Message from the Interim Dean

Welcome to the Faculty of Arts & Science!

Whether you are new to Arts & Science, or a returning student, I encourage you to take advantage of the extraordinary breadth of learning opportunities available to you. With more than 390 undergraduate programs to choose from, Arts & Science students can build a personalized degree by combining courses and programs from diverse subject areas—from African studies to data science to criminology and sociolegal studies, just to name a few!

In-class courses represent one of the many educational modalities at the Faculty. Research, international, creative and professional opportunities can also be part of your U of T experience. These enriching opportunities are designed to help you appreciate the complexity and interconnectedness of our world and provide practical, experiential learning.

As you navigate your degree, remember all of the resources and services that are available to help you achieve your goals. Your college is your home base, equipped with a writing centre and academic advisors to aid your success. There are also online tools like [Sidney Smith Commons](#), as well as dedicated supports for mental health and wellness.

I wish you a fantastic academic year and look forward to seeing you around campus.

Stephen Wright
Interim Dean, Faculty of Arts & Science
Professor, Department of Ecology & Evolutionary Biology

How to Use the Calendar

The Academic Calendar is a Faculty of Arts & Science document that houses the most current information on the degrees, programs, and courses offered, as well as rules and regulations. The Academic Calendar is published once a year in mid-May. Updates made post-publication may address corrections to courses, programs, or other general information.

Much of the information in the Calendar will be seen in other places. For example, course descriptions can also be found on the [Timetable Builder](#), and a breakdown of completion of program – and the degree – can be found on [Degree Explorer](#).

Program and Certificate Search: Search the Academic Calendar for programs and certificates by keyword, type (Specialist, Major, Minor, Focus, Certificate), or by subject area.

Course Search: Search the Academic Calendar for courses by keyword (in the course code, title, or description), program area, prerequisites, or breadth requirements.

Program Areas A-Z: Review a list of program or subject areas.

Course Changes: Review a list of all approved new and retired courses since the publication of the previous Academic Calendar.

Program and Certificate Changes: Review a list of all changes to programs and certificates since the publication of the previous Academic Calendar.

PDF version: Access a PDF version of the current Academic Calendar (typically available after the start of the Fall session).

Archived Calendars: Access PDF versions (including updates) of Academic Calendars from previous years.

Publication Updates: Review all updates to the current Academic Calendar following initial publication.

The top (horizontal) navigation menu of the Academic Calendar provides access to [degree requirements](#), [rules and regulations](#), and [rights and responsibilities](#).

Conventions

Certain conventions are useful in reading parts of the Calendar that deal with requirements, whether for courses (prerequisites, corequisites, recommended preparation) or programs.

- Commas (,) and semi-colons (;) indicate items in a list. Context indicates whether the list is of options a student can pick from, or whether it is a list of courses where a student is expected to take all of them. If not stated specifically, assume the list indicates that a student must take all options.
- The plus sign (+) means “and” but may be used as a strong “and” to indicate courses that are paired to be a single option or requirement.
A forward slash (/) means “or” and distinguishes multiple options to fulfil a specific requirement.
- Parentheses () or brackets [] identify courses that are grouped together to form a specific option or requirement.

For example, the First Year Requirements for the Cell and Molecular Biology Specialist:

- First Year:
BIO120H1, BIO130H1; (CHM135H1, CHM136H1)/ CHM151Y1; JMB170Y1/ (MAT135H1, MAT136H1)/
MAT137Y1/ MAT157Y1.

This text explains that there is a series of course requirements needed for first year, but within these there are options. Going from the beginning, this means:

- BIO120H1 and BIO130H1 are both required.
- There is a Chemistry (CHM) requirement, which is filled either by:
 - CHM135H1 and CHM136H1; or
 - CHM151Y1.
- There is also a Math requirement, filled either by:
 - JMB170Y1; or
 - MAT135H1 and MAT136H1; or
 - MAT137Y1; or
 - MAT157Y1.

These style conventions help the academic units offering programs try to list the options in a concise way. For any clarification, reach out directly to the academic unit, a College Registrar's Office, or the Faculty at ask.artsci@utoronto.ca.

How the Calendar Changes

The Academic Calendar is the official record of the curriculum of the Faculty as approved by the Faculty, including all the courses, programs, certificates, and degrees offered, and policies and rules around academic life. This information is also seen on other student websites and resources, including [Timetable Builder](#) and [Degree Explorer](#).

The Academic Calendar is published every twelve months and includes any changes that were approved in the previous twelve months. Changes can be small, like a change to a course title or description, but can also include new courses, changes to program or certificate requirements, and even new programs or certificates or retired programs or certificates. Changes can also include new or modified policies. All approved changes will have gone through planning, consultation, and governance approval before being published.

When does the information in the Academic Calendar come into effect?

The new Academic Calendar is published in May, and most of the items within it come into effect the September after publication. This means students can rely on the information in the Academic Calendar being in effect from September through to the end of the following August.

For example, the information in the 2025-26 Academic Calendar comes into effect September 2025. Students already following the 2024-25 Academic Calendar continue to do so through the Summer of 2025 but can use the new Calendar to begin planning their courses for 2025-26 Fall/Winter course enrolment and for program enrolment in the Spring of 2026.

Specifically, when it comes to any new information regarding courses, programs, or degrees offered, this means:

- New courses or changes to courses do not take effect until September, so courses in the Summer are from the previous Calendar and follow those rules. As an example: the changes to courses or new courses in the 2025-26 Academic Calendar do not start until September 2025, in the 2025-26 Fall/Winter session .
- Changes to programs – either to rules on how to enrol in the program or to complete the program – take effect the following Summer. Any changes in the 2025-26 Academic Calendar apply to students who enrol in the Spring/Summer of 2026 (allowing the 2025-26 Fall/Winter session to prepare and plan).
- Changes to degree requirements take effect for students entering the Faculty in September. Students who start their studies in September 2025 follow the rules for their degree requirements in the 2025-26 Academic Calendar.

This timeframe applies not only to changes to the curriculum – to degrees, programs, certificates, and courses – but also to rules and policies.

Exceptions

There are three different situations where new information in a new Calendar may come into effect right away or as of the start of the Summer academic session (i.e., starting May).

- Changes to Ancillary Fees – Some courses may charge a special fee to students in the course to offset the cost of specific course materials (for example, lab coats for certain science courses with laboratory work). Fees operate on a different cycle and, if they are changed, this takes effect starting in summer courses. So be sure to note, when using any Academic Calendar, that ancillary fees listed can change in the Summer at the end of that Calendar's cycle.
- Special or urgent changes to programs, certificates, or courses – If for any reason there is a change to courses, programs, and/or certificates that are urgently needed, or which are shown to only benefit students if they come into effect right away, these can take effect as of the Summer Session when the new Calendar is published. If this is true, the Academic Calendar will be annotated with special information about changes in effect as of March, when the program enrolment process begins.

- Changes that affect prospective students in high school – If any change in the Academic Calendar could significantly impact the planning for students in their last year of high school/secondary school, such changes may be published but be delayed by a year (or more) in taking effect, to allow time for students to adjust their studies before coming to the University of Toronto and the Faculty of Arts & Science.

Governing Structure of the Faculty of Arts & Science

Arts & Science Council

The Arts & Science Council is the governing body in the Faculty of Arts & Science. The Council is composed of elected members from the Faculty's undergraduate and graduate students, teaching staff, administrative and technical staff, and normally meets six times per year. It approves policy for the Faculty in the areas of admissions, curriculum development, evaluation and academic standing, and determines the Faculty's academic rules and regulations. Budgetary and administrative matters are not within the purview of Council; those responsibilities lie with the Dean of the Faculty.

The Council has several Standing Committees charged with specific responsibilities to formulate policy and to apply it in specific cases. Those committees are: Undergraduate Curriculum Committees, Graduate Curriculum Committee, Committee on Standing (petitions), Academic Appeals Board, and the Committee on Admissions. There is also an Agenda Committee which oversees the business conducted at each meeting of Council, and which can, in extreme cases, approve items when Council is unavailable and when urgency demands it.

Details on the Council and its sub-committees, along with the Constitution and By-Laws, rules for elections, meeting dates and agendas can be found on the [Faculty's Governance website](#).

Elections to Council and its Committees

Elections to fill the positions on the Arts & Science Council and its committees are held in the Spring for the following year's Council and committees. The exception is the election of First-Year representatives, held early in the Fall Term; this time may also be used to fill any seats still empty after the previous Spring.

Notification of the nomination and election dates, as well as nomination forms, will be available on the [Faculty's Governance website](#).

University and Faculty Leadership

Governing Council & the University of Toronto Senior Leadership

Governing Council of the University of Toronto, established in 1971, oversees the business of the University – its academic programs and planning, its business and finances, and the support for student community.

Governing Council, with this mandate, works closely with senior administrative leadership, including the University's Chancellor, the President, Vice-Presidents, the Provost and Vice-Provosts.

More about this leadership is available on the following web pages:

- [Office of the Governing Council](#) – For information not only on Governing Council, but the various boards and committees that report to it. There is also a link to the University's policies.
- [Office of the President](#) – For more information about the current President, Melanie Woodin, and her priorities in leading the University.
- [About U of T](#) – This page introduces you to the senior leadership of the University, with links to small bios to learn about each member.
- [Division of the Vice-President & Provost](#) – This page introduces the Vice-President and Provost and lists the many Vice-Provosts and their areas of work to support University life.

Arts & Science Council & Officers of the Faculty of Arts & Science

Faculty of Arts & Science Council, unlike Governing Council for the University, only oversees academic policy and curriculum in the Faculty of Arts & Science. The Dean of Arts & Science manages the business and financial side of the Faculty, supported by Vice-Deans, Associate Deans and senior administration. The Dean's Office, along with the Office of the Faculty Registrar, and the senior administration of the seven Colleges work closely with student groups and individual students to support communities of learning and engagement.

For more information about the Arts & Science Council, its Standing Committees, and its past and current business, please visit artsci.utoronto.ca/about/faculty-governance.

For more information about the current Dean of Arts & Science, please visit artsci.utoronto.ca/about/glance/leadership-team/dean-faculty-arts-science.

Faculty Officers for July 1, 2025 - June 30, 2026

(Academic appointment terms begin July 1 of a given year.)

Position	July 1, 2025 - June 30, 2026
Interim Dean, Faculty of Arts & Science	Professor Stephen Wright
Vice-Dean, Academic Operations	Professor Michael Widener
Vice-Dean, Academic Planning	Professor Gillian Hamilton
Vice-Dean, College Relations	Professor Markus Stock
Vice-Dean, Faculty & Academic Life	Professor Tamara Trojanowska
Acting Vice-Dean, Graduate Education	Professor Kimberly Strong (July 1, 2025 - December 31, 2025)
Vice-Dean, Graduate Education	Professor Antoinette Handley (on leave July 1, 2025 - December 31, 2025)
Acting Vice-Dean, Research & Infrastructure	Professor Jay Pratt (until December 31, 2025) Professor Kimberly Strong (January 1, 2026 - June 30, 2026)
Vice-Dean, Undergraduate	Professor Randy Boyagoda
Associate Dean, Student Affairs	Professor Suzanne Wood
Associate Dean, Teaching & Learning	Professor Don Boyes
Interim Associate Dean, Unit-Level Reviews	Professor Ebba Kurz

The Learning Experience

Language of Instruction

The default language of instruction in any course is English. If any course is taught in another language – for example, courses studying another language – then that is clearly stated either in the notes for that department/program, or in the course description.

Statement Regarding In-Person Learning

The University of Toronto delivers academic programs through an in-person learning environment. All students should therefore plan to attend on-campus activities in person in order to successfully complete their program/degree unless: (i) students have been approved by the University to participate in off-campus activities (such as study abroad or work terms), or (ii) the calendar entry for a program/degree explicitly states that no in-person activities are required.

While the University strives to maintain an in-person learning environment, the University reserves the right to alter the manner in which it delivers its courses and co-curricular opportunities in response to health and safety emergencies and public health guidance.

Academic Sessions and Terms

There are two Academic Sessions at the Faculty of Arts & Science.

- The **Fall/Winter** Session runs from September to April and is divided into two terms: First (September to December) and Second (January to April).
 - Each term of the Fall/Winter is comprised of 12 weeks for classes/lectures (thus, 24 weeks in total for the Session) and includes days for study break and for Faculty final exams (also called the Exam Period). Some courses, normally full (1.0 credit) courses, run the full 24 weeks from September to April; normally half-courses (0.5 credit) run in the Fall or Winter term. In some cases, courses may repeat and be offered in the Fall and the Winter.
 - Enrolment for an upcoming Fall/Winter normally begins in early July.
- The **Summer** Session runs from May to August (with a total of 12 weeks possible for course content) and has two short terms, a “First” and “Second”.
 - The first term runs from early May to mid-June, the other from early July to mid-August. Days are also allotted for exam preparation and for writing exams. Because of this compressed time period, many courses have double the normal lectures/tutorials in any week, and so the limit on the number of classes a student can take in the Summer is lower.
 - Enrolment for an upcoming Summer session normally begins in early March.

Students enrolled in a course are normally expected to be available from the start of classes through to the end of the Session, which is the last day of the final exam period.

Course Offerings

The Academic Calendar is the complete document of all the degrees, programs of study, and courses offered by the Faculty of Arts & Science. But note that each academic unit reserves the right not to offer every course every academic year. Every effort, however, is made to ensure that core mandatory courses are offered reliably every year, and in many cases, more than once through an academic year.

See [How to Use the Calendar](#) to learn more about what the Academic Calendar can tell you about the experience and expectations in any course offering.

Glossary of Terms

Academic standing

Academic standing is a reflection of a student's academic status based on their grade point averages. There are four types of academic standing in the Faculty of Arts & Science: "In Good Standing", "On Probation", "On Suspension", and "Refused Further Registration". Detailed information is available in the [Assessment of Academic Standing](#) section of the Calendar.

Academic unit

A department, college, interdisciplinary centre, school, or institute that provides academic offerings. A list of all [academic units within the Faculty of Arts & Science](#) is available on the Faculty website.

Breadth Requirement

The purpose of the Breadth Requirement is to ensure all students graduating with a degree from the Faculty of Arts & Science have chosen courses across a broad range of subject areas in the Faculty as part of their undergraduate education.

Almost all courses offered by the Faculty of Arts & Science are categorized in terms of one of the following five breadth requirement categories:

- 1 – Creative and Cultural Representations
- 2 – Thought, Belief and Behaviour
- 3 – Society and its Institutions
- 4 – Living Things and Their Environment
- 5 – Physical and Mathematical Universes

Detailed information is available in the [Degree Requirements](#) section of the Calendar.

Certificate

A certificate is composed of a sequence of 2.0 to 3.0 credits relating to an identified topic or theme that may complement the completion of a degree. A certificate is not a program (i.e. it is not the same as a specialist, major, or minor) and will not contribute toward the program(s) required to complete a degree ([HBA](#), [HBSC](#), or [BCom](#)).

The code for each certificate is included with the certificate title in the relevant entry in the Academic Calendar. Codes for all certificates in the Faculty of Arts & Science begin with 'ASCER'; for example, ASCER1401 is the code for the Certificate in Global German Studies (UofT Global Scholar). Codes can be used to search for certificates in the [Calendar](#) and also in [ACORN](#).

Co-requisite

A course that must be taken at the same time or prior to another course.

Course

An academic activity that is recorded with a result on a student's academic history. A passed course gives academic credit towards completing a degree, unless the course is marked "[Extra](#)", and may help complete a program and/or a breadth requirement.

Course code

The unique identifier of every course, which is used in the Academic Calendar and information systems like ACORN and Degree Explorer, for example, PSY100H1. Detailed information is available in the [Understanding Courses](#) section of the Calendar.

Course weight

The weight of a course equates to the number of credits assigned to a course and is determined by the required number of instructional hours for the course. With a few exceptions, the weight of courses in the Faculty of Arts & Science is either 0.5 or 1.0.

Credit

The weight assigned to each course in the Faculty of Arts & Science. With a few exceptions, courses are either full-credit (1.0 credit) or half-credit (0.5 credit). The total number of credits required to complete a degree in the Faculty is 20.0.

In each course code, unless otherwise stated in the course description, a “Y” after the numerals indicates a 1.0 credit course and an “H” indicates a 0.5 credit course. For example:

- PSY100H1 is a 0.5 credit course
- ECO220Y1 is a 1.0 credit course

Credit/No Credit (CR/NCR)

A grade of CR or NCR is added to a student's transcript instead of a percentage mark for courses that have been declared Credit/No Credit. Detailed information is available in the [Credit/No Credit](#) section of the Academic Calendar.

Division

The Faculty of Arts & Science, the University of Toronto Mississauga, the University of Toronto Scarborough, the John H. Daniels Faculty of Architecture, Landscape, and Design, and the Faculty of Applied Science & Engineering are all examples of academic divisions at the University of Toronto.

Exclusion

A course that cannot be taken for degree credit prior to, or concurrently with, another course.

Extra

The notation EXT is added to a student's transcript for a course that has been designated Extra. Detailed information is available in the [Extra Courses](#) section of the Calendar.

Focus

A focus is a small cluster of courses taken in conjunction with a specialist or major that identifies a student as having received substantial exposure to an area of emphasis within the specialist or major. Focuses denote an area of emphasis or specialization within a program. They are usually not mandatory.

The [code](#) for each focus is included with the focus title in the relevant entry in the Academic Calendar. Codes for all focuses in the Faculty of Arts & Science begin with 'ASFOC'; for example, ASFOC1478B is the code for the Focus in Data Analytics for the Economics Major. Codes can be used to search for a focus in the Calendar and also in ACORN.

Full-Course Equivalent (FCE)

An FCE is the equivalent of 1.0 credit. Courses that were previously referenced as 1.0 FCE or 0.5 FCE are now referenced as 1.0 credit or 0.5 credit.

Grade point average (GPA)

The weighted sum of the grade points earned, divided by the number of credits (a full-credit course is weighted as 1.0, a half-credit course as 0.5) in which grade points were earned. Detailed information is available in the [Grade Point Average](#) section of the Calendar.

Language citation

A language citation is a special recognition available in the Faculty of Arts & Science that shows advanced study of a language. A language citation is not a program and will not contribute toward the program(s) required to complete the degree. For detailed information, consult Faculty of Arts & Science Language Citation under the [Recognition of Academic Achievement](#) section of the Academic Calendar.

Late Withdrawal After the Drop Date (LWD)

Faculty of Arts & Science students may, for up to 3.0 credits and without a petition, request withdrawal from a course after the deadline to drop the course and until the last day of classes. The status of LWD is added to a student's transcript for the course instead of a percentage mark. Detailed information is available in the [Late Withdrawal After the Drop Date](#) section of the Calendar.

Lecture

A fundamental type of instruction that is standard in almost every course, where the instructor presents course content to

students. In the Calendar entry for each course, the number of hours that students will spend in lecture is followed by L; for example, 36L.

Letter of Permission

A Letter of Permission is the process by which the Faculty pre-approves a student enrolling in a course at another recognized institution and confirms whether transfer credit will be granted for the course. For detailed information, consult *Courses at Other Recognized Institutions* under the Taking Courses Outside the Faculty section of the Academic Calendar.

Limited enrolment program

A program with enrolment requirements in addition to the completion of 4.0 credits. Detailed information is available in the Open and Limited Programs section of the Calendar.

Major program

A comprehensive study of subject matter, requiring the completion of 6.0 to 8.0 credits. A major may be the primary area of degree studies, complemented with another major or two minor programs.

Program codes for all majors in the Faculty of Arts & Science begin with 'ASMAJ'; for example, ASMAJ1538 is the code for the Animal Physiology Major. Program codes can be used to search for a major in the Calendar and also in ACORN.

Minor program

A fundamental study of subject matter, requiring the completion of 4.0 credits. A minor complements degree studies where a major or a specialist is also being pursued.

Program codes for all minors in the Faculty of Arts & Science begin with 'ASMIN'; for example, ASMIN1407 is the program code for the Diaspora & Transnational Studies Minor. Program codes can be used to search for a minor in the Calendar and also in ACORN.

Open enrolment program

A program with no enrolment requirements except the completion of 4.0 credits. Detailed information is available in the Open and Limited Programs section of the Calendar.

Petition

A formal request submitted by a student to the Faculty of Arts & Science for an exception to a Faculty policy. Detailed information is available in the Petitions and Appeals section of the Calendar.

Practical

A component of a course that involves students being able to learn and apply their learning in a hands-on manner; for example, laboratories ("labs") for science courses. If a course has practicals, then it always has either lectures or seminars as well. In the Calendar entry for a course, the number of hours that students will spend in practical sessions is followed by P; for example, 18P.

Prerequisite

A course that a student must complete before taking another course, sometimes with a minimum grade.

Program code

Each specialist, major, and minor in the Faculty of Arts & Science has a distinct program code; for example, ASSPE0608 is the code for the Actuarial Science Specialist. Certificates and focuses also have distinct codes. Detailed information is available in the Elements of a Program or Certificate Description section of the Calendar.

Program type

The Faculty offers three types of programs, each of which can contribute to degree completion: specialists, majors, and minors.

Recommended preparation

A course that is suggested by the academic unit to prepare students for taking another course but that is not a prerequisite.

Seminar

A small-class experience, common for advanced courses, where the in-class process is a combination of some lecturing mixed with structured class discussion (and often, student presentations). In the Calendar entry for a course, the number of hours that students will spend in seminar is followed by S; for example, 24S.

Specialist program

The deepest and most extensive study of subject matter, and almost always represents the key area of degree studies. A specialist requires the completion of 10.0 to 14.0 credits.

Program codes for all specialists in the Faculty begin with 'ASSPE'; for example, ASSPE2575 is the code for the Global Health Specialist. Program codes can be used to search for a specialist in the [Calendar](#) and also in [ACORN](#)..

Stream

A categorization of special emphasis for a specialist or major program; streams are presented in the Academic Calendar as if they are each a distinct program. An example of a streamed program is the Cognitive Science Arts Major:

- Cognitive Science Major - Arts (Language and Cognition Stream); the code is ASMAJ1445B
- Cognitive Science Major - Arts (Perception and Attention Stream); the code is ASMAJ1445A
- Cognitive Science Major - Arts (Thinking and Reasoning Stream); the code is ASMAJ1445C

Tutorial

A smaller group meeting where students can discuss and ask questions about lecture material with either the instructor or (more often) a TA (teaching assistant). Tutorials always are part of a course that has either lectures or seminars. In the Calendar entry for a course, the number of hours that students will spend in tutorial is followed by T, for example, 24T.

Year of study

A Faculty of Arts & Science student who has:

- Completed fewer than 4.0 credits is in Year 1
- Completed 4.0 to 8.5 credits is in Year 2
- Completed 9.0 to 13.5 credits is in Year 3
- Completed 14.0 or more credits is in Year 4

Understanding Programs and Certificates

All degrees awarded by the Faculty of Arts & Science require and are defined by the program(s) – Specialist, Major, Minor – a student completes as a degree requirement. These programs identify the subject area(s) the student has pursued and completed. A program is a sequence of courses in certain areas, normally with some choice of options within the sequence. A certificate is composed of 2.0 to 3.0 credits relating to an identified topic or theme that may complement a degree program.

Elements of a Program

Programs and certificates can be searched directly using the Program and Certificate Search. Programs and certificates usually fall under a page dedicated to the academic unit that offers the program, but sometimes on their own page if they are very distinct from the usual programs that unit offers. Usually the program information is divided up this way:

- **Title** – The title indicates the subject area as well as Specialist, Major, Minor, Focus, or Certificate.
- **Code** – Each program and certificate has a distinct code, for example, ASSPE0608, which is the code for the Actuarial Science Specialist, comprising the following elements:
 - **AS**: All program and certificate codes begin with AS, indicating Arts & Science.
 - **SPE, MAJ, MIN, FOC, CER**: The next three letters indicate the program type – Specialist, Major, or Minor – or Focus or Certificate.
 - **Final four digits**: The final four digits usually indicate the individual area of study. In the example above, 0608 indicates Actuarial Science; the code for the Major in Actuarial Science, ASMAJ0608, includes the same final four digits.
- **Description** (optional) – A small bit of text to indicate what is notable about this program or certificate and why a student might select it as part of their academic or professional plans.
- **Enrolment requirements** – This describes what requirements, if any, a student must meet to in order to enrol in the program or certificate. A program or certificate can be entered only if a student has obtained 4.0 credits or is on track to doing so before the start of the next September.
- **Completion requirements** – This lays out – often year by year – the courses a student must complete to complete the program or certificate itself. This information is translated for use in Degree Explorer tool to help a student track their progress and plan future courses.
- **Notes** (optional) – If either the enrolment requirements or the completion requirements need some clarification, there may be special notes inserted in either area.
- **Course Groups** (program dependent) – Many programs, especially programs that can recognize a selection from a number of courses from many academic units to fulfil program requirements, will list courses grouped by category.

Specialist, Major, and Minor Programs

The programs offered by the Faculty that may be used to complete a degree are a Specialist, Major, or Minor.

- **Specialist** programs (from 10.0 to 14.0 credits to complete) offer the deepest and most extensive study of the subject matter in question, and almost always represent the key area of degree studies. The program codes for all Specialists in the Faculty of Arts & Science begin with 'ASSPE'.
- **Major** programs (from 6.0 to 8.0 credits to complete) offer a comprehensive study of the subject matter, and may be the primary area of degree studies, complemented with another Major or some Minor programs. The program codes for all Majors in the Faculty of Arts & Science begin with 'ASMAJ'.
- **Minor** programs (4.0 credits to complete) offer a fundamental study of the subject matter and complement degree studies where a Major or a Specialist is also being pursued. The program codes for all Minors in the Faculty of Arts & Science begin with 'ASMIN'.

Effective September 2025, students can complete only one program type – Specialist, Major, or Minor – in any individual area, as referenced by the same final four-digit program code. For example, students can complete only one of a Specialist (ASSPE1013), Major (ASMAJ1013), or Minor (ASMIN1013) in Sociology. For more information on what combination of programs ensure completion of a degree, and the allowable combinations of programs, refer to the [HBA/HBSc](#) or [BCom](#) Degree Requirements.

Open and Limited Programs

Programs in the Faculty of Arts & Science are either open or limited; in the Academic Calendar, the enrolment requirements section of each program will specify whether the program is open or limited enrolment. .

Open programs have no enrolment requirements except the completion of 4.0 credits. The enrolment requirements section for an open program may contain additional information that is useful for a student to know prior to enrolling in the program.

Limited programs have enrolment requirements in addition to the completion of 4.0 credits. These enrolment requirements are broken down in the following ways:

- Completed courses (with minimum grades)
 - For reasons of academic success, entry into the program relies on students having completed one or more specific courses, normally with a specific grade beyond a pass (50%).
- Variable Minimum Grade or Variable Minimum Grade Average
 - Limited programs with this requirement are in very high demand, and every year the program must establish a specific minimum grade (or a minimum average grade across multiple courses) based on how many students have applied and how many of the limited spaces are available. As such, this minimum changes each year and it is not possible to publish a guaranteed minimum.
 - Some programs may identify a minimum grade or minimum grade average that is required in order to ensure students' success in the program, however obtaining this minimum final grade or minimum grade average does not guarantee admission to the program.
- Special
 - Any requirement listed as “special” is a requirement that is beyond courses completed and grades achieved; for example, a supplementary application or audition.

Streams

Streams are categorizations of special emphasis for a Specialist or Major program. The difference between Streams shows itself in upper-year courses, while the courses usually taken in first or second year are similar across all Streams in the Major or Specialist. Streams are presented in the Academic Calendar like a distinct program.

Focuses

When focuses exist in an area of study, they are taken in conjunction with a Specialist or Major, and they allow a student to select a special cluster of course options that all contribute to study of a particular theme, topic, or sub-discipline within the area of study. Focuses are normally not mandatory and enhance how a student plans the completion of their programs. A completed focus will show on a student's transcript. The codes for all focuses in the Faculty of Arts & Science begin with 'ASFOC'.

Certificates

The University has three categories of Certificates. The Arts & Science Academic Calendar only includes those that must be completed by students pursuing a degree in the Faculty of Arts & Science. Certificates are composed of a sequence of 2.0-3.0 credits relating to an identified topic or theme that may complement a degree program. Pursuit of a Certificate may offer structure to elective course choices; these certificates do not offer any kind of professional certification. A completed Certificate will be noted on a student's transcript. Note that a Certificate is not a program and will not contribute toward the program(s) required to complete the degree. The codes for all Certificates in the Faculty of Arts & Science begin with 'ASCER'.

Understanding Courses

A course is an academic activity which is recorded with a result on a student's academic history. A passed course gives academic credit towards completing a degree, unless the course is marked Extra, and may help complete a program and/or a breadth requirement. The Faculty of Arts & Science offers full-credit (1.0 credit) and half-credit (0.5 credit) courses.

Elements of a Course

Below are the fields in the course description template. Links to existing courses as examples are included to help show how the template works.

Course Code

Element	Examples	Explanation
Course Code	ENG150Y1 , STA313H1	The full course code has 8 characters.
Course Designator	ENG, STA, J**	This three-letter designator identifies the program(s) or academic unit(s) offering the course. In these examples, ENG and STA refer to English and Statistical Sciences. J** (e.g., JIG, JIH, JSC) refers to a joint course which is offered by two programs or academic units.
Course Number	150, 313	Every course in a program has its own identifying digits. For-credit courses run from “100-level” (starting with a 1) all the way to “400-level” (starting with a 4), and as they go up, broadly they indicate more advanced or more focused study. The “level” does not restrict student access. For example, a third-year student could take 100- to 400-level courses, but a first-year student should be careful taking 200- or high-level courses.
Course Weight	Y (1.0) H (0.5)	This is only one of two letters, either a “Y” or an “H”: a “Y” indicates the course is a full-credit course and is worth 1.0 credit; an “H” indicates a half-credit course and is worth 0.5 credit.
Campus Indicator	1	This digit indicates the campus where the course is offered. In the Arts & Science Academic Calendar, normally a course has a “1” (one), indicating the downtown St. George Campus. Other indicators include a “0” (zero) meaning it is taught off-campus, a “3” (three) meaning it is taught at the University of Toronto Scarborough (UTSC), or “5” (five) meaning it is taught at the University of Toronto Mississauga (UTM).

Course Title

Indicates the topic and theme of the course. Some courses may have a general title of a “special topics course” in the Academic Calendar but the actual course content varies year by year; in such a case, seek out the academic unit's or program's website, or the Timetable offerings, to learn more about what will be offered. On the transcript, the full course titles normally appear, although some courses still list the abbreviated course title.

Types of Instruction (Lecture/Tutorial/Practical/Seminar Hours (L/T/P/S))

All courses comprise a certain number of hours dedicated to instruction. There are four types. Often courses may have more than one.

- **Lectures** are standard in almost every course as the fundamental type of instruction, where the instructor will present course content to students. All instructors have individual styles and approaches to lectures. For example, some instructors may take questions differently or present slides/visual aids differently.
- **Tutorials** are smaller group meetings where students can discuss and ask questions about lecture material with either the instructor or (more often) a Teaching Assistant (TA). Tutorials may also be used for some kinds of evaluation, like small quizzes or to be assessed on a student's participation in the course. Like practicals, tutorials always are part of a course that has either lectures or seminars (see below).
- **Practicals** involve students being able to learn and apply their learning hands-on, for example, laboratories (“labs”) for science courses. If a course has practicals, then it always has either lectures or seminars (see below).

- **Seminars** are a small-class experience, common for very advanced courses, where the in-class process is a combination of some lecturing mixed with structured class discussion and often student presentations. The Faculty also offers First-Year Foundation Seminars for newly admitted first-year students.

In brackets after the title, the number of hours that students will spend in lecture (L), in tutorial (T), in practical sessions (P), or seminar (S) for the course are listed. These are most often a multiple of 12, as the term is 12 weeks in length.

Calendar Description

This paragraph highlights the course content and themes to be delivered in the course. The description will state anything special about the course, from special aspects of the class experience (for example, language of study or field work), to the intended audience of the course (for example, a science course intended for non-science students as an elective), to any special ancillary fees (for example, lab material).

Prerequisites, Co-requisites, Recommended Preparation

These fields indicate courses which a student must complete before taking the course in question (prerequisites), sometimes with a minimum grade, take at the same time or prior to this course (co-requisites), or that are suggested (recommended preparation). The academic units that offer a course can remove students who do not have needed prerequisites or corequisites. Students are responsible for reviewing this information for their course planning.

Exclusions

Some courses overlap in content. This can be because the same kind of material may be offered in the context of different areas of study (like introductory statistics), or because there may be certain similar course material that is offered at different levels of difficulty, or because some courses have content that used to be offered in an older and now retired course. When reading a course description, if a student sees a course listed under “exclusions” that includes a course they already have credit for, they should not normally take this course. Academic units can remove students who have course exclusions, and even if they choose not to, the new course will not count for degree credit and will be marked “Extra”.

Breadth Requirement

Almost all courses are categorized in terms of one of the five breadth requirement categories:

- 1 (Creative and Cultural Representations)
- 2 (Thought, Belief and Behaviour)
- 3 (Society and its Institutions)
- 4 (Living Things and Their Environment)
- 5 (Physical and Mathematical Universes)

Half-credit courses offer 0.5 credits towards only one of the categories; full-credit courses offer either 0.5 credits in two different categories, or 1.0 credit in one category.

HBA/HBSc Requirements

Degree Requirements:

Honours Bachelor of Arts (HBA)/Honours Bachelor of Science (HBSc)

Number of Credits	20.0. At least 10.0 credits must be offered by the Faculty of Arts & Science.
Level of Credits	Minimum of 13.0 at the 200/300/400-level At least 6.0 at the 300/400-level
Program Requirements	1 Specialist, or 2 Majors*, or 1 Major + 2 Minors* * must consist of 12.0 different credits
Cumulative Grade Point Average (GPA)	1.85
Breadth Requirement	The Breadth Requirement can be completed in one of two ways: (a) at least 1.0 credit in each of 4 of the 5 categories below, or (b) at least 1.0 credit in each of any 3 of the 5 categories, and at least 0.5 credit in each of the other 2 categories. <ol style="list-style-type: none"> 1. Creative and Cultural Representations 2. Thought, Belief, and Behaviour 3. Society and Its Institutions 4. Living Things and Their Environment 5. The Physical and Mathematical Universes

To qualify for an Honours Bachelor of Arts (HBA) or Honours Bachelor of Science (HBSc), a student must:

a) Obtain standing (i.e., complete with a mark of 50% or higher/P/CR) in at least 20.0 credits that meet the following criteria:

- At least 13.0 credits at the 200+ level, including a minimum of 6.0 credits at the 300+ level. No more than 1.0 credit at the 300+ level in transfer credit may be counted towards the minimum number of 300- and 400-level credits, except transfer credits attained through a University of Toronto exchange program.
- At least 10.0 credits from Faculty of Arts & Science courses. Note that transfer credits attained through a University of Toronto exchange program contribute to this 10.0 credits minimum.
- No more than 15.0 credits may have the same three-letter designator ("AST," "ENG," etc.). Courses beyond this limit will not be included in the 20.0 credits required for the degree, but will be counted in all other respects.

b) Complete one of the following:

- One Specialist program (which includes at least 1.0 credit at the 400-level), or
- Two Major programs, which must include at least 12.0 different credits, or
- One Major and two Minor programs, which must include at least 12.0 different credits

Whether a student receives an HBA or HBSc depends on the programs that are completed; see [Program Requirements](#).

c) Complete the Arts & Science Breadth Requirement.

d) Obtain a Cumulative GPA of 1.85 or more by the time of graduation. Students who meet all the requirements for the HBA/HBSc except for the GPA requirement may elect to graduate with a Bachelor of Arts/Bachelor of Science degree provided that their final Cumulative GPA is between 1.5 and 1.84.

Program Requirements

Completion of one or more programs is only one part of the general degree requirements. Variations made in program details for individual students do not in any way affect degree requirements. Programs are groupings of courses in one or more disciplines.

Programs of Study are one of:

- **Specialist** Program: a sequence of between 10.0 and 14.0 credits in one or more disciplines (note that some interdisciplinary Specialist programs may require up to 16.0 credits). Specialist programs must include at least 4.0 credits from 300+ level courses, of which 1.0 credit must be at the 400 level.
- **Major** Program: a sequence of between 6.0 and 8.0 credits in one or more disciplines. Major programs must include at least 2.0 credits from 300+ level courses, of which one 0.5 credit must be at the 400 level.
- **Minor** Program: a sequence of 4.0 credits in one or more disciplines. Minor programs must include at least 1.0 credit at the 300+ level.

Please note that some courses included as program options may have prerequisites as requirements not listed in the program but which must be taken. Programs which list optional courses do not necessarily list their prerequisites. Students are responsible for fulfilling prerequisites; students enrolled in courses for which they do not have the published prerequisites may have their registration in those courses cancelled at any time without warning.

Students are required to:

- Enrol in at least one and no more than three programs (of which only two can be Majors or Specialists), in the session in which they pass the course that brings them to a total of 4.0 credits. See the Arts & Science Program Toolkit for details.
- Meet any enrolment requirements for a program as stated in the Calendar.
- The programs(s) completed determine whether a student receives the Honours Bachelor of Science (HBSc) or the Honours Bachelor of Arts (HBA) degree upon graduation. Each program entry lists the type of degree it leads to. For example, in the English section, the English Specialist listing is followed by “Arts program;” in the Mathematics section, the Math Major is followed by “Science program,” etc. A student completing one Specialist in an Arts area would receive the HBA; a student completing one Specialist in a Science area would receive the HBSc
 - Effective September 2025, students can complete only one program type – Specialist, Major, or Minor – in any individual area, as referenced by the same final four-digit program code. For example, students can complete only one of a Specialist (ASSPE1013), Major (ASMAJ1013), or Minor (ASMIN1013) in Sociology.

For program combinations that include more than one area (Arts and Science), the following applies:

- A student completing one Major in a Science area and one Major in an Arts area has a choice of either the HBSc or the HBA.
- In combinations of one Major and two Minors, the type of degree depends on the areas of the three programs. For example, if the Major is in a Science area and the two Minors are in Arts areas (or vice versa), the student has a choice of either the HBSc or the HBA. If the Major and one Minor are in Science areas and the other Minor is in an Arts area, the student would receive the HBSc. Similarly, if the Major and one Minor are in Arts areas and the other Minor is in a Science area, the student would receive the HBA.
- A student completing one Specialist in a Science area and an additional Major in an Arts area (or vice versa) has a choice of either the HBSc or the HBA.

- Students enrolled in either two Majors or one Major and two Minors must ensure they have a minimum of 12.0 different credits between the programs. If a student is enrolled in two Majors and one Minor, credits from the Minor can be used to complete the degree requirement of 12.0 different credits across programs as long as:
 - the three programs have all been completed and confirmed as complete by the relevant academic units, and
 - all degree requirements are complete except the 12.0 different credits.

For example:

- For a student enrolled in the Physiology Major (8.0 credits) and the Biology Major (8.0 credits):
 - In order to meet the 12.0 different credit requirement, they may have up to 4.0 overlapping credits between their Majors ($8.0 + 8.0 = 16.0$; $16.0 - 12.0 = 4.0$).
 - These two programs contain 3.0 core credits in common: (BIO120H1 and BIO130H1), (CHM135H1 and CHM136H1), and (BIO220H1 and BIO230H1). Therefore, they may take up to 1.0 more overlapping credit between the majors. In short, $8.0 \text{ for PSL} + 8.0 \text{ for BIO} = 16.0 \text{ credits}$; $16.0 \text{ credits} - 12.0 \text{ different credits} = 4.0 \text{ credits overlapping allowed}$.

Self-Designed Programs

In rare circumstances, a student may propose to design their own program, which must be substantially different from any program in this Calendar. Such cases are exceptional. Such a program, if formally adopted by the student's College on the basis of its academic rigour and coherence, and if approved by the Office of the Dean, will be accepted as fulfilling the degree requirement for certification in a program (transcripts indicate only "Completed Self-designed Program approved by 'X' College"). Since the approval process is necessarily a long one, students following this alternative must discuss this process with their College Registrar immediately after completion of 4.0 credits in the Faculty.

Breadth Requirement

The purpose of the Breadth Requirement is to ensure all students graduating with a degree from the Faculty of Arts & Science have chosen courses across a broad range of subject areas in the Faculty as part of their undergraduate education.

The five Breadth Requirement categories are:

1. Creative and Cultural Representations

An appreciation for the diversity of cultural products, their meanings, and their socio-historical contexts through exposure to works in a variety of media and forms. Courses in this category focus on creative products and cultural expression, engaging students in activities such as the reading of texts, the learning of languages, and the study of art, film or oral traditions. These courses would normally focus on the conditions through which such works are produced, on their various interpretations in societal context, and on the ways in which those interpretations may have changed over time.

2. Thought, Belief, and Behaviour

Familiarity with investigations of the mind and individual behaviour, and the formation and function of systems of meaning, belief, and communication. These courses explore the ways in which the mind perceives reality and makes sense of both the human and natural world. Their content may focus on the creation of meaning and the ways in which belief systems are sustained and reproduced, as well as on the communication of meaning through language and other symbolic systems. Many courses falling into this category centre upon understanding collective belief and the nature of human thought, and the ways in which these shape societal behavior and norms.

3. **Society and Its Institutions**

Knowledge of societal organization, institutions, and systems, the ways they change over time, and the theories and models used to understand them. These courses include not only the study of social, economic and political systems, but also the ways in which humans arrange their built environments and manage environmental systems to meet their own needs. They will typically explore the social networks and systems that organize human lives and modify their environments. Courses in this category will generally approach these issues using social science methodologies and/or historical and critical analyses. Courses may also situate the issues explored in relation to relevant social theory (or theorists), models, or approaches to understanding societal problems.

4. **Living Things and Their Environment**

A grasp of the principles and concepts of life and the relation between organisms and their natural surroundings, and the ability to make and evaluate observations about living things. This category includes courses broadly from the biological and environmental sciences, which develop an understanding of the study of life and its contexts; levels of organization range from molecules to the biosphere. Courses will cultivate an understanding of scientific methodology (the formulation of hypotheses, experimental design, and quantitative analysis methods), its application in the life sciences, and its limits in providing answers concerning biological and environmental questions.

5. **The Physical and Mathematical Universes**

An understanding of theories of the physical world and mathematical models, and the ability to apply them and to make and evaluate observations relating to them. Courses in the physical sciences study the constituents and mechanisms that govern the natural world, with an emphasis on non-living systems. Such courses develop an understanding of scientific methodology (the formulation of hypotheses, experimental design, and quantitative analysis methods), its application and its limits.

The Breadth Requirement can be completed in one of two ways:

- at least 1.0 credit in each of 4 of the 5 categories, or
- at least 1.0 credit in each of any 3 of the 5 categories, and at least one 0.5 credit in each of the other 2 categories.

Most courses in the Faculty of Arts & Science are classified into five Breadth categories by subject content. A few courses do not have a Breadth Requirement assigned and therefore do not count toward this degree requirement. If they do state a Breadth Requirement, half-credit courses offer 0.5 credits towards only one of the categories; full-credit courses offer either 0.5 credits in two different categories, or 1.0 credit in one. Students may count towards the Breadth Requirement any course which has a Breadth designation, and in which they have achieved standing (a grade of 50% or higher/P/CR), including courses completed toward program (Specialist, Major, Minor) requirements. Courses that have been designated Extra can contribute toward the Breadth Requirement.

A course's Breadth designation can be found following the course description in the Calendar for the year in which the course is taken; in the instance where a course does not have a Breadth category, the Breadth Requirement will not appear in the course description.

For example:

HIS103Y1: Strategy and Statecraft: War, Diplomacy, and the Development of the International System, 1600–1945

Hours: 48L/20T

This course explores the history of the international state system, encouraging students to consider how this system has been constantly adapting and evolving for hundreds of years as states compete for power. It examines how wars between European states, along with diplomacy, empire-building, and the quest for wealth, led—unintentionally in many ways—to a broader, international system not confined only to European “great powers.” Students will study themes such as strategy and war, empire and imperialism, and trade, diplomacy, and state-building to understand the rise and fall of major states and empires over the centuries.

Key events include the Thirty Years War in Europe; the global implications of the Seven Years War and Napoleonic Wars; and the roles of non-European regions like China, India, Japan, and the United States in the 18th and 19th centuries. The course also considers the effects of imperial competition in Africa and Asia, both for the imperial powers and the peoples and states of those continents; the diplomacy and competition that led to the First World War; and the global impact of the Second World War, with the rise of “superpowers” and the collapse of the European and Japanese empires.

Exclusion: HIS100Y1, HIS101Y1, HIS102Y1, HIS106Y1, HIS107Y1, HIS108Y1, HIS109Y1, HIS110Y1
 Breadth Requirements: Society and its Institutions (3)

HIS103Y1 counts as 1.0 credit in Category 3 (Society and Its Institutions).

ENG215H1: The Canadian Short Story

Hours: 36L

An introduction to the Canadian short story, this course emphasizes its rich variety of settings, subjects, and styles.

Prerequisite: 1.0 ENG credit or any 4.0 credits
 Breadth Requirements: Creative and Cultural Representations (1)

ENG215H1 counts as one 0.5 credit in Category 1 (Creative and Cultural Representations).

ANT100Y1: Introduction to Anthropology

Hours: 48L/12T

What does it mean to be human? In this course, you will learn the diverse and varied ways that anthropologists address this question. You will explore such topics as human origins and biological variation, our primate relatives, the relationship between biology and culture, the diversity of political, economic, and social practices through space and time, the origin of farming and cities, the political use of archaeology and heritage, the relationship between language and society, religion, and how capitalism and Industrialization shape our lives. You will learn from specialists in Evolutionary Anthropology, Archaeology, and Socio-cultural and Linguistic Anthropology and have the chance for hands-on learning and discussion through biweekly tutorials.

Breadth Requirements: Living Things and Their Environment (4), Society and its Institutions (3)

ANT100Y1 counts as one 0.5 credit in Category 3 (Society and its Institutions) and one 0.5 credit in Category 4 (Living Things and Their Environment).

BCom Requirements

Degree Requirements: Bachelor of Commerce (BCom)

Number of Credits	20.0. At least 10.0 credits must be offered by the Faculty of Arts & Science.
Level of Credits	Minimum of 13.0 at the 200/300/400-level At least 6.0 at the 300/400-level, including at least 1.0 at the 400-level
Program Requirements	Management, Finance & Economics, or Accounting Specialist (A minimum of 8.0 RSM/MGT credits, 8.0 other A&S credits)
Cumulative Grade Point Average (GPA)	1.85
Breadth Requirement	<p>The Breadth Requirement can be completed in one of two ways: (a) at least 1.0 credit in each of 4 of the 5 categories below, or (b) at least 1.0 credit in each of any 3 of the 5 categories, and at least one 0.5 credit in each of the other 2 categories.</p> <ol style="list-style-type: none"> 1. Creative and Cultural Representations 2. Thought, Belief, and Behaviour 3. Society and Its Institutions 4. Living Things and Their Environment 5. The Physical and Mathematical Universes

To qualify for a Bachelor of Commerce (BCom) degree, a student must:

a) Obtain standing (i.e., complete with a mark of 50% or higher/P/CR) in at least 20.0 credits that meet the following criteria:

- At least 13.0 credits at the 200+ level, including a minimum of 6.0 credits at the 300+ level. No more than 1.0 credit at the 300+ level in transfer credit may be counted towards the minimum number of 300- and 400-level credits, except transfer credits attained through a University of Toronto exchange program.
- At least 10.0 credits in Faculty of Arts & Science courses. Note that transfer credits attained through a University of Toronto exchange program contribute to this 10.0 credits minimum.
- No more than 15.0 credits may have the same three-letter designator ("AST," "ENG," etc.). Courses beyond this limit will not be included in the 20.0 credits required for the degree, but will be counted in all other respects.

b) Complete one of the following program requirements: Specialist in Accounting, Specialist in Finance and Economics, or Specialist in Management

c) Complete the Arts & Science Breadth Requirement;

d) Achieve a cumulative GPA of 1.85 or more by the time of graduation.

Program Requirements

Completion of one or more programs is only one part of the general degree requirements. Variations made in program details for individual students do not in any way affect degree requirements. Programs are groupings of courses in one or more disciplines.

Programs of Study are one of:

- **Specialist** Program: a sequence of between 10.0 and 14.0 credits in one or more disciplines (note that some interdisciplinary Specialist programs may require up to 16.0 credits). Specialist programs must include at least 4.0 credits from 300+ level courses, of which 1.0 credit must be at the 400 level.
- **Major** Program: a sequence of between 6.0 and 8.0 credits in one or more disciplines. Major programs must include at least 2.0 credits from 300+ level courses, of which one 0.5 credit must be at the 400 level.
- **Minor** Program: a sequence of 4.0 credits in one or more disciplines. Minor programs must include at least 1.0 credit at the 300+ level.

Please note that some courses included as program options may have prerequisites as requirements not listed in the program but which must be taken. Programs which list optional courses do not necessarily list their prerequisites. Students are responsible for fulfilling prerequisites; students enrolled in courses for which they do not have the published prerequisites may have their registration in those courses cancelled at any time without warning.

Students are required to:

- Enrol in at least one and no more than three programs (of which only two can be Majors or Specialists), in the session in which they pass the course that brings them to a total of 4.0 credits. Bachelor of Commerce students complete either the Specialist in Accounting, Specialist in Finance and Economics, or Specialist in Management and can enrol in Major or Minor programs in other disciplines as well.
 - Effective September 2025, students can complete only one program type – Specialist, Major, or Minor – in any individual area, as referenced by the same final four-digit program code. For example, students can complete only one of a Specialist (ASSPE1013), Major (ASMAJ1013), or Minor (ASMIN1013) in Sociology.
- Meet any enrolment requirements for a program as stated in the Calendar.

Self-Designed Programs

In rare circumstances, a student may propose to design their own program, which must be substantially different from any program in this Calendar. Such cases are exceptional. Such a program, if formally adopted by the student's College on the basis of its academic rigour and coherence, and if approved by the Office of the Dean, will be accepted as fulfilling the degree requirement for certification in a program (transcripts indicate only "Completed Self-designed Program approved by 'X' College"). Since the approval process is necessarily a long one, students following this alternative must discuss this process with their College Registrar immediately after completion of 4.0 credits in the Faculty.

Breadth Requirement

The purpose of the Breadth Requirement is to ensure all students graduating with a degree from the Faculty of Arts & Science have chosen courses across a broad range of subject areas in the Faculty as part of their undergraduate education.

The five Breadth Requirement categories are:

1. Creative and Cultural Representations

An appreciation for the diversity of cultural products, their meanings, and their socio-historical contexts through exposure to works in a variety of media and forms. Courses in this category focus on creative products and cultural expression, engaging students in activities such as the reading of texts, the learning of languages, and the study of art, film or oral traditions. These courses would normally focus on the conditions through which such works are produced, on their various interpretations in societal context, and on the ways in which those interpretations may have changed over time.

2. **Thought, Belief, and Behaviour**

Familiarity with investigations of the mind and individual behaviour, and the formation and function of systems of meaning, belief, and communication. These courses explore the ways in which the mind perceives reality and makes sense of both the human and natural world. Their content may focus on the creation of meaning and the ways in which belief systems are sustained and reproduced, as well as on the communication of meaning through language and other symbolic systems. Many courses falling into this category centre upon understanding collective belief and the nature of human thought, and the ways in which these shape societal behavior and norms.

3. **Society and Its Institutions**

Knowledge of societal organization, institutions, and systems, the ways they change over time, and the theories and models used to understand them. These courses include not only the study of social, economic and political systems, but also the ways in which humans arrange their built environments and manage environmental systems to meet their own needs. They will typically explore the social networks and systems that organize human lives and modify their environments. Courses in this category will generally approach these issues using social science methodologies and/or historical and critical analyses. Courses may also situate the issues explored in relation to relevant social theory (or theorists), models, or approaches to understanding societal problems.

4. **Living Things and Their Environment**

A grasp of the principles and concepts of life and the relation between organisms and their natural surroundings, and the ability to make and evaluate observations about living things. This category includes courses broadly from the biological and environmental sciences, which develop an understanding of the study of life and its contexts; levels of organization range from molecules to the biosphere. Courses will cultivate an understanding of scientific methodology (the formulation of hypotheses, experimental design, and quantitative analysis methods), its application in the life sciences, and its limits in providing answers concerning biological and environmental questions.

5. **The Physical and Mathematical Universes**

An understanding of theories of the physical world and mathematical models, and the ability to apply them and to make and evaluate observations relating to them. Courses in the physical sciences study the constituents and mechanisms that govern the natural world, with an emphasis on non-living systems. Such courses develop an understanding of scientific methodology (the formulation of hypotheses, experimental design, and quantitative analysis methods), its application and its limits.

The Breadth Requirement can be completed in one of two ways:

- at least 1.0 credit in each of 4 of the 5 categories, or
- at least 1.0 credit in each of any 3 of the 5 categories, and at least one 0.5 credit in each of the other 2 categories.

Most courses in the Faculty of Arts & Science are classified into five Breadth categories by subject content. A few courses do not have a Breadth Requirement assigned and therefore do not count toward this degree requirement. If they do state a Breadth Requirement, half-credit courses offer 0.5 credits towards only one of the categories; full-credit courses offer either 0.5 credits in two different categories, or 1.0 credit in one. Students may count towards the Breadth Requirement any course which has a Breadth designation, and in which they have achieved standing (a grade of 50% or higher/P/CR), including courses completed toward program (Specialist, Major, Minor) requirements. Courses that have been designated Extra can contribute toward the Breadth Requirement.

A course's Breadth designation can be found following the course description in the Calendar for the year in which the course is taken; in the instance where a course does not have a Breadth category, the Breadth Requirement will not appear in the course description.

For example:

HIS103Y1: Strategy and Statecraft: War, Diplomacy, and the Development of the International System, 1600–1945

Hours: 48L/20T

This course explores the history of the international state system, encouraging students to consider how this system has been constantly adapting and evolving for hundreds of years as states compete for power. It examines how wars between European states, along with diplomacy, empire-building, and the quest for wealth, led—unintentionally in many ways—to a broader, international system not confined only to European “great powers.” Students will study themes such as strategy and war, empire and imperialism, and trade, diplomacy, and state-building to understand the rise and fall of major states and empires over the centuries.

Key events include the Thirty Years War in Europe; the global implications of the Seven Years War and Napoleonic Wars; and the roles of non-European regions like China, India, Japan, and the United States in the 18th and 19th centuries. The course also considers the effects of imperial competition in Africa and Asia, both for the imperial powers and the peoples and states of those continents; the diplomacy and competition that led to the First World War; and the global impact of the Second World War, with the rise of “superpowers” and the collapse of the European and Japanese empires.

Exclusion: HIS100Y1, HIS101Y1, HIS102Y1, HIS106Y1, HIS107Y1, HIS108Y1, HIS109Y1, HIS110Y1

Breadth Requirements: Society and its Institutions (3)

HIS103Y1 counts as 1.0 credit in Category 3 (Society and Its Institutions).

ENG215H1: The Canadian Short Story

Hours: 36L

An introduction to the Canadian short story, this course emphasizes its rich variety of settings, subjects, and styles.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG215H1 counts as one 0.5 credit in Category 1 (Creative and Cultural Representations).

ANT100Y1: Introduction to Anthropology

Hours: 48L/12T

What does it mean to be human? In this course, you will learn the diverse and varied ways that anthropologists address this question. You will explore such topics as human origins and biological variation, our primate relatives, the relationship between biology and culture, the diversity of political, economic, and social practices through space and time, the origin of farming and cities, the political use of archaeology and heritage, the relationship between language and society, religion, and how capitalism and Industrialization shape our lives. You will learn from specialists in Evolutionary Anthropology, Archaeology, and Socio-cultural and Linguistic Anthropology and have the chance for hands-on learning and discussion through biweekly tutorials.

Breadth Requirements: Living Things and Their Environment (4), Society and its Institutions (3)

ANT100Y1 counts as one 0.5 credit in Category 3 (Society and its Institutions) and one 0.5 credit in Category 4 (Living Things and Their Environment).

Academic Record

In This Section:

- [Grading and Course Marks](#)
- [Grade Point Average](#)
- [Assessment of Academic Standing](#)
- [Recognition of Academic Achievement](#) (Including Dean's List Scholar, Distinction and High Distinction, Faculty of Arts & Science Language Citation, Faculty of Arts & Science Scholarships)

Grading and Course Marks

Marks Review Procedure

The Faculty of Arts & Science implements the Grading Regulations, reviews course marks submitted by academic units, and posts the official marks. Official marks are communicated to students via ACORN.

Each academic unit has an appointed faculty member (e.g., a Chair, Program Director, Vice Principal) who is responsible for reviewing marks submitted by instructors. This appointed faculty member may ask for clarification of any anomalous results or distributions, or disparity between sections of the same courses. Both the appointed faculty member and the Dean have the right, in consultation with the instructor of the course, to adjust marks where there is an obvious and unexplained discrepancy between the marks submitted and the perceived standards of the Faculty. Final marks are official, and may be communicated to the students only after the review procedure has taken place. Marks, as an expression of the instructor's best judgment of each student's overall performance, will not be determined by any system of quotas.

Course Marks

Percentage	Letter Grade	Grade Point Value*	Grade Definition	
90-100	A+	4.0	Excellent	Strong evidence of original thinking; good organization; capacity to analyze and synthesize; superior grasp of subject matter with sound critical evaluations; evidence of extensive knowledge base.
85-89	A	4.0		
80-84	A-	3.7		
77-79	B+	3.3	Good	Evidence of grasp of subject matter; some evidence of critical capacity and analytic ability; reasonable understanding of relevant issues; evidence of familiarity with literature.
73-76	B	3.0		
70-72	B-	2.7		
67-69	C+	2.3	Adequate	Student who is profiting from their university experience; understanding of the subject matter; ability to develop solutions to simple problems in the material.
63-66	C	2.0		
60-62	C-	1.7		
57-59	D+	1.3	Marginal	Some evidence of familiarity with subject matter and some evidence that critical and analytic skills have been developed.
53-56	D	1.0		
50-52	D-	0.7		
0-49	F	0.0	Inadequate	Little evidence of even superficial understanding of subject matter; weakness in critical and analytic skills; with limited or irrelevant use of literature.

* The grade point values above apply to marks earned in individual courses; grade point averages are weighted sums of the grade points earned, and thus do not necessarily correspond exactly to the scale above.

In order to obtain final standing in a course, a student must receive at least a passing grade (50%)/P/CR in that course. A Grade of "F" is a failure. There are no supplemental examination privileges in the Faculty.

Transcript notations that may appear in lieu of a final mark and have no grade point value are:

Notation	Definition
AEG	Aegrotat Standing on the basis of term work and evidence of medical or exceptional circumstances, granted only by <u>petition</u>
CR/NCR	<u>Credit/No Credit</u>
EXT or XTR or X	Extra
GWR	Grade Withheld pending Review
IPR	(Course) In Progress
LWD	<u>Late Withdrawal After the Drop Date</u>
NGA	No grade available
P/FL	Pass/Failure. In cases where the FL grade is used in calculating grade point averages, the symbol "FL %" is used and a grade point value of 0.0 is assigned
SDF	Standing Deferred; granted only by <u>petition</u>
WDR	Late Withdrawal without academic penalty after the relevant deadline; granted only by <u>petition</u>

Grade Point Average

The Grade Point Average (GPA) is the weighted sum (a full-credit course is weighted as 1.0, a half-credit course as 0.5) of the grade points earned, divided by the number of courses in which grade points were earned. GPAs are calculated for degree students, non-degree students, and visiting students. For non-degree students who have completed a degree in the Faculty, the cumulative GPA includes all courses taken both as a degree student and as a non-degree student.

Four types of grade point averages are calculated:

- **Sessional GPA (SGPA):** The SGPA is calculated up to three times per year, based on marks obtained during each of the Fall term (September-December), the Winter term (January-April), and the Summer Session (May-August).
- **Annual GPA (AGPA):** The AGPA is calculated once, based on courses completed during the Fall/Winter Session as a whole.
- **Cumulative GPA (CGPA):** The CGPA is calculated on the same schedule as the SGPA and takes into consideration all the marks for all individual courses completed by the student to that point.
- **The Concurrent Teacher Education Program (CTEP) GPA:** Takes into account all Bachelor of Education courses and is only calculated for CTEP students.

Courses that are not included in the GPA calculation are:

- courses noted with AEG standing
- transfer credits
- courses designated Extra
- courses taken as CR/NCR
- courses evaluated on a Pass/Fail basis in which a grade of Pass (P) is achieved

If a grade of Fail (FL) is achieved in a course evaluated on a Pass/Fail basis, a grade point value of 0.0 may be assigned in which case the course is included in the GPA.

Assessment of Academic Standing

There are four kinds of academic standing:

- In Good Standing
- On Probation
- On Suspension
- Refused Further Registration

Academic standing is assessed for the first time at the end of the Session in which a student achieves final standing in at least one 0.5 credit course in the Faculty of Arts & Science, excluding:

- courses noted with AEG standing
- transfer credits
- courses designated Extra
- courses taken as CR/NCR
- courses evaluated on a Pass/Fail basis in which a grade of Pass (P) is achieved

If a grade of Fail (FL) is achieved in a course evaluated on a Pass/Fail basis, a grade point value of 0.0 may be assigned in which case the course is included in the GPA and therefore contributes to the assessment of academic standing.

Academic standing is assessed twice a year:

- At the end of the Fall/Winter Session; the GPAs used for this assessment are the annual and the cumulative GPAs.
- At the end of the Summer Session; the GPAs used for this assessment are the sessional and the cumulative GPAs.

In Good Standing

Students are described as In Good Standing if their cumulative GPA is 1.50 or higher, that is, they have not been assessed as On Probation, Suspended, or Refused Further Registration.

Probation, Suspension, and Refused Further Registration

Students are on academic probation if they

- a) have a cumulative GPA of less than 1.50 or
- b) return from suspension

Students On Academic Probation may take no more than 2.5 credits in each of the Fall and Winter terms, and no more than 1.0 credit in each of the Summer terms (see Number of Courses Taken).

Students who are on probation and, depending on individual enrolment, at the end of the next Fall/Winter Session or Summer Session when academic standing is assessed:

- have a cumulative GPA of 1.50 or more: will be in good standing
- have a cumulative GPA of less than 1.50 but an annual GPA of 1.70 or more (Fall/Winter Session) or a sessional GPA of 1.70 or more (Summer Session): will continue on probation
- have a cumulative GPA of less than 1.50 and an annual GPA of less than 1.70 (Fall/Winter Session) or a sessional GPA of less than 1.70 (Summer Session): will be suspended for one calendar year unless they have already been suspended for one year, in which case they will be suspended for three years.

Students who, having been suspended for three years, when next assessed have a cumulative GPA of less than 1.50 and an annual GPA of less than 1.70 (Fall/Winter Session) or a sessional GPA of less than 1.70 (Summer Session): will be refused further registration in the Faculty.

Recognition of Academic Achievement

Dean's List Scholar

This designation is given at the end of the Fall/Winter Session and/or Summer Session to Faculty of Arts & Science degree students who complete their fifth, tenth, fifteenth, or twentieth degree credits in the Faculty and obtain a Cumulative Grade Point Average of 3.50 or higher.

The following courses are included in the credit count for the Dean's List, as long as the student receives a final mark of 50% or higher or a status of CR or P:

- Faculty of Arts & Science courses completed for degree credit
- Courses in other divisions (for example the University of Toronto Mississauga (UTM), University of Toronto Scarborough (UTSC), or the John H. Daniels Faculty of Architecture, Landscape, and Design (Daniels)) completed by a degree student registered in the Faculty of Arts & Science
- Faculty of Arts & Science courses completed while a student was registered in another division and the student subsequently transferred to the Faculty of Arts & Science; the courses are retained and applied to the student's Faculty of Arts & Science academic record
- Courses completed while a student was registered at UTM, UTSC, or Daniels and the student subsequently transferred to the Faculty of Arts & Science; the courses are retained and applied to the student's Faculty of Arts & Science academic record

The following courses are not included in the credit count for the Dean's List:

- Transfer credits from secondary school (e.g., AP, IB, GCE, etc.) and/or other post-secondary institutions
- Courses in other divisions completed while a student was registered in the other division, with the exception of any retained courses as referenced above
- Courses designated Extra
- Courses with a final mark of 49% or lower, or with a status of NCR or FL

A "Dean's List Scholar" notation is added to each qualifying student's transcript in late June (for students who satisfy the criteria at the end of the Fall/Winter Session) and in late October (for students who satisfy the criteria at the end of the Summer Session). Dean's List Scholar notations are not applied at the end of the Fall term. There is no monetary value.

Students who satisfy the criteria but do not receive a transcript notation by the dates above for the appropriate session can contact the Office of the Faculty Registrar, Faculty of Arts & Science, at ask.artsci@utoronto.ca.

Distinction and High Distinction

Students who graduate with a Cumulative Grade Point Average (GPA)* of 3.50 or above are described as graduates "With High Distinction." This achievement is noted on the diploma and transcript.

Students who graduate with a Cumulative GPA* of 3.20 to 3.49 are described as graduates "With Distinction." This achievement is noted on the diploma and transcript.

*Note that the Cumulative GPA must be based on at least 5.0 credits taken for Faculty of Arts & Science degree credit.

Faculty of Arts & Science Language Citation

This is a special recognition available at the Faculty of Arts & Science that shows advanced study of a language. The Language Citation will consist of a notation on the transcript that reads: "Completed Requirements of Language Citation in [name of language]." This notation will appear in the Faculty of Arts & Science sessional segment of the student's academic record on the transcript listing the courses and marks for the session in which the Citation is assessed as complete. Note that Language Citation is not a program, and will not contribute toward the program(s) required to complete the degree.

The list below identifies the academic units that offer a Language Citation. For details, including the languages in which students may achieve a Citation, see the relevant entries in this Calendar.

- [Classics](#)
- [East Asian Studies](#)
- [French](#)
- [Hungarian](#)
- [Indigenous Studies](#)
- [Italian Studies](#)
- [Near & Middle Eastern Civilizations](#)
- [St. Michael's College](#)
- [Slavic and East European Languages and Cultures](#)

Please note that the Department of Spanish and Portuguese and Department of Germanic Languages and Literatures are no longer participating in the language citation initiative going forward. Please refer to the departments' Calendar sections ([Spanish](#), [Portuguese](#), [German](#)) for information on their current offerings, including language certificates.

Faculty of Arts & Science Scholarships

The Faculty offers many academically-based scholarships and other awards to exceptional degree students. Full details of these scholarships are available on the [Faculty website](#).

Course Enrolment

In This Section:

- [Year of Study](#)
- [Number of Courses Taken \("Course Load"\)](#)
- [Full-time and Part-time Status](#)
- [Extra Courses](#)
- [Repeating Failed Courses](#)
- [Repeating Passed Courses](#)
- [Credit/No Credit \(CR/NCR\)](#)
- [Cancelling Courses](#)
- [Late Withdrawal \(LWD\)](#)
- [Prerequisites, Co-requisites, and Exclusions](#)
- [Taking Courses Outside the Faculty](#)

Year of Study

A Faculty of Arts & Science student who has:

- Completed fewer than 4.0 credits is in Year 1
- Completed 4.0 to 8.5 credits is in Year 2
- Completed 9.0 to 13.5 credits is in Year 3
- Completed 14.0 or more credits is in Year 4

Number of Courses Taken ("Course Load")

Students may proceed towards the degree at a rate of their own choosing, within the following parameters:

1. The recommended course load for full-time students who are in good standing in each of the Fall and Winter terms is no more than 2.5 credits; the maximum course load in each term is 3.0 credits. During the priority period of enrolment students' maximum course load, included waitlisted courses, is 2.5 credits; once the priority period has ended, students may enrol in/waitlist for an additional 0.5 credit to the maximum of 3.0 credits. Special consideration will not be granted on the basis of enrolment in more than the recommended maximum.
2. The maximum course load for students who are in good standing during the Summer Session is 1.0 credit per term.
3. Students on Academic Probation may take no more than 2.5 credits in each of the Fall and Winter terms and no more than 1.0 credit in each of the Summer terms.
4. Once students have completed 4.0 credits in the Faculty of Arts & Science, their College Registrar may consider a request for an exception to the above limits; the Rotman Commerce Program Office considers requests for an exception for Bachelor of Commerce students. The College Registrar or Rotman Commerce Program Office, following Faculty guidelines, has the discretion to approve or deny such requests. Special consideration will not be granted on the basis of, and final examination schedules may be affected by, a course overload.
5. Students restricted to a reduced course load on admission may take no more than 1.5 credits in a Fall or Winter term unless approved by their College Registrar, and no more than 2.5 credits overall during the Fall/Winter Session. They may take a maximum of 1.0 credit in the Summer Session. Students restricted to part-time studies who wish to transfer to full-time studies should consult with their College Registrar.

6. To calculate course loads, students should consult this Calendar together with the [Timetable](#). The codes “Y1” or “H1” in a course code in the Calendar indicate the credit value:

Y1 = a full-credit course (1.0 credit), for which one credit is given (e.g., ANT100Y1)

H1 = a half-credit course (0.5 credit), for which one half credit is given (e.g., HIS332H1)

7. In the Timetable a section code is associated with a course code to indicate when the course is offered:

F = “First Term;” the first term of the Fall/Winter Session (September – December) or the first term of the Summer Session (May-June)

S = “Second Term;” the second term of the Fall/Winter Session (January – April) or the second term of the Summer Session (July – August)

Y = full session; the entire Fall/Winter Session (September – April) or the entire Summer Session (May – August)

8. Students should note that courses designated as “...Y1F” or “...Y1S” in the Timetable are particularly demanding.

Full-Time and Part-Time Status

Full-time Status

- A student enrolled in 3.0 credits or more in the [Fall/Winter Session](#) is full-time.
- A student enrolled in 1.5 credits or more in the [Summer Session](#) is full-time.

Part-time Status

- A student enrolled in 2.5 credits or fewer in the [Fall/Winter Session](#) is part-time.
- A student enrolled in 1.0 credit or fewer in the [Summer Session](#) is part-time.

Extra Courses

Extra courses appear on a student's academic record with a final course mark and are noted as "EXT". Extra courses do not count for degree credit and are not included in calculating a student's [Grade Point Average](#), however, they may count toward [prerequisite requirements](#), program requirements, and Breadth Requirements for [HBA](#), [HBSc](#), or [BCom](#) degree requirements.

A course may be designated Extra due to an exclusion or a repeated attempt at a previously passed course.

Repeating Failed Courses

Students may re-enrol in a course if they have received a mark lower than 50% or a status of No Credit (NCR) or Failure (FL), as long as they have not previously obtained credit for the course with a mark of 50% or higher or a status of Credit (CR) or Pass (P).

Each attempt at the course will appear on students' academic records and the mark in the course will contribute to grade point average calculations, unless an attempt has been declared Credit/No Credit or designated Extra.

Students considering re-enrolling in a course are encouraged to contact their College Registrar's Office for advising.

Repeating Passed Courses

Degree and non-degree students may repeat, only once, any individual course in which they have already obtained credit with a final mark of 50% or higher or a status of Pass (P) or Credit (CR), regardless of the result of the second attempt. Note that the result of the second attempt could be any final mark or a status of Pass, Failure (FL), Credit, or No Credit (NCR); a previously passed course can be repeated only once. A direct equivalent transfer credit is considered a previously passed course.

For non-degree students, the second attempt at the course is always marked Extra. For degree students, the second attempt at the course is marked Extra unless the Second Attempt for Credit policy applies (see below).

Students requesting to repeat a passed course must do so at their College Registrar's Office, where they will receive appropriate advising and will be enrolled in the course, provided there is space available; degree students will be enrolled as of the first day of the general enrolment period and non-degree students will be enrolled as of the first day of enrolment for non-degree students. (See General Course Enrolment Period of the [Course Enrolment page](#))

Second Attempt for Credit

Please note that this policy does not apply to courses taken as a second attempt prior to September 2025. For courses taken as a second attempt prior to September 2025, refer to the Academic Calendar in effect when the course was taken. (See [Archived Calendars](#))

For degree students, in the case where the mark in the second attempt at a previously passed course is higher, the Extra designation will be added to the initial attempt for up to a maximum of 2.0 credits in chronological order, unless:

- The second attempt must be marked Extra due to an exclusion, in which case the Extra status will remain on the second attempt of the course.
- The passed course was first taken as part of a previously completed degree, in which case the Extra status will remain on the second attempt taken as part of a subsequent in-progress degree.

Degree students do not need to submit a request to initiate this process. If the Extra designation is added to the initial attempt of the course rather than to the second attempt:

- The initial attempt will not be included in [grade point average calculations](#) or the overall number of degree credits; the second attempt will be included instead.
- [Academic standing](#) from prior academic sessions will not be reassessed.

Credit/No Credit (CR/NCR)

Degree students in the Faculty of Arts & Science may select up to 2.0 credits to be assessed on a Credit/ No Credit (CR/NCR) basis. This option is available for Arts & Science degree students taking courses offered by the Faculty of Arts & Science, the John H. Daniels Faculty of Architecture, Landscape and Design (Daniels), the University of Toronto Mississauga (UTM), or the University of Toronto Scarborough (UTSC). Some courses may not be eligible for CR/NCR -- refer to the Academic Calendar of the relevant division. This option is not available to Arts & Science non-degree students.

Students who select a course to be assessed on a CR/NCR basis will not be identified individually to the instructor teaching that course; they will be assessed in the same way as all other students in the course (will have the same assignments and tests and will be evaluated with the same expectations).

Deadline

Students can choose or remove this mode of assessment on [ACORN](#) no later than the last day of classes. Once the deadline has passed, students may not reverse this decision.

Eligibility for CR or NCR

To achieve a status of CR (Credit) in a course, a student must achieve a final mark of at least 50%. Courses with a final status of CR will count as degree credits but will have no effect on the student's Grade Point Average (GPA) calculation. They can also count toward the Breadth Requirements, but cannot normally be used to satisfy program completion requirements (Specialist, Major, Minor) or the 12.0 distinct credits between programs required for the degree. See the Calendar sections on Degree Requirements for details.

A course with a final mark below 50% will be assessed as NCR (No Credit). Courses with a final status of NCR will not count as degree credits, and will also not be included in the GPA calculation.

If a student has specified the CR/NCR option for a course in which an academic offence has been committed, the CR/NCR option will be revoked and the percentage mark will stand as the course mark.

The following courses are ineligible for CR/NCR: courses where an individual student works on independent study or individual research supervised by a professor; Research Opportunity Program (299s/ 399s)/ Research Excursions (398s); First-Year Foundations Seminars; First-Year Foundations Ones Program courses; Rotman Commerce (RSM) courses; field courses; courses evaluated on a Pass/Fail basis. Other approved exceptions will be noted in the course description in the Calendar.

Important Notes and Limitations of CR/NCR

The underlying mark of a course completed on a CR/NCR basis will not be released or reported in any way. The Faculty cannot determine how an external body may read or interpret the use of CR/NCR on a transcript. If a specific mark may be required in a course for professional or graduate school applications or for other reasons in the future, students should avoid selecting the CR/NCR option. Students may wish to seek academic advising at their College Registrar's Office when considering the use of CR/NCR.

Students who transfer to the Faculty of Arts & Science from John H. Daniels Faculty of Architecture, Landscape and Design (Daniels), University of Toronto Mississauga (UTM) or University of Toronto Scarborough (UTSC) will have all Daniels, UTM, and UTSC CR/NCR options (if any) included in their Arts & Science academic record. These CR/NCR options are counted towards the 2.0 credits maximum.

Special note to graduating students

The CR/NCR option is only open to degree students. Once students have graduated, they become non-degree students and they may not complete courses on a CR/NCR basis, even if they enrolled in the course before their graduation. For example, if a student is graduating in the Spring and they select the CR/NCR option for a Summer course, or if a student is graduating in the Fall and they select the CR/NCR option for a Fall or Winter course, the CR/NCR option will be removed upon graduation and a percentage mark will appear on the student's record.

Courses that are not eligible to be taken as CR/NCR

The following courses are ineligible for CR/NCR: courses where an individual student works on independent study or individual research supervised by a professor; Research Opportunity Program (299s/ 399s)/ Research Excursions (398s); First-Year Foundations Seminars; First-Year Foundations Ones Program courses; Rotman Commerce (RSM) courses; field courses; courses evaluated on a Pass/Fail basis. Other approved exceptions will be noted in the course description in the Calendar.

Cancelling Courses

Students who do not intend to complete a course or courses must cancel the course on ACORN before the final date to cancel courses without academic penalty (see [Academic Dates and Deadlines](#)). Students still enrolled in a course after the final date to cancel the course will receive a mark for that course (unless [Late Withdrawal](#) is requested). Not attending classes, ceasing to complete further course work, and/or not writing the examination do not constitute grounds for cancellation without academic penalty from a course after the cancellation deadline; the course remains on the record with the mark earned, including a zero for incomplete work.

Students are not permitted to cancel or withdraw from a course in which an allegation of academic misconduct is pending from the time of the alleged offence until the final resolution of the allegation. Should the resolution include a sanction for academic misconduct, students cannot subsequently cancel or request withdrawal from the course.

Late Withdrawal After the Drop Date (LWD)

The Faculty of Arts & Science has a mechanism to assist students, in conjunction with their College Registrars, to remedy situations, particularly in their early years at university, where personal or other circumstances mean they are irretrievably behind in a course, struggling with a course or cannot continue with the course. Students who have fallen behind with assignments or are not at all prepared to write exams in one or more of courses can contact their College Registrar's Office to discuss a Late Withdrawal After the Drop Date (LWD) from the course.

Degree students in the Faculty of Arts & Science may request Late Withdrawal After the Drop Date (LWD) – to withdraw from a course without petition – for a total of 3.0 credits, provided such a request is made by the last day of classes in the relevant term. Non-degree students may also request LWD, provided they do not exceed the 3.0 credits maximum throughout their combined degree and non-degree studies.

Withdrawals approved under this procedure will be noted on the academic record by the course status LWD. This course status will have no effect on the [Grade Point Average](#) (GPA) or other elements of the academic record.

Students seeking to avail themselves of this remedy will be expected to work with their College registrarial advisor to analyze what led to their situation, to discuss what steps they can take to prevent it from happening again, and to learn from their experiences.

Students who transfer to the Faculty of Arts & Science from the University of Toronto Mississauga (UTM), or the University of Toronto Scarborough (UTSC), or the John H. Daniels Faculty of Architecture, Landscape and Design (Daniels) will have all UTM/UTSC/Daniels LWD requests (if any) included in their Arts & Science academic record. These LWD requests are counted towards the 3.0 credits maximum.

Note that the option for Late Withdrawal is not available if an allegation of academic misconduct is under investigation. If LWD was previously granted in the course, it will be revoked and the percentage grade will stand as the course grade.

Please note: Students who have not achieved final standing (a final passing mark/P/CR) in at least one course in the Faculty of Arts & Science who cancel their registration must re-apply for admission through the Ontario Universities Application Centre if they wish to return in the future. Late Withdrawal (LWD) does not constitute final standing in a course.

Prerequisites, Co-requisites, and Exclusions

Prerequisites and co-requisites are established by academic units to ensure that students enrolling in a course have the necessary academic preparation to be successful. Students are responsible for fulfilling prerequisites and co-requisites, and if they enrol in a course for which they do not have the published prerequisites or co-requisites, it is at the discretion of the academic unit to cancel their enrolment in the course at any time during the enrolment period. If students withdraw from a course, they must also withdraw from any course for which it is a co-requisite unless the academic unit offering the latter course agrees to waive the co-requisite.

An exclusion is a course that is deemed to have content that significantly overlaps with another course. Prerequisites, co-requisites, and exclusions will be listed below the course description.

Prerequisite

A course (or other qualification) required as preparation for enrolment in another course. Prerequisites must be completed in advance of enrolment in a course. If students consider that they have equivalent preparation, they may ask the academic unit to waive the stated prerequisite.

Co-requisite

A course to be undertaken concurrently with another course. If a student has previously passed the co-requisite course, the academic unit will waive the co-requisite.

Recommended Preparation

Background material or courses that may enhance a student's understanding of a course, but that are not required for enrolment in the course.

Exclusions

Students may not receive degree credit for a course that lists as an exclusion a course they are currently taking or a course they have already passed. If they enrol in such a course, they may be removed at any time during the enrolment period at the discretion of the department. If allowed to remain enrolled in an excluded course, the second course taken will be designated Extra.

Taking Courses Outside the Faculty

Courses at the University of Toronto Mississauga (UTM), the University of Toronto Scarborough (UTSC), and the John H. Daniels Faculty of Architecture, Landscape, and Design (Daniels)

Degree and non-degree Faculty of Arts & Science students may enrol in most undergraduate courses offered by UTM, UTSC, and Daniels if they meet the enrolment controls and prerequisites established by those divisions. The course will be included in grade point average calculations unless marked Extra or assessed on a Credit/No Credit basis.

For degree students, while still considered an earned credit, any course from UTM, UTSC, and Daniels taken in excess of 10.0 credits will not count toward the 20.0 credits required for a Faculty of Arts & Science degree. UTM, UTSC, and Daniels courses may also count toward program requirements; students are advised to contact the relevant Faculty of Arts & Science academic unit before enrolling in the course to discuss whether the course can contribute to program completion requirements.

Faculty of Arts & Science students enrolling in UTM, UTSC, and Daniels courses should also note that, although academic deadlines may be different for UTM, UTSC, or Daniels students, as a Faculty of Arts & Science student they must adhere to all Faculty of Arts & Science deadlines (e.g. enrolment, cancellation, Credit/No Credit, refund, etc.).

Courses at Other Divisions on the St. George Campus

Faculty of Arts & Science degree students may be eligible to enrol in certain courses offered by divisions other than the University of Toronto Mississauga (UTM), the University of Toronto Scarborough (UTSC), and the John H. Daniels Faculty of Architecture, Landscape, and Design (Daniels) if they meet the enrolment controls and prerequisites established by those divisions. Degree students may also request exceptional enrolment in certain courses of other divisions on the St. George campus in which they are not eligible to enrol, including a course administered by a graduate unit outside of the Faculty of Arts & Science.

Students are advised to contact their College Registrar's Office to discuss in what way a course might contribute to their degree requirements in advance of enrolling, or requesting enrolment, in the course. Should a student wish a course to contribute to the completion requirements of a program in which they are enrolled, they should contact the relevant Faculty of Arts & Science academic unit in advance of enrolling, or requesting enrolment, in the course.

If a student is requesting exceptional enrolment in a course offered by another division on the St. George campus, they should contact the division to request enrolment well in advance of the beginning of classes, so that they may choose alternate courses if permission is not granted. If permission is granted, the division will contact the Office of the Faculty Registrar in the Faculty of Arts & Science to request that the student be enrolled.

Faculty of Arts & Science degree students enrolling, or who have been enrolled, in courses at other St. George divisions should note that, although academic and course refund deadlines may be different for students registered in these divisions, as a Faculty of Arts & Science student they must adhere to all Faculty of Arts & Science deadlines (e.g. enrolment, cancellation, refund, etc.), with the exception of the start and end of classes. In addition, students should note that policies applicable to courses offered by other St. George divisions may differ from those of the Faculty of Arts & Science; for example, the option for Credit/No Credit may not be available.

Non-degree students in the Faculty of Arts & Science may enrol only in undergraduate Arts & Science, UTM, UTSC, and Daniels courses. They may not request permission from the Faculty or from another division on the St. George campus to enrol in courses from other divisions.

Courses Administered by a Faculty of Arts & Science Graduate Unit

In exceptional circumstances, undergraduate degree students in the Faculty of Arts & Science may be granted permission by a Faculty of Arts & Science graduate unit to enrol in a graduate course. Students are expected to have already exhausted all undergraduate courses available in the Faculty in the relevant subject area before requesting to enrol in a graduate course. Note that not all Faculty of Arts & Science graduate units will allow undergraduate enrolment in a graduate course, even in exceptional circumstances; others may require a minimum grade point average and/or the instructor's permission. Please contact the relevant graduate unit for details.

For undergraduate degree requirement purposes, a graduate course will count as a 400-level course. Graduate courses may also count toward program requirements; students are advised to contact the relevant undergraduate [Faculty of Arts & Science academic unit](#) before requesting enrolment in the course to discuss whether the course can contribute to program completion requirements.

For information concerning enrolling in a course administered by a graduate unit on the St. George campus outside the Faculty of Arts & Science, refer to 'Courses at Other Divisions on the St. George Campus'. For information concerning enrolling in a course administered by a graduate unit at the University of Toronto Mississauga (UTM), the University of Toronto Scarborough (UTSC), or the John H. Daniels Faculty of Architecture, Landscape, and Design (Daniels), please contact the relevant graduate unit.

Courses at Partner Institutions (Outbound Exchange Programs)

Information concerning the application process for outbound exchange opportunities and for transfer credit from studies completed on an exchange program is available on the [Learning Abroad and Exchange Programs page](#).

Transfer credits received as a result of studies completed on an outbound exchange program contribute to the [degree requirement](#) of a minimum of 10.0 credits in Faculty of Arts & Science courses. In addition, all 300+ level transfer credits received from studies completed on an exchange program can contribute to the 300+ level degree requirement.

Courses at Other Recognized Institutions (Letters of Permission and Transfer Credit)

Students registered in the Faculty of Arts & Science should choose courses offered by the Faculty of Arts & Science or University of Toronto courses from outside of the Faculty of Arts & Science within stated parameters. However, degree students who have completed their first [academic session](#) (Fall/Winter or Summer) in the Faculty of Arts & Science with a Cumulative Grade Point Average (CGPA) of at least 1.50 and who are [in good standing](#) may be eligible to receive a maximum of 5.0 transfer credits overall for courses taken at a recognized institution on the basis of a [Letter of Permission](#).

Students admitted to the Faculty of Arts & Science with [transfer credit from previous studies](#) may be limited in the number of Letter of Permission transfer credits that they can use toward the 20.0 credits required for their degree, since students must complete at least 10.0 credits in Faculty of Arts & Science courses toward their degree.

In addition, a maximum of 1.0 credit in transfer credits at the 300+ level granted by Letter of Permission can contribute toward the degree requirement of a minimum of 6.0 credits at the 300+ level.

Transfer credit will not be granted for courses that were not pre-approved by a Letter of Permission. Permission obtained from an instructor or from an academic unit for program purposes does not obligate the Faculty to grant transfer credit. Requests for Letters of Permission are reviewed on a case-by-case basis. Detailed eligibility requirements and timelines for Letters of Permission are available on the [Faculty of Arts & Science website](#).

Note that students who take courses pre-approved by a Letter of Permission during the final term before the convocation period in which they plan to graduate will need to delay their graduation. Please see the [Faculty of Arts & Science page on graduation](#) for more information.

Fees

Tuition fees normally consist of academic fees and compulsory non-academic incidental fees (which provide access to student services including Hart House, Health Services, Athletics and student organizations). Additional ancillary fees (such as lab fees) may also be billed for enrolment in some specific courses.

More information, as well as the University's policy on ancillary and incidental fees can be found in the [Office of the Vice-Provost, Students website](#).

Any [changes to fees](#) (tuition, incidental, or ancillary) are subject to approval by the Governing Council, and come into effect in the Summer session.

More information can be found on the [Student Accounts website](#).

Financial Assistance

A limited number of in-course bursaries, scholarships and awards are available to students who need financial assistance or who qualify for them on the basis of academic merit. Information on these, and the Ontario Student Assistance Program, is available on the following websites:

- [Faculty of Arts & Science](#)
- [Enrolment Services](#)
- [College Registrars' Offices](#)

Graduation

There are two graduation periods for Faculty of Arts & Science students: Spring Convocation and Fall Convocation. Students can request graduation on ACORN during the relevant timeframe.

For students graduating in the Spring, only courses completed by the end of the preceding Winter term (ending in April) will be included in the assessment of the student's eligibility to graduate. For students graduating in the Fall, only courses completed by the end of the preceding Summer Session (ending in August) will be included in the assessment of the student's eligibility to graduate.

Prospective graduands receive an email from the Office of Convocation in March (for Spring graduation) or in October (for Fall graduation) providing details of the convocation ceremony. The Office of the Faculty Registrar will contact students at least two weeks in advance of the relevant convocation ceremony to confirm their eligibility to graduate.

Recognition of Exceptional Academic Achievement: “High Distinction” and “Distinction”

Students who graduate with a Cumulative Grade Point Average (GPA) * of 3.50 or above are described as graduates “With High Distinction.” This achievement is noted on the diploma and transcript.

Students who graduate with a Cumulative GPA* of 3.20 to 3.49 are described as graduates “With Distinction.” This achievement is noted on the diploma and transcript.

*Note that the Cumulative GPA must be based on at least 5.0 credits taken for Faculty of Arts & Science degree credit.

Off-Campus Opportunities

Field Courses

Field courses take place away from the university campus and are sometimes an international opportunity. Most field courses have a very small class size which provides an opportunity for students to interact closely with the course instructor(s), and to collaborate with other students who share the same interests. Field courses are normally held during the Summer session for two to three weeks.

A small number of academic units in the Faculty of Arts & Science offer field courses. Please refer to the following websites for information about eligibility, cost and application process:

- [Department of Anthropology](#)
- [Department of Ecology & Evolutionary Biology](#)
- [Department of Earth Sciences](#)
- [Forestry Program](#) (John H. Daniels Faculty of Architecture, Landscape, and Design)
- [Department of Physiology](#) (Temerty Faculty of Medicine)

International/Indigenous Course Module

The Faculty of Arts & Science's International or Indigenous Course Module Program (IICMs) provides an opportunity for faculty members to incorporate an intensive international or Indigenous experiential module into the framework of existing undergraduate courses. IICMs are a great way to combine academic study with a short-term international experience. Professors lead IICM trips over the Fall or Winter Reading Week in conjunction with specific courses. International opportunities may include partnerships developed with Indigenous nations both within Canadian borders and beyond.

For more details, including current opportunities, please refer to the information on the [Faculty of Arts & Science website](#).

Learning Abroad Experiences

There are different types of Learning Abroad Experiences, for study, research and professional experience, in short-term, Summer, Fall/Winter, or year-long opportunities. For more information, visit the [Learning Abroad website](#).

Arts & Science Internship Program

The Arts & Science Internship Program (ASIP) is a professional work-integrated learning program for Faculty of Arts & Science students enrolled in specific programs of study. Students enrolled in the ASIP stream of their program of study complete mandatory Professional Development programming plus a minimum of 12 and maximum of 20 months of paid, full-time, academically related work experience. Normally, students enrolled in ASIP take five years to complete their degree. The ASIP stream of each program is limited enrolment. Students will typically be admitted to the ASIP stream of their program for the Fall term of Year 2 of study. The cost to students to participate in the full program will be \$3600, paid over a series of six installments. ASIP is administered by the Faculty of Arts & Science's Experiential Learning & Outreach Support (ELOS) Office. More details about the program can be found on the [ASIP webpage](#).

Research Excursions Program

The 398 Research Excursions Program (REP) provides an opportunity for Arts & Science (St. George) degree students in their third year (i.e. students who have completed at least 9.0 but not more than 16.0 credits by the end of the Winter term preceding the REP) to participate in an off-campus practical or experiential research activity, under the supervision of a faculty member. The practical, experiential component can take the form of research/learning in archives, laboratories, libraries, or in a field camp, etc.— but not in a classroom at another university (that is covered by the Faculty's summer abroad and exchange programs). REPs may take place in domestic or international locations. The projects run within the May-August period, when both faculty and students can make the time commitments necessary. The Faculty of Arts & Science covers travel and living expenses for students. Regular tuition fees apply.

For more information, refer to the [Faculty of Arts & Science website](#).

Summer Abroad

The Summer Abroad programs are designed to enrich students' academic lives by providing an exciting and educational international experience. Students complete full-year University of Toronto undergraduate degree credit courses from the Faculty of Arts & Science that are relevant to each location. Relatively small classes (about 25 students on average) are taught by University of Toronto professors or faculty from the host university, for a period of 3 to 6 weeks. All classes, except for language courses, are taught in English. All Summer Abroad courses and grades show on students' transcripts as regular U of T credits and are calculated into their CGPA.

For more information about a list of courses, locations, eligibility, cost and other information, please refer to the [Summer Abroad website](#).

Global Classrooms

Students interested in increasing their global fluencies are welcome to explore the latest Global Classrooms offerings by visiting the [Learning & Safety Abroad's Global-At-Home website](#).

Petitions and Appeals

In This Section:

- [Petitions to the Faculty](#)
- [Types of Petitions](#)
- [Appeals](#)

Students are responsible for observing sessional dates, course prerequisites, exclusions, satisfying the degree requirements, and following the rules and regulations in the Calendar and the Academic Dates & Deadlines webpage. Failure to follow regulations, requirements and deadlines may result in academic and/or financial consequences or penalties, and failure to familiarize oneself about these will not be accepted as sufficient rationale to avoid these consequences. Students should always consult their College Registrar's Office immediately for guidance if anything happens that interferes with continuing or completing their courses, or that appears to be contrary to rules, regulations and deadlines.

Special Consideration Requests to Academic Department(s)

Special consideration requests to academic department(s)/unit(s) (sometimes called Academic Appeals) concern issues arising within a course that relate to the pedagogical relationship of the instructor and the student, such as the organization of a course, or grading practices. These fall within the authority of the academic unit sponsoring the course and are not under the purview of Faculty petitions. Students are encouraged to discuss any issues regarding the academic aspects of a course first with the instructor. It is recommended that such discussions be documented in writing where possible. The successive stages of special consideration request after the course instructor must be submitted by the student in writing. These successive stages are: 1) the Associate Chair, Undergraduate (or equivalent); 2) the Chair or Program Director of the Academic Unit; 3) the Office of the Dean, Faculty of Arts & Science. A special consideration request must have been reviewed at the academic unit level before being referred to the Dean's Office; requests to the Dean's Office must be in writing.

Petitions to the Faculty

Students considering petitioning should review the [Arts & Science Petitions](#) webpage for additional and more specific information, in addition to the Academic Calendar.

Petitions to the Faculty concern issues relating to degree requirements, academic regulations, deadlines, examinations, and administrative rules. The Faculty recognizes that an exception to Faculty policies may be warranted when unpredictable and exceptional circumstances impact a student's academic progress. As part of a petition request, students will need to provide a statement explaining the extenuating circumstances they experienced, the impact of those circumstances on their academic progress, and the steps they took to mitigate the impact of the circumstances on their academic progress. Students must provide sufficient documentation supporting the information reported in their personal statement. Students are requested to present their entire case from the outset, demonstrating that they acted responsibly and with good judgment in attempting to observe Faculty policies and regulations. All petitions submitted to the Faculty are reviewed in a consistent and equitable manner. A petition is considered in confidence by the Faculty petitions office on behalf of the Committee on Standing, which is responsible for interpreting and administering the regulations of the Faculty. There is no guarantee that a petition will see a successful outcome.

Students considering submitting a petition to the Faculty are encouraged to seek academic advising from their College Registrar's Office.

It is the responsibility of the student to provide a valid U of T email address to which a petition decision may be sent.

Deadlines to Submit Petitions

The deadlines for petitions are strictly enforced. Students must submit a petition by the deadline associated with the petition type (see below). If there are compelling reasons why a petition is being submitted after the deadline, the student must explain the reasons for the late submission in their personal statement and provide relevant documentation to support their rationale. The issue of lateness must be satisfactorily resolved before the substance of the petition is considered. Late petitions without sufficient reason for lateness will not be granted, no matter how compelling.

The deadline for each petition type is referenced under each petition type below.

Types of Petitions

Petitions for Examinations

Students are expected to write their examinations as scheduled. Petitions based on travel, employment, or personal plans will not be considered as students are expected to make themselves available during the published Examination Period to write final examinations. Students who cannot write a final examination at the scheduled time due to a religious obligation should report it to the Office of the Faculty Registrar once a Final Examination Schedule is posted, and no later than the published deadline. Instructions and deadlines can be found on the [Exam Conflicts](#) webpage.

Deferred Examinations

In situations where a student is unable to write their final examination due to extenuating circumstances, they may request a deferral. A student who is too ill or otherwise unable to write the examination should submit a petition, with supporting documentation, for a deferred examination. When a petition for a deferred examination is granted, a notation of SDF (standing deferred) is added to the student's transcript in place of a final mark for the course. After a student has written the deferred examination, the SDF will be replaced with a final mark in the course.

Students have at most two opportunities to write a deferred examination for the same course. Students who miss their first opportunity to write a deferred examination may petition for a second opportunity to do so, however note that only under extenuating circumstances supported by appropriate documentation will a petition for a second deferral (a re-deferral) of the examination be considered. Students who miss a deferred examination will receive a mark of zero for the examination in the calculation of their final mark. Should a petition for a second deferral be granted, the notation of SDF will be re-added to the student's transcript for the course.

Students who, having been granted a second opportunity to write their deferred exam, miss the opportunity to do so are advised to contact their College Registrar's Office to discuss their situation and engage in academic planning. The SDF for the course on their transcript will be replaced by a final mark that includes a mark of zero for the examination.

Examination Re-Writes for In-Person Final Exams

Students who write an examination may not petition to rewrite it, except under extraordinary circumstances such as a sudden acute illness during the examination.

When a petition to re-write an examination is granted, a notation of SDF (standing deferred) is added to the transcript in place of a final mark for the course. After a student has written the examination, the SDF will be replaced with a final mark in the course.

Examination Re-Writes for Online Final Exams

Students who encounter extenuating circumstances during an online final exam should immediately contact their course instructor and follow the instructions they provide.

Important Notes:

Petition decisions are sent to students' active University of Toronto email address. Decisions of approved petitions for a deferred examination, a re-deferred examination, and/or an examination re-write advise students of the period in which the petitioned examination will take place and reference the deadline by which students must pay the petitioned examination fee. Students who have paid the petitioned examination fee by the payment deadline will receive their petitioned examination schedule. Students who do not pay the fee are not eligible to write the petitioned examination, nor can a missed payment be the basis to petition for a deferral of the examination. Students who are experiencing financial need are encouraged to meet with their College Registrar's Office to discuss their financial situation in more detail.

Students who have been granted a petitioned examination in a course that serves as a prerequisite for subsequent courses may enrol in those subsequent courses, provided they obtain the approval of the academic unit concerned and provided the term mark in the prerequisite course with the petitioned examination is at least 60%. If approval from the academic unit is not obtained, there is a risk that students may be removed from the subsequent course during a prerequisite check and reinstatement may not be possible if the course is full.

Students who are petitioning an examination and have a Cumulative Grade Point Average (CGPA) of less than 1.50 are strongly encouraged to include in their personal statement an academic plan for the term in which they will be completing the outstanding examination(s). The Faculty of Arts & Science reserves the right to limit registration or course load in a subsequent term for students who have outstanding academic obligations from a previous term. Students who find themselves in this situation should seek academic advising from their College Registrar's Office.

Deadline: The deadline to submit an examination-related petition with supporting documentation (i.e., deferred examination, re-deferred examination and/or examination re-write petition) is three (3) business days after the examination date. Refer to the Supporting Documentation for Petitions section below for more details.

Please note that the deadline to submit an examination-related petition for courses from other divisions may be different from the Faculty of Arts & Science deadline. Visit relevant divisional Calendars for specific dates and deadlines. See the Deadlines to Submit Petitions section above for information on late submission of a petition.

Petitions for Term Work Extension(s) (see also Term Work, Tests and Final Exams)

Matters concerning term work normally fall within the authority of the instructor. Students unable to comply with given deadlines must contact their instructor prior to the deadline to request an extension to the deadline or other solution. Students should expect no consideration if an issue is raised after the assignment deadline, unless unpredictable circumstances arose shortly before the deadline that prevented them from meeting the deadline.

All term work must be submitted by the date specified by the instructor. Instructors may grant individual students extensions up to five business days after the end of the examination period, provided that a student presents legitimate reasons with appropriate documentation. Extensions beyond five business days after the end of the examination period can be approved only through a petition. Students are expected to consult with their instructor about a proposed deadline before petitioning for an extension of time. The Faculty petitions office, under the authority of the Committee on Standing, may consult with the relevant academic unit for information about the status of the course work, proposed deadline, and the steps, if any, that must be taken to complete the course work. Students are expected to continue working on the outstanding assignments while they await a decision.

When a term work extension petition has been granted for work in a course, a notation of "SDF" (standing deferred) is placed on the transcript in place of a final mark. Students who have the notation of SDF for a course who have earned a Cumulative Grade Point Average (CGPA) of less than 1.50 are strongly encouraged to include in their personal statement an academic plan for the term in which they will be completing the outstanding work. The Faculty reserves the right to limit registration or course load in a subsequent session for students who have outstanding academic obligations from a previous term. Students who find themselves in this situation are strongly encouraged to seek academic advising from their College Registrar's office.

Deadline: The deadline to submit a petition for a term work extension is five (5) business days after the last day of the examination period for the term in question. The deadline to submit a petition for a further extension on term work is five (5) business days after the deadline outlined in the original petition decision. All documentation supporting petitions must be submitted as soon as possible, and no later than three (3) weeks after the date the student submits the petition. Refer to the Supporting Documentation for Petitions section below for more details. See the Deadlines to Submit Petitions section above for information on late submission of a petition.

Petitions for Withdrawal Without Academic Penalty (WDR)

A student may petition the Faculty for a withdrawal without academic penalty when they feel that they were unable to complete a course due to extenuating circumstances outside their control. Typically, a withdrawal petition is pursued when no other type of petition request (like term work extension, or a deferred final exam) will remedy the situation.

It is important to note that students who intend to finish a course, and therefore do not drop the course themselves (either by the last day to cancel on ACORN, or through their College Registrar's office for an "LWD"), assume responsibility for the course. The Faculty assumes that students who stay in a course to the end have assessed their progress and marks and decided to take the course to completion (i.e. they have written the final examination or final piece of term work (in courses without a final examination)), regardless of any circumstances. Therefore, a withdrawal without academic penalty petition has a much lower chance of success when a student has taken the course to completion.

If a withdrawal without academic penalty petition is granted, the course is not removed from the transcript, but the notation "WDR" is placed on the transcript in place of a final mark. Once a WDR has been placed on the student's academic record, no credit is received for the course and there is no impact on any GPA.

Please note that a granted WDR does not have any impact on fees. Because a WDR is granted beyond any fee refund deadlines, students are still responsible for any tuition or other fees incurred.

Deadline: The deadline to submit a petition for WDR depends on the session. For Fall/Winter Session courses, the deadline is the following 15 November. For Summer Session courses, the deadline is the following 28/29 February. All supporting documentation must be submitted as soon as possible, and no later than three (3) weeks after the date the student submits the petition. Refer to the Supporting Documentation for Petitions section below for more details. See the Deadlines to Submit Petitions section above for information on late submission of a petition.

Supporting Documentation for Petitions

A petition request should include documentation that provides pertinent evidence to support the information disclosed. This will be used to determine whether an exception to the Faculty's policy or guidelines should be granted or not, in order to ensure equitable treatment for all students. If the reasons cited in a petition are of a medical nature, the preferred medical documentation at the University of Toronto is the University's Verification of Illness or Injury Form. Students must submit the Verification of Illness or Injury form when submitting a petition to their College Registrar's office. This form may only be completed by approved licensed practitioners as listed on the form. The form can be found at www.illnessverification.utoronto.ca.

If illness is being presented as the reason for the petition request, this alone may not necessarily be sufficient grounds to guarantee an approval of the request. All cases are examined in their entirety before a decision is made. An illness or injury's duration and level of impact on academic functioning are considered along with other relevant factors in the context of the course at issue. Note that the practitioner's report must establish that the patient was examined and diagnosed at the time of illness, not after the fact. If the practitioner's report does not explicitly establish this, then the Faculty reserves the right to use its discretion in accepting the report as supporting documentation for the reported illness.

If the reasons cited for a petition request are of a non-medical nature, then the supporting documentation may come in various forms. Consult with your College Registrar's office and the Arts & Science Petitions webpage for more information on possible types of supporting documentation that should be submitted in other circumstances.

Appeals

Any student looking to appeal a denied request is strongly encouraged to seek academic advising from their College Registrar's office. If a student's initial petition is denied, they may appeal (through the following stepwise processes).

1. **Committee on Standing (COS):** The Committee on Standing will review an appeal request with new information not presented in the original petition request or reporting a procedural irregularity within 90 days of the original petition decision date. Appeals must be submitted to the student's College Registrar's office.
2. **Faculty Academic Appeals Board (AAB):** To appeal a denied COS appeal, students must submit their request in writing to their College Registrar's office within 90 days of the COS decision. An appeal request should include new information not presented with the COS appeal or a report of a procedural irregularity.
3. **Academic Appeals Committee of the Governing Council:** To appeal a denied AAB appeal, students must submit a Notice of Appeal and other related documents to the Academic Appeals Committee of the Office of Appeals, Discipline and Faculty Grievances (ADFG) of Governing Council in Simcoe Hall within 90 days of the AAB decision. Students considering submitting an appeal to the Academic Appeals Committee of the Governing Council should carefully review the instructions outlined here: governingcouncil.utoronto.ca/processes/academic-appeals.

Term Work, Tests, and Final Exams

In This Section:

- [Term Work and Tests](#)
- [Final Exams](#)
- [Reassessment of Term Work, Final Exam or Course Marks](#)

Term Work and Tests

Term Work

Instructors shall return by the deadline one or more marked assignments worth a combined total of at least 10% of the total course mark for H courses and 20% for Y courses. Instructors shall return one or more marked assignments worth a combined total of at least 10% of the total course mark for H courses and 20% for Y courses prior to the deadline to cancel without academic penalty. However, for courses that run the entire Fall/Winter or Summer session (Y1Y or H1Y courses), the deadline is seven days after the start of the S-term.

When submitting late term work due to extenuating circumstances, the student should contact their instructor ideally before the deadline but no later than one week past the deadline. Students should also refer to the course-specific late submission policy in the syllabus (if any). All term work must be submitted on or before the last day of the final examination period, unless an earlier date is specified by the instructor. Any extension may be for no longer than five business days after the end of the final examination period. If additional time beyond this period is required, students must petition through their College Registrar on or before five business days after the end of the examination period for a further extension of the deadline. (See [Petitions and Appeals](#).)

Students are strongly advised to keep rough and draft work and copies of their essays and assignments, as these may be required by the instructor.

All written work that has been evaluated should be returned to the student with such detailed comment as the instructor deems appropriate, and time made available for discussion of it. Any enquiries or appeals about a graded piece of work must be made to the instructor as soon as possible and no later than two weeks after the work was returned. Instructors must keep unclaimed term work for at least six months beyond the end of the course.

Term Work and Term Test Regulations

The following regulations summarize the Faculty's implementation of the University Assessment and Grading Practices Policy, Parts A and B, available on the [Governing Council website](#).

Marking Schemes

As early as possible in each course, and no later than the last date to enrol in the course, the instructor shall make available to the class, and shall file with the division/faculty or academic unit, the course marking scheme, i.e., methods by which student performance shall be evaluated. This should include whether the methods of evaluation will be essays, tests, class participation, seminar presentations, examinations, or other requirements; the relative weight of these methods in relation to the overall mark; and the timing of each major evaluation.

No essay, test, examination etc. in the marking scheme may be assigned a weight of more than 80% of the course mark. This limit does not apply when an instructor makes an accommodation at a student's request to take into account assessments missed for legitimate, documented reasons.

After the methods of evaluation and their relative weight have been made known by the last date to enrol in the course, the instructor may not change them without the consent of a simple majority of students attending the class, provided the vote is announced no later than in the previous class. For online asynchronous courses, with advance notice, a vote may be held online; a simple majority of students who voted is needed as evidence of consent. Any changes must be reported to the division or the academic unit. The only exception to this is in the case of the declaration of a disruption. Please see the University's [Policy on Academic Continuity](#).

In the event that this policy has not been followed, a student should contact their College Registrar's office or the relevant academic unit.

Term Tests

No term test or combination of term tests held in the last two weeks of classes at the end of any term may have a total weight greater than 25% of the final mark. This includes term tests in Y courses held in December, and also includes "take-home tests" and assignments where the topics or questions are both assigned and due within the last two weeks of classes.

All term tests must be held on or before the last day of classes. No term test may be held during Fall and Winter Reading Weeks, during the Study Breaks in December and April, or during Faculty Examination Periods, except for those in Y courses scheduled by the Faculty in the December or June Examination Periods.

Missed Term Tests

Students who miss a term test for reasons beyond their control may, no later than one week after the missed test, submit to the instructor or academic unit a request for special consideration. Such requests should explain the reason for missing the test, and should include appropriate documentation. Students should refer to the [A&S Student Absences webpage](#) for more information.

A student whose special consideration request is granted by the academic unit will be entitled to a) a make-up test, or b) a re-weighting of the missed test to remaining term work and/or final exam in the course. If the student misses the remaining term work and provides legitimate grounds, the full percentage weight of the missed work may be allocated to the final exam.

Note that the weight of a final exam in a 100-level course may not be increased beyond 80% as an initial accommodation for a legitimate absence. However, if the student misses the make-up opportunity or subsequent test that was to be re-weighted, then the weight of the final exam may be increased beyond 80%.

In courses where the mid-term test is the only marked term work in the course other than the final examination, an initial make-up test opportunity normally must be given. Instructors may use their discretion, but typically students are not automatically entitled to a second make-up test opportunity. The academic unit will determine what consideration is appropriate for a student who misses a make-up test for legitimate reasons. It is important to note that a student who misses a term test cannot subsequently petition for withdrawal without academic penalty from the course on the grounds that they had no term work returned before the drop date.

Final Exams

Faculty Final Examinations

A Faculty final examination counting for between one-third and two-thirds of the final mark must be held in each 100-level course, unless exemption has been granted by the Faculty of Arts & Science. In 200-, 300- and 400-level courses, the Departments will decide whether or not an examination is appropriate. Courses at the 200-level will normally have a final examination. The ratio of term work to examination will be the same for all sections of multi-section courses that have final examinations. The relative value of each part of a written examination must be indicated on the question paper.

Final examinations are held at the end of each term. Students taking courses during the day may be required to write evening examinations, and students taking evening courses may be required to write examinations during the day. Examinations may be held on Saturdays or Sundays. Students who make personal commitments during the examination period do so at their own risk. No special consideration is given and no special arrangements are made in the event of conflicts resulting from personal commitments such as travel arrangements.

Students who are unable to write their examinations due to illness, etc., should contact their College Registrar (see [Petitions for Deferred Examinations](#)).

Students who have two Faculty final examinations in the same time slot, or three consecutive Faculty final examinations (e.g., morning, afternoon, evening; or afternoon, evening, next morning), must report a conflict by no later than the published deadline. Instructions and deadlines can be found on the [Exam Conflicts](#) webpage.

Students who cannot write a final examination at the scheduled time due to a religious obligation should report it to the Office of the Faculty Registrar once a Final Examination Schedule is posted, and no later than the published deadline. Instructions and deadlines can be found on the [Exam Conflicts](#) webpage. Requests received after the deadline may not be accommodated and failure to meet a deadline is not considered a valid reason to petition for a deferred exam.

For the most up-to-date examination timetable consult the Faculty's [Exam Schedule](#) webpage.

Rules of Conduct for In-Person Examinations

1. No person will be allowed in an examination room during an examination except the students concerned and those supervising the examination.
2. Students are expected at the examination room at least twenty minutes before the commencement of the examination.
3. Students are required to bring their photo identification (ID) that contains a current and visible photo and signature for identification purposes. Valid forms of photo ID include any one of the following:
 - A) current University of Toronto Photo ID (TCard); or
 - B) up-to-date Passport (any country, in English); or
 - C) current Driver's License (any country, in English); or
 - D) government issued photo ID (any province or territory).

Students who do not provide a valid photo ID before the start of the exam will not be allowed to take the final exam and will need to speak to their College Registrar's Office to discuss next steps.

4. Students shall place their non-smartwatch or timepiece on their desks – if the CPO cannot tell if it is wireless or Bluetooth capable, they will direct for it to be placed under the desk.

5. All coats and jackets must be placed on the back of each Student's chair. All notes, books, pencil cases, cell phones (turned off), laptops, any other electronic devices or unauthorized aids, and smaller bags like purses must be stored inside the student's knapsack or large bag, which are required to be closed securely and placed under the student's chair. Students may not have a pencil case on their desk and any pencil cases found on desks will be searched and placed under the chair. All watches and timepieces on desks will be checked. Students are not allowed to touch their knapsacks or bags or access any of the contents until the exam is over. Students are not allowed to reach into the pockets or any part of their coat or jacket until the exam is over and bags and jackets are not permitted to be taken during washroom breaks.
6. The Chief Presiding Officer has the authority to assign seats to students.
7. Students are not permitted to communicate with one another in any manner whatsoever during the examination. Students may not leave the examination room unescorted for any reason, and this includes using the washroom.
8. No materials or electronic devices shall be used or viewed during an examination, except those authorized by the course instructor. Unauthorized materials include, but are not limited to: books, class notes, or aid sheets. Unauthorized electronic devices include any device that has internet/wireless/Bluetooth connectivity or otherwise may communicate with another person or device outside the exam hall. The most obvious examples include cell phones, tablets/laptops, smart technology including smart watches or fitness devices with connectivity, and so forth.
9. Students who use or view any unauthorized materials or electronic devices while their examination is in progress - or who assist or obtain assistance from other students or from any unauthorized source - are liable to academic penalties under the Code of Behaviour on Academic Matters which can be severe.
10. In general, students will not be permitted to enter an examination room later than thirty minutes after the commencement of the examination, nor leave until at least half an hour after the examination has commenced. Any exception to this rule is made by the Chief Presiding Officer, and the Chief Presiding Officer will set the conditions for such an exception.
11. Students shall remain seated at their desks during the final ten minutes of each examination.
12. At the conclusion of an examination, all writing shall cease. The Chief Presiding Officer may seize the papers of students who fail to observe this requirement, and a penalty may be imposed.
13. Examination papers, books and other material issued for the examination, shall not be removed from the examination room.
14. The University is not responsible for personal property left in examination rooms.

Rules of Conduct for Online Examinations

Online examinations are administered by the academic unit. Students should refer to the instructions provided by the unit or the course instructor.

Reassessment of Term Work, Final Exam or Course Marks

Requests for Re-marking of Term Work

A student who believes an individual item of work has been incorrectly or unfairly marked may request that it be re-marked. Such requests should be made initially to the instructor in the course as soon as possible after the work was returned, and no later than two weeks after it was returned.

If an instructor refuses the request to re-mark a piece of work, or if the student believes the re-marking was incorrect or unfair, the student may appeal to the Undergraduate Coordinator (e.g., Associate Chair who is acting on behalf of the Chair) of the academic unit sponsoring the course.

Requests for re-marking beyond the academic unit should be made to the Office of the Dean. Such requests about the marking of term work must be made in writing. They will be reviewed to ensure that appropriate procedures have been followed in earlier requests, that the student has been treated fairly, and that the standards applied have been consistent with those applied to other students doing the assignment. The Office of the Dean is the final level of requests for re-marking in the Faculty of Arts & Science; no further level of request is possible.

A request for re-grading of a mark beyond the instructor for term work may only be made for an item worth at least 20% of the course mark.

All requests beyond the instructor must be made in writing in a timely manner after the student receives the final response from the instructor, but no later than two weeks after receiving the response, explaining why the student believes the mark was inappropriate and summarizing all previous communications in the matter.

Students making a request for remarking must accept that the resulting mark will become the new mark, whether it goes up or down or remains the same.

Requesting a Course Mark Recheck

A recheck of a course mark calculation is a review of the mathematical calculation of the grade and does not involve the review of any individual graded course work, exam or components. If a student believes that there has been a course mark calculation error, a recheck can be requested. The student must submit a request for a course mark recheck no later than the deadlines published on the [Exam Reread & Course Mark Recheck](#) webpage. Submissions must follow the instructions outlined on the webpage.

Requesting a Reread of Faculty Final Examination

If a student believes that a final examination may have been incorrectly marked in its substance, or that a portion of an examination has not been marked, a reread of the final examination may be requested. Examination reread requests can only be submitted after a student has purchased a photocopy of their examination or has attended a supervised viewing of the examination. Detailed instructions, requirements and specific deadlines can be found on the [Exam Reread & Course Mark Recheck](#) webpage. There is a fee associated with this process, however, the mark is changed as a result of this review, both the photocopy fee (if paid) and the reread fee will be refunded. It should be noted that when a course is failed, the examination must be reread before the mark is reported.

Please note that a recheck or reread may result in a raised mark, a lowered mark, or no change. By requesting a reread or recheck a student agrees to abide by the outcome.

Withdrawal and Return from Absence

In This Section:

- [Voluntary Leave](#)
- [Cancelling Registration](#)
- [Undergraduate Leave of Absence Policy for International Students](#)
- [Return from Absence](#)

Voluntary Leave

All Faculty of Arts & Science students in [good academic standing](#) or on [academic probation](#) may take a voluntary leave from studies without formal authorization. No specific documentation or approval is required.

How to Take a Voluntary Leave

To take a voluntary leave from studies, students have the option to: a) choose not to complete registration in a given academic period (e.g., Fall/Winter session, Fall or Winter term), or b) cancel their current registration in a given academic period. For students who have already completed registration, read below for more information on cancelling registration. If you are an international student considering a voluntary leave from your studies, it is strongly recommended that you refer to the [Leave of Absence Policy for International Students](#) for further information.

While on Leave

Generally, while on a voluntary leave, students will not pay any tuition, incidental, or ancillary fees; are not considered for scholarships or awards; cannot normally access University services including health services (with the exception of their College and Faculty Registrar's Office); participate in student internships; or undertake undergraduate research. A student who chooses to take a voluntary leave from their studies is not exempt from academic deadlines, financial responsibilities, current or future policies, and fees schedules. Students who cancel their registration part-way through a term after [tuition refund deadlines](#) are responsible for any outstanding balance owed to the University. Students on leave may contact their College Registrar's Office for advising.

Financial Considerations

Each student's financial aid and award situation is unique. It is recommended that students meet with an advisor in their College Registrar's Office when considering a voluntary leave of absence to discuss financial implications. An advisor can help review the impact on financial aid programs such as OSAP, out of province aid, University of Toronto Advanced Planning for Students (UTAPS), or US Loans; the impact for internal and external award payments; and, how tuition and refunds will apply. Students who plan to cancel their courses and registration part-way through a term should refer to their [divisional refund schedule](#).

Questions

Students who have questions about taking a voluntary leave, withdrawal and/or registration timelines, and/or University resources available to students while on a voluntary leave should make an appointment with an advisor in their College Registrar's Office.

Cancelling Registration

Students who wish to cancel all their current courses in the Fall/Winter Session or in the Summer Session, and who do not intend to enrol in any other courses for the rest of the Session, can cancel their registration on ACORN. If a student is unable to cancel their registration on ACORN, the student can contact their College Registrar's Office.

Cancellation of registration only occurs when all courses are cancelled by the deadline to cancel courses without academic penalty. If any courses remain on a student's record for the academic session, such as a final mark, CR/NCR, P/FL, LWD or WDR, the registration for that Session cannot be cancelled. If a student has a question about a possible refund of their tuition, the student can contact their College Registrar's Office.

When cancelling their registration, students must:

1. pay any outstanding fees;
2. return any books to the Library and pay any outstanding fines; and
3. vacate any laboratory or athletic lockers and return any equipment in their possession.

Students who have not achieved final standing (a final passing mark/P/CR) in at least one course in the Faculty of Arts & Science who cancel their registration must re-apply for admission through the Ontario Universities Application Centre if they wish to return in the future.

Undergraduate Leave of Absence Policy for International Students

An approved leave of absence will be permitted for international undergraduate Faculty of Arts & Science students who have completed at least one academic term (e.g., Fall 2025 or Winter 2026) and whose current academic standing is in good standing or on academic probation. Students may request a leave for the Fall term, the Winter term, or the complete Fall/Winter session, for up to a maximum of two consecutive Fall/Winter sessions. Students should contact the Centre for International Experience to request a leave of absence.

Newly admitted students are not eligible for a leave of absence and should instead, if relevant, request a deferral of admission.

Students may request a leave for the following reasons:

- Serious health, personal or family issues
- Issues related to child birth or child care
- Military service

Students may extend an approved leave of absence for up to a maximum of two consecutive Fall/Winter sessions. An extension beyond two consecutive Fall/Winter sessions will not be approved; students may choose to continue a leave but it will not be considered an approved leave of absence.

Generally, while on approved leave, students do not pay any tuition, incidental, or ancillary fees; are not permitted to enrol in courses or register in the Faculty; are not considered for scholarships or awards; and cannot normally access University services (with the exception of their College Registrar's Office and the Centre for International Experience), participate in student internships, or undertake undergraduate research. A student who has been granted an approved leave of absence under this policy is not exempt from academic deadlines, financial responsibilities, current or future policies, and fees schedules. Students who cancel their registration part-way through a term after tuition refund deadlines are responsible for any outstanding balance owed to the University. Students on leave may contact their College Registrar's Office for advising.

To initiate a return to studies, students should contact their College Registrar's Office at least one month in advance of the term or session in which they plan to resume their studies.

Return from Absence

Students who were previously registered as degree or non-degree students in the Faculty of Arts & Science, who have completed at least one course in the Faculty, and who have not been registered in the Faculty for at least 12 months must submit an application for re-registration through their College Registrar's Office. Students who previously studied as non-degree visiting students do not request re-registration. They must submit a new visiting student application and valid letter of permission through Woodsworth College.

Students who were previously registered in the Faculty but who did not achieve final standing (e.g., a final grade or CR/NCR) in at least one course must re-apply for admission through the Ontario Universities Application Centre.

Students with outstanding accounts may not re-register at the University until these accounts are paid.

The recommended timeframe to submit an application for re-registration is a minimum of two weeks prior to course enrolment for the relevant session. Course enrolment for the Fall/Winter session begins in July; course enrolment for the Summer session begins in March. Although applications for re-registration will continue to be accepted after these dates, please note that if enrolment has already started some courses may no longer have space.

It is recommended that students planning to re-register make an appointment with an advisor in their College Registrar's Office to discuss their academic plans, their degree and program requirements, and any changes in Faculty policies or procedures since their last registration.

Rights and Responsibilities

Student Rights and Responsibilities

As members of the University of Toronto community, students assume certain responsibilities and are guaranteed certain rights and freedoms.

The University has several policies that are approved by the Governing Council and which apply to all students. The University will assume that each student has become familiar with the policies. The rules and regulations of the Faculty of Arts & Science are listed in this calendar. In applying to the Faculty, the student assumes certain responsibilities to the University and the Faculty and, if admitted and registered, will be subject to all rules, regulations and policies cited in the calendar, as amended from time to time.

A directory of the policies, guidelines and resources that relate to your conduct as a student at the University of Toronto can be found on the [Office of the Vice-Provost, Students website](#).

All University policies can be found in the [Governing Council Policies website](#).

Email Address

Students of the University of Toronto have access to the Information Commons, which is their passport to their University of Toronto affiliated email, libraries and Internet access while on campus. Once a student has their TCard, they must activate their University of Toronto email account. Setting up a UTmail+ account is mandatory; see the [University Policy on Official Correspondence with Students](#).

Mailing Address

Address information (mailing and permanent) must be reviewed and updated on ACORN. It is the student's responsibility to ensure that the mailing address is kept up to date on [ACORN](#).

Sanctions on Account of Outstanding Obligations

As per the Governing Council's policy on [Academic Sanctions for Students who have Outstanding University Obligations](#), the following are recognized University obligations:

- tuition fees
- academic and other incidental fees
- residence fees and other residence charges
- library fines
- Bookstore accounts
- loans made by colleges, faculties or the University
- Health Service accounts
- unreturned or damaged instruments, materials and equipment
- orders for the restitution, rectification or the payment of damages, fines, bonds for good behaviour, and requirement of public service work imposed under the authority of the Code of Student Conduct.

The following academic sanctions are imposed on Arts & Science students who have outstanding recognized University obligations:

- Official transcripts of record will not be issued.
- The University will not release the diploma nor provide confirmation of degree status to external enquirers.
- Graduands who have an outstanding balance will be allowed to walk on stage and have their names appear on the convocation program but will not receive their diploma until their account is paid.
- Registration will be refused to a continuing or returning student.
- Official letters (e.g., confirmation of graduation, QECO) will not be issued.
- Education verifications may not be issued.

Payments made by continuing or returning students will first be applied to outstanding University debts and then to current fees.

Scientific Observations

In biological and science programs, there may be occasions when scientific observations are made by students on themselves or on fellow students. These include common diagnostic or immunization procedures. Unless a valid reason exists, students are expected to participate in such exercises. If any investigative work involving student participation does not form part of the program, participation is voluntary.

Academic Record

Students are able to check their course results, grade point averages, and academic standing by accessing their academic record online through ACORN. Final course results will be available for viewing on ACORN as soon as possible after they are received and posted by the Office of the Faculty Registrar. Note that academic status is only assessed at the end of the Fall/Winter session and the end of the Summer session.

Students not in good standing (i.e., on probation, or suspended, or refused further registration) will receive notification by email to their UTMail+ account.

The University's Policy on Access to Student Academic Records can be found on the Governing Council website.

TCard

The TCard is the official University of Toronto student ID card, bearing student information including name, student number, and image. It serves various functions, including library card, meal plan card & access card (if applicable). It is used for identification purposes within the University, such as Faculty examinations, student activities, and Athletic Association privileges.

Detailed Information about the TCard, such as applying for a new card, reporting a loss card, and usage can be found in the TCard Office website.

Transcripts and Course Descriptions

The transcript of a student's record reports their complete registration history at the university including courses in progress and the standing in all courses attempted along with course average, information about the student's academic standing including records of suspension and refusal of further registration, any current academic sanctions if relevant, completion of program(s) at the time of graduation, and conferral of the degree.

The University of Toronto issues consolidated transcripts, including a student's total academic record at the University. However, graduate students who were previously enrolled at the University of Toronto as an undergraduate student may request that only the graduate portion of their record be issued. Students may request their transcript online on ACORN. Further information can be obtained on the University's Transcript Services website. Copies of course descriptions are issued at the student's request.

University Rights and Responsibilities

Changes in Programs of Study and/or Courses

The programs of study and courses that are listed in our Calendar are available for the year(s) to which the Calendar applies. They may not necessarily be available in later years or offered in all years. If the University or the Faculty must change the content of programs of study or courses or withdraw them, all reasonable possible advance notice will be given. The University will not, however, be liable for any loss, damages, or other expenses that such changes might cause.

For each program of study offered by the University through the Faculty, the courses necessary to complete the minimum requirements of the program will be made available annually. The Faculty reserves the right otherwise to change the content of courses, instructors and instructional assignments, enrolment limitations, prerequisites and co-requisites, grading policies, requirements for promotion and timetables without prior notice.

Copyright in Instructional Settings

If a student wishes to tape-record, photograph, video-record or otherwise reproduce lecture presentations, course notes or other similar materials provided by instructors, they must obtain the instructor's written consent beforehand. Otherwise all such reproduction is an infringement of copyright and is absolutely prohibited.

Note that where such permission is granted by the instructor, materials reproduced are for the student's individual private use only, not for further reproduction or publication.

In the case of private use by students with disabilities, the instructor's consent will not be unreasonably withheld.

Enrolment Limitations

The University makes every reasonable effort to plan and control enrolment to ensure that all of our students are qualified to complete the programs to which they are admitted, and to strike a practicable balance between enrolment and available instructional resources. Sometimes such a balance cannot be struck and the number of qualified students exceeds the instructional resources that we can reasonably make available while at the same time maintaining the quality of instruction. In such cases, we must reserve the right to limit enrolment in the programs, courses, or sections listed in the Calendar, and to withdraw courses for which enrolment or resources are insufficient. The University will not be liable for any loss, damages, or other expenses that such limitations or withdrawals might cause.

Fees and Other Charges

The University reserves the right to alter the fees and other charges described in the Calendar by approval of the Governing Council.

Notice of Collection of Personal Information: Freedom of Information and Privacy Act

The University of Toronto respects your privacy.

Personal information that you provide to the University is collected pursuant to section 2(14) of the University of Toronto Act, 1971.

It is collected for the purpose of administering admissions, registration, academic programs, university-related student activities, activities of student societies, safety, financial assistance and awards, graduation and university advancement, and reporting to government. This includes advising notes created to document interactions with students in support of their academic program. These notes may be accessed by authorized departments also involved in advising, to collaboratively support student success. Notes are statements of fact. They may relate to the student's academic record, provide documentation of issues and options discussed, as well as university service referrals.

The University is also required to report student-level enrolment-related data to the Ministry of Training, Colleges and Universities as a condition of its receipt of operating grant funding. The Ministry collects this enrolment data, which includes limited personal information such as Ontario Education Numbers, student characteristics and educational outcomes, in order to administer government postsecondary funding, policies and programs, including planning, evaluation and monitoring activities.

At all times it will be protected in accordance with the Freedom of Information and Protection of Privacy Act. If you have questions, please refer to www.utoronto.ca/privacy or contact the University Freedom of Information and Protection of Privacy Coordinator at McMurich Building, room 104, 12 Queen's Park Crescent West, Toronto, ON, M5S 1A8.

Person I.D. (Student Number)

Each student at the University is assigned a unique identification number. The number is confidential. The University strictly controls access to Person I.D. numbers. The University assumes and expects that students will protect the confidentiality of their Person I.D.'s.

Academic Bridging Program

Faculty List

Director

T. Socknat, MA, PhD

Associate Professors, Teaching Stream

W. B. MacDonald, BA, MA

T. Moritz, MA, PhD

J. B. Rose, BA, MA

Introduction

The Academic Bridging Program allows individuals, who have been away from formal education for some time and are at least 19 years of age, to pursue degree studies at the University of Toronto. The courses in the program are designed to help ease the transition into first-year university courses in the Faculty of Arts and Science after time away from prior education.

Courses feature study skills, essay writing skills, library research skills and the methodology of the specific academic discipline involved. Students are admitted by Woodsworth College to non-degree studies in the Academic Bridging Program and are enrolled in Woodsworth College courses. Both part-time and full-time options are available to students.

Students who successfully complete the Academic Bridging Program, earning a grade of 63% or above, are admitted to the Faculty of Arts and Science, at the University of Toronto, with at least 1.0 credit towards their degree for those who complete the part-time Academic Bridging Program. Students who complete the full-time program may transfer up to 2.0 credits towards their degree.

Academic Bridging Program Courses

ABP100Y1 - Introduction to Academic Studies

Hours: 72S

Program Learning Objectives

Develop Academic Skills:

- students learn clear, mature and reflective spoken and written communication
- students learn critical analytical reading, thinking and writing
- students learn basic information literacy and good academic work habits and study skills

Understand University Culture:

- students learn appropriate classroom protocol
- students learn to use classroom technology
- students learn to access university resources

Enhance Life Skills:

- students learn to assess their personal and academic strengths and weaknesses, and readiness for university
- students learn to develop an appreciation of lifelong learning in and out of the classroom
- students learn to think and act independently and responsibly

The program is offered in the Fall, Winter and Summer sessions. To find out more about the program please contact the Academic Bridging Program office.

t: 416-978-4444

e: academic.bridging@utoronto.ca

w: [Academic Bridging Program \(https://wdw.utoronto.ca/\)](https://wdw.utoronto.ca/)

This interdisciplinary, skills-focused course parallels the other component courses of the full-time Academic Bridging Program, supplementing those courses and helping students integrate their entire Academic Bridging experience, while providing intensive, workshop-style training in the fundamental skills needed for success in further university studies in the Humanities and Social Sciences. The course will also provide academic advising and planning, to help students understand and navigate university culture. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

ABP101Y1 - Introduction to Academic Studies in the Sciences

Hours: 72S

This interdisciplinary, skills-focused course parallels the other component courses of the full-time ABP Science Option, supplementing those courses and helping students integrate their entire Academic Bridging experience, while providing intensive, workshop-style training in the fundamental skills needed for success in further university studies in Mathematics and the Sciences. The course will also provide academic advising and planning, to help students understand and navigate university culture. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

ABP102Y1 - Diversity and Social Justice in Canada

Previous Course Number: JWU100Y1, WDW102Y1
Hours: 72L

Despite its image as a multicultural nation, non-dominant groups have often experienced discrimination and injustice within Canada. The course examines experiences of injustice in Canada from diverse perspectives, amplifying voices of marginalized communities (e.g., Indigenous and other racialized peoples, LGBTQ2S+) and providing a more nuanced and critical view of diversity in Canada, historically and in the present. The course will also highlight the ways diverse communities have resisted injustices and have worked towards the creation of more just futures in Canada. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Exclusion: WDW102Y1

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

ABP103Y1 - Exploring Literature: From Conventional to Cutting Edge

Previous Course Number: ENG185Y1, WDW103Y1
Hours: 72L

This course introduces students to the study of literature through an exploration of the conventional to the cutting

edge, in terms of literary content, genre, and form. Students will learn to identify and challenge literary conventions and structures while exploring new formats and media. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Exclusion: ENG185Y1, WDW103Y1

Breadth Requirements: Creative and Cultural Representations (1)

ABP104Y1 - Environmental Issues Today

Previous Course Number: WDW104Y1
Hours: 72L

This interdisciplinary course introduces the major issues regarding the sustainability of the global environment in the face of human development by integrating humanities and social science with the fundamental concept of environmental science. It examines major environmental problems, such as rapid climate change and land degradation as well as the role and impact of government, economics, and ethics on environmental issues. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Exclusion: WDW104Y1

Breadth Requirements: Society and its Institutions (3)

ABP105Y1 - Indigenous Cultures and Societies

Previous Course Number: WDW105Y1
Hours: 72L

This course provides an interdisciplinary focus on key topics relevant to Indigenous communities, historically and in the present. Students will be introduced to diverse cultures, communities, and worldviews of Indigenous peoples of Turtle Island (particularly Canada) and how they have been affected by colonialism. Emphasis will be placed on the ways Indigenous peoples are resisting social, economic, political, and environmental injustices, while revitalizing their identities, knowledges, and communities and creating space for the expression of Indigenous voices.

Storytelling that prioritizes the perspectives and worldviews of Indigenous peoples will guide students' learning about course topics, issues, and concepts. Students will be encouraged to connect their own storied identities and perspectives to course themes and issues. Classes will involve a mix of interactive lectures, class discussion, student-led learning opportunities, and field trips. Class time and assignments will also be devoted to helping students build their critical thinking, reading, and

writing skills towards the completion of a research-based essay due at the end of the year. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Exclusion: WDW105Y1

Breadth Requirements: Society and its Institutions (3)

ABP106Y1 - Media, Culture, and Society

Previous Course Number: WDW106Y1

Hours: 72L

This interdisciplinary course provides an introduction to the cultural and social impacts of present-day popular mass media. Themes explored include the economic and political forces that shape the media world, the role of technology, and issues of representation, gender, and social justice. The course examines a wide range of texts, emphasizing popular culture produced in Canada, and students will have the opportunity to draw extensively on their own interactions with popular media. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Exclusion: WDW106Y1

Breadth Requirements: Creative and Cultural Representations (1)

ABP107Y1 - Introduction to University Studies in Mathematics

Previous Course Number: WDW107Y1

Hours: 72L

This course focuses on mathematical concepts and skills needed for success in First Year university Math and Science courses. Students will develop quantitative reasoning abilities required to critique arguments and make decisions, and will gain a deep understanding of functions modeling relationships. The course highlights multiple representations of each topic, emphasizing connections, and workshop-style sessions enable students to strengthen the skills they learn. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Exclusion: WDW107Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

ABP108Y1 - Introduction to University Studies in Chemistry

Previous Course Number: WDW108Y1

Hours: 72L

This course covers the fundamental knowledge and skills needed for success in First Year university Chemistry and other Sciences such as Biology. Topics include atoms, elements, and compounds; the chemical and physical properties of gases, liquids, and solids; chemical reactions; and the importance of chemistry in understanding the world around us, with attention to how it can address issues in medicine, the environment, and sustainability. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Exclusion: WDW108Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

ABP109Y1 - Diverse Histories of Canada

Previous Course Number: WDW101Y1

Hours: 72L

This course explores diverse, under-acknowledged narratives of people, such as Indigenous and racialized peoples, within the territories currently known as Canada to challenge monolithic, linear, and uncritical representations of this country's past and future. Archival materials, maps, place names, art, literature, film, and other texts will be approached from interdisciplinary perspectives to reveal different orientations to historical events, social injustices, and futures of this territory. Open only to Academic Bridging Program students. Not eligible for CR/NCR option.

Exclusion: WDW101Y1

Breadth Requirements: Society and its Institutions (3)

Actuarial Science

Faculty List

Professors Emeriti

D.F. Andrews, MSc, PhD
 A. Feuerverger, BSc, PhD
 D.A.S. Fraser, BA, PhD, FRSC
 I. Guttman, MA, PhD
 P. McDunnough, MSc, PhD
 R. Neal, BSc, PhD
 M.S. Srivastava, MSc, PhD
 A.M. Vukov, MA, ASA

Professor and Chair of the Department

M.J. Evans, MA, PhD

Professor and Associate Chair, Graduate Studies

S. Volgushev, PhD

Associate Professor, Teaching Stream and Associate Chair, Undergraduate Studies - Actuarial Science

V. Zhang, BSc, MSc, FSA, ACIA, Actuarial Science

Associate Professor, Teaching Stream and Associate Chair, Undergraduate Studies - Statistics

N. Taback, BSc, MSc, PhD

 K. Huynh Wong, BSc, MSc
 M. Moon, BSc, MSc
 N. Moon, BSc, MA, PhD
 S. Schwartz, BA, BS, MSc, PhD

Introduction

Actuarial Science is based upon the application of mathematical techniques to reduce the impact of such hazards as loss of income through death, disability, or retirement, or loss of property through fire, accident, or theft. Actuaries are the chief architects of life, health, and property insurance plans, and pension plans, and bear the major responsibility for their financial soundness. By using concepts from the areas of probability and finance, actuaries model, forecast and value the costs of benefits that will be provided to the participants in such plans. Methods developed for modeling insurance risk can also be applied to modeling investment risk, and actuaries apply their expertise to the valuation of sophisticated investment vehicles such as options on equities, bonds and other investment derivatives. [ACT230H1](#) and [ACT240H1](#), though somewhat technical, are courses of interest to a wide audience, since almost every student will from time to time be either a saver or a borrower, and will be covered by insurance and pension plans. Other actuarial courses deal with more specialized topics, and are generally taken by students with a more serious interest in the field or who want to pursue a career as an

actuary. University of Toronto's Actuarial Science programs are fully accredited by the Canadian Institute of Actuaries and most professional requirements at the Associate level (ACIA) can be satisfied through courses in the actuarial programs. We are also designated as Society of Actuaries' Center for Actuarial Excellence (CAE).

For support with the Actuarial Science Specialist and Major, contact us by email at ug.actsci@utoronto.ca or visit us at 700 University Avenue, 9th Floor, Ontario Power Building.

Note About Programs Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Actuarial Science programs impacted by this policy: [ASSPE0608](#) and [ASMAJ0608](#)

Actuarial Science Programs

Actuarial Science Specialist (Science Program) - ASSPE0608

This program is designed to prepare a student for professional work as an actuary, and more generally in the financial risk management industry. Career options include insurance industry (life and annuities, health, property and casualty, reinsurance, consulting, etc.), pension plans, actuarial software development, quantitative finance and investment, public and social insurance, and non-traditional actuarial fields such as climate risk management and microinsurance.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- ([MAT135H1](#) and [MAT136H1](#)) with an average grade of 73%/ [MAT137Y1](#) (63%)/ [MAT157Y1](#) (60%)
- ([ACT240H1](#) and [ACT245H1](#) and [ACT247H1](#)) with an average grade of 63%

Completion Requirements:

(13.0 credits)

First Year:

1. ([MAT135H1](#) and [MAT136H1](#)) with an average grade of 73%/ [MAT137Y1](#) (63%)/ [MAT157Y1](#) (60%)
2. [MAT223H1](#)/ [MAT240H1](#) (should be taken in first year, enforced as a prerequisite for [MAT237Y1](#))
3. [ECO101H1](#), [ECO102H1](#)
4. [STA130H1](#)

Note: [STA130H1](#) is restricted to first-year students. If you are unable to complete [STA130H1](#) in first year, see Note A below for accepted substitutions for this requirement.

To be completed before the end of Second Year:

1. [CSC108H1](#)/ [CSC120H1](#)/ [CSC148H1](#). A student who has completed [CSC110Y1](#) also fulfills this program requirement.

Second Year:

1. ([ACT240H1](#) and [ACT245H1](#) and [ACT247H1](#)) with an average grade of 63%
2. [MAT235Y1](#)/ [MAT237Y1](#)/ [MAT257Y1](#)
3. ([STA257H1](#), [STA261H1](#))/ ([STA237H1](#), [STA238H1](#)); while either pair of courses is accepted, we strongly recommend ([STA257H1](#), [STA261H1](#))
4. [MGT201H1](#)

Higher Years:

1. A set of mandatory courses (3.5 credits): [ACT348H1](#), [ACT349H1](#), [ACT351H1](#), [ACT352H1](#), [ACT370H1](#), [ACT455H1](#)/ [ACT466H1](#), [STA302H1](#)
2. 2.0 credits to be selected from lists 1 and 2 (students can only use at a maximum 1.0 credit from list (2), the practice oriented courses, to fulfill program completion requirements):
(1) [ACT350H1](#), [ACT371H1](#), [ACT455H1](#)/ [ACT466H1](#) (whichever course that was not taken as a mandatory course), [ACT460H1](#), [STA314H1](#), [STA457H1](#), [STA414H1](#), and
(2) [ACT372H1](#), [ACT470H1](#), [ACT473H1](#), [ACT475H1](#).
3. Professional Experience Course [ACT390H1](#): students are strongly recommended to complete this course in the Fall semester of the third year.
4. Actuarial Professional Internship [ACT391H1](#): a full-time work term in an actuarial field (420-hour long at a minimum, and may be longer due to professional or academic needs).

NOTES:

- A. If you are unable to complete [STA130H1](#) in your first year of study, this requirement must be fulfilled with one of the following 0.5 credits to fulfill your 13.0-credit program requirements:

ACT100H1 (for first- and second-year students only), ACT350H1, ACT455H1/ ACT466H1 (whichever course that was not taken as a mandatory course), ACT460H1, STA314H1, STA457H1, STA414H1. The course taken in lieu of STA130H1 cannot be one that is already being used to satisfy Requirement 2 in the completion requirements for Higher Years.

- B. Students who have an interest in pursuing studies in mathematical finance should consider taking MAT244H1, MAT336H1/ MAT337H1 and APM346H1. Students in the Actuarial Science Specialist Program who have successfully completed ACT348H1 and ACT349H1 may request to enroll in the following RSM courses (provided the appropriate prerequisites and corequisites are met): RSM430H1, RSM433H1, RSM437H1. MAT246H1 is recommended (not required) for students in the Actuarial Science Specialist Program.
- C. Wherever possible, the expectation is that the student will be paid based on industry standards for the duration of the work term.

Note: STA130H1 is restricted to first-year students. If you are unable to complete STA130H1 in first year, see Note A below for accepted substitutions for this requirement.

To be completed before the end of Second Year:

4. CSC108H1/ CSC120H1/ CSC148H1. A student who has completed CSC110Y1 also fulfills this program requirement.

Higher Years:

5. ACT240H1, ACT245H1, ACT247H1, ACT348H1, ACT370H1
 6. MAT235Y1/ MAT237Y1/ MAT257Y1
 7. (STA257H1, STA261H1)/ (STA237H1, STA238H1); while either pair of courses is accepted, we strongly recommend (STA257H1, STA261H1)
 8. ACT351H1, ACT352H1

9. 0.5 credit from ACT455H1/ ACT466H1/ STA302H1/ ACT350H1

STA314H1 is strongly recommended.

NOTES:

- A. If you are unable to complete STA130H1 in your first year of study, this requirement must be met with one of the following 0.5 credits to fulfill your 8.5-credit program requirements: ACT100H1 (for first- and second-year students only), ACT349H1, ACT350H1, ACT455H1, ACT460H1, ACT466H1, STA302H1, STA314H1, STA457H1, STA414H1. The course taken in lieu of STA130H1 cannot be one that is already being used to satisfy Requirement 9 in the completion requirements for Higher Years.
- B. Students are highly encouraged to take ECO101H1 and ECO102H1 to obtain SOA VEE (Validation by Educational Experience) credit for Economics, and MGT201H1 and ACT349H1 to obtain VEE credit for Accounting and Finance.
- C. ACT390H1 is a required course in the actuarial science specialist program. The course is not required in the actuarial major program but a number of spots are available for actuarial major students. International students in the actuarial major program are not eligible for work permits for internships.
- D. Students interested in actuarial practices should consider taking ACT371H1, ACT372H1, ACT470H1, ACT473H1, ACT475H1.
- E. The University of Toronto requires that any student who is using a combination of programs to graduate (e.g. two majors, a major and two minors) must complete a total of at least 12.0 distinct credits that are used to satisfy program requirements. It is possible that a student with a combination of actuarial science major and statistics major may not comply with this 12.0 credit rule (depending on how students select their courses within the statistics major) and may

Actuarial Science Major (Science Program) - ASMAJ0608

This program is designed to prepare a student for professional work as an actuary, and more generally in the financial risk management industry. Career options include insurance industry (life and annuities, health, property and casualty, reinsurance, consulting, etc.), pension plans, actuarial software development, quantitative finance and investment, public and social insurance, and non-traditional actuarial fields such as climate risk management and microinsurance.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses

The following courses are required:

- (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1

Completion Requirements:

(8.5 credits)

First Year:

1. (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1
2. MAT223H1/ MAT240H1 (should be taken in first year, enforced as a prerequisite for MAT237Y1)
3. STA130H1

need to take additional courses to satisfy this rule. If you have concerns or questions regarding this rule, please consult with the department

- F. Students who have an interest in pursuing studies in mathematical finance should consider taking

MAT244H1, MAT336H1/ MAT337H1 and APM346H1.

Actuarial Science Courses

ACT100H1 - Wizard Managers of Risks: Exploring Actuarial Science

Hours: 24L/12T

Are you curious about the world of risk and insurance? This first-year introduction to Actuarial Science course takes you on a journey through the fascinating intersection of mathematics, finance, and risk management. This course will equip you with the foundational knowledge of actuarial principles while exploring real-world applications through engaging case studies. Whether you're aiming for a future career as an actuary or simply looking to enhance your analytical skills, this course is your gateway to understanding how actuaries shape the financial stability of our world.

Prerequisite: High school math

Recommended Preparation: High school calculus

Breadth Requirements: The Physical and Mathematical Universes (5)

Course Experience: University-Based Experience

ACT199H1 - Decipher Financial Puzzles in the Media and Pop Culture

Hours: 24L

Have you ever watched a pundit's passionate rant over financial crisis on TV and wondered whether he was right or wrong? Did you get the full story after watching movies like *Margin Call* or *The Big Short*? What was the efficiency market versus behavioral finance debate all about? Did you wonder why everyone in the financial press seem to be calling for a lower debt/equity ratio on banks in the post-crisis era? If you find yourself think about those questions, this is the course for you. We will start from some basic building blocks of finance, such as time value of money and discounting, and proceed to look at some of the important financial controversies you have read or heard in the pop culture or media. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT230H1 - Mathematics of Finance for Non-Actuaries

Hours: 24L/12T

Introduction to financial mathematics, interest measurement, present value calculation, annuity valuation, loan amortization, consumer financing arrangements, bond valuation. The course is aimed at a general audience who will not be continuing in the actuarial science program. Course manuals fee: \$30.

Prerequisite: First-year Calculus

Exclusion: ACT240H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT240H1 - Mathematics of Investment & Credit

Hours: 24L/12T

Interest, discount and present values, as applied to determine prices and values of annuities, mortgages, bonds, equities; loan repayment schedules and consumer finance payments in general; yield rates on investments given the costs on investments. Course manuals fee: \$45.

Prerequisite: (MAT135H1, MAT136H1)/ MAT137Y1/MAT157Y1

Exclusion: ACT230H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT245H1 - Financial Principles for Actuarial Science I

Hours: 24L/12T

Term structure of interest rates, cashflow duration, convexity and immunization, forward and futures contracts, interest rate swaps, introduction to investment derivatives and hedging strategies.

Prerequisite: ACT240H1, (MAT135H1, MAT136H1)/MAT137Y1/MAT157Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT247H1 - Introductory Life Contingencies

Hours: 36L

Probability theory applied to survival and to costs and risks of life assurances, life annuities, and pensions; analysis of survival distributions; international actuarial notation. Course manuals fee: \$35.

Prerequisite: ACT240H1, (MAT135H1, MAT136H1)/
MAT137Y1/ MAT157Y1

Corequisite: STA257H1/ STA237H1

Breadth Requirements: The Physical and Mathematical Universes (5)

The course offers an introduction to elementary probability theory and stochastic processes. The main goal of the course is to help actuarial students understand the concept of stochastic processes with particular emphasis on Markov chains that are of great importance in Life Contingencies and Property and Casualty insurance.

The course will cover the following topics: a basic review of probabilities with emphasis on conditional probabilities and expectations, discrete time Markov chains, Poisson processes, continuous time Markov chains, renewal theory and some applications, queueing theory.

Prerequisite: ACT240H1, ACT245H1, ACT247H1,
STA257H1/ STA237H1

Corequisite: MAT223H1/ MAT240H1, MAT235Y1/
MAT237Y1/ MAT257Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT348H1 - Life Contingencies II

Hours: 36L

Determination of benefit premium and benefit reserves for life insurance and annuities; analysis of insurance loss random variables; theory of life contingencies for multiple lives. This is the second course in the life contingencies series, following ACT247H1.

Course manuals fee: \$40.

Prerequisite: ACT240H1, ACT245H1, ACT247H1

Corequisite: STA257H1/ STA237H1, MAT235Y1/
MAT237Y1/ MAT257Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT351H1 - Loss Models: From Data to Decisions

Previous Course Number: ACT451H1

Hours: 36L

This course will introduce the probability models central to actuarial loss analysis. We will explore frequency and severity models, compound distributions, and the transformations of random variables to account for policy adjustments, such as deductibles, policy limits, and reinsurance structures. We will also discuss simulation techniques to estimate the distribution of aggregate losses and risk measures associated with these distributions.

Prerequisite: ACT240H1, ACT245H1, ACT247H1

Corequisite: STA257H1/ STA237H1

Exclusion: ACT451H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT349H1 - Corporate Finance for Actuarial Science

Hours: 24L/12T

Corporate finance for actuarial science students.

Prerequisite: ACT240H1, ACT245H1, ACT247H1

Corequisite: STA257H1/ STA237H1, MAT235Y1/
MAT237Y1/ MAT257Y1

Exclusion: ECO358H1, ECO359H1, RSM332H1,
RSM333H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT352H1 - Statistical Methods for Actuarial Loss Models

Previous Course Number: ACT452H1

Hours: 36L

Insurance data often exhibits unique characteristics such as deductibles, policy limits, and truncation, requiring specialized statistical methods to model and analyze losses and survival outcomes. This course introduces statistical methods for modelling and analyzing loss and survival data in actuarial science. Key topics include product-limit estimation, empirical estimation methods, moment and percentile estimation, maximum likelihood estimation, and simulation techniques. Emphasis is placed

ACT350H1 - Applied Probability for Actuarial Science

Hours: 24L/12T

on understanding the theoretical foundations of these methods and applying them to real loss data using R.

Prerequisite: ACT240H1, ACT245H1, ACT247H1, ACT351H1/ ACT451H1

Corequisite: STA261H1/ STA238H1

Exclusion: ACT452H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT370H1 - Financial Principles for Actuarial Science II

Hours: 36L

Mathematical theory of financial derivatives, discrete and continuous option pricing models, hedging strategies and exotic option valuation.

Arts and Science students must be enrolled in the Actuarial Science Major or Specialist, the Data Science Specialist, or the Specialist in Statistical Science: Theory and Methods.

Prerequisite: (ACT240H1, ACT245H1, ACT247H1) or (STA261H1, MAT237Y1/ MAT257Y1)

Corequisite: STA261H1/ STA238H1, MAT235Y1/ MAT237Y1/ MAT257Y1

Exclusion: RSM435H1

Breadth Requirements: The Physical and Mathematical Universes (5)

Course Experience: University-Based Experience

ACT371H1 - Reserving Methods For Property & Casualty Insurance

Hours: 24L/12T

Topics covered include reserving data and triangles, diagnoses methods that range from triangle of ratios of paid claims to reported claims to triangle of reported claim ratios. The syllabus also includes projection techniques. Not eligible for CR/NCR option.

Prerequisite: ACT240H1, STA257H1/ STA237H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT372H1 - Ratemaking Methods For Property & Casualty Insurance

Hours: 24L/12T

This course covers the basic ratemaking methods for P&C insurance. It assumes that students are familiar with traditional reserving diagnoses and projection methods. The syllabus would introduce concepts related to earning of exposures, on-level factors, catastrophe loading, large loss loading and credibility. Not eligible for CR/NCR option.

Prerequisite: ACT371H1

ACT390H1 - Professional Experience in Actuarial Science

Hours: 24S

This course is preparation for an internship work term. It includes various professional skill workshops, networking activities and an invited speaker series. The course is mandatory for students in the Actuarial Science Specialist program. A limited number of spots in the course are open for students in the Actuarial Science Major program. Students in the major program must apply to the department for permission to take the course.

This course does not carry credit weight and is evaluated as Credit/No Credit. No tuition fee is associated, however a \$651 ancillary fee will be assessed towards Professional Experience preparatory program costs.

Prerequisite: Enrolment in the Actuarial Science Specialist program or by approval of the Department of Statistical Sciences.

ACT391H1 - Professional Internship

Internship course for students enrolled in the Actuarial Science Specialist, fulfilled as a 420-hour work term at a minimum (maybe longer based on professional and academic needs) in a workplace related to actuarial science in third or fourth year. ACT390H1 must be completed first in preparation. Contact Department for more information.

This course does not carry credit weight and is evaluated as Credit/No Credit. No tuition fee is associated, however an ancillary fee of \$822 will be assessed towards Professional Experience placement.

Prerequisite: ACT390H1

ACT398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research>

-opportunities/research-excursions-program. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT455H1 - Advanced Life Contingencies - Modeling and Applications

Hours: 36L

The course explores advanced actuarial topics such as multi-decrement theory, multi-state transition models, profit testing, pension mathematics, and retirement benefits. It places a strong emphasis on practical applications within the life insurance industry, examining areas such as disability income insurance, long-term care, critical illness insurance, workers' compensation, continuing care insurance, and universal life insurance. Additionally, the course delves into the complexities of embedded options in life insurance and annuity products, providing students with in-depth knowledge of how these concepts are applied in real-world scenarios. This course is the last in the three-course series for life contingencies, following [ACT247H1](#) and [ACT348H1](#).

Prerequisite: [ACT240H1](#), [ACT245H1](#), [ACT247H1](#), [ACT348H1](#)

Corequisite: [ACT350H1](#)/ [STA347H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT460H1 - Stochastic Methods for Finance

Hours: 36L

Applications of the lognormal distribution, Brownian motion, geometric Brownian motion, martingales, Ito's lemma, stochastic differential equations, interest rate models, the Black-Scholes model, volatility, value at risk, conditional tail expectation. Topics in advanced financial mathematics.

Arts and Science students must be enrolled in the Actuarial Science Major or Specialist, the Data Science Specialist, or the Specialist in Statistical Science: Theory and Methods.

Prerequisite: ([ACT240H1](#), [ACT245H1](#), [ACT247H1](#), [ACT350H1](#)/ [STA347H1](#)) OR ([ACT350H1](#)/ [STA347H1](#), [MAT237Y1](#)/ [MAT257Y1](#))

Recommended Preparation: [ACT370H1](#) strongly recommended

Breadth Requirements: The Physical and Mathematical Universes (5)

Course Experience: University-Based Experience

ACT466H1 - Advanced Statistical Modeling in Property & Casualty Insurance

Hours: 36L

This course provides an in-depth exploration of advanced pricing and reserving techniques in Property and Casualty (P&C) insurance, with a strong focus on methodologies. It covers fundamental topics in P&C insurance ratemaking and reserving, such as Bayes credibility, Bulmann credibility, nonparametric Bayes credibility, deterministic and stochastic Chain Ladder, Bornhuetter-Ferguson, over-dispersed Poisson model, as well as a brief introduction to modern micro level reserving approaches. Through numerous examples, case studies, and applied models, the course emphasizes the practical application of these mathematical concepts in real-world insurance scenarios.

Prerequisite: [ACT240H1](#), [ACT245H1](#), [ACT247H1](#), [ACT351H1](#)

Corequisite: [STA261H1](#)/ [STA238H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT470H1 - Advanced Pension Mathematics

Hours: 36L

Topics in pension mathematics; funding methods for pension plans. (Offered in alternate years)

Prerequisite: [ACT348H1](#) or permission of instructor

Corequisite: [ACT455H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT473H1 - Issues In Actuarial Practice

Hours: 24L/24T

Case study approach to current issues in life insurance, pension consulting and casualty actuarial practice. The focus of the course will be on communication and presentation. This course is Pass/Fail. Not eligible for Credit/No Credit. The course is open to students in the specialist program in actuarial science. Students in the major program in actuarial science can enrol into the course with permission of the department.

Prerequisite: ACT348H1, ACT349H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT475H1 - Insurance Products and Regulation with AXIS

Hours: 36L

Case studies using leading actuarial application AXIS. Examine key types of insurance products and their pricing and valuation. Review representative developments in insurance regulations in US, Europe and Canada. Other topics include a brief introduction of the use of AI in life insurance.

Prerequisite: ACT240H1, ACT245H1, ACT247H1

Corequisite: ACT348H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT496H1 - Readings in Actuarial Science

Independent study under the direction of a faculty member. Persons wishing to take this course must have the permission of the Undergraduate Secretary and of the prospective supervisor. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT497H1 - Readings in Actuarial Science

Independent study under the direction of a faculty member. Persons wishing to take this course must have the permission of the Undergraduate Secretary and of the prospective supervisor. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT498Y1 - Readings in Actuarial Science

Independent study under the direction of a faculty member. Persons wishing to take this course must have the permission of the Undergraduate Secretary and of the prospective supervisor. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

ACT499Y1 - Readings in Actuarial Science

Independent study under the direction of a faculty member. Persons wishing to take this course must have the permission of the Undergraduate Secretary and of the prospective supervisor. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

D.L. Eyoh, MA, PhD (African Studies/Political Science)

M. Lo, Licence, MA, MSc, PhD (African Studies/Women and Gender Studies)

Assistant Professors

S. Aidid, Hon BA, MA, PhD (African Studies/History)

C. Azubuko-Udah, BA, MA, C Phil, PhD (African Studies/English)

N. Elamin, PhD (African Studies/Anthropology)

E. Kirigia, BA, MSc, PhD (African Studies/School of the Environment)

Associate Professors, Teaching Stream

A. Wasike, BA, MA, MEd, PhD (African Studies)

Assistant Professors, Teaching Stream (Part-Time)

M. Levin, BA, MSc, PhD (African Studies)

development, aid, humanitarianism, NGOs, conflict and peacemaking, activism and political struggles, politics, African cultures, ecocriticism, environmental justice, climate change and sustainability, climate justice, food security, African feminisms, migration and displacement, gender and development, African environmentalism, land acquisition and struggles, health, black freedom, human rights, urbanization, African systems of thought, the slave trade, colonialism, the post-colonial state, Africa and its diaspora, Pan-Africanism, and globalization. Innovative pedagogies nurturing students' intellectual curiosity, cultivating engaged, creative and critical thinking and teaching cutting edge courses that recognize Africa as a living place rather than merely as a site for intellectual speculation and study inform our teaching. The African Studies Centre also offers practical courses in African languages. These areas of emphasis are supported by a rich menu of African Studies courses that form the spin of the curriculum. Additional cross-listed courses with cognate disciplines and other interdisciplinary programs, drawn from disciplines in humanities, social sciences, and sciences, complement our offerings.

Introduction

How has the evolution of societies on the African continent been integral to universal human history? What factors, in the past and in our time, account for similarities and differences among Africa societies? How are patterns and challenges of development in African societies shaped by their location within the global political economy? How do representations of Africa in popular media influence our knowledge of African societies? What are the ethical dilemmas of the various ways in which we engage with African societies?

African Studies provides students unique opportunities to study the complexity and dynamism of African societies, the dynamics processes of socio-economic, cultural, environmental, and political transformations in Africa, the varied histories, ideas and institutions of Africa and its diasporas through interdisciplinary and transdisciplinary lenses. It fosters a vibrant intellectual, social and cultural hub of academic excellence with a shared ethos and commitment to public scholarship, social justice, global citizenship, engaged scholarship and a praxis of inclusivity, epistemic diversity, and reflexive community engagement.

The interdisciplinary courses, through innovative and critical pedagogies, deal with cutting edge subjects such as political economy, African inventions, nationalism,

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The African Studies programs impacted by this policy: [ASSPE1707](#), [ASMAJ1707](#), and [ASMIN1707](#)

African Studies Programs

African Studies Specialist (Arts Program) - ASSPE1707

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Consult Undergraduate Coordinator: undergraduatecoordinator.afr@utoronto.ca or 416-946-0282.

(11.0 credits, including at least 4.0 credits at the 300+ level, with at least 1.0 credit at the 400-level)

First Year:

1. AFR150Y1

Higher Years:

2. JQR360H1

3. AFR450Y1

4. 2.5 credits from Group A.

5. 2.0 credits from Group B.

6. 2.0 credits from Groups A or B

7. 2.0 credits in language courses from Group C (a *progression in one language*) or 2.0 credits in any major African language approved by the Program Committee.

Group A:

AFR199H1, AFR250Y1, AFR270H1, AFR290H1, AFR298H1, AFR322H1, AFR351Y1, AFR352H1, AFR353H1, AFR354H1, AFR355H1, AFR357H1, AFR358H1, AFR359H1, AFR365H1, AFR453Y1, AFR370H1, AFR381H1, AFR389H1, AFR450Y1, AFR451H1, AFR454H1, AFR455H1, AFR459H1, AFR499H1, ANT463H1, ENG367H1, HIS295Y1, HIS319H1, HIS322H1, HIS342H1, HIS352H1, HIS383Y1, HIS394H1, HIS450H1, HIS481H1, HIS483H1, HIS486H1, JNH350H1, JQR360H1, POL301H1, POL309H1, PRT100Y1, PRT220Y1, an independent studies course approved by the Program Committee

Group B:

ANT204H1, ANT348H1, ANT374H1, ARC233H1, CAR220H1, CAR226H1, CAR315H1, CIN332Y1, CIN372Y1, CSE444H1, DRM462H1, DTS200Y1, DTS401H1, DTS402H1, ECO231H1, ECO232H1, ECO324H1, ENG270H1, ENG356Y1, ENG370Y1, ENT200H1, ENV221H1, ENV333H1, FRE332H1, FRE334H1, FRE336H1, GGR112H1, HIS106Y1, HIS221H1, HIS222H1, HIS230H1, HIS359H1, HIS391Y1, HIS392Y1, HIS446H1, HIS487H1, HMB202H1, HMB203H1, HMB303H1, HMB323H1, HMB433H1, HMB443H1, JPR374H1, MGT230H1, MGT250H1, MGT201H1, NFS490H1, NMC343H1, NMC344H1, NMC362Y1, NMC374H1, NMC376H1, NMC377Y1, NMC378H1, NMC379H1, NMC381H1, PHL336H1, PHL380H1, POL201H1, POL223H1, POL486H1, POL417H1, POL418H1, POL445H1, POL447H1, POL479H1, POL488H1, POL489H1, RLG203H1, RLG204H1, RLG241H1, RLG312H1, RLG351H1, RLG355H1, SDS246H1, SDS355H1, SOC210H1, WGS273H1, WGS369H1, WGS385H1, WGS386H1, WGS426H1, WGS440H1, WGS463H1

Group C:

Swahili: AFR280Y1, AFR380Y1

Arabic: NML110Y1, NML210Y1

French: FSL221Y1/ (FSL220H1, FSL222H1), FSL321Y1/ (FSL320H1, FSL322H1)/ (FSL421Y1/ FSL420H1)

Portuguese: PRT100Y1/ (PRT101H1, PRT102H1),

PRT220Y1/ (PRT201H1, PRT202H1)

OR 2.0 credits in any major African language approved by the Program Committee

Notes:

- 4.0 credits must be 300/400-level (including at least 1.0 credit at the 400-level) of which at least 1.0 credit must be from Group A and another from Group B

African Studies Major (Arts Program) - ASMAJ1707

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Consult Undergraduate Coordinator:

undergraduatecoordinator.afr@utoronto.ca or 416-946-0282.

(6.0 credits, including 2.0 credits at the 300+ level)

First Year:

1. AFR150Y1

Higher Years:

2. JQR360H1

3. AFR450Y1

4. 2.0 credits from Group A.

5. 1.5 credits from Group B, or AFR280Y1 or AFR380Y1

Group A:

AFR250Y1, AFR270H1, AFR290H1, AFR298H1, AFR322H1, AFR351Y1, AFR352H1, AFR353H1, AFR354H1, AFR355H1, AFR357H1, AFR358H1, AFR359H1, AFR365H1, AFR370H1, AFR381H1, AFR389H1, AFR450Y1, AFR451H1, AFR453Y1, AFR454H1, AFR455H1, AFR459H1, AFR499H1, ENG367H1, FCS392H1, HIS295Y1, HIS319H1, HIS322H1, HIS297Y1, HIS342H1, HIS383Y1, HIS394H1, HIS450H1, HIS481H1, HIS483H1, HIS486H1, JNH350H1, JQR360H1, POL301H1, POL309H1, POL488H1, POL489H1, an independent studies course approved by the Program Committee

Group B:

Notes:

- At least 2.0 credits from Groups A and/or B must be at the 300/400 level

African Studies Minor (Arts Program) - ASMIN1707

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Consult Undergraduate Coordinator:
undergraduatecoordinator.afr@utoronto.ca or 416-946-0282.

(4.0 credits, including 1.0 credit at the 300+level)

First Year:

- AFR150Y1

Higher Years:

- 1.0 credit from Group A
- 1.0 credit from Group A or B
- 1.0 credit from Group B or AFR280Y1, or AFR380Y1

Group A:

AFR250Y1, AFR270H1, AFR290H1, AFR298H1, AFR322H1, AFR351Y1, AFR352H1, AFR353H1, AFR354H1, AFR355H1, AFR357H1, AFR358H1, AFR359H1, AFR365H1, AFR370H1, AFR381H1, AFR389H1, AFR450Y1, AFR451H1, AFR453Y1, AFR454H1, AFR455H1, AFR459H1, AFR499H1, ENG367H1, FCS392H1, HIS295Y1, HIS297Y1, HIS319H1, HIS322H1, HIS342H1, HIS383Y1, HIS394H1, HIS450H1, HIS481H1, HIS483H1, HIS486H1, JNH350H1, JQR360H1, POL301H1, POL309H1, POL488H1, POL489H1, an independent studies course approved by the Program Committee

Group B:

ANT204H1, ANT345H1, ANT348H1, ANT364H1, ANT374H1, ARC233H1, CAR220H1, CAR221H1, CAR225H1, CAR226H1, CAR321H1, CAR324H1, CAR325H1, CIN332Y1, CIN372Y1, CSE444H1, DRM462H1, DTS200Y1, DTS401H1, DTS402H1, ECO231H1, ECO232H1, ECO324H1, ENG270H1, ENG356Y1, ENG370Y1, ENT200H1, ENV221H1, ENV333H1, FOR201H1, FRE332H1, FRE334H1, FRE336H1, GGR112H1, GGR338H1, GGR419H1, HAJ453H1, HIS106Y1, HIS221H1, HIS222H1, HIS230H1, HIS231H1, HIS293H1, HIS359H1, HIS360H1, HIS391Y1, HIS392Y1, HIS413H1, HIS446H1, HIS474H1, HIS487H1, HMB202H1, HMB203H1, HMB303H1, HMB323H1, HMB433H1, HMB443H1, JPR374H1, MGT230H1, MGT250H1, MGT201H1, NFS490H1, NMC343H1, NMC344H1, NMC362Y1, NMC374H1, NMC376H1, NMC377Y1, NMC378H1, NMC379H1, NMC381H1, PHL336H1, PHL380H1, POL201H1, POL223H1, POL486H1, POL417H1, POL418H1, POL445H1, POL447H1, POL479H1, RLG203H1, RLG204H1, RLG241H1, RLG312H1, RLG351H1, RLG355H1, SDS246H1, SDS355H1, SOC210H1, WGS273H1, WGS369H1, WGS385H1, WGS386H1, WGS426H1, WGS440H1, WGS463H1

Notes:

- At least 1.0 credit must be a 300/400 series course from Groups A and/or B

African Studies Courses

AFR150Y1 - Africa: A Critical Introduction

Previous Course Number: NEW150Y1
Hours: 48L/24T

A multi-disciplinary study of Africa, emphasizing critical inquiry and analysis of Africa, the cradle of humanity and the most diverse and second largest continent in the world. Topics that will be explored include: pre-colonial, colonial and contemporary African history, cultures, economies, geographies, Africa's place in the world, politics, religions, spirituality, art, literature, music, race, resistance, gender, sexuality, futurism, environment, Afrofuturism, anticolonial worldmaking, and Pan-Africanism. The course provides a unique opportunity to learn from the African Studies faculty representing diverse

geographical and disciplinary backgrounds who will share their cutting-edge research and unique experiences, reading and writing practices.

Breadth Requirements: Society and its Institutions (3), Creative and Cultural Representations (1)

AFR199H1 - Africa in Toronto

Hours: 24L

Africa in Toronto offers students the unique opportunity to trace, map and document sites and encounters with “Africa” in Toronto across diverse social, political, economic, linguistic and cultural communities in the GTA.

What are the diasporic lives of diverse African communities in the GTA? How does Toronto become home for them? Students will get the chance to learn about, reflect on and reimagine global Africa in the GTA by exploring topics such as placemaking, community-building, the politics of belonging, organizing and activism, economic hubs, artistic creation and expressive cultures, foodways and the epic battle over jollof rice. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)
Course Experience: University-Based Experience

AFR250Y1 - Africa in the 21st Century: Challenges and Opportunities

Previous Course Number: NEW250Y1
Hours: 48L

A critical examination of Africa as a living space rather than merely a site of intellectual speculation and study. Uses scholarly and popular literature to explore the issues that engage the attention of ordinary Africans, ranging from the dramatic to the seemingly trivial, as they struggle to fashion meaningful lives in fast-changing societies. Topics include urban transition and city life; economic, political and cultural impacts of globalization; new religious movements and changing conceptions of selfhood; new African diasporas in the West; dynamics of gender relations, kinships and identities; and the politics of liberalization. Materials studied will include print and electronic news media and other mass media resources from Africa and across the world.

Exclusion: NEW250Y1
Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

AFR251H1 - Language, Freedom and Linguistic Human Rights in Africa

Hours: 24L

Examines the language situation in Africa and the extent to which freedom and linguistic human rights are enabled, granted, nurtured, achieved or protected by post-colonial African states. Using linguistic diversity in Africa as a backdrop, presents, discusses and assesses language policies that were adopted by post-colonial African states, particularly in education, and the implications that these policies have for the rights, freedom and empowerment of citizens of African states. Changes and evolving trends in language use and language planning are also discussed.

Recommended Preparation: AFR150Y1/ AFR250Y1/ AFR290H1
Breadth Requirements: Creative and Cultural Representations (1)

AFR260H1 - Land, Life, and Livelihoods

Hours: 24L

This course aims to challenge the often-uncritical understanding of land as a thing, object, or a commodity by engaging with land as a bricolage of multiple, dynamic assemblages. Land attracts manifold meanings in different cultural contexts and engenders vibrant discourses around identity, place, and belonging. The materiality of land, fixed in place as to not be ‘rolled up like a mat and taken away’, accords human and other-than-human life affordances that are vital to sustenance of life, and provides a fabric on which stories and histories are deeply embedded. In the African context, land constitutes a site where key political struggles transpire, key amongst them struggles against colonialism, and where African futures obtain form and meaning. It is on land that global interests have hugely converged as characterized by global land grabbing and quests for minerals and resources that offer hope to world’s future(s). These features of land impel us to discuss the institutions that govern land and related inscription devices such as maps and boundaries; technologies and techniques that seek to ‘improve’ agricultural productivity and biodiversity conservation; and the impacts of climate change on life and livelihoods in Africa.

Prerequisite: Completion of 2.0 credits
Recommended Preparation: AFR150Y1/ AFR199H1/ AFR250Y1
Breadth Requirements: Living Things and Their Environment (4)

AFR270H1 - African Literature and the Politics of Storytelling

Hours: 24L

Focuses on the art and politics of storytelling across the continent. Students will engage with various kinds of narrative genres from great African novels to short stories, folktales, popular African films from Nollywood and other industries, as well as more recent forms of storytelling from social media. Topics of discussion will include globalization, colonialism, post-coloniality, neo-imperialism, environmental justice, ecocriticism, artistic expression and African identities. This novel course offers a combination of a wide range of literary and non-literary narrative genres as well as a variety of theoretical and methodological approaches to textual analysis from decolonial theories to ecocriticism, postcolonial environmentalisms, narrative theory, as well as more traditional methods of literary criticism and analysis.

Recommended Preparation: AFR150Y1

Breadth Requirements: Creative and Cultural Representations (1)

AFR280Y1 - Introductory Swahili

Previous Course Number: NEW280Y1

Hours: 24L/72T

Introduction to grammar and basic vocabulary of Swahili. Emphasis on comprehension and oral practice. Reading of selected texts. Relation of the language to its East African cultural context.

Exclusion: NEW280Y1

Breadth Requirements: Creative and Cultural Representations (1)

AFR290H1 - The Idea of Africa

Hours: 24L/12T

An historical examination of Africa as a conceptual category, exploring discourses and representations - both African and non-African - that have produced our understandings of the meanings of Africa and Africanness.

Recommended Preparation: AFR150Y1

Breadth Requirements: Society and its Institutions (3)

AFR298H1 - Popular Uprisings in Africa

Hours: 24L

In recent years, popular uprisings have mobilized thousands in over 40 African countries, to demand a radical overhauling of existing economic and political systems. This course asks: What are the catalysts, underlying causes and demands of these protest movements? What can we learn from the grassroots organizing that allowed these movements to gain momentum? How might scholars and activists analyzing the popular uprisings in their countries, allow us to develop new vocabularies and frameworks for understanding popular protests and theories of revolution? Case Studies will include popular uprisings in Sudan, Burkina Faso, Algeria, Senegal, Cameroon, Djibouti, DRC, Eswatini and Nigeria and reflect on similar movements around the world.

Recommended Preparation: AFR150Y1

Breadth Requirements: Society and its Institutions (3)

AFR299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

AFR299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

AFR322H1 - The Contemporary African Novel

Previous Course Number: NEW322H1, NEW322Y1

Hours: 24S

Novels written in the last forty years by English, French and Portuguese-speaking Africans. Ideological views concerning colonialism and neo-colonialism. Tradition, religious and secular; the use of African symbolism. A small number of historical and sociological texts are recommended as essential background reading. Works not written in English are read in translation. (Offered in alternate years)

Breadth Requirements: Creative and Cultural Representations (1)

AFR340H1 - The Literary Lives of African Women

Hours: 24L

This course will track the literary history of African women through their writings. Students will study a variety of texts including memoirs, novels, short stories, creative non-fiction, drama, and poetry produced by African women with an eye to the politics of representation and legibility in these texts. This course will ask, how have African women written about their relationships to colonization, domesticity, citizenship, and national politics? It will also engage questions about the varieties of their experiences with motherhood, knowledge-making, displacement, citizenship, and belonging.

Prerequisite: Completion of 6.0 credits

Recommended Preparation: [AFR150Y1](#)/ [AFR270H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

JAH350H1 - AIDS, Outbreaks, Pandemics: Challenges and Successes in Africa

Previous Course Number: JNH350H1

Hours: 24L

Explores a range of historical and current outbreaks, pandemics and epidemics such as AIDS, COVID-19 and Ebola in Africa through a social science lens. It introduces students to major concepts, events and debates that have and continue to shape understanding of the HIV/AIDS epidemic, Ebola outbreak and COVID-19 pandemic, and the challenges and responses to these distinct health crises. Through a critical lens, students will engage diverse and interdisciplinary scholarship from public health, medical anthropology, sociology, African studies, and related fields within the health and social sciences fields to explore the converging factors that influence responses to health crises and their broader implications.

Prerequisite: 9.0 credits

Exclusion: [JNH350H1](#)

Recommended Preparation: [AFR150Y1](#)/ [AFR290H1](#) or [HMB203H1](#)/ [HMB202H1](#) or interested students with relevant background

Breadth Requirements: Society and its Institutions (3)

AFR351Y1 - African Systems of Thought

Previous Course Number: NEW351Y1, NEW252Y1

Hours: 48L

The exploration of a range of African cosmologies, epistemologies, and theologies, as well as specific case studies on justice, the moral order, and gender relations. The influence of these richly diverse traditions is traced as well in the writings of African thinkers in the Diaspora.

Exclusion: [NEW351Y1](#), [NEW252Y1](#), [JAP256H1](#)/ [JAP356H1](#)

Recommended Preparation: [AFR150Y1](#)

Breadth Requirements: Society and its Institutions (3), Thought, Belief and Behaviour (2)

AFR352H1 - International Organizations, NGOs, Development and Change in Africa

Previous Course Number: NEW352H1

Hours: 24L

Critically explores the role of international organizations such as the World Bank Group, the UN and NGOs in the economic development of Africa.

Prerequisite: [AFR150Y1](#)/ [AFR250Y1](#)

Exclusion: [NEW352H1](#)

Breadth Requirements: Society and its Institutions (3)

AFR353H1 - International Relations of Africa

Previous Course Number: NEW353H1

Hours: 24L

Explores inter-state relations in Africa, African states' relations with the West, China, India, Brazil, and international political, economic and financial institutions.

Prerequisite: [AFR150Y1](#)

Breadth Requirements: Society and its Institutions (3)

AFR354H1 - African Cultures and Development

Previous Course Number: NEW354H1

Hours: 24L

Critically examines scholarly debates on the relationships between African cultures and development in various regions of the continent. Draws on interdisciplinary scholarship and development discourses to enhance students' understanding of African conditions and cultures in the context of development thinking.

Prerequisite: Completion of 9.0 credits.

Recommended Preparation: AFR150Y1/ AFR250Y1

Breadth Requirements: Society and its Institutions (3)

AFR355H1 - African Youth Languages and Cultures

Previous Course Number: NEW355H1

Hours: 24L

Examines the nature of youth languages and cultures in contemporary Africa with a focus on their characteristics and the conditions under which they develop. Also considers similarities and/or differences between youth languages and cultures in different regions of Africa and the general youth condition. Includes urban youth languages such as Sheng, English, Tsotsitaal, etc. and music genres associated with youth such as hip hop, Bongo flava, etc. Discusses challenges and opportunities associated with African youth languages as they relate to questions of identity, national integration, regional integration, and development.

Prerequisite: Completion of 9.0 credits.

Recommended Preparation: AFR150Y1/ AFR250Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

AFR357H1 - Special Topics in African Studies

Previous Course Number: NEW357H1

Hours: 24L

An upper level course. Topics of study vary from year to year.

Prerequisite: Completed 9.0 credits.

AFR358H1 - Special Topics in African Studies

Previous Course Number: NEW358H1

Hours: 24L

An upper level course. Topics of study vary from year to year.

Prerequisite: Completed 9.0 credits.

AFR359H1 - The Horn of Africa - Critical Perspectives

Previous Course Number: NEW359H1

Hours: 24L

Examines the Horn of Africa, its diversity, geopolitics, cultural politics, present conditions and current debates through a critical and comparative lens. Considers social forces in contemporary politics within the region including competing claims, explanations of the underpinnings of the Horn's conflict, and the promise of peace. Draws upon interdisciplinary scholarship, public discourse, texts and media to reflect on the future of the Horn of Africa at this historical moment.

Prerequisite: Completion of at least 4.0 credits

Exclusion: NEW359H1, NEW357H1 (Special Topics in African Studies: The Horn of Africa: Critical Perspectives) offered in Fall 2018, Fall 2019

Recommended Preparation: AFR150Y1/ AFR250Y1

Breadth Requirements: Society and its Institutions (3)

AFR365H1 - Art, Media and Politics in Africa and the African Diaspora

Hours: 24L

Explores the critical intersections between art, media and politics by analyzing the making and circulation of various indigenous and modern art forms and their use as creative and radical strategies for creative expression, dissent, citizenship, and alternative forms of representation, reimaginings, transcendence and agency in African post-colonial contexts, and interconnected with the African Diaspora.

Prerequisite: Completion of 4.0 credits.

Exclusion: NEW357H1 (Special Topics in African Studies: Art, Media and Politics in Africa and the African Diaspora), offered in Winter 2019 and Fall 2019

Recommended Preparation: AFR150Y1

Breadth Requirements: Creative and Cultural Representations (1)

AFR370H1 - Anticolonialism, Radicalism and Revolutions in Africa

Hours: 24L

An interdisciplinary exploration of the histories of nationalist and revolutionary movements, ideologies, and regimes in twentieth and twenty-first century Africa, examining the various ways that Africans imagined, actively shaped, and continue to demand freedom and political modernity. Emphasis will be placed on African

history methodology (including oral history) and historiography to encourage students to apply a historical lens to approaching key themes and concepts in African Studies such as nationalism, decolonization, the state, politics, citizenship, labour movements, and pro-democracy movements.

Prerequisite: Completion of 4.0 credits

Recommended Preparation: AFR150Y1/ HIS295Y1/ HIS297Y1

Breadth Requirements: Society and its Institutions (3)

JAA377H1 - Black Radical Theory from the Global South: Anthropological Perspectives

Hours: 24L

This course will survey the works of Black theorists and anthropologists from the Global South, who are shaping current debates within and beyond the discipline of Anthropology, concerning colonialism and decolonization, Marxism, indigeneity, political economy, Black radical thought, queer theory and decolonial feminism. Students will look at how these works challenge the “Northern Academy’s monoliteracy” (Musila), politics of knowledge production and construction of the Global South as primarily a site of fieldwork and research extraction. Authors will include Sylvia Tamale, Wangui Kimari, Sabelo Ndlovu-Matsheni, Ochy Curiel, Keguro Macharia, Beatriz Nascimento, Michel-Rolph Trouillot and Abdelghaffar Ahmed.

Prerequisite: ANT204H1/ ANT207H1/ ANT215H1/ AFR150Y1/ AFR290H1/ AFR298H1

Breadth Requirements: Society and its Institutions (3)

AFR380Y1 - Intermediate Swahili

Previous Course Number: NEW380Y1

Hours: 24L/72T

Grammar and syntax. Conversation and written composition. Reading of texts: literary, journalistic. Relation of the language to its East African context.

Prerequisite: AFR280Y1

Exclusion: NEW380Y1

Breadth Requirements: Creative and Cultural Representations (1)

AFR389H1 - The Geopolitics and Debates on Africa-China Economic Relations

Hours: 24L

Explores the geopolitics of Africa-Asia relations, in particular, the unabated and polarized debates and narratives on China’s engagement across sectors in Africa, ‘Africa-China’ multifaceted trade relations, strategies and interests, and economic diplomacy. Critically examines the changing landscape of economic cooperation and development financing in contemporary Africa, their underlying impulses and their broader implications.

Prerequisite: Completion of 4.0 credits

Exclusion: NEW357H1/ AFR357H1 (Special Topics in African Studies: The Geopolitics and Debates on Africa-China Economic Relations), offered in Fall 2020 and Fall 2021

Recommended Preparation: AFR150Y1/ AFR250Y1/ AFR353H1

Breadth Requirements: Society and its Institutions (3)

AFR391H1 - African Studies Independent Study Course

Hours: 24S

The African Studies Independent Study course is designed both to complement regular offerings in African Studies and to provide an opportunity for African Studies students to enrich their studies. Aided and advised by a faculty supervisor, students will conduct extensive research, read relevant literature, and plan, execute, analyze and report on an original and independent investigation of an appropriate topic.

Prerequisite: At least 9.0 credits

Exclusion: NEW391H1 (New College Independent Studies), offered between Winter 2020 to Winter 2023

Recommended Preparation: AFR150Y1/ AFR250Y1/ AFR290H1

Breadth Requirements: Creative and Cultural Representations (1)

AFR398H0 - Research Excursion Program

Hours: 48S

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/faculty-staff/experiential->

learning/international-indigenous/research-excursions-program. Not eligible for CR/NCR option.

Prerequisite: Completion of 9.0 credits.

Recommended Preparation: AFR150Y1/ AFR250Y1/ AFR290H1

AFR398Y0 - Research Excursion Program

Previous Course Number: NEW398Y0

Hours: 48S

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/faculty-staff/experiential-learning/international-indigenous/research-excursions-program>. Not eligible for CR/NCR option.

Prerequisite: Completion of 9.0 credits

Exclusion: NEW398Y0

Recommended Preparation: AFR150Y1/ AFR250Y1/ AFR290H1

AFR450Y1 - African Studies Honours Research Seminar

Previous Course Number: NEW450Y1

Hours: 24S

This honours research seminar required of all specialists and majors in African Studies offers critical explorations of the genealogy of African Studies, the transnational study of Africa, Africa's place in a globalized world, the historical, intellectual and institutional contexts of Africanist knowledge production, its dissemination and consumption in Africa, Europe, the Americas and emerging academic sites in Asia. It engages with the paradigm shifts and vibrant scholarly and epistemic debates across disciplines and geographies as well as unfolding events, public discourses, geopolitics, African popular cultures and the reimagining of African futures through canonical, emergent scholarship and creative media. It emphasizes students' original and creative research explorations, engaged praxis and search for alternative theorizing and decolonial epistemologies. It is also open to upper level students interested in African Studies and/or research in and on Africa.

Prerequisite: AFR150Y1 or any 200-level or 300-level Group A Course. Students who do not meet the prerequisites are encouraged to contact the department.

Recommended Preparation: Any group A courses

Breadth Requirements: Society and its Institutions (3), Creative and Cultural Representations (1)

AFR451H1 - Special Topics in African Studies

Previous Course Number: NEW451H1

Hours: 24L

An upper level course. Topics of study vary from year to year.

Prerequisite: Completion of 9.0 credits.

AFR452H1 - Kiswahili in a Globalized World

Hours: 24L

Examines the state and role of Kiswahili in the globalized world of the 21st century. Traces the changes in the roles of Kiswahili over time from its beginnings as a local East African coastal language to its current status as a regional and international *lingua franca*, and gives students an opportunity to interact with Kiswahili speakers in Toronto. Explores the challenges and opportunities arising from contact with other cultures and languages through globalization. Globalization as a potent force and its effects on Kiswahili are discussed in detail.

Prerequisite: Completion of 9.0 credits

Recommended Preparation: AFR280Y1/ AFR380Y1

Breadth Requirements: Creative and Cultural Representations (1)

AFR454H1 - Migration, Mobility, and Displacement in Contemporary Africa

Previous Course Number: NEW454H1

Hours: 24S

Why do people move voluntarily or involuntarily? What are the causes and consequences of migration and displacement in Africa? This course critically examines the multifaceted dimensions of migration, mobility, and displacement, with a specific focus on communities and populations displaced by war, environmental destruction and disaster, economic failings, and the quest for economic opportunities, love, education, or individual freedom.

Prerequisite: Completion of 9.0 credits.

Recommended Preparation: AFR150Y1/ AFR250Y1/ AFR298H1/ AFR353H1/ AFR340H1

Breadth Requirements: Society and its Institutions (3)

AFR455H1 - Conflicts, Negotiations and Peacebuilding in Africa

Previous Course Number: NEW455H1

Hours: 24S

Examines conflicts and peace negotiations in African contexts such as Somalia, Sudan, the Democratic Republic of Congo, and North Africa through public discourse, citizen actions, policy debates and mobilizations. Explores formal, informal, indigenous and institutional mediation and peace negotiation platforms, strategies, and impulses. Analyzes various conflict zones, case studies and intervention strategies for negotiating and sustaining peace in Africa in the broader context of the war on terror, increasing militarism, and securitization in peacebuilding.

Prerequisite: Completion of 9.0 credits.

Recommended Preparation: [AFR150Y1](#)/ [AFR250Y1](#)/ [AFR270H1](#)/ [AFR298H1](#)/ [AFR353H1](#)/ [AFR359H1](#)/ [AFR370H1](#)

Breadth Requirements: Society and its Institutions (3)

AFR459H1 - Advanced Special Topics in African Studies

Previous Course Number: NEW459H1

Hours: 24L

An upper-level course. Topics of study vary from year to year.

Prerequisite: Completion of 9.0 credits.

AFR460H1 - Climate Change, Food Security, and Sustainability in Africa

Hours: 24L

Food security is a critical challenge for many African countries and, in the past decades, has been exacerbated by climate change. To understand the complexities of food insecurity and to explore possible pathways for a food-secure Africa, we ask: what is the nexus between food security, climate change, and sustainability in Africa? How is food security intertwined with livelihood security, rights, justice, resource governance, conflicts, natural disasters, uncertainties, and risks and vulnerabilities? What are the challenges and opportunities for sustainable futures in Africa? Which theoretical frameworks illuminate these complexities? Students will learn through case study analyses, guest lectures, modeling and scenario-building exercises, and engagement with indigenous knowledge systems, canonical and emergent interdisciplinary scholarship on the topic.

Prerequisite: Completion of 9.0 credits

Exclusion: [AFR459H1](#) (Topic: *Climate Change, Food Security and Sustainability in Africa*), offered in Winter 2022 and Winter 2024

Recommended Preparation: [AFR150Y1](#)/ [AFR250Y1](#)/ [AFR270H1](#)/ [AFR290H1](#)/ [AFR298H1](#)/ [AFR352H1](#)/ [AFR359H1](#)

Breadth Requirements: Society and its Institutions (3)

AFR465H1 - African Cities and Urban Futures

Hours: 24L

From slums, bustling cultural scenes and cityscapes, to diaspora lanes, African cities show diverse trajectories, inequalities and uneven pace of urbanization. Challenging clichés of African cities as 'dystopian' and 'off the map', this course critically examines the processes and dynamics of urban transformation and rapid urbanization of African cities and their socio-cultural, ecological, political and economic implications. It interrogates key drivers of urbanization, sustainable urban development, livelihoods, inclusive and just urbanism challenges, urban policies and governance, and the reimagining of African urban futures. Students will learn from cutting edge scholarship and engage with speakers and Africa-based city-builders, policy makers, artists, activists, and social entrepreneurs.

Prerequisite: Completion of 9.0 credits

Recommended Preparation: [AFR150Y1](#) or [AFR290H1](#) or interested students with relevant background

Breadth Requirements: Society and its Institutions (3)

AFR490Y1 - African Studies Independent Study Course

Hours: 48S

The African Studies Independent Study course is designed both to complement regular offerings in African Studies and to provide an opportunity for African Studies students to enrich their studies. Aided and advised by a faculty supervisor, students will conduct extensive research, read relevant literature, and plan, execute, analyze and report on an original and independent investigation of an appropriate topic. The exact Breadth Requirement category to be assigned to this course is based on the topic chosen by the student and approved by their faculty supervisor.

Prerequisite: At least 9.0 credits

Exclusion: [NEW490Y1](#) (if taken before 2025)

Recommended Preparation: [AFR150Y1](#)/ [AFR250Y1](#)/ [AFR290H1](#)

AFR491H1 - African Studies Independent Study Course

Hours: 48S

The African Studies Independent study course is designed both to complement regular offerings in African Studies and to provide an opportunity for African Studies students to enrich their studies. Students, aided and advised by a faculty supervisor, will conduct extensive research, read relevant literature, and plan, execute, analyze and report on an original and independent investigation of an appropriate topic. The exact Breadth Requirement category to be assigned to this course is based on the topic chosen by the student and approved by their faculty supervisor.

Prerequisite: At least 9.0 credits

Exclusion: NEW490H1 [If taken before 2025]

Recommended Preparation: AFR150Y1/ AFR250Y1/ AFR290H1

AFR499H1 - Advanced Topics in African Studies

Hours: 24S

A joint graduate/undergraduate upper-level seminar. Topics vary from year to year, depending on the instructor. Consult the Program Office for course enrolment procedures.

Prerequisite: Completion of 9.0 credits.

American Studies

Faculty List

Professor and Director

Rick Halpern, PhD. Director, American Studies Program and Centre for the Study of the United States

Assistant Professors, Teaching Stream

Alexandra Rahr, PhD. Director of Undergraduate Programs and Student Experience

Leah Montange, PhD. Bissell-Heyd Lecturer in American Studies

Introduction

The American Studies Program is designed to provide students with a broad, yet deep, education about the United States and its role in the world. American Studies' small and topical core courses allow students to engage intellectually with a rapidly changing world and ask, "what is America, how has it changed, and what are the best ways to study and understand it?"

To ensure breadth, students are required to take two interdisciplinary core courses that both range widely with respect to content and multidisciplinary perspectives. As well, the Program offers a wide selection of courses from participating departments and programs such as Geography, Political Science, History, Music, Cinema Studies, Economics, English, Indigenous Studies, Religion, Sociology, Caribbean Studies, and Canadian Studies, giving students broad exposure to fundamental themes animating American life. To ensure depth, the American Studies Program relies heavily on upper-level courses, including seminars at the 300 and 400-levels.

Enquiries:

Program Coordinator, Munk School of Global Affairs & Public Policy, 1 Devonshire Place Room 327N, (416-946-8972), csus@utoronto.ca

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The American Studies programs impacted by this policy: [ASMAJ0135](#), [ASMIN0135](#)

American Studies Programs

American Studies Major (Arts Program) - ASMAJ0135

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

7.0 credits specified as follows:

1. [AMS200H1](#) (formerly [USA200H1](#)) and [AMS300H1](#) (formerly [USA300H1](#)) (total of 1.0 credit).

2. 1.0 credit from the gateway courses in American Studies ([AMS100H1](#)), English ([ENG250H1](#) **and either** [ENG270H1](#) or [ENG235H1](#)), History ([HIS271Y1](#)), Geography ([GGR240H1](#) **and** [GGR254H1](#)), or Political Science ([POL386Y1](#) **or** the combination of [POL347H1](#) **and** [POL386H1](#)), or Cinema Studies ([CIN270Y1](#)).

3. Three of the following selections:

- 1.0 credit from the Politics and Economics disciplinary/thematic cluster
- 1.0 credit from the Society disciplinary/thematic cluster
- 1.0 credit from the Culture disciplinary/thematic cluster
- 1.0 credit from the History disciplinary/thematic cluster

4. 0.5 credit in Breadth Requirement Category 5: The Physical or Mathematical Universe, or another 0.5 credit approved by the CSUS Program Director, to fulfill the Quantitative Reasoning competency requirement of the program.

5. Additional AMS/USA courses or courses from the American Studies Program disciplinary/thematic clusters to a total of 7.0 credits, including requirement #4 above.

6. At least 2.0 credits of the student's 7.0 credits must be at the 300-level or above.

7. At least 1.5 credits of the student's program must be in American Studies (AMS prefix courses), at the 300-level or above, with at least 0.5 credits of these at the 400-level.

Recommended Sequence of Courses:

First Year:

Students are encouraged to take any pre-requisites for the gateway course required, and/or enroll directly in [AMS100H1](#) or [AMS200H1](#) as a first-year student. Of the required gateway courses, [POL347H1](#), [POL386H1](#) and [POL386Y1](#) have pre-requisites of a course that deals substantially with politics; students interested in these courses, therefore, should confer with the instructor as to whether their course work includes a pre-requisite for these courses. Other recommended courses at the first year level include: [HIS106Y1](#).

Second Year:

- [AMS200H1](#)
- [AMS220H1](#) (or) [HIS271Y1](#) (or) [ENG250H1](#) AND either [ENG270H1](#) or [ENG235H1](#) (or) [GGR240H1](#) AND [GGR254H1](#) (or) [POL386Y1](#), or [POL347H1](#) AND [POL386H1](#)

Second, Third, and Fourth Years:

- [AMS300H1](#), plus other eligible courses, to a total of 7.0 credits.
- At least 2.0 of these courses must be at the 300-level or above.
- At least 1.5 of these courses must be in American Studies (AMS prefix courses) at the 300- or 400-level. Courses must be chosen in a way that satisfies the disciplinary/thematic variety described above, plus 0.5 credit in Breadth Requirement Category 5, or another half course approved by the CSUS Program Director, to fulfill the Quantitative Reasoning competency requirement of the program.

*NOTE 1: Other 300+ level courses with 50% or more American content may be allowed; students should seek early approval of program credit for such courses from the CSUS Director.

Disciplinary/Thematic Cluster 1: Politics and Economics

[ECO306H1](#)/ [POL326H1](#)/ [POL327H1](#)/ [POL347H1](#)/ [POL377H1](#)/ [POL386H1](#)/ [POL386Y1](#)/ [POL326Y1](#)/ [POL379H1](#)/ [POL404Y1](#)/ [POL433H1](#)/ [POL443H1](#)/ [POL464H1](#)

Disciplinary/Thematic Cluster 2: Society

[AMS311H1](#)/ [AMS330H1](#)/ [GGR240H1](#)/ [GGR254H1](#)/ [GGR336H1](#)/ [GGR339H1](#)/ [GGR359H1](#)/ [GGR458H1](#)/ [INS302H1](#)/ [INS341H1](#)/ [MUN200H1](#)/ [SOC306H1](#)/ [SOC386H1](#)/ [SOC429H5](#)

Disciplinary/Thematic Cluster 3: Culture

[AMS320H1](#)/ [CIN211H1](#)/ [CIN230H1](#)/ [CIN270Y1](#)/ [CIN310Y1](#)/ [CIN334H1](#)/ [CIN335H1](#)/ [CIN374Y1](#)/ [CIN431H1](#)/

[CIN490Y1](#)/ [CIN491H1](#)/ [CIN492H1](#)/ [ENG250H1](#)/ [ENG235H1](#)/ [ENG270H1](#)/ [ENG355Y1](#)/ [ENG360H1](#)/ [ENG363Y1](#)/ [ENG364Y1](#)/ [ENG365H1](#)/ [ENG368H1](#)/ [ENG379H1](#)/ [ENG484H1](#)/ [MUS306H1](#)/ [RLG315H1](#)/ [CAR324H1](#)/ [JLN427H1](#)/ [CDN368H1](#)/ [FAH351H1](#)

Disciplinary/Thematic Cluster 4: History

[AMS220H1](#)/ [HIS106Y1](#)/ [HIS202H1](#)/ [HIS221H1](#)/ [HIS222H1](#)/ [HIS271Y1](#)/ [HIS300H1](#)/ [HIS310H1](#)/ [HIS343H1](#)/ [HIS345H1](#)/ [HIS366H1](#)/ [HIS369H1](#)/ [HIS374H1](#)/ [HIS376H1](#)/ [HIS377H1](#)/ [HIS378H1](#)/ [HIS379H1](#)/ [HIS389H1](#)/ [HIS389Y1](#)/ [HIS396H1](#)/ [HIS400H1](#)/ [HIS401H1](#)/ [HIS404H1](#)/ [HIS411H1](#)/ [HIS463H1](#)/ [HIS464H1](#)/ [HIS465Y1](#)/ [HIS473H1](#)/ [HIS479H1](#)/ [HIS484H1](#)/ [HIS487H1](#)/ [HIS497H1](#)

*NOTE: This list of eligible courses is not exhaustive and some courses may not be offered every year. Please visit the [CSUS website](#) for more information.

American Studies Minor (Arts Program) - ASMIN0135

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, including 1.0 credit at the 300+ level in at least two American Studies Program disciplinary/thematic clusters, categorized as follows: a) Politics and Economics b) Society (e.g. Indigenous Studies, Anthropology, East Asian Studies, Geography) c) Culture (e.g. Cinema Studies, English, Music, Religion) d) History)

Second year:

1. [AMS200H1](#) (formerly [USA200H1](#))

2. 1.0 credit from the gateway courses in American Studies ([AMS100H1](#)), English ([ENG250H1](#) and either [ENG270H1](#) or [ENG235H1](#)), History ([HIS271Y1](#)), Geography ([GGR240H1](#) and [GGR254H1](#)), Political Science ([POL386Y1](#) or the combination of [POL347H1](#) and [POL386H1](#)), or Cinema Studies ([CIN270Y1](#)).

Second, third, and fourth years:

3. 2.5 credits from AMS/USA courses (excluding [AMS200H1](#)/ [USA200H1](#)) or from the eligible courses listed below. These credits must include 1.0 credit at the 300+ level from AMS courses.

*NOTE 1: Other 300+ level courses with American content may be allowed; students should seek early approval of program credit for such courses.

Disciplinary/Thematic Cluster 1: Politics and Economics

American Studies Courses

AMS100H1 - Global Capitalism

Hours: 24L/8T

This course explores the rise of capitalism – understood not simply as an economic system but as a political and cultural one as well. It aims to acquaint students with the more important socio-economic changes of the past 600 years with an eye towards informing the way they think about problems of the present time: globalization, growing disparities of wealth, and the exploitation of natural resources. It seeks to foster a critical approach to the way in which the world is organized. A dual mission stands at its centre: it utilizes a focus on capitalism as a tool of scholarly understanding of the way the world has evolved, and it assists students in developing a critique of capitalism as a system.

Breadth Requirements: Society and its Institutions (3)

HIS463H1/ HIS464H1/ HIS465Y1/ HIS473H1/ HIS479H1/ HIS484H1/ HIS487H1/ HIS497H1

*NOTE: This list of eligible courses is not exhaustive and some courses may not be offered every year. Please visit the [CSUS website](#) for more information.

To see our full list of American Studies courses offered in 2024-2025, please go to our website at the Centre for the Study of the United States, at the Munk School of Global Affairs & Public Policy here: <https://munkschool.utoronto.ca/american-studies>

Courses Eligible for Program Credit

Please visit our [website](#) for more information on courses eligible for program credit, as the list of courses in the program requirements is not exhaustive. Some of the courses may not be offered every year. Certain courses have prerequisites and exclusions, so check the Calendar listings, or the offering department/program websites.

Students who wish to count non-AMS courses towards the program that are not listed in the program completion requirements (including U of T courses and transfer credits) must seek permission from the program director IN ADVANCE. Course approval is not guaranteed and will be given at the discretion of the program director. Please consult the program advisor at csus@utoronto.ca with questions.

MUN120H1 - Revolutions

Hours: 24L/8T

This course transcends time and place to delve into the overarching dynamics of revolution. This exploration of revolutions goes beyond simple chronology to uncover common threads that unite these transformative events. From the spirit that ignited the English Revolution to the fervor of the American Revolution, the course navigates through the social and political forces that reshaped societies. Students will dissect the emergence of radical change, tracing its evolution from the French Revolution to the Revolutions of 1848 and the birth of modern political ideologies. The course then navigates through the 20th century, from the Russian and Chinese Revolutions to the Cuban Revolution and the intricate web of Latin American revolutionary movements. Comparative analysis delves into the universal and unique aspects of these revolutions, offering students an understanding of the power and influence of these transformative moments.

Breadth Requirements: Thought, Belief and Behaviour (2)

AMS200H1 - Introduction to American Studies

Previous Course Number: USA200H1

Hours: 24L

A formal introduction to the interdisciplinary study of the United States and to the field of American Studies. Drawing from a variety of source materials ranging from political and literary to visual culture and material artifacts, this course examines the politics, history and culture of the U.S. A major emphasis will be learning to analyze primary sources.

Exclusion: USA200H1

Breadth Requirements: Society and its Institutions (3)

AMS210H1 - Concepts in American Studies

Hours: 24L

An interdisciplinary introduction to concepts key to the study of the United States in the world. Course materials will range from political, cultural, and literary theory to visual and material artifacts. Examining issues in the politics, history, and culture of the U.S., the course will give a grounding in the methods and ideas that make up the practice of American Studies.

Breadth Requirements: Society and its Institutions (3)

AMS220H1 - Depression Era America: History, Politics, Culture

Hours: 24S

This course explores the 1930s on a number of interconnected levels, prompting students to link the economic, political, and cultural planes of Americans' lived experience in an informed way. It starts with the impact of the 1929 Crash, looking at the ways this reshaped values, and conceptions of race and gender, and also allowed unprecedented critiques and organizational forms to emerge. It then considers local and federal responses to economic catastrophe, emphasizing the emergence of regulatory mechanisms that further reshaped social relations. With this foundation in place, the course turns to consider three forms of artistic production in which the social dynamics of the age found powerful echo: FSA photography and WPA murals; experimental literature; and cinema.

Recommended Preparation: HIS271Y1

Breadth Requirements: Society and its Institutions (3)

AMS300H1 - Theories and Methods in American Studies

Previous Course Number: USA300H1

Hours: 24L

This course, required for majors and minors but open to all who have met the pre-requisites, explores a range of approaches to the field of American Studies. Students will be introduced to some of the many 'theories and methods' that have animated the field of American Studies, including historical methods; formal analysis of visual and literary texts; and key concepts, such as commodity chain analysis; 'race,' 'commodity,' 'gender,' 'diaspora,' and 'affect.'

Prerequisite: HIS271Y1/ ENG250Y1/ GGR240H1/ GGR254H1/ POL203Y1/ POL386Y1/ (POL347H1, POL386H1). If you do not have these prerequisites but would like to take the course, please contact the instructor and/or csus@utoronto.ca to discuss exceptions to the prerequisites.

Exclusion: USA300H1, USA300Y1

Breadth Requirements: Creative and Cultural Representations (1)

AMS310H1 - Approaches to American Studies

Previous Course Number: USA310H1

Hours: 24L

An in-depth, interdisciplinary examination of a specific question concerning U.S. history, politics, and/or culture. Focus varies depending on instructor. Major emphases include reading critically and the initial steps of conducting original research.

Prerequisite: AMS300H1/ USA300H1, or 1.0 credit chosen from the four American Studies Program disciplinary/thematic clusters (Politics and Economics, Society, Culture, and History) as published in the American Studies section of the Calendar. If you do not have these prerequisites but would like to take the course, please contact the instructor and/or csus@utoronto.ca to discuss exceptions to the prerequisites.

Breadth Requirements: Creative and Cultural Representations (1)

AMS311H1 - Approaches to American Studies

Previous Course Number: USA311H1

Hours: 24L

An in-depth, interdisciplinary examination of a specific question concerning U.S. history, politics, and/or culture. Focus varies depending on instructor. Major emphases include reading critically and the initial steps of conducting original research.

Prerequisite: [AMS300H1/ USA300H1](#), or 1.0 credit chosen from the four American Studies Program disciplinary/thematic clusters (Politics and Economics, Society, Culture, and History) as published in the American Studies section of the Calendar. If you do not have these prerequisites but would like to take the course, please contact the instructor and/or csus@utoronto.ca to discuss exceptions to the prerequisites.

Breadth Requirements: Creative and Cultural Representations (1)

AMS312H1 - Approaches to American Studies

Previous Course Number: USA312H1

Hours: 24L

An in-depth, interdisciplinary examination of a specific question concerning U.S. history, politics, and/or culture. Focus varies depending on instructor. Major emphases include reading critically and the initial steps of conducting original research.

Prerequisite: [AMS300H1/ USA300H1](#), or 1.0 credit chosen from the four American Studies Program disciplinary/thematic clusters (Politics and Economics, Society, Culture, and History) as published in the American Studies section of the Calendar. If you do not have these prerequisites but would like to take the course, please contact the instructor and/or csus@utoronto.ca to discuss exceptions to the prerequisites.

Breadth Requirements: Society and its Institutions (3)

AMS313H1 - Approaches to American Studies

Previous Course Number: USA313H1

Hours: 24L

An in-depth, interdisciplinary examination of a specific question concerning U.S. history, politics, and/or culture. Focus varies depending on instructor. Major emphases include reading critically and the initial steps of conducting original research.

Prerequisite: [AMS300H1/ USA300H1](#), or 1.0 credit chosen from the four American Studies Program disciplinary/thematic clusters (Politics and Economics, Society, Culture, and History) as published in the American Studies section of the Calendar. If you do not have these prerequisites but would like to take the course,

please contact the instructor and/or csus@utoronto.ca to discuss exceptions to the prerequisites.

Breadth Requirements: Society and its Institutions (3)

AMS320H1 - Tearing Down Monuments: Controversies in Public Memory

Previous Course Number: AMS199H1

Hours: 24L

As statues are kicked off their pedestals all around the world, this class reckons with the legacy and future of public memory cultures. We'll consider the history, geography, aesthetics, bureaucracy, ecologies, and ideologies of both local and U.S. American memorials. And we'll examine the birth, life, death, and afterlives of both conventional monuments and emerging forms of material and digital alt-memorialization.

Prerequisite: [AMS200H1](#) or 1.0 credit chosen from the four American Studies Program disciplinary/thematic clusters (Politics and Economics, Society, Culture, and History) as published in the American Studies section of the Calendar. If you do not have these prerequisites but would like to take the course, please contact the instructor and/or csus@utoronto.ca to discuss exceptions to the prerequisites.

Exclusion: [AMS199H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

AMS330H1 - Transnational America

Previous Course Number: AMS313H1

Hours: 24S

The United States -- as a global military, cultural, and economic power -- has always been a transnational space. In this course, students will read texts that emphasize the transnational dimensions of the US, learning about a range of topics that may include borders, global supply chains, immigration, food cultures, media, and the reach of the US military. In what ways do the United States and its people exceed their national boundaries? And in what ways are the United States and its people shaped by "elsewhere"?

Exclusion: [AMS313H1](#) (Approaches to American Studies: *Transnational America*) offered in Winter 2024

Recommended Preparation: [AMS200H1](#)

Breadth Requirements: Society and its Institutions (3)

AMS400H1 - Topics in American Studies

Previous Course Number: USA400H1

Hours: 24S

In-depth examination of specific themes relating to American Studies.

Prerequisite: 2.0 credits chosen from courses with the AMS/USA designator or from the four American Studies Program disciplinary/thematic clusters (Politics and Economics, Society, Culture, and History) as published in the American Studies section of the Calendar. If you do not have these prerequisites but would like to take the course, please contact the instructor and/or csus@utoronto.ca to discuss exceptions to the prerequisites.

Breadth Requirements: Creative and Cultural Representations (1)

AMS401H1 - Topics in American Studies

Previous Course Number: USA401H1

Hours: 24S

In-depth examination of specific themes relating to American Studies.

Prerequisite: 2.0 credits chosen from courses with the AMS/USA designator or from the four American Studies Program disciplinary/thematic clusters (Politics and Economics, Society, Culture, and History) as published in the American Studies section of the Calendar. If you do not have these prerequisites but would like to take the course, please contact the instructor and/or csus@utoronto.ca to discuss exceptions to the prerequisites.

Breadth Requirements: Creative and Cultural Representations (1)

AMS402H1 - Topics in American Studies

Previous Course Number: USA402H1

Hours: 24S

In-depth examination of specific themes relating to American Studies.

Prerequisite: 2.0 credits chosen from courses with the AMS/USA designator or from the four American Studies Program disciplinary/thematic clusters (Politics and Economics, Society, Culture, and History) as published in the American Studies section of the Calendar. If you do

not have these prerequisites but would like to take the course, please contact the instructor and/or csus@utoronto.ca to discuss exceptions to the prerequisites.

Breadth Requirements: Society and its Institutions (3)

AMS403H1 - Topics in American Studies

Previous Course Number: USA403H1

Hours: 24S

In-depth examination of specific themes relating to American Studies.

Prerequisite: 2.0 credits chosen from courses with the AMS/USA designator or from the four American Studies Program disciplinary/thematic clusters (Politics and Economics, Society, Culture, and History) as published in the American Studies section of the Calendar. If you do not have these prerequisites but would like to take the course, please contact the instructor and/or csus@utoronto.ca to discuss exceptions to the prerequisites.

Breadth Requirements: Society and its Institutions (3)

AMS494H1 - Independent Studies

Previous Course Number: USA494H1

Independent Studies. Not eligible for CR/NCR option.

Exclusion: [USA494H1](#)

AMS495Y1 - Independent Studies

Previous Course Number: USA495Y1

Independent Studies. Not eligible for CR/NCR option.

Exclusion: [USA495Y1](#)

Anatomy

Anatomy Courses

ANA200H1 - Human Visceral Anatomy

Hours: 36L/12P

This course introduces students to the gross anatomy of human visceral systems.

Exclusion: ANA300Y1, ANA126Y1

Recommended Preparation: 4U Biology

Breadth Requirements: Living Things and Their Environment (4)

ANA300Y1 - Human Anatomy and Histology

Hours: 86L/18P

Structure of the human body and its relationship to function. Basic human histology, gross anatomy and neuroanatomy.

Prerequisite: BIO130H1/ BIO152H5/ BIOA01H3/ ANA126Y1/ (ANA124H1, ANA125H1)/ ANA200H1

Breadth Requirements: Living Things and Their Environment (4)

ANA301H1 - Human Embryology

Hours: 48L

Human embryology from fertilization to the end of the fetal period. Current concepts in mammalian morphogenesis applied to the development of the various organ systems; etiologies and pathogenesis of some of the more common human congenital abnormalities.

Prerequisite: BIO130H1

Breadth Requirements: Living Things and Their Environment (4)

ANA400H1 - Anatomy Dissection

Hours: 24P/24S

A focused series of Anatomical dissections will be made and the surgical implications of the findings will be the subject of seminars. Attitudes to dissection of the human body, complications of surgery and other relevant issues will be discussed.

Prerequisite: ANA300Y1/ ANA126Y1/ (ANA124H1, ANA125H1). Normally a "B" standing will be required.

Breadth Requirements: Living Things and Their Environment (4)

JHA410H1 - Clinical Neuroimaging

Hours: 24L/12T

This course focuses on the use of neuroimaging techniques in understanding how trauma, disorders, and disease impact neural structure and function. Lectures will focus on introduction to techniques and clinical/research applications. Lab work will focus on the development of

practical skills including image processing, analyses, and experimental design.

Prerequisite: Completion of 9.0 credits including PSL300H1, BIO230H1/ BIO255H1, and one of HMB200H1/ PSY290H1/ ANA300Y1

Recommended Preparation: HMB320H1

Breadth Requirements: Living Things and Their Environment (4)

ANA411H1 - Anatomy in Application: Exercise & Biomechanics

Hours: 30P/30S

This course will cover musculoskeletal anatomy (both upper and lower limb) topics with an emphasis on applying detailed anatomical review, biomechanical principles and research evidence to explain or clarify exercise principles and myths. This course is offered every other year.

Prerequisite: For KPE students: ANA124H1, ANA125H1, and ANA126Y1 For Arts & Science students: ANA300Y1 (78%) or equivalent

Breadth Requirements: Living Things and Their Environment (4)

ANA420H1 - Anatomy of the Stem Cell Niche

Hours: 24L/12T/2P

This course introduces the anatomy and histology of stem cell niches in the adult and relates adult stem cells to organ function throughout the body. It is designed to build upon students' knowledge of basic human anatomy and histology.

Prerequisite: Completion of 9.0 credits including one of BIO230H1/ PSL201Y1/ PSL300H1/ ANA301H1/ ANA300Y1/ HMB302H1

Breadth Requirements: Living Things and Their Environment (4)

ANA498Y1 - Project in Anatomy

A research project in Histology, Cellular or Molecular Biology, Developmental Biology, Neuroanatomy or Gross Anatomy. Not eligible for CR/NCR option.

Prerequisite: Permission of a professor to supervise the project

Breadth Requirements: Living Things and Their Environment (4)

Introduction

Anthropology examines the complexity and diversity of human experience, past and present, through evolutionary, archaeological, social, cultural, and linguistic perspectives. As such, Anthropology is a truly interdisciplinary venture that spans the natural sciences, social sciences, and humanities. This broad mandate has led to the division of the discipline into three broad areas

of research: Archaeology; Evolutionary Anthropology; and the study of Society, Culture and Language.

Archaeologists study the material remains of the human past. Archaeological methods range widely, from the study of artifacts to the analysis of plant and animal remains, and Archaeological research covers a vast expanse of time from the earliest stone tools to the complex record left by modern industrial society. Archaeologists also grapple with a range of theoretical issues including material culture, culture change, identity, and ritual. Many archaeologists today also work in collaboration with local communities and engage with the questions of archaeological ethics.

Evolutionary Anthropology is the study of the biological diversity of humans, the history of this diversity, and the biological relationships between humans and non-human primates. Major foci in Evolutionary Anthropology include Human Biology, the study of modern humans; Osteology, the study of the human skeleton; Paleoanthropology, the study of human evolution; and Primatology, the study of non-human primates. Evolutionary anthropologists integrate biological and social variables in their explanations of the effects of evolution on humans and other primates.

At the core of the study of Society, Culture and Language is the question of how we humans organize our lives together, and why we do so in such vastly different ways. The orientation is global and contemporary. We explore social relations: relations between kin and neighbours, between genders and generations, between ethnic groups and nations, between rich and poor, between people and the natural environment that sustains them, and between people and their gods. We also explore the production and communication of meanings through rituals, images, memories, symbols and linguistic codes. Topics include environment, power, ideology, identity, subjectivity, media, sexuality, ethics, affect, activism, health, cities, work and international development.

A training in anthropology prepares students to think clearly and critically; to engage with a wide range of perspectives, experiences, and world views; and to reach ethically sound decisions. Programs available within the Department of Anthropology provide excellent preparation for careers in business, or public service and the non-profit sector, especially in areas where international and human diversity issues are important. Courses in anthropology provide a unique grounding and can be fruitfully combined with courses in a wide variety of other disciplines in the sciences, social sciences, and humanities.

Website: <https://www.anthropology.utoronto.ca/>

Undergraduate Program Administrator/Student Counsellor: Anthropology Building, 19 Ursula Franklin Street, Room 258 (416-978-6414).

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Anthropology programs impacted by this policy: [ASSPE2112](#) and [ASMAJ2112](#); [ASMAJ1775](#) and [ASMIN1775](#)

Anthropology Programs

Anthropology Specialist (Society, Culture, and Language) (Arts Program) - ASSPE2112

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following course with the stated minimum grade is required:

- [ANT207H1](#) (70%)

Completion Requirements:

(10.0 credits, including at least 2.0 credits at the 400-level)

First and/or Second Year:

1. [ANT204H1](#) and [ANT207H1](#)

Upper Years:

2. [ANT370H1](#) and [ANT380H1](#)
3. 6.0 credits from Group C, or Subgroup C(i) or C(ii)
4. [ANT475H1](#) and an additional 1.5 credits at the 400-level

Note: ANT courses are those offered with the following prefixes: ANT, ARH, INS, JAA, JAL, and JGA.

Group C: Society, Culture, and Language

[ANT204H1](#), [ANT205H1](#), [ANT207H1](#), [ANT208H1](#), [ANT210H1](#), [ANT215H1](#), [ANT299Y1](#), [ANT324H1](#), [ANT342H1](#), [ANT343H1](#), [ANT344H1](#), [ANT345H1](#), [ANT346H1](#), [ANT347H1](#), [ANT348H1](#), [ANT352H1](#), [ANT354H1](#), [ANT356H1](#), [ANT357H1](#), [ANT358H1](#),

ANT362H1, ANT364H1, ANT366H1, ANT370H1, ANT374H1, ANT376H1, ANT378H1, ANT380H1, ANT382H1, ANT384H1, ANT385H1, ANT386H1, ANT390H1, ANT426H1, ANT435H1, ANT441H1, ANT442H1, ANT446H1, ANT450H1, ANT456H1, ANT459H1, ANT460H1, ANT462H1, ANT463H1, ANT464H1, ANT465H1, ANT473H1, ANT475H1, ANT480H1, ANT484H1, ANT485H1, ANT486H1, ANT488H1, ANT490Y1, ANT491Y1, ANT491H1, ANT497Y1, ANT498H1, ANT499H1, JAA377H1, JAH391Y0, JAH391H1, JNH350H1, AFR250Y1, NMC356H1, MCS225Y1

Note: ANT390H1 may be placed in a different Course Group depending on the topic, which will vary from year to year.

Subgroup C (i): (Society, Culture and Language-Area)

ANT455H1, ANT458H1, ANT472H1, ANT477H1, AFR298H1, CAR316H1, NMC241H1

Subgroup C (ii): (Society, Culture and Language – Linguistic)

ANT253H1, ANT329H1, ANT425H1, ANT483H1, ANT497Y1, ANT498H1, ANT499H1, JAL328H1, JAL355H1, JAL401H1, SLA380H1

Focus in Medical Anthropology (Specialist: Society, Culture and Language) - ASFOC2112B

This focus enables students in the Anthropology Specialist (Society, Culture, and Language) ASSPE2112, to identify courses pertaining to Medical Anthropology (Health) and receive formal acknowledgement for completing a suite of health-related anthropology courses.

Enrolment Requirements:

Enrolment in the Anthropology Specialist (Society, Culture, and Language) is required.

Completion Requirements:

3.5 credits (total)

1. ANT205H1

2. 3.0 credits from: ANT208H1, ANT331H1, ANT345H1, ANT348H1, ANT357H1, ANT358H1, ANT382H1, ANT385H1, ANT433H1, ANT435H1, ANT442H1, ANT446H1, ANT458H1, ANT460H1, ANT488H1

Health related Anthropology Special Topics courses may be chosen when offered at the third or fourth year levels.

Anthropology Major (Society, Culture, and Language) (Arts Program) - ASMAJ2112

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- ANT100Y1 (65%) or ANT207H1 (65%)

Completion Requirements:

(6.5 credits including at least 2.0 credits at the 300+ level and at least 1.0 credit at the 400-level)

First and/or Second Year:

1. ANT207H1
2. ANT204H1 or ANT205H1 or ANT210H1 or ANT253H1

Upper Years:

3. ANT370H1 or ANT425H1
4. 5.0 additional credits from Group C, or Subgroup C(i) or C(ii), including at least 1.0 credit at the 400-level. Students who want to focus more specifically on the role of language in culture and society should take ANT253H1, ANT425H1, and courses in Subgroup C (ii).

Note: ANT courses are those offered with the following prefixes: ANT, ARH, INS, JAA, JAL, and JGA.

Group C: Society, Culture, and Language

ANT204H1, ANT205H1, ANT207H1, ANT208H1, ANT210H1, ANT215H1, ANT299Y1, ANT324H1, ANT342H1, ANT343H1, ANT344H1, ANT345H1, ANT346H1, ANT347H1, ANT348H1, ANT352H1, ANT354H1, ANT356H1, ANT357H1, ANT358H1, ANT362H1, ANT364H1, ANT366H1, ANT370H1, ANT374H1, ANT376H1, ANT378H1, ANT380H1, ANT382H1, ANT384H1, ANT385H1, ANT386H1, ANT390H1, ANT426H1, ANT435H1, ANT441H1, ANT442H1, ANT446H1, ANT450H1, ANT456H1, ANT459H1, ANT460H1, ANT462H1, ANT463H1, ANT464H1, ANT465H1, ANT473H1, ANT475H1, ANT480H1, ANT484H1, ANT485H1, ANT486H1, ANT488H1, ANT490Y1, ANT491Y1, ANT491H1, ANT497Y1, ANT498H1, ANT499H1, JAA377H1, JAH391Y0, JAH391H1, JNH350H1, AFR250Y1, NMC356H1, MCS225Y1

Note: ANT390H1 may be placed in a different Course Group depending on the topic, which will vary from year to year.

Subgroup C (i): (Society, Culture and Language - Area)
ANT455H1, ANT458H1, ANT472H1, ANT477H1,
AFR298H1, CAR316H1, NMC241H1

Subgroup C (ii): (Society, Culture and Language – Linguistic)
ANT253H1, ANT329H1, ANT425H1, ANT483H1,
ANT497Y1, ANT498H1, ANT499H1, JAL328H1,
JAL355H1, JAL401H1, SLA380H1

Focus in Medical Anthropology (Major: Society, Culture and Language) - ASFOC2112A

This focus enables students in the Anthropology Major (Society, Culture and Language) ASMAJ2112 to identify courses pertaining to Medical Anthropology from a sociocultural perspective and receive formal acknowledgement for completing a suite of health-related anthropology courses.

Enrolment Requirements:

Enrolment in the Anthropology Major (Society, Culture, and Language) is required.

Completion Requirements:

2.5 credits (total)

1. ANT205H1

2. 2.0 credits from: ANT208H1, ANT331H1, ANT345H1,
ANT348H1, ANT357H1, ANT358H1, ANT382H1,
ANT385H1, ANT433H1, ANT435H1, ANT442H1,
ANT446H1, ANT458H1, ANT460H1, ANT488H1

Health related Anthropology Special Topics courses may be chosen when offered at the third or fourth year levels.

Anthropology Major (General) (Arts Program) - ASMAJ1775

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- ANT100Y1 (65%) or ANT200Y1/ ARH100Y1 (65%) or ANT203Y1 (65%) or ANT204H1 (65%) or ANT207H1 (65%)

Completion Requirements:

(6.5 credits)

First and/or Second Year:

1. ANT100Y1
2. ANT207H1
3. 1.0 credit from ANT200Y1/ ARH100Y1, ANT203Y1
4. 0.5 credit from ANT204H1, ANT205H1, ANT208H1, ANT210H1, ANT215H1, ANT253H1

Upper Years:

5. 2.5 credits at the 300+ level from either Group A, B or C, or Subgroups C(i) or C(ii), including at least one 0.5 credit at the 400-level.
6. 1.0 additional credit from a Group other than that used to meet requirement #5

Note: ANT courses are those offered with the following prefixes: ANT, ARH, INS, JAL, JAA, and JGA.

Group A: Archaeology

ANT200Y1/ ARH100Y1, ANT210H1, ANT215H1,
ANT299Y1, ANT311Y1, ANT315H1, ANT317H1,
ANT318H1, ANT320H1, ANT325H1, ANT390H1,
ANT405H1, ANT406H1, ANT407H1, ANT408H1,
ANT409H1, ANT410H1, ANT411H1, ANT412H1,
ANT416H1, ANT419H1, ANT420H1, ANT437H1,
ANT491Y1, ANT491H1, ANT497Y1, ANT498H1,
ANT499H1, ARH205H1/ ARH305H1, ARH306Y1,
ARH309H1, ARH312Y1, ARH360H1, ARH361H1,
ARH361Y1, ARH440H1, ARH482H1, ARH494H1,
ARH495H1, MCS225Y1

Note: ANT390H1 may be placed in either Group A or B or C depending on the topic which will vary from year to year

Group B: Evolutionary

ANT203Y1, ANT208H1, ANT210H1, ANT299Y1,

Focus in Medical Anthropology (Major: General) - ASFOC1775A

This focus enables students in the Anthropology Major (General) ASMAJ1775 to identify courses pertaining to Medical Anthropology across the discipline's social science and science fields and receive formal acknowledgement for completing a suite of health-related anthropology courses.

Enrolment Requirements:

Enrolment in the Anthropology Major (General) is required.

Completion Requirements:

2.5 credits (total)

1. 0.5 credit from ANT205H1 or ANT208H1

2. 2.0 credit from: ANT331H1, ANT345H1, ANT348H1,
ANT357H1, ANT358H1, ANT382H1, ANT385H1,
ANT433H1, ANT435H1, ANT442H1, ANT446H1,
ANT458H1, ANT460H1, ANT488H1.

Health related Anthropology Special Topics courses may be chosen when offered at the third or fourth year levels.

Anthropology Major (Evolutionary) (Science Program) - ASMAJ1510

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- ANT100Y1 (65%) or ANT203Y1 (65%)

Completion Requirements:

(6.5 credits, including at least 2.0 credits at the 300+ level, 0.5 credit of which must be at the 400-level)

First Year and/or Second Year:

1. BIO120H1
2. ANT100Y1 or BIO220H1. If BIO220H1 is taken, students must take an additional 0.5 credit in ANT
3. ANT203Y1

Upper Years:

4. 2.0 credits from ANT208H1, ANT333Y1, ANT334H1, ANT334Y1, ANT335Y1, ANT336H1
5. 1.5 additional credits from: Group B and/or ANT406H1, ANT415Y1, ARH312Y1
6. 0.5 credit at the 400-level from Group B

Note: ANT courses are those offered with the following prefixes: ANT, ARH, INS, JAL, and JGA.

Group B: Evolutionary

ANT203Y1, ANT208H1, ANT210H1, ANT299Y1,
ANT330Y1, ANT331H1, ANT333Y1, ANT334H1,
ANT334Y1, ANT335Y1, ANT336H1, ANT337H1,
ANT338H1, ANT390H1, ANT419H1, ANT430H1,
ANT431H1, ANT433H1, ANT434H1, ANT435H1,
ANT436H1, ANT437H1, ANT438H1, ANT481H1,
ANT491Y1, ANT491H1, ANT497Y1, ANT498H1,
ANT499H1

Note: ANT390H1 may not be available in Course Group B, depending on the topic, which will vary from year to year.

Anthropology Minor (General) (Arts Program) - ASMIN1775

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- ANT100Y1 (65%) or ANT200Y1/ ARH100Y1 (65%) or ANT203Y1 (65%) or ANT204H1 (65%) or ANT207H1 (65%)

Completion Requirements:

(4.0 credits including at least 1.0 credit at the 300-level)

First and/or Second Year:

1. ANT100Y1
2. 2.0 credits from ANT200Y1/ ARH100Y1, ANT203Y1, ANT204H1, ANT205H1, ANT207H1, ANT208H1, ANT210H1, ANT215H1, ANT253H1

Upper Years:

3. 1.0 credit at the 300+ level from either Group A, B, or C, or Subgroup C(i) or C(ii)

Note: ANT courses are those offered with the following prefixes: ANT, ARH, INS, JAA, JAL, and JGA.

Group A: Archaeology

ANT200Y1/ ARH100Y1, ANT210H1, ANT215H1, ANT299Y1, ANT311Y1, ANT315H1, ANT317H1, ANT318H1, ANT320H1, ANT325H1, ANT390H1, ANT405H1, ANT406H1, ANT407H1, ANT408H1, ANT409H1, ANT410H1, ANT411H1, ANT412H1, ANT416H1, ANT419H1, ANT420H1, ANT437H1, ANT491Y1, ANT491H1, ANT497Y1, ANT498H1, ANT499H1, ARH205H1/ ARH305H1, ARH306Y1, ARH309H1, ARH312Y1, ARH360H1, ARH361H1, ARH361Y1, ARH440H1, ARH482H1, ARH494H1, ARH495H1, MCS225Y1

Note: ANT390H1 may be placed in either Group A or B or C depending on the topic which will vary from year to year

Group B: Evolutionary

ANT203Y1, ANT208H1, ANT210H1, ANT299Y1, ANT330Y1, ANT331H1, ANT333Y1, ANT334H1/ ANT334Y1, ANT335Y1, ANT336H1, ANT337H1,

ANT338H1, ANT390H1, ANT419H1, ANT430H1, ANT431H1, ANT433H1, ANT434H1, ANT435H1, ANT436H1, ANT437H1, ANT438H1, ANT481H1, ANT491Y1, ANT491H1, ANT497Y1, ANT498H1, ANT499H1

Note: ANT390H1 may be placed in either Group A or B or C depending on the topic which will vary from year to year.

Group C: Society, Culture, and Language

ANT204H1, ANT205H1, ANT207H1, ANT208H1, ANT210H1, ANT215H1, ANT299Y1, ANT324H1, ANT342H1, ANT343H1, ANT344H1, ANT345H1, ANT346H1, ANT347H1, ANT348H1, ANT352H1, ANT354H1, ANT356H1, ANT357H1, ANT358H1, ANT362H1, ANT364H1, ANT366H1, ANT370H1, ANT374H1, ANT376H1, ANT378H1, ANT380H1, ANT382H1, ANT384H1, ANT385H1, ANT386H1, ANT390H1, ANT426H1, ANT435H1, ANT441H1, ANT442H1, ANT446H1, ANT450H1, ANT456H1, ANT459H1, ANT460H1, ANT462H1, ANT463H1, ANT464H1, ANT465H1, ANT473H1, ANT475H1, ANT480H1, ANT484H1, ANT485H1, ANT486H1, ANT488H1, ANT490Y1, ANT491Y1, ANT491H1, ANT497Y1, ANT498H1, ANT499H1, JAA377H1, JAH391Y0, JAH391H1, JNH350H1, AFR250Y1, NMC356H1, MCS225Y1

Note: ANT390H1 may be placed in either Group A or B or C depending on the topic which will vary from year to year.

Subgroup C (i): (Society, Culture and Language - Area)

ANT455H1, ANT458H1, ANT472H1, ANT477H1, AFR298H1, CAR316H1, NMC241H1

Subgroup C (ii): (Society, Culture and Language – Linguistic)

ANT253H1, ANT329H1, ANT425H1, ANT483H1, ANT497Y1, ANT498H1, ANT499H1, JAL328H1, JAL355H1, JAL401H1, SLA380H1

Environmental Anthropology Minor (Arts Program) - ASMIN1291

Admission Requirements:

A program focused on understanding the diverse nature of interactions between humans and their environments, both in the past and in modern global society. Consult the Undergraduate Office, Department of Anthropology (416-978-6414).

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, including 1.0 credit at the 300+ level)

1. ANT100Y1/(ENV221H1 and ENV222H1/ GGR223H1)
2. ANT200Y1/ ARH100Y1/ (ANT204H1 and ANT207H1/0.5 credit 300-level Social Anthropology course from Anthropology Group C, or Subgroup C(i), C(ii))
3. 2.0 credits from: ANT315H1, ANT336H1, ANT346H1, ANT364H1, ANT366H1, ANT374H1, ANT376H1, ANT409H1, ANT410H1, ANT415Y1, ANT420H1, ANT430H1, ANT450H1, INS250H1, INS402H1

Note: ANT courses are those offered with the following prefixes: ANT, ARH, INS, JAA, JAL, and JGA.

Group C: Society, Culture, and Language

ANT204H1, ANT205H1, ANT207H1, ANT208H1,
ANT210H1, ANT215H1, ANT299Y1, ANT324H1,
ANT342H1, ANT343H1, ANT344H1, ANT345H1,
ANT346H1, ANT347H1, ANT348H1, ANT352H1,
ANT354H1, ANT356H1, ANT357H1, ANT358H1,
ANT362H1, ANT364H1, ANT366H1, ANT370H1,
ANT374H1, ANT376H1, ANT378H1, ANT380H1,

ANT480H1, ANT484H1, ANT485H1, ANT486H1,
ANT488H1, ANT490Y1, ANT491Y1, ANT491H1,
ANT497Y1, ANT498H1, ANT499H1, JAA377H1,
JNH350H1, AFR250Y1, NMC356H1, MCS225Y1

Note: ANT390H1 may be placed in a different Course Group depending on the topic, which will vary from year to year.

Subgroup C (i): (Society, Culture and Language - Area)

ANT455H1, ANT458H1, ANT472H1, ANT477H1,
AFR298H1, CAR316H1, NMC241H1

Subgroup C (ii): (Society, Culture and Language – Linguistic)

ANT253H1, ANT329H1, ANT425H1, ANT483H1,
ANT497Y1, ANT498H1, ANT499H1, JAL328H1,
JAL355H1, JAL401H1, SLA380H1

Medical Anthropology Minor (Arts Program) - ASMIN1778

Medical Anthropology is a subfield within Anthropology that draws on both socio-cultural and evolutionary anthropology to examine health inequalities, disease vulnerability, illness discourses and meanings, and therapeutic systems around the world. Training in medical anthropology is excellent preparation for graduate or professional education in public health, medicine, nursing, and other allied health careers.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, including 1.0 or 1.5 credits at the 300+ level)

First Year:

1. ANT100Y1

Second Year:

2. ANT205H1 and ANT208H1
3. 0.5 credit from: ANT204H1, ANT207H1, ANT203Y1
 (Students who want to focus on evolutionary/biological approaches to medical anthropology should take ANT203Y1).

Upper Years:

4. Up to 1.5 credits from the following courses, up to a total of 4.0 credits to complete the minor program. Students who complete ANT203Y1 need to take 1.0 credit, and students who take ANT204H1 or ANT207H1 need to take 1.5 credits, from the following: ANT331H1, ANT334H1/ ANT334Y1, ANT336H1, ANT337H1, ANT338H1, ANT345H1, ANT348H1, ANT357H1, ANT358H1, ANT382H1, ANT385H1, ANT433H1, ANT434H1, ANT435H1, ANT442H1, ANT446H1, ANT458H1, ANT460H1, ANT488H1.

Health-related Anthropology Special Topics courses at the 300 or 400 level, and health-related Independent Research courses at the 400-level, will count towards program requirements

Anthropology Courses

ARH100Y1 - Introduction to Archaeology

Previous Course Number: ANT200Y1

Hours: 48L/24T

Archaeology entails an active process of uncovering evidence for and learning about aspects of the human past. The goal of this course is to involve students in current archaeological practice, including its socio-political context, and the global structure of the human experience from human evolution through cities and empires. Students will critically engage with ideas both within and outside the discipline on working with descendant communities, stewardship, ethical practice, and the relevance of archaeology to contemporary issues from climate change to social inequality. This course can serve as an introduction for students planning to pursue an archaeology program or as an opportunity to engage with a fascinating topic that is relevant to disciplines ranging from science to humanities.

Exclusion: ANT200Y1

Breadth Requirements: Society and its Institutions (3)

ANT100Y1 - Introduction to Anthropology

Hours: 48L/12T

What does it mean to be human? In this course, you will learn the diverse and varied ways that anthropologists address this question. You will explore such topics as human origins and biological variation, our primate relatives, the relationship between biology and culture, the diversity of political, economic, and social practices through space and time, the origin of farming and cities, the political use of archaeology and heritage, the relationship between language and society, religion, and how capitalism and Industrialization shape our lives. You will learn from specialists in Evolutionary Anthropology, Archaeology, and Socio-cultural and Linguistic Anthropology and have the chance for hands-on learning and discussion through biweekly tutorials.

Breadth Requirements: Living Things and Their Environment (4), Society and its Institutions (3)

ANT191H1 - Personhood and Technologies of Reason

Hours: 24S

The African thinker Achille Mbembe has rightly said that we need a new 'techne of reason' to respond to planetary changes. Anthropology has been good to think with the body, what is to be a person and the techniques that are salient to both. Artificial Intelligence is asking to rethink what is the limit of the body, reason and agency - the capacity to bring difference in the world. This course introduces key ideas in anthropology, psychoanalysis and religion, on bodies, personhood and forms of reason by focusing on textual and multimedia examples on anthropological accounts of personhood, Artificial Intelligence, and medieval and contemporary forms of mysticism. This is then to ask the question of how different technologies of reason may be co-existing, emerging, colliding while shaping politically different forms of being in the world. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

ANT192H1 - Murder and Other Deathly Crimes: Anthropological Perspectives

Hours: 24S

Anthropology has much to say about death. There is foundational literature on sacrifice, suicide, and the rites surrounding the end of life. Anthropology also has a lot to say about violence: war, conflict, revolution. But at the nexus of death and violence lies murder, a culturally and socially salient phenomenon that garners less scholarly attention. This seminar will explore what constitutes murder in different cultural and historical contexts, by reading across anthropology, cultural studies, and film studies. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

ANT193H1 - Making, Using, and Interpreting Stone Tools

Hours: 6L/8P/10S

Stone tools are the earliest and longest-lasting record of human technology. This course explores interpreting stone tools from a multidisciplinary perspective. In making, using, and studying stone tools, students will learn how archaeologists form hypotheses and design experiments to understand humans and their technologies in the past. This course presents research that investigate changes in human ancestors' cognition and livelihoods through the contributions of other disciplines in life and social sciences to the study of stone tools. The course introduces major stone tool discoveries and critically engages with current

research through the development of new ideas for research projects. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

ANT194H1 - Human-nonhuman relations through Manga & Anime

Hours: 24S

Anthropology has examined various ways human beings imagine and engage with non-human beings in their everyday lives in particular social and cultural contexts. By using manga and anime, specific popular cultural expressive modes developed in Japan, this course examines social and cultural aspects of human relationship with other beings, including but not restricted to animals, plants, microbes, technological objects and spirits from anthropological perspectives. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

ANT195H1 - Speculative Fiction and Social Reality

Hours: 24S

How do the imagined worlds of speculative fiction reflect, and reflect upon, the real worlds of their authors and audiences? And on the other hand, how can works of speculative fiction have real-world impacts? Is speculative fiction different, in either of these respects, than other genres of narrative? This course explores a variety of works of speculative fiction from the perspective of an anthropological interest in ideas, imaginations, and narratives in relation to social life. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Thought, Belief and Behaviour (2)

ANT197H1 - Representations of Intellectuals

Hours: 24S

This course is a First-Year Foundation Seminar and provides an opportunity for exploration of different topics and themes. The course explores ideas of intellectuals who carved transformative theories during war times or

under repressive regimes in the twentieth century. Intellectuals featured in the course include Rosa Luxemburg, Frantz Fanon, Walter Benjamin, Lu Xin, Audre Lorde. Further, it would examine cultural representations of them, such as, graphic novels, fictions, essays, films and videos on them or relatable to their ideas. For example, it would assign reading of *Red Rosa*, a graphic novel of Luxemburg together with her own work *Theory of Imperialism*. Or it would juxtapose Lorde's classic, *Sister Outsider*, with Octavia Butler's science fiction, *Parable of the Sower*. First-Year Foundation Seminars are restricted to first-year students and do not normally contribute towards program completion. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

ANT199H1 - Living on the Water in Toronto

Hours: 24S

What do the Great Lakes mean to people living here? Especially Indigenous people? When and how do people care about the Great Lakes? Poems, stories, social science offer perspectives on the water from anthropology and arts. Field trips including paddling on a river, hiking; talks with local activists and artists. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

ANT200Y1 - Introduction to Archaeology

Hours: 48L/24T

How did art and technology develop in the course of human evolution? What led to the development of agriculture and settled village life? How did social inequality and urbanism emerge? This course takes a global perspective to explore the archaeological evidence that sheds light on these questions and other aspects of prehistory and early history. Students will engage with the challenges posed by new discoveries and also with recent developments in archaeological method and theory. The goal of the course is to involve students with the current state of archaeological research and some of the major issues archaeologists work to address.

Recommended Preparation: ANT100Y1

Breadth Requirements: Society and its Institutions (3)

ANT203Y1 - The Nature of Humans

Hours: 48L/24P

This course examines where humans fit in the fabric of the natural world. It explores the history of ideas about humans in nature, humans as primates, the story of human evolution and modern human physical and genetic diversity.

Recommended Preparation: [ANT100Y1](#)/ [BIO120H1](#), [BIO220H1](#)

Breadth Requirements: Living Things and Their Environment (4)

ANT204H1 - Social Cultural Anthropology and Global Issues

Previous Course Number: ANT204Y1

Hours: 24L/12T

A course focused on recent anthropological scholarship that seeks to understand and explain the transformation of contemporary societies and cultures. Topics may include some of the following: new patterns of global inequality, war and neo-colonialism, health and globalization, social justice and indigeneity, religious fundamentalism, gender inequalities, biotechnologies and society etc.

Exclusion: [ANT204Y1](#)

Recommended Preparation: [ANT100Y1](#)

Breadth Requirements: Society and its Institutions (3)

ARH205H1 - Archaeological Inference

Previous Course Number: ARH305H1

Hours: 24L/6P/6S

This course explores ways that archaeologists investigate research questions and interpret archaeological evidence. It introduces some of the main conceptual tools that archaeologists use to make inferences, including analogy, ethnoarchaeology, and experimental archaeology. It also uses practical exercises to help students understand the basic logic of some of the methods that archaeologists use in their research, such as dating methods and identification of spatial patterns. This prepares students for more advanced courses in archaeology.

Prerequisite: [ANT200Y1](#)/ [ARH100Y1](#)

Exclusion: [ARH305H1](#)

Recommended Preparation: [ANT100Y1](#)

Breadth Requirements: Society and its Institutions (3)

ANT205H1 - Medical Anthropology: Sociocultural Perspectives on Illness, Medicine and Care

Hours: 24L/11T

Introduction to medical anthropology with a focus on questions, methods, and insights from sociocultural anthropology. Explores the relationships among culture, society, and medicine with special attention to power, inequality, and globalization. Examples from many parts of the world, addressing biomedicine as well as other healing systems.

Recommended Preparation: [ANT100Y1](#), [ANT207H1](#)

Breadth Requirements: Society and its Institutions (3)

ANT207H1 - Core Concepts in Social and Cultural Anthropology

Hours: 24L/12T

Society, culture, kinship, exchange, community, identity, politics, belief: these and other core concepts are explored in this course, which lays the foundation for advanced courses in social and cultural anthropology.

Breadth Requirements: Society and its Institutions (3)

ANT208H1 - Medical Anthropology: an Evolutionary Perspective on Human Health

Hours: 24L/10T

Introduction to applied evolutionary medical anthropology. It explores evidence for the evolution of human vulnerability to disease across the life cycle (conception to death) and implications for health of contemporary populations in behavioral ecological, cross-cultural, health and healing systems, historical trauma, intersectionality, and climate change, lenses.

Recommended Preparation: [ANT100Y1](#)/ [BIO120H1](#)

Breadth Requirements: Living Things and Their Environment (4)

ANT210H1 - Anthropologists and Indigenous Peoples in North America

Previous Course Number: ANT388H1

Hours: 24L/12T

This course provides a rigorous introduction to historical and contemporary relations between Indigenous peoples and anthropologists, spanning archaeology, biological/ evolutionary anthropology, and socio-cultural & linguistic fields. The course centers Indigenous experience, critique, and scholarship, and fosters students' critical thinking skills as applied to the ethics and politics of anthropological research, past and present. The course is organised into three modules:

1. Introduction to Indigenous peoples' critiques and concerns regarding anthropology

2. Understanding historical context of these issues

3. In-depth discussion of current issues, oriented to emergent and possible future transformations in anthropology's relations with Indigenous peoples.

Exclusion: ANT388H1

Recommended Preparation: ANT100Y1/ ANT241H5/ INS201Y1

Breadth Requirements: Society and its Institutions (3)

ANT215H1 - Fight the Power!: A Global History of Resistance and Revolution

Hours: 24L

This course examines the efforts of Indigenous communities in North America to subvert, resist, and persist in the face of hegemonic power. Over the course of the semester, students will develop a critical understanding of the inner workings of power and the impact of these structures on the contemporary world. In examining the power-resistance dynamic, this course takes a cross-cultural comparative approach that situates North American case studies in relation to examples of resistance from Africa, Latin America, and the Caribbean. In examining these case studies, students are asked to engage with a variety of primary sources including songs, speeches, literary texts, and material culture.

Prerequisite: 0.5 credit in BR=1/ 2/ 3

Recommended Preparation: ANT100Y1

Breadth Requirements: Society and its Institutions (3)

ANT253H1 - Language & Society

Hours: 24L/12T

This course introduces linguistic analysis with a view towards its application to the study of the relation between culture and social structure. The interplay of pronunciation, grammar, semantics, and discourse with rituals, ideologies, and constructions of social meaning and worldview are discussed in tandem with the traditional

branches of linguistic analysis: phonology, morphology, grammar, syntax, and semantics. The objective of the course is to provide a broad framework for understanding the role of language in society.

Exclusion: JAL253H1

Recommended Preparation: ANT100Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

ANT299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

ANT299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

ARH306Y1 - Archaeological Field Methods

Hours: 12L/61P

Intensive instruction in archaeological field methods and acquisition of field skills, including archaeological search and survey, site mapping, laying out excavation grids, use of theodolites, total station, and GPS, stratigraphic excavation, stratigraphy, field recording, screening sediment, Ontario license and reporting requirements. Normally this course would take place on campus in the summer. This course has a mandatory Lab Materials Fee of approximately \$26 to cover non-reusable materials. The fee will be included on the student's ACORN invoice. The details and application form are posted on the following website: <https://www.anthropology.utoronto.ca/undergraduate/curriculum-course-information/field-schools-and-research-opportunities>. The application form should be submitted at least one week prior to the beginning of classes.

Prerequisite: ANT200Y1/ ARH100Y1/ (NMC260H1, NMC262H1)/ NMC261Y0

ARH309H1 - Archaeology, Ethics, and the Public

Hours: 24L

An analysis of ethics in contemporary archaeology that covers reburial and repatriation, interpretation of the archaeological record in the context of historically oppressed groups, ethnic minorities, and non-western societies, the ethics of collecting and managing cultural property, relationships with the media, the debates surrounding looting, and other issues.

Prerequisite: [ANT200Y1/ ARH100Y1](#)

Breadth Requirements: Society and its Institutions (3)

ANT311Y0 - Archaeological Fieldwork

ANT311Y1 - Archaeological Fieldwork

Practical field training through six weeks of excavation on an archaeological site. Basic principles of artifact handling and classification. (Offered only in Summer Session) Not eligible for CR/NCR option.

Prerequisite: [ANT200Y1/ ARH100Y1](#)

ARH312Y1 - Archaeological Laboratory

Hours: 28L/44P

Techniques for making archaeological data meaningful after excavation or survey. Archaeological measurements, compilation of data, database design, archaeological systematics, and sampling theory in the context of lithics, pottery, floral, faunal and other archaeological remains.

Prerequisite: [ANT200Y1/ ARH100Y1](#), [ARH205H1/ ARH305H1](#), and one of [NMC268H1](#), [EEB225H1/ GGR270H1*](#), [STA220H1/ STA221H1/ STA257H1/ STA261H1/ ANTC35H3**](#) Note: *Geography pre- or co-requisites waived for Anthropology and Archaeology students; ** to be taken at the Scarborough Campus

Breadth Requirements: The Physical and Mathematical Universes (5)

ANT315H1 - Arctic Archaeology

Hours: 24L

Archaeology and ethnohistory of Arctic cultures. Emphasis is on variation in social organization, settlement pattern,

economy, ideology, and interaction with the expanding European world-system.

Prerequisite: [ANT200Y1/ ARH100Y1](#)

Breadth Requirements: Society and its Institutions (3)

ANT317H1 - Archaeology of Eastern North America

Hours: 24L

This course examines the precontact and early contact period culture history of eastern North America, including Ontario, through archaeological evidence. Topics covered include the earliest peopling of the region at the end of the Ice Age, diversity of hunter-gatherer societies, introduction of agriculture, and the development of the dynamic First Nations societies who eventually met and interacted with Europeans.

Prerequisite: [ANT200Y1/ ARH100Y1](#)

Breadth Requirements: Society and its Institutions (3)

ANT318H1 - The Preindustrial City and Urban Social Theory

Hours: 24L

This course offers a comparative examination of the rise and organization of ancient cities through a detailed investigation of urban social theory. We will explore competing anthropological interpretations of urban process while probing the political, ideological, and economic structures of the worlds earliest cities. Students will have the opportunity to consider a broad range of subjects, including mechanisms of city genesis; urban-rural relations; the intersections of city and state; and historical variation in urban landscapes, ideologies, and political economies.

Prerequisite: [ANT200Y1/ ARH100Y1](#)

Breadth Requirements: Society and its Institutions (3)

ANT320H1 - Ancient Cultures of the Andes

Hours: 24L

This class offers intensive study of the archaeology and culture history of the Andean region prior to the Spanish conquest. The complexity and distinctiveness of Andean social organization, political institutions, religious ideologies, and economic practices have long fascinated anthropologists. Ultimately, the course will explore

Andean cultures over a 10,000 year period, highlighting key debates, current research projects, and innovative theoretical approaches shaping contemporary archeological scholarship in South America and beyond.

Prerequisite: ANT100Y1/ ANT200Y1/ ARH100Y1

Breadth Requirements: Society and its Institutions (3)

ANT324H1 - Tourism & Globalization

Hours: 24L

The course uses tourism as a lens to examine global connections. Particular focus will be on the politics of cultural encounters. Drawing examples from diverse ethnographic materials, the course explores how different visions of the world come into contact, negotiated and transformed, and how tourist encounters shape peoples everyday lives.

Prerequisite: ANT204H1 or ANT207H1

Breadth Requirements: Society and its Institutions (3)

ANT325H1 - Indigenous Archaeologies

Hours: 24S

This course introduces students to the field of Indigenous archaeology. Indigenous archaeology is a form of critical praxis that encompasses archaeological research conducted for, with, and by Indigenous peoples. Throughout the class we explore the colonial origins of archaeology, Indigenous activism and its impacts on the discipline of anthropology, ongoing efforts to decolonize and indigenize cultural heritage, and community-based research methods. Students will all also be introduced to new theoretical perspectives emerging out of the intersection of Anthropology and Indigenous Studies including survivance, refusal, futurity, and resurgence.

Prerequisite: 1 course from ANT200Y1/ ARH205H1/ ANT210H1/ ANT215H1/ INS201Y1/ (INS201H1, INS202H1)/ INS200H1

Breadth Requirements: Society and its Institutions (3)

JAL328H1 - Writing Systems

Hours: 36L

Introduction to writing systems; their historical development, their relationship to language, and their role in culture and society. (Given by the Departments of Anthropology and Linguistics) (Not offered every year)

Prerequisite: ANT100Y1/ LIN101H1/ LIN200H1

Breadth Requirements: Thought, Belief and Behaviour (2)

ANT329H1 - Language & Power Structure

Hours: 24L/4T

The role of language and symbolism in the representation and manipulation of ideology and power structure. Case materials drawn from the study of verbal arts, gender, law, advertising, and politics with a focus on North America.

Prerequisite: ANT204H1 or ANT207H1 or ANT253H1 or MCS223H1 or 0.5 credit at the 200+ level in SOC or POL or LIN or Women's Studies

Breadth Requirements: Thought, Belief and Behaviour (2)

ANT330Y1 - Paleoanthropology Field School

Hours: 24L/78P

This course provides background in the practical and theoretical aspects of fieldwork in Paleoanthropology. Students are trained in the treatment and analysis of fossil vertebrates, plant macro- and micro-fossils and sediments. Excursions to paleoanthropological localities of Homo erectus and Homo sapiens, and excavation at a hominoid site. (Joint undergraduate-graduate) Not eligible for CR/NCR option. Additional fees of up to \$2500 for field trip costs will apply. The details and the application form are posted on the following website: <https://www.anthropology.utoronto.ca/undergraduate/curriculum-course-information/field-schools-and-research-opportunities>. The application form should be submitted by the deadlines indicated on the website.

Prerequisite: ANT203Y1

Breadth Requirements: Living Things and Their Environment (4)

ANT331H1 - Hormones and Behaviour: Biocultural Anthropological Perspectives

Hours: 24L/6T

This course takes a deep dive into one angle of biocultural anthropology by introducing bidirectional interactions between human behavior and hormonal responses, with an emphasis on psychosocial stressors, prosociality,

challenge, arousal, and biological rhythms. It also surveys logistical and ethical issues concerning the collection and analysis of biomarker data in anthropological, biosocial, biodemographic, and epidemiological research. This course does include lab tutorials covering topics such as anthropometric measurement, biomarker collection techniques, general hormonal assay protocols, survey design, data analysis, and point of care testing techniques. Where possible, we tie in discussions and implications for biocultural theory and measurement. (Course materials fee: \$25).

Prerequisite: ANT208H1

Exclusion: ANT382H1 (*Hormones and Behavior*) offered in Winter 2025

Breadth Requirements: Living Things and Their Environment (4)

ANT333Y1 - Living Primate Adaptations

Hours: 48L/24P

A survey of living primates, this lab-oriented course describes and compares the diverse behavioural and anatomical adaptations that are characteristic to this order of mammals. The understanding of the biological diversity and evolutionary history of primates is important for further understanding of human adaptation and evolution.

Prerequisite: ANT203Y1

Exclusion: ANT333H1

Recommended Preparation: ANT334Y1; BIO120H1, BIO220H1

Breadth Requirements: Living Things and Their Environment (4)

ANT334Y1 - Human Skeletal Biology

Previous Course Number: ANT334H1

Hours: 48L/48P

Exploration of the development and maintenance of the human skeleton and dentition, with emphasis on application to archaeological, forensic and biomedical sciences.

Prerequisite: ANT203Y1

Exclusion: ANT334H1

Breadth Requirements: Living Things and Their Environment (4)

ANT335Y1 - Human Evolution

Hours: 24L/36P

This course takes the student on a survey of human evolution from our ape ancestors to modern humans. Students will learn to identify skulls, teeth and limb bones, explore hundreds of casts, and learn how researchers understand human origins and trends in the development of human anatomy and behavior.

Prerequisite: ANT203Y1

Exclusion: ANT332H5, ANT333H5, ANT434H5, ANTC17H3

Breadth Requirements: Living Things and Their Environment (4)

ANT336H1 - Evolutionary Anthropology Theory

Hours: 24L

This course will explore the foundational and leading concepts in evolutionary anthropology. Historically important readings and current concepts will be presented and discussed in the context of research, especially in areas of human population biology, ecology and the evolution of *Homo sapiens*. Topics will include behavioral ecology and life history theory, as well as a critique of the adaptationist program.

Prerequisite: ANT203Y1

Breadth Requirements: Living Things and Their Environment (4)

ANT337H1 - Human Movement

Hours: 24L/24P

This course will investigate human movement and physical activity patterns through the lens of evolutionary anthropology. The evolution of hominin physical behaviours, such as bipedalism and tool use, will be explored alongside the morphological traits associated with these behaviours. We will also examine social and cultural factors that may moderate physical activities among diverse human groups, including subsistence strategy variation and contemporary views on activity and exercise.

Prerequisite: ANT203Y1

Breadth Requirements: Living Things and Their Environment (4)

ANT338H1 - Molecular Anthropology and Human Evolution

Hours: 24L/12P

Molecular anthropology is an interdisciplinary field combining biology, genetics, evolution and anthropology. In this class, we will explore the use of DNA for the study of past migrations and admixture patterns, the evolution of pathogens, plant and animal domestication and especially the relationships between recent and archaic humans.

Prerequisite: ANT203Y1

Breadth Requirements: Living Things and Their Environment (4)

ANT342H1 - Anthropology of Race and Racism

Hours: 24L

This course will examine the role of anthropology in the development, maintenance, as well as critique, of race as a concept and racism as a social, cultural, and structural reality. Topics include: the relationships among anthropology, race, and colonialism; the constructions of race as a social, cultural, and biological concept; ethnographic engagements with whiteness and white supremacy; and the future of anthropology as an anti-racist and anti-colonialist enterprise.

Prerequisite: ANT207H1

Recommended Preparation: ANT204H1

Breadth Requirements: Society and its Institutions (3)

ANT343H1 - Social Anthropology of Gender

Hours: 24L

Gender concerns the ways that groups define and experience what it is to be male, female, or a gender identity in-between or outside of that binary, and in all societies the boundaries of gender categories are both policed and resisted. In this course we examine how gender is made materially, discursively, and through intersections with other structures of inequality (e.g. race, sexuality, class, etc.).

Prerequisite: ANT207H1

Breadth Requirements: Society and its Institutions (3)

ANT344H1 - Political Anthropology

Hours: 24L

This course explores the conceptual and methodological tools anthropologists employ to study the ways social groups enact, resist, and transform social relations that involve the production and distribution of power. It studies

how anthropologists theorize politics in relation to power, authority, coercion, and consent. Topics explored in this class include political cultures in state and statelessness societies, political affect and the politics of everyday life, hegemony and resistance, governmentality and biopolitics, violence and militarization, social movements and citizenship, and the difficulties of anthropological research in conflict zones.

Prerequisite: ANT204H1 or ANT207H1

Breadth Requirements: Society and its Institutions (3)

ANT345H1 - Global Health: Anthropological Perspectives

Hours: 24L

This course examines medical anthropology's contributions to, and critiques of, global health policies and programs. Topics covered include: colonialism and health, the political ecology of disease, indigenous constructions of illness and healing, medical pluralism, the politics of primary health care, population policies, reproductive health, and AIDS.

Prerequisite: ANT205H1 or ANT207H1 or permission of the instructor

Recommended Preparation: ANT348H1

Breadth Requirements: Society and its Institutions (3)

ANT346H1 - Anthropology of Food

Hours: 24L

Social anthropological perspective on the nature and meaning of food production, culinary cultures, industrial food, food as metaphor, and famine and hunger.

Prerequisite: ANT204H1 or ANT207H1

Breadth Requirements: Society and its Institutions (3)

ANT347H1 - Metropolis: Global Cities

Hours: 24L

The role of culture, cultural diversity, space and performance in urban institutions and settings. The cultural context and consequence of urbanization.

Prerequisite: ANT207H1

Exclusion: ANT347Y1

Breadth Requirements: Society and its Institutions (3)

ANT348H1 - Medical Anthropology: Health, Power and Politics

Hours: 24L/5T

This course deepens students' understandings of health and illness as social, cultural, political and historical phenomena. Drawing on theories and approaches from social-cultural anthropology, students will develop skills in critical analysis of experiences and meanings of healing and illness in particular contexts, with a focus on anthropological critique of dominant health policies, discourses, technologies and practices.

Prerequisite: ANT204H1 or ANT205H1 or ANT207H1 or permission of the instructor. (Note: ANT208H1 is not accepted preparation for this course.)

Breadth Requirements: Society and its Institutions (3)

ANT352H1 - Anthropology of Life and Death

Hours: 24L

What might it mean to think of death as inside of life, as opposed to at the end of it? This class examines Anthropological approaches to understanding life and death in our contemporary moment, one marked by widespread illness, war, policing, suicide, accident, and further loss. How do we go on living surrounded by death every day? Why are certain deaths valued above others? We will examine a range of related themes including funerary rituals, grief and mourning, violence and killing, illness and ageing, and ghosts and the afterlife.

Prerequisite: ANT204H1/ ANT207H1

Breadth Requirements: Society and its Institutions (3)

ANT354H1 - Right-Wing Nationalisms

Hours: 24L/12T

Anthropological and other approaches to right-wing nationalism, populism, illiberalism, and "democratic backsliding," in specific parts of the world and across continents. Economic and geopolitical sources of right-wing nationalist ideas and their patterns of transmission. International cooperation among right-wing nationalists. White supremacism. Conspiracy theories. Connections between extreme and mainstream forms of illiberal nationalism.

Prerequisite: 0.5 credit of any 200-level course in ANT, GGR, HIS, POL, or SOC

Recommended Preparation: ANT204H1

Breadth Requirements: Society and its Institutions (3)

JAL355H1 - Language and Gender

Hours: 24L

An introduction to some of the principal questions of feminist theory, as viewed from sociolinguistics. Topics include: socialization into gendered discourse patterns; cultural and ethnic differences in gendered interactions; the role of language and gender in legal, medical and labour settings; multilingualism, migration, imperialism and nationalism; sexuality, desire and queer linguistics, language, gender and globalization.

Prerequisite: 1.0 credit at the 200-level in LIN/ANT/JAL/SOC/WGS

Recommended Preparation: ANT204H1/ ANT253H1/ SOC200H1/ SOC214H1

Breadth Requirements: Society and its Institutions (3)

ANT356H1 - Anthropology of Religion

Hours: 24L

This course introduces selective anthropological and ethnographic rendering of religion and theology; matter, magic and the miraculous; religion and media. It also engages with some political understandings of religious affects; the religious in movement; mystics and relics; religious practices and their entanglements in colonial histories.

Prerequisite: ANT207H1

Breadth Requirements: Thought, Belief and Behaviour (2)

ANT357H1 - Social Worlds of Medicine and Care

Hours: 24L

Presents anthropological perspectives on provision of healthcare as a complex social and cultural phenomenon. Examines hierarchies and division of labour among health care providers, and how social groups come to occupy particular positions. Considers how knowledge and skills are gained through formal training and/or lived experience, how they are recognized and valued, and may become sources of identity. Examines local variations within biomedicine as practiced in different settings around the world.

Prerequisite: ANT205H1

Breadth Requirements: Society and its Institutions (3)

ANT358H1 - Medical Anthropology and Social Justice

Hours: 24L

It is widely acknowledged that sharp disparities in disease burden and access to medical care characterize global patterns in health. These disparities affect the life chances of much of the world's population, based on class position, gender, and geographical region.

Prerequisite: ANT204H1 or ANT205H1 or ANT207H1
Breadth Requirements: Society and its Institutions (3)

ARH360H1 - Prehistory of the Near East

Hours: 24L

From earliest times through the rise of complex hunter-gatherers, and the food producing revolution to politically complex societies in Southwest Asia.

Prerequisite: ANT200Y1/ ARH100Y1/ (NMC260H1, NMC262H1)
Breadth Requirements: Society and its Institutions (3)

ARH361H1 - Field Archaeology

Opportunity for students participating in non-degree credit archaeological digs to submit reports, field notes and term papers for degree credit. Not eligible for CR/NCR option. Instructions on how to obtain an application form are posted on the following website:
<https://www.anthropology.utoronto.ca/undergraduate>. The application form should be submitted at least one week prior to the beginning of classes.

Prerequisite: Permission of Undergraduate Co-ordinator and Supervisor

ANT362H1 - Sports and Play

Hours: 24L

We tend to think of sports as unserious. This course shows that much serious cultural work is conducted through sports, but also that sports are indeed not always serious. This anthropology of sports engages with sports as both work and play, considering issues like gender, bodies, competition, and pleasure.

Prerequisite: ANT204H1 or ANT207H1
Breadth Requirements: Creative and Cultural Representations (1)

ANT364H1 - Advocating Environmental and Climate Justice

Hours: 24L

This course is designed for students eager to participate in, and reflect on, on-going advocacy on climate and environmental justice. Students will be placed, either as individuals, in partners, or in teams, with a government, non-profit or community advocacy group to collaboratively address a specific problem or need of the organization. In classroom discussions, and in assignments students will have an opportunity to reflect critically on their experiences, explore social and ethical issues, and integrate placements with course readings in ways that mobilize or perhaps challenge academic knowledge. Assignments will integrate practice in a range of forms of expression (for instance personal story, policy brief, podcast, interview, news release, or blog) to support the development of the range of expressive skills needed to support working for change. The application form is posted on the following website:
<https://www.anthropology.utoronto.ca/undergraduate> The application form should be submitted by the deadline indicated on the website.

Prerequisite: ANT204H1/ ANT207H1/ ANT215H1. Students who do not meet the prerequisite are encouraged to contact the Department.
Breadth Requirements: Society and its Institutions (3)
Course Experience: Partnership-Based Experience

ANT366H1 - Anthropology of Activism and Social Justice

Hours: 24L

Explores how anthropologists have traditionally studied social movements and how new social movements have challenged anthropologists to rethink some of their ethnographic methods and approaches. Some specific movements covered include those related to indigenous rights, environmentalism, refugees, gay and lesbian issues, biotechnology, new religions, and globalization.

Prerequisite: ANT207H1
Breadth Requirements: Society and its Institutions (3)

ANT370H1 - Introduction to Social Anthropological Theory

Hours: 24P

An in-depth critical review of foundational ideas in the development of the practice of Anthropology. Topics may include questioning fieldwork, origins and legacies of functionalism, cultural materialism, politics of culture, power and political economy, globalization and post modernism, gender and post-structuralism.

Prerequisite: ANT207H1

Breadth Requirements: Society and its Institutions (3)

ANT374H1 - Rethinking Development, or the Improvement of the World

Hours: 36L

Development, or deliberate intervention to improve the lives of people deemed to be lacking, or left behind, has shaped the modern world for at least a century. Drawing on historical and ethnographic studies, this course examines the trajectory of development as a concept and practice, and traces its effects.

Prerequisite: ANT207H1 or permission of the instructor

Breadth Requirements: Society and its Institutions (3)

ANT376H1 - Anthropology of Animals

Hours: 24L

The relationship between humans and other animals is one of the most hotly debated topics of our times. Through key classic and contemporary writings, this course introduces students to the interdisciplinary field of animal studies, and explores how anthropologists and other theorists have critically engaged in debates about animal and human distinctions.

Prerequisite: ANT204H1 or ANT207H1

Breadth Requirements: Society and its Institutions (3)

JAA377H1 - Black Radical Theory from the Global South: Anthropological Perspectives

Hours: 24L

This course will survey the works of Black theorists and anthropologists from the Global South, who are shaping current debates within and beyond the discipline of Anthropology, concerning colonialism and decolonization, Marxism, indigeneity, political economy, Black radical thought, queer theory and decolonial feminism. Students will look at how these works challenge the "Northern Academy's monoliteracy" (Musila), politics of knowledge

production and construction of the Global South as primarily a site of fieldwork and research extraction. Authors will include Sylvia Tamale, Wangui Kimari, Sabelo Ndlovu-Matsheni, Ochy Curiel, Keguro Macharia, Beatriz Nascimento, Michel-Rolph Trouillot and Abdelghaffar Ahmed.

Prerequisite: ANT204H1/ ANT207H1/ ANT215H1/

AFR150Y1/ AFR290H1/ AFR298H1

Breadth Requirements: Society and its Institutions (3)

ANT378H1 - Gift, Money, and Finance

Hours: 24L

This course introduces dialogue between anthropological literature and other disciplinary studies in regards to the economy and culture of gift and money transaction as a key aspect of human society. Studying the history of gift and money economy from agricultural societies and diverse developments of finance market culture in recent era through various perspectives (e.g., ethnographic, sociological, politico-economic, and historical views), this course aims to train students developing a critical understanding of capitalism.

Prerequisite: ANT204H1 or ANT207H1

Breadth Requirements: Society and its Institutions (3)

ANT380H1 - Craft of Social/Cultural Anthropology

Hours: 36S

This course introduces students to the skills they need to conduct ethnographic research, in particular, participant observation, in-depth interview, as well as writing fieldnotes and research proposals. The emphasis is on interactive, workshop-style small group learning.

Prerequisite: ANT207H1

Breadth Requirements: Society and its Institutions (3)

ANT382H1 - Special Topics in Biocultural Medical Anthropology

Hours: 24L

This course combines lecture and discussion, and focuses on a topic in medical anthropology from a biocultural perspective. Topics change from year to year. See Anthropology website for more details.

Prerequisite: ANT208H1

Recommended Preparation: ANT203Y1/ ANT205H1

Breadth Requirements: Living Things and Their Environment (4)

ANT384H1 - Special Topics in Society, Culture and Language

Hours: 24L

This lecture-format course focuses on a relatively broad topic in socio-cultural and/or linguistic anthropology. Topics change from year to year. For the 2015-16 academic year, the title of this course is "Nature, Culture, Human".

Prerequisite: ANT207H1

Breadth Requirements: Society and its Institutions (3)

ANT385H1 - Special Topics in Sociocultural Medical Anthropology

Hours: 24L

This course combines lecture and discussion, and focuses on a topic in medical anthropology from a sociocultural perspective. Topics change from year to year. See Anthropology website for more details.

Prerequisite: ANT205H1 or ANT207H1

Breadth Requirements: Society and its Institutions (3)

ANT386H1 - Global Catholicism: Anthropological Approaches

Hours: 24L

This is a course on material religion and mediation, kingdom and kinship, gender symbolisms and devotions, ecologies of selves and the histories of senses that infuse Catholicism. It challenges us to think about the importance of Catholicism as a global phenomenon expressed through socio-political and cultural practices of the everyday life.

Prerequisite: ANT204H1 or ANT207H1 or RLG212H1 or RLG203H1

Breadth Requirements: Thought, Belief and Behaviour (2)

ANT390H1 - Special Topics in Anthropology

Hours: 24L

This lecture-format course focuses on a relatively broad topic anthropology. Topics change from year to year. See Anthropology website for more details.

Prerequisite: 9.0 credits. Further prerequisites vary from year to year, consult the department.

ANT395Y0 - Special Topics in Anthropology

Hours: 48S

Studies in anthropology taken abroad. Areas of concentration vary depending on the instructor and year offered.

Recommended Preparation: ANT100Y1/ ANT200Y1/ ARH100Y1/ ANT203Y1/ ANT204H1/ ANT207H1

ANT396Y0 - Special Topics in Anthropology

Hours: 48S

Studies in anthropology taken abroad. Areas of concentration vary depending on the instructor and year offered.

Recommended Preparation: ANT100Y1/ ANT200Y1/ ARH100Y1/ ANT203Y1/ ANT204H1/ ANT207H1

ANT398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

ANT398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

ANT399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

ANT399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

JAL401H1 - Field Linguistics

Hours: 48P

Field Linguistics provides practice in language analysis based on elicited data from a native speaker of an indigenous or foreign language, emphasizing procedures and techniques. (Given by the Departments of Anthropology and Linguistics)

Prerequisite: Completion of [LIN322H1](#) and [LIN331H1](#) or permission of the instructor

Exclusion: [LIND46H3](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

ANT405H1 - African Diaspora Archaeology

Hours: 24L

Between the early 1500s and the late 1800s, more than 12 million Africans were trafficked to the Americas through the Atlantic slave trade. This act reoriented the modern world—demographically, economically, politically, and culturally, setting in motion legacies of racial ideologies that continue into the present. Beginning with the slave trade in West Africa, this course traces the construction of Blackness and the archaeological remains connected to Black life in North America, the Caribbean, and South America. Looking at historical and present-day case studies, students will learn how race continues to shape our contemporary worldview—using slave narratives, first-hand accounts, archaeological evidence, and secondary

sources to investigate the central themes of African Diaspora archaeology. This course goes from macro to micro to illuminate the legacy of slavery on a more localized scale. Students will also learn how to conduct independent research on specific sites of African diasporic heritage in Ontario and engage in a digital storytelling mapping project using Geographic Information System.

Prerequisite: [ARH100Y1](#) or [ARH205H1](#). Students who do not meet the requirements are encouraged to contact the instructor.

Exclusion: [ARH482H1](#) (*The Archaeology of Anti-Black Race Massacres in the United States*) offered in Fall 2024.

Recommended Preparation: [ANT412H1](#)/ [HIS265Y1](#)/ [HIS453H1](#)/ [HIS413H1](#)

Breadth Requirements: Society and its Institutions (3)

ANT406H1 - Lithic Analysis

Hours: 24L/12P

Core reduction strategies, replication, experimental archaeology, use-wear, design approaches, ground stone, inferring behaviour from lithic artifacts.

Prerequisite: [ANT200Y1](#)/ [ARH100Y1](#), [ARH205H1](#)/ [ARH305H1](#), [ARH312Y1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

ANT407H1 - Inka and Aztec States

Hours: 24L

This course provides a comparative study of the emergence, organization, and transformation of the two historically-documented states of the native Americas: the Inka and the Aztec. Students will have the opportunity to analyze ethnohistorical and archaeological data in order to critically evaluate models of the pre-industrial state while gauging the anthropological significance of either convergence or particularity in the historical development of centralized political formations.

Prerequisite: [ANT200Y1](#)/ [ARH100Y1](#), [ARH205H1](#)/ [ARH305H1](#)

Breadth Requirements: Society and its Institutions (3)

ANT408H1 - The History Lab: Applied Methods in Historical Archaeology

Hours: 24L

Artefacts have the potential to reveal a diverse range of information about everyday life in the past, including the inner workings of social institutions, class-based dynamics, and expressions of ethnic and gendered identities. Along with archival documents and oral histories, these materials are the interpretive building blocks that Historical Archaeologists use to answer larger research questions around micro and macro-level negotiations of power, the impact of industrialization on modernity, and the dynamic relationships between individuals and society. Over the semester, students in this course will gain experience in identifying, classifying, and analyzing artefacts from Ontario that date to the nineteenth and early twentieth centuries. In addition to learning these applied skills, students will hone their inference skills by using artefacts and archives to develop research-based interpretations of daily life in the Toronto-area which will be presented publicly through a GIS (Geographic Information Systems) Storymap.

Prerequisite: ARH100Y1/ ANT200Y1

Recommended Preparation: ARH312Y1/ ANT412H1, GGR272H1

Breadth Requirements: Creative and Cultural Representations (1)

ANT409H1 - Landscape Archaeology

Hours: 24L/12P

Archaeological survey, spatial analysis of archaeological evidence over landscapes and territories, and ways archaeologists attempt to interpret landscapes, regional settlement systems, agricultural land use, regional exchange and communication, and past people's perceptions of or ideas about landscape.

Prerequisite: ARH205H1/ ARH305H1

Recommended Preparation: GGR270H1

Breadth Requirements: Society and its Institutions (3)

ANT410H1 - Hunter-Gatherers Past & Present

Hours: 24S

Examines the diversity of recent hunter-gatherer societies, as a source of analogues for understanding the archaeological record of past foraging peoples.

Prerequisite: ARH205H1/ ARH305H1

Breadth Requirements: Society and its Institutions (3)

ANT411H1 - Advanced Archaeological Theory

Hours: 24S

Seminar in the critical examination of major schools of archaeological thought.

Prerequisite: ARH205H1/ ARH305H1

Breadth Requirements: Thought, Belief and Behaviour (2)

ANT412H1 - Historical Archaeology

Hours: 24L

What cultural, social, political, and ecological processes contribute to continuity or change in past social forms and material culture? How do we recognize and study the past dynamics of ethnicity, class, gender, colonialism, and racialization in archaeological remains? Historical archaeology, as the study of the recent past, explores material culture's role in making visible those erased in the archival record. Using material, documentary, and oral evidence, this course focuses on core debates that have shaped and continue to influence Historical archaeology's trajectory. We will also learn about the history of the subdiscipline, from its birth to the present day. Taking a broad approach, the first half of this course examines how power is negotiated through the historical and archaeological records by looking at theoretical and methodological approaches in case studies from North America, the Caribbean, and South America. The second half of this course will take a more localized approach where students visit historical sites around Toronto and finishes with a final project using artifactual remains currently in the possession of the City of Toronto.

Prerequisite: ANT200Y1/ ARH100Y1

Recommended Preparation: ANT408H1

Breadth Requirements: Society and its Institutions (3)

ANT415Y1 - Laboratory in Faunal Archaeo-Osteology

Hours: 48P/48S

Examination and interpretation of faunal material from archaeological sites as evidence for culture. The application form is posted on the following website: <https://www.anthropology.utoronto.ca/undergraduate>. The application form should be submitted by the deadline indicated on the website.

Prerequisite: ARH312Y1

Breadth Requirements: Living Things and Their

Environment (4), The Physical and Mathematical Universes (5)

ANT416H1 - Archaeology of Ritual and Identity

Hours: 24L

This course offers a comparative survey of archaeological approaches to ritual practice as it relates to identity politics, personhood, and the negotiation of power relations in past societies. An important goal of the seminar is to introduce students to social theories on the inherent materiality of ritual performance, whether orchestrated in everyday practice or in elaborate religious and political spectacles.

Prerequisite: ARH205H1/ ARH305H1, and one of ANT100Y1/ ANT200Y1/ ARH100Y1/ ANT356H1

Breadth Requirements: Thought, Belief and Behaviour (2)

ANT419H1 - Current Debates in Palaeolithic Archaeology

Hours: 24S

Current research in Palaeolithic Archaeology reflecting emerging issues.

Prerequisite: ANT200Y1/ ARH100Y1/ ANT203Y1

Breadth Requirements: Society and its Institutions (3)

ANT420H1 - Archaeology of Inequality

Hours: 24L

How social complexity is manifested in the archaeological record. Origins and evolution of prehistoric complex societies, from small-scale chiefdoms to large-scale states.

Prerequisite: ANT200Y1/ ARH100Y1, ARH205H1/ ARH305H1

Breadth Requirements: Society and its Institutions (3)

ANT425H1 - Language in Anthropological Thought

Hours: 24L

How ideas about language fit into the overall views of humankind as expressed by selected anthropologists, linguists, sociologists, and philosophers.

Prerequisite: ANT204H1 or ANT207H1 or ANT253H1 and a 0.5 credit 300+ level course from Group C: Society, Culture, and Language

Breadth Requirements: Thought, Belief and Behaviour (2)

ANT426H1 - 'The West' and Its Others

Hours: 24S

The history and present of western concepts and images about the 'Other', in anthropological and other scholarship and in popular culture.

Prerequisite: 0.5 credit at the 300-level from Anthropology Group C: Society, Culture, and Language, or Near and Middle Eastern Civilization or Jewish Studies or Diaspora and Transnational Studies or History

Breadth Requirements: Creative and Cultural Representations (1)

ANT430H1 - Primate Conservation Biology

Hours: 24L

The focus of this course is on the science of primate conservation biology in an anthropological context. Topics will include primate biodiversity and biogeography, human impacts, and conservation strategies/policies. The effects of cultural and political considerations on primate conservation will also be discussed.

Prerequisite: ANT203Y1

Breadth Requirements: Living Things and Their Environment (4)

ANT431H1 - The Real Planet of the Apes

Hours: 12L/12P

Through fossil labs and lectures, we look back over 30 to 5 million years ago when apes roamed from Spain to China and Germany to Southern Africa. The fossil record of these apes, our ancestors, reveals how we evolved our large brains, dexterous hands, extended growth period and incredible intelligence. We encounter many surprises along the way, such as apes living with pandas in Hungary, animals with a mix of monkey, ape and pig traits and apes the size of polar bears. Of the more than 100 species of fossil apes known, only one gave rise to us.

Prerequisite: ANT203Y1

Recommended Preparation: ANT335Y1 or ANT330Y1

Breadth Requirements: Living Things and Their Environment (4)

ANT433H1 - Female Biology, Gender, and Sex: Biocultural Evolutionary Approaches

Hours: 24S

This course explores variation in reproductive lives from a biocultural and evolutionary perspective. Focusing on social-ecological, physiological, and biobehavioral variation in processes such as puberty, pregnancy, birth, lactation, menopause, and aging. The course also engages students in critical evaluation of nuanced biocultural research on sex and gender in context, women's and LGBTQ+ health.

Prerequisite: ANT203Y1

Exclusion: ANT481H1 (*Biology, Gender, and Sex*) offered in Winter 2025

Recommended Preparation: ANT207H1/ ANT208H1

Breadth Requirements: Living Things and Their Environment (4)

ANT434H1 - Health, Diet & Disease in the Past

Hours: 24L/12P

Advanced exploration of the life histories of past populations, through the application of palaeodietary analyses, palaeopathology and other appropriate research methods.

Prerequisite: ANT334H1

Breadth Requirements: Living Things and Their Environment (4)

ANT435H1 - Anthropology of Childhood and Childcare

Hours: 24L

A detailed review of the classic and recently emerging literature on the anthropology of children, childhood, and childcare. Focus is on theories for evolution of human parenting adaptations, challenges in research methodology and implications for contemporary research, practice and policy in the area of care and nutrition of infants and children.

Prerequisite: ANT203Y1 or ANT208H1

Breadth Requirements: Living Things and Their Environment (4)

ANT436H1 - Primate Ecology & Social Behavior

Hours: 24L

This course will provide an overview of the ecology and social behavior of extant nonhuman primates. Topics will include socioecology, conservation biology, biogeography, aggression and affiliation, community ecology, communication, and socio-sexual behavior. There will also be extensive discussions of methods used in collecting data on primates in the field.

Prerequisite: ANT203Y1

Breadth Requirements: Living Things and Their Environment (4)

ANT437H1 - Introduction to Virtual Anthropology

Hours: 18L/24P

Virtual anthropology is a set of new methods that allow us to digitize objects, analyze, reconstruct and share them digitally, and bring them back into the real world. After a theoretical introduction, students will use surface scanners, photogrammetric software and 3D printers to digitize and study archaeological and anthropological specimens.

Prerequisite: ANT334H1 or ARH312Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

ANT438H1 - Topics in Emerging Scholarship (Evolutionary Anthropology)

Hours: 24S

Taught by an advanced PhD student or postdoctoral fellow, and based on his or her doctoral research and area of expertise, this course presents a unique opportunity to explore intensively a particular Evolutionary Anthropology topic in-depth. Topics vary from year to year.

Prerequisite: ANT203Y1 and a 0.5 credit 300+ level course from Group B: Evolutionary

Breadth Requirements: Living Things and Their Environment (4)

ARH440H1 - Photogrammetry and 3D Analysis of Material Culture

Hours: 12L/12P/12S

With the increasing availability of powerful computers and software, 3D modeling and recording has become commonplace in archaeology, architectural history, museum studies, and other areas of cultural heritage research. In this course, students will learn about a powerful new method for 3D recording known as photogrammetry. After a series of tutorials, they will gain firsthand experience creating their own models of various subjects, such as historical architecture and public art in Toronto, and museum objects on campus. They will also learn how to analyze and present 3D content, while thinking critically about the impact of how digital tools are currently being employed by and shaping the agendas of researchers in archaeology, art history, and related fields.

Prerequisite: 1.0 credit in ANT/ ARH/ FAH courses at the 300+ level

Exclusion: ARH482H1 (Special Topics in Archaeology: 3D Modeling and Archaeological Analysis), offered in Fall 2019 and Fall 2021

Recommended Preparation: Previous experience with photography or imaging software will be helpful but is not required

Breadth Requirements: Creative and Cultural Representations (1)

ANT441H1 - Love, Sex, and Marriage

Hours: 24S

Beginning with anthropology's early work on kinship, and ending with recent analyses of sex work and the globalization of ideologies of romantic love and companionate marriage, this course will investigate how emotional and sexual relationships are produced, used, conceptualized, and experienced both within particular societies and transnationally.

Prerequisite: ANT207H1 and ANT343H1

Breadth Requirements: Society and its Institutions (3)

ANT442H1 - Social Studies of Autism

Hours: 24L

Autism is simultaneously celebrated by autists as a core identity and pathologized in public and clinical discourses as a disease to be cured. This course spans anthropology of autism and critical autism studies, examining autism as

both lived experience and rubric for a complex set of biosocial and cultural phenomena. Engaging with academic and popular texts and multi-media sources, we explore how knowledge of autism is socially produced in historical, political and cultural contexts; autobiographies and ethnographies of autistic lives; histories of autistic organising; and autism and intersectionality, attending particularly to race and gender.

Prerequisite: ANT345H1/ ANT348H1/ ANT357H1/ ANT358H1/ ANT385H1

Exclusion: ANT486H1 (Topic: *Social Studies in Autism*) offered in Summer 2023 and Winter 2024

Recommended Preparation: ANT348H1

Breadth Requirements: Society and its Institutions (3)

ANT446H1 - Anthropology of Aging, Health, and Care

Hours: 36S

Introduces anthropological perspectives on the life course and aging, with particular attention to health challenges and care needs, the social and cultural arrangements around these, and the impacts of population aging, global migration, technological change and other broad scale transformations. Emphasizes questions, concepts, and insights from sociocultural medical anthropology. Readings present ethnographic research based in many different parts of the world. Course assignments include an ethnographic interview and analysis; students will be provided guidance on all stages of designing and carrying out this project.

Prerequisite: ANT203Y1/ ANT204H1/ ANT205H1/ ANT207H1/ ANT208H1/ ANT210H1

Recommended Preparation: ANT205H1/ ANT208H1

Breadth Requirements: Society and its Institutions (3)

ANT450H1 - Multispecies Cities

Hours: 24S

As of 2007, for the first time in human history, more than half the world's peoples lived in cities. It is estimated that by 2030 over 60% will be urban-dwellers. This demographic shift suggests that for many (if not most) people, their primary encounter with "nature" will be urban based. This course explores the idea of "urban-nature" by 1) focusing on the ways in which various theorists have challenged traditional ways of viewing both "the city" and "nature" and 2) encouraging students to develop their own critical perspectives through ethnographic engagements with the city of Toronto.

Prerequisite: [ANT204H1](#) or [ANT207H1](#) and a 300-level course or above in Society, Culture and Language

Breadth Requirements: Society and its Institutions (3)

ANT455H1 - Ethnographic Approaches to the Middle East and North Africa

Hours: 24L

What can Anthropology, as both an academic discipline and a way of knowing, bring to our understanding of the Middle East, a region deeply entangled in global geopolitics? What kinds of questions have social and cultural anthropologists asked when faced with the diversity of a region that stretches from North Africa to West Asia? This course explores the cultural, historical, and political complexity of the region from an ethnographic perspective, while also attending critically to the way “The Middle East” has been constructed in the first place. Rather than attempting an overview of the entire region, it focuses on themes that have compelled anthropological research in the area in recent decades, including but not limited to war, migration, labour, “terrorism”, gender, racialization, and religion. We will draw from key academic texts in conversation with other genres of knowledge production including film, journalism, and literature. No previous familiarity with the region is required.

Prerequisite: [ANT207H1](#)

Exclusion: [ANTC89H3](#), [ANT484H1](#) (Topics: Ethnography of the Middle East and North Africa) taken in Winter 2014, [ANT384H1](#) (Topics: Peoples of the Middle East and North Africa) taken in Winter 2017, Winter 2018.

Recommended Preparation: [NMC241H1](#), [RLG204H1](#), [NMC283Y1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

ANT456H1 - Queer Ethnography

Hours: 24L

This course explores, first, how and where forms of desire and sexual practice have become sites of anthropological inquiry and exemplars of particular cultural logics. Tracing, then, the transnational turn in the anthropology of sexuality, the course engages important debates about culture, locality, and globalization. By focusing on the transnational movement of desires, practices, and pleasures through activism, mass media, and tourism, the course asks how sex is global and how globalization is thoroughly sexed. Course material will stress, but not be limited to, forms of same-sex or otherwise queer sexualities.

Prerequisite: [ANT207H1](#) and any 300-level course in Society, Culture and Language

Breadth Requirements: Society and its Institutions (3)

ANT458H1 - Indigenous Health Histories and Canadian Settler Colonialism

Hours: 24S

We focus on the relationship between the health and well-being of Indigenous people/s and Canadian settler colonialism, drawing on scholarship from medical anthropology, history, Indigenous studies and settler colonial studies. The course is centrally concerned with how Indigenous social and political actors have engaged with health, illness, social suffering and healing throughout the 20th century, and informed by anthropological and historical understandings of healthcare systems as permeated by dynamic relations of power.

Prerequisite: Any 300 or 400 level course in Society, Culture and Language or [INS350H1](#) or [INS355H1](#) or [JFP450H1](#) or permission of the instructor

Recommended Preparation: [ANT345H1](#) or [ANT348H1](#) or [ANT358H1](#)

Breadth Requirements: Society and its Institutions (3)

ANT459H1 - Multispecies Ethnography

Hours: 24S

This course introduces perspectives which extend anthropological inquiry beyond the solely human realm. Building on an acknowledgement of the fundamental interconnectedness of humans and other life forms, it explores the agencies of other-than-humans, including nonhuman animals, land and seascapes, plants, bacteria, “contaminants,” and others. The course involves field-site visits and fieldwork projects in Toronto (GTA region) and engages with ethnographic methodologies best suited to investigations of inter-species, inter-life form relationships.

Prerequisite: [ANT376H1](#) or three 300-level anthropology courses in any subfield or permission of instructor

Breadth Requirements: Thought, Belief and Behaviour (2)

ANT460H1 - Global Perspectives on Women's Health

Hours: 24S

This fourth-year seminar examines how female gender shapes health and illness. Using case studies of sexual health, fertility and its management, substance use/abuse,

mental health, and occupational/labor health risks, the course investigates the material, political, and socio-cultural factors that can put women at risk for a range of illness conditions.

Prerequisite: [ANT343H1](#)/ [ANT345H1](#)/ [ANT348H1](#)

Breadth Requirements: Society and its Institutions (3)

ANT462H1 - Anthropology of Affect

Hours: 24S

This course examines how anthropologists have studied the way that people hope, imagine, love, and despise. Ethnography of the intimate realms of affect raises important questions about knowledge production and methodology as well as offering insight into how people come to act upon the world and what the human consequences of such action are. The course will also examine how the intimate is socially produced and harnessed in the service of politics and culture. Topics will include grief and its lack; dreams and activism; love and social change; memory and imperialism; sexuality and care; and violence and hope.

Prerequisite: [ANT207H1](#) and any 300-level course in Society, Culture and Language

Breadth Requirements: Thought, Belief and Behaviour (2)

ANT463H1 - Anthropology of Racial Capitalism and Dispossession

Hours: 24S

This course considers racial capitalism from an anthropological perspective through ethnographies and films which examine the role race, colonialism and white supremacy play in shaping and enabling contemporary forms of capitalist accumulation by dispossession in everyday life. Considering dispossession broadly, we will explore not only processes that dispossess people of property and land, but also of rights, modes of belonging, health, citizenship and life. We will also look at the ways people are organizing to reclaim what they have been dispossessed of or denied, from anti-eviction movements and abolitionist organizing to struggles for reproductive rights, food sovereignty and climate justice.

Prerequisite: [ANT204H1](#)/ [ANT207H1](#)

Recommended Preparation: [ANT342H1](#)/ [ANT366H1](#)

Breadth Requirements: Society and its Institutions (3)

ANT464H1 - Black Ethnographies

Hours: 24S

Black populations in the African Diaspora defy simple characterizations. In this course, we will examine the experiences of Black people through an ethnographic exploration of their lives. The close analysis of ethnographic monographs and articles will illuminate the ways in which race, gender, ethnicity, class, sexuality, ability, nationality, and other factors, shape the everyday for Black people in different cultural contexts. An additional focus will be a consideration of the experiences of Black anthropologists as ethnographers and scholars who are broadening anthropological discourses.

Prerequisite: [ANT342H1](#)

Breadth Requirements: Society and its Institutions (3)

ANT465H1 - Ethnographic Practicum: Toronto Tours

Hours: 24P

This course provides students with a partnered field experience by conducting ethnographic research on visitor tours in partner organizations in Toronto with faculty's supervision. The project will be developed in collaboration with the partner organizations to offer students partnership-based experiential learning opportunities. Students will produce detailed ethnographic descriptions of tourist experiences, analyze how media representations and tourism infrastructure shape diverse visitor experiences, explore how existing infrastructure can be potentially repurposed for a decolonial or inclusive tour, and develop skills to communicate their findings to the broader audience.

Prerequisite: [ANT380H1](#). Students who do not meet the prerequisite are encouraged to contact the Department.

Recommended Preparation: [ANT324H1](#)

Breadth Requirements: Society and its Institutions (3)

Course Experience: Partnership-Based Experience

ANT472H1 - Japan in Global Context: Anthropological Perspectives

Hours: 24L

This course examines how what we know as Japan and its culture has been constructed through global interactions. Topics include gender and sexuality, race and ethnicity, social and family life, work and leisure, and Japanese identity amid changing global power relations.

Prerequisite: [ANT204H1](#)/ [ANT207H1](#)

Breadth Requirements: Society and its Institutions (3)

ANT473H1 - Ethnographic Practicum: The University

Hours: 36S

Students carry out original ethnographic research projects on some aspect of life in the University of Toronto: its students, staff and faculty; its hierarchies and habits; and the everyday practices in classrooms, labs, dining halls, offices, clubs, and residence corridors. Class time is used for collective brainstorming, feedback and analysis.

Prerequisite: [ANT380H1](#) or permission of the instructor

Breadth Requirements: Society and its Institutions (3)

ANT475H1 - Reading Ethnography

Hours: 24P

Students read several full-length ethnographies, both classical and contemporary, and debate what makes for sound ethnographic research and writing, as well as what ethnography is and "should" be as a genre of writing and representation.

Prerequisite: [ANT207H1](#) and [ANT370H1](#)

Breadth Requirements: Society and its Institutions (3)

ANT477H1 - Transnational Korea in and outside the Peninsula

Hours: 24S

This course addresses reading ethnography as a tool to understand compressed and complex modernity such as Korean societies, both in and outside of the Korean peninsula. In particular, this course aims to develop students' critical thinking on class, ethnicity, gender, family, and migration in Korea and diasporic societies of Koreans in Canada, China, Japan, and US.

Prerequisite: [ANT207H1](#) and 0.5 credit at the 300+ level from BR=1/2/3 courses

Breadth Requirements: Society and its Institutions (3)

ANT480H1 - Special Topics in Anthropological Research

Hours: 24S

Unique opportunity to explore a particular anthropological topic in-depth. Topics vary from year to year.

Prerequisite: Any 200-level Anthropology course and 1.0 credit at the 300+ level

ANT480Y1 - Special Topics in Anthropological Research

Hours: 48S

Unique opportunity to explore a particular anthropological topic in-depth. Topics vary from year to year.

Prerequisite: Any 200-level Anthropology course and 1.0 credit at the 300+ level

ANT481H1 - Special Topics in Evolutionary Anthropology

Hours: 24S

Unique opportunity to explore in-depth a particular topic in Evolutionary Anthropology. Topics vary from year to year.

Prerequisite: [ANT203Y1](#) and a 0.5 credit 300+ level course from Group B: Evolutionary

Breadth Requirements: Living Things and Their Environment (4)

ARH482H1 - Special Topics in Archaeology

Hours: 24S

Unique opportunity to explore a particular archaeological topic in-depth. Topics vary from year to year.

Prerequisite: [ARH205H1](#)/ [ARH305H1](#)

ANT483H1 - Special Topics in Linguistic Anthropology

Hours: 24S

This course will focus on an advanced topic in Linguistic Anthropology. Topic will vary from year- to-year.

Prerequisite: [ANT253H1](#) and 1.0 credit at the 300-level from Group C: Society, Culture and Language

Breadth Requirements: Thought, Belief and Behaviour (2)

ANT484H1 - Special Topics in Social Cultural Anthropology

Hours: 24S

Unique opportunity to explore a particular Social Cultural Anthropology topic in-depth. Topics vary from year to year.

Prerequisite: ANT207H1 and 1.0 credit at the 300-level from Group C: Society, Culture and Language

Breadth Requirements: Society and its Institutions (3)

ANT485H1 - Topics in Emerging Scholarship (Society, Culture and Language)

Hours: 24S

Taught by an advanced PhD student or postdoctoral fellow, and based on his or her doctoral research and area of expertise, this course presents a unique opportunity to explore intensively a particular Socio-cultural or Linguistic Anthropology topic in-depth. Topics vary from year to year.

Prerequisite: ANT207H1 and 1.0 credit at the 300+ level from Group C: Society, Culture and Language

Breadth Requirements: Society and its Institutions (3)

ANT486H1 - Special Topics: Socio-Cultural Research Seminar

Hours: 24S

Unique opportunity to explore a particular Social Cultural Anthropology topic in-depth. Topics vary from year to year.

Prerequisite: ANT207H1 and 1.0 credit at the 300+ level from Group C: Society, Culture and Language

Breadth Requirements: Society and its Institutions (3)

ANT488H1 - Special Topics in Medical Anthropology

Hours: 24S

This discussion-based seminar course focuses on a topic in medical anthropology. Topics change from year to year. See Anthropology website for more details.

Prerequisite: ANT205H1, ANT208H1, and 1.0 credit in ANT/ARH/JAL courses at the 300-level

Breadth Requirements: Society and its Institutions (3)

ANT490Y1 - Field Course in Social and Cultural Anthropology

Hours: 24L/52P

An instructor-supervised experiential study project in social and cultural anthropology. Course takes place in an off-campus setting. Not eligible for CR/NCR option.

Prerequisite: ANT204H1 or ANT207H1, and 1.0 credit from Group C: Society, Culture, and Language

Breadth Requirements: Society and its Institutions (3)

ANT491H1 - Internship in Anthropology

Hours: 24P

This course is an opportunity to apply acquired knowledge in anthropology or archeology in a work placement environment. Opportunities may include local community organizations, international development organizations, museum or heritage projects, or media production projects. Only internships that require knowledge and skills in anthropology and/or archeology will be considered. Student must fulfill responsibilities of the internship as well as complete a final research paper. If qualified, the student's internship supervisor will mark the final paper for the course; if not, an appropriate academic supervisor will be assigned from within the Dept. of Anthropology. Restricted to students in a Specialist or Major program in Anthropology. Not eligible for CR/NCR option. Instructions on how to obtain an application form are posted on the following website: <https://www.anthropology.utoronto.ca/undergraduate>. The application form should be submitted at least one week prior to the beginning of classes.

Prerequisite: 14.0 credits, 3.0 credits in Anthropology

Breadth Requirements: Society and its Institutions (3)

ANT491Y1 - Internship in Anthropology

Hours: 48P

This course is an opportunity to apply acquired knowledge in anthropology or archeology in a work placement environment. Opportunities may include local community organizations, international development organizations, museum or heritage projects, or media production projects. Only internships that require knowledge and skills in anthropology and/or archeology will be

considered. Student must fulfill responsibilities of the internship as well as complete a final research paper. If qualified, the student's internship supervisor will mark the final paper for the course; if not, an appropriate academic supervisor will be assigned from within the Dept. of Anthropology. Restricted to students in a Specialist or Major program in Anthropology. Not eligible for CR/NCR option. Instructions on how to obtain an application form are posted on the following website:

<https://www.anthropology.utoronto.ca/undergraduate>. The application form should be submitted at least one week prior to the beginning of classes.

Prerequisite: 14.0 credits, 3.0 credits in Anthropology
Breadth Requirements: Society and its Institutions (3)

ARH494H1 - Topics in Emerging Scholarship (Archaeology)

Hours: 24S

Taught by an advanced PhD student or postdoctoral fellow, and based on his or her doctoral research and area of expertise, this course presents a unique opportunity to explore intensively a particular Archaeology topic in-depth. Topics vary from year to year.

Prerequisite: [ARH205H1](#)/ [ARH305H1](#)
Breadth Requirements: Society and its Institutions (3)

ARH495H1 - Archaeology Research Practicum

Laboratory or practical research on an archaeological project that emphasizes methods and research design in archaeology. Students must obtain the consent of a Supervisor before enrolling. Students are required to give an oral presentation of research results to an open meeting of the Archaeology Centre at the conclusion of the course. Application must be made to the Anthropology Department. Not eligible for CR/NCR option. Instructions on how to obtain an application form are posted on the following website:

<https://www.anthropology.utoronto.ca/undergraduate>. The application form should be submitted at least one week prior to the beginning of classes.

Prerequisite: A minimum of 14.0 credits, permission of Supervisor and Undergraduate Coordinator.

Exclusion: [ANT497Y1](#)

Recommended Preparation: [ARH205H1](#)/ [ARH305H1](#), [ARH312Y1](#)

ANT497Y1 - Independent Research

Supervised independent research on a topic agreed on by the student and supervisor before enrolment in the course. Open in exceptional circumstances to advanced students with a strong background in Anthropology. Course Supervisor must be a member of the Anthropology faculty. A maximum of one year of Independent Research courses is allowed per program. Not eligible for CR/NCR option. Instructions on how to obtain an application form are posted on the following website:

<https://www.anthropology.utoronto.ca/undergraduate>. The application form should be submitted at least one week prior to the beginning of classes.

Prerequisite: A minimum of 10.0 credits, permission of Supervisor and Undergraduate Coordinator.

ANT498H1 - Independent Research

Supervised independent research on a topic agreed on by the student and supervisor before enrolment in the course. Open in exceptional circumstances to advanced students with a strong background in Anthropology. Course Supervisor must be a member of the Anthropology faculty. A maximum of one year of Independent Research courses is allowed per program. Not eligible for CR/NCR option. Instructions on how to obtain an application form are posted on the following website:

<https://www.anthropology.utoronto.ca/undergraduate>. The application form should be submitted at least one week prior to the beginning of classes.

Prerequisite: A minimum of 10.0 credits, permission of Supervisor and Undergraduate Coordinator.

ANT499H1 - Independent Research

Supervised independent research on a topic agreed on by the student and supervisor before enrolment in the course. Open in exceptional circumstances to advanced students with a strong background in Anthropology. Course Supervisor must be a member of the Anthropology faculty. A maximum of one year of Independent Research courses is allowed per program. Not eligible for CR/NCR option. Instructions on how to obtain an application form are posted on the following website:

<https://www.anthropology.utoronto.ca/undergraduate>. The application form should be submitted at least one week prior to the beginning of classes.

Prerequisite: A minimum of 10.0 credits, permission of Supervisor and Undergraduate Coordinator.

Archaeology

Introduction

The Archaeology Program focuses on the study of past human societies primarily through their material remains, or “material culture.” Archaeologists explore the nature of and changes in past cultures around the world through survey, excavation and analyses of stone tools, pottery, bones, plant remains, architecture and other cultural residues. Some of the major research foci of archaeologists are the behaviour and adaptations of early hominins, diversity of hunter-gatherer societies, origins of agriculture, pastoralism, urbanism and politically complex states, the workings of ancient exchange systems, and the development of class-based and gender-based political and economic inequalities in complex societies. Working archaeologists often specialize geographically, chronologically or thematically. Classical archaeologists, for example, specialize in the cultures of the ancient Greco-Roman world, while palaeoethnobotanists explore ways that botanical residues of ancient and prehistoric cultures can inform us about their economies and social systems. The specialist, major and minor programs allow students to explore archaeology in an interdisciplinary setting.

Students in the specialist or major program should consult the program coordinator or faculty members in their intended areas of specialization for advice on the selection of courses. Those intending to go on to graduate studies in departments such as Classics, East Asian Studies, Art History or Near and Middle Eastern Civilizations should pay particular attention to language requirements at the graduate level.

The Archaeology Specialist (Arts program) is designed for students who would like to concentrate in archaeology while drawing on the teaching resources of diverse departments. See details below. Students interested in pursuing graduate studies should combine it with study of the ancient and modern languages relevant to their primary area of interest.

The Archaeology Major (Arts program) is designed for students who would like to pursue their interests in archaeology in conjunction with a Major in another field, such as Art History, Classics, Earth Sciences, History, or Near and Middle Eastern Civilizations. See details below.

The Archaeology Minor (Arts program) allows students to sample archaeology while pursuing their main interest in another discipline. See details below.

Undergraduate Program Administrator/Student Counsellor: Anthropology Building, 19 Ursula Franklin Street, Room 258 (416-978-6414)

Careers in archaeology usually require graduate training, although some aspects of archaeology in the public sector can be pursued with an undergraduate degree. Students completing our program have also successfully pursued careers in teaching, tourism, and cultural resource management.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Archaeology programs impacted by this policy: [ASSPE0155](#), [ASMAJ0155](#), and [ASMIN0155](#)

Archaeology Programs

Archaeology Specialist (Arts Program) - ASSPE0155

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following course with the stated minimum grade is required:

- [ANT200Y1/ ARH100Y1](#) (70%)

Completion Requirements:

(11.0 credits, including at least 4.0 credits at the 300+ level and 1.0 credit at the 400-level)

First Year:

1. [ANT200Y1/ ARH100Y1](#)
2. Statistical Requirement: [NMC268H1](#) or [GGR270H1](#) (Geography pre- or co-requisites waived for Archaeology and Anthropology students); or 0.5 credit from [STA220H1](#), [STA221H1](#), [STA247H1](#), [STA248H1](#), [STA255H1](#), [STA257H1](#), [STA261H1](#), or [ANTC35H3](#) (at UTSC)
3. [ANT100Y1](#) or [CLA160H1](#). If [CLA160H1](#) is taken, students must take an additional 0.5 credit from the following: [CLA210H1](#), [CLA230H1](#), [CLA231H1](#); [FAH206H1](#), [FAH207H1](#); [GGR101H1](#); [NMC262H1](#)

Upper Years:

4. ARH205H1/ ARH305H1, ARH309H1, ARH312Y1, ANT411H1
5. Field Requirement: ANT311Y1 or ARH306Y1 or NMC261Y0 or ARH361Y1 or ARH361H1 or ANT418H5 (at UTM). If ARH361H1 or ANT418H5 is taken, students must take an additional 0.5 credit from ANT/ ARH/ JAL/ JGA courses.
6. 5.0 credits from Groups A and B, of which 2.0 credits must be from Group A and 2.0 credits must be from Group B and 1.0 credit from either group

Note that students may substitute ARH495H1 (Research Practicum) for 0.5 credit of this requirement (assignment to Group A or B to be determined by Undergraduate Coordinator).

Group A: Theoretical and Methods 1: Theoretical

ANT210H1, ANT215H1, ANT325H1, ANT370H1, ANT409H1, ANT410H1, ANT411H1, ANT416H1, ANT420H1, GGR274H1, MCS225Y1, NMC265H1, NMC266H1, NMC268H1, NMC474H1, NMC476H1

Group A: Theoretical and Methods 2: Archaeometry

ARH440H1, CHM317H1, CHM414H1, CHM416H1, GGR315H1, JGA305H1, NMC462H1, NMC470H1

Group A: Theoretical and Methods 3: Ceramic and Lithic Analysis

ANT406H1, ANT408H1, FAH205H1, NMC465H1, NMC466H1, NMC469Y1

Group A: Theoretical and Methods 4: Geoarchaeology

ANT409H1, GGR272H1, GGR273H1, GGR301H1, GGR315H1, GGR373H1, GGR390H1, GGR406H1, GGR413H1, ESS234H1, ESS331H1, JGA305H1

Group A: Theoretical and Methods 5: Osteoarchaeology and Zooarchaeology

Group B: Area Courses and Cultural History 7: North and South American Prehistory

ANT315H1, ANT317H1, ANT320H1, ANT407H1, JIH369H1, JIG322H1

Group B: Area Courses and Cultural History 8: Old World Prehistory

ANT419H1, ARH360H1

Group B: Area Courses and Cultural History 9: East Asian Archaeology

EAS312H1, EAS412H1

Archaeology Major (Arts Program) - ASMAJ0155

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- ANT100Y1 (65%) or ANT200Y1/ ARH100Y1 (65%)

Completion Requirements:

(7.0 credits, including at least 2.0 credits at the 300+ level and one 0.5 credit at the 400-level)

First Year:

1. ANT200Y1/ ARH100Y1
2. ANT100Y1 or CLA160H1. If CLA160H1 is taken, students must take an additional 0.5 credit from the following: (CLA210H1/ CLA230H1/ CLA231H1)/ (FAH206H1/ FAH207H1)/ GGR101H1/ NMC262H1

Upper Years:

3. ARH205H1/ ARH305H1, and ARH309H1
4. 1.0 credit from: ARH306Y1, ARH312Y1, ARH361Y1, ARH361H1, ANT311Y1, NMC261Y0, NMC465H1, NMC466H1
5. 2.5 credits from: Group A
6. 0.5 credit from: Group B

Group A: Theoretical and Methods 1: Theoretical

ANT210H1, ANT215H1, ANT325H1, ANT370H1, ANT409H1, ANT410H1, ANT411H1, ANT416H1, ANT420H1, GGR274H1, MCS225Y1, NMC265H1, NMC266H1, NMC268H1, NMC474H1, NMC476H1

Group A: Theoretical and Methods 2: Archaeometry

ARH440H1, CHM317H1, CHM414H1, CHM416H1, GGR315H1, JGA305H1, NMC462H1, NMC470H1

Group A: Theoretical and Methods 3: Ceramic and Lithic Analysis

ANT406H1, ANT408H1, FAH205H1, NMC465H1, NMC466H1, NMC469Y1

Group A: Theoretical and Methods 4: Geoarchaeology

ANT409H1, GGR272H1, GGR273H1, GGR301H1, GGR315H1, GGR373H1, GGR390H1, GGR406H1, GGR413H1, ESS234H1, ESS331H1, JGA305H1

Group A: Theoretical and Methods 5: Osteoarchaeology and Zooarchaeology

ANT334H1/ ANT334Y1, ANT335Y1, ANT338H1, ANT415Y1, ANT434H1, EEB318H1, EEB323H1, EEB324H1, EEB390H1

EAS312H1, EAS412H1

Archaeology Minor (Arts Program) - ASMIN0155

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following course with the stated minimum grades are required:

- ANT200Y1/ ARH100Y1 (65%)

Completion Requirements:

(4.0 credits, including at least 1.0 credit at the 300 or 400-levels)

1. ANT200Y1/ ARH100Y1
2. ARH205H1/ ARH305H1, and ARH309H1
3. 1.5 credits from Group A
4. 0.5 credit from Group B

If ARH312Y1 is completed, it will be considered a Group A course.

Group A: Theoretical and Methods 1: Theoretical

Archaeology Courses

ARH100Y1 - Introduction to Archaeology

Previous Course Number: ANT200Y1
Hours: 48L/24T

Archaeology entails an active process of uncovering evidence for and learning about aspects of the human past. The goal of this course is to involve students in current archaeological practice, including its socio-political context, and the global structure of the human experience from human evolution through cities and empires. Students will critically engage with ideas both within and outside the discipline on working with descendant communities, stewardship, ethical practice, and the relevance of archaeology to contemporary issues from climate change to social inequality. This course can serve as an introduction for students planning to pursue an archaeology program or as an opportunity to engage with a fascinating topic that is relevant to disciplines ranging from science to humanities.

Exclusion: ANT200Y1
Breadth Requirements: Society and its Institutions (3)

ARH205H1 - Archaeological Inference

Previous Course Number: ARH305H1
Hours: 24L/6P/6S

This course explores ways that archaeologists investigate research questions and interpret archaeological evidence.

Group B: Area Courses and Cultural History 7: North and South American Prehistory

ANT315H1, ANT317H1, ANT320H1, ANT407H1,
JIH369H1, JIG322H1

Group B: Area Courses and Cultural History 8: Old World Prehistory

ANT419H1, ARH360H1

Group B: Area Courses and Cultural History 9: East Asian Archaeology

EAS312H1, EAS412H1

It introduces some of the main conceptual tools that archaeologists use to make inferences, including analogy, ethnoarchaeology, and experimental archaeology. It also uses practical exercises to help students understand the basic logic of some of the methods that archaeologists use in their research, such as dating methods and identification of spatial patterns. This prepares students for more advanced courses in archaeology.

Prerequisite: ANT200Y1/ ARH100Y1
Exclusion: ARH305H1
Recommended Preparation: ANT100Y1
Breadth Requirements: Society and its Institutions (3)

JGA305H1 - Environmental and Archaeological Geophysics

Hours: 24L/12P

Application of near-surface geophysical methods to investigate environmental and archaeological sites; in particular magnetometry, resistivity, ground-probing radar, and seismic surveys. Course will cover background on the various methods, and allow students to run field surveys and present on case studies.

Prerequisite: ESS241H1/ ESS262H1/ (ANT200Y1/ ARH100Y1)/ GGR201H1/ PHY224H1/ PHY250H1/ PHY254H1
Breadth Requirements: The Physical and Mathematical Universes (5)

ARH306Y1 - Archaeological Field Methods

Hours: 12L/61P

Intensive instruction in archaeological field methods and acquisition of field skills, including archaeological search and survey, site mapping, laying out excavation grids, use of theodolites, total station, and GPS, stratigraphic excavation, stratigraphy, field recording, screening sediment, Ontario license and reporting requirements. Normally this course would take place on campus in the summer. This course has a mandatory Lab Materials Fee of approximately \$26 to cover non-reusable materials. The fee will be included on the student's ACORN invoice. The details and application form are posted on the following website:

<https://www.anthropology.utoronto.ca/undergraduate/curriculum-course-information/field-schools-and-research-opportunities>. The application form should be submitted at least one week prior to the beginning of classes.

Prerequisite: ANT200Y1/ ARH100Y1/ (NMC260H1, NMC262H1)/ NMC261Y0

ARH309H1 - Archaeology, Ethics, and the Public

Hours: 24L

An analysis of ethics in contemporary archaeology that covers reburial and repatriation, interpretation of the archaeological record in the context of historically oppressed groups, ethnic minorities, and non-western societies, the ethics of collecting and managing cultural property, relationships with the media, the debates surrounding looting, and other issues.

Prerequisite: ANT200Y1/ ARH100Y1

Breadth Requirements: Society and its Institutions (3)

ARH312Y1 - Archaeological Laboratory

Hours: 28L/44P

Techniques for making archaeological data meaningful after excavation or survey. Archaeological measurements, compilation of data, database design, archaeological systematics, and sampling theory in the context of lithics, pottery, floral, faunal and other archaeological remains.

Prerequisite: ANT200Y1/ ARH100Y1, ARH205H1/ ARH305H1, and one of NMC268H1, EEB225H1/ GGR270H1*/ STA220H1/ STA221H1/ STA257H1/ STA261H1/ ANTC35H3** Note: *Geography pre- or co-requisites waived for Anthropology and Archaeology

students; ** to be taken at the Scarborough Campus
Breadth Requirements: The Physical and Mathematical Universes (5)

ARH360H1 - Prehistory of the Near East

Hours: 24L

From earliest times through the rise of complex hunter-gatherers, and the food producing revolution to politically complex societies in Southwest Asia.

Prerequisite: ANT200Y1/ ARH100Y1/ (NMC260H1, NMC262H1)

Breadth Requirements: Society and its Institutions (3)

ARH361H0 - Field Archaeology

ARH361H1 - Field Archaeology

Opportunity for students participating in non-degree credit archaeological digs to submit reports, field notes and term papers for degree credit. Not eligible for CR/NCR option. Instructions on how to obtain an application form are posted on the following website:

<https://www.anthropology.utoronto.ca/undergraduate>. The application form should be submitted at least one week prior to the beginning of classes.

Prerequisite: Permission of Undergraduate Co-ordinator and Supervisor

ARH361Y0 - Field Archaeology

ARH361Y1 - Field Archaeology

Opportunity for students participating in non-degree credit archaeological digs to submit reports, field notes and term papers for degree credit. Not eligible for CR/NCR option. Instructions on how to obtain an application form are posted on the following website:

<https://www.anthropology.utoronto.ca/undergraduate>. The application form should be submitted at least one week prior to the beginning of classes.

Prerequisite: Permission of Undergraduate Co-ordinator and Supervisor

ARH398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

ARH398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

ARH440H1 - Photogrammetry and 3D Analysis of Material Culture

Hours: 12L/12P/12S

With the increasing availability of powerful computers and software, 3D modeling and recording has become commonplace in archaeology, architectural history, museum studies, and other areas of cultural heritage research. In this course, students will learn about a powerful new method for 3D recording known as photogrammetry. After a series of tutorials, they will gain firsthand experience creating their own models of various subjects, such as historical architecture and public art in Toronto, and museum objects on campus. They will also learn how to analyze and present 3D content, while thinking critically about the impact of how digital tools are currently being employed by and shaping the agendas of researchers in archaeology, art history, and related fields.

Prerequisite: 1.0 credit in ANT/ ARH/ FAH courses at the 300+ level

Exclusion: ARH482H1 (Special Topics in Archaeology: 3D Modeling and Archaeological Analysis), offered in Fall 2019 and Fall 2021

Recommended Preparation: Previous experience with photography or imaging software will be helpful but is not required

Breadth Requirements: Creative and Cultural Representations (1)

ARH482H1 - Special Topics in Archaeology

Hours: 24S

Unique opportunity to explore a particular archaeological topic in-depth. Topics vary from year to year.

Prerequisite: ARH205H1/ ARH305H1

ARH494H1 - Topics in Emerging Scholarship (Archaeology)

Hours: 24S

Taught by an advanced PhD student or postdoctoral fellow, and based on his or her doctoral research and area of expertise, this course presents a unique opportunity to explore intensively a particular Archaeology topic in-depth. Topics vary from year to year.

Prerequisite: ARH205H1/ ARH305H1

Breadth Requirements: Society and its Institutions (3)

ARH495H1 - Archaeology Research Practicum

Laboratory or practical research on an archaeological project that emphasizes methods and research design in archaeology. Students must obtain the consent of a Supervisor before enrolling. Students are required to give an oral presentation of research results to an open meeting of the Archaeology Centre at the conclusion of the course. Application must be made to the Anthropology Department. Not eligible for CR/NCR option. Instructions on how to obtain an application form are posted on the following website:

<https://www.anthropology.utoronto.ca/undergraduate>. The application form should be submitted at least one week prior to the beginning of classes.

Prerequisite: A minimum of 14.0 credits, permission of Supervisor and Undergraduate Coordinator.

Exclusion: ANT497Y1

Recommended Preparation: ARH205H1/ ARH305H1, ARH312Y1

Architecture and Visual Studies

Introduction

A program of the Faculty of Arts & Science and the John H. Daniels Faculty of Architecture, Landscape, and Design. If you have any questions about the programs below, please contact the Daniels faculty registrar's office at registrar@daniels.utoronto.ca.

Visual studies focus upon a critical understanding and production of art. Visual studies is set within a unique environment focusing on a rigorous investigation of the interdisciplinary and conceptual components inherent to contemporary art and curatorial practice, as well as in critical writing, theory, art history, design, and related areas requiring a high degree of visual literacy. This innovative program of study provides instruction in studio practice in combination with critical discourse involving all aspects of contemporary visual culture through lectures, studio courses, seminars, and field trips.

The Visual Studies Minor is a Faculty of Arts & Science program. Requirements are listed below. Information about electives for this program may be found in the [Daniels faculty calendar](#).

Architecture and Visual Studies Programs

Visual Studies Minor (Arts Program) - ASMIN0660

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- [JAV120H1](#) and [JAV130H1](#).

To ensure that students admitted to the program will be successful, applicants with a final grade or grade average lower than a B in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or grade average does not guarantee admission to the program.

Completion Requirements:

(4.0 credits in Visual Studies, including at least 1.0 credit at the 300-level.)

1. [JAV120H1](#) and [JAV130H1](#)
2. [JAV200H1](#) and 2.5 credits in VIS courses taken through the Daniels Faculty.

Note: Visual Studies Minor students in the Faculty of Arts & Science are not permitted to take [VIS300H0](#), [VIS403H1](#), [VIS404H1](#), [VIS405H1](#), [VIS430Y1](#), and [VIS431Y1](#).

Visual Studies Programs

The Visual Studies specialist and major programs were transferred from the Faculty of Arts & Science to the John H. Daniels Faculty of Architecture, Landscape, and Design effective September 1, 2014. Students interested in pursuing the Visual Studies specialist or major program may apply for admission to the Daniels faculty (www.daniels.utoronto.ca).

For Arts & Science students enrolled in the program before September 2014, please refer to the [relevant archived Calendar](#) for program information.

Architecture Programs

The Architectural Studies major programs were transferred from the Faculty of Arts & Science to the John H. Daniels Faculty of Architecture, Landscape, and Design effective September 1, 2012. Students interested in pursuing the major programs may apply for admission to the Daniels Faculty. For information regarding architectural studies programs and courses, please visit the Daniels website: www.daniels.utoronto.ca.

For Arts & Science students enrolled in the program before September 2012, please refer to the [relevant archived Calendar](#) for program information.

Regarding Architecture and Visual Studies Courses

Architecture and visual studies course descriptions may be found in the [Daniels faculty calendar](#). Elective courses are available for Arts & Science students.

If you have any questions about architecture or visual studies courses, please contact the Daniels faculty registrar's office at registrar@daniels.utoronto.ca.

Architecture and Visual Studies Courses

JAV120H1 - Visual Concepts

Hours: 12L/36P

An introduction to a wide range of topics situated in modernism, postmodernism, and the contemporary that inform current art practice and critical discourse. The course investigates post-1970 art practice through diverse societal, cultural, and political influences of contemporary critical thought.

Exclusion: VIS120H1

Breadth Requirements: Society and its Institutions (3)

JAV130H1 - Visual Strategies

Hours: 24L/12T

An introduction to diverse mediums and topics for exploration with an emphasis on experimentation and conceptual development. In addition to acquiring manual skills used in production of contemporary visual art, students are encouraged to explore their own individual artistic and research processes.

Prerequisite: JAV120H1/ VIS120H1

Exclusion: VIS130H1

Breadth Requirements: Creative and Cultural Representations (1)

JAV200H1 - Introduction to Critical Theory

Hours: 24L/12T

A course that teaches critical and analytical ways of engaging visual culture within an interdisciplinary and international setting. Students are introduced to foundational intellectual tools and a research methodology appropriate to artists, designers, and architects.

Exclusion: VIS200H1

Breadth Requirements: Thought, Belief and Behaviour (2)

Art History

Faculty List

Professors Emeriti

K. Andrews, MFA
 L.E. Eleen, MA, PhD
 D.S. Richardson, MA, PhD (U)
 D. Rifat, DA
 J.W. Shaw, MAT, PhD, D Hum Lett, FSA, FRSC (T)
 M.C. Shaw, MA, PhD (S)
 B. Welsh-Orcharov, MA, PhD

Professor and Chair

C. Knappett, PhD, FSA (Homer Thompson/Walter Graham Chair in Aegean Prehistory)

Associate Chair, Undergraduate Studies

P. Sapirstein, PhD (Limited Term Appointment)

University Professor

P.L. Sohm, MA, PhD (U)

Professors

C. Anderson, MA, PhD
 M.A. Cheetham, MA, PhD, FRSC (U)
 L. Kaplan, MA, PhD (University of Toronto Mississauga)
 E.M. Kavalier, MA, PhD
 C. Knappett, PhD, FSA (Homer Thompson/Walter Graham Chair in Aegean Prehistory)
 E. Levy, MFA, PhD (University of Toronto Mississauga)
 J. Ricco, MA, PhD (University of Toronto Mississauga)

Associate Professors

J. Bear, MA, PhD
 J. Caskey, MA, PhD (University of Toronto Mississauga)
 A. S. Cohen, MA, PhD
 B. C. Ewald, MA, PhD
 E. Harney, MA, PhD (University of Toronto Scarborough)
 K. Jain, MA, PhD (University of Toronto Mississauga)
 S.J. Kim, MA, MPhil, PhD
 E.M.M. Legge, MA, PhD (U)
 G. Periti, MA, PhD
 J. Purtle, MA, MPhil, PhD (U)
 A. Syme, MA, PhD (University of Toronto Mississauga)

Assistant Professors

J. Clarke, M. Arch, M Phil, PhD

Y. Gu, MA, PhD (University of Toronto Scarborough)
 M. Harakawa, MPhil, PhD
 M. Migwans, MA, PhD
 H. Mostafa, MA, PhD
 P. Sapirstein, PhD

Adjunct Professor

Y. Hendeles, C.M., O.Ont, PhD Amsterdam, LL.D
 University of Toronto, Nova Scotia College of Art and Design, Ontario College of Art and Design (Hons)

Royal Ontario Museum

H. Coxon, Associate Professor, Status Only
 D. Dewan, MA, PhD, Associate Professor, Status Only
 R. Fox, MA, PhD, Assistant Professor, Status Only
 A. Gehmacher, MA, PhD, Associate Professor, Status Only
 A. Palmer, MA, PhD, Associate Professor, Status Only

Introduction

The Department of Art History offers Minor, Major, and Specialist programs in Art History (FAH).

The FAH curriculum covers art from prehistory to the present in several global regions: the Mediterranean area, Europe, the Indigenous and Colonized Americas, and Asia. [FAH101H1](#) and [FAH102H1](#) offer two different ways of acquiring the foundational skills of art history while exploring global art and architecture: the 101 previewing subject in 200-level FAH course offerings, the 102 drawing examples around a unifying theme. Taking one of these two courses is a mandatory component of the curriculum, and students are encouraged to complete this requirement early in their progress toward an FAH program. The 0.5 credit courses at the 200-level are more comprehensive surveys that introduce the material from specific chronological periods, regional areas, or the history of architecture. Many of these courses, which are offered on a regular basis, serve as “gateway” prerequisites for courses at the 300- and 400-level; students are advised to check the prerequisites for each upper-level course carefully before enrolment.

Courses in art history (FAH) are useful to students in other departments or faculties; history, literature, music, and philosophy - to name but a few examples - are likewise concerned with systems of thought and imagery. Fundamental concepts in such disciplines are embodied or reflected in related works of art of the same general period and area. Students in architecture, geography, or city planning will find courses in the history of architecture of benefit.

At the same time, the Department directs the attention of its students to the wide range of offerings in other departments and urges them to acquire the broad cultural background essential to an understanding of the arts. Of special importance are familiarity with history, a knowledge of the various traditions of literature and mythology, and an acquaintance with philosophy. Courses in cultural, historical or urban geography may also be relevant in programs that include the history of architecture. It is imperative that students interested in pursuing an advanced degree in art history acquire the foreign languages necessary for such work. Although the choice of languages will be dependent on an individual's program of study, it is generally recommended that students begin to learn German and at least one other European language. The Department website provides a [list of courses in other departments](#) that can be counted toward an art history degree; consult the Director of Undergraduate Studies to confirm the eligibility of any potentially suitable course not published there.

In conjunction with Woodsworth College, the Department offers courses during the summer term at the University of Siena, Italy, and at other locations abroad. For information about these degree-credit FAH courses, please consult the Department of Art History website or contact the Summer Abroad Program at Woodsworth College, 119 St. George Street (416-978-8713), summer.abroad@utoronto.ca

The History of Art Students' Association sponsors a variety of lectures and other activities for members of the departmental community.

Not all courses listed in this Calendar are offered every year. For more detailed information on courses and degree programs, consult the Department of Art History website at www.arthistory.utoronto.ca. Counselling is available, by appointment, from the Undergraduate Coordinator.

Enquiries:

Undergraduate Assistant, Sidney Smith Hall, Room 6036 (416-978-7892), undergrad.arthistory@utoronto.ca

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Art History programs impacted by this policy: [ASSPE0908](#), [ASMAJ0908](#), and [ASMIN0908](#)

Art History Programs

Art History Specialist (Arts Program) - ASSPE0908

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- 2.0 credits from FAH courses with a grade of 70% in each course

Completion Requirements:

(11.0 credits)

At least 9.0 FAH credits, and 2.0 credits in one or more languages including at least one German, French, or Italian, though an acceptable alternative modern language such as Dutch or Russian (or Chinese and/or another Asian language) may be acceptable. It is strongly recommended that students acquire a reading knowledge of German, French, or Italian by the end of the third year. Students specializing in Ancient or Medieval art should also recognize the importance of studying Greek and/or Latin. Students interested in pursuing Asian art history will need to acquire Chinese and/or Japanese and/or another Asian language.

First Year:

[FAH101H1/](#) [FAH102H1](#)

Higher Years:

1. At least 0.5 credit from each of Groups A, B, C, and D (see below for definitions).
2. 0.5 additional credit from each of Groups A and B.
3. No more than 3.5 credits may be taken at the 200-level.
4. 3.5 credits at the 300+level
5. 1.0 credit at the 400 level. No more than 1.5 credits at the 400-level will be counted toward fulfilling program requirements.
6. Approved courses in other programs may be substituted for up to 2.0 FAH credits. See [Department website](#) for details.

In addition, the Faculty of Arts and Science requires Art History Specialists who do not complete [FAH338H1](#) to complete at least 0.5 credit in Arts and Science courses in

Breadth Category 5: The Physical and Mathematical Universes.

Group A: Ancient, Medieval

[FAH205H1](#), [FAH206H1](#), [FAH207H1](#), [FAH208H1](#),
[FAH215H1](#), [FAH216H1](#), [FAH265H1](#), [FAH303H1](#),
[FAH304H1](#), [FAH307H1](#), [FAH308H1](#), [FAH309H1](#),
[FAH310H1](#), [FAH311H1](#), [FAH312H1](#), [FAH313H1](#),
[FAH314H1](#), [FAH318H1](#), [FAH319H1](#), [FAH325H1](#),
[FAH326H1](#), [FAH327H1](#), [FAH401H1](#), [FAH402H1](#),
[FAH405H1](#), [FAH406H1](#), [FAH407H1](#), [FAH415H1](#),
[FAH420H1](#), [FAH421H1](#), [FAH423H1](#), [FAH424H1](#)

Group B: Renaissance-Baroque, Modern-Contemporary-Canadian

[FAH230H1](#), [FAH231H1](#), [FAH245H1](#), [FAH246H1](#),
[FAH248H1](#), [FAH252H1](#), [FAH255H1](#), [FAH330H1](#),
[FAH331H1](#), [FAH335H1](#), [FAH337H1](#), [FAH338H1](#),
[FAH340H1](#), [FAH341H1](#), [FAH345H1](#), [FAH346H1](#),
[FAH347H1](#), [FAH348H1](#), [FAH349H1](#), [FAH350H1](#),
[FAH251H1/](#) [FAH351H1](#), [FAH352H1](#), [FAH353H1](#),
[FAH354H1](#), [FAH355H1](#), [FAH430H1](#), [FAH433H1](#),
[FAH434H1](#), [FAH436H1](#), [FAH438H1](#), [FAH439H1](#),
[FAH440H1](#), [FAH451H1](#), [FAH446H1](#), [FAH447H1](#),
[FAH448H1](#), [FAH449H1](#), [FAH452H1](#), [FAH457H1](#),
[FAH458H1](#)

Group C: Asian

[FAH205H1](#), [FAH260H1](#), [FAH262H1](#), [FAH360H1](#),
[FAH363H1](#), [FAH364H1](#), [FAH461H1](#), [FAH463H1](#),
[FAH464H1](#), [FAH465H1](#)

Group D: History of Architecture

[FAH265H1](#), [FAH270H1](#), [FAH272H1](#), [FAH273H1](#),
[FAH309H1](#), [FAH328H1](#), [FAH370H1](#), [FAH371H1](#),
[FAH373H1](#), [FAH376H1](#), [FAH415H1](#), [FAH421H1](#),
[FAH423H1](#), [FAH470H1](#), [FAH472H1](#), [FAH473H1](#)

Note: courses used to satisfy one group requirement cannot be counted toward another group requirement.

Art History Major (Arts Program) - ASMAJ0908

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(6.0 credits)

At least 6.0 FAH credits fulfilling the following distribution requirements:

First Year:

[FAH101H1/](#) [FAH102H1](#)

Higher Years:

1. At least one 0.5 credit in three of the four FAH Groups (see below for definitions).
2. 3.0 credits at the 300+ level, including at least one 0.5 credit at the 400-level.
3. No more than 1.0 credit at the 400-level will be counted toward fulfilling program requirements.
4. Approved courses in other programs may be substituted for up to 1.0 FAH credit. See [Department website](#) for details.

In addition, the Faculty of Arts and Science requires Art History Majors who do not complete [FAH338H1](#) to complete at least one 0.5 credit in Arts and Science courses in Breadth Category 5: The Physical and Mathematical Universes.

Group A: Ancient, Medieval

[FAH205H1](#), [FAH206H1](#), [FAH207H1](#), [FAH208H1](#),
[FAH215H1](#), [FAH216H1](#), [FAH265H1](#), [FAH303H1](#),
[FAH304H1](#), [FAH307H1](#), [FAH308H1](#), [FAH309H1](#),
[FAH310H1](#), [FAH311H1](#), [FAH312H1](#), [FAH313H1](#),
[FAH314H1](#), [FAH318H1](#), [FAH319H1](#), [FAH325H1](#),
[FAH326H1](#), [FAH327H1](#), [FAH401H1](#), [FAH402H1](#),
[FAH405H1](#), [FAH406H1](#), [FAH407H1](#), [FAH415H1](#),
[FAH420H1](#), [FAH421H1](#), [FAH423H1](#), [FAH424H1](#)

Group B: Renaissance-Baroque, Modern-Contemporary-Canadian

[FAH230H1](#), [FAH231H1](#), [FAH245H1](#), [FAH246H1](#),
[FAH248H1](#), [FAH252H1](#), [FAH255H1](#), [FAH330H1](#),
[FAH331H1](#), [FAH335H1](#), [FAH337H1](#), [FAH338H1](#),
[FAH340H1](#), [FAH341H1](#), [FAH345H1](#), [FAH346H1](#),
[FAH347H1](#), [FAH348H1](#), [FAH349H1](#), [FAH350H1](#),
[FAH251H1/](#) [FAH351H1](#), [FAH352H1](#), [FAH353H1](#),
[FAH354H1](#), [FAH355H1](#), [FAH430H1](#), [FAH433H1](#),
[FAH434H1](#), [FAH436H1](#), [FAH438H1](#), [FAH439H1](#),
[FAH440H1](#), [FAH446H1](#), [FAH447H1](#), [FAH448H1](#),
[FAH449H1](#), [FAH451H1](#), [FAH452H1](#), [FAH457H1](#),
[FAH458H1](#)

Group C: Asian

[FAH205H1](#), [FAH260H1](#), [FAH262H1](#), [FAH360H1](#),
[FAH363H1](#), [FAH364H1](#), [FAH461H1](#), [FAH463H1](#),
[FAH464H1](#), [FAH465H1](#)

Group D: History of Architecture

[FAH265H1](#), [FAH270H1](#), [FAH272H1](#), [FAH273H1](#),
[FAH309H1](#), [FAH328H1](#), [FAH370H1](#), [FAH371H1](#),
[FAH373H1](#), [FAH376H1](#), [FAH415H1](#), [FAH421H1](#),
[FAH423H1](#), [FAH470H1](#), [FAH472H1](#), [FAH473H1](#)

Note: courses used to satisfy one group requirement cannot be counted toward another group requirement.

Art History Minor (Arts Program) - ASMIN0908

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

At least 4.0 FAH credits fulfilling the following distribution requirements:

1. FAH101H1/ FAH102H1
2. At least one 0.5 credit in two of the four FAH Groups (see below for definitions).
3. At least one 1.0 credit at the 300-level.

Group A: Ancient, Medieval

FAH205H1, FAH206H1, FAH207H1, FAH208H1, FAH215H1, FAH216H1, FAH265H1, FAH303H1, FAH304H1, FAH307H1, FAH308H1, FAH309H1, FAH310H1, FAH311H1, FAH312H1, FAH313H1, FAH314H1, FAH318H1, FAH319H1, FAH325H1, FAH326H1, FAH327H1, FAH401H1, FAH402H1, FAH405H1, FAH406H1, FAH407H1, FAH415H1, FAH420H1, FAH421H1, FAH423H1, FAH424H1

Group B: Renaissance-Baroque, Modern-Contemporary-Canadian

FAH230H1, FAH231H1, FAH245H1, FAH246H1, FAH248H1, FAH252H1, FAH255H1, FAH330H1, FAH331H1, FAH335H1, FAH337H1, FAH338H1, FAH340H1, FAH341H1, FAH345H1, FAH346H1, FAH347H1, FAH348H1, FAH349H1, FAH350H1, FAH251H1/ FAH351H1, FAH352H1, FAH353H1, FAH354H1, FAH355H1, FAH430H1, FAH433H1, FAH434H1, FAH436H1, FAH438H1, FAH439H1, FAH440H1, FAH446H1, FAH447H1, FAH448H1, FAH449H1, FAH451H1, FAH452H1, FAH457H1, FAH458H1

Group C: Asian

FAH205H1, FAH260H1, FAH262H1, FAH360H1, FAH363H1, FAH364H1, FAH461H1, FAH463H1, FAH464H1, FAH465H1

Group D: History of Architecture

FAH265H1, FAH270H1, FAH272H1, FAH273H1, FAH309H1, FAH328H1, FAH370H1, FAH371H1, FAH373H1, FAH376H1, FAH415H1, FAH421H1, FAH423H1, FAH470H1, FAH472H1, FAH473H1

Note: courses used to satisfy one group requirement cannot be counted toward another group requirement.

Art History Courses

FAH101H1 - Monuments of Art History

Hours: 20L/10T

An introduction to the arts and architecture from antiquity to the present day which emphasizes the deep connection between art and history. This broad overview will examine carefully a selection of works, including real objects and buildings in Toronto, which are representative of the upper-level courses currently offered by the Art History faculty. Special attention is paid to developing essential art historical skills, including the ability to look at, analyze, and write about works of art and architecture. Tutorials provide training in and experience applying the basic principles and vocabulary employed in art-historical scholarship. Frequent short writing assignments and exercises will be based on readings, lectures, and museum or gallery visits to collections in Toronto. No previous knowledge of history of art or architecture is required.

Exclusion: FAH101H5

Breadth Requirements: Creative and Cultural Representations (1)

FAH102H1 - Art and Ideas

Hours: 24L/6T

A survey of the history of art, architecture and allied arts. This introduction to the history of art will examine a wide range of objects, selected and discussed in connection with a special theme to be selected by the instructor. Students will be expected to study the history and significance of art through the close reading of selected texts that relate to both art and theory. Special attention will be given to developing essential art historical skills necessary for upper level courses. The topic for each semester will vary based on the instructor. No previous knowledge of history of art or architecture is required. Frequent writing assignments and exercises will be based on readings, lectures, and museum or gallery visits to collections in Toronto.

Exclusion: FAH101H5

Breadth Requirements: Creative and Cultural Representations (1)

FAH194H1 - Public Art: Local and Global

Hours: 24S

We are surrounded by public art, whether in the form of official commemorative monuments or ephemeral (some say illegal) street art. We will examine the history and current practice of this important art form in Toronto and by comparison, globally. The focus will be on discussing the nature, roles, and issues pertaining to contemporary public art that we can see in situ in downtown Toronto. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

FAH195H1 - On Foot: From Pilgrimage to the Mobile City

Hours: 24S

Walking is a basic human activity, yet it also defines and shapes us. In order to understand the permutations of this seemingly simple activity we will look at walking in a variety of contexts through the study of texts, art, movies and the built environment. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

FAH196H1 - Marco Polo's World

Hours: 24S

This course explores the visual and material worlds of the Italian traveller Marco Polo, which are described in his *Travels*. Together we will read sections of this text and explore their meaning with respect to the objects and monuments of Marco Polo's time from the regions to which he travelled. By studying cartography, art, architecture, and urban form in the expansive medieval world of Marco Polo, the course will introduce us to the global world of the Middle Ages. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

FAH197H1 - Classical Art from Greek Gods to Roman Gladiators

Hours: 24S

The ancient Greeks and Romans lived in a world full of images. Ancient visual culture comprises not only the high arts but also the everyday. This course is meant to introduce students to key ideas about how art and images in general impacted the life of ancient Greeks and Romans. Students will learn to examine various categories of visual material ranging from the pictorial and applied arts (painting, sculpture, architecture) to everyday artifacts (for example, domestic wares, jewelry or weapons). Through a series of discussion-centred seminar sessions students will explore the interconnections between art and ideology, art and identity as well as visibility and viewing. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

FAH198H1 - Shocking Artists, Shocking Art

Hours: 24S

Art causes scandals for many reasons, provoking a range of consequences, including censorship, cuts to government funding of the arts or even destruction of the work in question. In this course we will consider a number of kinds of art scandal arising from exhibition in public galleries and urban spaces, including those that have to do with legal issues such as plagiarism and vandalism; aesthetic objections on the part of the public, ranging from perceived obscenity to simple resentment of abstract art; racism; sacrilege; and political subversion, amongst others. We will consider the work of artists including Chris Ofili, Joep van Lieshout, Paul McCarthy, Damien Hirst, Michael Snow, Sally Mann, Banksy, Rachel Whiteread, Richard Prince, Andres Serrano, Robert Mapplethorpe, Carl Andre, Maya Lin, and Jeff Koons, amongst others. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

FAH199H1 - Architecture of Toronto

Hours: 24S

The architecture of Toronto is characterized by artful and influential monuments as well as stylistically incoherent neighbourhoods, vibrant civic spaces alongside

dysfunctional infrastructure. This course investigates how Canada's national metropolis came to embody such extremes of architectural richness and urban contradictions. The seminar focuses on how to "read" the buildings of Toronto and think critically about the forces that have shaped city planning, monuments, public space, and concepts of heritage. Readings and discussions will be combined with field trips, research on site or in the archives, and direct engagement with local communities and preservation initiatives. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

FAH205H1 - Clay: A Material and Visual History

Hours: 24L

This course will reveal the deep history of clay, stretching back to the Palaeolithic period with the first clay figurines; through the Neolithic period with its extensive use of clay for the earliest permanent houses, the first inorganic containers, and many votive offerings in clay; all the way to the present day with the ceramic art of Pablo Picasso, Grayson Perry, and Ai Weiwei. Our approach will also be thoroughly global, ranging from the Maya of Mesoamerica to the Mingi of Japan. The course will involve hands-on elements too, particularly with the nearby Gardiner Museum of Ceramic Art.

Recommended Preparation: FAH101H1/ FAH102H1

Breadth Requirements: Creative and Cultural Representations (1)

FAH206H1 - Prehistoric Aegean and East Mediterranean Art and Archaeology

Hours: 24L

An overview of the major monuments, artifacts, themes and problems in the study of the archaeology, art and architecture of the Aegean region and the east Mediterranean to 1000BC.

Breadth Requirements: Creative and Cultural Representations (1)

FAH207H1 - Greek and Roman Art and Archaeology

Hours: 24L

An overview of the major monuments, artifacts, themes and problems in the study of the archaeology, art and architecture of the civilizations of Greece and Rome.

Breadth Requirements: Creative and Cultural Representations (1)

FAH208H1 - Heroes of the Classical World

Hours: 24L

This course is an introductory level study of Greek and Roman Art, explored through the concept of the hero. The course surveys the representations of mythological heroes as well as historical individuals who comply with the notion of hero in Greek and Roman cultures (warriors, athletes, political leaders, etc.). Examining their religious, civic and political contexts allows students to learn how visual culture deals more broadly with larger issues within the respective ancient societies. Readings are drawn from an array of primary and secondary sources both art historical and literary, and the visual exploration of certain mythological narratives teaches how stories are conveyed in the art of Greece and Rome. Basic issues of style and art historical development of the period are also addressed, as are various theories regarding the notion of the hero. This course provides ample opportunity to reflect upon ancient heroes' contemporary relevance, through various assignments and group projects.

Recommended Preparation: Familiarity with Greek mythology

Breadth Requirements: Creative and Cultural Representations (1)

FAH215H1 - Early Medieval Art and Architecture

Hours: 24L

An overview of major monuments and themes in the art and architecture of Western Europe and the Byzantine East from the third until the eleventh century.

Exclusion: FAH215H5/ VPHB53H3

Breadth Requirements: Creative and Cultural Representations (1)

FAH216H1 - Later Medieval Art and Architecture

Hours: 24L

An overview of major monuments and themes in the art and architecture of Western Europe and the Byzantine East from the eleventh until the fifteenth century.

Exclusion: [FAH216H5/ VPHB53H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH230H1 - Renaissance Art and Architecture

Hours: 24L

A selective survey of the major art centres and types of artistic and architectural production in Italy and northern Europe, from the early fifteenth century to the mid-sixteenth. Themes include the relations--artistic, economic and ideological--between northern and southern Europe during this period, the changing role of art in religious life, the emergence of secular themes, and the legacies left by Renaissance art to modern life and culture.

Exclusion: [FAH274H5](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH231H1 - Baroque Art and Architecture

Hours: 24L

Major forms of expression in the visual arts ca. 1600 - ca. 1750 with particular attention to forms, techniques, theories, and patronage of the arts as well as biographies of artists in Italy, France, the Netherlands, Flanders, Germany and England.

Exclusion: [FAH279H5/ VPHB64H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH245H1 - Modernism and anti-Modernism, c. 1750-1900

Hours: 24L

An introduction to the advent and development of art movements including Rococo and Neoclassicism; Romanticism and Revolution; Realism and the advent of Photography, Impressionism; Academic art; Post-Impressionism.

Exclusion: [FAH287H5/ VPHB58H3](#)

Recommended Preparation: [FAH101H1/ FAH102H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH246H1 - Art Since 1900

Hours: 24L

An introduction to the consolidation of Modernist tendencies in Europe to the mid 20th century and to the many contemporary responses to these achievements. Individual artists, including Picasso, Matisse, Duchamp, and Matthew Barney are considered in their relationship to various art movements and the theories that supported them, including Expressionism; Abstraction and Constructivism; Dada and Surrealism; Neue Sachlichkeit; Abstract Expressionism; Pop; Conceptual Art; Earth Art; Feminist Art; Postmodernism; New Media Art.

Exclusion: [FAH288H5/ FAH289H5/ VPHB58H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH248H1 - Canadian Painting 1665-1960

Hours: 24L

An introductory survey of the history of painting in Canada from the 17th to the 20th century.

Exclusion: [FAH292H5](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH251H1 - Black Art in North America

Previous Course Number: FAH351H1

Hours: 24L

This introductory course will survey the interrelated history of Blackness and artistic production in the United States, Mexico, the Caribbean, and Canada. Starting in the eighteenth century with the advent of the transatlantic slave trade and covering up to Black Lives Matter movement, the course proceeds chronologically and considers the Black Art within its larger social context. By discussing the aesthetic qualities of artworks and the careers of Black artists alongside of the history of anti-Black racism in North America, we will explore both how the visual has been used as a tool of domination and how art can challenge or subvert racist ideologies. At the end of the course, students will be familiar with the primary figures, debates, and works of art that constitute the field. They will also be comfortable discussing the history anti-Black racism and its current manifestations. Topics

include: the visual culture of slavery and abolition, hemispheric and transatlantic modernisms, the racial politics of “outsider” and “folk” art, the Black Arts Movement, and art and mass incarceration.

Exclusion: [FAH351H1](#), and [FAH280H1](#) (Special Topics in Art History: *Black Art in North America*) offered in Fall 2022.

Recommended Preparation: [FAH101H1](#)/ [FAH102H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH252H1 - Introduction to the History of Photography

Hours: 24L

This course surveys the history of photography in Europe and North America, from its origins to recent innovations in digital imaging. Emphasis is placed on the various aesthetic, scientific, and political discourses in which photography has been located, and the assumptions and premises associated with the medium's relationship to reality.

Exclusion: [FAH291H5](#)/ [FAH352H1](#)

Recommended Preparation: [FAH101H1](#)/ [FAH102H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH255H1 - Art of Indigenous North America

Hours: 24L

A broad survey of Indigenous arts in North America from Mexico to the Arctic, and from ancient to modern. Students will gain a basic literacy in key artforms including painting, architecture, basketry and more, grounded in an awareness of Indigenous realities and historical currents.

Exclusion: [FAH275H5](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH256H1 - Arts of Indigenous North America: East and North

Previous Course Number: FAH255H1

Hours: 24L

A broad survey of Indigenous arts in North America focusing on the east and the north, from ancient Mississippian cities, to historic Anishinaabe and

Haudenosaunee cultural traditions, to Inuit modern and contemporary art. Topics from resource extraction and water politics to ancestral arts and modern markets will emerge throughout, all departing from analysis of art objects in their cultural context. Assignments draw on the rich variety of Indigenous arts in local Toronto institutions and public spaces.

Exclusion: [FAH255H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH257H1 - Arts of Indigenous North America: South and West

Previous Course Number: FAH255H1

Hours: 24L

A broad survey of Indigenous arts in North America focusing on the south and the west, from Mesoamerican monuments, to Northwest Coast chiefly arts, to contemporary clay in the Southwest. Topics from resource extraction and water politics to ancestral arts and modern markets will emerge throughout, all departing from analysis of art objects in their cultural context. Assignments draw on the rich variety of Indigenous arts in local Toronto institutions and public spaces.

Exclusion: [FAH255H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH260H1 - The Artistic Landscape of East Asia

Hours: 24L

An overview of major monuments and themes in the art and architecture of East Asia (China, Japan, Korea, Vietnam, Mongolia and Tibet), from the Neolithic to the present.

Exclusion: [VPHB73H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH262H1 - Art and Visual Experience in Modern and Contemporary East Asia

Hours: 24L

An overview of major monuments and themes in the art and architecture of East Asia (China, Japan, Korea,

Vietnam, Mongolia and Tibet) and its diaspora in the nineteenth and twentieth centuries.

Exclusion: VPHB77H3

Breadth Requirements: Creative and Cultural Representations (1)

FAH265H1 - Monuments of the Islamic World

Hours: 24L

This course explores the architecture of the Islamic world from the 7th - 12th centuries through the lens of its major monuments throughout the central Islamic lands, North Africa and Spain. Through an emphasis upon the Umayyad, Abbasid, Fatimid and Seljuk periods, the course explores the range of cultural, political, social and religious aspects related to the development of the built environment. It also considers the impact of Islam's encounter with late antiquity and aims to position the rise of Islamic architecture within the context of this encounter. Additionally, the architecture is contextualized through a study of the urban history of select early and medieval Islamic cities.

Breadth Requirements: Creative and Cultural Representations (1)

FAH270H1 - Architecture: Rituals and Monuments

Hours: 24L

A survey of architecture from pre-history to the start of modernism, with attention given to the ways in which architecture shapes human experience.

Breadth Requirements: Creative and Cultural Representations (1)

FAH272H1 - Modern Architecture from 1750 to the Present

Hours: 24L

An introduction to the buildings, issues and ideas from Neoclassicism to the present.

Breadth Requirements: Creative and Cultural Representations (1)

FAH273H1 - Canada Buildings and Landscapes

Hours: 24L

An introduction to the traditions and patterns of building in Canada taking into account the unique landscapes, resources and history that comprise what is now a unified political entity. Lectures will pay special attention to the complexity of architecture throughout Canada including issues of land rights, natural resources, immigration, settlements and urban design, transportation, and heritage issues. A special feature of this class will be the opportunity to study Toronto first-hand through class projects. No previous architectural history study is required.

Breadth Requirements: Creative and Cultural Representations (1)

FAH280H1 - Special Topics in Art History

Hours: 24L

The thematic study of various aesthetic, cultural, social, political, and theoretical aspects of global art and photography.

Recommended Preparation: Any course in the Humanities or Social Sciences

Breadth Requirements: Creative and Cultural Representations (1)

FAH299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities....> Not eligible for CR/NCR option.

FAH303H1 - Emergence of Greek Civilisation

Hours: 24L

This course investigates the material culture, art and architecture of the Aegean civilizations from the Neolithic through to the building of the palaces of Crete around 2000BC.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH206H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH304H1 - Architecture of Ancient Greece

Hours: 24L

In this course we will survey the history of Greek architecture and its impact on the buildings of the ancient Mediterranean. Chronologically, we will begin in the latter second millennium BCE, examining the consequences of the collapse of Mycenaean society on Greek building, after which we will examine the synthesis and dissemination of exciting new forms of monumental building at Greek sanctuaries and cities during the Archaic and Classical periods (ca. 700–350/323 BCE). We will conclude with the developments of the Hellenistic period, the era of eastern Mediterranean empires when architectural patronage is increasingly dominated by Greek and Hellenized royalty. Along the way, the course will examine topics such as the interpretation of meaning in Greek buildings and their sculptural decoration, the origins of building technologies, the interaction of Greek and non-Greek architects and builders, and the reception of Greek architectural forms within non-Greek contexts throughout the Mediterranean.

Prerequisite: 1.0 FAH credit at any level/ [CLA210H1](#)/[CLA220H5](#)

Exclusion: [FAH380H1](#) (offered as "Greek Architecture") taken in Winter 2020 and 2022

Recommended Preparation: [FAH205H5](#)/ [FAH206H1](#)/[FAH207H1](#)/ [FAH208H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH307H1 - Ancient Art, Migration, and the Barbarian 'Other'

Hours: 24L

This course surveys the cultural, artistic and social interactions between the Graeco-Roman world and the

so-called 'Barbarians' beyond its eastern and northern confines. Chronologically, it spans from the Greek Geometric and Archaic periods (9th - 6th c. BCE) to the disintegration of the Western Roman Empire and the emergence of Early Medieval Europe (6th- 7th c. CE). The course will address issues of artistic production, material culture, ritual and cult in relation to the mobility of peoples and groups, objects and individuals.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH205H5](#)/ [FAH207H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH308H1 - City of Athens: Art, Politics and Society

Hours: 24L

This course provides a detailed investigation of the city of Athens, focusing on the art, architecture and archaeology in the later Archaic and Classical Period. A combination of topographical and chronological approach is taken to familiarize the students with both the physical cityscape as well as its development in the context of major areas of interest, such as politics, religion and social customs. Some broad themes explored include: art, democracy and propaganda (Agora), the impact of the Persian wars, ritual and religious festivals (Acropolis), the symposium, Athenian women, funerary art (Kerameikos), cult, sanctuaries and votives, art and Athenian drama. The course will also feature digital humanities components in the assignments, which may involve spatial mapping, 3D tools/VR and/or databases, as well as a trip to the Royal Ontario Museum.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH205H5](#)/ [FAH207H1](#)/[FAH208H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH309H1 - City of Rome

Hours: 24L

The art, architecture and archaeology of the city of Rome to AD476.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH205H5](#)/ [FAH207H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH310H1 - Greek Vase Painting

Hours: 24L

This course is a comprehensive exploration of the art of Greek vase painting, covering material from the late Geometric period (8th C. BCE) to the late Classical Period (4th C. BCE). While iconography and narrative will form a major portion of the content, the class will also explore issues surrounding material and technique, the prevalent sympotic (drinking) culture and Greek rituals that provides the cultural framework, dynamics of trade, theories of viewership and semiotics, status of the artist, and other historiographical concerns, including problematic issues surrounding the modern practice of collecting.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH205H1/ FAH205H5/ FAH207H1/ FAH208H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH311H1 - Greek Sculpture

Hours: 24L

The course provides a thorough examination of ancient Greek sculpture from 7th - 1st century BCE, which in many ways defined the canon of western art that was to follow. Classic issues of style, dating, and technique are complemented by putting them into the contexts of cultural history, religion and socio-politics. While the course is a traditional monument-based survey of major sculptural works from the ancient Greek world, several important issues are also addressed, pertaining both to contemporary society and the study of other areas of art history. These include but are not limited to: gender, social class, colonialism, notion of the artist, originality, and aesthetic theory.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH205H5/ FAH207H1/ FAH208H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH312H1 - Art of the Hellenistic Age

Hours: 24L

Transformation in the visual arts, paintings, sculpture, and mosaics of the expanding Greek world c. 400BC to c. 100BC; the response to Hellenization from the new artistic centres of Asia Minor and Italy.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH205H5/ FAH207H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH313H1 - Greek Myth in Ancient Art

Hours: 24L

A general introduction to Greek mythology and its uses (and abuses) by the Greeks and Romans through the art of antiquity. Students will learn about gods and goddesses, heroes and heroines, their attributes and stories which constituted the subjects of (not only) ancient art.

Corequisite: 1.0 FAH credit

Exclusion: [CLA204H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH314H1 - Eroticism in Ancient Art

Hours: 24L

Erotic 'imagery' – sculptures, reliefs, paintings – is ubiquitous in ancient art, to a degree that modern viewers have often found disturbing. This course faces the challenge posed by the ancient predilection for such imagery and explores it from a critical and scholarly perspective. At its most basic level, it reassigns a seemingly universal segment of human 'nature' and experience to the realm of culture, by examining the imagery against the background of ancient constructions of sexuality, gender and the body. But it also explores the libidinal and hedonic structure of the works of art themselves and asks for the functions of erotic imagery in its respective contexts. The course will avail itself of the excellent research on gender, sexuality and eroticism in antiquity that has been produced over the past few decades, and it will also explore the topic's lateral connections with the thematic fields of ancient humour, the 'grotesque', apotropaism, myth and magic.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH205H5/ FAH207H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH318H1 - Monastic Art and Architecture

Hours: 24L

An examination of the role played by monks and nuns in the creation and use of art and architecture in the Middle Ages.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH215H1/ FAH215H5/ FAH216H1/ FAH216H5/ VPHB53H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH319H1 - Illuminated Manuscripts

Hours: 24L

A focused survey of different types of manuscripts and their images from the origins of the book in Late Antiquity to the invention of printing.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH215H1/ FAH215H5/ FAH216H1/ FAH216H5/ VPHB53H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH325H1 - Urban Islam

Hours: 24L

By challenging essentialist questioning of Islamic urbanism, this course considers the inter-animated and complex web of forces that drive cities forward by identifying repertoires of underlying logic. Through a deep and historically situated reading of Medieval Mecca, Medina, Damascus, Jerusalem, Baghdad, Cairo, and Cordoba, we will map and encode history on the urban scale to reveal what makes a city "Islamic." Visual mapping skill cultivation for communication purposes (both digital and analogue) will be taught throughout to enhance understandings of urban complexity in rich historical contexts.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH265H1/ FAH326H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH326H1 - Cultural History of Islamic Spain

Hours: 24L

From its earliest beginnings as an Umayyad province and up until the 15th century, al-Andalus acted as a lynch pin within the Mediterranean world. Connecting the Islamic empire in the East and forging links of trade and cultural exchange with Europe to the West, cities such as Cordoba and Granada captured the imagination of contemporary chroniclers, earning descriptions in the sources as truly "first-rate places". Through an exploration

of the historical, artistic, architectural, urban, social and economic contexts, this course will engage with and expand upon current understandings of this seminal period in Islamic history to examine Islam's encounters and modes of cultural exchange with Europe and the Mediterranean world.

Prerequisite: 1.0 FAH credit

Breadth Requirements: Creative and Cultural Representations (1)

FAH327H1 - Secular Art and Architecture of the Middle Ages

Hours: 24L

A consideration of art and architecture made for the court, the aristocracy, and other patrons outside the realm of the Christian church.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH215H1/ FAH215H5/ FAH216H1/ FAH216H5/ VPHB53H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH328H1 - Gothic Cathedral

Hours: 24L

An examination of the Gothic cathedral from its origins in Paris in the 1130's through its development and elaboration in France, England and Italy. This course also considers monumental decorations in painted glass, wall painting, tapestry and portal sculpture.

Prerequisite: 1.0 FAH credit

Exclusion: [FAH351H5](#)

Recommended Preparation: [FAH215H1/ FAH215H5/ FAH216H1/ FAH216H5/ VPHB53H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH330H1 - German Art and Architecture in the Age of Dürer

Hours: 24L

Albrecht Dürer and the painting and printmaking of his contemporaries. Consideration of the great Hall churches of Saxony and the altarpieces of Tilman Riemenschneider and his contemporaries; the status of the arts and attitudes towards Italian art, and the consequences of the Reformation for religious imagery.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH230H1/ FAH274H5/ VPHB74H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH331H1 - Netherlandish Renaissance Art and Culture

Hours: 24L

The Netherlands had become one of Europe's most fertile artistic cultures by the sixteenth century. Hieronymus Bosch and Pieter Bruegel are famous today for their paintings of Hell and peasant life. Other painters introduced mythological and erotic subject matter, while practitioners in the other arts were perhaps even more widely known. Netherlandish sculptors created the tombs of northern European rulers, defining their public identity in the communal space of church and chapel. Miniature carved altarpieces helped guide modes of private devotion and were widely imitated from Italy to Scandinavia. Netherlandish tapestries broadcast the heroic deeds of the Caesars and the patriarchs in the palaces of kings and high nobles as prototypes for their reigns. We will examine the rise of the Renaissance manner in northern Europe, the role of the religious arts, the ideology of urban culture, the consequences of the Reformation and iconoclasm, the functions of various species of portraiture, and the particular properties of different media, while dedicating much attention to Bosch and Bruegel. And we will concentrate on the sixteenth century, the era in which the Netherlands was closely linked to the rest of Europe, from Italy to Sweden, from England to Ukraine.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH230H1/ FAH274H5/ VPHB74H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH335H1 - The Art of Love in the Renaissance

Hours: 24L

Love is studied not only as a favorite theme of Renaissance art, but as the basis of some of its fundamental aesthetic claims. The question of love connects Renaissance art to important strains of philosophical thought and religious spirituality, as well as to some urgent realities of social life.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH230H1/ FAH274H5](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH337H1 - Rivalry, Imitation and Envy in Italian Renaissance Art

Hours: 24L

This course examines works in different art media, including painting, sculpture and prints, produced from 1400 to 1600, discussing how artistic practice of imitation and emulation stimulated the development of individual styles. In addition, this course addresses notions of disruptive rivalry, and the representation of slander and envy.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH230H1/ FAH274H5](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH338H1 - Art and Consumers in the Renaissance (1400-1700)

Hours: 24L

It has long been said that the material culture of the Renaissance generated the first stir of consumerism with a variety of artifacts produced from 1400 to 1700 in Italy. This course explores the material culture of Renaissance consumerism and discusses the production and function of works in different art media.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH230H1/ FAH231H1/ FAH274H5/ FAH279H5/ VPHB64H3/ VPHB74H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH340H1 - 17th-Century Art of the Netherlands

Hours: 24L

Concentration on the major painters of Holland's Golden Age, ca. 1580-ca. - 1700. Particular attention is paid to genre painting and the notion of "Dutch realism." Consideration of art within its social and political contexts. Notions of gender, of the historical past, of embodiment, and of contact with the non-western world will be discussed.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH230H1/ FAH231H1/ FAH274H5/ FAH279H5/ VPHB64H3/ VPHB74H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH341H1 - Venetian Renaissance Art and Architecture

Hours: 24L

Form and meaning, theory and practice of painting and architecture in Venice, ca. 1450-ca. 1600. Social, political and cultural contexts of making and viewing art, including works by Giorgione, Titian, Veronese, Tintoretto and Palladio.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH230H1/ FAH231H1/ FAH274H5/ FAH279H5/ VPHB64H3/ VPHB74H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH345H1 - The Romantic Movement in French Art

Hours: 24L

This course explores the painting, sculpture, and graphic arts of the Romantic era in France, from about 1820 to 1850. Major emphasis on Gericault, Delacroix, and Ingres in their artistic, cultural, and political context. Key topics in Romanticism, including Orientalism and gender, are also explored.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH245H1/ FAH287H5/ VPHB58H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH346H1 - Impressionism

Hours: 24L

The origin and development of Impressionism in France and Europe, 1860-1886, in its social, political and intellectual context. Painting, graphics and sculpture by Monet, Renoir, Degas, Pissarro, Sisley, Cassatt and Morisot.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH245H1/ FAH287H5/ VPHB58H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH347H1 - Cubism and Related Movements

Hours: 24L

An investigation of the birth and development of Cubism, Futurism and Orphism in Europe and North America.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH245H1/ FAH246H1/ FAH287H5/ FAH288H5/ VPHB58H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH348H1 - The Dada and Surrealist Tradition

Hours: 24L

The origins and development of the Dada and Surrealist movements in early 20th-century Western art, and their lasting impact on art after World War II. Painting, sculpture, graphic arts, and the theoretical preoccupation which accompanied artistic production.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH246H1/ FAH288H5/ VPHB58H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH349H1 - Abstraction in Twentieth-Century Art

Hours: 24L

The origins, development, and critical issues pertaining to abstract or non-figurative modes of art as manifested in painting, sculpture and other selected media up to the present time. Movements include European abstract art before World War II as well as post-war developments.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH246H1/ FAH288H5/ FAH289H5/ VPHB58H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH350H1 - Minimalism

Hours: 24L

An investigation of the different definitions and issues of minimal art including seriality, materials, process,

objecthood, chance, installation, reception, relations to music and film, and the influence of structuralism.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH246H1/ FAH288H5/ FAH289H5/ VPHB58H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH352H1 - 19th Century Photography

Hours: 24L

An introduction to the major artists, movements, and debates in photography in Europe and North America, from its prehistory to the turn of the century. Issues considered include the relationship of social class to aesthetics, the role of illusion, the rise of mass reproduction.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH245H1/ FAH287H5/ VPHB58H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH353H1 - On Display: Cultures of Exhibition, 1789-1900

Hours: 24L

Examination of the historical development of the cultures of exhibition in Nineteenth-Century Europe, and the diversity of venues displaying works of art and nature. Historical and theoretical overview is complemented by case studies which include investigations of private cabinets of curiosity, encyclopedic museums, commercial galleries, side-shows, and world's fairs.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH245H1/ FAH252H1/ FAH287H5/ FAH291H5](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH354H1 - Art in Canada Since the 1960s

Hours: 24L

An examination of the visual arts in Canada from the 1960's to the present. A large and diverse range of media, practices, artists, and theoretical contexts will be examined. Emphasis is placed on work that can be seen in the original.

Prerequisite: 1.0 FAH credit

Breadth Requirements: Creative and Cultural Representations (1)

FAH355H1 - Landscape to EcoArt

Hours: 24L

Ecological art is a focus in contemporary global art. We examine ecoart's antecedents in the landscape genre and Earth Art and the diverse theoretical and disciplinary perspectives that inform our understanding of these movements. Artists include Burtynsky, Eliasson, Long, Mendieta, Netco, Smithson, Turrell. Readings include Deleuze, Heidegger, Latour.

Prerequisite: 1.0 FAH credit

Breadth Requirements: Creative and Cultural Representations (1)

FAH360H1 - World of the Senses: Chinese Decorative Arts

Hours: 24L

This course surveys late imperial Chinese decorative arts from the Song (960-1127) through Qing (1644-1911) dynasties. It focuses on ceramics/porcelain, textiles, and furniture, attending especially to works in Toronto collections. Students will read primary and secondary sources to learn how decorative arts shaped daily life in imperial China.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH260H1/ VPHB73H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH363H1 - The Mechanics of the Image in China

Hours: 24L

East Asian images differ from Western ones in material support, format, and technologies of image-making. This course probes how East Asian images -- painting on objects, handscrolls, prints, optical media, film, and new media -- work.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH260H1/ FAH262H1/ VPHB73H3/ VPHB77H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH364H1 - Visual South Asia

Hours: 24L

An overview of the visual culture (monuments to films) of South Asia from the Indus Valley Civilization (3500 BCE) to the contemporary. Focus on visual literacy, stylistic evolution, major concepts and the first-hand study of objects.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH260H1/ FAH262H1/ VPHB73H3/ VPHB77H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH370H1 - European Renaissance Architecture

Hours: 24L

Architecture and architectural theory ca. 1400 – ca. 1600.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH230H1/ FAH270H1/ FAH274H5/ VPHB74H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH371H1 - Architecture and Urbanism in Baroque Europe

Hours: 24L

Architecture studied through its various building types and in its urban context. Themes include architecture and power under Absolutism, and the rise of the modern city.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH231H1/ FAH270H1/ FAH279H5/ VPHB64H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH373H1 - Modern Architecture Since 1890

Hours: 24L

In-depth examination of the modern movement in architecture, with particular focus on European avant-gardes of the early twentieth century. Emphasis on close reading of buildings, architectural research methods, and writing skills.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH272H1/ FAH273H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH380H1 - Special Topics in Art History

Hours: 24L

The study of various aesthetic, cultural, social, political, and theoretical aspects of art and photography across the centuries.

Prerequisite: 1.0 FAH credit

Breadth Requirements: Creative and Cultural Representations (1)

FAH381H1 - Problems in Jewish Art

Hours: 24L

This course investigates the changing definition of Jewish art and the status of Jewish artists. Other issues explored include Jewish-Christian visual polemics, the construction of individual and communal Jewish identity through art, architecture, and texts, and the conceptual transformation of Jewish craft and ritual objects into art.

Prerequisite: 1.0 FAH credit

Recommended Preparation: [FAH102H1](#), 0.5 FAH credit at the 200 level

Breadth Requirements: Creative and Cultural Representations (1)

FAH382H1 - Art Writing

Hours: 12L/12P

Study and practice in the variety of writing genres and styles associated with art history and contemporary criticism. Students will develop skills in writing for museum exhibitions and publications, reviews and criticism, academic analysis, and writing for popular print and media. Regular and frequent writing assignments. Recommended for FAH majors and specialists.

Prerequisite: 1.0 FAH credit

Exclusion: [VPHC54H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH388H1 - Art History Theories and Practices

Hours: 24L

Investigates the development of art and architectural history as an academic discipline and method of analysis including discussion of varied approaches such as formalism, connoisseurship, post-colonialism, feminism, queer studies, psychoanalysis, and material studies. The course explores the relationship of art history to other disciplines including archaeology, literary criticism, film studies, and anthropology. Suggested for all Specialists and students considering graduate study in art history.

Prerequisite: 2.0 FAH credits

Exclusion: FAH388H5

Breadth Requirements: Creative and Cultural Representations (1)

FAH390Y0 - Studies Abroad in Spanish Art and Architecture

Hours: 24L

Through site visits and local resources, this course looks at the history of Spanish art and architecture, including the various work created by the diverse religious and political groups of the Iberian peninsula. The specific focus of the course may vary from year to year.

Prerequisite: 1.0 FAH credit

Breadth Requirements: Creative and Cultural Representations (1)

FAH391Y0 - Studies Abroad in Ancient Art and Architecture

Studies Abroad in Ancient Art and Architecture. Not eligible for CR/NCR option.

Prerequisite: 1.0 FAH credit

FAH398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

Prerequisite: 1.0 FAH credit

FAH398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

FAH399H1 - Research Opportunity Program

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

Prerequisite: 1.0 FAH credit

FAH399Y1 - Research Opportunity Program

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

Prerequisite: 1.0 FAH credit

FAH401H1 - Aegean Wall Paintings

Hours: 24S

Investigation of the wall-paintings of the Minoan, Cycladic and Mycenaean worlds in the second millennium BC: context, associations, viewing and historical interpretations.

Prerequisite: FAH206H1 and 1.0 FAH credit at the 300 level

Recommended Preparation: FAH303H1

Breadth Requirements: Creative and Cultural Representations (1)

FAH402H1 - Palaces of Minoan Crete

Previous Course Number: FAH423H1

Hours: 24L

Around 2000 BC, the island of Crete sees the emergence of what are arguably the earliest towns and states in European prehistory. At the heart of this new social order are the so-called 'palaces', massive architectural complexes usually interpreted as seats of administrative and political authority. However, fresh discoveries over the past two decades, coupled recently with radical new interpretations, require a fundamental rethinking of the nature of the palaces and their role in Minoan society. This course will provide students with an active opportunity to learn about the latest developments in Minoan art, architecture, and archaeology.

Prerequisite: FAH206H1 and 1.0 FAH credit at the 300 level

Exclusion: FAH423H1

Recommended Preparation: FAH303H1

Breadth Requirements: Creative and Cultural Representations (1)

FAH405H1 - Understanding Dionysos: The God of Wine, Theatre and the Afterlife

Hours: 24S

The Greek god Dionysos presents a multifaceted entry point into exploring Ancient Greek art, culture, religion and history. This course is a comprehensive exploration of the figure of Dionysos, from his obscure pre-historic beginnings of foreign origin, to his transformation into other post-classical entities, spanning Christianity to Buddhism. A substantial part of the course deals with his representations in Greek art, and the god's relationship to

the Greeks as the governing figure of many important facets of their lives: drinking practices, sexuality, the performative arts, and the transition into the afterlife through the notion of eternal bliss. The course reading draws on art historical literature, as well as primary sources, and theoretical texts regarding religion and cultural practices.

Prerequisite: [FAH307H1/ FAH310H1/ FAH311H1/ FAH312H1/ FAH313H1/ FAH314H1](#), and an additional 0.5 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH406H1 - Cross-Cultural Issues in Ancient Art Beyond Greece and Rome

Hours: 24S

When cultures collide, they assimilate, they exchange, they transform, and they develop, and there seems to be a pattern of recognizable centres of power around which artistic tradition often revolves. This has caused the conventional understanding of certain flowering of artistic heritage as a product of cross-cultural influences. This course is a seminar style survey that explores these fascinating amalgams of artistic traditions that lie at the Eastern outskirts of the Hellenistic world throughout the Roman Period, from Bactria to India, and with a heavy focus on the Buddhist art of Gandhara, reaching out along the Silk Road. As the title suggests, the class aims at a renewed framework that re-evaluates the role of the Ancient West, which has been absent since the heavily Eurocentric scholarship from the early 20th century. It also aims to familiarize students with current theoretical issues surrounding cross-cultural studies as it pertains to the visual arts, touching upon modern postcolonial theories of space.

Prerequisite: [FAH307H1/ FAH310H1/ FAH311H1/ FAH312H1/ FAH313H1/ FAH314H1](#), and an additional 0.5 FAH credit at the 300-level

Recommended Preparation: [FAH311H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH407H1 - Studies in Roman Painting and Sculpture

Hours: 24S

Issues explored might cover Republican and Imperial painting; its Hellenistic sources and parallel media (mosaic, relief). The four distinctive genres of Roman sculptural production: the portrait, the historical relief, sarcophagi, and replicas of famous Greek sculptures. Styles, themes and modes of display in cultural context.

Prerequisite: [FAH205H5/ FAH207H1](#), and an additional 1.0 FAH credit at the 300-level

Recommended Preparation: [FAH307H1/ FAH309H1/ FAH314H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH415H1 - History of Islamic Cairo

Hours: 24S

This seminar explores the architectural and urban development of Islamic Cairo (al-Qahira) between the 7th and 16th centuries. As a nexus of both the Islamic empire and the Mediterranean world, Cairo provides an opportunity to explore a major Islamic Medieval city. Modern day Cairo emerged first as a provincial capital (al-Fustat and later al-Qata'a) in the 7th and 8th century and later morphed into a capital under successive dynasties from the 9th to the 16th century. Exploring Cairo throughout this critical historical period, one of both relative stability and upheaval during the post-conquest period to the Crusades, allows for a better understanding of the reciprocity between architecture and urbanism on the one hand and broader political shifts on the other. A central organizing theme of this course is Cairo's position as a place of multiplicity and confessional diversity, embedded within networks of cultural and economic exchange. Other themes explored include the role played by ceremonies and processions on urban form and the development of public space as well as the development of various religious, charitable, military and educational institutions and their impact upon shaping the city.

Prerequisite: 1.0 FAH credit at the 300 level

Recommended Preparation: [FAH265H1/ FAH326H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH420H1 - Studies in Western Medieval Art and Architecture

Hours: 24S

In-depth examination of monuments and issues in the art and architecture of Western Europe from the sixth to the fifteenth century.

Prerequisite: [FAH215H1/ FAH215H5/ FAH216H1/ FAH216H5/ FAH265H1/ VPHB53H3](#), and an additional 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH421H1 - Studies in Medieval Cities

Hours: 24S

A focused examination of urbanism, art and architecture of a specific medieval city, such as Jerusalem, Rome, Constantinople, or Paris.

Prerequisite: [FAH215H1/ FAH216H1/ FAH265H1/ FAH285H5/ VPHB53H3](#), and 1.0 FAH credit at the 300 level

Recommended Preparation: [FAH327H1/ FAH328H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH424H1 - Studies in Medieval Book Illumination

Hours: 24S

A consideration of individual types of books, their decoration, function, and cultural context. Topics might include, for example, Gospels, Psalters, or Books of Hours.

Prerequisite: [FAH215H1/ FAH215H5/ FAH216H1/ FAH216H5/ FAH265H1/ VPHB53H3](#), and an additional 1.0 FAH credit at the 300-level

Recommended Preparation: [FAH319H1/ SMC358H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

FAH430H1 - Pieter Bruegel

Hours: 24S

The study of Pieter Bruegel's works in the context of Netherlandish culture. Emphasis on secular works.

Prerequisite: [FAH331H1](#)

Recommended Preparation: Reading knowledge of French or German

Breadth Requirements: Creative and Cultural Representations (1)

FAH433H1 - Leonardo and His Legacy in Renaissance Italy

Hours: 24S

This seminar examines major critical developments in the interpretation of High Renaissance art in Italy by looking at key works produced by Leonardo, his contemporaries, and followers (1470-1530).

Prerequisite: [FAH230H1/ FAH274H5](#), and 1.0 FAH credit at the 300 level

Breadth Requirements: Creative and Cultural Representations (1)

FAH434H1 - The First Art Historians

Hours: 24S

In Vasari's *Lives of the Artists* and their "after-lives," painters and humanists explored questions of word and image, art and life, biography and history, the psychology of style, the economics and politics of art and the languages of art. How and why did art history originate?

Prerequisite: [FAH230H1/ FAH231H1/ FAH274H5/ FAH279H5/ VPHB64H3/ VPHB74H3](#), and 1.0 FAH credit at the 300 level

Breadth Requirements: Creative and Cultural Representations (1)

FAH436H1 - Italian Renaissance Art, Fashion, and Material Culture

Hours: 24S

This seminar explores fashion in the visual and material culture of Renaissance Italy. It focuses on the discourse of fashion as represented by Renaissance artists in their works and as treated in contemporary texts. It further examines the multiple meanings of dress in the courts of Renaissance Italy.

Prerequisite: [FAH230H1/ FAH231H1/ FAH274H5/ FAH279H5/ VPHB64H3/ VPHB74H3](#), and 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH438H1 - History of Bad Art from Gothic to Kitsch

Hours: 24S

"Bad" art is a critical category that shadows and defines "good" art. How has the art of invective shaped the histories of art by applying ethical, psychological and anthropological values to the world of art? Topics include blasphemy, decadence, senility, the "other" and anti-social behaviors. Special attention will be given to such prejudicial period styles as Gothic, Mannerism, Baroque and Rococo, and to such artistic movements as the Macchiaioli, neo-Kitsch, Dada, Automatism and Degenerate Art. Readings range from Seneca and Vitruvius to Walter Benjamin and Clement Greenberg.

Case studies of artists range from Caravaggio to Odd Nerdrum.

Prerequisite: 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH439H1 - Studies in Renaissance and Baroque Art and Material Culture

Hours: 24L

Focused examinations of themes and methods in the study of Renaissance and Baroque visual arts and material culture.

Prerequisite: [FAH230H1](#)/ [FAH231H1](#)/ [FAH274H5](#)/ [FAH279H5](#)/ [VPHB64H3](#)/ [VPHB74H3](#), and 1.0 FAH credit at the 300+ level

Breadth Requirements: Creative and Cultural Representations (1)

ARH440H1 - Photogrammetry and 3D Analysis of Material Culture

Hours: 12L/12P/12S

With the increasing availability of powerful computers and software, 3D modeling and recording has become commonplace in archaeology, architectural history, museum studies, and other areas of cultural heritage research. In this course, students will learn about a powerful new method for 3D recording known as photogrammetry. After a series of tutorials, they will gain firsthand experience creating their own models of various subjects, such as historical architecture and public art in Toronto, and museum objects on campus. They will also learn how to analyze and present 3D content, while thinking critically about the impact of how digital tools are currently being employed by and shaping the agendas of researchers in archaeology, art history, and related fields.

Prerequisite: 1.0 credit in ANT/ ARH/ FAH courses at the 300+ level

Exclusion: [ARH482H1](#) (Special Topics in Archaeology: 3D Modeling and Archaeological Analysis), offered in Fall 2019 and Fall 2021

Recommended Preparation: Previous experience with photography or imaging software will be helpful but is not required

Breadth Requirements: Creative and Cultural Representations (1)

FAH440H1 - Dutch Genre Painting of the 17th Century

Hours: 24S

Study of so-called “scenes of everyday life.” Special attention given to cultural context and problems of constructions of gender and gendered relationships, of social and economic interests, of class conflict, of the relationship with broader European culture. Considerable attention will be paid to the work of Jan Vermeer.

Prerequisite: [FAH340H1](#)

Recommended Preparation: Reading knowledge of French or German

Breadth Requirements: Creative and Cultural Representations (1)

FAH446H1 - Arctic Anthropocene? Image Cultures of Arctic Voyaging

Hours: 24S

‘Arctic Anthropocene’ examines the extensive visual culture of voyages in the Arctic in the long 19th century. We will probe both Western and Inuit perspectives on the search for the Northwest Passage, whaling, and scientific understandings of the exotic meteorological, human, and animal phenomena of this region through its complex image culture. To underscore ecological understandings of the Arctic in the 19th century and today, we will frame our investigation of the visual culture of this place and time with an interrogation of the notion of the ‘Anthropocene.’

Prerequisite: [FAH352H1](#)/ [FAH353H1](#)/ [FAH354H1](#)/ [FAH355H1](#), and an additional 0.5 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH447H1 - 19th-Century Landscape Painting

Hours: 24S

Investigation of English, French, German and Swiss landscape painting from the birth of the Romantic movement to Post-Impressionism.

Prerequisite: [FAH245H1](#)/ [FAH287H5](#)/ [VPHB58H3](#), and 1.0 FAH credit at the 300-level

Recommended Preparation: Reading knowledge of French or German

Breadth Requirements: Creative and Cultural Representations (1)

FAH448H1 - International Art Since 1940

Hours: 24S

Developments in the mainstream of Western painting and sculpture since World War II with special emphasis upon interrelations between Europe and North America.

Prerequisite: FAH246H1/ FAH289H5/ VPHB59H3, and an additional 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH449H1 - Contemporary Art Movements

Hours: 24S

Selected aspects of the complex array of international contemporary art movements, their artists, objects, and critical discourses. Potential issues include the theoretical, philosophical, and political concerns addressed by given artworks and artists; the role of art journals, the private patron, and museum display.

Prerequisite: FAH246H1/ FAH289H5/ VPHB59H3, and 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH451H1 - Studies in Black Art

Hours: 24S

This Seminar explores the work of Black artists from across the African Diaspora, attending to questions such as formal innovation, sociopolitical and historical context, and methodological problems for art historical research.

Prerequisite: FAH101H1/ FAH102H1, and an additional 0.5 FAH credit at the 300-level

Recommended Preparation: FAH351H1

Breadth Requirements: Creative and Cultural Representations (1)

FAH452H1 - Contemporary Indigenous Art in Canada and the United States

Hours: 24S

This course focuses on Indigenous artists working both within and outside of contemporary art spaces in Canada

and the United States, through a study of key exhibitions and movements in the Indigenous arts community from 1984 to the present. From the Columbus Quincentennial in 1992 and its echoes in the "Canada 150" celebrations, to artists working from the front lines of land protection movements, we will explore ideas of nationalism, inclusion, intervention, and 'decolonization' of the gallery.

Prerequisite: 1.0 FAH credit at the 300-level

Recommended Preparation: FAH255H1 or other course work focusing on contemporary art and/or Indigenous topics

Breadth Requirements: Creative and Cultural Representations (1)

FAH457H1 - Issues in Canadian Art, ca. 1900-1940

Hours: 24S

Focused, thematic examinations of the visual arts in Canada in the first half of the twentieth century.

Prerequisite: FAH248H1/ FAH292H5, and an additional 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH458H1 - Issues in Recent Canadian Art

Hours: 24S

Focused, thematic examinations of the visual arts in Canada from c. 1960 to the present.

Prerequisite: FAH354H1 and an additional 0.5 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH461H1 - East Asian Art as a Cultural System

Hours: 24S

Methodologically-focused seminar engaged with recovering and articulating in Western terms indigenous ways of seeing and thinking about East Asian art.

Prerequisite: FAH260H1/ FAH262H1/ VPHB73H3/ VPHB77H3, and an additional 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH463H1 - Materiality, Objecthood, Connoisseurship and Collecting in the Arts of East Asia

Hours: 24S

Seminar based on firsthand examination of East Asian objects in Toronto collections that attends to the historical processes by which such objects were valued and collected.

Prerequisite: FAH260H1/ FAH262H1/ VPHB73H3/ VPHB77H3, and an additional 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH464H1 - Transregional East Asian Art

Hours: 24S

In-depth examination of the play of East Asian Art within and beyond East Asia.

Prerequisite: FAH260H1/ FAH262H1/ VPHB73H3/ VPHB77H3, and an additional 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH465H1 - Exhibiting China

Hours: 24S

This seminar teaches students the skills required to curate an exhibition of Chinese materials. Working firsthand with objects of Chinese art and visual culture in local Toronto collections, students learn to document the object, assess authenticity, write object labels, panel texts, and catalogue essays. Students will thus prepare an exhibition, actual or virtual, of Chinese objects in local collections.

Prerequisite: FAH260H1/ FAH262H1/ VPHB73H3/ VPHB77H3, and an additional 1.0 FAH credit at the 300-level

Recommended Preparation: Two additional courses in Chinese/East Asian art

Breadth Requirements: Creative and Cultural Representations (1)

FAH470H1 - Studies in Renaissance and Baroque Architecture

Hours: 24S

An in-depth study of themes and problems in architecture in Renaissance and Baroque Europe.

Prerequisite: FAH370H1/ FAH371H1, and an additional 0.5 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH472H1 - Studies in Modern Architecture

Hours: 24S

Focused examination of themes and methods in the history of architecture since 1750.

Prerequisite: FAH270H1/ FAH272H1/ FAH273H1, and 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH473H1 - Studies in Canadian Architecture and Landscapes

Hours: 24S

An in-depth study of themes in the history of architecture and landscape in Canada.

Prerequisite: FAH273H1 and an additional 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH480H1 - Special Topics in the History of Art and Architecture

Previous Course Number: FAH489H1

Hours: 24L

Focused examination of special topics in the art and architecture of any period in the Mediterranean, Europe, North America, Asia, or other global regions.

Prerequisite: 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH481H1 - Internship

Hours: 24S

The internship is designed to offer hands-on experience pertaining to the study, exhibition, and care of works of art, focused on the collections and activities of the University Art Centre, an auction house, a public museum, or a private gallery. Students must provide proof of their acceptance as an intern by the Art Centre/auction house/museum/gallery in order to be enrolled in the course. This course is Pass/Fail. Not eligible for CR/NCR option.

Prerequisite: 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH481Y1 - Internship

Hours: 48S

The internship is designed to offer hands-on experience pertaining to the study, exhibition, and care of works of art, focused on the collections and activities of the University Art Centre, an auction house, a public museum, or a private gallery. Students must provide proof of their acceptance as an intern by the Art Centre/auction house/museum/gallery in order to be enrolled in the course. This course is Pass/Fail. Not eligible for CR/NCR option.

Prerequisite: 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH483H1 - Introduction to Conservation: Materials, Deterioration, and Preservation in Art and Material Culture

Hours: 24S

An introduction to conservation, designed to give students a basic understanding of the field, its techniques, and its purposes. Sessions conducted by specialists in the Royal Ontario Museum conservation department.

Prerequisite: 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH484H1 - Fashion & Textiles: Culture & Consumption

Hours: 24S

This course examines the history, meaning and consumption of Western European fashion (18th - 21st centuries). Analysis and research will combine student seminars with the study of actual artefacts in the Textile & Costume Collection of the Royal Ontario Museum.

Prerequisite: 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH485H1 - Collecting Canada: Canadian Pictorial Arts Collection at the Royal Ontario Museum

Hours: 24S

Theoretical and practical engagement with the ROM's Canadian paintings, prints and drawing collections (18th-20th C). Through lectures, workshops, and seminars, we consider the collecting, interpretation, and display of images within the framework of "documentary art" and its various connotations.

Prerequisite: 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH486H1 - Case Studies at the Royal Ontario Museum

Hours: 24S

In-depth investigation of objects at the Royal Ontario Museum. Content will vary according to the museum department offering the course in any given semester.

Prerequisite: 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH487H1 - Introduction to Asian Textiles

Hours: 24S

Introduction to the diverse textile traditions of Asia and the diverse means for interpreting them, with a concentration on core production areas, select regional traditions and

connecting forces. Includes first-hand study of objects in ROM collections and galleries and possible guest lectures.

Prerequisite: 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH488H1 - Considering Sustainable Textiles and Fashions in the Age of Climate Crisis

Hours: 24S

This seminar looks at historic and contemporary global thinking about the production and consumption of textiles and fashions within the current climate change crisis, and over-production due to fast fashion. We question the notion of "in" and "out" of Western seasonal style and look at historic models to understand new economies of scale and value, issues of labour and natural resources. Through lectures, workshops, and seminars, the class will consider how to harness past models to attain the future of textiles and fashion and the context surrounding the 3 R's, reduce, reuse and recycle.

Prerequisite: 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH490H1 - Introduction to the Textile Arts of the Indian Ocean World

Hours: 24S

The Indian Ocean has been called the Cradle of Globalization. For thousands of years monsoon winds linked the people and arts of this vast Ocean that stretches from East Africa in the West to Indonesia (and beyond) in the East. Throughout its long history, handwoven textiles have been amongst the area's greatest art forms, trade goods, religious objects and markers of identity. This course will survey the wide variety of these forms, from c. 1100 to 1950. Special attention is placed on India, which lies at the center of the region, and originated many of the fibres, techniques, design and iconography of the wider area. Select regional manifestations are then examined in depth, using the ROM's extensive collections. These range from the silks of Madagascar, to embroidered men's wear of Oman, to the cosmopolitan batiks of northern coastal Java. It is seen that all these traditions can best be understood within the framework of the wider Indian Ocean region.

Prerequisite: 1.0 FAH credit at the 300-level

Recommended Preparation: Asian art, Islamic art, or

anthropology

Breadth Requirements: Creative and Cultural Representations (1)

FAH494H1 - Independent Studies

Eligible students may undertake an independent study course under the supervision of Department of Art History (St. George campus) faculty member. Refer to the Art History website for further information and application instructions. Not eligible for CR/NCR option.

Prerequisite: 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

FAH494Y1 - Independent Studies

Eligible students may undertake an independent study course under the supervision of a Department of Art History (St. George campus) faculty member. Refer to the Art History website for detailed information and application instructions. Not eligible for CR/NCR option.

Prerequisite: 1.0 FAH credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

ASIP (Arts & Science Internship Program)

Introduction

Arts & Science Internship Program

255 Beverley Street, 3rd floor.
asip@utoronto.ca

The Arts & Science Internship Program (ASIP) is a professional work-integrated learning program for Faculty of Arts & Science students enrolled in specific programs of study. Students enrolled in the ASIP stream of their program of study complete mandatory Professional Development programming plus a minimum of 12 and maximum of 20 months of paid, full-time, academically related work experience. The time to degree completion for students enrolled in ASIP is normally 5 years. ASIP is administered by the Faculty of Arts & Science's Experiential Learning & Outreach Support (ELOS) Office.

The ASIP stream of each program is limited enrolment. Students will typically be admitted to the ASIP stream of their program for the Fall term of Year 2 of study; however, in exceptional circumstances, students, including transfer students, who enrolled in an eligible program in the Summer after Year 2, may be admitted to the ASIP stream of their program for the Fall of Year 3. Acceptance into an ASIP stream in Year 3 is dependent on space and requires approval of the student's academic unit and the Faculty of Arts & Science Experiential Learning & Outreach Support (ELOS) Office. Please refer to the ASIP Eligibility page for further details.

The mandatory Professional Development programming will help students prepare for their work opportunities and maximize their learning while on their work terms. It will consist of 4 zero credit weight courses taken over 4 academic terms (Year 2 entry) or 2 academic terms (Year 3 entry). The completion of these courses is mandatory for the ASIP stream of each program, in addition to the regular academic requirements of the program.

The work experience component will consist of 12-20 months of paid, full-time work in the private, not-for-profit, and/or public sectors. For students enrolling in the ASIP stream of their program for the Fall term of Year 2, the first, 4-month work term will take place in the summer between Year 2 and 3, followed by a longer 8, 12 or 16-month work term following the completion of Year 3. Students enrolling in the ASIP stream of their program for the Fall term of Year 3 will complete 12 or 16 months of

work experience after Year 3 over one or two work terms. Students completing all mandatory Professional Development requirements and a minimum of 12 months of work experience will graduate with the ASIP stream acknowledged on their transcript.

Students will be provided a wide range of professional development supports as they progress through the ASIP stream of their program, including workplace readiness and job search coaching, access to a dedicated co-op/internship job board, professional skill development training, access to Employer Relations and Student Development staff, industry information sessions, resources to support students facing barriers to employability, and community-building events. Acceptance into the ASIP stream of a program does not guarantee a student's employment in each work term.

There are additional ancillary fees to participate in the ASIP stream. Fees are paid over a series of six installments, paid as ancillary fees which will be assessed on each Professional Development course, while the final two payments will be assessed on the first two work terms between Year 3 and Year 5. Refer to the mandatory Fees section below for further details.

Eligible Programs

Department of Computer Science:

- Data Science Specialist (ASSPE1687; joint program with Department of Statistical Sciences)
- Computer Science Specialist (ASSPE1689)
- Computer Science Major (ASMAJ1689)

Department of Statistical Sciences:

- Data Science Specialist (ASSPE1687; joint program with Department of Computer Science)
- Specialist in Statistical Science: Methods & Practice (ASSPE2270)
- Specialist in Statistical Science: Theory & Methods (ASSPE2290)

Department of Mathematics:

- Mathematics Specialist (ASSPE1165)
- Applied Mathematics Specialist (ASSPE2053)
- Mathematics & Physics Specialist (ASSPE0397; joint program with Department of Physics)
- Mathematics & Philosophy Specialist (ASSPE1361; joint program with Department of Philosophy)
- Mathematical Applications in Economics & Finance Specialist (ASSPE1700)
- Mathematics & its Applications Specialist (ASSPE1758, ASSPE1890; ASSPE1580)
- Mathematics Major (ASMAJ1165)

Department of Pharmacology & Toxicology:

- Joint Pharmacology and Biomedical Toxicology Specialist (ASSPE2340)
- Biomedical Toxicology Specialist (ASSPE2573)
- Pharmacology Specialist (ASSPE2082)
- Environment & Toxicology Specialist (ASSPE0605)

Department of Chemistry:

- Pharmaceutical Chemistry Specialist (ASSPE1211)
- Chemistry Specialist (ASSPE1376)
- Biological Chemistry Specialist (ASSPE1995)
- Materials Science Specialist (ASSPE2424)
- Chemical Physics Specialist (ASSPE0600)
- Synthetic & Catalytic Chemistry Specialist (ASSPE1377)

Centre for Industrial Relations & Human Resources:

- Industrial Relations & Human Resources Specialist (ASSPE1536)
- Industrial Relations & Human Resources Major (ASMAJ1536)

University of St. Michael's College:

- Book & Media Studies Major (ASMAJ1300)

Department of Cell & Systems Biology:

- Cell & Molecular Biology Major (ASMAJ1003)
- Genome Biology Major (ASMAJ2655)
- Animal Physiology Major (ASMAJ1538)
- Cell & Molecular Biology Specialist (ASSPE1003)
- Bioinformatics & Computational Biology Specialist (ASSPE1868)

Department of Economics:

- Economics Major (ASMAJ1478)
- Economics Specialist (ASSPE1478)
- Financial Economics Specialist (ASSPE2722)
- Economics & Mathematics Specialist (ASSPE2599)

School of the Environment:

- Environmental Science Major (ASMAJ1076)
- Environmental Studies Major (ASMAJ1254)
- Environment & Health Specialist (ASSPE0365)
- Environment & Health Major (ASMAJ0365)
- Environmental Ethics Major (ASMAJ1107)

- Environment and Toxicology Specialist (ASSPE0605; joint program with Department of Pharmacology & Toxicology)

Department of History:

- History Specialist (ASSPE0652)
- History Major (ASMAJ0652)

Human Biology:

- Health & Disease Specialist (ASSPE2013)
- Neuroscience Specialist (ASSPE1472)
- Fundamental Genetics & its Applications Specialist (ASSPE1050)
- Global Health Specialist (ASSPE2575)

Department of Laboratory Medicine & Pathobiology:

- Pathobiology Specialist (ASSPE2025)

Department of Physics:

- Biological Physics Specialist: Advanced Physics Stream (ASSPE2739)
- Biological Physics Specialist: Biochemistry Stream (ASSPE2737)
- Biological Physics Specialist: Immunology Stream (ASSPE2740)
- Biological Physics Specialist: Physiology Stream (ASSPE2738)
- Physics Specialist (ASSPE1944)
- Physics Major (ASMAJ1944)

Department of Political Science:

- Political Science Specialist (ASSPE2015)
- Political Science Major (ASMAJ2015)

Department of Psychology:

- Psychology Major (ASMAJ1160)
- Psychology Specialist (ASSPE1160)

Department of Sociology:

- Sociology Specialist (ASSPE1013)
- Sociology Major (ASMAJ1013)

Department for the Study of Religion:

- Religion Major (ASMAJ0151)
- Religion Specialist (ASSPE0151)

Student Eligibility

Students will apply to the ASIP stream of their program in the spring term after Year 1 (for Year-2 entry) or Year 2 (for Year 3 entry). To be eligible for admission to ASIP, students must meet the following core requirements:

- Be enrolled in an academic program that is participating in ASIP.
- **Year 2 Entry:** Entering Year 2 (4.0-8.5 credits completed) as a full-time student in the upcoming Fall/Winter session. Year 2 students who exceed the 8.5 credit limit due to transfer credits (whether from secondary school or postsecondary studies), with up to 10 credits at the time of entry, will also be considered.
- **Year 3 Entry:** Full-time students entering Year 3 (up to 13.5 credits completed) in the upcoming Fall/Winter session, and who enrolled in an eligible program in the summer after Year 2, may also be considered. Year 3 entry to ASIP, however, will be dependent on space and will require approval of both the student's academic unit and the Experiential Learning & Outreach Support (ELOS) office. Refer to Year 3 Entry Eligibility for further details.
- Be in good academic standing or on probation at the time of application and must remain in good academic standing or on probation to continue in ASIP and apply for a work term.
- Be returning to full-time studies after completion of all work term requirements. Students returning for only one term must be enrolled in at least 1.5 credits in that term.
- Not currently part of another co-op program at the University of Toronto.
- Both domestic and international students from eligible programs may participate. All international students require a valid work permit to participate in a work term. The International Student Immigration Advisors at the Centre for International Experience (CIE) can provide guidance and support for those that require it. Students are encouraged to apply for any required work permit as soon as possible after being admitted to the ASIP stream of their program.
- Students with part-time status may be considered for the program if they have received accommodation from the University. Examples of accommodation include, but are not limited to, being registered with Accessibility Services. Students with accommodation needs should first contact asip@utoronto.ca.

Student Selection and Enrolment

The ASIP stream of each program is limited enrolment. All students who meet the eligibility requirements stated above, and who submit a completed ASIP application

package, will be considered for admission.

The ASIP program's mission is to help students prepare for professional life through work-integrated learning. We strive to provide inclusive services that enable all students to thrive and succeed in the program, including those from equity-deserving groups. We encourage all interested students to apply to the program.

Holistic admissions criteria will form the basis for admission, with the following criteria being considered:

- demonstrated leadership, communication, teamwork, and community-building qualities
- evidence of motivation to learn and develop
- resilience and ability to overcome challenges
- sense of self and sense of responsibility, ability to learn from mistakes

The application package will consist of the student's resume and responses to a series of non-cognitive questions exploring the above qualities. Further details about applying to ASIP and program requirements can be found here.

Program Details

Students will typically be admitted to the ASIP stream of their program for the Fall term of Year 2 of study. However, in exceptional circumstances students, including transfer students, who enrolled in an eligible program in the Summer after Year 2, can be admitted to the ASIP stream for the Fall term of Year 3. Acceptance into an ASIP stream in Year 3 is dependent on space and requires approval of the student's academic unit and the Faculty of Arts & Science Experiential Learning & Outreach Support (ELOS) Office. Refer to the eligibility page for further details. Enrolment is limited and requires a supplemental application.

The work experience component will consist of 12 to 20 months of paid, full-time work in the private, not-for-profit, and/or public sectors. To help students prepare for their work opportunities and maximize their learning while on their work terms, students will also complete mandatory professional development training.

Students completing all mandatory professional development requirements and a minimum of 12 months of work experience will graduate from the ASIP stream of their program. This will be identified on their transcript with the notation "A&S Internship Program".

Completion Requirements

Year 2 Entry

- Second Year: PDC220H1, PDC221H1, and INT200H1 (optional)

- Third Year: PDC320H1, PDC321H1, and INT300H1 (optional)
- Fourth Year: INT300H1 (mandatory if not previously completed), INT400H1, INT450H1 (mandatory if INT200H1 not previously completed), INT470H1 (optional)

Year 3 Entry

- Third Year: PDC230H1, PDC231H1, PDC330H1, PDC331H1, INT301H1 (optional)
- Fourth Year: INT301H1 (mandatory if not previously completed), INT401H1, INT451H1, INT471H1 (optional)

Students must abide by the following guidelines and restrictions:

- **Year 2 Entry:** Students can complete one short (4-month) work term and one work term of 8, 12 or 16 months with two separate employers; or one long immersive work term with one employer to a maximum of 16 months.
- **Year 3 Entry:** Students can complete one short (4-month) work term and one work term of 8 or 12 months with two separate employers; or one long immersive work term to a maximum of 16 months with one employer.
- Students must return to full-time study after their final work term. Students returning for only one term must be enrolled in at least 1.5 credits in that term.
- Students will only be allowed to complete a 4-month work term in the summer term.
- Students will not be able to compete for additional jobs through the ASIP job board after 12 months of work experience has been completed.
- Students will be able to compete for a maximum of two work term opportunities through the ASIP job board.
- New work terms will begin in the Summer or Fall terms only.

Students are not normally eligible to enrol in courses while participating in their work terms. Students who wish to take courses must request the approval of their employer and the ELOS office, and approval may be granted for no more than one 0.5 credit course for each of the Fall term, Winter term, or Summer session.

Students will be considered full-time students while completing their work terms. The expectation is that all students joining ASIP in Year 2 will attempt to secure a 4-month work term in the summer between Year 2 and Year 3. Students who are unsuccessful in securing a work term will still be able to remain in the program and compete for work terms in the year between Year 3 and Year 5. During the summer between Year 2 and Year 3, these students may choose to take additional courses to accelerate their time to graduation, or work in jobs that would not

otherwise be eligible for ASIP (i.e., part-time and/or unpaid).

Mandatory Professional Development Courses

Course Title	Year 2 Entry		Year 3 Entry	
A&S Internship Program: Maximizing Your Experience	PDC220H1	Fall Term, Year 2	PDC230H1	Fall Term, Year 3
A&S Internship Program: Essential Skills for ASIP Success	PDC221H1	Winter Term, Year 2	PDC231H1	Winter Term, Year 3
A&S Internship Program: Professional Skill Development I	PDC320H1	Fall Term, Year 3	PDC330H1	Fall Term, Year 3
A&S Internship Program: Professional Skill Development II	PDC321H1	Winter Term, Year 3	PDC331H1	Winter Term, Year 3

Work Terms

Students must complete a minimum of 12 months of work experience. Each 4-month work block will be coded as follows:

Year 2 Entry	Year 3 Entry
INT200H1: A&S Internship Program: Professional Work Term	
INT300H1: A&S Internship Program: Professional Work Term	INT301H1: A&S Internship Program: Professional Work Term
INT400H1: A&S Internship Program: Professional Work Term	INT401H1: A&S Internship Program: Professional Work Term
INT450H1: A&S Internship Program: Professional Work Term	INT451H1: A&S Internship Program: Professional Work Term
INT470H1: A&S Internship Program: Professional Work Term	INT471H1: A&S Internship Program: Professional Work Term

Mandatory Fees

There is a supplemental fee to participate in ASIP. The total cost to participate will be paid over six installments, which will be assessed on each Professional Development course, while the final two payments will be assessed on the first two work terms between Year 3 and Year 5. Refer to the chart below for the 2025-26 ancillary fees. There is no work term fee for the INT200H1 4-month

work term taken between Year 2 and 3 and students will not be required to pay the work term fee if they are unable to secure a work term. Year 3 entry students do not take the INT200H1 work term course.

ASIP students who secure a work term, either independently or through a posting on the University of Toronto Co-op Job Board, are required to register their work term. Upon registration, they will be enrolled in the appropriate INT work term course(s).

Failure to register a work term will result in retroactive registration and enrollment in the applicable INT work term course(s) upon discovery. Associated fees will be applied, and the student will receive an NCR notation on their transcript for the relevant INT work term course(s).

ASIP Courses

INT200H1 - Arts & Science Internship Program - Professional Work Term

Students participate in a full-time, paid, career-related work experience totalling at least 420 hours within a 4-month period. Students compete for employment within the public, not-for-profit, or for-profit sectors. Students will be enrolled into the course once hired for an ASIP work term and the work experience must be approved by the Experiential Learning & Outreach Support (ELOS) Office.

Student performance while on the work term will be monitored through a site visit and/or student and employer check-in. Students will be required to submit a learning plan at the start of each work term opportunity, reflective reports at regular intervals during the work period, a work term evaluation, and a final work term assignment (which may have different formats depending on the student's program). Employers will also be asked to submit a final evaluation of the student's progress and performance.

This course does not carry credit weight, is evaluated as Credit/No Credit, and no tuition fee is associated.

This course is only open to students admitted to the ASIP stream of their program of study for Year 2.

Prerequisite: [PDC221H1](#)

PDC220H1 - Arts & Science Internship Program - Maximizing Your Experience

This course is a mandatory component of the Arts & Science Internship Program (ASIP) for students admitted to the ASIP stream of their program for Year 2, and students admitted for Year 2 must successfully complete this course and receive a passing grade to gain access to

Ancillary fees will be linked to the following course codes to facilitate payment:

Year 2 Entry		Year 3 Entry	
Ancillary Fee	Course	Ancillary Fee	Course
\$500	PDC220H1	\$480	PDC230H1
\$500	PDC221H1	\$480	PDC231H1
\$500	PDC320H1	\$500	PDC330H1
\$500	PDC321H1	\$500	PDC331H1
\$0	INT200H1	N/A	N/A
\$1010	INT300H1	\$1010	INT301H1
\$1010	INT400H1	\$1010	INT401H1

the ASIP job board. The course will provide an opportunity for students to prepare for and maximize their learning and personal development through ASIP. Topics may include: self-assessment – skills, values, interests; building a career and co-op plan; skills articulation – how to identify, articulate and apply skills gained through courses and other life experiences; personal marketing documents; guided self-reflection on barriers to employment; resources and toolkits to support access for all; and co-op student panels.

This course does not carry credit weight and is evaluated as Credit/No Credit. No tuition fee is associated, however an ancillary fee will be assessed. Refer to the [ASIP Fees & Financial Aid website](#) for further details.

Students who enrolled in the ASIP stream of their program in Year 3 should enrol in [PDC230H1](#).

Exclusion: [PDC230H1](#)

PDC221H1 - Arts & Science Internship Program - Essential Skills for ASIP Success

This course is a mandatory component of the Arts & Science Internship Program (ASIP) for students admitted to the ASIP stream of their program for Year 2, and students admitted for Year 2 must successfully complete this course and receive a passing grade before starting their first work term. The course will help students prepare for their first work term and optimize their chances of success in the first recruitment cycle. Topics may include: ASIP guidelines and requirements, resume and cover letter tailoring, professionalism essentials, job search essentials, interview preparation, workplace rights, health and wellbeing while in ASIP, and accessibility and EDI considerations.

This course does not carry credit weight and is evaluated as Credit/No Credit. No tuition fee is associated, however

an ancillary fee will be assessed. Refer to the [ASIP Fees & Financial Aid website](#) for further details.

Students who enrolled in the ASIP stream of their program in Year 3 should enrol in [PDC231H1](#).

Prerequisite: [PDC220H1](#)

Exclusion: [PDC231H1](#)

PDC230H1 - Arts & Science Internship Program - Maximizing Your Experience

This course is a mandatory component of the Arts & Science Internship Program (ASIP) for students admitted to the ASIP stream of their program for Year 3, and students admitted for Year 3 must successfully complete this course and receive a passing grade to gain access to the ASIP job board. The course will provide an opportunity for students to prepare for and maximize their learning and personal development through ASIP. Topics may include: self-assessment – skills, values, interests; building a career and co-op plan; skills articulation – how to identify, articulate and apply skills gained through courses and other life experiences; personal marketing documents; guided self-reflection on barriers to employment; resources and toolkits to support access for all; and co-op student panels.

This course does not carry credit weight and is evaluated as Credit/No Credit. No tuition fee is associated, however an ancillary fee will be assessed. Refer to the [ASIP Fees & Financial Aid website](#) for further details.

Students who enrolled in the ASIP stream of their program in Year 2 should enrol in [PDC220H1](#).

Exclusion: [PDC220H1](#)

PDC231H1 - Arts & Science Internship Program - Essential Skills for ASIP Success

This course is a mandatory component of the Arts & Science Internship Program (ASIP) for students admitted to the ASIP stream of their program for Year 3, and students admitted for Year 3 must successfully complete this course and receive a passing grade before starting their first work term. The course will help students prepare for their first work term and optimize their chances of success in the first recruitment cycle. Topics may include: ASIP guidelines and requirements, resume and cover letter tailoring, professionalism essentials, job search essentials, interview preparation, workplace rights, health and wellbeing while in ASIP, and accessibility and EDI considerations.

This course does not carry credit weight and is evaluated as Credit/No Credit. No tuition fee is associated, however an ancillary fee will be assessed. Refer to the [ASIP Fees & Financial Aid website](#) for further details.

PDC320H1 - Arts & Science Internship Program - Professional Skill Development I

This course is a mandatory component of the Arts & Science Internship Program (ASIP) for students admitted to the ASIP stream of their program for Year 2. Students admitted for Year 2 must successfully complete this course to graduate from the ASIP Stream of their program of study. The course will help students build transferable skills essential for success in the workplace and in the evolving world of work. The course will also support and help guide students through the next recruitment cycle. Topics may include: post work-term reflection (if applicable), advanced interview skills, job search support for recruitment cycle II, and skills development modules. Skills development modules may include: design thinking, intercultural communication, problem solving, conflict resolution, universal design and ethical and sustainability-minded decision making.

This course does not carry credit weight and is evaluated as Credit/No Credit. No tuition fee is associated, however an ancillary fee will be assessed. Refer to the [ASIP Fees & Financial Aid website](#) for further details.

Students who enrolled in the ASIP stream of their program in Year 3 should enrol in [PDC330H1](#).

Exclusion: [PDC331H1](#)

PDC330H1 - Arts & Science Internship Program - Professional Skill Development I

This course is a mandatory component of the Arts & Science Internship Program (ASIP) for students admitted to the ASIP stream of their program for Year 3. Students admitted for Year 3 must successfully complete this course to graduate from the ASIP Stream of their program of study. The course will help students build transferable skills essential for success in the workplace and in the evolving world of work. The course will also support and help guide students through the next recruitment cycle. Topics may include: post work-term reflection (if applicable), advanced interview skills, job search support for recruitment cycle II, and skills development modules. Skills development modules may include: design thinking, intercultural communication, problem solving, conflict resolution, universal design and ethical and sustainability-minded decision making.

This course does not carry credit weight and is evaluated as Credit/No Credit. No tuition fee is associated, however an ancillary fee will be assessed. Refer to the [ASIP Fees & Financial Aid website](#) for further details.

Students who enrolled in the ASIP stream of their program in Year 2 should enrol in [PDC320H1](#).

Exclusion: [PDC320H1](#)

PDC331H1 - Arts & Science Internship Program - Professional Skill Development II

This course is a mandatory component of the Arts & Science Internship Program (ASIP) for students admitted to the ASIP stream of their program for Year 3. Students admitted for Year 3 must successfully complete this course to graduate from the ASIP Stream of their program of study. The course will help students build transferable skills essential for success in the workplace and in the evolving world of work. The course will also support and help guide students through the next recruitment cycle. Topics will include: job search support for recruitment cycle II and skills development modules. Skill development topics will continue from [PDC330H1](#), with an additional focus on: Project management skills including, Problem Solving and Critical Thinking, Teamwork and Leadership, Goal Setting and Planning, professional responsibility, workplace organization skills, workplace writing and communication.

This course does not carry credit weight and is evaluated as Credit/No Credit. No tuition fee is associated, however an ancillary fee will be assessed. Refer to the [ASIP Fees & Financial Aid website](#) for further details.

Students who enrolled in the ASIP stream of their program in Year 2 should enrol in [PDC321H1](#).

Prerequisite: [PDC330H1](#)

Exclusion: [PDC321H1](#)

INT400H1 - Arts & Science Internship Program - Professional Work Term

Students participate in a full-time, paid, career-related work experience totalling at least 420 hours within a 4-month period. Students compete for employment within the public, not-for-profit, or for-profit sectors. Students will be enrolled into the course once hired for an ASIP work term and the work experience must be approved by the Experiential Learning & Outreach Support (ELOS) Office.

Student performance while on the work term will be monitored through a site visit and/or student and employer check-in. Students will be required to submit a learning plan at the start of each work term opportunity, reflective reports at regular intervals during the work period, a work term evaluation, and a final work term assignment (which may have different formats depending on the student's

program). Employers will also be asked to submit a final evaluation of the student's progress and performance.

This course is only open to students admitted to the ASIP stream of their program of study for Year 2.

This course does not carry credit weight and is evaluated as Credit/No Credit. No tuition fee is associated, however an ancillary fee will be assessed. Refer to the [ASIP Fees & Financial Aid website](#) for further details.

Prerequisite: [INT300H1](#)

Exclusion: [INT401H1](#)

INT401H1 - Arts & Science Internship Program - Professional Work Term

Students participate in a full-time, paid, career-related work experience totalling at least 420 hours within a 4-month period. Students compete for employment within the public, not-for-profit, or for-profit sectors. Students will be enrolled into the course once hired for an ASIP work term and the work experience must be approved by the Experiential Learning & Outreach Support (ELOS) Office.

Student performance while on the work term will be monitored through a site visit and/or student and employer check-in. Students will be required to submit a learning plan at the start of each work term opportunity, reflective reports at regular intervals during the work period, a work term evaluation, and a final work term assignment (which may have different formats depending on the student's program). Employers will also be asked to submit a final evaluation of the student's progress and performance.

This course is only open to students admitted to the ASIP stream of their program of study for Year 3.

This course does not carry credit weight and is evaluated as Credit/No Credit. No tuition fee is associated, however an ancillary fee will be assessed. Refer to the [ASIP Fees & Financial Aid website](#) for further details.

Prerequisite: [INT301H1](#)

Exclusion: [INT400H1](#)

INT450H1 - Arts & Science Internship Program - Professional Work Term

Students participate in a full-time, paid, career-related work experience totalling at least 420 hours within a 4-month period. Students compete for employment within the public, not-for-profit, or for-profit sectors. Students will be enrolled into the course once hired for an ASIP work term and the work experience must be approved by the Experiential Learning & Outreach Support (ELOS) Office.

Student performance while on the work term will be monitored through a site visit and/or student and employer check-in. Students will be required to submit a learning plan at the start of each work term opportunity, reflective reports at regular intervals during the work period, a work term evaluation, and a final work term assignment (which may have different formats depending on the student's program). Employers will also be asked to submit a final evaluation of the student's progress and performance.

This course is only open to students admitted to the ASIP stream of their program of study for Year 2.

This course does not carry credit weight, is evaluated as Credit/No Credit, and no tuition fee is associated.

Prerequisite: [INT400H1](#)

Exclusion: [INT451H1](#)

INT451H1 - Arts & Science Internship Program - Professional Work Term

Students participate in a full-time, paid, career-related work experience totalling at least 420 hours within a 4-month period. Students compete for employment within the public, not-for-profit, or for-profit sectors. Students will be enrolled into the course once hired for an ASIP work term and the work experience must be approved by the Experiential Learning & Outreach Support (ELOS) Office.

Introduction

Astronomy explores the universe beyond the earth and attempts to understand the physical processes that describe its contents. Essentially all civilizations have developed astronomy to some degree, with records extending back to the Babylonians. The modern development of astronomy began with Galileo turning a telescope to the sky and the heliocentric model of the solar system. Astronomy and astrophysics have undergone a revolution in the past fifty years as telescopes ranging from the radio to the gamma ray have discovered the relict radiation from the Big Bang, stars and galaxies that were forming not long after, ultradense neutron stars and black holes, as well as planets around other stars. Astronomy as a discipline is a distinctive integration of many of the sciences. At the introductory level it is used to provide a non-technical overview of the scientific approach to questions and our current understanding. At the more advanced level a quantitative physical understanding of astrophysical systems is developed. A graduate in astronomy has a wide grounding in modern physical science which is important for a wide range of roles in society.

Several courses are offered to suit persons of diverse backgrounds and depths of interest. Two introductory courses ([AST101H1](#), [AST201H1](#)) require no special knowledge of mathematics or other sciences and are best suited to students taking non-science programs. These

courses develop an understanding of the universe in a qualitative way and in terms of natural laws familiar to us on Earth. Following these courses, students can take [AST301H1](#) which offers a hands-on introduction to telescopes and observational astronomy. [AST121H1](#) is an introductory astronomy course for all science students. The department offers a range of cross-disciplinary courses, including [AST310H1](#), [JCA302H1](#), and [AST251H1](#) all of which are open to science majors and non-science majors.

The remaining courses are designed for physical sciences and astronomy program students. For all Astronomy & Astrophysics programs, the first astronomy courses normally start in the second year, as they require the mathematical and physical grounding provided in the first year. In third year, after further physics and mathematics, follow more advanced theoretical study as well as a lab course that includes the use of the campus telescopes. For the major program, this is complemented by electives in more advanced mathematics, physics or numerical methods, as well as an introduction to astrophysical research. For the Astronomy & Physics specialist program, intensive training in all aspects of physics is added, allowing supervised, forefront research in fourth year, and preparing for a career in (astro)physical research via graduate studies or otherwise.

The Department works closely with two related academic units, the Canadian Institute for Theoretical Astrophysics (CITA) and the Dunlap Institute for Astronomy and Astrophysics. With a national mandate, CITA fosters research in theoretical aspects of the discipline, including the exploitation of high-performance computers in house and in SciNet. Complementary to this, a focus of the Dunlap Institute is on the design and development of astronomical instrumentation. Undergraduate students will find diverse research opportunities through the Department and these two cognate units.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Astronomy and Astrophysics programs impacted by this policy: [ASMAJ1423](#) and [ASMIN1423](#)

Astronomy and Astrophysics Programs

Astronomy & Physics Specialist (Science Program) - ASSPE0271

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

The Astronomy & Physics Specialist program combines rigorous training in the full spectrum of core physics subfields with their application in astronomy. Lecture courses are complemented by practical courses, and the program culminates in a supervised research project, where all the skills learned are used, and which is intended to be published.

(14.0 credits, including at least 4.0 credits at the 300+ level, and at least 1.0 credit at the 400-level)

First Year:

[MAT137Y1](#)/ [MAT157Y1](#), [MAT223H1](#)/ [MAT240H1](#); [PHY131H1](#)/ [PHY151H1](#), [PHY132H1](#)/ [PHY152H1](#); 0.5 credit from [CSC108H1](#)/ [CSC110Y1](#)/ [CSC148H1](#) or another course that gives a foundation in computer programming approved by the Undergraduate Chair. ([MAT137Y1](#), [MAT223H1](#), [PHY151H1](#), [PHY152H1](#) recommended)

Second Year:

[AST221H1](#), [AST222H1](#); [MAT237Y1](#)/ [MAT257Y1](#)/ [MAT235Y1](#), [MAT244H1](#)/ [MAT267H1](#); [PHY250H1](#), [PHY252H1](#), [PHY256H1](#) ([MAT237Y1](#), [MAT244H1](#) recommended)

Third Year:

1. [AST320H1](#), [AST325H1](#)/ [AST326Y1](#); [PHY224H1](#), [PHY254H1](#), [PHY354H1](#)
2. 1.0 credit from [APM346H1](#), [PHY356H1](#), [MAT224H1](#), [MAT327H1](#), [MAT334H1](#), [MAT363H1](#), [STA257H1](#)

Fourth Year:

1. [AST425Y1](#)/ ([AST424H1](#), extra 0.5 credit from lines 2 or 3; see note 3); [PHY350H1](#)
2. 0.5 credit from [PHY324H1](#), [PHY357H1](#), [PHY358H1](#), [PHY385H1](#), [PHY407H1](#), [PHY408H1](#), [PHY483H1](#), [JPE395H1](#)
3. 1.0 credit from [AST430H1](#), [PHY450H1](#), [PHY454H1](#), [PHY456H1](#), [PHY460H1](#), [PHY483H1](#), [PHY484H1](#), [PHY495H1](#)
4. [AST310H1](#)/ [ENV222H1](#)/ [ENV333H1](#)/ [ESS205H1](#)/ [HPS200H1](#)/ [JPH441H1](#)/ [PHL273H1](#)/ [VIC172Y1](#), or

another course with a significant emphasis on Social and Ethical Responsibility approved by the Undergraduate Chair.

Notes:

1. Second-year students who wish to keep open the option of pursuing a physics specialist degree should consider taking [PHY254H1](#) in 2nd year.
2. Third-year students are invited and fourth-year students are expected to attend the weekly departmental colloquia.
3. Fourth-year students are encouraged to enrol in the independent research course [AST425Y1](#), but this is guaranteed for students with at least a B+ average in the program courses and requires identifying a supervisor. Others who wish to take [AST425Y1](#) should consult the course coordinator or the undergraduate chair.

Astronomy & Astrophysics Major (Science Program) - ASMAJ1423

The Astronomy Major provides deep knowledge in astronomy & physics, and enables students to pursue quantitative, problem-solving careers in a variety of fields.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

This program is appropriate for students interested in a more flexible and diverse undergraduate program. It may be tailored to be a natural counterpart to a second major in Mathematics, Physics, Statistics, or Computer Science; students should consult the undergraduate chairs of Astronomy & Astrophysics and the respective departments for advice on course selection.

(8.0 credits, including at least 2.0 credits at the 300+ level, and a 0.5 credit at the 400-level)

First Year:

1. ([MAT135H1](#), [MAT136H1](#)) / [MAT137Y1](#) / [MAT157Y1](#) ([MAT137Y1](#) recommended)

2. [PHY131H1](#) / [PHY151H1](#), [PHY132H1](#) / [PHY152H1](#) ([PHY151H1](#), [PHY152H1](#) recommended)

3. 0.5 credit from [CSC108H1](#) / [CSC110Y1](#) / [CSC148H1](#) or another course that gives a foundation in computer programming approved by the Undergraduate Chair. ([CSC108H1](#) recommended for non-Computer Science majors)

Second Year:

1. [AST221H1](#), [AST222H1](#)

2. [MAT235Y1](#) / [MAT237Y1](#) / [MAT257Y1](#) ([MAT237Y1](#) recommended)

3. [PHY252H1](#) and one of [PHY224H1](#) / [PHY250H1](#) / [PHY254H1](#) / [PHY256H1](#)

Third Year:

1. [AST320H1](#), [AST325H1](#) / [AST326Y1](#) ([AST325H1](#) recommended)

Third or fourth year:

1. [AST424H1](#) (can be substituted with [AST430H1](#) / [AST431H1](#) / [AST431Y1](#) with permission of the undergraduate chair)

2. 0.5 credit from [AST310H1](#) / [ENV222H1](#) / [ENV333H1](#) / [ESS205H1](#) / [HPS200H1](#) / [JPH441H1](#) / [PHL273H1](#) / [VIC172Y1](#), or another course with a significant emphasis on Social and Ethical Responsibility approved by the Undergraduate Chair.

3. 0.5 credit from [CSC336H1](#), [CSC385H1](#), [CSC413H1](#), [CSC456H1](#); [STA302H1](#), [STA313H1](#); [PHY350H1](#), [PHY354H1](#), [PHY356H1](#), [PHY357H1](#), [PHY358H1](#), [PHY385H1](#), [PHY407H1](#), [PHY408H1](#), [PHY450H1](#), [JPE395H1](#); [JCA302H1](#), [AST310H1](#), [AST398H0](#), [AST398Y0](#), [AST399Y1](#), [AST430H1](#), [AST431H1](#), [AST431Y1](#); or any CTA course at the 300+ level.

Notes:

1. The Astronomy & Astrophysics Major program is not designed primarily for students intending to pursue graduate studies in Astronomy & Astrophysics. Such students should consider the Astronomy & Physics Specialist program, or consult the Undergraduate Chair about their course selections.

2. Students interested in pursuing a research project in fourth year ([AST425Y1](#)) should consult the undergraduate chair.

3. Faculty of Applied Science & Engineering, UTM, and UTSC equivalents to courses can be substituted on a case-by-case basis with the approval of the course coordinator or the undergraduate chair.

4. Third-year students are invited and fourth-year students are expected to attend the weekly departmental colloquia.

Astronomy & Astrophysics Minor (Science Program) - ASMIN1423

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

A program designed for students looking to add breadth to a program in another, perhaps unrelated discipline.

(4 full courses or their equivalent)

1. [AST221H1](#), [AST222H1](#), [AST320H1](#), [AST325H1](#)/[AST326Y1](#)
2. ([PHY131H1](#), [PHY132H1](#)) / ([PHY151H1](#), [PHY152H1](#))

Astronomy and Astrophysics Courses

AST101H1 - The Sun and Its Neighbours

Hours: 24L

Our place in the Universe. Phenomena we see in the sky. What we know about the Sun, the planets and comets, and the formation of the solar system – and how we know it. What makes planets suitable for life. Finding out about the nearest stars and their planets. This course is intended for students with no science or engineering background.

Exclusion: [AST121H1](#), [AST101H5](#), [ASTA01H3](#), [ASTC25H3](#), [CIV100H1](#), [CIV101H1](#), [CIV102H1](#). Also excluded are [AST221H1](#), [ASTC25H3](#) if taken previously or concurrently.

Breadth Requirements: The Physical and Mathematical Universes (5)

AST121H1 - Origin and Evolution of the Universe

Hours: 24L/12T

The origin of the Universe and all that it contains, from the chemical elements, stars and galaxies, and life. The course is intended for students who are enrolling in science and engineering courses.

Prerequisite: SPH4U Physics; MCB4U Calculus

Exclusion: [AST101H1](#), [AST201H1](#), [AST210H1](#). Also excluded are [AST221H1](#), [AST222H1](#) if taken previously or concurrently.

Breadth Requirements: The Physical and Mathematical Universes (5)

3. [PHY252H1](#) and one of [PHY224H1](#), [PHY250H1](#), [PHY254H1](#), [PHY256H1](#)

Notes:

1. [PHY131H1](#), [PHY132H1](#) and [PHY151H1](#), [PHY152H1](#) require ([MAT135H1](#), [MAT136H1](#)) / [MAT137Y1](#) / [MAT157Y1](#) and [PHY252H1](#) requires [MAT235Y1](#) / [MAT237Y1](#) / [MAT257Y1](#).

2. Faculty of Applied Science & Engineering equivalents to the physics courses can be substituted. Please consult the Undergraduate Chair.

AST198H1 - Great Astronomical Issues

Hours: 24S

There are some fundamental questions which humankind has asked itself over the centuries. Many of these involve astronomical origins, events, and objects. Astronomers now have the tools with which to attempt to answer some of the most fundamental questions, such as "Where did it all begin, where are we in space and time, are we alone, and who and what are we?" This seminar will explore some of these great issues. The selection of topics will be made initially by the instructor, but will be modified by the seminar participants at the first class meeting. Topics could include: stellar evolution and the future of the Sun, origin of the elements, origin and future of the Universe, origin of the Earth, origin of life, and extinction of the dinosaurs, global warming, the scientific method, astronomy and the public. Participants will be expected to join actively in lively discussions and to prepare and lead some of the seminars. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: [AST199H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

AST199H1 - Astronomy at the Frontier

Hours: 24S

This seminar series aims at building up general scientific literacy, by discussing selected topics in current astronomy, cosmology, and space science. We will delve into the physical foundation behind the questions being asked and how the answers are being sought. Students will have an opportunity early in the course to select topics of particular interest to them and this will govern the choice of readings as well. Topics could include: formation of stars; lives and deaths of stars; stellar corpses: white dwarfs, neutron stars, and black holes; planets around other stars; recent results from Hubble and other telescopes; architecture of the solar system; exploration in the solar system; the invisible universe: dark energy and

dark matter; first light; formation of galaxies; the age and future of the universe. Participants should be comfortable with basic mathematics and quantitative reasoning. Students will be expected to do independent research for essays, presentations, etc. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: AST198H1

Breadth Requirements: The Physical and Mathematical Universes (5)

AST201H1 - Stars and Galaxies

Hours: 24L

What we know about the properties and life cycles of stars, of galaxies, and of the Universe itself – and how we know it. How astronomers develop methods for understanding phenomena that span such vast ranges in distance and time. This course is intended for students with no science or engineering background.

Exclusion: AST121H1, AST210H1, AST201H5, ASTA02H3, CIV100H1, CIV101H1, CIV102H1. Also excluded are AST221H1, AST222H1, ASTB23H3 if taken previously or concurrently.

Breadth Requirements: The Physical and Mathematical Universes (5)

AST210H1 - Great Moments in Astronomy

Hours: 24L

From the Copernican Revolution to twentieth century astrophysics. Emphasis is placed on the process of discovery which has led to major advances in knowledge about the Universe. The course includes an outline of some of the most significant puzzles of our day and an examination of the potential for new revolutions in our knowledge. This course is best suited to science students.

Exclusion: AST101H1, AST121H1, AST201H1

Breadth Requirements: The Physical and Mathematical Universes (5)

AST221H1 - Stars and Planets

Hours: 36L

The (astro)physics of stars and planets, their observed variety, their structure, formation and evolution. Introduction to telescopes and instrumentation.

Prerequisite: PHY132H1/ PHY152H1; MAT136H1/ MAT137Y1/ MAT157Y1

Exclusion: AST221H5, ASTB23H3, ASTC25H3

Breadth Requirements: The Physical and Mathematical Universes (5)

AST222H1 - Galaxies and Cosmology

Hours: 36L

The (astro)physics of stellar systems, galaxies, and the Universe, their structure, formation, and evolution.

Prerequisite: AST221H1/ AST221H5

Exclusion: AST222H5, ASTB23H3, ASTC25H3

Breadth Requirements: The Physical and Mathematical Universes (5)

AST251H1 - Life on Other Worlds

Hours: 24L/12T

Scholarly discussion of the probability that there are planets with life elsewhere in the universe, from the perspective of current ideas concerning the origin and evolution of the universe, the solar system and life. Search techniques and possibilities for interstellar travel and space colonies are discussed.

Exclusion: AST221H1, AST222H1, AST222H5, ASTB23H3, ASTC25H3

Breadth Requirements: The Physical and Mathematical Universes (5)

AST299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

AST299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

AST301H1 - Observational Astronomy

Hours: 36P

A hands-on introduction to telescopes and observational astronomy for students with little experience in the physical sciences. Through laboratory exercises and observations of the sky, students will learn the techniques that have enabled the major discoveries of modern astronomy, from the expansion of the universe to the existence of Earth-like planets orbiting other stars. Hands-on activities will teach how telescopes work and how we can measure the distances, motion, and chemical composition of celestial objects. Basic arithmetic is used, but no advanced mathematics. This course is intended for students without a formal science background to gain experience with hands-on observational astronomy.

Prerequisite: AST101H1/ AST201H1/ AST251H1

Exclusion: AST221H1, AST222H1, AST325H1, AST326Y1, AST110H5, AST221H5, AST222H5, ASTB23H3, ASTC25H3

Breadth Requirements: The Physical and Mathematical Universes (5)

JCA302H1 - The Bible and the Big Bang

Hours: 24L/12T

The origin of the Universe is addressed both by current physical cosmology and by religious interpretations of the Bible. This course explores how these approaches to the cosmos's origins differ and how they might be mutually informative. Core concepts in each domain will be examined and definitions carefully distinguished (e.g., 'nothing', 'cause', 'matter'); topics will include the question of temporal beginnings (scientific theories of spontaneous creation or an eternal universe vis-à-vis the doctrine of creation from nothing) and the problem of cosmic fine tuning (the multiverse vis-à-vis the idea of divine intervention).

Prerequisite: Completion of 4.0 credits

Recommended Preparation: AST101H1/ AST201H1/ AST121H1/ AST221H1/ AST222H1, SMC232H1/ CHC232H1

Breadth Requirements: Thought, Belief and Behaviour (2)

AST310H1 - Indigenous Worldviews & Astronomy

Hours: 24L

An in-depth exploration of astronomy, the Solar System, and the night sky through the lens of Indigenous knowledges, primarily that of Indigenous peoples from Turtle Island. Indigenous peoples have lived on Turtle Island since time immemorial and have a sophisticated relationship with the night sky that is influenced by their worldviews and their relationships with the land. In this course, students will learn about Indigenous perspectives for understanding nature and astronomy and learn to understand astronomy through these perspectives. Students will also learn about the intersection of western astronomy and ongoing colonization to understand the responsibilities of western astronomers for respecting treaties and Indigenous rights as well as presenting an Indigenous lens regarding space exploration.

Prerequisite: Any AST 100-level or AST 200-level course

Breadth Requirements: The Physical and Mathematical Universes (5)

AST320H1 - Introduction to Astrophysics

Hours: 24L/12T

The formation, equilibrium and evolution of structure on all astronomical scales from the largest to the smallest: universe, clusters of galaxies, galaxies, clusters of stars, gas clouds and stars.

Prerequisite: PHY252H1/ PHY294H1/ PHY242H5/ PHYB52H3; AST221H1, AST222H1 (or equivalent AST readings; consult the instructor)

Breadth Requirements: The Physical and Mathematical Universes (5)

AST325H1 - Introduction to Practical Astronomy

Hours: 39P

Through experiment and observation, develop the core skills to collect, reduce, and interpret astronomical data. Develop understanding and usage of telescopes, instruments, and detectors; reduction and analysis methods; simulations and model fitting; data and error analysis.

Prerequisite: AST221H1, AST222H1 (or equivalent readings, consult the instructor)

Exclusion: AST326Y1

Recommended Preparation: Basic programming/scripting, numerical techniques (e.g., through CSC108H1/ CSC148H1).

Breadth Requirements: The Physical and Mathematical Universes (5)

AST326Y1 - Practical Astronomy

Hours: 78P

Through experiment and observation, develop the core skills to collect, reduce, and interpret astronomical data. Develop understanding and usage of telescopes, instruments, and detectors; reduction and analysis methods; simulations and model fitting; data and error analysis. This course is an expanded version of [AST325H1](#) that gives a wider exposure to practical astronomy.

Prerequisite: [AST221H1](#), [AST222H1](#) (or equivalent readings; consult the instructor)

Exclusion: [AST325H1](#)

Recommended Preparation: Basic programming/scripting, numerical techniques (e.g., through [CSC108H1](#)/ [CSC148H1](#))

Breadth Requirements: The Physical and Mathematical Universes (5)

AST398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

AST398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

AST399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

AST399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

AST424H1 - Introduction to Astrophysical Research

Hours: 24L

A literature study or guided research project that develops methods and skills applicable to the physical sciences, with an emphasis on communication, including writing proposals and reports, and delivering presentations. This course is intended for students in the final year of the Astronomy & Astrophysics Major. Students are required to attend the weekly departmental colloquia or seminars. Not eligible for CR/NCR option.

Prerequisite: [AST320H1](#) (or [AST221H1](#) and [AST222H1](#) and a minimum GPA of 3.5 in Astronomy program courses and the permission of the Undergraduate Chair and the prospective adviser)

Exclusion: [AST425Y1](#)

Recommended Preparation: [AST325H1](#)/ [AST326Y1](#)

AST425Y1 - Research Topic in Astronomy

Hours: 48L

A research project done in consultation with an individual staff member in the Department leading to a detailed written report and oral presentation. This course is intended for students in the final year of the Astronomy and Physics specialist program. Students must enrol with the Undergraduate Secretary of the Department. Enrolment is guaranteed only for specialist students with at least a B+ average in program courses and requires identifying a supervisor. Others who wish to take [AST425Y1](#) should consult the course coordinator or the undergraduate chair. Not eligible for CR/NCR option.

Prerequisite: [AST320H1](#), two of [AST325H1](#)/ [AST326Y1](#), [PHY324H1](#), [PHY350H1](#), [PHY354H1](#), [PHY356H1](#), [PHY357H1](#), [PHY358H1](#), [PHY407H1](#)/ [PHY408H1](#), [PHY450H1](#), [JPE395H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

AST430H1 - Supervised Study in Astronomy & Astrophysics

An individual study program chosen by the student with the advice of, and under the direction of, a staff member. Not eligible for CR/NCR option.

Prerequisite: Minimum GPA of 3.5 in Astronomy program courses and the permission of the Undergraduate Chair and the prospective adviser

Breadth Requirements: The Physical and Mathematical Universes (5)

AST431H1 - Supervised Study in Astronomy & Astrophysics

An individual study program chosen by the student with the advice of, and under the direction of, a staff member. Not eligible for CR/NCR option.

Prerequisite: Minimum GPA of 3.5 in Astronomy program courses and the permission of the Undergraduate Chair and the prospective adviser

Breadth Requirements: The Physical and Mathematical Universes (5)

AST431Y1 - Supervised Study in Astronomy & Astrophysics

An individual study program chosen by the student with the advice of, and under the direction of, a staff member. Not eligible for CR/NCR option.

Prerequisite: Minimum GPA of 3.5 in Astronomy program courses and the permission of the Undergraduate Chair and the prospective adviser

Breadth Requirements: The Physical and Mathematical Universes (5)

Introduction

Biochemistry is the study of the chemistry of living organisms. Biochemists seek a molecular explanation of life by attempting to understand its underlying principles. Biochemistry is concerned with the relevance of a molecule to an organism and the correlations between its structure and its function. Modern biochemistry grew out of the application of chemical techniques to biological problems and is the foundation of biological science and medicine. In many ways it combines biology and chemistry but the subject now covers such a broad range of activity that it is difficult to draw a neat border around biochemistry. Some of the most exciting areas of current biochemistry research include:

- structural biology
- enzyme mechanisms
- signal transduction and regulation
- biotechnology
- molecular cell biology
- gene expression and development
- metabolic diseases
- proteomics and bioinformatics
- molecular evolution
- protein folding
- membranes and transport

The Biochemistry Specialist Program is academically oriented and designed to provide students with a fundamental understanding of the theoretical and practical aspects of the discipline. The program offers broad training in problem solving specifically using a molecular approach. Biochemistry specialists gain experience in critical thinking and the skills required to evaluate scientific rationale. The Biochemistry Major Program offers students fundamental training in the science and gives each student in the program the chance to combine Biochemistry with another relevant Major Program. This may be within the Life Sciences or Basic Sciences, or may be within the arts. For example, the combination of Biochemistry with Economics or with English could provide students with training relevant to the fields of investment within biotechnology or scientific journalism. Students who excel within the Biochemistry Major Program may be offered the chance to enter the Specialist Program at the third year. Students who complete a B.Sc. in the Specialist Program are well prepared to continue their studies in graduate programs in Biochemistry and other Life Sciences. Graduates from either the Specialist or Major Programs may find employment in research and teaching. Employers include universities and colleges,

government laboratories, clinical biochemistry laboratories, forensic laboratories, pharmaceutical companies, biotechnology companies, and many other industries. Skills learned in the Biochemistry Specialist and Major Programs are also helpful in other areas such as marketing, finance, and law. Some biochemistry graduates continue their studies in medicine, dentistry or other health related programs. Regardless of where life takes them, our students benefit from a broad knowledge-based and logical framework that will help them navigate the waters ahead.

Students considering choosing either the BCH Specialist or BCH Major program are encouraged to attend program information sessions held throughout the academic year. Please note that the Specialist program is the clearest path to graduate studies in Biochemistry and to careers in research.

Associate Chair of Undergraduate Education, Dr. S. Patterson, biochemistry.undergrad@utoronto.ca

Undergraduate Administrator, Jennifer Haughton, jennifer.haughton@utoronto.ca

For courses with enrolment restrictions, please contact Jennifer Haughton, jennifer.haughton@utoronto.ca

Enquiries: Medical Sciences Building, Room 5207 (416-978-2700)

Website: biochemistry.utoronto.ca

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Biochemistry programs impacted by this policy: [ASSPE1762](#) and [ASMAJ1762](#)

Biochemistry Programs

Biochemistry Specialist (Science Program) - ASSPE1762

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1 and CHM136H1)/ CHM151Y1
- (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60%, or a grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. While it is difficult to predict what will constitute "competitive" course marks in a given year, based on previous years the estimate is: course marks = mid 80s; average = mid 80s. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at biochemistry.undergrad@utoronto.ca, specify which program you would like to be considered for, and provide your student number.

Please note, the Biochemistry Specialist cannot be combined with:

- Immunology Major
- Molecular Genetics and Microbiology Major

Completion Requirements:

(14.0 credits, including at least 2.5 credits at the 400-level)

First Year:

1. BIO120H1, BIO130H1
2. (CHM135H1, CHM136H1)/ CHM151Y1
3. (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

First or Second Year:

(PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1)
[PHY131H1, PHY132H1 recommended]

Second Year:

1. BCH242Y1
2. MGY280H1
3. BIO230H1/ BIO255H1
4. STA220H1/ STA288H1
5. CHM247H1/ CHM249H1
6. BIO260H1/ HMB265H1 (See NOTE 1)

Third Year:

1. BCH340H1, BCH377H1
2. MGY311Y1

Fourth Year:

1. BCH478H1
2. 2.0 credits including at least 1.0 credit in BCH from: BCH422H1, BCH425H1, BCH426H1, BCH428H1, BCH440H1, BCH444H1, BCH445H1, BCH446H1, BCH448H1, BCH449H1, BCH450H1, BCH479H1, BCB420H1, CHM447H1, MGY420H1, MGY425H1, MGY428H1, MGY441H1, MGY450H1, MGY470H1. Up to 1.0 credit from research project courses (BCH372Y1/ BCH374Y1/ BCH472Y1/ BCH473Y1) may count towards this requirement (See NOTE 2).
3. Additional courses (to bring the program total to 14.0 credits) from the following list: BIO220H1/ CHM217H1/ CHM220H1 (See NOTE 3)/ CHM223H1/ one of CSC108H1 or CSC148H1/ MAT235Y1/ MAT237Y1/ STA221H1/ JPM300H1/ any suitable 300-level course from CHM/ CSB/ EEB/ HMB/ IMM/ LMP/ MGY/ PCL/ PSL (departmental approval required)

NOTES:

1. Alternatively, BIO260H1 may be taken in third year (due to timetable conflicts BIO260H1 may not be taken in 2nd year).
2. Additional BCH research project courses can be taken as part of the 20.0 credits needed for your degree.
3. CHM220H1 is highly recommended for students who are interested in pursuing studies in the physical aspects of biochemistry such as structural biology and molecular biophysics.

Biochemistry Major (Science Program) - ASMAJ1762

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average is needed for entry, and this

minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1 and CHM136H1)/ CHM151Y1
- (MAT135H1 and MAT136H1)/ MAT137Y1/MAT157Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60%, or a grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 70s; average = mid 70s. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at biochemistry.undergrad@utoronto.ca, specify which program you would like to be considered for, and provide your student number.

Please note, the Biochemistry Major cannot be combined with the:

- Immunology Specialist
- Molecular Genetics and Microbiology Specialist

Biochemistry Courses

BCH210H1 - Biochemistry I: Proteins, Lipids and Metabolism

Hours: 36L/24T

This introductory course in biochemistry will cover the fundamentals of proteins, enzymes, biological membranes and the metabolism of carbohydrates and lipids for energy production. This course is intended for students who are NOT taking BCH242Y1 as part of their program.

Prerequisite: Successful completion of (CHM135H1, CHM136H1)/ CHM151Y1 NOTE: CHM1** with COURSE EXCLUSION TO CHM135H1 AND CHM136H1 meet the Prerequisite requirement for BCH210H1. Students with a

Completion Requirements:

(8.0 credits, including 1.0 credit at the 400-level)

First Year:

1. BIO120H1, BIO130H1
2. (CHM135H1, CHM136H1)/ CHM151Y1
3. (MAT135H1, MAT136H1)/ MAT137Y1/MAT157Y1

Second Year:

1. BCH210H1
2. BIO230H1/ BIO255H1
3. CHM247H1/ CHM249H1

Third Year:

1. BCH311H1
2. BCH370H1
3. CHM217H1/ CHM220H1/ BCH340H1
4. 1.0 credit from BIO220H1/ one of BIO260H1 or HMB265H1/ JPM300H1 and the department is open to the use of 300-level non-field course(s) in CHM/ CSB/ EEB/ HMB/ IMM/ LMP/ MGY/ PCL/ PSL. Students must first seek approval from the department prior to course enrolment.

Fourth Year:

1.0 credit from: BCH422H1, BCH425H1, BCH426H1, BCH428H1, BCH440H1, BCH444H1, BCH445H1, BCH446H1, BCH448H1, BCH449H1, BCH479H1, CHM447H1, MGY441H1

SDF in CHM135H1/ CHM136H1 are not permitted to enrol in BCH210H1 until a final passing grade (50%) appears on the transcript. UTM students who have completed CHM110H5 (exclusion to CHM135H1) & CHM242H5 (exclusion to CHM136H1) will be permitted to enrol in BCH210H1. UTSC students who have completed CHMA11H3 (exclusion to CHM135H1) & CHMB41H3 (exclusion to CHM136H1) will be permitted to enrol in BCH210H1.

Exclusion: BCH242Y1, [CHM361H5(UTM) and CHM362H5(UTM)], [BIOC12H3(UTSC) and BIOC13H3(UTSC)], CHMB62H3(UTSC)

Breadth Requirements: The Physical and Mathematical Universes (5)

BCH242Y1 - Introduction to Biochemistry

Hours: 64L/12T/18P

This introductory course in biochemistry will serve as the foundation for upper-level BCH courses taken by students specializing in biochemistry and related specialist programs. The major topics include protein structure, enzyme mechanisms and function, gene expression, lipid and membrane structure and function, and the metabolism of carbohydrates, lipids and amino acids for energy production. Laboratory techniques will also be introduced to understand the role of biochemistry for research. Please note that there are five laboratories accompanying this course. **(Lab fees:\$10)**

Prerequisite: (CHM135H1, CHM136H1)/ CHM151Y1
Exclusion: BCH210H1 and BCH311H1, [CHM361H5 (UTM) and CHM362H5 (UTM)], [BIOC12H3 (UTSC) and BIOC13H3 (UTSC)], CHMB62H3 (UTSC)
Breadth Requirements: Living Things and Their Environment (4), The Physical and Mathematical Universes (5)

BCH299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

BCH299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

JPM300H1 - Research Readiness and Advancing Biomedical Discoveries

Hours: 12L/24T

Explore how scientists leverage their knowledge and skills to advance academic biomedical discoveries from the laboratory to improve patient health through either commercialization or not-for-profit approaches. Students

will learn about innovation and develop key research and industry skills including intellectual property, ethics, budget and project management; learn how to critically evaluate scientific evidence and effectively communicate to a wide audience. This hybrid student-centered course will include interactive online modules and in-class group work. Course work will focus on developing skills and knowledge to help you be successful in diverse research courses and future careers. Not eligible for CR/NCR option.

Prerequisite: Completion of 9.0 credits, BCH210H1/ BCH242Y1/ [CHM361H5(UTM) and CHM362H5(UTM)]/ [BIOC12H3(UTSC) and BIOC13H3(UTSC)]/ CHMB62H3(UTSC)
Recommended Preparation: PSL300H1, PSL301H1
Breadth Requirements: Living Things and Their Environment (4)

BCH311H1 - Biochemistry II: Nucleic Acids and Biological Information Flow

Hours: 24L/12T

Nucleic acids and flow of information in biological systems. Information storage and transmission by nucleic acids, as well as new molecular technologies will be discussed. Registration in one of the tutorial sessions is mandatory. Note: Students that have a SDF in BCH210H1 are not permitted to enrol in BCH311H1 until a final passing grade (50%) appears on the transcript. BCH2** WITH COURSE EXCLUSION TO BCH210H1 meets the prerequisite requirement for BCH311H1.

Prerequisite: BCH210H1/(BIOC12H3 and BIOC13H3 [UTSC])
Exclusion: MGY311Y1, PSL350H1
Breadth Requirements: Living Things and Their Environment (4)

BCH340H1 - Proteins: From Structure to Function

Hours: 24L/6T

Proteins are the main functional units in the cell. In this course, a detailed overview of protein structure and function will be given with strong emphasis on the basic principles in the field. Students will be introduced to folded and intrinsically disordered proteins. Biophysical methods to study protein stability and folding will be discussed, as well as experimental approaches to determine protein structure and function. Students will be introduced to catalysis, kinetics, and the mechanisms that regulate enzyme activity. Finally, proteomic methods to studying protein networks in cells will be presented. The course will offer a solid basis in protein biochemistry. It is

recommended for those interested in pursuing graduate studies or professional degrees in health or medicine.

Prerequisite: BCH210H1/ BCH242Y1

Breadth Requirements: Living Things and Their Environment (4)

BCH370H1 - Laboratory Course in Biochemical Techniques

Hours: 24L/48P

This course is designed to provide hands-on experience at an introductory level, employing a variety of biochemical techniques commonly used in research and clinical diagnostic laboratories. This course is intended for students who are not proceeding further in biochemistry. It is highly recommended that students take this course in their third year as space is limited and priority will go to third-year students. This course will be offered in the FALL & WINTER terms. Attendance in the first week of class is mandatory in order to receive safety information and laboratory protocols. (Enrolment limited.) **(Lab fees: \$40)**

Prerequisite: BCH210H1

Exclusion: BCH377H1, CHM379H1

Breadth Requirements: Living Things and Their Environment (4)

BCH372Y1 - Summer Research in Biochemistry

Hours: 144P

This course provides opportunities to pursue an original individual research project in a particular area of biochemistry, under the direct supervision of a Biochemistry Department faculty member. Students are responsible for arranging for supervision by a Biochemistry Department faculty member. To apply for enrolment, students are required to complete the application form by contacting the Course Coordinator by the end of April. Not eligible for CR/NCR option.

Prerequisite: A final grade of 75% or higher in BCH242Y1.

Breadth Requirements: Living Things and Their Environment (4)

BCH373H1 - Independent Research Project

Hours: 72P

This course provides an opportunity for individual research with a specific topic of study. Students are mentored and supervised by research scientists and faculty associated with the University of Toronto. It provides students an opportunity to enhance and apply their knowledge and understanding learned in other courses. Direct supervision must be provided by a faculty member within the Department of Biochemistry. Not eligible for the CR/NCR option.

Prerequisite: (75% or higher in BCH242Y1)/(80% or higher in BCH210H1); BIO230H1; CHM247H1/CHM249H1; and approval of the course coordinator.

Corequisite: BCH375H1 can be combined with BCH373H1.

Exclusion: BCH473Y1, BCH374Y1

Breadth Requirements: Living Things and Their Environment (4)

BCH374Y1 - Research Project in Biochemistry

Hours: 144P

This course provides opportunities to pursue an original individual research project in a particular area of biochemistry, under the direct supervision of a Biochemistry Department faculty member. Students are responsible for arranging for supervision by a Biochemistry Department faculty member. To apply for enrolment, students are required to complete the application form by contacting the Course Coordinator before the end of August. Not eligible for CR/NCR option.

Prerequisite: For Specialist: BCH242Y1 (75% or higher); BIO230H1; CHM247H1/CHM249H1. For Major: BCH210H1 (80% or higher); BIO230H1; CHM247H1/CHM249H1.

Breadth Requirements: Living Things and Their Environment (4)

BCH375H1 - Independent Research Project

Hours: 72P

This course provides an opportunity for individual research with a specific topic of study. Students are mentored and supervised by research scientists and faculty associated with the University of Toronto. It provides students an opportunity to enhance and apply their knowledge and understanding learned in other courses. Direct supervision must be provided by a faculty member within the Department of Biochemistry. Not eligible for the CR/NCR option.

Prerequisite: (75% or higher in BCH242Y1)/(80% or higher in BCH210H1); BIO230H1; CHM247H1/CHM249H1; and approval of the course coordinator.

Corequisite: BCH375H1 can be combined with BCH373H1.

Exclusion: BCH473Y1, BCH374Y1

Breadth Requirements: Living Things and Their Environment (4)

BCH377H1 - Biochemistry Laboratory I

Hours: 12L/48P

An introduction to fundamental laboratory techniques in modern biochemistry. Experiments illustrate and develop the concepts described in lecture courses and serve as a foundation for more advanced training in biochemistry laboratory courses. Enrollment in this course is generally restricted to students enrolled in the Biochemistry, Immunology, and Molecular Genetics & Microbiology (Genetics Stream) Specialist programs. **(Lab fees: \$25)**

Prerequisite: BCH242Y1

Exclusion: BCH370H1, CHM379H1

Breadth Requirements: Living Things and Their Environment (4)

BCH378H1 - Biochemistry Laboratory II

Hours: 12L/48P

This course builds upon the fundamental laboratory techniques acquired in BCH377H1. Students gain hands-on experience in experimental design and data analysis, exploring numerous modern and classic biochemistry and molecular biology experimental techniques used in research laboratories. Enrollment in this course is generally restricted to students enrolled in the Biochemistry Specialist program.

Prerequisite: BCH377H1

Breadth Requirements: Living Things and Their Environment (4)

BCH399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

BCH399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

JPM400Y1 - Biomedical Incubator Capstone Project

Hours: 240P/16S

Discover what it is like to be part of a biomedical innovation team. Develop and engage in biomedical research in a simulated small business/incubator setting under the guidance of a faculty mentor. Bring your proposed JPM300H1 project to life, while acquiring budget management, research, business and communication workplace skills for future careers. Enrollment is application-based. Application requirements and process are presented as part of the JPM300H1 course. Proposals will be reviewed by committee and successful proposals will be matched to a mentor. Not eligible for CR/NCR option.

Application required; contact department (undergrad.pharmtox@utoronto.ca) for more information.

Students will form teams and develop a research proposal based on either:

- 1. Faculty led concept requiring further development and testing, which would not normally be funded grants and would be tangential to ongoing research in the lab.*
- 2. Student developed innovative idea that requires further development and testing. This should be a project that is not being investigated in a UofT research lab.*

Prerequisite: A minimum of 75% in JPM300H1; completion of any of PCL367H1/PCL368H1/PSL372H1/BCH370H1/BCH377H1 or Permission of the Department.
Breadth Requirements: Living Things and Their Environment (4)

BCH422H1 - Membrane Proteins: Structure, and Function

Hours: 24L

Structural features of membrane proteins, their biogenesis and methods of analysis. Function of membrane proteins as transporters, channels, pumps and receptors. Molecular aspects of disease processes linked to membrane proteins.

Prerequisite: BCH210H1/ BCH242Y1; BCH311H1/ MGY311Y1/ PSL350H1

Breadth Requirements: Living Things and Their Environment (4)

BCH425H1 - Structural Biology: Principles and Practice

Hours: 24L

Theory of modern biophysical techniques as applied to the study of the structure and function of macromolecules; emphasis on X-ray crystallography, electron cryomicroscopy, NMR spectroscopy, and other spectroscopic methods.

Prerequisite: BCH210H1/ BCH242Y1. This is a problem-solving course and will require use of skills from introductory physics, math, and/or chemistry courses.

Breadth Requirements: Living Things and Their Environment (4)

BCH426H1 - Regulation of Signalling Pathways

Hours: 24L

This course is focused on the molecular aspects of signal transduction, covering how cells receive and then transmit signals via intracellular proteins such as kinases and phosphatase and how this ultimately regulates cell function. Specific topics covered include regulation and signalling by extracellular ligands including morphogens, growth factors and/or insulin, how signalling pathway crosstalk modulates cell function and low and high throughput methodological approaches used to elucidate signalling mechanisms.

Prerequisite: BCH210H1/ BCH242Y1; BCH311H1/ MGY311Y1/ PSL350H1

Breadth Requirements: Living Things and Their Environment (4)

BCH428H1 - Genomics of Microbial Communities in Human Health and Beyond

Hours: 24L/12P

There is a growing appreciation that microbes do not operate in isolation but form parts of larger populations and communities (microbiomes) with unique considerations for human health. Combining lectures, small group discussions, and a computer lab component, this course will cover how genomics can be applied to analyze microbial communities and the transformative discoveries that continue to result.

Prerequisite: BCH210H1/ BCH242Y1; BCH311H1/ MGY311Y1/ CSB349H1

Breadth Requirements: Living Things and Their Environment (4)

BCH440H1 - Protein Homeostasis

Hours: 24L

Protein homeostasis is dependent on the coordinated synthesis, folding, localization and degradation of the thousands of proteins in a living cell. This course deals with selected aspects of the process with emphasis on: i) protein folding and the role of chaperones, ii) protein degradation via the ubiquitin proteasome system, iii) protein folding and quality control in the ER and iv) ER-associated degradation and the unfolded protein response. The course will serve as a foundation for those with an interest in how cellular protein levels and conformations are maintained.

Prerequisite: BCH210H1/ BCH242Y1; BCH311H1/ MGY311Y1/ PSL350H1

Breadth Requirements: Living Things and Their Environment (4)

BCH444H1 - Protein Trafficking in the Secretory & Endocytic Pathways

Hours: 24L

This course examines the molecular details of the secretory and endocytic pathways in the cell. Some of the specific topics covered will include protein translocation into the ER, chaperones and protein folding in the ER, retrotranslocation and protein degradation, the Unfolded Protein Response (UPR), vesicle biogenesis and ER-Golgi transport, regulated secretion, basic concepts in endocytosis and protein sorting in polarized cells. Emphasis is placed on current experimental approaches. A good understanding of basic biochemical methods is an asset.

Prerequisite: BCH210H1/ BCH242Y1; BCH311H1 (75% or higher)/ MGY311Y1 (75% or higher)/ PSL350H1 (75% or higher).

Breadth Requirements: Living Things and Their Environment (4)

BCH445H1 - Organelles in Cell Function and Death

Hours: 24L

Advanced principles and concepts of cell biology are covered, including the structure, life cycle, and dynamic behavior of cell organelles. The cellular processes regulated by organelles, including the life and death of the cell and cellular communication, are highlighted. The course will also cover techniques and technologies that have advanced studies of the cell.

Prerequisite: (BCH210H1/ BCH242Y1), (BIO230H1/ BIO255H1), (BCH311H1/ MGY311Y1/ PSL350H1)

Breadth Requirements: Living Things and Their Environment (4)

BCH446H1 - Membrane Dynamics of the Cell Surface

Hours: 24L

This course covers the principles and concepts related to molecular cell biology of the cell surface in multicellular organisms. Topics include: biophysical properties of cells, membranes, and extracellular matrix, dynamic remodelling of the cytoskeleton; cell-cell and cell-matrix interactions; maintenance of planar and apical-basal cell polarity; cytokinesis, viral uptake by macropinocytosis and engulfment by phagocytosis. In addition to lectures, groups of students will interpret a recent scientific paper related to the course material to be formally presented during regular class hours.

Prerequisite: BCH210H1/ BCH242Y1; BCH311H1/ MGY311Y1/ PSL350H1.

Exclusion: CSB331H1, CSB428H1

Breadth Requirements: Living Things and Their Environment (4)

BCH448H1 - Structure and Function of the Nucleus

Hours: 24L

This course examines the structure and function of the cell nucleus and the genome through the lens of biochemistry, molecular biology, cell biology and evolution. A focus is placed on the major scientific developments that shaped our current understanding. Topics that will be covered are eukaryogenesis, junk DNA, the structure of DNA and chromatin, the transfer of information between genotype and phenotype, the filtering of information found in the

genome into biologically relevant molecules such as mRNA, the processing and export of these products from the nucleus into the cytoplasm, and the translation of mRNA into protein. We will also investigate how various organelles, such as the endoplasmic reticulum and mitochondria, played a role in the evolution of the nucleus. Finally we will investigate how biological information is partitioned during mitosis.

Prerequisite: BCH210H1/ BCH242Y1; BCH311H1/ MGY311Y1/ PSL350H1

Breadth Requirements: Living Things and Their Environment (4)

BCH449H1 - Medical Biochemistry

Hours: 24L/12T

This course will apply core biochemical principles to explain the pathogenesis of emerging diseases at the molecular level and describe advanced biochemical technologies used to understand and treat these illnesses. Students will be exposed to how biochemical principles influence medical diagnoses, therapy and the development of new drugs.

Prerequisite: BCH242Y1/(BCH210H1, BCH311H1), BIO230H1

Breadth Requirements: Living Things and Their Environment (4)

BCH450H1 - Antibiotics and Antibiotic Targets

Previous Course Number: BCH350H1

Hours: 24L/12T

This course will cover the action of the biochemical targets of the existing antibiotics (nucleotide-, RNA-, DNA-, protein- and cell wall synthesis, the manner in which these pathways are inhibited in antimicrobial therapy and the biochemical basis of antibiotic resistance. The biochemistry and origin of naturally occurring and synthetic antibiotics will be introduced. (Enrolment limited.)

Prerequisite: BCH242Y1/(BCH210H1, BCH311H1)

Exclusion: BCH350H1

Breadth Requirements: Living Things and Their Environment (4)

BCH470H1 - Independent Research Project

Hours: 144P

This course provides an opportunity for individual research with a specific topic of study. Students are mentored and supervised by research scientists and faculty associated with the University of Toronto. It provides students an opportunity to enhance and apply their knowledge and understanding learned in other courses. Direct supervision must be provided by a faculty member within the Department of Biochemistry. Not eligible for the CR/NCR option.

Prerequisite: (BCH340H1; BCH377H1; BCH378H1; 75% or higher in MGY311Y1)/(BCH370H1; 80% or higher in BCH311H1); and approval of the course coordinator.

Corequisite: BCH478H1

Exclusion: BCH473Y1

Breadth Requirements: Living Things and Their Environment (4)

BCH471H1 - Independent Research Project

Hours: 144P

This course provides an opportunity for individual research with a specific topic of study. Students are mentored and supervised by research scientists and faculty associated with the University of Toronto. It provides students an opportunity to enhance and apply their knowledge and understanding learned in other courses. Direct supervision must be provided by a faculty member within the Department of Biochemistry. Not eligible for the CR/NCR option.

Prerequisite: (BCH340H1; BCH377H1; BCH378H1; 75% or higher in MGY311Y1)/(BCH370H1; 80% or higher in BCH311H1); and approval of the course coordinator.

Corequisite: BCH478H1

Exclusion: BCH473Y1

Breadth Requirements: Living Things and Their Environment (4)

BCH472Y1 - Advanced Summer Research Project in Biochemistry

Hours: 144P

This course provides opportunities to pursue an original individual research project in a particular area of biochemistry, under the direct supervision of a Biochemistry Department faculty member. Students are responsible for arranging for supervision by a Biochemistry Department faculty member. To apply for enrolment, students are required to complete the application form by contacting the Course Coordinator by the end of April. Not eligible for CR/NCR option.

Prerequisite: A final grade of 75% or higher in each of BCH340H1; BCH377H1.

Breadth Requirements: Living Things and Their Environment (4)

BCH473Y1 - Advanced Research Project in Biochemistry

Hours: 144P

This course provides opportunities to pursue an original individual research project in a particular area of biochemistry, under the direct supervision of a Biochemistry Department faculty member. Students are responsible for arranging for supervision by a Biochemistry Department faculty member. To apply for enrolment, students are required to complete the application form by contacting the Course Coordinator before the end of August. Not eligible for CR/NCR option.

Prerequisite: For Specialist: BCH340H1; BCH377H1; 75% or higher in MGY311Y1. For Major: BCH370H1; 80% or higher in BCH311H1.

Corequisite: BCH478H1

Breadth Requirements: Living Things and Their Environment (4)

BCH478H1 - Advanced Biochemistry Laboratory

Hours: 24L/84P

Experiments extend students' technical abilities as well as their knowledge and application of practical theory. This course is designed as an advanced successor in a progression of biochemistry laboratory experiences in BCH242Y1 and BCH377H1 that will equip students with a spectrum of practical abilities that are of vital importance in scientific research. (**Lab fees: \$25**)

Prerequisite: BCH340H1, BCH377H1, MGY311Y1

Breadth Requirements: Living Things and Their Environment (4)

BCH479H1 - Advanced Seminar in Biochemistry

Hours: 24S

This seminar course will foster close interactions between students and Faculty and encourage in depth discussion not only of results but the ways the results were presented and the rationales for experimental design. Critical thinking skills will be developed, as will presentation skills, as students become presenters of results and take on the

role of scientist presenting and analyzing new findings. Writing skills will be developed through a written assignment. Students within the audience will also have access to the experimental papers and be encouraged to pose thoughtful questions about research and the ways that research can be communicated within the scientific community. This seminar course will foster an appreciation of scientific writing and give students a venue to develop their communication skills. The goal of the seminar course is to improve both the written and oral scientific communication skills and to increase the knowledge of key papers in Biochemistry.

Note: In addition to the required courses listed in the prerequisites, students enrolling in this course need to contact the Department at biochemistry.undergrad@utoronto.ca.

Prerequisite: For BCH Majors: [BCH340H1](#); [BCH370H1](#)
For BCH Specialists: [BCH340H1](#); [BCH377H1](#) Students in the BCH Majors and Specialists need to email the [Department](#) as well in order to enrol in this course.

Breadth Requirements: Living Things and Their Environment (4)

Biology

Introduction

Biology is the scientific study of life. At no time in history has biology been more visible and important to human life and the future of our planet. The study of biology has vast applications: in understanding one's own body, in improving human health and natural resources, in grappling with the ethical questions that face humanity and in understanding the interdependent web of living organisms on the planet. Important discoveries and advances in the biological sciences occur weekly as scientists and their students around the world develop and use new techniques, theories, and approaches.

The University of Toronto has an enormous depth of faculty members on the St. George campus who conduct leading-edge research and teach courses in the biological sciences. Within the Faculty of Arts and Science, St. George campus, there is no single biology department; members of the Departments of Cell & Systems Biology (CSB) and Ecology & Evolutionary Biology (EEB) teach biology courses across the broad spectrum of introductory to advanced topics. Each of these departments offers its own programs and courses, and jointly offer the Biology programs. These co-sponsored Programs of Study include **Biology** (Specialist, Major, Minor), **Bioinformatics & Computational Biology** (Specialist), and **Genome Biology** (Major). The program in Genome Biology also includes the Department of Molecular Genetics & Microbiology as a co-sponsor, and the program in Bioinformatics & Computational Biology additionally includes the Departments of Biochemistry and Computer Science as co-sponsors.

Students should consult the Cell & Systems Biology and Ecology & Evolutionary Biology entries in this Calendar about additional courses available in the broad subject areas of bioinformatics, cell and molecular biology, conservation and environmental biology, developmental biology, ecology, evolutionary biology, genetics, physiology, and genome biology. The diverse course offerings in the Biology programs allow students to customize their educational experience to match their personal interests and career aspirations.

High School Prerequisites and First-Year Requirements

Because many areas of biology draw on mathematics and the physical sciences, background preparation in calculus and chemistry from high school is required for students pursuing some programs in biology and recommended for others.

Students entering their first year in the life sciences take BIO120H1 and BIO130H1. These courses are taken by students who have successfully completed Grade 12 Biology (or an equivalent course); BIO130H1 also requires students to have successfully completed Grade 12 Chemistry (or an equivalent course). These single-semester courses are a prerequisite for almost all further courses in the life sciences. It is possible for students to enrol in BIO220H1 concurrently with BIO130H1.

All co-sponsored Biology programs have unlimited enrolment and no specific admission requirements. All students who have completed at least 4.0 credits are eligible to enrol (most single-semester courses are a 0.5 credit). Program completion requires 12.0-12.5 credits of courses for a Specialist, 8.0 credits for a Major, or 4.0 credits for a Minor. To fulfill graduation degree requirements, students must complete either one Specialist, two Majors, or one Major with two Minors. Students may choose a Specialist to focus in-depth on a single subject area or may pair complementing Majors (or Minors) to customize their education and training to encompass the breadth of their interests.

General Biology Programs

Students in the **Biology Specialist** and **Biology Major** programs obtain a foundation in the core areas of cell and molecular biology, ecology and biodiversity, evolutionary biology, physiology and genetics; as well as in calculus, chemistry and statistics (Specialist), or chemistry (Major). These programs are flexible in allowing students many possible course pathways that are compatible with completing program requirements, encouraging students to explore the diversity of their biological interests and to obtain broad training in life sciences. In the upper years, students take advanced courses in specific biological topics, and can also include courses in the biological sciences offered by other units. In their final year, students take at least 1.0 credit (*yearlong*) or two 0.5 credits (Specialist) or one 0.5 credit (Major) in an advanced integrative, inquiry-based course in the biological sciences offered by the departments of Cell & Systems Biology and Ecology & Evolutionary Biology, including seminar, independent research project, and field courses. Students who wish to focus either on plant and microbial biology or on animal biology can take courses within these programs that

concentrate in these subject areas. Students in these Biology Programs of Study prepare themselves for diverse life sciences career trajectories that depend on critical thinking and practical hands-on skills, including postgraduate study in biological sciences and medicine. The **Biology Minor** program offers students an introduction to cell and molecular biology, ecology, evolutionary biology, and physiology.

The Biology Specialist, Major and Minor programs are administered by the Department of Ecology & Evolutionary Biology, and co-sponsored by the Department of Cell & Systems Biology. Students requiring more information or advising about these programs are encouraged to visit the departmental website <https://eeb.utoronto.ca/education/undergraduate/> or to contact the EEB Undergraduate Office, Earth Sciences Centre (25 Willcocks St.), Room 3055B, undergrad.eeb@utoronto.ca, 416-978-2084.

Biology Programs in Genomics and Informatics

Genomics, the study of the structure, function and evolution of the genome, is among the newest and most rapidly growing fields of both basic and applied science, and nearly all of the more traditional disciplines in biology and medicine are being revolutionized by genomic tools. The growing flood of data on the DNA, RNA, and protein sequences of organisms provides unprecedented opportunities to address fundamental biological questions such as the causes of disease, the genetic basis of development, the nature of gene regulation, the extent and causes of adaptive evolution, and the history of species on planet earth, including humans. Genome biology and bioinformatics are highly interdisciplinary fields, encompassing concepts and practices from such diverse fields as cell and molecular biology, evolutionary genetics, and computer science. The **Bioinformatics & Computational Biology Specialist** program is an interdepartmental, interdisciplinary Program of Study that balances computer-science and life-science courses. Students in the **Genome Biology Major** program will receive a uniquely broad training in these concepts and practices, with a key focus on conceptual training in molecular biology, bioinformatics and evolutionary genetics, and practical training in both computational and wet-lab genomics research.

Note: The **Bioinformatics & Computational Biology Specialist** program has deregulated fees, which are incurred after enrolment in program. Please refer to the [Arts & Science Program Toolkit](#) for more information.

The Bioinformatics & Computational Biology Specialist and Genome Biology Major programs are administered by the Department of Cell & Systems Biology, and are co-

sponsored by the Departments of Ecology & Evolutionary Biology and Molecular Genetics & Microbiology. The Bioinformatics & Computational Biology Specialist additionally includes the Departments of Biochemistry and Computer Science as program co-sponsors. Students requiring more information or advising about these programs are encouraged to visit the departmental website, <https://csb.utoronto.ca/>, or contact the CSB Undergraduate Office, Ramsay Wright Building (25 Harbord St.), Room 424, 416-978-3477.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Biology programs impacted by this policy: ASSPE2364, ASMAJ2364, and ASMIN2364

Biology Programs

General Biology Programs

Biology Specialist (Science Program) - ASSPE2364

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

The Biology Specialist, Major, and Minor programs are administered through the Department of Ecology & Evolutionary Biology. Contact: undergrad.eeb@utoronto.ca

(12.0 credits including at least 1.0 credit at the 400-level)

First Year (3.0 credits): BIO120H1; BIO130H1; (CHM135H1, CHM136H1)/ CHM151Y1; (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

Higher Years:

1. 2.5 credits: BIO220H1; BIO230H1/ BIO255H1; BIO251H1/ EEB255H1/ EEB263H1/ EEB266H1/ EEB267H1/ EEB268H1; BIO270H1/ PSL300H1; BIO260H1/ HMB265H1

2. 0.5 credit in statistics from: [EEB225H1](#), [PSY201H1](#), [STA220H1](#), [STA257H1](#), [GGR270H1](#), [STA288H1](#)

3. 0.5 credit from chemistry, physics or statistics: [CHM220H1](#), [CHM247H1](#)/ [CHM249H1](#), [PHY131H1](#), [PHY151H1](#), [PSY202H1](#), [STA221H1](#), [STA255H1](#), [STA261H1](#)

4. 1.5 credits at the 200+ level from: BCH; BIO; [CJH332H1](#); CSB (excluding [CSB201H1](#), [CSB202H1](#)); EEB (excluding [EEB202H1](#), [EEB208H1](#), [EEB214H1](#), [EEB215H1](#)); [EHJ352H1](#); [ENV432H1](#); [IMM250H1](#); [JHE353H1](#), [JHE355H1](#); [MGY200H1](#), [MGY250H1](#), [MGY277H1](#); [NFS284H1](#); [PSY397H1](#), [PSY497H1](#)

5. 0.5 credit at the 300+ level in **plant or microbial biology** from: [CSB340H1](#), [CSB350H1](#), [CSB351Y1](#), [CSB353H1](#), [CSB450H1](#), [CSB451H1](#), [CSB452H1](#), [CSB454H1](#), [CSB459H1](#), [CSB460H1](#), [CSB475H1](#), [EEB328H1](#), [EEB340H1](#), [EEB403H1](#), [EEB405H1](#), [EEB410H1](#), [EEB428H1](#), [EEB440H1](#)

6. 0.5 credit at the 300+ level in **animal biology** from: [CJH332H1](#), [CSB325H1](#), [CSB327H1](#), [CSB328H1](#), [CSB329H1](#), [CSB330H1](#), [CSB331H1](#), [CSB332H1](#), [CSB343H1](#), [CSB346H1](#), [CSB348H1](#), [CSB426H1](#), [CSB427H1](#), [CSB428H1](#), [CSB429H1](#), [CSB430H1](#), [CSB431H1](#), [CSB432H1](#), [CSB435H1](#), [CSB445H1](#), [CSB447H1](#), [CSB483H1](#); [EEB322H1](#), [EEB380H1](#), [EEB382H1](#), [EEB384H1](#), [EEB386H1](#), [EEB388H1](#), [EEB390H1](#), [EEB440H1](#), [EHJ352H1](#)

NOTE: [BIO270H1](#) and [BIO271H1](#) are prerequisites for 300+ level CSB courses in physiology.

7. 2.0 credits at the 300+ level (at least 1.0 credit must be from Group 1) from:

Group 1: [CJH332H1](#); CSB; EEB; [EHJ352H1](#); [ENV432H1](#); [JHE353H1](#), [JHE355H1](#); [PSY397H1](#), [PSY497H1](#)

Group 2: ANA; [ANT333Y1](#), [ANT338H1](#), [ANT430H1](#), [ANT436H1](#); BCH; HMB; IMM; NFS; MGY; PCL; PSL

8. 1.0 credit at the 400-level from: CSB; EEB; [ENV432H1](#)

NOTE: Students who wish to focus on either **plant or microbial biology**, or **animal biology** should take courses in 7. and 8. that concentrate in these subject areas as listed in 5. and 6., respectively. [BIO271H1](#)/ [PSL301H1](#) is highly recommended for students concentrating in animal biology and is a prerequisite for 300+ level CSB courses in physiology.

Biology Major (Science Program) - ASMAJ2364

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

The Biology Specialist, Major, and Minor programs are administered through the Department of Ecology & Evolutionary Biology. Contact: undergrad.eeb@utoronto.ca

(8.0 credits including at least 1.5 credits at the 300+ level and 0.5 credit at the 400 level)

First Year (2.0 credits): [BIO120H1](#); [BIO130H1](#); ([CHM135H1](#), [CHM136H1](#))/ [CHM151Y1](#)

Higher Years:

1. 2.5 credits: [BIO220H1](#); [BIO230H1](#)/ [BIO255H1](#); [BIO251H1](#)/ [EEB255H1](#)/ [EEB263H1](#)/ [EEB266H1](#)/ [EEB267H1](#)/ [EEB268H1](#); [BIO270H1](#)/ [PSL300H1](#); [BIO260H1](#)/ [HMB265H1](#)

2. 1.5 credits from: BCH; BIO; [CJH332H1](#); CSB (excluding [CSB195H1](#), [CSB196H1](#), [CSB197H1](#), [CSB198H1](#), [CSB199H1](#), [CSB201H1](#), [CSB202H1](#)); EEB (excluding [EEB196H1](#), [EEB197H1](#), [EEB198H1](#), [EEB199H1](#), [EEB202H1](#), [EEB208H1](#), [EEB214H1](#), [EEB215H1](#)); [EHJ352H1](#); [IMM250H1](#); [JHE353H1](#), [JHE355H1](#); [MGY200H1](#), [MGY250H1](#), [MGY277H1](#); [NFS284H1](#); [PSY397H1](#), [PSY497H1](#)

3. 1.5 credits at 300+ level from: ANA; [ANT333Y1](#), [ANT338H1](#), [ANT430H1](#), [ANT436H1](#); BCH; [CJH332H1](#); CSB; EEB; [EHJ352H1](#); [ENV432H1](#); HMB; IMM; [JHE353H1](#), [JHE355H1](#); MGY; PCL; PSL; [PSY397H1](#), [PSY497H1](#)

4. 0.5 credit at 400-level from: CSB; EEB; [ENV432H1](#)

NOTE: Students who wish to focus on either **plant or microbial biology**, or **animal biology** should take courses in 2., 3., and 4. that concentrate in these subject areas (as listed below).

CSB and EEB courses in **plant or microbial biology**:

[CSB340H1](#), [CSB350H1](#), [CSB351Y1](#), [CSB353H1](#), [CSB450H1](#), [CSB451H1](#), [CSB452H1](#), [CSB454H1](#), [CSB459H1](#), [CSB460H1](#), [CSB475H1](#); [EEB268H1](#), [EEB328H1](#), [EEB340H1](#), [EEB405H1](#), [EEB428H1](#), [EEB440H1](#)

CSB and EEB courses in **animal biology**: [BIO271H1](#)/

[PSL301H1](#); [CJH332H1](#); [CSB325H1](#), [CSB327H1](#), [CSB328H1](#), [CSB329H1](#), [CSB330H1](#), [CSB331H1](#), [CSB343H1](#), [CSB346H1](#), [CSB348H1](#), [CSB426H1](#), [CSB427H1](#), [CSB428H1](#), [CSB429H1](#), [CSB430H1](#), [CSB431H1](#), [CSB432H1](#), [CSB435H1](#), [CSB445H1](#), [CSB447H1](#), [CSB483H1](#); [EEB263H1](#), [EEB266H1](#), [EEB267H1](#), [EEB322H1](#), [EEB380H1](#), [EEB382H1](#), [EEB384H1](#), [EEB386H1](#), [EEB388H1](#), [EEB390H1](#), [EEB440H1](#); [EHJ352H1](#). ([BIO271H1](#)/ [PSL301H1](#) is highly recommended for students concentrating in animal biology and is a prerequisite for 300+ level CSB courses in physiology.)

Biology Minor (Science Program) - ASMIN2364

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

The Biology Specialist, Major, and Minor programs are administered through the Department of Ecology & Evolutionary Biology. Contact: undergrad.eeb@utoronto.ca

4.0 credits

First Year (1.0 credit): [BIO120H1](#), [BIO130H1](#)

Higher Years:

1. [BIO220H1](#)

2. [BIO230H1](#)/ [BIO255H1](#)

3. 0.5 credit from: [BIO251H1](#), [BIO260H1](#), [BIO270H1](#), [BIO271H1](#), [EEB255H1](#), [EEB263H1](#), [EEB266H1](#), [EEB267H1](#), [EEB268H1](#), [HMB265H1](#), [PSL300H1](#), [PSL301H1](#)

4. 1.5 credits (1.0 credit must be at the 300+ level) from: [BIO](#), [CJH332H1](#), [CSB](#) (excluding [CSB195H1](#), [CSB196H1](#), [CSB197H1](#), [CSB198H1](#), [CSB199H1](#), [CSB201H1](#), [CSB202H1](#)), [EEB](#) (excluding [EEB196H1](#), [EEB197H1](#), [EEB198H1](#), [EEB199H1](#), [EEB202H1](#), [EEB208H1](#), [EEB214H1](#), [EEB215H1](#)), [EHJ352H1](#), [ENV432H1](#), [HMB265H1](#), [JHE353H1](#), [JHE355H1](#), [MGY200H1](#), [MGY250H1](#), [MGY277H1](#), [PSY397H1](#), [PSY497H1](#)

Biology Programs in Genomics and Informatics

Bioinformatics and Computational Biology Specialist (Science Program) - ASSPE1868

The genomic and post-genomic era brings opportunities for new insight into all aspects of biology and medicine, based on the computational analysis of very large datasets in a biological context. The Bioinformatics and Computational Biology Program is an interdepartmental, interdisciplinary Program of Study that balances

computer-science and life-science courses towards that goal. As a Specialist Program it is designed to prepare students for graduate studies in the field.

The Program is formally administered by the Department of Cell and Systems Biology and co-sponsored by the Departments of Biochemistry, Computer Science, Ecology and Evolutionary Biology, and Molecular Genetics; all sponsoring Departments have clear trajectories to extend the Program into graduate studies in the respective Department.

Note: this program has deregulated fees, which are incurred after enrolment in the program. Please refer to [Arts & Science Registration Instructions](#) for more information.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- [BIO130H1](#) and ([CSC108H1](#)/ [CSC148H1](#)/ [CSC110Y1](#))
or
- [BIO230H1](#) and [CSC236H1](#)

To ensure that students admitted to the program will be successful, applicants with a grade average lower than 75% in these required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program. While it is difficult to predict what will constitute a "competitive" grade average in a given year, based on previous years the estimate is =mid 80s.

Applications from students lacking a numerical grade in one of the specified prerequisites may be considered on the basis of their entire academic record and the availability of space in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have

been admitted to the Bioinformatics & Computational Biology Specialist in the Summer after Year 2.

Completion Requirements:

Specialist program:
(12.5 credits)

First or second year:

Foundational courses (5.0 credits total)

(MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1
(CSC108H1, CSC148H1)/ CSC110Y1
(CSC111H1/ CSC165H1, CSC236H1)/ CSC240H1 (1)
CSC263H1/ CSC265H1
(CHM135H1, CHM136H1)/ CHM151Y1
BIO130H1

Upper years:

Program requirements (7.5 credits total)

STA237H1/ STA247H1/ STA255H1/ STA257H1
CSC207H1
CSC209H1
CSC373H1
BIO230H1/ BIO255H1
BIO260H1/ HMB265H1
(BCH210H1, (BCH311H1/ CSB349H1/ MGY311Y1))/
BCH242Y1
BCH441H1/ MGY441H1/ CSB472H1
BCB330Y1
BCB410H1
BCB420H1
BCB430Y1

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream

Notes:

BCB students are allowed to enrol in up to 2.5 CSC credits at the 300/400-level

Course substitutions are possible with written permission of the Program Director. Note that the requirements for a co-sponsoring Department's major can normally be fulfilled with 0.5 to 3.5 additional credits. All Major programs in the co-sponsoring life science departments require BIO120H1, however, it is not formally a part of this Specialist Program's requirements.

(1) The "missing" 0.5 credit of the substitution does not have to be replaced. For details, please refer to the Computer Science Program instructions in this Calendar.

Former BCB students benefitted from taking CSB352H1, Bioinformatic Methods. They also found it to be helpful to take BCH441H1/ MGY441H1 prior to BCB410H1 due to BCB410H1's R programming requirement.

Quantitative Biology Major (Science Program) - ASMAJ2368

The Quantitative Biology Major program (8.0 credits) is designed for students with a deep interest in biology who wish to gain a strong grounding in quantitative methods and their application to biological questions. More than ever, advancements in biology, from the molecular through the organismal to the ecosystem level, require quantitative thinking and skills along with a strong understanding of biological processes. Interdisciplinary research that draws from the natural sciences, mathematics, statistics and computer science, is an important aspect of modern biology. This major provides foundations in biology and quantitative approaches used to test and advance biological knowledge, and is appropriate for students who wish to pursue a career or graduate studies in a broad range of life sciences, ranging from biomedical to conservation to epidemiology.

The program is delivered through a mixture of classroom-learning and applied laboratory teaching, with an emphasis on understanding how quantitative methods inform our understanding of biology, and how they can be applied to test and develop new hypotheses. Students also have access to independent research opportunities that enhance professional skills, science communication, and the development and application of knowledge in quantitative biology.

Quantitative Biology Major students have priority enrollment in the EEB courses listed, but not in courses offered by other departments, such as STA, MAT, CSC, CSB and BCB. Students should be aware that some courses listed have prerequisites that are not listed below. For students intending to pursue graduate studies, it is strongly recommended that an independent research course such as EEB498Y1 be included as part of the Quantitative Biology major.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- BIO120H1 (70%)/ BIO130H1 (70%)
- CSC108H1 (70%)/ CSC148H1 (70%)/ CSC110Y1 (70%)/ EEB125H1 (70%)/ MAT135H1 (70%)/ MAT136H1 (70%)/ MAT137Y1 (70%)/ MAT157Y1 (70%)

Completion Requirements:

(8.0 credits including at least 2.0 credits at the 300+ level, 0.5 of which must be at the 400 level)

First Year (2.5 credits):

BIO120H1, BIO130H1, EEB125H1/ CSC108H1/
CSC148H1/ CSC110Y1, (MAT135H1, MAT136H1)/
MAT137Y1/ MAT157Y1

Higher Years (5.5 credits):

- 1.5 credits: BIO220H1, BIO230H1/ BIO255H1,
BIO260H1/ HMB265H1
- 1.0 credit in introductory probability and statistics:
EEB225H1, GGR270H1, PSY201H1, PSY202H1,
STA220H1, STA221H1, STA237H1, STA238H1,
STA247H1, STA248H1, STA255H1, STA257H1,
STA261H1, STA288H1
- 0.5 credit in intermediate math: APM236H1,
MAT221H1/ MAT223H1, MAT224H1, MAT240H1,
MAT237Y1, MAT247H1
- 1.0 credit from: CSB352H1, EEB319H1,
EEB323H1, EEB324H1, EEB362H1, GGR372H1,
GGR373H1, PHY331H1
- 1.0 credit from: APM346H1, APM446H1,
APM461H1, APM462H1, CSB472H1, CSC311H1,
CSC320H1, CSC336H1, CSC343H1, CSC373H1,
CSC384H1, CSC401H1, CSC412H1, CSC413H1,
CSC420H1, EEB313H1, EEB314H1, EEB458H1,
EEB459H1, EEB460H1, EEB462H1, EEB463H1,
EEB498Y1, EEB499Y1, MAT332H1, MAT335H1,
MAT344H1, MAT351Y1, MGY428H1, PHY431H1,
PSY305H1, STA302H1, STA303H1, STA304H1,
STA305H1, STA355H1, STA365H1, STA480H1
- 0.5 credit at 400 level from: BCB410H1,
BCB420H1, CSB435H1, CSB472H1, CSB498Y1,
CSB499Y1, EEB458H1, EEB459H1, EEB460H1,
EEB462H1, EEB463H1, EEB498Y1, EEB499Y1,
PHY431H1, PSY474H1, STA480H1

Genome Biology Major (Science Program) - ASMAJ2655

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have

been admitted to the Genome Biology Major in the Summer after Year 2.

Completion Requirements:

This program is a joint program of the departments of Cell & Systems Biology, Ecology & Evolutionary Biology, and Molecular Genetics. It is administered through the Department of Cell & Systems Biology.

(8.0 credits)

First year: BIO120H1, BIO130H1; (CHM135H1,
CHM136H1)/ CHM151Y1; (MAT135H1, MAT136H1)/
MAT137Y1/ MAT157Y1

Higher years:

- BIO220H1, BIO230H1/ BIO255H1; BIO260H1/
HMB265H1; EEB225H1/ STA220H1
- Genomics fundamentals: BCH311H1/ CSB349H1/
MGY311Y1, CSB352H1; EEB323H1
- 0.5 credit laboratory course from: CSB472H1,
CSB474H1; EEB460H1
- 1.0 credit genomics elective from: CSB330H1,
CSB350H1, CSB397Y0, CSB427H1, CSB435H1,
CSB450H1, CSB457H1, CSB458H1, CSB471H1,
CSB473H1, CSB490H1, CSB491H1, CSB497H1/
CSB498Y1/ CSB499Y1; EEB362H1, EEB455H1,
EEB458H1, EEB459H1, EEB462H1, EEB463H1,
EEB397Y1/ EEB497H1/ EEB498Y1/ EEB499Y1;
EHJ352H1; MGY350H1, MGY360H1, MGY428H1,
MGY470H1, MGY480Y1

NOTE: Students taking CSB397Y0, CSB490H1,
CSB491H1, CSB497H1/ CSB498Y1/ CSB499Y1,
EEB397Y1/ EEB497H1/ EEB498Y1/ EEB499Y1 or
MGY480Y1 are encouraged to conduct a genomics-
related research project.

Students in this program have the option to complete the [Arts & Science Internship Program \(ASIP\)](#) stream.

Data Science in the Life Sciences

Bioinformatics and Computational Biology Specialist (Science Program) - ASSPE1868

The genomic and post-genomic era brings opportunities for new insight into all aspects of biology and medicine, based on the computational analysis of very large datasets in a biological context. The Bioinformatics and Computational Biology Program is an interdepartmental,

interdisciplinary Program of Study that balances computer-science and life-science courses towards that goal. As a Specialist Program it is designed to prepare students for graduate studies in the field.

The Program is formally administered by the Department of Cell and Systems Biology and co-sponsored by the Departments of Biochemistry, Computer Science, Ecology and Evolutionary Biology, and Molecular Genetics; all sponsoring Departments have clear trajectories to extend the Program into graduate studies in the respective Department.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- BIO120H1 (70%)/ BIO130H1 (70%)
- CSC108H1 (70%)/ CSC148H1 (70%)/ CSC110Y1 (70%)/ EEB125H1 (70%)/ MAT135H1 (70%)/ MAT136H1 (70%)/ MAT137Y1 (70%)/ MAT157Y1 (70%)

Completion Requirements:

(8.0 credits including at least 2.0 credits at the 300+ level, 0.5 of which must be at the 400 level)

First Year (2.5 credits):

BIO120H1, BIO130H1, EEB125H1/ CSC108H1/ CSC148H1/ CSC110Y1, (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

Higher Years (5.5 credits):

1. 1.5 credits: BIO220H1, BIO230H1/ BIO255H1, BIO260H1/ HMB265H1
2. 1.0 credit in introductory probability and statistics: EEB225H1, GGR270H1, PSY201H1, PSY202H1, STA220H1, STA221H1, STA237H1, STA238H1, STA247H1, STA248H1, STA255H1, STA257H1, STA261H1, STA288H1
3. 0.5 credit in intermediate math: APM236H1, MAT221H1/ MAT223H1, MAT224H1, MAT240H1, MAT237Y1, MAT247H1
4. 1.0 credit from: CSB352H1, EEB319H1, EEB323H1, EEB324H1, EEB362H1, GGR372H1, GGR373H1, PHY331H1
5. 1.0 credit from: APM346H1, APM446H1, APM461H1, APM462H1, CSB472H1, CSC311H1, CSC320H1, CSC336H1, CSC343H1, CSC373H1, CSC384H1, CSC401H1, CSC412H1, CSC413H1, CSC420H1, EEB313H1, EEB314H1, EEB458H1, EEB459H1, EEB460H1, EEB462H1, EEB463H1, EEB498Y1, EEB499Y1, MAT332H1, MAT335H1, MAT344H1, MAT351Y1, MGY428H1, PHY431H1, PSY305H1, STA302H1, STA303H1, STA304H1, STA305H1, STA355H1, STA365H1, STA480H1
6. 0.5 credit at 400 level from: BCB410H1, BCB420H1, CSB435H1, CSB472H1, CSB498Y1, CSB499Y1, EEB458H1, EEB459H1, EEB460H1, EEB462H1, EEB463H1, EEB498Y1, EEB499Y1, PHY431H1, PSY474H1, STA480H1

Genome Biology Major (Science Program) - ASMAJ2655

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have

been admitted to the Genome Biology Major in the Summer after Year 2.

Completion Requirements:

This program is a joint program of the departments of Cell & Systems Biology, Ecology & Evolutionary Biology, and Molecular Genetics. It is administered through the Department of Cell & Systems Biology.

(8.0 credits)

First year: BIO120H1, BIO130H1; (CHM135H1, CHM136H1)/ CHM151Y1; (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

Higher years:

1. BIO220H1, BIO230H1/ BIO255H1; BIO260H1/ HMB265H1; EEB225H1/ STA220H1
2. Genomics fundamentals: BCH311H1/ CSB349H1/ MGY311Y1, CSB352H1; EEB323H1
3. 0.5 credit laboratory course from: CSB472H1, CSB474H1; EEB460H1
4. 1.0 credit genomics elective from: CSB330H1, CSB350H1, CSB397Y0, CSB427H1, CSB435H1, CSB450H1, CSB457H1, CSB458H1, CSB471H1, CSB473H1, CSB490H1, CSB491H1, CSB497H1/ CSB498Y1/ CSB499Y1; EEB362H1, EEB455H1, EEB458H1, EEB459H1, EEB462H1, EEB463H1, EEB397Y1/ EEB497H1/ EEB498Y1/ EEB499Y1; EHJ352H1; MGY350H1, MGY360H1, MGY428H1, MGY470H1, MGY480Y1

NOTE: Students taking CSB397Y0, CSB490H1, CSB491H1, CSB497H1/ CSB498Y1/ CSB499Y1, EEB397Y1/ EEB497H1/ EEB498Y1/ EEB499Y1 or MGY480Y1 are encouraged to conduct a genomics-related research project.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Discipline-Specific Biology Programs within CSB and EEB:

In addition to the co-sponsored Biology programs, the Departments of Cell & Systems Biology and Ecology & Evolutionary Biology each administer Specialist, Major and Minor programs with particular disciplinary emphases within the biological sciences of the Faculty of Arts and Science, St. George campus. Discipline-specific Major or Minor programs may be paired with each other, with the general Biology Major or Minor programs, or with programs from other departments in accord with the University's degree requirements. Students may seek

more information about programs and courses offered by CSB and EEB from their respective Calendar entries:

- Cell & Systems Biology offers the **Animal Physiology** Major and **Cell & Molecular Biology** Major and Specialist programs
- Ecology & Evolutionary Biology offers the **Biodiversity & Conservation Biology** Major, **Ecology & Evolutionary Biology** Major and Specialist, and **Environmental Biology** Major and Minor programs

Other Discipline-Specific Programs in the Life Sciences:

Inside and outside the Faculty of Arts and Science on the St. George campus, several departments administer Specialist, Major and Minor programs with particular disciplinary emphases within life sciences. Many of the Life Science programs are collaborative programs given by the Faculty of Arts and Science and departments in the Temerty Faculty of Medicine. Students requiring more information and course details are encouraged to visit the corresponding departmental websites and departmental Calendar entries. These additional Life Science departments and programs are listed in this Calendar:

- Biochemistry
- Human Biology
- Immunology
- Laboratory Medicine & Pathobiology
- Molecular Genetics & Microbiology
- Nutritional Sciences
- Pharmaceutical Chemistry
- Pharmacology & Toxicology
- Physiology
- Psychology

Core Biology Courses

Courses with a BIO designation form core components of the biology curriculum and are taught by instructors from the Departments of Cell & Systems Biology and Ecology & Evolutionary Biology. These core courses include BIO120H1 and BIO130H1 as well as BIO220H1 and BIO230H1 that are required for most life sciences programs at the University of Toronto.

The Departments of Cell & Systems Biology and Ecology & Evolutionary Biology together also offer **over 100 courses in biology** from the 200-level to the 400-level, which contribute to the course requirements and electives for the co-sponsored Biology programs. Topics range from animal behaviour, biodiversity, bioinformatics, cell and

molecular biology, conservation and environmental biology, developmental biology, ecology, evolutionary biology, genetics, genome biology, neurobiology, plant biology, and physiology. They include course formats as small-class seminars, bench lab practicals, field excursions, computer labs, and individualized research experiences with research professors. These courses use designations CSB or EEB, as well as some collaborative course codes administered by these departments.

Biology Courses

BIO120H1 - Adaptation and Biodiversity

Hours: 24L/15P

Principles and concepts of evolution and ecology related to origins of adaptation and biodiversity. Mechanisms and processes driving biological diversification illustrated from various perspectives using empirical and theoretical approaches. Topics include: genetic diversity, natural selection, speciation, physiological, population, and community ecology, maintenance of species diversity, conservation, species extinction, global environmental change, and invasion biology. A lab coat is required. (Lab Materials Fee: \$26)

Prerequisite: Grade 12 Biology or equivalent. Students without high school Biology must consult the BIO120 Office (bio120@utoronto.ca)

Breadth Requirements: Living Things and Their Environment (4)

BIO130H1 - Molecular and Cell Biology

Hours: 36L/15P

One of the goals of modern biology is to understand how the basic building blocks of life give rise to biological form and function. This course provides students with a common lexicon to understand the key principles and concepts in molecular and cell biology, with a focus on how the building blocks of life lead to functioning cells. (Lab Materials Fee: approximately \$11). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is \$27).

Prerequisite: SBI4U and SCH4U (Grade 12 University Preparation Biology and Chemistry) or permission of department. Please contact bio130@utoronto.ca for more information.

Exclusion:
BIOA01H3, BIO152H5

Breadth Requirements: Living Things and Their Environment (4)

Students are encouraged to view the full list of courses from these departments on their respective Calendar entries:

- Cell & Systems Biology
- Ecology & Evolutionary Biology

BIO220H1 - From Genomes to Ecosystems in a Changing World

Hours: 24L/15P

Dynamics of genetic and ecological change in biological systems, from genomes to ecosystems. Evolutionary genetic and ecological perspectives on wide-ranging topics including disease, aging, sexual conflict, genetics of human differences, conservation, and global climate change. Applications of evolutionary, ecological, and molecular-genetic principles and processes. Responsibilities of human societies in a changing world. (Lab Materials Fee: \$26).

Prerequisite: BIO120H1

Recommended Preparation: BIO130H1, BIO230H1

Breadth Requirements: Living Things and Their Environment (4)

BIO230H1 - From Genes to Organisms

Hours: 36L/15P

The genome is the "book of life," providing instructions to construct an organism. This course introduces genome biology and explores how the building blocks of life are networked into functioning organisms. We will investigate how cells perceive internal and external cues, how gene expression is shaped by this perception, and how these events give rise to tissues, organs, and whole organisms. (Lab Materials Fee: approximately \$16). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is \$27).

Prerequisite: BIO130H1, (CHM135H1, CHM136H1)/ (CHM138H1, CHM139H1)/ CHM151Y1

Exclusion: BIO255H1

Breadth Requirements: Living Things and Their Environment (4)

BIO251H1 - Form, Function and Development in Plants

Hours: 24L/12T

This course is an introduction to structure, function and ecology of vegetative and reproductive processes in plants with a focus on flowering plants and gymnosperms. Topics of study in lecture and laboratory tutorials include photosynthesis, transport processes, plant reproduction, patterns of plant growth and development, and the role of hormones in plant development.

Prerequisite: BIO120H1

Breadth Requirements: Living Things and Their Environment (4)

BIO255H1 - From Genes to Organisms with Advanced Laboratory

Hours: 36L/33P

The genome is the "book of life," providing instructions to construct an organism. This course introduces genome biology and explores how the building blocks of life are networked into functioning organisms. We will investigate how cells perceive internal and external cues, how gene expression is shaped by this perception, and how these events give rise to tissues, organs, and whole organisms. The Enhanced Laboratory provides the opportunity for greater laboratory skill development in modern investigative techniques and is intended for students interested in conducting their own laboratory research. (Lab Materials Fee: \$53). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is \$27).

Prerequisite: BIO130H1, (CHM135H1, CHM136H1) / (CHM138H1, CHM139H1) / CHM151Y1, cGPA 3.0

Exclusion: BIO230H1

Recommended Preparation: BCH210H1 (taken concurrently or previously)

Breadth Requirements: Living Things and Their Environment (4)

BIO260H1 - Concepts in Genetics

Hours: 48L/12T

This is a problem based course which discusses classical, molecular, developmental, and population genetics and genomics with emphasis on model organisms for genetic analysis.

Prerequisite: BIO230H1 / BIO255H1

Exclusion: HMB265H1

Breadth Requirements: Living Things and Their Environment (4)

BIO270H1 - Animal Physiology I

Hours: 24L/9P

Animal physiology is a biological sub-discipline that aims to understand, in physical and chemical terms, how animals work. This course uses examples from throughout the animal kingdom, in a comparative approach, to introduce and study homeostasis and the endocrine system. Accompanying laboratories reinforce concepts introduced in lectures and provide opportunities for students to experience firsthand the role that experimentation, data collection, interpretation of data, and communication of data plays in the nature of the scientific process. (Lab Materials Fee: approximately \$11). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is \$27).

Prerequisite: BIO130H1

Breadth Requirements: Living Things and Their Environment (4)

BIO271H1 - Animal Physiology II

Hours: 24L/9P

Animal physiology is a biological sub-discipline that aims to understand, in physical and chemical terms, how animals work. This course uses examples from throughout the animal kingdom in a comparative approach to introduce and study the nervous and cardiorespiratory systems. Accompanying laboratories reinforce concepts introduced in lectures and provide opportunities for students to experience firsthand the role that experimentation, data collection, interpretation of data, and communication of data plays in the nature of the scientific process. (Lab Materials Fee: approximately \$11). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is \$27).

Prerequisite: BIO270H1

Breadth Requirements: Living Things and Their Environment (4)

CSB280H1 - Data Science for Cell and Systems Biology

Hours: 24L/12T

The abundance of raw data in biological sciences continues to grow year after year. The skills required to navigate and thrive in this field are no longer confined to the laboratory bench as experimental results go beyond simple analyses. This course will introduce basic tools used in the analysis of big data such as dimensional reduction, visualization, and machine learning. Students will get practical experience writing code to analyze example datasets.

Exclusion: STA272H1, STA302H1

Recommended Preparation: Students should familiarize themselves with basic summary and statistical analyses. Preferably, EEB125H1 or GGR274H1

Breadth Requirements: Living Things and Their Environment (4)

Business Fundamentals

Faculty List

Professor

D. Goldreich, BS, MS, MSIA, PhD

Associate Professors, Teaching Stream

M. Khan, BCom, MBA, CPA, CA, CGEIT, CISA, CITP

R. Tassone, BComm, MEd, CPA, CA

Assistant Professor, Teaching Stream

D. Richards, BA, MBA

Introduction

The Rotman School of Management offers a Certificate in Business Fundamentals, available to students across Arts & Science who are interested in enhancing their discipline-specific education with an introduction to business. The four courses of the Certificate cover a range of domains across the business spectrum. The courses are taught in a manner which makes them accessible to students from a variety of core disciplines.

Registration Instructions for Faculty of Arts & Science students can be found in the [Program Toolkit](#) and [Course Enrolment Instructions](#) sections of the Arts & Science website.

General inquiries should be directed to your [College Registrar's office](#).

Business Fundamentals Programs

Certificate in Business Fundamentals - ASCER2400

The purpose of this certificate is to provide all interested non-Rotman Commerce students in the Faculty of Arts & Science with an opportunity to obtain some basic business knowledge as part of their degree. This could be beneficial for all disciplines within the Faculty of Arts & Science as many students go on and work in a variety of businesses and industries or want some general understanding of management disciplines when entering the workforce. This will better equip students when going

on the job market by helping them signal some business knowledge and greater career readiness.

The certificate is offered by the Rotman School of Management and is composed of 2.0 credits that can be taken as part of a student's elective courses within the 20.0 credits that are required to complete a Bachelor's degree in the Faculty of Arts & Science. This certificate and included courses are not open to non-degree students.

Enrolment Requirements:

This is a limited enrolment certificate for any non-Rotman Commerce student in the Faculty of Arts & Science. A student who has completed 4.0 credits including [MGT100H1](#) or equivalent may enrol in the Certificate.

Completion Requirements:

(2.0 credits)

Successful completion of the following four courses (or their equivalents):

1. [MGT100H1](#)
2. [MGT201H1](#)
3. [MGT230H1](#)
4. [MGT250H1](#)

No courses in the Certificate in Business Fundamentals can be taken as Credit/No Credit if they are to fulfill certificate requirements.

Notes:

- [MGT100H1](#), [MGT201H1](#), [MGT230H1](#), [MGT250H1](#) have considerable overlap with [RSM100H1](#), [RSM219H1](#), [RSM230H1](#) and [RSM250H1](#) taught in Rotman Commerce. These courses are listed as exclusions to one another.
- Students who move from the Rotman Commerce program (BCOM) to another degree program (HBA/HBSc) within Arts & Science would be able to use any completed RSM course equivalents towards the completion of the Certificate in Business Fundamentals (e.g. [RSM100H1](#) would be deemed equivalent to [MGT100H1](#) as part of the Certificate in Business Fundamentals, etc).
- Students who move from a different degree program (HBA/HBSc) within Arts & Science to the Rotman Commerce program (BCOM) would be able to count these MGT courses towards their Rotman Commerce degree (conditional on being accepted to the program based on the requirements listed in the [Rotman Commerce section of the Calendar](#)). Please note that students who are accepted to Rotman Commerce after having completed 4.0 credits are charged retroactive program fees as applicable.

- A maximum of 0.5 transfer credit of equivalent courses from UTSC or UTM may be applied toward the certificate requirements.

Business Fundamentals Courses

MGT100H1 - Fundamentals of Management

Previous Course Number: RSM100Y1

Hours: 24L

Introduction to management and its subdisciplines. Themes include business in a Canadian context, the nature of corporations, corporate governance, organizational behavior, operations, and strategy. Not open to Rotman Commerce students.

Exclusion: RSM100H1, RSM100Y1

Breadth Requirements: Society and its Institutions (3)

MGT201H1 - Fundamentals of Financial Accounting

Hours: 24L

Introduction to financial reporting and analysis that is used by companies to organize and evaluate data in light of their organization's goal. Emphasis is on decision-making and interpretation of financial statements and how they can be used to plan a firm's overall business activities through the use of real-world companies. Not open to Rotman Commerce students.

Exclusion: RSM219H1

Recommended Preparation: MGT100H1, or enrolment in the Actuarial Science Specialist or Major

Breadth Requirements: Society and its Institutions (3)

MGT230H1 - Introduction to Financial Markets

Hours: 24L

This course is an introduction to financial securities and financial markets. It discusses the structure and function of financial markets, financial institutions and market participants, as well as some tools for market analysis. The objective of the course is to provide students with basic knowledge required to understand the nature of financial securities and markets and current financial issues. Not open to Rotman Commerce students.

Exclusion: RSM230H1

Recommended Preparation: MGT100H1

Breadth Requirements: Society and its Institutions (3)

MGT250H1 - Fundamentals of Marketing

Hours: 24L

This course is designed to introduce students to the key principles of marketing. After taking the course, students will understand the marketing planning process, including segmentation, targeting, positioning, marketing analysis, and strategy. In addition, students will be able to make basic marketing decisions to profitably satisfy customer needs and execute marketing strategies including product development, pricing, distribution and communications. Not open to Rotman Commerce students.

Exclusion: RSM250H1

Recommended Preparation: MGT100H1

Breadth Requirements: Thought, Belief and Behaviour (2)

A.C. Thompson, BSc, PhD

Introduction

The Canadian Institute for Theoretical Astrophysics (CITA) is an incorporated national institute hosted by the University of Toronto, conducting research covering all of modern astrophysical theory and analysis during this remarkable age of cosmic discovery. CITA has firmly established itself as one of the top five places in the world for such research; despite its small size CITA has had a large impact on the worldwide astrophysics community. Research at CITA is carried out by about 20 research fellows, 20 graduate students, and a limited number of undergraduate students, all supervised by full-time faculty members.

Canadian Institute for Theoretical Astrophysics Courses

CTA200H1 - Computational Astrophysics

Hours: 24L/12T

Research in theoretical astrophysics encompasses cosmology, galaxy formation and black holes. This course introduces students to modern computational techniques using large scale parallel numerical simulations, carried out at CITA and SciNet. This is an intensive two-week course taught in May.

Where do elements, planets, solar systems, stars, galaxies, the Universe, and life, come from? Questions like these fascinate everyone. Theorists at CITA analyze, interpret, and explain the astronomical observations that illuminate such questions, using laboratory-tested physical laws, or as recently seen, new physical laws that the observations require but which laboratory experiments have not been able, so far, to detect. The observational data are supplied by the recent and ongoing explosion in astronomical hardware, including CHIME, ARO, ALMA, the Hubble space telescope, x-ray, infrared, and ultra-violet space telescopes, and a host of others.

CITA courses are designed for students interested in doing undergraduate research in theoretical astrophysics, and are appropriate for computer science, engineering science, physical sciences and astronomy program students.

CITA works closely with two related academic units, the Department of Physics and the David A. Dunlap Department of Astronomy and Astrophysics (DADDAA). These departments conduct research in a broad range of fields. Undergraduate and graduate students will find diverse research opportunities through CITA and these two cognate units.

For enquiries about CITA's programming in theoretical astrophysics, please contact the Interim Director, Peter Martin: pgmartin@cita.utoronto.ca

Undergraduate Enquiries: murray@cita.utoronto.ca (416-978-1778)

Website: <http://www.cita.utoronto.ca>

Prerequisite: MAT135Y1/ MAT137Y1/ MAT157Y1; (PHY131H1, PHY132H1)/(PHY151H1, PHY152H1) or their equivalent.

Recommended Preparation: Physical science, mathematics and computation, or engineering

Breadth Requirements: The Physical and Mathematical Universes (5)

CTA299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

Prerequisite: MAT135Y1/ MAT137Y1/ MAT157Y1; (PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1) or their equivalent

Recommended Preparation: Physical science, mathematics and computation, or engineering

Breadth Requirements: The Physical and Mathematical Universes (5)

CTA299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

Prerequisite: MAT135Y1/ MAT137Y1/ MAT157Y1; (PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1) or their equivalent

Recommended Preparation: Physical science, mathematics and computation, or engineering

Breadth Requirements: The Physical and Mathematical Universes (5)

CTA395Y1 - Research Topic

Course credit for research under the supervision of a faculty member. Not eligible for CR/NCR option.

Prerequisite: Minimum 8.5 credits and no more than 14.0 credits, including courses in AST, CTA200H1, or permission

CTA396Y0 - Research Topic Abroad

Course credit for research or field studies abroad under the supervision of a faculty member. Not eligible for CR/NCR option.

Prerequisite: Minimum 8.5 credits and no more than 14.0 credits including courses in AST, CTA200H1, or permission of the instructor

Recommended Preparation: Physical science, mathematics and computation, or engineering

Breadth Requirements: The Physical and Mathematical Universes (5)

CTA398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

-opportunities/research-excursions-program. Not eligible for CR/NCR option.

CTA399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

CTA399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

CTA495Y1 - Independent Topics in Astrophysics

A research project done in consultation with an individual staff member in the Institute leading to a detailed written report and oral presentation. This course is intended primarily for students in the final year of the Astronomy and Physics specialist program, although it is available to students in Engineering Science, Computer Science, or Mathematics. Students must enroll with the Undergraduate Secretary, Prof. Pen. Not eligible for CR/NCR option.

Prerequisite: 1.0 credit from: PHY324H1, PHY350H1, PHY354H1, PHY356H1, PHY357H1, PHY358H1, PHY395H1, PHY404H1, PHY408H1, AST325H1/ AST326Y1, or similar courses in Engineering Science or Mathematics.

Recommended Preparation: Physical science, mathematics and computation, or engineering

Breadth Requirements: The Physical and Mathematical Universes (5)

Centre for Caribbean Studies

Faculty List

Professors

N. Rodríguez, BA, PhD (Caribbean Studies/Spanish and Portuguese)
A. Trotz, BA, MPhil, PhD (Caribbean Studies/Women and Gender Studies)

Associate Professors

C. James, PhD (Caribbean Studies/Comparative Literature)
M.J. Newton, BA, D Phil (Caribbean Studies/History)

Assistant Professor

K. Edmonds, BA (Hons), MA, PhD (Caribbean Studies)

Introduction

Caribbean Studies is an interdisciplinary undergraduate program that consists of courses on Caribbean history and society, politics and economic development, literature and thought. Our courses deal with a wide range of issues including gender, religion, culture, ethnicity, race, development, language, colonialism, the environment and regional common markets. Caribbean Studies equips students to think about broad, theoretical and challenging intellectual issues and, at the same time, to ground that expansive thinking in deep understanding of the particular historical, political, economic, geographical, cultural and linguistic realities of the Caribbean and its diasporas. This combined interdisciplinary and area studies approach prepares students to think across disciplines about these kinds of questions, and to base their comparative, transnational and interdisciplinary thinking in concrete knowledge of the Caribbean and its people. The study of the Caribbean equips students to question the order of things, reflect on their own place in the world, and see past the Caribbean's size or current level of geo-political influence to recognize the inherent value and intellectual significance of all places and all people.

Contact:

Note: Effective Fall 2021, courses associated with New College's African Studies, Caribbean Studies, and Critical Studies in Equity and Solidarity programs will have the new "AFR," "CAR," and "CSE" designators respectively.

Caribbean Studies Major (Arts Program) - ASMAJ1545

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Consult the Communications & Undergraduate Coordinator: crb.program@utoronto.ca.

(7 credits, including at least two credits at the 300+level, 0.5 of which must be at the 400-level)

First Year:

1. CAR120Y1

Higher Years:

2. 1.0 credit from HIS230H1/ HIS231H1/ CAR220H1/

CAR221H1/ CAR225H1/ CAR226H1

3. JQR360H1

4. 2.0 credits from the Core Group at the 300+ level, at least 0.5 of which must be at the 400-level: HIS474H1,

JHN323H1, JLN327H1, JLN427H1, CAR315H1, CAR316H1, CAR317H1, CAR321H1, CAR324H1, CAR325H1, CAR328H1, CAR329H1, CAR332Y0, CAR421H1, CAR423H1, CAR426H1, CAR426Y1, CAR428H1, CAR429H1, CAR499H1, SPA486H1

5. EITHER 2.5 credits from Group A or B OR

2.0 credits if taking 1.5 credits from HIS230H1/ HIS231H1/ CAR220H1/ CAR221H1/ CAR225H1/ CAR226H1 OR

1.5 credits if taking 2.0 credits from HIS230H1/ HIS231H1/ CAR220H1/ CAR221H1/ CAR225H1/ CAR226H1

Group A:

ENG356Y1, ENG369H1, HIS106Y1, HIS221H1, HIS222H1, HIS291H1, HIS292H1, HIS359H1, HIS360H1, HIS391Y1, HIS392Y1, HIS413H1, HIS446H1, HIS474H1, POL442H1, POL467H1, SPA220Y1, WGS450H1

Group B:

AMS200H1, AMS300H1, ANT207H1, ANT320H1, ANT322H1, ANT324H1, ANT345H1, ANT346H1, ANT364H1, ANT370H1, ANT372H1, ANT374H1, ANT388H1, ANT407H1, ANT412H1, ANT420H1, CDN335H1, CIN332Y1, CRI383H1, CRI422H1, CRI429H1, CRI487H1, DRM362H1, DTS200Y1, DTS401H1, DTS402H1, DTS403H1, DTS404H1, DTS406H1, ECO306H1, ECO313H1, EEB215H1, EEB255H1, ENG270H1, ENG285H1, ENG329H1, ENG356Y1, ENG369H1, ENG370Y1, ENG385H1, ENV322H1, ENV422H1, FOR201H1, FOR306H1, FRE272H1, FRE324H1, FRE332H1, FRE336H1, FSL100H1, FSL102H1, GGR112H1, GGR240H1, GGR241H1, GGR320H1, GGR329H1, GGR338H1, HIS324H1, HIS394H1, HIS457H1, INS201Y1, INS250H1, INS300Y1, INS302H1, INS322H1, INS355H1, INS360Y1, INS390H1, INS402H1, INS491Y1, JPR374H1, JPS315H1, LAS200H1, LAS201H1, AFR150Y1, CSE240H1, CSE270H1, AFR322H1, CSE345H1, CSE346H1, AFR351Y1, CSE446H1, CSE447H1, PHL316H1, PHL362H1, POL201H1, POL349H1, POL360H1, POL384H1, POL412H1, POL417Y1, POL426H1, POL445H1, POL447H1, RLG100H1, RLG233H1, SOC209H1, SOC214H1, SOC249H1, SOC308H1, SOC311H1, SOC367H1, SOC383H1, WGS273H1, WGS355H1, WGS369H1, WGS385H1, WGS426H1, WGS440H1, WGS450H1, WGS463H1

Note: Effective Fall 2021, courses associated with New College's African Studies, Caribbean Studies, and Critical Studies in Equity and Solidarity programs will have the new "AFR," "CAR," and "CSE" designators respectively.

Caribbean Studies Minor (Arts Program) - ASMIN1545

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Consult the Communications & Undergraduate Coordinator: crb.program@utoronto.ca.

(4.0 credits including at least 1.0 credit at the 300+level)

First Year:

1. [CAR120Y1](#)

Higher Years:

2. 1.0 credit from: [HIS230H1](#), [HIS231H1](#), [CAR220H1](#), [CAR221H1](#), [CAR225H1](#), [CAR226H1](#).

3. 1.0 credit from the Core Group: [HIS230H1](#), [HIS231H1](#), [HIS474H1](#), [JHN323H1](#), [JLN327H1](#), [JLN427H1](#),

Centre for Caribbean Studies Courses

CAR120Y1 - Introduction to Caribbean Studies

Previous Course Number: NEW120Y1

Hours: 48L/24T

Explores the complex and diverse languages, geographies, regional and national histories, cultural practices, intellectual traditions and political and economic landscapes of the Caribbean region, its people and its diasporas. Students will be introduced to the main questions, themes, and debates in Caribbean Studies. Lectures and readings develop the skills to take an interdisciplinary approach to Caribbean Studies. This is a team taught course.

Exclusion: [NEW120Y1](#)

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

CAR215H1 - Caribbean Foodways Across History, Culture and Diaspora

Previous Course Number: CAR315H1

Hours: 24L

Examines the historical roots of regional Caribbean food from the colonial period to the present day, and then moves to study Caribbean food in the global and Caribbean-Canadian diasporas, in the literary imagination, as a marker of personal, group and national identity, and as cultural expression.

[CAR220H1](#), [CAR221H1](#), [CAR225H1](#), [CAR226H1](#), [CAR315H1](#), [CAR316H1](#), [CAR317H1](#), [CAR321H1](#), [CAR324H1](#), [CAR325H1](#), [CAR328H1](#), [CAR329H1](#), [CAR332Y0](#), [CAR421H1](#), [CAR423H1](#), [CAR426H1](#), [CAR426Y1](#), [CAR428H1](#), [CAR429H1](#), [CAR499H1](#), [SPA486H1](#).

4. 1.0 credit from the Core Group or Group A:

Group A:

[ENG356Y1](#), [ENG369H1](#), [HIS106Y1](#), [HIS221H1](#), [HIS222H1](#), [HIS291H1](#), [HIS292H1](#), [HIS359H1](#), [HIS360H1](#), [HIS391Y1](#), [HIS392Y1](#), [HIS413H1](#), [HIS446H1](#), [HIS474H1](#), [POL442H1](#), [POL467H1](#), [SPA220Y1](#), [WGS450H1](#)

Note: Effective Fall 2021, courses associated with New College's Caribbean Studies program will have the new "CAR" designator.

Prerequisite: Completion of 4.0 credits

Exclusion: [NEW315H1](#), [CAR315H1](#)

Recommended Preparation: [HIS230H1](#)/ [HIS231H1](#)/ [CAR120Y1](#)/ [CAR220H1](#)/ [CAR221H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

CAR220H1 - Comparative Caribbean Literature

Previous Course Number: NEW220H1

Hours: 24L

Introduction to the rich and multi-linguistic literary traditions of the Caribbean and its diaspora, focusing on both canonical and emergent texts of Caribbean literature. Texts not originally written in English are read in translation.

Exclusion: [NEW220H1](#), [NEW222H1](#), [NEW222Y1](#), [NEW223Y1](#)

Recommended Preparation: [CAR120Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CAR221H1 - Comparative Caribbean Literature and Visual Culture

Previous Course Number: NEW221H1

Hours: 24L

Focuses on recent literary and visual texts produced in the last decade, from the Caribbean, insular and continental, and its diaspora. Texts not originally written in English are read in translation. While [CAR220H1](#) is an excellent companion course, [CAR221H1](#) can be taken independently.

Exclusion: [NEW221H1](#), [NEW222H1](#), [NEW222Y1](#), [NEW223Y1](#)

Recommended Preparation: [CAR120Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CAR225H1 - Caribbean Societies

Previous Course Number: NEW225H1

Hours: 24L/12T

Offers an interdisciplinary introduction to Caribbean sociology, focusing on the writings of thinkers and scholars from the era of decolonization to the more contemporary period. Themes may include: colonial encounters in the making of Caribbean societies; the role of religion; popular consciousness; histories of capitalism and exploitation; the relationship between political institutions and the wider society; "development", dependency and "underdevelopment".

Exclusion: [NEW225H1](#), [NEW224Y1](#)

Recommended Preparation: [CAR120Y1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

CAR226H1 - Caribbean Political Thought

Previous Course Number: NEW226H1

Hours: 24L/12T

Examines currents of Caribbean political thought from the Haitian Revolution to the present. Themes may include: struggles for independence and liberation, particularly the Haitian and Cuban Revolutions; theories of dependency; Caribbean political systems; regional integration; contemporary political issues facing Caribbean societies today; analyses of capitalism by Caribbean thinkers.

Exclusion: [NEW226H1](#), [NEW224Y1](#)

Recommended Preparation: [CAR120Y1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

CAR316H1 - Caribbean Religions

Previous Course Number: NEW316H1

Hours: 24L

Explores the complex and dynamic practices, philosophies and political and cultural contexts of Caribbean religions. Topics may include the profound impact - in both the Caribbean and its diasporas - of Caribbean Christianities, Hinduism and Islam as well as

Afro-Creole religions such as Vodun, Rastafari and Santeria.

Prerequisite: [HIS230H1](#)/ [HIS231H1](#)/ [CAR120Y1](#)/ [CAR220H1](#)/ [CAR221H1](#)/ [NEW224Y1](#)/ [CAR225H1](#)/ [CAR226H1](#)

Exclusion: [NEW316H1](#), [NEW329H1](#) (Special Topics in Caribbean Studies: Caribbean Religions), offered in Fall 2014 and Fall 2015

Breadth Requirements: Thought, Belief and Behaviour (2)

CAR317H1 - Caribbean Women Writers

Previous Course Number: NEW317H1

Hours: 24L

A critical feminist reading of selected works of fiction, poetry and essays by Caribbean women writers. The aim is to appraise the development of this literature, situate texts within the key social and political debates which have influenced the region's literary output, as well as to consider the implications of the environments within which these writers function.

Prerequisite: Completion of 4.0 credits.

Exclusion: [NEW317H1](#), [WGS330H1](#)

Recommended Preparation: [CAR120Y1](#)/ [CAR220H1](#)/ [CAR221H1](#)/ [WGS160Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CAR321H1 - Caribbean Visual Arts, Social Media and Performance

Previous Course Number: NEW321H1

Hours: 24L

Explores themes relating to visual arts, social media and theatre in the Caribbean. Topics may include: theatre, film, mixed media arts, the role of the internet and online publishing in the arts and the relationship between artists, the state and wider society.

Prerequisite: [HIS230H1](#)/ [HIS231H1](#)/ [CAR120Y1](#)/ [CAR220H1](#)/ [CAR221H1](#)/ [NEW224Y1](#)/ [CAR225H1](#)/ [CAR226H1](#)

Exclusion: [NEW321H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

JHN323H1 - Indigeneity in the Caribbean

Hours: 24L

Explores the legacies of the pre-Columbian era, as well as the post-1492 experiences of people of pre-Columbian Caribbean ancestry. Examines the origins and consequences of the Caribbean's narrative of "indigenous absence", as well as the relationship between indigeneity, globalization and diaspora.

Prerequisite: INS201Y1/ (INS201H1, INS202H1)/ HIS230H1/ HIS231H1/ CAR120Y1/ CAR220H1/ CAR221H1/ NEW224Y1/ CAR225H1/ CAR226H1

Breadth Requirements: Society and its Institutions (3)

CAR324H1 - Capitalism and Crisis in the Caribbean

Previous Course Number: NEW324H1

Hours: 24L

This upper level course examines the interplay between wider global processes and intra-regional responses that together help shape contemporary Caribbean realities. Topics include: economic crisis and structural adjustment; tourism; the agricultural sector; the Caribbean Single Market and Economy; migration and diaspora.

Prerequisite: HIS230H1/ HIS231H1/ CAR120Y1/ CAR220H1/ CAR221H1/ NEW224Y1/ CAR225H1/ CAR226H1

Exclusion: NEW324H1, NEW324Y1

Breadth Requirements: Society and its Institutions (3)

CAR325H1 - Caribbean Women Thinkers

Previous Course Number: NEW325H1

Hours: 24L

An examination of the historical and political significance of writings (literary, political, scholarly) by Caribbean women who engage problems within Caribbean culture and provide insights into the endeavours of the peoples of the region.

Prerequisite: Completion of 4.0 credits.

Exclusion: NEW325H1

Breadth Requirements: Creative and Cultural Representations (1)

JLN327H1 - Culture and Modernity in the Hispanic Caribbean

Hours: 24L

Explores the Hispanic areas of the Caribbean including the Caribbean areas of continental Spanish-speaking America. Topics may include: regional politics, state and economy; revolutions and authoritarian regimes; popular culture, the arts and media; religion and society; gender and sexuality; state structures; diasporas and migration.

Prerequisite: HIS230H1/ HIS231H1/ CAR120Y1/ CAR220H1/ CAR221H1/ NEW224Y1/ CAR225H1/ CAR226H1/ LAS200H1/ LAS201H1

Breadth Requirements: Society and its Institutions (3)

CAR328H1 - Caribbean Indentureship and its Legacies

Previous Course Number: NEW328H1

Hours: 24L

Explores indentured migration and its legacies from the 17th century through to the present. Encourages students to think comparatively and transnationally about indentureship and diaspora, as well as indentured migration's relationship to contract and labour law.

Prerequisite: HIS230H1/ HIS231H1/ CAR120Y1/ CAR220H1/ CAR221H1/ NEW224Y1/ CAR225H1/ CAR226H1

Exclusion: NEW328H1, NEW326Y1

Breadth Requirements: Society and its Institutions (3)

CAR329H1 - Special Topics in Caribbean Studies

Previous Course Number: NEW329H1

Hours: 24L

An upper level course. Topics of study vary from year to year.

CAR332Y0 - Puerto Rican Culture and Environment

Hours: 48L

Based on readings, lectures, experiential activities and discussions, CAR332Y0 examines the cultural and environmental history of Puerto Rico. The course explores debates on colonialism, capitalist modernity, development, ecosystems, religion, race and politics. Such analysis will help with the consideration of Puerto Rico as the last colony of the Americas within the larger context of the Caribbean. The course will include on-site excursions

related to the lectures and reading material covered. This course will be taught in English.

Prerequisite: Completion of 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

CAR342Y0 - The Dominican Republic: Culture and Environment

Hours: 48L

This course examines the cultural and environmental histories of the Dominican Republic. It traces key moments in the nation's history which have been significant for both the environmental destiny and the cultural character of the society. We will pay special attention to the social and ecological consequences of the nation's tourist industry in the 21st century. In the process we cover a range of issues concerning global capitalism, ecopolitics, race and cultural production. The course includes weekly excursions and will be taught in English.

Prerequisite: Completion of 4.0 credits

CAR421H1 - Global Perspectives on the Haitian Revolution

Previous Course Number: NEW421H1

Hours: 24S

Examines the colonial pre-history of the Haitian Revolution (1791-1804). Explores how this transatlantic revolution unfolded, including the emancipation of slaves, Toussaint, Louverture, and the roles played by Spain, the United States and Britain. A reflection on the Revolution in contemporary literature and film.

Prerequisite: HIS230H1/ HIS231H1/ CAR120Y1/ CAR220H1/ CAR221H1/ NEW224Y1/ CAR225H1/ CAR226H1

Exclusion: NEW421H1

Breadth Requirements: Society and its Institutions (3)

CAR422H1 - Caribbean Regionalism

Previous Course Number: NEW422H1

Hours: 24S

In a public lecture in 1958, Trinidadian CLR James described Federation as the means to "accomplish the transition from colonialism to national independence." This course explores the shift from James' vision to Jamaican economist Norman Girvan's observation that contemporary "...governments tend to perceive

supranationality as less an exercise in collective sovereignty and more a diminution of national sovereignty." Among the topics to be considered are: histories of regionalism; formal and informal dimensions of regional identity-making practices; freedom of movement; governance mechanisms; and widening and deepening debates, with particular reference to the non-Anglophone Caribbean and Latin America.

Prerequisite: Completion of at least 1.0 credit at the 300-level.

Exclusion: NEW422H1, NEW329H1 (Special Topics in Caribbean Studies: Caribbean Regionalism), offered in Winter 2018; NEW423H1 (Special Topics in Caribbean Studies: Caribbean Regionalism), offered in Winter 2019

Recommended Preparation: CAR120Y1/ CAR220H1/ CAR221H1/ HIS231H1

Breadth Requirements: Society and its Institutions (3)

CAR426H1 - Special Topics in Caribbean Studies

Previous Course Number: NEW426H1

Hours: 36S

An upper level seminar. Topics vary from year to year, depending on the instructor.

CAR426Y1 - Special Topics in Caribbean Studies

Previous Course Number: NEW426Y1

Hours: 72S

An upper level seminar. Topics vary from year to year, depending on the instructor.

CAR427H1 - Caribbean Diasporic Narratives: London, Paris, Toronto, Berlin, New York

Hours: 24S

Focusing on London, Paris, Toronto, Berlin and New York as major conduits through which the migratory flow of Caribbean literary production takes place, this course will explore both foundational and emergent works of fiction from the English, French and Spanish Caribbean.

Prerequisite: HIS230H1/ HIS231H1/ CAR120Y1/ CAR220H1/ CAR221H1/ NEW224Y1/ CAR225H1/ CAR226H1

JLN427H1 - Advanced Topics: The Hispanic Caribbean

Hours: 24S

Explores, in depth, a country in the Hispanic Caribbean or a theme relating to the Hispanic Caribbean. Topics vary each year and may include: Cuban society; Hispanic Caribbean revolutions; Hispanic Caribbean music, art and popular cultures; Hispanic Caribbean diasporas.

Prerequisite: HIS230H1/ HIS231H1/ JLN327H1/ LAS200H1/ LAS201H1/ CAR120Y1/ CAR220H1/ CAR221H1/ NEW224Y1/ CAR225H1/ CAR226H1
Exclusion: NEW427H1

Breadth Requirements: Society and its Institutions (3)

CAR428H1 - Caribbean Migrations and Diasporas

Previous Course Number: NEW428H1

Hours: 24S

Examines Caribbean migration in the post-slavery era. Topics include: Caribbean diasporas in the West; labour migrations such as the Panama Canal migration; Caribbean migrant communities in Central America; intra-regional migrations between the Caribbean islands; 'guest worker' programs; remittances and their impact; heritage tourism and 'return' migrations.

Prerequisite: HIS230H1/ HIS231H1/ CAR120Y1/ CAR220H1/ CAR221H1/ NEW224Y1/ CAR225H1/ CAR226H1

Exclusion: NEW428H1, HISC70H3

Breadth Requirements: Society and its Institutions (3)

CAR429H1 - Caribbean Diaspora in Canada

Previous Course Number: NEW429H1

Hours: 24S

Explores the transnational circuits through which the Caribbean diaspora makes a living and makes life in contemporary Canada. How do we make sense of the Caribbean experience in Canada? What might an engagement with the Caribbean teach us about Canada as a diasporic space?

Prerequisite: CDN355H1/ HIS230H1/ HIS231H1/ CAR120Y1/ CAR220H1/ CAR221H1/ NEW224Y1/ CAR225H1/ CAR226H1

Exclusion: NEW429H1, NEW329H1 (Special Topics in Caribbean Studies: Travels and Tribulations), offered in Summer 2013 and Summer 2014

Breadth Requirements: Society and its Institutions (3)

JGC439H1 - The Problem and Promise of Caribbean Freedom

Hours: 24L

This course surveys the institutional and ideological structures that have historically internally and externally governed the Caribbean; the patterns of uneven development and crisis they have produced and the forms of agency, resistance they have produced. Centering the social, economic, and spatial inter-connectedness of the Caribbean territorial region and its increasingly de-territorialized diaspora, we explore possibilities for economic, social and climate justice for all Caribbean communities.

Prerequisite: 10.0 credits

Exclusion: GGR400H1 (Special Topic: The Problem and Promise of Caribbean Freedom), offered in Winter 2023

Recommended Preparation: 1.0 credit in Geography (SOC SCI/BR = 3)

Breadth Requirements: Society and its Institutions (3)

CAR499H1 - Advanced Topics in Caribbean Studies

Hours: 24S

A joint graduate/undergraduate upper-level seminar. Topics vary from year to year, depending on the instructor. Consult the Program Office for course enrolment procedures.

Prerequisite: CAR120Y1, at least 1.0 credit from the Caribbean Studies Core Group at the 300+ level. Students who do not meet the prerequisites are encouraged to contact the Program Office.

 K. Yip, BSc, PhD

Introduction

The study of life, biology, has been transformed in recent decades by powerful new ways of asking fundamental questions about how living organisms work. In particular, molecular and microscopy approaches are revealing the incredible complexity of cells. With additional principles drawn from chemistry, physics and information science, we are beginning to understand this complexity and how it transcends multiple scales to organize molecular networks and cellular systems into fully functional organisms.

The Department of Cell and Systems Biology brings together biologists who study life at the level of molecules to functioning individual organisms. Our research laboratories conduct cutting edge research of fundamental processes using a diverse range of model systems (bacteria, yeast, plants, nematodes, insects, fish, frogs, mice, mammalian cell culture and others). Our undergraduate programs reflect this diversity and research strength. Since cells are the basic units of life, it is important to understand how molecular mechanisms control cells and how cells organize the development and physiology of whole organisms. These relationships encompass molecular biology, cell biology, developmental biology, genetics and physiology. These relationships are also complex, requiring studies of dynamic molecular and cellular networks: systems biology. One core component of systems biology is the integration of large datasets arising from the genomics revolution. In addition, computer modeling and bioinformatics are integrated with biochemical, structural, molecular and microscopy studies to understand genomes, transcriptomes, proteomes and metabolomes of the cell and organism.

The Department of Cell and Systems Biology offers two core programs: Animal Physiology (Major) and Cell & Molecular Biology (Major and Specialist). Cell & Molecular Biology Major and Specialist students also have the option of pursuing one Disciplinary Focus in either Molecular Networks of the Cell, Plant Genomics and Biotechnology, or Stem Cells and Developmental Biology.

We also contribute to multi-department programs (Bioinformatics & Computational Biology, Biology, and Genome Biology). We administer Bioinformatics & Computational Biology (Specialist) and Genome Biology (Major).

Contact information:
Undergraduate office, Department of Cell and Systems Biology
Ramsay Wright Laboratories, Room 533

The Department of Cell and Systems Biology is also the academic home of the Human Biology program (HMB). For any HMB related inquiries, please contact: hmb.undergrad@utoronto.ca.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Cell and Systems Biology programs impacted by this policy: [ASSPE1003](#) and [ASMAJ1003](#)

Cell and Systems Biology Programs

Bioinformatics and Computational Biology Specialist (Science Program) - ASSPE1868

The genomic and post-genomic era brings opportunities for new insight into all aspects of biology and medicine, based on the computational analysis of very large datasets in a biological context. The Bioinformatics and Computational Biology Program is an interdepartmental, interdisciplinary Program of Study that balances computer-science and life-science courses towards that

goal. As a Specialist Program it is designed to prepare students for graduate studies in the field.

The Program is formally administered by the Department of Cell and Systems Biology and co-sponsored by the Departments of Biochemistry, Computer Science, Ecology and Evolutionary Biology, and Molecular Genetics; all sponsoring Departments have clear trajectories to extend the Program into graduate studies in the respective Department.

Note: this program has deregulated fees, which are incurred after enrolment in the program. Please refer to [Arts & Science Registration Instructions](#) for more information.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- [BIO130H1](#) and ([CSC108H1](#)/ [CSC148H1](#)/ [CSC110Y1](#))
or
- [BIO230H1](#) and [CSC236H1](#)

To ensure that students admitted to the program will be successful, applicants with a grade average lower than 75% in these required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program. While it is difficult to predict what will constitute a "competitive" grade average in a given year, based on previous years the estimate is =mid 80s.

Applications from students lacking a numerical grade in one of the specified prerequisites may be considered on the basis of their entire academic record and the availability of space in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Bioinformatics & Computational Biology Specialist in the Summer after Year 2.

Completion Requirements:

Specialist program:
(12.5 credits)

First or second year:

Foundational courses (5.0 credits total)

(MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1
(CSC108H1, CSC148H1)/ CSC110Y1
(CSC111H1/ CSC165H1, CSC236H1)/ CSC240H1 (1)
CSC263H1/ CSC265H1
(CHM135H1, CHM136H1)/ CHM151Y1
BIO130H1

Upper years:

Program requirements (7.5 credits total)

STA237H1/ STA247H1/ STA255H1/ STA257H1
CSC207H1
CSC209H1
CSC373H1
BIO230H1/ BIO255H1
BIO260H1/ HMB265H1
(BCH210H1, (BCH311H1/ CSB349H1/ MGY311Y1))/
BCH242Y1
BCH441H1/ MGY441H1/ CSB472H1
BCB330Y1
BCB410H1
BCB420H1
BCB430Y1

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream

Notes:

BCB students are allowed to enrol in up to 2.5 CSC credits at the 300/400-level

Course substitutions are possible with written permission of the Program Director. Note that the requirements for a co-sponsoring Department's major can normally be fulfilled with 0.5 to 3.5 additional credits. All Major programs in the co-sponsoring life science departments require BIO120H1, however, it is not formally a part of this Specialist Program's requirements.

(1) The "missing" 0.5 credit of the substitution does not have to be replaced. For details, please refer to the Computer Science Program instructions in this Calendar.

Former BCB students benefitted from taking CSB352H1, Bioinformatic Methods. They also found it to be helpful to take BCH441H1/ MGY441H1 prior to BCB410H1 due to BCB410H1's R programming requirement.

Cell & Molecular Biology Specialist (Science Program) - ASSPE1003

Students learn how genes and proteins organize cells for cellular activities, multicellular development, and cellular interactions with the environment. Students also learn how cell and molecular biology research is conducted, and receive training in advanced techniques of the field. Cell and molecular biology research is one the most demanding fields in science. Students gain an understanding of the field, and leave the program equipped to tackle fundamental scientific questions.

After foundational courses in first and second year, students participate in advanced lecture, seminar and laboratory courses, and are encouraged to apply for research project courses in the laboratories of the Department. Course offerings include gene expression, cell biology, developmental biology, plant development, plant-microbe interactions, plant signaling, neurogenesis, tissue morphogenesis, stem cell biology, genomics and proteomics.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses

The following courses are required:

- BIO120H1, BIO130H1
- (CHM135H1 and CHM136H1)/ CHM151Y1
- JMB170Y1/(MAT135H1 and MAT136H1)/
MAT137Y1/ MAT157Y1

Variable Minimum Grade

A minimum grade in some courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO130H1 or BIO230H1/ BIO255H1

To ensure that students admitted to the program will be prepared, applicants with a final grade lower than 70% in BIO130H1 or BIO230H1/ BIO255H1 will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry,

starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Cell & Molecular Biology Specialist in the Summer after Year 2.

Completion Requirements:

(12.5 credits, including at least 1.0 credit at the 400-level)

First Year:

[BIO120H1](#), [BIO130H1](#); ([CHM135H1](#), [CHM136H1](#))/
[CHM151Y1](#); [JMB170Y1](#) / ([MAT135H1](#), [MAT136H1](#))/
[MAT137Y1](#) / [MAT157Y1](#).

Higher Years:

- ([PHY131H1](#), [PHY132H1](#)) / ([PHY151H1](#), [PHY152H1](#))
- [BIO220H1](#), [BIO230H1](#) / [BIO255H1](#), [BIO270H1](#),
[BIO271H1](#), [BIO260H1](#) / [HMB265H1](#); [BCH210H1](#)
- [CSB330H1](#) / [CSB350H1](#) / [CSB352H1](#), [CSB349H1](#)
- 1.0 credit from: [CJH332H1](#), [CSB327H1](#), [CSB328H1](#),
[CSB329H1](#), [CSB331H1](#), [CSB340H1](#), [CSB353H1](#)
- 1.0 credit from: [BCH422H1](#), [BCH426H1](#), [BCH444H1](#),
[BCH445H1](#), [CSB427H1](#), [CSB428H1](#), [CSB429H1](#),

[CSB472H1](#), [CSB473H1](#), [CSB474H1](#), [CSB475H1](#),
[CSB483H1](#)
- 2.5 credits from: [BCH422H1](#), [BCH426H1](#), [BCH440H1](#),
[BCH444H1](#), [BCH445H1](#), [CJH332H1](#), [CSB299Y1](#),
[CSB327H1](#), [CSB328H1](#), [CSB329H1](#), [CSB330H1](#),
[CSB331H1](#), [CSB340H1](#), [CSB350H1](#), [CSB351Y1](#),
[CSB352H1](#), [CSB353H1](#), [CSB360H1](#), [CSB397Y0](#),
[CSB399Y1](#), [CSB427H1](#), [CSB428H1](#), [CSB429H1](#),
[CSB430H1](#), [CSB431H1](#), [CSB435H1](#), [CSB447H1](#),
[CSB450H1](#), [CSB451H1](#), [CSB452H1](#), [CSB453H1](#),
[CSB454H1](#), [CSB457H1](#), [CSB458H1](#), [CSB459H1](#),
[CSB460H1](#), [CSB471H1](#), [CSB472H1](#), [CSB473H1](#),
[CSB474H1](#), [CSB475H1](#), [CSB483H1](#), [CSB490H1](#),
[CSB491H1](#), [CSB492H1](#), [CSB497H1](#), [CSB498Y1](#),
[CSB499Y1](#), [HMB496Y1](#) / [HMB499Y1](#), [MGY441H1](#),
[MGY480Y1](#).

NOTE: No more than 0.5 credit in BCH can be used towards requirements 5. and 6.

The Cell & Molecular Biology Specialist Program has the additional option of a Disciplinary Focus.

Students in this program have the option to complete the [Arts & Science Internship Program \(ASIP\)](#) stream.

Cell & Molecular Biology Specialist: Focus in Molecular Networks of the Cell - ASSPE1003A

Starting in 2nd year, this focus organizes a restricted number of highly motivated Cell and Molecular Biology Specialist students with an interest in Molecular Networks of the Cell. Focus students are required to complete a subset of related program courses and to participate in a learning community for the focus.

Enrolment Requirements:

Once you have been approved for and have enrolled in the Cell and Molecular Biology Specialist program, you have the option to apply for entry into a focus. The focuses have a limited enrolment and can only accommodate a restricted number of students with a particular interest in the topic of the focus. **Students can only apply for one focus.** Admission will be determined with a minimum grade of 80% in [BIO130H1](#). If the student does not achieve 80% in [BIO130H1](#), admission can be determined with a minimum grade of 80% in [BIO230H1](#), [BIO255H1](#) or [CSB349H1](#). On the application form, students must include a 300-word statement of interest regarding the topic of the focus. Statement submission instructions are in the Undergraduate program section of the CSB website, <http://csb.utoronto.ca>. Achieving these requirements does not necessarily guarantee admission to the focus in any given year.

Students in a focus complete the requirements of First Year, the requirements 1.-3. of Higher Years, as well as requirements 4.-7 specific to each focus.

Each year students are enrolled in a focus, they must also be an active participant in the faculty-led learning community for their focus (requirement 7.). Most required learning community meetings are held from 4pm to 5pm on Fridays. The learning community appears as a non-credit course recognized on the co-curricular record. Students who fail to contribute to the faculty-led learning community will be removed from the focus.

Completion Requirements:

This Focus is part of the Cell and Molecular Biology Specialist and begins with the requirements of First Year and of lines 1-3 of Higher Years of the Cell and Molecular Biology Specialist Program.

- 1.0 credit from: [CJH332H1](#), [CSB327H1](#), [CSB331H1](#),
[CSB353H1](#), [CSB360H1](#)
- 1.0 credit from: [CSB427H1](#), [CSB428H1](#), [CSB429H1](#),
[CSB435H1](#), [CSB451H1](#), [CSB453H1](#), [CSB454H1](#),
[CSB457H1](#), [CSB458H1](#), [CSB459H1](#), [CSB460H1](#),

CSB475H1

6. 2.5 credits from: BCH422H1, BCH426H1, BCH440H1, BCH444H1, BCH445H1, CJH332H1, CSB299Y1, CSB327H1, CSB328H1, CSB329H1, CSB330H1, CSB331H1, CSB340H1, CSB350H1, CSB351Y1, CSB352H1, CSB353H1, CSB360H1, CSB397Y0, CSB399Y1, CSB427H1, CSB428H1, CSB429H1, CSB430H1, CSB431H1, CSB435H1, CSB447H1, CSB450H1, CSB451H1, CSB452H1, CSB453H1, CSB454H1, CSB457H1, CSB458H1, CSB459H1, CSB460H1, CSB472H1, CSB473H1, CSB474H1, CSB475H1, CSB483H1, CSB490H1, CSB491H1, CSB492H1, CSB497H1, CSB498Y1, CSB499Y1, MGY441H1. No more than 0.5 credit in BCH can be used towards this requirement.

7. Molecular Network Learning Community (each year of focus enrolment)

Cell & Molecular Biology Specialist: Focus in Plant Genomics and Biotechnology - ASSPE1003B

Starting in 2nd year, this focus organizes a restricted number of highly motivated Cell and Molecular Biology Specialist students with an interest in Plant Genomics and Biotechnology. Focus students are required to complete a subset of related program courses and to participate in a learning community for the focus.

Enrolment Requirements:

Once you have been approved for and have enrolled in the Cell and Molecular Biology Specialist program, you have the option to apply for entry into a focus. The focuses have a limited enrolment and can only accommodate a restricted number of students with a particular interest in the topic of the focus. **Students can only apply for one focus.** Admission will be determined with a minimum grade of 80% in BIO130H1. If the student does not achieve 80% in BIO130H1, admission can be determined with a minimum grade of 80% in BIO230H1, BIO255H1 or CSB349H1. On the application form, students must include a 300-word statement of interest regarding the topic of the focus. Statement submission instructions are in the Undergraduate program section of the CSB website, <http://csb.utoronto.ca>. Achieving these requirements does not necessarily guarantee admission to the focus in any given year.

Students in a focus complete the requirements of First Year, the requirements 1.-3. of Higher Years, as well as requirements 4.-7 specific to each focus.

Each year students are enrolled in a focus, they must also be an active participant in the faculty-led learning community for their focus (requirement 7.). Most required learning community meetings are held from 4pm to 5pm

on Fridays. The learning community appears as a non-credit course recognized on the co-curricular record. Students who fail to contribute to the faculty-led learning community will be removed from the focus.

Completion Requirements:

This Focus is part of the Cell and Molecular Biology Specialist and begins with the requirements of First Year and of lines 1-3 of Higher Years of the Cell and Molecular Biology Specialist Program.

4. 1.0 credit from: CSB340H1, CSB350H1/ CSB352H1, CSB353H1

5. 1.0 credit from: CSB435H1, CSB450H1, CSB451H1, CSB452H1, CSB454H1, CSB459H1, CSB460H1, CSB471H1, CSB472H1, CSB473H1, CSB474H1, CSB475H1

6. 2.5 credits from: BCH422H1, BCH426H1, BCH440H1, BCH444H1, BCH445H1, CSB299Y1, CSB328H1, CSB329H1, CSB330H1, CSB331H1, CSB340H1, CSB350H1, CSB360H1, CSB351Y1, CSB352H1, CSB353H1, CSB397Y0, CSB399Y1, CSB428H1, CSB431H1, CSB435H1, CSB450H1, CSB451H1, CSB452H1, CSB454H1, CSB458H1, CSB459H1, CSB460H1, CSB471H1, CSB472H1, CSB473H1, CSB474H1, CSB475H1, CSB483H1, CSB490H1, CSB491H1, CSB492H1, CSB497H1, CSB498Y1, CSB499Y1, MGY441H1. No more than 0.5 credit in BCH can be used towards this requirement.

7. Plant Biotech Learning Community (each year of focus enrolment)

Cell & Molecular Biology Specialist: Focus in Stem Cells and Developmental Biology - ASSPE1003C

Starting in 2nd year, this focus organizes a restricted number of highly motivated Cell and Molecular Biology Specialist students with an interest in Stem Cells and Developmental Biology. Focus students are required to complete a subset of related program courses and to participate in a learning community for the focus.

Enrolment Requirements:

Once you have been approved for and have enrolled in the Cell and Molecular Biology Specialist program, you have the option to apply for entry into a focus. The focuses have a limited enrolment and can only accommodate a restricted number of students with a particular interest in the topic of the focus. **Students can only apply for one focus.** Admission will be determined with a minimum grade of 80% in BIO130H1. If the student does not achieve 80% in BIO130H1, admission can be determined with a minimum grade of 80% in BIO230H1,

BIO255H1 or CSB349H1. On the application form, students must include a 300-word statement of interest regarding the topic of the focus. Statement submission instructions are in the Undergraduate program section of the CSB website, <http://csb.utoronto.ca>. Achieving these requirements does not necessarily guarantee admission to the focus in any given year.

Students in a focus complete the requirements of First Year, the requirements 1-3 of Higher Years, as well as requirements 4-7 specific to each focus.

Each year students are enrolled in a focus, they must also be an active participant in the faculty-led learning community for their focus (requirement 7). Most required learning community meetings are held from 4pm to 5pm on Fridays. The learning community appears as a non-credit course recognized on the co-curricular record. Students who fail to contribute to the faculty-led learning community will be removed from the focus.

Completion Requirements:

This Focus is part of the Cell and Molecular Biology Specialist and begins with the requirements of First Year and of lines 1-3 of Higher Years of the Cell and Molecular Biology Specialist Program.

4. 1.0 credit from: CSB328H1, CSB329H1, CSB340H1
5. 1.0 credit from: CSB427H1, CSB429H1, CSB430H1, CSB431H1, CSB483H1
6. 2.5 credits from: BCH422H1, BCH426H1, BCH440H1, BCH441H1, BCH444H1, BCH445H1, CSB299Y1, CSB327H1, CSB328H1, CSB329H1, CSB330H1, CSB331H1, CSB340H1, CSB350H1, CSB352H1, CSB397Y0, CSB399Y1, CSB427H1, CSB428H1, CSB429H1, CSB430H1, CSB431H1, CSB435H1, CSB450H1, CSB453H1, CSB458H1, CSB460H1, CSB472H1, CSB473H1, CSB474H1, CSB483H1, CSB490H1, CSB491H1, CSB492H1, CSB497H1, CSB498Y1, CSB499Y1. No more than one 0.5 credit in BCH can be used towards this requirement.
7. Multicellularity Learning Community (each year of focus enrolment)

Animal Physiology Major (Science Program) - ASMAJ1538

Students learn to compare and contrast the physiological systems of different animal species, or of a single species under different environmental conditions. This experimental science strives to understand how physiological systems allow animals to adapt to their individual and ever-changing environments. Through a systems-level approach, from molecules to organisms, students gain an understanding of how emergent

properties arise when physiological components operate as a whole.

After foundational courses in first and second year, students participate in advanced lecture, seminar and laboratory courses, and are encouraged to apply for research project courses in the laboratories of the Department. Course offerings include neurophysiology, respiratory physiology, endocrinology, sleep physiology and comparative cellular physiology.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Animal Physiology Major in the Summer after Year 2.

Completion Requirements:

(8.0 credits)

First Year:

1. BIO120H1, BIO130H1; (CHM135H1, CHM136H1)/CHM151Y1
2. 1.0 credit from JMB170Y1/ MAT135H1/ MAT136H1/ MAT137Y1/ MAT157Y1/ PHY131H1/ PHY132H1/ PHY151H1/ PHY152H1

Higher Years:

1. BIO220H1, BIO230H1/ BIO255H1
2. BIO270H1, BIO271H1
3. CSB325H1
4. 0.5 credit from: CJH332H1, CSB343H1, CSB346H1
5. 1.5 credits (at least 0.5 credit must be at the 300+ level) from: BCH210H1; BIO260H1/ HMB265H1; CJH332H1; CSB299Y1, CSB327H1, CSB328H1, CSB329H1, CSB330H1, CSB331H1, CSB334H1, CSB343H1, CSB345H1, CSB346H1, CSB348H1, CSB352H1, CSB397Y0, CSB399Y1, EEB263H1; PSY397H1; STA220H1
6. 0.5 credit at the 400-level from CSB426H1, CSB427H1, CSB430H1, CSB431H1, CSB432H1, CSB434H1, CSB445H1, CSB447H1, CSB483H1, CSB492H1, CSB497H1, CSB498Y1, CSB499Y1; HMB430H1, HMB472H1, HMB496Y1, HMB499Y1; PSL432H1, PSL452H1

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Cell & Molecular Biology Major (Science Program) - ASMAJ1003

Students learn how genes and proteins organize cells for cellular activities, multicellular development, and cellular interactions with the environment. Students also learn how cell and molecular biology research is conducted, and receive training in advanced techniques of the field. Cell and molecular biology research is one the most demanding fields in science. Students gain an understanding of the field, and leave the program equipped to tackle fundamental scientific questions.

After foundational courses in first and second year, students participate in advanced lecture, seminar and laboratory courses, and are encouraged to apply for research project courses in the laboratories of the Department. Course offerings include gene expression, cell biology, developmental biology, plant development, plant-microbe interactions, plant signaling, neurogenesis, tissue morphogenesis, stem cell biology, genomics and proteomics.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Cell & Molecular Biology Major in the Summer after Year 2.

Completion Requirements:

(8.0 credits)

First Year:

1. BIO120H1, BIO130H1; (CHM135H1, CHM136H1)/ CHM151Y1
2. 1.0 credit from JMB170Y1/ MAT135H1/ MAT136H1/ MAT137Y1/ MAT157Y1/ PHY131H1/ PHY132H1/ PHY151H1/ PHY152H1

Higher Years:

1. BIO220H1, BIO230H1/ BIO255H1
2. BIO260H1/ HMB265H1; BCH210H1
3. CSB349H1
4. 1.0 credit from: CSB327H1, CSB328H1, CSB329H1, CSB331H1, CSB340H1, CSB353H1
5. 1.5 credits (at least 0.5 credit at the 400-level) from: BCH422H1, BCH426H1, BCH440H1, BCH444H1, BCH445H1, CJH332H1, CSB299Y1, CSB327H1, CSB328H1, CSB329H1, CSB330H1, CSB331H1, CSB340H1, CSB350H1, CSB351Y1, CSB352H1, CSB353H1, CSB360H1, CSB397Y0, CSB399Y1, CSB427H1, CSB428H1, CSB429H1, CSB430H1, CSB431H1, CSB435H1, CSB447H1, CSB450H1, CSB451H1, CSB452H1, CSB453H1, CSB454H1, CSB457H1, CSB458H1, CSB459H1, CSB460H1, CSB471H1, CSB472H1, CSB473H1, CSB474H1, CSB475H1, CSB483H1, CSB490H1, CSB491H1, CSB492H1, CSB497H1, CSB498Y1, CSB499Y1, HMB496Y1/ HMB499Y1, MGY441H1, MGY480Y1. No more than 0.5 credit in BCH can be used towards this requirement.

The Cell & Molecular Biology Major Program has the additional option of a Disciplinary Focus.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Cell & Molecular Biology Major: Focus in Molecular Networks of the Cell - ASMAJ1003A

Starting in 2nd year, this focus organizes a restricted number of highly motivated Cell and Molecular Biology Major students with an interest in Molecular Networks of the Cell. Focus students are required to complete a subset of related program courses and to participate in a learning community for the focus.

Enrolment Requirements:

Once you have enrolled in the Cell and Molecular Biology Major program, you have the option to apply for entry into a focus. The focuses have a limited enrolment and can only accommodate a restricted number of students with a particular interest in the topic of the focus. **Students can only apply for one focus.** Admission will be determined with a minimum grade of 80% in BIO130H1. If the student does not achieve 80% in BIO130H1, admission can be determined with a minimum grade of 80% in BIO230H1, BIO255H1 or CSB349H1. On the application form, students must include a 300-word statement of interest regarding the topic of the focus. Statement submission instructions are in the Undergraduate program section of

the CSB website, <http://csb.utoronto.ca>. Achieving these requirements does not necessarily guarantee admission to the focus in any given year.

Students in a focus complete the requirements of First Year, the requirements 1.-3. of Higher Years, as well as requirements 4.-7. specific to each focus.

Each year students are enrolled in a focus, they must also be an active participant in the faculty-led learning community for their focus (requirement 7.). Most required learning community meetings are held from 4pm to 5pm on Fridays. The learning community appears as a non-credit course recognized on the co-curricular record. Students who fail to contribute to the faculty-led learning community will be removed from the focus.

Completion Requirements:

This Focus is part of the Cell and Molecular Biology Major and begins with the requirements of First Year and of lines 1-3 of Higher Years of the Cell and Molecular Biology Major Program.

4. 1.0 credit from: [CJH332H1](#), [CSB327H1](#), [CSB331H1](#), [CSB353H1](#), [CSB360H1](#)

5. 0.5 credit from: [CSB427H1](#), [CSB428H1](#), [CSB429H1](#), [CSB435H1](#), [CSB451H1](#), [CSB453H1](#), [CSB454H1](#), [CSB457H1](#), [CSB458H1](#), [CSB459H1](#), [CSB460H1](#), [CSB475H1](#)

6. 1.0 credit from: [BCH422H1](#), [BCH426H1](#), [BCH444H1](#), [BCH445H1](#), [CJH332H1](#), [CSB299Y1](#), [CSB327H1](#), [CSB330H1](#), [CSB331H1](#), [CSB353H1](#), [CSB360H1](#), [CSB397Y0](#), [CSB399Y1](#), [CSB427H1](#), [CSB428H1](#), [CSB429H1](#), [CSB435H1](#), [CSB450H1](#), [CSB451H1](#), [CSB452H1](#), [CSB453H1](#), [CSB454H1](#), [CSB457H1](#), [CSB458H1](#), [CSB459H1](#), [CSB460H1](#), [CSB475H1](#), [CSB490H1](#), [CSB491H1](#), [CSB497H1](#), [CSB498Y1](#), [CSB499Y1](#). No more than 0.5 credit in BCH can be used towards this requirement.

7. Molecular Network Learning Community (each year of focus enrolment)

Cell & Molecular Biology Major: Focus in Plant Genomics and Biotechnology - ASMAJ1003B

Starting in 2nd year, this focus organizes a restricted number of highly motivated Cell and Molecular Biology Major students with an interest in Plant Genomics and Biotechnology. Focus students are required to complete a subset of related program courses and to participate in a learning community for the focus.

Enrolment Requirements:

Once you have enrolled in the Cell and Molecular Biology Major program, you have the option to apply for entry into a focus. The focuses have a limited enrolment and can only accommodate a restricted number of students with a particular interest in the topic of the focus. **Students can only apply for one focus.** Admission will be determined with a minimum grade of 80% in [BIO130H1](#). If the student does not achieve 80% in [BIO130H1](#), admission can be determined with a minimum grade of 80% in [BIO230H1](#), [BIO255H1](#) or [CSB349H1](#). On the application form, students must include a 300-word statement of interest regarding the topic of the focus. Statement submission instructions are in the Undergraduate program section of the CSB website, <http://csb.utoronto.ca>. Achieving these requirements does not necessarily guarantee admission to the focus in any given year.

Students in a focus complete the requirements of First Year, the requirements 1.-3. of Higher Years, as well as requirements 4.-7 specific to each focus.

Each year students are enrolled in a focus, they must also be an active participant in the faculty-led learning community for their focus (requirement 7.). Most required learning community meetings are held from 4pm to 5pm on Fridays. The learning community appears as a non-credit course recognized on the co-curricular record. Students who fail to contribute to the faculty-led learning community will be removed from the focus.

Completion Requirements:

This Focus is part of the Cell and Molecular Biology Major and begins with the requirements of First Year and of lines 1-3 of Higher Years of the Cell and Molecular Biology Major Program.

4. 1.0 credit from: [CSB340H1](#), [CSB350H1](#)/ [CSB352H1](#), [CSB353H1](#)

5. 0.5 credit from: [CSB435H1](#), [CSB450H1](#), [CSB451H1](#), [CSB452H1](#), [CSB454H1](#), [CSB459H1](#), [CSB460H1](#), [CSB471H1](#), [CSB472H1](#), [CSB473H1](#), [CSB474H1](#), [CSB475H1](#)

6. 1.0 credit from: [CSB299Y1](#), [CSB330H1](#), [CSB340H1](#), [CSB350H1](#), [CSB351Y1](#), [CSB352H1](#), [CSB353H1](#), [CSB360H1](#), [CSB397Y0](#), [CSB399Y1](#), [CSB435H1](#), [CSB450H1](#), [CSB451H1](#), [CSB452H1](#), [CSB454H1](#), [CSB459H1](#), [CSB460H1](#), [CSB471H1](#), [CSB472H1](#), [CSB473H1](#), [CSB474H1](#), [CSB475H1](#), [CSB490H1](#), [CSB491H1](#), [CSB497H1](#), [CSB498Y1](#), [CSB499Y1](#).

7. Plant Biotech Learning Community (each year of focus enrolment)

Cell & Molecular Biology Major: Focus in Stem Cells and Developmental Biology - ASMAJ1003C

Starting in 2nd year, this focus organizes a restricted number of highly motivated Cell and Molecular Biology Major students with an interest in Stem Cells and Developmental Biology. Focus students are required to complete a subset of related program courses and to participate in a learning community for the focus.

Enrolment Requirements:

Once you have enrolled in the Cell and Molecular Biology Major program, you have the option to apply for entry into a focus. The focuses have a limited enrolment and can only accommodate a restricted number of students with a particular interest in the topic of the focus. **Students can only apply for one focus.** Admission will be determined with a minimum grade of 80% in [BIO130H1](#). If the student does not achieve 80% in [BIO130H1](#), admission can be determined with a minimum grade of 80% in [BIO230H1](#), [BIO255H1](#) or [CSB349H1](#). On the application form, students must include a 300-word statement of interest regarding the topic of the focus. Statement submission instructions are in the Undergraduate program section of the CSB website, <http://csb.utoronto.ca>. Achieving these requirements does not necessarily guarantee admission to the focus in any given year.

Students in a focus complete the requirements of First Year, the requirements 1-3 of Higher Years, as well as requirements 4-7 specific to each focus.

Each year students are enrolled in a focus, they must also be an active participant in the faculty-led learning community for their focus (requirement 7). Most required learning community meetings are held from 4pm to 5pm on Fridays. The learning community appears as a non-credit course recognized on the co-curricular record. Students who fail to contribute to the faculty-led learning community will be removed from the focus.

Completion Requirements:

This Focus is part of the Cell and Molecular Biology Major and begins with the requirements of First Year and of lines 1-3 of Higher Years of the Cell and Molecular Biology Major Program.

4. 1.0 credit from: [CSB328H1](#), [CSB329H1](#), [CSB340H1](#)
5. 0.5 credit from: [CSB427H1](#), [CSB429H1](#), [CSB430H1](#), [CSB431H1](#), [CSB483H1](#)
6. 1.0 credit from: [CSB299Y1](#), [CSB328H1](#), [CSB329H1](#), [CSB340H1](#), [CSB397Y0](#), [CSB399Y1](#), [CSB427H1](#), [CSB429H1](#), [CSB430H1](#), [CSB431H1](#), [CSB453H1](#),

[CSB483H1](#), [CSB497H1](#), [CSB498Y1](#), [CSB499Y1](#).

7. Multicellularity Learning Community (each year of focus enrolment)

Genome Biology Major (Science Program) - ASMAJ2655

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Genome Biology Major in the Summer after Year 2.

Completion Requirements:

This program is a joint program of the departments of Cell & Systems Biology, Ecology & Evolutionary Biology, and Molecular Genetics. It is administered through the Department of Cell & Systems Biology.

(8.0 credits)

First year: [BIO120H1](#), [BIO130H1](#); ([CHM135H1](#), [CHM136H1](#))/ [CHM151Y1](#); ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)/ [MAT157Y1](#)

Higher years:

1. [BIO220H1](#), [BIO230H1](#)/ [BIO255H1](#); [BIO260H1](#)/ [HMB265H1](#); [EEB225H1](#)/ [STA220H1](#)
2. Genomics fundamentals: [BCH311H1](#)/ [CSB349H1](#)/ [MGY311Y1](#), [CSB352H1](#); [EEB323H1](#)
3. 0.5 credit laboratory course from: [CSB472H1](#), [CSB474H1](#); [EEB460H1](#)
4. 1.0 credit genomics elective from: [CSB330H1](#), [CSB350H1](#), [CSB397Y0](#), [CSB427H1](#), [CSB435H1](#), [CSB450H1](#), [CSB457H1](#), [CSB458H1](#), [CSB471H1](#), [CSB473H1](#), [CSB490H1](#), [CSB491H1](#), [CSB497H1](#)/ [CSB498Y1](#)/ [CSB499Y1](#); [EEB362H1](#), [EEB455H1](#), [EEB458H1](#), [EEB459H1](#), [EEB462H1](#), [EEB463H1](#), [EEB397Y1](#)/ [EEB497H1](#)/ [EEB498Y1](#)/ [EEB499Y1](#); [EHJ352H1](#); [MGY350H1](#), [MGY360H1](#), [MGY428H1](#), [MGY470H1](#), [MGY480Y1](#)

NOTE: Students taking [CSB397Y0](#), [CSB490H1](#), [CSB491H1](#), [CSB497H1](#)/ [CSB498Y1](#)/ [CSB499Y1](#),

EEB397Y1/ EEB497H1/ EEB498Y1/ EEB499Y1 or MGY480Y1 are encouraged to conduct a genomics-related research project.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Cell and Systems Biology Courses

BIO130H1 - Molecular and Cell Biology

Hours: 36L/15P

One of the goals of modern biology is to understand how the basic building blocks of life give rise to biological form and function. This course provides students with a common lexicon to understand the key principles and concepts in molecular and cell biology, with a focus on how the building blocks of life lead to functioning cells. (Lab Materials Fee: approximately \$11). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is \$27).

Prerequisite: SBI4U and SCH4U (Grade 12 University Preparation Biology and Chemistry) or permission of department. Please contact bio130@utoronto.ca for more information.

Exclusion:
BIOA01H3, BIO152H5

Breadth Requirements: Living Things and Their Environment (4)

CSB195H1 - Computational Biology Foundations

Hours: 24L/12T

Our understanding of life is built from observation, abstraction, modeling, and comparison. In this First Year Foundations course we explore how these activities are based on concepts of chance and choice, of organization and dispersion, of cooperation and conflict, and how these ideas inform domains such as statistics, computer science, bioinformatics, molecular biology, physiology and ecology. Through this, we build a broad framework of relationships and connections that will make students'

Biology: see Biology
Genome Biology: see Biology

Lab Materials Fee

Some courses in this department have a mandatory Lab Materials Fee to cover non-reusable materials. The fee for each such course is given below in the course description, and will be included on the student's invoice on ACORN.

engagement with specialized courses throughout the sciences all the more meaningful. This course's focus on best practices of structuring project work, using tools and resources, and documentation, will be valuable preparation for all subsequent courses. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

CSB196H1 - Genes, Genomes and Us

Hours: 24L

With the completion of the human genome sequence, we now have access to more information than ever before about our genetic make-up. This course addresses topics such as what are genes, how are they identified and how does knowledge about genes impact society. Students will learn basic concepts in genetics. Using this conceptual foundation, the significance of genomic research for understanding human biology, and the social consequences that may result from it, will be discussed. Evaluation is based on class discussions, homework, oral presentation and written assignments. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

CSB197H1 - Human Viruses

Hours: 24L

This course allows students to broaden their knowledge about the most important human viruses and prions. In essence, what viruses are, what they do, what are the diseases caused by viruses and how they are transmitted, etc., and what can be done about them (vaccines, antiviral treatments, etc.). Viruses cause many diseases ranging from a benign rash to severe hemorrhages and death. Each student will select a specific topic in Virology and write an essay and present a seminar for the rest of the class. Major "hot" problems in Virology from pandemics to

controversial vaccines will also be discussed. Two tests covering all materials presented by all the students' seminars will be conducted. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

CSB198H1 - Cell and Molecular Biology in the News

Hours: 24L

The pace of knowledge creation in the fields of cell and molecular biology has greatly increased in the 21st century and with it, the need for greater scientific literacy. In this course, we will teach students to find reliable sources of information in order to understand the basic concepts underlying the research reported in these media releases, with the ultimate aim of critically evaluating these reports. Through exploration of various media articles in cell and molecular biology (with an emphasis on humans), students will be able to apply what they have learned to current events, as well as relevant issues in their lives and society as a whole. Students will be assessed through short-written assignments, class discussions, an oral presentation, and a final project where they will get the opportunity to explore the research behind a media article of their choice. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

CSB199H1 - Biotechnology and Society

Hours: 24L

From the manipulation of genes of plants for improved food production through to human tissue engineering and stem cell research, biotechnology is increasingly playing a major role in our world. Society, however, is often challenged by the rapid advances in our knowledge in these areas, and how to best apply these technologies in a manner that is socially responsible and economically viable. In this seminar course, students will research and describe various applications of biotechnology using information obtained from reputable sources, and lead discussions on the benefits and concerns that arise from this research. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

CSB201H1 - Molecular Biology, Biotechnology and You

Hours: 24L/12T

An online course intended to provide non-science students with an understanding of basic concepts in molecular biology and genetics, with particular emphasis on humans. Students will work online in groups on problem sets. The course will end with an introduction to biotechnology, including an opportunity for students to use their new knowledge to explore a real, multi-dimensional problem (e.g., cancer). Lectures will be delivered via the web and mandatory tutorials will require live webinar participation. The final exam will require attendance on the St. George campus. This course does not count towards CSB programs.

Exclusion: [BIO130H1](#), [BIO230H1](#), [BIO255H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CSB202H1 - Further Exploration in Biotechnology

Hours: 24L/12T

Provides non-science students with an additional opportunity to explore biotechnology and its applications in agriculture, the environment, and human health including: genetically modified organisms, drug discovery and aging. Most lectures are viewed online before class and students work in groups during class on problem sets and case studies designed to stimulate further learning, enhance evidence-based reasoning, and promote reflection on the role of biotechnology in society. This course does not count towards CSB programs. [CSB201H1](#) is not a prerequisite for this course.

Exclusion: [BIO230H1](#), [BIO255H1](#)

Breadth Requirements: Living Things and Their Environment (4)

BIO230H1 - From Genes to Organisms

Hours: 36L/15P

The genome is the "book of life," providing instructions to construct an organism. This course introduces genome biology and explores how the building blocks of life are networked into functioning organisms. We will investigate how cells perceive internal and external cues, how gene expression is shaped by this perception, and how these events give rise to tissues, organs, and whole organisms. (Lab Materials Fee: approximately \$16). Lab coat and safety glasses are required for use in laboratories;

students are responsible for purchasing these items (approximate cost is \$27).

Prerequisite: [BIO130H1](#), ([CHM135H1](#), [CHM136H1](#))/ ([CHM138H1](#), [CHM139H1](#))/ [CHM151Y1](#)

Exclusion: [BIO255H1](#)

Breadth Requirements: Living Things and Their Environment (4)

BIO255H1 - From Genes to Organisms with Advanced Laboratory

Hours: 36L/33P

The genome is the "book of life," providing instructions to construct an organism. This course introduces genome biology and explores how the building blocks of life are networked into functioning organisms. We will investigate how cells perceive internal and external cues, how gene expression is shaped by this perception, and how these events give rise to tissues, organs, and whole organisms. The Enhanced Laboratory provides the opportunity for greater laboratory skill development in modern investigative techniques and is intended for students interested in conducting their own laboratory research. (Lab Materials Fee: \$53). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is \$27).

Prerequisite: [BIO130H1](#), ([CHM135H1](#), [CHM136H1](#))/ ([CHM138H1](#), [CHM139H1](#))/ [CHM151Y1](#), cGPA 3.0

Exclusion: [BIO230H1](#)

Recommended Preparation: [BCH210H1](#) (taken concurrently or previously)

Breadth Requirements: Living Things and Their Environment (4)

BIO260H1 - Concepts in Genetics

Hours: 48L/12T

This is a problem based course which discusses classical, molecular, developmental, and population genetics and genomics with emphasis on model organisms for genetic analysis.

Prerequisite: [BIO230H1](#)/ [BIO255H1](#)

Exclusion: [HMB265H1](#)

Breadth Requirements: Living Things and Their Environment (4)

BIO270H1 - Animal Physiology I

Hours: 24L/9P

Animal physiology is a biological sub-discipline that aims to understand, in physical and chemical terms, how animals work. This course uses examples from throughout the animal kingdom, in a comparative approach, to introduce and study homeostasis and the endocrine system. Accompanying laboratories reinforce concepts introduced in lectures and provide opportunities for students to experience firsthand the role that experimentation, data collection, interpretation of data, and communication of data plays in the nature of the scientific process. (Lab Materials Fee: approximately \$11). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is \$27).

Prerequisite: [BIO130H1](#)

Breadth Requirements: Living Things and Their Environment (4)

BIO271H1 - Animal Physiology II

Hours: 24L/9P

Animal physiology is a biological sub-discipline that aims to understand, in physical and chemical terms, how animals work. This course uses examples from throughout the animal kingdom in a comparative approach to introduce and study the nervous and cardiorespiratory systems. Accompanying laboratories reinforce concepts introduced in lectures and provide opportunities for students to experience firsthand the role that experimentation, data collection, interpretation of data, and communication of data plays in the nature of the scientific process. (Lab Materials Fee: approximately \$11). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is \$27).

Prerequisite: [BIO270H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CSB280H1 - Data Science for Cell and Systems Biology

Hours: 24L/12T

The abundance of raw data in biological sciences continues to grow year after year. The skills required to navigate and thrive in this field are no longer confined to the laboratory bench as experimental results go beyond simple analyses. This course will introduce basic tools used in the analysis of big data such as dimensional reduction, visualization, and machine learning. Students will get practical experience writing code to analyze example datasets.

Exclusion: [STA272H1](#), [STA302H1](#)

Recommended Preparation: Students should familiarize themselves with basic summary and statistical analyses. Preferably, [EEB125H1](#) or [GGR274H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CSB299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

CSB299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

CSB325H1 - Endocrine Physiology

Hours: 24L/9T

The regulation of physiological processes by hormones and other signalling molecules in non-human chordates. An integrated genes-to-environment approach is used to examine aspects of hormonal evolution, physiological information flow, behaviour and neuroendocrinology, and xenobiotic endocrine disruptors. Students will have the opportunity to research areas of their own interest via group interaction in a series of tutorial sessions.

Prerequisite: [BIO270H1](#), [BIO271H1](#)

Recommended Preparation: [EEB266H1](#), [EEB267H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CSB327H1 - Extracellular Matrix Dynamics and Associated Pathologies

Hours: 36L

Examines the expression, structure and function of the four major classes of ECM macromolecules: collagen, proteoglycans, non-collagenous structural proteins and

glycoproteins. In addition to forming elaborate networks that give tissues and organs their unique architectural design and biomechanical properties, ECM molecules act as potent regulators of all cellular activities. Emphasis is placed on the morphoregulatory contribution(s) of ECM molecules to normal and pathological development.

Prerequisite: [BIO230H1](#)/ [BIO255H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CSB328H1 - Animal Developmental Biology

Hours: 24L/24P

Basic concepts in developmental biology. Early development of invertebrates and vertebrates will be discussed with emphasis on experimental and molecular analysis of developmental mechanisms. Tutorials focus on the experimental analysis of embryonic development and regeneration, and discuss primary literature of selected topics in developmental biology. (Lab Materials Fee: approximately \$27). A lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these (approximate cost is \$27).

Prerequisite: [BIO230H1](#)/ [BIO255H1](#), [BIO260H1](#)/ [HMB265H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CSB329H1 - Stem Cell Biology: Developmental Models and Cell-based Therapeutics

Hours: 24L/12T

Stem cells provide the basis for cellular diversity in multicellular organisms and have enormous therapeutic potential in regenerative medicine. The course will introduce students to the differences and similarities between stem cells from different organisms, their roles throughout development and therapeutic potential.

Prerequisite: [BIO230H1](#)

Recommended Preparation: [BIO260H1](#)/ [HMB265H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CSB330H1 - Techniques in Molecular and Cell Biology

Hours: 8L/52P

Laboratory course on molecular and cell biology research techniques used to study genes and proteins. Topics include plasmid cloning, PCR, bioinformatics, gene expression analyses, protein-protein interactions, and protein subcellular localization. (Lab Materials Fee: \$53). A lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these (approximate cost is \$27).

Prerequisite: [BIO230H1/ BIO255H1, BIO260H1/ HMB265H1](#)

Recommended Preparation: [BCH311H1/ CSB349H1/ MGY311Y1](#) taken concurrently

Breadth Requirements: Living Things and Their Environment (4)

BCB330Y1 - Special Project in Bioinformatics and Computational Biology

An opportunity for specialized individual research in bioinformatics and computational biology by arrangement with a supervisor. Approval of the application by the BCB coordinator is required. Not eligible for CR/NCR option.

Prerequisite: Permission of the course coordinator (application required). Significant background in both life science and computer science courses is required.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSB331H1 - Advanced Cell Biology

Hours: 36L

The development of multicellular organisms is dependent on complex cell-cell and cell-matrix dynamics. The course examines the molecules and mechanisms involved and how they act in concert to regulate distinct developmental and physiological events. Emphasis is placed on the experimental approaches and technology used to study the molecular interactions and dynamics that alter structure-function relationships in cells and organisms.

Prerequisite: [BIO230H1/ BIO255H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CJH332H1 - Cellular and Molecular Neurobiology of the Synapse

Previous Course Number: CSB332H1

Hours: 36L

Examination of all aspects of the synapse in both the peripheral and central nervous systems of invertebrates and vertebrates. Topics include: neuroplasticity, synapse formation, synaptic transmission, synaptic modulation, and the molecular biological basis of neurodegenerative disorders.

Prerequisite: [BIO271H1/ PSL300H1](#)

Exclusion: [CSB332H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CSB334H1 - Methods and Analysis in Behavioral Neuroscience

Hours: 24L/12T

The scale and complexity of biological data are fast expanding as biotechnology develops. How are we going to process and interpret large-scale data? Using example-based approaches in the context of behavioural neuroscience (e.g., sleep, movement, learning, decision-making), this course aims to bridge biology and computational analysis techniques. Through lectures and hands-on sessions, students will learn about modern methodology in neuroscience (e.g., electrophysiology, optogenetics, calcium imaging) and how to analyze neural data sets. Students will be introduced to programming in MATLAB tailored for neuroscience, signal processing, image processing, statistical analysis, and machine learning techniques. By developing practical skills through various neural data types (e.g., EEG, EMG, Ca²⁺ Imaging), this course equips students with the skills to handle neural data, basic computational approaches in neuroscience, and a quantitative understanding of brain functionality.

Prerequisite: ([BIO270H1, BIO271H1/ PSL300H1, PSL301H1](#)), [MAT136H1](#)

Recommended Preparation: Students should familiarize themselves with linear algebra. A strong interest in neuroscience, data analysis, or computational biology is recommended. Recommended course: [CJH332H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CSB340H1 - Plant Development

Hours: 24L

Plant developmental genetics at the molecular, cellular and organismal level, generation and use of genomic resources in plant model organisms. Questions address the genetic dissection of plant embryo and meristem development, plant stem cell specification and tissue patterning. Genomic approaches applicable to plant biotechnology are also covered.

Prerequisite: BIO230H1/ BIO255H1, BIO260H1/ HMB265H1 with a minimum grade of 73%)

Breadth Requirements: Living Things and Their Environment (4)

CSB343H1 - Animal Energetics

Hours: 24L

Animal structure and function, at all levels from molecule to whole animal, are dependent on energy. This course describes how the supply, consumption, transformation, exchange and storage of energy can facilitate, constrain and limit animal function. Emphasis is placed on systems level physiological function and whole animal performance.

Prerequisite: (BIO270H1, BIO271H1)/(PSL300H1, PSL301H1)

Recommended Preparation: BCH210H1/ BCH242Y1

Breadth Requirements: Living Things and Their Environment (4)

CSB345H1 - Introductory Biology of Sleep

Hours: 24L/12T

This course will cover fundamental theories on the regulation, evolution, and function of sleep-wake states – how and why animals sleep. Sleep is a behavioural state that occurs in all vertebrates and it has also been identified in several species of invertebrates. In these animals, sleep is associated with profound changes in physiological function at the molecular, cellular and system levels. Furthermore, sleep has marked implications for the neurobiology of behaviour and the evolution of organisms because of the impact it has on cognitive function, memory consolidation, and overall health. The course will be integrative and comparative, linking together concepts from all levels of biological organization (molecular to whole organism) and drawing examples from a variety of different animals.

Prerequisite: (BIO270H1, BIO271H1)/(PSL300H1, PSL301H1)

Breadth Requirements: Living Things and Their Environment (4)

CSB346H1 - Neurobiology of Respiration

Hours: 24L/12T

This course examines how the central and peripheral nervous system controls breathing in mammals. Topics include how the brain generates rhythmic breathing movements, how sleep impacts breathing control and how abnormal breathing contributes to disorders such as sleep apnea.

Prerequisite: (BIO270H1, BIO271H1)/(PSL300H1, PSL301H1)

Breadth Requirements: Living Things and Their Environment (4)

CSB348H1 - Laboratory in Comparative Animal Physiology

Hours: 48P

Laboratory exercises will include traditional and guided inquiry approaches to investigate and gain an understanding of the regulation of physiological systems in vertebrates and invertebrates. Students will experience the nature of physiological investigation while being exposed to a range of the current experimental approaches animal physiologists use to design, test and evaluate hypotheses, and communicate their findings. This course will emphasize the fundamental characteristics humans share with all animal life and the physiological adaptations that have permitted species to exploit alternative environmental niches. This course requires participation and includes group work, written assignments, and oral presentations. (Lab Materials Fee: \$53). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is \$27).

Prerequisite: BIO230H1

Exclusion: PSL372H1

Recommended Preparation: BIO270H1, BIO271H1

Breadth Requirements: Living Things and Their Environment (4)

CSB349H1 - Eukaryotic Gene Expression

Hours: 30L/18T

Genome structure and the regulation of gene expression in eukaryotic cells. Topics include transcription, gene silencing and regulation, expression profiling, non-coding RNAs, and translational control. Tutorials emphasize problem based learning exercises that relate to recent advances in the broad field of eukaryotic gene expression.

Prerequisite: BIO230H1/ BIO255H1, BIO260H1/ HMB265H1

Exclusion: MGY311Y1, MGY420H1

Recommended Preparation: BCH210H1

Breadth Requirements: Living Things and Their Environment (4)

CSB350H1 - Laboratory in Molecular Plant Biology

Hours: 24L/36P

Laboratory methods used in plant molecular biology research. Topics include vector construction, plant transformations, PCR, DNA blots, high-throughput screens, genetic mapping, and bioinformatic analyses. (Lab Materials Fee: \$53). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is \$27).

Prerequisite: [BIO230H1](#)/ [BIO255H1](#)

Recommended Preparation: [BIO251H1](#) or higher level plant biology course; [BCH311H1](#)/ [CSB349H1](#)/ [MGY311Y1](#) concurrently

Breadth Requirements: Living Things and Their Environment (4)

CSB352H1 - Bioinformatic Methods

Hours: 6L/18P

Use of available programs for analyzing biological data. This is an introductory course with a strong emphasis on hands-on methods. Some theory is introduced, but the main focus is on using extant bioinformatics tools to analyze data and generate biological hypotheses.

Prerequisite: [BIO230H1](#)/ [BIO255H1](#), [BIO260H1](#)/ [HMB265H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CSB353H1 - Plant-Microorganism Interactions and Plant Immunity

Hours: 24L

Plants have co-evolved with microbes ever since their first appearance on land, resulting in sophisticated strategies of pathogenicity, symbiosis, commensalisms and mutualism by microorganisms. This course presents an overview of the strategies by both plant hosts and microorganisms for their survival. The lecture content includes the basic concepts of plant-microbe interactions and plant immunity as well as signal transduction in plant immunity.

Prerequisite: [BIO230H1](#)/ [BIO255H1](#)

Recommended Preparation: [BIO251H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CSB360H1 - Genetic Foundation of Molecular Biology

Hours: 24L

This course provides in depth foundational knowledge underlying molecular biology technologies. It focuses on how genetic principles were applied to develop the most commonly used molecular biology techniques today. Students will expand their genetic knowledge from introductory level genetic courses. This course does not involve explaining the basics of molecular biology such as replication, recombination, translation or gene expression. By contrast, this course expects that students already understand these concepts in detail and now apply this understanding towards how they were used to develop experimental technologies. For example, how are transformation, mutagenesis, plasmid construction, and gene expression systems used to design molecular experiments.

Prerequisite: [BIO230H1](#)/ [BIO255H1](#), [BIO260H1](#)/ [HMB265H1](#), [CSB349H1](#)

Exclusion: [MGY340H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CSB397Y0 - Research Abroad in Cell & Systems Biology

An independent research project conducted in molecular biology, cell biology, developmental biology, neurobiology, physiology or systems biology. Whole organism, cell culture, in vitro or in silico studies are acceptable. The laboratory research is conducted by the student and supervised by a faculty member at an approved partner university. An information session is held each fall, and an application and interview process is required. The research is typically conducted from May to August. Not eligible for CR/NCR option.

Prerequisite: Minimum grade of 73% in [BIO230H1](#)/ [BIO255H1](#)/ [BIO271H1](#) and permission of the [CSB397Y0](#) coordinator

Breadth Requirements: Living Things and Their Environment (4)

CSB398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research>

-opportunities/research-excursions-program. Not eligible for CR/NCR option.

CSB399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

CSB399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

BCB410H1 - Applied Bioinformatics

Hours: 24L

Practical introduction to concepts, standards and tools for the implementation of strategies in bioinformatics and computational biology. Student led discussions plus a strong component of hands-on exercises.

Prerequisite: BCH311H1/ CSB349H1/ MGY311Y1; (CSC324H1/ CSC373H1). Students who do not have the stated prerequisites are encouraged to contact the course coordinator.

Breadth Requirements: The Physical and Mathematical Universes (5)

BCB420H1 - Computational Systems Biology

Hours: 24L

Current approaches to using the computer for analyzing and modeling biology as integrated molecular systems. Lectures plus hands-on practical exercises. The course extends and complements an introductory Bioinformatics course.

Prerequisite: BCH441H1/ MGY441H1/ BCB410H1 and good working knowledge of R

Breadth Requirements: The Physical and Mathematical Universes (5)

CSB426H1 - Physiology of Stress and Reproduction

Hours: 12L/24S

Students will gain an integrated understanding of how organismal and cellular stress affects the process of reproduction. The focus will be primarily on chordates and will examine genetic, cellular, organismal, behavioural, and social levels of interaction.

Prerequisite: Minimum grade of 73% in CSB325H1

Breadth Requirements: Living Things and Their Environment (4)

CSB427H1 - Drosophila as a Model in Cancer Research

Hours: 12L/12T/12S

Use of the genetic model organism *Drosophila* in biomedical research with specific emphasis on cancer research. Students will read, discuss and present classical papers and current literature in the field to enhance their ability to critically evaluate the primary scientific literature.

Prerequisite: BIO260H1/ HMB265H1, two of CSB328H1/ CSB331H1/ CSB349H1/ MGY350H1

Breadth Requirements: Living Things and Their Environment (4)

CSB428H1 - Cytoskeletal Networks of the Cell

Hours: 12L/12T/12S

The cytoskeleton is a highly dynamic protein network that links all regions and components of the cell to provide a structural framework for organizing numerous cellular activities. This course will explore the molecular regulation of the actin and microtubule cytoskeletons during cell migration and other cellular processes. Topics will include (1) an overview of key regulators of the cytoskeleton, (2) how they organize specific cellular structures, and (3) how the coordinated activities of cytoskeletal networks govern complex cellular behaviours. The format of this course is mainly journal club style presentations and student-led discussions of research papers, together with supporting background lectures. Experience with critical evaluation of research papers is emphasized.

Prerequisite: Minimum grade of 73% in [BCH311H1](#)/[CSB349H1](#)/[MGY311Y1](#), minimum grade of 73% in [BCH340H1](#)/[CJH332H1](#)/[CSB328H1](#)/[CSB329H1](#)/[CSB331H1](#)/[CSB340H1](#)/[CSB397Y0](#)

Breadth Requirements: Living Things and Their Environment (4)

CSB429H1 - Germ Cell Biology

Hours: 12L/12T/12S

This course will discuss the genetic and cell biological aspects of the development of gametes, gonads, and sex related traits in animals, including invertebrates and vertebrates. The course consists of lectures and student seminars, and is based on the discussion of primary scientific literature. Not recommended for students with fewer than 14.0 credits.

Prerequisite: Minimum grade of 77% in [CSB328H1](#)/[CSB340H1](#)/[CSB349H1](#)/[MGY311Y1](#)/[MGY312H1](#)

Breadth Requirements: Living Things and Their Environment (4)

BCB430Y1 - Advanced Special Project in Bioinformatics and Computational Biology

An opportunity for advanced specialized individual research in bioinformatics and computational biology by arrangement with a supervisor. Approval of the application by the BCB coordinator is required. [BCB330Y1](#) is a recommended preparation for this course however students should not normally conduct their project in the same laboratory or continue their previous project. Not eligible for CR/NCR option.

Prerequisite: Permission of the course coordinator (application required). Significant background in both life science and computer science courses is required.

Recommended Preparation: [BCB330Y1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CSB430H1 - Neurogenesis

Hours: 24L/12T

An examination of the molecular and cellular basis of neurogenesis in development and adult nervous systems. Experimental evidence from recent studies in selected invertebrate and vertebrate model systems will be discussed. Topics include neural stem cells, regional specialization of neurogenesis, neuronal and glial differentiation, extrinsic regulation of neurogenesis, adult

neurogenesis, and the evolution of neurogenesis.

Students are expected to have a basic knowledge of molecular genetics, developmental biology and/or neuroanatomy. Lectures will be complemented by student directed seminars that focus on specialized research studies published in leading scientific journals.

Prerequisite: [BIO260H1](#)/[HMB265H1](#), [CSB328H1](#)/[CSB349H1](#)/[HMB200H1](#), [HMB320H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CSB431H1 - Evolution and Development: Gastrulation

Hours: 12L/12T/12S

Gastrulation is used to examine the molecular and cellular mechanisms of a major morphogenetic process and its evolutionary modifications. This course includes small group discussions and presentations. Controversial issues presented in the lectures are debated.

Prerequisite: [CSB328H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CSB432H1 - Advanced Topics in Cellular Neurophysiology

Hours: 12L/24S

This course examines cellular neurophysiological processes in the developing and mature nervous systems with a focus on: (1) understanding modern techniques used in neurophysiological research; and (2) interpreting the results from neurophysiological peer-reviewed manuscripts. This course is interactive and requires students to contribute actively during lectures and seminars, including conducting a group presentation.

Prerequisite: [CJH332H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CSB434H1 - Introduction & Methods of Systems Neuroscience

Hours: 12L/12P/12S

Our brain is highly complex with billions of neurons; how do neurons work together to produce adaptive & flexible behaviors? Systems neuroscience studies this question at the systems level. Using various animal models, it aims to

provide quantitative and causal links between neural circuits/networks and perception, behavior, and cognition. Through this course, you will learn about the popular animal models with simpler brains and interpret the neural mechanisms from multiple perspectives, to acquire a quantitative understanding. Particularly, this course will emphasize interdisciplinary technology, such as large-scale optical neural recording and computational tools. Knowledge gained will provide insights into understanding mental disorders and artificial intelligence.

Prerequisite: Minimum 75% in MAT136H1, and minimum 75% in BIO271H1/ CJH332H1/ PSL300H1

Breadth Requirements: Living Things and Their Environment (4)

CSB435H1 - Regulatory Networks and Systems in Molecular Biology

Hours: 24L/12T

After a review of the basic mechanisms of gene regulation and signaling, this course will expose students to several technological and methodological tools for systematically dissecting regulatory networks and systems. Emphasis is on extracting global insight from genome-scale molecular biology datasets. Students will participate in class discussions of research papers, solve systems biology problems using the R statistical software and write an independent paper.

Prerequisite: BCH311H1/ CSB349H1/ MGY311Y1

Breadth Requirements: Living Things and Their Environment (4)

CSB445H1 - Sleep Biology in Health and Disease

Hours: 3L/33S

This course covers theories in why and how we sleep. It will focus on the biological functions of sleep, how the brain generates different sleep states and how a breakdown in sleep mechanisms contribute to sleep disorders like insomnia, sleep walking and narcolepsy. This course emphasizes student participation in seminar discussion and debates.

Prerequisite: (BIO270H1, BIO271H1)/(PSL300H1, PSL301H1)

Recommended Preparation: CJH332H1/ CSB345H1/ PSY397H1

Breadth Requirements: Living Things and Their Environment (4)

CSB447H1 - Living Without Oxygen: Microbes to Mammals

Hours: 18L/18S

In-depth examination of the unique cellular adaptations of different organisms and tissues to survival in low oxygen environments. Cellular, physiological and biochemical strategies, and systemic and whole organism responses will be investigated to uncover broad-ranging common strategies employed by diverse organisms to live without oxygen and in other stressful environments.

Prerequisite: (BIO270H1, BIO271H1)/(PSL300H1, PSL301H1)

Exclusion: CSB347H1, NUS348H0

Recommended Preparation: BCH210H1

Breadth Requirements: Living Things and Their Environment (4)

CSB450H1 - Proteomics in Systems Biology

Hours: 24L

A discussion on current proteomic approaches to understand biological processes. The role of mass spectrometry, gel electrophoresis, protein-protein interaction and structural biology in understanding how proteins function in pathways and interaction networks will be discussed.

Prerequisite: BIO230H1/ BIO255H1, BCH210H1

Breadth Requirements: Living Things and Their Environment (4)

CSB451H1 - Seminar in Plant Cell Biology

Hours: 6L/30S

Plants represent roughly 80% of the biomass on our planet and are essential primary producers in our ecosystems. At the cellular level, plants display some fascinating differences from other eukaryotic cells, including fragmentation of the secretory pathway, dramatic changes to cytoskeleton organization, and other adaptations to life as a pressurized cell. This course will examine and discuss examples from the primary scientific literature that highlight these distinct features of plant cells by contrasting them to animal cells. We will also discuss how these discoveries can contribute to addressing global challenges, such as developing innovative biomaterials, enhancing food security and cultivating renewable biofuels.

Prerequisite: BIO230H1/ BIO255H1, BIO260H1/ HMB265H1

Recommended Preparation: BCH311H1/ BIO251H1/ CSB330H1/ CSB340H1/ CSB349H1/ CSB350H1/ MGY311Y1/ MGY340H1

Breadth Requirements: Living Things and Their Environment (4)

CSB452H1 - Molecular Interactions Between Plants and Microorganisms

Hours: 24L

This course explores the interactions between plants and both pathogenic and beneficial microorganisms at the molecular level. The course consists of two sections: 1. Plant-pathogenic microbe interactions and plant immunity and 2. Plant-beneficial microbe interactions and plant microbiome. The first section focuses on an in-depth discussion about on-going research of plant immunity against pathogenic microbes. The second section introduces the interaction of plant-beneficial microorganisms and their biotechnological usage for agriculture and food production.

Prerequisite: BCH311H1/ CSB349H1/ MGY311Y1

Recommended Preparation: CSB353H1

Breadth Requirements: Living Things and Their Environment (4)

CSB453H1 - Topics in Cell and Developmental Biology: Biology of Adherens Junctions

Hours: 12L/24S

Understanding how epithelial cells stick together to form tissues and organs, how they withstand mechanical forces, and how the loss of this adhesion leads to diseases such as cancer and its metastasis, are important fundamental questions in biology with significant implications for human health. Adherens junctions (AJs) are known to be dynamic plasma-membrane structures that mediate cell-cell adhesion and promote tissue integrity. In this course, we will discuss primary scientific literature to understand how AJs facilitate multicellular development and how they impact disease. Lectures will be complemented by student-led presentations of important research papers published in leading scientific journals.

Prerequisite: CSB331H1/ CSB328H1/ CSB349H1/ MGY311Y1/ BCH311H1, BIO230H1/ BIO255H1, BIO260H1/ HMB265H1

Recommended Preparation: BIO130H1, CSB331H1

Breadth Requirements: Living Things and Their Environment (4)

CSB454H1 - Pathogenic Effector Biology

Hours: 12L/12S

Microbial pathogens inject effector proteins into host cells in order to sabotage cellular systems and favor the infection process. This course explores the molecular details of how cellular systems (e.g., secretion, cytoskeleton and signaling) are manipulated by pathogenic effectors to promote the infection process, while emphasizing interesting structural and biochemical features of effector biology along the way. The course will also compare and contrast the strategies employed by plant versus animal pathogens, and how immune systems have evolved to cope with cellular hijacking by pathogenic effector molecules. The course will be based on the primary research literature and involve a combination of lectures and critical discussions of research papers.

Prerequisite: BCH311H1/ CSB349H1/ MGY311Y1

Recommended Preparation: MGY377H1

Breadth Requirements: Living Things and Their Environment (4)

CSB457H1 - Post-transcriptional Gene Regulation

Hours: 12L/24S

This course focuses on advances in post-transcriptional gene regulation. Topics include regulatory RNAs, RNA processing, localization, translation, and degradation. In addition to lectures covering background material, emphasis is placed on current research and involves discussion of primary literature in a round-table format.

Prerequisite: Minimum grade of 70% in BCH311H1/ CSB349H1/ MGY311Y1

Breadth Requirements: Living Things and Their Environment (4)

CSB458H1 - Epigenetics

Hours: 36S

A seminar course exploring non-Mendelian phenomena in plants, fungi and animals that reveal aspects of genome organization and regulation that may provide insight into genome function and evolution.

Prerequisite: BIO260H1/ HMB265H1, BCH311H1/ CSB349H1/ MGY311Y1

Breadth Requirements: Living Things and Their Environment (4)

CSB459H1 - Plant Molecular Biology and Biotechnology

Hours: 24L

This course introduces students to major features of gene expression and signal transduction in plants. Topics include strategies for generating transgenic plants and regulating gene expression, as well as the importance of signal transduction in plant growth and survival. How plants sense and respond at the molecular level to environmental stresses such as drought, salinity, cold and disease will be discussed. The application of this basic scientific information in biotechnological strategies for improving agronomic traits will also be addressed.

Prerequisite: BCH311H1/ CSB349H1/ MGY311Y1

Breadth Requirements: Living Things and Their Environment (4)

CSB460H1 - Plant Signal Transduction

Hours: 24L

Plant development, ecological adaptation and crop plant productivity depend on the sophisticated potential of plants to sense and compute signals to regulate their responses. An arsenal of genetic and genomic tools is employed to elucidate these plant signal transduction pathways. Examples from the original literature will be used to introduce general concepts of plant signal transduction, molecular biology and genomics and their application in understanding and influencing plant growth and development.

Prerequisite: BCH311H1/ CSB349H1/ MGY311Y1 or permission of instructor

Breadth Requirements: Living Things and Their Environment (4)

CSB471H1 - Foundational Discoveries in Genome Biology and Bioinformatics: AlphaFold2 and its implications

Hours: 24S

This course is based on the critical analysis of key research articles in genome biology and bioinformatics. The format is interactive and requires students to contribute actively during class meetings. Small student groups will be assigned to present context, figures, data, methods and impact from a number of research articles

during the semester. Based on the readings, small student groups will propose new genome technologies or datasets and new bioinformatics software or databases.

Prerequisite: BCB330Y1/ (BCH441H1/ MGY441H1)/ CSB352H1/ CSB472H1/ EHJ352H1/ MGY428H1

Breadth Requirements: Living Things and Their Environment (4)

CSB472H1 - Computational Genomics and Bioinformatics

Hours: 24L/12T

Computational analyses of DNA and RNA expression data. Understanding biological databases, sequence alignment, sequence annotation, gene prediction, computational analysis of function, motif analysis, phylogenetic analysis, and gene expression profiling analysis. Applied, theoretical and statistical issues will be addressed.

Prerequisite: BIO230H1/ BIO255H1

Recommended Preparation: BIO260H1/ HMB265H1

Breadth Requirements: Living Things and Their Environment (4)

CSB473H1 - Chemical Genomics

Hours: 24L

This course surveys the field of Chemical Genomics, focusing on the analysis of biological problems using chemical approaches. Topics covered include chemical genetics, combinatorial chemistry and combinatorial strategies in molecular biology. Examines both the underlying biological and chemical concepts; however, the focus is primarily biological.

Prerequisite: BIO230H1/ BIO255H1, BIO260H1/ HMB265H1, CHM247H1/ CHM249H1/any 300+ CHM course

Recommended Preparation: BCH210H1

Breadth Requirements: Living Things and Their Environment (4)

CSB474H1 - Methods in Genomics and Proteomics

Hours: 48P

This is a hands-on, laboratory based course offered in conjunction with the Centre for the Analysis of Genome Evolution and Function (CAGEF). It will teach students how to produce and analyze data that are central to the

fields of genomics and proteomics. Techniques taught include DNA and RNA extractions, PCR, Next Generation DNA library preparation and sequencing, expression profiling using RNAseq, protein extraction, 2D-gel electrophoresis and mass spectrometry. This will be combined with associated bioinformatics analyses. (Lab Materials Fee: \$53). A lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these (approximate cost is \$27).

Prerequisite: BIO260H1/ HMB265H1, BIO255H1/ CSB330H1/ CSB350H1 or by permission of the instructor

Recommended Preparation: BCH311H1/ CSB349H1/ MGY311Y1

Breadth Requirements: Living Things and Their Environment (4)

CSB475H1 - Plant Metabolomics

Hours: 24L

This course introduces students to major features of plant metabolism. The content covers plant physiology, natural product chemistry, genetics, molecular biology, and genomics. Topics also include strategies for designing how we modulate metabolic pathways and how we utilize plants for biotechnology through metabolic engineering.

Prerequisite: BCH311H1/ CSB349H1/ MGY311Y1

Breadth Requirements: Living Things and Their Environment (4)

CSB483H1 - Seminar in Development

Hours: 24S

Seminars analyzing major concepts in developmental biology from quantitative, physics-based and molecular perspectives.

Prerequisite: CSB328H1/ CSB340H1

Breadth Requirements: Living Things and Their Environment (4)

CSB490H1 - Team-Based Learning: Current Topics in Cell and Molecular Biology

Hours: 8L/16S

A team-based learning course with emphasis on questions in the fields of protein biochemistry, synthetic biology, and the evolution of proteins and networks of protein-protein interactions. Lectures and seminars will focus on current research topics within these fields and

will provide the background knowledge for students to work in teams to explore the primary research literature, and for each team to develop a formal research proposal. For details on this year's content, please go to the Undergraduate course section of the CSB website, <http://csb.utoronto.ca>.

Prerequisite: BIO260H1/ HMB265H1, CSB330H1/ CSB349H1/ CSB352H1

Breadth Requirements: Living Things and Their Environment (4)

CSB491H1 - Team-Based Research: Research in Cell and Molecular Biology

Hours: 60P

CSB491H1 is a plant molecular biology lab that builds on molecular biology and biochemistry skills acquired in CSB350H1 or CSB330H1. After an initial training lab section, students will work in teams to develop a research project which they will conduct in the second half of the course. They will develop laboratory and teamwork skills that are desirable for them to function in a research laboratory and in the workplace. The course will integrate current molecular biology techniques, including designing and characterizing mutants made with CRISPR/Cas9. (Lab Materials Fee: \$53). Lab coat and safety glasses are required for use in laboratories; students are responsible for purchasing these items (approximate cost is \$27).

Prerequisite: CSB330H1/ CSB350H1 with a minimum grade of 77% and approval of the instructor

Breadth Requirements: Living Things and Their Environment (4)

CSB492H1 - Advanced Topics in Cell and Systems Biology

Hours: 24L

This advanced course covers topics in cell and systems biology at all levels of biological organization. Students learn about the wide array of state-of-the-art molecular, genomic, proteomic, cell biological, imaging, physiological and computational tools and methods that researchers use to study the behaviour of cells.

Prerequisite: CSB325H1/ CSB349H1

Breadth Requirements: Living Things and Their Environment (4)

CSB497H1 - Independent Research in Cell and Systems Biology I

An original research project (a literature review alone is not sufficient) requiring the prior consent of a member of the Department to supervise the project. The topic is to be mutually agreed upon by the student and supervisor. They must arrange the time, place, and provision of any materials and submit to the Undergraduate Office a signed form of agreement outlining details prior to being enrolled. In the Fall or Winter sessions, a commitment of 8-10 hours per week is expected for research and related course activities. If spread over both the Fall and Winter sessions, a commitment of 4-5 hours per week is expected. In the Summer Session, the number of hours doubles per week (e.g., 16-20 for F or S, or 8-10 for Y) as the length of the term is halved compared to the Fall or Winter term. Many students spend more than this amount of time as they become immersed in their project. This course is normally open only to fourth year students with adequate background in Cell and Systems Biology. Course requirements include a final report, and either an oral presentation (Summer and Fall sessions) or a poster presentation (Winter session). Two workshops on scientific research are scheduled and highly recommended. Details for enrollment are available at the Undergraduate course section of the CSB website, <http://csb.utoronto.ca>. Maximum of 2.0 credits allowed among CSB497H1, CSB498Y1 and CSB499Y1. (Lab Materials Fee: approximately \$27). Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

CSB498Y1 - Independent Research in Cell and Systems Biology I

An original research project (a literature review alone is not sufficient) requiring the prior consent of a member of the Department to supervise the project. The topic is to be mutually agreed upon by the student and supervisor. They must arrange the time, place, and provision of any materials and submit to the Undergraduate Office a signed form of agreement outlining details prior to being enrolled. In the Fall/Winter session, a commitment of 8-10 hours per week is expected for research and related course activities. In the Summer session, the number of hours doubles (16-20 per week) as the length of the term is halved. This course is normally open only to fourth year students with adequate background in Cell and Systems Biology. Course requirements include a final report and either an oral presentation (Summer session) or a poster presentation (Fall/Winter session). Four workshops on scientific research are scheduled and highly recommended. Details for enrollment are available at the Undergraduate course section of the CSB website, <http://csb.utoronto.ca>. Maximum of 2.0 credits allowed

among CSB497H1, CSB498Y1 and CSB499Y1. (Lab Materials Fee: \$53). Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

CSB499Y1 - Independent Research in Cell and Systems Biology II

Allows students to do a second independent project. Operates in the same manner as CSB497H1/ CSB498Y1. Maximum of 2.0 credits allowed among CSB497H1, CSB498Y1 and CSB499Y1. Students who have completed both CSB497H1 and CSB498Y1 are excluded from taking CSB499Y1. (Lab Materials Fee: \$53). Not eligible for CR/NCR option.

Prerequisite: CSB497H1/ CSB498Y1

Breadth Requirements: Living Things and Their Environment (4)

Chemistry

Faculty List

University Professors Emeriti

J.B. Jones, BSc, PhD, D Phil, FRSC, FCIC
J.C. Polanyi, MSc, PhD, D Sc, FRS, FRSC, FRSEd

Professors Emeriti

D.J. Donaldson, BSc, PhD (University of Toronto Scarborough)
M. Georges, PhD (University of Toronto Mississauga)
R.E. Kapral, BSc, PhD, FRSC
U.J. Krull, BSc, PhD, FCIC (University of Toronto Mississauga)
P.M. Macdonald, MSc, PhD (University of Toronto Mississauga)
R.A. McClelland, BSc, PhD, FRSC (University of Toronto Scarborough)
S. McLean, BSc, PhD, FCIC
M. Menzinger, Dip Eng, MSc, PhD (SM)
W.F. Reynolds, MSc, PhD
E.A. Robinson, BSc, PhD, D Sc (University of Toronto Mississauga)
I.W.J. Still, BSc, PhD, D Sc (University of Toronto Mississauga)
T.T. Tidwell, BSc, AM, PhD, FRSC (University of Toronto Scarborough)
J.P. Valteau, MA, PhD (I)
S.G. Whittington, MA, PhD (T)

Professor Emerita, Teaching Stream

J. C. Poë, ARCS, MSc, DIC, FCIC (University of Toronto Mississauga)

Associate Professors Emeriti

S.J. Fraser, BA, PhD (University of Toronto Scarborough)

Associate Professors Emeriti, Teaching Stream

C.S. Browning, MSc, PhD (SM)
C.M. Kutas, BSc, MA, PhD

Senior Lecturers Emeriti

S. Skonieczny, D Sc, PhD
H. O. Ohorodnyk, MSc

Professor and Chair of the Department

M. Lautens, BSc, PhD, OC, FCIC, FRSC (T)

Associate Professor and Associate Chair (Graduate)

S. Rousseaux, BSc, PhD effective July 1, 2025

Professor, Teaching Stream and Associate Chair (Undergraduate)

A.P. Dicks, BSc, PhD (SM)

B. Morra, BSc, PhD effective January 1, 2026

University Professors

P.W. Brumer, BSc, PhD, FRSC
E. Kumacheva, MSc, PhD, FRSC
M. Lautens, BSc, PhD, OC, FCIC, FRSC (T)
R.J.D. Miller, BS, PhD, FRSC, FCIC
G.A. Ozin, BSc, D Phil, FRSC, FCIC
J.C. Polanyi, MSc, PhD, D Sc, FRS, FRSC, FRSEd
D.W. Stephan, BSc, PhD, FCIC, FRSC, FRSC(UK), FRS
M.A. Winnik, BA, PhD, FRSC, FCIC

Professors

J.P. Abbatt, BSc, PhD, FRSC
A. Aspuru-Guzik, BSc, PhD
J. Chin, MSc, PhD
M.C. Goh, BS, PhD (U)
P. Gunning, BSc, PhD (University of Toronto Mississauga) Status Only
A. Hargrove, BSc, PhD (University of Toronto Mississauga)
A.F. Izmaylov, MSc, PhD (University of Toronto Scarborough)
R.H. Kluger, AM, PhD, FCIC, FRSC
H.B. Kraatz, PhD (University of Toronto Scarborough)
S.A. Mabury, BS, PhD (U), FRSC
R.H. Morris, BSc, PhD, FRSC, FCIC
J.G. Murphy, BSc, PhD
M. Nitz, BSc, PhD
R.S. Prosser, MSc, PhD (University of Toronto Mississauga)
J.M. Schofield, BA, PhD
D.S. Seferos, BSc, PhD
D. Segal, BSc, PhD
A.J. Simpson, BSc, PhD (University of Toronto Scarborough)
M.J. Simpson, BSc, PhD (University of Toronto Scarborough)
M.S. Taylor, BSc, PhD
M. Thompson, BSc, PhD, D Sc, FRSC, FCIC
A. von Lilienfeld, BSc, PhD
G. Walker, BA, PhD
F. Wania, BSc, PhD (University of Toronto Scarborough)
A. Wheeler, BSc, PhD
G.A. Woolley, BSc, PhD
A. Yudin, BS, PhD

Associate Professors

A. Beharry, PhD (University of Toronto Mississauga)
A. Dhirani, MSc, PhD
U. Fekl, MSc, PhD (University of Toronto Mississauga)
R.A. Jockusch, BA, PhD

V. Kanelis, BSc, PhD (University of Toronto Mississauga)
 K. Kerman, MSc, PhD (University of Toronto Scarborough)
 D.R. McMillen, MA Sc, PhD (University of Toronto Mississauga)
 H. Peng, BSc, PhD
 S. Rousseaux, BSc, PhD
 J.A. Shin, AB, PhD (University of Toronto Mississauga)
 D. Song, BSc, PhD
 M. Wilson, MSc, PhD
 X. Zhang, MSc, PhD (University of Toronto Scarborough)

Assistant Professors

H. Cui, BSc, PhD
 X. Li, BSc, PhD
 S. Rauscher, BSc, PhD (University of Toronto Mississauga)
 R. Sullan, BSc, PhD (University of Toronto Scarborough)
 H. Tran, PhD
 O. Voznyy, PhD (University of Toronto Scarborough)

Professors, Teaching Stream

A.P. Dicks, BSc, PhD (SM)

Associate Professors, Teaching Stream

S. Dalili, MSc, PhD (University of Toronto Scarborough)
 J. D'eon, BSc, PhD
 A. Hadzovic, PhD (University of Toronto Scarborough)
 L. Mikhaylichenko, MSc, PhD (University of Toronto Scarborough)
 B. Morra, BSc, PhD
 P.A.E. Piunno, MSc, PhD (University of Toronto Mississauga)
 K. Quinlan, BSc, PhD
 E. Sauer, B Sc, PhD (University of Toronto Scarborough)
 D.C. Stone, BSc, PhD

Assistant Professors, Teaching Stream

J. De Backere, BSc, PhD
 K. Kim, BSc, PhD (University of Toronto Scarborough)
 K. Luska, BSc, MSc, PhD
 A. Sakaya, BSc, PhD
 J. Strautmanis, PhD (University of Toronto Mississauga)

molecules, and on using this understanding to interpret and predict the behaviour of matter. Many of the concepts of physics, and the methods of mathematics, are basic to chemistry. Chemistry is of fundamental importance to many other subjects including astrophysics, biological sciences, environmental science, geology, materials science, and medical sciences. These and other aspects of the subject are reflected in the undergraduate courses and programs offered by the Department.

The Department has made extensive changes to its course and program offerings in the last few years. These changes included a revision of first-year course delivery, modifications to later-year courses, and the refreshment of all six specialist programs in Chemistry, Biological Chemistry, Materials Science, Pharmaceutical Chemistry, Synthetic & Catalytic Chemistry, and Chemical Physics. In addition, a brand new Environmental Chemistry major has been launched. Students enrolled in any specialist or major program can select a Focus in Green Chemistry or a Focus in Practical Chemical Analysis as part of their undergraduate experience to highlight their acquired knowledge and skills to potential employers.

Students enrolled in any of the six specialist programs are eligible to participate in the Arts & Science Internship Program stream.

Students can choose between two first-year options according to their intended area of study.

1. CHM151Y1 is the course that is strongly recommended for students who plan to enrol in one of the specialist programs involving chemistry (including Biological Chemistry and Pharmaceutical Chemistry), or who plan to include a substantial amount of chemistry in their degree (such as those following a Chemistry major program. CHM151Y1 features a unique Course Community that significantly supports and enhances the student learning experience through informal sessions facilitated by upper-year undergraduate mentors.

2. The combination of CHM135H1 and CHM136H1 is recommended for students who intend to take programs in the Life or Health Sciences that do not require a large amount of chemistry.

The outlines of these first-year courses, together with those for later-year offerings, are shown in this Calendar. More detailed information is available from the Department and is posted at <https://www.chemistry.utoronto.ca/undergraduate/current-students/undergraduate-courses>.

Incoming first-year students may find more information about the first-year chemistry courses at <https://www.chemistry.utoronto.ca/current-students/first-year-students>. Some examples of common concepts from high school chemistry studies that you should be familiar with are listed at

Introduction

Chemistry is a rewarding intellectual pursuit and a dominant force in shaping our civilization. Chemistry places a strong emphasis on an understanding of the structures and properties of individual atoms and

<https://www.chemistry.utoronto.ca/prospective-students/self-assessment-test>.

Students who are following programs that contain a substantial number of chemistry courses are strongly advised to take courses in the proper year (i.e., 200-level in the second year, etc.). Following the correct sequence will enhance the level and balance of preparation for all later year courses, and timetable conflicts will be avoided. Students whose current programs may be affected by the introduction of new or revised chemistry courses are advised to consult the Department at the earliest possible opportunity.

Students requiring more information about Chemistry programs and courses are invited to visit the Undergraduate Office, Lash Miller Chemical Laboratories, Room 151, or to initiate contact via email (chem.undergrad@utoronto.ca).

Lab Materials Fee

Some courses in this department have a mandatory Lab Materials Fee to cover non-reusable materials. The fee for each such course is given below in the course description and will be included on the student's invoice on ACORN.

Regarding Materials Science Courses

Notes

1. The MSE courses listed in the programs below are administered by the Faculty of Applied Science and Engineering, and are subject to the rules and regulations of that Faculty, including those for term dates, examination periods and deferral practices.
2. The CHM courses listed for the Materials Science program are described in this section of the Calendar.
3. Enrollment in MSE courses is done through your own College Registrar. It is not necessary to petition as the courses listed below have been pre-approved for this Specialist Program.
4. Deferment of Final Exams is NOT generally granted in the Faculty of Applied Science and Engineering.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Chemistry programs impacted by this policy: ASSPE1376, ASMAJ1376, and ASMIN1376; ASMAJ2543 and ASMIN2543

Chemistry Programs

Biological Chemistry Specialist (Science Program) - ASSPE1995

Consult Professor G. A. Woolley, Department of Chemistry.

Biological Chemistry examines Nature at the molecular level by using a combination of synthetic, inorganic, analytical and physical chemistry as well as the tools of molecular biology and biochemistry. This program provides the setting to understand the chemical reactions and interactions that occur in biological processes, as well as how chemical strategies can be used to control these systems. This program includes sufficient flexibility to allow focus in areas such as bioinorganic, bioorganic, biophysical or medicinal chemistry. Students graduating from this program will be prepared for career paths in the biotechnology, biomedical and pharmaceutical sectors, as well as for research and teaching in related areas of chemistry and biology. This program is accredited by the Canadian Society for Chemistry.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirement listed below to enrol. Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

(CHM135H1, CHM136H1)/CHM151Y1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 63% in any of the required courses will not be considered for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have

been admitted to the Biological Chemistry Specialist in the Summer after Year 2.

Completion Requirements:

(14.0 credits, including 3.0 credits from 400-level courses)

First Year: BIO120H1, BIO130H1; CHM151Y1 (strongly recommended)/ (CHM135H1, CHM136H1); (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

First or Second Year: (PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1)

Second and Higher Years:

1. BCH210H1; BIO230H1/ BIO255H1; CHM217H1, CHM220H1/ CHM222H1 (CHM220H1 recommended), (CHM236H1, CHM237H1)/ CHM238Y1, CHM249H1
2. CHM310H1, CHM347H1, CHM348H1, CHM379H1
3. At least 1.0 credit from the following: CHM317H1, CHM327H1, CHM338H1, CHM343H1, CHM395Y1/ CHM499Y1/ PHC489Y1, CHM410H1
4. CHM437H1, CHM447H1, CHM479H1
5. Additional 300/400-level BCH or CHM courses to a total of 14.0 credits. CSB450H1 is also acceptable.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Chemical Physics Specialist (Science Program) - ASSPE0600

Consult Professor J. Schofield, Department of Chemistry.

Chemical Physics aims to explain structure and dynamics of molecular and bulk systems in terms of atomic and molecular interactions. Sub-disciplines and specialized topics include reaction dynamics, spectroscopy, optical control of molecular processes, nanoscale science, surface chemistry, theoretical and experimental studies of soft systems (polymers, liquids, biological systems), quantum control and quantum information sciences. The Chemical Physics program will provide students with a solid grounding in physical chemistry, and will prepare students for careers in experimental and theoretical physical sciences, in academia or in research development for companies.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed

below to enrol. Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

(CHM135H1, CHM136H1)/CHM151Y1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 63% in any of the required courses will not be considered for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Chemical Physics Specialist in the Summer after Year 2.

Completion Requirements:

(14.0 credits, including 1.5 credits from 400-level courses)

First Year:

1. (CHM151Y1 strongly recommended)/ (CHM135H1, CHM136H1)
2. (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1
3. (PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1)

Higher Years:

1. APM346H1, CHM222H1, CHM223H1, CHM326H1/ PHY356H1, CHM327H1, CHM328H1, MAT223H1/ MAT240H1, MAT235Y1/ MAT237Y1, MAT244H1, MAT334H1, PHY250H1, PHY254H1, PHY354H1, PHY350H1, CHM423H1/ PHY456H1
2. 2.0 credits from: CHM210H1, CHM217H1, (CHM236H1, CHM237H1)/ CHM238Y1, (CHM249H1 strongly recommended)/ CHM247H1, CHM310H1, CHM317H1, CHM338H1, CHM348H1, CHM415H1
3. Additional 400-level CHM/PHY 0.5 credit courses to a total of 14.0 credits. (Note: CHM395Y1 can be used toward this requirement).

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Chemistry Specialist (Science Program) - ASSPE1376

Consult Professor A. Dicks, Department of Chemistry.

The Chemistry Specialist Program provides broad coverage of the core areas of chemistry together with appropriate courses in mathematics and physics during the first three years and allows students to follow a particular area of interest or a more general program in the fourth year. The program is suitable for professional work in any area of chemistry and for entry into graduate school to continue work in any of the sub-fields of chemistry, provided that appropriate options are chosen in the fourth year. This program is accredited by the Canadian Society for Chemistry.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol. Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

(CHM135H1, CHM136H1)/CHM151Y1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 63% in any of the required courses will not be considered for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Chemistry Specialist in the Summer after Year 2.

Completion Requirements:

(14.0 credits, including at least 3.0 credits from 400-level courses)

First Year:

1. (CHM151Y1 strongly recommended)/ (CHM135H1, CHM136H1)

2. (MAT135H1, MAT136H1)/ MAT137Y1/
MAT157Y1
3. (PHY131H1, PHY132H1)/ (PHY151H1,
PHY152H1)

Second Year:

1. CHM217H1, CHM220H1/ CHM222H1,
CHM223H1, CHM228H1, (CHM236H1,
CHM237H1)/ CHM238Y1, CHM249H1

Third and Fourth Years:

1. BCH210H1, CHM326H1/ CHM328H1,
CHM327H1
2. Additional credits from 300/400-level CHM/ MAT/
another science, including at least three of
CHM317H1, CHM338H1, CHM343H1,
CHM379H1, CHM395Y1/ CHM499Y1/
PHC489Y1, CHM410H1. Minimum 3.0 CHM
credits at the 400-level to a total of 14.0 credits.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Materials Science Specialist (Science Program) - ASSPE2424

Consult Professor Andrew Dicks, Department of Chemistry.

This program draws both on the basic sciences of chemistry and physics, and on the more applied areas such as metallurgy or ceramics. Courses dealing with these latter fields are offered through the Department of Materials Science in the Faculty of Applied Science and Engineering. This is an appropriate program for students with career interests in solid-state, polymer, or composite materials industries, or for graduate work in either chemistry or materials science, with an appropriate choice of options. Students may follow the Materials Chemistry path by taking the research course CHM499Y1 or the Materials Science and Engineering path by taking the research courses MSE492H1 and MSE493H1. This program is accredited by the Canadian Society for Chemistry.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirement listed below to enrol. Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

([CHM135H1](#), [CHM136H1](#))/[CHM151Y1](#))

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 63% in any of the required courses will not be considered for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Materials Science Specialist in the Summer after Year 2.

Completion Requirements:

(14.0 credits, including 1.0 credit from 400-level courses)

First Year:

1. [BIO120H1](#)
2. [CHM151Y1](#) (strongly recommended)/ ([CHM135H1](#), [CHM136H1](#))
3. ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)/

[MSE432H1](#)/ [MSE443H1](#)/ [MSE543H1](#)),
[MSE440H1](#), [MSE458H1](#), [MSE459H1](#),
[MSE461H1](#), [MSE465H1](#)
5. [CHM499Y1](#)/ ([MSE492H1](#), [MSE493H1](#))

*It is highly recommended that students in the Materials Science Specialist Program complete [MSE202H1](#).

Students in this program have the option to complete the [Arts & Science Internship Program](#) (ASIP) stream.

Pharmaceutical Chemistry Specialist (Science Program) - ASSPE1211

Consult Professor D. Dubins, Faculty of Pharmacy

The Pharmaceutical Chemistry Specialist Program combines knowledge of the biological, medical, and physical sciences in the study of the scientific aspects of drug therapy, with an emphasis placed on the chemical nature of the reactions and interactions involved in drug therapy. The program is offered jointly by the Department of Chemistry and the Leslie Dan Faculty of Pharmacy at the University of Toronto. Students in the Pharmaceutical Chemistry Specialist program will receive a solid background and training in physical, organic, and analytical chemistry, and will also learn the fundamental aspects of the synthesis, manufacture, use, and mode of action of drugs. This program provides excellent preparation for future work in the pharmaceutical industry and is accredited by Canadian Society for Chemistry,

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- [BIO120H1](#) and [BIO130H1](#)
- ([CHM135H1](#) and [CHM136H1](#))/ [CHM151Y1](#)
- ([PHY131H1](#) and [PHY132H1](#))/ ([PHY151H1](#) and [PHY152H1](#))

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60%, or a grade average lower than 70% will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program.

Arts & Science Internship Program

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream

after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that space is more limited for Year 3 entry and students applying for Year 3 entry must have been admitted to the Pharmaceutical Chemistry Specialist in the Summer after Year 2.

Completion Requirements:

(13.0 credits, including 1.0 credit from 400-level courses)

NOTE: Some of the courses listed below may have prerequisites.

First Year:

1. [BIO120H1](#), [BIO130H1](#)
2. ([CHM135H1](#) and [CHM136H1](#))/ [CHM151Y1](#)
3. ([PHY131H1](#) and [PHY132H1](#))/ ([PHY151H1](#) and [PHY152H1](#))

Second Year:

1. [BCH210H1](#)
2. [BIO230H1](#)
3. [CHM220H1](#)/ [CHM222H1](#), [CHM223H1](#), ([CHM249H1](#) strongly recommended/ [CHM247H1](#))
4. [PCL201H1](#)
5. [PHC230H1](#)

Third Year:

1. [CHM217H1](#)
2. [PHC300H1](#), [PHC301H1](#), [PHC320H1](#), [PHC330H1](#), [PHC340Y1](#)

Fourth Year:

1. [PHC489Y1](#)/ [CHM499Y1](#)/ [CHM395Y1](#)
2. 2.0 credits from: [CHM317H1](#), [CHM342H1](#), [CHM347H1](#), [CHM379H1](#), [CHM410H1](#), [CHM414H1](#), [CHM417H1](#), [CHM427H1](#), [CHM440H1](#), [JPM300H1](#), [JPM400Y1](#), [PCL362H1](#), [PCL386H1](#), [PHC331H1](#), [PHC401H1](#), [PHC420H1](#), [PCL421H1](#), [PHC430H1](#), [PHC431H1](#), [PHC432H1](#), [PHC435H1](#), [PHC460H1](#), [PHC462H1](#), [PHC470H1](#), [PSL300H1](#), [PSL301H1](#)

Note that not all of the 400-level PHC courses are offered every academic year.

Synthetic & Catalytic Chemistry Specialist (Science Program) - ASSPE1377

Consult Professor R. Batey, Department of Chemistry.

This program focuses on the fundamentals and practical aspects of modern synthetic organic and inorganic chemistry, and the understanding and applications of catalytic reactions. Students will become exposed to extensive green chemistry approaches from both experimental and theoretical perspectives. The program provides preparation for career paths as synthetic/discovery chemists, in the pharmaceutical, biotechnology, biomedical, crop protection, materials and related sectors, or for academic research and teaching positions. This program is accredited by the Canadian Society for Chemistry.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol. Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

([CHM135H1](#), [CHM136H1](#))/[CHM151Y1](#))

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 63% in any of the required courses will not be considered for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Synthetic & Catalytic Chemistry Specialist in the Summer after Year 2.

Completion Requirements:

(14.0 credits)

First Year: ([CHM151Y1](#) strongly recommended)/ ([CHM135H1](#), [CHM136H1](#)); ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)/ [MAT157Y1](#); ([PHY131H1](#), [PHY132H1](#))/ ([PHY151H1](#), [PHY152H1](#))

Second and Higher Years:

1. BCH210H1, CHM217H1, (CHM220H1/CHM222H1, CHM223H1), CHM228H1, (CHM236H1, CHM237H1)/ CHM238Y1, (CHM249H1 strongly recommended)/ CHM247H1
2. CHM317H1, CHM338H1, CHM342H1, CHM343H1, CHM347H1, CHM348H1
3. CHM432H1, CHM440H1, CHM441H1, CHM443H1
4. CHM395Y1/ CHM499Y1/ PHC489Y1 and/or CHM397H0/ CHM398H0 in areas relevant to the program with prior approval by the Department
5. Additional 300/400-level courses from CHM, which may include courses from among CHM325H1, CHM355H1/ CHM328H1, CHM379H1, CHM416H1, CHM434H1/ CHM455H1, CHM437H1, CHM447H1 and CHM479H1 to a total of 14.0 credits.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Chemistry Major (Science Program) - ASMAJ1376

Consult Professor A. Dicks, Department of Chemistry.

The Chemistry Major Program provides exposure to the core areas of chemistry together with appropriate courses in mathematics during the first two years and allows students to follow a particular area or areas of interest during the third year and fourth year. The program is extremely flexible in its design in that students may focus their studies in the traditional sub-disciplines of inorganic, analytical, organic, or physical chemistry during the second year, and then progress to take upper-year courses in these areas or in additional sub-disciplines including biological, materials and environmental chemistry. Students gain extensive laboratory experience throughout the program from whichever path they choose to take.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol. Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

(CHM135H1, CHM136H1)/CHM151Y1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 63% in any of the required courses will not be considered for

admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

Completion Requirements:

(8.0 credits, including at least one 0.5 CHM credit at the 400-level)

First Year: (CHM151Y1 strongly recommended)/(CHM135H1 and CHM136H1); (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1

Second Year:

At least two of the following four options:

- CHM217H1
- CHM220H1/ CHM222H1
- (CHM236H1 and CHM237H1)/ CHM238Y1
- CHM249H1/ CHM247H1

Third Year: At least two of CHM317H1, CHM327H1, CHM338H1, CHM343H1, CHM348H1, CHM379H1

Fourth Year: Additional 200/300/400-level CHM courses to a total of 7.0 credits (CHM299H1, CHM299Y1, CHM396Y0, CHM397H0, CHM398H0, CHM398Y0, CHM399H1, CHM399Y1 excluded). Students may count either CHM395Y1 or CHM499Y1 towards Chemistry Major requirements.

Environmental Chemistry Major (Science Program) - ASMAJ2543

Consult Professor J. Murphy, Department of Chemistry

Environmental chemistry is the study of the chemical impacts of humankind's activities on the soil, air, and water. This program focuses on the development of fundamental skills in instrumental and mechanistic chemical analysis that are required to understand the sources, fate, and impacts of both organic and inorganic contaminants in soil, air, water, and biological tissues. It involves a solid foundation in chemistry with specialized courses in environmental and analytical chemistry and contains flexibility for students to select additional courses in areas of study of most interest to them. Students may be interested in combining an Environmental Chemistry Major with other major programs such as Environmental Science, or programs in the life sciences offered by departments including Cell & Systems Biology and Ecology & Evolutionary Biology.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol. Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

(CHM135H1, CHM136H1)/ CHM151Y1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 63% in any of the required courses will not be considered for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

Completion Requirements:

(8.0 credits)

First Year:

1. (CHM135H1, CHM136H1)/ CHM151Y1
2. (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

Second Year:

3. CHM210H1, CHM217H1
4. (CHM249H1 strongly recommended)/ CHM247H1
(CHM220H1/ CHM222H1 is strongly recommended.)

Third Year:

5. CHM310H1
6. At least 1.0 credit from: CHM317H1, CHM327H1, CHM338H1, CHM343H1, CHM348H1, CHM379H1

Fourth Year:

7. CHM410H1 and CHM415H1

8. Additional 200/300/400-level CHM courses to a total of 7.0 CHM credits (CHM299H1, CHM299Y1, CHM396Y0, CHM397H0, CHM398H0, CHM398Y0, CHM399H1, CHM399Y1 excluded)

Environmental Chemistry Minor (Science Program) - ASMIN2543

Consult Professor J. Murphy, Department of Chemistry

The Environmental Chemistry Minor program provides a balanced fundamental background in chemistry as well as an introduction to the major issues associated with environmental chemistry. This is achieved through a combination of introductory courses at the first and second-year levels, along with specific analytical and environmental chemistry courses in upper years.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, including 1.0 credit at the 300+ level)

1. (CHM135H1, CHM136H1)/ CHM151Y1
2. 1.0 credit from: CHM217H1, CHM220H1/ CHM222H1, (CHM236H1, CHM237H1)/ CHM238Y1, CHM247H1/ CHM249H1
3. CHM210H1
4. CHM310H1, and 1.0 credit from: CHM317H1, CHM410H1, CHM415H1

Chemistry Minor (Science Program) - ASMIN1376

Consult Professor A. Dicks, Department of Chemistry.

The Chemistry Minor is an open-enrollment program that provides students with an opportunity to experience the different sub-disciplines in chemistry without the more significant commitment of enrolling in a specialist or major program. Students gain laboratory experience throughout the program in an area or areas of their choice (organic, inorganic, physical, biological, or analytical).

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Consult Associate Chair, Undergraduate Studies, Department of Chemistry.

(4.0 credits, including 1.0 credit CHM course at the 300+ level)

First Year:

- CHM151Y1/ (CHM135H1 and CHM136H1)

Second Year:

At least one of the following three options:

- CHM217H1
- (CHM236H1 and CHM237H1)
- CHM249H1/ CHM247H1

Third Year & Fourth Year:

- Additional 200/300/400-level CHM courses to a total of 4.0 credits (CHM299Y1, CHM395Y1, CHM396Y0, CHM397H0, CHM398H0, CHM398Y0, CHM399Y1 excluded)

Focus in Green Chemistry

Consult Professor A. Dicks, Department of Chemistry.

The Focus in Green Chemistry provides students with the opportunity to emphasize green chemistry as part of any chemistry specialist or major program they are enrolled in. An understanding of green chemistry principles is integral to meeting several of the United Nations Sustainable Development Goals (SDGs: <https://www.un.org/sustainabledevelopment/sustainable-development-goals>), particularly those centered around affordable energy, climate action, clean water and sanitation, responsible consumption and production, and good well-being. As such, green chemistry broadly concerns the design and redesign of products and processes to reduce their impact on human health and the environment. This focus will be attractive to students who wish to combine courses that cover principles of toxicology, reaction metrics, safer chemicals/solvents, pollution prevention/recycling, catalysis, and energy efficiency.

Enrolment Requirements:

Enrolment in one of the following programs is required:

- Chemistry Major (Focus ASFOC1376A)
- Chemistry Specialist (Focus ASFOC1376B)
- Biological Chemistry Specialist (Focus ASFOC1995A)
- Synthetic & Catalytic Chemistry Specialist (Focus ASFOC1377A)
- Pharmaceutical Chemistry Specialist (Focus ASFOC1211A)
- Chemical Physics Specialist (Focus ASFOC0600A)
- Materials Science Specialist (Focus ASFOC2424A)
- Environmental Chemistry Major (Focus ASFOC2543A)

Completion Requirements:

(2.5 credits)

- (CHM135H1, CHM136H1)/ CHM151Y1
- CHM249H1
- CHM310H1, CHM343H1

Focus in Practical Chemical Analysis

Consult Professor D. Stone, Department of Chemistry.

The Focus in Practical Chemical Analysis provides students with the opportunity to emphasize chemical detection, identification, and measurement in a laboratory setting as part of any chemistry specialist or major program they are enrolled in. Having experience with and an understanding of methods for chemical analysis is of considerable value for both potential employers and students pursuing postgraduate research. Chemical analysis has wide application in fields as diverse as alternative energy and storage solutions; clinical medicine and research; drinking water quality and regulatory compliance; environmental monitoring and remediation; food quality and safety; pharmaceutical development, testing, and quality assurance; and product manufacturing and quality control.

Enrolment Requirements:

Enrolment in one of the following programs is required:

- Chemistry Specialist - ASSPE1376 (Focus Code: ASFOC1376D)
- Biological Chemistry Specialist - ASSPE1995 (Focus Code: ASFOC1995B)
- Pharmaceutical Chemistry Specialist - ASSPE1211 (Focus Code: ASFOC1211B)
- Materials Science Specialist - ASSPE2424 (Focus Code: ASFOC2424B)
- Synthetic & Catalytic Chemistry Specialist - ASSPE1377 (Focus Code: ASFOC1377B)
- Chemical Physics Specialist - ASSPE0600 (Focus Code: ASFOC0600B)
- Chemistry Major - ASMAJ1376 (Focus Code: ASFOC1376C)
- Environmental Chemistry Major - ASMAJ2543 (Focus Code: ASFOC2543C)

Completion Requirements:

Completion of the Focus in Practical Chemical Analysis requires the following 2.5 credits:

- CHM217H1
- CHM317H1 (students in ASSPE1211 may use PHC340Y1)
- Additional courses to a total of 2.5 credits from: CHM338H1, CHM343H1, CHM379H1, CHM410H1, and CHM441H1. CHM395Y1/ CHM499Y1/ PHC489Y1 may be used to fulfil this requirement with the permission of the department.

Chemistry Courses

CHM101H1 - The Chemistry and Biology of Organic Molecules: Sex, Drugs and Rock and Roll!

Hours: 30L/6T

An introduction to chemistry and chemical principles for non-scientists, with a focus on the chemistry and biology of organic molecules. The myriad roles these compounds play in our lives are discussed, including their use of pheromones, medicines and weapons, and their effect on colour, taste and smell.

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM135H1 - Chemistry: Physical Principles

Hours: 36L/12T/18P

CHM135H1 and CHM136H1 cannot be taken in the same session.

Structure of matter, gases, liquids and solids; phase equilibria and phase diagrams; colligative properties; chemical equilibria; electrolyte solutions and electrochemistry; reaction kinetics; introduction to thermodynamics. Recommended for students in life and health science programs that involve a small amount of chemistry. (Lab Materials Fee: \$26).

Prerequisite: Chemistry SCH4U, Mathematics MHF4U + MCV4U

Corequisite: (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1 recommended but may be required for further Chemistry courses

Exclusion: CHM151Y1, CHMA11H3, CHM110H5

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM136H1 - Introductory Organic Chemistry I

Hours: 36L/12T/18P

CHM135H1 and CHM136H1 cannot be taken in the same session.

An introduction to principles of structure and their relation to reactivity of organic molecules: molecular structure, stereochemistry, functional groups, reactions, and mechanisms. Recommended for students in life and health science programs that involve a small amount of chemistry. (Lab Materials Fee: \$26).

Prerequisite: CHM135H1

Corequisite: (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1 recommended but may be required for further Chemistry courses

Exclusion: CHM151Y1, CHM242H5, CHMB41H3

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM151Y1 - Chemistry: The Molecular Science

Hours: 72L/24T/35P

An introduction to the major areas of modern chemistry, including organic and biological chemistry; inorganic/materials chemistry and spectroscopy; and physical chemistry/chemical physics. The course is highly recommended for students who plan to enrol in one of the chemistry specialist programs, or who will be including a substantial amount of chemistry in their degree (such as those following a chemistry major or minor program). The combination of CHM151Y1 and CHM249H1 serves as a full year introductory course in organic chemistry with laboratory. (Lab Materials Fee: \$39).

Note: CHM151Y1 has a unique Course Community where the undergraduate experience in chemistry is greatly enhanced through a series of workshops, research seminars, tours, outreach opportunities and social activities. 90-minute biweekly Course Community meetings are held during laboratory class hours during alternate weeks to the laboratory sessions. The lab time is reserved for CHM151Y1 activities every week of each semester.

Prerequisite: Chemistry SCH4U, Mathematics MHF4U + MCV4U; Physics SPH4U recommended

Corequisite: (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1; (PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1) recommended, but may be required for further Chemistry courses

Exclusion: CHM135H1, CHM136H1, CHMA10H3, CHMA11H3, CHMB41H3, CHM110H5, CHM120H5

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM193H1 - Chemicals in the Environment: The Good, the Bad, and the Ugly

Previous Course Number: CHM211H1

Hours: 24S

The world is made up of chemicals: some are natural and some are invented and manufactured by humans. New chemicals are often intended to make our lives safer and easier (e.g., plastics, pesticides, personal care products) but may have unanticipated consequences once they are released into the world. In this seminar course, students will discover what properties of chemicals can lead to risks for the environment and for human health. Through discussion of how chemicals in the environment are understood by scientists, and described in popular media, students will develop improved scientific literacy to better evaluate risk in their own lives. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: CHM211H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM194H1 - Science and Human Values

Hours: 24S

There is a tension between creativity and the search for truth, which in science can be looking for patterns in nature. With examples drawn particularly from reports of scientific discoveries that have generated controversy, this seminar course will introduce the underlying principles and history of science, as well as how science and its boundaries are evolving, and how these influence human values. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: Minimum level of high school science and mathematics

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM196H1 - The Quantum World and Its Classical Limit

Hours: 24S

This course seeks to demystify quantum mechanics and equip students to critically analyze popular depictions of quantum phenomena. While quantum mechanics provides a reliable description of the behavior of atoms, molecules and photons, most people are uncomfortable with some of its predictions, such as "quantum entanglement" between distant particles. In this course we will delve into key

aspects of quantum mechanics and its more comfortable classical limit, focusing first on its manifestations in nature and then on fundamental issues such as uncertainty, interference, entanglement, and decoherence. This course will appeal to students with enthusiasm for physics. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: High school physics and mathematics

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM197H1 - Environmental Chemistry in a Sustainable World

Hours: 24S

Rapid and widespread industrialization is changing the chemical nature of the planet. In order to have a sustainable future, we need to manage chemicals released by humankind and understand their effects on the environment and on us. Each year, this seminar course designed for non-science students will address the fundamental science behind a specific topic in this field, such as the interactions of our energy choices and the environment, or changes in water and air quality. Emphasis is given to reading from both the popular media and scientific literature. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: Grade 12 chemistry

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM198H1 - Biosensor Technology and Applications for the Non-Scientist

Hours: 24S

This breadth course introduces uses of and key ideas behind biosensor technology. Sensors will be familiar to all, playing key roles in our everyday lives, for example in touch screens or in automotive technology. Biosensor devices are fabricated from an electrical transducer which is intimately connected to a biochemical probe such as an enzyme or antibody. The idea is that a detectable electrical signal can be obtained when a target molecule or ion binds to the probe. Such a device offers many applications. These range from the detection of biological markers in blood and serum to test for genetic and infectious disease, to the selective monitoring of biomolecules for public safety, or in biotechnology or other industrial processes. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: Reading of book chapter on biosensor technology

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM199H1 - The Context of Chemistry: Origins, Concepts, Tools, and Challenges

Hours: 24S

Chemistry is a practical as well as a conceptual science that serves as the basis for applications in many other fields. The ideas and methods have evolved from diverse inputs leading to widely accepted sets of standard of facts. This collective knowledge has led to progress in the quality and understanding of life at a molecular level. While the facts of chemistry are taught in established courses, the context of what we know, the limitations and challenges of what chemistry can do and how we got to this point will be the targets for discovery by students in this course. The course will operate in a seminar model, combining presentations, readings, reports and discussions of current and historical issues. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: Grade 12 level chemistry

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM209H1 - Science of the Modern Kitchen

Hours: 24L

The properties of different food types will be discussed, as well as how they can be manipulated in the kitchen to transform taste and texture. Concepts will be considered through the lens of the scientific method, and many of the ingredients and practices of modernist cuisine will be examined. This course is intended for students with no science background.

Exclusion: CHM135H1/ CHM136H1/ CHM138H1/ CHM139H1/ CHM151Y1

Recommended Preparation: SCH4U

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM210H1 - Chemistry of Environmental Change

Hours: 24L/12T

This course examines the fundamental chemical processes of the Earth's natural environment, and changes induced by human activity. Topics covered are related to the atmosphere and the hydrosphere: urban air pollution, stratospheric ozone depletion, acid rain, climate change, water resources and pollution, wastewater analysis, biogeochemistry, and inorganic metals in the environment. Skills in data analysis and visualization will be developed through an introduction to the R programming language and its use in several assignments.

Prerequisite: (CHM135H1/ CHM151Y1), (MAT135H1/ MAT137Y1/ MAT157Y1)

Exclusion: ENV235Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM217H1 - Introduction to Analytical Chemistry

Hours: 30L/6T/52P

Introduction to the science of chemical measurement, from sampling through analysis to the interpretation of results, including how water, food products, pharmaceuticals, and dietary supplements are analysed for content, quality, and potential contaminants. Also how to interpret experimental measurements, compare results and procedures, and calibrate analytical instrumentation. Through closely integrated classes, laboratories, and tutorials, this highly practical course introduces a variety of analytical techniques including volumetric methods, potentiometry, uv/visible and infrared spectrophotometry, flame atomic absorption spectrometry, and chromatography. Additional information can be found at <http://www.chem.utoronto.ca/coursenotes/CHM217/>. (Lab Materials Fee: \$39).

Prerequisite: (CHM135H1, CHM136H1)/ CHM151Y1 with a minimum grade of 63%, (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

Exclusion: CHM211H5, CHMB16H3

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM220H1 - Physical Chemistry for Life Sciences

Hours: 36L/12T

Introduction to thermodynamics; kinetics; phase equilibrium, properties of mixtures, chemical equilibrium, electrochemistry; introduction to quantum mechanics and spectroscopy. This course is recommended for students in life and health science programs that involve a small amount of chemistry.

Prerequisite: ([CHM135H1](#), [CHM136H1](#))/ [CHM151Y1](#); ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)/ [MAT157Y1](#)

Corequisite: Recommended co-requisite: [MAT235Y1](#)/ [MAT237Y1](#)

Exclusion: [CHM222H1](#), [CHMB20H3](#), [JCP221H5](#)/ [CHM221H5](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM222H1 - Introduction to Physical Chemistry

Hours: 24L/12T

Topics: introductory thermodynamics, first and second law and applications; chemical equilibrium. The course is intended for students who will be following the majority of chemistry specialist programs (Biological Chemistry specialist students are highly recommended to take [CHM220H1](#)).

Prerequisite: [([CHM135H1](#), [CHM136H1](#))/ [CHM151Y1](#) with a minimum grade of 63%], ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)/ [MAT157Y1](#), ([PHY131H1](#), [PHY132H1](#))/ ([PHY151H1](#), [PHY152H1](#))

Corequisite: [MAT235Y1](#)/ [MAT237Y1](#) recommended

Exclusion: [CHM220H1](#), [CHMB20H3](#), [CHM221H5](#), [JCP221H5](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM223H1 - Physical Chemistry: The Molecular Viewpoint

Previous Course Number: CHM221H1

Hours: 24L/12T

[CHM223H1](#) introduces key concepts and mathematical approaches that underly fundamental quantum mechanical models of atoms and molecules. Connections are drawn between these microscopic models and macroscopic properties of systems in physical chemistry—both how experimental observations shape the chosen structure of the models, and how these models can now successfully predict and interpret the results of experiments.

Prerequisite: [CHM220H1](#) with a minimum grade of 63%/ [CHM222H1](#)/ [MSE202H1](#)

Corequisite: [MAT235Y1](#)/ [MAT237Y1](#) recommended

Exclusion: [CHMB21H3](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM228H1 - Mathematical Methods for Chemical Sciences

Hours: 36L/12T

The use of mathematics as a language to describe chemical systems is prevalent across all fields of chemistry, such as in expressing reaction yields, assessing molecular symmetry, predicting and validating reaction mechanisms, and modeling molecular properties. This course is designed to equip Chemistry program students with the mathematical foundations needed in upper-year chemistry courses, with a particular focus on physical chemistry principles. Topics will include a brief review of common functions and coordinate systems, and will cover selected topics in complex numbers, multivariable calculus, scalar and vector algebra, matrix algebra, operators, eigenvectors and eigenvalues, differential equations, and special interest topics as time permits. The course material will be delivered within the context of chemistry concepts such as ideal gases, reaction rates, thermodynamic functions, and quantum mechanical systems. Emphasis will be placed on mastering foundational concepts and developing problem-solving strategies tailored to chemical applications.

Prerequisite: ([CHM135H1](#), [CHM136H1](#))/ [CHM151Y1](#); ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)/ [MAT157Y1](#)

Corequisite: [CHM220H1](#)/ [CHM222H1](#) ([CHM222H1](#) recommended)

Recommended Preparation: ([PHY131H1](#), [PHY132H1](#))/ ([PHY151H1](#), [PHY152H1](#))

Breadth Requirements: The Physical and Mathematical Universes (5)

PHC230H1 - Pharmaceuticals 1

Hours: 36L/12T

This course introduces the key concepts in the design, manufacture, and use of efficacious dosage forms. The characteristics of different delivery routes are discussed. The course focuses on the role of pharmaceuticals in drug development, and the role of anatomy and physiology in the conception and design of effective dosage forms. Topics covered include biopharmaceutical considerations, pharmaceutical solutions, sterilization theories and techniques, complexation and solubility enhancement, pre-formulation, colloids and dispersions, powders and micromeritics, and solid-state properties. Students will gain an appreciation of how the properties of drug components (such as pH, salt concentration, co-solvents, sterility, colloids, dispersions, powders, and solids) determine the stability, solubility, and efficacy of drug products.

Prerequisite: ([CHM135H1](#) and [CHM136H1](#))/ [CHM151Y1](#); [CHM220H1](#)/ [CHM222H1](#)

Exclusion: [PHM141H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CHM236H1 - Introductory Inorganic Chemistry I

Hours: 24L/12T

Inorganic chemistry is the chemistry of all the periodic table elements and includes the synthesis of the largest volume chemicals on Earth, the key energy-generating reactions and catalysts needed for a green planet, and compounds exploited in modern electronic and photonic devices. This is the first part (followed by [CHM237H1](#) and then [CHM338H1](#)) of a two-year sequence illustrating the rich variety of structures, physical properties, and reactions of compounds of the elements across and down the periodic table. It includes fundamentals of bonding, symmetry, and acid-base/ redox reactions of molecular compounds and transition metal complexes and applications of this chemistry in the world. [CHM236H1](#) is recommended for students interested in broadly learning about chemistry across the periodic table.

Prerequisite: [CHM151Y1](#)/([CHM135H1](#), [CHM136H1](#)) with a minimum grade of 63%

Exclusion: [CHM231H5](#), [CHM238Y1](#), [CHMB31H3](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM237H1 - Introductory Inorganic Chemistry II

Hours: 24L/6T/48P

This course is a continuation from [CHM236H1](#) which further studies the chemistry of the elements across the periodic table. It will cover topics that include the periodic properties of the elements, the structures, bonding and properties of main group compounds and transition metal complexes, inorganic solid-state materials, and solid-state chemistry with applications in advanced technologies. A strong emphasis on developing laboratory techniques and communication skills is made through the practical component of the course. [CHM236H1](#) is strongly recommended for students exploring experimental synthetic chemistry as part of their degree program. (Lab Materials Fee: \$39)

Prerequisite: [CHM236H1](#) with a minimum grade of 63%

Exclusion: [CHM231H5](#), [CHM238Y1](#), [CHMB31H3](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM247H1 - Introductory Organic Chemistry II

Hours: 36L/12T/22P

Reactions of organic compounds. Principles of mechanism, synthesis, and spectroscopy, continuing from [CHM136H1](#). This course is recommended for students in life and health science programs that involve a small amount of chemistry. Students who will be including a substantial amount of chemistry in their degree (including those following a chemistry major program) are strongly encouraged to take [CHM249H1](#). (Lab Materials Fee: \$26).

Prerequisite: ([CHM135H1](#), [CHM136H1](#))/ [CHM151Y1](#)

Exclusion: [CHM249H1](#), [CHM243H5](#), [CHMB42H3](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM249H1 - Organic Chemistry

Hours: 36L/52P

An introductory course in organic chemistry, based around the themes of structure, bonding, reaction mechanism, and synthesis. Reactions are discussed with a view to understanding mechanisms and how they are useful in the multi-step synthesis of medicinally and industrially important compounds. An introduction to the spectroscopy of organic molecules is also given, as well as a discussion of topics relating to the biological behaviour of organic molecules and medicinal chemistry. Students are also introduced to green chemistry approaches from an experimental perspective. This course continues from [CHM151Y1](#) or [CHM136H1](#) and is designed for students enrolled in any chemistry specialist or major program. (Lab Materials Fee: \$39).

Prerequisite: [CHM151Y1](#)/ ([CHM135H1](#), [CHM136H1](#)) with a minimum grade of 63%

Exclusion: [CHM247H1](#), [CHM243H5](#), [CHMB42H3](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

JCC250H1 - Computing for Science

Previous Course Number: CSC198H1

Hours: 24L/24T

Computational skills for the modern practice of basic and applied science. Applied computer programming with an emphasis on practical examples related to the simulation of matter, drawing from scientific disciplines including chemistry, biology, materials science, and physics. Studio format with a mixture of lecture, guided programming, and open scientific problem solving. Students will be exposed

to Python numerical and data analysis libraries. No prior programming experience is required.

Prerequisite: CHM135H1/ CHM136H1/ CHM151Y1, 0.5 credit in MAT (excluding FYF courses)

Exclusion: Any CSC course except CSC104H1, CSC196H1, CSC197H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM295H1 - Research Experience in Chemistry

Hours: 12L/48P

A course-based undergraduate research experience (CURE) that will introduce students to experimental research in chemistry from a physical science perspective, involving measurement, use of scientific instruments, and data analysis. Students will collaborate in teams to acquire research skills by carrying out laboratory work on a specific project that is defined by various chemistry departmental research groups. The topics will cover a range of research areas; however the approach will include aspects of physical chemistry such as spectroscopy, thermodynamics, nanotechnology, properties of materials, and reaction kinetics. Training in the use of instruments and data acquisition and analysis will be provided. (Lab Materials Fee: \$39).

Prerequisite: (CHM135H1, CHM136H1)/ CHM151Y1, (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1), (PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1)

Corequisite: CHM220H1/ CHM222H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

CHM299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

PHC300H1 - Molecular Pharmacology 1

Hours: 24L/12T

Structural and mechanistic determinants of drug action at the molecular level. Topics include the physical-chemical properties of drugs per se as they relate to therapeutic intervention and the biophysical and biochemical properties of enzymes and nucleic acids that underlie and are affected by their interactions with drugs.

Prerequisite: (CHM135H1, CHM136H1)/ CHM151Y1; CHM220H1/ CHM222H1

Exclusion: PCL302H1

Breadth Requirements: Living Things and Their Environment (4)

JSC301H1 - Principles and Practices in Science Education

Hours: 24L

Fundamental principles and practices in education and public outreach in the sciences, mathematics, and engineering, including education research, curriculum, teaching, and assessment. Students will learn and apply effective strategies which engage and educate learners at the K-16 and public level. The course assignments include a project and/or placement experience.

Prerequisite: At least 8.0 credits, and enrolment in a science, mathematics, or engineering program

Breadth Requirements: Society and its Institutions (3)

PHC301H1 - Molecular Pharmacology 2

Hours: 36L/12T

Structural and mechanistic determinants of drug action via macromolecules that effect cellular signalling. Neurohumoral receptors and other signalling proteins are grouped according to their structure and mechanism of action. Native properties and their modulation by drugs are discussed in the context of basic principles of molecular pharmacology.

Prerequisite: (CHM135H1, CHM136H1)/ CHM151Y1; CHM220H1/ CHM222H1; BCH210H1

Exclusion: PCL302H1, PHM140H1

Breadth Requirements: Living Things and Their Environment (4)

CHM310H1 - Environmental Fate and Toxicity of Organic Contaminants

Hours: 24L/12T

Organic chemical contaminants surround us in our everyday lives (e.g. in medications, personal care products, flame retardants, refrigerants) and because of this, they are present in the environment and in ourselves. In this course we will explore the fate of chemicals in the environment as a whole, as well as in the body, to understand how chemicals can be designed to mitigate the risks associated with their use and unintended release. Specific topics will include environmental partitioning; environmentally-relevant transformation processes; the chemistry and effects of redox-active species; and the toxicity/detoxification of electrophilic species in the body. Skills in big data analysis and environmental modeling will be developed through an introduction to the R programming language at the beginner level.

Prerequisite: ([CHM135H1](#), [CHM136H1](#))/ [CHM151Y1](#), ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)/ [MAT157Y1](#)

Recommended Preparation: [CHM247H1](#)/ [CHM249H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM317H1 - Introduction to Instrumental Methods of Analysis

Hours: 24L/52P

Scope of instrumental analytical chemistry; Fourier transform IR absorption spectroscopy; molecular luminescence; emission spectroscopy; mass spectrometry; sensors; gas and high performance liquid chromatography; instrument design principles and applications in industry and the environment. (Lab Materials Fee: \$39).

Prerequisite: [CHM217H1](#) with a minimum grade of 63%; ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)/ [MAT157Y1](#)

Exclusion: [CHM391H5](#), [CHMC11H3](#), [CHMC16H3](#)

Recommended Preparation: [CHM220H1](#)/ [CHM222H1](#), [CHM223H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

PHC320H1 - Chemistry and Technologies in Drug Discovery

Hours: 36L

This course provides interdisciplinary learning related to the chemistry of drugs and technologies of drug discovery

as they are related to small molecules and biologics, their mechanisms of action, and the latest trends in the field of pharmaceuticals. Various important concepts such as structure-activity relationships, drug-like properties, computer modelling, combinatorial chemistry, small molecule drugs, biologics and related aspects in relation to new drugs will be covered. Novel concepts such as artificial intelligence in drug discovery will be introduced. After completing this course, students may practice entry-level medicinal chemistry with sound synthetic chemistry acquired from other chemistry courses, or take advanced courses in medicinal chemistry, drug discovery, and specialized courses in drug development. Students will also have a deeper understanding of drug discovery and development.

Prerequisite: [BCH210H1](#), [CHM247H1](#)/ [CHM249H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CHM326H1 - Introductory Quantum Mechanics and Spectroscopy

Hours: 24L/12T

This course introduces the postulates of quantum mechanics to develop the fundamental framework of quantum theory. A number of exactly soluble problems are treated in detail as examples. Perturbation theory is introduced in the context of understanding many body problems. Various applications to chemical bonding and molecular spectroscopy are covered in detail.

Prerequisite: ([CHM220H1](#)/ [CHM222H1](#), [CHM223H1](#)), [MAT235Y1](#)/ [MAT237Y1](#)

Exclusion: [JCP321H5](#), [PHY356H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM327H1 - Experimental Physical Chemistry

Hours: 12L/52P

Students are introduced to physical chemistry laboratory work in a project-based approach in which they develop, design, and implement projects that address fundamental and applied questions in physical chemistry. The course also involves class material related to working as an experimental physical chemist. (Lab materials fee: \$39).

Prerequisite: ([CHM220H1](#)/ [CHM222H1](#)/ [MSE202H1](#), [CHM223H1](#)) with a minimum grade of 63% in each

Corequisite: Recommended: [CHM326H1](#) or [CHM328H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM328H1 - Modern Physical Chemistry

Hours: 24L/12T

This course explores the microscopic description of macroscopic phenomena in chemistry. Statistical mechanics is introduced as the bridge between the microscopic and macroscopic views, and applied to a variety of chemical problems including reaction dynamics. More advanced topics in thermodynamics are introduced and discussed as required.

Prerequisite: (CHM220H1/ CHM222H1, CHM223H1), MAT235Y1/ MAT237Y1

Exclusion: JCP322H5, CHMC20H3

Breadth Requirements: The Physical and Mathematical Universes (5)

PHC330H1 - Pharmaceutics 2

Hours: 36L/12T

This course provides an understanding of advanced topics in pharmaceutics. It involves a detailed examination of the material properties of pharmaceuticals and the role of cellular processes in the delivery of a drug to its site of action. Selected topics include thermodynamic characterization of drug solubility, diffusion measurement and its use in pharmaceutics, liposomal drug delivery, excipient consideration and selection for liquid dosage forms, polymeric materials in pharmaceutical applications, rheology and its applicability to liquid drug vehicles, bioequivalence determination of dermatological dosage forms, and an introduction on the impact of physiochemical properties on dermatological dosage forms.

Prerequisite: (CHM135H1, CHM136H1)/ CHM151Y1; CHM220H1/ CHM222H1

Breadth Requirements: Living Things and Their Environment (4)

PHC331H1 - Establishing the Bioequivalence of Pharmaceutical Products

Hours: 48L

This course will introduce the practical and regulatory design elements and consideration of human clinical trials for the purposes of demonstrating bioequivalence between drug products. The principles discussed are currently used by generic and innovator drug companies in many countries. Students will learn about the regulations, methods, techniques, pharmacokinetics, and

biostatistics involved in creating bioequivalence studies. The course has a heavy mathematical emphasis, with a large component dedicated to mathematical modeling (non-compartmental and compartmental pharmacokinetic modeling, and biostatistics). Also discussed are clinical trial sample size determination, bioequivalence study design elements, clinical study protocol and final report writing, disaster recovery and outlier analysis, and design of steady-state studies. A module is also included on developing and improving interview skills. After taking this course, students will understand the steps required to set up single-dose and steady-state pilot and pivotal bioequivalence trials using parallel, crossover, and semi-replicate designs, and be well-poised for entry-level scientific positions in industry.

Prerequisite: BCH210H1, CHM247H1/ CHM249H1, (MAT135H1, MAT136H1)/ MAT137Y1, PHC230H1, PHC330H1

Breadth Requirements: Living Things and Their Environment (4)

CHM338H1 - Intermediate Inorganic Chemistry

Hours: 24L/52P

Further study of the structures, physical properties, and reactions of transition metals. Introductions to spectroscopy, structural analysis, reaction mechanisms, d-block organometallic compounds, applications of metal, and main group compounds in catalysis. The weekly laboratory explores advanced synthetic and spectroscopic techniques including air- and moisture-sensitive chemistry and multinuclear NMR spectroscopy, with a strong emphasis on developing scientific communication skills. (Lab Materials Fee: \$39).

Prerequisite: CHM236H1 + CHM237H1 with a minimum grade of 63% in each course.

Exclusion: CHM331H5

Recommended Preparation: CHM217H1, CHM247H1/ CHM249H1

Breadth Requirements: The Physical and Mathematical Universes (5)

PHC340Y1 - Pharmaceutical Chemistry Laboratory

Hours: 24L/96P

This course will introduce students to theoretical and applied concepts in pharmaceutical chemistry, in research, development, and manufacturing contexts. The course is designed with lectures and laboratories covering major areas in pharmaceutical chemistry, which have been carefully scheduled together to link concepts

discussed during lectures to practical hands-on activities. The course covers selected topics pertinent to drug development such as acid/base equilibria, buffer preparation, drug solubility, drug polymorphs and salt selection, pKa, and co-solvency. The course also examines characterizing properties of common liquid, semi-solid and solid drug vehicles, such as viscosity, degradation kinetics/stability, diffusivity, tonicity, particle size distribution, and powder flowability. Emphasis is placed on the process of drug manufacture. Laboratory equipment used is commonly found in formulation labs, pharmacies, pharmaceutical research laboratories, and pharmaceutical manufacturing facilities. A lecture module on ethics and academic integrity will discuss cutting-edge applications of ethics in research, and issues arising when complex scientific solutions are proposed to regulatory bodies and to the public eye.

Prerequisite: [CHM247H1](#)/ [CHM249H1](#); ([CHM220H1](#)/ [CHM222H1](#)), [CHM223H1](#); [BCH210H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CHM342H1 - Modern Organic Synthesis

Hours: 24L/12T

An overview of the preparation of various classes of organic compounds. Strategies and tactics of synthetic organic chemistry using examples from natural products and pharmaceuticals. C-C bond formation, functional group reactivity, structure, stereochemistry and selectivity.

Prerequisite: [CHM247H1](#)/ [CHM249H1](#)

Exclusion: [CHM345H5](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM343H1 - Organic Synthesis Techniques

Hours: 24L/52P

This laboratory course showcases modern organic synthesis techniques and introduces chemical research principles. It provides excellent preparation for a [CHM499Y1](#) project in organic chemistry. Associated classes teach theory and problem-solving approaches from a practical perspective and through industrial case studies. Green chemistry decision-making is a central theme of both the class and laboratory components. (Lab Materials Fee: \$39).

Prerequisite: [CHM247H1](#)/ [CHM249H1](#) with a minimum grade of 63%

Exclusion: [CHM393H5](#)

Recommended Preparation: [CHM342H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM347H1 - Organic Chemistry of Biological Compounds

Hours: 24L/12T

An organic chemical approach to the structure and reactions of major classes of biological molecules: carbohydrates, amino acids, peptides and proteins, phosphates, lipids, heterocycles, vitamins, nucleotides, and polynucleotides. This is achieved through studies of advanced stereochemistry, chemical modification, reactions, and synthesis. In addition to classes and reading from texts, there will be opportunities for independent written assignments on several of the topics.

Prerequisite: [CHM247H1](#)/ [CHM249H1](#)

Exclusion: [CHM347H5](#), [CHMC47H3](#)

Recommended Preparation: [CHM217H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM348H1 - Organic Reaction Mechanisms

Hours: 24L/26P

Principles and methods of analyzing and predicting organic chemical reactivity: advanced stereochemistry, conformational analysis, molecular orbitals, reaction kinetics, isotope effects, linear free energy relationships, orbital transformations, systematization of mechanisms. The laboratory section is used to illustrate the operation of the principles, including examples of data acquisition for mechanistic analysis and theoretical computations. Regular original reports on methods and outcomes are an important part of the laboratory. (Lab Materials Fee: \$26).

Prerequisite: [CHM247H1](#)/ [CHM249H1](#) with a minimum grade of 63%

Exclusion: [CHM341H5](#), [CHMC41H3](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM355H1 - Introduction to Inorganic and Polymer Materials Chemistry

Previous Course Number: CHM325H1

Hours: 24L

Fashioned to illustrate how inorganic and polymer materials chemistry can be rationally used to synthesize superconductors, metals, semiconductors, ceramics,

elastomers, thermoplastics, thermosets and polymer liquid crystals, with properties that can be tailored for applications in a range of advanced technologies. Coverage is fairly broad and is organized to crosscut many aspects of the field.

Prerequisite: CHM220H1/ CHM222H1, (CHM236H1, CHM237H1), CHM247H1/ CHM249H1

Exclusion: CHM325H1, CHM426H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM379H1 - Biomolecular Chemistry

Hours: 24L/52P

This course provides an opportunity to learn core techniques in biological chemistry in a small group laboratory setting. It provides excellent preparation for a CHM499Y1 project in biological chemistry or related areas. Classes will discuss the theory behind the techniques and highlight how they are used in modern biological chemistry research and practice. Note: CHM379H1 can be used as the biochemistry lab requirement for students completing double majors in chemistry and biochemistry. (Lab Materials Fee: \$39).

Prerequisite: (CHM247H1/ CHM249H1 with a minimum grade of 63%), CHM347H1, BCH210H1

Exclusion: BCH370H1, CHM371H5

Recommended Preparation: CHM217H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM395Y1 - Research Project in Chemistry

Hours: 180P

An independent research project conducted under the direction of a tenure stream or teaching stream faculty member in the Department of Chemistry or a closely-affiliated department. Applications are due to the Associate Chair Undergraduate during March (for Summer Session projects) and during July (for Fall/Winter Session projects); the application form is available at the Department of Chemistry website. Not eligible for CR/NCR option.

Prerequisite: Completion of at least 2.0 CHM credits with a minimum cGPA of 3.0 in all CHM credits. Students are required to identify a potential faculty supervisor before contacting the Associate Chair, Undergraduate Studies for enrolment permission. Written confirmation is needed from both the Associate Chair, Undergraduate Studies and the prospective supervisor. Attendance at a mandatory safety orientation training session held during

the first week of May (Summer Session projects) or September (Fall/Winter Session projects).

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM396Y0 - Research Topic Abroad

Course credit for research or field studies abroad under the supervision of a faculty member. Not eligible for CR/NCR option.

Prerequisite: At least 8.5 credits and no more than 14.0 credits, including at least 1.5 credits from 200-level Chemistry courses, or permission of the instructor.

Recommended Preparation: CHM299Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM397H0 - Research Abroad in Chemistry

Independent research project in Chemistry under the supervision by a faculty member in an approved partner institution. This unique opportunity to conduct a lab-based research project is open to students in any Chemistry programs. Not eligible for CR/NCR option.

Prerequisite: Any CHM 300-level courses with lab; permission of the Department

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

CHM398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

CHM399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

The development, design, and operation of biosensors and chemical sensors, including: biosensor technology, transducer theory and operation, device design and fabrication, surface modification and methods of surface analysis, flow injection analysis and chemometrics.

Prerequisite: [CHM217H1](#)/ [CHM220H1](#)/ [CHM222H1](#)

Recommended Preparation: [CHM317H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

PHC401H1 - Drug Transport across Biological Membranes

Hours: 24L

The goal of this course is to provide students with knowledge of the molecular processes involved in drug transport across biological cell membranes with emphasis on their physiological and clinical significance. This course is restricted to Pharmaceutical Chemistry Specialist program students.

Prerequisite: [PHC301H1](#), and enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

Corequisite: [PHC300H1](#)

Exclusion: JFK1122H

Breadth Requirements: Living Things and Their Environment (4)

CHM410H1 - Analytical Environmental Chemistry

Hours: 24L/44P

An analytical theory, instrumental, and methodology course focused on the measurement of pollutants in soil, water, air, and biological tissues and the determination of physical/chemical properties including vapour pressure, degradation rates, partitioning. Lab experiments involve application of theory. (Lab Materials Fee: \$39).

Prerequisite: [CHM217H1](#), [CHM210H1](#)/ [CHM310H1](#)

Recommended Preparation: [CHM317H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM414H1 - Biosensors and Chemical Sensors

Hours: 24L

CHM415H1 - Topics in Atmospheric Chemistry

Hours: 24L

Building upon the introductory understanding of atmospheric chemistry provided in [CHM210H1](#), this course develops a quantitative description of chemical processes in the atmosphere. Modern research topics in the field are discussed, such as aerosol chemistry and formation mechanisms, tropospheric organic chemistry, the chemistry of climate including cloud formation and geoengineering, biosphere-atmosphere interactions, and the chemistry of remote environments. Mathematical models of atmospheric chemistry are developed; reading is from the scientific literature; class discussion is emphasized.

Prerequisite: [CHM210H1](#)

Recommended Preparation: [CHM220H1](#)/ [CHM222H1](#), ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)/ [MAT157Y1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM416H1 - Separation Science

Hours: 24L

This course provides theoretical and practical background useful for engaging in cutting-edge chemical separations in chemistry, biology, medicine, engineering, research, and industry. The course covers general separations concepts and principles, with an emphasis on liquid chromatography and its various modes, including partition chromatography, ion chromatography, enantiomer chromatography, size exclusion chromatography, and affinity chromatography. Other topics include materials and instrumentation, gas chromatography, supercritical fluid chromatography, electrophoresis and related techniques, and a host of miscellaneous separation (e.g., TLC, FFF, CF) and extraction (e.g., LLE, SPE, SPME) modalities. Classes are supplemented with online/virtual laboratory exercises.

Prerequisite: CHM317H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM417H1 - Laboratory Instrumentation

Hours: 24L/12P

This course provides an introduction to building and using optics- and electronics-based instrumentation for laboratory research, as well as for implementing custom software control. Class topics include passive electronic components, diodes and transistors, operational amplifiers, analogue-to-digital conversion, light sources and detectors, reflectors, refractors, polarizers, diffractors, and many others. Classes are supplemented by laboratories in which students work in teams to build fluorescent detection systems for chromatography over the course of several weeks. (Lab Materials Fee: \$26).

Recommended Preparation: CHM317H1

Breadth Requirements: The Physical and Mathematical Universes (5)

PHC420H1 - Application of Medicinal Chemistry to Pharmacology

Hours: 24L

This online course will build upon basic pharmacology and medicinal chemistry to make links between the basic sciences and demonstrate how basic principles can be used to improve clinical therapy. It will also include a critical evaluation of evidence for specific mechanisms and therapies. Topics covered include the effect of metabolism on drug response and factors that influence drug metabolism and kinetics; interactions of drugs with receptors, genetic differences in response, and mechanisms of tolerance; antimicrobials and antineoplastics; autoids, antihistamines, vasopressin, anticoagulants, iron, estrogens, androgens, and the use of drugs in the perinatal period; antithyroid drugs, drugs to treat diabetes, and corticosteroids; eicosanoids, antihyperlipidemic drugs, and vitamins; drugs affecting bone metabolism, cholinergic agonists and antagonists; adrenoreceptor agonists and antagonists, agents affecting muscles and movement; opioids; CNS organization; anticonvulsants, anesthetics, and anxiolytics; antipsychotics, antidepressants, inotropic agents, antiarrhythmic drugs, diuretics; anti-inflammatory drugs, respiratory drugs, immune system organization; drugs to treat acid-peptic disorders, intestinal motility disorders, and inflammatory bowel disease; and adverse drug reactions and poisoning. An emphasis is placed on developing critical reasoning and evaluation skills to discern between standard of care and complementary therapies that have been developed in the past showing poor safety and/or efficacy, with poor regard to the

scientific process. This course is restricted to Pharmaceutical Chemistry specialist program students.

Prerequisite: PHC301H1, PHC320H1, and enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

Exclusion: PHM240H1

Breadth Requirements: Living Things and Their Environment (4)

PHC421H1 - Biomolecular Interactions and Thermodynamics I

Hours: 36L

This course will consider many of the topics presented in the first half in much greater detail including a rigorous examination of the interpretation of experimental data. This course is intended for students whose research or interest is in the thermodynamics of biological molecules. This course is restricted to Pharmaceutical Chemistry specialist program students.

Prerequisite: Enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

Exclusion: PHM1130H

Breadth Requirements: Living Things and Their Environment (4)

CHM423H1 - Applications of Quantum Mechanics

Hours: 24L

Applications of time independent and time dependent perturbation theory to atomic and molecular problems, selection of topics from WKB approximation and the classical limit; the interaction of light with matter; elementary atomic scattering theory; molecular bonding.

Prerequisite: CHM326H1

Recommended Preparation: MAT223H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM427H1 - Statistical Mechanics

Hours: 24L

Ensemble theory in statistical mechanics. Applications, including imperfect gases and liquid theories. Introduction to non-equilibrium problems.

Prerequisite: [CHM326H1](#), [CHM328H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

PHC430H1 - Recent Developments in Dosage Form Design

Hours: 24L

Introduction to controlled drug delivery: Mechanisms and kinetics of controlled drug release. Fundamental theories and mathematical tools for the design of modern dosage forms. Development and applications of controlled drug delivery dosage forms. This course is restricted to Pharmaceutical Chemistry specialist program students.

Prerequisite: Enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

Exclusion: [PHM324H1](#), [PHM1109H](#)

Recommended Preparation: [PHC230H1](#), [PHC330H1](#), [PHC340Y1](#)

Breadth Requirements: Living Things and Their Environment (4)

PHC431H1 - Latest Developments in Drug Discovery

Hours: 24L

In-depth discussion of implementation of pharmaceutical sciences in drug development strategies. Students will apply fundamental principles of pharmaceuticals and drug delivery to current problems in the pharmaceutical industry. This course is restricted to Pharmaceutical Chemistry specialist program students.

Prerequisite: Enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

Exclusion: [JFK1120H](#)

Recommended Preparation: [PHC230H1](#), [PHC330H1](#), [PHC340Y1](#)

Breadth Requirements: Living Things and Their Environment (4)

PHC432H1 - Nanomedicines in Oncology

Hours: 24L

This course covers a range of topics that pertain to the development and application of nanomedicines in oncology. Students will gain an understanding of the biological barriers to drug delivery in oncology as well as the tremendous heterogeneity in cancer and the challenge this presents for treatment. The concepts of passive and

active targeting of nanomedicines will be covered with critical assessment of the enhanced permeability and retention effect. A detailed overview of the most advanced nanotechnology-platforms for drug delivery (i.e., liposomes, block copolymer micelles and polymer-drug conjugates) will be provided with additional discussion of new emerging platforms. The integration of imaging in drug development and development of theranostics and therapeutic-diagnostic pairs will also be discussed. Special emphasis on critical evaluation of scientific literature and pre-clinical/clinical studies will be made throughout the course. *Note* This course is offered in alternating years.

Prerequisite: [PHC230H1](#), [PHC330H1](#) and enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

Breadth Requirements: Living Things and Their Environment (4)

CHM432H1 - Organometallic Chemistry and Catalysis

Hours: 24L

Structure, bonding, and reactions of organometallic compounds, with emphasis on basic mechanisms, and industrial processes. Addition, metalation, elimination, important catalytic cycles, electrophilic, and nucleophilic reactions are considered on a mechanistic basis. Topics on modern organometallic chemistry and catalysis are covered.

Prerequisite: [CHM338H1](#)

Recommended Preparation: [CHM348H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

PHC435H1 - Pharmaceutical Data Acquisition and Analysis

Hours: 22L/26P

This course introduces students to theoretical and applied concepts in designing and implementing electronic circuitry, for the purpose of collecting and analyzing experimental data in pharmaceuticals and other contexts. The course discusses introductory circuit design, with an emphasis on how common components work in scientific and pharmaceutical manufacturing instrumentation. Practical and mathematical aspects of circuit design are discussed (e.g., Ohm's Law, voltage dividers, analog vs. digital signals). There is a heavy emphasis on programming in C++ in the Arduino IDE which will complement learning activities. Specific topics include power calculations, logic gates, capacitance, microprocessor pin functionality, switching strategies for

higher powder devices (relays, transistors, MOSFETs), process control (on/off and PID controllers), and operational amplifiers. Data acquisition, smoothing, filtering, and logging strategies are also discussed. Each section has planned practical activities where circuits are built, programmed, and tested. After taking this course, students will be better equipped to build their own control circuits for undergraduate research projects and other applications.

Prerequisite: BCH210H1, CHM247H1/ CHM249H1, (MAT135H1, MAT136H1)/ MAT137Y1, PHC340Y1 and enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM437H1 - Bioinorganic Chemistry

Hours: 24L

This course examines the use of metals in biology. Topics include naturally occurring and medicinal ligands; transport, uptake and control of concentration of metal ions; and physical methods of characterization of metal binding sites. The roles of metal ions in nature are discussed, including as structural and signaling elements in proteins, nucleic acids and DNA-binding complexes and proteins; as Lewis-acid centres in enzymes; as carriers of electrons, atoms and groups in redox proteins and enzymes; and as sources of biominerals; as radiopharmaceuticals.

Prerequisite: CHM236H1 + CHM237H1

Exclusion: CHM333H5, CHMD69H3

Recommended Preparation: CHM338H1 (strongly recommended), CHM347H1/ CHM379H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM440H1 - The Synthesis of Modern Pharmaceutical Agents

Hours: 24L

This course provides an overview of reactions and synthetic strategies that are being used at different stages of the drug development process. Using representative examples from the literature, we will concentrate on synthesis of complex heterocyclic compounds.

Prerequisite: CHM342H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM441H1 - Spectroscopic Analysis in Organic Chemistry

Hours: 24L/20P

Structure and stereochemistry determination using modern spectroscopic techniques. Several techniques are discussed but particular emphasis is given to NMR (^1H and ^{13}C NMR) and mass spectrometry. The approach taken emphasizes applications of these spectroscopic methods to organic problems. Students are trained to run their own spectra (IR, UV, NMR, GC-MS). (Lab Materials Fee: \$26).

Prerequisite: CHM249H1, CHM343H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM443H1 - Physical Organic Chemistry

Hours: 24L

Noncovalent binding forces, solutions, and molecular recognition. Electronic structure theory and computational techniques. Reaction mechanisms: experimental probes and reactive intermediates, including carbenes and radicals. Photophysics and photochemistry of organic compounds.

Prerequisite: CHM220H1/ CHM222H1, CHM348H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM447H1 - Bio-organic Chemistry

Hours: 24L

Mechanisms in biochemical systems: Examples of biological catalysis are considered in terms of chemical mechanisms and their extensions, overcoming barriers catalytic groups in active sites, stereochemical applications, energy transfer, kinetic patterns, inhibitors, drug design, cofactors, ribozymes, and proteosomes. Related current issues are noted and discussed. The format includes class material integrated with student discussions.

Prerequisite: CHM347H1, CHM348H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM455H1 - Advanced Materials Chemistry

Previous Course Number: CHM434H1

Hours: 24L

A comprehensive investigation of synthetic methods for preparing diverse classes of inorganic materials with properties intentionally tailored for a particular use. Begins with a primer on solid-state materials and electronic band description of solids followed by a survey of archetypical solids that have had a dramatic influence on the materials world, some new developments in materials chemistry and a look at perceived future developments in materials research and technology. Strategies for synthesizing many different classes of materials with intentionally designed structures and compositions, textures and morphologies are then explored in detail emphasizing how to control the relations between structure and property of materials and ultimately function and utility. A number of contemporary issues in materials research are critically evaluated to appreciate recent highlights in the field of materials chemistry - an emerging sub-discipline of chemistry.

Prerequisite: CHM325H1/ CHM355H1, CHM338H1

Exclusion: CHM434H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM456H1 - Organic Materials Chemistry

Previous Course Number: CHM446H1

Hours: 24L

This course covers design, synthesis, characterization and application of organic materials. Emphasis is placed on classic examples of organic materials including semiconducting polymers, molecular devices, self-assembled systems, and bioconjugates, as well as recent advances from the literature.

Prerequisite: CHM220H1/ CHM222H1, CHM247H1/ CHM249H1

Exclusion: CHM446H1

Recommended Preparation: CHM355H1, CHM342H1/ CHM343H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM457H1 - Polymer Chemistry

Previous Course Number: CHM426H1

Hours: 24L/12T

Scope of polymer chemistry. Classification of polymers. Synthesis and characterization. Polymers in solution. Thermodynamics of polymer solutions and blends, Flory-Huggins theory. Polymers in the solid state. Crystalline and amorphous polymers. Glass transition and melting temperature. Mechanical properties. Polymers as advanced materials.

Prerequisite: CHM220H1/ CHM222H1, CHM247H1/ CHM249H1

Exclusion: CHM426H1

Recommended Preparation: CHM355H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CHM458H1 - Soft Materials for Life, Energy, and the Environment

Hours: 24L

In the framework of a dry lab, students will analyze and interpret characterization data, extending their existing knowledge of chemical fundamentals and experimental techniques to polymeric systems. Through a combination of classes, dynamic group collaborations, and self-paced assignments, students will actively engage with peers to understand course materials (including published literature), explore how polymer innovations are commercialized, and develop a toolkit for leveraging instrumentation to investigate hypotheses in research.

Prerequisite: CHM247H1/ CHM249H1/ MSE245H1, CHM220H1/ CHM222H1/ CHM223H1/ APS110H1

Recommended Preparation: CHM355H1, CHM342H1/ CHM343H1, CHM426H1/ CHM457H1

Breadth Requirements: The Physical and Mathematical Universes (5)

PHC460H1 - Fundamentals of Drug Discovery

Hours: 24L

Lectures by scientists from academia and industry, and student seminars based on journal articles dealing with strategies for discovering new drugs for therapy and diagnosis. This course is restricted to Pharmaceutical Chemistry specialist program students.

Prerequisite: BIO120H1, BIO130H1, PHC301H1 and enrolled as a Year 4 student in the Pharmaceutical Chemistry program.

Breadth Requirements: Living Things and Their Environment (4)

PHC462H1 - Clinical Drug Development

Hours: 24L

This course is designed to broaden student's understanding of the development and licensing of new drugs and how scientific principles, ethics, governmental regulations and commercial considerations are coordinated for designing clinical trials. The format involves lectures, group discussion and student presentations. This course is restricted to Pharmaceutical Chemistry specialist program students.

Prerequisite: PHC230H1, PHC301H1, PHC340Y1 and enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

Exclusion: JFK1120H

Breadth Requirements: Society and its Institutions (3)

PHC470H1 - Global Pharmaceutical Policy

Hours: 24L/2T

This course is designed for students who are interested in the critical analysis of global health policy and the interrelationship between global and domestic policy issues. The course will introduce students generally to the basic concepts and issues in global health with a particular focus on pharmaceutical policy. We will address key issues in health and discuss core institutional and transnational actors, how governments in different jurisdictions manage public health responsibilities, the tension between economic imperatives and health objectives, global obligations, and pressure from special interest groups. More narrowly, we will analyze a breadth of complex policies questions. Examples include: the research and development global divide, political issues influences on pharmaceutical policy, how global commitments, such as membership in the World Trade Organization, conflict with or correspond to domestic policy directions and national sovereignty. Guest speakers will lead some sessions. This course will consist of lectures, guest discussions, case studies and student-led presentations. This is restricted to students in the Pharmaceutical Chemistry specialist program.

Prerequisite: Enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

Exclusion: PHM320H1, PHM1124H

Breadth Requirements: Society and its Institutions (3)

CHM479H1 - Biological Chemistry

Hours: 24L

An in depth examination of biological systems at the molecular level. Several complex, multi-component molecular machines with a central role in life will be examined. For each system studied, the focus will be on understanding the chemical mechanisms that underlie the biological activities, and how these processes fit into a cellular context.

Prerequisite: BCH210H1/ BCH242Y1, CHM347H1

Breadth Requirements: The Physical and Mathematical Universes (5)

PHC489Y1 - Pharmaceutical Chemistry Research

Hours: 165P

This course will provide research experience under the supervision of a Departmental staff member. The goal is to deepen the student's understanding of the scientific basis and practical techniques relevant to modern pharmaceutical development. This course is restricted to Pharmaceutical Chemistry specialist program students. Not eligible for CR/NCR option.

Prerequisite: Permission from the Course Coordinator and enrolled as a Year 4 student in the Pharmaceutical Chemistry specialist program.

Breadth Requirements: Living Things and Their Environment (4)

CHM499Y1 - Introduction to Chemistry Research

Hours: 240P/16S

An experimental or theoretical research problem under the supervision of a tenure-stream or teaching stream faculty member in the Department of Chemistry or a closely-affiliated department. Five mandatory 90-minute professional development workshops cover aspects of academic writing, poster presentations, reading chemical literature, job applications/interviews, and science communication. Applications for enrolment should be made to the Departmental Undergraduate Office in the preceding Winter Session: the application form is available at the Department of Chemistry website. Only admitted students must contact faculty to discuss available research projects. Projects are typically offered in the areas of environmental, analytical, physical/theoretical, inorganic, materials/polymers, organic and biological chemistry. Not eligible for CR/NCR option.

Prerequisite: Permission of the department. Minimum cGPA of 3.0 in CHM program courses. Research positions are limited. Students with strong background on courses

in the sub-discipline of research interest will be given preference. Attendance at a mandatory safety orientation training session held during the first week of September.

Exclusion: CHM489Y5, CHMD90Y3, MSE498Y1, PHC489Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

C. Columpar, PhD
S.C. Richmond, PhD
A. Zambenedetti, PhD

Associate Professor, Teaching Stream

K. Banning, MA

Assistant Professors

N. Chan, PhD
L.M. Cramer, PhD
æ. j. hollis o'neil, PhD
B. Story, PhD

Introduction

At the turn of the twentieth century cinema emerged as a new mass entertainment, an art form, a source of information, and a product of economic and social power. Cinema adapted to and absorbed novel technologies, such as sound, color, 3-D, and, later, digital techniques at a rapid pace. As shifting political and economic forces came into play, cinema continued to assume a key role in moving-image culture. During its history, cinema has absorbed seismic shocks in ideas and ideologies, and responded to the shifting politics of race, gender, class, and sexuality that have defined modern society. Now, in the twenty-first century, an evolving mediascape driven by digital technologies offers exciting opportunities to assess the ever-changing role of cinema across global cultures.

Because of its status as a major art form and a vital social practice, cinema has assumed a crucial place within the university. The Cinema Studies Institute, which celebrates its 50th anniversary in 2025, has developed into a major area of academic research, study, and teaching at the University of Toronto and has contributed in pivotal ways

to the development of the discipline both in Canada and internationally.

Cinema Studies offers courses that reflect the diversity of cinematic experience: film analysis, history, social practice, and theory are at the core of the program. Other topics also receive emphasis, including distinct types of film (such as documentary, animation, and the avant-garde), film genres, media cultures, and new media forms. Our courses explore the global dimension of cinema, investigating national and transnational cinema. They raise issues of how race, class, and gender operate in moving image culture. Cinema Studies offers a range of research methods, scholarly frameworks, and learning opportunities; all are designed to develop students' abilities to understand cinema within a wide range of contexts - critical, economic, cultural, technological, and aesthetic. Graduates of the Cinema Studies Institute achieve learning outcomes that include a strong historical and theoretical foundation coupled with advanced analytical and critical skills. Our graduates are well-equipped to apply their knowledge to a variety of media-related careers and avocations. They have become arts and entertainment journalists, film programmers, and image archivists, and have found a diversity of positions within the film, television, and new media sectors.

Since its inception, Cinema Studies has had its administration, teaching, and research home at Innis College, which also houses its faculty. Innis offers specially equipped facilities, and a cordial and intimate setting for cinema students. For more information about Innis College, go to innis.utoronto.ca.

Enquiries: Denise Ing, Undergraduate Program Assistant, Room 232AE, Innis College (416-978-8571), cinema.studies@utoronto.ca, or the Cinema Studies website, cinema.utoronto.ca.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Cinema Studies programs impacted by this policy: [ASSPE0797](#), [ASMAJ0797](#), and [ASMIN0797](#)

Cinema Studies Institute Programs

Cinema Studies Specialist (Arts Program) - ASSPE0797

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- [CIN105Y1](#) or [CIN201Y1](#)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 70% will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Completion Requirements:

(10.0 credits)

First Year:
[CIN105Y1](#)

Second Year:
[CIN201Y1](#)

Third Year:
[CIN301Y1](#)

Fourth Year:
1.0 credit from the following: [CIN410H1](#), [CIN411H1](#), [CIN412H1](#), [CIN420H1](#), [CIN430H1](#), [CIN431H1](#), [CIN432H1](#), [CIN440H1](#), [CIN450H1](#), [CIN451H1](#), [CIN452H1](#), [CIN460H1](#), [CIN461H1](#), [CIN470H1](#), [CIN471H1](#), [CIN472H1](#), [CIN480H1](#)

Second, Third and Fourth Year:
In addition, [CIN230H1](#) or a 0.5 credit from Breadth Category 5; and at least 5.5 credits from Groups B through G, of which 3.0 credits must be at the 300/400-level, and a maximum of 2.0 credits can be from Group G: Cross-Listed

Students must complete [CIN105Y1](#) and [CIN201Y1](#) before taking any fourth-year courses.

Group A: Foundations
[CIN105Y1](#), [CIN201Y1](#), [CIN301Y1](#)

Group B: Genre and Modes
[CIN210H1](#), [CIN211H1](#), [CIN212H1](#), [CIN213H1](#), [CIN214H1](#), [CIN215H1](#), [CIN216H1](#), [CIN310Y1](#), [CIN312Y1](#), [CIN314Y1](#), [CIN320H1](#), [CIN321H1](#), [CIN322H1](#), [CIN410H1](#), [CIN411H1](#), [CIN412H1](#), [CIN420H1](#)

Group C: Social and Cultural Practices
[CIN230H1](#), [CIN240H1](#), [CIN330Y1](#), [CIN332Y1](#), [CIN334H1](#), [CIN335H1](#), [CIN336H1](#), [CIN337H1](#), [CIN338H1](#), [CIN340H1](#), [CIN341H1](#), [CIN349H1](#), [CIN430H1](#), [CIN431H1](#), [CIN432H1](#), [CIN440H1](#)

Group D: Theory and Criticism
[CIN250Y1](#), [CIN260H1](#), [CIN352H1](#), [CIN353H1](#), [CIN360H1](#), [CIN361H1](#), [CIN362H1](#), [CIN363H1](#), [CIN364H1](#), [CIN365H1](#), [CIN366H1](#), [CIN369H1](#), [CIN450H1](#), [CIN451H1](#), [CIN452H1](#), [CIN460H1](#), [CIN461H1](#)

Group E: History and Nation
[CIN270Y1](#), [CIN370H1](#), [CIN371H1](#), [CIN372Y1](#), [CIN374Y1](#), [CIN376Y1](#), [CIN376Y0](#), [CIN378H1](#), [CIN378Y0](#), [CIN379H1](#), [CIN380H1](#), [CIN381H1](#), [CIN470H1](#), [CIN471H1](#), [CIN472H1](#), [CIN480H1](#), [FCS310Y1](#), [GER251H1](#), [ITA240Y1](#), [ITA340H1](#), [ITA341H1](#), [ITA342H1](#), [ITA345H1](#)

Group F: Independent Studies
[CIN490Y1](#), [CIN491H1](#), [CIN492H1](#)

Group G: Cross-Listed
[CLT355H1](#), [EAS242H1](#), [EAS243H1](#), [EAS249H1](#), [EAS278H1](#), [EAS431H1](#), [FCS392H1](#), [FIN250H1](#), [FIN260H1](#), [GER250H1](#), [HIS345H1](#), [HIS459H1](#), [HIS460H1](#), [HIS467H1](#), [JSU325H1](#), [SLA226H1](#), [SLA234H1](#), [SLA333H1](#), [SPA275H1](#)

Note: Effective Fall 2021, courses associated with St. Michael's College's Celtic Studies program will have the new "CLT" designator.

Cinema Studies Major (Arts Program) - ASMAJ0797

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- [CIN105Y1](#) or [CIN201Y1](#)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 70% will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Completion Requirements:

(7.0 credits)

First Year:
CIN105Y1

Second Year:
CIN201Y1

Third Year:
CIN301Y1

Fourth Year:
0.5 credit from the following: CIN410H1, CIN411H1, CIN412H1, CIN420H1, CIN430H1, CIN431H1, CIN432H1, CIN440H1, CIN450H1, CIN451H1, CIN452H1, CIN460H1, CIN461H1, CIN470H1, CIN471H1, CIN472H1, CIN480H1

Second, Third and Fourth Year:
In addition, CIN230H1 or 0.5 credit from Breadth Category 5; and at least 3.0 credits from Groups B through G, of which 2.0 credits must be at the 300/400-level, and only a maximum of 1.5 credits can be from Group G: Cross-Listed

Students must complete CIN105Y1 and CIN201Y1 before taking any fourth-year courses.

Group A: Foundations
CIN105Y1, CIN201Y1, CIN301Y1

Group B: Genre and Modes
CIN210H1, CIN211H1, CIN212H1, CIN213H1, CIN214H1, CIN215H1, CIN216H1, CIN310Y1, CIN312Y1, CIN314Y1, CIN320H1, CIN321H1, CIN322H1, CIN410H1, CIN411H1, CIN412H1, CIN420H1

Group C: Social and Cultural Practices
CIN230H1, CIN240H1, CIN330Y1, CIN332Y1, CIN334H1, CIN335H1, CIN336H1, CIN337H1, CIN338H1, CIN340H1, CIN341H1, CIN349H1, CIN430H1, CIN431H1, CIN432H1, CIN440H1

Cinema Studies Institute Courses

CIN105Y1 - Introduction to Film Study

Hours: 24L/24T/72P

Introduction to film form (including style and narration), different types of films, and popular approaches to the study of cinema. Topics include: narrative cinema, documentary, *avant-garde*, genre, authorship, ideology, and representation.

Exclusion: ENGB70H3, ENGB75H3, ENGB76H3, CIN101H5

Breadth Requirements: Creative and Cultural Representations (1)

CIN196H1 - Story Worlds and the Cinema

Hours: 24P/24S

Films create story worlds, imaginary environments in which characters live and act, and where events, large and small, transpire. Some story worlds are elaborate, fanciful constructs (think of Disney's animated films). Others stay close to reality (think of "docudramas"). But across the spectrum, all of them are framed by and provided with rules of time and space, of believable or impossible. This course offers an examination of selected story worlds from several periods of film history. Emphasis falls on the expansive story worlds of contemporary

CIN197H1 - School Daze

Hours: 24P/24S

This first-year foundation course is a survey of sound film (with a brief selection of silent shorts) on the topic of how popular cinemas have represented going to school. Looking at one film and one scholarly text a week, the course will offer an introduction to the close reading of film texts, reading and writing film criticism, and the fundamentals of film history. By engaging with only one film/reading per week, the course emphasizes depth over breadth. Texts for the course may include excerpts from Corrigan's *A Short Guide to Writing About Film*, Sturken and Cartwright's *Practices of Looking*, Staiger's *Interpreting Films*, and Prince's *Movies and Meaning*, along with selected criticism on the movies screened. Those films may include *Zero for Conduct*, *Aparajito*, *Tom Brown's School Days*, *Tea and Sympathy*, *If, Rock and Roll High School*, *Mean Girls*, *School Daze*, *Blackboard Jungle*, or *Lady Bird*. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

CIN201Y1 - Film Cultures I: Art and Industry

Hours: 24L/24T/72P

Examines the practices, theories, and debates surrounding the emergence of cinema through to the development of studio system filmmaking in the first half of the 20th Century. Topics include: film's relation to the other arts, formalist and realist traditions, technological innovations, audiences and reception, and cultural industries.

Prerequisite: CIN105Y1

Breadth Requirements: Creative and Cultural Representations (1), Thought, Belief and Behaviour (2)

CIN210H1 - Horror Film

Hours: 12L/12T/36P

Horror film as a genre, focusing on three types of international horror: the un-dead, body horror, and the supernatural. The genre's popular appeal, affective power, unique means of producing pleasure, and current global resurgence will be emphasized. Topics include: the aesthetics of gore and violence, technologies of fear, J-Horror, new French extremity, cult fandom and paracinema, and media convergence.

Breadth Requirements: Creative and Cultural Representations (1)

CIN211H1 - Science Fiction Film

Hours: 12T/36P

This course is the study of science fiction films in their cultural and political contexts and the genre's narrative and conceptual components. The goal of the course is to familiarize students with science fiction films as popular genre texts, emphasizing the period between 1950 and the present.

Breadth Requirements: Creative and Cultural Representations (1)

CIN212H1 - Cinema and Sensation I: Action/Spectacle

Hours: 12L/12T/36P

Action movies cement the dominance of commercial cinema, and they largely define the contemporary era of

the blockbuster and CGI effects. This course examines the narrative modes and the extremes that action scenes reach, and it explores the commercial and social function of the genre. The course also traces Action's historic reach and global diversity to include its significant precursors and transnational forms that Action cinema takes on.

Breadth Requirements: Creative and Cultural Representations (1)

CIN213H1 - Cinema and Sensation II: Sex

Hours: 12L/12T/36P

Erotic images and sounds have long featured in filmic pleasure and, for just as long, excited controversy. This course examines how sex is articulated on screen and how its regulation suggests broader themes and ideas. Topics include: obscenity laws and the history of film censorship, the eroticized aspects of conventional movies, art cinema, and "adult" erotic films.

Breadth Requirements: Creative and Cultural Representations (1)

CIN214H1 - New Media Forms

Hours: 36L/12T

Introduction to the study of new and contemporary media forms, with a focus on aesthetic and moving-image media. Students will learn key concepts in digital media studies through close examination of historical and contemporary examples from art, cinema, video, and games. Course readings draw on interdisciplinary critical models from cinema studies, cultural studies, art history, and digital media studies.

Breadth Requirements: Creative and Cultural Representations (1)

CIN215H1 - Fantasy Film

Hours: 12L/12T/36P

This course examines the development of the Fantasy imagination in cinema from the start of film production (i.e., Georges Méliès) through the classical era (i.e., *Wizard of Oz*) to the contemporary proliferation of Fantasy cinema (i.e., *Lord of the Rings*, *Snow White and the Huntsman*). Course includes study of Asian, European, and South American Fantasy films.

Breadth Requirements: Creative and Cultural Representations (1)

CIN216H1 - Crime Film Traditions

Hours: 12L/12T/36P

Originating in the mid-19th century from journalistic accounts and detective stories, crime fiction has emerged as one of the dominant popular genres in the 20th century across a variety of media and platforms, from true crime dime novels to radio dramas, from hard-boiled literature to prestige television series. Rejuvenated in the 21st century by the consolidation of gaming culture and the rise of podcasting, crime narratives have expanded to transmediality, stretching the boundaries between fiction and documentary practices. In this context, the culturally porous and generically elastic crime film had remained one of the most enduring cinematic expressions of sociopolitical anxieties related to class, gender, race, and ethnicity. This course examines a selection of crime film traditions across various geographical areas and historical periods, investigating the resilience of this form from the silent period to the present day.

Breadth Requirements: Creative and Cultural Representations (1)

CIN220H1 - Special Topics in Cinematic Genres and Modes

Hours: 12L/12T/36P

Course on special topics in cinematic genres and modes. Topics vary each year.

Breadth Requirements: Creative and Cultural Representations (1)

CIN230H1 - The Business of Film

Hours: 36L/12T

Examines cinema as a commercial enterprise, emphasizing production, distribution, and exhibition and the political economy of North American film culture.

This is a Breadth Category 3 course but has been specially-designed to fulfill the Quantitative Reasoning requirement for Cinema Studies Specialists and Majors.

Breadth Requirements: Society and its Institutions (3)

CIN240H1 - Special Topics in Cinema Studies

Hours: 12L/12T/36P

Course on special topics in Cinema Studies. Topics vary each year.

Breadth Requirements: Society and its Institutions (3)

CIN250Y1 - Directors: Four Studies in Film Authorship

Hours: 48L/48P

This course takes four selected directors' films and examines them analytically and interpretively. The purpose of the course is to apply and test the *auteur* theory in the context of concepts of film style and film conventions.

Prerequisite: [CIN105Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN260H1 - Selected Topics in Cinema Studies

Hours: 12L/12T/36P

Course on selected topics in Cinema Studies. Past topics include: "New Media."

Breadth Requirements: Creative and Cultural Representations (1)

CIN270Y1 - American Popular Film Since 1970

Hours: 48L/24T/48P

The examination of popular American cinema through its social, political, and commercial practices, and through the study of selected popular films from the 1970s to the present.

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

CIN301Y1 - Film Cultures II: Politics and Global Media

Hours: 24L/24T/72S

Examines film theory and practice from the 1950s onward, and the impact of media change on earlier film cultures and aesthetics. Topics include: New Wave cinemas, the politicization of theory, spectatorship, counter-cinemas, transnational film and "Global Hollywood", and media theory from the analog to the digital.

Prerequisite: CIN105Y1, CIN201Y1

Breadth Requirements: Creative and Cultural Representations (1), Thought, Belief and Behaviour (2)

CIN310Y1 - Avant-Garde and Experimental Film

Hours: 48L/72P

Avant-garde films, both canonical and marginal, are examined mainly in the context of modern art and poetry from the 1920s through the 1990s. Films include works from Europe, North America, and Japan. Art contexts range from Cubism, Dada, and Surrealism in the 1920s to Neo-Dada, Abstract Expressionism, Pop, and Postmodernism.

Prerequisite: CIN105Y1

Exclusion: ENGD91H3, CIN402H5

Breadth Requirements: Creative and Cultural Representations (1)

CIN312Y1 - Documentary Film

Hours: 48L/48P

Critical and historical survey of documentary practice, including cinema verité, ethnographic experiments, and various hybrid forms, with emphasis on the rhetorical, aesthetic, and political dimensions of the "art of record." Topics include: the filmmaker/subject/audience nexus; historiography, hagiography, and performance; and how emerging technology and new media platforms, evinced in the rise of documentary-based webdocs, i-docs, and webgames, affect the actual production and style of linear documentary, as well as impact earlier models of documentary exhibition, distribution, and viewer engagement alike.

Prerequisite: CIN105Y1

Exclusion: ENGD94H3

Recommended Preparation: CIN201Y1

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

CIN314Y1 - Genre, Narrative and Narration in Film

Hours: 48L/72P

Study of theoretical-analytical models of film genres, narrative form, and narration. Structuralist, cognitive-neoformalist, and historiographical approaches will be developed. Genres to be studied include: Westerns, musicals, crime films, biography films, gothic and fantastic films, and art cinema.

Prerequisite: CIN105Y1

Breadth Requirements: Creative and Cultural Representations (1), Thought, Belief and Behaviour (2)

CIN315H1 - Sound and Animation

Hours: 24L/24P

This course aims to unsettle the privileging of the visual and of live action cinema in film and media studies. The founding impetus of the class is to counter the marginalization of two intertwined issues – animation and sound – in cinema studies. This course takes seriously the suggestion of various scholars that animation is central rather than peripheral to film history and the rise of digital media.

The course aims to give students a working knowledge of key concepts at the intersection of animation, sound, and music, while also surveying a range of historical, national, and transnational contexts. The class considers feature-length titles from Hollywood and Japan as major nodes in the global circulation of cartoons and anime; at the same time, it de-centers these major players by also exploring short, experimental, and independent animation work in a transnational vein. This eclecticism is paralleled by a variety of approaches to sound and animation covered in the class, from more theoretical, philosophical, or formalist discourses to perspectives that foreground history and ideology, and considerations grounded in the materiality of media, production contexts, or industrial circulation. Throughout, the class is attuned to the cultural and political work that animated sound films do in negotiating dynamics of race, gender and sexuality.

Prerequisite: CIN105Y1

Breadth Requirements: Creative and Cultural Representations (1)

CIN320H1 - Special Topics in Genre and Modes

Hours: 24L/24P

Courses in special topics designed for Specialists and Majors in Cinema Studies. Past topics include: "Contemporary Screen Comedy," and "Eco-cinema: The Nature of Film."

Prerequisite: CIN105Y1

Breadth Requirements: Creative and Cultural Representations (1)

CIN321H1 - Special Topics in Genre and Modes II

Hours: 24L/24P

Courses in special topics designed for Specialists and Majors in Cinema Studies.

Prerequisite: CIN105Y1

Breadth Requirements: Creative and Cultural Representations (1)

CIN322H1 - Cult Cinema

Hours: 24L/24P

This course examines "cult" and "exploitation" cinema. It examines the growing popularity of cult/exploitation films as an emerging cinematic subculture that valorizes disreputable or "trash" cinema. A number of sub-genres within exploitation film, including teen films, educational/instructional films, sexploitation, and Blaxploitation, will be explored. The social politics of appropriating texts through ironic reading strategies will also be considered.

Prerequisite: CIN105Y1

Breadth Requirements: Creative and Cultural Representations (1)

CIN330Y1 - Feminist Approaches to Cinema

Hours: 48L/48P

Gender politics of feminist film culture since the 1970s. Topics include: apparatus theory and its legacy, models of spectatorship, feminist historiography, the cinematic (re)production of identity, the relationship between social movements and cinema, "postfeminism."

Prerequisite: CIN105Y1

Breadth Requirements: Creative and Cultural Representations (1), Thought, Belief and Behaviour (2)

CIN332Y1 - Screening Race

Hours: 48L/48P

How race functions in cinema. Topics include: the foundational role of racial inscription and its expansion beyond the black/white paradigm, visual ethnography, 'the primitive,' and Orientalism, indigenous media, the 'Black Atlantic' and Diaspora, Banlieu and exilic film practice and theory, border aesthetics, race and urban space, 'post-race', and the evolving racial imaginary.

Prerequisite: CIN105Y1, CIN201Y1

Exclusion: FLMB80H3

Breadth Requirements: Creative and Cultural Representations (1), Thought, Belief and Behaviour (2)

CIN334H1 - The Origins of the Animation Industry, 1900-1950: A Technosocial History

Hours: 24L/36P

An introduction to early animation, considering its vaudeville roots, industrialization, emerging aesthetics, and representational tropes. Examination of the early corpus of animation from 1900-1950, and in-depth study of the artistic, social, and cultural milieux from which animation derived.

Prerequisite: CIN105Y1, CIN201Y1

Breadth Requirements: Creative and Cultural Representations (1)

CIN335H1 - Animation after 1950

Hours: 24L/36P

This course examines the second fifty years of animation, first by marking Disney's shifting fortunes, then broadening the scope to take in its competitors here and abroad. The global nature of postwar animation has been an odd amalgam of competition and cooperation, of private and public funding, and of film, television, and eventually webcasting, and we will explore some of the changes the form has gone through in the past fifty years or so. Since this is a study of art and of commerce, and of high and low culture, we will view our limited history through the lenses of aesthetics, cultural practices, business decisions, and sometimes political struggle.

Prerequisite: [CIN105Y1](#), [CIN201Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN336H1 - Queer Film and Media

Hours: 48L

This course focuses on queer film, television, and/or digital media. Approaches may include cultural, historical, analytical, critical, and theoretical methods. This course may focus on the representation of queer people in film in media, or film and/or media made by queer people, or both.

Prerequisite: [CIN105Y1](#), or 1.0 credit from: [SDS255H1](#), [SDS256H1](#), [SDS279H1](#), [SDS355H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN337H1 - Black Cinema

Hours: 24L/24P

This course explores the cultural, aesthetic, technological, and political category of "Black cinema." Across the diaspora, Black cinema is an artistic praxis that utilizes techniques like improvisation and collaboration in order to make and remake the cinematic archive. The films and filmmakers in this category intervene in cinematic histories by responding to exclusionary narratives, technologies, and critical discourse by imagining alternative stories, spaces, and temporalities. Thus, these films help articulate both the pervasiveness of anti-blackness in our visual culture and help us understand the *difference* (film) aesthetics can make (Chun, 2019).

Our goal is to 1) develop a critical language to discuss Black cinema (its techniques, its aims, and its political contexts) and 2) articulate research questions, methods, and arguments that consider what is happening inside and outside the frame in these films.

Prerequisite: [CIN105Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN338H1 - Environmental Media

Hours: 24L/24P

This course is interested in exploring the many relationships between media and the environment. We not only analyze the representations of environmentality in film, photography, video games, and digital media, but

also the material entanglements of media technologies and infrastructures with environment—broadly defined. Adopting conceptual approaches in elemental, infrastructural, and architectural media studies, we seek to uncover and politicize media's troubled relationship with environmentality.

Prerequisite: [CIN105Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN339H1 - Adult Film Histories

Hours: 24L/24P

From the birth of cinema and the legal emergence of "hardcore" to the rise of the internet, adult film covers a broad span of periods, genres, geographies, venues, and technical formats: stag and grindhouse films, peepshows, sexploitation films, avant-garde cinema, "Golden Age" pornography, video, animation, adult theatres, and digital contexts. This course offers a critical and historical survey of adult films in social, legal, technical, and political contexts of production, consumption, and circulation. The course balances global and U.S. perspectives with attention to entanglements of race, class, gender, sexuality, feminism, and labor. Course content augmented by guest lectures from the adult industry.

Prerequisite: [CIN105Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN340H1 - Special Topics in Cinema as Social and Cultural Practice

Hours: 24L/24P

Courses in special topics designed for Specialists and Majors in Cinema Studies. Past topics include: "History of Cinematography," and "Everyday Life in the Digital Age."

Prerequisite: [CIN105Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN341H1 - Special Topics in Cinema as Social and Cultural Practice II

Hours: 24L/24P

Courses in special topics designed for Specialists and Majors in Cinema Studies.

Prerequisite: CIN105Y1

Breadth Requirements: Creative and Cultural Representations (1)

CIN349H1 - Screenwriting

Hours: 24S

Students will develop screenwriting skills under the guidance of a renowned Canadian screenwriter through a combination of writing workshops and individual consultations. Like the course, the appointment of the Universal Screenwriter-in-Residence occurs biannually.

Prospective students must submit an application form that will be found at Cinema Studies Institute Undergraduate Forms and provide a creative writing sample to the Cinema Studies Undergraduate Office by email to cinema.studies@utoronto.ca by April 30. A screenplay (or excerpt) is preferred, but a submission that the students feel best expresses their talent is also acceptable. The course instructor and/or Undergraduate Coordinator will assess student potential based on the writing samples to determine student eligibility to enrol in the course. Enrolment priority will be given to upper year Cinema Studies program students.

Prerequisite: CIN105Y1, CIN201Y1, and 2.0 additional CIN credits

Exclusion: VIC276H1, CRE276H1

Breadth Requirements: Creative and Cultural Representations (1)

CIN352H1 - Issues in Film Authorship I

Hours: 24L/24P

Advanced study of issues in film authorship through intensive examination of one or more major filmmakers.

Prerequisite: CIN105Y1

Exclusion: ENG52H3, CIN206H5

Breadth Requirements: Creative and Cultural Representations (1)

CIN353H1 - Issues in Film Authorship II

Hours: 24L/24P

Advanced study of issues in film authorship through intensive examination of one or more major filmmakers.

Prerequisite: CIN105Y1

Exclusion: ENG52H3, CIN206H5

Breadth Requirements: Creative and Cultural Representations (1)

CIN360H1 - Special Topics in Theory and Criticism

Hours: 24L/24P

Courses in special topics designed for Specialists and Majors in Cinema Studies. Past topics include: "Cinema and Intermediality."

Prerequisite: CIN105Y1, CIN201Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

CIN361H1 - Special Topics in Theory and Criticism II

Hours: 24L/24P

Courses in special topics designed for Specialists and Majors in Cinema Studies.

Prerequisite: CIN105Y1, CIN201Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

CIN362H1 - Animals and Cinema

Hours: 24L/24P

This course explores cinema's century-long fascination with animals. Its investigations are organized around three central questions. First, what does cinema teach us about animals (why and how we look at animals on film, how we represent and understand animals through film, and what lessons we hope to gain from animals on film)? Second, what do animal films reveal or teach us about the cinema? Third, what are the aesthetic, theoretical, and ethical stakes of such encounters between animals and cinema?

Prerequisite: CIN105Y1, CIN201Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

CIN363H1 - Ecocinema: The Nature of Film

Hours: 24L/24P

This course takes a broad approach to the growing field – sometimes termed “ecocinema” or “film ecology” – devoted to cinema’s relationship to the natural environment. We will consider that relationship through a combination of historical, textual, and theoretical analysis.

Prerequisite: [CIN105Y1](#), [CIN201Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN364H1 - Theories of Media

Hours: 48L

In-depth history of humanistic theories of media and mediation, with a focus on aesthetics. Authors discussed may include Karl Marx, Walter Benjamin, Sigmund Freud, Marshall McLuhan, Friedrich Kittler, Donna Haraway, Bernard Stiegler, Katherine Hayles, and others. Includes substantial discussion of contemporary problems and authors in digital media studies and media theory. Includes extensive consideration of aesthetic forms, including animation, cinema, television, installation art, video games, net.art, and others.

Prerequisite: [CIN105Y1](#)

Recommended Preparation: [CIN214H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN365H1 - Nonfiction Video Practice

Hours: 24L/24P

This course is designed to introduce students to the basics of creative video production, with an emphasis on documentary and nonfiction film and video. Students will be introduced to the theory and practice of documentary filmmaking, including the creative, ethical, conceptual, and practical dimensions of artistic moving-image production. This is a hands-on course that will include off-site practical workshops and in-course group critique. Students are expected to have some prior technical knowledge of video recording and video editing, as technical skill-building will fall outside the purview of this course. We will explore the diverse approaches adopted by nonfiction filmmakers and video artists in order to consider what constitutes a cinematic practice. Students will work on creative assignments individually and in groups, coming up with conceptual ideas, creative treatments, and artistic methods for translating their ideas and questions into non-fiction moving image media.

Prerequisite: [CIN105Y1](#), [CIN201Y1](#)

Recommended Preparation: Prior technical knowledge of video recording and video editing.

Breadth Requirements: Creative and Cultural Representations (1)

CIN366H1 - Durable Empires and Medias of Mass Culture

Hours: 24L/24P

Taking a deliberately broad view of “empire” to include formations of power under colonialism, nationalism, neoliberalism, and more, we seek to understand how visible and invisible structures of power define our world through cinematic and mediated forms. In particular, we are interested in how hegemony (and resistance) articulates with medias of mass culture. How do mass media such as cinema, television, the internet, and big data represent, disseminate, intercept, and/or resist imperial formations?

Prerequisite: [CIN105Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN369H1 - Critical Writing on Film

Hours: 48L

The practice of film criticism: studies of examples of journalistic and scholarly critical writing, practical sessions of process writing, and collaborative editing. Course includes regular film screenings. This course is offered biannually.

Prospective students must submit an application form that will be found at [Cinema Studies Institute Undergraduate Forms](#) and provide a brief (one to two paragraphs) explanation of why they would like to take [CIN369H1](#) to the Cinema Studies Undergraduate Office by email to cinema.studies@utoronto.ca by April 30. The course instructor and/or Undergraduate Coordinator will assess the applications to determine student eligibility to enrol in the course: prerequisites, program of study, and experience. Enrolment priority will be given to upper year Cinema Studies program students.

Prerequisite: [CIN105Y1](#) and 1.0 additional CIN credit

Exclusion: [ENGB71H3](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN370H1 - Canadian Cinemas

Hours: 24L/24P

History and diversity of Canadian and Québécois cinemas. Analyses of film and critical frameworks examine how co-productions, multiculturalism, and post-national arguments are re-shaping the production and reception contexts of national cinema. Annual emphasis will be placed on one of the following topics: the emergence of the feature film, Québécois cinema, documentary, or experimental cinema.

Prerequisite: CIN105Y1

Exclusion: FCS391H1

Breadth Requirements: Creative and Cultural Representations (1)

CIN371H1 - (New) Media Aesthetics

Hours: 48L

Investigates the theory and history of media technologies as sites of aesthetic investment in a wide variety of artistic practices, focusing on contemporary digital media work, including experimental cinema, gallery installation, net.art, and avant-garde videogames. One important emphasis lies in the aesthetic possibilities new (and newly inexpensive) media technologies have made available to marginalized artists, including especially women and queer artists. We will study the work of Maya Deren, John Cage, Tony Conrad, Yoko Ono, Jack Smith, Andy Warhol, Michael Snow, Marina Abramovic, Marlon Riggs, Felix Gonzales-Torres, Anna Anthropy, and others.

Prerequisite: CIN105Y1

Breadth Requirements: Creative and Cultural Representations (1)

CIN372Y1 - Contemporary World Cinema

Hours: 48L/72P

Major contemporary developments beyond Hollywood and European filmmaking, examining a select number of national/regional cinemas: Africa, Korea, Iran, India (Hindi cinema), and Latin America. Topics include: transnationalism, indigenization of generic and stylistic conventions, cultural contexts, distribution networks, film festivals, and reception within a global economy.

Prerequisite: CIN105Y1

Exclusion: ENG83H3

Recommended Preparation: CIN201Y1

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

CIN374Y1 - American Filmmaking in the Studio Era

Hours: 24L/24T/72P

Industrial, economic, ideological, and aesthetic dimensions of the American studio era.

Prerequisite: CIN105Y1

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

CIN376Y1 - Chinese Cinemas

Hours: 48L/72P

Examination of Chinese films in their three post-World War II production centres: The People's Republic of China, Taiwan, and Hong Kong. Commercial, political, and aesthetic trends; international reception; major *auteurs* and genres. Directors include Tsui Hark, Chen Kaige, Zang Yimou, Edward Yang, John Woo, and Wong Kar-Wai.

Prerequisite: CIN105Y1

Exclusion: CIN376Y0

Recommended Preparation: CIN201Y1

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

CIN376Y0 - Chinese Cinemas

Examination of Chinese films in their three post-World War II production centres: The People's Republic of China, Taiwan, and Hong Kong. Includes study of Shanghai films of the 1930s and 1940s. Commercial, political, and aesthetic trends; international reception; major *auteurs* and genres (including melodrama, wuxia pian and crime films). Directors include Tsui Hark, Chen Kaige, Zang Yimou, John Woo, Wong Kar-Wai, Hou Hsiao-hsien, and Feng Xiaogang.

This course is offered through the Summer Abroad program.

Prerequisite: CIN105Y1

Exclusion: CIN376Y1

Recommended Preparation: CIN201Y1

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

CIN378H1 - Aspects of a National Cinema

Hours: 24L/24P

In-depth treatment of a national cinema. Past courses include: "British Cinema," "Australian and New Zealand Cinema," and "The Other Europe."

Prerequisite: [CIN105Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN378Y0 - Aspects of a National Cinema

This course offers a critical study of British film cultures, with an emphasis on British film genres, movements and cycles from the 1960s to the present day. Earlier representative works, to include the British documentary movement, will provide a foundation for a comparative study of contemporary British cinema. Major and minor film cultures will be studied in their institutional, social, and cultural contexts to include: the long standing tradition of British realism; the Free Cinema Movement; the "New Wave;" "Swinging London;" "Thatcherite" cinema, including its heritage, art cinema, Brit-grit and Black British iterations; in addition to the recent "lad boy" underclass cycle that reconfigures the traditional conceptualization of British cinema as strictly oppositional "realism or tinsel." Debates pertinent to the way in which British films and relate to a shifting sense of national identity, towards examining the "Englishness" of British national cinema, will be highlighted.

This course is offered through the Summer Abroad program.

Breadth Requirements: Creative and Cultural Representations (1)

CIN379H1 - Hungarian Cinema

Hours: 24L/24P

Examines historical trends, influential filmmakers, and social and cultural factors influencing the development of Hungarian cinema, assessing its impact within the context of Eastern Europe and internationally.

Prerequisite: [CIN105Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN380H1 - Special Topics in History and Nation

Hours: 24P/24S

Courses in special topics designed for Specialists and Majors in Cinema Studies.

Prerequisite: [CIN105Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN381H1 - Special Topics in History and Nation II

Hours: 24L/24P

Courses in special topics designed for Specialists and Majors in Cinema Studies.

Prerequisite: [CIN105Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN381Y1 - Special Topics in History and Nation

Hours: 48P/48S

Courses in special topics designed for Specialists and Majors in Cinema Studies.

Prerequisite: [CIN105Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN410H1 - Advanced Study in Genre and Modes

Hours: 24P/24S

Consideration of the status of a selected film genre or mode from historical and theoretical perspectives. Past seminars include: "Film Comedy," "Melodrama," "Film Noir," "The End in Cinema," and "The Musical."

Pre-enrolment balloting for 400-Level seminars will start in late May to early June, opening roughly five weeks before the July enrolment period begins. More information on balloting procedures, the balloting form and the submission deadline can be found in [Cinema Studies Undergraduate Forms](#).

Prerequisite: At least 10.0 credits, including [CIN105Y1](#), [CIN201Y1](#)

Corequisite: [CIN301Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN411H1 - Advanced Study in Genre and Modes

Hours: 24P/24S

Consideration of the status of a selected film genre or mode from historical and theoretical perspectives. Past seminars include: "Film Comedy," "Melodrama," "Film Noir," "The End in Cinema," and "The Musical."

Pre-enrolment balloting for 400-Level seminars will start in late May to early June, opening roughly five weeks before the July enrolment period begins. More information on balloting procedures, the balloting form and the submission deadline can be found in [Cinema Studies Undergraduate Forms](#).

Prerequisite: At least 10.0 credits, including [CIN105Y1](#), [CIN201Y1](#)

Corequisite: [CIN301Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN412H1 - Advanced Study in Genre and Modes

Hours: 24P/24S

Consideration of the status of a selected film genre or mode from historical and theoretical perspectives. Past seminars include: "Film Comedy," "Melodrama," "Film Noir," "The End in Cinema," and "The Musical."

Pre-enrolment balloting for 400-Level seminars will start in late May to early June, opening roughly five weeks before the July enrolment period begins. More information on balloting procedures, the balloting form and the submission deadline can be found in [Cinema Studies Undergraduate Forms](#).

Prerequisite: At least 10.0 credits, including [CIN105Y1](#), [CIN201Y1](#)

Corequisite: [CIN301Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN420H1 - Advanced Studies in Cinema

Hours: 24P/24S

Seminars in special topics designed for advanced Specialist and Major students in Cinema Studies.

Pre-enrolment balloting for 400-Level seminars will start in late May to early June, opening roughly five weeks before the July enrolment period begins. More information on balloting procedures, the balloting form and the submission deadline can be found in [Cinema Studies Undergraduate Forms](#).

Prerequisite: At least 10.0 credits, including [CIN105Y1](#), [CIN201Y1](#)

Corequisite: [CIN301Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN430H1 - Advanced Study in Cinema as Social and Cultural Practice

Hours: 24P/24S

Consideration of cinema and its social relations. Past seminars include: "American Independent Film," "Children in the Movies," "Sub-Saharan African Cinema," "International Film Festivals," "Interactive Documentary," "Graphic!," "The Revolution Will/Will Not Be Televised," "Social Problem Films," and "Programming and Curation."

Pre-enrolment balloting for 400-Level seminars will start in late May to early June, opening roughly five weeks before the July enrolment period begins. More information on balloting procedures, the balloting form and the submission deadline can be found in [Cinema Studies Undergraduate Forms](#).

Prerequisite: At least 10.0 credits, including [CIN105Y1](#), [CIN201Y1](#)

Corequisite: [CIN301Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN431H1 - Advanced Study in Cinema as Social and Cultural Practice

Hours: 24P/24S

Consideration of cinema and its social relations. Past seminars include: "American Independent Film," "Children in the Movies," "Sub-Saharan African Cinema," "International Film Festivals," "Interactive Documentary,"

"Graphic!," "The Revolution Will/Will Not Be Televised," "Social Problem Films," and "Programming and Curation."

Pre-enrolment balloting for 400-Level seminars will start in late May to early June, opening roughly five weeks before the July enrolment period begins. More information on balloting procedures, the balloting form and the submission deadline can be found in [Cinema Studies Undergraduate Forms](#).

Prerequisite: At least 10.0 credits, including [CIN105Y1](#), [CIN201Y1](#)

Corequisite: [CIN301Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN432H1 - Advanced Study in Cinema as Social and Cultural Practice

Hours: 24P/24S

Consideration of cinema and its social relations. Past seminars include: "American Independent Film," "Children in the Movies," "Sub-Saharan African Cinema," "International Film Festivals," "Interactive Documentary," "Graphic!," "The Revolution Will/Will Not Be Televised," "Social Problem Films," and "Programming and Curation."

Pre-enrolment balloting for 400-Level seminars will start in late May to early June, opening roughly five weeks before the July enrolment period begins. More information on balloting procedures, the balloting form and the submission deadline can be found in [Cinema Studies Undergraduate Forms](#).

Prerequisite: At least 10.0 credits, including [CIN105Y1](#), [CIN201Y1](#)

Corequisite: [CIN301Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN433Y1 - Sensory Ecologies: Theory and Praxis in Environmental Media Studies

Hours: 48P/48S

Practitioners of environmental filmmaking struggle with a fundamental challenge: how to represent the dimensionality, and immersivity of the so-called natural world within the flat space and linear temporalities of the cinematic medium. These challenges resonate with larger questions about loss, extinction, and degradation; one cannot capture what is now disappeared, elusive, or destroyed. What then, should the role of media be amid a period of environmental ruination? This experiential

learning course seeks to investigate these questions, and more. Through a combination of praxis and theory, students will collaborate with community partners on a series of applied learning outcomes.

Pre-enrolment balloting for 400-Level seminars will start in late May to early June, opening roughly five weeks before the July enrolment period begins. More information on balloting procedures, the balloting form and the submission deadline can be found in [Cinema Studies Undergraduate Forms](#).

Prerequisite: [CIN105Y1](#), [CIN201Y1](#)

Corequisite: [CIN301Y1](#)

Recommended Preparation: As media making is a component of this course, basic skills in media production (e.g. basic shooting with a camera/smartphone and editing) is a prerequisite. Classes will sometimes be conducted off campus so students should be flexible and able to travel.

Breadth Requirements: Creative and Cultural Representations (1)

CIN440H1 - Advanced Studies in Cinema

Hours: 24P/24S

Seminars in special topics designed for advanced Specialist and Major students in Cinema Studies. Past seminars include: "Experiential Learning."

Pre-enrolment balloting for 400-Level seminars will start in late May to early June, opening roughly five weeks before the July enrolment period begins. More information on balloting procedures, the balloting form and the submission deadline can be found in [Cinema Studies Undergraduate Forms](#).

Prerequisite: At least 10.0 credits, including [CIN105Y1](#), [CIN201Y1](#)

Corequisite: [CIN301Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN450H1 - Advanced Study in Theory and Criticism

Hours: 24P/24S

Advanced study of select approaches to film theory and criticism. Past seminars include: "Corporeality and the Cinema," "The Cinematic City: Urban Spaces in Film," "Sound and Music in Film," "Expanded Cinema," "Digital Cinema," and "Cinema and Architecture: Scenes, Screens, Studios."

Pre-enrolment balloting for 400-Level seminars will start in late May to early June, opening roughly five weeks before the July enrolment period begins. More information on balloting procedures, the balloting form and the submission deadline can be found in [Cinema Studies Undergraduate Forms](#).

Prerequisite: At least 10.0 credits, including [CIN105Y1](#), [CIN201Y1](#)

Corequisite: [CIN301Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN451H1 - Advanced Study in Theory and Criticism

Hours: 24P/24S

Advanced study of select approaches to film theory and criticism. Past seminars include: "Corporeality and the Cinema," "The Cinematic City: Urban Spaces in Film," "Sound and Music in Film," "Expanded Cinema," "Digital Cinema," and "Cinema and Architecture: Scenes, Screens, Studios."

Pre-enrolment balloting for 400-Level seminars will start in late May to early June, opening roughly five weeks before the July enrolment period begins. More information on balloting procedures, the balloting form and the submission deadline can be found in [Cinema Studies Undergraduate Forms](#).

Prerequisite: At least 10.0 credits, including [CIN105Y1](#), [CIN201Y1](#)

Corequisite: [CIN301Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN452H1 - Advanced Study in Theory and Criticism

Hours: 24P/24S

Advanced study of select approaches to film theory and criticism. Past seminars include: "Corporeality and the Cinema," "The Cinematic City: Urban Spaces in Film," "Sound and Music in Film," "Expanded Cinema," "Digital Cinema," and "Cinema and Architecture: Scenes, Screens, Studios."

Pre-enrolment balloting for 400-Level seminars will start in late May to early June, opening roughly five weeks before the July enrolment period begins. More information on balloting procedures, the balloting form and the submission deadline can be found in [Cinema Studies Undergraduate Forms](#).

Prerequisite: At least 10.0 credits, including [CIN105Y1](#), [CIN201Y1](#)

Corequisite: [CIN301Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN460H1 - Advanced Studies in Cinema

Hours: 24P/24S

Seminars in special topics designed for advanced Specialist and Major students in Cinema Studies.

Pre-enrolment balloting for 400-Level seminars will start in late May to early June, opening roughly five weeks before the July enrolment period begins. More information on balloting procedures, the balloting form and the submission deadline can be found in [Cinema Studies Undergraduate Forms](#).

Prerequisite: At least 10.0 credits, including [CIN105Y1](#), [CIN201Y1](#)

Corequisite: [CIN301Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN461H1 - Advanced Study in Cinema and Media Practice

Hours: 24L/24P

This seminar uses research creation, critical making, digital humanities, videographic criticism, or other practice-based methods to the humanistic study of cinema and moving-image media, at an advanced level. Students will pursue advanced research projects grounded in these approaches. Topics and methods vary by semester and instructor. This seminar is designed for advanced Specialist and Major students in Cinema Studies, but it does not presume prior practice-based knowledge.

Pre-enrolment balloting for 400-Level seminars will start in late May to early June, opening roughly five weeks before the July enrolment period begins. More information on balloting procedures, the balloting form and the submission deadline can be found in the [Cinema Studies Undergraduate Forms](#).

Prerequisite: 10.0 credits, including [CIN105Y1](#) and [CIN201Y1](#)

Corequisite: [CIN301Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN470H1 - Advanced Study in History and Nation

Hours: 24P/24S

Seminars in historiography and questions of national cinema. Past seminars include: "Film Historiography," "Early Cinema," "Reviewing Hollywood Classicism," "Women Pioneers," "Local Film Cultures: Toronto Sites and Scenes," and "Debating Transnational Cinema."

Pre-enrolment balloting for 400-Level seminars will start in late May to early June, opening roughly five weeks before the July enrolment period begins. More information on balloting procedures, the balloting form and the submission deadline can be found in [Cinema Studies Undergraduate Forms](#).

Prerequisite: At least 10.0 credits, including [CIN105Y1](#), [CIN201Y1](#)

Corequisite: [CIN301Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN471H1 - Advanced Study in History and Nation

Hours: 24P/24S

Seminars in historiography and questions of national cinema. Past seminars include: "Film Historiography," "Early Cinema," "Reviewing Hollywood Classicism," "Women Pioneers," "Local Film Cultures: Toronto Sites and Scenes," and "Debating Transnational Cinema."

Pre-enrolment balloting for 400-Level seminars will start in late May to early June, opening roughly five weeks before the July enrolment period begins. More information on balloting procedures, the balloting form and the submission deadline can be found in [Cinema Studies Undergraduate Forms](#).

Prerequisite: At least 10.0 credits, including [CIN105Y1](#), [CIN201Y1](#)

Corequisite: [CIN301Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN472H1 - Advanced Study in History and Nation

Hours: 24P/24S

Seminars in historiography and questions of national cinema. Past seminars include: "Film Historiography,"

"Early Cinema," "Reviewing Hollywood Classicism," "Women Pioneers," "Local Film Cultures: Toronto Sites and Scenes," and "Debating Transnational Cinema."

Pre-enrolment balloting for 400-Level seminars will start in late May to early June, opening roughly five weeks before the July enrolment period begins. More information on balloting procedures, the balloting form and the submission deadline can be found in [Cinema Studies Undergraduate Forms](#).

Prerequisite: At least 10.0 credits, including [CIN105Y1](#), [CIN201Y1](#)

Corequisite: [CIN301Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN480H1 - Advanced Studies in Cinema

Hours: 24P/24S

Seminars in special topics designed for advanced Specialist and Major students in Cinema Studies.

Pre-enrolment balloting for 400-Level seminars will start in late May to early June, opening roughly five weeks before the July enrolment period begins. More information on balloting procedures, the balloting form and the submission deadline can be found in [Cinema Studies Undergraduate Forms](#).

Prerequisite: At least 10.0 credits, including [CIN105Y1](#), [CIN201Y1](#)

Corequisite: [CIN301Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN490Y1 - Independent Studies in Cinema

Independent research projects devised by students and supervised by Cinema Studies faculty. Open to advanced Specialist and Major students in the Program. Submit applications to the Cinema Studies Undergraduate Office prior to requesting enrolment: Fall term courses, June 1/ Winter term courses, November 1/ Summer term courses, April 1. Not eligible for CR/NCR option.

Prerequisite: At least 10.0 credits, including [CIN105Y1](#), [CIN201Y1](#), [CIN301Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CIN491H1 - Independent Studies in Cinema

Independent research projects devised by students and supervised by Cinema Studies faculty. Open to advanced Specialist and Major students in the Program. Submit applications to the Cinema Studies Undergraduate Office prior to requesting enrolment: Fall term courses, June 1/ Winter term courses, November 1/ Summer term courses, April 1. Not eligible for CR/NCR option.

Prerequisite: At least 10.0 credits, including CIN105Y1, CIN201Y1, CIN301Y1

Breadth Requirements: Creative and Cultural Representations (1)

CIN492H1 - Independent Studies in Cinema

Independent research projects devised by students and supervised by Cinema Studies faculty. Open to advanced Specialist and Major students in the Program. Submit applications to the Cinema Studies Undergraduate Office prior to requesting enrolment: Fall term courses, June 1/ Winter term courses, November 1/ Summer term courses, April 1. Not eligible for CR/NCR option.

Prerequisite: At least 10.0 credits, including CIN105Y1, CIN201Y1, CIN301Y1

Breadth Requirements: Creative and Cultural Representations (1)

D. Kenny, MPhil, PhD

Introduction

Classics is the study of the civilizations of ancient Greece and Rome. This includes their literature, religion, mythology, history, philosophy and art, and also their physical settings, their interactions with surrounding societies, and their influence on later cultures to the present day. The scope of the discipline is vast both in space (not just the territories of the modern states of Greece and Italy but most of western Europe, the Middle East and North Africa) and time (a period of at least two thousand years, from the start of the Bronze Age in Europe in the second millennium B.C. to the dawn of the Middle Ages). Classics at the University of Toronto is not just looking at the past but engaging with issues of compelling and enduring relevance, including: gender and sexuality; the nature of freedom and the basis of political power and legitimacy; how relationships should and do work between parents and children; whether democracy is compatible with imperialism; what it means to be in love; how people cope with the fear of death; and when, if ever, it is right to go to war.

The Department of Classics welcomes students of all academic backgrounds who wish to take courses in the field but do not wish to specialize in Classical Studies. Even without knowing Greek or Latin, students can profitably study Greek and Roman history or Greek and Latin literature in translation - two areas combined under the designation CLA (for Classical Civilization courses) below. Similarly, the Major and Minor Programs in Classical Civilization presuppose no knowledge of the classical languages.

Advanced work in Greek and Latin does require study of the basic language courses in sequence. These are listed below under the designations GRK (for Greek courses) and LAT (for Latin courses). The Department of Classics publishes an undergraduate handbook which may be obtained from the departmental office and is published on the internet; this and other information about the Department is available at:

Website: <https://classics.utoronto.ca/>

Undergraduate Coordinator: Professor Sarah Murray

125 Queens Park, room LI114
(undergrad.classics@utoronto.ca; 416-978-7174)

Enquiries: 125 Queens Park, room 108 (416-978-5513)

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Classics programs impacted by this policy: [ASMAJ0382](#) and [ASMIN0382](#); [ASMAJ2123](#) and [ASMIN2123](#); [ASMAJ1451](#) and [ASMIN1451](#)

Classics Programs

Classical Civilization Major (Arts Program) - ASMAJ0382

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

There are no specific requirements for first year. Students are recommended to take [CLA160H1](#)/ [CLA170H1](#) and at least one other CLA course at the 200-level.

(7.0 credits)

1. [CLA160H1](#)/ [CLA170H1](#)
2. [CLA260H1](#)
3. [CLA402H1](#)/ [CLA403H1](#)
4. Additional 5.5 credits in CLA, including 2.0 credits at the 300+-level

Substitutions:

1. Up to 3.0 credits from approved courses involving the ancient Greek and Roman civilizations taught by other departments, notably Art History and Philosophy, may be substituted for the 5.5 credits in CLA courses from Requirement 4.

Art History:

[FAH206H1](#), [FAH207H1](#), [FAH208H1](#), [FAH303H1](#), [FAH304H1](#), [FAH307H1](#), [FAH308H1](#), [FAH309H1](#), [FAH310H1](#), [FAH311H1](#), [FAH312H1](#), [FAH313H1](#), [FAH314H1](#), [FAH401H1](#), [FAH402H1](#), [FAH405H1](#), [FAH406H1](#), [FAH407H1](#)

Philosophy:

[PHL200Y1](#), [PHL301H1](#), [PHL302H1](#), [PHL303H1](#), [PHL304H1](#), [PHL307H1](#), [PHL400H1](#), [PHL471H1](#)

2. Up to 2.0 credits in GRK or LAT may be substituted for the 5.5 credits in CLA courses from Requirement 4.

Classics (Greek and Latin) Major (Arts Program) - ASMAJ0962

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

There are no specific requirements for first year. Students are recommended to take [CLA160H1](#) or [CLA170H1](#), and in addition [GRK101H1](#) and [GRK102H1](#), and/or [LAT101H1](#) and [LAT102H1](#).

(7.0 credits)

1. [CLA160H1](#)/ [CLA170H1](#), [CLA260H1](#)
2. 6.0 credits of GRK/LAT courses, including:
 - at least 2.0 credits in each of GRK and LAT
 - at least 1.0 credit at the 400-level in either GRK or LAT

Greek Major (Arts Program) - ASMAJ2123

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

There are no specific requirements for first year. Students are recommended to take [CLA160H1](#)/ [CLA170H1](#), [GRK101H1](#) and [GRK102H1](#).

(6.0 credits)

1. [CLA160H1](#)/ [CLA170H1](#), [CLA260H1](#)
2. 4.0 credits from GRK courses, of which 1.0 credit must be at the 300-level and 1.0 credit at the 400-level
3. Additional 1.0 credit from CLA/GRK/LAT

Latin Major (Arts Program) - ASMAJ1451

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

There are no specific requirements for first year. Students are recommended to take CLA160H1/ CLA170H1, LAT101H1 and LAT102H1.

(6.0 credits)

1. CLA160H1/ CLA170H1, CLA260H1
2. 4.0 credits from LAT courses, of which 1.0 credit must be at the 300-level and 1.0 credit at the 400-level
3. Additional 1.0 credit from CLA/GRK/LAT

Classical Civilization Minor (Arts Program) - ASMIN0382

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

There are no specific requirements for first year. Students are recommended to take CLA160H1/ CLA170H1 and one other CLA course at the 200-level.

(4.0 credits)

1. CLA160H1/ CLA170H1
2. 3.5 credits in CLA courses at the 200+ level, including 1.0 credit at the 300+ level

Substitutions:

1. Up to 2.0 credits from approved courses involving the ancient Greek and Roman civilizations taught by other departments, notably Art History and Philosophy, may be substituted for the 3.5 credits in CLA courses from Requirement 2.

Art History:

FAH206H1, FAH207H1, FAH208H1, FAH303H1, FAH304H1, FAH307H1, FAH308H1, FAH309H1, FAH310H1, FAH311H1, FAH312H1, FAH313H1, FAH314H1, FAH401H1, FAH402H1, FAH405H1, FAH406H1, FAH407H1

Philosophy:

PHL200Y1, PHL301H1, PHL302H1, PHL303H1, PHL304H1, PHL307H1, PHL400H1, PHL471H1

2. Up to 1.0 credit in GRK or LAT may be substituted for the 3.5 credits in CLA courses from Requirement 2.

Greek Minor (Arts Program) - ASMIN2123

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

There are no specific requirements for first year. Students are recommended to take CLA160H1/ CLA170H1, GRK101H1 and GRK102H1.

(4.0 credits)

1. 1.0 credit from CLA courses, including CLA160H1/ CLA170H1
2. 3.0 credits from GRK courses, of which 1.0 credit must be at the 300-level

Latin Minor (Arts Program) - ASMIN1451

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

There are no specific requirements for first year. Students are recommended to take CLA160H1/ CLA170H1, LAT101H1 and LAT102H1.

(4.0 credits)

1. 1.0 credit from CLA courses, including CLA160H1/ CLA170H1
2. 3.0 credits from LAT courses, of which 1.0 credit must be at the 300-level

Faculty of Arts & Science Language Citation

The Department of Classics participates in the Faculty of Arts & Science's Language Citation initiative for Ancient

Greek and Latin. The study of Ancient Greek and Latin is a demanding and intellectually rewarding educational experience which makes available to the modern student the rich resources of classical texts in the original languages. Successful study of these languages demonstrates intelligence, discipline, analytical sophistication, and an excellent memory. The study of any foreign language provides invaluable insights into the varieties of human culture and expression.

In each language, the Language Citation recognizes a significant level of achievement in language study with a high level of academic success.

The Citation in Latin is available to students who complete LAT101H1 and LAT102H1 (or the equivalent prerequisite training) and earn a grade of at least B- in LAT201H1, LAT202H1 and any two LAT 0.5 credit courses at the 300-level.

The Citation in Ancient Greek is available to students who complete GRK101H1 and GRK102H1 (or the equivalent prerequisite training) and earn a grade of at least B- in GRK201H1, GRK202H1 and any two GRK 0.5 credit courses at the 300-level.

Students should note that, as explained in the Academic Record - Recognition of Academic Achievement section of this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation.

Regarding Classics Courses

Note: CLA courses are taught in English; all readings are in English. CLA courses do not require knowledge of Greek or Latin.

300-Level Courses

Most 300-level courses have specific prerequisites, which are enforced. Students seeking exemptions from these prerequisites should contact the undergraduate coordinator before attempting to enroll in them on ACORN.

Students enrolled in the Major and Minor Programs in Classical Civilization have priority access to these courses.

300-level 0.5 credit courses: only 8 to 10 are offered in a typical Fall-Winter Session.

Greek Courses

These courses teach reading in ancient Greek. Prerequisites will be enforced. GRK101H1 requires no prior knowledge in ancient Greek. Courses in Greek taught by the Department of Classics involve the study of the form of the language employed in antiquity from about 800 B.C.E. to 400 C.E. The Department of Classics does not offer instruction in Medieval or Modern Greek.

Frequency of Offering: In each fall-winter session, GRK430H1 will be offered and a minimum of 1.5 credits (three 0.5 credit courses) in each of the GRK 300 and 400-level. In odd-numbered years the courses offered in the 300 and 400-level will normally be drawn from those with odd numbers, and in even-numbered years from those with even numbers.

Courses numbered GRK440H1 to GRK453H1 are advanced versions of the courses with the same titles at the 300-level (GRK340H1 - GRK353H1). They differ from the 300-level versions in meeting for an extra hour, studying more texts, and including a component of integrative, inquiry-based research.

Latin Courses

These courses teach reading in Latin. Prerequisites will be enforced. LAT101H1 requires no prior knowledge of Latin.

Frequency of Offering: In each fall-winter session, LAT430H1 will be offered and a minimum of 1.5 credits (three 0.5 credit courses) in each of the LAT 300 and 400-level. In odd-numbered years the courses offered in the 300 and 400-level will normally be drawn from those with odd numbers, and in even-numbered years from those with even numbers.

Courses numbered LAT440H1 to LAT453H1 are advanced versions of the courses with the same titles at the 300-level (LAT340H1 - LAT353H1). They differ from the 300-level versions in meeting for an extra hour, studying more texts, and including a component of integrative, inquiry-based research.

Classics First-Year Foundations

CLA195H1 - Julius Caesar

Hours: 24S

Gaius Julius Caesar (100 – 44 BC) was a writer, an orator, a reformer, and a builder, as well as a general, a conqueror, an explorer, and a dictator. After his death, he was even worshipped as a god with a temple in the very heart of Rome. According to his critics, both ancient and modern, he was also a megalomaniac, an enemy of the state, a war criminal, and a tyrant. Only a very few individuals have left such an extensive and controversial mark on the history of the ancient world. We shall consider as many aspects of his life and his legacy as we can, from his conquest of Gaul to his decision to plunge Rome into a horrific civil war, from his love-affair with Queen Cleopatra of Egypt to his brutal assassination on the Ides of March. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

CLA196H1 - Unhappy Families

Hours: 24S

Unhappy families appear throughout Greco-Roman literature and culture. Spectacular Tragic Houses were filled with several generations of disasters. These inspired a variety of poets to retell select moments in their histories. But even the comic household can mobilize hatred, suspicion, and other ugly feelings to humorous effect. Conflict between domineering fathers and the rest of the household was a staple of rhetorical training. And in many homes we can see the misery of slaves, members who are also not members of the family. This course will survey a variety of intimate disasters. We will explore norms and ideals as well as the sense that the same are fragile, contradictory, or even impossible. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

CLA197H1 - Inventing the Ancient Mediterranean: Roman Technology

Hours: 24S

Two thousand years ago Roman hydraulic engineers designed aqueducts and provided hundreds of cities in the Mediterranean region with a richer water supply than any nation could boast before the late 1800s. Ever more sophisticated ships transported goods from harbour to harbour and Roman experts on construction built the Colosseum and other amphitheatres, as well as countless temples, theatres, roads, bridges, and even high-rise apartment buildings, which in some cases survive to this very day. What was the secret of Roman civilization, and what did this level of technology mean for the empire's inhabitants? This course presents for discussion the many achievements of centuries of Roman presence on three continents around the Mediterranean Sea, while bringing into the equation also the issue of standard of living and the ecological costs. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

CLA198H1 - Homer's Odyssey down through Time

Hours: 24S

This course will survey creative works inspired by Homer's *Odyssey*. First we will read through the *Odyssey*, contextualizing the Homeric epic within the larger story of the Trojan War and the subsequent heroic return in the "Epic Cycle." Then we will study various "receptions" of the *Odyssey*, ancient and modern. Ancient works will include the satyr play *Cyclops* by Euripides and portrayals of a love-sick Cyclops in Theocritus and Ovid. In *True Story* Lucian calls Odysseus a liar but rivals his travel tale with episodes placed on the moon and inside a whale. Modern works include Atwood's *Penelopiad*, Walcott's stage version of the *Odyssey*, and the film "O Brother, Where Art Thou?" Themes will include travel literature, truth and lying, localization of the wanderings of Odysseus, culture clash, and the definition of home. All this material, various in date, media, and fidelity to their Homeric source, will provide us with a well-rounded sense of how the *Odyssey* has been re-imagined over the ages. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

CLA199H1 - The “Decline and Fall” of the Roman Empire

Hours: 24S

After a high water mark of territorial reach and economic success in the middle of the 2nd century CE, the Roman Empire eventually disintegrated. How? Why? When? In this course, we will consider some of the historical features that may have contributed to its political collapse, and we will consider some modern scholarly analyses from Edward Gibbon (late 18th century) to the present. But we will also investigate “decline and fall” as a narrative trope. Why is this story arc always with us? Who decides what qualifies as “decline”? Is the “fall” of some systems necessarily a bad thing? Among the topics to be considered in the context of the Later Roman Empire are several of relevance in the modern world, not least: climate change, disease, human migration, religious difference, and economic inequality. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

Classics

CLA160H1 - Introduction to Classical Studies

Hours: 36L/10T

An introduction to major themes in the development of Greek and Roman civilization, literature and culture.

Breadth Requirements: Creative and Cultural Representations (1)

CLA170H1 - Ancient Texts, Modern Worlds

Hours: 36L/10T

An introduction to Greek and Latin literature and culture which highlights the theoretical issues involved in the translation and reception of ancient texts. It introduces key works of literature, questions what it means to talk about an “original” text, asks what makes for an “accurate” translation, and sharpens awareness of linguistic issues even for students without Latin and Greek.

Breadth Requirements: Creative and Cultural Representations (1)

CLA201H1 - Latin & Greek in Scientific Terminology

Hours: 36L

The study of technical and scientific terms derived from Latin and Greek: word elements, formation, analysis. The course is designed to give students in any field of specialization a better grasp of the derivation and basic meaning of English words derived from Latin and Greek elements.

Breadth Requirements: Thought, Belief and Behaviour (2)

CLA203H1 - Science in Antiquity

Hours: 36L

The first scientific traditions in the classical Mediterranean and the Near East, with emphasis on Greek science. Discussions of early physical science, biology, mathematics, and astronomy, and their place in ancient life and thought, based on primary sources in translation. Designed for students in both the sciences and humanities.

Breadth Requirements: Thought, Belief and Behaviour (2)

CLA204H1 - Introduction to Classical Mythology

Hours: 36L

A survey of the myths and legends of ancient Greece (and their extension to Rome) with some consideration of their role in ancient and modern literature and art.

Breadth Requirements: Thought, Belief and Behaviour (2)

CLA208H1 - Socrates and His World

Hours: 36L

Already in antiquity, Socrates was viewed as a watershed in philosophical history, and a reference-point for everything that came after him. This course explores the evidence for his beliefs and methods and the context in which he lived and worked, and it introduces a lively circle of interlocutors and pupils going far beyond the most famous, Plato and Xenophon.

Breadth Requirements: Thought, Belief and Behaviour (2)

CLA209H1 - Magic, Religion, and Science

Hours: 36L

A study of the overlapping and contested categories of “magic”, “religion”, and “science” in ancient Greek and Roman thought and practice.

Breadth Requirements: Thought, Belief and Behaviour (2)

CLA210H1 - Greek and Roman Archaeology

Hours: 36L

A survey of the practices and theory of archaeology in the Classical Mediterranean, from the Greek Bronze Age through the Roman Empire. This course introduces students to the archaeological record of the Greco-Roman past, as well as the means by which we access it. Students will develop essential skills to recognize and analyze ancient material culture in preparation for upper level classes, or for fieldwork. No previous knowledge of the discipline is required.

Breadth Requirements: Society and its Institutions (3)

CLA215H1 - Classical Warfare

Hours: 36L

An introduction to the military history of ancient Greece and Rome from the 8th century BCE to the 7th century CE, with an emphasis on the political, social and economic implications of warfare and military institutions.

Breadth Requirements: Society and its Institutions (3)

CLA217H1 - Marginal Identities in the Ancient Mediterranean

Hours: 36L

An exploration of the groups and individuals who could be considered “marginal” in Greek and Roman antiquity. Includes discussion of ancient ideas about race, ethnicity,

social status, economic class, gender, sexuality, and disability.

Prerequisite: 4.0 credits

Breadth Requirements: Thought, Belief and Behaviour (2)

CLA219H1 - Women in Antiquity

Hours: 36L

A survey of the position of women in ancient Greece and Rome, with focus on women's sexuality and socialization; their economic, religious, and political roles; and their creative production in the arts.

Breadth Requirements: Society and its Institutions (3)

CLA222H1 - Sex, Death, and Poetry

Hours: 36L

A study of the themes of sex and death and the connection between them in the poetry of ancient Greece and Rome. Readings will be drawn from Greek and Roman lyric, epic, tragedy, and other genres.

Breadth Requirements: Creative and Cultural Representations (1)

CLA223H1 - Literature and Empire

Hours: 36L

A study of the relation between literature and empire in ancient Greece and Rome. The course covers a variety of genres and historical moments, examining how literature can support or challenge imperial power.

Breadth Requirements: Creative and Cultural Representations (1)

CLA224H1 - Letters from the Past

Hours: 36L

A study of letters and letter writing in Greek and Roman Antiquity. Students will be introduced to ancient theories of epistolography and a wide variety of texts, including letters by famous historical figures, philosophical letters, poetic letters, and fictional letters in prose.

Breadth Requirements: Creative and Cultural Representations (1)

CLA230H1 - Introduction to Greek History

Hours: 36L

A historical survey of the most significant features in the development of the civilization and states of ancient Greece from the Bronze Age to the second century B.C.E.

Breadth Requirements: Society and its Institutions (3)

CLA231H1 - Introduction to Roman History

Hours: 36L

A historical survey of the most significant features in the development of the civilization and state of ancient Rome from the mythical beginnings to the fourth century C.E.

Breadth Requirements: Society and its Institutions (3)

CLA236H1 - Greek and Roman Epic

Hours: 36L

A study of one or more of the epic poems of Greek and Roman antiquity (e. g. The *Iliad* and *Odyssey* of Homer and the *Aeneid* of Virgil).

Breadth Requirements: Creative and Cultural Representations (1)

CLA260H1 - Method and Theory in Classics

Hours: 36L

An introduction to key issues in methodology and theory in the study of the classical world.

CLA299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at

<https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

CLA299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

CLA303H1 - The Ancient Novel

Hours: 36S

An introduction to the Greek romances of love and adventure (Chariton, Longus, Heliodorus), and the more ironical and socially conscious works of the Roman writers Petronius and Apuleius.

Prerequisite: [CLA160H1](#)/ [CLA170H1](#), [CLA204H1](#)/ [CLA219H1](#)/ [CLA222H1](#)/ [CLA223H1](#)/ [CLA224H1](#)/ [CLA232H1](#)/ [CLA233H1](#)/ [CLA236H1](#)/ [CLA260H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CLA305H1 - Theories of Myth

Hours: 36S

A detailed study of the major modern approaches to the analysis and interpretation of myth with specific reference to their applications to ancient Graeco-Roman myth.

Prerequisite: [CLA204H1](#), [CLA160H1](#)/ [CLA170H1](#)/ [CLA260H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

CLA308H1 - Religion in the Greek World

Hours: 36S

A study of the religious cults and forms of worship in the ancient Greek world.

Prerequisite: [CLA160H1](#)/ [CLA170H1](#), [CLA204H1](#)/ [CLA208H1](#)/ [CLA209H1](#)/ [CLA210H1](#)/ [CLA222H1](#)/ [CLA223H1](#)/ [CLA224H1](#)/ [CLA230H1](#)/ [CLA232H1](#)

CLA236H1/ CLA260H1

Breadth Requirements: Thought, Belief and Behaviour (2)

CLA310H1 - Religion in the Roman World

Hours: 36S

A study of the religious cults and forms of worship in the Roman world, including the pagan cults, Judaism, and early Christianity.

Prerequisite: CLA160H1/ CLA170H1, CLA204H1/ CLA208H1/ CLA209H1/ CLA210H1/ CLA222H1/ CLA223H1/ CLA224H1/ CLA231H1/ CLA233H1/ CLA236H1/ CLA260H1

Breadth Requirements: Thought, Belief and Behaviour (2)

CLA312H1 - Persons and Passions

Hours: 36L

Ancient Greek and Roman thought about the emotions and the relationship that individuals have, or ought to have, with them. Primary sources in translation drawn from ancient literary, medical and philosophical texts.

Prerequisite: CLA160H1/ CLA170H1, CLA208H1/ CLA209H1/ CLA222H1/ CLA223H1/ CLA224H1/ CLA230H1/ CLA231H1/ CLA232H1/ CLA233H1/ CLA260H1/ PHL200Y1

Breadth Requirements: Creative and Cultural Representations (1)

CLA314H1 - Slavery in the Ancient Mediterranean World

Hours: 36S

A study of slavery and slave systems in ancient Greek and Roman societies.

Prerequisite: CLA160H1/ CLA170H1, CLA210H1/ CLA215H1/ CLA217H1/ CLA219H1/ CLA230H1/ CLA231H1/ CLA260H1

Breadth Requirements: Society and its Institutions (3)

CLA315H1 - Insider-Outsiders: Being Greek in the Roman Empire

Hours: 36L

This course looks at Greek culture in the Roman imperial context. Topics include the Second Sophistic; the creation of canons and the idea of the "Classics"; alterity; the rise of Christianity; cultural loss and nostalgia; the fiction of Greece as a site of cultural capital and prestige. Authors including Pausanias, Philostratus, Plutarch, Aristides, Galen, and Lucian are read in translation.

Prerequisite: CLA160H1/ CLA170H1, CLA222H1/ CLA223H1/ CLA224H1/ CLA230H1/ CLA231H1/ CLA232H1/ CLA233H1/ CLA260H1

Breadth Requirements: Creative and Cultural Representations (1)

CLA317H1 - Greek and Roman Colonialism

Hours: 36L

An exploration of the motivations and consequences of colonial movements and foundations throughout classical antiquity, and the role of race and ethnicity in ancient structures of colonial power. Includes consideration of their influence on later colonial and imperial projects and reactions to them.

Prerequisite: CLA160H1/ CLA170H1, CLA217H1/ CLA230H1/ CLA231H1/ CLA232H1/ CLA233H1/ CLA260H1

Breadth Requirements: Society and its Institutions (3)

CLA319H1 - Sexuality and Gender in Classical Literature

Hours: 36S

Detailed study of the representation of sexuality and gender in Greek and/or Roman literary texts from one or more genres.

Prerequisite: CLA160H1/ CLA170H1, CLA219H1/ CLA222H1/ CLA223H1/ CLA224H1/ CLA232H1/ CLA233H1/ CLA260H1

Breadth Requirements: Creative and Cultural Representations (1)

CLA321H1 - Sport and Festival

Hours: 36S

An examination of various aspects of athletic competition in the ancient Greco-Roman world, employing literary and archaeological evidence.

Prerequisite: [CLA160H1/ CLA170H1, CLA210H1/ CLA222H1/ CLA223H1/ CLA224H1/ CLA230H1/ CLA231H1/ CLA232H1/ CLA233H1/ CLA236H1/ CLA260H1](#)

Breadth Requirements: Society and its Institutions (3)

CLA322H1 - Classical Reception

Hours: 36S

Modern reception of the classical world in a variety of media, such as art, literature, music, popular culture, etc.

Prerequisite: [CLA160H1/ CLA170H1, CLA204H1/ CLA219H1/ CLA222H1/ CLA223H1/ CLA224H1/ CLA230H1/ CLA231H1/ CLA232H1/ CLA233H1/ CLA236H1/ CLA260H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CLA323H1 - Ancient Philosophy and Literature

Hours: 36S

A study of some of the ways in which ancient Greek and Roman philosophy was itself a literary endeavour, and its relations to other kinds of ancient literature.

Prerequisite: [CLA160H1/ CLA170H1, CLA203H1/ CLA204H1/ CLA208H1/ CLA222H1/ CLA223H1/ CLA224H1/ CLA232H1/ CLA233H1/ CLA236H1/ CLA260H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CLA336H1 - Law in Ancient Greek and Roman Society

Hours: 36S

A study of legal sources and systems in ancient Greek and/or Roman states with particular attention to social and historical context.

Prerequisite: [CLA160H1/ CLA170H1, CLA210H1/ CLA215H1/ CLA219H1/ CLA230H1/ CLA231H1/ CLA260H1](#)

Breadth Requirements: Society and its Institutions (3)

CLA362H1 - Early Greece

Hours: 36S

The Greek world from the second millennium B.C.E. to the emergence of the *polis*

Prerequisite: [CLA160H1/ CLA170H1, CLA210H1/ CLA230H1/ CLA260H1](#)

Breadth Requirements: Society and its Institutions (3)

CLA363H1 - Archaic and Classical Greece

Hours: 36S

The Greek world from the eighth to the fourth centuries B.C.E., with an emphasis on political events and development.

Prerequisite: [CLA160H1/ CLA170H1, CLA210H1/ CLA230H1/ CLA260H1](#)

Breadth Requirements: Society and its Institutions (3)

CLA364H1 - The Hellenistic World

Hours: 36S

The Greek world in the age of Alexander the Great and his successors (336 B.C.E. to 31 B.C.E.)

Prerequisite: [CLA160H1/ CLA170H1, CLA210H1/ CLA230H1/ CLA260H1](#)

Breadth Requirements: Society and its Institutions (3)

CLA367H1 - The Roman Republic

Hours: 36S

The Roman world from 510 B.C.E. to 44 B.C.E.

Prerequisite: [CLA160H1/ CLA170H1, CLA210H1/ CLA231H1/ CLA260H1](#)

Breadth Requirements: Society and its Institutions (3)

CLA368H1 - Augustus and the Julio-Claudians

Hours: 36S

The Roman world in the age of Augustus and his dynasty (44 B.C.E. to 68 C.E.)

Prerequisite: [CLA160H1/ CLA170H1, CLA210H1/ CLA231H1/ CLA260H1](#)

Breadth Requirements: Society and its Institutions (3)

CLA369H1 - The Roman Empire

Hours: 36S

The Roman world from 68 C.E. to 378 C.E.

Prerequisite: [CLA160H1/ CLA170H1, CLA210H1/ CLA231H1/ CLA260H1](#)

Breadth Requirements: Society and its Institutions (3)

CLA372H1 - The Economic History of the Classical World

Hours: 36S

The structure and performance of economies in the Greek and/or Roman worlds, and their modern interpretation.

Prerequisite: [CLA160H1/ CLA170H1, CLA210H1/ CLA230H1/ CLA231H1/ CLA260H1](#)

Breadth Requirements: Society and its Institutions (3)

CLA373H1 - The Environment in the Greco-Roman World

Hours: 36S

An exploration of the ecology and environment of the ancient Mediterranean basin in classical antiquity.

Prerequisite: [CLA160H1/ CLA170H1, CLA210H1/ CLA230H1/ CLA231H1/ CLA260H1](#)

Breadth Requirements: Living Things and Their Environment (4)

CLA378H1 - Late Antiquity

Hours: 36S

The history and culture of the Greco-Roman world during the fourth through seventh centuries C.E., with particular emphasis on the decline of the Roman state and emergence of Christianity.

Prerequisite: [CLA160H1/ CLA170H1, CLA210H1/ CLA231H1/ CLA260H1](#)

Breadth Requirements: Society and its Institutions (3)

CLA382H1 - Tragedy

Hours: 36S

The study of classical tragedy as a literary genre, dramatic production, and social institution, with analysis of representative plays.

Prerequisite: [CLA160H1/ CLA170H1, CLA204H1/ CLA219H1/ CLA222H1/ CLA223H1/ CLA224H1/ CLA230H1/ CLA232H1/ CLA236H1/ CLA260H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CLA383H1 - Comedy

Hours: 36S

The origin and development of Greek and Roman comedy, based on a study of representative plays.

Prerequisite: [CLA160H1/ CLA170H1, CLA219H1/ CLA222H1/ CLA223H1/ CLA224H1/ CLA230H1/ CLA231H1/ CLA232H1/ CLA233H1/ CLA236H1/ CLA260H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CLA387H1 - Spectacle in the Roman World

Hours: 36S

The role in Roman society and culture of public spectacles, including the chariot-races, the gladiatorial games, executions, and triumphal processions.

Prerequisite: [CLA160H1/ CLA170H1, CLA231H1/ CLA233H1/ CLA260H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CLA388H1 - Classical Antiquity and the Cinema

Hours: 36S

A study of the representation of ancient Greece and/ or Rome in cinema.

Prerequisite: [CLA160H1/ CLA170H1, \(CLA219H1/ CLA222H1/ CLA223H1/ CLA224H1/ CLA232H1/ CLA233H1/ CLA260H1\)/ CIN105Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

CLA389H1 - Classical Spaces: Sites and Monuments

Hours: 36S

A close study of one or more sites in the ancient world and the cultural significance of the site(s) in question.

Prerequisite: CLA160H1/ CLA170H1, CLA210H1/ CLA230H1/ CLA231H1/ CLA260H1

Breadth Requirements: Creative and Cultural Representations (1)

CLA392H1 - Topics in the study of Classical Culture and Society

Hours: 36S

Topics vary from year to year.

Prerequisite: CLA160H1, (CLA210H1/ CLA219H1/ CLA230H1/ CLA231H1/ CLA232H1/ CLA233H1/ CLA260H1)

Breadth Requirements: Creative and Cultural Representations (1)

CLA398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

CLA398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

CLA399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

CLA399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

CLA400H1 - Independent Studies

Previous Course Number: CLA400Y1

Independent Studies. Not eligible for CR/NCR option.

Prerequisite: Permission of Department

Exclusion: CLA400Y1

Recommended Preparation: Preferably 1.0 CLA credit at the 300-level

CLA401H1 - Independent Studies

Independent Studies. Not eligible for CR/NCR option.

Prerequisite: Permission of Department

Recommended Preparation: Preferably 1.0 CLA credit at the 300-level

CLA402H1 - Advanced Seminar in Greek Civilization

Hours: 36S

An advanced research seminar devoted to critical issues relating to Greek civilization. Course requirements include a research essay. Topics vary from year to year.

Prerequisite: 14.0 credits, including 1.0 CLA credit at the 300-level

Exclusion: CLA403H1

CLA403H1 - Advanced Seminar in Roman Civilization

Hours: 36S

An advanced research seminar devoted to critical issues relating to Roman civilization. Course requirements include a research essay. Topics vary from year to year.

Prerequisite: 14.0 credits, including 1.0 CLA credit at the 300-level

Exclusion: CLA402H1

Greek

GRK101H1 - Introductory Ancient Greek I

Previous Course Number: GRK100Y1

Hours: 48S

An intensive introduction to Ancient Greek for students who have no knowledge of the language; preparation for the reading of Ancient Greek literature.

Exclusion: GRK100Y1. Students who have studied Ancient Greek previously must obtain permission from the Undergraduate Coordinator before enrolling.

Breadth Requirements: Creative and Cultural Representations (1)

GRK102H1 - Introductory Ancient Greek II

Hours: 48S

A continuation of the intensive introduction to Ancient Greek in GRK 101H1. Also appropriate for students who have some training in Ancient Greek, but have not completed a whole credit course at University or a final-year (Grade 12) course in secondary school.

Prerequisite: GRK101H1/some background in Ancient Greek

Exclusion: GRK100Y1

Breadth Requirements: Creative and Cultural Representations (1)

GRK201H1 - Intermediate Ancient Greek I

Hours: 48S

Reading of selections of Ancient Greek prose works with systematic language study.

Prerequisite: GRK100Y1/ GRK102H1. Grade 12 in Ancient Greek may be accepted, but students should consult the Undergraduate Coordinator before enrolling.

Breadth Requirements: Creative and Cultural Representations (1)

GRK202H1 - Intermediate Ancient Greek II

Hours: 48S

Continued language training with readings in Ancient Greek prose and verse.

Prerequisite: GRK201H1

Breadth Requirements: Creative and Cultural Representations (1)

GRK340H1 - Greek Philosophy I

Hours: 36S

Readings from one or more philosophical texts.

Prerequisite: GRK202H1

Breadth Requirements: Creative and Cultural Representations (1)

GRK341H1 - Greek Historians I

Hours: 36S

Readings from one or more Greek Historians.

Prerequisite: GRK202H1

Breadth Requirements: Creative and Cultural Representations (1)

GRK343H1 - Greek Prose Authors I

Hours: 36S

Readings from Greek prose authors (e.g., biography, novels, essays, texts in *koine*).

Prerequisite: GRK202H1

Breadth Requirements: Creative and Cultural Representations (1)

GRK350H1 - Greek Epic I

Hours: 36S

Readings from Greek epics, including Homer.

Prerequisite: GRK202H1

Breadth Requirements: Creative and Cultural Representations (1)

GRK351H1 - Greek Drama I

Hours: 36S

Readings from Greek tragedy and/or comedy.

Prerequisite: GRK202H1

Breadth Requirements: Creative and Cultural Representations (1)

GRK353H1 - Greek Verse Authors I

Hours: 36S

Readings from Greek verse (e.g., elegy, iambics, lyric).

Prerequisite: GRK202H1

Breadth Requirements: Creative and Cultural Representations (1)

GRK354H1 - Greek of Classical Athens I

Hours: 36S

Readings from one or more Greek texts, in prose or poetry, from Athens of the 5th-4th centuries BCE.

Prerequisite: GRK202H1

Breadth Requirements: Creative and Cultural Representations (1)

GRK355H1 - Post-Classical Greek I

Hours: 36S

Readings from one or more Greek texts, in prose or poetry, from the Hellenistic and/or Roman Period.

Prerequisite: GRK202H1

Breadth Requirements: Creative and Cultural Representations (1)

GRK428H1 - Independent Studies

Previous Course Number: GRK428Y1

Independent Studies. Not eligible for CR/NCR option.

Prerequisite: Permission of Department

Exclusion: GRK428Y1

Recommended Preparation: Usually 1.0 credit from 300-level GRK courses

Breadth Requirements: Creative and Cultural Representations (1)

GRK429H1 - Independent Studies

Independent Studies. Not eligible for CR/NCR option.

Prerequisite: Permission of Department

Recommended Preparation: Usually 1.0 credit from 300-level GRK courses

Breadth Requirements: Creative and Cultural Representations (1)

GRK440H1 - Greek Philosophy II

Hours: 48S

Advanced readings from one or more philosophical texts.

Prerequisite: 1.0 GRK credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

GRK441H1 - Greek Historians II

Hours: 48S

Advanced readings from one or more Greek historians.

Prerequisite: 1.0 GRK credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

GRK443H1 - Greek Prose Authors II

Hours: 48S

Advanced readings from Greek prose authors (e.g., biography, novels, essays, texts in *koine*).

Prerequisite: 1.0 GRK credit at the 300-level
Breadth Requirements: Creative and Cultural Representations (1)

GRK450H1 - Greek Epic II

Hours: 48S

Advanced readings from Greek epics, including Homer.

Prerequisite: 1.0 GRK credit at the 300-level
Breadth Requirements: Creative and Cultural Representations (1)

GRK451H1 - Greek Drama II

Hours: 48S

Advanced readings from Greek tragedy and/or comedy.

Prerequisite: 1.0 GRK credit at the 300-level
Breadth Requirements: Creative and Cultural Representations (1)

GRK453H1 - Greek Verse Authors II

Hours: 48S

Advanced readings from Greek verse (e.g., elegy, iambic, lyric).

Prerequisite: 1.0 GRK credit at the 300-level
Breadth Requirements: Creative and Cultural Representations (1)

GRK454H1 - Greek of Classical Athens II

Hours: 48S

Advanced readings from one or more Greek texts, in prose or poetry, from Athens of the 5th-4th centuries BCE.

Prerequisite: 1.0 GRK credit at the 300-level
Breadth Requirements: Creative and Cultural Representations (1)

GRK455H1 - Post-Classical Greek II

Hours: 48S

Advanced readings from one or more Greek texts, in prose or poetry, from the Hellenistic and/or Roman Period.

Prerequisite: 1.0 GRK credit at the 300-level
Breadth Requirements: Creative and Cultural Representations (1)

Latin

LAT101H1 - Introductory Latin I

Previous Course Number: LAT100Y1
Hours: 48S

An intensive introduction to Latin for students who have no knowledge of the language; preparation for the reading of Latin literature.

Exclusion: LAT100Y1. Students who have studied Latin previously must obtain permission from the Undergraduate Coordinator before enrolling.
Breadth Requirements: Creative and Cultural Representations (1)

LAT102H1 - Introductory Latin II

Hours: 48S

A continuation of the intensive introduction to Latin in LAT 101H1. Also appropriate for students who have some training in Latin, but have not completed a whole credit course at University or a final-year (Grade 12) course in secondary school.

Prerequisite: LAT101H1/some background in Latin
Exclusion: LAT100Y1
Breadth Requirements: Creative and Cultural Representations (1)

LAT201H1 - Intermediate Latin I

Hours: 48S

Reading of selections of Latin prose works with systematic language study.

Prerequisite: LAT100Y1/LAT102H1. Grade 12 in Latin may be accepted, but students should consult the Undergraduate Coordinator before enrolling.
Breadth Requirements: Creative and Cultural Representations (1)

LAT202H1 - Intermediate Latin II

Hours: 48S

Continued language training with readings in Latin prose and verse.

Prerequisite: LAT201H1

Breadth Requirements: Creative and Cultural Representations (1)

LAT341H1 - Latin Historians I

Hours: 36S

Readings from one or more Latin historians.

Prerequisite: LAT202H1

Breadth Requirements: Creative and Cultural Representations (1)

LAT342H1 - Latin Orators I

Hours: 36S

Readings from Latin orators, including Cicero.

Prerequisite: LAT202H1

Breadth Requirements: Creative and Cultural Representations (1)

LAT343H1 - Latin Prose Authors I

Hours: 36S

Readings from Latin prose authors (e. g. biography, letters, philosophy).

Prerequisite: LAT202H1

Breadth Requirements: Creative and Cultural Representations (1)

LAT350H1 - Latin Epic I

Hours: 36S

Readings from one or more Latin epics, including Virgil.

Prerequisite: LAT202H1

Breadth Requirements: Creative and Cultural Representations (1)

LAT351H1 - Latin Drama I

Hours: 36S

Readings from Latin comedy and/or tragedy.

Prerequisite: LAT202H1

Breadth Requirements: Creative and Cultural Representations (1)

LAT353H1 - Latin Verse Authors I

Hours: 36S

Readings from Latin verse (e. g. elegy, lyric, bucolic).

Prerequisite: LAT202H1

Breadth Requirements: Creative and Cultural Representations (1)

LAT354H1 - Latin of the Roman Republic I

Hours: 36S

Readings from one or more Latin texts, in prose or poetry, from the Roman Republican Period.

Prerequisite: LAT202H1

Breadth Requirements: Creative and Cultural Representations (1)

LAT355H1 - Latin of the Roman Empire I

Hours: 36S

Readings from one or more Latin texts, in prose or poetry, from the period between the late 1st century BCE and late antiquity.

Prerequisite: LAT202H1

Breadth Requirements: Creative and Cultural Representations (1)

LAT428H1 - Independent Studies

Previous Course Number: LAT428Y1

Independent Studies. Not eligible for CR/NCR option.

Prerequisite: Permission of Department

Exclusion: LAT428Y1

Recommended Preparation: Usually 1.0 credit from 300-level LAT courses

Breadth Requirements: Creative and Cultural Representations (1)

LAT429H1 - Independent Studies

Independent Studies. Not eligible for CR/NCR option.

Prerequisite: Permission of Department

Recommended Preparation: Usually 1.0 credit from 300-level LAT courses

Breadth Requirements: Creative and Cultural Representations (1)

LAT441H1 - Latin Historians II

Hours: 48S

Advanced readings from one or more Latin historians.

Prerequisite: 1.0 LAT credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

LAT442H1 - Latin Orators II

Hours: 48S

Advanced readings from Latin orators, including Cicero.

Prerequisite: 1.0 LAT credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

LAT443H1 - Latin Prose Authors II

Hours: 48S

Advanced readings from Latin prose authors (e. g. biography, letters, philosophy).

Prerequisite: 1.0 LAT credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

LAT450H1 - Latin Epic II

Hours: 48S

Advanced readings from one or more Latin epics, including Virgil.

Prerequisite: 1.0 LAT credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

LAT451H1 - Latin Drama II

Hours: 48S

Advanced readings from Latin comedy and/or tragedy.

Prerequisite: 1.0 LAT credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

LAT453H1 - Latin Verse Authors II

Hours: 48S

Advanced readings from Latin verse (e. g. elegy, lyric, bucolic).

Prerequisite: 1.0 LAT credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

LAT454H1 - Latin of the Roman Republic II

Hours: 48S

Advanced readings from one or more Latin texts, in prose or poetry, from the Roman Republican Period.

Prerequisite:

1.0 LAT credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

LAT455H1 - Latin of the Roman Empire II

Hours: 48S

Advanced readings from one or more Latin texts, in prose or poetry, from the period between the late 1st century BCE and late antiquity.

Prerequisite: 1.0 LAT credit at the 300-level

Breadth Requirements: Creative and Cultural Representations (1)

Combined Degree Programs

Combined Degree Program (CDP) in HBA/HBSc and Master of Teaching (MT) (Victoria College and OISE)

The Combined Degree Program in HBA/HBSc and Master of Teaching (MT) is designed for students interested in studying the intersections of teaching subjects and Education, coupled with professional teacher preparation. Students earn an Honours Bachelor's degree from the Faculty of Arts and Science (St. George) and an accredited professional Master of Teaching (MT) degree from the Ontario Institute for Studies in Education (OISE). The CDP permits the completion of both degrees in six years with 1.0 credit that may be counted towards both the undergraduate and graduate degrees. There are 5 distinct Combined Degree Programs:

- Honours Bachelor of Arts, Major in English/Master of Teaching
- Honours Bachelor of Arts, Major in History/Master of Teaching
- Honours Bachelor of Science, Major in Mathematics/Master of Teaching
- Honours Bachelor of Science, Major in Psychology/Master of Teaching
- Honours Bachelor of Arts, Major in Sociology/Master of Teaching

Enquiries: vic.academics@utoronto.ca; 416-585-4441

Admission Requirements:

Applicants apply successively to the H.B.A./H.B.Sc. program, the MT program, and the CDP. See the department/college sections for admission requirements in the relevant Major and Minor programs.

In the Spring term of Year 3 of the Bachelor program, students apply at OISE for **conditional admission to the MT. To be considered for conditional admission to the Master of Teaching and the Combined Degree Program**, students must meet the following admission requirements:

- Have completed or be on course to complete the Minor in Education and Society (Victoria College)

- Be registered in the 3rd year of the H.B.Sc. or H.B.A. Degree Program, in one of the above listed major programs.
- Have completed at least half of the teaching subjects' prerequisite courses (i.e. 3.0 credits in 1st teaching subject, and 1.5 credits in 2nd teaching subject) by the end of third year.
- Have an average grade equivalent of at least B+, normally demonstrated by an average grade in the 2nd year.
- Provide at least two letters of reference.
- In their Statement of Intent, applicants should indicate their preferred concentration (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children.
- Meet other qualifications as specified by the MT program.

See: <https://www.oise.utoronto.ca/ctl/masters-degrees/master-teaching>

Once students have accepted a conditional offer of admission to the MT program, they will be eligible to take 1.0 credit at the graduate level at OISE in their fourth year, which will count towards both the undergraduate degree and the Master of Teaching degree.

If the student does not meet the above conditions, the offer of conditional admission to the Combined Degree Program will be rescinded. Students in this position could apply separately to the Master of Teaching outside of the Combined Degree Program.

For students to be given **full, unconditional admission to the MT program**, they must:

- Maintain at least a B+ (3.3) average in their final year or over senior courses.
- Achieve a grade of at least B+ average in the 1.0 graduate FCE taken in Year 4.
- Have completed required courses to meet the first and second teaching subjects.
- Successfully complete the requirements for the H.B.Sc./H.B.A. program.
- Have the undergraduate degree confirmed.

Completion Requirements:

Note: at the undergraduate level, a "credit" is equal to the graduate-level "full-course equivalent (FCE)."

1. Minor in Education and Society, Victoria College
2. Major in one of the following areas, corresponding to the first teaching subject:
 - English
 - History
 - Mathematics

- [Psychology](#)
- [Sociology](#)

3. Minor in an area corresponding to the second teaching subject as determined by OISE. See the teaching subject prerequisites for [Junior/Intermediate](#) and [Intermediate/Senior](#) teaching.

Academic Path to Completion for the CDP

Year 1-4:

- H.B.Sc./H.B.A. program and degree requirements

Year 4:

- 1.0 credit (FCE) in the MT graduate courses

Year 5-6:

- 9 credits (FCEs) of the MT program requirements

Combined Degree Program (CDP) in Education and Society, HBA/HBSc and Master of Arts, Child Study and Education (MA-CSE) (Victoria College and OISE)

The Combined Degree Program (CDP): STG, Honours Bachelor of Arts, Minor in Education and Society / Child Study and Education, Master of Arts is designed for students interested in studying the intersections of child study, education, and human development, coupled with professional teacher preparation.

The CDP permits the completion of both degrees in six years with 1.0 FCE of graduate courses that may be counted towards both the undergraduate and graduate degree. Students admitted to the CDP will follow the academic path to completion outlined below.

For a general description of CDPs, see [General Regulations section 1.4.3 in the School of Graduate Studies Calendar](#).

Vanessa Dane, Program Coordinator, Child Study & Education MA Program (MA CSE), Dr. Eric Jackman Institute of Child Study

Email: vanessa.dane@utoronto.ca

Admission Requirements:

Application Process

- Applicants must apply to the Honours Bachelor of Arts (HBA) or Honours Bachelor of Science (HBSc) program, the MA in Child Study and Education (CSE) program, and the CDP
- Applicants must be in registered the HBA/HBSc program before they may be considered for admission to the CDP and MA-CSE.
- To be considered for conditional admission to the MA-CSE and the CDP, students must meet the qualifications as specified by the MA-CSE program (i.e., experience working with children, submission of a statement of intent and resumé/CV), and the following requirements:
 - Be enrolled in the Education and Society Minor Program at Victoria College.
 - Be registered in Year 3 of the HBA/HBSc degree program.
 - Have completed — or in progress to complete — VIC360H/Y Education Internship, taking place in a setting involving young children.
 - Have an average grade equivalent of at least A- (3.7) or better, normally demonstrated by an average grade in Year 2 courses.
 - Provide two letters of reference (one professional, one academic).
- To be given full, unconditional admission to the MA-CSE program, students must meet the following requirements:
 - Maintain at least an A- (3.7) average in their final year or over senior (Year 3 & 4) courses;
 - Achieve a grade of at least B+ average in the 1.0 FCE graduate course taken in Year 4;
 - Successfully complete the requirements for the HBA/HBSc program with the Minor in Education and Society and have the degree confirmed.

Minimum Admission Requirements

- Applicants must meet the admission requirements of the HBA program, the School of Graduate Studies, and the MA-CSE program.

Completion Requirements:

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year. Note: at the undergraduate level, a “credit” is equal to the graduate-level “full-course equivalent (FCE).”

Year 1-4

Progression

- HBA/ HBSc degree requirements:
 - Undergraduate courses in accordance with Faculty of Arts & Science regulations for the Education and Society Minor and degree requirements at the Faculty of Arts and Science (FAS).

Specific Requirements

- Students are expected to carry a full course load of 5.0 credits over the three academic sessions (Fall, Winter, Summer) of each year;
- In the Fall Session, students registered in Year 3 express interest in the CDP to the Victoria College Registrar's Office, which advises applicants on the process in collaboration with the OISE Office of the Registrar and Student Services. Successful applicants receive conditional acceptance to the CDP, MA.
- In Year 4, students who receive a conditional offer of admission to the CDP must complete 1.0 credit in MA-CSE elective courses in consultation with the MA-CSE program Chair. This will be counted as one credit toward the overall requirements of the HBA or HBSc and MA-CSE requirements. This 1.0 credit is chosen from among master's-level courses in the Department of Applied Psychology and Human Development (APHD). Elective courses that are especially recommended for Child Study and Education Students are listed in the APHD program guidelines.
- By the end of Year 4, students must complete all HBA/ HBSc program requirements and degree requirements, including 1.0 credit of graduate courses.

- To be given full, unconditional admission to the MA-CSE, students must maintain at least an A- (3.7) average in their final year or over senior (Year 3 & 4) courses; achieve a grade of at least B+ average in the 1.0 credit graduate course taken in Year 4; successfully complete the requirements for the Minor in Education and Society, and HBSc/HBA program and have the degree confirmed.

Year 5-6

Progression

- Remaining graduate courses in accordance with the U of T regulations for the MA-CSE program.

Specific Requirements

- 10.0 credits in MA-CSE program requirements. See the Child Study and Education calendar entry for full course requirements.
- Note that students will have previously completed the 1.0 credit in electives in Year 4 of the undergraduate program.

Introduction

What is Computer Science?

Despite the name, Computer Science is not really a science of computers at all. Computers are quite remarkable electronic devices, but even more remarkable is what they can be made to do: simulate the flow of air over a wing, manage communication over the Internet, control the actions of a robot, synthesize realistic images, play grandmaster-level chess, learn how to automatically translate between languages, and on and on. Indeed, the application of computers in activities like these has affected most areas of modern life. What these tasks have in common has little to do with the physics or electronics of computers; what matters is that they can be formulated as some sort of computation. This is the real subject matter of Computer Science: computation, and what can or cannot be done computationally.

In trying to make sense of what we can get a computer to do, a wide variety of topics come up. There are, however, two recurring themes. The first is the issue of scale: how big a system can we specify without getting lost in the design, or how big a task can a computer handle within reasonable bounds of time, memory, and accuracy? A large part of Computer Science deals with these questions in one form or another. In the area of programming languages and methodology, for example, we look for notations for describing computations, and programming methodologies that facilitate the production of manageable and efficient software. In the theory of computation area, we study resource requirements in time and memory of many basic computational tasks.

The second theme concerns the scope of computation. Computers were originally conceived as purely numerical calculators, but today, we tend to view them much more broadly. Part of Computer Science is concerned with understanding just how far computational ideas can be applied. In the area of artificial intelligence, for example, we ask how the function of the human brain can be expressed in computational terms. In the area of human-computer interaction, we ask what sorts of normal day-to-day activities of people might be supported and augmented using computers.

Computer Science Programs

Current students registered in the Faculty of Arts & Science interested in Computer Science (CS) can pursue the following programs:

- CS Major (ASMAJ1689)
- CS Minor (ASMIN1689)

In addition to the programs listed above, current students in the first-year Computer Science admission category (CMP1) may also apply to:

- CS Specialist (ASSPE1689)

A **Minor** in Computer Science provides an introduction to theoretical and applied computer science as a complement to your studies in other disciplines, and allows you to take up to 1.5 credits in 300+ level computer science courses.

A **Major** in Computer Science builds on the content of the Minor, preparing you for upper-year computer science study with options to explore a few topics more deeply. Students enrolled in the Computer Science Major can integrate their studies with another discipline.

A **Specialist** in Computer Science goes beyond the Major, providing a broad and deep foundation to computer science, and exposes you to a broad range of upper-year computer science topics.

Students enrolled in the CS Major or CS Specialist may choose to complete one or more **Focuses** in a particular area of computer science, such as: Artificial Intelligence, Human-Computer Interaction, or the Theory of Computation, among others. See below for a full list of focuses and their respective course requirements.

Data Science Programs

All Arts & Science students may apply to the following data science programs, which are jointly offered by the Departments of Computer Science and Statistical Sciences:

- Data Science Specialist (ASSPE1687)
- Applied Data Science Minor (ASMIN0160)

Students enrolled in the Data Science Specialist may choose to complete a Focus in a particular area related to data science: Technology Leadership or Quantitative Finance.

Applying to Computer Science Programs

For enrolment requirements please refer to the individual program requirements. There are separate admission requirements and introductory courses for students currently in the first-year Computer Science admission category (CMP1) and other Arts & Science students. More information, including information about the supplemental

application form, is available on the Department of Computer Science website at:
<https://web.cs.toronto.edu/undergraduate/how-to-apply>.

Note: Only grades from [CSC148H1](#) and [CSC165H1/](#)[CSC240H1](#) (completed on the St. George campus, not UTM or UTSC) will be accepted for purposes of application to the Computer Science Specialist, Major and Minor and the Data Science Specialist.

Arts & Science Internship Program (ASIP)

The [Arts & Science Internship Program](#) (ASIP) stream is available to students who are entering Year 2 or Year 3 of study and enrolled in the Data Science Specialist, Computer Science Specialist, or Computer Science Major.

- Enrolment is limited and requires a supplemental application. Students enrolled in the ASIP stream will be required to complete mandatory Professional Development programming plus a minimum of 12 and maximum of 20 months (Year 2 entry) or a minimum of 12 and maximum of 16 months (Year 3 entry) of paid, full-time work experience. The time to degree completion for students enrolled in ASIP will normally be 5 years. There is an additional cost to participate in the ASIP stream.
- Students will typically be admitted to the ASIP stream for the Fall term of Year 2 of study, however in exceptional circumstances students, including transfer students, who enrolled in an eligible program in the Summer after Year 2 can be admitted to the ASIP stream for the Fall of Year 3. Acceptance into an ASIP stream in Year 3 is dependent on space and requires approval of the student's academic unit and the Faculty of Arts & Science Experiential Learning & Outreach Support (ELOS) Office. Please refer to the [ASIP eligibility page](#) for further details.
- Further details about ASIP, including eligibility requirements and application procedures, can be found [here](#). Students may also visit the [ASIP webpage](#) or contact the ELOS office at asip@utoronto.ca.

Contact Information

The Department of Computer Science is committed to providing academic support to our students throughout the duration of their undergraduate studies. Our undergraduate program office can provide all students interested in studying computer science with advice on

course selection, program admission, research and experiential learning opportunities, and ways to get involved in the CS community.

Contact us by email at cs.undergrad@utoronto.ca, or visit our office during our drop-in advising hours. For current advising times, please visit <https://web.cs.toronto.edu/contact-us>.

The Department of Computer Science is located in the Bahen Building, Room 4207, 40 St. George Street. Email: cs.undergrad@utoronto.ca. Website: <https://web.cs.toronto.edu>.

Note: Students may obtain course and program support for the [Applied Data Science Minor](#) by visiting the Department of Statistical Sciences at 700 University Avenue, 9th Floor, Ontario Power Building or by emailing ug.statistics@utoronto.ca.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Computer Science programs impacted by this policy: [ASSPE1689](#), [ASMAJ1689](#), and [ASMIN1689](#)

Computer Science Programs

Applied Data Science Minor (Science Program) - ASMIN0160

More than at any other time in our history, we are living through a paradigm shift in how we think about data. Advances in computing power, algorithms for data modeling and machine learning, coupled with unparalleled access to vast quantities of data has transformed disciplines across the sciences, social sciences, and humanities. The Minor in Applied Data Science will help students learn fundamental data science methodologies drawn from computing and statistics and provide opportunities to apply these methodologies to datasets, problem domains, and explorations in many disciplines of study in Arts & Science. Understanding the human and ethical contexts and communicating results of data science methodologies will appear in courses throughout the program.

The minor is designed to complement programs in other areas with opportunities for data science applications (see

program requirements for pertinent programs). This program is designed to be accessible to students who have never done any computer programming or statistics before, or who haven't taken high school or university calculus. All skills necessary to succeed in the program are taught in our courses. Most students who are interested in this program should start by choosing one of our three introductory, interdisciplinary data science courses: EEB125H1, GGR274H1, or ENG286H1, which introduce data science skills such as computer programming, statistical reasoning, and data visualization within the context of a particular discipline. Students then proceed to take a suite of key computer science and statistics courses that reinforce and extend these skills, with an emphasis on applications to real-world problems. Finally, in later years students will choose from a wide variety of courses drawn from across the Faculty of Arts & Science. These upper-year courses will provide the opportunity to discuss and analyze the human contexts of data science, and to apply data science methodologies in discipline-specific contexts.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum may change each year depending on available spaces and the number of applicants. Eligibility is based on the following criteria:

- A. Completion of one of EEB125H1/ ENG286H1/ GGR274H1/ ESS245H1/ STA130H1 with a grade of at least 60%, OR
- B. Completion of one of CSC108H1/ CSC110Y1/ CSC148H1 with a grade of at least 60%, OR
- C. Completion of one of ECO220Y1/ EEB225H1/ GGR270H1/ IRW220H1/ PSY201H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA261H1/ STA288H1 with a grade of at least 60%.

Obtaining this minimum grade does not guarantee admission to the program. If students have completed more than one of the above courses at the time of admission, the minimum grade will be based on the higher course grade.

Notes:

1. Requests for admission will be considered in the first program request period only.
2. Students enrolled in this program cannot be simultaneously enrolled in or complete any Computer Science, Statistics, or Actuarial Science programs, including the Computer Science Minor, Statistics Minor, and Data Science Specialist; nor any Mathematics Major or Specialist program; nor the Focus in Data Analytics within the Economics

Major or Specialist; nor the Focus in Data Science in Business within the Rotman Commerce specialist programs.

Completion Requirements:

(4.0 credits)

1. EEB125H1/ ENG286H1/ GGR274H1/ ESS245H1/ STA130H1
2. 0.5 credit from CSC108H1/ CSC110Y1/ CSC148H1
3. 0.5 credit from ECO220Y1/ EEB225H1/ GGR270H1/ IRW220H1/ PSY201H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA261H1/ STA288H1/ POL222H1

Note: If you completed STA238H1, STA248H1, and/or STA261H1 before being admitted to the Minor, please note that these courses are exclusions to EEB125H1, ENG286H1, GGR274H1, and STA130H1. You can complete ESS245H1 to meet requirement 1 or can instead complete an additional 0.5 credit from the list of courses in requirement 7, for a total of 1.5 credits for requirement 7.

If you completed CSC148H1 before being admitted to the Minor, please note that this course is an exclusion to EEB125H1, ENG286H1, and GGR274H1. You can complete ESS245H1 or STA130H1 to meet requirement 1 or can instead complete an additional 0.5 credit from the list of courses in requirement 7, for a total of 1.5 credits for requirement 7.

4. CSC271H1 (first offering in 2025-26)
5. STA272H1 (first offering in 2025-26)
6. PHL277H1/ PHL377H1/ HPS246H1/ CSC300H1

7. At least 1.0 credit from the following courses:
BCB410H1/ BCB420H1/ CHM326H1/ CHM328H1/ CSB352H1/ CSB435H1/ CSB434H1/ CSB471H1/ CSB472H1/ DHU338H1/ EEB313H1/ EEB319H1/ EEB365H1/ EEB458H1/ EEB460H1/ EEB463H1/ ENV338H1/ ESS452H1/ GGR315H1/ GGR372H1/ GGR373H1/ GGR375H1/ GGR376H1/ GGR377H1/ GGR415H1/ GGR462H1/ GGR472H1/ GGR473H1/ IMM360H1/ IRE379H1/ JFL484H1/ JGA305H1/ JPM400Y1/ LIN305H1/ LIN405H1/ LIN456H1/ MGY441H1/ POL314H1/ POL352H1/ POL332H1/ POL483H1/ PCL367H1/ PCL368H1/ PSL432H1/ PSY305H1/ PSY319H1/ PSY329H1/ PSY339H1/ PSY349H1/ PSY359H1/ PSY369H1/ PSY379H1/ SOC303H1/ 0.5 or 1.0 credits from a 300-/400-level capstone, topics, or independent study course(s) in which students apply data science methodologies, and with prior approval of the Applied Data Science Minor Program Director

Courses listed in requirement 7 are offered by academic units across the Faculty of Arts & Science. Please review the prerequisites and enrolment controls for the course(s)

that you are planning to take to complete this requirement. Course enrolment controls are listed in the University's Timetable Builder. Course descriptions, prerequisites, corequisites, and exclusions are listed in both in the Timetable Builder and in the Faculty of Arts & Science Academic Calendar.

Data Science Specialist (Science Program) - ASSPE1687

The field of Data Science is a combination of statistics and computer science methodologies that enable 'learning from data'. A data scientist extracts information from data, and is involved with every step that must be taken to achieve this goal, from getting acquainted with the data to communicating the results in non-technical language. The Data Science Specialist program prepares students for work in the Data Science industry or government and for graduate studies in Data Science, Computer Science, or Statistics. Students in the program will benefit from a range of advanced courses in Computer Science and Statistics offered by the University of Toronto, as well as from a sequence of three integrative courses designed especially for the program.

The Data Science Specialist program comprises three fundamental and highly-integrated aspects. First, students will acquire expertise in statistical reasoning, methods, and inference essential for any data analyst. Second, students will receive in-depth training in computer science: the design and analysis of algorithms and data structures for handling large amounts of data, and best practices in software design. Students will receive training in machine learning, which lies at the intersection of computer and statistical sciences. The third aspect is the application of computer science and statistics to produce analyses of complex, large-scale datasets, and the communication of the results of these analyses; students will receive training in these areas by taking integrative courses that are designed specifically for the Data Science Specialist program. The courses involve experiential learning: students will be working with real large-scale datasets from the domain of business, government, and/or science. The successful student will combine their expertise in computer and statistical science to produce and communicate analyses of complex large-scale datasets.

Skills that graduates of the program will acquire include proficiency in statistical reasoning and computational thinking; data manipulation and exploration, visualization, and communication that are required for work as a data scientist; the ability to apply statistical methods to solve problems in the context of scientific research, business, and government; familiarity and experience with best practices in software development; and knowledge of current software infrastructure for handling large data sets. Graduates of the program will be able to demonstrate the ability to apply machine learning

algorithms to large-scale datasets that arise in scientific research, government, and business; create appropriate data visualizations for complex datasets; identify and answer questions that involve applying statistical methods or machine learning algorithms to complex data, and communicating the results; present the results and limitations of a data analysis at an appropriate technical level for the intended audience.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

For students admitted to Arts & Science in the Year 1 Computer Science (CMP1) admission category:

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on the number of applicants. At least 20 spaces will be available each year for students applying from Year 1 Computer Science (CMP1) within 12 months of beginning their studies:

- CSC110Y1
- CSC111H1
- MAT137Y1/ MAT157Y1
- STA130H1/ STA261H1*

* STA130H1 is restricted to first-year students, therefore students are strongly encouraged to take STA130H1 in their first year. STA261H1 will be used in place of STA130H1 for program admission purposes if a student has not completed STA130H1 or if they have completed both STA130H1 and STA261H1 by the time they are being considered for admission.

To ensure that students admitted to the program will be successful, applicants will not be considered for admission with a grade lower than 70% in CSC110Y1, MAT137Y1, and STA130H1/ STA261H1, or lower than 77% in CSC111H1. (MAT157Y1 grades will be adjusted to account for the course's greater difficulty.) Obtaining these minimum grades does not guarantee admission to the program.

For students admitted to other Arts & Science Year 1 admission categories:

Special Requirement

- Students who do not have the Computer Science Admission Guarantee must complete a supplementary application to be considered for the program.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum

changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- CSC148H1
- MAT137Y1/ MAT157Y1
- STA130H1/ STA261H1*

* STA130H1 is restricted to first-year students, therefore students are strongly encouraged to take STA130H1 in their first year. STA261H1 will be used in place of STA130H1 for program admission purposes if a student has not completed STA130H1 or if they have completed both STA130H1 and STA261H1 by the time they are being considered for admission.

To ensure that students admitted to the program will be successful, applicants with a grade lower than 70% will not be considered for admission. (MAT157Y1 grades will be adjusted to account for the course's greater difficulty.) Obtaining these minimum grades does not guarantee admission to the program.

Notes:

1. Requests for admission will be considered in the first program request period only.
2. Due to the limited enrolment nature of this program, students are strongly advised to plan to enroll in backup programs.
3. Students admitted to the program after second or third year will be required to pay retroactive deregulated program fees.

Arts & Science Internship Program

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that space is more limited for Year 3 entry and students applying for Year 3 entry must have been admitted to the Data Science Specialist in the Summer after Year 2.

Completion Requirements:

(13.0-13.5 credits, including at least 1.5 credits at the 400-level)

First year (3.0-3.5 credits)

MAT137Y1/ MAT157Y1, MAT223H1/ MAT240H1 (MAT240H1 is recommended), STA130H1, (CSC108H1, CSC148H1) / (CSC110Y1, CSC111H1)

Note: Students with a strong background in an object-oriented language such as Python, Java or C++ may omit CSC108H1 and proceed directly with CSC148H1. There is no need to replace the missing half-credit for program

completion; however, please base your course choice on what you are ready to take, not on "saving" a half-credit. Consult with the Computer Science Undergraduate Office for advice on choosing between CSC108H1 and CSC148H1.

Students in this program have the option to enrol in the Arts & Science Internship Program (ASIP) stream.

Second year (3.5-4.0 credits)

MAT237Y1/ MAT257Y1, STA257H1, STA261H1, CSC207H1, (CSC165H1, CSC236H1)/ CSC236H1/ CSC240H1 (CSC240H1 is recommended), JSC270H1 (Data Science I)

Note: CSC240H1 is an accelerated and enriched version of CSC165H1 plus CSC236H1, intended for students with a strong mathematical background, or who develop an interest after taking CSC165H1. If you take CSC240H1 without CSC165H1, there is no need to replace the missing half-credit for program completion; however, please base your course choice on what you are ready to take, not on "saving" a half-credit. Consult the Computer Science Undergraduate Office for advice on choosing between CSC165H1 and CSC240H1. CSC236H1 may be taken without CSC165H1 for students who completed CSC111H1.

Later years (6.5 credits/7.0 credits for students who have not completed STA130H1 (see 4.))

1. STA302H1, one of STA303H1 or STA305H1, STA355H1, CSC209H1, CSC263H1/ CSC265H1 (CSC265H1 is recommended), CSC343H1, CSC373H1, JSC370H1 (Data Science II)
2. STA314H1/ CSC311H1
3. 2.0 credits from the following list, including at least 1.0 credit at the 400-level (see below for additional conditions): STA303H1/ STA305H1 (whichever one was not taken previously), STA313H1/ CSC316H1, STA347H1, CSC401H1, STA414H1/ CSC412H1, CSC413H1, any 400-level STA course; JSC470H1 (Data Science III); CSC454H1, CSC490H1, CSC491H1, CSC494H1, CSC495H1, CSC494Y1.
4. If a student has not completed STA130H1 then an additional 0.5 credit 300+ level STA course that is not used towards any other program requirement must be completed.

The choices from 3 must satisfy the requirement for an integrative, inquiry-based activity by including at least 0.5 credit from the following: JSC470H1 (Data Science III); CSC454H1, CSC490H1, CSC491H1, CSC494H1, CSC495H1, CSC494Y1, STA490Y1, STA496H1, STA497H1, STA498Y1, STA499Y1. Students who complete the Arts & Science Internship Program (ASIP) stream will also meet this requirement.

Transfer credits (except for those attained through a University of Toronto exchange program) cannot comprise more than 1.0 credit at the 300-/400-level, and cannot be

used to satisfy the requirement for an integrative, inquiry-based activity. In addition, transfer credits (except for those attained through a University of Toronto exchange program) cannot comprise more than 0.5 credit of the 400-level CSC or STA or JSC courses required.

Students will be advised to develop domain expertise in at least one area where Data Science is applicable, by taking a sequence of courses in that area throughout their program. Examples of such areas will be provided to students by program advisors and will form the basis for a later proposal for program Focuses (to be approved through internal Arts & Science governance procedures).

Note:

-If you do not complete STA130H1 in your first year of study, this requirement must be fulfilled by completing a 300 or 400-level 0.5 credit STA course to replace STA130H1. Please note that the 300 or 400-level STA course used to replace STA130H1 cannot be a course that is already being used to meet a program completion requirement.

Computer Science Specialist (Science Program) - ASSPE1689

Enrolment Requirements:

This is a limited enrolment program. Only students in the Year 1 Computer Science admission category (CMP1) who meet the criteria of the Computer Science program admission guarantee are eligible to apply to the Computer Science Specialist program.

Requests for admission will be considered in the first program request period only. Students must have completed 4.0 credits and meet the requirements listed below to apply.

Completed courses (with minimum grades)

Students in the CMP1 admissions category have guaranteed admission to the Computer Science Specialist, provided the following courses with the stated minimum grades are successfully completed within 12 months of beginning their studies:

- CSC110Y1 (70%)
- CSC111H1 (77%)
- MAT137Y1/ MAT157Y1

Note:

1. If you are admitted to the CS Specialist in a session other than the summer after your first year (including if you are admitted after completing summer courses), you may be

charged retroactive program fees. More information about retroactive fees can be found in the [Faculty of Arts & Science Fees & Refund](#) page.

Arts & Science Internship Program

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that space is more limited for Year 3 entry and students applying for Year 3 entry must have been admitted to the Computer Science Specialist in the Summer after Year 2.

Completion Requirements:

(12.0 credits, including at least 1.5 credits at the 400-level)

First year (2.5 credits):

1. (CSC110Y1, CSC111H1), MAT137Y1/ MAT157Y1

Notes:

- a. CSC110Y1 and CSC111H1 must be completed in order to complete the Specialist program. No course substitutions will be accepted for CSC110Y1 and/or CSC111H1.
- b. Students seeking an enriched introduction to the theory of computing may choose to enrol in CSC240H1 in their first year. Please consult the department's Undergraduate Office for advice about enrolling in CSC240H1.

Students in this program have the option to enrol in the Arts & Science Internship Program (ASIP) stream. (See **Note** below)

Second year (3.5 credits):

2. CSC207H1, CSC209H1, CSC236H1/ CSC240H1, CSC258H1, CSC263H1/ CSC265H1, MAT223H1/ MAT240H1, STA247H1/ STA237H1/ STA255H1/ STA257H1

Later years (6.0 credits):

3. CSC369H1, CSC373H1

4. 5.0 credits of courses in total selected from among the following groups:

- **Group A:** Any 300-/ 400-level CSC course *except* CSC369H1, CSC373H1, and those listed in Group B

- **Group B:** CSC299H1, CSC299Y1, CSC396H0, CSC398H0, CSC398Y0, CSC399H1, CSC399Y1, CSC490H1, CSC491H1, CSC494H1, CSC494Y1, CSC495H1
- **Group C:** BCB330Y1, BCB410H1, BCB420H1, BCB430Y1, MAT224H1, MAT247H1, MAT235Y1, MAT237Y1, MAT257Y1, any 300-/400-level MAT course except MAT329Y1, MAT390H1, MAT391H1, STA248H1, STA238H1, STA261H1, any 300-/400-level STA course; ECE419H1, ECE454H1

These 5.0 credits must include:

- at least 3.0 credits from Groups A and/or B, including at least 1.5 credits from 400-level CSC courses
- at least 1.0 credit from Group A
- no more than 2.0 credits from Group B, and no more than 1.0 credit from Group B at the 400-level
- no more than 0.5 credit from CSC311H1/STA314H1
- no more than 0.5 credit from CSC412H1/STA414H1
- no more than 0.5 credit from CSC438H1/MAT309H1

The choices in 4 must satisfy the requirement for an integrative, inquiry-based activity by including one of the following courses: CSC301H1, CSC302H1, CSC316H1, CSC318H1, CSC404H1, CSC413H1, CSC417H1, CSC419H1, CSC428H1, CSC454H1, CSC485H1, CSC490H1, CSC491H1, CSC494H1, CSC495H1, CSC494Y1. Students who complete the Arts & Science Internship Program (ASIP) stream will also meet this requirement.

Students enrolled in the Computer Science Specialist (ASSPE1689) program may request to count other University of Toronto Faculty of Applied Science and Engineering courses within Group C. Requests must be reviewed and approved by the Computer Science Undergraduate Office and will be evaluated on a case-by-case basis. For information about this process, please contact the Computer Science Undergraduate Office.

Transfer credits (except for those attained through a University of Toronto exchange program) cannot comprise more than 1.0 credit at the 300-/400-level, and cannot be used to satisfy the requirement for an integrative, inquiry-based activity. In addition, transfer credits (except for those attained through a University of Toronto exchange

program) cannot comprise more than 0.5 credit of the 400-level CSC courses required.

Students cannot combine the Computer Science Specialist (ASSPE1689) program with the Computer Science Major (ASMAJ1689) or the Computer Science Minor (ASMIN1689) for their degree.

Choosing courses

This program offers considerable freedom to choose courses at the 300-/400-level, and you are free to make those choices on your own. We are eager to offer guidance, however, and both our Undergraduate Office and individual faculty members are a rich source of advice.

Computer Science Major (Science Program) - ASMAJ1689

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

For students admitted to Arts & Science in the Year 1 Computer Science (CMP1) admission category:

Completed courses (with minimum grades)

Students in the CMP1 admissions category have guaranteed admission to the Computer Science Major, provided the following courses with the stated minimum grades are completed within 12 months of beginning their studies:

- CSC110Y1 (70%)
- CSC111H1 (77%)
- MAT137Y1/MAT157Y1

For students admitted to other Arts & Science Year 1 admission categories:

Special Requirement

- Students who do not have the Computer Science Admission Guarantee must complete a supplementary application to be considered for the program.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- CSC148H1
- CSC165H1/ CSC240H1

To ensure that students admitted to the program will be successful, applicants with a grade below 70% will not be considered for admission. Obtaining this minimum grade does not guarantee admission to the program.

Notes:

1. Requests for admission will be considered in the first program request period only.
2. Due to the limited enrolment nature of this program, students are strongly advised to plan to enrol in backup programs.
3. Students admitted to the program after second or third year will be required to pay retroactive deregulated program fees.

Arts & Science Internship Program

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that space is more limited for Year 3 entry and students applying for Year 3 entry must have been admitted to the Computer Science Major in the Summer after Year 2.

Completion Requirements:

(8.0 credits, including at least one 0.5 credit at the 400-level)

First year (2.5 credits):

1. (CSC108H1, CSC148H1, CSC165H1/ CSC240H1) / (CSC110Y1, CSC111H1); MAT137Y1/ MAT157Y1 / (MAT135H1, MAT136H1)

Students in this program have the option to enrol in the Arts & Science Internship Program (ASIP) stream.

Notes:

- a. Students with a strong background in an object-oriented language such as Python, Java or C++ may omit CSC108H1 and proceed directly with CSC148H1. [There is no need to replace the missing 0.5 credit for program completion; however, please base your course choice on what you are ready to take, not on "saving" a 0.5 credit].
- b. CSC240H1 is an accelerated and enriched version of CSC165H1 plus CSC236H1, intended

for students with a strong mathematical background, or who develop an interest after taking CSC165H1. If you take CSC240H1 without CSC165H1, there is no need to replace the missing half-credit for program completion; but please see Note (a).

- c. Consult the Undergraduate Office for advice about choosing among CSC108H1 and CSC148H1, and between CSC165H1 and CSC240H1.
- d. We recommend that students take MAT137Y1 or MAT157Y1, as they have been determined to provide the best preparation for upper-year courses in computer science and benefit students in CSC165H1/ CSC240H1.

Second year (2.5 credits):

2. CSC207H1, CSC236H1/ CSC240H1, CSC258H1, CSC263H1/ CSC265H1, STA247H1/ STA237H1/ STA255H1/ STA257H1

Later years (3.0 credits):

3. 3.0 credits of courses in total selected from among the following groups:

- **Group A:** CSC209H1; any 300-/ 400-level CSC course *except* those listed in Group B
- **Group B:** CSC299H1, CSC299Y1, CSC396H0, CSC398H0, CSC398Y0, CSC399H1, CSC399Y1, CSC490H1, CSC491H1, CSC494H1, CSC494Y1, CSC495H1
- **Group C:** BCB330Y1, BCB410H1, BCB420H1, BCB430Y1; MAT223H1/ MAT240H1, MAT235Y1/ MAT237Y1/ MAT257Y1, any 300-/400-level MAT course *except* MAT329Y1, MAT390H1, MAT391H1; STA248H1/ STA238H1/ STA261H1, any 300-/400-level STA course; ECE419H1, ECE454H1

These 3.0 credits must include:

- at least 2.0 credits from Groups A and/or B, including at least 0.5 credit from a 400-level CSC course
- at least 1.0 credit at the 300-/400-level from Group A
- no more than 1.5 credits from Group B, and no more than 1.0 credit from Group B at the 400-level
- no more than 0.5 credit from CSC311H1/ STA314H1

- no more than 0.5 credit from CSC412H1/STA414H1
- no more than 0.5 credit from CSC438H1/MAT309H1

The choices in 3 must satisfy the requirement for an integrative, inquiry-based activity by including one of the following courses: CSC301H1, CSC302H1, CSC316H1, CSC318H1, CSC404H1, CSC413H1, CSC417H1, CSC419H1, CSC428H1, CSC454H1, CSC485H1, CSC490H1, CSC491H1, CSC494H1, CSC495H1, CSC494Y1. Students who complete the Arts & Science Internship Program (ASIP) stream will also meet this requirement.

Students enrolled in the Computer Science Major (ASMAJ1689) program may request to count other University of Toronto Faculty of Applied Science and Engineering courses within Group C. Requests must be reviewed and approved by the Computer Science Undergraduate Office and will be evaluated on a case-by-case basis. For information about this process, please contact the Computer Science Undergraduate Office.

Transfer credits (except for those attained through a University of Toronto exchange program) cannot comprise more than 1.0 credit at the 300-/ 400-level, and cannot be used to satisfy the requirement for an integrative, inquiry-based activity. In addition, transfer credits (except for those attained through a University of Toronto exchange program) cannot be used to satisfy the requirement for 0.5 credit at the 400-level in CSC.

Students cannot combine the Computer Science Major (ASMAJ1689) program with the Computer Science Specialist (ASSPE1689) or the Computer Science Minor (ASMIN1689) for their degree.

Computer Science Minor (Science Program) - ASMIN1689

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

For students admitted to Arts & Science in the Year 1 Computer Science (CMP1) admission category:

Completed courses (with minimum grades)

Students in the CMP1 admissions category have guaranteed admission to the Computer Science Minor, provided the following courses with the stated minimum

grades are completed within 12 months of beginning their studies:

- CSC110Y1 (70%)
- CSC111H1 (70%)

For students admitted to other Arts & Science Year 1 admission categories:

Special Requirement

- Students who do not have the Computer Science Admission Guarantee must complete a supplementary application to be considered for the program.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- CSC148H1
- CSC165H1/ CSC240H1

To ensure that students admitted to the program will be successful, applicants with a grade below 70% will not be considered for admission. Obtaining this minimum grade does not guarantee admission to the program.

Notes:

1. Requests for admission will be considered in the first program request period only.
2. Due to the limited enrolment nature of this program, students are strongly advised to plan to enroll in backup programs.

Completion Requirements:

(4.0 credits)

1. (CSC108H1/ CSC120H1, CSC148H1, CSC165H1/ CSC240H1) / (CSC110Y1, CSC111H1)

Notes:

- a. Students with a strong background in an object-oriented language such as Python, Java or C++ may omit CSC108H1 and proceed directly with CSC148H1.
- b. CSC240H1 is an accelerated and enriched version of CSC165H1 plus CSC236H1, intended for students with a strong mathematical background, or who develop an interest after taking CSC165H1.
- c. Consult the Undergraduate Office for advice about choosing among CSC108H1 and

CSC148H1, and between CSC165H1 and CSC240H1.

2. CSC207H1, CSC236H1/ CSC240H1

(Total of above requirements: 2.5 credits. If you take fewer than 2.5 credits, you must take more than 1.5 credits from the next list, so that the total is 4.0 credits.)

3. 1.5 credits from the following list, of which at least 1.0 credit must be at the 300-/400-level:

- CSC: any 200-/300-/400-level

Note:

- Computer Science Minors are limited to 1.5 credits from 300-/400-level CSC/ECE courses.
- Transfer credits cannot comprise more than 0.5 credit at the 300-/400-level.

Students cannot combine the Computer Science Minor (ASMIN1689) program with the Computer Science Major (ASMAJ1689) or the Computer Science Specialist (ASSPE1689) for their degree.

Focus in Artificial Intelligence (Specialist) - ASFOC1689B

(3.5 credits)

Artificial Intelligence (AI) is aimed at understanding and replicating the computational processes underlying intelligent behaviour. These behaviours include the perception of one's environment, learning how that environment is structured, communicating with other agents, and reasoning to guide one's actions. This focus is designed to provide students with an introduction to some of the key scientific and technical ideas that have been developed in AI. There are four different sub-areas of AI represented in our department: Computer Vision, Computational Linguistics, Machine Learning, and Knowledge Representation and Reasoning. These areas cover a wide variety of ideas and techniques. Students wanting to achieve this focus are required to take courses from at least two of these sub-areas (as in point 2, below).

Enrolment Requirements:

Enrolment in the Computer Science Specialist Program (ASSPE1689).

Completion Requirements:

Required Courses:

1. 1.0 credit from the following: CSC336H1, MAT235Y1/ MAT237Y1/ MAT257Y1, APM236H1, MAT224H1/ MAT247H1, STA238H1/ STA248H1/ STA261H1, STA302H1, STA347H1
2. 2.5 credits from the following, so that courses are from at least two of the four areas:
 - a. CSC401H1, CSC485H1
 - b. CSC320H1, CSC420H1
 - c. CSC413H1, CSC311H1/ STA314H1, CSC412H1/ STA414H1
 - d. CSC304H1, CSC384H1, CSC486H1

Suggested Related Courses:

CSC324H1, COG250Y1, PSY270H1, PHL232H1, PHL342H1

Focus in Artificial Intelligence (Major) - ASFOC1689K

(3.5 credits)

The Focus in Artificial Intelligence (Major) has the same set of requirements as the Focus in Artificial Intelligence (Specialist).

Artificial Intelligence (AI) is aimed at understanding and replicating the computational processes underlying intelligent behaviour. These behaviours include the perception of one's environment, learning how that environment is structured, communicating with other agents, and reasoning to guide one's actions. This focus is designed to provide students with an introduction to some of the key scientific and technical ideas that have been developed in AI. There are four different sub-areas of AI represented in our department: Computer Vision, Computational Linguistics, Machine Learning, and Knowledge Representation and Reasoning. These areas cover a wide variety of ideas and techniques. Students wanting to achieve this focus are required to take courses from at least two of these sub-areas (as in point 2, below).

Enrolment Requirements:

Enrolment in the Computer Science Major Program (ASMAJ1689).

Completion Requirements:

Required Courses:

1. 1.0 credit from the following: CSC336H1, MAT235Y1/ MAT237Y1/ MAT257Y1, APM236H1, MAT224H1/ MAT247H1, STA238H1/ STA248H1/ STA261H1, STA302H1, STA347H1
2. 2.5 credits from the following, so that courses are from at least two of the four areas:
 - a. CSC401H1, CSC485H1

- b. [CSC320H1](#), [CSC420H1](#)
- c. [CSC413H1](#), [CSC311H1](#)/ [STA314H1](#),
[CSC412H1](#)/ [STA414H1](#)
- d. [CSC304H1](#), [CSC384H1](#), [CSC486H1](#)

Suggested Related Courses:

[CSC324H1](#), [COG250Y1](#), [PSY270H1](#), [PHL232H1](#),
[PHL342H1](#)

Focus in Computational Linguistics and Natural Language Processing (Specialist) - ASFOC1689C

(4.0 credits)

How can we build and analyze systems that enable users to communicate with computers using human language (also called natural language) and automatically process the vast amounts of data on the web available in the form of text? The focus covers appropriate material on natural language interfaces, as well as tools such as document summarization, intelligent search over the web, and so on. Students considering this focus are encouraged to consider a Major in Linguistics. [Note 0.5 credit in LIN is in addition to the 12.0 credits required to complete the Specialist program]

Enrolment Requirements:

Enrolment in the Computer Science Specialist Program (ASSPE1689).

Completion Requirements:

Required Courses:

1. [CSC318H1](#)
2. [CSC401H1](#), [CSC485H1](#)
3. [LIN101H1](#)/ [LIN200H1](#)
4. 1.5 credits from the following: [CSC309H1](#),
[CSC413H1](#), [CSC311H1](#), [CSC428H1](#), [CSC486H1](#)
5. 0.5 credit from the following: [PSY100H1](#),
[COG250Y1](#)

Suggested Related Courses:

Other relevant Computer Science courses, depending on the student's interests, include other courses in artificial intelligence such as [CSC384H1](#) or [CSC420H1](#). Linguistics, Psychology, and Cognitive Science are all directly relevant to this focus, and we recommend that interested students take additional courses from any or all of those disciplines.

Focus in Computational Linguistics and Natural Language Processing (Major) - ASFOC1689M

(4.0 credits)

The Focus in Computational Linguistics and Natural Language Processing (Major) has the same set of requirements as the Focus in Computational Linguistics and Natural Language Processing (Specialist).

How can we build and analyze systems that enable users to communicate with computers using human language (also called natural language) and automatically process the vast amounts of data on the web available in the form of text? The focus covers appropriate material on natural language interfaces, as well as tools such as document summarization, intelligent search over the web, and so on. Linguistics, Psychology, and Cognitive Science are all directly relevant to this focus, and we recommend that interested students take additional courses from any or all of those disciplines.

Focus in Computer Systems (Specialist) - ASFOC1689F

(2.0 credits)

Software systems are complex and interesting. Poorly done systems can be incredibly expensive: they can cost society billions of dollars and sometimes make the difference between life and death. Rapid changes in technology and applications means that the underlying systems must continually adapt. This focus takes you under the covers of software systems, laying bare the layers and introducing you to concurrency issues, scalability, multiprocessor systems, distributed computing, and more.

Enrolment Requirements:

Enrolment in the Computer Science Specialist Program (ASSPE1689).

Completion Requirements:

Required Courses:

- 1.0 credit from the following: [CSC343H1](#), [CSC367H1](#), [CSC457H1/ CSC458H1](#)
- 1.0 credit from the following: [CSC457H1/ CSC458H1](#) (if not taken in list 1), [CSC324H1](#), [CSC364H1](#), [CSC368H1](#), [CSC385H1](#), [CSC443H1](#), [CSC469H1](#), [CSC488H1](#)

Suggested Related Courses:

- [CSC301H1](#), [CSC309H1](#), [CSC410H1](#)
- Relevant courses offered at UTM: [CSC347H5](#), [CSC423H5](#), [CSC427H5](#)
- Relevant courses offered by Engineering: [ECE454H1](#), [ECE568H1](#)

Focus in Computer Systems (Major) - ASFOC1689P

(3.0 credits)

Software systems are complex and interesting. Poorly done systems can be incredibly expensive: they can cost society billions of dollars and sometimes make the difference between life and death. Rapid changes in technology and applications means that the underlying systems must continually adapt. This focus takes you under the covers of software systems, laying bare the layers and introducing you to concurrency issues, scalability, multiprocessor systems, distributed computing, and more.

Enrolment Requirements:

Enrolment in the Computer Science Major Program (ASMAJ1689).

Completion Requirements:

Focus in Computer Vision (Specialist) - ASFOC1689D

(3.5 credits)

Computer vision is the science and technology of machines that can see. As a science, the goal of computer vision is to understand the computational processes required for a machine to come to an understanding of the content of a set of images. The data here may be a single snapshot, a video sequence, or a set of images from different viewpoints or provided by medical scanners.

The computer vision focus introduces students to the study of vision from a computational point of view. That is, we attempt to clearly define computational problems for various steps of the overall process, and then show how these problems can be tackled with appropriate algorithms.

Students who wish to pursue computer vision should have an understanding of linear algebra and calculus of several variables. Moreover, they should be solid programmers and have a good understanding of data structures and algorithm design. These basic tools are required in order to first pose computational vision problems, and then develop and test algorithms for the solution to those problems.

Enrolment Requirements:

Enrolment in the Computer Science Specialist Program (ASSPE1689).

Completion Requirements:

Required Courses:

1. [MAT235Y1](#)/[MAT237Y1](#)/[MAT257Y1](#), [CSC320H1](#), [CSC336H1](#), [CSC311H1](#), [CSC420H1](#)
2. 0.5 credit from the following: [CSC412H1](#), [CSC417H1](#), [CSC317H1](#), [CSC419H1](#), [CSC2503H](#)
(Note: students must request permission to take a graduate course.)

Suggested Related Courses:

The following are examples of topics and courses that fit naturally with a study of computational vision. The list is meant to be illustrative of the range of cognate topics, but is not necessarily complete. The ordering is alphabetical and not indicative of importance. Note: there are prerequisites for many of these courses that we do not list here.

[APM462H1](#), [COG250Y1](#), [CSC384H1](#), [CSC485H1](#), [CSC486H1](#), [ECE216H1](#), [PHL232H1](#), [PHY385H1](#), [PSL440Y1](#), [PSY270H1](#), [PSY280H1](#), [STA257H1](#)/[STA261H1](#)

Focus in Computer Vision (Major) - ASFOC1689L

(3.5 credits)

Focus in Game Design (Specialist) - ASFOC1689G

(3.0 credits)

Video game design combines several disciplines within computer science, including software engineering, graphics, artificial intelligence, and human-computer interaction. It also incorporates elements of economics, psychology, music, and creative writing, requiring video game researchers to have a diverse, multidisciplinary set of skills.

Students who wish to pursue video game design should have an understanding of linear algebra (for computer graphics modelling), computer hardware and operating systems (for console architecture), data structures, and algorithm design. Students will gain a general knowledge of the more advanced topics listed in the courses below.

Enrolment Requirements:

Enrolment in the Computer Science Specialist Program (ASSPE1689).

Completion Requirements:

Required courses:

1. [CSC300H1](#), [CSC301H1](#), [CSC318H1](#), [CSC384H1](#),
[CSC317H1](#)/ [CSC417H1](#)/ [CSC419H1](#), [CSC404H1](#)

- ENV281H1, ENV381H1
- IRE260H1
- COG250Y1, COG260H1, COG341H1, COG343H1, and COG344H1

If you have completed any of these suggested related courses, please contact cs.undergrad@utoronto.ca to determine whether it may be appropriate to count a related course towards Focus requirements.

Focus in Scientific Computing (Specialist) - ASFOC1689A

(3.5 credits)

Scientific computing studies the world around us. Known and unknown quantities are related through certain rules, e.g. physical laws, formulating mathematical problems. These problems are solved by numerical methods implemented as algorithms and run on computers. The numerical methods are analyzed and their performance (e.g. accuracy, efficiency) studied. Problems, such as choosing the optimal shape for an airplane (to achieve, for example, minimal fuel consumption), finding the fair price for derivative products of the market, or regulating the amount of radiation in medical scans, can be modelled by mathematical expressions and solved by numerical techniques.

Students wishing to study scientific computing should have a strong background in mathematics—in particular calculus of several variables, linear algebra, and statistics—be fluent in programming, and have a good understanding of data structures and algorithm design.

Enrolment Requirements:

Enrolment in the Computer Science Specialist Program (ASSPE1689).

Completion Requirements:

Required Courses:

1. MAT235Y1/ MAT237Y1/ MAT257Y1
2. 1.5 credits from the following: CSC336H1, CSC436H1, CSC446H1, CSC456H1, CSC466H1
3. 1.0 credit from the following: CSC317H1/ CSC320H1/ CSC417H1/ CSC419H1, CSC311H1, CSC343H1, CSC384H1, CSC457H1/ CSC458H1

Suggested Related Courses:

- CSC367H1
- MAT224H1/ MAT240H1/ MAT247H1, MAT334H1/ MAT354H1, MAT337H1/ MAT357H1

It is also recommended that students in this focus consider taking a half-course or two from the basic sciences (such as physics, chemistry, biology), as these sciences are the source of many problems solved by numerical techniques.

Focus in Scientific Computing (Major) - ASFOC16890

(3.5 credits)

The Focus in Scientific Computing (Major) has the same set of requirements as the Focus in Scientific Computing (Specialist).

Scientific computing studies the world around us. Known and unknown quantities are related through certain rules, e.g. physical laws, formulating mathematical problems. These problems are solved by numerical methods implemented as algorithms and run on computers. The numerical methods are analyzed and their performance (e.g. accuracy, efficiency) studied. Problems, such as choosing the optimal shape for an airplane (to achieve, for example, minimal fuel consumption), finding the fair price for derivative products of the market, or regulating the amount of radiation in medical scans, can be modelled by mathematical expressions and solved by numerical techniques.

Students wishing to study scientific computing should have a strong background in mathematics—in particular calculus of several variables, linear algebra, and statistics—be fluent in programming, and have a good understanding of data structures and algorithm design.

Enrolment Requirements:

Enrolment in the Computer Science Major Program (ASMAJ1689).

Completion Requirements:

2. 1.5 credits from the following: CSC336H1, CSC436H1, CSC446H1, CSC456H1, CSC466H1
3. 1.0 credit from the following: CSC317H1/ CSC320H1/ CSC417H1/ CSC419H1, CSC311H1, CSC343H1, CSC384H1, CSC457H1/ CSC458H1

Suggested Related Courses:

- CSC367H1
- MAT224H1/ MAT240H1/ MAT247H1, MAT334H1/ MAT354H1, MAT337H1/ MAT357H1

It is also recommended that students in this focus consider taking a half-course or two from the basic sciences (such as physics, chemistry, biology), as these sciences are the source of many problems solved by numerical techniques.

Focus in Technology Leadership (Computer Science Specialist) - ASFOC1689T

The Technology Leadership Focus combines the development of applied Computer Science skills with an exploration of the core aspects of leadership within the context of the technology sector.

Students who complete the Technology Leadership Focus will be well-prepared to step into leadership roles and navigate the complexities of the tech industry.

To enrol in the Technology Leadership Focus, you must meet eligibility requirements, apply and be admitted, as detailed in "Enrolment Requirements."

Enrolment Requirements:

To be admitted to the Technology Leadership Focus, you must:

- Have not yet completed CSC207H1 prior to beginning Focus requirements.
- Complete an application and/or interview. Application information will be provided to all Computer Science Specialist and Major and Data Science Specialist program applicants during the Round 1 program admission period.
- Students who complete the Technology Leadership Focus application and/or interview and are admitted to a Computer Science Specialist or Major or Data Science Specialist program will be considered for admission to the Focus.

Students admitted to the Focus will be enrolled in an industry-engaged version of CSC207H1 in the Fall term. This industry-engaged version of CSC207H1 is a required component of the Focus, and is a prerequisite to CSC308H1.

Completion Requirements:

1. Industry-engaged version of CSC207H1: Software Design
2. CSC308H1: Technology Leadership
3. 0.5 credits from CSC301H1, CSC302H1, CSC309H1, CSC318H1, CSC343H1, and CSC364H1
4. 1.0 credits including:
 1. a. Up to 0.5 credits from CSC301H1, CSC302H1, CSC309H1, CSC318H1,

CSC343H1 and CSC364H1 (if not taken in list 3)

- b. Up to 1.0 credits from CSC404H1, CSC413H1, CSC417H1, CSC419H1, CSC428H1, CSC454H1, CSC485H1, CSC490H1, CSC491H1, CSC494H1, CSC495H1, CSC494Y1

Additionally, participating students will be invited to participate in co-curricular community-building and networking activities. These co-curricular activities will provide opportunities for students to meet leaders in the field and to reflect on their own leadership development.

Focus in Technology Leadership (Data Science Specialist) - ASFOC1687A

The Technology Leadership Focus combines the development of applied Computer Science skills with an exploration of the core aspects of leadership within the context of the technology sector.

Students who complete the Technology Leadership Focus will be well-prepared to step into leadership roles and navigate the complexities of the tech industry.

To enrol in the Technology Leadership Focus, you must meet eligibility requirements, apply and be admitted, as detailed in "Enrolment Requirements."

Enrolment Requirements:

To be admitted to the Technology Leadership Focus, you must:

- Have not yet completed CSC207H1 prior to beginning Focus requirements.
- Complete an application and/or interview. Application information will be provided to all Computer Science Specialist and Major and Data Science Specialist program applicants during the Round 1 program admission period.
- Students who complete the Technology Leadership Focus application and/or interview and are admitted to a Computer Science Specialist or Major or Data Science Specialist program will be considered for admission to the Focus.

Students admitted to the Focus will be enrolled in an industry-engaged version of CSC207H1 in the Fall term. This industry-engaged version of CSC207H1 is a required component of the Focus, and is a prerequisite to CSC308H1.

Completion Requirements:

1. Industry-engaged version of CSC207H1: Software Design
2. CSC308H1: Technology Leadership
3. 0.5 credits from CSC301H1, CSC302H1, CSC309H1, CSC318H1, and CSC343H1
4. 1.0 credits including:
 - a. Up to 0.5 credits from CSC301H1, CSC302H1, CSC309H1, CSC318H1, and CSC343H1 (if not taken in list 3)
 - b. Up to 1.0 credits from CSC404H1, CSC413H1, CSC417H1, CSC419H1, CSC428H1, CSC454H1, CSC485H1, CSC490H1, CSC491H1, CSC494H1, CSC495H1, CSC494Y1

Additionally, participating students will be invited to participate in co-curricular community-building and networking activities. These co-curricular activities will provide opportunities for students to meet leaders in the field and to reflect on their own leadership development.

Focus in Quantitative Finance (Data Science Specialist) - ASFOC1687B

The Quantitative Finance Focus combines the rigor of theoretical and methodological statistics with an in-depth exploration of the tools and techniques used in modern quantitative finance. Students in this focus will develop a deeper understanding of financial markets, derivative pricing, risk management, and the quantitative methods essential for addressing complex financial challenges.

The focus emphasizes the application of statistical models and methods to real-world financial data, equipping students with the skills needed to succeed in the growing field of finance. Topics include stochastic processes, time series analysis, portfolio optimization, and mathematical finance, among others.

Graduates of the Quantitative Finance Focus will be well-prepared for careers in fintech, investment banking, hedge funds, and risk management, as well as for graduate study in quantitative finance or related fields. The curriculum is designed to provide both a solid theoretical foundation and practical expertise, ensuring students are ready to tackle challenges using advanced quantitative methods.

To enrol in the Quantitative Finance Focus, students must be admitted to the Data Science Specialist program (ASSPE1687) as detailed in the Enrolment Requirements.

Enrolment Requirements:

Enrolment in the Data Science Specialist program (ASSPE1687).

Completion Requirements:

3.5 credits

1. ACT370H1
2. ACT460H1
3. STA314H1
4. STA457H1
5. STA410H1/ STA414H1
6. STA447H1/ STA452H1
7. MAT244H1/ MAT267H1

Focus in Technology Leadership (Computer Science Major) - ASFOC1689U

The Technology Leadership Focus combines the development of applied Computer Science skills with an exploration of the core aspects of leadership within the context of the technology sector.

Students who complete the Technology Leadership Focus will be well-prepared to step into leadership roles and navigate the complexities of the tech industry.

To enrol in the Technology Leadership Focus, you must meet eligibility requirements, apply and be admitted, as detailed in "Enrolment Requirements."

Enrolment Requirements:

To be admitted to the Technology Leadership Focus, you must:

- Have not yet completed CSC207H1 prior to beginning Focus requirements.
- Complete an application and/or interview. Application information will be provided to all Computer Science Specialist and Major and Data Science Specialist program applicants during the Round 1 program admission period.
- Students who complete the Technology Leadership Focus application and/or interview and are admitted to a Computer Science Specialist or Major or Data Science Specialist program will be considered for admission to the Focus.

Students admitted to the Focus will be enrolled in an industry-engaged version of CSC207H1 in the Fall term. This industry-engaged version of CSC207H1 is a required component of the Focus, and is a prerequisite to CSC308H1.

Completion Requirements:

1. Industry-engaged version of CSC207H1: Software Design
2. CSC308H1: Technology Leadership
3. 0.5 credit from CSC301H1, CSC302H1, CSC309H1, CSC318H1, and CSC343H1
4. 1.0 credit including:
 - a. Up to 0.5 credit from CSC301H1, CSC302H1, CSC309H1, CSC318H1, and CSC343H1 (if not taken in list 3)
 - b. Up to 1.0 credit from CSC404H1, CSC413H1, CSC417H1, CSC419H1, CSC428H1, CSC454H1, CSC485H1, CSC490H1, CSC491H1, CSC494H1, CSC495H1, CSC494Y1

Additionally, participating students will be invited to participate in co-curricular community-building and networking activities. These co-curricular activities will provide opportunities for students to meet leaders in the field and to reflect on their own leadership development.

Focus in Theory of Computation (Specialist) - ASFOC1689I

(3.5 credits)

Why is it easy to sort a list of numbers, but hard to break Internet encryption schemes? Is finding a solution to a problem harder than checking that a solution is correct? Can we find good approximate solutions, even when the exact solutions seem out of reach? Theory of Computation studies the inherent complexity of fundamental algorithmic problems. On one hand, we develop ground-breaking efficient data structures and algorithms. On the other, we have yet to develop good algorithms for many problems despite decades of effort, and for these problems we strive to prove no time- or space-efficient algorithms will ever solve them. While the field has seen some successful impossibility results, there are still many problems (such as those underlying modern cryptography and security) for which we do not know either efficient algorithms or strong lower bounds!

This focus takes a rigorous, mathematical approach to computational problem-solving: students will gain a deep understanding of algorithm paradigms and measures of problem complexity, and develop the skills necessary to convey abstract ideas with precision and clarity. Many of our students go on to graduate studies and sophisticated

algorithmic work in industry. This focus has natural ties with many branches of mathematics and is the foundation of many computer science fields. Consequently, our students often apply their theoretical knowledge to other fields of interest.

We advise you to take [CSC240H1](#) and [CSC265H1](#), the enriched versions of [CSC236H1](#) and [CSC263H1](#), because these courses are particularly well-aligned with the goals of this focus and will best prepare you for advanced theory courses. However, students who have already taken [CSC236H1](#)/ [CSC236H5](#)/ [CSCB36H3](#) or [CSC263H1](#)/ [CSC263H5](#)/ [CSCB63H3](#) are also welcome to enrol in the focus.

Enrolment Requirements:

Enrolment in the Computer Science Specialist Program (ASSPE1689).

Completion Requirements:

1. [CSC463H1](#)
2. 3.0 credits from the following:
 - [CSC304H1](#), [CSC310H1](#), [CSC336H1](#), [CSC436H1](#), [CSC438H1](#)/ [MAT309H1](#), [CSC448H1](#), [CSC473H1](#), [MAT332H1](#), [MAT344H1](#)
 - at UTM: [MAT302H5](#)
 - graduate courses: [CSC2221H](#), [CSC2240H](#), [CSC2401H](#), [CSC2410H](#), [CSC2412H](#), [CSC2420H](#), [CSC2421H](#), [CSC2426H](#), [CSC2451H](#), [CSC2556H](#) (Note that students must contact cs.undergrad@utoronto.ca during the course enrolment period to request permission to take a graduate course.)

Students who complete an independent study project ([CSC494H1](#)/ [CSC495H1](#)) under the supervision of a faculty member from the Theory group may request to substitute one of [CSC494H1](#)/ [CSC495H1](#) for one of the courses in list 2 above. This request must be made directly to the department's Undergraduate Office.

Students who complete a graduate Topics course in Theory may request to count it towards the completion of list 2 above. This request must be made directly to the department's Undergraduate Office.

Focus in Theory of Computation (Major) - ASFOC1689R

(3.5 credits)

Students who complete a graduate Topics course in Theory may request to count it towards the completion of list 2 above. This request must be made directly to the department's Undergraduate Office.

Focus in Web and Internet Technologies (Specialist) - ASFOC1689J

(3.0 credits)

The Web and Internet Technologies focus introduces students to the systems and algorithms that power today's large-scale web and Internet applications such as search engines, social networking applications, web data mining applications, and content distribution networks. The focus covers the architecture of the systems, algorithms and protocols, and machine learning techniques underlying these applications.

Students who wish to pursue the Focus in Web and Internet Technologies should have a solid understanding of statistics, be good programmers, and have a good understanding of data structures and algorithm design.

To get practical experience, students pursuing the web and Internet technologies focus are encouraged to do either a [CSC494H1/ CSC495H1](#): Computer Science Project course or a summer USRA/UTEA project in web and internet technologies.

Enrolment Requirements:

Enrolment in the Computer Science Specialist Program (ASSPE1689).

Completion Requirements:

Required courses:

1. [STA238H1/ STA248H1/ STA261H1, CSC309H1, CSC311H1, CSC343H1, CSC457H1/ CSC458H1](#)
2. 0.5 credit from the following list: [CSC364H1, CSC413H1, CSC443H1, CSC457H1](#) (if not taken in list 2), [CSC458H1](#) (if not taken in list 2)

Suggested Related Courses:

1. Courses offered at UTM: [CSC347H5, CSC423H5, CSC427H5](#)
2. [ECE568H1](#)
3. [ENV281H1, ENV381H1](#)

Focus in Web and Internet Technologies (Major) - ASFOC1689S

(3.0 credits)

The Web and Internet Technologies focus introduces students to the systems and algorithms that power today's large-scale web and Internet applications such as search engines, social networking applications, web data mining applications, and content distribution networks. The focus covers the architecture of the systems, algorithms and protocols, and machine learning techniques underlying these applications.

Students who wish to pursue the Focus in Web and Internet Technologies should have a solid understanding of statistics, be good programmers, and have a good understanding of data structures and algorithm design.

To get practical experience, students pursuing the web and Internet technologies focus are encouraged to do either a [CSC494H1/ CSC495H1](#): Computer Science Project course or a summer USRA/UTEA project in web and internet technologies.

Enrolment Requirements:

Enrolment in the Computer Science Major Program (ASMAJ1689).

Completion Requirements:

1. [CSC209H1](#)
2. 2.5 credits from [STA238H1/ STA248H1/ STA261H1, CSC309H1, CSC311H1, CSC343H1, CSC364H1, CSC413H1, CSC443H1, CSC457H1, CSC458H1](#)

Suggested Related Courses:

- [ECE568H1](#)
- [ENV281H1, ENV381H1](#)

Regarding Computer Science Courses

Enrolment Notes

1. **Priority enrolment:** Most CSC courses at the 200-level and above offer priority enrolment to students in Computer Science programs. Consult the [Timetable](#) for details.
2. **Limits to upper-level courses:** Students not enrolled in Computer Science Major or Specialist programs are limited to a maximum of 1.5 credits in 300+ level CSC/ECE courses, with two exceptions:
 1. Students enrolled in the Engineering Science Robotics Engineering, Electrical and Computer Engineering, or Machine Intelligence Majors are instead limited to a maximum of 2.0 credits in 300+ level CSC courses.
 2. Students enrolled in the Arts & Science Bioinformatics and Computational Biology Specialist are limited to a maximum of 2.5 credits in 300+ level CSC/ECE courses.
3. **Completion of CS Minor without program enrolment:** Students who complete the requirements of CS Minor and are not enrolled in the CS Minor program may request to be enrolled in the CS Minor during their final term of studies. This policy does not apply to any other computer science program. Please contact cs.undergrad@utoronto.ca for more information.
4. **Prerequisites:** For Arts & Science students, no requests to waive prerequisites are considered in 200-level courses except for [CSC240H1](#) and [CSC265H1](#), where appropriate, and students without prerequisites will be removed from the course. For upper-level courses, students without prerequisites must obtain permission to remain enrolled in the course through the department's prerequisite waiver process. Please contact cs.undergrad@utoronto.ca for information about the prerequisite waiver process.
5. **Students with transfer credits:** If you have transfer credits in Computer Science, or a similar subject, for courses done at another university or college, contact our Undergraduate Office (cs.undergrad@utoronto.ca) for advice on choosing courses. Also ask for advice even if you don't have transfer credits yet but are considering degree study at the University of Toronto.
6. **First-Year Foundations Seminars:** First-Year Foundations Seminars are open only to newly-admitted, Faculty of Arts & Science students (3.5 credits or less). They are full-credit or half-credit courses that focus on discussion of issues, questions and controversies surrounding a particular discipline (or several disciplines) in a small-group setting that encourages the development of critical thinking, writing skills, oral presentation and research methods. FYF seminars are as rigorous and demanding as any other first-year course and require in addition the acquisition of those skills expected of successful

undergraduate students. With a maximum enrolment of 30 students each, they are an ideal way to have an enjoyable and challenging small-class experience in your first year. First-Year Foundations Seminars count as 0.5 or 1.0 of the 20.0 credits required for an HBA, HBSc or BCom and can be counted towards the breadth requirement.

7. The Department of Computer Science provides [Courseography](#), an interactive tool for exploring course options and pathways our department.

Advice on choosing courses towards a Major in Computer Science

A Major program in any discipline may form part (but not the whole) of your degree requirements. The Major program in Computer Science is designed to include a solid grounding in the essentials of Computer Science, followed by options that let you explore one or a few topics more deeply. You will also realize what areas you have not studied and be ready to explore them if your interests change after completing the Major.

To give you freedom to choose your path through Computer Science, we have designed the Major to include a minimal set of required courses. There are some courses that we think you ought to consider carefully as you make those choices. [CSC373H1](#) is fundamental to many more advanced Computer Science topics, where designing appropriate algorithms is central. [CSC209H1](#) is a prerequisite to effective work in many application areas. Additionally, you may wish to select a Focus as part of your Major program.

A significant role of the Major is to allow you to integrate your studies in Computer Science and another discipline. For example, many Computer Science students are also interested in statistics, economics, physics or mathematics. In those cases, it makes sense to enrol in a Major in one discipline and either a Major or a Specialist in the other. Explore some more suggestions from the department about combining Computer Science with other programs at the [Departmental webpage](#).

If you are doing two Majors in related disciplines, you might want to consult your College Registrar's Office for advice on satisfying the degree requirements with overlapping Majors.

A Major program may not be enough to prepare you for graduate study in Computer Science, though a complete Specialist is not typically required. Consult the CS Undergraduate Office (cs.undergrad@utoronto.ca) for advice and referrals if you are a student in the Major considering graduate study in Computer Science.

Computer Science Courses

CSC104H1 - Computational Thinking

Hours: 24L/12T

Humans have solved problems for millennia on computing devices by representing data as diverse numbers, text, images, sound and genomes, and then transforming the data. A gentle introduction to designing programs (recipes) for systematically solving problems that crop up in diverse domains such as science, literature, and graphics. Social and intellectual issues raised by computing. Algorithms, hardware, software, operating systems, the limits of computation.

Note: you may not take this course concurrently with any Computer Science course, but you may take [CSC108H1](#)/[CSC148H1](#) after [CSC104H1](#).

Exclusion: [JCC250H1](#); Any CSC course except [CSC196H1](#), [CSC197H1](#), [CSC199H1](#), AP, IB, CAPE or GCE Transfer Credits.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC108H1 - Introduction to Computer Programming

Hours: 36L

Programming in a language such as Python. Elementary data types, lists, maps. Program structure: control flow, functions, classes, objects, methods. Algorithms and problem solving. Searching, sorting, and complexity. Unit testing. Floating-point numbers and numerical computation. No prior programming experience required.

NOTE: You may take [CSC148H1](#) after [CSC108H1](#). You may not take [CSC108H1](#) in the same term as, or after taking, any of [CSC110Y1](#)/[CSC111H1](#)/[CSC120H1](#)/[CSC148H1](#).

Exclusion: [CSC110Y1](#), [CSC111H1](#), [CSC120H1](#), [CSC121H1](#), [CSC148H1](#), [CSC108H5](#), [CSC148H5](#), [CSCA08H3](#), [CSCA20H3](#), [CSCA48H3](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC110Y1 - Foundations of Computer Science I

Hours: 72L/24T

An introduction to the field of computer science combining the tools and techniques of programming (using the Python programming language) with rigorous mathematical analysis and reasoning. Topics include: data representations; program control flow (conditionals, loops, exceptions, functions); mathematical logic and formal proof; representation of floating-point numbers and numerical computation; algorithms and running time analysis; software engineering principles (formal specification and design, testing and verification). Prior programming experience is not required to succeed in this course.

This course is restricted to students in the first year Computer Science admission stream, and is only offered in the Fall term. Other students planning to pursue studies in computer science should enrol in [CSC108H1](#), [CSC148H1](#), and [CSC165H1](#)/[CSC240H1](#).

Exclusion: [CSC108H1](#), [CSC148H1](#), [CSC165H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC111H1 - Foundations of Computer Science II

Hours: 36L/24T

A continuation of [CSC110Y1](#) to extend principles of programming and mathematical analysis to further topics in computer science.

Topics include: object-oriented programming (design principles, encapsulation, composition and inheritance); binary representation of numbers; recursion and mathematical induction; abstract data types and data structures (stacks, queues, linked lists, trees, graphs); the limitations of computation.

This course is restricted to students in the first year Computer Science admission stream, and is only offered in the Winter term. Other students planning to pursue studies in computer science should enrol in [CSC108H1](#), [CSC148H1](#), and [CSC165H1](#)/[CSC240H1](#).

Prerequisite: [CSC110Y1](#) (70% or higher)

Exclusion: [CSC108H1](#), [CSC148H1](#), [CSC165H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC148H1 - Introduction to Computer Science

Hours: 36L/24P

Abstract data types and data structures for implementing them. Linked data structures. Encapsulation and information-hiding. Object-oriented programming. Specifications. Analyzing the efficiency of programs. Recursion. This course assumes programming experience as provided by [CSC108H1](#). Students who already have this background may consult the Computer Science Undergraduate Office for advice about skipping [CSC108H1](#). Practical (P) sections consist of supervised work in the computing laboratory. These sections are offered when facilities are available, and attendance is required. Note: Students may request to move from [CSC148H1](#) to [CSC108H1](#) after the last day to add classes and before a deadline set by the course instructors, if space is available in [CSC108H1](#) at the time of the request.

Prerequisite: [CSC108H1](#)/ (equivalent programming experience)

Exclusion: [CSC111H1](#), [CSC207H1](#), [CSC148H5](#), [CSC207H5](#), [CSCA48H3](#), [CSCB07H3](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC165H1 - Mathematical Expression and Reasoning for Computer Science

Hours: 36L/12T

Introduction to abstraction and rigour. Informal introduction to logical notation and reasoning. Understanding, using and developing precise expressions of mathematical ideas, including definitions and theorems. Structuring proofs to improve presentation and comprehension. General problem-solving techniques. Representation of floating-point numbers. Running time analysis of iterative programs. Formal definition of Big-Oh. Diagonalization, the Halting Problem, and some reductions. Unified approaches to programming and theoretical problems.

Corequisite: [CSC108H1](#)/ [CSC120H1](#)/(equivalent programming experience)

Exclusion: [CSC111H1](#), [CSC236H1](#), [CSC240H1](#), [MAT102H5](#), [CSC236H5](#), [CSCA67H3](#), [MATA67H3](#), [CSCB36H3](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC194H1 - Impactful Video Game Design

Previous Course Number: PMU199H1

Hours: 24S

An introduction to the fundamental design and development principles for digital games, and their

potential for real-world impact and social betterment. Topics include game design history & social issues, narrative and gameplay elements, human-computer interaction and project management. Strong focus on how design elements affect player engagement and learning. This course requires students to create a game as part of the course, with practical assignments and a final project that reflect industry milestones. No programming is required for this course. Please note that not all CSC first-year seminars will be offered in a given year; please check the Timetable for current offerings. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

CSC196H1 - Great Ideas in Computing

Hours: 36L

We will pursue the general (and very debatable) theme of GREAT IDEAS in COMPUTING (including some surprising algorithms). The ambitious goal is to try to identify some of the great ideas that have significantly influenced the field and have helped to make computing so pervasive. We will concentrate on mathematical, algorithmic and software ideas with the understanding that the importance and usefulness of these ideas depends upon (and often parallels) the remarkable ideas and progress in computing and communications hardware. As we will see, many of the great ideas were against the "prevailing opinion". The list of topics we shall discuss will depend to some degree on the background and interests of the class. Please note that not all CSC first-year seminars will be offered in a given year; please check the Timetable for current offerings. Restricted to first-year students. Not eligible for CR/NCR option.

Recommended Preparation: Some knowledge of probability theory

Breadth Requirements: Society and its Institutions (3)

CSC197H1 - Big Data and Privacy

Hours: 24S

The rapid advance of technology has brought remarkable changes to how we conduct our daily lives, from how we communicate, consume news and data, and purchase goods. As we increase our online activity, so too do we increase the amount of personal data that we're sharing, often without realizing it. The questions of exactly what data is being collected, who is collecting and accessing this data, and how this data is being used, have significant implications for both individuals and our larger social and political institutions. Organized by a wide variety of case studies drawn from current events, we'll study how personal data can be collected and tracked, how personal

and social factors may influence our own decisions about whether and how much to share our data, and what broader political and legal tools are used to either protect or subvert individual privacy. Please note that not all CSC first-year seminars will be offered in a given year; please check the Timetable for current offerings. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

CSC199H1 - Intelligence, Artificial and Human

Hours: 36S

What is human intelligence? How close are we to replicating it? How productive/reductive is the brain-computer analogy? What ethical challenges are posed by AI on workers, society, and the environment? Can we put a hold on "progress"? Is Silicon Valley the seat of a new techno-religion? What can they teach us about today's research priorities? What insight (or inspiration) can we get from works of science fiction about the future of human-AI interaction? Through reading discussion, written assignment, and workshops, this seminar will present students with the opportunity to integrate their computer science interests with philosophy, history, and literature. *There is an equivalent course offered by St. Michael's College. Students may take one or the other but not both.* Please note that not all CSC first-year seminars will be offered in a given year; please check the Timetable for current offerings. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: SMC199H1 (Intelligence, Artificial and Human)

Breadth Requirements: Society and its Institutions (3)

CSC207H1 - Software Design

Hours: 24L/24T

An introduction to software design and development concepts, methods, and tools using a statically-typed object-oriented programming language such as Java. Topics from: version control, unit testing, refactoring, object-oriented design and development, design patterns, advanced IDE usage, regular expressions, and reflection.

Prerequisite: 60% or higher in CSC148H1/ 60% or higher in CSC148H5/ 60% or higher in CSCA48H3/ 60% or higher in CSC111H1

Exclusion: CSC207H5, CSCB07H3

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC209H1 - Software Tools and Systems Programming

Hours: 24L/12T

Software techniques in a Unix-style environment, using scripting languages and a machine-oriented programming language (typically C). What goes on in the operating system when programs are executed. Core topics: creating and using software tools, pipes and filters, file processing, shell programming, processes, system calls, signals, basic network programming.

Prerequisite: CSC207H1/ CSC207H5/ CSCB07H3

Exclusion: CSC372H1, CSC369H1, CSC469H1, CSC209H5, CSC369H5, CSC469H5, CSCB09H3, CSCC69H3

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC236H1 - Introduction to the Theory of Computation

Hours: 24L/12T

The application of logic and proof techniques to Computer Science. Mathematical induction; correctness proofs for iterative and recursive algorithms; recurrence equations and their solutions; introduction to automata and formal languages. This course assumes university-level experience with proof techniques and algorithmic complexity as provided by CSC165H1. Very strong students who already have this experience (e.g. successful completion of MAT157Y1) may consult the undergraduate office about proceeding directly into CSC236H1 or CSC240H1.

Prerequisite: (60% or higher in CSC148H1/ 60% or higher in CSC148H5/ 60% or higher in CSCA48H3; 60% or higher in CSC165H1 /60% or higher in MAT102H5/ 60% or higher in CSCA67H3/ 60% or higher in MATA67H3)/ 60% or higher in CSC111H1

Exclusion: CSC240H1, CSC236H5, CSCB36H3

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC240H1 - Enriched Introduction to the Theory of Computation

Hours: 24L/12T

The rigorous application of logic and proof techniques to Computer Science. Propositional and predicate logic; mathematical induction and other basic proof techniques; correctness proofs for iterative and recursive algorithms; recurrence equations and their solutions (including the

Master Theorem); introduction to automata and formal languages. This course covers the same topics as [CSC236H1](#), together with selected material from [CSC165H1](#), but at a faster pace, in greater depth and with more rigour, and with more challenging assignments. Greater emphasis will be placed on proofs and theoretical analysis. Certain topics briefly mentioned in [CSC165H1](#) or [CSC236H1](#) may be covered in more detail in this course, and some additional topics may also be covered.

Prerequisite: [CSC110Y1](#) (with a minimum mark of at least 85%) / [CSC165H1](#) (with a minimum mark of at least 85%). Students with a strong mathematical background who have not completed [CSC110Y1](#) or [CSC165H1](#) may apply for a prerequisite waiver to take [CSC240H1](#) as an enriched alternative to [CSC165H1](#).

Corequisite: Corequisite: [CSC111H1](#)/ [CSC148H1](#); [MAT137Y1](#)/ [MAT157Y1](#). [MAT135H1](#) and [MAT136H1](#) do not provide appropriate preparation for [CSC240H1](#). Students with programming experience equivalent to [CSC111H1](#)/ [CSC148H1](#) or who have completed math courses equivalent to [MAT137Y1](#)/ [MAT157Y1](#) may apply for a corequisite waiver.

Exclusion: [CSC236H1](#), [CSC263H1](#)/ [CSC265H1](#), [CSC236H5](#), [CSC263H5](#), [CSCB36H3](#), [CSCB63H3](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

JCC250H1 - Computing for Science

Previous Course Number: CSC198H1

Hours: 24L/24T

Computational skills for the modern practice of basic and applied science. Applied computer programming with an emphasis on practical examples related to the simulation of matter, drawing from scientific disciplines including chemistry, biology, materials science, and physics. Studio format with a mixture of lecture, guided programming, and open scientific problem solving. Students will be exposed to Python numerical and data analysis libraries. No prior programming experience is required.

Prerequisite: [CHM135H1](#)/ [CHM136H1](#)/ [CHM151Y1](#), 0.5 credit in MAT (excluding FYF courses)

Exclusion: Any CSC course except [CSC104H1](#), [CSC196H1](#), [CSC197H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC258H1 - Computer Organization

Hours: 36L/36P

Computer structures, machine languages, instruction execution, addressing techniques, and digital representation of data. Computer system organization, memory storage devices, and microprogramming. Block

diagram circuit realizations of memory, control and arithmetic functions. There are a number of laboratory periods in which students conduct experiments with digital logic circuits.

Prerequisite: (60% or higher in ([CSC148H1](#)/ [CSC148H5](#)/ [CSCA48H3](#)), 60% or higher in ([CSC165H1](#)/ [CSC240H1](#)/ [MAT102H5](#)/ [MATA67H3](#)/ [CSCA67H3](#)))/ 60% or higher in [CSC111H1](#)

Exclusion: [CSC258H5](#), [CSCB58H3](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC263H1 - Data Structures and Analysis

Hours: 24L/12T

Algorithm analysis: worst-case, average-case, and amortized complexity. Expected worst-case complexity, randomized quicksort and selection. Standard abstract data types, such as graphs, dictionaries, priority queues, and disjoint sets. A variety of data structures for implementing these abstract data types, such as balanced search trees, hashing, heaps, and disjoint forests. Design and comparison of data structures. Introduction to lower bounds.

Prerequisite: [CSC236H1](#)/ [CSC240H1](#)/ [CSC236H5](#)/ [CSCB36H3](#); [STA237H1](#)/ [STA247H1](#)/ [STA255H1](#)/ [STA257H1](#)/ [STAB57H3](#)/ [STAB52H3](#) **Prerequisite for Faculty of Applied Science and Engineering students:** [APS105H1](#)/ [APS106H1](#)/ [ESC180H1](#); [ECE302H1](#)/ [STA286H1](#)/ [CHE223H1](#)/ [CME263H1](#)/ [MIE231H1](#)/ [MIE236H1](#)/ [MSE238H1](#)/ [ECE286H1](#)

Exclusion: [CSC265H1](#), [CSC263H5](#), [CSCB63H3](#), [MIE245H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC265H1 - Enriched Data Structures and Analysis

Hours: 24L/12T

This course covers the same topics as [CSC263H1](#), but at a faster pace, in greater depth and with more rigour, and with more challenging assignments. Greater emphasis will be placed on proofs, theoretical analysis, and creative problem-solving. Certain topics briefly mentioned in [CSC263H1](#) may be covered in more detail in this course, and some additional topics may also be covered.

Prerequisite: minimum of 70% in [CSC240H1](#)/ (minimum of 85% in [CSC236H1](#)/ minimum of 85% in [CSC236H5](#)/ minimum of 85% in [CSCB36H3](#), [MAT377H1](#)/ [STA237H1](#)/ [STA247H1](#)/ [STA255H1](#)/ [STA257H1](#)) Notes: Students who

have completed CSC240H1 must enrol in MAT377H1/ STA237H1/ STA247H1/ STA255H1/ STA257H1 concurrently with CSC265H1, if they have not already completed one of those courses. Students who have completed additional 200- or 300-level Mathematics courses may submit a prerequisite waiver request for permission to complete the statistics requirement as a co-requisite or to consider other courses as appropriate preparation for CSC265H1.

Exclusion: CSC263H1, CSC263H5, CSCB63H3

Breadth Requirements: The Physical and Mathematical Universes (5)

JSC270H1 - Data Science I

Hours: 24L/24P

This course is restricted to students in the Data Science Specialist program. Data exploration and preparation; data visualization and presentation; and computing with data will be introduced. Professional skills, such as oral and written communication, and ethical skills for data science will be introduced. Data science workflows will be integrated throughout the course. These topics will be explored through case studies and collaboration with researchers in other fields.

Prerequisite: STA257H1, CSC207H1

Corequisite: STA261H1, MAT237Y1/ MAT257Y1, CSC236H1/ CSC240H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC271H1 - Computational Principles and Methods for Data Science

Hours: 24L/12T

Computational tools and methods are a cornerstone of the data scientist's toolbox, useful in a variety of applications and disciplines. This course builds on introductory data science and computer programming skills to equip students with several of these tools and methods. Computational methods for gathering and storing data via web APIs or web scraping or other formats; data pre-processing methods useful in data science algorithms; using version control and other tools to implement reproducible data science workflows; using web tools to communicate data science results and build data science products; creating, distributing, and accessing open-source data science software libraries. This course assumes prerequisite experience in computer programming, but does not require any additional knowledge or prior experience with any of the tools or methods covered.

Prerequisite: CSC108H1/ CSC110Y1/ CSC148H1

Exclusion: CSC207H1/ ECO225H1

Recommended Preparation: EEB125H1/ GGR274H1/ ENG286H1/ STA130H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

CSC299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

CSC300H1 - Computers and Society

Hours: 24L/12T

This course offers a concise introduction to ethics in computing, distilled from the ethical and social discussions carried on by today's academic and popular commentators. This course covers a wide range of topics within this area including the philosophical framework for analyzing computer ethics; the impact of computer technology on security, privacy and intellectual property, digital divide, and gender and racial discrimination; the ethical tensions with Artificial Intelligence around future of work and humanity, the emerging role of online social media over voice, inclusion, and democracy; and the environmental consequences of computing.

Prerequisite: 0.5 credit in CSC

Exclusion: CSC300H5, CSCD03H3. NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: Society and its Institutions (3)

CSC301H1 - Introduction to Software Engineering

Hours: 24L/12T

An introduction to agile development methods appropriate for medium-sized teams and rapidly-moving projects. Basic software development infrastructure; requirements elicitation and tracking; estimation and prioritization; teamwork skills; basic modeling; design patterns and refactoring; discussion of ethical issues, and professional responsibility.

Prerequisite: CSC209H1/ CSC209H5/ CSCB09H3, CSC263H1/ CSC265H1/ CSC263H5/ CSCB63H3

Exclusion: CSC301H5, CCCC01H3. NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC302H1 - Engineering Large Software Systems

Hours: 24L/12T

An introduction to the theory and practice of large-scale software system design, development, and deployment. Project management; advanced UML; reverse engineering; requirements inspection; verification and validation; software architecture; performance modelling and analysis.

Prerequisite: CSC301H1/ CSC301H5/ CCCC01H3

Exclusion: CSCD01H3. NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC303H1 - Social and Information Networks

Hours: 24L/12T

A course on how networks underlie the social, technological, and natural worlds, with an emphasis on developing intuitions for broadly applicable concepts in network analysis. Topics include: introductions to graph theory, network concepts, and game theory; social networks; information networks; the aggregate behaviour of markets and crowds; network dynamics; information

diffusion; popular concepts such as "six degrees of separation," the "friendship paradox," and the "wisdom of crowds."

Prerequisite: CSC263H1/ CSC265H1/ CSC263H5/ CSCB63H3, STA247H1/ STA255H1/ STA257H1/ ECO227Y1/ STA237H1/ STAB52H3/ STAB57H3, MAT223H1/ MAT240H1

Exclusion: CSCC46H3. NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC304H1 - Algorithmic Game Theory and Mechanism Design

Hours: 24L/12P

A mathematical and computational introduction to game theory and mechanism design. Analysis of equilibria in games and computation of price of anarchy. Design and analysis mechanisms with monetary transfers (such as auctions). Design and analysis of mechanisms without monetary transfers (such as voting and matching). This course is intended for economics, mathematics, and computer science students.

Prerequisite: STA247H1/ STA255H1/ STA257H1/ STA237H1/ PSY201H1/ ECO227Y1, (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Recommended Preparation: MAT223H1, CSC373H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC308H1 - Technology Leadership

Hours: 36L

An exploration of the core aspects of leadership within the context of the software-oriented industry and academic research sectors. Topics include corporate mission, vision, and stakeholder roles in the technology sector; strategic planning; competitive technology market analysis; decision-making; a practical awareness of financial documents; contract negotiation; equity and financing in technology business growth; business-to-business (B2B) and business-to-consumer (B2C) software markets; principles of effective communication and influence in a corporate setting; professional development

strategies for a software-oriented career; crafting an impactful elevator pitch; understanding of employment rights. The approach ensures that graduates are well-prepared to step into leadership roles and navigate the complexities of the tech industry and of academic research.

Students must be enrolled in the Focus in Technology Leadership to enrol in this course.

Prerequisite: [CSC207H1](#)

Breadth Requirements: Society and its Institutions (3)

CSC309H1 - Programming on the Web

Hours: 24L/12T

An introduction to software development on the web. Concepts underlying the development of programs that operate on the web; survey of technological alternatives; greater depth on some technologies. Operational concepts of the internet and the web, static client content, dynamic client content, dynamically served content, n-tiered architectures, web development processes, and security on the web.

Prerequisite: [CSC209H1](#)/ [CSC209H5](#)/ [CSCB09H3](#)

Prerequisite for Faculty of Applied Science and Engineering students: [ESC180H1](#)/ [ESC190H1](#)/ ([APS105H1](#), [ECE244H1](#))

Exclusion: [CSC309H5](#), [CSCC09H3](#). NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/ 400-level CSC/ ECE courses.

Recommended Preparation: [CSC343H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC310H1 - Information Theory

Hours: 24L/12T

Measuring information. Entropy, mutual information and their meaning. Probabilistic source models and the source coding theorem. Data compression. Noisy channels and the channel coding theorem. Error correcting codes and their decoding. Applications to inference, learning, data structures and communication complexity.

Prerequisite: 60% or higher in [CSC148H1](#)/ 60% or higher in [CSC148H5](#)/ 60% or higher in [CSCA48H3](#)/ 60% or higher in [CSC111H1](#); [CSC263H1](#)/ [CSC263H5](#)/ [CSCB63H3](#)/ [CSC265H1](#); [MAT223H1](#)/ [MAT240H1](#)
Prerequisite for Faculty of Applied Science and Engineering students: [ESC190H1](#); [ECE345H1](#)/ [ECE358H1](#)/ [MIE245H1](#); [MAT185H1](#)/ [MAT188H1](#)

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC311H1 - Introduction to Machine Learning

Previous Course Number: CSC411H1

Hours: 24L/12T

An introduction to methods for automated learning of relationships on the basis of empirical data. Classification and regression using nearest neighbour methods, decision trees, linear models, and neural networks. Clustering algorithms. Problems of overfitting and of assessing accuracy.

Prerequisite: [CSC207H1](#)/ [CSC207H5](#)/ [CSCB07H3](#); [MAT235Y1](#)/ [MAT237Y1](#)/ [MAT257Y1](#)/ (minimum of 77% in [MAT135H1](#) and [MAT136H1](#))/ (minimum of 73% in [MAT137Y1](#))/ (minimum of 67% in [MAT157Y1](#)); [MAT223H1](#)/ [MAT240H1](#); [STA237H1](#)/ [STA247H1](#)/ [STA255H1](#)/ [STA257H1](#) **Prerequisite for Faculty of Applied Science and Engineering students:** [APS105H1](#)/ [APS106H1](#)/ [ESC180H1](#)/ [CSC180H1](#); [MAT291H1](#)/ [MAT294H1](#)/ (minimum of 77% in [MAT186H1](#), [MAT187H1](#))/ (minimum of 73% in [MAT194H1](#), [MAT195H1](#))/ (minimum of 73% in [ESC194H1](#), [ESC195H1](#)); [MAT185H1](#)/ [MAT188H1](#); [STA286H1](#)/ [CHE223H1](#)/ [CME263H1](#)/ [MIE231H1](#)/ [MIE236H1](#)/ [MSE238H1](#)/ [ECE286H1](#)

Exclusion: [CSC411H1](#), [STA314H1](#), [ECE421H1](#), [CSC311H5](#), [CSC411H5](#), [CSCC11H3](#). NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Recommended Preparation: [MAT235Y1](#)/ [MAT237Y1](#)/ [MAT257Y1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC316H1 - Data Visualization: Foundations and Advanced Programming

Hours: 24L/12T

The amount and complexity of information produced in science, engineering, business, and everyday human activity is increasing at staggering rates. The goal of this course is to expose you to visual representation methods and techniques that increase the understanding of

complex data. Good visualizations not only present a visual interpretation of data, but do so by improving comprehension, communication, and decision making.

In this course you will learn how the human visual system processes and perceives images, good design practices for visualization, methods for visualization of data from a variety of fields, and programming of interactive web-based visualizations, using front-end libraries (e.g., D3 or Vega).

Prerequisite: [CSC207H1/ CSC207H5/ CSCB07H3](#)

Recommended Preparation: Javascript knowledge helpful, but not required

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC317H1 - Computer Graphics

Previous Course Number: CSC418H1

Hours: 24L/12T

Identification and characterization of the objects manipulated in computer graphics, the operations possible on these objects, efficient algorithms to perform these operations, and interfaces to transform one type of object to another. Display devices, display data structures and procedures, graphical input, object modelling, transformations, illumination models, primary and secondary light effects; graphics packages and systems. Students, individually or in teams, implement graphical algorithms or entire graphics systems.

Prerequisite: [MAT235Y1/ MAT237Y1/ MAT257Y1/ \(MAT232H5/ MAT233H5, MAT236H5\)/ \(MATB41H3, MATB42H3\); MAT223H1/ MAT240H1/ MAT223H5/ MATA22H3; CSC209H1/ CSC209H5/ CSCB09H3/](#) proficiency in C or C++

Prerequisite for Faculty of Applied Science and Engineering students:

[MAT291H1/ MAT292H1/ MAT294H1; MAT185H1/ MAT188H1; APS105H1/ ESC180H1/ CSC180H1](#)

Exclusion: [CSC418H1, CSCD18H3](#). NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Recommended Preparation: [MAT244H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC318H1 - The Design of Interactive Computational Media

Hours: 24L/24T

User-centred design of interactive systems; methodologies, principles, and metaphors; task analysis.

Interdisciplinary design; the role of graphic design, industrial design, and the behavioural sciences. Interactive hardware and software; concepts from computer graphics. Typography, layout, colour, sound, video, gesture, and usability enhancements. Classes of interactive graphical media; direct manipulation systems, extensible systems, rapid prototyping tools. Students work on projects in interdisciplinary teams.

Prerequisite: Any 0.5 credit in CSC **Prerequisite for Faculty of Applied Science and Engineering students:** [ESC180H1/ ESC190H1/ APS105H1/ APS106H1](#)

Exclusion: [CSC318H5, CSCC10H3](#). NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Recommended Preparation: [CSC300H1](#) provides useful background for work in [CSC318H1](#), so if you plan to take [CSC300H1](#) then you should do it before [CSC318H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC320H1 - Introduction to Visual Computing

Hours: 24L/12T

A first-principles introduction to the acquisition and computational processing of 2D images, aimed at students interested in computer vision, digital photography and computer graphics. The course serves as a stepping stone for tackling more advanced courses in those subjects and covers four broad themes: (1) mathematical and engineering foundations: introducing key concepts from geometry; multivariate calculus; linear algebra; image and signal processing; and human vision, (2) algorithms for low-level computer vision: image warping, morphing and stitching; image enhancement; image scissoring and inpainting; color image processing and display; face recognition; and 2D image matching, (3) implementing several such tools in Python, and (4) a first taste of vision and graphics research. Understanding how to turn algorithmic descriptions in research papers into working computer vision code—and how to evaluate its performance—will be key skills acquired in the course.

Prerequisite: [CSC263H1/ CSC265H1/ CSC263H5/ CSCB63H3; MAT223H1/ MAT240H1; \(MAT136H1 with a minimum mark of 77\)/ \(MAT137Y1 with a minimum mark of 73\)/ \(MAT157Y1 with a minimum mark of 67\)/ MAT235Y1/ MAT237Y1/ MAT257Y1](#) **Prerequisite for Faculty of Applied Science and Engineering students:** [ECE345H1/ ECE358H1/ MIE335H1; MAT185H1/ MAT188H1; MAT291H1/ MAT292H1](#)

Exclusion: [CSC320H5](#). NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-

level CSC/ECE courses.

Recommended Preparation: MAT235Y1/ MAT237Y1/ MAT257Y1/ (MAT232H5, MAT236H5)/ (MAT233H5, MAT236H5)/ (MATB41H3, MATB42H3)

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC324H1 - Principles of Programming Languages

Hours: 24L/12T

Programming principles common in modern languages; details of commonly used paradigms. The structure and meaning of code. Scope, control flow, datatypes, and parameter passing. Two non-procedural, non-object-oriented programming paradigms: functional programming (illustrated by languages such as Lisp/Scheme, ML or Haskell) and logic programming (typically illustrated in Prolog).

Prerequisite: CSC263H1/ CSC265H1/ CSC263H5/ CSCB63H3

Exclusion: CSC324H5, CCCC24H3. NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC336H1 - Numerical Methods

Hours: 24L/12T

The study of computational methods for solving problems in linear algebra, non-linear equations, and approximation. The aim is to give students a basic understanding of both floating-point arithmetic and the implementation of algorithms used to solve numerical problems, as well as a familiarity with current numerical computing environments.

Prerequisite: CSC148H1/ CSC148H5/ CSCA48H3/ CSC111H1; MAT133Y1(70%)/ (MAT135H1, MAT136H1)/ MAT135Y1/ MAT137Y1/ MAT157Y1, MAT223H1/ MAT240H1

Exclusion: CSC338H5, CCCC37H3. NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC343H1 - Introduction to Databases

Hours: 36L

Introduction to database management systems. The relational data model. Relational algebra. Querying and updating databases: the query language SQL. Application programming with SQL. Integrity constraints, normal forms, and database design. Elements of database system technology: query processing, transaction management.

Prerequisite: CSC111H1/ CSC165H1/ MAT102H5/ CSCA67H3/ MATA67H3/ CSC240H1/ (MAT135H1, MAT136H1)/ MAT135Y1/ MAT137Y1/ MAT157Y1; CSC207H1/ CSC207H5/ CSCB07H3 **Prerequisite for Faculty of Applied Science and Engineering students:** (ESC194H1, ESC195H1)/ (MAT186H1, MAT187H1)/ (MAT194H1, MAT195H1); ECE345H1/ ESC190H1

Exclusion: CSC343H5, CCCC43H3, MIE253H1, MIE353H1. NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC364H1 - Foundations of Computer Security

Hours: 24L/12T

This course provides a comprehensive introduction to computer security, covering the foundational principles of secure systems and cryptography. It focuses on the core principles of designing secure systems, including the use of cryptography to ensure data confidentiality and integrity. Students will also learn how to approach systems from an adversarial perspective and study threat modeling to better understand and mitigate security threats. The course serves as an entry point for undergraduates interested in computer security and prepare students for advanced topics such as applied cryptography, systems security, machine learning security, and theoretical cryptography at the graduate level.

Prerequisite: CSC209H1/ CSC209H5/ CSCB09H3, CSC236H1/ CSC236H5/ CSCB36H3

Corequisite: CSC369H1/ CSC369H5/ CCCC69H3

Exclusion: CSC347H5, CSC427H5, ECE568H1, CSCD27H3

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC367H1 - Parallel Programming

Hours: 24L/12T

Introduction to aspects of parallel programming. Topics include computer instruction execution, instruction-level parallelism, memory system performance, task and data parallelism, parallel models (shared memory, message passing), synchronization, scalability and Amdahl's law, Flynn taxonomy, vector processing and parallel computing architectures.

Prerequisite: [CSC258H1/ CSC258H5/ CSCB58H3](#); [CSC209H1/ CSC209H5/ CSCB09H3](#)

Exclusion: [CSC367H5](#). NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC368H1 - Computer Architecture

Hours: 24L/12T

An introduction to computer architecture and how to evaluate the performance of workloads running on processor architectures. Topics include statically and dynamically scheduling instructions in a processor pipeline; speculative execution through branch prediction; hardware cache organizations, their policies, and prefetching; multi-core processors, cache coherence, and synchronization primitives. Additional topics may include other relevant architectures, such as GPUs or domain specific accelerators.

Prerequisite: [CSC209H1/ CSC209H5/ CSCB09H3](#), [CSC258H1/ CSC258H5/ CSCB58H3](#)

Exclusion: [ECE552H1](#). NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC369H1 - Operating Systems

Hours: 24L/12T

Principles of operating systems. The operating system as a control program and as a resource allocator. The concept of a process and concurrency problems: synchronization, mutual exclusion, deadlock. Additional topics include memory management, file systems, process scheduling, threads, and protection.

Prerequisite: [CSC209H1/ CSC209H5/ CSCB09H3](#); [CSC258H1/ CSC258H5/ CSCB58H3](#)

Exclusion: [CSC369H5](#), [CSCC69H3](#). NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

JSC370H1 - Data Science II

Hours: 24L/24P

This course is **restricted to** students in the Data Science Specialist program. Students will learn to identify and answer questions through the application of exploratory data analysis, data visualization, statistical methods or machine learning algorithms to complex data. Software development for data science and reproducible workflows. Communication of statistical information at various technical levels, ethical practice of data analysis and software development, and teamwork skills. Topics will be explored through case studies and collaboration with researchers in other fields.

Prerequisite: [JSC270H1](#), [STA261H1](#), [MAT237Y1/ MAT257Y1](#), [CSC263H1/ CSC265H1/ CSC263H5/ CSCB63H3](#), [STA302H1](#), [CSC343H1/ CSC343H5/ CSCC43H3](#)

Corequisite: [STA303H1/ STA305H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC373H1 - Algorithm Design, Analysis & Complexity

Hours: 36L/12T

Standard algorithm design techniques: divide-and-conquer, greedy strategies, dynamic programming, linear programming, randomization, network flows, approximation algorithms. Brief introduction to NP-completeness: polynomial time reductions, examples of various NP-complete problems, self-reducibility. Additional topics may include approximation and randomized algorithms. Students will be expected to show good design principles and adequate skills at reasoning about the correctness and complexity of algorithms.

Prerequisite: [CSC263H1/ CSC265H1 / CSC263H5/ CSCB63H3](#)

Exclusion: [CSC375H1](#), [CSC373H5](#), [CSCC73H3](#). NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC384H1 - Introduction to Artificial Intelligence

Hours: 24L/12T

Theories and algorithms that capture (or approximate) some of the core elements of computational intelligence. Topics include: search; logical representations and reasoning, classical automated planning, representing and reasoning with uncertainty, learning, decision making (planning) under uncertainty. Assignments provide practical experience, in both theory and programming, of the core topics.

Prerequisite: CSC263H1/ CSC265H1/ CSC263H5/ CSCB63H3, STA237H1/ STA247H1/ STA255H1/ STA257H1/ STAB57H3/ STAB52H3. Notes: students enrolled in ASMAJ1446A who have completed at least 9.0 credits may substitute CSC111H1/ CSC148H1 for CSC263H1 and STA220H1/ PSY201H1 for STA237H1. Starting in 2026-27, these students will require CSC111H1/ (CSC148H1, CSC165H1/ MAT137Y1) to substitute for CSC263H1.

Prerequisite for Applied Science and Engineering students: ECE345H1/ ECE358H1/ MIE245H1; ECE302H1/ STA286H1/ CHE223H1/ CME263H1/ MIE231H1/ MIE236H1/ MSE238H1/ ECE286H1

Exclusion: CSC384H5, CSCD84H3, MIE369H1. NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Recommended Preparation: CSC324H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC385H1 - Microprocessor Systems

Hours: 24L/24P

An examination of the issues unique to embedded computing and the Internet of Things (IoT). Software techniques for programming with sensors on lightweight, low-power processors. Topics include embedded processor architectures, interrupts, scheduling for real-time systems, power consumption, and connected device characteristics. Laboratory experiments provide hands-on experience with embedded systems. A refundable deposit of \$90 will be charged for the use of discovery board in lab activities.

Prerequisite: CSC209H1/ CSC209H5/ CSCB09H3, CSC258H1/ CSC258H5/ CSCB58H3

Exclusion: NOTE: Students not enrolled in the Computer

Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC396Y0 - Designing Systems for Real World Problems

This Summer Abroad special offering provides students with an opportunity to explore new environments, which improves their ability to see their own world with increased sensitivity and germinates new design ideas. In this course, students will identify a real problem in the world and work in groups on projects addressing this problem. Students will explore their problem space and the people within that space, identify needs, constraints, and requirements, and ultimately design solutions. Their designs will be iterated by gathering feedback and conducting usability testing on the early prototypes. The course projects will culminate with development of a technological solution that addresses the identified problem. Final project presentations will take place at the end of the course. This course can be counted as 0.5 credit at the 300-level for Computer Science program completion.

Prerequisite: Any CSC 0.5 credit, and balloting

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at

<https://www.artsci.utoronto.ca/current/academics/research-opportunities....> Not eligible for CR/NCR option.

CSC398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at

<https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

CSC399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...> Not eligible for CR/NCR option.

CSC399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

CSC401H1 - Natural Language Computing

Hours: 24L/12T

Introduction to techniques involving natural language processing and speech in applications such as information retrieval, speech recognition and synthesis, machine translation, summarization, and dialogue. N-grams, corpus analysis, neural methods, and information theory. Python and other software.

Prerequisite: CSC207H1/ CSC209H1/ CSC207H5/ CSCB07H3/ CSC209H5/ CSCB09H3/ STA237H1/ STA247H1/ STA255H1/ STA257H1/ STAB57H3/ STAB52H3 **Prerequisite for Faculty of Applied Science and Engineering students:** APS105H1/ APS106H1/ ESC180H1/ CSC180H1/ ECE302H1/ STA286H1/ CHE223H1/ CME263H1/ MIE231H1/ MIE236H1/ MSE238H1/ ECE286H1

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Recommended Preparation: CSC311H1, MAT221H1/ MAT223H1/ MAT240H1 is strongly recommended

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC404H1 - Introduction to Video Game Design

Hours: 36L

Concepts and techniques for the design and development of electronic games. History, social issues, and story elements. The business of game development and game promotion. Software engineering, artificial intelligence, and graphics elements. Level and model design. Audio elements. Practical assignments leading to team implementation of a complete game.

Students must submit an application to the course describing relevant interests, experience, and skills and general academic history. Application questions are set and assessed by the instructor. Applications from St. George students enrolled in a Computer Science program or the Data Science Specialist program will be considered first. Applications by students from other programs with appropriate prerequisites will be considered as space permits.

Please visit <https://q.utoronto.ca/courses/221753/pages/400-level-course-balloting-and-applications> for application deadlines and details. A decision on your application will be confirmed approximately 2-3 weeks after the application deadline, so students should enrol in an alternate course until the results of their application are confirmed.

Prerequisite: CSC301H1/ CSC301H5/ CSCC01H3/ CSC317H1/ CSC318H1/ CSC318H5/ CSCC10H3/ CSC384H1/ CSC384H5/ CSCD84H3/ CSC417H1/ CSC419H1

Exclusion: CSC404H5. NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: Creative and Cultural Representations (1)

CSC410H1 - Software Testing and Verification

Hours: 24L/24T

Concepts and state-of-the-art techniques in quality assessment for software engineering; quality attributes; formal specifications and their analysis; testing, verification, and validation.

Prerequisite: CSC207H1/ CSC207H5/ CSCB07H3, CSC236H1/ CSC236H5/ CSCB36H3/ CSC240H1

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited

to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Recommended Preparation: [CSC330H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC412H1 - Probabilistic Learning and Reasoning

Hours: 24L/12T

An introduction to probability as a means of representing and reasoning with uncertain knowledge. Qualitative and quantitative specification of probability distributions using probabilistic graphical models. Algorithms for inference and probabilistic reasoning with graphical models. Statistical approaches and algorithms for learning probability models from empirical data. Applications of these models in artificial intelligence and machine learning.

Prerequisite: [CSC311H1](#)/ [STA314H1](#)/ [CSCC11H3](#)/ [CSC311H5](#) **Prerequisite for Faculty of Applied Science and Engineering students:** [ECE421H1](#)/ [ROB313H1](#)

Exclusion: [STA414H1](#), [STAD68H3](#). NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC413H1 - Neural Networks and Deep Learning

Previous Course Number: [CSC321H1](#)/[CSC421H1](#)

Hours: 24L/12T

An introduction to neural networks and deep learning. Backpropagation and automatic differentiation. Architectures: convolutional networks and recurrent neural networks. Methods for improving optimization and generalization. Neural networks for unsupervised and reinforcement learning.

Prerequisite: [CSC311H1](#)/ [CSC311H5](#)/ [CSCC11H3](#)/ [STA314H1](#); [MAT235Y1](#)/ [MAT237Y1](#)/ [MAT257Y1](#)/ [MAT257Y5](#)/ ([MAT232H5](#), [MAT236H5](#)) / ([MAT233H5](#), [MAT236H5](#)) / ([MATB41H3](#), [MATB42H3](#)); [MAT223H1](#)/ [MAT240H1](#)/ [MAT223H5](#)/ [MATA23H3](#) **Prerequisite for Faculty of Applied Science and Engineering students:** [ECE421H1](#)/ [ROB313H1](#); [MAT291H1](#)/ [MAT294H1](#)/ [AER210H1](#); [MAT185H1](#)/ [MAT188H1](#)

Exclusion: [CSC321H5](#), [CSC413H5](#). NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits

in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC417H1 - Physics-Based Animation

Hours: 24L/12T

This course is designed to introduce students to the field of physics-based animation by exposing them to the underlying mathematical and algorithmic techniques required to understand and develop efficient numerical simulations of physical phenomena such as rigid bodies, deformable bodies and fluids. Topics covered include rigid body simulation, elasticity simulation, cloth simulation, collision detection and resolution and fluid simulation. Along the way, we will explore the underlying mathematics of ordinary differential equations, discrete time integration, finite element methods and more.

Students should have a strong background in Linear Algebra and Multivariate Calculus.

Prerequisite: [MAT235Y1](#)/ [MAT237Y1](#)/ [MAT257Y1](#); [MAT223H1](#)/ [MAT240H1](#); [CSC209H1](#)/ [CSC209H5](#)/ [CSCB09H3](#)/ proficiency in C or C++ **Prerequisite for Faculty of Applied Science and Engineering students:** [MAT291H1](#)/ [MAT294H1](#); [MAT185H1](#)/ [MAT188H1](#); [APS105H1](#)/ [ESC180H1](#)/ [CSC180H1](#)

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC419H1 - Geometry Processing

Hours: 24L/12T

Extending traditional signal processing, geometry processing interprets three-dimensional curves and surfaces as signals. Just as audio and image signal data can be filtered, denoised and decomposed spectrally, so can the geometry of a three-dimensional curve or surface. The course covers algorithms and mathematics behind fundamental operations for interpreting and manipulating geometric data. These essential tools enable: geometric modeling for computer aided design, life-like animations for computer graphics, reliable physical simulations, and robust scene representations for computer vision. Topics include: discrete curves and surfaces, curvature computation, surface reconstruction from point clouds, surface smoothing and denoising, parameterization, symmetry detection, and animation.

Prerequisite: MAT235Y1/ MAT237Y1/ MAT257Y1/ MAT223H1/ MAT240H1/ CSC209H1/ CSC209H5/ CSCB09H3/ proficiency in C or C++ **Prerequisite for Faculty of Applied Science and Engineering students:** MAT291H1/ MAT294H1/ MAT185H1/ MAT188H1/ APS105H1/ ESC180H1/ CSC180H1

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Recommended Preparation: CSC317H1/ CSC418H1
Breadth Requirements: The Physical and Mathematical Universes (5)

CSC420H1 - Introduction to Image Understanding

Hours: 24L/12P

Introduction to basic concepts in computer vision. Extraction of image features at multiple scales. Robust estimation of model parameters. Multiview geometry and reconstruction. Image motion estimation and tracking. Object recognition. Topics in scene understanding as time permits.

Prerequisite: CSC263H1/ CSC265H1/ CSC263H5/ CSCB63H3/ ECE345H1/ ECE358H1/ MIE335H1/ CSC311H1/ STA314H1/ CSC311H5/ CSCC11H3/ ROB313H1/ ECE421H1/ CSC320H1/ CSC320H5

Exclusion: CSC420H5. NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC428H1 - Human-Computer Interaction

Hours: 24L/12T

Understanding human behaviour as it applies to user interfaces: work activity analysis, observational techniques, questionnaire administration, and unobtrusive measures. Operating parameters of the human cognitive system, task analysis and cognitive modelling techniques and their application to designing interfaces. Interface representations and prototyping tools. Cognitive walkthroughs, usability studies and verbal protocol analysis. Case studies of specific user interfaces.

Prerequisite: CSC318H1/ CSC318H5/ CSCC10H3/ STA237H1/ STA247H1/ STA255H1/ STA257H1/ ECE302H1/ STA286H1/ CHE223H1/ CME263H1/

MIE231H1/ MIE236H1/ MSE238H1/ ECE286H1/ CSC207H1/ APS105H1/ ESC180H1/ CSC180H1

Exclusion: CSC428H5. NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Recommended Preparation: A course in PSY; (STA248H1/ STA250H1/ STA261H1/ (PSY201H1, PSY202H1/ (SOC202H1, SOC300H1))

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC436H1 - Numerical Algorithms

Hours: 24L/12T

Numerical algorithms for the algebraic eigenvalue problem, approximation, integration, and the solution of ordinary differential equations. Emphasis is on the convergence, stability, and efficiency properties of the algorithms.

Prerequisite: CSC336H1/ CSC338H5/ CSCC37H3

Exclusion: CSCD37H3. NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Recommended Preparation: MAT235Y1/ MAT237Y1/ MAT257Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC438H1 - Computability and Logic

Hours: 24L/12T

Computable functions, Church's thesis, unsolvable problems, recursively enumerable sets. Predicate calculus, including the completeness, compactness, and Lowenheim-Skolem theorems. Formal theories and the Gödel Incompleteness Theorem. Ordinarily offered in years alternating with CSC448H1.

Prerequisite: CSC463H1/ CSC373H1/ CSC363H5/ CSCC63H3/ MAT247H1

Exclusion: MAT309H1/ PHL348H1. NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC443H1 - Database System Technology

Hours: 24L/12T

Implementation of database management systems. Storage management, indexing, query processing, concurrency control, transaction management. Database systems on parallel and distributed architectures. Modern database applications: data mining, data warehousing, OLAP, data on the web. Object-oriented and object-relational databases.

Prerequisite: CSC343H1/ CSC343H5/ CSCC43H3, CSC369H1/ CSC369H5/ CSCC69H3, CSC373H1/ CSC373H5/ CSCC73H3

Exclusion: CSCD43H3. NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC446H1 - Computational Methods for Partial Differential Equations

Hours: 24L/12T

Finite Difference and Finite Element methods for boundary value problems including 2-point boundary value problems and 2-dimensional problems. Convergence of methods. Efficiency of the solution of linear systems. Finite difference methods for initial value problems. Consistency, stability and convergence. Method of lines. Special topics of interest among domain decomposition, multigrid, FFT solvers. Ordinarily offered in years alternating with CSC466H1.

Prerequisite: 75% or greater in CSC336H1/ 75% or greater in CSC338H5/ 75% or greater in CSCC37H3/ equivalent mathematical background; MAT237Y1/ MAT257Y1; APM346H1/ MAT351Y1/ (MAT244H1/ MAT267H1 and exposure to PDEs)

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC448H1 - Formal Languages and Automata

Hours: 24L/12T

Regular, deterministic, context free, context sensitive, and recursively enumerable languages via generative grammars and corresponding automata (finite state machines, push down machines, and Turing machines). Topics include complexity bounds for recognition, language decision problems and operations on languages. Ordinarily offered in years alternating with CSC438H1.

Prerequisite: CSC236H1/ CSC236H5/ CSCB36H3/ CSC240H1, CSC263H1/ CSC263H5/ CSCB63H3/ CSC265H1

Exclusion: CSC448H5. NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Recommended Preparation: CSC373H1

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC454H1 - The Business of Software

Hours: 24L/12T

Designed and delivered by industry experts in successful commercialization of tech startups, this course focuses on the development of a viable business and startup in partnership and mentorship from industry businesses and entrepreneurs.

The course is designed to be taken by students from any faculty or discipline. It focuses on helping them understand and develop business sense, introduce modern customer development, and teach skills in product development, financial management, marketing, and leadership. Alongside the software engineering abilities of CSC491H1 teammates, skills learned in CSC454H1 will aid the development of a viable startup.

For more details visit our website at <https://www.dcsil.ca/student-courses>.

Not eligible for CR/NCR option.

Students must submit an application to the course describing relevant interests, experience, and skills and general academic history. On this application, you will indicate whether you wish to be considered for CSC454H1 only, or CSC454H1 and CSC491H1. Application questions are set and assessed by the instructor. Applications from St. George students enrolled in a Computer Science program or the Data Science Specialist program will be considered first. Applications by students from other programs with appropriate prerequisites will be considered as space permits.

Please visit <https://q.utoronto.ca/courses/221753/pages/400-level->

[course-balloting-and-applications](#) for application deadlines and details. A decision on your application will be confirmed approximately 2-3 weeks after the application deadline, so students should enrol in an alternate course until the results of their application are confirmed.

Prerequisite: 2.5 credits at the 300-level or higher

Exclusion: [CSCD54H3](#). NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC456H1 - High-Performance Scientific Computing

Hours: 24L/12T

Computationally-intensive applications in science and engineering are implemented on the fastest computers available, today composed of many processors operating in parallel. Parallel computer architectures; implementation of numerical algorithms on parallel architectures; performance evaluation. Topics from: matrix-vector product, solution of linear systems, sparse matrices, iterative methods, domain decomposition, Fourier solvers. For students in computer science, applied mathematics, science, engineering. Ordinarily offered in years alternating with [CSC446H1](#).

Prerequisite: [CSC436H1](#)/ [CSCD37H3](#)/ 75% or greater in [CSC336H1](#) / 75% or greater in [CSC338H5](#)/ 75% or greater in [CSCC37H3](#)/ equivalent mathematical background; [CSC209H1](#)/ proficiency in C, C++, or Fortran

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC457H1 - Principles of Computer Networks

Hours: 24L/12T

The course covers fundamental principles of computer networks, as well as currently used network architectures and protocols. Its emphasis is 1) to explain why reliable data transfer, addressing, routing and congestion control are the fundamental concepts, 2) to explore the design principles behind algorithms/protocols for reliable data transfer, addressing, routing and congestion control and 3) to use current protocols such as TCP/IP, ARQ,

Ethernet, CSMA/CD, DNS and Internet routing protocols as examples of concrete implementations/designs of these protocols. It will highlight the trade-offs (and approaches to navigate these trade-offs) in the design of computer network protocols.

Prerequisite: [CSC373H1](#)/ [CSC373H5](#)/ [CSCC73H3](#), [STA247H1](#)/ [STA255H1](#)/ [STA257H1](#)/ [STA237H1](#)

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Recommended Preparation: [CSC309H1](#), [CSC369H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC458H1 - Computer Networking Systems

Hours: 24L/12T

Computer networks with an emphasis on network systems, network programming, and applications. Networking basics: layering, routing, congestion control, and the global Internet. Network systems design and programming: Internet design, socket programming, and packet switching system fundamentals. Additional topics include network security, multimedia, software-defined networking, peer-to-peer networking, and online social networks.

Prerequisite: [CSC209H1](#)/ [CSC209H5](#)/ [CSCB09H3](#), [CSC258H1](#)/ [CSC258H5](#)/ [CSCB58H3](#), [CSC263H1](#)/ [CSC263H5](#)/ [CSCB63H3](#)/ [CSC265H1](#), [STA247H1](#)/ [STA255H1](#)/ [STA257H1](#)/ [STA237H1](#)/ [ECO227Y1](#)

Exclusion: [CSC458H5](#), [CSCD58H3](#). NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC463H1 - Computational Complexity and Computability

Hours: 24L/12T

Introduction to the theory of computability: Turing machines and other models of computation, Church's thesis, computable and noncomputable functions, recursive and recursively enumerable sets, many-one reductions. Introduction to complexity theory: P, NP, polynomial time reducibility, NP-completeness, self-reducibility, space complexity (L, NL, PSPACE and

completeness for those classes), hierarchy theorems, and provably intractable problems.

Prerequisite: CSC236H1/ CSC240H1/ CSC236H5/ CSCB36H3

Exclusion: CSC363H1/ CSC363H5/ CSCC63H3/ CSC365H1. NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC465H1 - Formal Methods in Software Design

Hours: 24L

Using mathematics to write error-free programs. Proving each refinement; identifying errors as they are made. Program development to meet specifications; modifications that preserve correctness. Useful for all programming; essential for programs that lives depend on. Basic logic, formal specifications, refinement. Conditional, sequential, parallel, interaction, probabilistic programming, and functional programming.

Prerequisite: CSC236H1/ CSC240H1/ MAT309H1/ CSC236H5/ CSCB36H3

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC466H1 - Numerical Methods for Optimization Problems

Hours: 36L

Numerical methods for unconstrained optimization problems, in particular line search methods and trust region methods. Topics include steepest descent, Newton's method, quasi-Newton methods, conjugate gradient methods and techniques for large problems. This course will normally be offered every other year.

Prerequisite: CSC336H1/ CSC338H5/ CSCC37H3, MAT223H1/ MAT240H1, MAT235Y1/ MAT237Y1/ MAT257Y1

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE

courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC469H1 - Operating Systems Design and Implementation

Hours: 24L/12T

An in-depth exploration of the major components of operating systems with an emphasis on the techniques, algorithms, and structures used to implement these components in modern systems. Project-based study of process management, scheduling, memory management, file systems, and networking is used to build insight into the intricacies of a large concurrent system.

Prerequisite: CSC369H1/ CSC369H5/ CSCC69H3

Exclusion: CSC469H5. NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

JSC470H1 - Data Science III

Hours: 24L/24P

This course is **restricted to** students in the Data Science Specialist program. Research topics and applications of data science methods will be explored through case studies and collaboration with researchers in other fields. Data analysis, visualization, and communication of statistical information at various technical levels, ethical practice of data analysis and software development, and teamwork skills.

Prerequisite: JSC370H1, STA314H1/ CSC311H1, STA303H1/ STA305H1

Exclusion: STA490Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC473H1 - Advanced Algorithm Design

Hours: 24L/12T

Advanced algorithm design techniques, with emphasis on the role that geometry, approximation, randomization, and parallelism play in modern algorithms. Examples will be drawn from linear programming and basics of continuous optimization; randomized algorithms for string matching,

graph problems, and number theory problems; streaming algorithms and parallel algorithms in the Map-Reduce model.

Prerequisite: [CSC373H1/ CSC373H5/ CSCC73H3, MAT223H1/ MAT240H1](#)

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC485H1 - Computational Linguistics

Hours: 36L

Computational linguistics and the processing of language by computer. Topics include: context-free grammars; chart parsing, statistical parsing; semantics and semantic interpretation; ambiguity resolution techniques; reference resolution. Emphasis on statistical learning methods for lexical, syntactic, and semantic knowledge.

Prerequisite: [CSC209H1/ CSC209H5/ CSCB09H3; STA237H1/ STA247H1/ STA255H1/ STA257H1](#)

Prerequisite for Faculty of Applied Science and Engineering students: [APS105H1/ APS106H1/ ESC180H1/ CSC180H1; ECE302H1/ STA286H1/ CHE223H1/ CME263H1/ MIE231H1/ MIE236H1/ MSE238H1/ ECE286H1](#)

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Recommended Preparation: [CSC311H1, CSC324H1/ CSC384H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC486H1 - Knowledge Representation and Reasoning

Hours: 24L/12T

Representing knowledge symbolically in a form suitable for automated reasoning, and associated reasoning methods. Topics from: first-order logic, entailment, the resolution method, Horn clauses, procedural representations, production systems, description logics, inheritance networks, defaults and probabilities, tractable reasoning, abductive explanation, the representation of action, planning.

Prerequisite: [CSC384H1/ CSC384H5/ CSCD84H3](#)

Prerequisite for Faculty of Applied Science and Engineering students: [ROB311H1](#)

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC488H1 - Compilers and Interpreters

Hours: 24L/12T

The structure of compilers, Programming language processing. Scanning based on regular expressions, Parsing using context free grammars, Semantic analysis (type and usage checking), Compiler dictionaries and tables. Runtime organization and storage allocation, code generation, optimization. Use of modern compiler building tools. Course project involves building a complete compiler.

Prerequisite: [CSC258H1/ CSC258H5/ CSCB58H3, CSC324H1/ CSC324H5/ CSCC24H3, CSC263H1/ CSC265H1/ CSC263H5/ CSCB63H3](#)

Exclusion: [CSC488H5, CSCD70H3](#). NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC490H1 - Capstone Design Project

Hours: 36L

This half-course gives students experience solving a substantial problem that may span several areas of Computer Science. Students will define the scope of the problem, develop a solution plan, produce a working implementation, and present their work using written, oral, and (if suitable) video reports. Class time will focus on the project, but may include some lectures. The class will be small and highly interactive. Project themes change each year. Contact the Computer Science Undergraduate Office for information about this year's topic themes, required preparation, and course enrolment procedures. Not eligible for CR/NCR option. A refundable deposit of \$90 will be charged for the use of Arduino kit in lab activities.

Students must submit an application to the course describing relevant interests, experience, and skills and general academic history. Application questions are set and assessed by the instructor. Applications from St.

George students enrolled in a Computer Science program or the Data Science Specialist program will be considered first. Applications by students from other programs with appropriate prerequisites will be considered as space permits.

Please visit

<https://q.utoronto.ca/courses/221753/pages/400-level-course-balloting-and-applications> for application deadlines and details. A decision on your application will be confirmed approximately 2-3 weeks after the application deadline, so students should enrol in an alternate course until the results of their application are confirmed.

Prerequisite: 1.5 credits of 300+ level CSC courses.

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC491H1 - Capstone Design Project

Hours: 36L

This course is designed and delivered by industry experts from the Software/Tech fields. Students will work with teammates from CSC454H1 to develop a marketable startup on a selected theme.

The class will be small and highly interactive. You will work to develop working software industry best practices. You are expected to have experience writing software and be able to learn on the go.

For more details, visit our website at <https://www.dcsil.ca/student-courses>. Not eligible for CR/NCR option.

Students submit a single application for CSC491H1 and CSC454H1, describing relevant interests, experience, and skills and general academic history. Application questions are set and assessed by the instructor. Applications from St. George students enrolled in a Computer Science program or the Data Science Specialist program will be considered first. Applications by students from other programs with appropriate prerequisites will be considered as space permits.

Please visit

<https://q.utoronto.ca/courses/221753/pages/400-level-course-balloting-and-applications> for application deadlines and details. A decision on your application will be confirmed approximately 2-3 weeks after the application deadline, so students should enrol in an alternate course until the results of their application are confirmed.

Corequisite: CSC454H1/ CSC2527H

Exclusion: CSCD90H3. NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Recommended Preparation: 2.0 CSC credits at the 300+ level, 0.5 additional credits at the 300+ level

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC494H1 - Computer Science Project

This half-course involves a significant project in any area of Computer Science. The project may be undertaken individually or in small groups. The course is offered by arrangement with a Computer Science faculty member, and is restricted to students in an Arts & Science Computer Science program or Data Science Specialist program. Not eligible for CR/NCR option.

Students must submit an application to the course.

Applications request information about students' planned project and project supervisor. Applications for each term are due no later than the end of the first week of classes in that term.

Please visit

<https://q.utoronto.ca/courses/221753/pages/400-level-course-balloting-and-applications> for application deadlines and details. A decision on your application will be confirmed approximately 2-3 weeks after the application deadline, so students should enrol in an alternate course until the results of their application are confirmed.

Prerequisite: 1.5 credits of 300+ level CSC courses.

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC494Y1 - Computer Science Project

This course involves a significant multidisciplinary project in an area of Computer Science completed in partnership with another academic unit. Not eligible for CR/NCR option.

Students must submit an application to the course.

Application requirements and timelines are set and assessed by the instructor or partnering program. Please visit <https://q.utoronto.ca/courses/221753/pages/400-level-course-balloting-and-applications> for application deadlines and details.

Prerequisite: 1.5 credits of 300+ level CSC courses.

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

CSC495H1 - Computer Science Project

This half-course involves a significant project in any area of Computer Science. The project may be undertaken individually or in small groups. The course is offered by arrangement with a Computer Science faculty member, and is restricted to students in an Arts & Science Computer Science program or Data Science Specialist program. Not eligible for CR/NCR option.

Students must submit an application to the course. Applications request information about students' planned project and project supervisor. Applications for each term are due no later than the end of the first week of classes in that term.

Please visit

<https://q.utoronto.ca/courses/221753/pages/400-level-course-balloting-and-applications> for application deadlines and details. A decision on your application will be confirmed approximately 2-3 weeks after the application deadline, so students should enrol in an alternate course until the results of their application are confirmed.

Prerequisite: CSC494H1. 1.5 credits of 300+ level CSC courses.

Exclusion: NOTE: Students not enrolled in the Computer Science Major or Specialist program at A&S, UTM, or UTSC, or the Data Science Specialist at A&S, are limited to a maximum of 1.5 credits in 300-/400-level CSC/ECE courses.

Breadth Requirements: The Physical and Mathematical Universes (5)

Dr. David Chu Program In Contemporary Asian Studies

Faculty List

Professors Emeriti

Victor Falkenheim (East Asian Studies/Political Science)
Hy Van Luong (Anthropology)

University Professor

Tania Li (Anthropology)

Professors

Zaheer Baber (Sociology, University of Toronto Scarborough)
Jacques Bertrand (Political Science)
Loren Brandt (Economics)
Eric Cazdyn (East Asian Studies)
Amrita Daniere (Geography/Planning)
Takashi Fujitani (History)
Ping-Chun Hsiung (Social Sciences, University of Toronto Scarborough)
Yoonjung Kang (French and Linguistics)
Bonnie McElhinny (Anthropology)
Ito Peng (Sociology)
Katharine Rankin (Geography)
Atsuko Sakaki (East Asian Studies)
Rachel Silvey (Geography)
Jesook Song (Anthropology)
Andre Sorensen (Social Sciences, University of Toronto Scarborough)
Ka Tat Tsang (Social Work)
Joseph Wong (Political Science)
Jia-Lin Xie (Rotman School of Management)
Lisa Yoneyama (East Asian Studies)
Xiaodong Zhu (Economics)

Associate Professors

Aisha Ahmad (Political Science)
Ruoyun Bai (Global Asia Studies, University of Toronto Scarborough)
Joshua Barker (Anthropology)
Ritu Birla (History)
Alana Boland (Geography)
Li Chen (Global Asia Studies, University of Toronto Mississauga)
Carol Chin (History)
Hae Yeon Choo (Sociology)
Francis Cody (Anthropology/Asian Institute)

Naisargi Dave (Anthropology)
Arti Dhand (Religion)
Christoph Emmrich (Religion)
Xing Fan (Centre for Drama, Theatre and Performance Studies)
Diana Fu (Political Science, University of Toronto Scarborough)
Frances Garrett (Religion)
Kanishka Goonewardena (Geography)
Yi Gu (Art History, University of Toronto Scarborough)
Kajri Jain (Visual Studies, University of Toronto Mississauga)
Beatrice Jauregui (Criminology and Sociolegal Studies)
Raji Jayaraman (Economics and Munk School of Global Affairs & Public Policy)
Malavika Kasturi (Historical Studies, University of Toronto Mississauga)
Ken Kawashima (East Asian Studies)
Tong Lam (Historical Studies, University of Toronto Mississauga)
Yoonkyung Lee (Sociology)
Phillip Lipsky (Political Science, Munk School of Global Affairs & Public Policy)
Sida Liu (Sociology)
Ken MacDonald (Social Sciences, University of Toronto Scarborough)
Mark Manger (Munk School of Global Affairs & Public Policy)
Lisa Mar (History, University College)
Heather Miller (Anthropology)
Kanta Murali (Political Science)
Rajashree Narayanareddy (Geography)
Lynette Ong (Political Science/Asian Institute)
Joshua Pilzer (Music)
Janet Poole (East Asian Studies)
Jennifer Purtle (Art History)
Bhavani Raman (Historical and Cultural Studies, University of Toronto Scarborough)
Srilita Raman (Religion)
Ajay Rao (Religion)
Karen Ruffle (Religion)
Izumi Sakamoto (Social Work)
Shiho Satsuka (Anthropology)
Andre Schmid (East Asian Studies)
J. Barton Scott (Religion)
Jayeeta Sharma (History, University of Toronto Scarborough)
Neera Singh (Geography)
Shafique Virani (Historical Studies, University of Toronto Mississauga)
Yvon Wang (History)
Yiching Wu (East Asian Studies/Asian Institute)
Sherry Yu (Arts, Culture and Media, University of Toronto Scarborough)
Meng Yue (East Asian Studies)
Jun Zhang (Geography)
Weiguo Zhang (Sociology, University of Toronto Mississauga)
Yurou Zhong (East Asian Studies)

Assistant Professors

Michelle Cho (East Asian Studies)
 Yujeong Choi (East Asian Studies)
 Cindy Ewing (History)
 Elisa Freschi (Philosophy)
 Alessandro Graheli (Historical Studies, University of Toronto Mississauga)
 Anup Grewal (Cultural and Historical Studies, University of Toronto Scarborough)
 Rijuta Mehta (English)
 Libby Mills (Religion)
 Shivaji Mukherjee (Political Science, University of Toronto Mississauga)
 Tahseen Shams (Sociology)
 Nidhi Subramanyam (Geography)
 Wen-Ching Sung (Anthropology)
 Julie Vig (Religion)
 Matthew Walton (Political Science)
 Elizabeth Wijaya (Visual Studies and Cinema Studies)
 Shana Ye (Women and Gender Studies, University of Toronto Scarborough)

Adjunct Professors

Deepali Dewan (Royal Ontario Museum)
 Wendy Dobson (Rotman School of Management)

Introduction

Asia is home to more than half the world's population. Its cultural and historical complexity is endless, its economic growth unprecedented, and its global influence unmatched.

The Contemporary Asian Studies program (CAS) offers a thematically driven approach to understanding the complexity of issues facing today's Asia. It examines the linkages between Asia's history and culture, its emergence on the global stage, and its future in the global arena. CAS courses are distinctly pan-Asian in geographic scope, providing empirical and critical coverage of South, Southeast, and East Asia through multiple disciplinary approaches, including anthropology, economics, geography, history, political science, religion, and sociology.

By exposing students to current issues and debates in Asia, the CAS program is designed to prepare students for careers in or about Asia. In addition, the Asian Institute is committed to facilitating overseas experiential learning opportunities, including field schools, international course modules, professional internships, and study abroad opportunities. Upper-level CAS courses are designed to be research-intensive. There is no language requirement for the CAS major or minor. However, students are strongly encouraged to study an Asian language. 1.0 credit in an approved Asian language can be credited towards the major or minor degree.

Students may also be interested in the South Asian Studies minor, which is closely connected with the Contemporary Asian Studies program.

NOTE: Students who wish to count courses towards the CAS major or minor that are not listed as CAS courses or in Group A, B, or C of the program completion requirements (including U of T courses and transfer credits) must seek pre-approval from the program advisor prior to taking the course. Asian content does not guarantee that the course will be approved for CAS program credit.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Contemporary Asian Studies programs impacted by this policy: ASMAJ0235 and ASMIN0235

Contemporary Asian Studies Programs

Contemporary Asian Studies Major (Arts Program) - ASMAJ0235

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(7.0 credits. Please note: each course can only be counted towards one of the requirements below)

- 1.0 credit from CAS100H1/ CAS200H1/ CAS201H1/ CAS202H1

2. 1.0 credit in 300-level CAS courses (including JHA, JPA, and SAS)

3. CAS400H1

4. 1.5 credits from Group A

5. 1.5 credits from Group B

6. 1.0 additional credit from Group A or B, **OR** 1.0 credit at any level of an Asian language (see *Accepted Language Courses* below)

7. CAS450H1 **OR** 0.5 credit in a quantitative or qualitative methods course from Group C to fulfill the Research Competency required in the program.

Group A: Social, Political and Economic Topics (Social Science)

AFR389H1, CAS200H1, CAS201H1, CAS202H1, CAS310H1, CAS320H1, CAS370H1, CAS390H1, CAS420H1, CAS430H1, CAS490H1, ANT341H1, ANT472H1, ANT477H1, CDN230H1, CDN390H1, EAS105H1, EAS246H1, EAS247H1, EAS270H1, EAS271H1, EAS272H1, EAS273H1, EAS285H1, EAS289Y1, EAS315H1, EAS328H1, EAS333H1, EAS345Y1, EAS347H1, EAS357H1, EAS364H1, EAS372H1, EAS373H1, EAS374H1, EAS375H1, EAS378H1, EAS457H1, EAS459Y1, EAS466H1, EAS468H1, EAS473H1, EAS474H1, EAS476H1, ECO435H1, GGR342H1, GGR343H1, HIS280Y1, HIS282Y1, HIS283Y1, HIS285H1, HIS315H1, HIS316H1, HIS326H1, HIS328H1, HIS333H1, HIS346H1, HIS379H1, HIS385H1, HIS385Y0, HIS400H1, HIS470H1, HIS480H1, HIS494H1, JHA384H1, JHA394H1, JPA331H1, JPA376Y0, JPA453H1, MUN200H1, POL302H1, POL307H1, POL328H1, POL388H1, POL357Y1, POL431H1, POL441H1, RLG362H1, RLG476H1, SAS114H1, SAS318H1, SOC218H1, SOC372H1, WGS420H1

Group B: Cultural Topics (Humanities)

BPM214H1, CAS310H1, CAS320H1, CAS350H1, CAS360H1, CAS414H1, CDN225H1, CDN307H1, CDN325H1, CHC456H1, CIN376Y1, EAS231H1, EAS251H1, EAS278H1, EAS279H1, EAS307H1, EAS314H1, EAS333H1, EAS355H1, EAS387H1, EAS391H1, EAS392H1, EAS394H1, EAS419H1, EAS421H1, EAS431H1, EAS489H1, ENG368H1, ENG369H1, FAH260H1, FAH262H1, FAH363H1, FAH364H1, FAH462H1, FAH463H1, FAH464H1, FAH465H1, FAH487H1, FAH490H1, HIS266H1, HIS467H1, MUS209H1, MUS215H1, PHL237H1, PHL239H1, PHL339H1, RLG205H1, RLG206H1, RLG208H1, RLG311H1, RLG312H1, RLG352H1, RLG355H1, RLG356H1, RLG358H1, RLG361H1, RLG365H1, RLG366H1, RLG372H1, RLG373H1, RLG478H1, SAS490H1

Group C: Methodology

ANT380H1, CAS450H1, CRI350H1, DTS300H1, ECO220Y1, ECO227Y1, ENV338H1, GGR225H1, GGR270H1, GGR271H1, GGR274H1, INS390H1, INS460H1, LIN405H1, MUN105Y1, PCJ461H1, POL222H1, POL419H1, PSY201H1, STA201H1, STA220H1, SOC202H1, SOC204H1, SOC409H1, WGS360H1

Accepted Language Courses

EAS100Y1, EAS101Y1, EAS200Y1, EAS201H1, EAS300Y1, EAS301H1, EAS401H1, EAS402H1, EAS404H1, EAS120Y1, EAS121H1, EAS122Y0, EAS220Y1, EAS221H1, EAS222Y0, EAS223Y0, EAS320Y1, EAS321Y0, EAS322Y0, EAS460H1, EAS461H1, EAS462Y0, EAS463Y0, EAS464Y0, EAS110Y1, EAS210Y1, EAS211Y1, EAS212H1, EAS310Y1, EAS410Y1, EAS416Y1, HIN211H5, HIN212H5, HIN311H5, HIN312H5, HIN313H5, HIN412Y5, LGA70H3, LGA71H3, LGA72Y3, LGA74H3, LGA75H3, LGA76Y3, LGB74H3, LGA78Y3, LGGC70H3, PUN212Y5, RLG260H1, RLG263H1, RLG359H1, RLG360H1, RLG474H1, SAN291Y5, SAN392Y5, URD212Y5, URD312Y5

Contemporary Asian Studies Minor (Arts Program) - ASMIN0235

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits. Please note: each course can only be counted toward one of the requirements below)

- 1.0 credit from CAS100H1, CAS200H1, CAS201H1, CAS202H1
- 1.0 credit from 300-level CAS courses and/or 400-level courses (including JHA, JPA, and SAS)
- 0.5 credit from Group A and 0.5 credit from Group B (excluding 100-level courses)
- 1.0 credit from Group A or B (excluding 100-level courses), or at any level in an Asian language (see *Accepted Language Courses* below)

Group A: Social, Political and Economic Topics (Social Science)

AFR389H1, CAS200H1, CAS201H1, CAS202H1, CAS310H1, CAS320H1, CAS370H1, CAS390H1, CAS420H1, CAS430H1, CAS490H1, ANT341H1, ANT472H1, ANT477H1, CDN230H1, CDN390H1, EAS105H1, EAS246H1, EAS247H1, EAS270H1, EAS271H1, EAS272H1, EAS273H1, EAS285H1, EAS289Y1, EAS315H1, EAS328H1, EAS333H1,

Elective Courses

Electives offered by other departments which are pre-approved for CAS credit are listed under groups A, B, and C in the major and minor program requirements. Note that not all electives are offered every year. Some may not be offered on a regular basis and/or may only be offered to students enrolled in a program sponsored by the department or unit offering the course. Students are responsible for checking co- and prerequisites for all courses.

Courses with Priority Enrolment

The following courses (non-CAS) offer priority enrolment for CAS students:

POL328H1 - Politics and Government in South Asia

Contemporary Asian Studies Courses

CAS100H1 - Locating Asia: An Introduction to Contemporary Asian Studies

Previous Course Number: CAS202H1

Hours: 24L/6T

This course provides an introduction to Contemporary Asian Studies, focusing on the rapid social, political, economic, and cultural changes taking place in the dynamic regions of East Asia, South Asia, and Southeast Asia.

Breadth Requirements: Society and its Institutions (3)

MUN120H1 - Revolutions

Hours: 24L/8T

This course transcends time and place to delve into the overarching dynamics of revolution. This exploration of revolutions goes beyond simple chronology to uncover common threads that unite these transformative events. From the spirit that ignited the English Revolution to the fervor of the American Revolution, the course navigates through the social and political forces that reshaped societies. Students will dissect the emergence of radical change, tracing its evolution from the French Revolution to the Revolutions of 1848 and the birth of modern political ideologies. The course then navigates through the 20th century, from the Russian and Chinese Revolutions to the Cuban Revolution and the intricate web of Latin American revolutionary movements. Comparative analysis delves into the universal and unique aspects of these revolutions,

offering students an understanding of the power and influence of these transformative moments.

Breadth Requirements: Thought, Belief and Behaviour (2)

CAS200H1 - State Power and Social Diversity in Asia

Hours: 24L

This course is an introduction to Contemporary Asian Studies. It covers detailed case study material from South Asia, Southeast Asia, and East Asia. It introduces students to the interdisciplinary study of political, sociocultural and economic interactions among these regions, as well as the transnational forces shaping internal dynamics throughout Asia. In addition, it examines the ways that forces stemming from Asia are affecting global processes, pushing scholarship to engage questions about colonialism, nationalism, "race," religion, markets, urbanization, migration, and mass mediated culture. This course provides preparation for more advanced courses on Asia and globalization and provides an introductory gateway for the Contemporary Asian Studies major and minor. May be taken in the first year of studies.

Breadth Requirements: Society and its Institutions (3)

CAS201H1 - Global Asian Studies: Insights and Concepts

Previous Course Number: CAS200Y1

Hours: 24L

This course addresses Asia empirically in contemporary global formations and as an idea in the global imagination. It introduces students to concepts and theories central to scholarship on Asia and its transnational formations. It provides foundational theoretical and conceptual material to understand global issues as they play out in the politics, economies, cultures and contemporary social worlds of contemporary Asian sites. Interdisciplinary analytical and research concepts are introduced to provide area studies grounding. This course provides preparation to delve into deeper research on Asia connected to broad questions about the natures of democracy, authoritarianism, market formation, social justice, and the media of cultural expression. It informs students aiming to take more advanced courses on Asia and globalization and provides one part of the foundation for the Contemporary Asian Studies major and minor. CAS201H1 introduces the theoretical and conceptual frameworks that are explored through further grounded empirical case studies in upper year CAS courses.

Breadth Requirements: Society and its Institutions (3)

CAS202H1 - Asia and the World in the 21st Century

Previous Course Number: CAS200Y1

Hours: 24L

This interdisciplinary course explores a variety of sites and topics in South, Southeast, and East Asia. It explores themes including contemporary and historical articulations of socio-economic development, (post)colonial political formations, urbanization processes, climate change, labour struggles, gender studies, migration, citizenship, and social justice. The course examines the diversity of Asian modernities, cross-regional linkages, and changing approaches to area studies over time. It provides a foundation for the Contemporary Asian Studies major and minor, preparing students for taking more advanced courses on Asia in the global context.

Breadth Requirements: Society and its Institutions (3)

CAS310H1 - Comparative Colonialisms in Asia

Hours: 24L

This course analyzes the impact of colonialism in South, East, and Southeast Asia and the various ways in which pre-colonial traditions intersect with and reshape colonial and postcolonial process across the various regions of Asia. The course will examine the conjunctures of economy, politics, religion, education, ethnicity, gender, and caste, as these have played out over time in the making and re-making of Asia as both idea and place. Attention will be paid to postcolonial and indigenous theories, questions of 'the colonial' from the perspective of Asian Studies, and debates about the meaning of postcolonialism for the study of Asia now and in the future.

Breadth Requirements: Society and its Institutions (3)

CAS320H1 - Comparative Modernities in Asia

Hours: 24L

Since at least the late 1700s, the effects of capitalism across the globe have profoundly transformed the landscapes of human livelihood, consumption, production and governance in Asia. While colonial empires have declined, new empires have emerged, and a growing number of countries have witnessed the rise of nationalism and independent states, social, political and

technological revolutions, and most recently neoliberal globalization. This course theorizes and explores these dramatic changes in a comparative framework. It is aimed at students wishing to better understand the great transformations of modern Asia in a global context.

Recommended Preparation: CAS202H1

Breadth Requirements: Society and its Institutions (3)

JPA331H1 - Rise of China as a Global Power

Previous Course Number: JPA331Y1

Hours: 24L

This course will take students through important domestic institutions and events in China that shape its current political landscape. Students will be prompted to think about the implications of domestic political factors for China's rise as a global power. The course examines major China's adventurism abroad, such as the Belt-and-Road Initiative, and what increasing footprints of Chinese state and private firms overseas mean for international politics.

(Given by the Department of Political Science and the Contemporary Asian Studies Program)

Prerequisite: 2.0 credits in POL/ JPA/ JPF/ JPI/ JPR/ JPS/ JRA courses, or 1.0 CAS credit

Exclusion: JPA331Y1/ POLC16H3

Breadth Requirements: Society and its Institutions (3)

JPA331Y0 - Rise of China as a Global Power

Previous Course Number: JPA331Y1

Hours: 48L

This course will take students through important domestic institutions and events in China that shape its current political landscape. Students will be prompted to think about the implications of domestic political factors for China's rise as a global power. The course examines major China's adventurism abroad, such as the Belt-and-Road Initiative, and what increasing footprints of Chinese state and private firms overseas mean for international politics. *(Offered as part of the Summer Abroad program)*

(Given by the Department of Political Science and the Contemporary Asian Studies Program)

Prerequisite: 2.0 POL credits/1.0 CAS credit

Exclusion: JPA331H1/ JPA331Y1/ POLC16H3

Breadth Requirements: Society and its Institutions (3)

CAS350H1 - Asian Youth Cultures

Hours: 24L

In focusing on youth in Asia, this course brings together two disputed cultural formations of substantial contemporary importance. Both youth and Asia are increasingly invoked on the global stage in support of a wide range of interests. Examining practices of young people and the idea of youth in the context of Asia requires critical attention to the promises and fears that attach to the rise of Asian economies, international demographic transitions, the growth of a global middle-class, increasing consumption disparities, changing immigration patterns, expanding technological skills, global/local environmental concerns, and young people's shifting political priorities and loyalties. The course may feature a significant amount of social theory, with authors such as Michel Foucault, Roland Barthes, Louis Althusser, and Stuart Hall.

Prerequisite: 6.0 credits

Recommended Preparation: 0.5 CAS credit at the 200-level

Breadth Requirements: Creative and Cultural Representations (1)

CAS360H1 - Asian Genders

Hours: 24L

This course will explore ways that gender is mobilized and produced in parts of Asia. It seeks to understand gender and sexuality in their diversity and in attempts to "fix" or locate it in various bodies and places. Attempts will be made to see how gender is made knowable in terms of sexuality, medicine, nation, class, ethnicity, religion, and other discourses. The course assumes a willingness to read challenging theory – such as the writings of Judith Butler, Michel Foucault, and Eve Sedgwick – and asks that students commit to regular attendance.

Prerequisite: 6.0 credits

Recommended Preparation: 0.5 CAS credit at the 200-level

Breadth Requirements: Society and its Institutions (3)

CAS370H1 - Asian Cities

Hours: 24L

This course offers a multidisciplinary perspective of urban life in Asia. The thematic focus will be on how the urban intersects with modernities and postcolonial formations. Drawing on recent scholarship in the social sciences and the humanities, we will examine the realignment of

cultural, political, and economic forces associated with Asia's diverse processes of urbanization.

Prerequisite: 6.0 credits

Recommended Preparation: 0.5 CAS credit at the 200-level

Breadth Requirements: Society and its Institutions (3)

JPA376Y0 - Transforming Global Politics: Comparative and Chinese Perspectives

Hours: 48L

Set against the backdrop of the rise of China, this course examines the dynamics of global change from comparative and Chinese perspectives. Themes include international security, political economy, political development and democracy, global climate change, economic development, poverty and inequality, corruption, technology innovation, among others.

(Given by the Department of Political Science and the Contemporary Asian Studies Program)

Prerequisite: POL208H1/ POL208Y1/ POL209H5/ POLB80H3/ POLB81H3/ POL224H1/ POL224Y1/ CAS200Y1

Breadth Requirements: Society and its Institutions (3)

JHA384H1 - Japan in the World, Mid-16th to Mid-20th century

Hours: 24L

This course examines Japan within the context of world history from the mid-16th to the mid-20th century. Rather than seek comprehensive coverage of Japan's national history along a linear timeline, we will use Japan as a lens through which to consider key moments in the history of the modern world.

Prerequisite: One course from: HIS102Y1, HIS103Y1, HIS107Y1, HIS241H1, HIS242H1, HIS244H1, HIS250H1, HIS250Y1, HIS271Y1, HIS280Y1, HIS281Y1, HIS282Y1, HIS283Y1, HIS291H1, HIS291Y1, HIS292H1, HIS292Y1, HIS297Y1, or 1.0 credit from CAS200H1, CAS201H1, CAS202H1, CAS310H1, CAS320H1.

Breadth Requirements: Society and its Institutions (3)

CAS390H1 - Special Topics

Hours: 24L

Course content varies in accordance with the interest of the instructor. Check <http://munkschool.utoronto.ca/ai/cas> for an updated description.

Prerequisite: 6.0 credits

Recommended Preparation: 0.5 CAS credit at the 200-level

CAS393Y1 - Independent Research

Supervised independent research on a topic agreed on by the student and a faculty supervisor before enrolment in the course. Open to advanced students in the CAS major and minor with a strong background in contemporary Asian studies. A maximum of one year of Independent Research courses is allowed per program. Contact hours with the supervisor may vary, but typically comprise of one hour per week. Not eligible for CR/NCR option. To enrol, please contact ai.asianstudies@utoronto.ca to request an application form, which should be filled out in consultation with the faculty supervisor and include a detailed description of the course topic, reading list, and assignments/marking scheme. Students must submit the completed form to ai.asianstudies@utoronto.ca at least one week before the start of term.

Prerequisite: 10.0 credits, an application form

CAS393H1 - Independent Research

Supervised independent research on a topic agreed on by the student and a faculty supervisor before enrolment in the course. Open to advanced CAS major and minor students with a strong background in contemporary Asian studies. A maximum of one year of Independent Research courses is allowed per program. Contact hours with the supervisor may vary, but typically comprise of one hour per week. Not eligible for CR/NCR option. To enrol, please contact ai.asianstudies@utoronto.ca to request an application form, which should be filled out in consultation with the faculty supervisor and include a detailed description of the course topic, reading list, and assignments/marking scheme. Students must submit the completed form to ai.asianstudies@utoronto.ca at least one week before the start of term.

Prerequisite: 10.0 credits, an application form

JHA394H1 - The Asia Pacific War

Hours: 24L

This course examines the Second World War in the Asia Pacific region and highlights: (1) how imperialism and colonialism of both the Euro-American and Japanese varieties were central to the War's outbreak, conduct, and

“resolution”; (2) various “local” rather than simply national experiences and memories of the War, including those of marginalized groups in Japan and its colonies, “comfort women,” victims of war atrocities, Asian North Americans, African Americans, and Pacific Islanders.

Prerequisite: One course from: HIS107Y1, HIS242H1, HIS250H1, HIS251H1, HIS263Y1, HIS271Y1, HIS280Y1, HIS281Y1, HIS282Y1, HIS283Y1, HIS284Y1, HIS292Y1, HIS311Y1, HIS317H1, HIS328H1, HIS338H1, HIS343H1, HIS343Y1, HIS344H1, HIS344Y1, HIS351Y1, HIS361Y1, HIS377H1, HIS385H1, HIS385Y1, or 1.0 credit from CAS200H1, CAS201H1, CAS202H1, CAS310H1, CAS320H1.

Recommended Preparation: One or more courses on Japan, China, Korea, or Southeast Asia in any department.

Breadth Requirements: Society and its Institutions (3)

CAS400H1 - Advanced Seminar in Methods in Contemporary Asian Studies

Hours: 24S

This seminar challenges students to hone their growing mastery in Contemporary Asian Studies by engaging with advanced theory about the peoples and places of the continent. Readings address colonial history and emphasize the contemporary period throughout Asia. As the culmination of a student's studies in CAS, the course requires students to grapple with post-colonial conditions in Asia.

Prerequisite: 1.0 200-level CAS credit and 1.0 300-level CAS credit

Breadth Requirements: Society and its Institutions (3)

CAS413H1 - Asia and Canada

Hours: 24S

This service-learning course partners teams of students with non-governmental organizations (NGOs) that work for the betterment of people and places in Asia. Students cultivate professional skills in project management, consulting, communications, and team-building. Projects for NGOs include components such as: research, video production, social media enhancement, website development, compiling reports, or youth outreach campaigns.

Prerequisite: 14.0 credits

Exclusion: NEW413H1, SAS413H1

Breadth Requirements: Society and its Institutions (3)

CAS414H1 - The Public Event in Asia

Hours: 24S

This upper-level seminar will introduce students to the interdisciplinary study of popular culture in Asia through a focus on public events. Readings about all kinds of performances, including ritual, popular protest, festivals, sports, cinema, television, digital media events, and the performing arts will help students learn methodological tools to interpret the politics and meanings of public culture as it articulates with class, ethnicity, religious community, gender and caste. The course will furthermore familiarize students with a range of theoretical lenses for conceptualizing the different meanings of the “event” and the “public” from a perspective grounded in the histories of South Asia, Southeast Asia, East Asia, and their diasporas.

Prerequisite: At least 14.0 credits

Exclusion: NEW414H1, SAS414H1

Recommended Preparation: 1.0 credit in 200 level CAS courses; 1.0 credit in 300 level CAS courses

Breadth Requirements: Creative and Cultural Representations (1)

CAS420H1 - Asia and the New Global Economy

Previous Course Number: JPA420H1

Hours: 24S

This course explores the rise of Asia and its integration into the new global economy (labour, capitalism, knowledge economy, economic nationalism, inequality, gender, the meaning of capitalism, democracy, among others), exposing students to diverse disciplinary perspectives. Geographical coverage is pan-Asian, including East, Southeast and South Asia.

Prerequisite: 14.0 credits

Exclusion: JPA420H1

Recommended Preparation: 1.0 200-level CAS credit and 1.0 300-level CAS credit

Breadth Requirements: Society and its Institutions (3)

CAS430H1 - Nationalism and Revolution in Asia

Hours: 24L

This course explores the far-reaching social, political, and cultural transformations in modern East, Southeast, and South Asia, focusing on the twentieth-century revolutionary histories and struggles to establish modern nation-states. The course adopts a topical approach within

a chronological and comparative framework to highlight major historical movements and theoretical issues significant to the Asian experience.

Prerequisite: 14.0 credits

Exclusion: ASI430H1

Recommended Preparation: 1.0 200-level CAS credit and 1.0 300-level CAS credit

Breadth Requirements: Society and its Institutions (3)

CAS450H1 - Asian Pathways Research Practice

Hours: 24S

This seminar builds on the systematic overview of research methodologies of the Contemporary Asian Studies major and its capstone course, CAS400H1. CAS450H1 provides students with the opportunity to research questions of contemporary relevance stemming from Asia and its transnational networks and communities. Addressing a range of methodologies, including historical-archival, ethnographic, visual/media, and statistical/quantitative, the course emphasizes research experience outside the classroom, in Asia as well as locally with communities in Toronto. Students will develop their own research contributions while working collaboratively.

Prerequisite: 14.0 credits, including 1.0 200-level CAS credit and 1.0 300-level CAS credit

Exclusion: CAS400Y1

Breadth Requirements: Society and its Institutions (3)

JPA453H1 - Authoritarianism in Comparative Perspective

Previous Course Number: POL453H1

Hours: 24S

This course examines the politics of authoritarianism in theory and practice. It covers major theories in authoritarian politics, ranging from selectorate theory, authoritarian institutions, impact of institutions on political outcome, ways of measuring authoritarian state power, democracy and development, to social movement and state repression in authoritarian regime, and political transitions. On empirical application, we will draw on cases from around the world, with some emphasis on Asian authoritarian states.

(Given by the Department of Political Science and the Contemporary Asian Studies Program)

Prerequisite: 2.0 credits in POL/ JPA/ JPF/ JPI/ JPR/ JPS/ JRA/ CAS courses

Exclusion: POL453H1

Breadth Requirements: Society and its Institutions (3)

CAS460H1 - Global China and Its Growing Footprints in Asia and Around the World

Hours: 24L

This course traces the domestic roots of China's global expansion. The end of "bide your time, hide your strength" era signals a more confident China and an expansionist stance. Intense domestic competition and excess supply have pushed state-owned and private enterprises alike to seek cheaper manufacturing base and consumer markets overseas. However, increased presence of Chinese capital and people have been met with open arms, but also cynicism, and even resistance. This course will examine the rise of Global China, traces the domestic roots of its rise, the implications for its relations with host countries as well as state-society relations in host countries from Asia to elsewhere.

Prerequisite: 14.0 credits, including 1.0 200-level CAS credit and 1.0 300-level CAS credit

Breadth Requirements: Society and its Institutions (3)

SAS490H1 - Special Topics in South Asian Studies

Hours: 24S

Course content varies in accordance with the interest of the instructor. Please check the Arts & Science timetable for an updated title and description.

Prerequisite: 14.0 credits including at least 1.0 credit from SAS or CAS courses. Students who do not meet these prerequisites are encouraged to contact the Department.

Breadth Requirements: Society and its Institutions (3)

CAS490H1 - Special Topics in Contemporary Asian Studies

Hours: 24S

Course content varies in accordance with the interest of the instructor. Check <http://munkschool.utoronto.ca/ai/cas> for an updated description.

Prerequisite: 14.0 credits, including 1.0 200-level CAS credit and 1.0 300-level CAS credit

CAS498H1 - Independent Research

Supervised independent research on a topic agreed on by the student and a faculty supervisor before enrolment in the course. Open to advanced CAS major and minor students with a strong background in contemporary Asian studies. A maximum of one year of Independent Research courses is allowed per program. Contact hours with the supervisor may vary, but typically comprise of one hour per week. Not eligible for CR/NCR option. To enrol, please contact ai.asianstudies@utoronto.ca to request an application form, which should be filled out in consultation with the faculty supervisor and include a detailed description of the course topic, reading list, and assignments/marking scheme. Students must submit the completed form to ai.asianstudies@utoronto.ca at least one week before the start of term.

Prerequisite: 14.0 credits, including CAS200Y1/
CAS201H1 and CAS202H1), CAS310H1

Recommended Preparation: CAS320H1

CAS498Y1 - Independent Research

Supervised independent research on a topic agreed on by the student and a faculty supervisor before enrolment in the course. Open to advanced CAS major and minor students with a strong background in contemporary Asian studies. A maximum of one year of Independent Research courses is allowed per program. Contact hours with the supervisor may vary, but typically comprise of one hour per week. Not eligible for CR/NCR option. To enrol, please contact ai.asianstudies@utoronto.ca to request an application form, which should be filled out in consultation with the faculty supervisor and include a detailed description of the course topic, reading list, and assignments/marking scheme. Students must submit the completed form to ai.asianstudies@utoronto.ca at least one week before the start of term.

Prerequisite: 14.0 credits, including 1.0 200-level CAS credit and 1.0 300-level CAS credit

Introduction

The Centre for Criminology and Sociolegal Studies (CrimSL) is a research and teaching unit at the University of Toronto. Founded in 1963 by Prof. John Edwards, CrimSL faculty and students study crime, justice, and governance through law from a variety of disciplinary perspectives and theoretical approaches. With backgrounds in sociology, anthropology, history, law, psychology, philosophy and political science, the faculty are actively engaged in Canadian and international criminological and sociolegal research. The CrimSL library (the Criminology Information Service) houses the leading Canadian research collection of criminological material, consisting of more than 25,000 books, journals,

government reports, statistical sources and other documents.

The Criminology and Sociolegal Studies program incorporates theory, research methods, and knowledge from a wide range of disciplines. The program provides students with a sound foundation for the understanding of crime and the administration of justice in Canada and abroad, and, more generally, the processes of social order and disorder. The curriculum also responds to the Truth and Reconciliation Commission's calls to action by offering courses in Indigenous peoples and criminal justice and Indigenous law, as well as incorporating attention to Indigeneity in other courses. Most students combine their studies in Criminology and Sociolegal Studies with programs in Political Science, Psychology or Sociology.

People with backgrounds in Criminology and Sociolegal Studies are found working in Correctional Services, Law Enforcement, Courts, Government departments, NGOs and other settings. Some careers in Criminology and Sociolegal Studies require additional education and experience beyond the undergraduate level. Please visit our website for other program resources and course forms.

Undergraduate Program Office | Criminology and Sociolegal Studies (416-946-3237)

Regarding Criminology and Sociolegal Programs

Note 1. Enrolment in criminology programs is limited. Achieving the minimum required marks does not necessarily guarantee admission to the program in any given year. Requests for admission will be considered in the first program request period only. For detailed program application instructions, please consult the [Arts & Science Program Toolkit](#). Do not change your program after Year 3 if you are required to complete your degree in four years as prerequisites and program requirements will not be waived. Due to the limited enrolment nature of this program students are strongly advised to enrol in backup programs.

Note 2. [CRI205H1](#), [CRI210H1](#), [CRI215H1](#), [CRI225H1](#), [CRI350H1](#) must be completed on the St. George Campus. Transfer and second-degree students may have received transfer credits that can potentially count towards Criminology programs subject to the approval of the Undergraduate Coordinator. Transfer and second-degree students should contact crimsl.undergrad@utoronto.ca.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Criminology and Sociolegal Studies programs impacted by this policy: [ASSPE0826](#) and [ASMAJ0826](#)

Criminology and Sociolegal Studies Programs

Criminology and Sociolegal Studies - Specialist (Arts Program) - ASSPE0826

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 9.0 credits and meet the requirements listed below to enrol. Note there are different options depending on whether a student has completed between 9.0 and 13.5 credits, or 14.0 or more credits.

For students who have completed between 9.0 and 13.5 credits:

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- [CRI205H1](#), [CRI210H1](#) and [CRI225H1](#)

For reasons of limited capacity, applicants with a final grade average lower than 80% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade average does not guarantee admission to the program.

Special Requirement

- Student must be enrolled in the Criminology and Sociolegal Studies Major (ASMAJ0826)

For students who have completed 14.0 or more credits:

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending

on available spaces and the number of applicants. The following courses must be completed:

- 2.0 credits in CRI courses at the 300+-level
- 1.0 credit from: [CRI205H1](#), [CRI210H1](#) and [CRI225H1](#)

To ensure that students admitted to the program will be successful, applicants with a final grade average lower than 80% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade average does not guarantee admission to the program.

Special Requirement

- Student must be enrolled in the Criminology and Sociolegal Studies Major (ASMAJ0826)

Notes:

- Requests for admission will be considered in the first program request period only.
- Due to the limited enrolment nature of this program students are strongly advised to plan to enroll in backup programs.

Completion Requirements:

Each course requirement is individual and cannot be used more than once.

Total credits: 11.0 of which 7.0 credits must be CRI courses (including 3.0 credits at the 300+ level and 1.0 credit at the 400-level).

1. 2.0 credits from ECO/HIS/PHL/POL/PSY/SOC
2. All of [CRI205H1](#), [CRI210H1](#), [CRI215H1](#), [CRI225H1](#), [CRI335H1](#), [CRI340H1](#), [CRI350H1](#)
3. At least 3.0 credits from Group A
4. At least 1.0 credit from Group B
5. Additional credits (excluding those already counted) from Groups A, B or C for a total of 11.0 credits

Note: Students may use a maximum of 1.0 credit from Independent Study courses and 1.0 credit from Research Participation courses towards the Criminology & Sociolegal Studies program.

Group A: [CRI300H1](#)/ [CRI322H1](#)/ [CRI343H1](#)/ [CRI345H1](#)/ [CRI364H1](#)/ [CRI365H1](#)/ [CRI370H1](#)/ [CRI372H1](#)/ [CRI380H1](#)/ [CRI383H1](#)/ [CRI385H1](#)/ [CRI386H1](#)/ [CRI390H1](#)/ [CRI391H1](#)/ [CRI392H1](#)/ [CRI393H1](#)/ [CRI394H1](#)/ [CRI395H1](#)/ [CRI396H1](#)/ [CRI450H1](#)

Group B: [CRI420H1](#)/ [CRI422H1](#)/ [CRI425H1](#)/ [CRI427H1](#)/ [CRI428H1](#)/ [CRI429H1](#)/ [CRI431H1](#)/ [CRI435H1](#)/ [CRI480H1](#)/

CRI482H1/ CRI487H1/ CRI490H1/ CRI491H1/ CRI492H1/ CRI493H1/ CRI494H1/ CRI498H1

Group C: HIS324H1/ HIS375H1/ HIS411H1/ PHL271H1/ PHL370H1/ PSY201H1/ PSY202H1/ PSY220H1/ PSY240H1/ PSY328H1/ SOC205H1/ SOC212H1/ SOC313H1/ SOC315H1/ SOC413H1/ TRN412H1/ CRI389Y0

Note about non CRI courses:

1. Group C courses are offered by other departments. Registration in these courses may be available only to students who have completed specified prerequisites and/or are enrolled in a program sponsored by the department offering the course. Course enrolment conditions are listed in the Arts and Science timetable. Course descriptions, prerequisites, corequisites and exclusions are listed in the Calendar.
2. Students who have completed criminology/sociolegal type courses in the Faculty of Arts and Science that are not included in Group C may email the Program Coordinator to find out if the courses can be used towards the Group C program requirements.

Criminology and Sociolegal Studies - Major (Arts Program) - ASMAJ0826

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- 2.0 credits from ECO, HIS, PHL, POL, PSY, or SOC courses (any course level and combination)

For reasons of limited capacity, applicants with a final grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade average does not guarantee admission to the program.

Notes:

- Requests for admission will be considered in the first program request period only.

- Due to the limited enrolment nature of this program students are strongly advised to plan to enroll in backup programs.

Completion Requirements:

Students must complete a total of 8.0 credits including a minimum of 2.0 credits from 300+level CRI courses, of these 0.5 CRI credit must be at the 400-level.

1. 2.0 credits from ECO/HIS/PHL/POL/PSY/SOC
2. All of CRI205H1, CRI210H1, CRI215H1, CRI225H1
3. At least 2.0 credits at the 300+ level from Group A, at least 0.5 credit must be at the 400-level
4. At least 0.5 credit from Group B
5. Additional courses (excluding those already counted) from Groups A and C for a total of 8.0 credits

Note: Students may use a maximum of 1.0 credit from Independent Study courses and 1.0 credit from Research Participation courses towards the Criminology & Sociolegal Studies program.

Group A: CRI300H1/ CRI322H1/ CRI335H1/ CRI340H1/ CRI343H1/ CRI345H1/ CRI364H1/ CRI365H1/ CRI370H1/ CRI372H1/ CRI380H1/ CRI383H1/ CRI385H1/ CRI386H1/ CRI390H1/ CRI391H1/ CRI392H1/ CRI393H1/ CRI394H1/ CRI395H1/ CRI396H1/ CRI420H1/ CRI422H1/ CRI425H1/ CRI427H1/ CRI428H1/ CRI429H1/ CRI431H1/ CRI435H1/ CRI480H1/ CRI482H1/ CRI487H1/ CRI490H1/ CRI491H1/ CRI492H1/ CRI493H1/ CRI494H1/ CRI498H1

Group B: PSY201H1/ PSY202H1/ SOC202H1/ CRI350H1/ POL222H1

Group C: HIS375H1/ HIS411H1/ PHL271H1/ PHL370H1/ PSY220H1/ PSY240H1/ PSY328H1/ SOC205H1/ SOC212H1/ SOC313H1/ SOC315H1/ SOC413H1/ TRN412H1/ CRI389Y0

Important Notes:

1. Group C Courses: These courses are offered by other academic units. Registration in these courses may be available only to students who have completed specified prerequisites and/or are enrolled in a program sponsored by the academic unit offering the course. Check the Faculty of Arts and Science's timetable for details.
2. Students who have completed criminology/sociolegal type courses in the Faculty of Arts and Science (not included in Group C) may email the Program Coordinator to find out if these courses can be used towards the Group C requirements.

Not all courses are offered every year. Please check the [timetable](#) for current course offerings and enrolment restrictions/conditions. Students without course

Criminology and Sociolegal Studies Courses

CRI100H1 - True Crime? The Myths and Realities of Media Depictions of Crime and Justice

Hours: 24L/12T

The course will explore how crime and criminal justice institutions (the police, the courts and corrections) are depicted in the news, movies, television and on social media. The course will focus on how these depictions impact both public opinion and politics. The course will also examine how media depictions and public perceptions of crime and justice often differ dramatically from the empirical evidence produced by Criminological and Social Legal research.

Breadth Requirements: Society and its Institutions (3)

CRI205H1 - Introduction to Criminology

Hours: 24L/12T

An introduction to the study of crime and criminal behaviour. The concept of crime, the process of law formation, and the academic domain of criminology. Theories of crime causation, methodologies used by criminologists, and the complex relationship between crime, the media and modern politics.

Prerequisite: 4.0 credits

Recommended Preparation: 2.0 credits from ECO/HIS/PHL/POL/PSY/SOC with a combined average of at least 70%

Breadth Requirements: Society and its Institutions (3)

CRI210H1 - Criminal Justice

Hours: 24L/12T

An introduction to the Canadian criminal justice system. The institutions established by government to respond to crime and control it; how they operate, and the larger function they serve; including the role of the police, the trial process, courts and juries, sentencing, imprisonment and community corrections.

prerequisites may be removed at any time during the enrolment period. Course descriptions, prerequisites, corequisites and exclusions are listed below.

Prerequisite: [CRI205H1](#)

Breadth Requirements: Society and its Institutions (3)

CRI215H1 - Introduction to Sociolegal Studies

Hours: 24L/12T

The course covers several major issues that will help prepare students for advanced courses in the criminology major: the meaning of law, the production of laws and legal institutions, law in action, comparative legal traditions, and the methodology of sociolegal studies.

Prerequisite: 4.0 credits

Recommended Preparation: 2.0 credits from ECO/HIS/PHL/POL/PSY/SOC with a combined average of at least 70%

Breadth Requirements: Society and its Institutions (3)

CRI225H1 - Criminal Law

Hours: 24L/12T

The main principles and themes of Canadian criminal law; legal definitions of crime, requirements of a criminal act (actus reus), criminal intention (mens rea), causation and defences. The origins, goals and functioning of criminal law, and limits on the power of the state to criminalize behaviour.

Prerequisite: 4.0 credits

Recommended Preparation: 2.0 credits from ECO/ HIS/ PHL/ POL/ PSY/ SOC with a combined average of at least 70%

Breadth Requirements: Society and its Institutions (3)

CRI299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

CRI299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities....> Not eligible for CR/NCR option.

CRI300H1 - Theories of Criminal Justice

Hours: 36L

A survey of the evolution of normative theories of criminal justice, which examines how major theorists from the Enlightenment to the contemporary period have understood the normative justification for criminal prohibition and punishment. Although the course focuses on western political philosophy and social science, there will also be some attention to theories of criminal justice in selected non-western traditions.

Prerequisite: ([CRI205H1](#) and [CRI225H1](#)) or 1.0 credit at the 300+ level from HIS/PHL/POL/SOC

Breadth Requirements: Society and its Institutions (3)

CRI322H1 - Inequality and Criminal Justice

Hours: 36L

This course examines the intersections between social inequality and the criminal justice system in Canada and internationally. The course explores how factors such as race, ethnicity, gender, sexual orientation and religion influence perceptions of and experiences with crime and criminal justice.

Prerequisite: 1.0 credit from: [CRI205H1](#), [CRI210H1](#), [SOC212H1](#)

Exclusion: [CRI391H1](#) (Topics in Criminology and Sociolegal Studies: Inequality and Criminal Justice) offered in Winter 2018, Summer 2018, Summer 2019, Winter 2020, [SOC322H5](#)

Breadth Requirements: Society and its Institutions (3)

CRI335H1 - Policing

Hours: 36L

A theoretical framework is developed to examine the nature of policing, its structure and function. Attention is given to the history of policing as a global form of social practice. We examine the perspectives of both “the police”

and “the policed”, as well as the objectives, domains, strategies, and authority of contemporary policing, including decision-making, organizational culture, and accountability.

Prerequisite: [CRI210H1](#)/ [CRI215H1](#)

Breadth Requirements: Society and its Institutions (3)

CRI340H1 - Punishment: Theory and Practice

Hours: 36L

The study of punishment from historical and philosophical perspectives, with a focus on contemporary Canadian policy issues. Topics covered include penal theory, prisons and non-carceral forms of punishment, and the goals of penal reform.

Prerequisite: [CRI205H1](#), [CRI210H1](#), [CRI225H1](#)

Breadth Requirements: Society and its Institutions (3)

CRI343H1 - Comparative Criminal Justice

Hours: 36L

Criminal justice issues outside Canada, based on a variety of international and historical studies. The evolution of criminal justice systems in Western Europe, including the English adversarial and continental European inquisitorial approaches. A comparison of policing, criminal procedure, forms of punishment, and crime rates in the contemporary world.

Prerequisite: [CRI205H1](#), [CRI210H1](#), [CRI225H1](#)

Breadth Requirements: Society and its Institutions (3)

CRI345H1 - History of Criminal Justice

Hours: 36L

The course offers a historical perspective on the development of the legal doctrines, professions and institutions that define criminal justice in Canada and the broader common law world today. Topics include the shift from medieval trial by ordeal and torture to the modern reliance on expert witnesses and forensic science; the emergence of the adversarial trial; the growth of the legal profession; the birth of policing; the rise of the penitentiary; and the changing fortunes of the death penalty. The course focuses primarily on the period from the eighteenth century to the present. Students will be introduced to historical debates and ways of thinking and writing about law and crime. We will explore how culture,

politics, economics and social life are essential to how we understand the foundational elements of criminal justice, including concepts of truth, guilt, legitimacy, fairness and violence.

Prerequisite: 1.0 credit from: CRI215H1, CRI210H1, SOC212H1, SOC313H1, HIS268H1, any HIS 300+ level course. Any course combination from this list is acceptable.

Exclusion: CRI392H1 (Topics in Criminology and Sociolegal Studies: History of Criminal Justice in the Common Law World) offered in Winter 2018, Winter 2019, Winter 2020

Breadth Requirements: Society and its Institutions (3)

CRI350H1 - Understanding Criminological Research

Hours: 36L

An introduction to social science research methods used by criminologists and to the statistical analysis of criminological data. An understanding of the strengths and weaknesses of published criminological research is developed. Specific technical issues related to sampling, measurement, and data analysis are taught in the context of examining ways of answering research questions.

Prerequisite: CRI205H1, CRI210H1

Exclusion: SOC200H1, SOC200Y1

Breadth Requirements: Society and its Institutions (3)

CRI364H1 - Indigenous Peoples & Criminal Justice

Hours: 36L

An introduction to issues affecting Indigenous peoples in the Canadian criminal justice system identified by Indigenous scholars, activists and allies. Topics include: effects of colonization, legal discrimination and disenfranchisement, Treaties and land claims, criminalization, Indigenous activism, and the Truth and Reconciliation Commission.

Prerequisite: 1.0 credit from: CRI205H1, CRI210H1, CRI215H1, CRI225H1

Exclusion: CRI394H1 Topics: Indigenous Peoples & Criminal Justice taken in 20171

Breadth Requirements: Society and its Institutions (3)

CRI365H1 - Crime and Mind

Hours: 36L

Legal, psychological and sociological understandings of issues in the criminal justice system, through a consideration of topics including: criminal intent, the Not Criminally Responsible on Account of Mental Disorder defence, the use of battered woman syndrome as part of a self-defence, infanticide, issues of transcultural psychiatry, and jury screening for bias.

Prerequisite: 1.0 credit from: CRI205H1, CRI210H1, CRI225H1

Breadth Requirements: Society and its Institutions (3)

CRI370H1 - Youth Justice

Hours: 36L

The course will examine what is known about offending by youths and the various purposes that have been attributed to youth justice systems. The course will focus, in large part, however, on the nature of the laws and youth justice systems that have been designed in Canada and elsewhere to respond to offending by youths.

Prerequisite: CRI205H1, CRI210H1, CRI225H1

Breadth Requirements: Society and its Institutions (3)

CRI372H1 - Regulating Citizenship

Hours: 36L

The course examines selected topics in the scholarly study of citizenship, including the history of citizenship, normative theories of democratic citizenship, rights and duties of citizenship, acquisition and loss of citizenship, and related issues, such as multiple citizenship, statelessness, and the international law of citizenship. Readings come from law, history, political science, and other disciplines; and cover Canada, other western societies, and developing countries. The course comprises three basic units: the normative basis and historical evolution of citizenship, including a case study of Canada, policies governing the acquisition and loss of citizenship in Canada and elsewhere, and the parameters of citizenship and lack of citizenship in the contemporary world. Students will gain an understanding of the historical evolution of forms of political membership in both western and non-western societies, the constitutive role of citizenship in creating and maintaining individual rights, and the development and contemporary regulation of Canadian citizenship in comparative international perspective.

Prerequisite: 1.0 credit from: CRI205H1, CRI210H1, CRI225H1

Exclusion: CRI392H1 (Topic: *Regulating Citizenship*) offered in Fall 2021, CRI394H1 (Topic: *Regulating*

Citizenship) offered in Fall 2017, 2018, and 2019

Breadth Requirements: Society and its Institutions (3)

CRI380H1 - Crime, Gender and Sex

Hours: 36L

Theory, research and policy related to the ways in which gender shapes criminal behaviour, the administration of criminal justice, and the criminal law. How notions of different types of masculinity and femininity are embedded in and influence both the operation of the criminal justice system as well as criminal behaviours. The regulation of gender and sexuality through the criminal law and through crime.

Prerequisite: ([CRI205H1](#) and [CRI210H1](#)) or (70% in [SOC212H1](#) and enrolment in Sociology program)
Breadth Requirements: Society and its Institutions (3)

CRI383H1 - Immigration, Ethnicity and Crime

Hours: 36L

The connection between immigration and crime, the effect of immigration on crime rates, discrimination against immigrants, the representation of immigrants in crime statistics, public perception of risk and security, and criminal justice policy changes which affect immigration. We consider research conducted in North America and Europe.

Prerequisite: [CRI205H1](#) or [SOC212H1](#)
Breadth Requirements: Society and its Institutions (3)

CRI385H1 - Representing Crime and Authority

Hours: 36L

Cultural constructions of crime, disorder, dangerousness and risk are integral parts of the criminal justice system. A critical analysis of how criminal justice personnel, the media, and academic criminologists construct their authority through symbols and images, in order to “explain” and manage crime, and how these representations are regarded in public discourse.

Prerequisite: 1.0 credit from: [CRI205H1](#), [CRI210H1](#), [CRI225H1](#)
Breadth Requirements: Society and its Institutions (3)

CRI386H1 - Origins of Criminal Justice

Hours: 36L

Criminal justice practice, as well as political debate concerning crime and criminal justice, are often influenced by ideas that are initially developed outside the criminal justice arena. This course examines the history, current influence and efficacy of a range of such ideas, such as: the role of religious practice in rehabilitating offenders; military service and participation in sports as preventive of delinquency; the influence of environmental pollution on crime rates; the concept of the ‘problem family’; intelligence based policing and the use of management theories in criminal justice organizations.

Note: The course may include an optional Service Learning component. If offered, additional information will be provided in the Faculty of Arts and Science's [timetable](#).

Prerequisite: [CRI205H1](#), [CRI210H1](#)
Exclusion: [CRI390H1](#) Roots of Criminal Justice Policy taken in 20141/20151/20161.
Breadth Requirements: Society and its Institutions (3)

CRI389Y0 - Topics in Criminology and Sociolegal Studies Abroad

Topics in Criminology and Sociolegal Studies offered in an international setting. The content may vary from year to year. Details are posted on the Summer Abroad [website](#).

Prerequisite: Consult the Summer Abroad Program Office.
Breadth Requirements: Society and its Institutions (3)

CRI390H1 - Topics in Criminology and Sociolegal Studies

Hours: 36L

The objective of the course is to explore emerging issues in Criminology, and their social, legal, ethical and political implications. Topics vary from year to year.

Prerequisite: 1.0 credit from: [CRI205H1](#), [CRI210H1](#), [CRI225H1](#)
Breadth Requirements: Society and its Institutions (3)

CRI391H1 - Topics in Criminology and Sociolegal Studies

Hours: 36L

The objective of the course is to explore emerging issues in Criminology, and their social, legal, ethical and political implications. Topics vary from year to year.

Prerequisite: 1.0 credit from: [CRI205H1](#), [CRI210H1](#), [CRI225H1](#)

Breadth Requirements: Society and its Institutions (3)

CRI392H1 - Topics in Criminology and Sociolegal Studies

Hours: 36L

The objective of the course is to explore emerging issues in Criminology, and their social, legal, ethical and political implications. Topics vary from year to year.

Prerequisite: 1.0 credit from: [CRI205H1](#), [CRI210H1](#), [CRI225H1](#)

Breadth Requirements: Society and its Institutions (3)

CRI393H1 - Topics in Criminology and Sociolegal Studies

Hours: 36L

The objective of the course is to explore emerging issues in Criminology, and their social, legal, ethical and political implications. Topics vary from year to year.

Prerequisite: 1.0 credit from: [CRI205H1](#), [CRI210H1](#), [CRI225H1](#)

Breadth Requirements: Society and its Institutions (3)

CRI394H1 - Topics in Criminology and Sociolegal Studies

Hours: 36L

The objective of the course is to explore emerging issues in Criminology, and their social, legal, ethical and political implications. Topics vary from year to year.

Prerequisite: 1.0 credit from: [CRI205H1](#), [CRI210H1](#), [CRI225H1](#)

Breadth Requirements: Society and its Institutions (3)

CRI395H1 - Independent Study

Independent study under the direction of a faculty member. It is recommended that student approaches a Criminology and Sociolegal Studies Faculty member who

might willing to supervise their work in [CRI395H1](#). If student has found a faculty member willing to supervise their proposal, they must complete the [application form](#) with the help of their supervisor. A detailed description of the proposal is required. Enrolment is limited to students in the Criminology and Sociolegal Studies program. Students are not entitled to take more than 1.0 credit of [CRI395H1](#) course.

Consult the program [website](#) for additional information. Not eligible for CR/NCR option.

Prerequisite: [CRI205H1](#), [CRI210H1](#), [CRI225H1](#) and 1.0 CRI credit at the 300-level

Exclusion: [CRI395Y1](#)

Breadth Requirements: Society and its Institutions (3)

CRI396H1 - Research Participation

Credit course for supervised participation in a faculty research project. Offered only when a full-time appointed faculty member from the Centre for Criminology & Sociolegal Studies is willing and available to supervise. Students must contact faculty members currently teaching in the Criminology and Sociolegal Studies program to find out if there are any research participation opportunities available. Students requesting enrolment in a research participation course are advised to select an alternative course until the status of their enrolment is confirmed. Together with your supervisor, complete and submit a request for enrolment [application form](#) and the research ethics approval confirmation letter (if required). Submit the form by the beginning of the first week of the semester.

Consult the program [website](#) for additional information. Not eligible for CR/NCR option.

Prerequisite: 9.0 credits

Exclusion: [CRI397Y1](#)

Recommended Preparation: CGPA 3.0 recommended

Breadth Requirements: Society and its Institutions (3)

CRI398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

CRI398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>

-opportunities/research-excursions-program. Not eligible for CR/NCR option.

CRI399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

CRI399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

CRI420H1 - Current Issues in Criminal Law

Hours: 24S

An advanced seminar exploring in detail current issues in criminal law. The objective of the course is to discuss current policy and case law developments in the criminal law, and their social, political and ethical implications. The role of Parliament and the judiciary in the development of the criminal law is considered. Topics vary from year to year.

Prerequisite: 1.0 CRI credit at the 300-level
Breadth Requirements: Society and its Institutions (3)

CRI422H1 - Indigenous Law

Hours: 24S

Seminar course exploring Indigenous law, settler state law, and the complex interrelationship between the two in Canada. Topics include: legal sources, forms and processes; sovereignty, territory and jurisdiction; treaty relationships; Indigenous peoples in international law; Indigenous rights and the constitution; environmental use, relations and protection; and Indigenous self-determination and governance.

Prerequisite: 1.0 credit from: CRI205H1, CRI210H1, CRI215H1, CRI225H1 and a 0.5 CRI credit at the 300-level

Exclusion: CRI490H1 Advanced Topics in Criminology: Indigenous Law taken in 20169

Breadth Requirements: Society and its Institutions (3)

CRI425H1 - The Prosecution Process

Hours: 24L

A critical examination of the process by which certain conduct is identified, prosecuted and punished as “crime”, and the process by which individuals become “criminals”. The evolution of the modern prosecution system, including the exercise of prosecutorial discretion, rules of evidence, socially constructed defences, disparity in sentencing, and wrongful convictions.

Prerequisite: CRI205H1, CRI210H1, CRI225H1, 0.5 CRI credit at the 300-level

Breadth Requirements: Society and its Institutions (3)

CRI427H1 - Organized Crime and Corruption

Hours: 24S

An advanced seminar exploring the history and characteristics of organized crime and corruption.

Prerequisite: 1.0 CRI credit at the 300-level
Breadth Requirements: Society and its Institutions (3)

CRI428H1 - Policing the City: Crime, Community and Inequality

Hours: 24S

An advanced seminar exploring the connection between neighbourhoods and the perpetuation of poverty, social marginalization, segregation and crime. The course may include an optional Service Learning component. Check the timetable for details.

Prerequisite: 1.0 CRI credit at the 300-level
Breadth Requirements: Society and its Institutions (3)

CRI429H1 - Youth Culture, Racialization and Crime in the Global Context

Hours: 24S

An advanced seminar exploring youth culture and its possible connection to criminality from an international perspective.

Prerequisite: 1.0 CRI credit at the 300-level (0.5 may be substituted by a 300+ level HIS/PHL/PSY/SOC course)

Breadth Requirements: Society and its Institutions (3)

CRI431H1 - Mental Health, Morality & Legal Controls

Hours: 24S

A critical exploration of contemporary debates in criminology, and legal and moral philosophy concerning the diagnostic and criminal justice labeling of mental disorders such as psychopathy and paedophilia, and their representation in popular culture.

Prerequisite: 1.0 CRI credit at the 300-level

Breadth Requirements: Society and its Institutions (3)

CRI435H1 - Advanced Seminar in Policing

Hours: 24S

This course will explore policing in a comparative and historical context. Issues to be covered include the following: the maintenance of law and order before police forces; development of police forces in continental Europe and the English-speaking world; structure and function of national police forces around the world today; the role of political and secret police forces; and contemporary debates on the mission and regulation of the police in contemporary North America including issues such as police-community relations, private policing, and counter-terrorism.

Prerequisite: 1.0 CRI credit at the 300-level

Exclusion: CRI3130H1

Breadth Requirements: Society and its Institutions (3)

CRI450H1 - Advanced Research/Reading

A supervised individual or group project under the direction of a faculty member from the Centre for Criminology & Sociolegal Studies. Offered only when a full-time appointed faculty member from the Centre for Criminology & Sociolegal Studies is willing and available to supervise. Students must contact Faculty members currently teaching in the Criminology and Sociolegal Studies program to find out if there are any individual or group project opportunities available. Students requesting

enrolment in a research participation course are advised to select an alternative course until the status of their enrolment is confirmed. Together with your supervisor, complete and submit a request for enrolment application form and the research ethics approval confirmation letter (if required). Submit the form by the beginning of the first week of the semester. Form is available on the Program Office [website](#).

Not eligible for CR/NCR option.

Prerequisite: 1.5 CRI credits at the 300-level

Breadth Requirements: Society and its Institutions (3)

CRI480H1 - Interpersonal Violence

Hours: 24S

The meaning, purposes and sources of interpersonal violence, including an examination of debates over defining and documenting violence, and a review of the research on the relationships between illegitimate, interpersonal violence and state-approved or state-initiated violence. Cultural, social and individual correlates of interpersonal violence; the violence of the law; and how violence is justified and denied.

Prerequisite: 1.0 CRI credit at the 300-level

Breadth Requirements: Society and its Institutions (3)

CRI482H1 - Security Governance

Hours: 24S

The course will examine selected topics in security governance. Complementing university courses on public or state policing, which emphasize the role of the state in maintaining public order, we will examine how security is jointly produced through the interactions of state, commercial, civil society, and individual actors. Topics to be covered include the following: the public police and theories of security governance, private and privatized policing, plural policing and other non-state sources of public order, and private ownership of weapons. Students should gain an understanding of the myriad ways in which the state and other actors interact to create, maintain, and reshape public order.

Prerequisite: 1.0 CRI credit at the 300-level

Exclusion: CRI491H1 (Topic: *Security Governance*)

offered in Fall 2021, CRI492H1 (Topic: *Security Governance*) offered in Fall 2022

Breadth Requirements: Society and its Institutions (3)

CRI487H1 - Law, Space, and the City

Hours: 24S

An introduction to interdisciplinary studies of law and space, this course covers a broad range of topics, from work on empire and colonialism by legal historians and indigenous scholars to studies of national spaces, urban spaces, and bodily spaces. Some background in either legal studies or cultural geography is desirable. Open to students in law, geography, anthropology, women/gender studies, and sociology, though permission of the instructor is required.

Prerequisite: 1.0 CRI credit at the 300-level

Exclusion: CRI3256H (when offered as a joint course)

Breadth Requirements: Society and its Institutions (3)

CRI490H1 - Advanced Topics in Criminology and Sociolegal Studies

Hours: 24S

The objective of the course is to explore emerging issues in Criminology, and their social, legal, ethical and political implications. Topics vary from year to year.

Prerequisite: 1.0 CRI credit at the 300-level

Breadth Requirements: Society and its Institutions (3)

CRI491H1 - Advanced Topics in Criminology and Sociolegal Studies

Hours: 24S

Topics vary from year to year. The objective of the course is to explore emerging issues in Criminology, and their social, legal, ethical and political implications.

Prerequisite: 1.0 CRI credit at the 300-level

Breadth Requirements: Society and its Institutions (3)

CRI492H1 - Advanced Topics in Criminology and Sociolegal Studies

Hours: 24S

The objective of the course is to explore emerging issues in Criminology, and their social, legal, ethical and political implications. Topics vary from year to year.

Prerequisite: 1.0 CRI credit at the 300-level

Breadth Requirements: Society and its Institutions (3)

CRI493H1 - Advanced Topics in Criminology and Sociolegal Studies

Hours: 24S

Topics vary from year to year. The objective of the course is to explore emerging issues in Criminology, and their social, legal, ethical and political implications.

Prerequisite: 1.0 CRI credit at the 300-level

Breadth Requirements: Society and its Institutions (3)

CRI494H1 - Advanced Topics in Criminology and Sociolegal Studies

Hours: 24S

Topics vary from year to year. The objective of the course is to explore emerging issues in Criminology, and their social, legal, ethical and political implications.

Prerequisite: 1.0 CRI credit at the 300-level

Breadth Requirements: Society and its Institutions (3)

CRI498H1 - Intensive Course

Content in any given year depends on instructor. Intensive courses are offered by distinguished visitors from around the world. Students in their 4th year are strongly encouraged to take advantage of this unique opportunity to study with one or more outstanding visiting international scholars that the Centre for Criminology & Sociolegal Studies brings from time to time. The intensive course usually runs for approximately 3-4 weeks.

Breadth Requirements: Society and its Institutions (3)

Data Science

Introduction

Data Science is an emerging science that involves the ubiquitous problem of learning from data in a wide variety of disciplines. The building blocks of data science include computer science, statistics, and mathematics. Disciplines such as biology, English, economics, and geography generate and use data to tackle problems, and are a key part of the data science ecosystem. What data should and shouldn't be collected? How should society use data, and data derived predictions? are fundamental questions related to the societal, cultural, philosophical, legal, and historical implications of the emerging uses of data.

The University of Toronto is a global destination for data-science-driven research and education, and is home to one of the world's leading data science ecosystems that includes award winning faculty and data science researchers that are helping to address some of today's most challenging issues. Within the Faculty of Arts & Science there is no single data science department; many of our faculty members across several departments teach courses with significant data science components. We also offer a variety of programs of study in data science and related disciplines, including the data science specialist program, programs in computer science, statistical sciences, and more in the humanities, social sciences, and sciences, listed throughout this page.

Foundational Data Science Courses

There are a wide range of foundational Data Science courses offered within the Faculty of Arts & Science, which provide a starting point for students of all backgrounds, interests, and academic and career goals.

Preparing for Programs in Data Science, Statistical Sciences, or Computer Science

Students who intend to pursue Specialist or Major programs in Data Science, Statistical Sciences, or Computer Science should enroll in [STA130H1](#) and [CSC108H1](#) (or [CSC110Y1](#) if in the First-Year Computer Science Admission Category). STA130H1 is an introduction to the field of Data Science, using a combination of logical thinking, mathematics, computer simulation, and oral and written discussion and analysis.

CSC108H1 and CSC110Y1 is an introduction to the field of computer science, including the programming and computational thinking skills that are vital to data science studies. See below for a description and course requirements of the Data Science Specialist Program and other related programs.

Preparing for Other Programs that Incorporate Data Science

For students who are interested in pursuing other programs but who want to apply Data Science knowledge and skills to their studies, we offer three interdisciplinary foundational Data Science courses: [EEB125H1](#) (for students in the Physical and Life Sciences), [GGR274H1](#) (for students in the Social Sciences), and [ENG286H1](#) (for students in the Humanities). Each of these courses covers the same core Data Science content but is tailored to students in each sector through a combination of domain-specific applications and themes.

While the foundational Data Science courses all have a significant computational component, there is no **programming experience required** for any of them. Instead, these courses teach the relevant programming skills throughout, so that all students can write computer programs to analyze data by the end of the course. Students who complete EEB125H1, GGR274H1, or ENG286H1 and are interested in gaining a more in-depth introduction to computer programming should consider taking CSC108H1 and other computer science courses.

Data Science Specialist Program

The Data Science Specialist Program is a program offered jointly between the Department of Statistical Sciences and the Department of Computer Science. This program comprises three fundamental and highly-integrated aspects. Students will acquire expertise in statistical reasoning, methods, and inference essential for any data analyst; in-depth training in computer science - the design and analysis of algorithms and data structures for handling large amounts of data; and best practices in software design. This includes training in machine learning, which lies at the intersection of computer and statistical sciences. The third aspect is the application of computer science and statistics to produce analyses of complex, large-scale datasets, and the communication of the insights resulting from these analyses. Students will receive training in these areas by taking integrative courses that are designed specifically for the Data Science Specialist Program. These courses involve experiential learning: students will be solving real world data science problems that involve real datasets from a variety of domains such as business, social sciences, and medicine. The successful student will combine their expertise in computer and statistical science to collect,

clean, wrangle complex large-scale datasets, and produce and communicate analyses.

Students may also be interested in exploring other programs and courses offered by the Department of Statistical Sciences or Department of Computer Science. In particular, their Specialist and Major programs share most of the same first-year requirements as the Data Science Specialist program.

Data Science in the Humanities

Large datasets and new computational techniques are reshaping our understanding of the humanities — and humanistic inquiry is raising pressing questions about their ethics and impact. A humanities approach to Data Science equips students with the practical and theoretical skills to engage critically with literary data and computation. What insights emerge when we move “close” to “distant” reading practices — from the close examination of a few canonical texts to algorithmic investigation of vast archives? How comprehensive are existing humanities datasets, and what gaps exist in them? What biases and assumptions are enshrined and naturalized in code?

In the humanities, scholars use computational approaches to large datasets to study a huge range of topics:

- How cities work in science fiction
- How Black women abolition activists changed the language and society of the nineteenth century United States
- How Indigenous data sovereignty needs to inform digital research
- How historians can use data about imprisonment to understand the past and the present
- How data reflects power differences in our societies, and may be used to improve health and share culture – but also to surveil and discriminate
- What datasets are missing, and what their absence tells us about our world

Students in humanities-focused Data Science courses learn how to create computer programs, to negotiate tradeoffs between computational and statistical techniques, and how to make arguments with and about data. They will weigh the merits of quantitative and qualitative approaches to problems in the humanities, engage critically with gaps and biases in datasets, learn to make persuasive arguments with data, and engage with urgent scholarly approaches to issues of the race, gender, disability, and environmental impacts of large-scale computing, data science, and algorithmic decision-making.

Data Science in the Social Sciences

Social scientists are increasingly working with big and complex datasets that contain spatial, group-level, and individual-level dimensions to answer questions about society. This involves projects as diverse as simulating the spread of disease across geographic space to using data on housing prices to understand why market bubbles occur to exploring how social network structure links to the spread of misinformation. Students will develop introductory programming knowledge and data acumen in order to create and run computer programs to explore where, when, and why social processes occur, drawing on theories from geography, linguistics, sociology, anthropology, economics, political science, and psychology. Instruction will focus on applying current data analysis libraries, communicating and translating data science methods to both researchers and the public, distinguishing causation from correlation and coincidence, and negotiating tradeoffs between different computational and statistical approaches.

Data Science in the Physical and Life Sciences

Life and physical scientists increasingly use big and complex datasets to answer questions about society and the natural world. More than ever, advances in biology, chemistry, and physics require data science thinking and quantitative skills. This importance highlights the urgency to gaining aptitude in the ability to break a complex problem into simpler parts with computational and statistical approaches, as well as in the collection, organization, interpretation, and clear communication of complex data. The Faculty of Arts & Science offers several programs of study that intentionally bridge data science learning to disciplinary topics in the life and physical sciences through the departments of Cell & Systems Biology, Chemistry, Ecology & Evolutionary Biology, and Physics.

Programs Incorporating Data Science

Data Science, Computer Science, Statistical Sciences, and Mathematics

Applied Data Science Minor (Science Program) - ASMIN0160

More than at any other time in our history, we are living through a paradigm shift in how we think about data. Advances in computing power, algorithms for data modeling and machine learning, coupled with unparalleled access to vast quantities of data has transformed disciplines across the sciences, social sciences, and humanities. The Minor in Applied Data Science will help students learn fundamental data science methodologies drawn from computing and statistics and provide opportunities to apply these methodologies to datasets, problem domains, and explorations in many disciplines of study in Arts & Science. Understanding the human and ethical contexts and communicating results of data science methodologies will appear in courses throughout the program.

The minor is designed to complement programs in other areas with opportunities for data science applications (see program requirements for pertinent programs). This program is designed to be accessible to students who have never done any computer programming or statistics before, or who haven't taken high school or university calculus. All skills necessary to succeed in the program are taught in our courses. Most students who are interested in this program should start by choosing one of our three introductory, interdisciplinary data science courses: EEB125H1, GGR274H1, or ENG286H1, which introduce data science skills such as computer programming, statistical reasoning, and data visualization within the context of a particular discipline. Students then proceed to take a suite of key computer science and statistics courses that reinforce and extend these skills, with an emphasis on applications to real-world problems. Finally, in later years students will choose from a wide variety of courses drawn from across the Faculty of Arts & Science. These upper-year courses will provide the opportunity to discuss and analyze the human contexts of data science, and to apply data science methodologies in discipline-specific contexts.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum may change each year depending on available spaces and the number of applicants. Eligibility is based on the following criteria:

- A. Completion of one of EEB125H1/ ENG286H1/ GGR274H1/ ESS245H1/ STA130H1 with a grade of at least 60%, OR
- B. Completion of one of CSC108H1/ CSC110Y1/ CSC148H1 with a grade of at least 60%, OR
- C. Completion of one of ECO220Y1/ EEB225H1/ GGR270H1/ IRW220H1/ PSY201H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA261H1/ STA288H1 with a grade of at least 60%.

Obtaining this minimum grade does not guarantee admission to the program. If students have completed more than one of the above courses at the time of admission, the minimum grade will be based on the higher course grade.

Notes:

1. Requests for admission will be considered in the first program request period only.
2. Students enrolled in this program cannot be simultaneously enrolled in or complete any Computer Science, Statistics, or Actuarial Science programs, including the Computer Science Minor, Statistics Minor, and Data Science Specialist; nor any Mathematics Major or Specialist program; nor the Focus in Data Analytics within the Economics Major or Specialist; nor the Focus in Data Science in Business within the Rotman Commerce specialist programs.

Completion Requirements:

(4.0 credits)

1. EEB125H1/ ENG286H1/ GGR274H1/ ESS245H1/ STA130H1
2. 0.5 credit from CSC108H1/ CSC110Y1/ CSC148H1
3. 0.5 credit from ECO220Y1/ EEB225H1/ GGR270H1/ IRW220H1/ PSY201H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA261H1/ STA288H1/ POL222H1

Note: If you completed STA238H1, STA248H1, and/or STA261H1 before being admitted to the Minor, please note that these courses are exclusions to EEB125H1, ENG286H1, GGR274H1, and STA130H1. You can complete ESS245H1 to meet requirement 1 or can instead complete an additional 0.5 credit from the list of

courses in requirement 7, for a total of 1.5 credits for requirement 7.

If you completed [CSC148H1](#) before being admitted to the Minor, please note that this course is an exclusion to [EEB125H1](#), [ENG286H1](#), and [GGR274H1](#). You can complete [ESS245H1](#) or [STA130H1](#) to meet requirement 1 or can instead complete an additional 0.5 credit from the list of courses in requirement 7, for a total of 1.5 credits for requirement 7.

4. [CSC271H1](#) (first offering in 2025-26)
5. [STA272H1](#) (first offering in 2025-26)
6. [PHL277H1](#)/ [PHL377H1](#)/ [HPS246H1](#)/ [CSC300H1](#)

7. At least 1.0 credit from the following courses:
[BCB410H1](#)/ [BCB420H1](#)/ [CHM326H1](#)/ [CHM328H1](#)/
[CSB352H1](#)/ [CSB435H1](#)/ [CSB434H1](#)/ [CSB471H1](#)/
[CSB472H1](#)/ [DHU338H1](#)/ [EEB313H1](#)/ [EEB319H1](#)/
[EEB365H1](#)/ [EEB458H1](#)/ [EEB460H1](#)/ [EEB463H1](#)/
[ENV338H1](#)/ [ESS452H1](#)/ [GGR315H1](#)/ [GGR372H1](#)/
[GGR373H1](#)/ [GGR375H1](#)/ [GGR376H1](#)/ [GGR377H1](#)/
[GGR415H1](#)/ [GGR462H1](#)/ [GGR472H1](#)/ [GGR473H1](#)/
[IMM360H1](#)/ [IRE379H1](#)/ [JFL484H1](#)/ [JGA305H1](#)/
[JPM400Y1](#)/ [LIN305H1](#)/ [LIN405H1](#)/ [LIN456H1](#)/
[MGY441H1](#)/ [POL314H1](#)/ [POL352H1](#)/ [POL332H1](#)/
[POL483H1](#)/ [PCL367H1](#)/ [PCL368H1](#)/ [PSL432H1](#)/
[PSY305H1](#)/ [PSY319H1](#)/ [PSY329H1](#)/ [PSY339H1](#)/
[PSY349H1](#)/ [PSY359H1](#)/ [PSY369H1](#)/ [PSY379H1](#)/
[SOC303H1](#)/ 0.5 or 1.0 credits from a 300-/400-level capstone, topics, or independent study course(s) in which students apply data science methodologies, and with prior approval of the Applied Data Science Minor Program Director

Courses listed in requirement 7 are offered by academic units across the Faculty of Arts & Science. Please review the prerequisites and enrolment controls for the course(s) that you are planning to take to complete this requirement. Course enrolment controls are listed in the University's Timetable Builder. Course descriptions, prerequisites, corequisites, and exclusions are listed in both in the Timetable Builder and in the Faculty of Arts & Science Academic Calendar.

Computer Science Major (Science Program) - ASMAJ1689

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

For students admitted to Arts & Science in the Year 1 Computer Science (CMP1) admission category:

Completed courses (with minimum grades)

Students in the CMP1 admissions category have guaranteed admission to the Computer Science Major, provided the following courses with the stated minimum grades are completed within 12 months of beginning their studies:

- [CSC110Y1](#) (70%)
- [CSC111H1](#) (77%)
- [MAT137Y1](#)/ [MAT157Y1](#)

For students admitted to other Arts & Science Year 1 admission categories:

Special Requirement

- Students who do not have the Computer Science Admission Guarantee must complete a supplementary application to be considered for the program.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- [CSC148H1](#)
- [CSC165H1](#)/ [CSC240H1](#)

To ensure that students admitted to the program will be successful, applicants with a grade below 70% will not be considered for admission. Obtaining this minimum grade does not guarantee admission to the program.

Notes:

1. Requests for admission will be considered in the first program request period only.
2. Due to the limited enrolment nature of this program, students are strongly advised to plan to enrol in backup programs.
3. Students admitted to the program after second or third year will be required to pay retroactive deregulated program fees.

Arts & Science Internship Program

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that space is more limited for Year 3 entry and students

applying for Year 3 entry must have been admitted to the Computer Science Major in the Summer after Year 2.

Completion Requirements:

(8.0 credits, including at least one 0.5 credit at the 400-level)

First year (2.5 credits):

1. (CSC108H1, CSC148H1, CSC165H1/ CSC240H1)/ (CSC110Y1, CSC111H1); MAT137Y1/ MAT157Y1/ (MAT135H1, MAT136H1)

Students in this program have the option to enrol in the Arts & Science Internship Program (ASIP) stream.

Notes:

- Students with a strong background in an object-oriented language such as Python, Java or C++ may omit CSC108H1 and proceed directly with CSC148H1. [There is no need to replace the missing 0.5 credit for program completion; however, please base your course choice on what you are ready to take, not on “saving” a 0.5 credit].
- CSC240H1 is an accelerated and enriched version of CSC165H1 plus CSC236H1, intended for students with a strong mathematical background, or who develop an interest after taking CSC165H1. If you take CSC240H1 without CSC165H1, there is no need to replace the missing half-credit for program completion; but please see Note (a).
- Consult the Undergraduate Office for advice about choosing among CSC108H1 and CSC148H1, and between CSC165H1 and CSC240H1.
- We recommend that students take MAT137Y1 or MAT157Y1, as they have been determined to provide the best preparation for upper-year courses in computer science and benefit students in CSC165H1/ CSC240H1.

Second year (2.5 credits):

2. CSC207H1, CSC236H1/ CSC240H1, CSC258H1, CSC263H1/ CSC265H1, STA247H1/ STA237H1/ STA255H1/ STA257H1

Later years (3.0 credits):

3. 3.0 credits of courses in total selected from among the following groups:

- Group A:** CSC209H1; any 300-/ 400-level CSC course *except* those listed in Group B

- Group B:** CSC299H1, CSC299Y1, CSC396H0, CSC398H0, CSC398Y0, CSC399H1, CSC399Y1, CSC490H1, CSC491H1, CSC494H1, CSC494Y1, CSC495H1
- Group C:** BCB330Y1, BCB410H1, BCB420H1, BCB430Y1; MAT223H1/ MAT240H1, MAT235Y1/ MAT237Y1/ MAT257Y1, any 300-/400-level MAT course *except* MAT329Y1, MAT390H1, MAT391H1; STA248H1/ STA238H1/ STA261H1, any 300-/400-level STA course; ECE419H1, ECE454H1

These 3.0 credits must include:

- at least 2.0 credits from Groups A and/or B, including at least 0.5 credit from a 400-level CSC course
- at least 1.0 credit at the 300-/400-level from Group A
- no more than 1.5 credits from Group B, and no more than 1.0 credit from Group B at the 400-level
- no more than 0.5 credit from CSC311H1/ STA314H1
- no more than 0.5 credit from CSC412H1/ STA414H1
- no more than 0.5 credit from CSC438H1/ MAT309H1

The choices in 3 must satisfy the requirement for an integrative, inquiry-based activity by including one of the following courses: CSC301H1, CSC302H1, CSC316H1, CSC318H1, CSC404H1, CSC413H1, CSC417H1, CSC419H1, CSC428H1, CSC454H1, CSC485H1, CSC490H1, CSC491H1, CSC494H1, CSC495H1, CSC494Y1. Students who complete the Arts & Science Internship Program (ASIP) stream will also meet this requirement.

Students enrolled in the Computer Science Major (ASMAJ1689) program may request to count other University of Toronto Faculty of Applied Science and Engineering courses within Group C. Requests must be reviewed and approved by the Computer Science Undergraduate Office and will be evaluated on a case-by-case basis. For information about this process, please contact the Computer Science Undergraduate Office.

Transfer credits (except for those attained through a University of Toronto exchange program) cannot comprise more than 1.0 credit at the 300-/ 400-level, and cannot be used to satisfy the requirement for an integrative, inquiry-based activity. In addition, transfer credits (except for

those attained through a University of Toronto exchange program) cannot be used to satisfy the requirement for 0.5 credit at the 400-level in CSC.

Students cannot combine the Computer Science Major (ASMAJ1689) program with the Computer Science Specialist (ASSPE1689) or the Computer Science Minor (ASMIN1689) for their degree.

Computer Science Minor (Science Program) - ASMIN1689

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

For students admitted to Arts & Science in the Year 1 Computer Science (CMP1) admission category:

Completed courses (with minimum grades)

Students in the CMP1 admissions category have guaranteed admission to the Computer Science Minor, provided the following courses with the stated minimum grades are completed within 12 months of beginning their studies:

- CSC110Y1 (70%)
- CSC111H1 (70%)

For students admitted to other Arts & Science Year 1 admission categories:

Special Requirement

- Students who do not have the Computer Science Admission Guarantee must complete a supplementary application to be considered for the program.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- CSC148H1
- CSC165H1/ CSC240H1

To ensure that students admitted to the program will be successful, applicants with a grade below 70% will not be considered for admission. Obtaining this minimum grade does not guarantee admission to the program.

Notes:

1. Requests for admission will be considered in the first program request period only.
2. Due to the limited enrolment nature of this program, students are strongly advised to plan to enroll in backup programs.

Completion Requirements:

(4.0 credits)

1. (CSC108H1/ CSC120H1, CSC148H1, CSC165H1/ CSC240H1) / (CSC110Y1, CSC111H1)

Notes:

- a. Students with a strong background in an object-oriented language such as Python, Java or C++ may omit CSC108H1 and proceed directly with CSC148H1.
- b. CSC240H1 is an accelerated and enriched version of CSC165H1 plus CSC236H1, intended for students with a strong mathematical background, or who develop an interest after taking CSC165H1.
- c. Consult the Undergraduate Office for advice about choosing among CSC108H1 and CSC148H1, and between CSC165H1 and CSC240H1.

2. CSC207H1, CSC236H1/ CSC240H1

(Total of above requirements: 2.5 credits. If you take fewer than 2.5 credits, you must take more than 1.5 credits from the next list, so that the total is 4.0 credits.)

3. 1.5 credits from the following list, of which at least 1.0 credit must be at the 300-/400-level:

- CSC: any 200-/300-/400-level

Note:

- Computer Science Minors are limited to 1.5 credits from 300-/400-level CSC/ECE courses.
- Transfer credits cannot comprise more than 0.5 credit at the 300-/400-level.

Students cannot combine the Computer Science Minor (ASMIN1689) program with the Computer Science Major (ASMAJ1689) or the Computer Science Specialist (ASSPE1689) for their degree.

Computer Science Specialist (Science Program) - ASSPE1689

Enrolment Requirements:

This is a limited enrolment program. Only students in the Year 1 Computer Science admission category (CMP1) who meet the criteria of the Computer Science program admission guarantee are eligible to apply to the Computer Science Specialist program.

Requests for admission will be considered in the first program request period only. Students must have completed 4.0 credits and meet the requirements listed below to apply.

Completed courses (with minimum grades)

Students in the CMP1 admissions category have guaranteed admission to the Computer Science Specialist, provided the following courses with the stated minimum grades are successfully completed within 12 months of beginning their studies:

- CSC110Y1 (70%)
- CSC111H1 (77%)
- MAT137Y1/ MAT157Y1

Note:

1. If you are admitted to the CS Specialist in a session other than the summer after your first year (including if you are admitted after completing summer courses), you may be charged retroactive program fees. More information about retroactive fees can be found in the Faculty of Arts & Science Fees & Refund page.

Arts & Science Internship Program

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that space is more limited for Year 3 entry and students applying for Year 3 entry must have been admitted to the Computer Science Specialist in the Summer after Year 2.

Completion Requirements:

(12.0 credits, including at least 1.5 credits at the 400-level)

First year (2.5 credits):

1. (CSC110Y1, CSC111H1), MAT137Y1/ MAT157Y1

Notes:

- a. CSC110Y1 and CSC111H1 must be completed in order to complete the Specialist program. No course substitutions will be accepted for CSC110Y1 and/or CSC111H1.
- b. Students seeking an enriched introduction to the theory of computing may choose to enrol in CSC240H1 in their first year. Please consult the department's Undergraduate Office for advice about enrolling in CSC240H1.

Students in this program have the option to enrol in the Arts & Science Internship Program (ASIP) stream. (See **Note** below)

Second year (3.5 credits):

2. CSC207H1, CSC209H1, CSC236H1/ CSC240H1, CSC258H1, CSC263H1/ CSC265H1, MAT223H1/ MAT240H1; STA247H1/ STA237H1/ STA255H1/ STA257H1

Later years (6.0 credits):

3. CSC369H1, CSC373H1

4. 5.0 credits of courses in total selected from among the following groups:

- **Group A:** Any 300-/ 400-level CSC course *except* CSC369H1, CSC373H1, and those listed in Group B
- **Group B:** CSC299H1, CSC299Y1, CSC396H0, CSC398H0, CSC398Y0, CSC399H1, CSC399Y1, CSC490H1, CSC491H1, CSC494H1, CSC494Y1, CSC495H1
- **Group C:** BCB330Y1, BCB410H1, BCB420H1, BCB430Y1; MAT224H1/ MAT247H1, MAT235Y1/ MAT237Y1/ MAT257Y1, any 300-/400-level MAT course except MAT329Y1, MAT390H1, MAT391H1; STA248H1/ STA238H1/ STA261H1, any 300-/400-level STA course; ECE419H1, ECE454H1

These 5.0 credits must include:

- at least 3.0 credits from Groups A and/or B, including at least 1.5 credits from 400-level CSC courses
- at least 1.0 credit from Group A

- no more than 2.0 credits from Group B, and no more than 1.0 credit from Group B at the 400-level
- no more than 0.5 credit from CSC311H1/STA314H1
- no more than 0.5 credit from CSC412H1/STA414H1
- no more than 0.5 credit from CSC438H1/MAT309H1

The choices in 4 must satisfy the requirement for an integrative, inquiry-based activity by including one of the following courses: CSC301H1, CSC302H1, CSC316H1, CSC318H1, CSC404H1, CSC413H1, CSC417H1, CSC419H1, CSC428H1, CSC454H1, CSC485H1, CSC490H1, CSC491H1, CSC494H1, CSC495H1, CSC494Y1. Students who complete the Arts & Science Internship Program (ASIP) stream will also meet this requirement.

Students enrolled in the Computer Science Specialist (ASSPE1689) program may request to count other University of Toronto Faculty of Applied Science and Engineering courses within Group C. Requests must be reviewed and approved by the Computer Science Undergraduate Office and will be evaluated on a case-by-case basis. For information about this process, please contact the Computer Science Undergraduate Office.

Transfer credits (except for those attained through a University of Toronto exchange program) cannot comprise more than 1.0 credit at the 300-/400-level, and cannot be used to satisfy the requirement for an integrative, inquiry-based activity. In addition, transfer credits (except for those attained through a University of Toronto exchange program) cannot comprise more than 0.5 credit of the 400-level CSC courses required.

Students cannot combine the Computer Science Specialist (ASSPE1689) program with the Computer Science Major (ASMAJ1689) or the Computer Science Minor (ASMIN1689) for their degree.

Choosing courses

This program offers considerable freedom to choose courses at the 300-/400-level, and you are free to make those choices on your own. We are eager to offer guidance, however, and both our Undergraduate Office and individual faculty members are a rich source of advice.

Data Science Specialist (Science Program) - ASSPE1687

The field of Data Science is a combination of statistics and computer science methodologies that enable 'learning from data'. A data scientist extracts information from data, and is involved with every step that must be taken to achieve this goal, from getting acquainted with the data to communicating the results in non-technical language. The Data Science Specialist program prepares students for work in the Data Science industry or government and for graduate studies in Data Science, Computer Science, or Statistics. Students in the program will benefit from a range of advanced courses in Computer Science and Statistics offered by the University of Toronto, as well as from a sequence of three integrative courses designed especially for the program.

The Data Science Specialist program comprises three fundamental and highly-integrated aspects. First, students will acquire expertise in statistical reasoning, methods, and inference essential for any data analyst. Second, students will receive in-depth training in computer science: the design and analysis of algorithms and data structures for handling large amounts of data, and best practices in software design. Students will receive training in machine learning, which lies at the intersection of computer and statistical sciences. The third aspect is the application of computer science and statistics to produce analyses of complex, large-scale datasets, and the communication of the results of these analyses; students will receive training in these areas by taking integrative courses that are designed specifically for the Data Science Specialist program. The courses involve experiential learning: students will be working with real large-scale datasets from the domain of business, government, and/or science. The successful student will combine their expertise in computer and statistical science to produce and communicate analyses of complex large-scale datasets.

Skills that graduates of the program will acquire include proficiency in statistical reasoning and computational thinking; data manipulation and exploration, visualization, and communication that are required for work as a data scientist; the ability to apply statistical methods to solve problems in the context of scientific research, business, and government; familiarity and experience with best practices in software development; and knowledge of current software infrastructure for handling large data sets. Graduates of the program will be able to demonstrate the ability to apply machine learning algorithms to large-scale datasets that arise in scientific research, government, and business; create appropriate data visualizations for complex datasets; identify and answer questions that involve applying statistical methods or machine learning algorithms to complex data, and communicating the results; present the results and

limitations of a data analysis at an appropriate technical level for the intended audience.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

For students admitted to Arts & Science in the Year 1 Computer Science (CMP1) admission category:

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on the number of applicants. At least 20 spaces will be available each year for students applying from Year 1 Computer Science (CMP1) within 12 months of beginning their studies:

- CSC110Y1
- CSC111H1
- MAT137Y1/ MAT157Y1
- STA130H1/ STA261H1*

* STA130H1 is restricted to first-year students, therefore students are strongly encouraged to take STA130H1 in their first year. STA261H1 will be used in place of STA130H1 for program admission purposes if a student has not completed STA130H1 or if they have completed both STA130H1 and STA261H1 by the time they are being considered for admission.

To ensure that students admitted to the program will be successful, applicants will not be considered for admission with a grade lower than 70% in CSC110Y1, MAT137Y1, and STA130H1/ STA261H1, or lower than 77% in CSC111H1. (MAT157Y1 grades will be adjusted to account for the course's greater difficulty.) Obtaining these minimum grades does not guarantee admission to the program.

For students admitted to other Arts & Science Year 1 admission categories:

Special Requirement

- Students who do not have the Computer Science Admission Guarantee must complete a supplementary application to be considered for the program.

Variable Minimum Grade

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- CSC148H1
- MAT137Y1/ MAT157Y1

- STA130H1/ STA261H1*

* STA130H1 is restricted to first-year students, therefore students are strongly encouraged to take STA130H1 in their first year. STA261H1 will be used in place of STA130H1 for program admission purposes if a student has not completed STA130H1 or if they have completed both STA130H1 and STA261H1 by the time they are being considered for admission.

To ensure that students admitted to the program will be successful, applicants with a grade lower than 70% will not be considered for admission. (MAT157Y1 grades will be adjusted to account for the course's greater difficulty.) Obtaining these minimum grades does not guarantee admission to the program.

Notes:

1. Requests for admission will be considered in the first program request period only.
2. Due to the limited enrolment nature of this program, students are strongly advised to plan to enroll in backup programs.
3. Students admitted to the program after second or third year will be required to pay retroactive deregulated program fees.

Arts & Science Internship Program

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that space is more limited for Year 3 entry and students applying for Year 3 entry must have been admitted to the Data Science Specialist in the Summer after Year 2.

Completion Requirements:

(13.0-13.5 credits, including at least 1.5 credits at the 400-level)

First year (3.0-3.5 credits)

MAT137Y1/ MAT157Y1, MAT223H1/ MAT240H1 (MAT240H1 is recommended), STA130H1, (CSC108H1, CSC148H1)/ (CSC110Y1, CSC111H1)

Note: Students with a strong background in an object-oriented language such as Python, Java or C++ may omit CSC108H1 and proceed directly with CSC148H1. There is no need to replace the missing half-credit for program completion; however, please base your course choice on what you are ready to take, not on "saving" a half-credit. Consult with the Computer Science Undergraduate Office for advice on choosing between CSC108H1 and CSC148H1.

Students in this program have the option to enrol in the Arts & Science Internship Program (ASIP) stream.

Second year (3.5-4.0 credits)

MAT237Y1/ MAT257Y1, STA257H1, STA261H1, CSC207H1, (CSC165H1, CSC236H1)/ CSC236H1/ CSC240H1 (CSC240H1 is recommended), JSC270H1 (Data Science I)

Note: CSC240H1 is an accelerated and enriched version of CSC165H1 plus CSC236H1, intended for students with a strong mathematical background, or who develop an interest after taking CSC165H1. If you take CSC240H1 without CSC165H1, there is no need to replace the missing half-credit for program completion; however, please base your course choice on what you are ready to take, not on "saving" a half-credit. Consult the Computer Science Undergraduate Office for advice on choosing between CSC165H1 and CSC240H1. CSC236H1 may be taken without CSC165H1 for students who completed CSC111H1.

Later years (6.5 credits/7.0 credits for students who have not completed STA130H1 (see 4.))

1. STA302H1, one of STA303H1 or STA305H1, STA355H1, CSC209H1, CSC263H1/ CSC265H1 (CSC265H1 is recommended), CSC343H1, CSC373H1, JSC370H1 (Data Science II)
2. STA314H1/ CSC311H1
3. 2.0 credits from the following list, including at least 1.0 credit at the 400-level (see below for additional conditions): STA303H1/ STA305H1 (whichever one was not taken previously), STA313H1/ CSC316H1, STA347H1, CSC401H1, STA414H1/ CSC412H1, CSC413H1, any 400-level STA course; JSC470H1 (Data Science III); CSC454H1, CSC490H1, CSC491H1, CSC494H1, CSC495H1, CSC494Y1.
4. If a student has not completed STA130H1 then an additional 0.5 credit 300+ level STA course that is not used towards any other program requirement must be completed.

The choices from 3 must satisfy the requirement for an integrative, inquiry-based activity by including at least 0.5 credit from the following: JSC470H1 (Data Science III); CSC454H1, CSC490H1, CSC491H1, CSC494H1, CSC495H1, CSC494Y1, STA490Y1, STA496H1, STA497H1, STA498Y1, STA499Y1. Students who complete the Arts & Science Internship Program (ASIP) stream will also meet this requirement.

Transfer credits (except for those attained through a University of Toronto exchange program) cannot comprise more than 1.0 credit at the 300-/400-level, and cannot be used to satisfy the requirement for an integrative, inquiry-based activity. In addition, transfer credits (except for those attained through a University of Toronto exchange program) cannot comprise more than 0.5 credit of the 400-level CSC or or STA or JSC courses required.

Students will be advised to develop domain expertise in at least one area where Data Science is applicable, by taking a sequence of courses in that area throughout their program. Examples of such areas will be provided to students by program advisors and will form the basis for a later proposal for program Focuses (to be approved through internal Arts & Science governance procedures).

Note:

-If you do not complete STA130H1 in your first year of study, this requirement must be fulfilled by completing a 300 or 400-level 0.5 credit STA course to replace STA130H1. Please note that the 300 or 400-level STA course used to replace STA130H1 cannot be a course that is already being used to meet a program completion requirement.

Mathematics & Its Applications Specialist (Probability/Statistics) (Science Program) - ASSPE1890

The Specialist in Mathematics & Its Applications (Probability/Statistics) is directed toward students whose interests include both Mathematics and its applications in Probability and Statistics. These skills are in high demand in a world in which the uses of AI are expanding by leaps and bounds.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students are encouraged to take their introductory calculus/analysis, algebra, and computer programming in their first year of study (MAT157Y1/ MAT137Y1, MAT223H1/ MAT240H1, MAT224H1/ MAT247H1, CSC108H1, CSC148H1).

Arts & Science Internship Program

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and students applying for Year 3 entry must have

been admitted to the Mathematics & Its Applications Specialist (Probability/Statistics) in the Summer after Year 2.

Completion Requirements:

11.5-12.5 credits

Fundamentals for Mathematical Applications in Probability and Statistics

1. Calculus, Analysis and Proofs: 2.0 – 2.5 credits from MAT157Y1/ (MAT137Y1, MAT246H1), MAT237Y1/ MAT257Y1
2. Algebra: 1.0 credit from MAT223H1/ MAT240H1, MAT224H1/ MAT247H1
3. Ordinary Differential Equations: MAT244H1/ MAT267H1
4. Computer Programming: CSC108H1, CSC148H1/ CSC110Y1
5. Probability and Statistics: STA237H1/ STA257H1, STA238H1/ STA261H1, STA347H1/ MAT377H1/ MAT370H1

Ethical and Social Responsibility

6. 0.5 credit with a significant emphasis on ethics and social responsibility (list below)

Further Studies in Probability and Statistics

7. Data Analysis: STA302H1
8. Related Structures: 1.0 credit from STA355H1/ MAT332H1/ MAT344H1/ APM348H1/ APM461H1
9. Advanced Statistics: 1.0 credit from STA452H1/ STA453H1/ STA437H1/ STA442H1/ STA447H1/ STA465H1/ STA410H1

Further Studies in Mathematics

10. Groups and Symmetries: MAT301H1
11. Complex Variables: MAT334H1
12. Real Analysis: MAT337H1
13. Partial Differential Equations or Optimization: 0.5 credit from APM346H1/ MAT351Y1/ APM462H1
14. Advanced Topics: Additional 1.0 credit at the 300+ level from APM/MAT courses

Notes:

- Not all courses listed have priority enrolment for students enrolled in this program. Students are responsible for checking priority of courses and meeting course prerequisites for courses they wish to take.
- Each course can count toward only one requirement, even if listed as options to multiple requisites of the program.

- CSC108H1 is waived for students who complete CSC148H1 first. If a student has not taken a year-long course in programming in secondary school, it is strongly recommended that students take CSC108H1 first.
- Students may use CR/NCR on the course they use toward the ethics and social responsibility credit.
- Students may be permitted to take Math graduate courses. A 0.5 credit of these courses may count toward specialist program requirements, where relevant (e.g., as courses “at the 400-level”). To review eligibility criteria and apply for graduate courses as an undergraduate student, find more information on the A&S Math website.
- Students may be permitted to take an independent reading course. A 0.5 credit of these courses may count towards program requirements, where relevant (e.g., as courses “at the 400-level”). To review eligibility criteria and apply for independent reading courses as an undergraduate student, find more information on the A&S Math website.

Courses accepted towards this program's ethics requirement:

CSC300H1/ CSE240H1/ CSE270H1/ EEB215H1/ ENV200H1/ ESS205H1/ any ETH200+/ FOR201H1/ HIS268H1/ HPS200H1/ HPS202H1/ INS200H1/ JPH441H1/ PHL265H1/ PHL271H1/ PHL273H1/ PHL275H1/ PHL281H1/ PHL295H1/ SDS256H1/ another suitable course with permission from the Associate Chair, Undergraduate

Specialist in Statistical Science: Methods and Practice (Science Program) - ASSPE2270

Statistical Science encompasses methods and tools for obtaining knowledge from data and for understanding the uncertainty associated with this knowledge. The purposes of the undergraduate programs are to: (1) equip students with a general framework for obtaining knowledge from data; (2) give students skills that they are able to flexibly apply to a variety of problems; and (3) to provide students with the ability to learn new methods as needs, data sources, and technology change.

The Specialist Program in Statistical Science: Methods and Practice is distinguished from the specialist program in Statistical Science: Theory and Methods through its emphasis on collaborative statistical practice and advanced exposure to an allied discipline. The program includes fundamental concepts in probability and statistical theory with mathematical prerequisites relevant

to statistical practice. Students in the program acquire advanced expertise in statistical reasoning, methods, and computation, and complete a focus in another discipline that permits students to become conversant in that discipline to the extent that they can effectively collaborate. Students will also acquire advanced skills in communication, consultation and collaboration and an understanding of the role of mathematical thinking to support the development and evaluate the properties of statistical methods.

Enrolment Requirements:

This is a limited enrolment program. Note there are different admission criteria depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

For students who have completed between 4.0 and 8.5 credits:

Completed Courses (some with minimum grades)

The following courses are required:

- STA130H1
- CSC108H1/ CSC110Y1/ CSC111H1/ CSC120H1/ CSC148H1
- MAT223H1/ MAT224H1/ MAT240H1
- (MAT135H1 and MAT136H1) with a minimum grade of 73% in each/ MAT137Y1 (63%)/ MAT157Y1 (63%)

Variable Minimum Grade Average

A minimum grade average in STA130H1 and (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

Note:

- Students who take (MAT135H1 and MAT136H1) will typically require a higher minimum grade average than students who take MAT137Y1/ MAT157Y1.
- STA130H1 is restricted to first-year students, therefore students are strongly encouraged to take STA130H1 in their first year. If you are unable to complete STA130H1 in first year, see notes below for accepted substitutions for this requirement.

For students who have completed 9.0 or more credits:

Completed Courses (some with minimum grades)

The following courses are required:

- CSC108H1/ CSC110Y1/ CSC111H1/ CSC120H1/ CSC148H1
- MAT223H1/ MAT224H1/ MAT240H1
- MAT235Y1/ MAT237Y1/ MAT257Y1
- (STA237H1 and STA238H1) with a minimum grade of 73% in each/ (STA247H1 and STA248H1) with a

minimum grade of 73% in each/ (STA257H1 and STA261H1) with a minimum grade of 63% in each.

Variable Minimum Grade Average

A minimum grade average in (STA237H1 and STA238H1) / (STA247H1 and STA248H1) / (STA257H1 and STA261H1) and MAT235Y1/ MAT237Y1/ MAT257Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

Note:

Students who take (STA237H1, STA238H1) / (STA247H1, STA248H1) will typically require a higher minimum grade average than students who take (STA257H1, STA261H1).

Arts & Science Internship Program

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that space is more limited for Year 3 entry and students applying for Year 3 entry must have been admitted to the Specialist in Statistical Science: Methods and Practice in the Summer after Year 2.

Completion Requirements:

(10.5 or 11.0 credits plus a disciplinary focus requiring 2.0-3.5 credits)

First year:

1. STA130H1, (CSC108H1, CSC148H1) / (CSC110Y1, CSC111H1) / (CSC110Y1, CSC148H1), (MAT135H1, MAT136H1) / MAT137Y1/ MAT157Y1. (MAT137Y1/ MAT157Y1 recommended)

Notes:

1. Students with a strong background in an object-oriented language such as Python, Java or C++ may omit CSC108H1 and proceed directly with CSC148H1. [There is no need to replace the missing 0.5 credit for program completion; however, please base your course choice on what you are ready to take, not on "saving" a 0.5 credit].
2. Recommended: introductory course in disciplinary focus. MAT223H1/ MAT224H1/ MAT240H1 is also strongly recommended to be taken in first year and is required preparation for MAT237Y1.

Second year:

3. MAT223H1/ MAT224H1/ MAT240H1, MAT235Y1/ MAT237Y1/ MAT257Y1, (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

((STA257H1, STA261H1) recommended)

Upper years:

4. STA302H1, STA303H1, STA304H1/ STA305H1, STA313H1/ STA314H1/ STA365H1, STA355H1

5. 1.5 credits from the following list: STA414H1, STA437H1, STA442H1, STA457H1, STA465H1, STA475H1, STA480H1, STA410H1

6. STA490Y1. Students who complete the Arts & Science Internship Program (ASIP) stream will also meet this requirement.

7. 1.0 credit from the following list: MAT224H1/ MAT247H1, MAT337H1/ MAT357H1, CSC207H1, or any remaining 300+ level STA courses not used toward other requirements of this program - STA304H1, STA305H1, STA313H1, STA314H1, STA347H1, STA365H1, STA410H1, STA414H1, STA437H1, STA442H1, STA447H1, STA450H1, STA452H1, STA453H1, STA457H1, STA465H1, STA475H1, STA480H1, STA492H1, STA496H1/ STA497H1 (STA399H1 and STA399Y1 may be considered on a case by case basis with the approval of the Program Director.)

Notes:

-If you do not complete STA130H1 in your first year of study, this requirement must be fulfilled by completing a 300 or 400-level 0.5 credit STA course to replace STA130H1. Please note that the 300 or 400-level STA course used to replace STA130H1 cannot be a course that is already being used to meet a program completion requirement.

Disciplinary Focuses

Students in the Specialist Program in Statistical Science: Methods and Practice program must enrol in and complete at least one disciplinary focus.

To enrol in one or more focuses, students must first be enrolled in the Specialist Program in Statistical Science: Methods and Practice program. Enrolment instructions can be found on the [Arts & Science Program Toolkit website](#). Focuses can be chosen on ACORN after admission to the program, which begins in July.

Health Studies (ASFOC2270A): (2.0 credits) HMB342H1, at least 0.5 credit from HST209H1/ HST211H1/ HST250H1, and at least 0.5 credit from HST308H1/ HST310H1/ HST405H1/ HST330H1/ HST440H1/ HST464H1

Global Health (ASFOC2270B): (3.0 credits) BIO120H1, BIO130H1, HMB203H1, HMB265H1, HMB323H1/ HMB303H1/ HMB306H1/ JNH350H1/ HMB342H1, HMB433H1/ HMB406H1/ HMB462H1/ HAJ453H1/ HMB434H1 (Recommended: HMB433H1)

Health and Disease (ASFOC2270C): (3.0 credits) BIO120H1, BIO130H1, HMB202H1, HMB265H1, HMB302H1/ HMB322H1/ HMB312H1/ HMB342H1, HMB422H1/ HMB402H1/ HMB432H1/ HMB434H1/ HMB435H1/ HMB436H1/ HMB437H1/ HMB452H1/ HMB462H1

Fundamental Genetics and its Applications (ASFOC2270D): (3.0 credits) BIO120H1, BIO130H1, HMB201H1, HMB265H1, HMB301H1/ HMB311H1/ HMB321H1/ HMB360H1, HMB421H1/ HMB441H1/ HMB401H1/ HMB431H1 (Recommended: HMB421H1)

Neuroscience (ASFOC2270E): (3.0 credits) BIO120H1, BIO130H1, HMB200H1, HMB265H1, HMB300H1/ HMB310H1/ HMB320H1/ HMB360H1/ CJH332H1, HMB420H1/ JHA410H1/ HMB430H1/ HMB450H1 (Recommended: HMB420H1)

Social Psychology (ASFOC2270F): (2.0 credits) PSY100H1, PSY220H1, at least 1.0 from PSY320H1/ PSY321H1/ PSY322H1, PSY324H1/ PSY326H1/ PSY421H1/ PSY424H1/ PSY425H1/ PSY426H1/ PSY427H1/ PSY405H1/ PSY406H1/ PSY405Y1/ PSY406Y1

Cognitive Psychology (ASFOC2270G): (2.0 credits) PSY100H1, PSY270H1, 1, at least 1.0 credits from PSY312H1/ PSY370H1/ PSY371H1/ PSY372H1/ PSY475H1/ PSY493H1 / PSY496H1/ PSY405H1/ PSY406H1/ PSY405Y1/ PSY406Y1

Sociolinguistics (ASFOC2270H): (3.0 credits) (LIN101H1, LIN102H1); two of LIN228H1, LIN229H1, LIN232H1 or LIN241H1; LIN351H1 and LIN456H1

Psycholinguistics (ASFOC2270I): (3.0 credits) (LIN101H1, LIN102H1); two of LIN228H1, LIN229H1, LIN232H1 or LIN241H1; two of JLP374H1, JLP315H1 or JLP471H1

Astronomy & Astrophysics (ASFOC2270J): (2.5 or 3.0 credits) (PHY131H1, PHY132H1) / (PHY151H1, PHY152H1); AST221H1, AST222H1; (PHY252H1, AST320H1) / AST325H1/ AST326Y1

Sociology (ASFOC2270K): (2.5 credits) (SOC100H1, SOC150H1) with a combined minimum grade average of 65%; SOC204H1; 1.0 credit from SOC303H1, SOC312H1, SOC336H1, SOC355H1, SOC363H1, SOC364H1.

Students interested in advanced study in Sociology should consider additional courses, in particular SOC201H1, SOC251H1, and SOC254H1

Ecology (ASFOC2270L): (3.0 credits) BIO120H1, BIO220H1; 2.0 credits from (with at least a 0.5 credit at the 400-level) EEB319H1/ EEB321H1/ EEB328H1/ EEB365H1/ EEB428H1/ EEB433H1/ EEB440H1 or ENV234H1/ ENV334H1/ ENV432H1

Evolutionary Biology (ASFOC2270M): (3.5 credits) BIO120H1, BIO130H1, BIO220H1; 1.5 credits from HMB265H1/ BIO260H1, EEB318H1, EEB323H1, EEB324H1, EEB325H1, EEB362H1, EHJ352H1; 0.5 credit from EEB440H1, EEB455H1, EEB458H1, EEB459H1, EEB460H1

Notes:

- BIO260H1 requires BIO230H1 as a prerequisite.
- Students in the Focus in Evolutionary Biology can request that HMB waive the co-requisite of BIO230H1 for HMB265H1 and that EEB waive the prerequisite of BIO230H1 for EEB460H1. These waivers will only be considered for students in the Applied Statistics and Methods and Practice specialist focus in Evolutionary Biology. All other pre- and co-requisites are required.

Economics (ASFOC2270N): (3.5 credits) (ECO101H1, ECO102H1), ECO200Y1/ ECO206Y1, ECO202Y1/ ECO208Y1, 0.5 credit 300+ series ECO course with the exception of ECO374H1 and ECO375H1

Biochemistry (ASFOC2270O): (3.0 credits) CHM135H1, CHM136H1, BCH210H1, BCH311H1, BCH370H1, BCH441H1

Physics (ASFOC2270P): (2.5 credits) PHY131H1/ PHY151H1, PHY132H1/ PHY152H1, PHY224H1, PHY252H1/ PHY254H1/ PHY256H1, PHY324H1

Pharmacology and Biomedical Toxicology (ASFOC2270Q): (3.0 credits) BIO130H1 (70%), PSL300H1, PSL301H1, PCL201H1, PCL302H1, PCL345H1/ PCL362H1/ PCL381H1/ PCL469H1/ PCL470H1

Immunology (3.0 Credits) - BIO130H1 (70%), IMM250H1, IMM340H1, IMM350H1, IMM360H1, IMM429H1/ IMM430H1/ IMM431H1/ IMM435H1

Students in the Focus in Immunology can request that Immunology waive the BIO and BCH prerequisites for IMM340H1, IMM360H1, and IMM435H1. These waivers will only be considered for students in the Specialist in Statistical Science: Methods and Practice Focus in Immunology. All other pre- and co-requisites are required.

Specialist in Statistical Science: Theory and Methods (Science Program) - ASSPE2290

Statistical Science encompasses methods and tools for obtaining knowledge from data and for understanding the uncertainty associated with this knowledge. The purposes of the undergraduate programs are to: (1) equip students with a general framework for obtaining knowledge from data; (2) give students skills that they are able to flexibly apply to a variety of problems; and (3) to provide students with the ability to learn new methods as needs, data sources, and technology change.

The Specialist Program in Statistical Science: Theory and Methods emphasizes probability and the theory of statistical inference as underlying mathematical frameworks for statistical data analysis. Students in the program acquire advanced expertise in statistical theory and methods, as well as an understanding of the role of statistical science to solve problems in a variety of contexts. The successful student will also acquire skills in mathematical reasoning, computational thinking, and communication in the context of solving statistical problems.

Enrolment Requirements:

This is a limited enrolment program. Note there are different admission criteria depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

For students who have completed between 4.0 and 8.5 credits:

Completed Courses (some with minimum grades)
The following courses are required:

- STA130H1
- CSC108H1/ CSC110Y1/ CSC111H1/ CSC120H1/ CSC148H1
- MAT223H1/ MAT224H1/ MAT240H1
- MAT137Y1 (63%)/ MAT157Y1 (63%)

Variable Minimum Grade Average

A minimum grade average in STA130H1 and MAT137Y1/ MAT157Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

Note:

- STA130H1 is restricted to first-year students, therefore students are strongly encouraged to take STA130H1 in their first year. If you are unable to complete STA130H1 in

first year, see notes below for accepted substitutions for this requirement.

For students who have completed 9.0 or more credits:

Completed Courses (some with minimum grades)

The following courses are required:

- CSC108H1/ CSC110Y1/ CSC111H1/ CSC120H1/ CSC148H1
- MAT223H1/ MAT224H1/ MAT240H1
- MAT237Y1/ MAT257Y1
- STA257H1 (63%) and STA261H1 (63%)

Variable Minimum Grade Average

A minimum grade average in (STA257H1 and STA261H1) and MAT237Y1/ MAT257Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

Arts & Science Internship Program

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that space is more limited for Year 3 entry and students applying for Year 3 entry must have been admitted to the Specialist in Statistical Science: Theory and Methods in the Summer after Year 2.

Completion Requirements:

(11.0 or 11.5 credits)

First Year:

STA130H1, CSC108H1/ CSC110Y1/ CSC111H1/ CSC120H1/ CSC148H1, MAT137Y1/ MAT157Y1, MAT223H1/ MAT224H1/ MAT240H1

Second Year:

MAT224H1/ MAT247H1, MAT237Y1/ MAT257Y1; STA257H1, STA261H1

Higher Years:

1. STA302H1, STA303H1, STA304H1/ STA305H1, STA313H1/ STA314H1/ STA365H1, STA347H1, STA355H1

2. 1.0 credit from the following list: STA410H1, STA414H1, STA437H1, STA442H1, STA457H1, STA465H1, STA475H1, STA480H1

3. One of STA447H1, STA452H1, STA453H1

4. 1.0 credit from: ACT351H1/ ACT451H1, ACT352H1/ ACT452H1, ACT460H1, MAT327H1, MAT332H1, MAT334H1/ MAT354H1, MAT337H1/ MAT357H1, MAT301H1/ MAT347Y1, MAT344H1, CSC207H1, CSC336H1, CSC343H1, or any remaining 300+ level STA courses not used toward other program requirements - STA304H1, STA305H1, STA313H1, STA314H1, STA365H1, STA410H1, STA414H1, STA437H1, STA442H1, STA447H1, STA450H1, STA452H1, STA453H1, STA457H1, STA465H1, STA475H1, STA480H1, STA490Y1, STA492H1, STA496H1/ STA497H1 (STA399H1 and STA399Y1 may be considered on a case by case basis with the approval of the Program Director.)

5. One of STA492H1, STA496H1/ STA497H1/ STA498Y1/ STA499Y1. Students who complete the Arts & Science Internship Program (ASIP) stream will also meet this requirement.

Students planning to take any of these courses should ensure they have the required prerequisites

Note:

- If you do not complete STA130H1 in your first year of study, this requirement must be fulfilled by completing a 300 or 400-level 0.5 credit STA course to replace STA130H1. Please note that the 300 or 400-level STA course used to replace STA130H1 cannot be a course that is already being used to meet a program completion requirement.

Statistics Major (Science Program) - ASMAJ2289

Statistical Science encompasses methods and tools for obtaining knowledge from data and for understanding the uncertainty associated with this knowledge. The purposes of the undergraduate programs are to: (1) equip students with a general framework for obtaining knowledge from data; (2) give students skills that they are able to flexibly apply to a variety of problems; and (3) to provide students with the ability to learn new methods as needs, data sources, and technology change.

The Major in Statistics gives students a broad understanding of the statistical methods and computational and communication skills appropriate for effective statistical problem solving. The successful student will also acquire a general understanding of the role of mathematical thinking to support the development and evaluate the properties of statistical methods. While the Major is designed to complement study in an area of application of quantitative methods, students in the Major may choose to have a greater focus in probability and statistical theory through elective courses.

Enrolment Requirements:

This is a limited enrolment program. Note there are different admission criteria depending on whether a student has completed between 4.0 and 8.5 credits, or 9.0 or more credits.

For students who have completed between 4.0 and 8.5 credits:

Completed Courses

The following courses are required:

- STA130H1
- (MAT135H1 and MAT136H1) / MAT137Y1 / MAT157Y1

Variable Minimum Grade Average

A minimum grade average in STA130H1 and (MAT135H1 and MAT136H1) / MAT137Y1 / MAT157Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

Note:

- Students who take (MAT135H1 and MAT136H1) will typically require a higher minimum grade average than students who take MAT137Y1 / MAT157Y1.
- STA130H1 is restricted to first-year students, therefore students are strongly encouraged to take STA130H1 in their first year. If you are unable to complete STA130H1 in first year, see notes below for accepted substitutions for this requirement.

For students who have completed 9.0 or more credits:

Completed Courses

The following courses are required:

- CSC108H1 / CSC110Y1 / CSC111H1 / CSC120H1 / CSC148H1
- MAT223H1 / MAT224H1 / MAT240H1
- MAT235Y1 / MAT237Y1 / MAT257Y1
- (STA237H1 and STA238H1) / (STA247H1 and STA248H1) / (STA257H1 and STA261H1) / ECO227Y1

Variable Minimum Grade Average

A minimum grade average in (STA237H1 and STA238H1) / (STA247H1 and STA248H1) / (STA257H1 and STA261H1) / ECO227Y1 and MAT235Y1 / MAT237Y1 / MAT257Y1 is needed for entry. This minimum grade average changes each year depending on available spaces and the number of applicants.

Note:

- Students who take (STA237H1 and STA238H1) / (STA247H1 and STA248H1) will typically require a higher minimum grade average than students who take (STA257H1 and STA261H1) / ECO227Y1.

Completion Requirements:

(7.0 or 7.5 credits, including a 0.5 credit STA 400-series course)

First Year:

STA130H1, CSC108H1 / CSC110Y1 / CSC111H1 / CSC120H1 / CSC148H1, (MAT135H1, MAT136H1) / MAT137Y1 / MAT157Y1.

(MAT223H1 / MAT224H1 / MAT240H1 recommended in first year)

Second Year:

MAT223H1 / MAT224H1 / MAT240H1, MAT235Y1 / MAT237Y1 / MAT257Y1; (STA247H1, STA248H1) / (STA237H1, STA238H1) / (STA257H1, STA261H1) / ECO227Y1

(STA237H1 and STA238H1 are strongly recommended. MAT221H1 may not be used for this requirement.)

Higher Years:

1. STA302H1
2. 0.5 credit from STA313H1 / STA314H1 / STA365H1 / STA347H1 / STA355H1
3. 0.5 credit from STA414H1 / STA437H1 / STA442H1 / STA457H1 / STA465H1 / STA475H1 / STA480H1
4. 1.0 credit from remaining STA300+ level courses not used toward other program requirements in the following list: STA303H1, STA304H1, STA305H1, STA313H1, STA314H1, STA347H1, STA355H1, STA365H1, STA410H1, STA414H1, STA437H1, STA442H1, STA447H1, STA450H1, STA452H1, STA453H1, STA457H1, STA465H1, STA475H1, STA480H1, STA490Y1, STA492H1, STA496H1 / STA497H1 (STA399H1 and STA399Y1 may be considered on a case by case basis with the approval of the Program Director).

Note:

- If you do not complete STA130H1 in your first year of study, this requirement must be fulfilled by completing a 300 or 400-level 0.5 credit STA course to replace STA130H1. Please note that the 300 or 400-level STA course used to replace STA130H1 cannot be a course that is already being used to meet a program completion requirement.

Statistics Minor (Science Program) - ASMIN2289

Statistical Science encompasses methods and tools for obtaining knowledge from data and for understanding the uncertainty associated with this knowledge. The Minor in Statistics is designed to provide students with some exposure and skills in statistical methods. It

complements programs in other disciplines which involve quantitative research.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

First Year:

MAT133Y1 (70%)/(MAT135H1, MAT136H1)/MAT135Y1/MAT137Y1/ MAT157Y1; CSC108H1/ CSC110Y1/CSC111H1/ CSC120H1/ CSC148H1. (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1 is strongly recommended).

STA130H1 is also strongly recommended.

Second Year:

MAT223H1/ MAT224H1/ MAT240H1, (STA220H1/ STA221H1/ ECO220Y1, STA255H1)/(STA237H1, STA238H1)/(STA247H1, STA248H1)/(STA257H1, STA261H1)/ ECO227Y1

MAT223H1/ MAT224H1/ MAT240H1 recommended in 1st year

Higher Years:

STA302H1

0.5 credit from the following list: STA303H1, STA304H1, STA305H1, STA313H1, STA314H1, STA347H1, STA355H1, STA365H1, STA410H1, STA437H1, STA450H1, STA457H1

Biology Programs in Genomics and Informatics

Bioinformatics and Computational Biology Specialist (Science Program) - ASSPE1868

The genomic and post-genomic era brings opportunities for new insight into all aspects of biology and medicine, based on the computational analysis of very large datasets in a biological context. The Bioinformatics and Computational Biology Program is an interdepartmental,

interdisciplinary Program of Study that balances computer-science and life-science courses towards that goal. As a Specialist Program it is designed to prepare students for graduate studies in the field.

The Program is formally administered by the Department of Cell and Systems Biology and co-sponsored by the Departments of Biochemistry, Computer Science, Ecology and Evolutionary Biology, and Molecular Genetics; all sponsoring Departments have clear trajectories to extend the Program into graduate studies in the respective Department.

Note: this program has deregulated fees, which are incurred after enrolment in the program. Please refer to Arts & Science Registration Instructions for more information.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO130H1 and (CSC108H1/ CSC148H1/ CSC110Y1)
or
- BIO230H1 and CSC236H1

To ensure that students admitted to the program will be successful, applicants with a grade average lower than 75% in these required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program. While it is difficult to predict what will constitute a "competitive" grade average in a given year, based on previous years the estimate is =mid 80s.

Applications from students lacking a numerical grade in one of the specified prerequisites may be considered on the basis of their entire academic record and the availability of space in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have

been admitted to the Bioinformatics & Computational Biology Specialist in the Summer after Year 2.

Completion Requirements:

Specialist program:
(12.5 credits)

First or second year:

Foundational courses (5.0 credits total)

(MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1
(CSC108H1, CSC148H1)/ CSC110Y1
(CSC111H1/ CSC165H1, CSC236H1)/ CSC240H1 (1)
CSC263H1/ CSC265H1
(CHM135H1, CHM136H1)/ CHM151Y1
BIO130H1

Upper years:

Program requirements (7.5 credits total)

STA237H1/ STA247H1/ STA255H1/ STA257H1
CSC207H1
CSC209H1
CSC373H1
BIO230H1/ BIO255H1
BIO260H1/ HMB265H1
(BCH210H1, (BCH311H1/ CSB349H1/ MGY311Y1))/
BCH242Y1
BCH441H1/ MGY441H1/ CSB472H1
BCB330Y1
BCB410H1
BCB420H1
BCB430Y1

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream

Notes:

BCB students are allowed to enrol in up to 2.5 CSC credits at the 300/400-level

Course substitutions are possible with written permission of the Program Director. Note that the requirements for a co-sponsoring Department's major can normally be fulfilled with 0.5 to 3.5 additional credits. All Major programs in the co-sponsoring life science departments require BIO120H1, however, it is not formally a part of this Specialist Program's requirements.

(1) The "missing" 0.5 credit of the substitution does not have to be replaced. For details, please refer to the Computer Science Program instructions in this Calendar.

Former BCB students benefitted from taking CSB352H1, Bioinformatic Methods. They also found it to be helpful to take BCH441H1/ MGY441H1 prior to BCB410H1 due to BCB410H1's R programming requirement.

Genome Biology Major (Science Program) - ASMAJ2655

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Genome Biology Major in the Summer after Year 2.

Completion Requirements:

This program is a joint program of the departments of Cell & Systems Biology, Ecology & Evolutionary Biology, and Molecular Genetics. It is administered through the Department of Cell & Systems Biology.

(8.0 credits)

First year: BIO120H1, BIO130H1; (CHM135H1, CHM136H1)/ CHM151Y1; (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

Higher years:

1. BIO220H1, BIO230H1/ BIO255H1; BIO260H1/ HMB265H1; EEB225H1/ STA220H1
2. Genomics fundamentals: BCH311H1/ CSB349H1/ MGY311Y1, CSB352H1; EEB323H1
3. 0.5 credit laboratory course from: CSB472H1, CSB474H1; EEB460H1
4. 1.0 credit genomics elective from: CSB330H1, CSB350H1, CSB397Y0, CSB427H1, CSB435H1, CSB450H1, CSB457H1, CSB458H1, CSB471H1, CSB473H1, CSB490H1, CSB491H1, CSB497H1/ CSB498Y1/ CSB499Y1; EEB362H1, EEB455H1, EEB458H1, EEB459H1, EEB462H1, EEB463H1, EEB397Y1/ EEB497H1/ EEB498Y1/ EEB499Y1; EHJ352H1; MGY350H1, MGY360H1, MGY428H1, MGY470H1, MGY480Y1

NOTE: Students taking CSB397Y0, CSB490H1, CSB491H1, CSB497H1/ CSB498Y1/ CSB499Y1, EEB397Y1/ EEB497H1/ EEB498Y1/ EEB499Y1 or MGY480Y1 are encouraged to conduct a genomics-related research project.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Quantitative Biology Major (Science Program) - ASMAJ2368

The Quantitative Biology Major program (8.0 credits) is designed for students with a deep interest in biology who wish to gain a strong grounding in quantitative methods and their application to biological questions. More than ever, advancements in biology, from the molecular through the organismal to the ecosystem level, require quantitative thinking and skills along with a strong understanding of biological processes. Interdisciplinary research that draws from the natural sciences, mathematics, statistics and computer science, is an important aspect of modern biology. This major provides foundations in biology and quantitative approaches used to test and advance biological knowledge, and is appropriate for students who wish to pursue a career or graduate studies in a broad range of life sciences, ranging from biomedical to conservation to epidemiology.

The program is delivered through a mixture of classroom-learning and applied laboratory teaching, with an emphasis on understanding how quantitative methods inform our understanding of biology, and how they can be applied to test and develop new hypotheses. Students also have access to independent research opportunities that enhance professional skills, science communication, and the development and application of knowledge in quantitative biology.

Quantitative Biology Major students have priority enrollment in the EEB courses listed, but not in courses offered by other departments, such as STA, MAT, CSC, CSB and BCB. Students should be aware that some courses listed have prerequisites that are not listed below. For students intending to pursue graduate studies, it is strongly recommended that an independent research course such as EEB498Y1 be included as part of the Quantitative Biology major.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- BIO120H1 (70%)/ BIO130H1 (70%)
- CSC108H1 (70%)/ CSC148H1 (70%)/ CSC110Y1 (70%)/ EEB125H1 (70%)/ MAT135H1 (70%)/

MAT136H1 (70%)/ MAT137Y1 (70%)/ MAT157Y1 (70%)

Completion Requirements:

(8.0 credits including at least 2.0 credits at the 300+ level, 0.5 of which must be at the 400 level)

First Year (2.5 credits):

BIO120H1, BIO130H1, EEB125H1/ CSC108H1/ CSC148H1/ CSC110Y1, (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

Higher Years (5.5 credits):

1. 1.5 credits: BIO220H1, BIO230H1/ BIO255H1, BIO260H1/ HMB265H1
2. 1.0 credit in introductory probability and statistics: EEB225H1, GGR270H1, PSY201H1, PSY202H1, STA220H1, STA221H1, STA237H1, STA238H1, STA247H1, STA248H1, STA255H1, STA257H1, STA261H1, STA288H1
3. 0.5 credit in intermediate math: APM236H1, MAT221H1/ MAT223H1, MAT224H1, MAT240H1, MAT237Y1, MAT247H1
4. 1.0 credit from: CSB352H1, EEB319H1, EEB323H1, EEB324H1, EEB362H1, GGR372H1, GGR373H1, PHY331H1
5. 1.0 credit from: APM346H1, APM446H1, APM461H1, APM462H1, CSB472H1, CSC311H1, CSC320H1, CSC336H1, CSC343H1, CSC373H1, CSC384H1, CSC401H1, CSC412H1, CSC413H1, CSC420H1, EEB313H1, EEB314H1, EEB458H1, EEB459H1, EEB460H1, EEB462H1, EEB463H1, EEB498Y1, EEB499Y1, MAT332H1, MAT335H1, MAT344H1, MAT351Y1, MGY428H1, PHY431H1, PSY305H1, STA302H1, STA303H1, STA304H1, STA305H1, STA355H1, STA365H1, STA480H1
6. 0.5 credit at 400 level from: BCB410H1, BCB420H1, CSB435H1, CSB472H1, CSB498Y1, CSB499Y1, EEB458H1, EEB459H1, EEB460H1, EEB462H1, EEB463H1, EEB498Y1, EEB499Y1, PHY431H1, PSY474H1, STA480H1

Data Science in the Humanities

Digital Humanities Minor (Arts Program) - ASMIN1337

Digital humanities (DH) is a discipline at the intersections of the humanities with computing. DH studies human culture -- art, literature, history, geography, religion -- through computational tools and methodologies; and, in turn, DH studies the digital through humanist lenses. Digital humanists study social media phenomena or medieval manuscript archives; computationally analyze

thousands of newspaper articles to trace economic developments; construct video games to study literary narratives; or resurrect historical cities through digital maps and virtual reality exhibits.

In introductory and advanced DH courses, students learn about the intellectual landscape of digital humanities scholarship. They learn how to build digital stories, exhibits, and maps; how to digitize rare books; how to analyze collections of data; how to construct digital models and 3D-print them; and how to manage major digital projects. By the end of the program, students conduct a major DH research project of their own or participate in the research of an established faculty project. Throughout the program, students gain a critical perspective on digital technologies, learning to consider the ways digital platforms shape, and are shaped by, the currents of wider social and cultural forces.

By providing this critical and technical skillset, the Digital Humanities Minor prepares students for future paths that range from graduate studies in literature, history, library science, education, or computer science, to careers as technical writers, data analysts and visualizers, project managers, or programmers.

Students should note that some courses at the 200, 300, and 400 levels may have additional prerequisites.

Permission to count courses that are not on the list below towards the Minor in Digital Humanities must be received from the Program Coordinator, and will be granted on a case-by-case basis when the student's work demonstrably and substantially engages Digital Humanities-related content or research methods.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, including 1.0 credit at the 300/400-level)

Students should note that some courses at the 200, 300, and 400-levels may have additional prerequisites.

Permission to count courses towards the Minor in Digital Humanities that are not in the Completion Requirements must be received by the Program Coordinator, and will be granted on a case-by-case basis when the student's work demonstrably and substantially engages Digital Humanities-related content or research methods.

It is not possible to complete this program in one year.

1. Introductory courses: [DHU235H1](#) and [DHU236H1](#)

2. Maximum 2.5 credits from any of the following courses, which include DHU courses and cross-listed courses offered by other departments:

a. [DHU335H1](#)/ [DHU336H1](#)/ [DHU337H1](#)/ [DHU338H1](#)/ [DHU339H1](#)

b. Cross-Listed Courses:

Anthropology: [ANT437H1](#)

Book and Media Studies: [SMC228H1](#)/ [SMC229H1](#)/ [SMC255H1](#)/ [BMS392H1](#)

Cinema Studies: [CIN312Y1](#)

Drama, Theatre, and Performance Studies: [DRM244H1](#)/ [DRM424H1](#)

Computer Science: [CSC104H1](#)/ [CSC108H1](#)/ [CSC300H1](#)

English: [ENG287H1](#)

Geography: [GGR271H1](#)/ [GGR272H1](#)/ [GGR273H1](#)/ [GGR349H1](#)/ [GGR452H1](#)

History: [HIS393H1](#)/ [HIS455Y1](#)

History & Philosophy of Science & Technology: [HPS202H1](#)/ [HPS203H1](#)

Medieval Studies: [MST201H1](#)/ [MST202H1](#)/ [MST300H1](#)

Music: [MUS300H1](#)

Religion: [RLG233H1](#)/ [RLG307H1](#)/ [RLG308H1](#)

Urban Studies: [URB235H1](#)/ [URB236H1](#)/ [URB333H1](#)

Writing and Rhetoric: [WRR303H1](#)

3. A minimum of a 0.5 credit that provides a capstone experience, chosen from the list below:

a. [DHU435H1](#), [DHU436H1](#), [DHU437H1](#)

b. Other 400-level courses with a significant DH practicum element, such as [CDN435Y1](#) (Active Citizenship), can also be considered for fulfillment of the capstone requirement, if students receive written permission of the Digital Humanities Program Coordinator within the first two weeks of enrollment in the course.

Note: Cross-listed courses are offered by other departments. Registration in these courses may be available only to students who have completed specified prerequisites and/or are enrolled in a program sponsored by the department offering the course. Course enrolment conditions are listed in the Arts and Science timetable. Course descriptions, prerequisites, corequisites and exclusions are listed in the Calendar.

Note:

- Effective Fall 2021, courses associated with Woodsworth College's Digital Humanities program will have the new "DHU" designator.
- Effective Fall 2021, active courses associated with St. Michael's College's Book and Media Studies program will have the new "BMS" designator. In addition, courses associated with Innis College's Urban Studies and Writing and Rhetoric programs will have the new "URB" and "WRR" designators respectively.

Collaborative Programs

Environment & Toxicology Specialist (Science Program) - ASSPE0605

This program is jointly sponsored by the Department of Pharmacology and Toxicology and the School of the Environment. For additional information see "School of the Environment" (www.environment.utoronto.ca) or consult our website: www.pharmtox.utoronto.ca.

The Environment and Toxicology Specialist program is an interdisciplinary program which spans the social, physical and life sciences and integrates study of the effects of chemicals not only on the health and behaviour of human beings but on whole ecosystems as the adverse effects associated with therapeutic and environmental chemicals are discussed. This program emphasizes the application of knowledge of environmental toxicology and risk assessment and prepares students for a variety of job opportunities following its completion. Graduates of the Environment and Toxicology program may pursue careers in scientific research, environmental science, conservation science, governmental agencies, consulting agencies, and within chemical, manufacturing or agriculture industries. Students learn to integrate basic environmental and life science with particular aspects of clinical toxicology and related areas through lectures, tutorials, and laboratory and independent research project experience. The senior independent research project course enables students to gain valuable research experience while working under the supervision of an individual faculty member in either a laboratory-based or a non-laboratory-based setting.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enroll.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- [BIO120H1](#), [BIO130H1](#)
- ([CHM135H1](#), [CHM136H1](#))/ [CHM151Y1](#)
- 1.0 credit from ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)/ [MAT157Y1](#)/ ([PHY131H1](#), [PHY132H1](#))/ ([PHY151H1](#), [PHY152H1](#))

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in each course, or a combined grade average lower than 70% in these required courses will not be considered for

admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at undergrad.pharmtox@utoronto.ca, specify which program you would like to be considered for, and provide your student number. Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment.

Arts & Science Internship Program (ASIP)

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2025). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and there are program-specific year 3 entry enrolment requirements. Students applying for Year 3 entry must have been admitted to the Environment & Toxicology Specialist in the Summer after Year 2 and completion of [PCL201H1](#) (with a minimum grade of 77%), [PSL300H1](#) and [PSL301H1](#).

Notes:

- The Environment and Toxicology Specialist cannot be combined with the Biomedical Toxicology Major or the Pharmacology Major.
- Students who wish to enroll in the program **after** their second year will be considered on a case-by-case basis. Successful completion of required prerequisite courses is required to enroll in further upper-level program courses.

Completion Requirements:

(14.0 credits, including 4.0 credits at the 300+ level, 1.0 credit of which must be at the 400-level).

First Year: [BIO120H1](#), [BIO130H1](#), ([CHM135H1](#), [CHM136H1](#))/ [CHM151Y1](#), and at least 1.0 credit from [MAT135H1](#), [MAT136H1](#), [MAT137Y1](#), [MAT157Y1](#), [PHY131H1](#), [PHY132H1](#), [PHY151H1](#), [PHY152H1](#)

Students in this program have the option to enrol in the Arts & Science Internship Program (ASIP) stream.

Second Year: BCH210H1, BIO230H1/ BIO255H1, ENV221H1, ENV222H1, PCL201H1, PSL300H1, PSL301H1 and CHM247H1 (see NOTE 1)

Third and Fourth Years:

BIO220H1, EEB240H1, JGE321H1, CHM210H1, PCL302H1, PCL381H1, PCL382H1, PCL482H1

One of: ENV341H1/ ENV337H1/ EEB320H1

One of: STA220H1/ STA221H1/ STA288H1/ EEB225H1 (see NOTE 2)

One of: ENV421Y1/ JPM400Y1/ PCL367H1/ PCL474Y1 (see NOTE 2)

At least 1.0 credit from: CHM310H1, EEB321H1, EEB365H1, EEB428H1, ENV441H1, ENV462H1, ESS313H1, JPM300H1, LMP301H1, PCL298H1, PCL386H1, PCL477H1, PCL483H1, PCL484H1, PCL490H1, PCL497H1, PCL498Y1 (see NOTE 4), PHY231H1 (see NOTE 3)

An Integrative, Inquiry-Based Activity Requirement must be satisfied.

The requirement for an integrative, inquiry-based and/or experiential activity must be met by completing at least one of the following: ENV421Y1, JPM400Y1, PCL297H1, PCL298H1, PCL367H1, PCL397Y0, PCL474Y1, PCL497H1, PCL498Y1. Students who complete the Arts & Science Internship Program (ASIP) stream will also meet this requirement.

Notes:

1. PSL300H1 and PSL301H1 require MAT 100-level/ PHY 100-level courses.
2. PCL201H1, PCL302H1, and PCL367H1 are pre-requisites for students intending to take PCL474Y1. Students intending to take PCL474Y1 must obtain permission from the Undergraduate Student Advisor of the School of the Environment 3 months prior to the intended date of enrolment. Students must also consult with the Department of Pharmacology and Toxicology at least 3 months prior to the intended date of enrolment. **Students wishing to take ENV421Y1 are advised to take the course during third year, due to scheduling conflicts with fourth year requirements.**
3. Students taking PCL477H1 must take BCH210H1 prior. **Students taking only PCL367H1 must take 1.5 credits from program electives requirement list of courses to ensure 14.0 program credits. Students may choose to take both PCL367H1 and ENV421Y1/ JPM400Y1/ PCL474Y1 and would then need to take only 0.5 credits from the program electives**

requirement list of courses to ensure 14.0 program credits.

4. Students may not use more than 2.0 credits towards their program from JPM400Y1/ PCL298H1/ PCL474Y1/ PCL497H1/ PCL498Y1.

Data Science in the Social Sciences

Focus in Data Analytics (Major) - ASFOC1478B

The Focus in Data Analytics (major) ensures that students gain proficiency in applied empirical economics. It provides students with hands-on exposure to the tools empirical economists use to build and analyze datasets - programming languages such as Python, and software programs to manage, statistically analyze, and visualize data such as Excel, GIS, Stata and R. The focus will also direct students to empirical economics courses that apply these tools in a wide variety of contexts.

Enrolment Requirements:

Enrolment in the Economics Major program (ASMAJ1478) is required.

Completion Requirements:

(3.0 credits)

1. 0.5 credit from: CSC108H1, CSC110Y1, CSC148H1
2. ECO225H1/ GGR272H1/ JSC270H1
3. ECO372H1
4. 1.0 credit of 300+ ECO elective courses from: ECO310H1, ECO334H1, ECO339H1, ECO340H1, ECO353H1, ECO354H1, ECO367H1, ECO374H1, ECO375H1, ECO380H1 (or the 400-level courses listed below (#5))
5. 0.5 credit 400-level ECO course from: ECO401H1, ECO403H1, ECO404H1, ECO418H1, ECO439H1, ECO446H1, ECO464H1, ECO466H1, ECO475H1, ECO480H1, ECO481H1, ECO482H1, ECO483H1, ECO499H1

Focus in Data Analytics (Specialist) - ASFOC1478A

Students in the Economics Specialist program who undertake a Focus in Data Analytics will gain advanced ability in applied empirical economics. The Focus (for specialists) provides students with hands-on exposure to

the tools empirical economists use to build and analyze datasets - programming languages such as Python, and software programs to manage, statistically analyze, and visualize data such as Excel, GIS, Stata and R. The Specialist Focus will also direct students to required and elective empirical economics courses that apply these tools in a wide variety of contexts.

Enrolment Requirements:

Enrolment in the Economics Specialist program (ASSPE1478) is required.

Completion Requirements:

(5.0 credits)

1. 0.5 credit from: CSC108H1, CSC110Y1, CSC148H1
2. ECO225H1/ GGR272H1/ JSC270H1
3. ECO372H1
4. ECO374H1
5. ECO475H1
6. 2.0 credits of 300+ ECO elective courses from: ECO310H1, ECO334H1, ECO339H1, ECO340H1, ECO353H1, ECO354H1, ECO367H1, ECO380H1 (or the 400-level courses listed below (#7))
7. 0.5 credit 400-level ECO course from: ECO401H1, ECO403H1, ECO404H1, ECO418H1, ECO439H1, ECO446H1, ECO464H1, ECO466H1, ECO480H1, ECO481H1, ECO482H1, ECO483H1, ECO499H1

Focus in Data Science in Business

This is a focus in data science in business that can be taken as part of any of the 3 specialists (Management, Accounting, and Finance & Economics) in the Rotman Commerce program. It requires taking 1.0 credit of required courses in programming and data analytics tools and then allows students to choose 1.5 credits of elective courses applying these tools to various areas in management and economics.

Enrolment Requirements:

Enrolment in one of the following Bachelor of Commerce Specialist programs is required:

- Management Specialist (Focus ASFOC2431G)
- Accounting Specialist (Focus ASFOC2676A)
- Finance & Economics Specialist (Focus ASFOC2038A)

Completion Requirements:

This focus requires the completion of 2.5 credits.

1. 0.5 credit in Programming: CSC108H1/ CSC148H1
2. 0.5 credit in Data Science Tools: RSM338H1/ RSM358H1
3. 1.5 credits from the following courses: ECO225H1, ECO372H1, ECO374H1, ECO375H1, ECO464H1, ECO475H1, GGR274H1, RSM326H1, RSM351H1 (formerly offered as a special topics course under RSM311H1), RSM371H1, RSM384H1, RSM456H1, RSM470H1, RSM483H1 and any data science-themed RSM special topics course and RSM Summer Abroad course as determined by the Director of Rotman Commerce.

Alternative courses may be substituted with the prior approval of the Director, Rotman Commerce. Contact the Rotman Commerce Program office for more information.

Geographic Information Systems Minor (Arts Program) - ASMIN0305

The GIS program covers the on theoretical, technical and applied foundations for geographic information systems. Students learn methods for spatial data production, analysis and presentation using computer cartography, spatial analysis, remote sensing, and geovisualization. Problem solving and project design are emphasized in upper level courses, as students apply techniques to answer specific geographic questions. The GIS program is structured to provide a stand-alone minor for students in Geography and other disciplines seeking complementary skills in spatial analysis (e.g., field biology, archaeology).

Note: Students combining this program with a Specialist/Major sponsored by the Department of Geography will normally be allowed to count only 1.5 (of the 4.0) credits towards both programs.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

First Year Geography Courses: Any 2 courses (1.0 credit) from JEG100H1, GGR101H1, GGR107H1, GGR112H1, GGR124H1, GGR172H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1. 200/300-level GGR courses may also be used to meet this requirement. Contact the Undergraduate Administrator to update your program.

Methods & Core Courses: All (2.0 credits) of GGR270H1, GGR272H1, GGR273H1, GGR373H1

Applications: Any 2 courses (1.0 credit) from GGR225H1, GGR274H1, GGR315H1/ GGR337H1, GGR372H1, GGR375H1, GGR376H1, GGR377H1, GGR386H1, GGR413H1, GGR414H1/ GGR415H1, GGR462H1, GGR472H1, GGR473H1. Up to 0.5 credit can be used from GGR493Y1, based on suitability of placement for this program, and approval by department. Up to 0.5 credit from GGR491Y1, GGR492H1, GGR497H1, GGR498H1, and GGR499H1 based on suitability of research topic for this program, and approval by department.

Note: At least 1.0 credit must be 300/400-level courses

Directed Minors

Geographic Information Systems Minor (Arts Program) - ASMIN0305

The GIS program covers the on theoretical, technical and applied foundations for geographic information systems. Students learn methods for spatial data production, analysis and presentation using computer cartography, spatial analysis, remote sensing, and geovisualization. Problem solving and project design are emphasized in upper level courses, as students apply techniques to answer specific geographic questions. The GIS program is structured to provide a stand-alone minor for students in Geography and other disciplines seeking complementary skills in spatial analysis (e.g., field biology, archaeology).

Note: Students combining this program with a Specialist/Major sponsored by the Department of Geography will normally be allowed to count only 1.5 (of the 4.0) credits towards both programs.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

First Year Geography Courses: Any 2 courses (1.0 credit) from JEG100H1, GGR101H1, GGR107H1, GGR112H1, GGR124H1, GGR172H1, GGR196H1, GGR197H1, GGR198H1, GGR199H1. 200/300-level GGR courses may also be used to meet this requirement. Contact the Undergraduate Administrator to update your program.

Methods & Core Courses: All (2.0 credits) of GGR270H1, GGR272H1, GGR273H1, GGR373H1

Applications: Any 2 courses (1.0 credit) from GGR225H1, GGR274H1, GGR315H1/ GGR337H1, GGR372H1, GGR375H1, GGR376H1, GGR377H1, GGR386H1, GGR413H1, GGR414H1/ GGR415H1, GGR462H1, GGR472H1, GGR473H1. Up to 0.5 credit can be used from GGR493Y1, based on suitability of placement for this program, and approval by department. Up to 0.5 credit from GGR491Y1, GGR492H1, GGR497H1, GGR498H1, and GGR499H1 based on suitability of research topic for this program, and approval by department.

Note: At least 1.0 credit must be 300/400-level courses

Data Science in the Life Sciences

Biochemistry Major (Science Program) - ASMAJ1762

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1 and CHM136H1)/ CHM151Y1
- (MAT135H1 and MAT136H1)/ MAT137Y1/MAT157Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60%, or a grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 70s; average = mid 70s. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the

availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at biochemistry.undergrad@utoronto.ca, specify which program you would like to be considered for, and provide your student number.

Please note, the Biochemistry Major cannot be combined with the:

- Immunology Specialist
- Molecular Genetics and Microbiology Specialist

Completion Requirements:

(8.0 credits, including 1.0 credit at the 400-level)

First Year:

1. BIO120H1, BIO130H1
2. (CHM135H1, CHM136H1)/ CHM151Y1
3. (MAT135H1, MAT136H1)/ MAT137Y1/
MAT157Y1

Second Year:

1. BCH210H1
2. BIO230H1/ BIO255H1
3. CHM247H1/ CHM249H1

Third Year:

1. BCH311H1
2. BCH370H1
3. CHM217H1/ CHM220H1/ BCH340H1
4. 1.0 credit from BIO220H1/ one of BIO260H1 or HMB265H1/ JPM300H1 and the department is open to the use of 300-level non-field course(s) in CHM/ CSB/ EEB/ HMB/ IMM/ LMP/ MGY/ PCL/ PSL. Students must first seek approval from the department prior to course enrolment.

Fourth Year:

1.0 credit from: BCH422H1, BCH425H1, BCH426H1, BCH428H1, BCH440H1, BCH444H1, BCH445H1, BCH446H1, BCH448H1, BCH449H1, BCH479H1, CHM447H1, MGY441H1

Biochemistry Specialist (Science Program) - ASSPE1762

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1 and CHM136H1)/ CHM151Y1
- (MAT135H1 and MAT136H1)/ MAT137Y1/
MAT157Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60%, or a grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. While it is difficult to predict what will constitute "competitive" course marks in a given year, based on previous years the estimate is: course marks = mid 80s; average = mid 80s. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at biochemistry.undergrad@utoronto.ca, specify which program you would like to be considered for, and provide your student number.

Please note, the Biochemistry Specialist cannot be combined with:

- Immunology Major
- Molecular Genetics and Microbiology Major

Completion Requirements:

(14.0 credits, including at least 2.5 credits at the 400-level)

First Year:

1. BIO120H1, BIO130H1
2. (CHM135H1, CHM136H1)/ CHM151Y1
3. (MAT135H1, MAT136H1)/ MAT137Y1/
MAT157Y1

First or Second Year:

(PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1)
[PHY131H1, PHY132H1 recommended]

Second Year:

1. [BCH242Y1](#)
2. [MGY280H1](#)
3. [BIO230H1/ BIO255H1](#)
4. [STA220H1/ STA288H1](#)
5. [CHM247H1/ CHM249H1](#)
6. [BIO260H1/ HMB265H1](#) (See NOTE 1)

Third Year:

1. [BCH340H1](#), [BCH377H1](#)
2. [MGY311Y1](#)

Fourth Year:

1. [BCH478H1](#)
2. 2.0 credits including at least 1.0 credit in BCH from: [BCH422H1](#), [BCH425H1](#), [BCH426H1](#), [BCH428H1](#), [BCH440H1](#), [BCH444H1](#), [BCH445H1](#), [BCH446H1](#), [BCH448H1](#), [BCH449H1](#), [BCH450H1](#), [BCH479H1](#), [BCB420H1](#), [CHM447H1](#), [MGY420H1](#), [MGY425H1](#), [MGY428H1](#), [MGY441H1](#), [MGY450H1](#), [MGY470H1](#). Up to 1.0 credit from research project courses ([BCH372Y1/ BCH374Y1/ BCH472Y1/ BCH473Y1](#)) may count towards this requirement (See NOTE 2).
3. Additional courses (to bring the program total to 14.0 credits) from the following list: [BIO220H1/ CHM217H1/ CHM220H1](#) (See NOTE 3)/ [CHM223H1/](#) one of [CSC108H1](#) or [CSC148H1/ MAT235Y1/ MAT237Y1/ STA221H1/ JPM300H1/](#) any suitable 300-level course from CHM/ CSB/ EEB/ HMB/ IMM/ LMP/ MGY/ PCL/ PSL (departmental approval required)

NOTES:

1. Alternatively, [BIO260H1](#) may be taken in third year (due to timetable conflicts [BIO260H1](#) may not be taken in 2nd year).
2. Additional BCH research project courses can be taken as part of the 20.0 credits needed for your degree.
3. [CHM220H1](#) is highly recommended for students who are interested in pursuing studies in the physical aspects of biochemistry such as structural biology and molecular biophysics.

Bioinformatics and Computational Biology Specialist (Science Program) - ASSPE1868

The genomic and post-genomic era brings opportunities for new insight into all aspects of biology and medicine, based on the computational analysis of very large datasets in a biological context. The Bioinformatics and Computational Biology Program is an interdepartmental,

interdisciplinary Program of Study that balances computer-science and life-science courses towards that goal. As a Specialist Program it is designed to prepare students for graduate studies in the field.

The Program is formally administered by the Department of Cell and Systems Biology and co-sponsored by the Departments of Biochemistry, Computer Science, Ecology and Evolutionary Biology, and Molecular Genetics; all sponsoring Departments have clear trajectories to extend the Program into graduate studies in the respective Department.

Note: this program has deregulated fees, which are incurred after enrolment in the program. Please refer to [Arts & Science Registration Instructions](#) for more information.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- [BIO130H1](#) and ([CSC108H1/ CSC148H1/ CSC110Y1](#))
or
- [BIO230H1](#) and [CSC236H1](#)

To ensure that students admitted to the program will be successful, applicants with a grade average lower than 75% in these required courses will not be considered for admission. Please note that obtaining this minimum grade average does not guarantee admission to the program. While it is difficult to predict what will constitute a "competitive" grade average in a given year, based on previous years the estimate is =mid 80s.

Applications from students lacking a numerical grade in one of the specified prerequisites may be considered on the basis of their entire academic record and the availability of space in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the [Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have

been admitted to the Bioinformatics & Computational Biology Specialist in the Summer after Year 2.

Completion Requirements:

Specialist program:
(12.5 credits)

First or second year:

Foundational courses (5.0 credits total)

(MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1
(CSC108H1, CSC148H1)/ CSC110Y1
(CSC111H1/ CSC165H1, CSC236H1)/ CSC240H1 (1)
CSC263H1/ CSC265H1
(CHM135H1, CHM136H1)/ CHM151Y1
BIO130H1

Upper years:

Program requirements (7.5 credits total)

STA237H1/ STA247H1/ STA255H1/ STA257H1
CSC207H1
CSC209H1
CSC373H1
BIO230H1/ BIO255H1
BIO260H1/ HMB265H1
(BCH210H1, (BCH311H1/ CSB349H1/ MGY311Y1))/
BCH242Y1
BCH441H1/ MGY441H1/ CSB472H1
BCB330Y1
BCB410H1
BCB420H1
BCB430Y1

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream

Notes:

BCB students are allowed to enrol in up to 2.5 CSC credits at the 300/400-level

Course substitutions are possible with written permission of the Program Director. Note that the requirements for a co-sponsoring Department's major can normally be fulfilled with 0.5 to 3.5 additional credits. All Major programs in the co-sponsoring life science departments require BIO120H1, however, it is not formally a part of this Specialist Program's requirements.

(1) The "missing" 0.5 credit of the substitution does not have to be replaced. For details, please refer to the Computer Science Program instructions in this Calendar.

Former BCB students benefitted from taking CSB352H1, Bioinformatic Methods. They also found it to be helpful to take BCH441H1/ MGY441H1 prior to BCB410H1 due to BCB410H1's R programming requirement.

Biomedical Toxicology Major (Science Program) - ASMAJ2573

Biomedical toxicology has emerged as an important science addressing drug safety and the adverse consequences of chemical exposure. The Biomedical Toxicology Major program examines the harmful effects of chemicals on the health and behavior of individuals and society. The safety/toxicity of a wide array of chemicals is examined including pharmaceutical preparations, herbal products, natural toxins, and environmental contaminants, with a focus on their effects on human health. Students learn about basic and clinical toxicology and related areas through lectures, tutorials and class discussions/debates.

This program includes the application of toxicological knowledge and risk assessment and prepares students for a variety of job opportunities following its completion as well as for further study in graduate research or professional programs such as Medicine, Dentistry, and Pharmacy. (Note: Students interested in professional programs should contact the respective faculties to inquire about specific transfer credits.) Many graduates of the Biomedical Toxicology major program pursue careers in scientific research, forensic science, nutrition and food sciences, governmental agencies, consulting agencies, and industrial settings including the pharmaceutical and chemical industries.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enroll.

Variable Minimum Grade or Variable Minimum Grade Average

A minimum grade and minimum grade average in required courses are needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1, CHM136H1)/ CHM151Y1

Students who have completed at least 8.0 credits but who are not already enrolled in ASMAJ2573 must apply using the following courses:

- BIO120H1 and BIO130H1
- (CHM135H1, CHM136H1)/ CHM151Y1
- PCL201H1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in

any of these courses, or a combined grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade and minimum grade average does not guarantee admission to the program.

Applications from students lacking numerical grades in one or more of the specified enrolment requirements, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at undergrad.pharmtox@utoronto.ca, specify which program you would like to be considered for, and provide your student number. Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment.

Notes:

- While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 80s; average = mid 80s.
- Students cannot combine a Biomedical Toxicology Major program with a Pharmacology Major or Specialist program for their degree.
- Students wishing to enroll **after** their second year who have taken [PCL201H1](#) will be considered on a case by case basis. Successful completion of required pre-requisite courses is required to further enroll in upper level program courses.

Completion Requirements:

(8.0 credits)

First Year: [BIO120H1](#); [BIO130H1](#); ([CHM135H1](#), [CHM136H1](#))/ [CHM151Y1](#)

Second Year: [BCH210H1](#); [BIO230H1](#)/ [BIO255H1](#); [PCL201H1](#); [CHM247H1](#)/ [CHM249H1](#); ([PSL300H1](#), [PSL301H1](#)) (NOTE: [PSL201Y1](#) is not acceptable)

Third Year: [PCL302H1](#); [PCL381H1](#); [PCL382H1](#)

Third or Fourth Year: 0.5 credits from: [JPM300H1](#)/ [JPM400Y1](#)/ [PCL298H1](#)/ [PCL345H1](#)/ [PCL367H1](#)/ [PCL368H1](#)/ [PCL386H1](#)/ [PCL389H1](#)/ [PCL402H1](#)/ [PCL475H1](#)/ [PCL476H1](#)/ [PCL477H1](#)/ [PCL484H1](#)/ [PCL490H1](#)/ [ANA301H1](#)/ [ENV341H1](#)/ [ENV441H1](#)/ [LMP301H1](#)

Fourth Year: [PCL482H1](#), [PCL483H1](#)

Notes:

1. Students are not allowed to enroll concurrently in the Major Program in Pharmacology and the Major Program in Toxicology.
2. Students are not allowed to enroll concurrently in the Major Program in Pharmacology and a Specialist Program in Toxicology.
3. Students are not permitted to take [PCL472Y1](#) or [PCL474Y1](#).

Biomedical Toxicology Specialist (Science Program) - ASSPE2573

Biomedical toxicology has emerged as an important science addressing drug safety and the adverse consequences of chemical exposure. The Biomedical Toxicology Specialist program examines the harmful effects of chemicals on the health and behaviour of individuals and society. The safety/toxicity of a wide array of chemicals is examined including pharmaceutical preparations, herbal products, natural toxins and environmental contaminants, with a focus on their effects on human health. This program emphasizes the application of toxicological knowledge and risk assessment and prepares students for a variety of job opportunities following its completion as well as for further study in graduate research or professional programs such as Medicine, Dentistry, and Pharmacy. (Note: Students interested in professional programs should contact the respective faculties to inquire about specific transfer credits.) Many graduates of the Biomedical Toxicology Specialist program pursue careers in scientific research, forensic science, nutrition and food sciences, governmental agencies, consulting agencies, and industrial settings including the pharmaceutical and chemical industries. Students learn about basic and clinical toxicology and related areas through lectures, tutorials, laboratories, and independent research projects. The senior research project course enables students to gain valuable research experience while working under the supervision of an individual faculty member in either a laboratory-based or a non-laboratory-based setting.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 8.0 credits and meet the requirements listed below to enroll. Students interested in this program should initially apply to the Specialist in Pharmacology & Biomedical Toxicology Program (ASSPE2340) after their first year of study. Students in ASSPE2340 will have the opportunity to move into the Biomedical Toxicology Specialist (ASSPE2573) following their second year of study.

Students who have completed 4.0 to 7.5 credits cannot apply directly to ASSPE2573 and must first apply to ASSPE2340, using the following courses:

- BIO120H1 and BIO130H1
- (CHM135H1, CHM136H1)/ CHM151Y1
- 1.0 credit from (MAT135H1 and MAT136H1)/
MAT137Y1/ MAT157Y1/ (PHY131H1 and
PHY132H1)/ (PHY151H1 and PHY152H1)

Students who have completed at least 8.0 credits and who are already enrolled in ASSPE2340 may enrol in ASSPE2573 themselves on ACORN.

Students who have completed at least 8.0 credits but who are not already enrolled in ASSPE2340 must apply to ASSPE2573 using the following courses:

- BIO120H1 and BIO130H1
- (CHM135H1, CHM136H1)/ CHM151Y1
- 1.0 credit from (MAT135H1 and MAT136H1)/
MAT137Y1/ MAT157Y1/ (PHY131H1 and
PHY132H1)/ (PHY151H1 and PHY152H1)
- PCL201H1

Variable Minimum Grade and Variable Minimum Grade Average

A minimum grade and minimum grade average in required courses are needed for entry, and this minimum changes each year depending on available spaces and the number of applicants.

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in any of these courses, or a combined grade average lower than 75% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade and minimum grade average does not guarantee admission to the program.

Applications from students lacking numerical grades in one or more of the specified enrolment requirements, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at undergrad.pharmtox@utoronto.ca, specify which program you would like to be considered for, and provide your student number. Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment.

Arts & Science Internship Program (ASIP)

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section](#) of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of

Year 2. Space is more limited for Year 3 entry and there are program-specific year 3 entry enrolment requirements. Students applying for Year 3 entry must have been admitted to the Biomedical Toxicology Specialist in the Summer after Year 2 and completion of PCL201H1 (with a minimum grade of 77%), PSL300H1 and PSL301H1.

Notes:

- While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 80s; average = mid 80s.
- **Students wishing to enroll in the Biomedical Toxicology Specialist will initially apply to the Joint Specialist in Pharmacology and Biomedical Toxicology (ASSPE2340). After admission, students can then choose to transfer to the Biomedical Toxicology Specialist following second year.** First and second year courses are the same for all Specialist programs within the Department (ASSPE2082/ASSPE2340/ASSPE2573).
- Students cannot combine the Biomedical Toxicology Specialist with either departmental Major programs (Biomedical Toxicology or Pharmacology).
- Students wishing to enroll **after** their second year who have taken PCL201H1 will be considered on a case by case basis. Successful completion of pre-requisite courses is required to enroll in upper level program courses. Students may not transfer to the Major program from the Specialist after completion of PCL474Y1 or INT300H1/ INT301H1 in the Arts & Science Internship Program (ASIP).

Completion Requirements:

(14.0 credits)

First Year: BIO120H1, BIO130H1, (CHM135H1, CHM136H1)/ CHM151Y1, and 1.0 credit from any combination of (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1, PHY131H1/ PHY151H1, PHY132H1/ PHY152H1 (see NOTE 1)

Students in this program have the option to enrol in the Arts & Science Internship Program (ASIP) stream.

Second Year: BCH210H1, BIO230H1/ BIO255H1, BIO260H1/ HMB265H1, CHM247H1/ CHM249H1, STA288H1, PCL201H1, (PSL300H1, PSL301H1) (NOTE: PSL201Y1 is not acceptable)

Third Year: PCL302H1, PCL381H1, PCL382H1 at least one 0.5 credit from PCL367H1 or PCL368H1 (see NOTE 2)

Third or Fourth Year: 2.5 credits at least 1.5 credits from PCL courses: JPM300H1/ JPM400Y1 (see NOTE 3)

PCL298H1/ PCL345H1/ PCL367H1 or PCL368H1 (see NOTE 2)/ PCL386H1/ PCL389H1/ PCL475H1/ PCL476H1/ PCL477H1/ PCL484H1/ PCL490H1/ PCL497H1/ PCL498Y1 (see NOTE 5)/ ANA301H1/ CHM310H1/ ENV341H1/ ENV441H1/ LMP301H1

Fourth Year: PCL402H1, (PCL482H1, PCL483H1), PCL474Y1/ JPM400Y1 (see NOTE 3)

An Integrative, Inquiry-Based Activity Requirement must be satisfied.

The requirement for an integrative, inquiry-based and/or experiential activity must be met by completing at least one of the following: PCL297H1, PCL298H1, PCL389H1, PCL397Y0, PCL474Y1, PCL497H1, PCL498Y1, JPM400Y1. Students who complete the Arts & Science Internship Program (ASIP) stream will also meet this requirement.

NOTES:

1. Any PHY/MAT courses should be completed during the first year and included for program enrolment.
2. At least 0.5 credit from PCL367H1 or PCL368H1 is required for the program, however if desired the alternative course can be taken as a program elective.
3. Enrolment in any of PCL474Y1 or JPM400Y1 is limited and requires permission from the Department of Pharmacology and Toxicology. Students must receive prior consent from the course coordinator according to Departmental guidelines before the Department will register them in the course. Students can take either course as their required independent project, or may take JPM400Y1 as an additional elective. It is the student's responsibility to make all necessary preparations before the session starts (see course description).
4. Students wishing to apply their Arts & Science Internship Program (ASIP) towards the requirement to complete PCL474Y1/ JPM400Y1 should reach out to undergrad.pharmtox@utoronto.ca.
5. Students may not use more than 2.0 credits towards their program from JPM400Y1/ PCL298H1/ PCL474Y1/ PCL497H1/ PCL498Y1.

Cell & Molecular Biology Specialist (Science Program) - ASSPE1003

Students learn how genes and proteins organize cells for cellular activities, multicellular development, and cellular interactions with the environment. Students also learn how cell and molecular biology research is conducted, and

receive training in advanced techniques of the field. Cell and molecular biology research is one the most demanding fields in science. Students gain an understanding of the field, and leave the program equipped to tackle fundamental scientific questions.

After foundational courses in first and second year, students participate in advanced lecture, seminar and laboratory courses, and are encouraged to apply for research project courses in the laboratories of the Department. Course offerings include gene expression, cell biology, developmental biology, plant development, plant-microbe interactions, plant signaling, neurogenesis, tissue morphogenesis, stem cell biology, genomics and proteomics.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses

The following courses are required:

- BIO120H1, BIO130H1
- (CHM135H1 and CHM136H1)/ CHM151Y1
- JMB170Y1/(MAT135H1 and MAT136H1)/MAT137Y1/ MAT157Y1

Variable Minimum Grade

A minimum grade in some courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO130H1 or BIO230H1/ BIO255H1

To ensure that students admitted to the program will be prepared, applicants with a final grade lower than 70% in BIO130H1 or BIO230H1/ BIO255H1 will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Cell & Molecular Biology Specialist in the Summer after Year 2.

Completion Requirements:

(12.5 credits, including at least 1.0 credit at the 400-level)

First Year:

BIO120H1, BIO130H1; (CHM135H1, CHM136H1)/
CHM151Y1; JMB170Y1/ (MAT135H1, MAT136H1)/
MAT137Y1/ MAT157Y1.

Higher Years:

1. (PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1)
2. BIO220H1, BIO230H1/ BIO255H1, BIO270H1,
BIO271H1, BIO260H1/ HMB265H1; BCH210H1
3. CSB330H1/ CSB350H1/ CSB352H1, CSB349H1
4. 1.0 credit from: CJH332H1, CSB327H1, CSB328H1,
CSB329H1, CSB331H1, CSB340H1, CSB353H1
5. 1.0 credit from: BCH422H1, BCH426H1, BCH444H1,
BCH445H1, CSB427H1, CSB428H1, CSB429H1,
CSB430H1, CSB431H1, CSB435H1, CSB450H1,
CSB451H1, CSB452H1, CSB454H1, CSB457H1,
CSB458H1, CSB459H1, CSB460H1, CSB471H1,
CSB472H1, CSB473H1, CSB474H1, CSB475H1,
CSB483H1
6. 2.5 credits from: BCH422H1, BCH426H1, BCH440H1,
BCH444H1, BCH445H1, CJH332H1, CSB299Y1,
CSB327H1, CSB328H1, CSB329H1, CSB330H1,
CSB331H1, CSB340H1, CSB350H1, CSB351Y1,
CSB352H1, CSB353H1, CSB360H1, CSB397Y0,
CSB399Y1, CSB427H1, CSB428H1, CSB429H1,
CSB430H1, CSB431H1, CSB435H1, CSB447H1,
CSB450H1, CSB451H1, CSB452H1, CSB453H1,
CSB454H1, CSB457H1, CSB458H1, CSB459H1,
CSB460H1, CSB471H1, CSB472H1, CSB473H1,
CSB474H1, CSB475H1, CSB483H1, CSB490H1,
CSB491H1, CSB492H1, CSB497H1, CSB498Y1,
CSB499Y1, HMB496Y1/ HMB499Y1, MGY441H1,
MGY480Y1.

NOTE: No more than 0.5 credit in BCH can be used towards requirements 5. and 6.

The Cell & Molecular Biology Specialist Program has the additional option of a Disciplinary Focus.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Cell & Molecular Biology Specialist: Focus in Molecular Networks of the Cell - ASSPE1003A

Starting in 2nd year, this focus organizes a restricted number of highly motivated Cell and Molecular Biology Specialist students with an interest in Molecular Networks of the Cell. Focus students are required to complete a subset of related program courses and to participate in a learning community for the focus.

Enrolment Requirements:

Once you have been approved for and have enrolled in the Cell and Molecular Biology Specialist program, you have the option to apply for entry into a focus. The focuses have a limited enrolment and can only accommodate a restricted number of students with a particular interest in the topic of the focus. **Students can only apply for one focus.** Admission will be determined with a minimum grade of 80% in BIO130H1. If the student does not achieve 80% in BIO130H1, admission can be determined with a minimum grade of 80% in BIO230H1, BIO255H1 or CSB349H1. On the application form, students must include a 300-word statement of interest regarding the topic of the focus. Statement submission instructions are in the Undergraduate program section of the CSB website, <http://csb.utoronto.ca>. Achieving these requirements does not necessarily guarantee admission to the focus in any given year.

Students in a focus complete the requirements of First Year, the requirements 1.-3. of Higher Years, as well as requirements 4.-7 specific to each focus.

Each year students are enrolled in a focus, they must also be an active participant in the faculty-led learning community for their focus (requirement 7.). Most required learning community meetings are held from 4pm to 5pm on Fridays. The learning community appears as a non-credit course recognized on the co-curricular record. Students who fail to contribute to the faculty-led learning community will be removed from the focus.

Completion Requirements:

This Focus is part of the Cell and Molecular Biology Specialist and begins with the requirements of First Year and of lines 1-3 of Higher Years of the Cell and Molecular Biology Specialist Program.

4. 1.0 credit from: CJH332H1, CSB327H1, CSB331H1, CSB353H1, CSB360H1
5. 1.0 credit from: CSB427H1, CSB428H1, CSB429H1, CSB435H1, CSB451H1, CSB453H1, CSB454H1, CSB457H1, CSB458H1, CSB459H1, CSB460H1, CSB475H1
6. 2.5 credits from: BCH422H1, BCH426H1, BCH440H1,
BCH444H1, BCH445H1, CJH332H1, CSB299Y1,
CSB327H1, CSB328H1, CSB329H1, CSB330H1,
CSB331H1, CSB340H1, CSB350H1, CSB351Y1,
CSB352H1, CSB353H1, CSB360H1, CSB397Y0,
CSB399Y1, CSB427H1, CSB428H1, CSB429H1,
CSB430H1, CSB431H1, CSB435H1, CSB447H1,
CSB450H1, CSB451H1, CSB452H1, CSB453H1,
CSB454H1, CSB457H1, CSB458H1, CSB459H1,
CSB460H1, CSB472H1, CSB473H1, CSB474H1,
CSB475H1, CSB483H1, CSB490H1, CSB491H1,
CSB492H1, CSB497H1, CSB498Y1, CSB499Y1,
MGY441H1. No more than 0.5 credit in BCH can be used towards this requirement.

7. Molecular Network Learning Community (each year of focus enrolment)

Cell & Molecular Biology Specialist: Focus in Plant Genomics and Biotechnology - ASSPE1003B

Starting in 2nd year, this focus organizes a restricted number of highly motivated Cell and Molecular Biology Specialist students with an interest in Plant Genomics and Biotechnology. Focus students are required to complete a subset of related program courses and to participate in a learning community for the focus.

Enrolment Requirements:

Once you have been approved for and have enrolled in the Cell and Molecular Biology Specialist program, you have the option to apply for entry into a focus. The focuses have a limited enrolment and can only accommodate a restricted number of students with a particular interest in the topic of the focus. **Students can only apply for one focus.** Admission will be determined with a minimum grade of 80% in BIO130H1. If the student does not achieve 80% in BIO130H1, admission can be determined with a minimum grade of 80% in BIO230H1, BIO255H1 or CSB349H1. On the application form, students must include a 300-word statement of interest regarding the topic of the focus. Statement submission instructions are in the Undergraduate program section of the CSB website, <http://csb.utoronto.ca>. Achieving these requirements does not necessarily guarantee admission to the focus in any given year.

Students in a focus complete the requirements of First Year, the requirements 1.-3. of Higher Years, as well as requirements 4.-7 specific to each focus.

Each year students are enrolled in a focus, they must also be an active participant in the faculty-led learning community for their focus (requirement 7.). Most required learning community meetings are held from 4pm to 5pm on Fridays. The learning community appears as a non-credit course recognized on the co-curricular record. Students who fail to contribute to the faculty-led learning community will be removed from the focus.

Completion Requirements:

This Focus is part of the Cell and Molecular Biology Specialist and begins with the requirements of First Year and of lines 1-3 of Higher Years of the Cell and Molecular Biology Specialist Program.

4. 1.0 credit from: CSB340H1, CSB350H1/ CSB352H1, CSB353H1

5. 1.0 credit from: CSB435H1, CSB450H1, CSB451H1, CSB452H1, CSB454H1, CSB459H1, CSB460H1, CSB471H1, CSB472H1, CSB473H1, CSB474H1, CSB475H1

6. 2.5 credits from: BCH422H1, BCH426H1, BCH440H1, BCH444H1, BCH445H1, CSB299Y1, CSB328H1, CSB329H1, CSB330H1, CSB331H1, CSB340H1, CSB350H1, CSB360H1, CSB351Y1, CSB352H1, CSB353H1, CSB397Y0, CSB399Y1, CSB428H1, CSB431H1, CSB435H1, CSB450H1, CSB451H1, CSB452H1, CSB454H1, CSB458H1, CSB459H1, CSB460H1, CSB471H1, CSB472H1, CSB473H1, CSB474H1, CSB475H1, CSB483H1, CSB490H1, CSB491H1, CSB492H1, CSB497H1, CSB498Y1, CSB499Y1, MGY441H1. No more than 0.5 credit in BCH can be used towards this requirement.

7. Plant Biotech Learning Community (each year of focus enrolment)

Cell & Molecular Biology Specialist: Focus in Stem Cells and Developmental Biology - ASSPE1003C

Starting in 2nd year, this focus organizes a restricted number of highly motivated Cell and Molecular Biology Specialist students with an interest in Stem Cells and Developmental Biology. Focus students are required to complete a subset of related program courses and to participate in a learning community for the focus.

Enrolment Requirements:

Once you have been approved for and have enrolled in the Cell and Molecular Biology Specialist program, you have the option to apply for entry into a focus. The focuses have a limited enrolment and can only accommodate a restricted number of students with a particular interest in the topic of the focus. **Students can only apply for one focus.** Admission will be determined with a minimum grade of 80% in BIO130H1. If the student does not achieve 80% in BIO130H1, admission can be determined with a minimum grade of 80% in BIO230H1, BIO255H1 or CSB349H1. On the application form, students must include a 300-word statement of interest regarding the topic of the focus. Statement submission instructions are in the Undergraduate program section of the CSB website, <http://csb.utoronto.ca>. Achieving these requirements does not necessarily guarantee admission to the focus in any given year.

Students in a focus complete the requirements of First Year, the requirements 1-3 of Higher Years, as well as requirements 4-7 specific to each focus.

Each year students are enrolled in a focus, they must also be an active participant in the faculty-led learning community for their focus (requirement 7). Most required

learning community meetings are held from 4pm to 5pm on Fridays. The learning community appears as a non-credit course recognized on the co-curricular record. Students who fail to contribute to the faculty-led learning community will be removed from the focus.

Completion Requirements:

This Focus is part of the Cell and Molecular Biology Specialist and begins with the requirements of First Year and of lines 1-3 of Higher Years of the Cell and Molecular Biology Specialist Program.

4. 1.0 credit from: CSB328H1, CSB329H1, CSB340H1
5. 1.0 credit from: CSB427H1, CSB429H1, CSB430H1, CSB431H1, CSB483H1
6. 2.5 credits from: BCH422H1, BCH426H1, BCH440H1, BCH441H1, BCH444H1, BCH445H1, CSB299Y1, CSB327H1, CSB328H1, CSB329H1, CSB330H1, CSB331H1, CSB340H1, CSB350H1, CSB352H1, CSB397Y0, CSB399Y1, CSB427H1, CSB428H1, CSB429H1, CSB430H1, CSB431H1, CSB435H1, CSB450H1, CSB453H1, CSB458H1, CSB460H1, CSB472H1, CSB473H1, CSB474H1, CSB483H1, CSB490H1, CSB491H1, CSB492H1, CSB497H1, CSB498Y1, CSB499Y1. No more than one 0.5 credit in BCH can be used towards this requirement.
7. Multicellularity Learning Community (each year of focus enrolment)

Ecology and Evolutionary Biology Specialist (Science Program) - ASSPE1006

The **Ecology & Evolutionary Biology Specialist** program (12.0 credits) provides an in-depth understanding of ecological and evolutionary patterns and processes, as well as the diversity of life forms (microbes, fungi, plants, animals). Concepts are taught using a broad array of approaches, including molecular studies, laboratory experiments, computer and mathematical modeling, and field studies. An integral part of the experience is to conduct independent research projects in the laboratory and/or field. There is a strong emphasis within the program on hands-on laboratory and fieldwork that complement the conceptual framework developed in lectures. Students in this program have the opportunity to concentrate in ecology, evolutionary biology, or behaviour.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(12.0 credits including at least 4.0 credits at the 300+ level, 1.0 of which must be at the 400-level)

First Year (3.0 credits): BIO120H1; BIO130H1; (CHM135H1, CHM136H1)/ CHM151Y1; (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

1. 2.0 credits: BIO220H1 (ecology and evolutionary biology); BIO230H1/ BIO255H1 (molecular and cell biology); BIO260H1/ HMB265H1 (genetics); BIO251H1/ BIO270H1/ PSL300H1/ EEB240H1 (plant or animal form and function/environmental biology).

2. 0.5 credit in computational science from: EEB125H1/ CSC108H1/ CSC148H1/ CSC110Y1, and 0.5 credit in statistics from: EEB225H1/ STA220H1/ STA257H1/ STA288H1/ GGR270H1/ PSY201H1

3. 0.5 credit in core evolution from: EEB318H1, EEB323H1, EEB362H1

4. 0.5 credit in core ecology from: EEB319H1, EEB320H1, EEB321H1, EEB328H1

5. 0.5 credit in organismal biology from: EEB263H1, EEB266H1, EEB267H1, EEB268H1, EEB331H1, EEB340H1, EEB380H1, EEB382H1, EEB384H1, EEB386H1, EEB388H1

6. 1.0 credit at 300+ level, from: EEB313H1, EEB314H1, EEB318H1, EEB319H1, EEB320H1, EEB321H1, EEB322H1, EEB323H1, EEB324H1, EEB325H1, EEB328H1, EEB340H1, EEB356H1, EEB362H1, EEB365H1, EEB380H1, EEB382H1, EEB384H1, EEB386H1, EEB388H1, EEB390H1, EEB398H0, EEB398Y0, EEB399H1, EEB399Y1, EEB428H1, EEB434H1, EEB440H1, EEB455H1, EEB458H1, EEB459H1, EEB460H1, EEB463H1, EEB465H1, EEB466H1, EEB491H1, EEB495H1; EHJ352H1; ENV432H1; ENV395Y1

Sub-total = 8.5 credits

7. 1.0 to 1.5 credits in at least two of the three following categories: (1) one field course (0.5 credit) from EEB403H1, EEB405H1, EEB406H1, EEB410H1; (2) one seminar (0.5 credit) from EEB491H1, EEB495H1; and/or (3) one independent research course (0.5 credit) from EEB497H1/ (1.0 credit) from EEB498Y1

Sub-total = 9.5 or 10.0 credits (depending on options chosen in #7)

8. Select the remaining credits for a total of 12.0 credits (at least 1.0 must be 300+ series if 1.0 credit is completed in #7 above) from: BIO251H1, BIO270H1/ PSL300H1, BIO271H1/ PSL301H1; all EEB courses (excluding EEB196H1, EEB197H1, EEB198H1, EEB199H1, EEB202H1, EEB208H1, EEB214H1, EEB215H1); EHJ352H1; ENV432H1; JHE353H1, JHE355H1; and no more than 1.0 credit from the following (note that some courses may require prerequisites that are not listed within this program): ANT336H1, ANT333Y1, ANT335Y1,

ANT338H1, ANT430H1, ANT436H1, CSB328H1, CSB340H1, CSB349H1, CSB350H1, CSB352H1, CSB353H1, CSB430H1, CSB431H1, CSB452H1, CSB458H1, CSB472H1, CSB474H1, ENV346H1; FOR200H1, FOR201H1, FOR301H1, FOR306H1, FOR307H1, FOR413H1, FOR416H1, FOR417H1, FOR418H1; GGR201H1, GGR203H1, GGR205H1, GGR206H1, GGR272H1, GGR273H1, GGR305H1, GGR307H1, GGR308H1; MAT221H1; MGY340H1; PSY100H1, PSY260H1, PSY270H1, PSY280H1, PSY290H1, PSY305H1, PSY390H1, PSY397H1, PSY474H1, PSY492H1, PSY497H1 (note that many PSY courses have limited enrolment)

Total = 12.0 credits

NOTE: Students may wish to concentrate in ecology, evolutionary biology, or behaviour. Recommended EEB, EHJ and JHE courses for these concentrations are as follows:

Ecology: EEB255H1, EEB319H1, EEB320H1, EEB321H1, EEB328H1, EEB365H1, EEB428H1, EEB434H1, EEB440H1, EEB465H1, EEB495H1; ENV432H1
 Evolutionary Biology: EEB323H1, EEB324H1, EEB325H1, EEB362H1, EEB390H1, EEB440H1, EEB459H1, EEB460H1; EHJ352H1; JHE353H1, JHE355H1
 Behaviour: EEB322H1, EEB455H1

Environment & Toxicology Specialist (Science Program) - ASSPE0605

This program is jointly sponsored by the Department of Pharmacology and Toxicology and the School of the Environment. For additional information see "School of the Environment" (www.environment.utoronto.ca) or consult our website: www.pharmtox.utoronto.ca.

The Environment and Toxicology Specialist program is an interdisciplinary program which spans the social, physical and life sciences and integrates study of the effects of chemicals not only on the health and behaviour of human beings but on whole ecosystems as the adverse effects associated with therapeutic and environmental chemicals are discussed. This program emphasizes the application of knowledge of environmental toxicology and risk assessment and prepares students for a variety of job opportunities following its completion. Graduates of the Environment and Toxicology program may pursue careers in scientific research, environmental science, conservation science, governmental agencies, consulting agencies, and within chemical, manufacturing or agriculture industries. Students learn to integrate basic environmental and life science with particular aspects of clinical toxicology and related areas through lectures, tutorials, and laboratory and independent research project experience. The senior independent research project course enables students to

gain valuable research experience while working under the supervision of an individual faculty member in either a laboratory-based or a non-laboratory-based setting.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enroll.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1, BIO130H1
- (CHM135H1, CHM136H1)/ CHM151Y1
- 1.0 credit from (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1/ (PHY131H1, PHY132H1)/(PHY151H1, PHY152H1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in each course, or a combined grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at undergrad.pharmtox@utoronto.ca, specify which program you would like to be considered for, and provide your student number. Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment.

Arts & Science Internship Program (ASIP)

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2025). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and there are program-specific year 3 entry enrolment requirements. Students applying for Year 3 entry must have been admitted to the Environment &

Toxicology Specialist in the Summer after Year 2 and completion of PCL201H1 (with a minimum grade of 77%), PSL300H1 and PSL301H1.

Notes:

- The Environment and Toxicology Specialist cannot be combined with the Biomedical Toxicology Major or the Pharmacology Major.
- Students who wish to enroll in the program **after** their second year will be considered on a case-by-case basis. Successful completion of required prerequisite courses is required to enroll in further upper-level program courses.

Completion Requirements:

(14.0 credits, including 4.0 credits at the 300+level, 1.0 credit of which must be at the 400-level).

First Year: BIO120H1, BIO130H1, (CHM135H1, CHM136H1)/ CHM151Y1, and at least 1.0 credit from MAT135H1, MAT136H1, MAT137Y1, MAT157Y1, PHY131H1, PHY132H1, PHY151H1, PHY152H1

Students in this program have the option to enrol in the Arts & Science Internship Program (ASIP) stream.

Second Year: BCH210H1, BIO230H1/ BIO255H1, ENV221H1, ENV222H1, PCL201H1, PSL300H1, PSL301H1 and CHM247H1 (see NOTE 1)

Third and Fourth Years:

BIO220H1, EEB240H1, JGE321H1, CHM210H1, PCL302H1, PCL381H1, PCL382H1, PCL482H1

One of: ENV341H1/ ENV337H1/ EEB320H1
One of: STA220H1/ STA221H1/ STA288H1/ EEB225H1
(see NOTE 2)

One of: ENV421Y1/ JPM400Y1/ PCL367H1/ PCL474Y1
(see NOTE 2)

At least 1.0 credit from: CHM310H1, EEB321H1, EEB365H1, EEB428H1, ENV441H1, ENV462H1, ESS313H1, JPM300H1, LMP301H1, PCL298H1, PCL386H1, PCL477H1, PCL483H1, PCL484H1, PCL490H1, PCL497H1, PCL498Y1 (see NOTE 4), PHY231H1 (see NOTE 3)

An Integrative, Inquiry-Based Activity Requirement must be satisfied.

The requirement for an integrative, inquiry-based and/or experiential activity must be met by completing at least one of the following: ENV421Y1, JPM400Y1, PCL297H1, PCL298H1, PCL367H1, PCL397Y0, PCL474Y1, PCL497H1, PCL498Y1. Students who complete the Arts & Science Internship Program (ASIP) stream will also meet this requirement.

Notes:

1. PSL300H1 and PSL301H1 require MAT 100-level/ PHY 100-level courses.
2. PCL201H1, PCL302H1, and PCL367H1 are pre-requisites for students intending to take PCL474Y1. Students intending to take PCL474Y1 must obtain permission from the Undergraduate Student Advisor of the School of the Environment 3 months prior to the intended date of enrolment. Students must also consult with the Department of Pharmacology and Toxicology at least 3 months prior to the intended date of enrolment. **Students wishing to take ENV421Y1 are advised to take the course during third year, due to scheduling conflicts with fourth year requirements.**
3. Students taking PCL477H1 must take BCH210H1 prior. **Students taking only PCL367H1 must take 1.5 credits from program electives requirement list of courses to ensure 14.0 program credits. Students may choose to take both PCL367H1 and ENV421Y1/ JPM400Y1/ PCL474Y1 and would then need to take only 0.5 credits from the program electives requirement list of courses to ensure 14.0 program credits.**
4. Students may not use more than 2.0 credits towards their program from JPM400Y1/ PCL298H1/ PCL474Y1/ PCL497H1/ PCL498Y1.

Genome Biology Major (Science Program) - ASMAJ2655

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Genome Biology Major in the Summer after Year 2.

Completion Requirements:

This program is a joint program of the departments of Cell & Systems Biology, Ecology & Evolutionary Biology, and

Molecular Genetics. It is administered through the Department of Cell & Systems Biology.

(8.0 credits)

First year: BIO120H1, BIO130H1; (CHM135H1, CHM136H1)/ CHM151Y1; (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

Higher years:

1. BIO220H1, BIO230H1/ BIO255H1; BIO260H1/ HMB265H1; EEB225H1/ STA220H1
2. Genomics fundamentals: BCH311H1/ CSB349H1/ MGY311Y1, CSB352H1; EEB323H1
3. 0.5 credit laboratory course from: CSB472H1, CSB474H1; EEB460H1
4. 1.0 credit genomics elective from: CSB330H1, CSB350H1, CSB397Y0, CSB427H1, CSB435H1, CSB450H1, CSB457H1, CSB458H1, CSB471H1, CSB473H1, CSB490H1, CSB491H1, CSB497H1/ CSB498Y1/ CSB499Y1; EEB362H1, EEB455H1, EEB458H1, EEB459H1, EEB462H1, EEB463H1, EEB397Y1/ EEB497H1/ EEB498Y1/ EEB499Y1; EHJ352H1; MGY350H1, MGY360H1, MGY428H1, MGY470H1, MGY480Y1

NOTE: Students taking CSB397Y0, CSB490H1, CSB491H1, CSB497H1/ CSB498Y1/ CSB499Y1, EEB397Y1/ EEB497H1/ EEB498Y1/ EEB499Y1 or MGY480Y1 are encouraged to conduct a genomics-related research project.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Immunology Major (Science Program) - ASMAJ1002

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade and Variable Minimum Grade Average

Minimum grades combined with a minimum grade average in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1 and BIO130H1
- CHM135H1 and CHM136H1, or CHM151Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in each course, or a final grade average lower than 70% in

these required courses will not be considered for admission. Please note that obtaining the minimum final grades and grade average does not guarantee admission to the program. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at admissions.immunology@utoronto.ca, specify which program you would like to be considered for, and provide your student number.

Please consult the Arts & Science Program Toolkit for more information on program enrolment. Additional information is also available on the Immunology website at www.immunology.utoronto.ca.

Completion Requirements:

(8.0 credits, including 1.0 credit at the 400-level)

First Year:

BIO120H1; BIO130H1; (CHM135H1, CHM136H1)/ CHM151Y1

Second Year:

1. BCH210H1; BIO230H1; IMM250H1; BIO260H1/ HMB265H1; STA288H1
2. 0.5 credit from the following list: BIO220H1/ TRN225Y1/ CHM247H1/ CHM249H1

Third Year:

IMM340H1; IMM350H1; CSB349H1/ BCH311H1; 0.5 credit from the following list: BCH370H1/ IMM360H1/ MGY377H1/ MGY378H1/ MGY381H1

Fourth Year:

1.0 credit from the following list: IMM428H1/ IMM429H1/ IMM430H1/ IMM431H1/ IMM432H1/ IMM435H1/ MIJ485H1

Notes:

1. Students considering graduate school are encouraged to add the additional non-compulsory IMM450Y1 research course, if space permits.
2. MIJ485H1 requires MGY377H1 & MGY378H1 as pre-requisites.
3. IMM435H1 is capped at 40 students. Priority will be given to Immunology Specialist students, followed by Immunology Major students.

Immunology Specialist (Science Program) - ASSPE1002

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade and Variable Minimum Grade Average

Minimum grades combined with a minimum grade average in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1 and BIO130H1
- CHM135H1 and CHM136H1, or CHM151Y1
- MAT135H1 and MAT136H1, or MAT137Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 70% in each course, or a final grade average lower than 75% in these required courses will not be considered for admission. Please note that obtaining the minimum final grades and grade average does not guarantee admission to the program. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at admissions.immunology@utoronto.ca, specify which program you would like to be considered for, and provide your student number.

Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment. Additional information is also available on the Immunology website at www.immunology.utoronto.ca.

Note: The Immunology Specialist cannot be combined with the Biochemistry Major or the Molecular Genetics and Microbiology Major.

Completion Requirements:

(13.5 credits)

First Year:

BIO120H1; BIO130H1; (CHM135H1, CHM136H1)/
CHM151Y1; (MAT135H1, MAT136H1)/ MAT137Y1

First Year or upper years:

(PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1)
(Note 1)

Second Year:

1. BCH242Y1; BIO230H1; BIO260H1/ HMB265H1;
IMM250H1; STA288H1

2. One course from the following list: BIO220H1/
TRN225Y1/ CHM220H1/ CHM247H1/ CHM249H1

Third Year:

1. BCH377H1; IMM341H1; IMM351H1; MGY311Y1;
IMM360H1

2. MGY377H1/ MGY378H1

Fourth Year:

1. IMM435H1

2. 1.0 credit from the following list: IMM428H1/
IMM429H1/ IMM430H1/ IMM431H1/ IMM432H1/
MIJ485H1

3. IMM450Y1 or 1.0 credit at the 400-level in ANA, BCH, IMM, LMP, MGY, CSB.

Notes:

1. (PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1) may be taken in the first year or subsequent years and are not required for entrance into the specialist program.

2. IMM435H1 is capped at 40 students. Priority will be given to Immunology Specialist students, followed by Immunology Major students.

3. Students considering graduate school are encouraged to take IMM385Y1.

Molecular Genetics and Microbiology Major (Science Program) - ASMAJ1387

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade and Variable Minimum Grade Average

Minimum grades combined with a minimum grade average in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1, BIO130H1

- ([CHM135H1](#) and [CHM136H1](#))/ [CHM151Y1](#)
- ([MAT135H1](#) and [MAT136H1](#))/ [MAT137Y1](#)/
[MAT157Y1](#)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60% in each course, or a grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining the minimum final grades and grade average does not guarantee admission to the program. While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 70s; average = mid 70s. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at studentservices.mogen@utoronto.ca, specify which program you would like to be considered for, and provide your student number.

Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment. Additional information is also available by contacting the Undergraduate Coordinator.

Completion Requirements:

(8.0 credits)

First Year:

[BIO120H1](#), [BIO130H1](#); ([CHM135H1](#), [CHM136H1](#))/ [CHM151Y1](#); ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)

Second Year:

[BCH210H1](#); [BIO230H1](#)/ [BIO255H1](#), [BIO260H1](#)/
[HMB265H1](#), [MGY200H1](#)

Third and Fourth Years:

[BCH311H1](#)/ [CSB349H1](#)/ [MGY311Y1](#); 2.5 credits from [MGY314H1](#), [MGY315H1](#), [MGY340H1](#), [MGY350H1](#), [MGY360H1](#), [MGY377H1](#), [MGY378H1](#), [MGY379Y1](#)/ [MGY380H1](#), [MGY381H1](#), [MGY420H1](#), [MGY425H1](#), [MGY428H1](#), [MGY434H1](#), [MGY440H1](#), [MGY441H1](#), [MGY460H1](#), [MGY470H1](#), [MIJ485H1](#), [BCH428H1](#) (at least 0.5 credit must be a laboratory course and at least 0.5 credit must be a 400-level course, 0.5 credit additional are given if taking [MGY311Y1](#) in lieu of [BCH311H1](#)/ [CSB349H1](#))

Molecular Genetics And Microbiology Specialist: Genetics Stream (Science Program) - ASSPE1388

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enroll.

Variable Minimum Grade and Variable Minimum Grade Average

Minimum grades combined with a minimum grade average in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- [BIO120H1](#), [BIO130H1](#)
- ([CHM135H1](#) and [CHM136H1](#))/ [CHM151Y1](#)
- ([MAT135H1](#) and [MAT136H1](#))/ [MAT137Y1](#)/
[MAT157Y1](#)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 75% in each course, or a grade average lower than 80% in these required courses will not be considered for admission. Please note that obtaining the minimum final grades and grade average does not guarantee admission to the program. While it is difficult to predict what will constitute "competitive" course marks in a given year, based on previous years the estimate is: course marks = mid 80s; average = mid 80s.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at studentservices.mogen@utoronto.ca, specify which program you would like to be considered for, and provide your student number.

Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment. Additional information is also available by contacting the Undergraduate Program Coordinator (studentservices.mogen@utoronto.ca).

Completion Requirements:

(14.0 credits)

First Year:

(BIO120H1, BIO130H1); (CHM135H1, CHM136H1)/
CHM151Y1; (MAT135H1, MAT136H1)/ MAT137Y1

First or Second Year:

(PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1)

Second Year:

BCH242Y1; BIO230H1/ BIO255H1, HMB265H1;
MGY280H1, CHM247H1, STA220H1/ STA288H1

Third Year:

1. MGY340H1, MGY350H1, MGY311Y1, MGY314H1,
MGY315H1
2. 0.5 credit from BCH340H1, BCH377H1, MGY360H1,
MGY377H1, MGY378H1

Fourth Year:

1. MGY420H1,
plus 2.5 credits from Genetics Lists 1 and 2, distributed as follows:
2. At least 1.5 credits must be taken from list 1:
MGY425H1, MGY428H1, MGY460H1, MGY470H1
3. Up to 1.0 credit may be taken from list 2:
MGY440H1, MGY480Y1/ one or both of (MGY481H1 and
MGY482H1), BCH428H1, BCH440H1, MGY441H1/
BCH441H1/ CSB472H1, BCH448H1, EEB460H1

Molecular Genetics And Microbiology Specialist: Microbiology Stream (Science Program) - ASSPE1389

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enroll.

Variable Minimum Grade and Variable Minimum Grade Average

Minimum grades combined with a minimum grade average in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1, BIO130H1
- (CHM135H1 and CHM136H1)/ CHM151Y1
- (MAT135H1 and MAT136H1)/ MAT137Y1/
MAT157Y1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 75% in each course, or a grade average lower than 80% in these required courses will not be considered for admission. Please note that obtaining the minimum final grades and

grade average does not guarantee admission to the program. While it is difficult to predict what will constitute "competitive" course marks in a given year, based on previous years the estimate is: course marks = mid 80s; average = mid 80s.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at studentservices.mogen@utoronto.ca, specify which program you would like to be considered for, and provide your student number.

Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment. Additional information is also available by contacting the Undergraduate Program Coordinator (studentservices.mogen@utoronto.ca).

Completion Requirements:

(14.0 credits)

First Year:

(BIO120H1, BIO130H1), (CHM135H1, CHM136H1)/
CHM151Y1, (MAT135H1, MAT136H1)/ MAT137Y1

First or Second Year:

(PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1)

Second Year:

BCH242Y1, BIO230H1/ BIO255H1, HMB265H1,
MGY280H1, CHM247H1, STA220H1/ STA288H1

Third Year:

1. IMM341H1, IMM351H1, MGY311Y1, MGY377H1,
MGY378H1, MGY380H1, MGY381H1

Fourth Year :

2.5 credits from Microbiology Lists 1 and 2, distributed as follows:

1. At least 1.5 credits must be taken from list 1:
MGY428H1, MGY440H1, MIJ485H1, BCH449H1,
IMM428H1, IMM430H1, IMM435H1, LMP402H1,
LMP436H1, LMP440H1, NFS485H1, HMB304H1
2. Up to 1.0 credit may be taken from list 2: MGY360H1,
MGY420H1, MGY425H1, MGY470H1, MGY480Y1/ one
or both of (MGY481H1 and MGY482H1), BCH450H1,
BCH428H1, MGY441H1/ BCH441H1/ CSB472H1,
BCH445H1

Pathobiology Specialist (Science Program) - ASSPE2025

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade or Variable Minimum Grade Average

A minimum grade/minimum grade average in required courses or their equivalents is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1 and CHM136H1)/ CHM151Y1
- (MAT135H1 and MAT136H1)/ MAT137Y1/
MAT157Y1

The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at Imp.undergrad@utoronto.ca and provide your student number.

Please consult the [Arts & Science Program Toolkit](#) for program enrolment information.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the [Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and there are program-specific year 3 entry enrolment requirements. Students applying for Year 3 entry must have been admitted to the Pathobiology Specialist in the Summer after Year 2.

Completion Requirements:

(14.0-15.5 credits, including at least 2.0 credits at the 400-level)

First Year:

- BIO120H1, BIO130H1
- (CHM135H1, CHM136H1)/ CHM151Y1
- (MAT135H1, MAT136H1)/ MAT137Y1/
MAT157Y1

First or Second Year:

- (PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1)

Second Year:

- BCH210H1
- BIO230H1
- BIO260H1/ HMB265H1
- CHM220H1
- CHM247H1/ CHM249H1
- PSL300H1, PSL301H1
- STA288H1/ STA220H1/ BIO220H1
- LMP200H1

Third Year:

- BCH370H1, BCH311H1
- LMP310H1, LMP320H1, LMP330H1

Choose one of the options below:

- Option A: Immunology: (IMM341H1, IMM351H1)
- Option B: Microbiology: (MGY377H1, MGY378H1)
- Option C: Anatomy: ANA300Y1
- Option D: Metabolic and Signaling Pathways: PSL425H1 and PCL386H1
- Option E: Research: LMP305Y1 and one of the above four options

Fourth Year:

Students should choose four of the following 400-level courses (2.0-2.5 credits):

- LMP405Y1, LMP410H1, LMP415H1, LMP420H1,
LMP430H1, LMP440H1, LMP450H1, LMP460H1

Note: If the research course LMP405Y1 is taken, an additional three 400-level courses from the list are still required (totalling 2.5 credits).

Pharmacology Specialist (Science Program) - ASSPE2082

Pharmacology is an integrative medical science that builds upon the core foundational disciplines of the basic life sciences. The Pharmacology Specialist program aims to provide students with an understanding of the therapeutic properties and clinical uses of externally administered chemical substances in the whole body, as well as the mechanisms of their actions and interactions with molecular, cellular and tissue targets. This understanding prepares students for a variety of either research-based or non-research-based careers, including positions in the pharmaceutical and biotechnology industries, in government agencies, in research institutes and in universities. Students learn about both basic and clinical pharmacology through lectures, tutorials, laboratories and independent research projects. The senior research project course enables students to gain valuable research experience while working under the supervision of an individual faculty member in either a laboratory-based or a non-laboratory-based setting.

Pharmacology (and its application in clinical therapeutics) plays a prominent role in society, and a comprehension of drug mechanisms and uses is fundamental to career success in the fields of medicine, dentistry, pharmacy and nursing. While some students take the Pharmacology Specialist program in preparation for these professional programs, students are advised to contact the respective Faculties directly for questions related to transfer credits.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 8.0 credits and meet the requirements listed below to enroll. Students interested in this program should initially apply to the Specialist in Pharmacology & Biomedical Toxicology Program (ASSPE2340) after their first year of study. Students in ASSPE2340 will have the opportunity to move into the Pharmacology Specialist (ASSPE2082) following their second year of study.

Students who have completed 4.0 to 7.5 credits cannot apply directly to ASSPE2082 and must first apply to ASSPE2340, using the following courses:

- BIO120H1 and BIO130H1
- (CHM135H1, CHM136H1)/ CHM151Y1
- 1.0 credit from (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1/ (PHY131H1 and PHY132H1)/ (PHY151H1 and PHY152H1)

Students who have completed at least 8.0 credits and who are already enrolled in ASSPE2340 may enrol in ASSPE2082 themselves on ACORN.

Students who have completed at least 8.0 credits but who are not already enrolled in ASSPE2340 must apply to ASSPE2082 using the following courses:

- BIO120H1 and BIO130H1
- (CHM135H1, CHM136H1)/ CHM151Y1
- 1.0 credit from (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1/ (PHY131H1 and PHY132H1)/ (PHY151H1 and PHY152H1)
- PCL201H1

Variable Minimum Grade and Variable Minimum Grade Average

A minimum grade and minimum grade average in required courses are needed for entry, and this minimum changes each year depending on available spaces and the number of applicants.

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in each course, or a combined grade average lower than 75% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade and minimum grade average does not guarantee admission to the program. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified enrolment requirements, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at undergrad.pharmtox@utoronto.ca, specify which program you would like to be considered for, and provide your student number. Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment.

Arts & Science Internship Program (ASIP)

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and there are program-specific year 3 entry enrolment requirements. Students applying for Year 3 entry must have been admitted to the Pharmacology Specialist in the Summer after Year 2 and completion of PCL201H1 (with a minimum grade of 77%), PSL300H1 and PSL301H1.

Notes:

- While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 80s; average = mid 80s.
- **Students wishing to enroll in the Pharmacology Specialist will initially apply to the Joint Specialist in Pharmacology and Biomedical Toxicology (ASSPE2340). After admission, students can then choose to transfer to the Pharmacology Specialist following second year.** First and second year courses are the same for all Specialist programs within the Department (ASSPE2082/ASSPE2340/ASSPE2573).
- Students cannot combine the Pharmacology Specialist with either departmental Major programs (Biomedical Toxicology or Pharmacology).
- Students wishing to enroll **after** their second year who have taken PCL201H1 will be considered on a case by case basis. Successful completion of required pre-requisite courses is required to further enroll in upper level program courses. Students may not transfer to the Major program from the Specialist after completion of PCL472Y1 or INT300H1/ INT301H1 in the Arts & Science Internship Program (ASIP).

Completion Requirements:

(14.0 credits)

First Year: BIO120H1, BIO130H1, (CHM135H1, CHM136H1)/ CHM151Y1, and 1.0 credit from any combination of (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1, PHY131H1/ PHY151H1, PHY132H1/ PHY152H1 (see NOTE 1)

Students in this program have the option to enrol in the Arts & Science Internship Program (ASIP) stream.

Second Year: BCH210H1, BIO230H1/ BIO255H1, BIO260H1/ HMB265H1, CHM247H1/ CHM249H1, STA288H1, PCL201H1, (PSL300H1, PSL301H1) (NOTE: PSL201Y1 is not acceptable)

Third Year: BCH311H1/ PSL350H1, PCL302H1, at least one 0.5 credit from PCL367H1 or PCL368H1 (see NOTE 2)

Third or Fourth Year: PCL469H1 and 3.0 credits with at least 1.5 credits from PCL courses: JPM300H1/ JPM400Y1 (see NOTE 3)/ PCL298H1/ PCL345H1/ PCL367H1 or PCL368H1 (see NOTE 2)/ PCL386H1/ PCL389H1/ PCL475H1/ PCL476H1/ PCL477H1/ PCL484H1/ PCL490H1/ PCL497H1/ PCL498Y1 (see NOTE 5)/ ANA300Y1/ BCH340H1/ BCH450H1

Fourth Year: PCL402H1, PCL470H1, PCL472Y1/ JPM400Y1 (see NOTE 3)

An Integrative, Inquiry-Based Activity Requirement must be satisfied.

The requirement for an integrative, inquiry-based and/or experiential activity must be met by completing at least one of the following: PCL297H1, PCL298H1, PCL389H1, PCL397Y0, PCL472Y1, PCL497H1, PCL498Y1, JPM400Y1. Students who complete the Arts & Science Internship Program (ASIP) stream will also meet this requirement.

NOTES:

1. Any PHY/MAT courses should be completed during the first year and included for program enrolment.
2. At least one 0.5 credit from PCL367H1 or PCL368H1 is required for the program, however if desired the alternative course can be taken as a program elective.
3. Enrolment in either PCL472Y1 or JPM400Y1 is limited and requires permission from the Department of Pharmacology and Toxicology. Students must receive prior consent from course coordinator according to Departmental guidelines before the Department will register them in the course. Students can take either course as their required independent project, or may take JPM400Y1 as an additional elective. It is the student's responsibility to make all necessary preparations before the session starts (see course description).
4. Students wishing to apply their Arts & Science Internship Program (ASIP) towards the requirement to complete PCL472Y1/ JPM400Y1 should reach out to undergrad.pharmtox@utoronto.ca.
5. Students may not use more than 2.0 credits towards their program from JPM400Y1/ PCL298H1/ PCL472Y1/ PCL497H1/ PCL498Y1.

Physiology Specialist (Science Program) - ASSPE0482

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending

on available spaces and the number of applicants. The following courses or their equivalents must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1 and CHM136H1)/ CHM151Y1
- 1.0 credit from MAT135H1, MAT136H1, MAT137Y1, MAT157Y1, PHY131H1, PHY132H1, PHY151H1, PHY152H1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60% in each course, or a grade average lower than 70% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at physiology.undergrad@utoronto.ca, specify which program you would like to be considered for, and provide your student number.

Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment, or the Physiology website at www.physiology.utoronto.ca.

Completion Requirements:

(14.0 credits)

First Year:

BIO120H1, BIO130H1; (CHM135H1, CHM136H1)/ CHM151Y1; (PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1)

First Year or Upper Years:

(MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1*

Second Year:

1. 3.0 credits from BCH210H1; BIO230H1/ BIO255H1; CHM220H1/ CHM247H1/ CHM249H1; PSL300H1, PSL301H1, STA220H1/ STA288H1
2. 1.0 credit from BIO220H1, BIO260H1/ HMB265H1; MAT235Y1, PHY231H1, PSL299Y1/ PSL399Y1

Third Year:

1. 3 credits from BCH370H1; PSL304H1, PSL305H1, PSL350H1/ CSB349H1/ BCH311H1, PSL372H1, PSL374H1
2. 1 credit from the following list: ANA300Y1, ANA301H1; BME498Y1; CSB325H1, CSB332H1/ CJH332H1, CSB343H1, CSB345H1/ CSB445H1, CSB346H1,

CSB347H1; IMM340H1/ IMM341H1, IMM350H1/ IMM351H1; JPM300H1; PCL201H1, PCL285H1, PCL302H1; PHY331H1, PSL310H1; PSL378H1/ PSL379H0/ PSL398H0; PSY397H1

Fourth Year: (at least 2.0 credits at 400-level)

1. PSL496Y1/ PSL497H1/ PSL498Y1/ PSL499H1/ JPM400Y1
2. 1.0-1.5 credits from PSL400-series or HMB430H1/ HMB470H1/ HMB472H1

* These courses may be taken in the first year or subsequent years, and are not required for entrance into the specialist program.

Quantitative Biology Major (Science Program) - ASMAJ2368

The Quantitative Biology Major program (8.0 credits) is designed for students with a deep interest in biology who wish to gain a strong grounding in quantitative methods and their application to biological questions. More than ever, advancements in biology, from the molecular through the organismal to the ecosystem level, require quantitative thinking and skills along with a strong understanding of biological processes. Interdisciplinary research that draws from the natural sciences, mathematics, statistics and computer science, is an important aspect of modern biology. This major provides foundations in biology and quantitative approaches used to test and advance biological knowledge, and is appropriate for students who wish to pursue a career or graduate studies in a broad range of life sciences, ranging from biomedical to conservation to epidemiology.

The program is delivered through a mixture of classroom-learning and applied laboratory teaching, with an emphasis on understanding how quantitative methods inform our understanding of biology, and how they can be applied to test and develop new hypotheses. Students also have access to independent research opportunities that enhance professional skills, science communication, and the development and application of knowledge in quantitative biology.

Quantitative Biology Major students have priority enrollment in the EEB courses listed, but not in courses offered by other departments, such as STA, MAT, CSC, CSB and BCB. Students should be aware that some courses listed have prerequisites that are not listed below. For students intending to pursue graduate studies, it is strongly recommended that an independent research course such as EEB498Y1 be included as part of the Quantitative Biology major.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- BIO120H1 (70%)/ BIO130H1 (70%)
- CSC108H1 (70%)/ CSC148H1 (70%)/ CSC110Y1 (70%)/ EEB125H1 (70%)/ MAT135H1 (70%)/ MAT136H1 (70%)/ MAT137Y1 (70%)/ MAT157Y1 (70%)

Completion Requirements:

(8.0 credits including at least 2.0 credits at the 300+ level, 0.5 of which must be at the 400 level)

First Year (2.5 credits):

BIO120H1, BIO130H1, EEB125H1/ CSC108H1/ CSC148H1/ CSC110Y1, (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

Higher Years (5.5 credits):

1. 1.5 credits: BIO220H1, BIO230H1/ BIO255H1, BIO260H1/ HMB265H1
2. 1.0 credit in introductory probability and statistics: EEB225H1, GGR270H1, PSY201H1, PSY202H1, STA220H1, STA221H1, STA237H1, STA238H1, STA247H1, STA248H1, STA255H1, STA257H1, STA261H1, STA288H1
3. 0.5 credit in intermediate math: APM236H1, MAT221H1/ MAT223H1, MAT224H1, MAT240H1, MAT237Y1, MAT247H1
4. 1.0 credit from: CSB352H1, EEB319H1, EEB323H1, EEB324H1, EEB362H1, GGR372H1, GGR373H1, PHY331H1
5. 1.0 credit from: APM346H1, APM446H1, APM461H1, APM462H1, CSB472H1, CSC311H1, CSC320H1, CSC336H1, CSC343H1, CSC373H1, CSC384H1, CSC401H1, CSC412H1, CSC413H1, CSC420H1, EEB313H1, EEB314H1, EEB458H1, EEB459H1, EEB460H1, EEB462H1, EEB463H1, EEB498Y1, EEB499Y1, MAT332H1, MAT335H1, MAT344H1, MAT351Y1, MGY428H1, PHY431H1, PSY305H1, STA302H1, STA303H1, STA304H1, STA305H1, STA355H1, STA365H1, STA480H1
6. 0.5 credit at 400 level from: BCB410H1, BCB420H1, CSB435H1, CSB472H1, CSB498Y1, CSB499Y1, EEB458H1, EEB459H1, EEB460H1, EEB462H1, EEB463H1, EEB498Y1, EEB499Y1, PHY431H1, PSY474H1, STA480H1

Specialist in Pharmacology and Biomedical Toxicology (Science Program) - ASSPE2340

Pharmacology and Biomedical Toxicology are complementary sciences, and the Pharmacology and Biomedical Toxicology Specialist combines the requirements of the two distinct specialist programs. The Specialist program integrates knowledge of pharmacology – the understanding of the therapeutic properties and clinical applications of externally administered chemical substances in the whole body and the mechanisms of their actions and interactions with their intended targets, while biomedical toxicology examines the harmful effects of exogenous chemicals on the health and behaviour of individuals and society, addressing drug safety and the adverse consequences of chemical exposure. Biomedical toxicology includes understanding the safety/toxicity of a wide array of chemicals (pharmaceutical preparations, herbal products, natural toxins and environmental contaminants) with a focus on their effects and adverse consequences on human health.

Both Pharmacology and Biomedical Toxicology are integrative life sciences which build on the core foundational disciplines of the basic life sciences and the prominent role each science plays in society. A comprehension of the biological mechanisms of action and potential uses of chemicals are key to career success in the fields of medicine, dentistry, pharmacy and nursing. The Specialist program prepares students for a variety of job opportunities following its completion as well as for further study in graduate research or professional programs such as Medicine, Dentistry, and Pharmacy. (Note: Students interested in professional programs should contact the respective faculties to inquire about specific transfer credits.) Graduates of this rigorous program will have access to an impressive variety of job opportunities in either research-based or non-research-based careers, including scientific research in research institutes and in universities, positions in the pharmaceutical, biotechnology and chemical industries, forensic science, nutrition and food sciences, government or consulting agencies. Students learn about both basic and clinical pharmacology and biomedical toxicology through lectures, tutorials, small group sessions, laboratories and independent research projects. The senior research project course enables students to gain valuable research experience while working under the supervision of an individual faculty member in either a laboratory-based or a non-laboratory-based setting.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade or Variable Minimum Grade Average

A minimum grade/minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses or their equivalents must be completed:

Students who have completed 4.0 to 7.5 credits can apply directly to ASSPE2340 using the following courses:

- BIO120H1 and BIO130H1
- (CHM135H1, CHM136H1)/ CHM151Y1
- 1.0 credit from (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1/ (PHY131H1 and PHY132H1)/ (PHY151H1 and PHY152H1)

Students who have completed at least 8.0 credits and who are already enrolled in ASSPE2340 have the option of remaining in the program until completion or may enrol themselves in ASSPE2082 or ASSPE2573 on ACORN.

Students who have completed at least 8.0 credits but who are not already enrolled in ASSPE2340 must apply using the following courses:

- BIO120H1 and BIO130H1
- (CHM135H1, CHM136H1)/ CHM151Y1
- 1.0 credit from (MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1/ (PHY131H1 and PHY132H1)/ (PHY151H1 and PHY152H1)
- PCL201H1

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 65% in each course, or a combined grade average lower than 75% in these required courses will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program. The underlying numeric final mark in each of your courses required for program enrolment will be used by the relevant academic unit to determine your eligibility.

Applications from students lacking numerical grades in one or more of the specified prerequisites, or students applying in their second or later years, may be considered on the basis of their entire academic record and the availability of space in the program. In addition to applying through ACORN, students applying in their second year or later are asked to please contact the department directly at undergrad.pharmtox@utoronto.ca, specify which program you would like to be considered for, and provide your student number. Please consult the [Arts & Science Program Toolkit](#) for more information on program enrolment.

Arts & Science Internship Program (ASIP)

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and there are program-specific year 3 entry enrolment requirements. Students applying for Year 3 entry must have been admitted to the Specialist in Pharmacology and Biomedical Toxicology in the Summer after Year 2 and completion of PCL201H1 (with a minimum grade of 77%), PSL300H1 and PSL301H1.

Notes:

- While it is difficult to predict what will be competitive course marks and average in a given year, based on previous years, the estimate is: course marks = mid 80s; average = mid 80s.
- **Students wishing to enroll in the Pharmacology Specialist (ASSPE2082) or Biomedical Toxicology Specialist (ASSPE2573) will initially apply to the Joint Specialist in Pharmacology and Biomedical Toxicology (ASSPE2340). After admission, students can then choose to transfer to the Pharmacology or Biomedical Toxicology Specialist following second year.** First and second year courses are the same for all Specialist programs within the Department (ASSPE2082/ASSPE2340/ASSPE2573).
- Students cannot combine the Pharmacology and Biomedical Toxicology Specialist with either departmental Major programs (Biomedical Toxicology or Pharmacology).
- Students wishing to enroll **after** their second year who have taken PCL201H1 will be considered on a case by case basis. Successful completion of required pre-requisite courses is required to further enroll in upper level program courses. Students may not transfer to the Major program from the Specialist after completion of PCL472Y1/ PCL474Y1 courses or INT300H1/ INT301H1 in the Arts & Science Internship Program (ASIP).

Completion Requirements:

(14.5 credits)

First Year: BIO120H1, BIO130H1, (CHM135H1, CHM136H1)/ CHM151Y1, and 1.0 credit from any combination of (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1, PHY131H1/ PHY151H1, PHY132H1/ PHY152H1 (see NOTE 1)

Students in this program have the option to enrol in the Arts & Science Internship Program (ASIP) stream.

Second Year: BCH210H1, BIO230H1/ BIO255H1, BIO260H1/ HMB265H1, CHM247H1/ CHM249H1, STA288H1, PCL201H1, (PSL300H1, PSL301H1) (NOTE: PSL201Y1 is not acceptable)

Third Year: BCH311H1/ PSL350H1, PCL302H1, PCL381H1, PCL382H1 at least one 0.5 credit from PCL367H1 or PCL368H1 (see NOTE 2)

Third or Fourth Year: PCL469H1, and 1.5 credits from the following courses: JPM300H1/ JPM400Y1 (see NOTE 3)/ PCL298H1/ PCL345H1/ PCL367H1 or PCL368H1 (see NOTE 2)/ PCL386H1/ PCL389H1/ PCL475H1/ PCL476H1/ PCL477H1/ PCL484H1/ PCL490H1/ PCL497H1/ PCL498Y1 (see NOTE 5)/ ENV341H1/ LMP301H1. Additional courses that may strengthen your background in this program can be taken, but will not count towards your program: ANA300Y1/ ANA301H1/ BCH340H1/ CHM310H1

Fourth Year: PCL402H1; PCL470H1; (PCL482H1, PCL483H1); PCL472Y1/ PCL474Y1/ JPM400Y1 (see NOTE 3)

An Integrative, Inquiry-Based Activity Requirement must be satisfied.

The requirement for an integrative, inquiry-based and/or experiential activity must be met by completing at least one of the following: PCL297H1, PCL298H1, PCL389H1, PCL397Y0, PCL472Y1, PCL474Y1, PCL497H1, PCL498Y1, JPM400Y1. Students who complete the Arts & Science Internship Program (ASIP) will also meet this requirement.

NOTES:

- Any PHY/MAT courses should be completed during the first year and included for program enrolment.
- At least one 0.5 credit from PCL367H1 or PCL368H1 is required for the program, however if desired the alternative course can be taken as a program elective.
- Enrolment in any of PCL472Y1/ PCL474Y1 or JPM400Y1 is limited and requires permission from the Department of Pharmacology and Toxicology. Students must receive prior consent from the course coordinator according to Departmental guidelines before the Department will register them in the course. Students can take either course as their required independent project, or may take JPM400Y1 as an additional elective. It is the student's responsibility to make all necessary preparations before the session starts (see course description).
- Students wishing to apply their Arts & Science Internship Program (ASIP) towards the requirement to complete PCL472Y1/ PCL474Y1/ JPM400Y1 should reach out to undergrad.pharmtox@utoronto.ca.

- Students may not use more than 2.0 credits towards their program from JPM400Y1/ PCL298H1/ PCL472Y1/ PCL474Y1/ PCL497H1/ PCL498Y1.

Data Science in the Physical Sciences

Biological Chemistry Specialist (Science Program) - ASSPE1995

Consult Professor G. A. Woolley, Department of Chemistry.

Biological Chemistry examines Nature at the molecular level by using a combination of synthetic, inorganic, analytical and physical chemistry as well as the tools of molecular biology and biochemistry. This program provides the setting to understand the chemical reactions and interactions that occur in biological processes, as well as how chemical strategies can be used to control these systems. This program includes sufficient flexibility to allow focus in areas such as bioinorganic, bioorganic, biophysical or medicinal chemistry. Students graduating from this program will be prepared for career paths in the biotechnology, biomedical and pharmaceutical sectors, as well as for research and teaching in related areas of chemistry and biology. This program is accredited by the Canadian Society for Chemistry.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirement listed below to enrol. Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

(CHM135H1, CHM136H1)/CHM151Y1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 63% in any of the required courses will not be considered for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic

Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Biological Chemistry Specialist in the Summer after Year 2.

Completion Requirements:

(14.0 credits, including 3.0 credits from 400-level courses)

First Year: BIO120H1, BIO130H1; CHM151Y1 (strongly recommended)/ (CHM135H1, CHM136H1); (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

First or Second Year: (PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1)

Second and Higher Years:

1. BCH210H1; BIO230H1/ BIO255H1; CHM217H1, CHM220H1/ CHM222H1 (CHM220H1 recommended), (CHM236H1, CHM237H1)/ CHM238Y1, CHM249H1
2. CHM310H1, CHM347H1, CHM348H1, CHM379H1
3. At least 1.0 credit from the following: CHM317H1, CHM327H1, CHM338H1, CHM343H1, CHM395Y1/ CHM499Y1/ PHC489Y1, CHM410H1
4. CHM437H1, CHM447H1, CHM479H1
5. Additional 300/400-level BCH or CHM courses to a total of 14.0 credits. CSB450H1 is also acceptable.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Biological Physics Specialist: Advanced Physics Stream (Science Program) - ASSPE2739

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have

been admitted to the Biological Physics Specialist: Advanced Physics Stream in the Summer after Year 2.

Completion Requirements:

Core Biological Physics Courses (12.0 credits)

First Year (3.0 credits): (CHM135H1, CHM136H1)/ CHM151Y1, (MAT135H1, MAT136H1)/ MAT137Y1, PHY131H1/ PHY151H1, PHY132H1/ PHY152H1 (PHY151H1, PHY152H1 recommended)

First or Second Year (1.0 credit): BIO130H1, MAT223H1

Second Year (3.0 credits): BCH210H1, (MAT235Y1/ MAT237Y1), MAT244H1, PHY250H1, PHY252H1

Second or Third Year (0.5 credit): BIO230H1/ BIO255H1

Third Year (2.0 credits): PHY224H1, PHY254H1, PHY256H1, PHY354H1

Third or Fourth Year (2.5 credits):

1. PHY331H1, PHY431H1
2. PHY324H1/ BCH370H1/ CHM327H1/ PSL372H1
3. 1.0 credit, including at least 0.5 credit at the 400-level, from APM346H1/ PHY 300-level courses/ PHY 400-level courses (APM346H1, PHY350H1, PHY356H1, PHY407H1, PHY452H1, PHY454H1, PHY460H1 recommended)

Additional Requirements for the Advanced Physics Stream (2.5 credits):

1. (BCH311H1, BCH340H1)/ (PSL300H1, PSL301H1)
2. 1.5 credits, including at least 0.5 credit at the 400-level, from PHY 300-level courses, PHY 400-level courses

Integrative, Inquiry-Based Activity Requirement

The choices in the program must satisfy the requirement for an integrative, inquiry-based activity by including at least one of the following courses: PHY371Y1, PHY372H1, PHY378H1, PHY379Y1, PHY396Y0, PHY397Y0, PHY398H0, PHY398Y0, PHY399Y0, PHY399Y1, PHY407H1, PHY424H1, PHY426H1, PHY428H1, PHY429H1, PHY471Y1, PHY472H1, PHY478H1, PHY479Y1.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Notes:

Students are encouraged but not required to enrol in the independent project courses PHY478H1/ PHY479Y1. These students may be supervised by faculty in the Departments of Physics, Biochemistry, Chemistry,

Immunology, and Physiology. Students are required to have a B average in the program courses, identify a supervisor, and consult the Associate Chair of Physics (Undergraduate Studies) before enrolling in [PHY478H1](#)/[PHY479Y1](#).

Students might wish to enrol in 300- and 400-level courses in the partner life science departments that are not listed above, including independent research or project courses. These students will need approval to take these courses from the Associate Chair (Undergraduate Studies) prior to enrolment in the course.

Biological Physics Specialist: Biochemistry Stream (Science Program) - ASSPE2737

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Biological Physics Specialist: Biochemistry Stream in the Summer after Year 2.

Completion Requirements:

Core Biological Physics Courses (12.0 credits):

First Year (3.0 credits): ([CHM135H1](#), [CHM136H1](#))/[CHM151Y1](#), ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#), [PHY131H1](#)/ [PHY151H1](#), [PHY132H1](#)/ [PHY152H1](#) ([PHY151H1](#), [PHY152H1](#) recommended)

First or Second Year (1.0 credit): [BIO130H1](#), [MAT223H1](#)

Second Year (3.0 credits): [BCH210H1](#), ([MAT235Y1](#)/ [MAT237Y1](#)), [MAT244H1](#), [PHY250H1](#), [PHY252H1](#)

Second or Third Year (0.5 credit): [BIO230H1](#)/ [BIO255H1](#)

Third Year (2.0 credits): [PHY224H1](#), [PHY254H1](#), [PHY256H1](#), [PHY354H1](#)

Third or Fourth Year (2.5 credits):

1. [PHY331H1](#), [PHY431H1](#)
2. [PHY324H1](#)/ [BCH370H1](#)/ [CHM327H1](#)/ [PSL372H1](#)
3. 1.0 credit, including at least 0.5 credit at the 400-level, from [APM346H1](#)/ [PHY 300-level courses](#)/ [PHY 400-level courses](#) ([APM346H1](#), [PHY350H1](#), [PHY356H1](#), [PHY407H1](#), [PHY452H1](#), [PHY454H1](#), [PHY460H1](#) recommended)

Additional Courses for the Biochemistry Stream (2.5 credits):

1. [BCH311H1](#), [BCH340H1](#)
2. 1.5 credits from [BCH370H1](#)/ [CSB428H1](#)/ [BCH 400-level courses](#) ([BCH422H1](#), [BCH425H1](#), [BCH426H1](#), [BCH428H1](#), [BCH440H1](#), [BCH450H1](#) recommended). Excludes [BCH472Y1](#), [BCH473Y1](#), [BCH478H1](#), [BCH479H1](#).

Integrative, Inquiry-Based Activity Requirement

The choices in the program must satisfy the requirement for an integrative, inquiry-based activity by including at least one of the following courses: [PHY371Y1](#), [PHY372H1](#), [PHY378H1](#), [PHY379Y1](#), [PHY396Y0](#), [PHY397Y0](#), [PHY398H0](#), [PHY398Y0](#), [PHY399Y0](#), [PHY399Y1](#), [PHY407H1](#), [PHY424H1](#), [PHY426H1](#), [PHY428H1](#), [PHY429H1](#), [PHY471Y1](#), [PHY472H1](#), [PHY478H1](#), [PHY479Y1](#), [BCH472Y1](#) and [BCH473Y1](#).

Students in this program have the option to complete the [Arts & Science Internship Program \(ASIP\)](#) stream.

Notes:

Students are encouraged but not required to enroll in the independent project courses [PHY478H1](#)/ [PHY479Y1](#). These students may be supervised by faculty in the Departments of Physics, Biochemistry, Chemistry, Immunology, and Physiology. Students are required to have a B average in the program courses, identify a supervisor, and consult the Associate Chair of Physics (Undergraduate Studies) before enrolling in [PHY478H1](#)/[PHY479Y1](#).

Students might wish to enrol in 300- and 400-level courses in the partner life science departments that are not listed above, including independent research or project courses. These students will need approval to take these courses from the Associate Chair (Undergraduate Studies) prior to enrolment in the course.

On approval of the Department of Physics, students who take [CHM222H1](#) will not have to take [PHY252H1](#).

Biological Physics Specialist: Immunology Stream (Science Program) - ASSPE2740

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Biological Physics Specialist: Immunology Stream in the Summer after Year 2.

Completion Requirements:

Core Biological Physics Courses (12.0 credits)

First Year (3.0 credits): ([CHM135H1](#), [CHM136H1](#)) / [CHM151Y1](#), ([MAT135H1](#), [MAT136H1](#)) / [MAT137Y1](#), [PHY131H1](#) / [PHY151H1](#), [PHY132H1](#) / [PHY152H1](#) ([PHY151H1](#), [PHY152H1](#) recommended)

First or Second Year (1.0 credit): [BIO130H1](#), [MAT223H1](#)

Second Year (3.0 credits): [BCH210H1](#), ([MAT235Y1](#) / [MAT237Y1](#)), [MAT244H1](#), [PHY250H1](#), [PHY252H1](#)

Second or Third Year (0.5 credit): [BIO230H1](#) / [BIO255H1](#)

Third Year (2.0 credits): [PHY224H1](#), [PHY254H1](#), [PHY256H1](#), [PHY354H1](#)

Third or Fourth Year (2.5 credits):

1. [PHY331H1](#), [PHY431H1](#)
2. [PHY324H1](#) / [BCH370H1](#) / [CHM327H1](#) / [PSL372H1](#)
3. 1.0 credit, including at least 0.5 credit at the 400-level from [APM346H1](#) / [PHY 300-level courses](#) / [PHY 400-level courses](#) ([APM346H1](#), [PHY350H1](#), [PHY356H1](#), [PHY407H1](#), [PHY452H1](#), [PHY454H1](#), [PHY460H1](#) recommended)

Additional Courses for the Immunology Stream (2.5 credits):

1. [IMM341H1](#), [IMM351H1](#) (Students in the Biological Physics Specialist Immunology Stream are permitted to take [BIO230H1](#) as a co-requisite to [IMM341H1](#), instead of as a prerequisite, by permission of the Department of

Immunology)

2. 1.0 credit from ([STA220H1](#) / [STA288H1](#), [STA221H1](#)) or ([STA237H1](#), [STA238H1](#)) and 0.5 credit from IMM 400-level courses, OR

0.5 credit from [STA220H1](#) / [STA288H1](#) and 1.0 credit from IMM 400-level courses

Integrative, Inquiry-Based Activity Requirement

The choices in the program must satisfy the requirement for an integrative, inquiry-based activity by including at least one of the following courses: [PHY371Y1](#), [PHY372H1](#), [PHY378H1](#), [PHY379Y1](#), [PHY396Y0](#), [PHY397Y0](#), [PHY398H0](#), [PHY398Y0](#), [PHY399Y0](#), [PHY399Y1](#), [PHY407H1](#), [PHY424H1](#), [PHY426H1](#), [PHY428H1](#), [PHY429H1](#), [PHY471Y1](#), [PHY472H1](#), [PHY478H1](#), [PHY479Y1](#), [IMM385Y1](#), [IMM435H1](#) and [IMM450Y1](#).

Students in this program have the option to complete the [Arts & Science Internship Program](#) (ASIP) stream.

Notes:

Students are encouraged but not required to enrol in the independent project courses [PHY478H1](#) / [PHY479Y1](#). These students may be supervised by faculty in the Departments of Physics, Biochemistry, Chemistry, Immunology, and Physiology. Students are required to have a B average in the program courses, identify a supervisor, and consult the Associate Chair of Physics (Undergraduate Studies) before enrolling in [PHY478H1](#) / [PHY479Y1](#).

Students might wish to enrol in 300- and 400-level courses in the partner life science departments that are not listed above, including independent research courses. These students will need approval to take these courses from the Associate Chair (Undergraduate Studies) prior to enrolment in the course.

On approval of the Department of Physics, students who take [CHM222H1](#) will not have to take [PHY252H1](#).

Biological Physics Specialist: Physiology Stream (Science Program) - ASSPE2738

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry,

starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Biological Physics Specialist: Physiology Stream in the Summer after Year 2.

Completion Requirements:

Core Biological Physics Courses (12.0 credits):

First Year (3.0 credits): ([CHM135H1](#), [CHM136H1](#))/
[CHM151Y1](#), ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#),
[PHY131H1](#)/ [PHY151H1](#), [PHY132H1](#)/ [PHY152H1](#) ([PHY151H1](#), [PHY152H1](#) recommended)

First or Second Year (1.0 credit): [BIO130H1](#), [MAT223H1](#)

Second Year (3.0 credits): [BCH210H1](#), ([MAT235Y1](#)/ [MAT237Y1](#)), [MAT244H1](#), [PHY250H1](#), [PHY252H1](#)

Second or Third Year (0.5 credit): [BIO230H1](#)/ [BIO255H1](#)

Third Year (2.0 credits): [PHY224H1](#), [PHY254H1](#),
[PHY256H1](#), [PHY354H1](#)

Third or Fourth Year (2.5 credits):

1. [PHY331H1](#), [PHY431H1](#)
2. [PHY324H1](#)/ [BCH370H1](#)/ [CHM327H1](#)/ [PSL372H1](#)
3. 1.0 credit, including at least 0.5 credit at the 400-level, from [APM346H1](#)/ [PHY 300-level courses](#)/ [PHY 400-level courses](#) ([APM346H1](#), [PHY350H1](#), [PHY356H1](#), [PHY407H1](#), [PHY452H1](#), [PHY454H1](#), [PHY460H1](#) recommended)

Additional Courses for the Physiology Stream (2.5 credits):

1. [PSL300H1](#), [PSL301H1](#)
2. 1.5 credits, including at least 0.5 credit at the 400-level, from [PSL304H1](#)/ [PSL305H1](#)/ [PSL372H1](#)/ [PSL 400-level courses](#) ([PSL440Y1](#), [PSL445H1](#), [PSL452H1](#) recommended)

Integrative, Inquiry-Based Activity Requirement

The choices in the program must satisfy the requirement for an integrative, inquiry-based activity by including at least one of the following courses: [PHY371Y1](#), [PHY372H1](#), [PHY378H1](#), [PHY379Y1](#), [PHY396Y0](#), [PHY397Y0](#), [PHY398H0](#), [PHY398Y0](#), [PHY399Y0](#), [PHY399Y1](#), [PHY407H1](#), [PHY424H1](#), [PHY426H1](#), [PHY428H1](#), [PHY429H1](#), [PHY471Y1](#), [PHY472H1](#), [PHY478H1](#), [PHY479Y1](#), [PSL398H0](#), [PSL398Y0](#), [PSL399Y1](#), [PSL498Y1](#) and [PSL499H1](#).

Students in this program have the option to complete the [Arts & Science Internship Program](#) (ASIP) stream.

Notes:

Students are encouraged but not required to enrol in the independent project courses [PHY478H1](#)/ [PHY479Y1](#). These students may be supervised by faculty in the Departments of Physics, Biochemistry, Chemistry, Immunology, and Physiology. Students are required to have a B average in the program courses, identify a supervisor, and consult the Associate Chair of Physics (Undergraduate Studies) before enrolling in [PHY478H1](#)/ [PHY479Y1](#).

Students might wish to enrol in 300- and 400-level courses in the partner life science departments that are not listed above, including independent research or project courses. These students will need approval to take these courses from the Associate Chair (Undergraduate Studies) prior to enrolment in the course.

On approval of the Department of Physics, students who take [CHM222H1](#) will not have to take [PHY252H1](#).

Chemical Physics Specialist (Science Program) - ASSPE0600

Consult Professor J. Schofield, Department of Chemistry.

Chemical Physics aims to explain structure and dynamics of molecular and bulk systems in terms of atomic and molecular interactions. Sub-disciplines and specialized topics include reaction dynamics, spectroscopy, optical control of molecular processes, nanoscale science, surface chemistry, theoretical and experimental studies of soft systems (polymers, liquids, biological systems), quantum control and quantum information sciences. The Chemical Physics program will provide students with a solid grounding in physical chemistry, and will prepare students for careers in experimental and theoretical physical sciences, in academia or in research development for companies.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol. Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

([CHM135H1](#), [CHM136H1](#))/[CHM151Y1](#))

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 63% in any of the required courses will not be considered for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Chemical Physics Specialist in the Summer after Year 2.

Completion Requirements:

(14.0 credits, including 1.5 credits from 400-level courses)

First Year:

1. ([CHM151Y1](#) strongly recommended)/ ([CHM135H1](#), [CHM136H1](#))
2. ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)/
[MAT157Y1](#)
3. ([PHY131H1](#), [PHY132H1](#))/ ([PHY151H1](#), [PHY152H1](#))

Higher Years:

1. [APM346H1](#), [CHM222H1](#), [CHM223H1](#), [CHM326H1](#)/ [PHY356H1](#), [CHM327H1](#), [CHM328H1](#), [MAT223H1](#)/ [MAT240H1](#), [MAT235Y1](#)/ [MAT237Y1](#), [MAT244H1](#), [MAT334H1](#), [PHY250H1](#), [PHY254H1](#), [PHY354H1](#), [PHY350H1](#), [CHM423H1](#)/ [PHY456H1](#)
2. 2.0 credits from: [CHM210H1](#), [CHM217H1](#), ([CHM236H1](#), [CHM237H1](#))/ [CHM238Y1](#), ([CHM249H1](#) strongly recommended)/ [CHM247H1](#), [CHM310H1](#), [CHM317H1](#), [CHM338H1](#), [CHM348H1](#), [CHM415H1](#)
3. Additional 400-level CHM/PHY 0.5 credit courses to a total of 14.0 credits. (Note: [CHM395Y1](#) can be used toward this requirement).

Students in this program have the option to complete the [Arts & Science Internship Program \(ASIP\)](#) stream.

Chemistry Major (Science Program) - ASMAJ1376

Consult Professor A. Dicks, Department of Chemistry.

The Chemistry Major Program provides exposure to the core areas of chemistry together with appropriate courses in mathematics during the first two years and allows students to follow a particular area or areas of interest during the third year and fourth year. The program is extremely flexible in its design in that students may focus their studies in the traditional sub-disciplines of inorganic, analytical, organic, or physical chemistry during the second year, and then progress to take upper-year courses in these areas or in additional sub-disciplines including biological, materials and environmental chemistry. Students gain extensive laboratory experience throughout the program from whichever path they choose to take.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol. Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

([CHM135H1](#), [CHM136H1](#))/[CHM151Y1](#))

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 63% in any of the required courses will not be considered for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

Completion Requirements:

(8.0 credits, including at least one 0.5 CHM credit at the 400-level)

First Year: ([CHM151Y1](#) strongly recommended)/([CHM135H1](#) and [CHM136H1](#)); ([MAT135H1](#) and [MAT136H1](#))/ [MAT137Y1](#)/ [MAT157Y1](#)

Second Year:

At least two of the following four options:

- [CHM217H1](#)
- [CHM220H1](#)/ [CHM222H1](#)
- ([CHM236H1](#) and [CHM237H1](#))/ [CHM238Y1](#)
- [CHM249H1](#)/ [CHM247H1](#)

Third Year: At least two of [CHM317H1](#), [CHM327H1](#), [CHM338H1](#), [CHM343H1](#), [CHM348H1](#), [CHM379H1](#)

Fourth Year: Additional 200/300/400-level CHM courses to a total of 7.0 credits ([CHM299H1](#), [CHM299Y1](#), [CHM396Y0](#), [CHM397H0](#), [CHM398H0](#), [CHM398Y0](#), [CHM399H1](#), [CHM399Y1](#) excluded). Students may count

either [CHM395Y1](#) or [CHM499Y1](#) towards Chemistry Major requirements.

Chemistry Specialist (Science Program) - ASSPE1376

Consult Professor A. Dicks, Department of Chemistry.

The Chemistry Specialist Program provides broad coverage of the core areas of chemistry together with appropriate courses in mathematics and physics during the first three years and allows students to follow a particular area of interest or a more general program in the fourth year. The program is suitable for professional work in any area of chemistry and for entry into graduate school to continue work in any of the sub-fields of chemistry, provided that appropriate options are chosen in the fourth year. This program is accredited by the Canadian Society for Chemistry.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol. Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

([CHM135H1](#), [CHM136H1](#))/[CHM151Y1](#))

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 63% in any of the required courses will not be considered for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Chemistry Specialist in the Summer after Year 2.

Completion Requirements:

(14.0 credits, including at least 3.0 credits from 400-level courses)

First Year:

1. ([CHM151Y1](#) strongly recommended)/ ([CHM135H1](#), [CHM136H1](#))
2. ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)/
[MAT157Y1](#)
3. ([PHY131H1](#), [PHY132H1](#))/ ([PHY151H1](#), [PHY152H1](#))

Second Year:

1. [CHM217H1](#), [CHM220H1](#)/ [CHM222H1](#),
[CHM223H1](#), [CHM228H1](#), ([CHM236H1](#),
[CHM237H1](#))/ [CHM238Y1](#), [CHM249H1](#)

Third and Fourth Years:

1. [BCH210H1](#), [CHM326H1](#)/ [CHM328H1](#),
[CHM327H1](#)
2. Additional credits from 300/400-level CHM/ MAT/ another science, including at least three of [CHM317H1](#), [CHM338H1](#), [CHM343H1](#), [CHM379H1](#), [CHM395Y1](#)/ [CHM499Y1](#)/ [PHC489Y1](#), [CHM410H1](#). Minimum 3.0 CHM credits at the 400-level to a total of 14.0 credits.

Students in this program have the option to complete the [Arts & Science Internship Program](#) (ASIP) stream.

Materials Science Specialist (Science Program) - ASSPE2424

Consult Professor Andrew Dicks, Department of Chemistry.

This program draws both on the basic sciences of chemistry and physics, and on the more applied areas such as metallurgy or ceramics. Courses dealing with these latter fields are offered through the Department of Materials Science in the Faculty of Applied Science and Engineering. This is an appropriate program for students with career interests in solid-state, polymer, or composite materials industries, or for graduate work in either chemistry or materials science, with an appropriate choice of options. Students may follow the Materials Chemistry path by taking the research course [CHM499Y1](#) or the Materials Science and Engineering path by taking the research courses [MSE492H1](#) and [MSE493H1](#). This program is accredited by the Canadian Society for Chemistry.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirement listed below to enrol. Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available

spaces and the number of applicants. The following courses must be completed:

(CHM135H1, CHM136H1)/CHM151Y1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 63% in any of the required courses will not be considered for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Materials Science Specialist in the Summer after Year 2.

Completion Requirements:

(14.0 credits, including 1.0 credit from 400-level courses)

First Year:

1. BIO120H1
2. CHM151Y1 (strongly recommended)/ (CHM135H1, CHM136H1)
3. (MAT135H1, MAT136H1)/ MAT137Y1/
MAT157Y1
4. MSE120H1

First or Second Year:

1. BIO130H1/ BIO220H1
2. (PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1)

Second Year and Higher Years:

1. CHM220H1/ CHM222H1/ MSE202H1*,
CHM223H1, (CHM236H1, CHM237H1)/
CHM238Y1, CHM247H1/ CHM249H1
2. MSE219H1, (MSE218H1/ MSE318H1),
MSE335H1
3. CHM327H1, CHM338H1, CHM343H1/
CHM348H1, CHM325H1/ CHM355H1,
CHM434H1/ CHM455H1, CHM426H1/
CHM457H1
4. At least 1.5 credits from the following, of which 0.5 credit must be at the 400-level: MSE302H1,
MSE316H1, MSE343H1, CHM446H1/
CHM456H1, CHM458H1, MSE415H1,
MSE419H1, MSE430H1, MSE431H1, (
MSE432H1/ MSE443H1/ MSE543H1),

MSE440H1, MSE458H1, MSE459H1,
MSE461H1, MSE465H1

5. CHM499Y1/ (MSE492H1, MSE493H1)

*It is highly recommended that students in the Materials Science Specialist Program complete MSE202H1.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Pharmaceutical Chemistry Specialist (Science Program) - ASSPE1211

Consult Professor D. Dubins, Faculty of Pharmacy

The Pharmaceutical Chemistry Specialist Program combines knowledge of the biological, medical, and physical sciences in the study of the scientific aspects of drug therapy, with an emphasis placed on the chemical nature of the reactions and interactions involved in drug therapy. The program is offered jointly by the Department of Chemistry and the Leslie Dan Faculty of Pharmacy at the University of Toronto. Students in the Pharmaceutical Chemistry Specialist program will receive a solid background and training in physical, organic, and analytical chemistry, and will also learn the fundamental aspects of the synthesis, manufacture, use, and mode of action of drugs. This program provides excellent preparation for future work in the pharmaceutical industry and is accredited by Canadian Society for Chemistry,

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

- BIO120H1 and BIO130H1
- (CHM135H1 and CHM136H1)/ CHM151Y1
- (PHY131H1 and PHY132H1)/ (PHY151H1 and PHY152H1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 60%, or a grade average lower than 70% will not be considered for admission. Please note that obtaining this minimum final grade or minimum grade average does not guarantee admission to the program.

Arts & Science Internship Program

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that space is more limited for Year 3 entry and students applying for Year 3 entry must have been admitted to the Pharmaceutical Chemistry Specialist in the Summer after Year 2.

Completion Requirements:

(13.0 credits, including 1.0 credit from 400-level courses)

NOTE: Some of the courses listed below may have prerequisites.

First Year:

1. [BIO120H1](#), [BIO130H1](#)
2. ([CHM135H1](#) and [CHM136H1](#))/ [CHM151Y1](#)
3. ([PHY131H1](#) and [PHY132H1](#))/ ([PHY151H1](#) and [PHY152H1](#))

Second Year:

1. [BCH210H1](#)
2. [BIO230H1](#)
3. [CHM220H1](#)/ [CHM222H1](#), [CHM223H1](#), ([CHM249H1](#) strongly recommended/ [CHM247H1](#))
4. [PCL201H1](#)
5. [PHC230H1](#)

Third Year:

1. [CHM217H1](#)
2. [PHC300H1](#), [PHC301H1](#), [PHC320H1](#), [PHC330H1](#), [PHC340Y1](#)

Fourth Year:

1. [PHC489Y1](#)/ [CHM499Y1](#)/ [CHM395Y1](#)
2. 2.0 credits from: [CHM317H1](#), [CHM342H1](#), [CHM347H1](#), [CHM379H1](#), [CHM410H1](#), [CHM414H1](#), [CHM417H1](#), [CHM427H1](#), [CHM440H1](#), [JPM300H1](#), [JPM400Y1](#), [PCL362H1](#), [PCL386H1](#), [PHC331H1](#), [PHC401H1](#), [PHC420H1](#), [PHC421H1](#), [PHC430H1](#), [PHC431H1](#), [PHC432H1](#), [PHC435H1](#), [PHC460H1](#), [PHC462H1](#), [PHC470H1](#), [PSL300H1](#), [PSL301H1](#)

Note that not all of the 400-level PHC courses are offered every academic year.

Physics and Philosophy Specialist (Science Program) - ASSPE2584

Physics has deep historical roots in natural philosophy and many aspects of contemporary Physics raise profound philosophical questions about the nature of reality. The interdisciplinary Physics and Philosophy Program allows the student to engage with both Physics and Philosophy at their deepest levels, and to more fully explore the connections between them.

Consult Associate Chair (Undergraduate Studies), Department of Physics or Philosophy.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(15.0 credits, including at least 1.5 credits at the 400-level)

First Year: (2.5 credits)

([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)/ [MAT157Y1](#), [MAT223H1](#)/ [MAT240H1](#), [PHY131H1](#)/ [PHY151H1](#), [PHY132H1](#)/ [PHY152H1](#) (The courses [MAT137Y1](#), [MAT223H1](#), [PHY151H1](#), [PHY152H1](#) are recommended.)

First or Second Year: (1.5 credits)

1.5 credits of: [PHL232H1](#)/ [PHL233H1](#)/ [PHL240H1](#)/ [PHL245H1](#)/ [HPS250H1](#)/ [PHL255H1](#) ([PHL245H1](#) may only be counted here if [MAT157Y1](#) is not taken)

Second Year: (3.0 credits)

[MAT237Y1](#)/ [MAT257Y1](#)/ [MAT235Y1](#), [MAT244H1](#)/ [MAT267H1](#), [PHY250H1](#), [PHY254H1](#), [PHY256H1](#) (The courses [MAT237Y1](#), [MAT244H1](#) are recommended.)

Third Year: (2.0 credits)

[MAT334H1](#)/ [MAT354H1](#), [PHY252H1](#), ([PHY350H1](#)/ [PHY354H1](#)), [PHY356H1](#)

Fourth Year: (1.0 credit)

[PHY456H1](#), [PHY491H1](#)

Any Year: (5.0 credits)

([PHL345H1](#)/ [PHL347H1](#)), [PHL355H1](#), [PHL356H1](#), ([PHL415H1](#)/ [PHL455H1](#)/ [PHL482H1](#)), plus 1.0 credit of (

PHL325H1/ PHL331H1/ PHL332H1/ PHL346H1/ PHL354H1/ PHL357H1) plus 2.0 additional PHL credits, at least 0.5 credit of which must be from Course Group 2 - Value Theory (The courses PHL265H1, PHL275H1 are recommended.)

Group 2 - Value Theory:

PHL265H1, PHL295H1, PHL365H1, PHL366H1, PHL370H1, PHL375H1, PHL407H1, PHL412H1, PHL413H1, PHL483H1

Physics Major (Science Program) - ASMAJ1944

A Physics Major program is appropriate for students interested in a more flexible and diverse undergraduate physics program. A Physics Major may be tailored to be a natural counterpart to a second Major in mathematics, astronomy, computer science, environmental science, geology or the life sciences. Students should consult the Associate Chairs (Undergraduate Studies) of Physics and the respective departments for advice on course selections.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Physics Major in the Summer after Year 2.

Completion Requirements:

(8.0 credits, including 2.0 credits at the 300+ level, with at least one 0.5 credit at the 400-level)

First Year: (2.0 credits)

(MAT135H1, MAT136H1/ MAT137Y1/ MAT157Y1, PHY131H1/ PHY151H1, PHY132H1/ PHY152H1

Second Year: (3.0 credits)

1. MAT235Y1/ MAT237Y1/ MAT257Y1, MAT223H1/ MAT240H1, PHY224H1

2. 1.0 credit from PHY231H1, PHY250H1, PHY252H1, PHY254H1, PHY256H1, PHY331H1

Third Year: (2.5 credits)

1. MAT244H1/ MAT267H1, PHY324H1/ PHY405H1/ PHY407H1/ PHY408H1

2. 1.5 credits, including at least a 0.5 credit at the PHY 400-level, from APM346H1/ MAT334H1/ MAT354H1/ PHY 300-level courses/ PHY 400-level courses/ JPE395H1/ JPE493H1, excluding JPH311H1, JPH441H1. A maximum of a 0.5 credit from APM346H1/ MAT334H1/ MAT354H1 may be used to fulfil this requirement

Third or Fourth Year: (0.5 credit)

1. Ethics and Social Responsibility Requirement: The Physics course JPH441H1 meets this requirement as well as any of the following courses: HPS200H1/ ENV222H1/ ENV333H1/ ESS205H1/ PHL273H1/ VIC172Y1/ AST310H1. See Note 2.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Notes:

1. Students in the Physics Major program who are intending to pursue graduate studies in Physics should consult with the Associate Chair (Undergraduate Studies).

2. Requirement 1 in Third or Fourth Year represents a 0.5 credit with a significant emphasis on "Ethics and Social Responsibility", in the context of the physical sciences. Students may use the CR/NCR option towards any of the courses listed in Requirement 1. Another Arts & Science course with a significant emphasis on "Ethics and Social Responsibility", in the context of the physical sciences, may be substituted subject to approval from the Associate Chair (Undergraduate Studies).

Physics Minor (Science Program) - ASMIN1944

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits)

First Year: (1.0 credit)

PHY131H1/ PHY151H1, PHY132H1/ PHY152H1

Second Year: (2.0 credits)

1. PHY224H1

2. 1.5 credits from PHY231H1, PHY250H1, PHY252H1, PHY254H1, PHY256H1

Third Year: (1.0 credit)

1. PHY324H1/ PHY405H1/ PHY407H1/ PHY408H1

2. 0.5 credit from: PHY 300-level course/PHY 400-level course/ JPE395H1/ JPE493H1, excluding JPH311H1, JPH441H1

Physics Specialist (Science Program) - ASSPE1944

The Physics Specialist Program offers rigorous training in the full spectrum of core physics subfields, as well as their numerous important applications. Practical courses treat the experimental and computational aspects and complement the lecture courses. Physics concerns many of the most fundamental questions in our scientific understanding of the universe. What is the nature of matter and energy at the smallest scales? What are the physical processes that govern the Earth's climate? What is the nature of light and how can it be controlled? How do the collective properties of solids emerge from those of individual atoms? How do biological processes organize themselves to maintain their survival? What is the structure and evolution of the Earth and the other planets? How can quantum information be used for computation? Physics seeks answers to these questions using a combination of theory, computation and precise experimental work, and the results find application across all of science.

Consult the Associate Chair (Undergraduate Studies), Department of Physics.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have

been admitted to the Physics Specialist in the Summer after Year 2.

Completion Requirements:

(13.5 credits, including 1.0 credit at the 400-level)

First Year: (2.5 credits)

(MAT135H1, MAT136H1/ MAT137Y1/ MAT157Y1, MAT223H1/ MAT240H1, PHY131H1/ PHY151H1, PHY132H1/ PHY152H1

(The courses MAT137Y1, MAT223H1, PHY151H1, PHY152H1 are recommended.)

Second Year: (4.0 credits)

MAT237Y1/ MAT257Y1/ MAT235Y1, MAT244H1/ MAT267H1, PHY224H1, PHY250H1, PHY252H1, PHY254H1, PHY256H1

(The courses MAT237Y1, MAT244H1 are recommended.)

Second or Third Year: (0.5 credit)

PHY324H1

Third Year: (3.0 credits)

1. APM346H1, MAT334H1/ MAT354H1, PHY350H1, PHY354H1, PHY356H1

2. Additional 0.5 credit from PHY 300-level courses/ PHY 400-level courses/ JPE395H1/ JPE493H1, excluding JPH311H1, JPH441H1

Third or Fourth Year: (3.5 credits)

1. PHY424H1

2. 1.0 credit from PHY450H1, PHY452H1, PHY454H1, PHY456H1, PHY460H1

3. PHY405H1/ PHY407H1/ PHY408H1/ PHY426H1/ PHY478H1. See Note 2.

4. 1.0 credit, including at least a 0.5 PHY credit at the 400-level, from PHY 300-level courses/ PHY 400-level courses/ JPE395H1/ JPE493H1, excluding JPH311H1, JPH441H1

5. Ethics and Social Responsibility Requirement: The Physics course JPH441H1 meets this requirement as well as any of the following courses: HPS200H1/ ENV222H1/ ENV333H1/ ESS205H1/ PHL273H1/ VIC172Y1/ AST310H1. See Note 3.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Notes:

1. Students are encouraged but not required to enrol in the independent study and project courses such as PHY371Y1, PHY478H1, etc.
2. PHY479Y1 (Undergraduate Research Project) satisfies Requirement 3 in Third or Fourth Year and counts as a 0.5 credit at the PHY 400-level for Requirement 4 in Third or Fourth Year. Students may use MAT351Y1 instead of APM346H1 for Requirement 1 in Third Year.
3. Requirement 5 in Third or Fourth Year represents a 0.5 credit with a significant emphasis on "Ethics and Social Responsibility", in the context of the physical sciences. Students may use the CR/NCR option towards any of the courses listed in Requirement 5. Another Arts & Science course with a significant emphasis on "Ethics and Social Responsibility", in the context of the physical sciences, may be substituted subject to approval from the Associate Chair (Undergraduate Studies).
4. The requirement for an integrative, inquiry-based activity is satisfied by the required course PHY424H1.

Synthetic & Catalytic Chemistry Specialist (Science Program) - ASSPE1377

Consult Professor R. Batey, Department of Chemistry.

This program focuses on the fundamentals and practical aspects of modern synthetic organic and inorganic chemistry, and the understanding and applications of catalytic reactions. Students will become exposed to extensive green chemistry approaches from both experimental and theoretical perspectives. The program provides preparation for career paths as synthetic/discovery chemists, in the pharmaceutical, biotechnology, biomedical, crop protection, materials and related sectors, or for academic research and teaching positions. This program is accredited by the Canadian Society for Chemistry.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol. Minimum grades in required courses or their equivalents are needed for entry, and these minimums change each year depending on available spaces and the number of applicants. The following courses must be completed:

(CHM135H1, CHM136H1)/CHM151Y1)

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 63% in any of the required courses will not be considered for admission. Please note that obtaining the minimum final grades does not guarantee admission to the program.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Synthetic & Catalytic Chemistry Specialist in the Summer after Year 2.

Completion Requirements:

(14.0 credits)

First Year: (CHM151Y1 strongly recommended)/ (CHM135H1, CHM136H1); (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1; (PHY131H1, PHY132H1)/ (PHY151H1, PHY152H1)

Second and Higher Years:

1. BCH210H1, CHM217H1, (CHM220H1/ CHM222H1, CHM223H1), CHM228H1, (CHM236H1, CHM237H1)/ CHM238Y1, (CHM249H1 strongly recommended)/ CHM247H1
2. CHM317H1, CHM338H1, CHM342H1, CHM343H1, CHM347H1, CHM348H1
3. CHM432H1, CHM440H1, CHM441H1, CHM443H1
4. CHM395Y1/ CHM499Y1/ PHC489Y1 and/or CHM397H0/ CHM398H0 in areas relevant to the program with prior approval by the Department
5. Additional 300/400-level courses from CHM, which may include courses from among CHM325H1, CHM355H1/ CHM328H1, CHM379H1, CHM416H1, CHM434H1/ CHM455H1, CHM437H1, CHM447H1 and CHM479H1 to a total of 14.0 credits.

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Courses Incorporating Data Science

Note: the following lists of courses are not exhaustive, and are chosen to illustrate the wide variety of courses teaching and incorporating data science across different disciplines. Please consult the full course listings for individual departments to find further data science-related courses.

Foundational Data Science Courses

CSC108H1 - Introduction to Computer Programming

Hours: 36L

Programming in a language such as Python. Elementary data types, lists, maps. Program structure: control flow, functions, classes, objects, methods. Algorithms and problem solving. Searching, sorting, and complexity. Unit testing. Floating-point numbers and numerical computation. No prior programming experience required.

NOTE: You may take [CSC148H1](#) after [CSC108H1](#). You may not take [CSC108H1](#) in the same term as, or after taking, any of [CSC110Y1](#)/ [CSC111H1](#)/ [CSC120H1](#)/ [CSC148H1](#).

Exclusion: [CSC110Y1](#), [CSC111H1](#), [CSC120H1](#), [CSC121H1](#), [CSC148H1](#), [CSC108H5](#), [CSC148H5](#), [CSCA08H3](#), [CSCA20H3](#), [CSCA48H3](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

EEB125H1 - Introductory Computation and Data Science for the Life and Physical Sciences

Hours: 24L/12T

Life and physical scientists increasingly use big and complex datasets to answer questions about society and the natural world. In this course, students will develop introductory programming knowledge and data acumen to explore topics drawn from biology, chemistry, physics, and psychology. Students will learn to create and run computer programs, organize ideas using data to communicate clearly to others, break a complex problem into simpler parts, apply general data science principles to specific cases, distinguish causation from correlation and

coincidence, and negotiate tradeoffs between different computational and statistical approaches.

Exclusion: [CSC111H1](#), [CSC148H1](#), [STA130H1](#), [STA238H1](#), [STA248H1](#), [STA261H1](#), [GGR274H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

ENG286H1 - Literature and Data

Hours: 24L/12T

Geared toward the interests and aptitudes of humanities students, this course provides an accessible introduction to computer programming, statistics, and data science, and equips students with the practical and theoretical skills to engage critically with literary data and computation. What new insights about literary form, history, or culture might we glean from a spreadsheet of bestsellers, a database of fan fiction, or an archive containing more novels than any individual could ever read? What gaps exist in literary datasets, and what biases are enshrined in code? No programming or statistical experience required or expected.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Exclusion: [CSC111H1](#), [CSC148H1](#), [STA130H1](#), [STA238H1](#), [STA248H1](#), [STA261H1](#), [GGR274H1](#), [EEB125H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR274H1 - Introductory Computation and Data Science for the Social Sciences

Hours: 24L/12T

Social scientists are increasingly working with big and complex datasets that contain spatial, group-level, and individual-level dimensions to answer questions about society. In this course, students will develop introductory programming knowledge and data acumen in order to create and run computer programs to explore where, when, and why social processes occur, drawing on theories from geography, linguistics, sociology, anthropology, economics, political science, and psychology. Instruction will focus on applying current data analysis libraries, communicating and translating data science methods to both researchers and the public, distinguishing causation from correlation and coincidence, and negotiating tradeoffs between different computational and statistical approaches.

Exclusion: [CSC111H1](#), [CSC148H1](#), [STA130H1](#), [STA238H1](#), [STA248H1](#), [STA261H1](#), [EEB125H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

STA130H1 - An Introduction to Statistical Reasoning and Data Science

Hours: 24L/24P

This course, intended for students considering a program in Statistical Sciences, discusses the crucial role played by statistical reasoning in solving challenging problems from natural science, social science, technology, health care, and public policy, using a combination of logical thinking, mathematics, computer simulation, and oral and written discussion and analysis.

Corequisite: MAT135H1/ MAT136H1/ MAT137Y1/ MAT157Y1, (CSC108H1/ equivalent programming experience/ CSC110Y1/ CSC148H1 *Note: the corequisite may be completed either concurrently or in advance.

Exclusion: Any of STA220H1/ STA255H1/ STA238H1/ STA248H1/ STA261H1/ ECO220Y1/ ECO227Y1/ STAB22H3/ STA220H5/ STAB57H3/ STA258H5/ STA260H5/ ECO220Y5/ ECO227Y5/ STAA57H3 taken previously or concurrently

Breadth Requirements: The Physical and Mathematical Universes (5)

Data Science in the Humanities

DHU338H1 - Data: Access, Creation, Curation, and Interpretation

Previous Course Number: WDW338H1

Hours: 24L/12P

A central challenge of digital humanities is the complexity of representing interpretive, narrative, and perspective-dependent humanities data through digital tools and environments. Topics include the history of “data” as term and concept; data standards, databases, and linked data; datasets, data curation and analytics, both qualitative and quantitative; and data visualization.

Prerequisite: DHU235H1 and DHU236H1; open to students not taking the Digital Humanities Minor by permission of the program coordinator.

Exclusion: WDW338H1

Breadth Requirements: Creative and Cultural Representations (1)

ENG287H1 - The Digital Text

Hours: 24L/12T

This course explores the stakes and consequences of literature’s transition from printed to digital forms. How do digital and printed texts differ materially, and how does this affect literary form, authorship, consumption, reception — and society more broadly? What new expressive possibilities are present in “born digital” forms like webcomics, fan fiction, interactive fiction, and videogames? How do social media and online reading communities impact the way that literature is marketed and discussed? Will electronic archives make literature more accessible, or less? How do digital texts challenge existing definitions of what counts as “literature”?

Prerequisite: 1.0 ENG credit or any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

LIN405H1 - Advanced Quantitative Methods in Linguistics

Hours: 36L

This course introduces advanced statistical modeling techniques using the statistical software R, tailored specifically to the needs of linguistic research.

Prerequisite: LIN305H1

Breadth Requirements: Thought, Belief and Behaviour (2)

NMC268H1 - Data Science Applications in Archaeology

Hours: 12L/12P/12S

Digital technology and the growth of “big data” are transforming not only the ways in which archaeologists present and communicate their research, but also increasingly the ways they collect and analyze data. This course uses underlying concepts from the emerging field of data science and helps students develop hands-on skills in various critical techniques in archaeological data analysis and modelling, focusing on case studies from the Near East.

Prerequisite: 3.0 credits at the 100-level.

Breadth Requirements: Society and its Institutions (3)

Data Science in the Social Sciences

ECO220Y1 - Introduction to Data Analysis and Applied Econometrics

Hours: 48L/48T

Numerical and graphical data description; data collection and sampling; probability; sampling distributions; statistical inference; hypothesis testing and estimation; simple and multiple regression analysis (extensive coverage). Learn how to analyze data and how to correctly interpret and explain results. Use Excel to analyze a wide variety of data and replicate tables and figures in economics research papers.

Prerequisite: (ECO101H1(63%), ECO102H1(63%))/ ECO105Y1(80%)/ ECO100Y5(67%)/ (ECO101H5(63%), ECO102H5(63%))/ (MGEA02H3(67%), MGEA06H3(67%)); MAT133Y1/ (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

Exclusion: GGR270H1, IRW220H1, PSY201H1, PSY202H1, SOC202H1, SOC252H1, STA220H1, STA221H1, STA248H1, ECO220Y5, MGEB11H3, MGEB12H3

Breadth Requirements: Society and its Institutions (3), The Physical and Mathematical Universes (5)

ECO225H1 - Big-Data Tools for Economists

Hours: 24L/12T

An introduction to the big-data tools—including Machine-Learning techniques—economists increasingly use in applied research. The course explores unstructured data sources such as text files, webpages, social media posts, satellite imagery, and weather data. It offers a practical introduction to creating datasets from these sources (e.g., web scrapping), linking data, and managing and visualizing them (e.g., geospatial visualization).

Prerequisite: (ECO101H1(63%), ECO102H1(63%))/ ECO105Y1(80%)/ ECO100Y5(67%)/ (ECO101H5(63%), ECO102H5(63%))/ (MGEA02H3(67%), MGEA06H3(67%)); MAT133Y1(63%)/ (MAT135H1(60%), MAT136H1(60%))/ MAT137Y1(55%)/ MAT157Y1(55%); CSC108H1/ CSC110Y1/ CSC148H1

Exclusion: CSC311H1, ECO250Y0 (Special Topics Abroad in Economics: Big Data Tools and Machine Learning for Economists) taken in Summer 2023, ESC190H1, JSC270H1, STA314H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ECO424H1 - Topics in Experimental Economics

Hours: 24L/12T

Experimental Economics is a relatively new and very exciting field in economics. While most data used in economics is observational, experimentalists use controlled environments to study various economic issues: from individual decision making, to interaction in games and markets, to asset markets and even macroeconomic issues. In this “hands on” course, students read the background literature in a few areas of current academic research, design and conduct human-subject experiments, ultimately submitting a paper where they draw conclusion from their analysis of real data.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level.

Exclusion: ECO421H1 (Special Topics in Economics: Experimental Economics), taken Fall 2020 and Fall 2022.

Recommended Preparation: ECO316H1/ ECO326H1

Breadth Requirements: Society and its Institutions (3)

ECO482H1 - Machine Learning Applications in Macroeconomic Finance

Hours: 24L/12T

This course introduces students to machine learning concepts and techniques, focusing on applications in macroeconomic finance. In the first part we review supervised and unsupervised machine-learning methods. In the second part, we focus on various questions and topics in macro-finance where the use of machine learning is increasingly common. Hands-on use of these techniques to solve economic problems in macro-finance will prepare students for more advanced machine learning courses.

Prerequisite: CSC108H1/ CSC110Y1/ CSC148H1, ECO200Y1/ ECO204Y1/ ECO206Y1, ECO202Y1/ ECO208Y1/ ECO209Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level.

Exclusion: CSC311H1, STA314H1, ECO481H1 (*Special Topics in Economics with Data Analytics: Macroeconomic Finance with Machine Learning Applications*) taken in Fall 2022 or Winter 2023.

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR272H1 - Geographic Information and Mapping I

Hours: 24L/24P

Introduction to digital mapping and spatial analysis using geographic information systems (GIS). Students learn how to use GIS software to find, edit, analyze and map geographic data to create their own maps, analyze geographic problems and use techniques that can be applied to a variety of subject areas.

Exclusion: [GGRB30H3](#), [GGR278H5](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR375H1 - Introduction to Programming in GIS

Hours: 24L

This course will introduce students to the fundamentals of programming, followed by an applied focus on using these skills in geographic information systems. Students will learn how to programmatically edit spatial data, automate common processes, and conduct complex spatial analyses. The course will emphasize open-source software that enriches geospatial data analysis alongside the data processing and analytical capabilities of existing GIS software. Classroom time will be a mix of short lectures and laboratory exercises.

Prerequisite: 8.0 credits including [GGR272H1](#)/[GGR274H1](#)

Exclusion: [GGR386H1](#) (Special Topics in Geographic Information Systems: Programming in GIS), offered in Fall 2019 and Winter 2021

Recommended Preparation: One of [CSC108H1](#)/[GGR273H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR376H1 - Geovisualization

Hours: 24L

Visualizing geographic information forms an important step in aiding visual thinking, generating hypotheses, and communicating findings relating to places. Geovisualization not only involves the display of spatial data through static maps, but also the process of creating 3D, dynamic, or interactive visualizations for data exploration, insights, and analysis. This course will introduce the foundations and capabilities of geovisualization for scientific communication, and

students will learn techniques and tools to develop and critically appraise a range of geovisual outputs.

Prerequisite: 8.0 credits including [GGR272H1](#)/[GGR274H1](#)

Exclusion: [GGR386H1](#) (Special Topic: Geovisualization), offered in Fall 2022

Recommended Preparation: [GGR273H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

Course Experience: University-Based Experience

GGR377H1 - Introduction to Urban Data Analytics

Hours: 24L/12P

This course draws on census and economic data collection, processing, and analysis to teach written and visual storytelling about cities with data and maps, while exploring the uses of real-time data and analytics to solve urban problems. It provides a socio-economic and political context for the use of big data and the smart cities movement, focusing on data ethics and governance.

Prerequisite: 8.0 credits

Recommended Preparation: [GGR270H1](#)/[ECO220Y1](#)/[ECO227Y1](#)/[EEB225H1](#)/[GGR270Y1](#)/[LIN305H1](#)/[POL222H1](#)/[POL242Y1](#)/[PSY201H1](#)/[SOC202H1](#)/[STA220H1](#)/[STA248H1](#)/[STA250H1](#)/[STA261H1](#), [GGR272H1](#), [GGR274H1](#)

Breadth Requirements: Society and its Institutions (3)

GGR472H1 - Developing Web Maps

Hours: 24L

Explores the power of web mapping and CyberGIS, with a focus on hands-on learning and open source software. Students will learn about relevant software (exploring various APIs), data structures, methods, and cartographic and visualization techniques. Finally, students will work in groups to develop and deliver their own online web maps from scratch, on a topic of their choosing.

Prerequisite: 10.0 credits including [GGR272H1](#) and one of [GGR273H1](#) or [GGR274H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

GGR473H1 - Geospatial Big Data

Hours: 24L

Advances in sensing and mobile technologies have contributed to the increasing availability of large volume georeferenced data such as geo-tagged social media content, GPS traces, and crowdsourced maps. While geospatial big data provide a major source for innovation and analysis, challenges relating to data handling, processing, and interpretation have simultaneously arisen. In this course, students will build a critical understanding of the evolution, potential, and biases of geospatial big data. Knowledge of geo-computational techniques to handle geospatial big data and perform meaningful analysis will also be developed and applied.

Prerequisite: 10.0 credits including one of GGR272H1 or GGR274H1

Exclusion: GGR401H1 (Special Topic: *Geospatial Big Data*), offered in Fall 2022

Recommended Preparation: GGR273H1

Breadth Requirements: Society and its Institutions (3)

RSM371H1 - Data and Information Management for Business Analytics

Previous Course Number: RSM312H1

Hours: 24L

This course focuses on the fundamentals of data management for the purposes of producing information and supporting advanced techniques of business analytics. This applied learning course will expose the learner to a broad range of technical skills that are required to access, prepare and visualize data for advanced analysis. The course introduces the fundamental skills that form the foundation in the development of advanced business analytics.

Prerequisite: CSC108H1

Exclusion: RSM312H1 (Data and Information Management for Business Analytics), offered in Winter 2020, 2021, 2022, 2023

Recommended Preparation: Python for Business, e.g., <http://apps.rotman.utoronto.ca/RotmanEvents/EventDetails.aspx?eid=27258>

Breadth Requirements: Society and its Institutions (3)

RSM384H1 - Sports Analytics

Hours: 24L

This course applies concepts of analytic management and data analysis to the sports world. The class is intended to deepen the students' ability to apply econometric skills from ECO220Y1. Particular emphasis is given to player management, "on the field" decisions and giving the students the opportunity to do their own analysis while learning frontier techniques. The class will introduce students to some basics of coding and econometric

analysis in R. No prior coding experience is required, but basic coding will be necessary and the course provides students with new or deepened skills in that area.

Prerequisite: ECO220Y1/ ECO227Y1/(STA220H1, STA255H1)/(STA237H1, STA238H1)/(STA257H1, STA261H1)

Exclusion: RSM314H1 (Special Topics in Management: Sports Analytics), offered in Winter 2019/Winter 2020/Winter 2021

Breadth Requirements: The Physical and Mathematical Universes (5)

Data Science in the Life Sciences

EEB313H1 - Quantitative Methods in R for Biology

Hours: 24L/24P

The quantitative analysis and management of biological data is crucial in modern life sciences disciplines. Students will develop skills with R as applied to problems in ecology and evolutionary biology to learn reproducible approaches for data management, data manipulation, visualization, modelling, statistical analysis, and simulation for solving biological problems.

Prerequisite: BIO220H1, EEB225H1/ STA288H1/ STA220H1

Exclusion: STA130H1, PSY305H1

Recommended Preparation: CSC108H1/ CSC120H1/ CSC121H1

Breadth Requirements: The Physical and Mathematical Universes (5)

PSY305H1 - The Treatment of Psychological Data

Hours: 36L

This course provides a practical yet intensive introduction to the research pipeline, with a focus on research data management and advanced statistical analysis and inference. Students learn how to find, organize, and analyze data sets in a transparent and reproducible way. Students also learn more about statistical inference, focusing on how the design and analysis of data shape the interpretation of results.

Prerequisite: PSY202H1/ ECO220Y1/ SOC252H1/ STA221H1/ ECO220Y5/ PSY202H5/ STA221H5/ PSYC08H3/ STAB27H3/ STAC32H3

Exclusion: EEB313H1

Breadth Requirements: The Physical and Mathematical Universes (5)

PSY474H1 - Computation in Psychology

Hours: 36L

This lecture course surveys computational perspectives on the mind and brain and introduces computational tools for connecting psychological and neural data to theory. Topics may include neural networks, probabilistic models, pattern recognition, and other techniques applicable to psychological research and general analysis. Basic familiarity with programming is recommended but not required.

Prerequisite: PSY202H1/ ECO220Y1/ SOC252H1/ STA221H1/ ECO220Y5/ PSY202H5/ STA221H5/ PSYC08H3/ STAB27H3/ STAC32H3

Breadth Requirements: The Physical and Mathematical Universes (5)

Data Science in the Mathematical and Physical Sciences

ENV338H1 - Environmental Research Data and Decision-making

Hours: 24L/12T

Understanding the natural world and human perturbations to it requires data. All data has inherent biases and constraints. In this class we will explore the world of environmental data from the perspective of those interested in affecting positive change. The class will use case studies and current research to explore topics such as: How do environmental scientists design studies or experiments to answer specific questions? How do we characterize the limitations of the data we have and work within these constraints to answer scientific questions and make informed and meaningful decisions?

Prerequisite: Completion of 8.0 credits including ENV221H1/ ENV222H1 and ENV223H1.

Students who do not meet the prerequisites are encouraged to contact the Undergraduate Associate Director.

Corequisite: None

Exclusion: None

Recommended Preparation: GGR274H1 or EEB125H1 or ENG286H1

ESS245H1 - Computational Geology

Previous Course Number: ESS345H1

Hours: 24L/1T/30P

A practical introduction to programming. This course will teach an operational knowledge on how to write and execute self written computer programs. Course topics touch upon using a computer without a graphical interface, using an integrated development environment, programming, documenting, debugging, reading and writing data, graphical output, how to navigate existing documentation and internet resources, and last but not least how to effectively ask for help. Students will work individually and in small groups in an inverted classroom setting on earth science related problem sets. Previous programming experience is not required.

Prerequisite: 1.0 credit from first-year math, or physics courses except MAT193H1, MAT198H1, MAT199H1, PHY196H1, PHY197H1, PHY198H1, PHY199H1

Exclusion: CSC108H1, ESS345H1

Breadth Requirements: The Physical and Mathematical Universes (5)

MAT245H1 - Mathematical Methods in Data Science

Hours: 36L/24P

An introduction to the mathematical methods behind scientific techniques developed for extracting information from large data sets. Elementary probability density functions, conditional expectation, inverse problems, regularization, dimension reduction, gradient methods, singular value decomposition and its applications, stability, diffusion maps. Examples from applications in data science and big data.

Prerequisite: MAT137Y1/ MAT157Y1, MAT223H1/ MAT240H1, MAT224H1/ MAT247H1

Corequisite: MAT237Y1/ MAT257Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

PHY407H1 - Computational Physics

Hours: 12L/36P

This is an introduction to scientific computing in physics. Students will be introduced to computational techniques used in a range of physics research areas. By considering select physics topics, students will learn basic computational methods for function analysis (computing integrals and derivatives; finding roots and extrema), resolution of linear and non-linear equations, eigenvalue problems, Fourier analysis, ODEs, PDEs and Monte Carlo

techniques. As the course progresses, students will develop their skills at debugging, solution visualization, computational efficiency and accuracy. The course is based on python and will involve working on a set of computational labs throughout the semester as well as a final project.

Prerequisite: PHY224H1, PHY250H1/ PHY252H1/
PHY254H1/ PHY256H1, MAT235Y1/ MAT237Y1/
MAT257Y1

Corequisite: Any 300/ 400-level lecture course in Physics (PHY/ JPE)

Breadth Requirements: The Physical and Mathematical Universes (5)

Introduction

Interdisciplinary program

Where is home? Need it be in one place? Is it always attached to territory? Diaspora and transnational studies examines the historical and contemporary movements of peoples and the complex problems of identity and experience to which these movements give rise as well as the creative possibilities that flow from movement. The program is comparative and interdisciplinary, drawing from the social sciences, history and the arts. Students are required to take a yearlong course that offers an introduction to a broad array of themes and disciplinary methodologies. The program offers a wide selection of additional courses, giving students the opportunity to learn about a range of diasporic communities as well as key debates in the field.

Centre for Diaspora and Transnational Studies
170 St. George Street, room 230
Toronto, ON M5R 2M8
Phone: 416-946-7177
Email: cdts.admin@utoronto.ca
Website: www.cdts.utoronto.ca

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Diaspora and Transnational Studies programs impacted by this policy: [ASMAJ1407](#) and [ASMIN1407](#)

Diaspora and Transnational Studies Programs

Diaspora & Transnational Studies Major (Arts Program) - ASMAJ1407

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(7.0 credits, including at least 2.0 credits at the 300+ level)

1. [DTS200H1/ DTS200Y1](#)
2. 1.0 DTS credit at the 300-level, including [DTS300H1](#)
3. 4.5 credits from Group A and B courses, with at least two credits from each group. Coverage must include at least two diasporic communities or regions, to be identified in consultation with the program advisor.
4. 1.0 DTS credit at the 400-level

Group A: Humanities Courses

Regarding Diaspora and Transnational Studies Courses

University of Toronto Mississauga courses that can be applied to the program

<https://utm.calendar.utoronto.ca/section/Diaspora-and-Transnational-Studies>

Diaspora and Transnational Studies Courses

DTS199H1 - Superman and Other Migrants

Hours: 24S

From the 1938 debut of Superman until the spate of recent autobiographical graphic novels by immigrants and children of immigrants, the development of the comic and graphic novel form has been intricately bound up with the diaspora experience. In this course, we will explore the emergence of the superhero from the immigrant experience; trace the depiction of migrants, immigrants and refugees in recent graphic novels; and study visual strategies for representing migration and displacement. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

DTS200H1 - Introduction to Diaspora and Transnational Studies

Previous Course Number: DTS200Y1

Hours: 24L

What is the relationship between place and belonging, between territory and memory? How have the experiences of migration and dislocation challenged the modern assumption that the nation-state should be the limit of identification? What effect has the emergence of new media of communication had upon the coherence of cultural and political boundaries? All of these questions and many more form part of the subject matter of Diaspora and Transnational Studies. This introductory course ex-amines the historical and contemporary movements of peoples and the complex issues of identity and experience to which these processes give rise as well as the creative possibilities that flow from movement and being moved. The area of study is comparative and interdisciplinary, drawing from the social sciences, history, the arts and humanities. Accordingly, this course provides the background to the subject area from diverse perspectives and introduces students to a range of key debates in the field, with particular attention to questions

of history, globalization, cultural production and the creative imagination.

Exclusion: [DTS200Y1](#), [DTS201H5](#) and [DTS202H5](#)

Breadth Requirements: Society and its Institutions (3)

DTS300H1 - Qualitative and Quantitative Reasoning

Hours: 24L

Focuses on research design and training in methods from history, geography, anthropology, literary and cultural studies, and other disciplines appropriate to Diaspora and Transnational Studies. Prepares students to undertake primary research required in senior seminars.

Prerequisite: Completion of 9.0 credits

Recommended Preparation: [DTS200H1/ DTS200Y1/ CJS200H1/ CJS201H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

DTS305H1 - Special Topics in Diaspora and Transnational Studies

Hours: 24L

An upper level course. Topics of study vary from year to year.

Prerequisite: Completion of 9.0 credits

Recommended Preparation: [DTS200H1/ DTS200Y1](#)

Breadth Requirements: Society and its Institutions (3)

DTS310H1 - Transnational Toronto

Hours: 24L

Toronto is a city increasingly configured through transnational connections and practices. It is a city defined by the scale at which its residents live their lives; a scale that is no longer (if it ever was) parochial, but extends across time and space to connect people and practice across a multitude of locales. Contemporary understandings of Toronto can only be reached through adopting a transnational lens. This course will examine the processes that have produced Toronto as a transnational city over time, including the dynamics of immigration and mobility, experiences of alienation, the global extension of capitalism, and the (re)formation of communities grounded in the complex dynamics of identities produced in a space that is both 'home' and away'. We will also explore the specific practices, and connections that produce "Toronto" as a space that

transcends its physical geographic boundaries and is continually reproduced in and through the flows of people, capital, objects, ideas, - and the many forces that reproduce and reconfigure these flows.

Prerequisite: Completion of 9.0 credits

Recommended Preparation: [DTS200H1/ DTS200Y1](#)

Breadth Requirements: Society and its Institutions (3)

DTS311H1 - Fun in Diaspora

Hours: 24L

From parkour to "Baby Shark" remixes, concepts and practices surrounding fun, entertainment, and pleasure transcend cultural boundaries, reveal the reach of globalization, and help facilitate the maintenance of transnational communities through shared activities. This course will examine these relationships with fun, and we will also assess cases where concepts of fun diverge and clash in intercultural contexts. Additionally, the class will consider the relationship between entertainment practices and politics, marketing, and social movements. Cases examined will include K-pop fandom, bucket challenges, social media memes, and global YouTube phenomena.

Recommended Preparation: [DTS200H1/ DTS200Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

DTS312H1 - Exile

Hours: 24S

Historically used to describe both voluntary departure and enforced banishment from a city, today, "Exile" is perhaps most famously associated with both the Jewish and the Palestinian condition. But exile is also a state of being, one that is creative, critical, and full of meaning-making. This class posits "Exile" as a conceptual framework through which to think through the 21st-century condition of migration and diaspora. Through foundational texts and historic case studies, particularly drawn from East Africa, South Asia, and the Middle East, we will consider how exile has been deployed in order to bring together diverse situations under a unifying theory of both individual and collective experience.

Recommended Preparation: [DTS200H1/ DTS200Y1](#)

Breadth Requirements: Society and its Institutions (3)

DTS314H1 - Citizenship and Multiculturalism

Hours: 24S

This course examines approaches to belonging and distinction that accompany different models of citizenship. What are some historical and recent trends in the intersections of place, custom, and rights? How have governments related social diversity to social justice in theory and in practice? Areas of emphasis will vary, but may include topics such as authenticity and assimilation; ethno-nationalism; immigration and naturalization policy; indigeneity; insurgency; legacies of colonialism; mass media and popular culture; policing and surveillance; racial stratification; transnational markets; and xenophobia.

Recommended Preparation: [DTS200H1/ DTS200Y1](#)
Breadth Requirements: Society and its Institutions (3)

DTS315H1 - Marriage and Family across Nations, Diasporas, and Boundaries

Hours: 12L/12S

How do migration and resettlement affect marriage and family life? This course will explore marital, familial, sexual, and other relational aspects of diaspora and migration, examining how marriage and family become tools for maintaining cultural traditions and gender hierarchies but are also areas of life where negotiation, creativity, and rebellion occur. Transnational in its scope, the course will investigate how marriage and family involve choices but also constraints imposed by communities, cultures, religions, and nation-states. A primary objective of this course will be to interrogate how marriage and family relations consist of choices and constraints that are experienced, celebrated, lamented, and resisted. The class will draw on interdisciplinary approaches and present case studies from a variety of diasporic communities in Canada and other migration contexts.

Recommended Preparation: [DTS200H1/ DTS200Y1](#)
Breadth Requirements: Society and its Institutions (3)

DTS316H1 - Filth: Dirt and Dehumanization in Transnational Perspective

Hours: 12L/12S

This class will draw on research from anthropology, religious studies, environmental studies, and other fields to examine transnational, cross-cultural, and diasporic perspectives on filth and dirt and how these concepts are deployed to create and reinforce social hierarchies in a multitude of global contexts. Discussions will address such topics as colonial encounters and otherization through ideas of cleanliness; the weaponization of filth in transnational practices of violence; the commercialization

and exportation of trash from wealthy nations to the global south; migrants, cleaning/cleanliness, and dehumanization; and impurity, gender, and sexuality in diaspora communities.

Recommended Preparation: [DTS200H1/ DTS200Y1](#)
Breadth Requirements: Society and its Institutions (3)

JQR360H1 - The Canadian Census: Populations, Migrations and Demographics

Hours: 24L/12T

Examines the Canadian population census through the experience of diasporic groups in Canada. Approaches the census as a statistical tool, an historical source and an ideological project of citizenship and nationalism. Uses census data to explore mathematical and statistical concepts and to integrate numerical ways of thinking with qualitative analysis. (Jointly sponsored by African Studies, Diaspora and Transnational Studies, Caribbean Studies, Critical Studies in Equity and Solidarity, and Latin American Studies).

Prerequisite: [DTS200H1/ DTS200Y1/ HIS230H1/ HIS231H1/ LAS200H1/ LAS201H1/ CAR120Y1/ AFR150Y1/ CAR220H1/ CAR221H1/ NEW224Y1/ CAR225H1/ CAR226H1/ CSE240H1/ NEW240Y1](#)
Breadth Requirements: Society and its Institutions (3)

DTS390H1 - Independent Study

A scholarly project chosen by the student, approved by the Department, and supervised by one of its instructors. Consult with the Diaspora and Transnational Studies Program Office for more information. Not eligible for CR/NCR option.

Prerequisite: [DTS200H1/ DTS200Y1](#)

DTS390Y1 - Independent Study

A scholarly project chosen by the student, approved by the Department, and supervised by one of its instructors. Consult with the Diaspora and Transnational Studies Program Office for more information. Not eligible for CR/NCR option.

Prerequisite: [DTS200H1/ DTS200Y1](#)

DTS401H1 - Advanced Topics in Diaspora and Transnationalism

Hours: 24S

An in-depth investigation of topics in Diaspora and Transnationalism. Content in any given year depends on instructor. Refer to the Centre for Diaspora and Transnational Studies website (<https://www.cdts.utoronto.ca/undergraduate/undergraduate-program/current-undergraduate-courses>) for more information.

Prerequisite: 14.0 credits including DTS200H1/DTS200Y1

Breadth Requirements: Society and its Institutions (3)

DTS402H1 - Advanced Topics in Diaspora and Transnationalism

Hours: 24S

An in-depth investigation of topics in Diaspora and Transnationalism. Content in any given year depends on instructor. Refer to the Centre for Diaspora and Transnational Studies website (<https://www.cdts.utoronto.ca/undergraduate/undergraduate-program/current-undergraduate-courses>) for more information.

Prerequisite: 14.0 credits including DTS200H1/DTS200Y1

Breadth Requirements: Society and its Institutions (3)

DTS403H1 - Advanced Topics in Diaspora and Transnationalism

Hours: 24S

An in-depth investigation of topics in Diaspora and Transnationalism. Content in any given year depends on instructor. Refer to the Centre for Diaspora and Transnational Studies website (<https://www.cdts.utoronto.ca/undergraduate/undergraduate-program/current-undergraduate-courses>) for more information.

Prerequisite: 14.0 credits including DTS200H1/DTS200Y1

Breadth Requirements: Society and its Institutions (3)

DTS404H1 - Advanced Topics in Diaspora and Transnationalism

Hours: 24S

An in-depth investigation of topics in Diaspora and Transnationalism. Content in any given year depends on instructor. Refer to the Centre for Diaspora and Transnational Studies website (<https://www.cdts.utoronto.ca/undergraduate/undergraduate-program/current-undergraduate-courses>) for more information.

Prerequisite: 14.0 credits including DTS200Y1/CJS200H1/CJS201H1

Breadth Requirements: Society and its Institutions (3)

DTS405H1 - Advanced Topics in Diaspora and Transnationalism

Hours: 24S

An in-depth investigation of topics in Diaspora and Transnationalism. Content in any given year depends on instructor. Refer to the Centre for Diaspora and Transnational Studies website (<https://www.cdts.utoronto.ca/undergraduate/undergraduate-program/current-undergraduate-courses>) for more information.

Prerequisite: 14.0 credits including DTS200H1/DTS200Y1

Breadth Requirements: Society and its Institutions (3)

DTS406H1 - Advanced Topics in Diaspora and Transnationalism

Hours: 24S

An in-depth investigation of topics in Diaspora and Transnationalism. Content in any given year depends on instructor. Refer to the Centre for Diaspora and Transnational Studies website (<https://www.cdts.utoronto.ca/undergraduate/undergraduate-program/current-undergraduate-courses>) for more information.

Prerequisite: 14.0 credits including DTS200H1/DTS200Y1

Breadth Requirements: Society and its Institutions (3)

DTS410H1 - Diasporic Foodways

Hours: 24S

Food links people across space and time. As it spirals outward from parochial sites of origin to articulate with new sites, actors and scales, it assumes new substance and meaning in new locales. This movement of food gives rise to new 'foodways' to help us to understand the past in terms of temporally connected sites of intense interaction. Food also plays a strong role in shaping translocal identities. As peoples have moved in the world, food has played a central role in (re)defining who they are, reproducing myth and ritual, and bounding diasporic communities. This course seeks to address questions surrounding the dynamics of the food 'we' eat, the ways in which 'we' eat, the meaning 'we' give to eating, and the effect of eating in a transnational world. Recognizing that culinary culture is central to diasporic identifications, the focus is on the place of food in the enduring habits, rituals, and everyday practices that are collectively used to produce and sustain a shared sense of diasporic cultural identity.

Prerequisite: 14.0 credits including [DTS200H1/](#)[DTS200Y1](#)

Breadth Requirements: Society and its Institutions (3)

DTS411H1 - Transnational Justice

Hours: 24S

This course explores the intersection between local conceptions of justice and their transnational and institutional circulations. It interrogates competing meanings of justice and examines the varied practices of actors engaged in justice making domains. From international human rights, to transitional justice and truth and reconciliation, to international legal and traditional justice formulations, the course offers students an opportunity to learn about and critically reflect on the processes and purposes through which justice conceptions are structured, implemented and being contested in the contemporary period. Topics include: theories of transnationalism, transnational justice, social injustice, law and culture, universalism, racism and social inequality.

Prerequisite: 14.0 credits including [DTS200H1/](#)[DTS200Y1](#)

Breadth Requirements: Society and its Institutions (3)

DTS412H1 - The Diasporic Imagination

Hours: 24S

This course focuses on echoes of diasporic and transnational life in artistic work, and on the significance of aesthetic production to the formation of diasporic and transnational worlds. How have practices, producers, and works of art illuminated the particularities of diasporic life? How do conventions of genre, performance, and tradition

shape experiences of borders and crossings? Areas of emphasis will vary but may spotlight particular historical and geographic contexts, and may foreground one or more form, including film, poetry, fiction, music, and dance.

Prerequisite: 14.0 credits including [DTS200H1/](#)[DTS200Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

DTS413H1 - Global Sexualities

Hours: 24S

Sexuality is a complex interplay of desires, attractions, interests, and modes of behavior and has diverse meanings in different societies and cultures. In this course, we will examine the notion of sexuality as well as gender identity and expression from an interdisciplinary perspective that is rooted in ethnography. A cross-cultural study of sexuality and gender identity within global and transnational contexts will provide students with an understanding of how the intersections of culture, community, as well as social and political factors affect individuals' sexual choices and understandings of gender. A particular focus in this course will be experiences of sexuality and gender within diasporic communities.

Prerequisite: 14.0 credits including [DTS200H1/](#)[DTS200Y1/](#)[SDS380H1](#)

Breadth Requirements: Society and its Institutions (3)

DTS414H1 - Money on the Move

Hours: 24S

In the eighteenth and nineteenth centuries, industry and finance matured together, pushing people into motion around the world. The instruments of long-distance trade, like insurance, credit and debt, connected cities and continents in new and sometimes unsettling ways. The free movement of goods and cash was mirrored by restrictions on migration to some parts of the world and by forced or coerced migration to others. This course explores the history of the rise of global capitalism at a human scale, exploring how financialization, industrialization and imperialism overlapped and intertwined, and how the remaking of the world in the image of capital weighed on human lives.

Prerequisite: 14.0 credits including [DTS200H1/](#)[DTS200Y1](#)

Breadth Requirements: Society and its Institutions (3)

DTS415H1 - Diaspora at Home

Hours: 24S

What is the relationship between diaspora and domesticity? What does it mean to inhabit the position of the stranger not in the public life of the city, but in the private sphere of the household? This course approaches questions of migration, labour, and foreignness through the prism of the home. We consider the international phenomenon of migrant domestic labour and how it shapes social and family relations, both in countries of origin such as the Philippines and Ethiopia, as well as in countries of employment such as Canada and Lebanon. But we also reflect on how migration radically transforms life inside the home, affecting what it means to be a parent, a child, or a partner. In doing so we draw upon diverse representations of “the family”, kinship, and intimacy across both the humanities and the social sciences.

Prerequisite: 14.0 credits including [DTS200H1/](#)[DTS200Y1](#)

Breadth Requirements: Society and its Institutions (3)

DTS416H1 - Wars, Diaspora and Music

Hours: 24S

The course explores how composers, performers, songwriters and audiences made sense of traumatic and violent events that they experienced, such as ethnic conflicts, wars, exile and displacement, through music. We will also look at how government ideologies employ music during wars. The case studies will include stories of Jewish, Palestinian, Afghan, Romani, Korean, Rwandan and other diasporas severely affected by wars and violence.

Prerequisite: 14.0 credits including [DTS200H1/](#)[DTS200Y1](#)

Breadth Requirements: Society and its Institutions (3)

DTS417H1 - 9 to 5: A Transnational History of the Working Day

Hours: 24S

Work is a central preoccupation in human life and culture, and the working day – measured in daylight, in shifts, or in tasks and ‘gigs’ – is, for most people, the basic unit of work. A ‘day’s work’ is so ubiquitous that it seems natural – but it is not – the offices, worksites, hourly wages and everyday forms of discipline and surveillance that shape working lives have a history. This course explores the transnational and diasporic histories of working life, from

plantations to factories to offices to informal work at the margins of global industrial capitalism.

Prerequisite: 14.0 credits including [DTS200H1/](#)[DTS200Y1](#)

Breadth Requirements: Society and its Institutions (3)

DTS418H1 - Violence and Memory: Transnational Approaches

Hours: 12L/12S

Nation-states not only perpetrate mass violence regularly but also pivotally shape how that violence is remembered and memorialized. In doing this, they shape how communities heal or do not heal from violence. Memorializing violence is also tied to how states both make violence endemic and draw upon violence that may already be endemic within particular social contexts. This class will examine these phenomena in transnational and transhistorical perspective, focusing on case studies spanning different historical eras and various continents. These comparisons will reveal differences and linkages between the formation, utilization, and weaponization of memory in widely divergent contexts.

Prerequisite: 14.0 credits including [DTS200H1/](#)[DTS200Y1](#)

Breadth Requirements: Society and its Institutions (3)

DTS419H1 - History and Counterstories in the Black Mediterranean

Hours: 12L/12S

This course explores colonial histories and counter-stories of resistance in the Black Mediterranean. Intended not only as a physical space but also as a symbolic site, the Black Mediterranean can be seen as a new theoretical approach useful to understand the racialized production of bodies and borders, and to highlight forms of resistance. The course will focus on Italy and its (post)colonial ties with Libya, Eritrea, Ethiopia and Somalia. Going from the Italian invasion of Eritrea in 1890 to the current so-called “refugee crisis”; the case of Italy illustrates the intersections and resignification of race, bodies and borders in the Mediterranean region, as well as the presence of important histories of resistance and alternative conceptualisations of belonging.

Prerequisite: 14.0 credits including [DTS200H1/](#)[DTS200Y1](#)

Introduction

The undergraduate program at the Centre for Drama, Theatre, and Performance Studies (CDTPS) offers a unique combination of rich and rigorous scholarship with high standards of practical training. The program provides students with an integrated set of critical and artistic skills through which to engage with broader intellectual, social, and political issues in the Humanities and beyond. Along with courses in theatre and performance theory and history, dramatic literature, dramaturgy, technology, and practice-based lab courses, the Centre offers introductory and advanced studio courses in acting, production, design, directing, and playwriting. The Digital Dramaturgy Lab (squared) (DDL) 2 and the newly founded BMO Lab in Creative Research in the Arts, Performance, Emerging Technologies and AI, with their international scope and interdisciplinary approach, present the students with a unique opportunity to develop projects exploring the use of new technologies in the context of the performing arts.

The Centre's undergraduate program has access to two theatres (the Helen Gardiner Phelan Playhouse and Luella Massey Studio Theatre) and a number of performance and rehearsal spaces available to CDTPS students and faculty. In July 2025, we are moving into a newly renovated state-of-the-art facility in University College's north wing with a contemporary rehearsal studio, reconfigurable black box theatre, comfortable student lounge areas, ultramodern seminar rooms and hoteling workspaces, and a highly sophisticated studio space for our BMO Lab for Creative Research in the Arts, Performance, Emerging Technologies and AI.

Students graduating from our program have combined majors in the Humanities, Social Sciences, and Sciences, including English, Women and Gender Studies, Cinema Studies, Sexual Diversity Studies, Art History, Classics, Religion, Anthropology, Canadian Studies, Political Science, Psychology, Sociology, Human Biology, Computer Science, and Cognitive Science.

Please note: While some of our courses are open to all students of the University, others are restricted to students in a Drama Specialist, Major or Minor program. Some studio courses (Group B) require an audition, interview, or the submission of a portfolio. While entry into and progress through most of these studio courses require certain prerequisites, the Centre can grant exceptions on a case-by-case basis.

More details, including application [guidelines and deadlines](https://www.cdtps.utoronto.ca/), can be found on our website at: <https://www.cdtps.utoronto.ca/>.

The Centre's Undergraduate Administrative Coordinator, Colleen Osborn, is also available for consultation. For general enquiries or to schedule an appointment call 416-978-8099 or send an email to undergrad.cdtps@utoronto.ca.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Drama, Theatre, and Performance Studies programs impacted by the policy: [ASSPE2148](#), [ASMAJ2148](#), and [ASMIN2148](#)

Drama, Theatre and Performance Studies Programs

Drama Specialist (Arts Program) - ASSPE2148

Admission Requirements:

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol the program.

Please note (below) that while there are no specific course requirements to join the program, completion of the Studio (Group B) requirement will normally require either an audition, a personal interview, or the submission of a portfolio to match students with courses as required. The Centre will, however, work with any student who enrolls in the program to determine the best options for proceeding through and completing the program.

Completion Requirements:

12.0 credits, including 4.0 credits from 300+ level courses, with at least 1.0 credit at the 400-level.

1. [DRM101Y1](#)
2. [DRM220Y1](#)
3. 3.0 credits from Drama, Theatre, and Performance Studies courses (Group A)
4. 2.0 credits from Studio courses (Group B)
5. From Group A, B, C or other DRM: 5.0 credits to make up the total of 12.0 credits

Notes on Group A and B requirements:

- Following completion of [DRM220Y1](#), students are advised to complete at least a 0.5 credit from Group A per academic year until they have

completed the required total of 3.0 credits from Group A.

- Students can take a maximum of 3.0 credits from Group B per year.
- Minimum grade requirements apply to some pre-requisite courses ([DRM101Y1](#), [DRM220Y1](#) and second-year foundation courses) to advance through some Studio (Group B) courses.
- Some Studio (Group B) courses will require a separate assessment either through an audition (performance), submission of a portfolio (playwriting), or a personal interview (directing, design and production). For information on the deadlines for these assessments and the process for applying, please consult the Centre website.
- The Centre is committed to working with any student to consider best options for not only progressing but completing the program. Students are strongly encouraged to reach out to Centre staff for advising on planning their program.

Drama Minor (Arts Program) - ASMIN2148

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Please note that while there are no specific course requirements to join the program, Studio courses (Group B) may require an audition, a personal interview, or the submission of a portfolio to match students with courses as required. The Centre will, however, work with any student who enrolls in the program to determine the best options for proceeding through and completing the program.

Completion Requirements:

4.0 credits including at least 1.0 credit at the 300+ level.

1. DRM101Y1
2. From Group A: 1.0 credit or DRM220Y1
3. From Group A: 1.0 credit
4. From Groups A, B, C or other DRM (when eligible): 1.0 credit to make up the total of 4.0 credits

Note: Priority is reserved for Drama Majors and Specialists for Group B Studio courses.

Drama, Theatre and Performance Studies Courses

DRM101Y1 - Introduction to Drama, Theatre and Performance Studies

Hours: 48L/24T

The course introduces students to key concepts and issues in the three related disciplines at the core of our program: drama, theatre, and performance studies. We consider broader questions of performance and performativity in daily life. Engaging critically with theoretical and dramatic texts and live performances, students learn how to think about performance in its cultural, social, historical, aesthetic and political dimensions, and how to acknowledge and navigate their own responsibilities as culture workers situated in specific historical and contemporary contexts. This course combines weekly two-hour lectures with one-hour tutorials.

Exclusion: (DRE121H5, DRE122H5) / (ENG121H5, DRE122H5) / (THRA10H3, THRB20H3) / (THRA10H3, UNI102H1)

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

DRM200Y1 - Performance I

Hours: 48T/96P

Emphasis is initially placed on ensemble, non-verbal, and improvisational work. Students proceed to the application of their acquired skills to scripted material. Students may apply in their first or second year of University. The Application Deadline is March 10th for the first round of auditions; August 1st for the second round. Priority is given to Drama Specialists and Majors. See CDTPS Application Guidelines for information on how to apply.

Prerequisite: An audition and interview in April or in August. Newly admitted students can apply for an audition before beginning their first year of studies.

Corequisite: DRM101Y1/ DRM220Y1

Exclusion: (DRS121H5/ DRE201H5, DRS122H5), (DRS221H5, DRS222H5)

Recommended Preparation: DRM101Y1

Breadth Requirements: Creative and Cultural Representations (1)

DRM202H1 - Directing I

Hours: 36P

A practical introduction to directing theatre and to the different styles, concerns, and goals that guide directors

as they pursue their vision. Through lectures, discussions, and practical exercises, students learn how directors prepare for their work by generating ideas, breaking down a text, animating space, and communicating with actors. The majority of the learning takes place during contact time within the class and regular attendance is key. A letter of interest is required. The Application Deadline is March 10th for the first round; August 1st for the second round. Priority is given to Drama Specialists and Majors. See CDTPS Application Guidelines for information on how to apply.

Prerequisite: DRM101Y1

Corequisite: DRM220Y1

Exclusion: VPDC02H3, THRD30H3

Breadth Requirements: Creative and Cultural Representations (1)

DRM220Y1 - Comparative Theatre Histories

Hours: 48L/24T

This course will introduce students to major developments in world theatre history through the exploration of a wide range of plays, performances, and practices. In the Fall term our trajectory will go roughly from antiquity to the 16th Century; in the Winter term, from the 16th Century to the present. We will examine material from Africa, America, Asia, Europe, and Oceania, with close attention to the social, religious, historical, aesthetic, and political parameters in which theatre and performance take place. Nurturing ethnically sensitive approaches to world theatre history, this course considers the many ways theatre and performance interact with the globalized world. Students will have an opportunity to participate in collaborative projects and focus on writing for research in the performing arts.

Prerequisite: DRM101Y1

Exclusion: THRB20H3, THRB21H3

Breadth Requirements: Creative and Cultural Representations (1), Thought, Belief and Behaviour (2)

DRM224H1 - Robots, Automata, and Avatars

Hours: 18L/18P

Across centuries and global traditions, theatre has staged imaginations - and real demonstrations - of mechanical humans and other animals. This course introduces students to a wide range of technological performers, from science-fiction drama to drone ballets, from baroque automata to virtual puppeteering. Special attention will be paid to how these figures both construct and dismantle concepts of race, gender, and the human. Hands-on

sessions will introduce students to the problems such performers present in the studio. Priority will be given to students in the Drama Specialist and Major.

Prerequisite: DRM101Y1 or 4.0 credits

Corequisite: DRM101Y1 or DRM220Y1

Recommended Preparation: DRM101Y1

Breadth Requirements: Creative and Cultural Representations (1)

DRM228H1 - Playwriting I

Hours: 36L

A hands-on study of the craft of dramatic writing. The class examines the basic elements of playwriting such as plot, structure, theme, character, dialogue, setting, with an emphasis on story-making. Attention is given to the development of students own work through written assignments and in-class exercises. Priority will be given to students in the Drama Specialist and Major.

Prerequisite: Drama Major, Specialist or Minor; DRM101Y1

Corequisite: DRM220Y1

Exclusion: DRE362H5

Breadth Requirements: Creative and Cultural Representations (1)

DRM254H1 - Design and Production I

Hours: 36L/24T

A practical and theoretical introduction to the fundamentals of theatrical performance design. This course touches on theatre architecture, conceptual approaches to theatrical design and spatial considerations of live performance. Students will work on case studies and practical projects geared toward understanding theatre terminology, design, and production processes. Students will also explore concrete aspects of technical theatre production, particularly as they pertain to theatrical design elements. Priority will be given to students in the Drama Specialist and Major.

Prerequisite: DRM101Y1 or any 4.0 credits

Corequisite: DRM101Y1 or DRM220Y1

Exclusion: VPDB03H3, VPDC03H3, THRB50H3, THRC30H3

Recommended Preparation: DRM101Y1

Breadth Requirements: Creative and Cultural Representations (1)

DRM286H1 - Special Topics in Drama, Theatre and Performance Studies

Hours: 36P

An introduction to selected issues in drama, theatre and performance studies.

Special Topics vary for Breadth distribution and Group assignment depending on the course content. Please consult the Undergraduate Drama office and check Special Topics on the website for more details.

Breadth Requirements: Creative and Cultural Representations (1)

DRM288H1 - Introduction to Communication

Previous Course Number: DRM286H1
Hours: 48P

Effective communication is a pivotal skill when public speaking, persuasive discourse, and personal presence are key to success. In this introductory course, students will strengthen and develop confidence in a supportive, playful, highly participatory and collaborative environment. This course is suited to students in professional programs or for those who would like to learn a full range of communication skills. Exploration of language structure, argumentation, grounding, alignment, vocal resonance, clarity and effective listening will be part of each class with an emphasis on enhancing individual potential.

Prerequisite: 4.0 credits

Exclusion: DRM286H1 (Special Topics in Drama: Introduction to Communications) offered in Summer 2013, Summer 2014, Summer 2015, Summer 2016, Summer 2017, Summer 2018, Summer 2019, and Summer 2020.

Breadth Requirements: Creative and Cultural Representations (1)

DRM299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

DRM299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

Prerequisite: Permission from the instructor.

DRM300Y1 - Performance II

Hours: 48T/96P

Building upon the work of DRM200Y1, students concentrate on scene study, styles of acting, and the development of ensemble work with an intensive focus on voice and movement practices. Restricted to students in the Drama Specialist and Major or by permission from the Centre.

NB: To enroll in this course, you will need to complete an application by March 10th. See CDTPS Application Guidelines for more information.

Prerequisite: Minimum 70% in required courses: DRM101Y1, DRM200Y1

Corequisite: DRM220Y1 or any course from Group A if DRM220Y1 is complete

Exclusion: (DRS221H5, DRS222H5), (DRS321H5, DRS322H5)

Breadth Requirements: Creative and Cultural Representations (1)

DRM301H1 - Voice and Movement I

Hours: 48P

A practice-based exploration of voice and movement in relation to performance. Through an exploration of the connections between breath, movement, voice, impulse, emotion, space, character and text, students learn to use their voice and body in informed and efficient ways in practice and performance and to develop a wide expressive range. Emphasis is placed on both personal awareness and ensemble work. Taken in conjunction with DRM300Y1: Performance II.

Prerequisite: DRM101Y1 and DRM200Y1

Corequisite: DRM300Y1

Recommended Preparation: DRM220Y1

Breadth Requirements: Creative and Cultural Representations (1)

DRM302H1 - Directing II

Hours: 12T/36P

A continuation of [DRM202H1](#), concentrating on deepening the exploration of what it means to think and work like a director. Through practical exercises and scene study, students learn how to conceptualize a production and how to communicate their vision, as well as deepen their understanding of what is involved in directing actors and collaborating with a production team. Restricted to students in the Drama Specialist and Major or by permission from the Centre (requests can be made once the priority period has opened on Acorn).

Prerequisite: Minimum 70% in required courses: [DRM101Y1](#) and [DRM202H1](#)

Corequisite: [DRM220Y1](#) or any course from Group A.

Recommended Preparation: [DRM220Y1](#) and [DRM331H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

DRM303H1 - Theories of Acting

Hours: 36L

A critical survey of the major theorists and practitioners whose writing has influenced the art of the actor, with a focus on Twentieth Century acting and actor training. Students will be introduced to the work of Konstantin Stanislavsky and his American followers (such as Lee Strasberg), Vsevolod Meyerhold, Bertolt Brecht, and Michael Chekhov, among others.

Prerequisite: [DRM101Y1](#) or any 4.0 credits

Exclusion: [VPDB15H3](#)

Recommended Preparation: [DRM220Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

DRM308H1 - Dancing Black in Canada

Hours: 36L

This course explores the role of dance within Canada's Black population with a focus on 1900-1970. Both social and theatrical dance for the stage will be explored within the contexts of legislation, immigration, transnational relations, social and cultural heritage, media reception, and representations of Blackness. We will consider the influence of this era on social, street, and theatrical dance in the late 20th and 21st century.

Prerequisite: 4.0 credits or [DRM101Y1](#)

Exclusion: [DRM388H1](#) (*Dancing Black in Canada*) offered in Fall 2023 and 2024

Recommended Preparation: [DRM220Y1](#) for DRM Majors, Minors & Specialists or [HIS265Y1](#) for [Certificate in Black Canadian Studies](#) students

Breadth Requirements: Creative and Cultural Representations (1)

Course Experience: University-Based Experience

DRM311H1 - Voice and Movement II

Hours: 3T/36P

Building on [DRM301H1](#), students deepen their exploration of vocal and physical practices and techniques. Taken in conjunction with [DRM300Y1](#): Performance II.

Prerequisite: [DRM101Y1](#) and [DRM200Y1](#)

Corequisite: [DRM300Y1](#)

Recommended Preparation: [DRM220Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

DRM320H1 - Concepts of Theatre in the Twentieth and Twenty-first Centuries

Hours: 36L

An exploration of the shifting landscapes of European theatre theory, history and practice in the late 19th century and their repercussions throughout the 20th and 21st centuries. The course focuses on the developments of modern and post-dramatic theatre. It also includes critical analysis of the annual Drama Mainstage production and current Canadian theatre.

Prerequisite: [DRM101Y1](#)

Exclusion: [DRM230Y1](#)

Recommended Preparation: [DRM220Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

DRM328H1 - Playwriting II

Hours: 36L/12T

A continuation of [DRM228H1](#), concentrating on the in-depth knowledge and practice of playwriting with an emphasis on style and technique of writing for the stage. Students develop their own work through written assignments, in-class exercises, and a final public presentation. Restricted to students in the Drama Specialist and Major or by permission from the Centre.

NB: You will need to complete an [application](#) by March 10th and submit writing samples by April 10th in order to

be considered for enrollment in this course. See [CDTPS Application Guidelines](#) for more information.

Prerequisite: Minimum 70% in required courses: [DRM101Y1](#), [DRM228H1](#), and a portfolio of writing samples due on April 10th.

Corequisite: [DRM220Y1](#) or any course from Group A

Exclusion: [DRE363H5](#)

Breadth Requirements: Creative and Cultural Representations (1)

DRM331H1 - Dramaturgy

Hours: 36L

An introduction to the theory and practice of dramaturgy in its many theatrical manifestations: from preparatory research to script analysis, from new play development to audience dramaturgy.

Prerequisite: [DRM101Y1](#)

Exclusion: [DRE222H5](#), [DRE348H5](#), [DRE360H5](#), [VPDD01H3](#)

Recommended Preparation: [DRM220Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

DRM342H1 - The Contemporary Avant-Garde

Hours: 36L

This class, while exploring significant artistic and sociopolitical developments of the historical avant-garde, will primarily concentrate on the experimental theatre and performance of the past 25 years—a contemporary avant-garde that, as Paige McGinley describes, “hinge[s] on a networked spatiality, rather than on linear teleology” and reflects a growing collective investment on part of audiences and artists alike in the work of a work of art.

Prerequisite: [DRM101Y1](#) or any 4.0 credits

Recommended Preparation: [DRM220Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

DRM354H1 - Design II

Hours: 72P

An intermediate-level investigation of various aspects of theatrical performance design, with a focus on scenic and costume design, though also considering the impact of projections and lighting. Using skills developed through practical study in the Design Studio, the students form the

core of the design team for Mainstage production. The course requires active students' participation in a theatre setting, within and outside of regular class time. Restricted to students in the Drama Specialist and Major or by permission from the Centre (requests can be made once the priority period has opened on Acorn).

Prerequisite: Minimum 70% in required courses:

[DRM101Y1](#) and [DRM254H1](#).

Corequisite: [DRM220Y1](#) or any course from Group A

Exclusion: [DRM354Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

DRM355H1 - Production II

Hours: 36L/36P

An intermediate-level hands-on investigation of various aspects of theatrical production, including stage management, lighting and sound design, and video design. Using the skills developed in this course, students will form the core of the production team for a number of CDTPS productions. Restricted to students in the Drama Specialist and Major or by permission from the Centre (requests can be made once the priority period has opened on Acorn).

Prerequisite: Minimum 70% in required courses:

[DRM101Y1](#) and [DRM254H1](#)

Corequisite: [DRM220Y1](#) or any course from Group A

Breadth Requirements: Creative and Cultural Representations (1)

DRM355Y1 - Production II

Hours: 72L/72P

An intermediate-level hands-on investigation of various aspects of theatrical production, including stage management, lighting and sound design, and video design. Using the skills developed in this course, students will form the core of the production team for a number of CDTPS productions. Restricted to students in the Drama Specialist and Major or by permission from the Centre (requests can be made once the priority period has opened on Acorn).

Prerequisite: Minimum 70% in required courses:

[DRM101Y1](#) and [DRM254H1](#)

Corequisite: [DRM220Y1](#) or any course from Group A

Breadth Requirements: Creative and Cultural Representations (1)

DRM360H1 - Race, Gender and Performance

Hours: 36L

This course will enable students to look at performance in generative new ways by introducing them to theoretical frameworks and critical perspectives from postcolonial theory and queer theory, critical race studies and gender studies. As well as learning to apply these critical tools to works that they are already familiar with, students will be introduced to work in feminist, queer, and anti-racist performance from outside the mainstream.

Prerequisite: DRM101Y1 or any 4.0 credits

Exclusion: DRM387H1 (Special Topics in Drama, Theatre and Performance Studies: Race, Gender & Performance), offered in Summer 2021

Recommended Preparation: DRM220Y1

Breadth Requirements: Thought, Belief and Behaviour (2)

DRM362H1 - Theatre and the World

Hours: 36L

An intercultural, post-colonial and comparative analysis of innovative processes in the national and cross-cultural theatre around the world. Focusing on selected periods and cultures, the course explores the cultural backgrounds of key turning points in pre-modern and modern theatre and their impact on the developments of the post-modern theatre in a globalizing world.

Prerequisite: DRM101Y1 or any 4.0 credits

Recommended Preparation: DRM220Y1/ DRM230Y1

Breadth Requirements: Creative and Cultural Representations (1)

DRM363H1 - Story-ing the Possible: Talking Treaties, Rehearsing (Re)conciliation

Hours: 36L

This half course offers a comprehensive examination of Indigenous history in the territories (now called Canada), Treaty Relationships, and Indigenous-Settler Relationships, as they have shifted and evolved since first contact. Students will enter into conversation with this history and the contemporary issues confronting all Canadians today through the writings of Indigenous playwrights, oral history keepers, academic historians, and Indigenous theorists.

Prerequisite: DRM101Y1 or any 4.0 credits

Exclusion: INS201Y1

Breadth Requirements: Society and its Institutions (3)

DRM366H1 - Canadian Theatre

Hours: 36L

Since the 1960s, actors, directors, and writers have been architects of Canadian identity. This course will study the history of Canadian theatre, with an emphasis on how Canadian playwrights and creators have been engaged with social and political issues. A survey of post-colonial theatre, cultural diversity, and gender politics on the Canadian stage.

Prerequisite: DRM101Y1 or any 4.0 credits

Exclusion: DRE200H5, VPDB13H3, THRB22H3

Recommended Preparation: For Drama Majors and Specialists: DRM220Y1

Breadth Requirements: Society and its Institutions (3)

DRM368H1 - Devised Theatre

Hours: 36P

An in-depth, hands-on study of devising theatre in a group context. This course offers an intensive exploration of the history and practice of devised theatre within the late 20th and early 21st centuries that will culminate in a number of in-class and public presentations.

Prerequisite: Minimum 70% in required courses:

DRM101Y1, DRM200Y1/ DRM202H1/ DRM224H1/ DRM228H1/ DRM254H1

Exclusion: THRB31H3

Recommended Preparation: DRM220Y1

Breadth Requirements: Creative and Cultural Representations (1)

DRM375H1 - Special Topics in Studio Practice

Hours: 36P

A focused, in-depth practice-based examination of specific performance disciplines, styles, and genres, considered within their historical and critical context. Content will vary depending on instructor. Please check Studio Topics under Group B on the CDTPS undergraduate web page for more details. Priority will be given to students in the Drama Specialist and Major.

Prerequisite: Minimum 70% in required courses:

DRM101Y1, DRM200Y1/ DRM202H1/ DRM224H1

DRM228H1/ DRM254H1

Recommended Preparation: DRM220Y1

Breadth Requirements: Creative and Cultural Representations (1)

DRM375Y1 - Special Topics in Studio Practice

Hours: 72P

A focused, in-depth practice-based examination of specific performance disciplines, styles, and genres, considered within their historical and critical context. Content will vary depending on instructor. Please check Studio Topics under Group B on the [CDTPS undergraduate web page](#) for more details. Priority will be given to students in the Drama Specialist and Major.

Prerequisite: Minimum 70% in required courses: DRM101Y1, DRM200Y1/ DRM202H1/ DRM224H1/ DRM228H1/ DRM254H1

Recommended Preparation: DRM220Y1

Breadth Requirements: Creative and Cultural Representations (1)

DRM376H1 - Special Topics in Studio Practice

Hours: 36P

A focused, in-depth practice-based examination of specific performance disciplines, styles, and genres, considered within their historical and critical context. Content will vary depending on instructor. Please check Studio Topics under Group B on the [CDTPS undergraduate web page](#) for more details. Priority will be given to students in the Drama Specialist and Major.

Prerequisite: Minimum 70% in required courses: DRM101Y1, DRM200Y1/ DRM202H1/ DRM224H1/ DRM228H1/ DRM254H1

Recommended Preparation: DRM220Y1

Breadth Requirements: Creative and Cultural Representations (1)

DRM377H1 - Special Topics in Studio Practice

Hours: 36P

A focused, in-depth practice-based examination of specific performance disciplines, styles, and genres, considered within their historical and critical context. Content will vary depending on instructor. Please check Studio Topics under Group B on the [CDTPS undergraduate web page](#)

for more details. Priority will be given to students in the Drama Specialist and Major.

Prerequisite: DRM101Y1, DRM200Y1/ DRM202H1/ DRM224H1/ DRM228H1/ DRM254H1

Recommended Preparation: DRM220Y1

Breadth Requirements: Creative and Cultural Representations (1)

DRM378H1 - Special Topics in Studio Practice

Hours: 36P

A focused, in-depth practice-based examination of specific performance disciplines, styles, and genres, considered within their historical and critical context. Content will vary depending on instructor. Please check Studio Topics under Group B on the [CDTPS undergraduate web page](#) for more details. Priority will be given to students in the Drama Specialist and Major.

Prerequisite: Minimum 70% in required courses: DRM101Y1, DRM200Y1/ DRM202H1/ DRM224H1/ DRM228H1/ DRM254H1

Recommended Preparation: DRM220Y1

Breadth Requirements: Creative and Cultural Representations (1)

DRM385H1 - Special Topics in Drama, Theatre and Performance Studies

Hours: 36L

A focused, in-depth examination of specific issues in drama, theatre and performance studies. Special Topics vary for Breadth distribution depending on the course content. Please check Special Topics under Group A on the [CDTPS undergraduate web page](#) for more details.

Prerequisite: DRM101Y1 or any 4.0 credits

Recommended Preparation: DRM220Y1

DRM385Y1 - Special Topics in Drama, Theatre and Performance Studies

Recommended Preparation: DRM220Y1

DRM386H1 - Special Topics in Drama, Theatre and Performance Studies

Hours: 36L

A focused, in-depth examination of specific issues in drama, theatre and performance studies. Special Topics vary for Breadth distribution depending on the course content. Please check Special Topics under Group A on the [CDTPS undergraduate web page](#) for more details.

Prerequisite: [DRM101Y1](#) or any 4.0 credits

Recommended Preparation: [DRM220Y1](#)

DRM387H1 - Special Topics in Drama, Theatre and Performance Studies

Hours: 36L

A focused, in-depth examination of specific issues in drama, theatre and performance studies. Special Topics vary for Breadth distribution depending on the course content. Please check Special Topics under Group A on the [CDTPS undergraduate web page](#) for more details.

Prerequisite: [DRM101Y1](#) or any 4.0 credits

Recommended Preparation: [DRM220Y1](#)

DRM388H1 - Special Topics in Drama, Theatre and Performance Studies

Hours: 36L

A focused, in-depth examination of specific issues in drama, theatre and performance studies. Special Topics vary for Breadth distribution depending on the course content. Please check Special Topics under Group A on the [CDTPS undergraduate web page](#) for more details.

Prerequisite: [DRM101Y1](#) or any 4.0 credits

Recommended Preparation: [DRM220Y1](#)

DRM390Y1 - Independent Studies in Drama, Theatre and Performance Studies

An independent research project at the 300-level, proposed by the student in conversation with a full-time faculty member who agrees to act as their supervisor for the course. Not eligible for CR/NCR option. Restricted to

students in the Drama Specialist and Major. An application and a proposal are required in order to enroll in this course. Please consult the [CDTPS Independent Study Policy](#) for further details.

Prerequisite: 10.0 credits, Specialist or Major in Drama with a minimum of 70% in [DRM220Y1](#), Independent Study Application Form and description of project/syllabus signed by the student and the faculty supervisor, approval of the Centre for Drama, Theatre and Performance Studies (CDTPS). Application deadlines: August 10th for September start date.

DRM391H1 - Independent Studies in Drama, Theatre and Performance Studies

An independent research project at the 300-level, proposed by the student in conversation with a full-time faculty member who agrees to act as their supervisor for the course. Not eligible for CR/NCR option. Restricted to students in the Drama Specialist and Major. An application and a proposal are required in order to enroll in this course. Please consult the [CDTPS Independent Study Policy](#) for further details.

Prerequisite: 10.0 credits, Specialist or Major in Drama with a minimum of 70% in [DRM220Y1](#), Independent Study Application Form and description of project/syllabus signed by the student and the faculty supervisor, approval of the Centre for Drama, Theatre and Performance Studies (CDTPS). Application deadlines: August 10th for September start date; November 10th for January start date.

DRM398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities...>. Not eligible for CR/NCR option.

DRM398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

DRM399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

DRM399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

JIA400H1 - Interdisciplinary Practice for the Arts

Hours: 72P

While examining the interconnectedness of the arts, students are required to meet between sessions and develop projects connected to their study. These projects involve a range of media, including theatre, film, music and visual art (installation). An application, a proposal, and/or an interview are required in order to be considered for enrollment in this course. Please consult the [CDTPS Application Guidelines](#) for specific procedures and deadlines.

Prerequisite: 14.0 credits and an interview/proposal
Breadth Requirements: Creative and Cultural Representations (1)

DRM400H1 - Advanced Performance

Hours: 12T/48P

Advanced Performance builds on the training sequence of [DRM200Y1](#) and [DRM300Y1](#) by developing students' acting and performance skills in devised monologues and extensive collaborative scene work. The work focuses on the particulars of creating a character and the creative aspects of the actor's craft. Ensemble work is a priority and full attendance is required. Restricted to students in the Drama Specialist and Major. A letter of interest is required. The [Application](#) Deadline is March 10th. See [CDTPS Application Guidelines](#) for information on how to apply.

Prerequisite: Minimum 70% in required courses: [DRM220Y1](#), [DRM300Y1](#)

Corequisite: [DRM403Y1](#) or permission of the Centre

Breadth Requirements: Creative and Cultural Representations (1)

DRM402H1 - Advanced Directing

Hours: 36T/36P

A hands-on exploration of advanced directing for the theatre. The class is centered on student-directed projects, which are publicly presented at the end of term. An application, a proposal, and an interview in April are required to be considered for enrollment in this course. Please consult the [CDTPS Application Guidelines](#) for specific procedures and deadlines.

Prerequisite: Specialist or Major in Drama; Minimum 70% in required courses: [DRM220Y1](#), [DRM302H1](#); a written proposal and an interview in April.

Recommended Preparation: [DRM331H1](#) and [DRM300Y1](#)/ [DRM328H1](#)/ [DRM354H1](#)/ [DRM355H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

DRM403Y1 - Mainstage Performance

Hours: 72T/144P

This course, taught each year by a different visiting professional theatre director, offers upper-level students the opportunity to explore acting in a full-length production. Plays are selected to challenge students in a variety of different ways, exposing them to a full spectrum of theatre and performance genres and possibilities. Restricted to students in the Drama Specialist and Major. An audition is required. The [Application](#) Deadline is March 10th. See [CDTPS Application Guidelines](#) for information on how to apply.

Prerequisite: Minimum 70% in required courses: [DRM220Y1](#), [DRM300Y1](#), 0.5 credit from [DRM301H1](#)/ [DRM375H1](#)

Corequisite: [DRM400H1](#), [DRM413H1](#)

Exclusion: [DRS425H5](#), [DRS426H5](#)

Recommended Preparation: [DRM301H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

DRM413H1 - Advanced Voice and Movement

Hours: 12T/48P

This course is a skill-developing companion to [DRM400H1](#) Advanced Performance, and a co-requisite to [DRM403Y1](#) Mainstage Performance. It exposes students to a wide range of voice and movement techniques and explores a heightened use of physicality, voice and speech. Restricted to students in the Drama Specialist and Major taking [DRM403Y1](#).

Prerequisite: Minimum 70% in required courses: [DRM220Y1](#), [DRM300Y1](#), 0.5 credit from [DRM301H1](#)/[DRM375H1](#)

Corequisite: [DRM403Y1](#)

Recommended Preparation: [DRM301H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

DRM420H1 - Arts and Politics: Bertolt Brecht, Giorgio Strehler, Robert Wilson and Robert Lepage

Previous Course Number: JDC410H1

Hours: 36L

Bertolt Brecht played a specific role in the paradigm shift of the art which began at the end of the 19th century. He advanced this change by trying to connect art to its social and political functions and structure with the positive acceptance of the industrial revolution and by trying to transform it with the help of the new technological media. Restricted to students in the Drama Specialist or Major.

Prerequisite: 9.0 credits including [DRM220Y1](#)

Exclusion: JDC410H1

Recommended Preparation: [DRM320H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

DRM424H1 - Projects in Digital Performance

Hours: 18P/18S

This course introduces students to independent research-creation in the field of contemporary digital performance. Readings and invited guests will expose students to innovative practices in theatres and online platforms, and outline current political and academic debates around liveness, copyright, and social media. Students will pursue research on a contemporary artist who is integrating the performing arts with computational media, and create a performance piece responding to issues raised by their research.

Prerequisite: 14.0 credits including [DRM220Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

DRM428H1 - Advanced Playwriting

Hours: 12T/36P

A continuation of [DRM328H1](#), concentrating upon the in-depth knowledge and practice of playwriting with an emphasis on advanced style and technique of writing for the stage. Students develop their own longer work through in-class exercises, one major written assignment, and a final public presentation. Restricted to students in the Drama Specialist and Major or by permission from the Centre. An [application](#) and writing samples (due November 10th) are required in order to be considered for enrollment in this course. Please consult the [CDTPS Application Guidelines](#) for information on how to apply.

Prerequisite: Minimum 70% in required courses:

[DRM220Y1](#), [DRM328H1](#) and a portfolio of writing samples due November 10th.

Breadth Requirements: Creative and Cultural Representations (1)

DRM431H1 - Advanced Dramaturgy

Hours: 36L

A continuation of [DRM331H1](#) Dramaturgy, deepening the critical exploration of more specific and/or specialized aspects of dramaturgy, such as digital dramaturgy, new media dramaturgy, intercultural and transcultural dramaturgy.

Prerequisite: [DRM220Y1](#) and [DRM331H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

DRM454H1 - Advanced Design

Hours: 36L/36P

An advanced-level exploration of theatrical design skills and techniques, delving deeper into specific areas of specialization and with more opportunity for independent work. Students are expected to participate in Drama Centre productions in senior creative and leadership roles. NB: To enroll in this course, you will need to complete an [application](#) by March 10th. See [CDTPS Application Guidelines](#) for more information.

Prerequisite: Minimum 70% in required courses:

[DRM220Y1](#), [DRM354H1](#).

Breadth Requirements: Creative and Cultural Representations (1)

DRM455H1 - Advanced Production

Hours: 36L/36P

An advanced-level exploration of production skills and techniques, delving deeper into specific areas of specialization and with more opportunity for independent work. Students are expected to participate in Drama Centre productions in senior creative and leadership roles.

NB: To enroll in this course, you will need to complete an [application](#) by March 10th. See [CDTPS Application Guidelines](#) for more information.

Prerequisite: Minimum 70% in required courses: [DRM220Y1](#), [DRM355H1](#).

Breadth Requirements: Creative and Cultural Representations (1)

DRM462H1 - Black Playwrights: Resistance, Resilience and Transformation

Previous Course Number: DRM488H1

Hours: 18L/18S

An exploration of dramatic literature by writers from the African Diaspora (Canada, USA, UK and the Caribbean) from 1959 to the present. The course will identify playwrights central to the development of Black theatre, their plays, and performance practices. Emphasis will be placed on dramaturgical analysis, sociohistorical context, the author's influences, and relevant critical writing, in order to evaluate these works as sites of social resistance, cultural resilience, and aesthetic transformation. Selected authors include: Lorraine Hansberry, Wole Soyinka, August Wilson, Derek Walcott, Debbie Hunter Green, George Elliott Clarke, Tarell Alvin McCraney, Walter Borden, Suzan-Lori Parks, Kwame Kwei-Armah and Ntozake Shange.

Prerequisite: 14.0 credits including [DRM220Y1](#)

Exclusion: [DRM488H1](#) (Senior Seminar in Drama, Theatre and Performance Studies: Black Playwrights), offered in Fall 2019

Breadth Requirements: Creative and Cultural Representations (1)

DRM480H1 - Internships: Performance and Cultural Arts Organizations

Hours: 49P/21S

In this course students will participate in partnership-based academic internships with performing and cultural arts organizations. With an emphasis on applying

academic learning to the community and workplace contexts, students will strengthen their professional skills development and critical reflective practices through their structured engagement with cultural arts organizations across the city. In addition to regular in-class meetings, readings and assignments, students will complete 49 - 55 hours with a cultural arts organization.

Please note that internships will not include performance or performance understudy and will be subject to the availability of partner organizations.

Prerequisite: 14.0 credits, including [DRM220Y1](#) with an application and interview

Breadth Requirements: Creative and Cultural Representations (1)

DRM480Y1 - Internships: Performance and Cultural Arts Organizations

Hours: 98P/42S

In this course students will participate in partnership-based academic internships with performing and cultural arts organizations. With an emphasis on applying academic learning to the community and workplace contexts, students will strengthen their professional skills development and critical reflective practices through their structured engagement with cultural arts organizations across the city. In addition to regular in-class meetings, readings and assignments, students will complete 98-112 hours with a cultural arts organization.

Please note that internships will not include performance or performance understudy and will be subject to the availability of partner organizations.

Prerequisite: 14.0 credits, including [DRM220Y1](#) with an application and interview

Breadth Requirements: Creative and Cultural Representations (1)

DRM485H1 - Senior Seminar in Drama, Theatre and Performance Studies

Hours: 36L

An in-depth examination of selected issues in drama, theatre and performance studies at the 400-level. Special Topics vary for breadth distribution depending on the course content and therefore may be counted towards Groups A or B. Please consult the Undergraduate Drama office or check the [CDTPS undergraduate web page](#) for more details. Restricted to students in the Drama Specialist or Major.

Prerequisite: 14.0 credits, including [DRM220Y1](#) with a minimum of 70% or permission of the Centre

DRM485Y1 - Senior Seminar: Drama, Theatre and Performance Studies Thesis

Hours: 72L

Research thesis, emphasizing topics and methods used in drama, theatre and performance studies. Students must obtain permission from the instructor by submitting a research project proposal. The project may engage creative practice, but the thesis itself will be a critical, written work engaging the research and dramaturgy involved in the performance or artwork. Not eligible for CR/NCR option. The [application](#) deadline is March 10th. See [CDTPS Application Guidelines](#) for information on how to apply. Restricted to students in the Drama Specialist or Major.

Prerequisite: 14.0 credits, including [DRM220Y1](#) with a minimum of 70%, an application and interview

Breadth Requirements: Creative and Cultural Representations (1), Society and its Institutions (3)

DRM486H1 - Senior Seminar in Drama, Theatre and Performance Studies

Hours: 36P

An in-depth examination of selected issues in drama, theatre and performance studies at the 400-level. Special Topics vary for breadth distribution depending on the course content and therefore may be counted towards Groups A or B. Please consult the Undergraduate Drama office or check the [CDTPS undergraduate web page](#) for more details. Restricted to students in the Drama Specialist or Major.

Prerequisite: 14.0 credits, including [DRM220Y1](#) with a minimum of 70% or permission of the Centre

DRM487H1 - Senior Seminar in Drama, Theatre and Performance Studies

Hours: 36L

An in-depth examination of selected issues in drama, theatre and performance studies at the 400-level. Special Topics vary for breadth distribution depending on the course content and therefore may be counted towards Groups A or B. Please consult the Undergraduate Drama office or check the [CDTPS undergraduate web page](#) for

more details. Restricted to students in the Drama Specialist or Major.

Prerequisite: 14.0 credits, including [DRM220Y1](#) with a minimum of 70% or permission of the Centre

DRM488H1 - Senior Seminar in Drama, Theatre and Performance Studies

Hours: 36L

An in-depth examination of selected issues in drama, theatre and performance studies at the 400-level. Special Topics vary for breadth distribution depending on the course content and therefore may be counted towards Groups A or B. Please consult the Undergraduate Drama office or check the [CDTPS undergraduate web page](#) for more details. Restricted to students in the Drama Specialist or Major.

Prerequisite: 14.0 credits, including [DRM220Y1](#)

DRM490Y1 - Independent Studies in Drama, Theatre and Performance Studies

An independent research project at the 400-level, proposed by the student in conversation with a full-time faculty member who agrees to act as their supervisor for the course. Not eligible for CR/NCR option. Restricted to students in the Drama Specialist and Major. An application and a proposal are required in order to enroll in this course. Please consult the [CDTPS Independent Study Policy](#) for further details.

Prerequisite: 14.0 credits, including [DRM220Y1](#) with a minimum of 70%, Specialist or Major in Drama, Independent Study Application Form and description of project/syllabus signed by the student and the faculty supervisor, approval of the Centre for Drama, Theatre and Performance Studies (CDTPS). Application deadline: August 10th for September start date.

DRM491H1 - Independent Studies in Drama, Theatre and Performance Studies

An independent research project at the 400-level, proposed by the student in conversation with a full-time faculty member who agrees to act as their supervisor for the course. Not eligible for CR/NCR option. Restricted to students in the Drama Specialist and Major. An application and a proposal are required in order to enroll in this course.

Please consult the [CDTPS Independent Study Policy](#) for further details.

Prerequisite: 14.0 credits, including [DRM220Y1](#) with a minimum of 70%, Specialist or Major in Drama, Independent Study Application Form and description of project/syllabus signed by the student and the faculty supervisor, approval of the Centre for Drama, Theatre and Performance Studies (CDTPS). Application deadlines: August 10th for September start date; November 10th for January start date.

Earth Sciences

Faculty List

Professor and Chair of the Department

S. Finkelstein, M.Phil., PhD

Associate Professor and Associate Chair (Graduate Studies)

A. Swidinsky, MSc, PhD

Associate Professor, Teaching Stream, and Associate Chair (Undergraduate)

B. Bergquist, BSc, PhD

University Professor

B. Sherwood-Lollar, BA, PhD, FRSC

Professors

M. Chazan, M.Phil., PhD

J. R. Desloges (joint appointment with Geography), MSc, PhD, FRSC

M. L. Diamond, MSc, M.Sc. Eng., PhD

M. Dittrich, PhD (U of T Scarborough)

J. Halfar, Dip Geol, PhD (U of T Mississauga)

K.W.F. Howard, MSc, PhD (U of T Scarborough)

Q. Liu, MSc, PhD (joint appointment with Physics)

R. Pysklywec, MSc, PhD

L. Schoenbohm, BSc, PhD (U of T Mississauga)

Associate Professors

B.A. Bergquist, BSc, PhD

J. Bollmann, Dipl. Geol., Sci. Nat. ETH

S. A. Cowling, MSc, PhD

M. Laflamme, PhD (U of T Mississauga)

A. Swidinsky, MSc, PhD

U. Wortmann, Dipl. Geo., Dr. Rer. Nat.

Assistant Professors

M.O. Anderson, BSc, MSc, PhD

S. Ariano, BSc, MSc, PhD

N. Bennett, MSc, PhD

X. Chu, M.Phil., PhD

R. Correa Rangel, BSc, MSc, PhD

D.D. Gregory, BSc, PhD

P. Heron, MSc, M. Geophys., PhD (U of T Scarborough)

S. Lui, PhD (U of T Mississauga)

C. Kin I Sio, BS, PhD

Professor, Teaching Stream

Charly (Carl-Georg) Bank, MSc, PhD

Assistant Professor, Teaching Stream

S. Pierce, MSc, PhD

T. Santimano, MSc, PhD

Status Only Faculty

M. Head, MSc, PhD (Brock University)

K. Tait, MSc, PhD, ROM

Non-tenure Stream Faculty

N. Bennett, MSc, PhD

M.A. Hamilton, MSc, PhD

S. Kamo, MSc, PhD

Professors Emeriti

G.M. Anderson, B. Eng, MSc, PhD

R. C. Bailey, BSc, PhD

D. Davis, MSc, PhD

N. Eyles, MSc, PhD (U of T Scarborough)

F.G. Ferris, BSc, PhD, FRSC

J. Gittins, MSc, PhD, Sc D (U)

H.C. Halls, MSc, PhD (U of T Mississauga)

G.S. Henderson, MSc, PhD

A.D. Miall, BSc, PhD, D. Sc., FRSC

B. Milkereit, MSc, PhD

G. Norris, MA, PhD, FRSC (U)

P.-Y. F. Robin, MSc, PhD (U of T Mississauga)

D.J. Schulze, MSc, PhD (U of T Mississauga)

W.M. Schwerdtner, Dipl. Geol., Dr. Rer. Nat.

E. T. C. Spooner, MA, PhD (U)

P.H. von Bitter, MA, PhD

J.A. Westgate, BSc, PhD (S)

Introduction

Do you like sciences but have a hard time choosing which one to pursue? Can you picture yourself performing experiments in the lab, or collecting data in the field, or developing and testing models on a computer? Then Earth Sciences is the discipline for you. It is the study of physical, chemical, and biological processes over a wide range of temporal and spatial scales in earth and planetary systems.

Our department offers various programs:

The three specialist programs – Geology, Environmental Geoscience, and Geophysics (offered in collaboration with the Department of Physics) – give students the skills to enter graduate studies and also allow them to become professional “geoscientists in training” after graduation. The Geology specialist program focuses on processes of the solid planetary bodies, including volcanoes, sedimentary environments, mountain building, the formation of minerals or ores, and Earth through time. The Environmental Geosciences specialist program in addition addresses processes related to groundwater and biochemical activities. The Geophysics specialist program allows students to model physical processes in and on Earth and other planets and to apply non-invasive methods of imaging the subsurface, often in 4D (i.e.,

space and time); targets may range from archaeological investigations to groundwater imaging and mineral exploration, but also include modeling of mountain-building processes and planetary magnetic fields.

The Geoscience Major program builds on a set of core courses and allows students to select elective courses that match their particular interests. Students have paired this program not just with other science programs but such diverse fields as geography, archaeology, economics, history, political science, or peace and conflict studies.

The Geoscience Minor program provides an introduction to Earth science topics and thinking.

The Earth and Environmental Systems Major program takes a holistic approach to understanding how the Earth system works and how it has evolved over tens to millions and billions of years. This requires understanding the dynamics and interactions of all aspects of the system (solid Earth, ocean, atmosphere, and biosphere) and provides the larger context at a time when climate change, resource consumption and global pollution weigh heavily on people and societies.

Our programs emphasise hands-on lab and field work. At least one field course is required in each program, and several courses have offered optional one-day to two-week long trips. In recent years courses have travelled to Newfoundland, Texas, Arizona, Hawaii, Chile, and New Zealand, and small groups of undergraduates have been involved with field research in Turkey, Peru, Greece and South Africa. These field training opportunities foster the establishment of peer networks, develop team-working skills, afford hands-on learning, and allow for a close collaboration and mentoring experience between individual students and instructors. Students are also encouraged to take advantage of extra and co-curricular opportunities such as study abroad, summer abroad, internships, or working in industry and non-governmental organizations.

More information (including an undergraduate handbook) can be found on the department website www.es.utoronto.ca. Students are encouraged to discuss their plans for program and course selection with the Undergraduate Associate Chair (undergradchair@es.utoronto.ca).

Undergraduate/Graduate Administrator: 22 Ursula Franklin Street, room 1066; 416-978-1240; ugrad@es.utoronto.ca

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Earth Sciences programs impacted by the policy: [ASSPE1253](#) and [ASMIN1253](#); [ASSPE0509](#), [ASMAJ0509](#), and [ASMIN0509](#)

Earth Sciences Programs

Environmental Geosciences Specialist (Science Program) - ASSPE1253

The Environmental Geosciences specialist program focusses on the interconnectedness within the Earth system (biosphere, hydrosphere, atmosphere, and geosphere) and core environmental geoscience subjects such as earth materials, aqueous geochemistry, hydrogeology, environmental contaminants, sedimentary geology, geomorphology, and biogeochemistry. This program aims at preparing students for a variety of careers in industry (e.g. environmental consulting), government and academia that require knowledge of Earth and Environmental science, including knowledge about environmental assessment, water and food quality, climate change, waste management, mining practices, and sustainability.

Jointly sponsored by the School of the Environment and the Department of Earth Sciences. For more information, please contact the Department of Earth Sciences, undergradchair@es.utoronto.ca. Students should note that under the Professional Geoscientists Act of 2000, individuals practicing Environmental Geoscience in Ontario require education that fulfills APGO knowledge requirements (see note below).

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(12.0 credits including at least 1.0 credit from 400-level courses)

1st year required courses (2.0 credits): [CHM151Y1/CHM135H1](#), [CHM136H1](#), [MAT135H1](#), [PHY131H1/PHY151H1](#)

1st year elective courses: 1.0 credit from [MAT136H1](#), [PHY132H1/PHY152H1](#), [ENV237H1/ENV238H1](#),

BIO120H1, CSC108H1/ CSC110Y1/ ESS245H1/
ESS345H1

2nd year required courses (2.0 credits): ESS241H1,
ESS223H1/ ENV233H1, JEG100H1/ ESS262H1,
GGR201H1/ JEG201H1

2nd year elective courses: 1.0 credit from ESS224H1,
ESS261H1, STA220H1/ GGR270H1, CHM210H1,
MAT221H1/ MAT223H1; up to 0.5 credit of this
requirement can be satisfied by taking one of the following
ethics courses: IMC200H1/ INS201Y1/ PHL273H1/
PHL275H1

3rd and 4th year required courses (2.0 credits):
ESS311H1, ESS312H1, ESS410H1, ESS461H1

3rd and 4th year elective courses: 4.0 credits from
JGA305H1, ESS234H1, ESS313H1, ESS331H1,
ESS361H1, ESS362H1, ESS363H1/ ESS462H1,
GGR315H1, GGR390H1, ENV333H1, ESS431H1,
ESS441H1, ESS445H1, ESS450H1, ESS463H1,
ESS464H1, ESS465H1, ESS490H1, ESS491H1/
ESS492Y1

Other courses which might of interest: ESS391H1,
ESS392Y1, ESS381H1, ESS481H1

If you plan to become APGO certified, we suggest you
consider the following courses to fulfill minimum
qualifications. This list comprises courses which are
required for the specialist as well as suggested courses;
together they fulfill groups 1A, 1B, 2A and 2B of the
APGO requirements and add up to 13.5 credits:

Group 1A: CHM135H1, MAT135H1, PHY131H1

Group 1B: BIO120H1, MAT136H1, CHM136H1,
PHY132H1, STA220H1, CSC108H1/ ESS245H1/
ESS345H1

Group 2A: ESS224H1, ESS241H1, ESS234H1,
ESS331H1

Group 2B: ESS223H1, ESS312H1, GGR201H1/
JEG201H1, GGR315H1, JGA305H1, ESS322H1,
GGR205H1/ JEG205H1

Group 2C: 4.5 of 200/ 300/ 400-level ESS or other
allowable courses

All students, regardless of their career aspirations, are
encouraged to talk to the undergraduate chair about their
selection of electives.

Geology Specialist (Science Program) - ASSPE0509

This program gives the deepest level of education within
the field of geology, preparing students for careers in the
energy and mineral resources sectors, as a government-
employed geoscientists, in geoscience research and in
many other fields where geoscience knowledge is an
asset. The program meets the requirements for gaining
membership in the Association of Professional
Geoscientist of Ontario (APGO) and similar organizations
in other Canadian provinces and territories. The Geology
Specialist Program focuses on core geology subjects,
such as mineralogy and petrology, sedimentology,
structural geology, mineral resources, hydrogeology,
Earth history and geologic field mapping. Students are
advised to be aware of course prerequisites, check
clusters of courses listed for the Geology Specialist
program, and consult the Earth Sciences Undergraduate
Handbook for logical course progressions. For further
questions, please consult with the Student Affairs
Coordinator (Scott Moore, Department of Earth Sciences,
22 Ursula Franklin St., Earth Sciences Center, Room
1062 email: ugrad@es.utoronto.ca).

Keywords: Geology, Petrology, Energy and Mineral
Resources

Enrolment Requirements:

This is an open enrolment program. A student who has
completed 4.0 credits may enrol in the program.

Completion Requirements:

(14.0 credits)

Compulsory Foundation Sciences (1.5 credits):

CHM135H1, MAT135H1, PHY131H1

Additional Foundation Sciences (3.0 credits):

Any 3.0 credits from the following, with no more than 1.0
credit from the same category:

- Biology: BIO120H1, BIO130H1
- Computer Science: CSC108H1, CSC148H1,
CSC110Y1, ESS245H1/ ESS345H1
- Chemistry: CHM136H1, CHM220H1, CHM222H1
- Math: MAT136H1, MAT221H1
- Physics: PHY132H1/ PHY152H1
- Statistics: STA220H1/ GGR270H1/ STA247H1/
STA257H1, STA248H1/ STA261H1

Compulsory Foundation Geosciences (3.5 credits):

- Field techniques: [ESS234H1](#)
- Mineralogy and Petrology: [ESS222H1/](#)
[ESS224H1](#)
- Sedimentation and Stratigraphy: [ESS331H1](#)
- Structural Geology: [ESS241H1](#)
- Additionally: [JEG100H1/](#) [ESS262H1](#), [ESS221H1/](#)
[ESS321H1](#), [ESS324H1](#)

Additional Foundation Geosciences (2.5 credits):

At least 0.5 credit, but no more than 1.0 credit from each subgroup:

- Geochemistry and Geophysics: [ESS223H1](#),
[JGA305H1](#)
- Mineralogy and Petrology: [ESS322H1](#),
[ESS424H1](#)
- Sedimentology, Glacial Geology, Geomorphology,
Remote Sensing: [ESS431H1](#), [GGR201H1/](#)
[JEG201H1](#), [GGR301H1/](#) [JEG301H1](#), [GGR315H1](#)

Other Geosciences (3.5 credits):

A minimum of 3.5 credits from the following list that have not been used to fulfill the above requirements. At least 1.0 credit needs to be at the 400 level, and no more than 1.5 credits from the 200 level.

- Second-year courses: [ESS223H1](#), [EEB240H1](#),
[ESS245H1/](#) [ESS345H1](#), [ESS261H1](#), [GGR201H1/](#)
[JEG201H1](#), [GGR205H1/](#) [JEG205H1](#), [GGR206H1/](#)
[JEG206H1](#), [GGR272H1](#), [GGR273H1](#)
- Third-year courses: [ESS311H1](#), [ESS312H1](#),
[ESS313H1](#), [ESS324H1](#), [ESS362H1](#), [ESS381H1](#),
[ESS391H1](#), [ESS392Y1](#), [GGR301H1/](#) [JEG301H1](#),
[GGR337H1/](#) [GGR315H1](#), [JGA305H1](#), [JPE395H1](#)
- Fourth-year Courses: [ESS410H1](#), [ESS423H1](#),
[ESS424H1](#), [ESS425H1](#), [ESS431H1](#), [ESS441H1](#),
[ESS445H1](#), [ESS450H1](#), [ESS461H1](#), [ESS481H1](#),
[ESS490H1](#), [ESS491H1/](#) [ESS492Y1](#)

Notes:

1. Advanced courses, like [CHM151Y1](#), [PHY151H1](#),
[MAT137Y1](#) or [MAT157Y1](#), can be used as credits
for both foundation sciences sections, meaning,
half of the credit will count for Compulsory
Foundation Sciences, and the other half will count
for Additional Foundation Sciences.
2. You may choose more than 2.5 credits from the
Additional Foundation Geosciences list. In that
case, the additional courses will count towards the
Other Geosciences.
3. You need a minimum of 4.0 credits of 300/400-
level courses
4. Students are advised to check the prerequisites of
the upper-year courses when deciding on their
2nd and 3rd-year-course selection.
5. Students who do not wish to attain APGO
certification are advised to speak to the Associate

Chair, Undergraduate Affairs concerning their
course selection.

Recommended Course Combinations:

Students interested in Mineral Exploration:

First Year: [BIO120H1](#), [CHM135H1](#), [CHM136H1](#),
[MAT135H1](#), [MAT136H1](#), [PHY131H1](#), [PHY132H1](#)

Second year: [ESS223H1](#), [ESS224H1](#) or [ESS221H1](#) and
[ESS222H1](#), [ESS234H1](#), [ESS241H1](#), [ESS245H1/](#)
[ESS345H1](#), [ESS262H1](#), [STA220H1](#)

Third Year: [ESS331H1](#), [ESS321H1](#), [ESS322H1](#),
[JGA305H1](#), [ESS311H1](#), [ESS324H1](#)

Fourth Year: [ESS423H1](#), [ESS424H1](#), [ESS431H1](#),
[ESS441H1](#), [ESS461H1](#), [ESS490H1](#), [ESS491H1](#),
[ESS492Y1](#)

Students with an interest in GIS and Geology:

First Year: [CHM135H1](#), [CHM136H1](#), [MAT135H1](#),
[PHY131H1](#), [PHY132H1](#), [CSC108H1](#)

Second year: [STA220H1](#), [ESS223H1](#), [ESS224H1](#),
[ESS234H1](#), [ESS241H1](#), [ESS262H1](#), [GGR272H1](#),
[GGR273H1](#), [MAT221H1](#)

Third Year: [ESS311H1](#), [ESS312H1](#), [ESS321H1](#),
[ESS322H1](#), [ESS331H1](#), [JGA305H1](#), [GGR315H1](#),
[GGR375H1](#), [GGR376H1](#), [ESS324H1](#)

Fourth Year: [ESS424H1](#), [ESS431H1](#), [ESS490H1](#),
[ESS491H1](#), [ESS492Y1](#), [GGR415H1](#), [GGR462H1](#),
[GGR472H1](#), [GGR473H1](#)

Geophysics Specialist (Science Program) - ASSPE1650

The Geophysics Specialist program allows students to model physical processes in and on Earth and other planets and to apply noninvasive methods of imaging the subsurface, often in 4D (i.e., space and time). Targets may range from archaeological investigations to groundwater imaging and mineral exploration, but also include modeling of mountain-building processes and the exploration of planetary bodies. Students are advised to be aware of course prerequisites, and consult the Earth Sciences Undergraduate Handbook. For further questions, please consult with the Student Affairs Coordinator (Scott Moore, Department of Earth Sciences, 22 Russell St. Earth Sciences Center, Room 1062 email: ugrad@es.utoronto.ca).

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(13.5 to 14.0 credits with at least 1.0 credit at the 400-level)

10.0 credits of core courses:

Foundation courses: [PHY131H1](#)/ [PHY151H1](#), [PHY132H1](#)/ [PHY152H1](#), ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#), [JEG100H1](#)/ [ESS262H1](#)

200-level physics, math, and earth sciences: [PHY250H1](#), [PHY254H1](#), [MAT224H1](#), [MAT235Y1](#)/ [MAT237Y1](#), [ESS224H1](#), [ESS241H1](#), [ESS245H1](#)/ [CSC108H1](#)/ [PHY224H1](#)

300-level global and near-surface geophysics: [JPE395H1](#), [JGA305H1](#)

400-level advanced geophysics, including field course: [PHY408H1](#), [JPE493H1](#), [ESS445H1](#), [ESS450H1](#), [ESS452H1](#)/ [ESS453H1](#)

0.5 to 1.0 credit ethics course chosen from the following list: [JPH441H1](#), [ENV333H1](#), [PHL273H1](#), [PHL275H1](#), [INS201Y1](#)

3.0 to 3.5 additional credits chosen from Groups A, B, and/or C:

Group A -- courses required and relevant for professional registration (APGO):

[CHM135H1](#), [STA220H1](#)/ [GGR270H1](#), [MAT223H1](#), [APM346H1](#), [ESS331H1](#), [ESS452H1](#)/ [ESS453H1](#)

Group B -- emphasis on physics (suitable for graduate school preparation in a physics program):

[PHY252H1](#), [PHY350H1](#), [PHY354H1](#), [PHY392H1](#), [PHY454H1](#)

Group C -- other relevant courses from physics, mathematics, or earth sciences:

[PHY224H1](#), [MAT335H1](#), [ESS234H1](#), [ESS311H1](#), [ESS312H1](#), [ESS313H1](#), [ESS321H1](#), [ESS322H1](#), [ESS381H1](#), [ESS391H1](#), [ESS392Y1](#), [ESS410H1](#), [ESS424H1](#), [ESS441H1](#), [ESS481H1](#), [ESS490H1](#), [ESS491H1](#)/ [ESS492Y1](#)

Earth and Environmental Systems Major (Science Program) - ASMAJ2745

In the Earth and Environmental Systems Major, students use multidisciplinary approaches to studying the large-scale interactions between the Earth and planetary systems over a broad spectrum of time-scales, addressing deep timescales of millions to billions of years as well as processes taking place in today's and in future worlds. Courses take an integrative approach to understanding interactions between the solid Earth, the biosphere, the atmosphere and the hydrosphere, addressing how these interactions have developed over geological, historical, and recent time periods. Themes of the program include biogeochemistry, paleoclimatology (e.g., drivers of Earth's natural climate variability), global environmental change, Quaternary science (e.g., understanding the ice ages) and Earth surface processes (e.g., evolution of landforms and sedimentary basins). This program provides broad context over time and space to better understand and provide solutions for the current issues of climate change, resource consumption and global pollution weighing heavily on people and societies. Students are advised to check course prerequisites, to review the clusters of courses listed, and to consult the Earth Sciences Undergraduate Handbook for logical course progressions. For further questions, please contact the Student Affairs Coordinator (Scott Moore, Department of Earth Sciences, 22 Ursula Franklin St. Earth Sciences Center, Room 1062 email: ugrad@es.utoronto.ca).

Keywords: Geoscience, Environment, Geology, Earth Sciences, Earth History, Evolution, Chemistry, Physics, Biology

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(8.0 credits including at least 2.0 credits at 300+ level with at least 0.5 credit at 400-level.)

1. 2.0 credits of foundation science courses selected from [BIO120H1](#)/ [BIO130H1](#), [CHM135H1](#), [CHM136H1](#), [PHY131H1](#), [PHY132H1](#), [MAT135H1](#), [ENV237H1](#)/ [ENV238H1](#)

2. 3.0 credits of ESS core courses:

- 1.0 credit chosen from the following courses: [JEG100H1](#) (Introduction to Physical Geography)/ [ESS262H1](#) (Earth System Processes), [ESS224H1](#) (Intro to Mineralogy and Petrology), [ESS241H1](#) (Geologic Structures and Maps)

- 1.0 credit at the 300-level:
 - Global Biogeochemical Cycles or Biogeography: [ESS363H1](#)/ [GGR305H1](#)/ [JEG305H1](#)
 - Sedimentation and Stratigraphy or Oceanography: [ESS331H1](#)/ [ESS362H1](#)
 - Aqueous Geochemistry or Hydrogeology: [ESS311H1](#)/ [ESS312H1](#)
- 0.5 credit of field courses: [ESS410H1](#) (Field Techniques in Hydrogeochemistry)/ [ESS450H1](#) (Geophysical Field Techniques)/ [GGR390H1](#) (Field Methods)
- 0.5 credit of capstone courses: [ESS461H1](#) (Paleoenvironmental Studies)/ [ESS464H1](#) (Biological Perspectives on Earth Systems Evolution)/ [ESS465H1](#) (Topics in Critical Zone Processes)

3. 3.0 credits of elective courses:

In addition to the above core courses, you need to take 3.0 credits of electives. This requirement can be satisfied by any of the Earth Sciences Courses listed in categories A to F below. The following clusters of courses are neither mutually exclusive nor meant to limit choice but intended to show logical course complements. These are not program requirements; rather the clusters are presented to aid students in course selection according to their interests.

a) Earth Surface Processes

[ESS224H1](#), [ESS241H1](#), [ESS245H1](#)/ [ESS345H1](#), [JGA305H1](#), [ESS311H1](#), [ESS331H1](#), [ESS445H1](#), [GGR201H1](#)/ [JEG201H1](#), [GGR205H1](#)/ [JEG205H1](#), [GGR272H1](#), [GGR301H1](#)/ [JEG301H1](#), [GGR406H1](#)/ [JEG406H1](#)

b) Paleoclimate

[ESS245H1](#)/ [ESS345H1](#), [ESS261H1](#), [ESS331H1](#), [ESS361H1](#), [ESS362H1](#), [ESS461H1](#), [ESS464H1](#), [EEB240H1](#)/ [ENV234H1](#), [GGR305H1](#)/ [JEG305H1](#)

c) Biogeochemistry

[ESS223H1](#)/ [ENV233H1](#), [ESS245H1](#)/ [ESS345H1](#), [ESS311H1](#), [ESS312H1](#), [ESS313H1](#), [ESS362H1](#), [ESS363H1](#)/ [ESS462H1](#), [ESS410H1](#), [ESS465H1](#)

d) Global Environmental Change

[ESS245H1](#)/ [ESS345H1](#), [ESS313H1](#), [JGA305H1](#), [ESS362H1](#), [ESS363H1](#)/ [ESS462H1](#), [ESS462H1](#), [ESS463H1](#), [ESS465H1](#), [GGR203H1](#), [GGR314H1](#), [PHY392H1](#), [GGR308H1](#)/ [JEG308H1](#), [GGR406H1](#)/ [JEG406H1](#)

e) Quaternary Science

[ESS224H1](#), [ESS245H1](#)/ [ESS345H1](#), [JGA305H1](#), [ANT314H1](#), [ANT315H1](#), [ANT409H1](#), [ANT419H1](#), [ESS461H1](#), [GGR201H1](#)/ [JEG201H1](#), [GGR301H1](#)/ [JEG301H1](#), [GGR406H1](#)/ [JEG406H1](#)

f) Other Relevant Courses

[ESS261H1](#), [ESS321H1](#), [ESS313H1](#), [ESS322H1](#), [ESS450H1](#), [GGR315H1](#), [ENV337H1](#), [JSC301H1](#), [ESS381H1](#), [ESS398H0](#)/ [ESS398Y0](#), [ESS424H1](#), [ESS481H1](#), [ESS490H1](#), [ESS491H1](#)/ [ESS492Y1](#)

Environmental Geosciences Minor (Science Program) - ASMIN1253

Enrolment Requirements:

Admission to the Environmental Geosciences Minor has been administratively suspended as of 1 April 2015 and is no longer admitting students. Students presently enrolled in the minor will be able to complete the program requirements as described below.

Completion Requirements:

(4 full courses or their equivalent; must include at least one full-course equivalent at the 300+-level)

1. [CHM136H1](#) ([CHM138H1](#))
2. [ENV233H1](#); [ESS221H1](#), [ESS222H1](#), [ESS311H1](#), [ESS312H1](#), [ESS410H1](#)

Geoscience Major (Science Program) - ASMAJ0509

The study of Earth Sciences integrates principles from physics, chemistry, and biology to illuminate a wide variety of natural phenomena. The major program exposes students to the foundations of the geoscience curriculum (mineralogy, petrology, geological structures and maps, field techniques, Earth evolution, etc.). Careers available are similar to those of the Geoscience Specialist although the Major gives more flexibility to someone wanting to minor or double major in another field. Students are advised to be aware of course prerequisites, check clusters of courses listed for the geoscience major program, and consult the Earth Sciences Undergraduate Handbook for logical course progressions. For further questions, please consult with the Student Affairs Coordinator (Scott Moore, Department of Earth Sciences, 22 Ursula Franklin St., Earth Sciences Center, Room 1062 email: ugrad@es.utoronto.ca).

Keywords: Geology, Paleontology, Earth History, Evolution

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(8.0 credits including at least 2.0 credits at 300+ level with at least 0.5 credit at 400-level.)

2.0 credits chosen from BIO120H1; (CHM135H1, CHM136H1); MAT135H1, MAT136H1, MAT137Y1; PHY131H1, PHY132H1

2.5 credits of core courses: JEG100H1/ ENV234H1/ EEB240H1/ ESS262H1, ESS223H1, ESS224H1/ ESS222H1, ESS241H1, ESS331H1

0.5 credit of field courses chosen from: ESS234H1/ ESS324H1/ ESS410H1/ ESS450H1

3.0 credits chosen from 300/400-level ESS/ JGA/ JPE courses. Note course progressions and prerequisites.

We suggest that students consider the following logical course clusters in their higher years:

(a) Earth/planetary materials and mineral resources: ESS321H1/ ESS221H1, ESS322H1, ESS323H1, ESS324H1, ESS431H1, ESS423H1, ESS424H1, ESS425H1, ESS441H1

(b) Tectonics: JGA305H1, ESS245H1/ ESS345H1/ CSC108H1/ CSC110Y1, ESS321H1, ESS322H1, ESS424H1, ESS441H1, ESS445H1

(c) Environmental biogeochemistry: ESS261H1, ESS311H1, ESS312H1, ESS313H1, ESS363H1, ESS410H1, ESS461H1

(d) Geoarchaeology: ESS261H1, JGA305H1, ESS461H1, ESS450H1

Geoscience Minor (Science Program) - ASMIN0509

The study of Earth Sciences (or “Geology” to use the Greek term) integrates the classical sciences of chemistry,

Earth Sciences Courses

JEG100H1 - Introduction to Physical Geography and Earth Science

Hours: 24L/12P

physics and biology, and applies their principles to a diverse range of processes on Earth and other planets, from landform evolution to plate tectonics all the way to the origin and evolution of life and geomicrobiology. The Geoscience Minor program aims to give students as much leeway as possible to choose particular interests within the diverse and dynamic field of Earth Sciences. Students are advised to check course prerequisites, to review the clusters of courses listed for the geoscience major program, and to consult the Earth Sciences Undergraduate Handbook for logical course progressions. For further questions, please contact the Student Affairs Coordinator (Scott Moore, Department of Earth Sciences, 22 Russell St. Earth Sciences Center, Room 1062 email: ugrad@es.utoronto.ca).

Keywords: Geology

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits, with at least 1.0 credit at the 300+ level.)

1. 1.0 credit of 100-level CHM, BIO, MAT or PHY courses.

2. 2.0 credits of 100- or 200-level ESS courses (excluding ESS103H1, ESS104H1, ESS105H1, and ESS205H1). It is however recommended to include at least ESS262H1/ EEB240H1/ JEG100H1 and ESS224H1.

3. 1.0 credit of 300/400-level ESS/JGA/JPE courses.

Be aware of course prerequisites, check clusters of courses listed for the geoscience major program, and consult the geology undergraduate handbook for logical course progressions.

This introduction to Physical Geography and Earth Sciences examines the atmosphere, lithosphere, hydrosphere, cryosphere and biosphere, emphasizing processes, flows of energy and materials, and the interconnectedness of these Earth systems. Specific topics include weather and climate, earth materials, geological and geomorphic processes involved in the genesis of landforms, river systems, glaciers, soils, and biomes.

Exclusion: GGR100H1, ESS102H1, EESA06H3

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS103H1 - Geology in Public Issues

Hours: 24L

Geologic hazards: earthquakes, volcanoes, landslides, tsunamis. The distribution and politics of natural resources, including petroleum and ore deposits. Nuclear power and nuclear waste disposal. Global change: the geologic record of hot and cold climates, and how the earth survives. ESS103H1 is primarily intended as a science Distribution Requirement course for Humanities and Social Science.

Exclusion: GLG103H1, ERS103H5

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS104H1 - Controversies in Earth Science

Hours: 24L

The evolution of ideas about the origin and development of the earth from the Athenians to the 20th Century, with attention on the age of earth; on the evolution and disappearance of species; on the origin of oceans, continents and mountains; on climate change; and on the courage of scientists in confronting the religious and political views of their time. ESS104H1 is primarily intended as a science Distribution Requirement course for Humanities and Social Science students. Taught in even years.

Exclusion: GLG105H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS105H1 - Our home planet

Hours: 24L

The nature and evolution of the Earth; plate tectonics; rocks and minerals; volcanism; geological time; fossils; geology of Ontario; environmental issues; and human interactions with the planet. ESS105H1 is primarily intended as a science Distribution Requirement course for Humanities and Social Science students

Exclusion: GLG110H1, EESA06H3

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS196H1 - Life and Death in the Solar System

Previous Course Number: PMU199H1

Hours: 24L

Earth is the only planet in the solar system known to support life. Through directed readings, seminars, videos and lab visits, participants in this course will work with instructors whose own research tackles important questions concerning the origin of life on earth; the limits to life on this planet; implications for life under extreme conditions elsewhere in the solar system; and the life cycles of the planets themselves. The course will involve reading of scientific literature, student-led discussions, oral presentations and research projects, as well as potential field trips to sites in Southern Ontario. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS197H1 - Earth and Life through Time

Previous Course Number: PMU199H1

Hours: 24L

This seminar will look through the lens of earth history to explore drivers of change in the biosphere and the impacts of these changes. We will focus on episodes of mass extinction, and the spectacular landscape changes and speciation events which often followed. Abrupt or gradual climatic changes, massive volcanism, asteroid impacts, catastrophic carbon releases, and human activity will be evaluated as the causes of major extinction events in Earth history. The course will involve reading of scientific literature, student-led discussions, oral presentations and research projects, as well as potential field trips to sites in Southern Ontario. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS198H1 - Resources and Sustainability

Previous Course Number: PMU199H1

Hours: 24L

The rise of humanity is intricately linked to the exploitation of natural resources. From its earliest attempts to use fire and extract metals from rocks, to coal-fired steam that brought the industrial revolution, hydrocarbons that fuel

international travel and trade, nuclear energy to produce electricity, and the reliance on smartphones in our daily lives, the planet's resources have brought innovation and problems and require us to ask questions regarding sustainability. This course will explore the gamut from resource extraction and trading, to its societal consequences including global politics, environmental pollution, and remediation. The course will involve reading of scientific literature, student-led discussions, oral presentations and research projects, and potentially field trips to sites in Southern Ontario. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS199H1 - Earth Science Perspectives on Human Origins

Hours: 24L

Archaeologists and paleontologists depend on earth science to provide the contextual information that is essential to our understanding of human evolution. Among the topics this course will examine are the methods used to determine the age of discoveries, approaches to understanding the environments human ancestors lived in, and how geologists unravel site formation processes. Our discussions will include the role of fire in human evolution, the adaptations of Neanderthals, and the timing of the first appearance of modern humans. The course will be structured around key research localities including Hadar, the Cradle of Humankind, Olduvai Gorge, Wonderwerk Cave, Kebara Cave, Hohlefelds, and Pinnacle Point. The course will involve reading of scientific literature, student-led discussions, oral presentations and research projects. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

JEG201H1 - Geomorphology

Previous Course Number: GGR201H1

Hours: 24L/8P

This course introduces the principles of geomorphology, including the landforms and processes associated with water, wind, waves, and ice, as well as the human impacts on earth surface processes. Laboratory sessions occur irregularly during the semester to introduce assignments and provide support. A local field trip may be offered (transportation and entrance cost: approximately \$26).

Exclusion: GGR201H1, GGR201H5

Recommended Preparation: JEG100H1

Breadth Requirements: The Physical and Mathematical Universes (5)

JEG205H1 - Introduction to Soil Science

Previous Course Number: GGR205H1

Hours: 24L/4P

This course introduces the fundamentals of soil science, including the chemical, physical, and biological properties of soils as well as soil formation and development, the classification of soils, and the applications of soil science. A field trip may be offered (transportation cost: approximately \$26).

Exclusion: GGR205H1

Recommended Preparation: CHM136H1, CHM135H1, JEG100H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS205H1 - Confronting Global Change

Hours: 24L/8T

The emergence of society as a major geological force is considered in terms of the evolving debate about the consequences of human activity for the habitability of our planet. Major issues such as climate change, environmental pollution, and depletion of natural resources are examined.

Prerequisite: Completion of at least 4.0 credits

Exclusion: GLG205H1, ERS321H5, EEB208H1

Breadth Requirements: Living Things and Their Environment (4)

JEG206H1 - Introduction to Hydrology

Previous Course Number: GGR206H1

Hours: 30L/4P

Introduction to the hydrologic cycle with emphasis on the physical processes, including precipitation, interception, evaporation, runoff, ground water and soil water. Basic hydrological models will be practiced. Potential field trip, cost: approximately \$21.

Exclusion: GGR206H1

Recommended Preparation: JEG100H1; MAT135H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS223H1 - Introduction to Geochemistry

Previous Course Number: ENV233H1

Hours: 24L/24T

This course introduces students to the basic principles of geochemistry that are used to understand Earth system processes. Topics will include the origin and distribution of elements and isotopes on Earth, mineral compositions, phase diagrams, weathering, and aqueous geochemistry. The course will also cover the thermodynamic and kinetic principles that govern chemical reactions in nature.

Prerequisite: MAT135H1, CHM135H1

Exclusion: ENV233H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS224H1 - Introduction to Mineralogy and Petrology

Hours: 24L/48P

An introduction to atomic structure, chemistry, physical properties, and geological significance of rock-forming minerals and rocks. Field techniques and core concepts to identify important minerals and rocks in hand specimens and place them into their geological context. The development of practical skills is emphasized.

Prerequisite: JEG100H1/ ESS262H1

Recommended Preparation: CHM135H1, PHY131H1, MAT135H1. For Mineral Engineering students, recommended preparation is MAT186H1 and CHE112H1.

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS234H1 - Introduction to Geological Field Methods

Previous Course Number: ESS330H1

A two-week field course in early May or late August. Students are introduced to field geology and to basic field measurement, mapping and documentation techniques (for example in the Espanola - Manitoulin Island area, west of Sudbury). Students are responsible for the cost of board and lodging and transport to and from the field area. Not eligible for CR/NCR option. Note: Enrollment is handled by the department. For registration deadlines, additional fees associated with the field course, course dates, and special registration requirements, please consult the departmental announcements or inquire with ugrad@es.utoronto.ca. Additional fee of up to \$918 will apply.

Prerequisite: ESS224H1/ ESS222H1, ESS241H1, ESS262H1/ JEG100H1

Exclusion: ESS330H1, GLG340H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS241H1 - Geologic Structures and Maps

Hours: 24L/36P

Field observations, description and classification of geological structures: stratigraphic and intrusive contacts, unconformities; relative age determination; folds and fold systems; faults and fault systems; boudinage, foliations and lineations; spherical projections and mechanical principles (stress, strain, rheology). Practical work focuses on reading geological maps, constructing cross-sections, and interpreting both in terms of geological processes and histories.

Exclusion: GLG345H1, EESC37H3

Recommended Preparation: JEG100H1/ ESS262H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS245H1 - Computational Geology

Previous Course Number: ESS345H1

Hours: 24L/1T/30P

A practical introduction to programming. This course will teach an operational knowledge on how to write and execute self written computer programs. Course topics touch upon using a computer without a graphical interface, using an integrated development environment, programming, documenting, debugging, reading and writing data, graphical output, how to navigate existing documentation and internet resources, and last but not least how to effectively ask for help. Students will work individually and in small groups in an inverted classroom setting on earth science related problem sets. Previous programming experience is not required.

Prerequisite: 1.0 credit from first-year math, or physics courses except MAT193H1, MAT198H1, MAT199H1, PHY196H1, PHY197H1, PHY198H1, PHY199H1

Exclusion: CSC108H1, ESS345H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS261H1 - Earth System Evolution

Hours: 24L/36P

Interrelationships between Earth's atmosphere, hydrosphere, geosphere and biosphere through time; including patterns of evolution and extinction as they are related to changes at the earth's surface and recorded in the rock record. Laboratories cover major groups of fossils, their classification, use in biostratigraphy, and living analogues. NOTE: ESS261H1 and ESS262H1 may be taken in either order; and both are required for advanced courses.

Exclusion: GLG217H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS262H1 - Earth System Processes

Hours: 24L/24P

An introduction to how our planet works, focusing on physical processes that govern the nature and composition of Earth with an emphasis on the dynamic nature of the planet. Topics include surface processes (e.g., weathering and erosion, ocean and atmospheric circulation, weather and climate), crustal processes (e.g., plate tectonics, earthquakes, volcanoes, biogeochemical cycles), and earth-environment interactions (e.g., natural hazards, resource development, and sustainability).

Exclusion: JEG100H1

Recommended Preparation: PHY131H1/ CHM138H1/ BIO120H1. For Mineral Engineering students, recommended preparation is MAT186H1 and CHE112H1.

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

ESS299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

JEG301H1 - Fluvial Geomorphology

Previous Course Number: GGR301H1

Hours: 24L/4P

Elements of drainage basin morphology and hydrology, classification of rivers, stream patterns and hydraulic geometry. Elements of open channel flow, sediment transport and the paleohydrology of river systems. River channel adjustments to environmental change, human impact and the management/design of river habitats. Exercises include experimentation in a laboratory flume. A field trip may be offered (at no cost). **Course usually offered every other year.**

Prerequisite: GGR201H1/ JEG201H1. Students who do not meet the prerequisite are encouraged to contact the instructor.

Exclusion: GGR301H1

Recommended Preparation: 9.0 credits including JEG100H1/ GGR100H1 and ECO220Y1/ ECO227Y1/ EEB225H1/ GGR270H1/ GGR270Y1/ LIN305H1/ POL222H1/ POL242Y1/ PSY201H1/ SOC202H1/ STA220H1/ STA248H1/ STA250H1/ STA261H1

Breadth Requirements: The Physical and Mathematical Universes (5)

JEG305H1 - Biogeography

Previous Course Number: GGR305H1

Hours: 24L

Biogeography aims to identify and explain patterns of plant and animal distributions through space and time. This course considers topics including ecological and evolutionary dynamics, dispersal, migration, plate tectonics, speciation, extinction, paleoenvironments, and island biogeography. We will examine terrestrial and marine biomes, the meaning of biodiversity, conservation challenges, and recent biogeographic changes associated with human activities.

Prerequisite: 9.0 credits

Exclusion: GGR305H1, GGR305H5

Recommended Preparation: JEG100H1 or (BIO120H1, BIO130H1)

Breadth Requirements: Living Things and Their Environment (4)

JGA305H1 - Environmental and Archaeological Geophysics

Hours: 24L/12P

Application of near-surface geophysical methods to investigate environmental and archaeological sites; in particular magnetometry, resistivity, ground-probing radar,

and seismic surveys. Course will cover background on the various methods, and allow students to run field surveys and present on case studies.

Prerequisite: [ESS241H1](#)/ [ESS262H1](#)/ ([ANT200Y1](#)/ [ARH100Y1](#))/ [GGR201H1](#)/ [PHY224H1](#)/ [PHY250H1](#)/ [PHY254H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

JEG308H1 - Canadian Arctic Environments

Previous Course Number: GGR308H1

Hours: 24L

This course explores the unique physical geography of Canada's Arctic regions by covering topics on climate, the cryosphere, hydrology, geomorphology, and ecosystems. Throughout the course, we will consider the impacts of climate change in communities, landscapes, and ecosystems in Arctic regions.

Prerequisite: 9.0 credits

Exclusion: [GGR308H1](#)

Recommended Preparation: [JEG100H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS311H1 - Aqueous Geochemistry

Hours: 24L/24P

An introduction to aqueous environmental geochemistry emphasising the importance of chemical equilibria, mass transport, and microbiological activity in regulating the chemical composition of natural and contaminated systems.

Prerequisite: [CHM135H1](#)/ [CHM151Y1](#), [MAT135H1](#)

Exclusion: [GLG351H1](#)

Recommended Preparation: [ESS223H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS312H1 - Hydrogeology

Hours: 24L/24P

This course covers groundwater formation, flow and transport, the role of groundwater in geologic processes, and physical, chemical and biological constraints on transport and attenuation of chemicals in groundwater.

Exclusion: [GLG450H1](#)

Recommended Preparation: [ESS262H1](#), [ESS311H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS313H1 - Contaminants, Environment, Geoethics

Hours: 36L

One of humanity's key challenges is growing environmental pollution by a wide range of contaminants entering the environment from anthropogenic activities, including mining (even for critical minerals needed for "green energy"), agriculture, land use change, and industry. Topics covered will include the sources, transport and fate of inorganic and organic contaminants using geochemical, geobiological, and geophysical lenses. Students will investigate the need for mining, remediation and mitigation strategies, and will discuss ethical issues related to activities that lead to contaminant releases and their impact on human and environmental health.

Prerequisite: [JEG100H1](#)/ [ESS262H1](#)/ [ESS311H1](#)/ [JGA305H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS321H1 - Mineralogy

Previous Course Number: ESS221H1

Hours: 24L/36P

Systematic mineralogy (including identification, classification, and description); physical and chemical properties of minerals; crystallography and crystal systems (symmetry, crystal structure, crystal systems); optical techniques in mineral identification.

Prerequisite: [ESS224H1](#), [ESS234H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS322H1 - Igneous Petrology

Hours: 24L/36P

An overview of the nature and origin of igneous rocks, with particular emphasis on the interpretation of textures and mineral assemblages as they reflect rock-forming processes. Topics include the physical and chemical properties of magma, origin, and evolution of different magmatic series in specific igneous/tectonic

environments, geochemical and isotopic characteristics of igneous rocks, and the assimilation, fractionation & crystallization processes.

Prerequisite: ESS224H1, ESS321H1/ ESS221H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS324H1 - Advanced Geological Field Methods

Previous Course Number: ESS420H1

A two-week advanced geological mapping project in a challenging field environment. Students learn to compile existing geoscience data, create a geological map and prepare a professional final report on their activities and findings. Not eligible for CR/NCR option. For registration deadlines, additional fees associated with the field course, course dates, and special registration requirements, please consult the departmental announcements or inquire with ugrad@es.utoronto.ca. Additional fee of up to \$918 will apply.

Prerequisite: ESS322H1, ESS234H1/ ESS330H1

Exclusion: ESS420H1, GLG445H1

Recommended Preparation: ESS323H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS331H1 - Sedimentation and Stratigraphy

Hours: 24L/36P

Formal principles of stratigraphy, types of stratigraphic unit, methods of dating and correlation (biostratigraphic methods, magnetostratigraphy, radiometric dating). Methods of study in surface and subsurface (outcrop measurement, elementary introduction to wireline logs, seismic methods). The principles of facies analysis; sediment transport - sedimentary structures, the flow regime, and sediment gravity flows. The carbonate factory and carbonate rock classification. Trace fossils. Laboratory exercises in understanding facies mapping, isopachs and isolith maps.

Prerequisite: ESS224H1

Exclusion: GLG360H1, ERS211H5, ERS313H5

Recommended Preparation: ESS222H1, ESS234H1/ ESS330H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS362H1 - Oceanography

Hours: 24L/24P

An introduction to the physical, geological, chemical, and biological processes governing the world's oceans. The course emphasizes critical thinking, environmental issues, and interrelationships among scientific disciplines.

Prerequisite: Completion of 8.0 credits

Recommended Preparation: 1.0 credit from: PHY131H1/ PHY132H1/ CHM135H1/ CHM136H1/ BIO120H1/ MAT135H1 and ESS261H1/ ESS262H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS363H1 - Global Biogeochemical Cycles

Previous Course Number: ESS462H1

Hours: 36L

Exchange of energy and matter (elements and minerals) between the Earth's atmosphere, ocean, biosphere, and geosphere. Course-related topics include global biogeochemical cycling of carbon, nitrogen, phosphorous, silicon, iron, and zinc (amongst other elements) and will include both terrestrial and marine ecosystems. Examples and case studies will be viewed from the paleo-, contemporary and potential future global change perspectives.

Prerequisite: 8.0 credits including JEG100H1/ ESS223H1/ ESS262H1/ ESS261H1 and 1.0 credit from: PHY131H1/ PHY132H1/ CHM135H1/ CHM136H1/ MAT135H1/ MAT136H1

Exclusion: ESS462H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS381H1 - Special Topics in Earth Science

Hours: 24L/24P

A survey of current thinking in Earth science. Topics may include isotope geochemistry, ore genesis, or planetary remote sensing.

Prerequisite: Minimum of 1.0 credit in ESS/ JEG/ JGA/ JPE courses at the 200+level

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS391H1 - Directed Studies

An individual study program chosen by the student with the advice, and under the supervision, of a faculty member. Such work may involve obtaining data in the field or lab and analyzing it, an interdisciplinary research project, and supervised readings. Not eligible for CR/NCR option.

Prerequisite: Enrolment in an Earth Science program of study, completion of at least 1.0 credit of 200-level ESS/ JEG/ JGA/ JPE courses.

Exclusion: GLG371H1

ESS392Y1 - Directed Studies

An individual study program chosen by the student with the advice, and under the supervision, of a faculty member. Such work may involve obtaining data in the field or lab and analyzing it, an interdisciplinary research project, and supervised readings. Not eligible for CR/NCR option.

Prerequisite: Enrolment in an Earth Sciences Program of Study, completion of at least 1.0 credit of 200-level ESS/ JEG/ JGA/ JPE courses.

Exclusion: GLG372Y1

JPE395H1 - Physics of the Earth

Hours: 24L

Designed for students interested in the physics of the Earth and the planets. Study of the Earth as a unified dynamic system; determination of major internal divisions in the planet; development and evolution of the Earth's large scale surface features through plate tectonics; the age and thermal history of the planet; Earth's gravitational field and the concept of isostasy; mantle rheology and convection; Earth tides; geodetic measurement techniques, in particular modern space-based techniques.

Prerequisite: PHY132H1/ PHY152H1/ PHY180H1/ MIE100H1, MAT235Y1/ MAT237Y1/ MAT291H1/ AER210H1, PHY254H1/ PHY293H1/ MAT244H1/ MAT267H1/ MAT290H1/ MAT292H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research>

-opportunities/research-excursions-program. Not eligible for CR/NCR option.

ESS398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research> -opportunities/research-excursions-program. Not eligible for CR/NCR option.

Exclusion: GLG399Y0

ESS399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research> -opportunities/research-opportunities-program. Not eligible for CR/NCR option.

JEG406H1 - Geomorphology and the Anthropocene

Previous Course Number: GGR406H1

Hours: 12L/12S

In this seminar course, we will use lectures, readings, and classroom activities to investigate the ways in which Earth's surface has been impacted by humans while considering the role of geomorphology as a science for understanding these changes.

Prerequisite: GGR201H1/ JEG201H1

Exclusion: GGR406H1

Recommended Preparation: 9.0 credits, GGR272H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS410H1 - Field Techniques in Environmental Geosciences

A ten-day field course in late summer at the Deep River field site designed to familiarize students in a variety of hydrogeological and biogeochemical field techniques; includes a mixture of lecture, laboratory and field exercises. Not eligible for CR/NCR option. Note: Enrollment is handled by the department. For registration deadlines, additional fees associated with the field course, course dates, and special registration requirements,

please consult the departmental announcements or inquire with ugrad@es.utoronto.ca. Additional fee of up to \$918 will apply.

Prerequisite: 1.5 credits at the 300- or 400-level from EES/ JEG/ JGA/ JPE courses

Exclusion: [GLG448H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS423H1 - Mineral Deposits

Hours: 24L/36P

This course investigates the geochemistry, geology, and mineralogy of mineral systems. Practical skills that will be developed include identification of ore and gangue minerals in hand and polished sections as well as understanding ore systems from source to the deposit. This will be of interest to students interested in a career in mineral exploration and mining as it will lead to an increased understanding of mineral systems, skills used in mineral exploration, and how to use these to find mineral deposits. Additionally, it will be of interest to students interested in environmental science as it will teach identification of ore minerals and associated minerals that are important for assessing and developing remediation techniques for acid mine drainage sites. Finally, it will be of interest to students interested in geochemistry as we will investigate high temperature reactions between fluids and wallrocks.

Prerequisite: [ESS322H1](#)/ [ESS323H1](#)

Exclusion: [GLG442H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS424H1 - Metamorphic Petrology

Previous Course Number: ESS323H1

Hours: 24L/36P

This course provides a basic understanding of the formative processes of metamorphic rocks through quantitative applications of simple thermodynamic and kinetic principles. Topics include processes of heat and mass transport in orogenic belts, fluid-rock interaction in metasomatic systems, pressure-temperature-time paths of metamorphic rocks, temporospatial patterns of metamorphism through geologic time, and metamorphism in extreme conditions.

Prerequisite: [ESS222H1](#)/ [ESS224H1](#), [ESS221H1](#)/ [ESS321H1](#)

Exclusion: [ESS323H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS425H1 - Advanced Methods in the Geosciences

Hours: 24L/36P

Theory and operation of current analytical techniques applicable to geological and environmental analysis. In each lab, students receive instruction from an experienced analyst and acquire hands-on experience using state-of-the-art analytical equipment. Techniques covered include X-ray Fluorescence, X-ray Diffraction, Electron Probe Microanalysis, Scanning Electron Microscopy, Ion Chromatography, Atomic Absorption spectrometry, Inductively Coupled Plasma Mass Spectrometry, and Raman spectroscopy.

Prerequisite: 10.0 credits, of which 2.0 credits must be 300+ level ESS/ JEG/ JGA/ JPE courses

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS431H1 - Basin Analysis

Previous Course Number: ESS332H1

Hours: 24L/36P

Detailed study of each of the major sedimentary environments. Typical facies assemblages, cyclic sedimentation. Autogenic and allogenic processes. The principles of sequence stratigraphy. The history of the sequence concept; systems tracts and bounding surfaces. Sequence models. What causes sequences: mechanisms of change in base level and accommodation: – tectonism, climate change, eustatic sea-level change.

Prerequisite: [ESS331H1](#)

Exclusion: [GLG430H1](#), [ESS332H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS441H1 - Advanced Structural Geology

Hours: 24L/24P

Principles of geological mechanics: stress, strain, rheology. Faulting, folding and development of tectonic foliations and lineations. Structural analysis of fractures, folds and tectonites.

Prerequisite: [ESS234H1](#), [ESS241H1](#)

Recommended Preparation: [ESS321H1](#), [ESS322H1](#), [ESS323H1](#), [ESS331H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS445H1 - Global Tectonics

Hours: 24L/24P

Exploration of physical Earth processes and their relationship to large-scale geological phenomena. Mantle convection as plate tectonic engine; intraplate/plate boundary lithospheric deformation including orogenesis and crustal subsidence. Focus on reconciling geodynamic theory/modelling with geological/geophysical observations.

Exclusion: GLG465H1

Recommended Preparation: ESS241H1, ESS322H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS450H1 - Geophysical Field Techniques

A ten-day field course in late August at the Deep River field site. Students get hands-on experience using geophysical instrumentation, applying various data collection techniques, and performing data analysis in gravity, magnetic, seismic, electrical, electromagnetic, and radar surveys. Not eligible for CR/NCR option. Note: Enrollment is handled by the department. For registration deadlines, additional fees associated with the field course, course dates, and special registration requirements, please consult the departmental announcements or inquire with ugrad@es.utoronto.ca. Additional fee of up to \$918 will apply.

Recommended Preparation: JGA305H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS452H1 - Electrical and Electromagnetic Imaging

Hours: 24L

Resistivity, induced polarization, self-potential, and electromagnetic methods are commonly used for mineral exploration and environmental surveys. Students will learn the theory and application of Maxwell's equations on which these methods are based, and apply this understanding to analysing and interpreting data acquired with these methods. Geophysicists use these methods to image the Earth to depths ranging from several meters to tens of kilometers.

Prerequisite: (

MAT135H1, MAT136H1)/ MAT137Y1, MAT224H1, PHY250H1, JGA305H1

Recommended Preparation: ESS245H1, APM346H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS453H1 - Gravity and Magnetism

Hours: 24L

Earth's gravity and magnetic fields provide geophysicists with natural sources to collect data from which they may answer questions related to resource exploration and anthropogenic (archaeology, forensic, environmental) targets. Students will learn about potential theory, data transformation (eg, filtering, upward continuation, analytical signal, reduction-to-the-pole), and apply forward modeling and inversion methods to potential field data.

Prerequisite: (MAT135H1, MAT136H1)/ MAT137Y1, MAT224H1, JGA305H1, PHY254H1

Recommended Preparation: ESS245H1

ESS461H1 - Palaeoenvironmental Studies

Hours: 24L/24P

The use of proxy data (terrestrial and aquatic microfossils) to infer past environmental conditions. The nature and extent of Quaternary environmental change is considered in the context of assessing current issues such as acidification, metal pollution, eutrophication and global climate change. Palaeoenvironmental techniques are applied in the laboratory.

Prerequisite: ESS261H1

Exclusion: GLG436H1

Recommended Preparation: ESS362H1, ENV233H1

Breadth Requirements: Living Things and Their Environment (4)

ESS464H1 - Biological Perspectives on Earth System Evolution

Hours: 24L

A seminar course focussing on ways that the Earth's biosphere (terrestrial and marine) has altered the overall functioning of the Earth System over geological time, including (1) influence of terrestrial vegetation on surface processes such as palaeosol development, river geomorphology, erosion, and cycling of major biogeochemical nutrients on land, (2) influence of the

marine biosphere on the concentration of O₂ and CO₂ in the atmosphere, including the origin of the stratospheric ozone layer, and (3) the interactive influence of the terrestrial and marine biosphere on atmospheric moisture transport, production of latent relative to sensible heat fluxes, and the development of the planetary boundary layer. Offered in alternate years.

Prerequisite: ESS261H1/ ESS262H1, ESS361H1/ ESS362H1/ GGR305H1 or permission of the instructor

Breadth Requirements: Living Things and Their Environment (4)

ESS465H1 - Topics in Critical Zone Processes

Hours: 24L

An in-depth look at a significant aspect of the Earth system. The "critical zone" -- defined as the outer layer reaching from the treetops into the weathered bedrock where rock, water, air and life interact -- is crucial to life and habitats, food production, water quality, and regulating climate. Topics will vary depending on instructor expertise, who may focus on biosphere-atmosphere interactions, or microbiologically driven cycling of energy and matter in the subsurface. Emphasis will be placed on approaches to quantitatively model interactions and reading of primary scientific literature.

Prerequisite: ESS363H1/ ESS362H1 and 9.5 credits from any ESS/ JEG/ JGA/ JPE/ MAT/ PHY/ JPH/ CHM/ JCC/ JSC/ EEB/ EHJ/ JHE/ GGR/ JGU/ JUG/ JGE/ JIG/ JGC courses

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS481H1 - Advanced Topics in Earth Sciences

Hours: 24L/24P

This course is offered on an irregular basis, typically in the winter term. Students are advised to consult the departmental notices with respect to course times and content, but should expect an in-depth study of modern earth science questions, for example mineralogy and material science, advanced petrology, or exploration geochemistry. Course instructors will often, but not always, be recruited from Industry.

Prerequisite: Appropriate 300-level ESS/ JEG/ JGA/ JPE courses. Prerequisites change from year to year; consult Department for details.

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS490H1 - Geological Capstone Fieldtrip

The capstone course is an opportunity to integrate your collected knowledge of geology, geophysics, and environmental geoscience in an exciting and varied field setting. You will use information gathered across a variety of field sites to examine how Earth processes have shaped the larger Earth system, and how this has influenced humans. Most past trips were run for two weeks during the summer months and explored Scotland, Hawaii, Newfoundland, Labrador, or the southwestern USA; future sites and dates will vary depending on instructor and destination. Note: Enrollment is handled by the department. For registration deadlines, additional fees associated with the field course, course dates, and special registration requirements, please consult the departmental announcements or inquire with ugrad@es.utoronto.ca. Additional fee of up to \$988 may apply.

Prerequisite: 12.0 credits from any Earth Science program of study requirements. Students who do not meet the prerequisite are encouraged to contact the instructor.

Exclusion: GLG420H1

Recommended Preparation: ESS221H1/ ESS224H1, ESS262H1, ESS222H1, ESS234H1, ESS331H1, ESS423H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS491H1 - Undergraduate Thesis Project

Research emphasising methods used in field and experimental work. Students must obtain the consent of an instructor and register with the undergraduate coordinator and are urged to do so toward the end of their third year. In addition to submitting a thesis, students are required to give an oral presentation of their research results to an open meeting of the department. Not eligible for CR/NCR option.

Prerequisite: Completion of the required 300-level courses, and enrollment in a relevant program and permission of the department.

Exclusion: GLG471H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ESS492Y1 - Undergraduate Thesis Project

Research emphasising methods used in field and experimental work. Students must obtain the consent of an instructor and register with the undergraduate coordinator and are urged to do so toward the end of their third year. In addition to submitting a thesis, students are

required to give an oral presentation of their research results to an open meeting of the department. Not eligible for CR/NCR option.

Prerequisite: Completion of the required 300-level courses in an appropriate program and permission of the department.

Exclusion: GLG470Y1

Breadth Requirements: The Physical and Mathematical Universes (5)

JPE493H1 - Seismology

Hours: 24L

Why do earthquakes occur and how are they related to tectonic motion of the Earth's surface? What is the physics

behind the propagation of seismic waves through the Earth, and how can it be used to determine the internal structures of the Earth? This introductory course is aimed at understanding the physics behind seismic wave propagation, as well as asymptotic and numerical solutions to the elastodynamic equation. Travel time and amplitude of seismic waves are discussed based on seismic ray theory, while numerical methods are introduced to obtain accurate solutions to more complex velocity structures. Seismic tomographic methods, including their applications to hydrocarbon reservoir imaging, are also covered.

Prerequisite: JPE395H1/ JGA305H1, MAT244H1/ MAT267H1

Recommended Preparation: ESS245H1

Breadth Requirements: The Physical and Mathematical Universes (5)

Introduction

The Department of East Asian Studies offers students the opportunity to develop a deeper understanding of the history, cultures, and languages of premodern, modern, and contemporary East Asia. The department's course offerings engage the diversity of East Asian cultures, from contemporary film and politics to ancient philosophy, and they critically examine the structures that define the area and render it an object of study. We offer a full range of courses on East Asian literature, history, thought, religion, and society, as well as Chinese, Japanese, and Korean language courses from beginning to advanced levels. In a time of globalization, a degree in East Asian Studies can be an excellent springboard from which to launch a career in fields where bilingualism, critical analytical skills, and in-depth knowledge of the socio-historical and cultural contexts of East Asian texts and ideas are essential. Our Major and Specialist programs build the foundation for careers in teaching and research, international business and law, foreign service, and cultural institutions.

Students seeking advice on course selection or academic progress should contact the Undergraduate Coordinator, but all members of the Department will be happy to provide advice and information about their course offerings. In conjunction with Woodsworth College, the Department offers courses during June and July at the University of Hong Kong, and through the Centre for International Experience, participates in exchange programs with universities in China, Korea, Japan, Taiwan, and Singapore.

General Enquiries: Robarts Library, 14th Floor, (416) 978-0023, eas.undergrad@utoronto.ca, www.eas.utoronto.ca

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The East Asian Studies programs impacted by the policy: [ASSPE1058](#), [ASMAJ1058](#), and [ASMIN1058](#)

East Asian Studies Programs

East Asian Studies Specialist (Arts Program) - ASSPE1058

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Completion of the program requires 10.0 credits, meeting the following requirements:

1. EAS103H1 and EAS105H1, normally taken in the first year;
2. EAS209H1, highly recommended to be taken in the second year;
3. At least third-year proficiency in Chinese, Korean or Japanese, either by completing an appropriate language course (e.g., EAS300Y1/ EAS310Y1/ EAS320Y1 or a 400-level language course) or by demonstrating the required proficiency in the initial placement. Students whose placement assessment exempts them from the requirement must substitute Society-Culture courses or courses in one of the other languages offered;
4. A minimum of 5.0 Society-Culture credits, with at least 4.0 credits at the 300-level or above, of which at least 1.0 credit must be at the 400-level;
5. Additional EAS courses to a total of 10.0 credits; and
6. 2.5 credits may be courses on East Asia offered by other departments.

Note: First-year students should take EAS103H1 and EAS105H1, a first-year language course (unless placed in an upper-year language course by the department), and may take up to 1.0 Society-Culture credit at the 200-level.

East Asian Studies Major (Arts Program) - ASMAJ1058

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

Completion of the program requires 7.0 credits, meeting the following requirements:

1. EAS103H1 and EAS105H1, normally taken in the first year;
2. EAS209H1, highly recommended to be taken in the second year;
3. At least second-year proficiency in Chinese, Korean or Japanese, either by completing an appropriate language course (e.g., EAS201H1/ EAS200Y1/ EAS210Y1/ EAS211Y1/ EAS212H1/ EAS220Y1/ EAS221H1 or a higher level language course) or by demonstrating the required proficiency in the initial placement. Students whose placement assessment exempts them from the requirement must substitute Society-Culture courses or

courses in one of the other languages offered;

4. A minimum of 3.0 Society-Culture credits, with at least 2.0 credits at the 300-level or above, of which at least a 0.5 credit must be at the 400-level;

5. Additional EAS courses to a total of 7.0 credits; and

6. 1.5 credits may be courses on East Asia offered by other departments.

Note: First-year students should take EAS103H1 and EAS105H1, a first-year language course (unless placed in an upper-year language course by the department), and may take up to 1.0 Society-Culture credit at the 200-level.

East Asian Studies Courses

EAS First-Year Foundations

EAS193H1 - What is “The Yellow Peril”?

Hours: 24L

This course explores the old and new reincarnations of “the Yellow Peril” complex. The 2020 naming of COVID-19 as “the Chinese virus” by the U.S. president Donald Trump has provoked much anger, criticism, and concerns for anti-Asian violence and the reargitation of “The Yellow Peril” panic. Yet the imaginaries of “the Yellow Peril” and their power effects have been engrained in our political modernity, the Enlightenment ideas, and its institutions in a much more complex, far-reaching, and intersecting ways in East Asia and beyond. The course will explore various types of cultural productions, including history,

Faculty of Arts & Science Language Citation

The Department of East Asian Studies participates in the Faculty of Arts & Science’s Language Citation initiative for Chinese, Japanese, and Korean. The study of any of these languages is a challenging and time-consuming endeavour, which offers rich rewards for students interested in the cultures, societies, and economies of East Asia.

The Language Citation recognizes a significant level of achievement in language study with a high level of academic success. The Language Citation is available to students who achieve a B- or above in 2.0 credits beyond the first-year course in a language. The following courses count towards a Language Citation:

- Chinese – EAS200Y1, EAS201H1, EAS300Y1, EAS301H1, EAS401H1, EAS402H1, EAS404H1
- Japanese
– EAS220Y1, EAS221H1, EAS320Y1, EAS460H1, EAS461H1
- Korean – EAS210Y1, half (0.5) a credit of EAS211Y1, EAS212H1, EAS310Y1, EAS410Y1, and EAS416Y1

Students should note that, as explained in the *Academic Record - Recognition of Academic Achievement* section of this Calendar, the Language Citation is not equivalent to an academic program and that enrolment in a program is not necessary in order to earn the recognition bestowed by the Citation. Students interested in the Citation should email eas.undergrad@utoronto.ca.

literature, film, news media, etc., to introduce the racial, colonial, capitalist, sexual, militarized, and other dimensions of the “Yellow Peril.” Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

EAS194H1 - East Asia through Music

Hours: 24L

This course will discuss ‘East Asia’ through music as composed, performed, recorded, processed, remembered, imagined, and represented. Questions to be asked include: what kinds of sound are recognized as music in East Asia? What are the goals and effects of music? When, where, and how is music performed in East Asia? How is music described in East Asian literature and visual art? How does music translate East Asian literature and visual art? How are certain musical elements—

tonality, rhythm, genre, instruments—recognized as ‘East Asian’? How is East Asia imagined musically? How are East Asian composers and performers received globally? Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

EAS195H1 - Shan Shui Landscape: A Cultural Historical Study

Hours: 24L

This course looks into the history of cultural production of Chinese Shan Shui (lit., mountain and water) landscape representations from an environmental humanities perspective. As an artistic motif, Shan Shui travels between past and present and across various mediums as well as literary and artistic genres. What exactly are we invited to see and contemplate on in the Shan Shui? Are Shan Shui works about “nature,” spirit, Qi, or the human world? The course seeks to inquire into these and other questions through examining the concepts, arts, and transformations of selected Shan Shui works in imperial and contemporary China. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

EAS196H1 - Consumption, Taste and Culture in East Asia

Hours: 24S

This course explores the roles that consumption and taste play in personal and public lives in East Asia. Course focus may include the cultural histories of food, fashion, tourism, sports, or forms of audio and visual media. (No prior knowledge of East Asian languages or cultures is necessary.) Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

EAS197H1 - Media Worlds and East Asia

Hours: 24S

The term “world-making” is often used nowadays to refer to transmedia storytelling, or the creation of story-worlds

across serial narratives in a range of entertainment media, such as novels, games, film series/franchises, television shows, comics, and webtoons. This course looks at the ways that media producers and fans, alike, engage with media worlds. More importantly, the course situates these media worlds within a broader conception of “world-making,” namely, the geopolitical and economic configuration of modern East Asia. (No prior knowledge of East Asian languages or cultures is necessary.) Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

EAS198H1 - Martial Arts in East Asian Narratives

Hours: 24S

What can we learn about East Asian history and culture through its rich tradition of narratives featuring the martial arts? This course introduces short stories and novels dealing with combat and warfare from nearly two thousand years of East Asian literature, exploring issues such as self and society, gender, power, the body, and identity. All texts will be provided in translation, and no prior knowledge of any East Asian language or culture is necessary. The texts explored will vary year to year, depending on the instructor. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

EAS199H1 - Thinking through Art in Chinese Culture

Hours: 24S

This seminar explores different visions and methods of art (textual and visual) as a way of thinking about living, knowing, and willing in Chinese culture. Examination of various theoretical texts on arts and literature, as well as works of art themselves, will provide students with knowledge and research skills on arts in Chinese culture, and an expanded sense of Chinese intellectual history. Questions explored in the course will include: How should we understand the concept of Chinese art beyond representation? How did Chinese literati pursue a sense of beauty through their poetry and painting? How is beauty apprehended in natural and constructed landscapes? What are the political and social functions of art education in Chinese culture? How do Chinese artists fit into a global cultural context? (No prior knowledge of East Asian languages or cultures is necessary.) Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Creative and Cultural Representations (1)

Core Courses

EAS103H1 - Premodern East Asia

Hours: 24L/12T

Examines how various histories of East Asia can be written by focusing on specific themes in the histories of China, Japan, and Korea to roughly 1600. Required of EAS specialists, majors, and minors.

Exclusion: EAS102Y1

Breadth Requirements: Society and its Institutions (3)

EAS105H1 - Modern East Asia

Hours: 24L/12T

Examines how various histories of East Asia can be written by focusing on specific themes in the histories of China, Japan, and Korea from roughly 1600 to the Cold War. Required of EAS specialists, majors, and minors.

Prerequisite: EAS103H1

Exclusion: EAS102Y1

Breadth Requirements: Society and its Institutions (3)

EAS209H1 - Approaches to East Asia

Previous Course Number: EAS209Y1

Hours: 24L/12T

Required of EAS specialists and majors, this course introduces various approaches, theories, and methodologies for the study of East Asian societies and cultures. As the course serves as a foundation for upper-level EAS courses, it should be taken as early as possible, preferably in the second year.

Prerequisite: EAS103H1, EAS105H1

Exclusion: EAS209Y1

Society-Culture Courses

EAS218H1 - Classical Chinese Prose

Hours: 24L

This course introduces the form and types of prose in classical Chinese literature by critical reading of some basic Chinese texts and their English translations on various themes, such as history, philosophy, religion and art.

Breadth Requirements: Creative and Cultural Representations (1)

EAS219H1 - Cultural History of Food & Drink in East Asia

Hours: 24L

This course introduces historical, literary, and anthropological issues related to the consumption of food and/or drink in East Asia. Through a wide variety of reading materials, it focuses on the relationships between food/drink consumption and commerce, religion, social regulation, medicine, and cultural identity, among others.

Breadth Requirements: Creative and Cultural Representations (1)

EAS231H1 - Tales of the Supernatural in Chinese Literature

Hours: 24L

This course explores the long tradition of writing about the fantastic, strange, and supernatural in Chinese literature, from the earliest records to medieval tales, late imperial opera, and contemporary science fiction. In addition to close reading and interpretation, we will situate these texts in their social and cultural contexts, examining critical moments of transformation in Chinese history and the enduring questions they raise in terms of philosophy, religion, gender, ethnicity, and politics.

Breadth Requirements: Creative and Cultural Representations (1)

EAS235H1 - Perceptions of China in Japanese Literature

Hours: 24L

Lectures on Japanese literary negotiations with China, the Chinese and Chineseness, ranging from celebration of shared cultural practices and aestheticization of China to nativist resistance to Chinese cultural hegemony. Required readings are available in English translation, including Tale of Genji, Tale of Middle-Councillor Hamamatsu (medieval romance), Haku Rakuten (No

Play), Battles of Coxinga (Kabuki play), Three-Cornered World (by Soseki), and Wild Goose (by Ogai).

Breadth Requirements: Creative and Cultural Representations (1)

EAS236H1 - Queer Feminist Literature: Writing in Global Capitalism

Hours: 24L

This course is an introduction to gender and sexuality studies and East Asian queer feminist writings produced in the context of global capitalism.

Breadth Requirements: Creative and Cultural Representations (1)

EAS241H1 - Introduction to Chinese Philosophy

Hours: 36L

A historical introduction to Chinese philosophy, covering selected figures and texts from the Warring States period through the Qīng dynasty. Schools of thought covered include Confucianism, Mohism, Daoism, Legalism, "Profound Learning," Neo-Confucianism, and "Evidential Learning." Texts and thinkers include the Confucian *Analects*, *Mòzǐ*, *Mèngzǐ*, *Xúnzǐ*, *Dàodéjīng*, *Zhuāngzǐ*, *Hán Fēi*, Guō Xiàng, Zhū Xī, Wáng Yángmíng, and Dài Zhèn.

Exclusion: [PHL237H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

EAS242H1 - Japanese Cinemas I: Film Form and the Problems of Modernity

Hours: 36L/12T

This course investigates how film aesthetics relate to the most profound socio-historical problems of Japanese modernity. It also considers the ways various filmmakers employ cinematic form to engage the social problems of their moment. Part I focuses on the 1890s - 1950s.

Exclusion: [EAS237Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS243H1 - Japanese Cinemas II: Film Form and the Problems of Modernity

Hours: 36L/12T

This course investigates how film aesthetics relate to the most profound socio-historical problems of Japanese modernity. It also considers how various film makers employ cinematic form to engage the social problems of their moment. Part II focuses on the 1960s - present.

Exclusion: [EAS237Y1](#)

Recommended Preparation: [EAS242H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS245H1 - Premodern Japanese History

Hours: 24L

A survey of the history of premodern Japan from earliest recorded histories to the establishment of the Tokugawa regime in the seventeenth century. Uses a wide range of translated primary Japanese texts to illuminate the emergence of cultural forms and their conjunction with social, economic, religious, and political trends.

Recommended Preparation: [EAS103H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS246H1 - Early Modern Japanese History

Hours: 24L

A survey of the history of Japan from about 1600 until the disintegration of the Tokugawa regime in the mid-19th century. Uses a wide range of translated primary Japanese texts to illuminate the emergence of cultural forms and their conjunction with social, economic, religious, and political trends.

Recommended Preparation: [EAS103H1](#)/ [EAS105H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS247H1 - History of Capitalism in Modern Japan

Hours: 24L

This course provides a historical narrative of the development of the capitalist mode of production in Japan,

from the mid-19th century to the present day. Readings include texts from various disciplines: economics, philosophy, social and labour history, and literature.

Breadth Requirements: Society and its Institutions (3)

EAS248H1 - Marxism and East Asia

Hours: 24L

This course focuses on how Marxism became one of the most important and influential systems of revolutionary thought in East Asian countries such as Japan, Korea, and China in the twentieth century, with enormous repercussions for our present historical conjuncture. The course particularly focuses on the theoretical creativity and impasses that went into translating the basic tenets of Marxism to address particular, national questions in East Asia.

Breadth Requirements: Society and its Institutions (3)

EAS249H1 - Sinophone Cinemas: Revolution of the Sensible World

Hours: 24L/24P

This course is an introduction to the cinematic avant-garde movements that follow the end of the first Cold War across the Sinophone world, specifically China, Hong Kong, and Taiwan. Taking up the legacies of the Cold War, we examine specific film histories in each region and situate the New Wave movements of the past four decades in a vast terrain that is shaped by the narratives of war, nationalism, colonialism, economic integration, urbanization, among others.

Breadth Requirements: Creative and Cultural Representations (1)

EAS251H1 - Aesthetics and Politics in 20th Century Korea

Hours: 24L

This lecture course examines key questions and texts in the history of literature from the Korean peninsula during the twentieth century, exploring how aesthetic form refracted the experiences of colonialism, division, and the formation of opposing nation-states.

Breadth Requirements: Creative and Cultural Representations (1)

EAS256H1 - Chinese Literature (Pre-Qin to Tang)

Hours: 24L

A survey of major works in premodern Chinese literature, including poetry, essays, and short narratives from the pre-Qin through Tang eras (11th century BCE - 10th century CE).

Exclusion: [EAS336Y1](#), [EAS336H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS257H1 - Chinese Literature (Song to Qing)

Hours: 24L

A survey of major works in premodern Chinese literature, including poetry, essays, short narratives and drama from the Song through Qing dynasties (10th - 19th centuries CE).

Exclusion: [EAS337Y1](#), [EAS337H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS263H1 - Classical Japanese Literature

Hours: 24L

This course examines canonical literary works written in classical and sinitic Japanese (bungo and kanbun), including poetry, narrative, and theatre, produced from the Nara Period to the Edo Period (roughly 8th to 19th Centuries), with an emphasis on rhetoric, media, performance, reception history, canon formation and gender relations. Themes include: orality and literacy; masculine and feminine discourses; image and text; poetry and narrative; (auto)biography and fiction; intertextuality and authorship; the supernatural and realistic; establishment and resistance; and the centre and periphery. All readings will be in English.

Recommended Preparation: [EAS103H1](#), [EAS245H1](#), [EAS246H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS270H1 - Narratives of 19th-Century Korea

Hours: 24L

This course examines the tumultuous events of 19th-century Korea – from peasant uprisings to gunboat diplomacy and from the decline of slavery to the economy's integration into global capitalism – together with the ways these events have been subjected to the changing and contentious interpretations of historians.

Breadth Requirements: Society and its Institutions (3)

EAS271H1 - 20th Century Korean Colonial History

Hours: 24L

An exploration of Korean colonial history in a comparative and global context, including coverage of controversies over political economy, gender, race, architecture, and later public memory debates.

Exclusion: [EAS271Y1](#)

Breadth Requirements: Society and its Institutions (3)

EAS272H1 - The Two Koreas in World History

Hours: 24L

This course begins with the division of the peninsula into two mutually-hostile Koreas in the context of decolonization and the Cold War, and traces the struggles of peoples on both sides of the divide down to the late 20th century.

Breadth Requirements: Society and its Institutions (3)

EAS273H1 - Modern Chinese Cities

Hours: 24L

This course offers a critical review of the history and historiography of modern Chinese cities. Focusing on the development of specific Chinese cities, the course emphasizes understanding the socio-cultural production of space as well as analytical reading of landscape, urban imagery, and urban writings.

Breadth Requirements: Creative and Cultural Representations (1)

EAS274H1 - Popular Culture in East Asia

Hours: 24L

Through various forms of popular culture in the 20th century, this course explores the cultural contexts and social trajectories of China, Japan and Korea. Forms of popular culture studied include art, visual culture, consumer habits, foodways, advertising, music, and fashion.

Breadth Requirements: Creative and Cultural Representations (1)

EAS278H1 - Approaches to Korean Cinema

Hours: 48L

This course explores the postwar development of film in Korea with a focus on the analysis of film form, genre and historical context.

Breadth Requirements: Creative and Cultural Representations (1)

EAS279H1 - East Asian Ecocinema

Hours: 36L

The course examines the ethical, political, historic and aesthetic dimensions of Asian Ecocinema (environmental films that engage with the Asia-based global environmental crisis) and discusses the films' ways of connecting place and planet.

Breadth Requirements: Creative and Cultural Representations (1)

EAS284H1 - Modern Chinese Literature

Hours: 24L

This course offers a critical examination of 20th-century Chinese literature, with a focus on the important developments of literary writing over time, from the inception of New Literature in the 1910s, the development of realism and modernism in the 1930s, to the emergency of post-revolution and postmodernist writings in the 1990s. Emphasis is placed on generating a dialogue on interpretations of key works.

Exclusion: [EAS284Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS285H1 - Revolutions in Modern China

Hours: 24L

This course offers an interdisciplinary treatment of the Chinese people's protracted struggle to transform the world's oldest empire and to create a revolutionary society, with a special focus on the myriad revolutions, uprisings, and protests that had radically remade the country's social fabric in the tumultuous twentieth century. First-person accounts, classic and revisionist scholarly works, and literary and visual materials will be used to examine China's multifaceted transformations both chronologically and thematically, in their socioeconomic, cultural, political, and global contexts.

Recommended Preparation: [EAS105H1](#), [HIS280Y1](#)

Breadth Requirements: Society and its Institutions (3)

EAS289H1 - Environment and East Asia

Previous Course Number: EAS289Y1

Hours: 24L

This course introduces environmental issues that are important to East Asia. Or better put, it examines the role East Asia plays in the global environmental crisis. We engage both the factual and humanities' dimensions of Climate Change, biodiversity loss, and other urgent environmental crises.

Exclusion: [EAS289Y1](#)

Breadth Requirements: Society and its Institutions (3)

EAS295Y0 - Topics in East Asian Studies (Summer Abroad)

This course allows students to pursue the specialized study of specific topics tailored to the research and study opportunities available in Hong Kong and the expertise and interests of the instructor. Available only in the Woodsworth College Hong Kong Summer Program.

EAS296H1 - Topics in East Asian Studies

Hours: 24L

A study of Chinese, Japanese or Korean culture, history and/or literature. Content depends on the instructor. When offered, the course will have a subtitle that describes its content.

EAS297H1 - Texts, Images and Objects in East Asia

Hours: 24P

This course seeks to understand East Asian civilizations through texts, images, and objects exhibited at the Royal Ontario Museum (ROM). Students study various texts, paintings, bronzes, architecture, sculptures, porcelains, and other objects, and explore their historical, aesthetic, and critical meanings.

Breadth Requirements: Creative and Cultural Representations (1)

EAS307H1 - Traditional Chinese Political Philosophy

Hours: 24L

This course explores and evaluates the views of prominent Chinese thinkers and texts from the classical, medieval, and late imperial periods on central issues in political philosophy, including the justification of political authority, the relation between people and the state, the roles and means of government, and the extent of the state's power over its subjects. We cover a broad selection of materials from different periods in Chinese history, devoting special attention to the specific form that certain philosophically relevant issues take in Chinese political discourse, such as the role of formal standards versus that of character, the interplay between institutions and ethical discretion, the role of education versus legal coercion, and the advantages of central versus local administration. Readings will include selections from the *Documents*, *Guānzǐ*, *Mòzǐ*, *Analects*, *Mèngzǐ*, *Xúnzǐ*, *Dàodéjīng*, *Zhuāngzǐ*, *Hánfēizǐ*, *Discourses on Salt and Iron*, *Jī Kāng*, *Guō Xiàng*, *Bào Jìng Yán*, *Luó Yǐn*, *Oūyáng Xiū*, *Chéng Yí*, *Wáng Ānshí*, *Chéng Hào*, *Hú Hóng*, *Chén Liàng*, *Fāng Xiàorú*, *Gù Yánwǔ*, *Huáng Zōngxī*, and *Táng Zhēn*.

Prerequisite: [EAS105H1](#)/ [EAS241H1](#)/ [PHL237H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

EAS308H1 - East Asia Seen in Maps, Ancient and Modern

Hours: 24L

Through the lens of important maps ancient and new, this course looks at the histories, cultural logic, and methods of visual representation in societies of East Asia. The maps include archaeological artifacts, ancient manuscripts, and printed renditions, spanning from early history to the nineteenth century.

Prerequisite: EAS105H1

Breadth Requirements: Thought, Belief and Behaviour (2)

EAS309H1 - Modern Chinese Prose

Hours: 24S

A survey of representative works of prose written by 20th-century Chinese writers. This course focuses on reading texts, as well as analyzing their textual structures, aesthetic values, and historical contexts.

Prerequisite: EAS105H1

Breadth Requirements: Creative and Cultural Representations (1)

EAS311H1 - A History of Japanese Monsters

Hours: 24L

This course examines the historical development of Japanese monsters, from roughly the 7th - 8th centuries to modern times. We focus on how the changing understanding of monsters in society has embodied certain fissures in Japanese culture, especially with regard to gender and class.

Prerequisite: EAS105H1

Recommended Preparation: EAS209H1

Breadth Requirements: Creative and Cultural Representations (1)

EAS312H1 - Art and Archaeology of Early China

Hours: 36L

This course explores ancient societies from prehistory to the Bronze Age of China from archaeological perspectives with a focus on Chinese collections at the ROM. The

course offers students an understanding of the origins and formation of Chinese civilizations.

Prerequisite: EAS105H1 and EAS209H1/ ANT100Y1/ ANT200Y1

Exclusion: EAS411H1

Breadth Requirements: Creative and Cultural Representations (1)

EAS314H1 - Culture & World After Hiroshima & Nagasaki

Hours: 24L

Exploration of literature, film, and other cultural production related to the atomic bombing and other nuclear catastrophes from transnational, inter-Asia, and transpacific perspectives. Primarily focuses on, but not necessarily limited to, the cultural texts, intellectual concepts, and social thoughts generated out of the history of Hiroshima and Nagasaki atomic destruction.

Prerequisite: EAS105H1

Breadth Requirements: Society and its Institutions (3)

EAS315H1 - The "Yellow Peril": Past & Present

Hours: 24L

Beginning with the Chinese Exclusion Acts, the Asian presence in North America has often been considered a serious social menace. This course explores the Asian/North American response to the past and present "Yellow Peril" constituted as a gendered, sexualized, classed, and racialized epistemological and affective structure of knowledge.

Prerequisite: EAS105H1

Breadth Requirements: Society and its Institutions (3)

EAS324H1 - The Asia-Pacific in the Nuclear Age

Hours: 24L

From the events such as the world's first use of the atoms for war, the Cold War nuclear arms race, the "Atoms for Peace" campaign, the worst nuclear accident in history, to the unfolding threat of nuclear proliferation, the twentieth century Asia-Pacific region has been profoundly shaped by the nuclear age. The course introduces the diverse cultural knowledge and social thoughts that have developed distinctly in the Asia-Pacific in response to the

nuclear-related affairs. They include, for instance, the ideas and practices concerning the environment, the human, peace, visibility, security, coloniality, sustainability, etc.

Prerequisite: [EAS105H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS327H1 - Japanese Fiction and the Nation

Hours: 24L/4T

Explores modern Japanese literature, with special attention given to literature's relation to the nation. Students explore how literature transforms throughout Japanese modernity and how its meaning and effects function to simultaneously solidify and fracture national identity.

Prerequisite: [EAS105H1](#) and at least one (0.5 credit) course in literature

Breadth Requirements: Creative and Cultural Representations (1)

EAS328H1 - Science, Technology and Society in Modern China

Hours: 24L

Learn to understand modern China from an understudied yet important perspective: the development of science and technology since the establishment of People's Republic in 1949. Science and technology have played crucial parts in China's political, economical, social, and cultural transformations. Drawing from anthropological, social, and historical studies of science, we examine, among other topics, science and nation-building, biopolitics, technocracy, and scientists' self-fashioning at the junction of Communist reign and global capitalism. Students also learn key concepts of science studies.

Prerequisite: [EAS105H1](#)/ [CAS201H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS329H1 - Cross-Cultural History of Scents and Aromatics

Hours: 24L

This course surveys the importance of smell as a form of knowledge and source of history, and explores the use of aromatics in medicine, food, ritual, and personal fragrance, along with their role as a global commodity in

East Asia and beyond. Students will read a variety of medieval and early modern texts about aromatics as well as more recent studies on olfaction.

Prerequisite: [EAS105H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS330H1 - Narrative Strategies in Modern Japanese Fiction

Hours: 24L

Discussion of narratives by modern Japanese authors with attention to issues in narratology and contemporary narrative studies such as: voice and perspective; gender and power relationships of the narrator-narratee-narrated; the act of narrating, writing, listening and reading; and metafictional paradox.

Prerequisite: [EAS105H1](#) and one of the following: [EAS218H1](#)/ [EAS231H1](#)/ [EAS235H1](#)/ [EAS251H1](#)/ [EAS256H1](#)/ [EAS257H1](#)/ [EAS263H1](#)/ [EAS279H1](#)/ [EAS284H1](#)/ [EAS284Y1](#)/ [EAS308H1](#)/ [EAS309H1](#)/ [EAS327H1](#)/ [EAS333H1](#)/ [EAS334H1](#).

Breadth Requirements: Creative and Cultural Representations (1)

EAS333H1 - Modernism and Colonial Korea

Hours: 24L

This course considers the problem of colonial modernism through a close reading of literary and cultural texts from early 20th-century Korea. It asks what it means to enter modernity under colonial rule, and questions the relationship between imperialism, writing, and subjectivity. Topics include the role of literature in elaborating new concepts of subjectivity, literature and the fine arts as assimilatory practices, the emergence of urban space and reconfiguration of notions of the rural, and changing notions of time and space in the cultural products of nativism. Readings of literary works will be accompanied by showings of paintings and photographs from the period, as well as discussions of theoretical essays on modernism.

Prerequisite: [EAS105H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS334H1 - Chinese Novels

Hours: 24L

This course explores the development of Chinese fiction from earliest times with emphasis on the twentieth century.

Prerequisite: [EAS105H1](#)

Exclusion: [EAS334Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS335H1 - Introduction to Manchu Language and History

Hours: 24L

This course explores the history of Manchu rule in China's last imperial dynasty, the Qing (1644–1912), through an introduction to the Manchu language. In addition to learning to read Manchu materials, from imperial court documents to conversation guides and short stories, students will be exposed to a wide range of historical approaches to the study of Manchu social, literary, and political culture, as well as ethnicity in late imperial China.

Prerequisite: [EAS209H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS338H1 - Classical Daoism

Hours: 48L/24P

This course examines major issues of classical Daoist thought, such as Dao and cosmos, body and self, human nature, language and knowledge, and political visions. Based on both textual and ideological analysis of Daoist works such as the Laozi, the Zhuangzi, and Huanglao Daoist texts, to be updated with recently unearthed texts in silk and bamboo slips.

Prerequisite: [EAS105H1](#) and [PHL237H1](#)/ [EAS241H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

EAS340H1 - Chinese Society and Culture

Hours: 24L

This course explores issues of identity, self, and community in a broad exploration of cultural transformation in China.

Prerequisite: [EAS105H1](#)

Exclusion: [EAS340Y1](#)

Recommended Preparation: [EAS103H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS343H1 - A History of Sushi

Hours: 24L

Japan's most famous foodstuff—and a global commodity—sushi is simultaneously “Japanese” and international. This course uses sushi and other familiar Japanese dishes as a starting point to investigate how food takes on, maintains, or sheds national characteristics in an age of globalization and fusion cuisine. The historical development of sushi offers a perspective on how ideas about Japan and Japaneseness have evolved and about how Japan has interacted with global currents in food and culture.

Prerequisite: [EAS105H1](#)

Recommended Preparation: [EAS219H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS345Y1 - The Rise of Greater China: Issues & Topics

Previous Course Number: EAS345H1

Hours: 48L

This course looks at China from a regional perspective, with a focus on Taiwan, Hong Kong, and the Peoples Republic of China's economic integration. The role of Chinese communities globally and in Southeast Asia also receives attention.

Prerequisite: [EAS105H1](#)

Exclusion: [EAS345H1](#)

Recommended Preparation: One course on modern China or East Asia or equivalent

Breadth Requirements: Society and its Institutions (3)

EAS347H1 - Everyday Life in Modern Japan

Hours: 24L

This course analyzes the history of modern Japan from the perspective of a “critique everyday life” (*la vie quotidienne*; *nichijō seikatsu*). Analyzing the uneven transformation of Japan's feudal society into a capitalist commodity economy, the course discusses how everyday life in Japan was produced and reproduced in ways that are specific to capitalist society, but that also open onto questions of a revolution of everyday life, an everyday life after capitalism. Focusing on different moments in Japan's

modern history (including its past colonial empire), the course looks at, reads, and listens to diverse representations of everyday life in Japan, especially in the worlds of work and labour, consumption and social reproduction. How are these worlds represented politically, as well as aesthetically? Specific topics include: literature and music, architecture and housing, war and forced labour, population control and sexual reproduction, and radio, leisure-time, and state propaganda.

Prerequisite: EAS105H1

Recommended Preparation: EAS247H1

Breadth Requirements: Society and its Institutions (3)

EAS348H1 - Gift, Plunder, and Exchange: Japan and World History

Hours: 24L

This course critically re-evaluates the history and historiography of Japanese capitalism, imperialism/colonialism, and world-empire through the lens of three, distinct “modes of exchange”: gift, plunder, and commodity exchange. Inspired by Kojin Karatani’s *The Structure of World History: From Modes of Production to Modes of Exchange* (2014), this course explores the emancipatory politics inherent in the critical analysis of modes of exchange, and takes up historical cases from Japan, Hokkaido, Okinawa, Taiwan, Korea, China, and the “Greater East Asian Co-Prosperity Sphere.”

Prerequisite: EAS105H1/ EAS247H1

Breadth Requirements: Society and its Institutions (3)

EAS349H1 - Soundscapes and Modern China

Hours: 24L

An introduction to sound studies through the case of modern China. The class surveys basic theories of sound studies. It investigates the technological, cultural, and social production of soundscapes in modern China. Topics include the invention of national language(s), the introduction of gramophone, radio, and sound cinema, and the relationship between sound, aesthetics, and power.

Prerequisite: EAS105H1

Breadth Requirements: Creative and Cultural Representations (1)

EAS350H1 - Ideology and Japan

Hours: 24L

This course analyzes the problem of ideology in relation to the development of capitalism and imperialism in modern Japan. Among the topics analyzed in the course will be: the development of a national ideology in the transition to capitalism, the rise of “ultra-nationalism,” the ideological battles between Communism and fascism, the ideological struggles surrounding the U.S. military occupation of Japan, and the question of national ideology in the postwar period.

Prerequisite: EAS105H1/ EAS247H1

Breadth Requirements: Society and its Institutions (3)

EAS354H1 - Body, Movement, Japan

Hours: 24L

This course will explore theories and practices of the body and movement in Japan by way of a series of associated territories: From the 17th century walking poetry of Basho to various political resistance movements of the 1960s, from the revolutionary dance experiments of Min Tanaka to Buddhist inspired philosophies of Body-Mind and physics inspired theories of movement by Japanese scientists to the movement of information, people, and capital at the contemporary moment.

Prerequisite: EAS105H1

Breadth Requirements: Creative and Cultural Representations (1)

EAS355H1 - The Art and Politics of Video in Japan

Hours: 24L

This course will study the history of Japanese video art, beginning in the 1960s (when the Sony Corporation released the first portable video cameras) leading to the contemporary moment in which recording devices (phones, surveillance cameras, computers) and new distribution models (the Internet, public projections) abound. Video art is neither cinema nor television, and its early history is marked by some of the most radical artistic and political experiments in the history of modern Japan. This course will focus on the aesthetics and politics of experimental video with an eye on its global flows and Japan’s central role in its development.

Prerequisite: EAS105H1

Breadth Requirements: Creative and Cultural Representations (1)

EAS357H1 - Mao's China and Beyond

Hours: 24L

This course introduces major issues and events in contemporary Chinese history from the success of the Communist revolution in 1949 to China's postsocialist transitions in the 1980s and early 1990s. Topics include the development and victory of the Chinese Communist revolution, the rule and legacy of Mao Zedong (particularly the Hundred Flowers movement, the Great Leap Forward, and the Cultural Revolution), and economic reform and political repression in the era of Deng Xiaoping.

Prerequisite: EAS105H1

Breadth Requirements: Society and its Institutions (3)

EAS358Y1 - Classical Chinese I

Hours: 48S

An introduction to the Classical Chinese language with emphasis on grammatical analysis and translation into English. Open only to EAS majors and specialists.

Prerequisite: EAS103H1, EAS100Y1/ EAS101Y1/
EAS200Y1

Recommended Preparation: Two or more years of Modern Standard Chinese

Breadth Requirements: Creative and Cultural Representations (1)

EAS361H1 - Zen Buddhism

Hours: 24L

This course introduces the Zen Buddhist traditions of China, Korea, and Japan. Emphasis is placed on the radical views of history, language, ritual, self, and enlightenment espoused by these traditions. The course also examines issues related to Zen monasticism, the development of koans, and the definition of orthodoxy in both premodern and modern Zen. Students will be asked to explore these and other topics by paying close attention to the historical, doctrinal, and institutional contexts from which they arose.

Prerequisite: EAS105H1

Breadth Requirements: Thought, Belief and Behaviour (2)

EAS362Y1 - Classical Japanese

Hours: 48S

Introduction to classical Japanese, followed by readings of various short works by classical authors.

Prerequisite: EAS220Y1

Breadth Requirements: Creative and Cultural Representations (1)

EAS363H1 - Classical Japanese Part I

Hours: 24S

Introduction to classical Japanese, followed by readings of various short works by classical authors. Covers first half of EAS362Y1.

Prerequisite: EAS220Y1

Exclusion: EAS362Y1

Breadth Requirements: Creative and Cultural Representations (1)

EAS364H1 - China's Cultural Revolution: History and Memory

Hours: 24L

No understanding of contemporary China is possible without understanding the ramifications of the Great Proletarian Cultural Revolution (1966-1976). This course considers this tumultuous episode as a field of historical research and conceptual inquiry. This course critically examines a wide variety of sources, including scholarly accounts, official documents, personal memoirs, oral histories, and literary works.

Prerequisite: EAS105H1

Breadth Requirements: Society and its Institutions (3)

EAS365H1 - Classical Japanese Part II

Hours: 24S

Introduction to classical Japanese, followed by readings of various short works by classical authors. Covers the second half of EAS362Y1. Students must seek permission of the instructor to be placed in the course.

Prerequisite: EAS363H1, EAS220Y1

Exclusion: EAS362Y1

Breadth Requirements: Creative and Cultural Representations (1)

EAS370H1 - Media, Cultural Citizenship, and the Korean Diaspora

Hours: 24L

This course explores how cultural and ethnic identity in diaspora is constructed in media texts, and how the politics of national identity target various publics. We will examine the work of particular filmmakers, diasporic Korean celebrities in Korea, and digital platforms for producing public visibility, such as YouTube.

Prerequisite: [EAS105H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS372H1 - The Postwar, Cold War and Divided Koreas

Hours: 24L

This research-oriented course examines the divided history of the Korean peninsula since 1945 in the context of the global war. Examines key debates in the history of contemporary Korea, beginning with the Korean war and ending with the contemporary culture of division.

Prerequisite: [EAS105H1](#)

Exclusion: [EAS372Y1](#)

Recommended Preparation: [EAS271H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS373H1 - Revolutionaries, Rebels, and Dissent in Korea's Long 20th Century

Hours: 24L

Korea's long 20th century experienced many tumultuous moments of dissent, rebellion, and revolution. When, why, and how do specific people dissent? This course devotes each weekly meeting to the study of a single moment of dissent, ranging from the peasant uprisings of the 1890s to labor activities in the colonial period and from anti-regime student movements in the 1970s to recent social movements and candlelight demonstrations.

Prerequisite: [EAS105H1](#)

Recommended Preparation: [EAS271H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS374H1 - Modern Japan and the Colonial Question

Hours: 24L

This course interrogates the history of modern Japan from the perspective of Japan's colonial exploits in East Asia. The course also addresses the political economy and culture of the military occupation of Japan by the Supreme Command of the Allied Powers. Texts from economics, philosophy, and literature will be used.

Prerequisite: [EAS105H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS375H1 - Postwar Japan: Crisis, Apocalypse

Hours: 24L

This course explores the history of the postwar period in Japan and its former colonies in order to delineate a way to think of the idea of apocalypse in relation to crisis in advanced capitalism. Through an examination of the history of capitalist crisis in postwar Japan, the course investigates themes of apocalypse in atomic-bomb literature, television, Godzilla, radical students movements, ecological-industrial disasters, worker art movements, debates on modernity and fascism, avant-garde theatre, popular music, religious movements, nationalism, populism, and the so-called "ageing population" problem. The course revolves around texts by philosophers, economists, novelists, essayists, artists, and critics, as well as film and audio recordings.

Prerequisite: [EAS105H1](#)

Exclusion: [EAS347H1](#), [EAS374H1](#)

Recommended Preparation: [EAS247H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS378H1 - Urban Life in Early Modern Japan

Hours: 24L

An exploration of most important cities of Tokugawa Japan, which were among the largest of the early modern world, and home to vibrant urban culture and economic activity. The texts include buildings, maps, paintings, prints, film and novels.

Prerequisite: [EAS105H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS380H1 - Writing Women in Premodern China

Hours: 24L

A survey of premodern Chinese texts (before 1700) in translation, written by women, about women, and in the voices of women, across a variety of genres drawn from literature, history, philosophy, and religion. The texts provide opportunities to explore how gender was constructed in Chinese societies, how women were defined and constrained by texts, and how women used writing to express themselves, often in resistance to dominant modes of representation.

Prerequisite: [EAS105H1](#)

Recommended Preparation: [EAS209H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS381H1 - Moral Agency in Chinese Thought

Hours: 24L

The course explores selected Chinese philosophical texts addressing moral motivation, cultivation, reasoning, and action to examine their treatment of how human beings can become morally virtuous and live an ethically ideal or fulfilling life. Topics discussed will include people's typical moral dispositions; morally relevant features of people's nature (*xíng*); the role of the heart (*xīn*) in guiding action; the role of desire, emotion, and normative judgment in motivation and action; methods of moral education and training; the nature and function of virtue; and the structure of action. In different years, the course may focus on classical texts such as the *Mòzǐ*, *Mèngzǐ*, *Xúnzǐ*, and *Zhuāngzǐ* or on later Confucian figures from the Sòng, Míng, and Qīng dynasties, such as Chéng Yí, Chéng Hào, Zhū Xī, Lù Xiàngshān, Wáng Yángmíng, and Dài Zhèn.

Prerequisite: [EAS105H1](#)/ [EAS241H1](#)/ [PHL237H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

EAS384H1 - Medieval Japan

Hours: 24L

In popular culture medieval Japan often figures as an era of unrelenting warfare, in which only samurai mattered. This course offers more balanced view of what many historians regard as the most volatile, yet also most creative, era in Japanese history. The course examines the era from 1100-1500 with an eye to understanding the place of warriors, but also to explaining the incredible

cultural advances of the period, which gave rise to many of the arts for which Japanese culture is renowned.

Prerequisite: [EAS103H1](#)/ [EAS105H1](#)

Recommended Preparation: [EAS245H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS386H1 - Culture of Nature in China

Hours: 24L

The course examines the cultural practice of nature in China's past and present, focusing on literary, artistic, spiritual, ethical, political, and scientific aspects of human-nature relation. Through scholarly works and primary sources, the course inquires into the cultural politics of human-nature entanglements.

Prerequisite: [EAS105H1](#)

Exclusion: [EAS386Y1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

EAS387H1 - Images and Ideas in Chinese Art

Hours: 24L

Making use of the Royal Ontario Museum's excellent Chinese art collection, this object-based and oriented seminar encourages exploration of the ideas and practices behind works of Chinese art. We examine art and artifacts in relation to their social environment and historical contexts, paying close attention to such issues as political practices, power and authority, identity, gender, and materiality. Other relevant topics include patronage, audience, religious quests, and literati culture. Depending on special Chinese exhibitions of the year at the ROM, the course may incorporate case-studies of relevant exhibition content.

Prerequisite: [EAS105H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS388H1 - Asian/North American Feminist Issues

Hours: 24L

A transpacific examination of gender and sexuality issues that have directly and indirectly affected Asians and Asian North Americans. Considers, for example, the gender and sexual representations of Asia in North America, the psycho-history of the "Yellow Peril" and its ramifications

beyond Asian North Americans, and the history of immigration, nationalism, colonialism, war, and the militarized empire.

Prerequisite: [EAS105H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS389H1 - Dangerous Bodies: Crossings in Gender and Sexuality Studies

Hours: 24L

This course examines non-conforming bodies and technologies of self-making that defy gender and racial norms in 20th and 21st century China and Asian America. Through different cross-dressing and other crossing practices in literature, fashion, and history, we explore shifting social meanings of the body, masculinity, femininity, and trans-becoming.

Prerequisite: [EAS105H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS391H1 - Transnational East Asian Cinema

Hours: 48L

This course investigates cinema's border-crossing modes of production, reception, and circulation, to uncover the ways in which the study of cinema enriches current theories and approaches to the transnational. Films and sites to be explored may include Asian co-productions (documentaries, feature films, shorts), transnational genre adaptations (e.g., *The Ring/Ringu*), and film festivals.

Prerequisite: [EAS105H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS392H1 - East Asian Television

Hours: 24L

This course approaches television and televisuality in regional, transnational, and global perspectives. Beginning with the cold war histories of transmission infrastructures in the Asia Pacific, continuing with an exploration of key television shows and genres that support and resist the nation-building ethos of the medium, the course will introduce students to the history and ideology of televisuality in East Asia.

Prerequisite: [EAS105H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS393H1 - Chinese Buddhism

Hours: 24L

Topics vary according to the instructor's interests.

Prerequisite: [EAS105H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

EAS394H1 - Film Culture in Contemporary China

Hours: 36L

This course discusses documentary film and DV culture in contemporary China as forms of cultural, communal, and political practices. We focus on films and videos that seek to address important global issues such as peace, environment, and climate change in cross-media approach and in personal tone. We ask: What new tendencies are there in the films and videos? Where can we trace them back to? What fresh possibilities do they bring forth to our aesthetic and public life?

Prerequisite: [EAS105H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS395Y0 - Topics in East Asian Studies (Summer Abroad)

This course allows students to pursue the specialized study of topics tailored to the research and study opportunities available in Hong Kong and the expertise and interests of the instructor. Available only in the Woodsworth College Hong Kong Summer Program.

Prerequisite: [EAS105H1](#)

EAS396H1 - Special Topics in East Asian Studies

Hours: 24L

A study of Chinese, Japanese or Korean culture, history and/or literature. Content depends on the instructor. When offered, the course will have a subtitle that describes its content.

Prerequisite: EAS105H1

EAS398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

Prerequisite: EAS105H1

EAS398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

Prerequisite: EAS105H1

EAS406Y1 - Thinking about Things: Material Culture in East Asia

Hours: 48S

This seminar explores theories of the object, the histories of objects in East Asia, and critical thinking about the process of research. Through theoretical readings, class, and individual research projects, the seminar asks how to formulate research questions, use the internet and other resources, and present discoveries in a class conference.

Prerequisite: EAS209H1

Breadth Requirements: Creative and Cultural Representations (1)

EAS407H1 - Textual Analysis of Classical Chinese Philosophy

Hours: 24S

Readings from ancient and medieval Chinese philosophy. Beginning with linguistic (especially semantic) analysis of key words, structure and meaning of sentences, paragraphs, and texts as a whole, which forms the basis for philosophical examination.

Prerequisite: EAS209H1 and PHL237H1/ EAS241H1

Breadth Requirements: Thought, Belief and Behaviour (2)

EAS408H1 - Modern Taiwanese Literature

Hours: 24S

A general survey of modern Taiwanese literature from 1949 to the present. It examines issues central to understanding the Taiwanese literary culture, such as historical/cultural context, oral/written language, self-identification, gender, and human rights.

Prerequisite: EAS209H1 and 2.0 credits in literature

Breadth Requirements: Creative and Cultural Representations (1)

EAS409H1 - Cities in Premodern China

Hours: 24S

Focusing on selected Chinese cities from the earliest history to 1800 CE, this course introduces students to different aspects of urban life and its representations in literature and history.

Prerequisite: EAS209H1

Exclusion: EAS367H1

Recommended Preparation: Some familiarity with Chinese history in the middle period

Breadth Requirements: Creative and Cultural Representations (1)

EAS412H1 - Technology and Material Cultures of Ancient China

Hours: 24P

This course introduces the technology and material culture of prehistoric and Bronze-Age China. Offers students an understanding of the development of ancient technologies (e.g. bronze, jade, and lacquer) and associated ways of life from archaeological perspectives.

Prerequisite: EAS209H1 and EAS312H1/ EAS411H1

Breadth Requirements: Society and its Institutions (3)

EAS417H1 - Korean Literary Translation Workshop

Hours: 24L

A workshop format is used to explore problems encountered when translating Korean literary texts (fiction and poetry) into English. Practice with a variety of texts is accompanied by readings in translation theory to refine

our understanding of translation and enrich our experience working with historical forms of Korean and English.

Prerequisite: [EAS209H1](#) and [EAS310Y1](#) or its equivalent

Recommended Preparation: [EAS410Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS418H1 - Chinese Art Theories

Hours: 24S

This course focuses on theories of Chinese arts by critically analyzing various theoretical texts and treatises on music, painting, calligraphy, and literature as recorded in the Classics.

Prerequisite: [EAS209H1](#)

Recommended Preparation: Knowledge of Chinese language

Breadth Requirements: Creative and Cultural Representations (1)

EAS419H1 - Chinese Cultural Studies Seminar: May Fourth

Hours: 24L

This seminar focuses on the May Fourth Movement in early twentieth century China. Taking May Fourth as a case study and a vantage point, this class enables a critical understanding of various aspects of the cultural and intellectual life in the early Republican period.

Prerequisite: [EAS209H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS420H1 - Travels, Travelers, and Travel Accounts in Asia

Hours: 24S

This seminar focuses on the circulation of people, words, and ideas throughout Asia before 1900, as we try to understand the worlds travelers both sought and encountered. Texts include travel diaries and geographical narratives.

Prerequisite: [EAS209H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS421H1 - History of the Chinese Book

Hours: 24L

This seminar traces the changing forms of the Chinese book from the early 'page' to modern print editions. We begin by considering the Chinese writing system and the bones, shells, bamboo and silk on which it was first inscribed. Next, we examine the specific technologies associated with medieval manuscript and early print cultures, many of which were associated with Buddhist textual production. Along the way we consider the social dimensions of Chinese book culture by considering the scribes, binders, engravers, printers, publishers, distributors and readers who produced, circulated and consumed Chinese books. The course draws on the methods and theories developed in diverse fields of study, including book history, philology, literacy studies and archive studies, to examine different chapters in the history of the Chinese book.

Prerequisite: [EAS209H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS427H1 - The Kyoto School: Now, Then, and To Come

Hours: 24S

This course begins with a careful study of a group of modern Japanese thinkers (Nishida, Tanabe, Nishitani) known as the Kyoto School (Kyoto Gaku-ha) who developed their original philosophies by creatively combining the spiritual and intellectual traditions of Mahayana Buddhism with the Western philosophical tradition, most notably with the work of Hegel and Heidegger. We focus on the concept of "Absolute Nothingness" and how it is similar and different to Western ontologies of Being as well as what it implies for political, psychological, spiritual, and artistic life. We also study significant criticisms of the Kyoto School (Tosaka, Miki, et al.) and re-evaluate how such a project persists today as well as how it might make a claim on possible futures.

Prerequisite: [EAS209H1](#)

Breadth Requirements: Thought, Belief and Behaviour (2)

EAS431H1 - Advanced Seminar in Japanese Cinema

Hours: 24S

The focus ranges from the examination of cross-cultural theoretical problems (such as Orientalism) to a director-based focus, from the examination of genre (such as documentary or the category of genre itself) to the way film intersects with other cultural forms and technologies (such as video and new media).

Prerequisite: EAS209H1 and EAS242H1/ EAS243H1

Breadth Requirements: Creative and Cultural Representations (1)

EAS432H1 - Korean Cultural Studies Seminar

Hours: 24S

This seminar provides an opportunity for in-depth reading and research into a specific topic in the cultural and intellectual history of Korea. Topics will vary each semester but may include colonial period print culture, the New Woman, the history of photography, and modernism.

Prerequisite: EAS209H1

Breadth Requirements: Creative and Cultural Representations (1)

EAS433H1 - Chinese Cultural Studies Seminar: Land

Hours: 24S

Land as part of the Earth is repeatedly reconfigured in China throughout the 20th century, first by the Reformists and pioneers of the New Culture, then by geoscientists and writers, as well as by economic planners and social thinkers of recent decades. This seminar provides a critical review of this multi-dimensional cultural and conceptual practice of land, as well as its possible role in the era of climate change.

Prerequisite: EAS209H1

Recommended Preparation: EAS289H1

Breadth Requirements: Society and its Institutions (3)

EAS439H1 - The Global Bildungsroman: Narratives of Development, Time, and Colonialism

Hours: 24S

This course studies Bildungsroman, the story of an individual's coming of age, in the context of twentieth-century political, cultural, and social developments of imperialism, anti-colonialism, human rights discourse, and

globalization. Our focus will be novels from the (post)colonial world and theoretical essays on the Bildungsroman form. The course aims to provide a model for rethinking literary history and genres within a global context. Authors may include Yi Kwangsu, Wu Zhouliu, Pramodya Ananta Toer, Kang Younghill, Tsitsi Dangaremba, Camara Laye, amongst others.

Prerequisite: EAS209H1

Breadth Requirements: Creative and Cultural Representations (1)

EAS444H1 - The City, Body and Text in Modern Japanese Literature

Hours: 24S

This course examines how the city and body exert formative forces on the text, and how the practice of writing and reading texts informs the ways we, as corporeal beings, experience the city as manifested in the 20th-century Japanese literature.

Prerequisite: EAS209H1, EAS218H1/ EAS231H1/ EAS235H1/ EAS251H1/ EAS256H1/ EAS257H1/ EAS263H1/ EAS279H1/ EAS284Y1/ EAS308H1/ EAS309H1/ EAS327H1/ EAS330H1/ EAS333H1/ EAS334H1/ EAS334Y1/ EAS408H1/ EAS409H1/ EAS417H1/ EAS419H1/ EAS467H1

Breadth Requirements: Creative and Cultural Representations (1)

EAS446H1 - The Communist Hypothesis and Asia

Hours: 24L

In recent years, the basic hypotheses of Communism have begun to be thought anew, precisely because of the demise of the Soviet Union and the rise of capitalism in communist regimes (i.e., China). Taking up recent writings by Alain Badiou, Jodi Dean, Gavin Walker, Fred Jameson and a host of other contemporary thinkers, this course asks again: what is the communist hypothesis in today's Asia and how can it help us to imagine a different Asia?

Prerequisite: EAS209H1

Breadth Requirements: Society and its Institutions (3)

EAS447H1 - Sound Studies and Modern Japan

Hours: 24S

This seminar explores the growing field of sound studies with particular attention given to auditory histories and cultures in modern Japan and the prewar Japanese empire in East Asia. We study the interrelationships between industrialization, mass culture, colonialism, and techniques and processes of reproducing sound in order to specify the status of acoustic and sonic mediation in everyday life in a capitalist commodity economy.

Prerequisite: [EAS209H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS448H1 - East Asian Studies Archive: Language, Number, Money

Hours: 24S

This course investigates salient problems of the historical archive in relation to the experience of modernity in East Asian societies. What is the meaning of the modern archive in East Asia? How is the knowledge of the modern archive produced in relation to the production of quantitative knowledge (e.g., in demographic or economic statistics)? How should we approach the relationship between number and language? How is this knowledge transformed into state knowledge as well as into what we call common sense?

Prerequisite: [EAS209H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS449H1 - Future, Architecture, Japan

Hours: 24L

Examination of how the future is imagined and materialized in architectural theory and practice throughout Japanese history. From classical temples to modernist experiments of the Metabolist movement to contemporary works by Isozaki Arata and Atelier Bow Wow, we study built and unbuilt structures as theories of the future.

Prerequisite: [EAS209H1](#)/ [ARC221H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS450H1 - History of the USA in the Pacific, the 19th century

Hours: 24S

This course examines the growth of the American empire in Asia Pacific during the late 19th century. It examines

historical writings concerning Japan, Korea, Hawaii, the Philippines, and China.

Prerequisite: [EAS209H1](#) or permission from the course instructor

Recommended Preparation: [EAS209H1](#)/ [HIS271Y1](#)/ [HIS280Y1](#)/ [HIS285H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS452H1 - The Korean War, Global Cold Wars, and Decolonization

Hours: 24S

This course examines the political economic, racial, and cultural dimensions of the Korean war in a global context. It examines how the Korean War consolidated Cold War structures and discourse on both sides of the conflict by examining such issues as the United Nations, multiculturalism, decolonization, atomic weapons, and military industrialization. In this writing intensive course, students will be expected to write a major research paper.

Prerequisite: [EAS209H1](#) or permission from the course instructor

Recommended Preparation: [EAS209H1](#)/ [HIS271Y1](#)/ [HIS280Y1](#)/ [HIS285H1](#)/ [HIS344H1](#)/ [HIS377H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS454H1 - Modern Chinese Historiography

Hours: 24S

A selective survey of major historiographical problems and debates in the fields of late 19th and 20th century Chinese history. Course readings will include both theoretical and historical materials.

Prerequisite: [EAS209H1](#)

Recommended Preparation: [EAS209H1](#), [HIS280Y1](#)

Breadth Requirements: Society and its Institutions (3)

EAS455H1 - Classical Confucianism

Hours: 24S

This course explores the historical and systematic aspects of classical Confucianism, which is fundamental for understanding Chinese philosophy and culture. The historical part discusses the development of the Confucian doctrine from Confucius to his generations of disciples. The systematic part engages issues such as emotion, art, poetry, morality and virtues, political philosophy, and knowledge and reality.

Prerequisite: [EAS209H1](#) and [EAS241H1/ PHL237H1](#)
Breadth Requirements: Thought, Belief and Behaviour (2)

EAS456H1 - Japan as seen by ?: Reference, Apparatus, Operation

Hours: 24S

The course discusses how images of Japan, charged with varied degrees of desire for empirical knowledge, have contributed to contemporary novels and plays by David Mitchell, Ruth L. Ozeki, David Mamet, Joy Kogawa, Kazuo Ishiguro, Marguerite Duras, and David Hwang.

Prerequisite: [EAS209H1](#), or permission of the instructor.
Breadth Requirements: Creative and Cultural Representations (1)

EAS457H1 - Modern Japanese Historiography

Hours: 24S

An analysis of contemporary monographs on modern Japanese history. This course offers a critical survey of existing methodologies of and approaches to writing about modern Japan.

Prerequisite: [EAS209H1](#) and [EAS247H1](#)
Breadth Requirements: Society and its Institutions (3)

EAS458H1 - Classical Chinese II

Previous Course Number: EAS306Y1
Hours: 24S

As a continuation of [EAS358Y1](#) (formerly [EAS206Y1](#)), this course helps students to gain in-depth control of grammatical structures of classical Chinese and to read texts with greater ease. Requirements include a major research/translation project. Open only to EAS majors and specialists.

Prerequisite: [EAS358Y1](#) (minimum 79%)
Exclusion: [EAS306Y1](#), [EAS335Y1](#)
Recommended Preparation: Three or more years of Modern Standard Chinese
Breadth Requirements: Creative and Cultural Representations (1)

EAS459Y1 - Rethinking the Cold War in East Asia

Hours: 48S

This research course examines the ways our historical understanding of the Cold War in East Asia has shifted over the last twenty years. Focusing primarily on the divided Korean peninsula where it can be said the Cold War still rages, the course examines the mutual constitution of two competing regional political economies rooted in a shared commitment to developmentalism.

Prerequisite: [EAS209H1](#) and [EAS271H1](#)
Breadth Requirements: Society and its Institutions (3)

EAS465H1 - Korea Under Japanese Colonialism

Hours: 24S

This seminar introduces students to comparative studies of colonialism, focusing on Japanese colonialism in Korea. Students will read broadly in the historiography of the Japanese Empire with the goal of developing an understanding of trends that have shaped the research directions of the last ten years. Part of the course will also include readings in and discussion of comparative colonialism. The final statement will be an intensive state-of-the-field paper.

Prerequisite: Completion minimum of 9.0 credits

Recommended Preparation: [EAS271H1](#)
Breadth Requirements: Society and its Institutions (3)

EAS466H1 - Rethinking North Korean History

Hours: 36S

This essay-driven course explores the complexity of examining North Korean history by using comparative methods developed through the study of other socialist societies and theories of everyday life.

Prerequisite: [EAS209H1](#), [EAS271H1](#)
Breadth Requirements: Society and its Institutions (3)

EAS467H1 - Photographic Narratives of Japan

Hours: 24S

Uses seminal theoretical literature, photo roman (by, e.g., Abe, Nakagami) and narratives about photography (by, e.g., Tanizaki, Mishima, Kanai) to examine the rhetorical complicity and coercion of the two modes of representation which emerged in the modern and nationalistic age, and persist, in the wake of the newer media, as dominant registers of everyday life and departures from there.

Prerequisite: [EAS209H1](#) & at least one course in humanities (literature, art history, philosophy) or reading proficiency in Japanese

Breadth Requirements: Creative and Cultural Representations (1)

EAS468H1 - Democratic Struggles in Korea

Hours: 24S

This seminar examines resistance, struggles, strikes and movements seen as constituting a troubled history of democracy across Korea's long 20th century.

Prerequisite: [EAS209H1](#), [EAS271H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS471H1 - Issues in the Political Economy of South Korea

Hours: 24S

A course designed to guide students toward a research paper on a selected topic of interest on the postwar political economy of South Korea.

Prerequisite: [EAS209H1](#) and [EAS271H1](#)

Exclusion: [EAS471Y1](#)

Breadth Requirements: Society and its Institutions (3)

EAS473H1 - Modern Korean Historiography

Hours: 24S

An examination of recent literature in the modern Korean history field, focusing especially on the late 19th and 20th centuries.

Prerequisite: [EAS209H1](#) and [EAS271H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS474H1 - U.S. and Canada's Wars in Asia

Hours: 24S

This course examines the cultural and social legacies of the 19th- and 20th-century hot and cold wars fought by the U.S. and Canada in different parts of Asia. It explores film, literature, and other cultural products that came out of the transpacific violence and its aftermath.

Prerequisite: [EAS209H1](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS475Y1 - Issues in East Asian Historiography

Hours: 48L

This course analyses select topics in the historiography of East Asian. Students are expected to write a major research paper.

Prerequisite: [EAS209H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS476H1 - Social Protest in Modern East Asia

Hours: 24L

This course explores cases of social protests in 19th and 20th century China, Japan, and Korea. Students will read and write about specific case studies of anti-government student protests, labor actions, anti-colonial movements, women's rights activism, and peasant rebellions.

Prerequisite: [EAS209H1](#)

Breadth Requirements: Society and its Institutions (3)

EAS477H1 - Samurai Culture

Hours: 24S

An intensive seminar exploring one of Japan's most recognizable figures, the samurai. This course investigates the historical reality of warrior life along with the legends, with focus on the ways in the warrior's world found expression in religion, art, and literature.

Prerequisite: [EAS209H1](#), [EAS245H1](#)/ [EAS246H1](#)/ [EAS247H1](#)

Exclusion: EAS478Y1**Breadth Requirements:** Society and its Institutions (3)

EAS479H1 - Ecocriticism

Hours: 24L

The course aims to establish students' ability to engage with core ecological agendas with methodology of cultural history and literary and visual analysis.

Prerequisite: EAS209H1**Recommended Preparation:** At least one 300-level EAS course**Breadth Requirements:** Society and its Institutions (3)

EAS486H1 - Readings in Mahāyāna Sūtra Literature

Hours: 24S

This seminar explores the key literary, doctrinal and ritual innovations of the Mahāyāna Buddhist tradition as it unfolded in the first few centuries of the Common Era. The semester will begin with a consideration of the origins of the Mahāyāna in early India, and end in medieval Mahāyāna communities of East Asia and Tibet. Along the way we will conduct close readings of several important Mahāyāna works (sūtras, commentaries, ritual manuals) in order to explore key elements in the development of the Great Vehicle as it was transmitted and transformed across Buddhist Asia.

Prerequisite: EAS209H1**Breadth Requirements:** Thought, Belief and Behaviour (2)

EAS488H1 - Fandom, Transmedia, and the Korean Wave

Hours: 24S

This course investigates the transmedia forms and reception contexts of what is now known as hallyu or "the Korean wave." Topics include fan subjectivity and the "global popular," across a broad array of texts, including music, feature films, television dramas, fan blogs, and internet video. This seminar considers how popular media shape collective identity, and explores the connections between activism, mass media, commodity culture, and their corresponding affective registers, bridging fan studies, media studies, and contemporary Korean cultural studies.

Prerequisite: EAS209H1**Breadth Requirements:** Creative and Cultural Representations (1)

EAS489H1 - Advanced Seminar in Asian Media Studies

Hours: 24S

Topics include: histories of media infrastructures, material culture, geopolitics of colonialism, imperialism, and regionalism, institutional histories of media production, analyses of popular and industrial media practices, questions of interface, platforms, circulation, and reception, and the constitutive role of media in shaping notions of modernity, publicity, and politics.

Prerequisite: EAS209H1**Breadth Requirements:** Creative and Cultural Representations (1)

EAS496H1 - Advanced Topics in East Asian Studies

Hours: 24S

An in-depth study of Chinese, Japanese or Korean culture, history and/or literature. Content depends on the instructor. When offered, the course will have a subtitle that describes its content.

Prerequisite: EAS209H1

EAS Independent Studies

EAS299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

EAS299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>.

-opportunities/research-opportunities-program. Not eligible for CR/NCR option.

EAS399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

EAS399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

EAS434H1 - Independent Studies

A scholarly project chosen by the student, approved by the Department, and supervised by one of its instructors. Consult the website (eas.utoronto.ca) for more information. Not eligible for CR/NCR option.

Prerequisite: 5.0 EAS credits, including [EAS209H1](#)

EAS435H1 - Independent Studies

A scholarly project chosen by the student, approved by the Department, and supervised by one of its instructors. Consult the website (eas.utoronto.ca) for more information. Not eligible for CR/NCR option.

Prerequisite: 5.0 EAS credits, including [EAS209H1](#)

EAS436Y1 - Independent Studies

A scholarly project chosen by the student, approved by the Department, and supervised by one of its instructors. Consult the website (eas.utoronto.ca) for more information. Not eligible for CR/NCR option.

Prerequisite: 5.0 EAS credits, including [EAS209H1](#)

Chinese

EAS100Y1 - Modern Standard Chinese I

Hours: 48L/72T

Intended for students with no background in Mandarin or any Chinese dialect, this course provides an introduction to modern standard Chinese as a foreign/second language. The course consists of mandatory lectures and tutorials. Students study a minimum of 450 Chinese characters. Students must go through screening process conducted by the Department. See www.eas.utoronto.ca/languages/chinese for details.

Prerequisite: Students must go through screening process conducted by the Department. See <https://www.eas.utoronto.ca/languages/chinese> for details.

Exclusion: [EAS101Y1](#), [LGGA60H3](#), [LGGA61H3](#), [LGGB60H3](#), [LGGB61H3](#), [CHI101H5](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS101Y1 - Modern Chinese I for Students with Prior Background

Hours: 48L/48T

This course is designed for students who understand elementary Mandarin or any Chinese dialect. The course consists of mandatory lectures and tutorials. Students will learn 600 characters. Students must go through placement process conducted by the Department. See www.eas.utoronto.ca/languages/chinese for details.

Prerequisite: Students must go through placement process conducted by the Department. See <https://www.eas.utoronto.ca/languages/chinese> for details.

Exclusion: [EAS100Y1](#), [EAS200Y1](#), [LGGA60H3](#), [LGGA61H3](#), [LGGA64H3](#), [LGGA65H3](#), [LGGB60H3](#), [LGGB61H3](#), [CHI101H5](#), [CHI103H5](#), [CHI104H5](#), [CHI203H5](#), [CHI204H5](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS200Y1 - Modern Standard Chinese II

Hours: 96L

This course is a continuation of [EAS100Y1](#). Students learn major grammatical structures which are not introduced in the first year and expand their vocabulary. Students who do not meet the prerequisite must go through a placement process conducted by the Department. See www.eas.utoronto.ca/languages/chinese for details.

Prerequisite: EAS100Y1 (minimum grade 67%)/equivalent as determined by placement process.

Exclusion: EAS101Y1, EAS201H1, LGGB60H3, LGGB61H3, LGGB62H3, LGGB63H3, CHI203H5, CHI204H5

Breadth Requirements: Creative and Cultural Representations (1)

EAS201H1 - Modern Chinese II for Students with Prior Background

Previous Course Number: EAS201Y1

Hours: 48L

This course is a continuation of EAS101Y1. It focuses on development of students' listening, speaking, reading, and writing skills at an intermediate low level. Students who do not meet the prerequisite must go through placement process conducted by the Department. See www.eas.utoronto.ca/languages/chinese for details.

Prerequisite: EAS101Y1 (minimum 67%)/equivalent as determined by placement process.

Exclusion: EAS200Y1, LGGB60H3, LGGB61H3, LGGB62H3, LGGB63H3, CHI203H5, CHI204H5

Breadth Requirements: Creative and Cultural Representations (1)

EAS300Y1 - Modern Standard Chinese III

Hours: 96L/36T

This high intermediate-level course is a continuation of EAS200Y1. Students learn to read short texts which deal with cultural and social topics, compose paragraph-length essays, and converse in social situations which require exchanges of basic information and generate interpretations. Students who do not meet the prerequisite must go through placement process conducted by the Department. See www.eas.utoronto.ca/languages/chinese for details.

Prerequisite: EAS200Y1 (minimum 70%)/ equivalent as determined by placement process.

Exclusion: LGGC60H3, LGGC61H3, LGGB62H3, LGGB63H3, LGGB62H3, LGGB63H3, CHI303H5, CHI304H5

Breadth Requirements: Creative and Cultural Representations (1)

EAS301H1 - Modern Standard Chinese III for Students with Prior Background

Hours: 48L

This course is the equivalent of the second half of EAS300Y1. It is for students who have either completed successfully EAS201H1 or reached the intermediate-mid level in speaking, listening, reading and writing by prior study. Successful completion of the course fulfills the prerequisite for EAS401H1, EAS402H1, or EAS404H1.

Prerequisite: EAS201H1 (minimum 70%)/equivalent as determined by placement process.

Exclusion: EAS300Y1, LGGC60H3, LGGC61H3, LGGB62H3, LGGB63H3, CHI303H5, CHI304H5

Breadth Requirements: Creative and Cultural Representations (1)

EAS401H1 - Modern Standard Chinese IVa

Hours: 48L

This course aims to develop students' abilities at an advanced level, with a focus on reading of fictional and/or journalistic writings. Students will improve their reading comprehension, strengthen writing skills, and advance speaking and listening skills through class discussions and oral presentations. Students who do not meet the prerequisite must go through placement process conducted by the Department. See www.eas.utoronto.ca/languages/chinese for details.

Prerequisite: EAS300Y1/ EAS301H1 (minimum 73%)/ equivalent as determined by placement process

Exclusion: CHI411H5 and ECTB61H3

Breadth Requirements: Creative and Cultural Representations (1)

EAS402H1 - Modern Standard Chinese IVb

Hours: 48L/24T

An advanced Chinese language course which explores major concerns in contemporary China, including mass consumption, Western influences and technological innovation. Students will improve their reading comprehension, strengthen their writing skills and, importantly, advance their speaking and listening abilities through debate exercises. Students who do not meet the prerequisite must go through placement process conducted by the Department. See <https://www.eas.utoronto.ca/languages/chinese> for details.

Prerequisite: EAS300Y1/ EAS301H1 (minimum 73%)/ equivalent as determined by placement process

Exclusion: CHI411H5 and ECTB61H3

Breadth Requirements: Creative and Cultural Representations (1)

EAS404H1 - Business Chinese

Hours: 48L/24T

This course aims to assist students with upgrading their language proficiency for professional purposes. This advanced Chinese language course focuses on 1) business terms and expressions and 2) formal or semiformal discourse in business. Students who do not meet the prerequisite must go through placement process conducted by the Department. See <https://www.eas.utoronto.ca/languages/chinese> for details.

Prerequisite: EAS300Y1/ EAS301H1 (minimum 73%)/ equivalent as determined by placement process

Exclusion: CHI411H5 and ECTB61H3

Breadth Requirements: Creative and Cultural Representations (1)

Japanese

EAS120Y1 - Modern Standard Japanese I

Hours: 48L/48T

This course is for students with no or a very limited background in Japanese. Students must go through screening process conducted by the Department. See www.eas.utoronto.ca/languages/japanese/ for details. Not eligible for CR/NCR option.

Prerequisite: Students must go through screening process conducted by the Department. See <https://www.eas.utoronto.ca/languages/japanese> for details.

Exclusion: EAS121H1, EAS122Y0, LGGA80H3, LGGA81H3

Recommended Preparation: Learning the Japanese alphabets (hiragana & katakana)

Breadth Requirements: Creative and Cultural Representations (1)

EAS151H1 - Modern Standard Japanese I-a

Hours: 24L/24T

This course is for students with no or a very limited background in Japanese. Not eligible for CR/NCR option.

Prerequisite: Students must go through a screening process conducted by the Department. See <https://www.eas.utoronto.ca/languages/japanese> for details.

Exclusion: EAS120Y1, EAS121H1, EAS122Y0, LGGA80H3, LGGA81H3, LGGA82Y3

Recommended Preparation: Learning the Japanese alphabets (hiragana & katakana)

Breadth Requirements: Creative and Cultural Representations (1)

EAS152H1 - Modern Standard Japanese I-b

Previous Course Number: EAS121H1

Hours: 24L/24T

This course, which is a continuation of EAS151H1, is for students with some background in the Japanese language. All students must go through a screening process conducted by the Department. See <https://www.eas.utoronto.ca/languages/japanese> for details. Not eligible for CR/NCR option.

Prerequisite: EAS151H1 (minimum of 60%) or equivalent as determined by the placement process. Students who did not take the prerequisite in the same academic year must take the placement test.

Exclusion: EAS120Y1, EAS222Y0, LGGA81H3

Breadth Requirements: Creative and Cultural Representations (1)

EAS220Y1 - Modern Standard Japanese II

Hours: 48L/48T

This is an advanced beginner level language course for those who completed EAS120Y1 or EAS121H1 with a minimum grade of 67%. Students who do not meet the prerequisite must go through placement process conducted by the Department. See <https://www.eas.utoronto.ca/languages/japanese> for details.

Prerequisite: EAS120Y1 (minimum of 67%)/ EAS121H1 (minimum 67%)/equivalent as determined by placement process. Students who did not take the prerequisite in the preceding academic year must take the placement test.

Exclusion: EAS223Y0

Breadth Requirements: Creative and Cultural Representations (1)

EAS252H1 - Modern Standard Japanese II-a

Hours: 24L/24T

This course is an advanced beginners' level Japanese language course, which is designed for those who have completed [EAS152H1](#) or [EAS120Y1](#) or [EAS121H1](#) with a minimum grade of 67%. All students must go through a screening process conducted by the Department. See <https://www.eas.utoronto.ca/languages/japanese> for details.

Prerequisite: [EAS152H1](#) or [EAS120Y1](#) or [EAS121H1](#) (minimum of 67%), or equivalent as determined by the placement process. Students who did not take the prerequisite in the preceding academic year must take the [placement test](#).

Exclusion: [EAS220Y1](#), [EAS223Y0](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS253H1 - Modern Standard Japanese II-b

Previous Course Number: EAS221H1

Hours: 24L/24T

This course, which is a continuation of [EAS252H1](#), is for students who have a good foundation of lower beginners' grammar, vocabulary and kanji knowledge and have not yet acquired the proficiency required to take [EAS350Y1](#) (previously [EAS320Y1](#)). All students must go through a screening process conducted by the Department. See <https://www.eas.utoronto.ca/languages/japanese> for details.

Prerequisite: [EAS252H1](#) (minimum of 60%) or equivalent as determined by the placement process. Students who did not take the prerequisite in the same academic year must take the [placement test](#).

Exclusion: [EAS220Y1](#), [EAS221H1](#), [EAS223Y0](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS350Y1 - Modern Standard Japanese III

Previous Course Number: EAS320Y1

Hours: 96S

This is a lower intermediate level course for those who have completed [EAS253H1](#) or [EAS220Y1](#) or [EAS221H1](#) with a minimum grade of 70%. All students must go through a screening process conducted by the Department. See <https://www.eas.utoronto.ca/languages/japanese> for details.

Prerequisite: [EAS253H1](#) and [EAS220Y1](#) or [EAS221H1](#) (minimum of 70%), or equivalent as determined by the

placement process. Students who did not take the prerequisite in the preceding academic year must take the [placement test](#).

Exclusion: [EAS320Y1](#), [EAS322Y0](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS451H1 - Modern Standard Japanese IV-a

Previous Course Number: EAS461H1

Hours: 48S

This is an upper intermediate level Japanese course that focuses on reading and writing skills for those who have completed [EAS350Y1](#) (previously [EAS320Y1](#)) with a minimum grade of 70%. Native or near-native speakers are not permitted to take this course. All students must go through a screening process conducted by the Department. See <https://www.eas.utoronto.ca/languages/japanese> for details.

Prerequisite: [EAS350Y1](#) or [EAS320Y1](#) (minimum of 67%), or equivalent as determined by the placement process. Students who did not take the prerequisite in the preceding academic year must take the [placement test](#).

Exclusion: [EAS461H1](#), [EAS463Y0](#)

Breadth Requirements: Creative and Cultural Representations (1)

EAS453H1 - Modern Standard Japanese IV-b

Previous Course Number: EAS460H1

Hours: 48S

This is an upper intermediate level Japanese course that focuses on oral/aural communication for those who have completed [EAS350Y1](#) (previously [EAS320Y1](#)) with a minimum grade of 70%. Native or near-native speakers are not permitted to take this course. All students must go through a screening process conducted by the Department. See <https://www.eas.utoronto.ca/languages/japanese> for details.

Prerequisite: [EAS350Y1](#) or [EAS320Y1](#) (minimum of 67%), or equivalent as determined by the placement process. Students who did not take the prerequisite in the preceding academic year must take the [placement test](#).

Exclusion: [EAS460H1](#), [EAS463Y0](#)

Breadth Requirements: Creative and Cultural Representations (1)

Korean

EAS110Y1 - Modern Standard Korean I

Hours: 48L/72T

This course is designed to help students build communication skills in the Korean language. Through an integration of listening, speaking, reading and writing, it aims to provide a solid foundation in beginning-level Korean. This course assumes that students do not have any prior knowledge of Korean. Students must go through screening process conducted by the Department. See <https://www.eas.utoronto.ca/languages/korean> for details.

Prerequisite: Students must go through screening process conducted by the Department. See <https://www.eas.utoronto.ca/languages/korean> for details.

Exclusion: EAS211Y1

Breadth Requirements: Creative and Cultural Representations (1)

EAS210Y1 - Modern Standard Korean II

Hours: 48L/72T

As a continuation of EAS110Y1, this course is designed to help students improve their skills in the Korean language. Students in this course are expected to perform basic communicative functions, read and write paragraph-level texts, and conjugate verbs/adjectives accurately. Students who do not meet the prerequisite must go through placement process conducted by the Department. See <https://www.eas.utoronto.ca/languages/korean> for details.

Prerequisite: EAS110Y1 (63% minimum)/ equivalent as determined by the Korean placement interview. Students who do not meet the prerequisite must go through placement process conducted by the Department. See <https://www.eas.utoronto.ca/languages/korean> for details.

Exclusion: EAS211Y1, EAS212H1

Breadth Requirements: Creative and Cultural Representations (1)

EAS211Y1 - Accelerated Modern Standard Korean I & II

Hours: 96L

Covering both EAS110Y1 and EAS210Y1, the course is ideal for self-motivated students who enjoy fast-paced language learning, students with a passion for Korean films and television, students with some listening and speaking skills from prior study or family background, and students taking the full four-year course series. Successful

completion of the course fulfils the prerequisite for EAS310Y1. Students must go through screening process conducted by the Department. See www.eas.utoronto.ca/languages/korean for details.

Prerequisite: Students must go through screening process conducted by the Department. See <https://www.eas.utoronto.ca/languages/korean> for details.

Exclusion: EAS110Y1, EAS210Y1, EAS212H1

Breadth Requirements: Creative and Cultural Representations (1)

EAS212H1 - Accelerated Modern Standard Korean II

Hours: 48L

As a continuation of EAS110Y1, this course is designed to help students increase their Korean communication skills at beginner high to intermediate low levels. It is ideal for self-motivated students who enjoy fast-paced language learning, and students who have built basic language skills from prior study. Successful completion of the course fulfils the prerequisite for EAS310Y1. Students who do not meet the prerequisite must go through placement process conducted by the Department. See www.eas.utoronto.ca/languages/korean for details.

Prerequisite: EAS110Y1 (70% minimum)/Students who do not meet the prerequisite must go through placement process conducted by the Department.

Exclusion: EAS210Y1, EAS211Y1

Breadth Requirements: Creative and Cultural Representations (1)

EAS310Y1 - Modern Standard Korean III

Hours: 48L/72T

As a continuation of EAS210Y1 and EAS211Y1, this course is designed to help students improve their Korean proficiency at the intermediate level. The class focuses not only on oral fluency and grammar but also on reading comprehension. Students who do not meet the prerequisite must go through placement process conducted by Department. See www.eas.utoronto.ca/languages/korean for details.

Prerequisite: EAS210Y1 (67%)/ EAS211Y1 (67%)/ EAS212H1 (67%)/equivalent as determined by placement process

Breadth Requirements: Creative and Cultural Representations (1)

EAS410Y1 - Modern Standard Korean IV

Hours: 96L

As a continuation of EAS310Y1, this course is designed for advanced-level learners of Korean. Through reading short essays/articles and watching films, this course aims to improve students' proficiency in speaking, writing, listening, and reading. Classroom and online discussions are conducted entirely in Korean. Students who do not meet the prerequisite must go through placement process conducted by the Department. See www.eas.utoronto.ca/languages/korean for details.

Prerequisite: EAS310Y1 (70% minimum)/equivalent as determined by placement process

Breadth Requirements: Creative and Cultural Representations (1)

EAS416Y1 - Academic and Professional Korean

Hours: 96L

This course aims to assist students to upgrade their language proficiency for academic and professional purposes. It is ideal for students who seek career opportunities in Korea-related business or in higher education in Korean studies. Emphasis is on comprehension and composition of academic and business texts and preparation for Korean proficiency tests. Students who do not meet the prerequisite must go through placement process conducted by the Department. See www.utoronto.ca/languages/korean for details.

Prerequisite: EAS310Y1 (70% minimum)/equivalent as determined by placement process.

Breadth Requirements: Creative and Cultural Representations (1)

Introduction

Ecology and evolutionary biology (EEB) seeks to understand the origins, diversity, and distribution of organisms. All life evolves. All life sciences, along with evidence-based stewardship of life on planet Earth, depend on understanding the factors that influence the origin and maintenance of biological diversity – from genomes to ecosystems. Understanding EEB helps society to make informed decisions about sustainable development, global climate change, invasive species, harvested natural resources, preservation of biodiversity, genetic diversity and ecosystem integrity, control of herbicide and pesticide resistance, antibiotic and drug resistance, and emerging infectious diseases.

Students exposed to these subjects come to realize that the ecological and evolutionary underpinnings of life pose a constellation of engaging scientific problems that are both intellectually challenging and critical to humanity's future. EEB graduates go on to successful careers in data science, research, medicine and healthcare, government ministries like MNR and DFO, environmental and conservation NGO's and consulting firms, and many other industries. As members of one of the highest ranked EEB departments in the world and the largest EEB department in Canada, EEB students are uniquely positioned to enhance their scientific literacy as the future decision-makers and knowledge-creators in society.

The EEB Department offers a diverse collection of over 50 courses that explore biological diversity, conservation biology, molecular evolution, population and quantitative genetics, computational and statistical data analysis, genomics, animal behaviour, the ecology of populations, communities, and ecosystems, mathematical theory in biology, environmental biology, and systematics. EEB faculty include Curators from the Royal Ontario Museum. Students participate in diverse learning environments within EEB courses: hands-on bench and computer lab practicals, field trips, off-campus field courses in Ontario and internationally, small-class discussion seminars, and independent research projects with world-leading faculty researchers. Students enrolled in EEB courses and programs become part of a welcoming and supportive community of scholars.

The EEB Department offers six core programs of study: **Ecology & Evolutionary Biology** (Specialist and Major), **Biodiversity & Conservation Biology** (Major), **Environmental Biology** (Major and Minor) and **Quantitative Biology** (Major). Students enrolled in EEB programs are invited to participate in the Arts & Science's Second-Year Learning Communities, or SLCs, that bring together a small group of second-year students who have a similar academic focus and belong to the same department, and to attend the EEB Info Session Series for advising about career options, applying for scholarships and grad school, and seeking out research opportunities.

Students with questions and advising needs about EEB-sponsored programs are encouraged to visit the departmental website <https://eeb.utoronto.ca/education/undergraduate/> or to contact the EEB Undergraduate Office, Earth Sciences Centre (25 Willcocks St.), Room 3055B, undergrad.eeb@utoronto.ca, 416-978-2084.

The EEB Department also jointly offers multi-department programs: Specialist, Major, and Minor programs in general **Biology** (with Cell & Systems Biology), a Major program in **Genome Biology** (with Cell & Systems Biology and Molecular Genetics & Microbiology), and a Specialist program in **Bioinformatics & Computational Biology** (with Cell & Systems Biology, Biochemistry, Molecular Genetics & Microbiology, and Computer Science). Students requiring more information about these programs and their course requirements should consult the Biology Calendar page.

Ecology and Evolutionary Biology Program Goals

Ecologists and evolutionary biologists recognize that all life has evolved and that an understanding of the factors influencing the origin and maintenance of biological diversity – from genomes to ecosystems – underlies all life sciences and is critical to our stewardship of life on this

planet. EEB aims to produce citizens who are literate in the ecological and evolutionary principles that form the foundation for understanding life on Earth, how human and natural factors influence nature, and how changes to nature influence public health, the economy, and other societal priorities. The EEB-sponsored programs of study prepare students in these foundations of life science for future careers in data science, research, medicine and healthcare, government agencies like MNR and DFO, environmental and conservation NGOs, and many other industries.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Ecology and Evolutionary Biology programs impacted by this policy: ASSPE1006 and ASMAJ1006; ASMAJ1390 and ASMIN1390

Ecology and Evolutionary Biology Programs

Ecology and Evolutionary Biology Specialist (Science Program) - ASSPE1006

The **Ecology & Evolutionary Biology Specialist** program (12.0 credits) provides an in-depth understanding of ecological and evolutionary patterns and processes, as well as the diversity of life forms (microbes, fungi, plants, animals). Concepts are taught using a broad array of approaches, including molecular studies, laboratory experiments, computer and mathematical modeling, and field studies. An integral part of the experience is to conduct independent research projects in the laboratory and/or field. There is a strong emphasis within the program on hands-on laboratory and fieldwork that complement the conceptual framework developed in lectures. Students in this program have the opportunity to concentrate in ecology, evolutionary biology, or behaviour.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(12.0 credits including at least 4.0 credits at the 300+ level, 1.0 of which must be at the 400-level)

First Year (3.0 credits): BIO120H1; BIO130H1; (CHM135H1, CHM136H1)/ CHM151Y1; (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

1. 2.0 credits: BIO220H1 (ecology and evolutionary biology); BIO230H1/ BIO255H1 (molecular and cell biology); BIO260H1/ HMB265H1 (genetics); BIO251H1/ BIO270H1/ PSL300H1/ EEB240H1 (plant or animal form and function/environmental biology).

2. 0.5 credit in computational science from: EEB125H1/ CSC108H1/ CSC148H1/ CSC110Y1, and 0.5 credit in statistics from: EEB225H1/ STA220H1/ STA257H1/ STA288H1/ GGR270H1/ PSY201H1

3. 0.5 credit in core evolution from: EEB318H1, EEB323H1, EEB362H1

4. 0.5 credit in core ecology from: EEB319H1, EEB320H1, EEB321H1, EEB328H1

5. 0.5 credit in organismal biology from: EEB263H1, EEB266H1, EEB267H1, EEB268H1, EEB331H1, EEB340H1, EEB380H1, EEB382H1, EEB384H1, EEB386H1, EEB388H1

6. 1.0 credit at 300+ level, from: EEB313H1, EEB314H1, EEB318H1, EEB319H1, EEB320H1, EEB321H1, EEB322H1, EEB323H1, EEB324H1, EEB325H1, EEB328H1, EEB340H1, EEB356H1, EEB362H1, EEB365H1, EEB380H1, EEB382H1, EEB384H1, EEB386H1, EEB388H1, EEB390H1, EEB398H0, EEB398Y0, EEB399H1, EEB399Y1, EEB428H1, EEB434H1, EEB440H1, EEB455H1, EEB458H1, EEB459H1, EEB460H1, EEB463H1, EEB465H1, EEB466H1, EEB491H1, EEB495H1; EHJ352H1; ENV432H1; ENV395Y1

Sub-total = 8.5 credits

7. 1.0 to 1.5 credits in at least two of the three following categories: (1) one field course (0.5 credit) from EEB403H1, EEB405H1, EEB406H1, EEB410H1; (2) one seminar (0.5 credit) from EEB491H1, EEB495H1; and/or (3) one independent research course (0.5 credit) from EEB497H1/ (1.0 credit) from EEB498Y1

Sub-total = 9.5 or 10.0 credits (depending on options chosen in #7)

8. Select the remaining credits for a total of 12.0 credits (at least 1.0 must be 300+ series if 1.0 credit is completed in #7 above) from: BIO251H1, BIO270H1/ PSL300H1, BIO271H1/ PSL301H1; all EEB courses (excluding EEB196H1, EEB197H1, EEB198H1, EEB199H1, EEB202H1, EEB208H1, EEB214H1, EEB215H1); EHJ352H1; ENV432H1; JHE353H1, JHE355H1; and no more than 1.0 credit from the following (note that some courses may require prerequisites that are not listed within this program): ANT336H1, ANT333Y1, ANT335Y1,

ANT338H1, ANT430H1, ANT436H1; CSB328H1, CSB340H1, CSB349H1, CSB350H1, CSB352H1, CSB353H1, CSB430H1, CSB431H1, CSB452H1, CSB458H1, CSB472H1, CSB474H1; ENV346H1; FOR200H1, FOR201H1, FOR301H1, FOR306H1, FOR307H1, FOR413H1, FOR416H1, FOR417H1, FOR418H1; GGR201H1, GGR203H1, GGR205H1, GGR206H1, GGR272H1, GGR273H1, GGR305H1, GGR307H1, GGR308H1; MAT221H1; MGY340H1; PSY100H1, PSY260H1, PSY270H1, PSY280H1, PSY290H1, PSY305H1, PSY390H1, PSY397H1, PSY474H1, PSY492H1, PSY497H1 (note that many PSY courses have limited enrolment)

Total = 12.0 credits

NOTE: Students may wish to concentrate in ecology, evolutionary biology, or behaviour. Recommended EEB, EHJ and JHE courses for these concentrations are as follows:

Ecology: EEB255H1, EEB319H1, EEB320H1, EEB321H1, EEB328H1, EEB365H1, EEB428H1, EEB434H1, EEB440H1, EEB465H1, EEB495H1; ENV432H1
Evolutionary Biology: EEB323H1, EEB324H1, EEB325H1, EEB362H1, EEB390H1, EEB440H1, EEB459H1, EEB460H1; EHJ352H1; JHE353H1, JHE355H1
Behaviour: EEB322H1, EEB455H1

Biodiversity and Conservation Biology Major (Science Program) - ASMAJ0110

In today's era of unprecedented global change, natural ecosystems are under attack and thousands of species are threatened with extinction and many more have experienced unprecedented declines. Students in the **Biodiversity & Conservation Biology Major** program (8.0 credits) will be equipped to aid in the response to what is perhaps humanity's most pressing challenge, the conservation of biological diversity. Students in this program take courses in their first and second years that provide foundations in ecology, evolutionary biology, biodiversity and conservation biology, environmental biology, mathematics, and statistics. In their upper years students will obtain in-depth knowledge about the diversity of living organisms and take advanced courses in ecology, evolution, and biodiversity and conservation biology.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(8.0 credits including at least 2.0 credits at 300+ level with at least 0.5 credit at the 400 level)

First Year (1.0 credit): BIO120H1; EEB125H1/
MAT135H1/ MAT137Y1/ MAT221H1/ MAT223H1

Higher Years:

1. 2.0 credits: BIO220H1 (ecology and evolutionary biology); EEB225H1/ STA220H1/ STA257H1/ STA288H1/ GGR270H1/ PSY201H1 (statistics); EEB255H1 (conservation biology); EEB240H1 (environmental biology).

2. 1.5 credits from: BIO251H1; EEB263H1, EEB266H1, EEB267H1, EEB268H1, EEB299H1, EEB299Y1, EEB340H1, EEB380H1, EEB382H1, EEB384H1, EEB386H1, EEB388H1, EEB398H0, EEB398Y0, EEB399H1, EEB399Y1; FOR305H1

3. 1.0 credits in core ecology and evolution: EEB314H1, EEB318H1, EEB319H1, EEB320H1, EEB321H1, EEB322H1, EEB323H1, EEB324H1, EEB328H1, EEB362H1

4. 0.5 credit: EEB365H1 (applied conservation biology)

5. 1.5 credits from: BIO130H1, BIO251H1; EEB263H1, EEB266H1, EEB267H1, EEB268H1, EEB299H1, EEB299Y1, EEB313H1, EEB314H1, EEB318H1, EEB319H1, EEB320H1, EEB321H1, EEB322H1, EEB323H1, EEB324H1, EEB325H1, EEB328H1, EEB340H1, EEB362H1, EEB380H1, EEB382H1, EEB384H1, EEB386H1, EEB388H1, EEB390H1, EEB397Y1, EEB398H0, EEB398Y0, EEB399H1, EEB399Y1, EEB428H1, EEB434H1, EEB440H1, EEB455H1, EEB458H1, EEB459H1, EEB460H1, EEB462H1, EEB463H1, EEB491H1, EEB495H1, EEB497H1, EEB498Y1, EEB499Y1; EHJ352H1; ENV432H1; FOR200H1, FOR201H1, FOR307H1, FOR413H1; GGR272H1, JHE353H1, JHE355H1

6. 0.5 credit: EEB 400-series level course

Ecology and Evolutionary Biology Major (Science Program) - ASMAJ1006

The **Ecology and Evolutionary Biology Major** program (8.0 credits) provides a comprehensive understanding of ecological and evolutionary patterns and processes, as well as the diversity of life forms (microbes, fungi, plants, animals). Concepts are taught using a broad array of approaches, including molecular studies, laboratory experiments, computer and mathematical modeling, and field studies. An integral part of the experience is to conduct independent research projects in the laboratory and/or field. There is a strong emphasis within the

program on hands-on laboratory and fieldwork that complement the conceptual framework developed in lectures.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(8.0 credits including at least 2.0 credits at 300+ series with at least 0.5 credit at the 400-series)

First Year (2.0 credits): BIO120H1; BIO130H1; (CHM135H1, CHM136H1)/ CHM151Y1/ (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

Higher Years:

1. 2.0 credits: BIO220H1; BIO230H1/ BIO255H1; BIO260H1/ HMB265H1; EEB225H1/ STA220H1/ STA257H1/ STA288H1/ GGR270H1/ PSY201H1

2. 1.0 credit from: BIO251H1, BIO270H1/ PSL300H1, BIO271H1/ PSL301H1, EEB263H1, EEB266H1, EEB267H1, EEB268H1, EEB240H1

3. 0.5 credit in core ecology and evolution from: EEB314H1, EEB318H1, EEB319H1, EEB320H1, EEB321H1, EEB322H1, EEB328H1, EEB362H1

4. 1.5 credits from: EEB313H1, EEB314H1, EEB318H1, EEB319H1, EEB320H1, EEB321H1, EEB322H1, EEB323H1, EEB324H1, EEB325H1, EEB328H1, EEB362H1, EEB365H1, EEB380H1, EEB382H1, EEB384H1, EEB386H1, EEB388H1, EEB390H1, EEB397Y1, EEB398H0, EEB398Y0, EEB399H1, EEB399Y1, EEB428H1, EEB434H1, EEB440H1, EEB455H1, EEB458H1, EEB459H1, EEB460H1, EEB463H1, EEB465H1, EEB466H1; EHJ352H1; ENV432H1; PSY305H1

5. 0.5 credit from: BIO251H1; BIO270H1/ PSL300H1; BIO271H1/ PSL301H1; EEB (excluding EEB196H1, EEB197H1, EEB198H1, EEB199H1, EEB202H1, EEB208H1, EEB214H1, EEB215H1); ENV432H1; EHJ352H1; JHE353H1, JHE355H1; MAT135H1/ MAT136H1/ MAT137Y1/ MAT221H1/ MAT223H1; MGY340H1

6. 0.5 credit at the 400-series from: field course, EEB403H1, EEB405H1, EEB406H1, EEB410H1; seminar EEB491H1, EEB495H1; independent research project course, EEB497H1, EEB498Y1 (concurrent with research issues course EEB488H1), EEB499Y1; advanced lecture/discussion course, EEB428H1, EEB440H1, EEB455H1, EEB459H1, EEB460H1, EEB465H1, EEB466H1; ENV432H1

Environmental Biology Major (Science Program) - ASMAJ1390

Environmental science is an interdisciplinary field that integrates biological, chemical, and physical sciences to study human interactions with their environment. The **Environmental Biology Major** program (8.0 credits) provides a broad background in biology that is essential to understand the impact of humans on other organisms and their environments. It provides students with an understanding of ecology, the diversity and function of living organisms, the physical and chemical environment, and the ways organisms interact with, and affect, ecosystem processes. Students are exposed to ecosystem management, issues related to environmental change, and the consequences of interactions between humans and the environment.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(8.0 credits including at least 2.0 credits at 300+ level with at least 0.5 credit at the 400-level)

First Year (2.0 credits): BIO120H1; (CHM135H1, CHM136H1)/ CHM151Y1; MAT135H1/ MAT136H1/ MAT137Y1/ MAT221H1/ MAT223H1 or PHY131H1/ PHY151H1 or BIO130H1 or EEB125H1

1. 1.5 credits: BIO220H1; EEB240H1; EEB225H1/ STA220H1/ STA257H1/ STA288H1/ GGR270H1/ PSY201H1

2. 0.5 credit in biological diversity and function from: BIO251H1, BIO270H1; EEB266H1, EEB267H1, EEB268H1, EEB340H1; BIO260H1/ HMB265H1 (note that both require BIO130H1 and BIO230H1/ BIO255H1)

3. 0.5 credit in physical environment from: CHM210H1; ENV237H1, ENV238H1; ESS223H1, ESS261H1, ESS262H1; GGR201H1, GGR203H1, GGR205H1, GGR206H1; PHY131H1, PHY132H1, PHY151H1, PHY152H1

4. 1.0 credit in core ecology from: EEB314H1, EEB319H1, EEB320H1, EEB321H1, EEB322H1, EEB324H1, EEB328H1

5. 2.0 credits from: EEB313H1, EEB314H1, EEB319H1, EEB320H1, EEB321H1, EEB322H1, EEB323H1, EEB324H1, EEB325H1, EEB328H1, EEB365H1, EEB386H1, EEB398H0, EEB398Y0, EEB399H1,

EEB399Y1, EEB403H1, EEB405H1, EEB406H1, EEB410H1, EEB428H1, EEB434H1, EEB458H1, EEB463H1, EEB497H1, EEB498Y1, EEB499Y1; ENV316H1, ENV337H1, ENV432H1, ENV452H1; ESS311H1, ESS361H1, ESS362H1, ESS462H1, ESS463H1, ESS464H1; FOR305H1, FOR307H1, FOR418H1; GGR305H1, GGR307H1, GGR308H1; JFG470H1

6. 0.5 credit at the 400-level from: field course EEB403H1, EEB405H1, EEB406H1, EEB410H1/ FOR418H1; seminar/lecture course EEB428H1, EEB491H1, EEB495H1, ENV432H1, ENV452H1; ESS462H1, ESS463H1, ESS464H1; JFG470H1; EEB497H1, independent research project course EEB498Y1 (concurrent with research issues course EEB488H1), EEB499Y1

This program can be combined with other Environmental programs (see School of the Environment), as well as Science (e.g., Chemistry, Earth Sciences) and Social Science (e.g., Economics) programs.

Environmental Biology Minor (Science Program) - ASMIN1390

Environmental science is an interdisciplinary field that integrates biological, chemical, and physical sciences to study human interactions with their environment. The **Environmental Biology Minor** program (4.0 credits) provides students an introduction to biology that is essential to understand the impact of humans on other organisms and their environments. It provides students with an understanding of ecology, the diversity and function of living organisms, the physical and chemical environment, and the ways organisms interact with, and affect, ecosystem processes. Students are exposed to ecosystem management, issues related to environmental change, and the consequences of interactions between humans and the environment.

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

(4.0 credits; must include at least 1.0 credit at the 300+ level)

1. 1.5 credits: BIO120H1, BIO220H1, EEB240H1

2. 1.0 credits in organismal biology & biological diversity: BIO251H1, EEB263H1, EEB266H1, EEB267H1, EEB268H1, EEB340H1, EEB380H1, EEB382H1, EEB384H1, EEB386H1, EEB388H1

3. 0.5 credit in core ecology: [EEB314H1](#), [EEB319H1](#), [EEB320H1](#), [EEB321H1](#), [EEB322H1](#), [EEB324H1](#), [EEB328H1](#)

4. 1.0 credits in any EEB or [ENV432H1](#)

Quantitative Biology Major (Science Program) - ASMAJ2368

The Quantitative Biology Major program (8.0 credits) is designed for students with a deep interest in biology who wish to gain a strong grounding in quantitative methods and their application to biological questions. More than ever, advancements in biology, from the molecular through the organismal to the ecosystem level, require quantitative thinking and skills along with a strong understanding of biological processes. Interdisciplinary research that draws from the natural sciences, mathematics, statistics and computer science, is an important aspect of modern biology. This major provides foundations in biology and quantitative approaches used to test and advance biological knowledge, and is appropriate for students who wish to pursue a career or graduate studies in a broad range of life sciences, ranging from biomedical to conservation to epidemiology.

The program is delivered through a mixture of classroom-learning and applied laboratory teaching, with an emphasis on understanding how quantitative methods inform our understanding of biology, and how they can be applied to test and develop new hypotheses. Students also have access to independent research opportunities that enhance professional skills, science communication, and the development and application of knowledge in quantitative biology.

Quantitative Biology Major students have priority enrollment in the EEB courses listed, but not in courses offered by other departments, such as STA, MAT, CSC, CSB and BCB. Students should be aware that some courses listed have prerequisites that are not listed below. For students intending to pursue graduate studies, it is strongly recommended that an independent research course such as [EEB498Y1](#) be included as part of the Quantitative Biology major.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- [BIO120H1](#) (70%)/ [BIO130H1](#) (70%)

- [CSC108H1](#) (70%)/ [CSC148H1](#) (70%)/ [CSC110Y1](#) (70%)/ [EEB125H1](#) (70%)/ [MAT135H1](#) (70%)/ [MAT136H1](#) (70%)/ [MAT137Y1](#) (70%)/ [MAT157Y1](#) (70%)

Completion Requirements:

(8.0 credits including at least 2.0 credits at the 300+ level, 0.5 of which must be at the 400 level)

First Year (2.5 credits):

[BIO120H1](#), [BIO130H1](#), [EEB125H1](#)/ [CSC108H1](#)/ [CSC148H1](#)/ [CSC110Y1](#), ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)/ [MAT157Y1](#)

Higher Years (5.5 credits):

1. 1.5 credits: [BIO220H1](#), [BIO230H1](#)/ [BIO255H1](#), [BIO260H1](#)/ [HMB265H1](#)
2. 1.0 credit in introductory probability and statistics: [EEB225H1](#), [GGR270H1](#), [PSY201H1](#), [PSY202H1](#), [STA220H1](#), [STA221H1](#), [STA237H1](#), [STA238H1](#), [STA247H1](#), [STA248H1](#), [STA255H1](#), [STA257H1](#), [STA261H1](#), [STA288H1](#)
3. 0.5 credit in intermediate math: [APM236H1](#), [MAT221H1](#)/ [MAT223H1](#), [MAT224H1](#), [MAT240H1](#), [MAT237Y1](#), [MAT247H1](#)
4. 1.0 credit from: [CSB352H1](#), [EEB319H1](#), [EEB323H1](#), [EEB324H1](#), [EEB362H1](#), [GGR372H1](#), [GGR373H1](#), [PHY331H1](#)
5. 1.0 credit from: [APM346H1](#), [APM446H1](#), [APM461H1](#), [APM462H1](#), [CSB472H1](#), [CSC311H1](#), [CSC320H1](#), [CSC336H1](#), [CSC343H1](#), [CSC373H1](#), [CSC384H1](#), [CSC401H1](#), [CSC412H1](#), [CSC413H1](#), [CSC420H1](#), [EEB313H1](#), [EEB314H1](#), [EEB458H1](#), [EEB459H1](#), [EEB460H1](#), [EEB462H1](#), [EEB463H1](#), [EEB498Y1](#), [EEB499Y1](#), [MAT332H1](#), [MAT335H1](#), [MAT344H1](#), [MAT351Y1](#), [MGY428H1](#), [PHY431H1](#), [PSY305H1](#), [STA302H1](#), [STA303H1](#), [STA304H1](#), [STA305H1](#), [STA355H1](#), [STA365H1](#), [STA480H1](#)
6. 0.5 credit at 400 level from: [BCB410H1](#), [BCB420H1](#), [CSB435H1](#), [CSB472H1](#), [CSB498Y1](#), [CSB499Y1](#), [EEB458H1](#), [EEB459H1](#), [EEB460H1](#), [EEB462H1](#), [EEB463H1](#), [EEB498Y1](#), [EEB499Y1](#), [PHY431H1](#), [PSY474H1](#), [STA480H1](#)

General Biology Programs: see [Biology](#)

The University of Toronto has an enormous depth of faculty members on the St. George campus who conduct leading-edge research and teach courses in the biological sciences. Within the Faculty of Arts and Science, St. George campus, there is no single biology department; members of the Departments of [Ecology & Evolutionary Biology \(EEB\)](#) and [Cell & Systems Biology \(CSB\)](#) teach biology courses across the broad spectrum of introductory

to advanced topics. These departments jointly offer the Biology Programs of Study to provide broad-based training in biological sciences. Students requiring more information about these programs and their course requirements should consult the [Biology](#) Calendar page.

The Biology Specialist, Major and Minor programs are administered by the Department of Ecology & Evolutionary Biology. Students with questions and advising needs about these programs are encouraged to visit the departmental website <https://eeb.utoronto.ca/education/undergraduate/> or to contact the EEB Undergraduate Office, Earth Sciences Centre (25 Willcocks St.), Room 3055B, undergrad.eeb@utoronto.ca, 416-978-2084.

Co-sponsored Programs in Genomics and Informatics: see [Biology](#)

The Department of Ecology & Evolutionary Biology also co-sponsors the **Bioinformatics & Computational Biology** (Specialist) and **Genome Biology** (Major) programs. These programs are administered by the Department of Cell & Systems Biology. Students requiring more information about these programs and their course requirements should consult the [Biology](#) Calendar page.

Enrolment Requirements, First-Year Courses, Advising and Mentorship

All EEB programs except for the [Quantitative Biology Major](#) have unlimited enrolment and no specific admission requirements. All students who have completed at least 4.0 credits of courses are eligible to enrol in a Program of Study (most single-semester courses are a 0.5 credit). Program completion requires 12.0-12.5 credits for a Specialist, 8.0 credits for a Major, or 4.0 credits for a Minor. To fulfill graduation [degree requirements](#), students must complete either one Specialist, two Majors, or one Major with two Minors. Students may choose a Specialist to focus in-depth on a single subject area or may pair complementing Majors (or Minors) to customize their education and training to encompass the breadth of their interests.

Students entering their first year in the life sciences take [BIO120H1](#) ("Adaptation and Biodiversity" offered by EEB) and [BIO130H1](#) ("Molecular and Cell Biology" offered by CSB). These courses are taken by students who have successfully completed Grade 12 Biology (SBI4U or an equivalent course). [BIO130H1](#) also requires Grade 12 Chemistry (SCH4U or an equivalent course). One or both of these courses are a prerequisite for almost all further courses in the life sciences. Students requiring more information about BIO120H1 please contact the BIO120

Office, Ramsay Wright Zoological Laboratories (25 Harbord St.), Room 105E, bio120@utoronto.ca

Students requiring more information about EEB programs and courses please visit the departmental website or contact the Undergraduate Office, Earth Sciences Centre (25 Willcocks St.), Room 3055B, undergrad.eeb@utoronto.ca, 416-978-2084.

EEB

website: <https://eeb.utoronto.ca/education/undergraduate/>

Students enrolled in EEB programs are encouraged to participate in the Arts & Science's [Second-Year Learning Communities](#), or SLCs, that bring together a small group of second-year students who have a similar academic focus and belong to the same department, and to attend the EEB Info Session Series for advising about [career options](#), applying for [scholarships](#) and grad school, and seeking out research opportunities. EEB students are automatically considered for >\$25,000 in merit and need-based [endowed scholarships](#) annually from our department. Students in EEB courses and programs also are encouraged to seek advice from the EEB undergraduate office (undergrad.eeb@utoronto.ca).

Lab Materials Fee

Some courses in this department have a mandatory Lab Materials Fee to cover non-reusable materials. The fee for each such course is given in its course description, and will be included on the student's tuition invoice on ACORN.

First Year Seminars

EEB's "first-year foundations" seminar courses ([EEB196H1](#), [EEB197H1](#), [EEB198H1](#), [EEB199H1](#)) are designed to provide students the opportunity to work closely with an instructor in a class of no more than 30 students. These interactive seminars are intended to stimulate the students' curiosity and provide an opportunity to get to know a member of the professorial staff in a seminar environment during the first year of study.

Ecology & Evolutionary Biology Course Goals

The [EEB Department](#) offers a diverse collection of over 50 courses that explore biological diversity, conservation biology, molecular evolution, population and quantitative genetics, computational and statistical data analysis, genomics, animal behaviour, the ecology of populations, communities, and ecosystems, mathematical theory in biology, environmental biology, and systematics. We encourage students enrolled in non-life sciences

programs to take one of our many breadth courses to fulfill their distribution requirements for graduation. Students enrolled in EEB courses and programs become part of a welcoming and supportive community of scholars.

Students participate in diverse learning environments within EEB courses: hands-on bench and computer lab practical sections, field trips, off-campus field courses in Ontario and internationally, small-class discussion seminars, and independent research projects with world-leading faculty researchers. EEB faculty even include Curators from the Royal Ontario Museum. In EEB courses, students make use of leading resources at U of T, including EEB's greenhouse Growth Facility and the Koffler Scientific Reserve. Students build skills in writing, oral presentation, teamwork, critical thinking, and technical ability in addition to expanding their factual

Ecology and Evolutionary Biology Courses

BIO120H1 - Adaptation and Biodiversity

Hours: 24L/15P

Principles and concepts of evolution and ecology related to origins of adaptation and biodiversity. Mechanisms and processes driving biological diversification illustrated from various perspectives using empirical and theoretical approaches. Topics include: genetic diversity, natural selection, speciation, physiological, population, and community ecology, maintenance of species diversity, conservation, species extinction, global environmental change, and invasion biology. A lab coat is required. (Lab Materials Fee: \$26)

Prerequisite: Grade 12 Biology or equivalent. Students without high school Biology must consult the BIO120 Office (bio120@utoronto.ca)

Breadth Requirements: Living Things and Their Environment (4)

EEB125H1 - Introductory Computation and Data Science for the Life and Physical Sciences

Hours: 24L/12T

Life and physical scientists increasingly use big and complex datasets to answer questions about society and the natural world. In this course, students will develop introductory programming knowledge and data acumen to explore topics drawn from biology, chemistry, physics, and psychology. Students will learn to create and run computer programs, organize ideas using data to

knowledge and conceptual understanding in the biological sciences.

Breadth courses for students in programs outside of the life sciences:

- EEB196H1 - Using Ecology and Evolution to Understand our World
- EEB197H1 - Biodiversity and the City
- EEB198H1 - Genes and Behaviour
- EEB199H1 - Humans, Evolution and Ecology
- EEB202H1 - Plants and Society
- EEB208H1 - Ecosystems and the Human Footprint
- EEB214H1 - Evolution and Adaptation
- EEB215H1 - Conservation Biology

communicate clearly to others, break a complex problem into simpler parts, apply general data science principles to specific cases, distinguish causation from correlation and coincidence, and negotiate tradeoffs between different computational and statistical approaches.

Exclusion: CSC111H1, CSC148H1, STA130H1, STA238H1, STA248H1, STA261H1, GGR274H1

Breadth Requirements: The Physical and Mathematical Universes (5)

EEB196H1 - Using Ecology and Evolution to Understand our World

Hours: 24L

Understand the living world by learning principles of ecology and evolution. Through discussion, scientific literature research, seminal readings, written reports and presentations, you will discover how scientists ask and answer questions in ecology and evolution. Specific topics will vary to emphasize the expertise of the instructor, with examples including: Are humans still evolving? What is causing the sixth extinction crisis and how can we protect endangered species? Are species shifting their ranges to mitigate the impacts of climate change, and should we be helping them? How do diseases evolve and can we use evolutionary tools to control diseases of concern? Why are there so many species, and do introduced species increase or lower this diversity? Can and should we use evolution to create improved species? For non-science students in all disciplines. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

EEB197H1 - Biodiversity and the City

Hours: 24L

Most of us are urban creatures, but we as people are not the only urban creatures. In this seminar we will explore the diversity of animal and plant species comprising the ecological community that we call "Toronto". We will learn their names, whether they are endemic (from here originally) or newcomers, general aspects of their biology that suit them to living in an urban environment, how natural selection shapes the traits similarly and differently for species in urban versus wilderness settings, and what happens when the wild and the domesticated members of the community meet one another. For non-science students in all disciplines. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

EEB198H1 - Genes and Behaviour

Hours: 24L

In this course you will experience the new paradigm in behaviour genetic research. You will learn why the concept of a nature-nurture dichotomy is passé and that it has been replaced by a new understanding gained from animal and human research in the areas of gene by environment interaction and epigenetics. We will discuss how our genome listens to our environment and the effect this has on our health and behaviour. We will learn why our early experiences are critical for the development of our brains and our bodies. Together this new body of knowledge will help us understand how individual differences in behaviour and health arise. For non-science students in all disciplines. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

EEB199H1 - Humans, Evolution and Ecology

Hours: 24L

Learn about the evolution and ecology of humans and other species. Through discussion, scientific literature research, seminal readings, written reports and presentations you will discover scientific answers to questions such as (topics vary among years): How did life originate? Why are there so many species? Where did humans come from? Will humans become extinct? How can we explain human DNA and human brain size? Need we worry about climate change? What is causing the sixth

extinction crisis? Are there ecological limits to human population size? What will life be like in the Anthropocene? Are humans still evolving? For non-science students in all disciplines. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Living Things and Their Environment (4)

EEB202H1 - Plants and Society

Hours: 24L

The importance of plants to society. Topics include: plant biology, domestication of crop plants, plant breeding and genetic engineering, biological invasions, conservation, biodiversity and genetic resources, ecological implications of advances in modern plant science, macroevolution of plants, forest utilization. For non-science students in all years and disciplines.

Exclusion: BIO120H1

Breadth Requirements: Living Things and Their Environment (4)

EEB208H1 - Ecosystems and the Human Footprint

Hours: 24L/12T

An introduction to the diversity of Earth's aquatic and terrestrial ecosystems (e.g., coral reefs, lakes, tropical rainforests); the history of industrialization and human population growth; how the human footprint impacts ecosystems (e.g., ecosystem function, biological diversity); and strategies to maintain, recover and restore ecosystems. This is a course for non-science students in all years and disciplines.

Exclusion: BIO120H1, ENV200H1, ESS205H1

Breadth Requirements: Living Things and Their Environment (4)

EEB214H1 - Evolution and Adaptation

Hours: 24L/12T

Evolution and adaptation of life on Earth. Introduction to the theory of evolution by natural selection. Topics may include evidence supporting the fact of evolution, and how evolutionary theory can help explain the world around us, such as how species are formed, and the evolution of sex, infanticide, and disease. For non-science students in all years and disciplines.

Exclusion: BIO120H1

Breadth Requirements: Living Things and Their Environment (4)

EEB215H1 - Conservation Biology

Hours: 24L/12T

Introduction to the scientific discipline that deals with threatened species and habitats. Topics include biodiversity, extinction, threats, demography, genetic diversity, protecting, managing and restoring ecosystems (e.g., nature reserves, captive breeding, conservation corridors), sustainable development, and global warming. Ties between the study of conservation biology and environmental law, economics, and policy will also be covered. This is a course for non-science students in all years and disciplines.

Exclusion: BIO120H1

Breadth Requirements: Living Things and Their Environment (4)

BIO220H1 - From Genomes to Ecosystems in a Changing World

Hours: 24L/15P

Dynamics of genetic and ecological change in biological systems, from genomes to ecosystems. Evolutionary genetic and ecological perspectives on wide-ranging topics including disease, aging, sexual conflict, genetics of human differences, conservation, and global climate change. Applications of evolutionary, ecological, and molecular-genetic principles and processes. Responsibilities of human societies in a changing world. (Lab Materials Fee: \$26).

Prerequisite: BIO120H1

Recommended Preparation: BIO130H1, BIO230H1

Breadth Requirements: Living Things and Their Environment (4)

EEB225H1 - Biostatistics for Biological Sciences

Hours: 36L/12P

A statistics course designed especially for life science students, using examples from ecology and evolution where appropriate. Students learn to choose and use statistics that are appropriate to address relevant biological questions and hypotheses. Lectures and computer labs will be used to cover the following methods: sampling and experimental design, data exploration,

correlation, regression, ANOVA, Chi-square, and other parametric tests.

Prerequisite: BIO120H1

Exclusion: ECO220Y1/ ECO227Y1/ GGR270H1/ HMB325H1/ PCL376H1/ PSY201H1/ SOC300Y1/ STA220H1/ STA288H1

EEB240H1 - Environmental Biology: From Organisms to Ecosystems

Previous Course Number: ENV234H1

Hours: 24L/15P

Biological processes depend on, and impact, environmental conditions that change across space and time, from local scales to biomes, and from seconds to millennia. This course examines the relationships among organisms, populations, and communities, and ecosystems, including the increasing impacts of human activity on environmental conditions. It draws links between global change, biological diversity, and the functions of ecosystems from local to global scales. We use examples from both aquatic and terrestrial ecosystems and emphasize the connectivity across ecosystems and ecosystem-types. Field trips and labs. Mandatory day-long field trip on a weekend. (Lab Materials Fee: \$26).

Prerequisite: BIO120H1

Exclusion: ENV234H1

Breadth Requirements: Living Things and Their Environment (4)

BIO251H1 - Form, Function and Development in Plants

Hours: 24L/12T

This course is an introduction to structure, function and ecology of vegetative and reproductive processes in plants with a focus on flowering plants and gymnosperms. Topics of study in lecture and laboratory tutorials include photosynthesis, transport processes, plant reproduction, patterns of plant growth and development, and the role of hormones in plant development.

Prerequisite: BIO120H1

Breadth Requirements: Living Things and Their Environment (4)

EEB255H1 - Essentials of Biodiversity Science and Conservation Biology

Hours: 24L/24T

“Classical” and “new” concepts in biodiversity and conservation. Topics may include: evolution and ecology in the past (Holocene) and future (Anthropocene); levels and kinds of biodiversity; valuing biodiversity through ecological economics; causes of endangerment; predicting extinction; genetic and demographic theory; habitat protection and captive breeding; conservation policies and endangered species acts; designing future biodiversity.

Prerequisite: BIO120H1

Breadth Requirements: Living Things and Their Environment (4)

EEB263H1 - Comparative Vertebrate Anatomy

Hours: 24L/36P

The ontogeny and phylogeny of vertebrate structure are considered within the context of evolutionary theory. Functional aspects of the various organ systems are examined. Representative vertebrates are analyzed (with brief dissection of some forms) in laboratory to illustrate selected anatomical features and to provide practical exposure to vertebrate construction. (Lab Materials Fee: \$26)

Prerequisite: BIO120H1

Breadth Requirements: Living Things and Their Environment (4)

EEB266H1 - Animal Diversity: Invertebrates

Hours: 24L/18P

The diversity of invertebrates (e.g. sponges, jellyfish, flatworms, molluscs, segmented worms, round worms, arthropods, echinoderms and several smaller phyla) is explored, focusing on taxonomic characters that define each group and their placement in the evolutionary tree of life, ecological function, biological requirements, and geographical distribution. Labs emphasize identification and recognition of major groups, including dissection when appropriate. (Lab Materials Fee: \$26)

Prerequisite: BIO120H1

Breadth Requirements: Living Things and Their Environment (4)

EEB267H1 - Animal Diversity: Vertebrates

Hours: 24L/18P

Introduction to the diversity of chordate animals (vertebrates, tunicates, and lancelets), focusing on morphological, physiological, ecological and behavioural traits that make each group special and how those traits increase vulnerability to human-based exploitation. Labs involve living organisms whenever possible, but only for display purposes.

Prerequisite: BIO120H1

Breadth Requirements: Living Things and Their Environment (4)

EEB268H1 - Plant and Microbial Diversity

Hours: 24L/36P

Introduction to the biology of algae, fungi, and land plants. Lectures and labs emphasize the diversity of organisms with a focus on life cycles, ecology, and evolution. (Lab Materials Fee: \$26)

Prerequisite: BIO120H1

Breadth Requirements: Living Things and Their Environment (4)

EEB299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

EEB299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

EEB313H1 - Quantitative Methods in R for Biology

Hours: 24L/24P

The quantitative analysis and management of biological data is crucial in modern life sciences disciplines. Students will develop skills with R as applied to problems in ecology and evolutionary biology to learn reproducible approaches for data management, data manipulation, visualization, modelling, statistical analysis, and simulation for solving biological problems.

Prerequisite: [BIO220H1](#), [EEB225H1](#)/ [STA288H1](#)/ [STA220H1](#)

Exclusion: [STA130H1](#), [PSY305H1](#)

Recommended Preparation: [CSC108H1](#)/ [CSC120H1](#)/ [CSC121H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

EEB314H1 - Modeling in Ecology and Evolution

Previous Course Number: EEB430H1

Hours: 24L/12P

Mathematics is central to science because it provides a rigorous way to go from a set of assumptions to their logical consequences. In ecology & evolution this might be how we think a virus will spread and evolve, how climate change will impact a threatened population, or how much genetic diversity we expect to see in a randomly mating population. In this course you'll learn how to build, analyze, and interpret mathematical models of increasing complexity through readings, lectures, homework, computer labs, and a final project.

Prerequisite: [BIO220H1](#), [MAT136H1](#)/ [MAT137Y1](#)

Exclusion: [EEB430H1](#)

Breadth Requirements: Living Things and Their Environment (4)

EEB318H1 - Principles of Evolution

Hours: 24L/12T

Principles and practice of evolutionary biology since Darwin. Topics may include: phylogeny, speciation, mutation and neutral evolution, population genetic variation, quantitative genetics, molecular evolution, natural selection and adaptation, evolutionary conflict and cooperation, and levels of selection.

Prerequisite: [BIO220H1](#)

Exclusion: [EEB323H1](#)/ [EEB324H1](#)

Recommended Preparation: [BIO260H1](#)/ [HMB265H1](#)

Breadth Requirements: Living Things and Their Environment (4)

EEB319H1 - Population Ecology

Hours: 24L/36P

Abundance and distribution of populations; population growth and regulation; fluctuations, stochasticity and chaos; meta-population persistence and extinction; age and stage-structured populations; interactions within and between species; optimal harvesting; spread of infectious diseases. Labs include experiments and computer simulations. (Lab Materials Fee: \$26)

Prerequisite: [BIO220H1](#), ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)/ [MAT157Y1](#), and a course in statistics from [EEB225H1](#)/ [PSY201H1](#)/ [STA220H1](#)/ [STA250H1](#)/ [STA257H1](#)/ [STA288H1](#)/ [GGR270H1](#)/ [HMB325H1](#)

Breadth Requirements: Living Things and Their Environment (4)

EEB320H1 - Dynamics of Ecosystem Processes

Hours: 24L/24P

This course explores the relationships and feedback between biological communities and the abiotic factors of ecosystems. The course will cover the biogeochemical dynamics of energy and nutrients through ecosystem development and the effects of global change on these processes. The lab component of the course will apply lecture concepts and tools to specific case studies. (Lab Materials Fee: \$26)

Prerequisite: [BIO220H1](#)

Breadth Requirements: Living Things and Their Environment (4)

EEB321H1 - Community Ecology

Hours: 24L/36P

Nature and analysis of community structure; disturbance and community development; species interactions; community assembly processes. Computer exercises in weekly labs provide training in sampling, simulation, and data analysis.

Prerequisite: [BIO220H1](#) and a course in statistics from [EEB225H1](#)/ [PSY201H1](#)/ [STA220H1](#)/ [STA250H1](#)/ [STA257H1](#)/ [STA288H1](#)/ [GGR270H1](#)/ [HMB325H1](#)

Recommended Preparation: [EEB319H1](#)

Breadth Requirements: Living Things and Their Environment (4)

EEB322H1 - Behaviour and Behavioural Ecology

Hours: 24L/36P

A broad introduction to animal behaviour emphasizing concepts from ethology and behavioural ecology, including foraging, predation, mating systems, parental care and behaviour genetics. Field and laboratory studies are undertaken. (Lab Materials Fee: \$26)

Prerequisite: [BIO220H1](#) and a course in statistics from [EEB225H1](#)/ [PSY201H1](#)/ [STA220H1](#)/ [STA250H1](#)/ [STA257H1](#)/ [STA288H1](#)/ [GGR270H1](#)/ [HMB325H1](#)

Breadth Requirements: Living Things and Their Environment (4)

EEB323H1 - Evolutionary Genetics

Hours: 36L/12T

Evolutionary biology rests on a foundation of evolutionary genetics. This course focuses on the core ideas in population genetics and extends to evolutionary genomics. Students are exposed to the mathematical theory underlying evolutionary genetics and will learn the mathematical foundations underlying these ideas. Topics include the population genetics of mutation, migration, drift, and selection, evolutionary analysis of DNA sequences, genome evolution, and the evolution of sexual reproduction.

Prerequisite: [BIO220H1](#), [BIO260H1](#)/ [HMB265H1](#)
Recommended Preparation: ([MAT135H1](#), [MAT136H1](#))/
[MAT137Y1](#)/ [MAT157Y1](#)
Breadth Requirements: Living Things and Their Environment (4)

EEB324H1 - Evolutionary Ecology

Hours: 36L/12T

Empirical and theoretical approaches to key areas of research including natural selection, sexual selection, and life histories. Other topics may include phenotypic plasticity, speciation, co-evolution, and quantitative genetics.

Prerequisite: [BIO220H1](#)
Breadth Requirements: Living Things and Their Environment (4)

EEB325H1 - Evolutionary Medicine

Hours: 36L/12T

How evolutionary principles can help us better understand health and disease. Concepts from evolutionary biology (e.g., life history theory, coevolution, genomic conflict, constraints and trade-offs) will be applied to key problems in medicine and public health, including antibiotic resistance, aging, cancer, autoimmune disease, and pathogen virulence.

Prerequisite: [BIO130H1](#), [BIO220H1](#)
Breadth Requirements: Living Things and Their Environment (4)

EEB328H1 - Physiological Ecology

Hours: 24L/24T

An advanced treatment of the physiological mechanisms controlling plant and animal distribution and ecological success. Topics of focus include photosynthesis and resource balance, water and nutrient relations, temperature effects, and adaptations to abiotic stress.

Prerequisite: [BIO220H1](#)
Recommended Preparation: [BIO251H1](#)/ [BIO270H1](#)
Breadth Requirements: Living Things and Their Environment (4)

EEB340H1 - Comparative Plant Morphology

Hours: 24L/36P

This course addresses the origin of land plants and subsequent diversification of land plant vegetative and reproductive form and function. Lectures and laboratory tutorials synthesize morphological and anatomical knowledge from living organisms and fossil records with cellular, physiological and molecular information of land plants and their ancestors throughout geological time. Topics of study include the evolution of (i) vegetative and reproductive meristems, (ii) stem, leaf and root architecture, (iii) vascular tissue, (iv) the ovule habit, and (v) fertilization. (Lab materials fee: \$26).

Prerequisite: [BIO220H1](#)
Breadth Requirements: Living Things and Their Environment (4)

EHJ352H1 - Human Evolutionary Genomics

Hours: 24L/12T

Human genome diversity and evolution with a focus on current research. The course integrates applications of

human evolutionary genomics to the understanding of human history and adaptation, the causes of disease, and genome structure and function. Topics include: comparative genomics, population genomics of adaptation, association mapping, polygenic scores, and repetitive/selfish DNA.

Prerequisite: [BIO220H1](#), [BIO260H1](#)/ [HMB265H1](#)

Breadth Requirements: Living Things and Their Environment (4)

JHE353H1 - History of Evolutionary Biology

Hours: 24L/10T

A historical examination of major ideas about biological evolution, with an emphasis on the period from the 18th century to the 1950s, and of their impact on scientific and social thought. Topics include the diversity of life and its classification, the adaptation of organisms to their environments, Wallace's and Darwin's views on evolution by natural selection, sexual selection, concepts and mechanisms of biological inheritance, and the implications of evolutionary theory for the organization of human society.

Prerequisite: 6.0 credits including a 0.5 credit from HPS/ EEB/ BIO

Exclusion: [HPS353H1](#)

Recommended Preparation: 2.0 HPS/ EEB/ BIO credits including 1.0 credit at the 200+ level

Breadth Requirements: Society and its Institutions (3)

JHE355H1 - History and Philosophy of Evolutionary Biology

Hours: 24L/10T

An examination of the place of the organism in evolutionary theory from the early 1900s to the present. Biology is the science of living things, and yet, paradoxically, living things--organisms--have been comprehensively left out of the Modern Synthesis theory of evolution that developed in the twentieth century. This course surveys the reasons--historical, philosophical and empirical--for the marginalization of organisms from evolutionary theory. It examines the ways in which evolutionary developmental biology attempts to restore the organisms to a central place in evolutionary biology. Offered by faculty in the Institute for the History and Philosophy of Science and Technology.

Prerequisite: 6.0 credits, of which 1.0 credit is from EEB/ BIO/ HPS courses

Recommended Preparation: [JHE353H1](#)

Breadth Requirements: Society and its Institutions (3)

EEB362H1 - Macroevolution

Hours: 24L/24T

Explores patterns and processes of large-scale evolutionary change, played out over large geographic expanses and extended periods of time. Integrates information from paleontology, phylogenetics, field studies, functional biology, and experiments to link emergent evolutionary patterns to underlying evolutionary processes. Topics include: speciation, phylogenetic inference, adaptive vs. non-adaptive evolution, evolutionary constraints, diversification and extinction, evolutionary innovations, historical biogeography, and the relationship between evolutionary history and ecology. Tutorials will illustrate common analytical approaches to macroevolutionary investigation and provide in-depth exploration of landmark studies in macroevolution.

Prerequisite: [BIO220H1](#)

Breadth Requirements: Living Things and Their Environment (4)

EEB365H1 - Topics in Applied Conservation Biology

Hours: 24L/24P

Applied conservation biology including management (at the level of species/populations, environments/landscapes, and ecosystems) and how to conserve and maintain biodiversity and ecosystem function (including species and ecosystem distribution modelling).

Prerequisite: [BIO220H1](#), [EEB225H1](#)/ [ECO220Y1](#)/ [ECO227Y1](#)/ [GGR270H1](#)/ [HMB325H1](#)/ [PSY201H1](#)/ [SOC300Y1](#)/ [STA220H1](#)/ [STA250H1](#)/ [STA288H1](#)

Recommended Preparation: [EEB255H1](#)

Breadth Requirements: Living Things and Their Environment (4)

EEB380H1 - Diversity of Insects

Hours: 24L/36P

Evolutionary history, morphology, physiology, development, behaviour, and ecological significance of insects. Labs focus on identification of major groups of insects found in Ontario and each student makes an insect collection. Insects are collected during field trips during class time and also on Saturday field trips early in the term. (Lab Materials Fee: \$26)

Prerequisite: BIO220H1

Breadth Requirements: Living Things and Their Environment (4)

EEB382H1 - Diversity of Fishes

Hours: 24L/18P

Systematics, morphology, ecology, behaviour, biogeography, and conservation of fishes. Identification of major groups of fish; what makes each group biologically special and how those unique traits might contribute to conservation concerns. Labs focus on exercises designed to highlight how ichthyologists actually do research. (Lab Materials Fee: \$26)

Prerequisite: BIO220H1

Breadth Requirements: Living Things and Their Environment (4)

EEB384H1 - Diversity of Amphibians and Reptiles

Hours: 24L/36P

Lectures and laboratories examine the natural history, morphology, behaviour, ecology, evolutionary relationships, and biogeography of amphibians (frogs and toads, salamanders, caecilians) and non-avian reptiles (turtles, the tuatara, lizards, snakes, and crocodilians). Students are required to purchase a \$25 lab manual.

Prerequisite: BIO220H1

Breadth Requirements: Living Things and Their Environment (4)

EEB386H1 - Diversity of Birds

Hours: 24L/24P

Diversity of Birds provides a general overview of bird biology and diversity, including bird origins and evolution, modern classification and diversity, flight evolution and mechanics, reproduction, ecology, and conservation. Labs focus on anatomy, functional morphology and field techniques that will be put into practice in a final field trip.

Prerequisite: BIO220H1

Exclusion: BIOD48H3/ BIO326H5

Breadth Requirements: Living Things and Their Environment (4)

EEB388H1 - Diversity of Mammals

Hours: 24L/36P

Lectures and laboratories examine the natural history, morphology, classification, evolutionary relationships, reproduction, biogeography, and conservation of mammals. Labs focus on the identification of mammals and their diverse morphological adaptations including mammals of Ontario.

Prerequisite: BIO220H1

Breadth Requirements: Living Things and Their Environment (4)

EEB390H1 - Vertebrate Paleontology: Major Transitions in Vertebrate History

Hours: 24L/18P

The evolutionary history of vertebrates is recorded in their fossil record. Lectures highlight the origin and radiation of major vertebrate clades, and emphasize key events in vertebrate history, notably major ecological and evolutionary transitions, and mass extinctions. Practicals (at the Royal Ontario Museum) explore fossils that exemplify these themes.

Prerequisite: BIO220H1; at least one of EEB263H1, EEB267H1, EEB362H1, EEB382H1, EEB384H1, EEB386H1, EEB388H1

Recommended Preparation: EEB263H1

Breadth Requirements: Living Things and Their Environment (4)

EEB397Y1 - Research Project in Ecology and Evolutionary Biology

An intermediate research project requiring the prior consent of a member of the Department to supervise the project. The topic is to be one mutually agreed on by the student and supervisor. They must arrange the time, place, and provision of any materials and submit to the Undergraduate Office a signed form of agreement outlining details prior to being enrolled. This course is open to highly self-motivated students who are in their Third Year and have a strong interest in ecology and/or evolutionary biology. Students are required to write up the results of their research in a formal paper, often in the format of a research article, and may be required to present the results at a poster session and/or participate in an oral presentation. Students should contact their potential supervisors over the summer before classes begin in September. Information regarding how to apply and register for the course is available on the EEB website. Not eligible for CR/NCR option. Note: cannot

enrol if already taken the fourth year research project course [EEB498Y1/ EEB499Y1](#).

Prerequisite: Completion of 9.0 credits.

Breadth Requirements: Living Things and Their Environment (4)

EEB398Y0 - Research Excursion

An instructor-supervised group project in an off-campus setting. Details at: <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

Breadth Requirements: The Physical and Mathematical Universes (5)

EEB398H0 - Research Excursions

An instructor-supervised project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

EEB399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

EEB399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

EEB401H1 - Marine Field Ecology

A two-week field course offered in Summer. The course will include activities in and around the ocean and its

shorelines with lectures and seminars combined with intensive field work on different marine habitats – from rocky reefs to kelp forests – and organisms. Students will conduct independent research projects. Comfortable with swimming is expected of students.

Students interested in taking an EEB field course apply directly to the department. Spaces for the course are limited, and student selection is based on a number of criteria that include:

1. background in EEB concepts and approaches (assessed through courses taken and grades);
2. benefit of course to student progress in their program of study and for professional development (assessed through courses taken and the student statement in the application)
3. interest and motivation for taking the course (assessed through the student statement in the application)
4. Year of study, with more senior students given preference.

See Departmental website for details. Not eligible for CR/NCR option.

Prerequisite: [BIO220H1](#) and permission of department

Recommended Preparation: A second or third year ecology, evolution, or environmental biology course.

Breadth Requirements: Living Things and Their Environment (4)

EEB403H1 - Tropical Field Biology

A two-week field course introducing students to the diversity of biological communities in the tropics focusing on ecological and evolutionary interactions. Plant and animal communities of the South American tropics are compared and contrasted with temperate communities. Student research projects included. Fee for accommodations, food, within course travel, station fee, etc., will apply.

Students interested in taking an EEB field course apply directly to the department. Spaces for the course are limited, and student selection is based on a number of criteria that include:

1. background in EEB concepts and approaches (assessed through courses taken and grades);
2. benefit of course to student progress in their program of study and for professional development (assessed through courses taken and the student statement in the application)
3. interest and motivation for taking the course (assessed through the student statement in the application)
4. Year of study, with more senior students given preference.

See Departmental website for details. Not eligible for CR/NCR option.

Prerequisite: BIO220H1 and permission of department

Recommended Preparation: A second or third year ecology, evolution or environmental biology course; and a course in statistics.

Breadth Requirements: Living Things and Their Environment (4)

EEB405H1 - Temperate Field Biology

A two-week field course offered (in May or August) at U of T's Koffler Scientific Reserve, King City, Ontario. Students learn the natural history of the region and conduct a field-based research project in ecology or evolutionary biology. A fee of \$800 for accommodations, food, within course travel, station fee, etc. will apply.

Students interested in taking an EEB field course apply directly to the department. Spaces for the course are limited, and student selection is based on a number of criteria that include:

1. background in EEB concepts and approaches (assessed through courses taken and grades);
2. benefit of course to student progress in their program of study and for professional development (assessed through courses taken and the student statement in the application)
3. interest and motivation for taking the course (assessed through the student statement in the application)
4. Year of study, with more senior students given preference.

See Departmental website for details. Not eligible for CR/NCR option.

Prerequisite: BIO220H1 and a course in statistics and permission of department

Recommended Preparation: A second- or third-year ecology, evolution or environmental biology course.

Breadth Requirements: Living Things and Their Environment (4)

EEB406H1 - Inter-University Field Course

A two-week field course offered between May and August by another Ontario university (to various locations) as part of the Ontario Universities Program in Field Biology (OUPFB). The selection of field course modules are announced in January. For registration information and additional fees information consult the EEB website; fees from \$350-5000 will be applied for field trip costs. Not eligible for CR/NCR option.

Prerequisite: Varies on module selected

Breadth Requirements: Living Things and Their Environment (4)

EEB428H1 - Global Change Ecology

Hours: 24L/24T

An examination of organism, population, and ecosystem responses to long-term environmental change occurring at the global scale, with emphasis on human caused perturbation to climate and the carbon, nitrogen, and hydrologic cycles and their ecological effects.

Prerequisite: BIO220H1 and at least 1.0 credit from EEB at the 300+ level

Breadth Requirements: Living Things and Their Environment (4)

ENV432H1 - Urban Ecology

Hours: 24L/12S

The ecology of urban areas through consideration of the biological and physical environments, in particular how the human-constructed environment alters pre-existing biophysical conditions and interactions. Encompasses a comparative perspective to study the development of these emerging ecosystems of increasing importance given global urbanization. Saturday field trip using local transit.

Prerequisite: BIO220H1 and at least one of EEB319H1/ EEB321H1/ EEB365H1

Breadth Requirements: Living Things and Their Environment (4)

EEB434H1 - Marine Ecology

Hours: 24L/18P

This course explores the study of ecological processes in marine and coastal habitats. The course will cover processes operating from individuals to populations and communities to ecosystems, and spanning daily to decadal scales, and meters to global scales. The lab component of the course will apply lecture concepts and tools to specific case studies, which include hands-on activities/experiments/field excursions, and/or data synthesis and analysis. (Lab materials Fee: \$26)

Prerequisite: BIO220H1/ (BIO120H1, ESS362H1)

Recommended Preparation: EEB225H1, EEB240H1

Breadth Requirements: Living Things and Their Environment (4)

EEB440H1 - Ecology and Evolution of Plant-Animal Interactions

Hours: 24L/24T

Major concepts in ecology and evolution from the perspective of plant-animal interactions. The richness of interactions between plants and animals is explored including antagonistic interactions (e.g., herbivory), mutualistic interactions (e.g., pollination, seed dispersal, ant-plant associations), and interactions involving multiple species across trophic levels.

Prerequisite: BIO220H1, a course in statistics (from EEB225H1 (recommended)/ PSY201H1/ STA220H1/ STA257H1/ STA288H1/ GGR270H1/ HMB325H1) and at least one of EEB318H1/ EEB319H1/ EEB321H1/ EEB323H1/ EEB324H1/ EEB328H1/ EEB403H1/ EEB403H0/ EEB405H1/ EEB405H0/ EEB406H1/ EEB406H0/ EEB410H1/ EEB410H0

Breadth Requirements: Living Things and Their Environment (4)

EEB455H1 - Genes, Environment and Behaviour

Hours: 18L/18S

An examination of the Gene-Environment Interplay perspective as sources of individual differences in behaviour, from both mechanistic and evolutionary viewpoints. Both historical and recent studies are used to illustrate important concepts in the field. Student-led discussions address the evidence base for these concepts.

Prerequisite: BIO220H1, HMB265H1/ BIO260H1, and at least 12.0 credits (including 1.0 EEB credit at the 300+ level)

Recommended Preparation: EEB322H1

Breadth Requirements: Living Things and Their Environment (4)

EEB458H1 - Evolutionary Quantitative Genetics

Hours: 24L/12P

This course will cover quantitative genetic theory for inheritance and evolution of continuous traits over contemporary timescales. Students will learn how to estimate statistical quantities such as genetic variances and heritability using classical pedigree analysis and more recent genomic methods. In the lab component students

will learn how to analyze quantitative genetic data sets using modern statistical software and methods.

Prerequisite: EEB225H1/ STA221H1/ STA238H1/ STA248H1/ STA255H1/ STA261H1/ STA288H1; EEB323H1

Recommended Preparation: MAT223H1

Breadth Requirements: Living Things and Their Environment (4)

EEB459H1 - Population Genetics

Hours: 24L/12T

A focus on theoretical population genetics, using mathematical models to understand how different evolutionary forces drive allele frequency change. Students learn how to mathematically derive classic results in population genetics. Topics include drift, coalescence, the relationship between population and quantitative genetics, selection in finite populations, and mutation load. Offered in alternate years.

Prerequisite: BIO260H1/ HMB265H1, EEB323H1

Recommended Preparation: A solid understanding of basic algebra and calculus.

Breadth Requirements: Living Things and Their Environment (4)

EEB460H1 - Molecular Evolution and Genomics

Hours: 36L

Processes of evolution at the molecular level, and the analysis of molecular data. Gene structure, neutrality, nucleotide sequence evolution, sequence evolution, sequence alignment, phylogeny construction, gene families, transposition.

Prerequisite: BIO230H1/ BIO255H1, BIO260H1/ HMB265H1, CSC108H1/ EEB125H1/ EEB225H1/ EEB318H1/ EEB323H1/ EEB362H1

Breadth Requirements: Living Things and Their Environment (4)

EEB462H1 - Phylogenetic Inference: Methods and Applications

Hours: 24L/24P

The representation of the evolutionary relationships in the form of phylogenetic trees has become a fundamental tool in many branches of biology. This course is an introduction to the core concepts and methods of

phylogenetic reconstruction including parsimony, likelihood, and Bayesian techniques, as well as advanced topics such as divergence time estimation, species-tree inference, and species delimitation. Through a combination of lectures, discussions, and computer labs, students will master the theory and practice of phylogenetics.

Prerequisite: [BIO220H1](#), [EEB225H1](#)/ [STA220H1](#)/ [STA247H1](#)/ [STA248H1](#)/ [STA261H1](#)/ [STA288H1](#)/ [GGR270H1](#)/ [PSY201H1](#)

Exclusion: [BIO443H5](#)

Recommended Preparation: [CSC108H1](#), [EEB125H1](#), [EEB323H1](#), [EEB362H1](#)

Breadth Requirements: The Physical and Mathematical Universes (5)

EEB463H1 - Computing Stochastic Models in Evolutionary Biology

Hours: 36L

Probability and stochasticity underlie our understanding of evolutionary and ecological processes, but many students don't get to experience these concepts without a background in mathematics or computer science. This course explores the fundamentals of modelling and quantitative approaches in ecology, evolution, and organismal biology in an accessible way. We will cover the probabilistic foundations of ecological, evolutionary, and bioinformatic models and concepts by developing students' proficiency at developing their own code from scratch.

Prerequisite: [EEB318H1](#)/ [EEB323H1](#)/ [EEB324H1](#)/ [EEB362H1](#); [EEB125H1](#)/ [EEB225H1](#)/ [STA220H1](#)/ [STA237H1](#)/ [STA257H1](#)/ [STA288H1](#)/ [EEB313H1](#)

Breadth Requirements: Living Things and Their Environment (4)

EEB465H1 - Advanced Topics in Biodiversity Science and Conservation Biology

Hours: 36L

Biodiversity in the Anthropocene. This course links the biological and social sciences to identify human goals for future biodiversity, methods to achieve this biodiversity, and to understand key issues such as the end of the wild, ecosystem services as a unit of conservation, animal welfare as a moral responsibility, and GMOs as biodiversity. Practical training may be provided in identifying species at risk, and in applying ecological-economics to trade-off decisions.

Prerequisite: [BIO220H1](#), [EEB255H1](#) and at least 1.0 credit from EEB at the 300+ level

Breadth Requirements: Living Things and Their Environment (4)

EEB466H1 - Approaches to the Study of Biodiversity

Hours: 24L/24P

This course uses the collections, research, and public gallery areas of the Royal Ontario Museum to expose students to the ways in which biodiversity is discovered, analyzed, and interpreted in a museum setting. Topics include: morphological and molecular approaches, taxonomy, classification, bioinformatics and e-taxonomy, and the interpretation of biodiversity for the public.

Prerequisite: [BIO220H1](#); [EEB266H1](#)/ [EEB267H1](#)/ [EEB268H1](#)/ [EEB331H1](#)/ [EEB365H1](#)/ [EEB380H1](#)/ [EEB382H1](#)/ [EEB384H1](#)/ [EEB386H1](#)/ [EEB388H1](#)

Breadth Requirements: Living Things and Their Environment (4)

EEB488H1 - Research Issues in Ecology and Evolutionary Biology

Hours: 36L/36T

This course is taken concurrently by students who are enrolled in [EEB498Y1](#) Advanced Research Project in Ecology and Evolutionary Biology, and uses a combination of seminars, discussions, and presentations (including presentations by students) designed to cover issues commonly encountered when conducting research in ecology and evolutionary biology. Topics may include experimental design, effective use of statistics, scientific writing and publishing, public communication, ethics, and career development. Students will be required to attend weekly departmental seminars. This half-credit course runs from September to April and lectures meet in alternate weeks. Information regarding how to apply and enrol in the course is available on the EEB departmental website.

Prerequisite: Completion of 14.0 credits.

Corequisite: [EEB498Y1](#)

Exclusion: [EEB499Y1](#)

Breadth Requirements: Living Things and Their Environment (4)

EEB491H1 - Seminar in Biodiversity and Conservation Biology

Hours: 24L

Seminar course in biodiversity and conservation biology, emphasizing critical thinking and the synthesis of ideas crossing disciplinary boundaries. Group discussions among peers, facilitated by faculty, and student presentations. Discussions include critical analysis of research and review articles in the primary literature, with a focus on recent developments in biodiversity science and conservation biology. Evaluation based on presentations, participation in class discussions, and written assignments. (Note: students may take this course only once)

Prerequisite: A minimum of 1.0 credit in EEB courses at the 300+ level

Exclusion: [EEB495H1](#)

Recommended Preparation: [EEB365H1](#) highly recommended

Breadth Requirements: Living Things and Their Environment (4)

EEB495H1 - Seminar in Ecology and Evolutionary Biology

Hours: 24S

Seminar course in ecology and evolutionary biology, emphasizing critical thinking and the synthesis of ideas crossing disciplinary boundaries. Group discussions among peers, facilitated by faculty, and student presentations. Discussions include critical analysis of research and review articles in the primary literature. Evaluation based on presentations, participation in class discussions, and written assignments. (Note students may take this course only once.)

Prerequisite: A minimum of 1.0 credit in EEB courses at the 300+ level

Exclusion: [EEB491H1](#)

Recommended Preparation: At least one 0.5 credit in ecology and one 0.5 credit in evolutionary biology is highly recommended.

Breadth Requirements: Living Things and Their Environment (4)

EEB497H1 - Research Studies in Ecology & Evolutionary Biology

An independent studies half-credit course allowing students to produce a literature review, which is supervised by a faculty member in the Department of Ecology and Evolutionary Biology. Highly motivated fourth-year students will work closely with a supervisor and be required to write up the results of their research in a final research paper. Students should contact a potential supervisor well before classes begin in the fall, winter, or summer session. Students cannot take more than two independent research courses of EEB 497H1, 498Y1, and

499Y1, and the second project must be with a different supervisor. Students cannot take multiple EEB research courses concurrently. Information on how to apply for the course is available on the EEB website. Not eligible for CR/NCR option.

Prerequisite: Completion of 14.0 credits.

Breadth Requirements: Living Things and Their Environment (4)

EEB498Y1 - Advanced Research Project in Ecology and Evolutionary Biology

An advanced research project (a literature review alone is not sufficient) requiring the prior consent of a member of the Department to supervise the project. The topic is to be one mutually agreed on by the student and supervisor. They must arrange the time, place, and provision of any materials and submit to the Undergraduate Office a signed form of agreement outlining details prior to being enrolled. This course is open only to highly self-motivated students who are in their Fourth-Year and have adequate background in ecology and/or evolutionary biology. Students are required to write up the results of their research in a formal paper, often in the format of a research article, and are also required to present the results at a poster session and/or oral presentation. The time commitment is approximately 8 hours per week. Students should contact their potential supervisors over the summer before classes begin in September. Information regarding how to apply and register for the course is available on the EEB website. Students in this course are also concurrently enrolled in [EEB488H1Y](#) Research Issues in Ecology and Evolutionary Biology. Students cannot take multiple EEB research courses concurrently. Not eligible for CR/NCR option.

Prerequisite: Completion of 14.0 credits.

Corequisite: [EEB488H1Y](#)

Breadth Requirements: Living Things and Their Environment (4)

EEB499Y1 - Advanced Research Project in Ecology and Evolutionary Biology II

An advanced research project (a literature review alone is not sufficient) that allows students to do another independent project, supervision of which must be different from [EEB497H1](#)/ [EEB498Y1](#). It requires the prior consent of a member of the Department to supervise the project. The topic is to be one mutually agreed on by the student and supervisor. They must arrange the time, place, and provision of any materials and submit to the Undergraduate Office a signed form of agreement outlining details prior to being enrolled. This course is open only to highly self-motivated students who are in their Fourth Year and have adequate background in

ecology and/or evolutionary biology. Students are required to write up the results of their research in a formal paper, often in the format of a research article, and are also required to present the results at a poster session and/or oral presentation. The time commitment is approximately 8 hours per week. Students should contact their potential supervisors over the summer before classes begin in September. Information regarding how to apply and register for the course is available on the EEB website. Students cannot take multiple EEB research courses concurrently. Not eligible for CR/NCR option.

Prerequisite: EEB497H1/ EEB498Y1 and must have completed 14.0 credits.

Breadth Requirements: Living Things and Their Environment (4)

Introduction

Economics is a social science that encompasses a broad range of human behaviour and has a strong influence on the structure, well-being and development of a society.

Much of human activity is directed towards the satisfaction of material wants. In many areas of the world, the greater part of human effort must be directed towards meeting the most elemental demands for food, clothing, and shelter. Even in technologically advanced societies, where these basic requirements can be met with comparative ease, the

desire for more goods and services never appears to be fully satisfied. In consequence, every society - whatever its political orientation - is both competitive and cooperative. It is competitive because its members contend with one another to satisfy their individual wants from a limited supply of productive resources. It is cooperative because the greatest supply of goods is available when the activity of producing them is coordinated and organized. Economics deals with any issue arising out of the conflict between the demand for goods and services, and a limited supply of resources to satisfy those demands.

Undergraduate training in economics is intended to familiarize students with the discipline of economic thinking, to equip them to better understand human behaviour, and for the intelligent appraisal of contemporary economic problems.

Economics makes considerable use of mathematics in its enquiries. All economics programs require at least one course in mathematics.

An undergraduate degree is generally not sufficient to become a professional economist. For this or other reasons, graduate work may be necessary. Students who wish to do graduate work should seek advice from the Department concerning their choice of courses. The Economics Specialist and the Economics and Mathematics programs, with their greater emphasis on mathematics, are designed to prepare students for graduate study, and are excellent starting points. Appropriate coursework can certainly be achieved, however, through the Economics Major, often in combination with another program.

General inquiries: 150 St. George Street
 (ugassistant.economics@utoronto.ca or 416-978-4603)

Website: <https://uoft.me/eco>

Regarding Economics Programs

These are limited enrolment programs. All students who request the program and obtain at least the specified mark(s) in the required course(s) will be eligible to enrol (please read entry requirements for each program carefully). Consult the [Arts & Science Program Toolkit](#) for details and instructions.

Course Prerequisites and Exclusions

Please read prerequisites and exclusions carefully. Course prerequisites are strictly enforced and are not just "recommended preparation." For all mathematics and statistics course prerequisites, the level of the course is also important. For all third- and fourth-year economics

courses, **FULL YEAR (Y-course, 1.0 credit)** intermediate course prerequisites are mandatory: a similar “half course” (H-course, 0.5 credit) version is not acceptable. All prerequisites must be fully completed **BEFORE** a course can be taken. Courses that are prerequisites cannot be taken simultaneously with the courses for which they are a prerequisite (i.e., they are not “co-requisites”). Students from other institutions must show their transcripts to the department if they are using prior courses as prerequisites. The same rules apply.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The Economics programs impacted by this policy: ASSPE1478, ASMAJ1478, and ASMIN1478

Economics Programs

Financial Economics Specialist (Science Program) - ASSPE2722

Enrolment Requirements:

This is a limited enrolment program. Students must meet the requirements listed below to enrol.

A minimum grade is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- ECO206Y1(80%)
- ECO208Y1(80%)
- ECO227Y1(80%)/ (STA257H1(80%), STA261H1(80%))

To ensure that students admitted to the program will be successful, applicants with a final grade lower than 80% will not be considered for admission. Please note that obtaining this minimum final grade does not guarantee admission to the program.

Special Requirement

- In order to apply for the Financial Economics Specialist Program, a student must first be enrolled in the

Economics Major (ASMAJ1478). Upon acceptance to the Financial Economics Specialist Program, your Specialist enrolment will replace your Economics Major.

- Students enrolled in this program cannot be simultaneously enrolled in any other Economics program or the Environmental Economics minor.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Financial Economics Specialist in the Summer after Year 2. ASIP students enrolled in the Economics Major can transfer to the ASIP stream of the Financial Economics Specialist without needing to reapply to ASIP.

Completion Requirements:

Program Course Requirements: 13.0 credits

First Year (2.0 credits):

1. ECO101H1, ECO102H1
2. (MAT135H1, MAT136H1)/ MAT137Y1/
MAT157Y1

Note: MAT133Y1 is not a suitable substitute for (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1.

Second Year (Core Courses, 3.0 credits):

- ECO206Y1, ECO208Y1, ECO227Y1/ (STA257H1, STA261H1)

Third Year (Core Courses, 2.5 credits):

1. ECO325H1, ECO326H1, ECO375H1
2. ECO358H1, ECO359H1

Third Year and Higher (Electives, 5.5 credits, at least 1.0 credit at the 400-level):

1. 1.0 credit from ECO349H1, ECO356H1, ECO440H5, ECO456H1, ECO461H1/
ECO460H5, ECO462H1, ECO464H1,
ECO465H1, ECO475H1
2. 4.5 additional credits from 300+ level ECO courses

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Notes:

1. A minimum of 70% is required in ECO101H1 and ECO102H1 to meet prerequisites for specialist-level intermediate ECO courses (ECO206Y1, ECO208Y1, ECO227Y1).
2. Some required courses at upper-year levels may be offered only on the St. George or on the University of Toronto Mississauga campus in any given year. Students registered in this program at either campus may have to attend lectures on the other campus in such cases.
3. MAT221H1/ MAT223H1/ MAT240H1 is recommended as preparation for ECO375H1. Students taking one of these MAT courses can have it count in lieu of a 0.5 300-level ECO course required for this program.
4. (MAT235Y1/ MAT237Y1/ ECO210H1 is strongly recommended for this program. Students taking one of these courses can have it count in lieu of 0.5 300-level course required for this program.
5. ECO475H1 is strongly recommended.
6. STA302H1/ STA303H1 are not accepted in lieu of ECO375H1.
7. CSC108H1/ CSC148H1/ CSC110Y1 (introductory programming) is strongly recommended for students interested in graduate studies.

Economics & Mathematics Specialist (Science Program) - ASSPE2599

Enrolment Requirements:

This is a limited enrolment program. Students must meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- ECO206Y1(70%)
- ECO208Y1(70%)
- MAT137Y1 (60%)/ MAT157Y1(60%).

Special Requirement

- In order to apply for the Economics and Mathematics Specialist Program, a student must first be enrolled in the Economics Major (ASMAJ1478) or Mathematics Major (ASMAJ1165). Upon acceptance to the Economics and Mathematics Specialist Program, your Specialist enrolment will replace your Economics Major.
- Students enrolled in this program cannot be simultaneously enrolled in any other Economics program or the Environmental Economics minor.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Economics & Mathematics Specialist in the Summer after Year 2. ASIP students enrolled in the Economics Major can transfer to the ASIP stream of the Economics & Mathematics Specialist without needing to reapply to ASIP.

Completion Requirements:**Program Course Requirements: 13.0 credits***First Year (2.0 credits):*

1. ECO101H1, ECO102H1
2. MAT137Y1/ MAT157Y1

Second Year and Higher (Core Courses, 8.5 credits):

1. ECO206Y1, ECO208Y1, ECO220Y1/ ECO227Y1/ (STA257H1, STA261H1)
2. 0.5 credit from: CSC108H1/ CSC148H1/ CSC110Y1
3. MAT223H1/ MAT240H1, MAT224H1/ MAT247H1, MAT237Y1/ MAT257Y1, MAT246H1
4. ECO325H1, ECO326H1, ECO375H1
5. MAT337H1/ MAT357H1, APM462H1

Third Year and Higher (Elective Courses, 2.5 credits):

1. 0.5 credit 300+ level ECO course
2. 1.0 credit from 400-level ECO courses
3. 1.0 credit from 300-level or higher MAT (or APM) courses (in addition to APM462H1).

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Notes:

1. A minimum of 70% is required in ECO101H1 and ECO102H1 to meet prerequisites for specialist-level intermediate ECO courses (ECO206Y1, ECO208Y1, ECO227Y1).
2. Students must meet all prerequisites for upper-year math courses, and should choose their sequencing of courses accordingly.
3. CSC108H1/ CSC148H1/ CSC110Y1 may be taken in First Year.
4. MAT223H1/ MAT240H1 may be taken in First Year.
5. ECO475H1 is strongly recommended.

6. STA302H1/ STA303H1 are not accepted in lieu of ECO375H1.
7. Students with MAT157Y1 cannot take MAT246H1 (it is an exclusion). Such students can instead substitute any 300-level MAT or APM course to meet the MAT246H1 requirement.

Economics Specialist (Arts Program) - ASSPE1478

Enrolment Requirements:

This is a limited enrolment program. Students must meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- ECO206Y1 (70%)
- ECO208Y1 (70%)
- ECO220Y1(70%)/ ECO227Y1(70%)/ (STA257H1(70%), STA261H1(70%))

Special Requirement

- In order to apply for the Economics Specialist Program, a student must first be enrolled in the Economics Major (ASMAJ1478). Upon acceptance to the Economics Specialist Program, your Specialist enrolment will replace your Economics Major.
- Students enrolled in this program cannot be simultaneously enrolled in any other Economics program or the Environmental Economics minor.

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the ASIP section of the Arts & Science Academic Calendar. Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry. Students applying for Year 3 entry must have been admitted to the Economics Specialist in the Summer after Year 2. ASIP students enrolled in the Economics Major can transfer to the ASIP stream of the Economics Specialist without needing to reapply to ASIP.

Completion Requirements:

Program Course Requirements: 12.0 credits

First Year (2.0 credits):

1. ECO101H1, ECO102H1
2. (MAT135H1, MAT136H1)/ MAT137Y1/MAT157Y1

Note: MAT133Y1 is not a suitable substitute for (MAT135H1, MAT136H1)/ MAT137Y1/MAT157Y1.

Second Year (Core Courses, 3.0 credits):

- ECO206Y1, ECO208Y1, ECO220Y1/ ECO227Y1/ (STA257H1, STA261H1)

Third Year (Core Courses, 1.5 credits):

- ECO325H1, ECO326H1, ECO375H1

Third Year and Higher (ECO Electives, 5.5 credits):

1. 4.5 credits from 300-level or higher ECO courses
2. 1.0 credit from 400-level ECO courses

Students in this program have the option to complete the Arts & Science Internship Program (ASIP) stream.

Notes:

1. A minimum of 70% is required in ECO101H1 and ECO102H1 to meet prerequisites for specialist-level intermediate ECO courses (ECO206Y1, ECO208Y1, ECO227Y1).
2. ECO210H1 is highly recommended, especially for students interested in graduate studies. Students may count ECO210H1 towards the Specialist program in lieu of a 0.5 credit 300-level ECO elective.
3. While 200-level or higher math or statistics courses may complement the Economics Specialist courses, they **cannot** be used as substitutes for economics courses in this program.
4. Students are nevertheless encouraged to take more math if they plan on pursuing graduate studies. Students should especially consider MAT221H1/MAT223H1/MAT240H1 (Linear Algebra), MAT235Y1/MAT237Y1 (Multivariate Calculus), MAT246H1 (Abstract Mathematics), or even consider doing a Minor program in Mathematics.
5. ECO475H1 is strongly recommended.
6. STA302H1/STA303H1 are not accepted in lieu of ECO375H1.
7. (STA237H1, STA238H1) are not accepted in lieu of ECO220Y1/ECO227Y1/ (STA257H1, STA261H1).
8. CSC108H1/CSC148H1/CSC110Y1 (introductory programming) is strongly recommended for students interested in graduate studies.

Focus in Data Analytics (Specialist) - ASFOC1478A

Students in the Economics Specialist program who undertake a Focus in Data Analytics will gain advanced

ability in applied empirical economics. The Focus (for specialists) provides students with hands-on exposure to the tools empirical economists use to build and analyze datasets - programming languages such as Python, and software programs to manage, statistically analyze, and visualize data such as Excel, GIS, Stata and R. The Specialist Focus will also direct students to required and elective empirical economics courses that apply these tools in a wide variety of contexts.

Enrolment Requirements:

Enrolment in the Economics Specialist program (ASSPE1478) is required.

Completion Requirements:

(5.0 credits)

1. 0.5 credit from: CSC108H1, CSC110Y1, CSC148H1
2. ECO225H1/ GGR272H1/ JSC270H1
3. ECO372H1
4. ECO374H1
5. ECO475H1
6. 2.0 credits of 300+ ECO elective courses from: ECO310H1, ECO334H1, ECO339H1, ECO340H1, ECO353H1, ECO354H1, ECO367H1, ECO380H1 (or the 400-level courses listed below (#7))
7. 0.5 credit 400-level ECO course from: ECO401H1, ECO403H1, ECO404H1, ECO418H1, ECO439H1, ECO446H1, ECO464H1, ECO466H1, ECO480H1, ECO481H1, ECO482H1, ECO483H1, ECO499H1

Economics Major (Arts Program) - ASMAJ1478

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- (ECO101H1 (63%), ECO102H1 (63%))/ ECO105Y1 (80%)
- MAT133Y1 (63%)/(MAT135H1 (60%), MAT136H1 (60%))/ MAT137Y1 (55%)/ MAT157Y1 (55%)

Students in this program have the option to request enrolment in the Arts & Science Internship Program (ASIP) stream. Students can apply for the ASIP stream

after Year 1 (Year 2 entry) or after Year 2 (Year 3 entry, starting Fall 2024). Full details about ASIP, including student eligibility, selection and enrolment, are available in the [ASIP section of the Arts & Science Academic Calendar](#). Please note that the majority of students enter ASIP in Fall term of Year 2. Space is more limited for Year 3 entry and there are program-specific year 3 entry enrolment requirements. Students applying for Year 3 entry must have been admitted to the Economics Major in the Summer after Year 2 and have completed the following courses prior to ASIP entry, with the posted minimum grades: ECO200Y1(60%) or ECO204Y1(60%) or ECO206Y1(50%), ECO220Y1(60%) or ECO227Y1(50%) or STA237H1(60%), STA238H1(60%) or STA247H1(60%), STA248H1(60%) or STA257H1(50%), and STA261H1(50%).

Completion Requirements:

Program Course Requirements: 7.0 credits

First Year (2.0 credits):

1. (ECO101H1, ECO102H1)/ ECO105Y1;
2. MAT133Y1/(MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

Second Year (Core Courses, 3.0 credits):

1. ECO200Y1/ ECO204Y1/ ECO206Y1,
2. ECO202Y1/ ECO208Y1/ ECO209Y1,
3. ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

Third and Higher Years (ECO Electives, 2.0 credits):

1. 1.5 credits from 300+ level ECO courses
2. At least a 0.5 credit 400-level ECO course

Students in this program have the option to complete the [Arts & Science Internship Program \(ASIP\)](#) stream.

Notes:

1. Eligibility for all Economics programs is based, in part, on attaining a minimum grade in ECO101H1 and ECO102H1 (or ECO105Y1). Students are reminded that in order to achieve the required minimum grade in the above-mentioned courses, they may repeat a specific *passed* course only once as per Faculty regulations.
2. Students in the Major program considering graduate studies in Economics are advised to take the more mathematical stream courses (ECO206Y1, ECO208Y1), and also some or all of the 300-level advanced micro, macro, and econometrics sequence (ECO325H1, ECO316H1/ ECO326H1, and ECO375H1).

- Students considering graduate studies in Economics are also encouraged to take more than the minimum amount and level of math. Students should especially consider MAT221H1/MAT223H1/MAT240H1 (Linear Algebra), MAT235Y1/MAT237Y1 (Multivariate Calculus), MAT246H1 (Abstract Mathematics), or even consider doing a Minor program in Mathematics.
- STA220H1 and STA255H1 are not accepted for the major.
- Students enrolled in this program cannot be simultaneously enrolled in any other Economics program or the Environmental Economics minor.

Focus in Data Analytics (Major) - ASFOC1478B

The Focus in Data Analytics (major) ensures that students gain proficiency in applied empirical economics. It provides students with hands-on exposure to the tools empirical economists use to build and analyze datasets - programming languages such as Python, and software programs to manage, statistically analyze, and visualize data such as Excel, GIS, Stata and R. The focus will also direct students to empirical economics courses that apply these tools in a wide variety of contexts.

Enrolment Requirements:

Enrolment in the Economics Major program (ASMAJ1478) is required.

Completion Requirements:

(3.0 credits)

- 0.5 credit from: CSC108H1, CSC110Y1, CSC148H1
- ECO225H1/GGR272H1/JSC270H1
- ECO372H1
- 1.0 credit of 300+ ECO elective courses from: ECO310H1, ECO334H1, ECO339H1, ECO340H1, ECO353H1, ECO354H1, ECO367H1, ECO374H1, ECO375H1, ECO380H1 (or the 400-level courses listed below (#5))
- 0.5 credit 400-level ECO course from: ECO401H1, ECO403H1, ECO404H1, ECO418H1, ECO439H1, ECO446H1, ECO464H1, ECO466H1, ECO475H1, ECO480H1, ECO481H1, ECO482H1, ECO483H1, ECO499H1

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- ECO101H1 (63%) and ECO102H1 (63%)/ ECO105Y1 (80%)
- MAT133Y1 (63%)/(MAT135H1 (60%) and MAT136H1 (60%))/ MAT137Y1 (55%)/ MAT157Y1 (55%)

Completion Requirements:

Program Course Requirements: 4.0 credits

First Year (2.0 credits):

- (ECO101H1 and ECO102H1)/ ECO105Y1
- MAT133Y1/(MAT135H1 and MAT136H1)/ MAT137Y1/ MAT157Y1

Second Year (Core Courses, 1.0 credit):

- ECO200Y1/ ECO204Y1/ ECO206Y1

Third and Higher Years (ECO Electives, 1.0 credit):

- 1.0 credit from 300+ level ECO courses

Notes:

- Students enrolled in this program cannot be simultaneously enrolled in any other Economics program or the Environmental Economics minor.
- Eligibility for all Economics programs is based, in part, on attaining a minimum grade in ECO101H1 and ECO102H1 (or ECO105Y1). Students are reminded that in order to achieve the required minimum grade in the above-mentioned courses, they may repeat a specific *passed* course only once as per Faculty regulations.
- Many 300-level and higher courses in economics **require** ECO220Y1. While not a formal part of the Economics Minor program, students **MUST** meet the specified prerequisites for 300+ economics courses, and should seriously consider taking ECO220Y1.

Economics Minor (Arts Program) - ASMIN1478

Enrolment Requirements:

Other Programs

- Finance & Economics (BCom) - See [Rotman Commerce](#)

Economics Courses

ECO101H1 - Principles of Microeconomics

Hours: 24L/12T

An introduction to economic analysis and its applications: price determination, market structure, decision making by individuals and firms, public policy. NOTE: extensive use of graphical and quantitative analysis.

Exclusion: [ECO105Y1](#), [ECO100Y5](#), [ECO101H5](#), [MGEA01H3](#), [MGEA02H3](#), [PPG201H1](#)

Recommended Preparation: MCV4U (Calculus & Vectors) and MHF4U (Advanced Functions), or equivalent secondary school mathematics credits

Breadth Requirements: Society and its Institutions (3)

ECO102H1 - Principles of Macroeconomics

Hours: 24L/12T

An introduction to economic analysis and its applications from a macroeconomic (economy-wide) perspective. Topics covered include international trade and finance, role of money and the banking system, monetary and fiscal policy. Note: graphical and quantitative analysis are used extensively.

Prerequisite: [ECO101H1](#)/ [ECO101H5](#)/ [MGEA02H3](#)

Exclusion: [ECO105Y1](#), [ECO100Y5](#), [ECO102H5](#), [MGEA05H3](#), [MGEA06H3](#)

Recommended Preparation: MCV4U (Calculus & Vectors) and MHF4U (Advanced Functions), or equivalent secondary school mathematics credits

Breadth Requirements: Society and its Institutions (3)

ECO105Y1 - Principles of Economics for Non-Specialists

Hours: 48L/24T

Fundamentals for consumers, businesses, citizens. Microeconomics focuses on cost/benefit analysis: gains from trade, price coordination, competition/monopoly, efficiency/equity tradeoffs, government/market failures, environmental policies, income/wealth distributions.

- Environmental Economics - See [School of the Environment](#)

Macroeconomics focuses on: GDP growth, unemployment, inflation, monetary/fiscal policies, business cycles, exchange rates, government deficits/debt, globalization. Emphasizes economic literacy, fewer mathematical tools than [ECO101H1](#), [ECO102H1](#).

Exclusion: [ECO101H1](#), [ECO102H1](#), [ECO100Y5](#), [ECO101H5](#), [ECO102H5](#), [MGEA01H3](#), [MGEA02H3](#), [MGEA05H3](#), [MGEA06H3](#)

Breadth Requirements: Society and its Institutions (3)

ECO196H1 - An Economist's Guide to the Galaxy

Hours: 24S

Climb aboard as we seek answers to the "Ultimate Question of Life, the Universe, and Everything" (Douglas Adams). Unlike the Hitchhiker's Guide to the Galaxy, the answer will not be 42. Prepare for a wide-ranging journey into the questions economists seek to answer and the evidence they must examine these questions. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

ECO197H1 - Seminar on Classical Economic Thought

Hours: 24L/12T

This seminar examines the basic ideas of the five most notable economic thinkers before 1870: Aristotle, Adam Smith, Thomas Malthus, David Ricardo, and Karl Marx. We focus on demand as the basis of price in Aristotle; the ambiguity in Smith between a labour theory of value and a demand/supply theory of value; the principle of population in Malthus; Ricardo's labour theory of value and his theory of rent and economic growth; and Marx's labour theory of value as the explanation for the development of capital. The understanding in these authors of economics as an historical process of production gives fascinating insights into modern economic development that contrast with the modern economic concentration on the distribution of resources in a world of scarcity. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

ECO198H1 - Seminar on Modern Economic Thought

Hours: 24L/12T

This seminar examines the development of modern economic thought from the marginal revolutionaries (Jevons and Menger) who proclaimed that demand in the form of utility was the basis of price to the supply/demand analysis of Alfred Marshall that established modern microeconomics by 1890. We then look at Irving Fisher's 1907 foundation of the modern concept of the interest rate and the present value of capital before reviewing J.M. Keynes' 1936 criticism of neo-classical positions on full employment and interest rates in arguing for government manipulation of interest rates to ensure full employment. We finish with Milton Friedman's championing of the unregulated market economy through his quantity theory of money critique of Keynes. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

ECO199H1 - Economics and Sustainable, Green Development

Hours: 24L/12T

Economic growth has been a powerful force through history in improving living standards throughout the world. At the same time, there is a growing recognition that environmental damages frequently accompany this growth, whether it be at the local level (soil degradation and deforestation), or the global level (climate change). Economics studies the allocation of scarce resources, but how can it incorporate "the environment" in a meaningful way that can help guide policy-makers in the 21st century? This course is a fast review of economic approaches and tools, and a review of a wide range of environmental policies, designed to manage the possible adverse impacts of economic expansions. The major emphasis in this course is on the market-based policies that guarantee incentive compatibility of these policies, thus, a higher chance of success. Restricted to first-year students. Not eligible for CR/NCR option.

Breadth Requirements: Society and its Institutions (3)

ECO200Y1 - Microeconomic Theory

Hours: 48L/24T

Theory of markets and prices. Determination of prices through the interaction of the basic economic units, the household as consumer and as supplier of inputs and the business firm as producer and as employer of inputs. The

pricing system as the mechanism by which social decisions and allocation of goods are made in a market economy.

Prerequisite: ([ECO101H1](#)(63%), [ECO102H1](#)(63%))/ [ECO105Y1](#)(80%)/ [ECO100Y5](#)(67%)/ ([ECO101H5](#)(63%), [ECO102H5](#)(63%))/ ([MGEA02H3](#) (67%), [MGEA06H3](#) (67%)); [MAT133Y1](#)/ ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)/ [MAT157Y1](#)

Exclusion: [ECO204Y1](#), [ECO206Y1](#), [ECO200Y5](#), [ECO204Y5](#), [ECO205Y5](#), [ECO206Y5](#), [MGEB01H3](#), [MGEB02H3](#), [MGEC02H3](#)

Breadth Requirements: Society and its Institutions (3)

ECO202Y1 - Macroeconomic Theory and Policy

Hours: 48L/24T

Theory of output, employment and the price level; techniques for achieving economic stability; central banking and Canadian financial institutions and markets; foreign exchange markets and the exchange rate. This course is not intended for students enrolled in the BCom program; please see [ECO209Y1](#).

Prerequisite: ([ECO101H1](#)(63%), [ECO102H1](#)(63%))/ [ECO105Y1](#)(80%)/ [ECO100Y5](#)(67%)/ ([ECO101H5](#)(63%), [ECO102H5](#)(63%))/ ([MGEA02H3](#) (67%), [MGEA06H3](#) (67%)); [MAT133Y1](#)/ ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)/ [MAT157Y1](#)

Exclusion: [ECO208Y1](#), [ECO209Y1](#), [ECO202Y5](#), [ECO208Y5](#), [ECO209Y5](#), [MGEB05H3](#), [MGEB06H3](#), [MGEC06H3](#)

Breadth Requirements: Society and its Institutions (3)

ECO204Y1 - Microeconomic Theory and Applications (for Commerce)

Hours: 48L/24T

The use of microeconomics to analyze a variety of issues from marketing and finance to organizational structure. Consumer preferences and behaviour; demand, cost analysis and estimation; allocation of inputs, pricing and firm behaviour under perfect and imperfect competition; game theory and public policy, including competition policy. Business cases are used to connect theory and practice and to highlight differences and similarities between economics and accounting, marketing and finance. This course is restricted to students in the Commerce programs.

Prerequisite: ([ECO101H1](#)(63%), [ECO102H1](#)(63%))/ [ECO105Y1](#)(80%); [MAT133Y1](#)/ ([MAT135H1](#), [MAT136H1](#))/ [MAT137Y1](#)/ [MAT157Y1](#)

Exclusion: ECO200Y1, ECO206Y1

Breadth Requirements: Society and its Institutions (3)

ECO206Y1 - Microeconomic Theory

Hours: 48L/24T

This course deals more rigorously and more mathematically with the topics included in ECO200Y1 and is intended primarily for students in certain Economics Specialist programs.

Prerequisite: (ECO101H1(70%), ECO102H1(70%))/ ECO100Y5(70%)/ (ECO101H5(70%), ECO102H5(70%))/ (MGEA02H3 (70%), MGEA06H3(70%)); MAT133Y1(63%)/ (MAT135H1(60%), MAT136H1(60%))/ MAT137Y1(55%)/ MAT157Y1(55%)

Exclusion: ECO200Y1, ECO204Y1, ECO200Y5, ECO204Y5, ECO205Y5, ECO206Y5, MGEB01H3, MGEB02H3, MGEC02H3

Breadth Requirements: Society and its Institutions (3)

ECO208Y1 - Macroeconomic Theory

Hours: 48L/24T

This course deals more rigorously and more mathematically with the topics included in ECO202Y1 and is intended primarily for students in certain Economics Specialist programs.

Prerequisite: (ECO101H1(70%), ECO102H1(70%))/ ECO100Y5(70%)/ (ECO101H5(70%), ECO102H5(70%))/ (MGEA02H3(70%), MGEA06H3 (70%)); MAT133Y1(63%)/ (MAT135H1(60%), MAT136H1(60%))/ MAT137Y1(55%)/ MAT157Y1(55%)

Exclusion: ECO202Y1, ECO209Y1, ECO202Y5, ECO208Y5, ECO209Y5, MGEB05H3, MGEB06H3, MGEC06H3

Breadth Requirements: Society and its Institutions (3)

ECO209Y1 - Macroeconomic Theory and Policy (for Commerce)

Hours: 48L/24T

Macroeconomic issues relevant for commerce students. Analytical tools are used to examine policy issues: Canadian government budgets, Bank of Canada monetary policy, exchange rate policy, foreign trade policy and government regulation of financial intermediaries. This course is restricted to students in the Commerce programs.

Prerequisite: (ECO101H1(63%), ECO102H1(63%))/ ECO105Y1(80%); MAT133Y1/ (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

Exclusion: ECO202Y1, ECO208Y1

Breadth Requirements: Society and its Institutions (3)

ECO210H1 - Mathematical Methods for Economic Theory

Hours: 24L/12T

An introduction to mathematical methods commonly used in economic theory. Topics include: multivariate calculus, concavity and convexity, unconstrained multivariate optimization, multivariate optimization subject to equality or inequality constraints and differential equations.

Prerequisite: (ECO101H1(63%), ECO102H1(63%))/ ECO105Y1(80%)/ ECO100Y5(67%)/ (ECO101H5(63%), ECO102H5(63%))/ (MGEA02H3 (67%), MGEA06H3 (67%)); MAT133Y1(63%)/ (MAT135H1(60%), MAT136H1(60%))/ MAT137Y1(55%)/ MAT157Y1(55%)

Exclusion: MAT235Y1, MAT237Y1

Recommended Preparation: ECO200Y1/ ECO204Y1/ ECO206Y1 is a recommended corequisite.

ECO220Y1 - Introduction to Data Analysis and Applied Econometrics

Hours: 48L/48T

Numerical and graphical data description; data collection and sampling; probability; sampling distributions; statistical inference; hypothesis testing and estimation; simple and multiple regression analysis (extensive coverage). Learn how to analyze data and how to correctly interpret and explain results. Use Excel to analyze a wide variety of data and replicate tables and figures in economics research papers.

Prerequisite: (ECO101H1(63%), ECO102H1(63%))/ ECO105Y1(80%)/ ECO100Y5(67%)/ (ECO101H5(63%), ECO102H5(63%))/ (MGEA02H3(67%), MGEA06H3 (67%)); MAT133Y1/ (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1

Exclusion: GGR270H1, IRW220H1, PSY201H1, PSY202H1, SOC202H1, SOC252H1, STA220H1, STA221H1, STA248H1, ECO220Y5, MGEB11H3, MGEB12H3

Breadth Requirements: Society and its Institutions (3), The Physical and Mathematical Universes (5)

ECO225H1 - Big-Data Tools for Economists

Hours: 24L/12T

An introduction to the big-data tools—including Machine-Learning techniques—economists increasingly use in applied research. The course explores unstructured data sources such as text files, webpages, social media posts, satellite imagery, and weather data. It offers a practical introduction to creating datasets from these sources (e.g., web scrapping), linking data, and managing and visualizing them (e.g., geospatial visualization).

Prerequisite: (ECO101H1(63%), ECO102H1(63%))/ ECO105Y1(80%)/ ECO100Y5(67%)/ (ECO101H5(63%), ECO102H5(63%))/ (MGEA02H3 (67%), MGEA06H3 (67%)); MAT133Y1(63%)/ (MAT135H1(60%), MAT136H1(60%))/ MAT137Y1(55%)/ MAT157Y1(55%); CSC108H1/ CSC110Y1/ CSC148H1

Exclusion: CSC311H1, ECO250Y0 (Special Topics Abroad in Economics: Big Data Tools and Machine Learning for Economists) taken in Summer 2023, ESC190H1, JSC270H1, STA314H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ECO227Y1 - Foundations of Econometrics

Hours: 48L/24T

A rigorous introduction to probability and mathematical statistics intended for students in Economics Specialist programs. Probability and estimation theory, sampling distributions, hypotheses testing, multiple regression analysis. Students will learn the tools used in economics and finance to model and address randomness and uncertainty.

Prerequisite: (ECO101H1(70%), ECO102H1(70%))/ ECO100Y5(70%)/ (ECO101H5(70%), ECO102H5(70%))/ (MGEA02H3(70%), MGEA06H3(70%)); MAT133Y1(63%)/ (MAT135H1(60%), MAT136H1(60%))/ MAT137Y1(55%)/ MAT157Y1(55%)

Corequisite: Recommended: MAT223H1/ MAT240H1, MAT235Y1/ MAT237Y1/ ECO210H1

Exclusion: STA237H1, STA238H1, STA247H1, STA248H1, STA255H1, STA257H1, STA261H1, ECO227Y5

Breadth Requirements: The Physical and Mathematical Universes (5)

ECO231H1 - Economics of Global Trade

Previous Course Number: ECO230Y1

Hours: 24L/12T

This course is intended primarily for students in the International Relations program. This course offers an introduction to the economic causes and consequences of international trade in goods, services, labour, innovation and capital. Attention will be devoted to the economic impact of policies that affect these flows, such as protectionism and outsourcing.

Prerequisite: (ECO101H1, ECO102H1)/ ECO105Y1

Exclusion: ECO230Y1, ECO364H1, ECO364H5

Breadth Requirements: Society and its Institutions (3)

ECO232H1 - Global Macroeconomics and Policies

Previous Course Number: ECO230Y1

Hours: 24L/12T

This course is intended primarily for students in the International Relations program. The course serves as an introduction to some of the causes of differences in economic performance across countries and the impact of a variety of government policies, such as monetary and fiscal policy as well as exchange rate regimes, and how each of the three interact in response to changes in development, sovereign debt, monetary unions and financial crises.

Prerequisite: (ECO101H1, ECO102H1)/ ECO105Y1

Exclusion: ECO230Y1, ECO365H1, ECO365H5

Breadth Requirements: Society and its Institutions (3)

ECO250Y0 - Special Topics Abroad in Economics

Hours: 48L/24T

Special Topics in Economics offered in an international setting. Course content and destination may vary. For more information see the Summer Abroad website.

Prerequisite: (ECO101H1(63%), ECO102H1(63%))/ ECO105Y1(80%)/ ECO100Y5(67%)/ (ECO101H5(63%), ECO102H5(63%))/ (MGEA02H3 (67%), MGEA06H3 (67%)); MAT133Y1/ (MAT135H1, MAT136H1)/ MAT137Y1/ MAT157Y1. Further prerequisites (e.g. CSC108H1/ CSC110Y1/ CSC148H1) may be required and may vary. See Summer Abroad website for details.

Exclusion: ECO250Y0 (Summer 2023) has an exclusion to ECO225H1

Breadth Requirements: Society and its Institutions (3)

ECO250Y1 - Special Topics in Economics

Hours: 48L/24T

Courses may be offered in one or more subjects each year. Students must meet the prerequisites announced by the Department.

Prerequisite: See the Department of Economics website for details.

ECO251H1 - Special Topics in Economics

Hours: 24L/12T

Courses may be offered in one or more subjects each year. Students must meet the prerequisites announced by the Department.

Prerequisite: See the Department of Economics website for details.

ECO252H1 - Special Topics in Economics

Hours: 24L/12T

Courses may be offered in one or more subjects each year. Students must meet the prerequisites announced by the Department.

Prerequisite: See the Department of Economics website for details.

ECO295H1 - Independent Study

This is an independent study course for students enrolled in an Economics program under the direction of a Department of Economics faculty member. It is an opportunity to explore a topic of interest through readings, discussion, written assignments, experiential learning, etc. This course is open only when a faculty member is available and willing to supervise on an individual basis. Applications will be jointly reviewed by the faculty member and Associate Chair, Undergraduate Studies. Not eligible for CR/NCR option.

Corequisite:
ECO200Y1/ ECO204Y1/ ECO206Y1, ECO202Y1/ ECO

208Y1/ ECO209Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

Breadth Requirements: Society and its Institutions (3)

ECO299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

ECO299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

ECO306H1 - American Economic History

Hours: 24L/12T

A survey of American economic history from the ante-bellum period to the present. Potential topics include: the rapid growth of the American economy in the late 19th and early 20th century; causes of the onset of the Great Depression; the economic impact of slavery and its aftermath; health and demographic trends; and 20th century trends in inequality.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

Breadth Requirements: Society and its Institutions (3)

ECO310H1 - Empirical Industrial Organization

Hours: 24L/12T

The quantitative analysis of firms' strategies in real-world industries, using tools from applied microeconomics and statistics. Topics include: studies of monopoly, oligopoly, imperfect competition, and the estimation of demand and

cost functions that underpin these markets. Note: hands-on analysis of real-world data using computer programs is a course requirement. The course is open to all students who meet the prerequisites, and necessary support for applicable software is provided.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Breadth Requirements: Society and its Institutions (3)

ECO313H1 - Environmental Economics and Policies

Hours: 24L/12T

This course demonstrates how a rigorous application of microeconomic techniques can inform our responses to various environmental problems. Topics may include: air and water pollution and renewable resource management.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Exclusion: ECO313H5
Breadth Requirements: Society and its Institutions (3)

ECO314H1 - Energy and the Environment

Hours: 24L/12T

This course surveys important features of energy markets and related environmental challenges. One of the central objectives is to provide an understanding of the key economic tools needed to analyse these markets. A related objective is the development of a framework for understanding the public discourse on energy and the environment. Topics include: the hydrocarbon economy (oil, natural gas and coal), electricity markets, global warming and other externalities, renewable energy, conservation, carbon taxes and 'cap-and-trade'.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Breadth Requirements: Society and its Institutions (3)

ECO316H1 - Applied Game Theory

Hours: 24L/12T

Focuses on the core ideas and concepts of game theory and on applications of them in economics and other social sciences. Topics may include: oligopoly, electoral

competition, the theory of public goods, voting theory, the free rider problem, repeated interaction, bargaining, evolutionary equilibrium, matching and auctions.

Note: This course cannot be taken as a substitute in programs that require ECO326H1.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1
Exclusion: ECO326H1, ECO326H5
Breadth Requirements: Society and its Institutions (3)

ECO317H1 - Concepts of Fairness in Economics

Hours: 24L/12T

How can we make collective decisions fairly? What does it mean to properly balance conflicting interests? How can we combine the well-being of individuals into a concept of societal well-being? We explore these and related ethical questions from the perspective of economic theory. A central tool is the axiomatic approach, which calls for decisions to be consistent, in precise senses, across related situations. Possible topics include: rationing problems, the Shapley value, fair division, discrimination, voting theory, foundations of utilitarianism and egalitarianism, measurement of inequality, population ethics, intergenerational equity, and concepts of equal opportunity.

Prerequisite: ECO200Y1(63%)/ ECO204Y1(63%)/ ECO206Y1
Exclusion: ECO351H1 (Special Topics in Economics: Principles of Fair Decisions) taken Fall 2021, Winter 2022, Fall 2022, and Winter 2023
Recommended Preparation: Familiarity and comfort with mathematical notation and formal definitions.
Breadth Requirements: Society and its Institutions (3)

ECO320H1 - Economic Analysis of Law

Hours: 24L/12T

The practical application of microeconomic theory to common legal problems: torts, contracts, property and crime, and the limitations of economic analysis. No previous familiarity with the law is assumed. (This is an economic analysis of legal issues, not a course in law).

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1
Exclusion: ECO320H5
Breadth Requirements: Society and its Institutions (3)

ECO321H1 - Canadian Economic History prior to 1850

Hours: 24L/12T

This course applies the tools of economics - theoretical and empirical - to study Canada's historical growth experiences. Topics include: the variation in well-being among Indigenous peoples (both pre and post contact), migration and indentured servitude, colonial money, child labour and education, and the rise of factories. The impact of colonial institutions on Canada's economic success is studied in a comparative context.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1

Exclusion: ECO322Y5

Breadth Requirements: Society and its Institutions (3)

ECO322H1 - Canadian Economic History, 1850-1960

Hours: 24L/12T

Canadian economic history between 1850 and 1960, with a focus on the debate over the ability of the market mechanism to optimize economic development. Topics covered include: tariff policies, Confederation, the transcontinental railroad, opening the West, the Great Depression, monetary policy and the Bank of Canada, regional growth and dominion-provincial relations.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1

Exclusion: ECO322Y5

Breadth Requirements: Society and its Institutions (3)

ECO324H1 - Economic Development

Hours: 24L/12T

This course critically analyzes issues related to economic development and the associated policy responses. Tools from micro and macroeconomic theory are employed, as well as the critical assessment of empirical evidence. Topics may include: education, health, credit markets, inequality, and the role of foreign aid.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

Exclusion: ECO324H5

Breadth Requirements: Society and its Institutions (3)

ECO325H1 - Advanced Economic Theory - Macro

Hours: 24L/12T

A development of the microeconomic foundations of macroeconomic theory to expand students' analytic skills by constructing and solving macroeconomic models. Topics may include: dynamic choice, neoclassical growth theory, uncertainty and rational expectations, business cycles, as well as fiscal and monetary policy.

Prerequisite: ECO208Y1/ ECO202Y1(70%)/ ECO209Y1; ECO220Y1(70%)/ ECO227Y1/ (STA237H1(70%), STA238H1(70%))/ (STA247H1(70%), STA248H1(70%))/ (STA257H1, STA261H1)

Exclusion: ECO325H5

Recommended Preparation: MAT235Y1/ MAT237Y1/ ECO210H1

Breadth Requirements: Society and its Institutions (3)

ECO326H1 - Advanced Microeconomics - Game Theory

Hours: 24L/12T

Game theory and applications. Topics include: strategic and extensive games, with applications to economics.

Prerequisite: ECO200Y1(70%)/ ECO204Y1/ ECO206Y1; ECO220Y1(70%)/ ECO227Y1/ (STA237H1(70%), STA238H1(70%))/ (STA247H1(70%), STA248H1(70%))/ (STA257H1, STA261H1)

Exclusion: ECO316H1, ECO326H5

Recommended Preparation: MAT235Y1/ MAT237Y1/ ECO210H1

Breadth Requirements: Society and its Institutions (3)

ECO331H1 - Behavioural and Experimental Economics

Hours: 24L/12T

Ample empirical and experimental evidence suggests significant departures from classical assumptions of economic behaviour. For example, humans are neither always perfectly rational nor always self interested. This course describes systematic ways in which behaviour deviates from neoclassical assumptions, generating new, and hopefully more realistic behavioural assumptions that have broad empirical, theoretical and policy implications.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

Breadth Requirements: Society and its Institutions (3)

ECO332H1 - Economics of the Family

Hours: 24L/24T

A use of microeconomics to study the behaviour of the family, including marriage, divorce, intra-family allocations, investment in children and gender roles.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

Breadth Requirements: Society and its Institutions (3)

ECO333H1 - Urban Economics

Hours: 24L/12T

Spatial economic theory and urban public policy: firms and individuals in partial and general equilibrium, land development and land-use controls, urban transportation, efficiency and equity in spending and taxing.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1

Exclusion: ECO333H5

Breadth Requirements: Society and its Institutions (3)

ECO334H1 - The Political Economy of Media

Hours: 24L/12T

We develop tools to analyze voters and the role of information in democracies. Theories of voter information are evaluated using empirical literature on media its political economy. We explore the effects of information-technology innovation, evaluating how the empirical results square with the theory. We focus on empirical methods used to identify the effects of media—from newspapers, radio and television to the internet and social media—on voters. Note: hands-on analysis of real-world data using computer programs is a course requirement. The course is open to all students who meet the prerequisites and necessary support for applicable software is provided.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

Breadth Requirements: Society and its Institutions (3)

ECO336H1 - Public Economics

Hours: 24L/12T

Theory of taxation and public goods, and quantitative methods for program evaluation. Additional topics include: taxation and income distribution; environmental policy; and the political economy of government policy.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

Exclusion: ECO336H5, ECO337H1

Breadth Requirements: Society and its Institutions (3)

ECO337H1 - Public Economics (for Commerce)

Hours: 24L/12T

An introduction to the economics of government similar to ECO336H1, but with greater focus on issues in business and financial economics. Additional topics include: business tax planning and corporate financial policy; taxation of saving and risk-taking; and government business enterprises.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

Exclusion: ECO336H1, ECO336H5

Breadth Requirements: Society and its Institutions (3)

ECO338H1 - Economics of Careers

Hours: 24L/12T

The economic analysis of careers from the perspectives of both workers and employers. How do people decide what to study, what careers to pursue, and when to change jobs? How do these decisions interact with the structure of firms? The impact of specialization and the division of labour on the evolution of careers is considered, as are the role of cognitive and communication skills in the labour market.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

Breadth Requirements: Society and its Institutions (3)

ECO339H1 - Labour Economics: Employment, Wages and Public Policy

Hours: 24L/12T

Using tools from microeconomic theory and statistics, this course introduces students to the study of labour markets, focusing on employment and wage determination, and the application of labour economics to public policy. Topics may include: labour supply, labour demand, estimating the impact of welfare programs, minimum wages, and other labour market interventions. Note: hands-on analysis of real-world data using computer programs is a course requirement. The course is open to all students who meet the prerequisites and necessary support for applicable software is provided.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1/ ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Exclusion: ECO343H5, ECO344H5
Breadth Requirements: Society and its Institutions (3)

ECO340H1 - Labour Economics: The Distribution of Earnings

Hours: 24L/12T

Using tools from microeconomic theory and statistics, this course studies the determinants of wages across labour markets. Topics include: the theory of compensating differentials, human capital, discrimination, immigration, unions, and alternative models of compensation. In addition, students are introduced to microeconomic models of unemployment. Throughout the course, there is an emphasis on the evaluation of empirical evidence. Note: hands-on analysis of real-world data using computer programs is a course requirement. The course is open to all students who meet the prerequisites and necessary support for applicable software is provided.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1/ ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Exclusion: ECO343H5, ECO344H5
Breadth Requirements: Society and its Institutions (3)

ECO341H1 - The Economic History of the 20th Century: Trade, Migration, Money and Finance before 1945

Hours: 24L/12T

Tailored to advanced students in Economics, Commerce, International Relations and History. The focus is on

growth and fluctuations in Europe and North America between roughly 1870 and 1939, with a particular emphasis on international trade and payments, migration, investment, and monetary arrangements.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1/ (ECO230Y1/ (ECO231H1, ECO232H1), (POL208Y1/ POL208H1))
Exclusion: ECO303H5
Breadth Requirements: Society and its Institutions (3)

ECO342H1 - Twentieth Century Economic History: Institutions, Growth and Inequality

Hours: 24L/12T

Tailored to advanced students in Economics, Commerce, International Relations and History. The focus is on institutions, growth and inequality in countries across the world.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1/ (ECO230Y1/ (ECO231H1, ECO232H1), (POL208Y1/ POL208H1))
Breadth Requirements: Society and its Institutions (3)

ECO349H1 - Money, Banking and Financial Markets

Hours: 24L/12T

This course studies the interaction of the monetary and banking sectors with financial markets and the broader economy. It builds especially on tools developed in intermediate macroeconomics, but also focuses on the institutional structure of the Canadian monetary sector, including the role and operation of the Bank of Canada.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1/ ECO202Y1/ ECO208Y1/ ECO209Y1/ ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Exclusion: ECO348H5/ ECO349H5
Breadth Requirements: Society and its Institutions (3)

ECO350Y1 - Special Topics in Economics

Hours: 48L/24T

Courses may be offered in one or more subjects each year.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1).
Further prerequisites may be required and may vary from year to year, consult the Department of Economics website/current Timetable for more information.
Breadth Requirements: Society and its Institutions (3)

ECO351H1 - Special Topics in Economics

Hours: 24L/12T

Courses may be offered in one or more subjects each year.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1).
Further prerequisites may be required and may vary from year to year, consult the Department of Economics website/current Timetable for more information.
Breadth Requirements: Society and its Institutions (3)

ECO352H1 - Special Topics in Economics

Hours: 24L/12T

Courses may be offered in one or more subjects each year.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO202Y1/ ECO208Y1/ ECO209Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1). Further prerequisites may be required and may vary from year to year, consult the Department of Economics website/current Timetable for more information.
Breadth Requirements: Society and its Institutions (3)

ECO353H1 - Special Topics in Economics with Data Analytics

Hours: 24L/12T

Seminars or workshops in economics with a data analytics component may be offered in one or more topics each year. Note: hands-on analysis of real-world data using computer programs is a course requirement. The course is open to all students who meet the prerequisites and necessary support for applicable software is provided.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1).
Further prerequisites (e.g. ECO225H1/ GGR272H1) may be required and may vary from year to year, consult the Department of Economics website/current Timetable for more information.
Breadth Requirements: Society and its Institutions (3)

ECO354H1 - Special Topics in Economics with Data Analytics

Hours: 24L/12T

Seminars or workshops in economics with a data analytics component may be offered in one or more topics each year. Note: hands-on analysis of real-world data using computer programs is a course requirement. The course is open to all students who meet the prerequisites and necessary support for applicable software is provided.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1, ECO202Y1/ ECO208Y1/ ECO209Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1). Further prerequisites (e.g. ECO225H1/ GGR272H1) may be required and may vary from year to year, consult the Department of Economics website/current Timetable for more information.
Breadth Requirements: Society and its Institutions (3)

ECO356H1 - Special Topics in Financial Economics

Hours: 24L/12T

Courses may be offered in one or more subjects each year. Students must meet the prerequisites announced by the Department.

Prerequisite: See the Department of Economics website for details.
Breadth Requirements: Society and its Institutions (3)

ECO358H1 - Financial Economics I

Hours: 24L/12T

An introduction to economics of financial assets and financial markets. Topics: inter-temporal choice, expected utility theory, security valuation, selected asset pricing models, market efficiency, and the term structure of interest rates - essential materials for an understanding of the role and operation of financial markets.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Exclusion: ACT349H1, ECO358H5, MGT231H5, RSM332H1
Breadth Requirements: Society and its Institutions (3)

ECO359H1 - Financial Economics II: Corporate Finance

Hours: 24L/12T

Agency and incomplete information problems inherent in financial transactions; the role of contractual arrangements in overcoming them. Financial constraints on investment decisions of firms; the financial system in economic growth; the legal system in the functioning of financial markets. A look at theoretical and empirical literature covering these issues.

Prerequisite: ECO358H1
Exclusion: ACT349H1, ECO359H5, MGT232H5, RSM333H1
Breadth Requirements: Society and its Institutions (3)

ECO362H1 - Economic Growth

Hours: 24L/12T

The course considers a broad range of issues that underlie economic growth, including technical progress and the accumulation of human and physical capital. Beyond these factors, the course also investigates the efficiency with which capital is used, the role of foreign trade, and the possible roles of institutions and geography.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO202Y1/ ECO208Y1/ ECO209Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Exclusion: ECO362H5
Breadth Requirements: Society and its Institutions (3)

ECO364H1 - International Trade Theory

Hours: 24L/12T

An examination of the causes and consequences of international trade. The first half develops traditional models of comparative advantage. The second half examines more recent theoretical and empirical work on trade & wages, the political economy of trade, outsourcing, and firm heterogeneity.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Exclusion: ECO230Y1, ECO231H1, ECO364H5
Breadth Requirements: Society and its Institutions (3)

ECO365H1 - International Monetary Economics

Hours: 24L/12T

Introduction to open economy macroeconomics and international finance. The core objective of the course is to develop macroeconomic models of open economies that can be applied towards gaining an understanding of recent events such as US deficits, financial crises, China's exchange rate policy and the Euro.

Prerequisite: ECO202Y1/ ECO208Y1/ ECO209Y1
Exclusion: ECO230Y1, ECO232H1, ECO365H5
Breadth Requirements: Society and its Institutions (3)

ECO367H1 - The Economics of Inequality

Hours: 24L/12T

This course critically analyzes the causes and recent dynamics of economic inequality both between countries as well as within a particular country, with a particular emphasis on the role of public policy. While theoretical models are employed, there is a focus on the critical assessment of empirical evidence. Topics may include the roles of traditional market forces (e.g., globalisation, technological change), institutions (e.g., minimum wage, unions) as well as race and gender. Note: hands-on analysis of real-world data using computer programs is a course requirement. The course is open to all students who meet the prerequisites and necessary support for applicable software is provided.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Breadth Requirements: Society and its Institutions (3)

ECO368H1 - Economics of Conflict

Hours: 24L/12T

This course explores the links between violent conflict and socioeconomic development. It focuses on micro-level processes leading to conflict, and how conflict and political violence affect people's lives at the household and community levels. It also examines how these processes

are linked to wider political and economic issues including governance and the role of institutions. Tools from economic theory are applied alongside country-specific and cross-country empirical evidence.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1). Note: Students with (ECO101H1(63%), ECO102H1(63%)/ ECO105Y1(80%)), plus a full-year of quantitative methods/statistics (e.g., POL222H1, POL232H1), and who are enrolled in the International Relations or Peace, Conflict and Justice Major or Specialist programs may take this course with Permission of the Instructor.
Breadth Requirements: Society and its Institutions (3)

ECO369H1 - Health Economics

Hours: 24L/12T

The provision of health care provides many special problems of informational asymmetry, regulation, insurance and redistribution. A consideration of the demand and supply side problems. Alternative reform proposals for health care are explored.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Breadth Requirements: Society and its Institutions (3)

ECO372H1 - Data Analysis and Applied Econometrics in Practice

Hours: 24L/12T

How multiple regression can be used to answer causal questions. Implications of, and how to interpret different model specifications and identification strategies. Students will read, critically evaluate and replicate existing research, and conduct their own original analyses. Statistical software STATA or R will be used.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Breadth Requirements: Society and its Institutions (3)

ECO374H1 - Forecasting and Time Series Econometrics

Hours: 24L/12T

Introduction to time series econometrics and forecasting. Statistical foundations and economic applications of

stochastic processes including ARMA, neural networks with machine learning, VAR, VEC, and volatility models. Students gain practical experience working with economic and financial data, making use of statistical software.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1(70%)/ ECO227Y1/ (STA237H1(70%), STA238H1(70%)/ (STA247H1(70%), STA248H1(70%)/ (STA257H1, STA261H1)
Exclusion: STA457H1
Recommended Preparation: MAT221H1/ MAT223H1/ MAT240H1
Breadth Requirements: Society and its Institutions (3)

ECO375H1 - Applied Econometrics I

Hours: 24L/12T

Introduction to econometrics. Statistical foundations and the interpretation of multiple regression models, with an emphasis on cross-sectional data. Application of regressions to a wide variety of economic questions and data sources, including the use of statistical software. Problems in the identification of causality, and an introduction to methods of addressing common statistical issues.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1(70%)/ ECO227Y1/ (STA237H1(70%), STA238H1(70%)/ (STA247H1(70%), STA248H1(70%)/ (STA257H1, STA261H1)
Exclusion: ECO375H5
Recommended Preparation: MAT221H1/ MAT223H1/ MAT240H1
Breadth Requirements: Society and its Institutions (3)

ECO380H1 - Markets, Competition, and Strategy

Hours: 24L/12T

This course in applied microeconomics is concerned with the functioning of markets and the behaviour of firms within these markets. The focus is on strategic relationships between organizations, including competitive relationships among firms in the same market and cooperative relationships between a firm and its suppliers and distributors. Note: hands-on analysis of real-world data using computer programs is a course requirement. The course is open to all students who meet the prerequisites and necessary support for applicable software is provided.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

Exclusion: ECO312H5

Breadth Requirements: Society and its Institutions (3)

ECO381H1 - Personnel Economics

Hours: 24L/12T

An examination of selected material on compensation and incentives in organizations. Topics include: recruitment and hiring, training, turnover, downsizing, motivating workers, teams, allocating authority and task assignment.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

Exclusion: ECO381H5

Breadth Requirements: Society and its Institutions (3)

ECO398H0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

ECO398Y0 - Research Excursions

An instructor-supervised group project in an off-campus setting. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-excursions-program>. Not eligible for CR/NCR option.

ECO399H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

ECO399Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at

<https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

ECO401H1 - Topics in Economic Policy

Hours: 24L/12T

This course covers basic issues in the theoretical and empirical evaluation of public policy. Sample topics include: income redistribution through taxation and the provision of social insurance and public goods, the mitigation of externalities, and welfare analysis in behavioural models. Note: hands-on analysis of real-world data using computer programs is a course requirement. The course is open to all students who meet the prerequisites and necessary support for applicable software is provided.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1, ECO202Y1/ ECO208Y1/ ECO209Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level.

Breadth Requirements: Society and its Institutions (3)

ECO402H1 - Topics in Health Economics

Hours: 24L/12T

This course explores a variety of topics in health economics, providing students with an overview of current and historical institutional characteristics of the market for, and public policy towards, health care. Students will apply theoretical and empirical tools to current domestic and international issues in health policy. No previous background in health economics is required.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1, ECO202Y1/ ECO208Y1/ ECO209Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level.

Breadth Requirements: Society and its Institutions (3)

ECO403H1 - Topics in Development Economics and Policy

Hours: 24L/12T

This course covers a variety of topics pertaining to economic development and associated policies.

Depending on the course instructor, the focus may be on theories and policies related to poverty alleviation, human capital formation, financial markets, international trade, governance or economic growth. Note: hands-on analysis of real-world data using computer programs is a course requirement. The course is open to all students who meet the prerequisites and necessary support for applicable software is provided.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1, ECO202Y1/ ECO208Y1/ ECO209Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level.

Breadth Requirements: Society and its Institutions (3)

ECO404H1 - Topics in Managerial Economics

Hours: 24L/12T

Applies quantitative economic methods to real world business-oriented cases. Sample topics include: new product design, decision making under uncertainty, market segmentation and price discrimination, inventory analysis, game theoretic analysis of price wars, financial portfolio design, and optimal pricing. Involves substantial modeling in Excel, regression analysis, optimization methods, and financial reports. Note: hands-on analysis of real-world data using computer programs is a course requirement. The course is open to all students who meet the prerequisites and necessary support for applicable software is provided.

Prerequisite: ECO200Y1(63%)/ ECO204Y1/ ECO206Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level.

Breadth Requirements: Society and its Institutions (3)

ECO406H1 - Developmental Macroeconomics

Hours: 24L/12T

This course studies a growth model applicable to both middle-income developing countries and resource-rich developed countries. Special attention is paid to causes of cyclical currency overvaluation, particularly Dutch disease and excessive capital inflows.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1, ECO202Y1/ ECO208Y1/ ECO209Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level.

Breadth Requirements: Society and its Institutions (3)

ECO407H1 - Competing Views in Macroeconomic Theory and Policy

Hours: 24L/24T

Provides students with a systematic analysis of competing perspectives on key areas of macroeconomic theory and policy. Special attention paid to competing views regarding key fiscal, monetary, and trade policy issues as applied to Canada.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1, ECO202Y1/ ECO208Y1/ ECO209Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level.

Breadth Requirements: Society and its Institutions (3)

ECO409H1 - Topics in Money, Banking, and Finance

Hours: 24L/12T

This course examines the foundations of money and financial institutions using tools mastered in micro and macroeconomics. The goal is a set of principles valid for the analysis of monetary policy and institutional regulation in a variety of real world settings.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1, ECO202Y1/ ECO208Y1/ ECO209Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level.

Breadth Requirements: Society and its Institutions (3)

ECO410H1 - Mergers and Competition Policy

Hours: 24L/24T

A combined theoretical, empirical and policy approach to mergers amongst competitors (horizontal mergers). Uses microeconomic models including game theory and econometrics. Delves into recent/current matters assessed by antitrust authorities domestically and/or internationally with applications to specific industries.

Prerequisite: ECO372H1/ ECO374H1/ ECO375H1, at least 1.0 credit in ECO at the 300+ level.

Breadth Requirements: Society and its Institutions (3)

ECO414H1 - Energy and Regulation

Hours: 24L/12T

This course provides a general treatment of the economics of energy markets and the use of regulation in addressing environmental and other issues arising in these markets. A central theme is the search for an appropriate balance between market forces and regulatory/government intervention. Familiarity with tools of microeconomics and statistics/econometrics is essential. Topics include: oil, natural gas, coal and electricity markets, global warming and other externalities, networks, feed-in-tariffs, carbon taxes, 'cap-and-trade' and incentive regulation.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Breadth Requirements: Society and its Institutions (3)

ECO417H1 - Economic Development Policy: Community Engaged Learning

Hours: 12L/12T/12P

An examination of the causes and consequence of poverty in developing countries with a microeconomic focus, and how it relates to poverty in the developed world, using a 30-hour service placement at a community organization. Importance of community and context specific factors in policy implementation; learn how local organizations have responded. Use of reflection assignments, papers, group work and class discussions to relate to course concepts. Topics include: poverty traps, health, education, and credit. An application to the instructor is necessary. Not eligible for CR/NCR option.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO202Y1/ ECO208Y1/ ECO209Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Breadth Requirements: Society and its Institutions (3)

ECO418H1 - Empirical Applications of Economic Theory

Hours: 24L/12T

Topics class in applied econometrics, emphasizing empirical industrial organization. Emphasis on a balanced treatment of theory and econometric techniques used in empirical research in industrial organization (the study of firms and markets). How firms behave, how market equilibriums arise and how economic policies are used to affect market equilibriums. Note: hands-on analysis of

real-world data using computer programs is a course requirement. The course is open to all students who meet the prerequisites and necessary support for applicable software is provided.

Prerequisite: ECO372H1(73%)/ ECO374H1/ ECO375H1
Breadth Requirements: Society and its Institutions (3)

ECO419H1 - International Macroeconomics

Hours: 24L/12T

This course studies the causes and consequences of international borrowing and lending and exchange rate fluctuations. We will discuss key empirical facts about these phenomena, develop economic models to understand the forces that drive them, and apply the models to gain insights about a variety of historical contexts like China's rapid economic development and the recent sovereign debt crises in the Eurozone periphery.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO202Y1/ ECO208Y1/ ECO209Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)
Breadth Requirements: Society and its Institutions (3)

ECO420Y1 - Special Topics in Economics

Hours: 48S

Seminars or workshops may be offered in one or more subjects each year.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level. Further prerequisites (e.g. ECO225H1) may be required and may vary from year to year, consult the Department of Economics website/current Timetable for more information.
Breadth Requirements: Society and its Institutions (3)

ECO421H1 - Special Topics in Economics

Hours: 36S

Seminars or workshops may be offered in one or more subjects each year.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level. Further prerequisites may be required and may vary from year to year, consult the Department of Economics website/current Timetable for more information.

Breadth Requirements: Society and its Institutions (3)

ECO422H1 - Special Topics in Economics

Hours: 36S

Seminars or workshops may be offered in one or more subjects each year.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1, ECO202Y1/ ECO208Y1/ ECO209Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level. Further prerequisites may be required and may vary from year to year, consult the Department of Economics website/current Timetable for more information.

Breadth Requirements: Society and its Institutions (3)

ECO424H1 - Topics in Experimental Economics

Hours: 24L/12T

Experimental Economics is a relatively new and very exciting field in economics. While most data used in economics is observational, experimentalists use controlled environments to study various economic issues: from individual decision making, to interaction in games and markets, to asset markets and even macroeconomic issues. In this “hands on” course, students read the background literature in a few areas of current academic research, design and conduct human-subject experiments, ultimately submitting a paper where they draw conclusion from their analysis of real data.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level.

Exclusion: ECO421H1 (Special Topics in Economics: Experimental Economics), taken Fall 2020 and Fall 2022.

Recommended Preparation: ECO316H1/ ECO326H1

Breadth Requirements: Society and its Institutions (3)

ECO425H1 - Business Cycles

Hours: 24L/12T

This course builds on material covered in ECO208Y1. Students will learn how to use business cycle models to better understand key empirical features of the macroeconomy. Topics covered include: the financial crisis, monetary policy, fiscal policy, theories of unemployment, and the effects of innovation on economic fluctuations, the Great Depression and the Financial Crisis.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1, ECO202Y1/ ECO208Y1/ ECO209Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level.

Corequisite: ECO374H1/ ECO375H1

Breadth Requirements: Society and its Institutions (3)

ECO426H1 - Market Design

Hours: 24L/12T

This course presents the theory and practice of market design, including matching markets and auctions. Sample topics include: school choice, kidney exchange, spectrum auctions, and keyword auctions.

Prerequisite: ECO316H1(60%)/ ECO326H1

Breadth Requirements: Society and its Institutions (3)

ECO427H1 - Economics of Information

Previous Course Number: ECO421H1

Hours: 24L/12T

This course examines the role and the use of information in strategic situations. The class will expand on the material covered in game theory classes and illustrate it with applications. Topics include: communication, signalling, building reputations, adverse selection, etc.

Prerequisite: ECO316H1(60%)/ ECO326H1

Exclusion: ECO421H1 (Special Topics in Economics: Economics of Information), offered in Winter 2018 and Winter 2020.

Breadth Requirements: Society and its Institutions (3)

ECO428H1 - Classical Economic Thought

Hours: 24L/12T

An examination of the price, distribution, and growth theories of major economic thinkers before 1870, from pre-classical contributions by Aristotle, Mercantilists, and Physiocrats to the classical authors Adam Smith, David Ricardo, T.R. Malthus, and Karl Marx.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO202Y1/ ECO208Y1/ ECO209Y1

Exclusion: ECO322Y5

Breadth Requirements: Society and its Institutions (3)

ECO429H1 - Economic Thought after 1870

Hours: 24L/12T

Economic analysis between 1870 and 1960, from the foundations of microeconomics by the Marginal Utility theorists of the 1870s (Jevons, Menger, and Walras), Alfred Marshall in the 1890s, and the capital theorists Bohm-Bawerk and Fisher in the early 1900s, to the Keynesian revolution in macroeconomics in the 1930s and Friedman's counter-revolution in the 1950s.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO202Y1/ ECO208Y1/ ECO209Y1

Exclusion: ECO322Y5

Breadth Requirements: Society and its Institutions (3)

ECO430Y1 - Reading Course or Thesis

Intended for advanced Specialist students who have exhausted course offerings in a particular area. Students may apply by submitting an application detailing their proposed topic, consult Timetable for more information. The course is open only when a faculty member is available and willing to supervise. Applications will be jointly reviewed by the faculty member and Associate Chair, Undergraduate Studies. Not eligible for CR/NCR option.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO202Y1/ ECO208Y1/ ECO209Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level.

Breadth Requirements: Society and its Institutions (3)

ECO431H1 - Reading Course or Thesis

Intended for advanced Specialist students who have exhausted course offerings in a particular area. Students may apply by submitting an application detailing their proposed topic, consult Timetable for more information. The course is open only when a faculty member is available and willing to supervise. Applications will be

jointly reviewed by the faculty member and Associate Chair, Undergraduate Studies. Not eligible for CR/NCR option.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO202Y1/ ECO208Y1/ ECO209Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level.

Breadth Requirements: Society and its Institutions (3)

ECO434H1 - Topics in Political Economy

Hours: 24L/12T

This course surveys recent advances in political economy, emphasizing the critical evaluation of empirical evidence pertaining to political economic theories. Topics vary by year, but may include: voters and electoral competition, and the political economy of media and political agency.

Prerequisite: ECO316H1/ ECO326H1; ECO374H1/ ECO375H1

Breadth Requirements: Society and its Institutions (3)

ECO435H1 - The Economics of Modern China

Hours: 24L/12T

A focus on post-1949 Chinese economy, and the PRCs economic legacy. Economic development during the Maoist period, particularly post-1979 reforms. China's experience is compared to Eastern Europe's and the role of China in the rapidly growing East Asian economy. This is a limited enrolment seminar requiring extensive reading.

Prerequisite: ECO200Y1(70%)/ ECO204Y1(70%)/ ECO206Y1(70%); ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1)

Breadth Requirements: Society and its Institutions (3)

ECO437H1 - Quantitative Macroeconomics

Hours: 24L/12T

In order to capture the complexity of economic behaviour and interactions, especially with a significant time dimension, modern models of the macroeconomy make considerable use of computer simulation. This course teaches students both how to develop the economic

models, and how to solve and work with them computationally.

Prerequisite: [ECO325H1](#)

Breadth Requirements: Society and its Institutions (3)

ECO438H1 - Topics in Behavioural Economics

Previous Course Number: ECO422H1

Hours: 24L/12T

Behavioural Economics is a relatively new field that incorporates insights gained from psychological, experimental and neuroscientific studies. Research methods adapted from behavioural economics are now being employed in virtually every field in economics. The course will cover the main themes in behavioural economics: individual choices under risk and uncertainty, reference-dependent choices, intertemporal preferences, other-regarding preferences, bounded rationality in individual and interactive decision-making, and the measurement of rationality and recovery of preferences.

Prerequisite: [ECO200Y1](#)/ [ECO204Y1](#)/ [ECO206Y1](#), [ECO220Y1](#)/ [ECO227Y1](#)/ ([STA237H1](#), [STA238H1](#))/ ([STA247H1](#), [STA248H1](#))/ ([STA257H1](#), [STA261H1](#)), at least 1.0 credit in ECO at the 300+ level.

Exclusion: [ECO422H1](#) (Special Topics in Economics: Topics in Behavioural Economics), offered in Winter 2018, Winter 2019, and Winter 2020.

Breadth Requirements: Society and its Institutions (3)

ECO439H1 - Empirical Methods in Microeconomics

Hours: 24L/12T

This course studies the methods used in modern program evaluation and micro-econometrics to identify causal effects in the presence of potentially unobserved confounding factors. Covers a range of methods and designs, both experimental and quasi-experimental. There is a heavy emphasis on the application of these methods to a broad range of economic questions. Note: hands-on analysis of real-world data using computer programs is a course requirement. The course is open to all students who meet the prerequisites and necessary support for applicable software is provided.

Prerequisite: ([ECO372H1](#)(70%)/ [ECO374H1](#)(70%)/ [ECO375H1](#)(60%)) OR ([ECO200Y1](#)(80%)/ [ECO204Y1](#)(80%)/ [ECO206Y1](#)(80%), ([ECO220Y1](#)(80%)/ [ECO227Y1](#)(80%))

Breadth Requirements: Society and its Institutions (3)

ECO446H1 - Advanced Public Economics

Hours: 24L/12T

Advanced topics in public economics and economic analysis of Canadian public policy. Through a mix of lectures and independent research, students will acquire theoretical and empirical tools for public policy analysis. Topics may include: income inequality and redistribution; fiscal federalism; taxation of corporate profits; and policies to deal with public goods and externalities. Note: hands-on analysis of real-world data using computer programs is a course requirement. The course is open to all students who meet the prerequisites and necessary support for applicable software is provided.

Prerequisite: [ECO200Y1](#)/ [ECO204Y1](#)/ [ECO206Y1](#), [ECO220Y1](#)/ [ECO227Y1](#)/ ([STA237H1](#), [STA238H1](#))/ ([STA247H1](#), [STA248H1](#))/ ([STA257H1](#), [STA261H1](#)), at least 1.0 credit in ECO at the 300+ level.

Exclusion: [ECO336Y1](#)

Recommended Preparation: [ECO372H1](#)/ [ECO374H1](#)/ [ECO375H1](#) (familiarity with STATA)

Breadth Requirements: Society and its Institutions (3)

ECO451H1 - Macroeconomic Growth

Hours: 24L/12T

Studies current empirical evidence, and corresponding theoretical models to explain and understand macroeconomic growth, and its varied experience across countries. Coverage and depth of treatment go beyond [ECO362H1](#). Students may benefit from, but need not have taken [ECO362H1](#).

Prerequisite: [ECO325H1](#)(60%)

Breadth Requirements: Society and its Institutions (3)

ECO456H1 - Special Topics in Financial Economics

Hours: 24L/12T

Courses may be offered in one or more subjects each year. Students must meet the prerequisites announced by the Department.

Prerequisite: See the Department of Economics website for details.

Breadth Requirements: Society and its Institutions (3)

ECO459H1 - International Trade Regulation

Hours: 24L

The theory and political economy of international trade, with examination of specific trade institutions: Bretton Woods, WTO, NAFTA, tariff administration, most-favoured nation treatment, antidumping regulation, subsidies and countervailing duties, agriculture, trade in services, trade-related intellectual property, trade and environment, trade and developing countries.

Prerequisite: ECO364H1, ECO365H1, permission of the instructor

Breadth Requirements: Society and its Institutions (3)

ECO461H1 - The Economics of Financial Risk Management

Hours: 24L/12T

This course is intended primarily for students in the Financial Economics specialist program and is not open to students in the BCom program. The role of risk management in both private and public sectors, a discussion of why firms and government should hedge financial risks; individual and social gains of financial risk management; identification and quantification of financial risks (including Value-at-Risk measures); how derivative securities can be used for financial risk management.

Prerequisite: ECO358H1(70%)

Exclusion: ACT349H1, RSM435H1, ECO460H5, ECO461H5

Breadth Requirements: Society and its Institutions (3)

ECO462H1 - Financial Econometrics

Hours: 24L/12T

This course is intended primarily for students in the Financial Economics specialist program. An introduction to the econometrics used in empirical finance, with an emphasis on estimation and inference using computer based applications. Topics will include: parametric and nonparametric models of volatility, evaluation of asset pricing theories, and models for risk management and transactions data.

Prerequisite: ECO358H1(70%); ECO375H1(70%)/ECO375H5(70%)

Breadth Requirements: Society and its Institutions (3)

ECO464H1 - Empirical Financial Economics

Hours: 24L/12T

The course develops the tools used in empirical research in financial economics. Coverage may include: discrete choice models, duration models, instrumental variables, differences-in-differences, regression discontinuity, propensity score estimators, sample selection models and cumulative abnormal return calculation. Topics are drawn from: ownership structure, mergers and acquisitions, capital structure, payout policy, CEOs' effect on the firm, executive compensation, insider trading, shareholder activism, and bank financing. Note: hands-on analysis of real-world data using computer programs is a course requirement. The course is open to all students who meet the prerequisites and necessary support for applicable software is provided.

Prerequisite: ECO358H1(70%)/ RSM332H1(70%); ECO374H1(70%)/ ECO375H1(70%)/ ECO375H5(70%)/ ECO327Y5(70%)

Recommended Preparation: ECO359H1

Breadth Requirements: Society and its Institutions (3)

ECO465H1 - International Finance

Hours: 24L/12T

An advanced course that addresses topics in international finance and macroeconomics. Potential topics include: foreign exchange market; exchange rate determination; empirical models of exchange rates; international financial markets and uncertainty; international CAPM and home bias; sovereign debt; optimal capital controls.

Prerequisite: One of the following: ECO365H1(80%)/(ECO325H1(60%), ECO374H1(60%))/(ECO325H1(60%), ECO375H1(60%))

Breadth Requirements: Society and its Institutions (3)

ECO466H1 - Empirical Macroeconomics and Policy

Hours: 24L/12T

Building on ECO325H1, ECO374H1 and ECO375H1, students increase their data literacy and learn modelling techniques to address policy issues. The course covers monetary policy conduct, central bank use of general equilibrium models, and basic techniques for predicting key macroeconomic variables. The class is divided into groups making regular presentations on current global and domestic issues, the economic outlook, and how the Bank of Canada should adjust monetary policy in the short

run. At the end of the course, traditionally a group is chosen to compete in the Bank of Canada Governor's Challenge. Note: hands-on analysis of real-world data using computer programs is a course requirement. The course is open to all students who meet the prerequisites and necessary support for applicable software is provided.

Prerequisite: ECO208Y1(70%)/ ECO209Y1(70%)/ ECO202Y1(75%)/ ECO325H1(70%), ECO374H1(70%)/ ECO375H1(70%)

Exclusion: ECO466H5

Breadth Requirements: Society and its Institutions (3)

ECO475H1 - Applied Econometrics II

Previous Course Number: ECO376H1

Hours: 24L/12T

A research-oriented course continuing from ECO375H. The regression model is extended in several possible directions: time series analysis; panel data techniques; instrumental variables; simultaneous equations; limited dependent variables. Students will complete a major empirical term paper, applying the tools of econometrics to a topic chosen by the student.

Prerequisite: ECO375H1(70%)/ ECO374H1(80%),

NOTE: STA302H1 is not accepted preparation.

Exclusion: ECO475H5

Breadth Requirements: Society and its Institutions (3)

ECO480H1 - Special Topics in Economics with Data Analytics

Hours: 24L/12T

Seminars or workshops in economics with a data analytics component may be offered in one or more topics each year. Note: hands-on analysis of real-world data using computer programs is a course requirement. The course is open to all students who meet the prerequisites and necessary support for applicable software is provided.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level. Further prerequisites (e.g. ECO225H1/ GGR272H1) may be required and may vary from year to year, consult the Department of Economics website/current Timetable for more information.

Breadth Requirements: Society and its Institutions (3)

ECO481H1 - Special Topics in Economics with Data Analytics

Hours: 24L/12T

Seminars or workshops in economics with a data analytics component may be offered in one or more topics each year. Note: hands-on analysis of real-world data using computer programs is a course requirement. The course is open to all students who meet the prerequisites and necessary support for applicable software is provided.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1, ECO202Y1/ ECO208Y1/ ECO209Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level. Further prerequisites (e.g. ECO225H1/ GGR272H1) may be required and may vary from year to year, consult the Department of Economics website/current Timetable for more information.

Breadth Requirements: Society and its Institutions (3)

ECO482H1 - Machine Learning Applications in Macroeconomic Finance

Hours: 24L/12T

This course introduces students to machine learning concepts and techniques, focusing on applications in macroeconomic finance. In the first part we review supervised and unsupervised machine-learning methods. In the second part, we focus on various questions and topics in macro-finance where the use of machine learning is increasingly common. Hands-on use of these techniques to solve economic problems in macro-finance will prepare students for more advanced machine learning courses.

Prerequisite: CSC108H1/ CSC110Y1/ CSC148H1, ECO200Y1/ ECO204Y1/ ECO206Y1, ECO202Y1/ ECO208Y1/ ECO209Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level.

Exclusion: CSC311H1, STA314H1, ECO481H1 (*Special Topics in Economics with Data Analytics: Macroeconomic Finance with Machine Learning Applications*) taken in Fall 2022 or Winter 2023.

Breadth Requirements: The Physical and Mathematical Universes (5)

ECO483H1 - Health and Economic Inequality

Hours: 24L/12T

This course provides an interactive overview of the key themes in health and economic inequality, paying particular attention to the bidirectional causal relationship: poor health can lead to poor economic outcomes, while economic insecurity can have serious health implications. Focusing on the current empirical literature and employing a hands-on approach to economic and health data, we investigate social and economic determinants such as income, geography, family, health care, race and gender. Note: hands-on analysis of real-world data using computer programs is a course requirement. The course is open to all students who meet the prerequisites, and necessary support for applicable software is provided.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1, ECO202Y1/ ECO208Y1/ ECO209Y1, ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1), at least 1.0 credit in ECO at the 300+ level.

Exclusion: ECO481H1 (*Special Topics in Economics with Data Analytics: Health and Economic Inequality*) taken in Fall 2023.

Breadth Requirements: Society and its Institutions (3)

ECO499H1 - Honours Essay in Applied Microeconomics

Hours: 24L/12T

Students will complete an original research paper on a topic of their choosing. Topic must be microeconomic and applied, meaning all papers will involve data and quantitative (regression) analysis.

Prerequisite: ECO200Y1/ ECO204Y1/ ECO206Y1; ECO202Y1/ ECO208Y1/ ECO209Y1; ECO220Y1/ ECO227Y1/ (STA237H1, STA238H1)/ (STA247H1, STA248H1)/ (STA257H1, STA261H1); ECO372H1/ ECO374H1/ ECO375H1; an overall average of 73% across all ECO courses taken. Students will need to submit a supplemental application that briefly describes the topic of interest for the original research paper. The application form will be noted on the Timetable.

Recommended Preparation: ECO374H1/ ECO375H1 and ECO372H1

Breadth Requirements: Society and its Institutions (3)

Introduction

Literary study engages with some of history's most creative and articulate thinkers as they contemplate fundamental and persistent questions: How do individuals form and sustain meaningful relationships with one another? What is the purpose of art? How does language record and shape human experience? As a student in the English program, you will be introduced to the literary tradition in English, a fascinating conversation spanning over a thousand years and connecting nations and peoples all across the globe. In addition, you will be trained in methods of critical reading and writing which will help you to comprehend complex texts and the authors and societies that produced them. The skills acquired by students of English are directly applicable to any career that requires critical thinking and effective communication—from education to government, law to engineering, business to medicine, and beyond. Just as valuably, the study of English will provide you with models and tools for discovering and articulating your own perspective on the many different kinds of written texts that make up our world.

The Department of English offers courses in British, Canadian, and American literature; Indigenous literatures of North America; postcolonial, transnational, and diasporic English literatures of Africa, the Caribbean, and South Asia; and in the critical and theoretical literature through which literary critics and philosophers have developed vocabulary and methods for describing the forms, histories, and ideologies of literary art.

English courses are arranged in four levels. Courses at the 100-level introduce students, in large lectures, to the study of English literature through sweeping surveys: of the literary tradition from Homer through the 19th century; of literature written in direct response to the events of recent decades; or of narrative forms in many genres and historical periods. Most 100-level courses include small-

group tutorials, where students are introduced to critical reading and writing skills; essays at the 100-level typically do not require research or secondary sources. Courses at the 200-level provide historically, geographically, generically, or theoretically grounded introductions to the study of English literature. These include the four "gateway" courses required of all Specialists and Majors—introductions to the major national-historical fields (British, Canadian, and American) that comprise literatures in English—as well as a wide range of courses that will prepare students for further study. 300-level courses focus on particular literary periods, on diasporic literatures, and on special topics within a literature or literary genre. Courses at this level introduce students to research skills and typically require essays that incorporate secondary sources. Courses in the 400-level are both advanced and focused—unique courses created by Department faculty which often relate to their own research. Active student participation, including oral presentations, is an important part of these courses. These courses require a substantial research essay. English 400-level courses are open to students who have obtained standing in at least 9.0 credits, including 4.0 ENG credits, and who have completed [ENG202H1](#), [ENG203H1](#), [ENG250H1](#), and [ENG252H1](#) (though exemptions may be made for students registered in our pre-2018 programs).

The Department of English offers several Programs of Study. The Specialist is the most intensive and comprehensive, requiring a minimum of 10.0 credits in a 20.0 credits degree. The Major is the Department's most popular program. It provides both depth and breadth to students who wish to focus on English studies but also wish to leave room in their degrees to pursue other interests. The Minor is the Department's second-most popular program, and can be combined with Majors or Minors in a wide variety of other fields. On the presumption that the Minor is a curiosity-driven program, Minors are exempt from the required courses and distribution requirements of the Specialist and Major. The Minor in Creative Writing is a limited enrolment program with the objective of allowing students to exercise their creativity and to improve as writers through the practice-based and reflective study of genres, strategies, and techniques.

The Department of English publishes detailed course descriptions and reading lists online, usually at the beginning of May. Students are urged to consult these course descriptions at www.english.utoronto.ca before enrolment begins.

Students with questions about the English Undergraduate Programs should consult the Undergraduate Advisor.

Regarding English Programs

Students are responsible for completing all the requirements of an English program from the Calendar of the year in which they enrolled in the program. Completion of a first-year ENG course is not a requirement for any of our programs. Please note that we do not accept ENG100H1, ENG102H1, or any CR/NCR courses toward any of our programs. Enrolment in the English Specialist program requires a final grade of at least 73% in ENG110Y1, ENG140Y1, or ENG150Y1; or a final grade of at least 73% in 2.0 ENG credits at the 200-level.

Note About Program Completion

Students can complete only one program type – Specialist, Major, or Minor – in an individual area referenced with the same four-digit program code.

The English programs impacted by this policy:
[ASSPE1645](#), [ASMAJ1645](#), and [ASMIN1645](#)

English Programs

English Specialist (Arts Program) - ASSPE1645

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Completed courses (with minimum grades)

The following courses with the stated minimum grades are required:

- 73% in [ENG110Y1](#), [ENG140Y1](#), or [ENG150Y1](#), or
- 2.0 credits from 200-series ENG courses, with a final grade of 73% in each.

Completion Requirements:

10.0 ENG credits including 4.0 credits from 300+ level courses, at least 1.0 credit of which must be at the 400-level.

Only 1.0 credit from 100-level ENG courses may be counted. We do not accept ENG100H1, ENG102H1, or any CR/NCR courses toward our programs.

Courses must fulfill the following requirements:

1. ENG202H1, ENG203H1, ENG250H1, ENG252H1
2. 0.5 ENG credit from Indigenous, Postcolonial, Transnational Literatures
3. 2.0 ENG credits from Pre-1800 British Literature
4. 0.5 ENG/ JEI/ JWE credit from Theory, Language, Critical Methods
5. ENG286H1 or ENG287H1. If not, one 0.5 credit in any BR=5 course

Indigenous, Postcolonial, Transnational Literatures:
ENG253H1, ENG254H1, ENG269H1, ENG270H1,
ENG355H1/ ENG355Y1, (ENG358H1 and ENG359H1)/
ENG356Y1, ENG367H1, ENG368H1, ENG369H1,
ENG370H1/ ENG370Y1, ENG371H1, ENG372H1

Pre-1800 British Literature:
ENG220H1, ENG240Y1, ENG300H1/ ENG300Y1, (ENG301H1 and ENG302H1)/ ENG302Y1, ENG303H1,
ENG305H1, (ENG306H1 and ENG307H1)/ ENG306Y1, (ENG308H1 and ENG309H1)/ ENG308Y1, ENG311H1, (ENG320H1 and ENG321H1)/ ENG320Y1, ENG322H1/ ENG322Y1, ENG323H1, ENG330H1, ENG331H1,
ENG335H1, ENG337H1, ENG373H1, ENG374H1

Theory, Language, Critical Methods:
ENG201H1/ ENG201Y1, ENG205H1, JEI206H1/ JWE206H1, ENG280H1, ENG281H1, ENG285H1,
ENG376H1, ENG377H1, ENG382H1/ ENG382Y1,
ENG384H1/ ENG384Y1, ENG385H1

Note:

- ENG387H1, ENG388H1, ENG389H1, ENG394H1, ENG497H1, and ENG498H1 may not be counted toward fulfilling the requirements of this program.

English Major (Arts Program) - ASMAJ1645

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

7.0 ENG credits including 2.0 credits from 300+ level courses, at least 0.5 credit of which must be at the 400-level.

Only 1.0 credit from 100-level ENG courses may be counted. We do not accept ENG100H1, ENG102H1, or any CR/NCR courses toward our programs.

any CR/NCR courses toward our programs.
Courses must fulfill the following requirements:

1. ENG202H1, ENG203H1, ENG250H1, ENG252H1
2. 0.5 ENG credit from Indigenous, Postcolonial, Transnational Literatures
3. 1.0 ENG credit from Pre-1800 British Literature
4. 0.5 ENG/ JEI/ JWE credit from Theory, Language, Critical Methods
5. ENG286H1 or ENG287H1. If not, one 0.5 credit in any BR=5 course

Indigenous, Postcolonial, Transnational Literatures:
ENG253H1, ENG254H1, ENG269H1, ENG270H1,
ENG355H1/ ENG355Y1, (ENG358H1 and ENG359H1)/
ENG356Y1, ENG367H1, ENG368H1, ENG369H1,
ENG370H1/ ENG370Y1, ENG371H1, ENG372H1

Pre-1800 British Literature:
ENG220H1, ENG240Y1, ENG300H1/ ENG300Y1, (ENG301H1 and ENG302H1)/ ENG302Y1, ENG303H1,
ENG305H1, (ENG306H1 and ENG307H1)/ ENG306Y1, (ENG308H1 and ENG309H1)/ ENG308Y1, ENG311H1, (ENG320H1 and ENG321H1)/ ENG320Y1, ENG322H1/ ENG322Y1, ENG323H1, ENG330H1, ENG331H1,
ENG335H1, ENG337H1, ENG373H1, ENG374H1

Theory, Language, Critical Methods:
ENG201H1/ ENG201Y1, ENG205H1, JEI206H1/ JWE206H1, ENG280H1, ENG281H1, ENG285H1,
ENG376H1, ENG377H1, ENG382H1/ ENG382Y1,
ENG384H1/ ENG384Y1, ENG385H1

Note:

- ENG387H1, ENG388H1, ENG389H1, ENG394H1, ENG497H1, and ENG498H1 may not be counted toward fulfilling the requirements of this program.

English Minor (Arts Program) - ASMIN1645

Enrolment Requirements:

This is an open enrolment program. A student who has completed 4.0 credits may enrol in the program.

Completion Requirements:

4.0 ENG credits, including 1.0 credit from 300+level ENG courses.

Only 1.0 credit from 100-level ENG courses may be counted. We do not accept ENG100H1, ENG102H1, or any CR/NCR courses toward our programs.

Note:

- ENG387H1, ENG388H1, ENG389H1, ENG394H1, ENG497H1, and ENG498H1 may not be counted toward fulfilling the requirements of this program.

Minor in Creative Writing (Arts Program) - ASMIN1646

The Minor in Creative Writing allows students to exercise their creativity and to improve as writers through the practice-based and reflective study of genres, strategies, and techniques. The program includes lecture courses on forms including short fiction, poetry, and creative nonfiction; form-specific workshops focused on the discussion of students' work; opportunities to write in longer forms such as the novella and the poetry collection; and seminars on subjects such as the publishing industry and literary culture. Through these courses, students will develop their writing and editorial skills while gaining a better understanding of literary craft and of writing beyond the university.

Enrolment Requirements:

This is a limited enrolment program. Students must have completed 4.0 credits and meet the requirements listed below to enrol.

Variable Minimum Grade Average

A minimum grade average in required courses is needed for entry, and this minimum changes each year depending on available spaces and the number of applicants. The following courses must be completed:

For students who have completed 4.0 to 8.5 credits:

- ENG110Y1, ENG140Y1, or ENG150Y1 with a final grade of at least 77%

For students who have completed 9.0 or more credits:

- 2.0 credits in 200-level ENG courses, each with a final grade of at least 77%

Completion Requirements:

(4.0 credits as follows, including at least 1.5 credits at the 300 level or above)

1. 1.5 credits from: ENG110Y1, ENG140Y1, ENG150Y1, ENG201H1, ENG201Y1, ENG205H1, ENG210H1, ENG213H1, ENG215H1, ENG234H1, ENG235H1, ENG237H1, ENG239H1, ENG285H1, ENG287H1
2. ENG289H1

3. 2.0 credits from the following: ENG387H1, CRE279H1, ENG388H1, CRE280H1, ENG389H1, CRE275H1, WRR311H1, WRR311Y1, ENG394H1, ENG497H1, ENG498H1; approved courses offered by other departments and programs (see list of Cognate Courses below).

Accepted Cognate Courses:

- Writing and Rhetoric: WRR211H1, WRR311Y1
- Drama, Theatre and Performance Studies: DRM228H1, DRM328H1, DRM428H1
- Creative Expression and Society: CRE275H1, CRE276H1, CRE279H1, CRE280H1, CRE282H1, CRE350Y1, CRE479H1, CRE479Y1, CRE480H1

Notes:

- We do not accept any CR/NCR courses toward our program.
- 200-level English courses in the program are open to students who have obtained standing in 1.0 ENG credit or in any 4.0 credits. Students without these prerequisites may enrol in a 200-level course if they are concurrently enrolled in ENG110Y1, ENG140Y1, or ENG150Y1.
- ENG387H1, ENG388H1, ENG389H1, and ENG394H1 are open to students who have obtained standing in ENG289H1 and any further 3.5 credits.
- ENG497H1 and ENG498H1 are open to students who have obtained standing in 9.0 credits, including ENG289H1 and any additional 1.5 ENG credits.
- Please note that prerequisites and exclusions will be strictly enforced.

Regarding English Courses

Please note that not all courses are offered every year.

Only ONE of ENG110Y1, ENG140Y1, or ENG150Y1 may be counted toward English program requirements. ENG100H1 and ENG102H1 may not be used to meet the requirements of any English program. First-year students may enrol in a 200-level ENG course if they are concurrently enrolled in ENG110Y1, ENG140Y1, or ENG150Y1. English 200-level courses are open to students who have obtained standing in 1.0 ENG credit or in any 4.0 credits. Students without these prerequisites may enrol in a 200-level course if they are concurrently enrolled in ENG110Y1, ENG140Y1, or ENG150Y1. English 300-level courses are open to students who have obtained standing in 4.0 credits, including 2.0 ENG credits. English 400-level courses are open to students who have obtained 4.0 ENG credits (including ENG202H1, ENG203H1, ENG250H1, ENG252H1); and

any 9.0 credits (though exemptions may be made for students registered in our pre-2018 programs). Students who require a 400-level course to satisfy their program requirements have enrolment priority in the first round of course enrolment. Individual topics to be specified by instructors. Seminars are designed to provide students with the opportunity to practice their skills of research and interpretation at a particularly advanced level. These courses are not eligible for the CR/NCR option. Prerequisites and exclusions will be strictly enforced.

Combined Degree Program (CDP) offered with Victoria College and Ontario Institute for Studies in Education (OISE)

- Combined Degree Program in HBA/HBSc and Master of Teaching (MT)

Students enrolled in the Minor in Education and Society and Major in English may apply for this Combined Degree Program. For details about application and program requirements, see the [Combined Degree Programs section](#).

English Courses

ENG100H1 - Effective Writing

Hours: 36L

Practical tools for writing in university and beyond. Students will gain experience in generating ideas, clarifying insights, structuring arguments, composing paragraphs and sentences, critiquing and revising their writing, and communicating effectively to diverse audiences. This course may not be counted toward any English program.

Breadth Requirements: Creative and Cultural Representations (1)

ENG102H1 - Literature and the Sciences

Hours: 36L

Literature has always provided a place for the imaginative exploration of science, technology, and the physical universe. For students interested in literary treatments of science and scientific problems, concerns, and methods. Assumes no background in the methods and techniques of literary scholarship. This course may not be counted toward any English program.

Breadth Requirements: Creative and Cultural Representations (1)

ENG110Y1 - Narrative

Hours: 48L/24T

This course explores the stories that are all around us and that shape our world: traditional literary narratives such as ballads, romances, and novels, and also non-literary forms of narrative, such as journalism, movies, myths, jokes, legal judgments, travel writing, histories, songs, diaries, biographies.

Breadth Requirements: Creative and Cultural Representations (1)

ENG140Y1 - Literature for our Time

Hours: 48L/24T

An exploration of how recent literature in English responds to our world. Includes poetry, prose, and drama by major writers of the twentieth century and emerging writers of the current century.

Breadth Requirements: Creative and Cultural Representations (1)

ENG150Y1 - Literary Traditions

Hours: 48L/24T

An introduction to major authors, ideas, and texts that shaped and continue to inform the ever-evolving traditions of literature in English. Includes works and authors from antiquity to the nineteenth century such as the Bible, the Qur'an, Plato, Homer, Sappho, Virgil, Dante, Christine de Pizan, Shakespeare, Cervantes, Montaigne, Austen, Dostoevski.

Breadth Requirements: Creative and Cultural Representations (1)

ENG196H1 - Cook the Books

Hours: 36S

If, as Brillat-Savarin so famously said, “you are what you eat”, then what are we? What do our eating choices reveal about us and what we value? In this class, we will examine stories about farming, cooking, and eating in order to understand how culture shapes culinary traditions and vice versa. But we don’t stop there: through cooking and eating together, we will create new stories about our food and our relationship to the earth that sustains us. Co-taught with a professional chef, this course combines literary and historical analysis with hands-on cooking classes, shared meals, and food-oriented field trips. Restricted to first-year students. Not eligible for CR/NCR option. An additional fee to cover food and field trip costs is required.

Exclusion: [ENG197H1](#), [ENG198H1](#), [ENG199H1](#)
Breadth Requirements: Creative and Cultural Representations (1)

ENG197H1 - Time Travel and Narrative

Hours: 24S

From H.G. Wells to *Star Trek* to *Bill and Ted’s Excellent Adventure*, tales of time travelers remain captivating. What does our fascination with time travel tell us about storytelling and narrative? This course will explore the questions that time travel raises about narrative as well as history, temporality, subjectivity, and agency. We will look at examples of time travel in film, television, and books as well as philosophical and scientific writing about it. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: [ENG196H1](#), [ENG198H1](#), [ENG199H1](#)
Breadth Requirements: Creative and Cultural Representations (1)

ENG198H1 - Representing Disability

Hours: 24S

Understanding disability as a cultural concept—not a medical condition or personal misfortune—that describes how human variation matters in the world, this course asks: how do literary texts represent physical and intellectual disability? Reading drama, fiction, and poetry, we will consider how disability prompts new strategies of writing and thinking, in order to consider what new forms of representation disability can produce, and what the concept of disability can teach us about being human. We will consider literary, visual, performative, and performance-based possibilities for bodies and minds that

resist normative structures, theorize ideas of access, cure, and care, and claim disability as enlivening identity. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: [ENG196H1](#), [ENG197H1](#), [ENG199H1](#)
Breadth Requirements: Creative and Cultural Representations (1)

ENG199H1 - Tree Stories

Hours: 24S

Trees are all around us. We climb them, tell stories about them, write on paper, at desks, in homes made from them. But most people tend to take them for granted. This course considers how we imagine trees in works of art and legend and what trees can teach us about our own place in the world. We will read stories and poems as well as exploring the trees around campus and the environment we share. Restricted to first-year students. Not eligible for CR/NCR option.

Exclusion: [ENG196H1](#), [ENG197H1](#), [ENG198H1](#)
Breadth Requirements: Creative and Cultural Representations (1)

ENG201H1 - Reading Poetry

Previous Course Number: ENG201Y1
Hours: 36L

An introduction to poetry through a close reading of texts, focusing on its traditional forms, themes, techniques, and uses of language; its historical and geographical range; and its contemporary diversity.

Prerequisite: 1.0 ENG credit or any 4.0 credits
Exclusion: [ENG201Y1](#)
Breadth Requirements: Creative and Cultural Representations (1)

ENG202H1 - Introduction to British Literature I

Previous Course Number: ENG202Y1
Hours: 36L

An introduction to British literature, exploring works in poetry, prose, and drama from the medieval period to the end of the seventeenth century.

Prerequisite: 1.0 ENG credit or any 4.0 credits
Exclusion: [ENG202Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

ENG203H1 - Introduction to British Literature II

Previous Course Number: ENG202Y1

Hours: 36L

An introduction to British literature, exploring works in poetry, prose, and drama from the end of the seventeenth century into the twentieth century.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Exclusion: ENG202Y1

Breadth Requirements: Creative and Cultural Representations (1)

JWE206H1 - Writing English Essays

Previous Course Number: JEI206H1

Hours: 24L/12T

This course teaches students who already write effectively how to write clear, compelling, research-informed English essays. The course aims to help students recognize the function of grammar and rhetoric, the importance of audience, and the persuasive role of style.

Prerequisite: Completion of 1.0 ENG credit or any 4.0 credits

Exclusion: JEI206H1

Breadth Requirements: Creative and Cultural Representations (1)

ENG210H1 - Introduction to the Novel

Previous Course Number: ENG210Y1

Hours: 36L

An introduction to the novel as literary genre through a reading of five or six key novels from a range of periods and regions.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Exclusion: ENG210Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG213H1 - The Short Story

Hours: 36L

This course explores shorter works of nineteenth- and twentieth-century writers. Special attention is paid to formal and rhetorical concepts for the study of fiction as well as to issues such as narrative voice, allegory, irony, and the representation of temporality.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG215H1 - The Canadian Short Story

Hours: 36L

An introduction to the Canadian short story, this course emphasizes its rich variety of settings, subjects, and styles.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG220H1 - Introduction to Shakespeare

Previous Course Number: ENG220Y1

Hours: 36L

An introduction to Shakespeare's work through five or six representative plays. Readings may include non-dramatic poetry as well as plays.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Exclusion: ENG220Y1, ENG320Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG234H1 - Children's Literature

Hours: 36L

A critical and historical study of poetry and fiction written for or appropriated by children, this course may also include drama or non-fiction and will cover works by at least twelve authors such as Bunyan, Stevenson, Carroll, Twain, Alcott, Nesbit, Montgomery, Milne, Norton, Fitzhugh.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG235H1 - The Graphic Novel

Hours: 36L

An introduction to book-length sequential art, this course includes fictional and nonfictional comics, with a focus on formal properties such as narrative layout and text/art hybridity. Themes vary but may include superheroes; auto/biography; the figure of the outsider; women in comics; alienation and youth; and war reporting.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG237H1 - Science Fiction

Hours: 36L

This course explores speculative fiction that invents or extrapolates an inner or outer cosmology from the physical, life, social, and human sciences. Typical subjects include AI, alternative histories, cyberpunk, evolution, future and dying worlds, genetics, space/time travel, strange species, theories of everything, utopias, and dystopias.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG239H1 - Fantasy and Horror

Hours: 36L

This course explores speculative fiction of the fantastic, the magical, the supernatural, and the horrific. Subgenres may include alternative histories, animal fantasy, epic fantasy, the Gothic, fairy tales, magic realism, sword and sorcery, and vampire fiction.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG240Y1 - Old English Language and Literature

Hours: 72L

Prepares students to read the oldest English literary forms in the original language. Introduces the earliest English poetry in a woman's voice, expressions of desire, religious fervour, and the agonies of war. Texts, written 680 - 1100,

range from the epic of *Beowulf* the dragon-slayer to ribald riddles.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG250H1 - Introduction to American Literature

Previous Course Number: ENG250Y1

Hours: 36L

An introduction to American literature, exploring works in a variety of genres, including poetry, fiction, essays, and slave narratives.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Exclusion: ENG250Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG252H1 - Introduction to Canadian Literature

Previous Course Number: ENG252Y1

Hours: 36L

An introduction to Canadian literature, exploring works in poetry, prose, and drama from early to recent times.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Exclusion: ENG252Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG253H1 - Caribbean Literature

Hours: 36L

An introduction to Caribbean poetry, prose, and drama in English or translation.

Prerequisite: English 200-level courses are open to students who have obtained standing in 1.0 ENG credit or in any 4.0 credits. Students without these prerequisites may enrol in a 200-level course if they are concurrently enrolled in ENG110Y1, ENG140Y1 or ENG150Y1.

Breadth Requirements: Creative and Cultural Representations (1)

ENG254H1 - Introduction to Indigenous Literatures

Previous Course Number: ENG254Y1

Hours: 36L

An introduction to Indigenous writings in English, with significant attention to Indigenous literatures in Canada. The writings are placed within the context of Indigenous cultural and political continuity, linguistic and territorial diversity, and living oral traditions. The primary focus may be on contemporary Indigenous writing.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Exclusion: ENG254Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG269H1 - English Literature and Chinese Translation

Hours: 36L

This course studies how works of English literature have been translated and presented in modern Chinese culture. It requires no background in translation or literary studies. Through exercises and workshops, students will be exposed to works by British, American, and Canadian authors. Students will engage with issues in translation studies and learn practical skills of translation from English to Chinese. Class will be taught primarily in English, supplemented by Mandarin. Assignments to be completed in English. Reading knowledge of Mandarin is required.

Prerequisite: 1.0 ENG credit or any 4.0 credits, reading knowledge of Mandarin

Breadth Requirements: Thought, Belief and Behaviour (2)

ENG270H1 - Introduction to Colonial and Postcolonial Writing

Previous Course Number: ENG270Y1

Hours: 36L

In this course, we examine the colonial archive for its representations of race, indigeneity, sexuality, and capital accumulation. We familiarize ourselves with the aesthetic and political modes of resisting colonial power around the world. Besides literary texts, our objects of study may include photographs, film, and digital media.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Exclusion: ENG270Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG273H1 - Queer Writing

Previous Course Number: ENG273Y1

Hours: 36L

Introducing a lesbian, gay, bisexual, trans, and queer tradition in literature and theory, this course explores classical, modern, postmodern, and contemporary literature, criticism, art, film, music, and popular culture.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Exclusion: ENG273Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG280H1 - Critical Approaches to Literature

Hours: 36L

An introduction to the theory and practice of literary criticism. Focusing on a single text or small group of texts, students will gain experience with close reading and analysis, critical theory, research methods, and the conventions and skills particular to literary-critical writing.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG281H1 - Writing About Literature

Hours: 24L/12T

An introduction to the skills and contexts that underlie university-level writing about literature. Students will analyze the style and mechanics of literary criticism in a variety of fields, including published essays by Department faculty. Guest speakers and writing-intensive tutorials will help students begin to join the critical conversation.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG285H1 - The English Language in the World

Hours: 36L

This introductory course surveys transnational, regional, and social varieties of Later Modern English; the linguistic and social factors that have shaped them; their characteristic structures; and their uses in speech and in writing, both literary and non-literary.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Breadth Requirements: Thought, Belief and Behaviour (2)

ENG286H1 - Literature and Data

Hours: 24L/12T

Geared toward the interests and aptitudes of humanities students, this course provides an accessible introduction to computer programming, statistics, and data science, and equips students with the practical and theoretical skills to engage critically with literary data and computation. What new insights about literary form, history, or culture might we glean from a spreadsheet of bestsellers, a database of fan fiction, or an archive containing more novels than any individual could ever read? What gaps exist in literary datasets, and what biases are enshrined in code? No programming or statistical experience required or expected.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Exclusion: CSC111H1, CSC148H1, STA130H1, STA238H1, STA248H1, STA261H1, GGR274H1, EEB125H1

Breadth Requirements: The Physical and Mathematical Universes (5)

ENG287H1 - The Digital Text

Hours: 24L/12T

This course explores the stakes and consequences of literature's transition from printed to digital forms. How do digital and printed texts differ materially, and how does this affect literary form, authorship, consumption, reception — and society more broadly? What new expressive possibilities are present in “born digital” forms like webcomics, fan fiction, interactive fiction, and videogames? How do social media and online reading communities impact the way that literature is marketed and discussed? Will electronic archives make literature more accessible, or less? How do digital texts challenge existing definitions of what counts as “literature”?

Prerequisite: 1.0 ENG credit or any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG289H1 - Introduction to Creative Writing

Hours: 36L

An introduction to creative writing, especially poetry and short fiction, attending to conventions of literary forms and genres, as well as to writing strategies, techniques, and terminology.

Prerequisite: 1.0 ENG credit or any 4.0 credits

Exclusion: ENG389Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG296Y0 - Topics in English Literature

Content varies with Instructor. Offered by the Summer Abroad program, usually in Oxford, England.

Prerequisite: 1.0 ENG credit or any 4.0 credits

ENG297Y0 - Topics in English Literature

Content varies with Instructor. Offered by the Summer Abroad program, usually in Siena, Italy.

Prerequisite: 1.0 ENG credit or any 4.0 credits

ENG299H1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

ENG299Y1 - Research Opportunity Program

Credit course for supervised participation in faculty research project. Details at <https://www.artsci.utoronto.ca/current/academics/research-opportunities/research-opportunities-program>. Not eligible for CR/NCR option.

ENG300H1 - Chaucer

Previous Course Number: ENG300Y1

Hours: 36L

An in-depth study of Chaucer's works, including *The Canterbury Tales* and some of his shorter works.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG300Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG301H1 - Sixteenth-Century Literature

Previous Course Number: ENG302Y1

Hours: 36L

An overview of some of the major works in English, especially in poetry and prose, written mostly before 1600.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG302Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG302H1 - Seventeenth-Century Literature

Previous Course Number: ENG302Y1

Hours: 36L

An overview of some of the major works in English, especially in poetry and prose, written mostly after 1600.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG302Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG303H1 - Milton

Hours: 36L

Selections from *Paradise Lost* and other works.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG305H1 - Swift, Pope, and Their Contemporaries

Hours: 36L

Selected works in prose and verse by Swift and Pope studied alongside works by their contemporaries. Topics may include the legitimacy of satire, the role of criticism, and the growing importance of writing by women.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG306H1 - Restoration and Early-Eighteenth Century Literature

Previous Course Number: ENG306Y1

Hours: 36L

This course explores the literatures produced across roughly two generations following the Restoration of the Stuart monarchy in 1660, during which time literary patronage gradually gave way to an early print capitalism. What emerged from that context was an exciting period defined by great satires, often obscene imagery, experimental prose, and novel media. This course examines the era's formal innovations while touching on a number of themes that remain pressing to this day, including questions of politics, religion, and power, the tension between classical tradition and scientific discovery, shifting categories of identity such as race, class, and gender, and censorship and the role of the arts in the public sphere. Authors studied may include Behn, Bunyan, Rochester, Dryden, Defoe, Haywood, Montagu, Pope, and Swift.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG306Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG307H1 - Eighteenth-Century Literature

Previous Course Number: ENG306Y1

Hours: 36L

This course explores the literatures produced between the heyday of English neoclassicism in the early part of the eighteenth century and the eruption of Romanticism towards the century's end. The period between those two moments was marked by a refinement of Georgian taste, by the controversies and advances of Enlightenment, by the flamboyant performance of sentimentality, and ultimately, by a protracted series of global conflicts and

revolutions. This course traces these themes and others alongside a careful study of the formal innovations of the period, its shifting rhetorics, and central aesthetic debates. Authors studied may include Pope, Swift, Gray, Johnson, Sterne, Equiano, Barbauld, Cowper, Wollstonecraft, and Blake.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: [ENG306Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

ENG308H1 - Romantic Literature to 1812

Previous Course Number: ENG308Y1

Hours: 36L

This course introduces students to the earlier years of Romantic poetry and prose. Romanticism (roughly 1780-1832) was a time of intense intellectual, cultural, political and social activity. We will explore some of its many forms and themes, including such topics as the nature of self, human rights, nationalism, political revolution, the role of imagination, nature, poetic form, class, slavery, and abolition. Texts will include selections from authors such as William Wordsworth, Charlotte Smith, S.T. Coleridge, William Blake, Edmund Burke, Thomas Paine, Anna Barbauld, Mary Robinson, Olaudah Equiano, Ann Radcliffe.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: [ENG308Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

ENG309H1 - Romantic Literature after 1812

Previous Course Number: ENG308Y1

Hours: 36L

This course introduces students to the later years of Romantic poetry and prose. Romanticism (roughly 1780-1832) was a time of intense intellectual, cultural, political and social activity. We will explore some of its many forms and themes, including such topics as the nature of self, human rights, nationalism, political revolution, the role of imagination, nature, poetic form, class, slavery, and abolition. Texts will include selections from authors such as Percy Shelley, Mary Shelley, John Keats, Felicia Hemans, John Clare, Thomas De Quincey, Jane Austen, Mary Prince, Lord Byron, Letitia Landon.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: [ENG308Y1](#)

Breadth Requirements: Creative and Cultural Representations (1)

ENG311H1 - Medieval Literature

Hours: 36L

This course explores a selection of writings in early English, excluding those by Chaucer.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG320H1 - Shakespeare I: Early Plays and Poems

Previous Course Number: ENG320Y1

Hours: 36L

An in-depth study of selected plays and poems to 1600, this course equips students to explore Shakespeare's works in relation to genre, language, structure, and performance. The course considers how the early works engage with Elizabethan social, political, and cultural contexts, and introduces some current developments in Shakespeare studies. [ENG321H1](#) is a recommended complement to [ENG320H1](#).

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: [ENG320Y1](#)

Recommended Preparation: [ENG321H1](#) is a recommended complement to [ENG320H1](#).

Breadth Requirements: Creative and Cultural Representations (1)

ENG321H1 - Shakespeare II: Later Plays and Poems

Previous Course Number: ENG320Y1

Hours: 36L

An in-depth study of selected plays and poems after 1600, this course equips students to explore Shakespeare's works in relation to genre, language, structure, and performance. The course considers how the later works engage with Jacobean social, political, and cultural contexts, and introduces some current developments in Shakespeare studies. [ENG320H1](#) is a recommended complement to [ENG321H1](#).

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: [ENG320Y1](#)

Recommended Preparation: [ENG320H1](#) is a recommended complement to [ENG321H1](#).

Breadth Requirements: Creative and Cultural Representations (1)

ENG322H1 - The Rise of the Novel

Previous Course Number: ENG322Y1

Hours: 36L

This course traces the emergence of the modern novel between the late seventeenth and early nineteenth centuries, with special attention to innovations and experiments in narrative form, the mingling of genres in the early novel, and the wide thematic range of the period's fiction. The focus is both technical and thematic: on the formally self-conscious quality of much eighteenth-century narrative, and on novelists' use of the genre to address a broad range of issues such as selfhood and subjective experience; local and national identities; race, gender, ethnicity, and class relations; urban experience and social change; sympathy and community; politics and empire. Authors studied may include Behn, Defoe, Haywood, Richardson, Fielding, Sterne, Smollett, Austen; some attention may also be paid to related genres (e.g. journalism, autobiography, diaries, letters) that influenced, and were influenced by, the themes and conventions of the emergent novel.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG322Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG323H1 - Austen and Her Contemporaries

Hours: 36L

A study of selected novels of Jane Austen and of works by such contemporaries as Radcliffe, Godwin, Wollstonecraft, Wordsworth, Edgeworth, Scott, and Shelley, in the context of the complex literary, social, and political relationships of that time.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Breadth Requirements: Creative and Cultural Representations (1)

ENG324H1 - Early Victorian Novels

Previous Course Number: ENG324Y1

Hours: 36L

British novels from the middle of the nineteenth century still speak to us—in part because so many of their concerns remain our concerns: questions of gender and

sexuality, social class, and race and colonialism, among many others. In this course, we will read fiction that addresses those questions and, in the process, reshapes the very form of the novel. Reading fiction by authors such as Dickens, Brontë, and Gaskell, we will consider issues of class, identity, and self-making as they arise in first-person narratives, the industrial novel, and the beginnings of sensation fiction. This course concentrates on the novel as it developed over roughly the first half of the Victorian era and is envisioned as a complement to (though independent of) ENG325H1 Late Victorian Novels.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG324Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG325H1 - Late Victorian Novels

Previous Course Number: ENG324Y1

Hours: 36L

A time of social, political, and literary tumult, the late Victorian era witnessed the publication of novels that would come to be iconic. Discussions will highlight issues such as changing ideas of class, gender, and identity; the role of imperialism in Victorian culture; and the origins of detective fiction. We will also think through the relation between literary form and historical change, analysing how specific styles and genres emerged to treat specific political questions, such as empire, and scientific discoveries, such as evolution. This course is envisioned as a complement to (though independent of) ENG324H1 Early Victorian Novels.

Prerequisite: 2.0 ENG credits and any 4.0 credits

Exclusion: ENG324Y1

Breadth Requirements: Creative and Cultural Representations (1)

ENG328H1 - Modern Fiction

Previous Course Number: ENG328Y1

Hours: 36L
