: [NEW342H1](#)

Breadth Requirements: Society and its Institutions (3)

CSE344H1 - Body Matters: Oppression, Solidarity and Justice

Previous Course Number: NEW344H1

Hours: 24L

Through lectures, small-group discussions and experiential activities, explores how intersecting cultural stories impact our bodies and how stories inscribed upon us shape and constrain our relations, perceptions, experiences and vulnerabilities as embodied subjects. Draws on work in cultural studies, critical race and decolonial theory, gender studies, queer, trans and disability theory and fat studies to ask: Whose bodies matter? How do bodies come to matter? And, how are we - as embodied beings - engaged in acts of rewriting, resisting and otherwise transforming the body means and what it can do?

Prerequisite: [CSE240H1/ NEW240Y1/ CSE241Y1](#)

Exclusion: [NEW344H1](#), [NEW344Y1](#), [CSE344Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CSE344Y1 - Body Matters: Oppression, Solidarity and Justice

Previous Course Number: NEW344Y1

Hours: 48L

Through lectures, small-group discussions and experiential activities, explores how intersecting cultural stories impact our bodies and how stories inscribed upon us shape and constrain our relations, perceptions, experiences and vulnerabilities as embodied subjects. Draws on work in cultural studies, critical race and decolonial theory, gender studies, queer, trans and disability theory and fat studies to ask: Whose bodies matter? How do bodies come to matter? And, how are we - as embodied beings - engaged in acts of rewriting, resisting and otherwise transforming the body means and what it can do?

Prerequisite: CSE240H1/ NEW240Y1/ CSE241Y1

Exclusion: NEW344Y1, NEW344H1, CSE344H1

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

CSE345H1 - Equity and Activism in Education

Previous Course Number: NEW345H1

Hours: 24L

Examines contemporary issues in education and schooling from a social justice and equity perspective. Engages with a variety of theoretical frameworks including anti-homophobia education, critical pedagogy, critical race theory, decolonizing knowledges, and intersectionality. Includes an overview of educational activist projects.

Prerequisite: CSE240H1/ NEW240Y1

Exclusion: NEW345H1

Breadth Requirements: Society and its Institutions (3)

CSE346H1 - Community Organizing and Global Solidarity

Previous Course Number: NEW346H1

Hours: 24L

Considers, from an interdisciplinary perspective, the evolution of community organizations and non-profits in the context of neoliberalism, settler colonialism, and imperialism. Examines the inter-woven relations of political economy, local community development, marginalized communities in Canada, and emergent forms of global/local solidarity.

Prerequisite: CSE240H1/ NEW240Y1

Exclusion: NEW346H1

Breadth Requirements: Society and its Institutions (3)

CSE347H1 - Critical Race and Anti-Racism Studies

Previous Course Number: NEW347H1

Hours: 36L

Considers what it means to pursue integrative anti-racism in organizational/institutional settings such as the workplace, justice system, media and education through a study of theories on race and philosophical tenets of anti-racism. Examines the concept of race as a pedagogical discourse and social-political practice across local, national and global contexts.

Prerequisite: CSE240H1/ NEW240Y1

Exclusion: NEW347H1

Breadth Requirements: Society and its Institutions (3)

CSE348H1 - Special Topics in Equity Studies

Previous Course Number: NEW348H1

Hours: 24L

An upper level course. Topics of study vary from year to year.

Prerequisite: CSE240H1/ NEW240Y1

Breadth Requirements: Society and its Institutions (3)

CSE349H1 - Disability Arts and Culture

Previous Course Number: NEW349H1

Hours: 24S

Explores the work of disabled, mad, sick and/or Deaf artists and considers how disability disrupts - or 'crips' - artistic spaces and cultural movements. Engages with contemporary debates emanating from within these spaces and movements to reveal disability as a dynamic range of bodily practices, aesthetics and relations.

Prerequisite: CSE240H1/ NEW240Y1

Exclusion: NEW349H1

Breadth Requirements: Society and its Institutions (3)

CSE439H1 - Advanced Topics in Equity and Solidarity Studies

Hours: 24S

An upper-level seminar course. Topics of study vary from year to year, depending on the instructor.

Prerequisite: CSE240H1/ NEW240H1/ NEW240Y1 and a 300+ level 0.5 credit from Critical Studies in Equity and Solidarity Core Group

Breadth Requirements: Society and its Institutions (3)

CSE440Y1 - Advanced Special Topics in Equity Studies

Previous Course Number: NEW440Y1

Hours: 72L

An advanced level seminar course. Topics of study vary from year to year.

Prerequisite: CSE240H1/ NEW240Y1 and an additional 0.5 credit at the 300+ level from the Critical Studies in Equity and Solidarity Core Group

Breadth Requirements: Society and its Institutions (3), Thought, Belief and Behaviour (2)

CSE441H1 - Advanced Topics in Equity Studies

Previous Course Number: NEW441H1

Hours: 24S

An advanced level seminar course. Topics vary from year to year.

Prerequisite: CSE240H1/ NEW240Y1

CSE442H1 - Food Systems and the Politics of Resistance

Previous Course Number: NEW442H1

Hours: 36L

Examines the food we eat in the local and global context of food systems, food sovereignty and food movements. Explores the possibilities for food as a catalyst for learning, resistance and social change. Enrolment is by application. Application forms are available on the CSES webpage prior to the start of course enrolment, and are accepted up to the end of the enrolment period, space permitting.

Note: This is a joint graduate/undergraduate course.

Prerequisite: 14.0 credits, CSE240H1/ NEW240Y1, CSE342H1, an additional 0.5 credit at the 300+ level from the Critical Studies in Equity and Solidarity Studies Core Group, a GPA of at least 3.5 in CSE courses

Exclusion: NEW442H1

Breadth Requirements: Society and its Institutions (3)

CSE443H1 - Advanced Special Topics in Equity Studies

Previous Course Number: NEW443H1

Hours: 36S

An advanced level seminar course. Topics of study vary from year to year.

Prerequisite: CSE240H1/ NEW240Y1 and an additional 0.5 Critical Studies in Equity and Solidarity Core Group 300+ level course.

Breadth Requirements: Society and its Institutions (3)

CSE444H1 - Anti-Colonization and the Politics of Violence

Previous Course Number: NEW444H1

Hours: 36S

This advanced seminar interrogates how the theorizations, embodied lived experiences and lived resistance to structural violence can create social, epistemological, ontological and political decolonizing/anti-colonial transformation. The work of Frantz Fanon, John Akomfrah, The Black Panther Party for Self-Defense, Elaine Brown and Assata Shakur amongst others are utilized to search for alternative and oppositional ways to rethink and re-respond to violence. The seminar pursues a nuanced understanding of violence as it relates to de/anticolonization as a lived praxis of resistance and as a practice of self-defense that is grounded in the assertion that there can be no decolonization without *anticolonization*.

Prerequisite: CSE240H1/ NEW240Y1 and an additional 0.5 credit at the 300+ level from the Critical Studies in Equity and Solidarity Core Group.

Exclusion: NEW444H1

Breadth Requirements: Society and its Institutions (3)

CSE445H1 - Rethinking Palestine: Colonialism, Revolution and Transnational Solidarity

Hours: 24S

Aims at decolonizing the study of Palestine by providing an overview of Palestine's modern history that is grounded in critical perspectives that challenge dominant scholarly paradigms about Palestine. Provides specific theoretical approaches in the study of Palestinian history, culture and politics through such concepts as settler

colonialism, occupation, revolution, nationalism, indigeneity, racial capitalism, imperialism, sovereignty, collective memory, resistance, liberation and transnational solidarity. Engages with memoirs, oral histories, archival documents, films, poetry, music and literature to understand the historical, political-economic and juridical foundations that have produced a century of oppression, violence, resistance and solidarity within, across and beyond Palestine.

Prerequisite: CSE240H1/ NEW240H1/ NEW240Y1, CSE341H1/ NEW341H1

Breadth Requirements: Society and its Institutions (3)

CSE446H1 - Community Development and Social Change

Previous Course Number: NEW446H1

Hours: 36L

Explores the significance of community development as a social change strategy, through a critical social analysis of local and global case studies and policies.

Prerequisite: 14.0 credits, CSE240H1/ NEW240Y1, CSE346H1, and an additional 0.5 credit at the 300+ level from the Critical Studies in Equity and Solidarity Studies Core Group.

Exclusion: NEW446H1

Breadth Requirements: Society and its Institutions (3)

CSE447H1 - Race, Ethnicity and Educational Praxis

Previous Course Number: NEW447H1

Hours: 36L

An application of critical race, ethnicity and social difference discourse to educational praxis. Examines the articulation of theoretical perspectives to explain particular incidents in society, and to understand forms of institutional racism and emerging minority responses. Explores the implications for pedagogical practices in education.

Prerequisite: CSE240H1/ NEW240Y1, CSE347H1 and one additional 0.5 credit at the 300+ level in CSE courses; permission of Program Director

Exclusion: NEW447H1

Breadth Requirements: Society and its Institutions (3)

CSE448H1 - Disability and the Child

Previous Course Number: NEW448H1

Hours: 24S

Examines a range of historical and present-day meanings associated with the figure of the disabled child. Draws on work emanating from a variety of disciplines, including history, psychology, neuroscience, visual arts, film and literature, and engaging with critical theories of race, class, gender, sexuality and disability, to discuss ideas and issues relevant to the construction of 21st century disabled childhoods. Counters the near monolithic story of disability as threat to the presumed goodness of normative childhood by asking: what alternate depictions and narratives of disabled childhood exist and what can they teach us?

Prerequisite: CSE240H1/ NEW240Y1/ CSE241Y1 and an additional 0.5 Critical Studies in Equity and Solidarity Core Group 300+ level course

Exclusion: NEW448H1

Breadth Requirements: Society and its Institutions (3)

CSE449H1 - Contemporary Theories in Critical Disability Studies

Previous Course Number: NEW449H1

Hours: 24S

Explores competing conceptions, definitions and practices of disability through a range of critical disability theories, including crip-of-colour critique, decolonial theories of disability studies and black feminist disability frameworks. Enacts disability studies as a justice-oriented methodology or practice that has value for understanding and responding to colonial systems of race, class, gender and disability. Interrogates the shape and limits of disability and disability studies to ask the provocative question: what can disability studies do?

Prerequisite: CSE240H1/ NEW240Y1 and 0.5 credit from CSE241Y1/ CSE344Y1/ CSE349H1/ CSE448H1

Exclusion: NEW449H1

Breadth Requirements: Society and its Institutions (3)

JNS450H1 - Sexuality & Disability

Hours: 24S

An interdisciplinary and intersectional approach to the study of disability and sexuality. Students will engage with historical, mainstream and critical discourses and explore complex issues and representations pertaining to disability, sexuality, sexual practices and desire. Draws from a range of writings and cultural texts in queer, crip and sexuality studies.

Prerequisite: 1.0 SDS credit/ NEW240Y1/ NEW240H1/ CSE240H1/ NEW241Y1/ CSE241Y1

Breadth Requirements: Society and its Institutions (3)

CSE469Y1 - Decolonizing Research Methodologies for New Researchers

Previous Course Number: NEW469Y1

Hours: 48S

A feminist/anti-racist/anti-colonial/anti-imperialist exploration of research methods. Examines the work of researchers and scholar-activists who seek to humanize research with communities detrimentally impacted by colonial, imperialist, heteropatriarchal research agendas and processes. Supports students' independent research projects through guidance from the course instructor. Prepares students for graduate studies or research-oriented careers. Not eligible for CR/NCR option.

Prerequisite: CSE240H1 and 1.0 credit from Critical Studies in Equity and Solidarity Core Group 300+ level courses

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

CSE499H1 - Advanced Topics in Critical Studies in Equity and Solidarity

Hours: 24S

A joint graduate/undergraduate upper-level seminar. Topics vary from year to year, depending on the instructor. Consult the Program Office for course enrolment procedures.

Prerequisite: CSE240H1, at least 1.0 credit from the CSES Core Group at the 300+ level. Students who do not meet the prerequisites are encouraged to contact the Program Office.

Community Engaged Learning (CEL) Courses

NEW495Y1 - Community Engaged Learning: Critical and Creative Perspectives on the Non-Profit Sector

Hours: 96P/24S

A placement-based course in which students develop knowledge, practice and professional skills appropriate to the social purpose sector while working to support programming for community partners. The accompanying seminar considers critical social justice issues and creative models of community-engagement practice from grassroots, community and non-profit organizations and other perspectives that support students' experiential,

participatory and reflective learning. Not eligible for CR/NCR option.

Enrolment is by application. Detailed application instructions are available on the [CEL website](#).

There are 3 enrolment application options:

1. Apply to an in-person placement (positions posted on the CEL website)
2. Apply to a virtual placement
3. Apply to the course without a placement

Placement positions will be posted on the CEL website by June 1. The application period is June 1 - July 15. Applications will be reviewed on a rolling basis, and match meetings will be held between June 1 - August 31.

Prerequisite: Completion of 9.0 credits

Breadth Requirements: Society and its Institutions (3)

NEW496H1 - Community Engaged Learning: Critical and Creative Perspectives on the Non-Profit Sector

Hours: 48P/12S

A placement-based course in which students develop knowledge, practice and professional skills appropriate to the social purpose sector while working to support programming for community partners. The accompanying seminar considers critical social justice issues and creative models of community-engagement practice from grassroots, community and non-profit organizations and other perspectives that support students' experiential, participatory and reflective learning. Not eligible for CR/NCR option.

Enrolment is by application. Detailed application instructions are available on the [CEL website](#).

There are 3 enrolment application options:

2. Apply to a virtual placement
3. Apply to the course without a placement

Placement positions will be posted on the CEL website by June 1. The application period is June 1 - July 15. Applications will be reviewed on a rolling basis, and match meetings will be held between June 1 - August 31.

Prerequisite: Completion of 9.0 credits

Breadth Requirements: Society and its Institutions (3)

NEW497Y1 - Critical and Creative Perspectives on Community Based Research (CBR): An Advanced Seminar

Hours: 96P/24S

Explores how research is conducted and mobilized by marginalized communities as a form of resistance, knowledge production and social change. Examines the foundations of empirical research, the role of the university as a site of research activity and the ethics and methods of community-based research. Informed by examples of grassroots research projects from Black, Indigenous and racialized communities locally, nationally and globally. In this course, students engage in community-based and participatory action research projects with community partners. Not eligible for CR/NCR option.

Enrolment is by application. Detailed application instructions available on the [CEL website](#).

Independent Studies Courses

NEW299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

NEW299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

NEW390Y1 - New College Independent Studies

New College Independent Study courses are designed both to complement regular offerings in New College Programs and to provide an opportunity for New College students in any program to enrich their studies. The normal expectation of a project course is that the student, aided and advised by their supervisor, will read relevant literature, and plan, analyze and report on an original and independent investigation of an appropriate topic. Enrolment is by application. Written applications, which include an application form and detailed proposal, should be made through the Programs Office for approval by the Vice Principal of New College or a designate by April 15

for the Summer Session; by July 15 for the Fall Term; or by November 15 for the Winter Term. Should the deadline fall on a weekend, applications will be accepted until the following Monday. Students will be notified of the acceptance or rejection of an application. If the project requires ethics approval, please be advised that you should find and consult with a supervisor about meeting this requirement at least a semester in advance of these deadlines. For more information and application forms, please see the Independent Studies website: <http://www.newcollege.utoronto.ca/new-college-academic-programs/independent-studies>. Not eligible for CR/NCR option.

Prerequisite: Completion of 9.0 credits

NEW391H1 - New College Independent Studies

New College Independent Study courses are designed both to complement regular offerings in New College Programs and to provide an opportunity for New College students in any program to enrich their studies. The normal expectation of a project course is that the student, aided and advised by their supervisor, will read relevant literature, and plan, analyze and report on an original and independent investigation of an appropriate topic. Prerequisite: Completion of 14.0 credits

Interdisciplinary Courses

NEW271H1 - Interdisciplinary Special Topics

Hours: 24L

Topics vary from year to year depending on the instructor. Consult timetable for current offering information.

JQR360H1 - The Canadian Census: Populations, Migrations and Demographics

Hours: 24L/12T

Examines the Canadian population census through the experience of diasporic groups in Canada. Approaches the census as a statistical tool, an historical source and an ideological project of citizenship and nationalism. Uses census data to explore mathematical and statistical concepts and to integrate numerical ways of thinking with qualitative analysis. (Jointly sponsored by African Studies, Diaspora and Transnational Studies, Caribbean Studies, Critical Studies in Equity and Solidarity, and Latin American Studies).

Prerequisite: DTS200H1/ DTS200Y1/ HIS230H1/ HIS231H1/ LAS200H1/ LAS201H1/ CAR120Y1/ AFR150Y1/ CAR220H1/ CAR221H1/ NEW224Y1/ CAR225H1/ CAR226H1/ CSE240H1/ NEW240Y1
Breadth Requirements: Society and its Institutions (3)

NEW370Y1 - Interdisciplinary Special Topics

Hours: 48L

Topics vary from year to year depending on the instructor.

NEW371H0 - International Field Course

Provides opportunities for students to engage in an international experiential learning program related to their academic areas of study. The course involves seminars, group exercises, site visits and a final project. Some sessions will be held in Toronto prior to and following the trip. Not eligible for CR/NCR option.

Prerequisite: Foundational course from participating programs (Buddhism, Psychology and Mental Health; Critical Studies in Equity and Solidarity)

NEW372H1 - Interdisciplinary Special Topics

Hours: 24L

Topics vary from year to year depending on the instructor. Consult timetable for current offering information.

NEW398Y0 - Research Excursion

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

NEW471H1 - Interdisciplinary Special Topics

Hours: 24S

Topics vary from year to year depending on the instructor.

Interdisciplinary Courses in Jungian Theory

NEW302Y1 - C.G. Jung: Stories, Patterns, Symbols

Hours: 48L/24S

Impact of Jung's analytical psychology, critical methodology and interpretative practice on issues in religion, anthropology, art and literature, popular culture, gender studies and postmodernist critique. Theoretical studies include traditional Jungian and contemporary post-Jungian texts together with feminist and non-Jungian sources.

Prerequisite: 4.0 credits, at least 1.0 of which should be in the HUM/BR=1/2

Breadth Requirements: Creative and Cultural Representations (1), Thought, Belief and Behaviour (2)

NEW303H1 - Hypotheses of the Unconscious

Hours: 12L/12S

Current discussions of the hypotheses, starting with Freud's and Jung's hypotheses, especially Jung's collective unconscious; critical examination through retrospective analysis of the evolution and development of the concept in works from philosophy, psychology, poetry, ethnology, science and popular culture that anticipated, influenced or were influenced by the work of Freud and Jung, post-Freudians and post-Jungians.

Prerequisite: 4.0 credits, at least 1.0 of which should be in the HUM/BR=1/2

Recommended Preparation: NEW302Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

NEW402Y1 - Advanced Special Topics in Jungian Theory

Hours: 48S

Topics vary from year to year, depending on the interests of students and instructors.

Prerequisite: Permission of instructor

NEW403H1 - Advanced Special Topics in Jungian Theory

Hours: 24S

Topics vary from year to year depending on the interests of students and instructors.

Prerequisite: Permission of instructor

International Foundation Program Courses

UTP100H1 - Themes in World History

Hours: 24L

Surveys the development of human societies from their origins to the present. Topics may include the environment, cultural development and interaction, the creation and nature of belief systems, political, economic and social structures, gender relations, and the

relationship between global patterns and local development. Restricted to students enrolled in the UTPrep program.

Exclusion: IFP100H1/ IFP100Y1

Breadth Requirements: Society and its Institutions (3)

IFP100Y1 - Themes in World History

Hours: 48L/36T

Surveys the development of human societies from their origins to the present using examples from across the world. Topics may include the environment, cultural development and interaction, the creation and nature of belief systems, political, economic and social structures, gender relations, and the relationship between global patterns and local developments. Enrolment is restricted to students registered in the International Foundation Program. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3), Thought, Belief and Behaviour (2)

IFP100H1 - Themes in World History

Hours: 24L

Surveys the development of human societies from their origins to the present. Topics may include the environment, cultural development and interaction, the creation and nature of belief systems, political, economic and social structures, gender relations, and the relationship between global patterns and local development. Restricted to students enrolled in the summer offering of the International Foundation Program (IFP). Not eligible for CR/NCR option.

Exclusion: IFP100Y1/ UTP100H1

Breadth Requirements: Society and its Institutions (3)

Faculty List

Professors Emeriti

M.C. Archer, MA, PhD, D Sc
 G.E. Eyssen, MSc, PhD
 C.E. Greenwood, MSc, PhD
 D. Gurfinkel, PhD
 K.N. Jeejeebhoy, PhD
 M. Kronl, PhD
 P.B. Pencharz, MB, ChB, PhD, FRCPC
 A.V. Rao, MSc, PhD
 L.U. Thompson, MSc, PhD
 T.M.S. Wolever, MA, BM, BCh, MSc, PhD

Chair

D.L. O'Connor, PhD, RD

Professors

G.H. Anderson, MSc, PhD
 R.P. Bazinet, PhD
 A. El-Sohemy, PhD
 A.J. Hanley, PhD
 D.J.A. Jenkins, MA, DM, D Phil, D Sc
 M.R. L'Abbé, PhD
 D. Sellen, PhD
 V. Tarasuk, PhD
 V. Vuksan, MSc, D Sc

Associate Professors

E.M. Comelli, PhD
 J. Sievenpiper, MD, PhD, FRCPC

Assistant Professors

J. Beaudry, PhD
 V. Malik, ScD
 A. Metherel, PhD
 K. Miliku, MD, PhD

Introduction

Nutritional Sciences represents an exciting and challenging area of study of a truly interdisciplinary nature. Understanding of the impact of nutrition on health and its role in disease is based upon a knowledge of the metabolic processes involved (nutrient requirements and utilization, food additive metabolism and safety), of the chemistry of foods (food preservation, food production) and of social and behavioural factors (determinants of food selection). Thus, in this program, the physical, biological and social sciences are integrated in consideration of the national and international goals of achieving optimal health through proper nutrition.

Most career opportunities in Nutritional Sciences require training beyond the undergraduate level. The Major Program provides excellent preparation for entry into postgraduate studies in nutrition research or for a professional faculty such as Medicine and Dentistry.

Please note that this Department does not offer an undergraduate dietetics program. Students interested in this qualification should contact [Dietitians of Canada](#) for information.

Students interested in applying to the [MPH: Nutrition and Dietetics Program](#), through the Dalla Lana School of Public Health, are advised to contact the program director during their second year of undergraduate studies.

Undergraduate Coordinator:
 Dr. Ahmed El-Sohemy

Nutritional Sciences Programs

Nutritional Sciences Major (Science Program) - ASMAJ1068

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade/Grade Average

A minimum grade average in required courses or their equivalents is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- [BIO120H1](#), [BIO130H1](#)
- ([CHM135H1](#), [CHM136H1](#)) / ([CHM138H1](#), [CHM139H1](#)) / [CHM151Y1](#)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60% in each course, or a final grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program. The underlying numeric final mark in each of your courses

required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at dns.admin@utoronto.ca, specify which program you would like to be considered for, and provide your student number.

Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment.

Completion Requirements:

Nutritional Sciences Courses

NFS284H1 - Basic Human Nutrition

Hours: 36L

An introductory course to provide the fundamentals of human nutrition to enable students to understand and think critically about the complex interrelationships between food, nutrition, health and the environment.

Exclusion: [HLTB11H3](#)

Recommended Preparation: ([BIO120H1](#), [BIO130H1](#))/
[BIO150Y1](#); ([CHM138H1](#), [CHM139H1](#))/([CHM135H1](#),
[CHM136H1](#))/ [CHM151Y1](#)

Breadth Requirements: Living Things and Their Environment (4)

NFS301H1 - Nutrition Literacy: Sorting Science from Snake Oil

Hours: 36L

This course will help students learn how to recognize the strengths and limitations of various nutrition research methods, find reliable nutrition information on the Internet and develop systematic thinking skills to critically evaluate the quality of nutrition information in both the scientific literature and popular media.

Prerequisite: [NFS284H1](#)

Breadth Requirements: Living Things and Their Environment (4)

First Year:

([BIO120H1](#), [BIO130H1](#)); ([CHM135H1](#), [CHM136H1](#))/(
[CHM138H1](#), [CHM139H1](#))/ [CHM151Y1](#)

Second Year:

[NFS284H1](#); [BCH210H1](#); ([STA220H1](#), [STA221H1](#))/(
[PSY201H1](#), [PSY202H1](#))

Third Year:

([PSL300H1](#), [PSL301H1](#))/ [PSL302Y1](#); [CSB349H1](#)/
[PSL350H1](#)/ [BCH311H1](#); any two of: [NFS382H1](#),
[NFS386H1](#), [NFS301H1](#); [NFS302H1](#); [NFS394Y1](#)

Fourth Year:

Any three of: [NFS400H1](#), [NFS484H1](#), [NFS485H1](#),
[NFS486H1](#), [NFS487H1](#), [NFS488H1](#), [NFS489H1](#),
[NFS490H1](#), [NFS494Y1](#)

NFS302H1 - Nutrition, Athletics, Performance and Behaviour

Hours: 36L

This course will give an overview of the emerging and advancing role of chronic diet and supplements in athletics, performance and behavior.

Prerequisite: [NFS284H1](#)

Exclusion: [KPE328H1](#)

Breadth Requirements: Living Things and Their Environment (4)

NFS310H1 - Introduction to Clinical Nutrition

Hours: 36L

Clinical Nutrition I introduces students to the foundational principles of nutrition care and its application in clinical settings. This course covers essential topics such as nutritional assessment techniques, medical nutrition therapy for common chronic conditions, and the role of diet in disease prevention and management. Students will develop skills in evaluating dietary intake, identifying nutritional risk factors, and creating basic nutrition care plans tailored to individual needs. Emphasis is placed on evidence-based practices, cultural competence, and professional communication. Through case studies and practical exercises, students will gain the tools to address real-world clinical nutrition challenges.

Prerequisite: [NFS284H1](#)

Breadth Requirements: Living Things and Their Environment (4)

NFS311H1 - Advanced Clinical Nutrition

Hours: 36L

This course builds on the concepts introduced in Introduction to Clinical Nutrition (NFS310H), with a focus on advanced interventions for complex medical conditions. This course explores medical nutrition therapy for acute and chronic diseases such as kidney disease, cancer, gastrointestinal disorders, and critical care. Students will engage with advanced nutritional biochemistry, evaluate the impact of emerging research, and refine their ability to develop comprehensive, patient-centred care plans. Case-based learning and interactive discussions will foster critical thinking and the integration of nutrition science into clinical practice. By the end of the course, students will be equipped to address complex nutritional challenges in diverse healthcare settings.

Prerequisite: NFS284H1, NFS310H1

Breadth Requirements: Living Things and Their Environment (4)

NFS382H1 - Vitamin and Mineral Metabolism Throughout the Life Cycle

Hours: 36L

Micronutrients are essential for health throughout the life cycle. This course examines the role of micronutrients during development and ageing with some emphasis on disease prevention and pathogenesis. Students develop critical appraisal skills, an understanding of the principles of study design and learn to write in a scientific style.

Prerequisite: NFS284H1

Breadth Requirements: Living Things and Their Environment (4)

NFS386H1 - Introduction to Food Science

Hours: 36L

This course gives an overview of the scope of food science as a discipline. Students will learn about the fundamental principles underlying food science such as food chemistry, processing, packaging, and sensory evaluation as they relate to food formulations, quality, and safety of foods. Students will gain insights into the building blocks of food, crucial chemical reactions in food, preservation of the quality attributes of food, modern food processing techniques and sensory analysis. Midterm and final exams along with research papers on the effect of processing on the quality attributes of selected foods will

be used to assess student's application of food science principles.

Prerequisite: CHM135H1/ CHM136H1, NFS284H1

Breadth Requirements: Living Things and Their Environment (4)

NFS394Y1 - Research Course in Nutritional Science

Hours: 144P

Research experience under the supervision of a Departmental staff member. The course entails designing and carrying out a small research project and the preparation and presentation of both a research proposal and a final report. Note that the research project NFS394Y1 requires the prior consent of a staff member who will supervise the project and departmental approval before enrolment. The student is responsible for locating a supervisor. Not eligible for CR/NCR option.

Prerequisite: NFS284H1, Permission of Department and Project Supervisor

Breadth Requirements: Living Things and Their Environment (4)

NFS400H1 - Functional Foods and Nutraceuticals in Human Nutrition

Hours: 36L

This course will demonstrate the rationale, including health benefits, development and marketing of functional foods and nutraceuticals.

Prerequisite: BCH210H1, NFS284H1, (PSL300H1, PSL301H1)/ PSL302Y1

Recommended Preparation: CSB349H1/ PSL350H1/ BCH311H1, NFS386H1

Breadth Requirements: Living Things and Their Environment (4)

NFS481H1 - Advanced Food Science

Hours: 24L/36P

This course provides an in-depth exploration of food microbiology, safety, and preservation, emphasizing the role of microorganisms in foodborne illnesses, fermentation, and spoilage. Students will gain foundational knowledge in food safety systems, including Hazard Analysis of Critical Control Points (HACCP), and learn preservation techniques such as freezing, canning, pickling, and irradiation. The course also examines the

chemical and functional properties of carbohydrates, fats, and proteins, with a focus on their roles in food processing, preservation, and quality enhancement. Topics include microbial growth, classification of foodborne diseases, principles of food chemistry, and innovative processing methods used in the food industry, such as flash freezing and enzymatic applications.

The lab component provides hands-on experience in food safety and processing techniques. Students will conduct experiments on microbial growth, food preservation methods, and chemical modifications of food components. Activities include freezing, canning, pickling, blanching, and dehydration experiments, as well as protein denaturation and fat emulsification studies. Emphasis is placed on applying theoretical knowledge to real-world scenarios, such as determining critical control points in food processing, understanding D, F, and Z values, and optimizing preservation methods to ensure food safety and quality. The lab also covers innovative techniques like nitrogen freezing and UV irradiation to prepare students for advancements in the food industry.

Prerequisite: NFS284H1, NFS386H1

Breadth Requirements: Living Things and Their Environment (4)

NFS482H1 - Food Systems Management

Hours: 24L/24P

This course explores the operational planning and management of food service systems, emphasizing quality control, regulatory compliance, and sustainability. Students will gain a comprehensive understanding of menu planning, workflow optimization, and risk management across various settings, including daycare facilities, hospitals, and long-term care institutions. The course incorporates cultural inclusivity, addressing the dietary needs of Indigenous and immigrant communities, while promoting environmentally sustainable practices. Topics include food safety, sanitation, equipment usage, procurement, waste management, and employee safety, with a focus on real-world applications in institutional and commercial food service operations.

The lab component provides hands-on experience in food service operations, allowing students to apply theoretical concepts to practical scenarios. Activities include designing workflows, conducting facility audits, and modifying menus to meet therapeutic, cultural, and regulatory requirements. Students will gain proficiency in menu preparation, food assembly, and distribution while practicing risk management and safety standards. Emphasis will be placed on incorporating sustainable practices and culturally appropriate food choices for diverse populations, including Indigenous and immigrant groups. Lab projects will culminate in real-world

applications, such as facility audits, food safety planning, and menu modifications for institutional settings.

Prerequisite: NFS284H1, NFS386H1

Breadth Requirements: Living Things and Their Environment (4)

NFS484H1 - Advanced Nutrition

Hours: 24L/12T

Physiological and biochemical features of nutrient needs. The roles of nutrients in the development and adaptability of the whole body, organs and cells. Interpretation of current research data.

Prerequisite: BCH210H1, CSB349H1/ PSL350H1/ BCH311H1, NFS284H1, (PSL300H1, PSL301H1)/ PSL302Y1, (STA220H1, STA221H1/ JBS229H1) or permission of instructor

Breadth Requirements: Living Things and Their Environment (4)

NFS485H1 - Diet, Microbiome & Health

Hours: 36L

Provides an integrated approach to how prokaryotes modulate nutrient availability and how they interact with the host to impact human health from a molecular perspective.

Prerequisite: BCH210H1, CSB349H1/ PSL350H1/ BCH311H1/ MGY311Y1, NFS284H1, (PSL300H1, PSL301H1)/ PSL302Y1 or permission of the instructor

Breadth Requirements: Living Things and Their Environment (4)

NFS486H1 - Obesity: Metabolic and Clinical Aspects

Hours: 36L

Obesity and its co-morbidities illustrated with pathophysiological and biochemical principles and clinical case studies.

Prerequisite: BCH210H1, NFS284H1, (PSL300H1, PSL301H1)/ PSL302Y1

Recommended Preparation: CSB349H1/ PSL350H1/ BCH311H1, (STA220H1, STA221H1)

Breadth Requirements: Living Things and Their Environment (4)

NFS487H1 - Nutrigenomics and Personalized Nutrition

Hours: 36L

The impact of the human genome on nutrition research. Experimental approaches to investigating gene-diet interactions. Understanding how genetic variability affects nutrient response, and how dietary factors regulate gene expression. Application of the various 'omics' technologies to nutrition research as well as exploring the social, legal and ethical issues associated with direct-to-consumer marketing of genetic tests for personalized nutrition.

Prerequisite: NFS284H1, CSB349H1/ PSL350H1/ BCH311H1

Breadth Requirements: Living Things and Their Environment (4)

NFS488H1 - Nutritional Toxicology

Hours: 36L

Occurrence, mechanism of action, safety and health implications of chemicals naturally present in or added to foods. Interactions of nutrients and toxicants and the effects on their metabolism and utilization. Food safety evaluation and regulatory control.

Prerequisite: BCH210H1, NFS284H1

Breadth Requirements: Living Things and Their Environment (4)

NFS489H1 - Nutritional Neurosciences

Hours: 36L

This course provides an integrated approach to how brain function regulates and in turn is regulated by nutrition from a biochemical perspective.

Prerequisite: BCH210H1, BCH311H1/ CSB349H1/ PSL350H1, NFS284H1, PSL302Y1/(PSL300H1, PSL301H1)

Breadth Requirements: Living Things and Their Environment (4)

NFS490H1 - International and Community Nutrition

Hours: 36L

This course focuses on current issues in international and community nutrition including global and domestic food

security, micronutrient deficiencies and other forms of undernutrition, maternal and infant/child nutrition, dietary guidance, and food and nutrition policy. The course will consider the environmental, sociopolitical, cultural and biosocial contexts of nutrition.

Prerequisite: NFS284H1

Recommended Preparation: GGR107Y1/ POL103Y1/ SOC101Y1

Breadth Requirements: Society and its Institutions (3)

NFS494Y1 - Research Projects in Nutritional Sciences

Hours: 144P

Research experience under the supervision of a Departmental staff member. The course entails designing and carrying out a small research project and the preparation and presentation of both a research proposal and a final report. Note that the research project NFS494Y1 requires the prior consent of a staff member who will supervise the project and departmental approval before enrolment. The student is responsible for locating a supervisor. Not eligible for CR/NCR option.

Prerequisite: NFS284H1, Permission of Department and Project Supervisor

Introduction

The Trudeau Centre for Peace, Conflict and Justice houses the Peace, Conflict and Justice program at the Munk School of Global Affairs and Public Policy.

The Peace, Conflict and Justice program provides undergraduates with an interdisciplinary education covering three central pillars: the meanings and causes of conflict, peace, and justice; the lived experiences of living in the context of conflict and struggles for peace and justice; and approaches to resolving conflict and producing peace and/or justice. The topics of study are wide-ranging, including the study of peacemaking and peace-building, interstate war and intrastate conflicts, insurgencies, revolutions and rebellions, ethnic strife, global justice, and negotiation theory. In doing so, we address some of the world's most urgent humanitarian problems, and train students to deeply analyze these issues across several levels of analysis, from the local through the national and the global. Students interested in this program are strongly encouraged to consider pursuing a double major in related fields, especially International Relations. Other related fields include Economics, Political Science, Sociology, Psychology, Anthropology, Geography, History, Diaspora and Transnational Studies, Ethics, Society and Law and Women and Gender Studies.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Peace, Conflict and Justice programs impacted by this policy: [ASSPE1228](#) and [ASMAJ1228](#)

Peace, Conflict and Justice Programs

Peace, Conflict and Justice Specialist (Arts Program) - ASSPE1228

The Peace, Conflict and Justice at the Munk School of Global Affairs & Public Policy is an interdisciplinary academic program that focuses on conditions, causes and effects of conflict, peace, and justice. In this program, students analyze socio-political conditions and policies, economic and cultural phenomena, historical events, and empirical research related to peace, conflict, and justice. Students also have opportunities to assess, conceptualize, and generate solutions that pave the way for conflict resolution, promote peace, and achieve greater justice. The topics of study are diverse, including the study of peacemaking and peacebuilding, human rights, legacies of war, interstate war and intrastate conflict, violence in protests and collective action, ethnic conflict, inequities in social policies such as health, gender, and education. Students select from a wide range of core and elective courses related to PCJ. The program has a strong emphasis on collaboration and teamwork through involvement in hands-on, real-life experiential learning. Moreover, students strengthen their research skills through training in various research methodologies. Our academic program allows students to understand issues of peace, conflict, and justice at multiple levels - local, national, regional, and global. Students interested in this program may consider pursuing a double major in related fields, such as International Relations, Political Science, Economics, Geography, Sociology, Anthropology, History, Environmental Studies, Indigenous Studies, Diaspora and Transnational Studies, Ethics, Society and Law, and Women and Gender Studies.

Enrolment Requirements:

While we welcome students with diverse experiences, this is a limited enrollment program that can accommodate a limited number of students. Admission is determined by a range of criteria, including the student's academic records from their first year of studies, short essays, a writing sample, a resume, and a video submission. In the past, enrollment in Peace, Conflict and Justice has proven to be

extremely competitive across all of these dimensions, and an applicant's success in any one of these dimensions does not necessarily guarantee admission to the program in any given year.

Completion Requirements:

(12.0 credits)

1. 1.0 credit from gateway 100-level courses. Possibilities include but are not limited to: (MUN100H1 and MUN110H1) or (CAS100H1 and MUN120H1) or (AMS100H1 and MUN120H1) or (ECO101H1 and ECO102H1) or ECO105Y1 or HIS101Y1 or (POL107H1 and POL109H1) or AFR150Y1 or WGS160Y1 or TRN152Y1 or (SOC100H1 and SOC150H1).

Other introductory courses in relevant disciplines are also eligible to meet this 100-level course requirement; please contact the program director for discussion and approval.

2. 3.5 credits of the following core PCJ courses, all of which are required: PCJ200H1, PCJ210H1, PCJ310H1/PCJ260H1, PCJ350H1/PCJ261H1, PCJ362H1, PCJ410H1, MUN200H1.

3. 2.5 additional credits in Peace, Conflict and Justice courses (i.e. PCJ prefix classes) at the 300 or 400 level, including at least 1.0 at the 400 level.

4. 5.0 credits of complementary courses, i.e., courses relevant to PCJ and offered by other programs. Of these 5.0 credits, at least 2.0 must be at the 300-level or above.

Complementary courses include but are not limited to the following. Other courses are also eligible to meet this requirement; please contact the program director for discussion and approval.

AFR298H1, AFR460H1, AMS320H1, CAR324H1, CAS310H1, CJS220H1, CSE240H1, CSE342H1, CSE346H1, DTS200Y1, EAS315H1, ECO200Y1, ECO202Y1, ECO220Y1, ENG273Y1, ENV101H1, GGR240H1, GGR419H1, HIS231H1, HIS397H1, HIS401H1, INS201Y1, INS352H1, JAH350H1, JPR364H1, JPS315H1, LAS310H1, MUN101H1/MUN102H1, MUN200H1, PHL373H1, PHL378H1, POL201H1, POL212H1, POL353H1, POL412H1, POL417H1, RLG309H1, SDS465H1, SOC210H1, SOC249H1, SOC367H1, TRN250Y1, TRN312H1, WGS273H1, WGS340H1.

5. Within the 12.0 credits required for the specialist program, 3.0 credits must focus on a particular global region and 3.0 credits must focus on a theme related to peace, conflict and justice.

Regional Studies Focus:

3.0 credits focused on a particular global region.

Examples include Africa, Asia, Canada, the Caribbean,

Europe, Latin America, the Middle East, Slavic countries or the United States. This is not a complete list. Other regions are also eligible to meet this requirement; to propose an alternative, please contact the program director for discussion and approval.

Thematic Focus:

3.0 credits focused on a particular theme related to peace, conflict and justice. Examples include negotiation and conflict resolution, peacemaking and peacebuilding, environmental justice, diplomatic history, reparation and reconciliation, colonialism and decolonization, economic development, interstate war, intrastate conflict, legacies of war and conflict.

This is not a complete list. Other themes are also eligible to meet this requirement; to propose an alternative, please contact the program director for discussion and approval.

Peace, Conflict and Justice Major (Arts Program) - ASMAJ1228

The Peace, Conflict and Justice at the Munk School of Global Affairs & Public Policy is an interdisciplinary academic program that focuses on conditions, causes and effects of conflict, peace, and justice. In this program, students analyze socio-political conditions and policies, economic and cultural phenomena, historical events, and empirical research related to peace, conflict, and justice. Students also have opportunities to assess, conceptualize, and generate solutions that pave the way for conflict resolution, promote peace, and achieve greater justice. The topics of study are diverse, including the study of peacemaking and peacebuilding, human rights, legacies of war, interstate war and intrastate conflict, violence in protests and collective action, ethnic conflict, inequities in social policies such as health, gender, and education. Students select from a wide range of core and elective courses related to PCJ. The program has a strong emphasis on collaboration and teamwork through involvement in hands-on, real-life experiential learning. Moreover, students strengthen their research skills through training in various research methodologies. Our academic program allows students to understand issues of peace, conflict, and justice at multiple levels - local, national, regional, and global. Students interested in this program may consider pursuing a double major in related fields, such as International Relations, Political Science, Economics, Geography, Sociology, Anthropology, History, Environmental Studies, Indigenous Studies, Diaspora and Transnational Studies, Ethics, Society and Law, and Women and Gender Studies.

Enrolment Requirements:

While we welcome students with diverse experiences, this is a limited enrollment program that can accommodate a

limited number of students. Admission is determined by a range of criteria, including the student's academic records from their first year of studies, short essays, a writing sample, a resume, and a video submission. In the past, enrollment in Peace, Conflict and Justice has proven to be extremely competitive across all of these dimensions, and an applicant's success in any one of these dimensions does not necessarily guarantee admission to the program in any given year.

Completion Requirements:

(7.5 credits)

1. 1.0 credit from gateway 100-level courses. Possibilities include but are not limited to: ([MUN100H1](#) and [MUN110H1](#)) or ([CAS100H1](#) and [MUN120H1](#)) or ([AMS100H1](#) and [MUN120H1](#)) or ([ECO101H1](#) and [ECO102H1](#)) or [ECO105Y1](#) or [HIS101Y1](#) or ([POL107H1](#) and [POL109H1](#)) or [AFR150Y1](#) or [WGS160Y1](#) or [TRN152Y1](#) or ([SOC100H1](#) and [SOC150H1](#)).

Other introductory courses in relevant disciplines are also eligible to meet this 100-level course requirement; please contact the program director for discussion and approval.

2. 2.0 credits comprised of the following core PCJ courses, all of which are required: [PCJ200H1](#), [PCJ210H1](#), [PCJ350H1](#)/ [PCJ261H1](#), [PCJ362H1](#).

3. 2.0 additional credits in Peace, Conflict and Justice courses (i.e. PCJ prefix classes) at the 300 or 400 level, including at least 0.5 at the 400 level.

4. An additional 2.5 credits of PCJ-coded courses or complementary courses offered in other programs. Of these 2.0 credits, at least 1.0 must be at the 300-level or above. Complementary courses include but are not limited to the following; other relevant courses are eligible on the approval of the program director:

[AFR298H1](#), [AFR460H1](#), [AMS320H1](#), [CAR324H1](#), [CAS310H1](#), [CJS220H1](#), [CSE240H1](#), [CSE342H1](#), [CSE346H1](#), [DTS200Y1](#), [EAS315H1](#), [ECO200Y1](#), [ECO202Y1](#), [ECO220Y1](#), [ENG273Y1](#), [ENV101H1](#), [GGR240H1](#), [GGR419H1](#), [HIS231H1](#), [HIS397H1](#), [HIS401H1](#), [INS201Y1](#), [INS352H1](#), [JAH350H1](#), [JPR364H1](#), [JPS315H1](#), [LAS310H1](#), [MUN101H1](#)/ [MUN102H1](#), [MUN200H1](#), [PHL373H1](#), [PHL378H1](#), [POL201H1](#), [POL212H1](#), [POL353H1](#), [POL412H1](#), [POL417H1](#), [RLG309H1](#), [SDS465H1](#), [SOC210H1](#), [SOC249H1](#), [SOC367H1](#), [TRN250Y1](#), [TRN312H1](#), [WGS273H1](#), [WGS340H1](#).

Peace, Conflict and Justice Courses

PCJ200H1 - Introduction to Peace, Conflict and Justice

Hours: 24L/12T

This course introduces students to the theories, concepts, histories, and actors that are fundamental to the field of peace, conflict, and justice. Students will discuss meanings, causes, obstacles, and sustainability of peace and justice through the discussion of historical and contemporary cases from around the world. Stemming from the interdisciplinary aspect of the field, students will learn a wide range of theoretical, empirical, and policy-oriented perspectives on thematic topics such as protection and violation of human rights, social and economic inequalities, and causes of violence and oppression. This course is intended for first year PCJ students and it serves as a gateway for all other courses offered in the PCJ program. This course is a requirement for PCJ majors and specialists.

Prerequisite: Admission to PCJ

Breadth Requirements: Society and its Institutions (3)

PCJ210H1 - Research Methods in Peace, Conflict and Justice

Hours: 24L/12T

This course introduces students to key research methods employed in the study of peace, conflict and justice. It considers both qualitative, quantitative, and mixed-methods research frameworks prominent in PCJ research drawn from a range of disciplines and approaches. Some methods explored in this course might include: descriptive analysis, correlational studies, bivariate or multivariate regression models, surveys, interviews, focus groups, and country case studies. The class teaches students how to read, understand and critique these frameworks and the scholarship they influence/produce. Concepts of internal and external validity, inductive and deductive reasoning, and ethics in research will also be covered. This course is a requirement for PCJ majors and specialists.

Prerequisite: Admission to PCJ

Breadth Requirements: Society and its Institutions (3)

PCJ299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at

<https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

PCJ299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

PCJ310H1 - Data and Applications in PCJ

Hours: 24L/12T

The goal of this course is to introduce students to data literacy and applications in the topics of peace, conflict, and justice. The course is broadly divided into two parts. The first part will introduce data in the context of peace, conflict, and justice studies and outline the research process. Students will learn advanced quantitative research designs and will work with fundamental descriptive statistics tools. Students will work with different datasets, learn how to summarize data for different types of variables through graphs and tables, and explore measures of association between variables. In the second part of the course, students will work on data projects related to peace, conflict, and justice. Students will also design their own research relevant in PCJ. This course is a requirement for PCJ Specialists.

Prerequisite: [PCJ200H1](#), [PCJ210H1](#)

Exclusion: [PCJ260H1](#)

Breadth Requirements: Society and its Institutions (3)

PCJ350H1 - The Violence of Inequality: Conflict Dynamics and Power Asymmetries

Hours: 24L/12T

This course builds on various multi-disciplinary approaches to explore how inequalities shape violence, conflict, and post-conflict dynamics. It teaches students to understand and engage critically in debates in the field and to discover connections between the power structures that shape the emergence of violent conflicts, their dynamics, and their legacies. In addition, this course will offer students practical tools to analyze the intersection of

conflict and inequality, as well as the implications of that intersection for pursuing peace. This course is a requirement for PCJ majors and specialists.

Prerequisite: [PCJ200H1](#), [PCJ210H1](#)

Exclusion: [PCJ261H1](#)

Breadth Requirements: Society and its Institutions (3)

PCJ360H1 - Topics in Peace, Conflict and Justice

Hours: 24L

This course explores selected issues in the field of Peace, Conflict and Justice. Topics may vary from year to year. Through a suite of recent readings, students will strive to critically examine implications and challenges of, and solutions to the issues being studied. Please visit the [Trudeau Centre for Peace, Conflict and Justice website](#) for current offering information.

Prerequisite: [PCJ260Y1](#)/ ([PCJ260H1](#), [PCJ261H1](#))

Recommended Preparation: [POL208H1](#)

Breadth Requirements: Society and its Institutions (3)

PCJ361H1 - Special Topics in Peace, Conflict and Justice Studies

Hours: 24S

An exploration of selected issues in the field of Peace, Conflict and Justice involving an overseas and/or practicum component.

Exclusion: [PCS361H1](#), [UNI361Y1](#)

Recommended Preparation: [POL208Y1](#)

PCJ361Y1 - Special Topics in Peace and Conflict Studies

Previous Course Number: [PCS361Y1](#), [UNI361Y1](#)

Hours: 48S

An exploration of selected issues in the field of Peace, Conflict and Justice involving an overseas and/or practicum component.

Prerequisite: [PCJ260Y1](#) or permission from the Program Director

Exclusion: [PCS361H1](#), [PCS361Y1](#), [UNI361Y1](#)

Recommended Preparation: [POL208Y1](#)/ [POL208H1](#)

Breadth Requirements: Society and its Institutions (3)

PCJ362H1 - Experiential Learning in PCJ

Hours: 12T/24S

This course provides students an opportunity to learn by providing valuable services to local, national, or international organizations. This model of experiential learning is called organization partner experiences, in which students work in teams on a project that is of relevance to the partner organization. The overarching theme in this course is inclusion through access to public services. Access to public services such as education, health, and public provision of services is one of the most important ways in which disadvantaged populations experience upward socioeconomic mobility. Students will gain insights about inequality of access to public service, conduct critical analysis of current issues, and produce deliverables to understand issues of socio-economic inequality in societies around the world.

Prerequisite: PCJ200H1, PCJ210H1, PCJ350H1

Breadth Requirements: Society and its Institutions (3)

PCJ380H1 - Justice Institutions: Crime, Violence, and Insecurity

Hours: 24S

This course examines the role of institutions that respond to crime and violence. We study the role of institutional actors centering on criminal justice: we focus in particular on criminal justice institutions, but also community organizations, government agencies, international organizations, journalists, and others—in identifying, naming, and acting upon crime and violence. We also study the strategies these institutions adopt in responding to crime, violence, and insecurity, along with evidence about how they do so and outcomes of their interventions. Finally, we attend to the relationship between criminal justice and other social outcomes, including health and well-being, collective memory, skepticism, social movements, and civic participation. Throughout the course we rely on a wide range of materials, so that in most weeks students will engage with a combination of perspectives, including social science research, legal materials, testimonies, official documents, and journalistic accounts.

Prerequisite: PCJ200H1, PCJ210H1

Corequisite: PCJ350H1

Breadth Requirements: Society and its Institutions (3)

PCJ399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

PCJ399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

PCJ410H1 - Research Paper Seminar in PCJ

Hours: 24S

This course guides each student through their own individual research project, embedded in an interactive group learning process, to offer an applied introduction to research methods for peace, conflict and justice studies. Students work through the research in the field of peace, conflict and justice studies, such as: identifying a research question, learning how to write a critical literature review, developing a rigorous research design, and applying quantitative, qualitative, or mixed methods to answering research inquiries. The final deliverable is a draft of a research proposal or an empirical research-based paper. This course is a requirement for PCJ Specialists and open to PCJ Majors with approval from the Director.

Prerequisite: PCJ200H1, PCJ210H1, PCJ350H1

Breadth Requirements: Society and its Institutions (3)

PCJ444H1 - Special Topics in Peace and Conflict Studies

Previous Course Number: PCS444H1

Topics vary annually. The objective of the course is to explore emerging issues in Peace and Conflict Studies. The focus of the course will be on a specific topic, rather than a broad survey of the field.

Prerequisite: [PCJ260Y1](#), [PCJ360Y1](#) or permission of the instructor

Exclusion: [PCS444H1](#)

Breadth Requirements: Society and its Institutions (3)

PCJ460H1 - Advanced Topics in Peace, Conflict and Justice

Hours: 24S

This course explores selected issues in the field of Peace, Conflict and Justice. Topics may vary from year to year. Through a suite of recent readings, students will strive to critically examine implications and challenges of, and solutions to the issues being studied. Please visit the [Trudeau Centre for Peace, Conflict and Justice website](#) for current offering information.

Prerequisite: [PCJ360H1](#), [PCJ362H1](#)

Breadth Requirements: Society and its Institutions (3)

PCJ461H1 - Research Methods in Peace, Conflict and Justice

Hours: 48S

This course guides each student through their own individual research project, embedded in an interactive group learning process, in order to offer an applied introduction to research methods for peace, conflict and justice studies. Students work through the full research process, including: identifying a research question, learning how to conduct effective literature reviews, developing a rigorous research design, and applying quantitative and qualitative methods to answering questions. Rather than conducting research independently or studying research methods in isolation, the course combines the two: students learn collectively about the different steps in the research process while simultaneously applying those steps to their own research project. This is then complemented by presenting that research and discussing different research projects in class, so as to receive continuous feedback and be exposed to a variety of research methods and approaches.

Prerequisite: Enrolment restricted to students enrolled in the Peace, Conflict and Justice Specialist program

Corequisite: [PCJ460H1](#)

Breadth Requirements: Society and its Institutions (3)

PCJ499H1 - Peace and Conflict Studies Independent Study Course

Previous Course Number: PCS499H1

This course is designed to provide students with the opportunity to explore topics not covered in the curriculum, or to develop a more detailed focus on topics covered. Approval of the program director is required. The student must obtain written agreement of the instructor who will supervise the independent study, submit the proposal to and obtain approval from the director and program administrator, who will then add the student to the course. Not eligible for CR/NCR option.

Applications are due two weeks before course enrolment deadlines.

Prerequisite: [PCJ260Y1](#)/ ([PCJ260H1](#), [PCJ261H1](#))

Exclusion: [PCS499H1](#)

Recommended Preparation: For students enrolled in the Peace, Conflict and Justice Major or Specialist program.

Breadth Requirements: Society and its Institutions (3)
